The Desert Renewable Energy Conservation Plan – Federal, State, and local land managers are developing the Desert Renewable Energy Conservation Plan, a major component of California's renewable energy plan, to provide for renewable energy development and conservation of desert ecosystems. This planning effort incorporates information about the potential distribution of habitat of selected endangered species to guide conservation efforts and site solar energy development. For example, a new desert tortoise habitat model is targeted for publication in May 2014, and is expected to help forecast desert tortoise habitat as it might exist in 30 and 80 years. The model will produce information to guide adaptive management based on the Desert Renewable Energy Conservation Plan and will inform BLM and FWS decisions.

National Park Service Call to Action – The NPS will manage its natural and cultural resources to increase resilience in the face of climate change and other stressors and collaborate with other land managers and partners to create, restore, and maintain landscape-scale connectivity. These efforts are guided by *A Call to Action*, the NPS vision for its second century. One goal of this strategy is to expand the NPS Migration Conservation Initiative to create a service-wide structure for conserving migratory species. Landscape-scale conservation of migratory wildlife requires the collaboration of national and international agencies and organizations to develop new and innovative technologies to identify key migration routes, and to design and implement scientifically valid monitoring and research projects to conserve migratory species habitat.

Implementing the Western Solar Energy Plan – Landscape level planning that guides siting and permitting decisions increases certainty for project developers, their investors, and utilities. At the same time, planning on a landscape-scale improves efforts to avoid, reduce, and mitigate resource risks and thereby serves as a better process to ensure conservation success. These efforts allow Interior and its bureaus to avoid litigation and streamline permitting.

The Solar Environmental Impact Statement Record of Decision signed in October 2012, which aimed to identify solar energy zones to facilitate future utility scale solar energy development while reducing other resource conflicts, reflects the principle of pursuing resource conservation and mitigation at the landscape level. This document required the development of mitigation plans for each solar energy zone.

The Mitigation Strategy for the Dry Lake SEZ is the first mitigation plan that was completed by BLM under the solar EIS. Under this plan, solar companies that build power plants at the Dry Lake SEZ, which is 15 miles northeast of Las Vegas, would agree to pay a mitigation fee to compensate for degraded habitat. The fee would be used to restore lands of similar character at the Gold Butte Area of Critical Environmental Concern, a desert area impacted several years ago by wildfires that charred native plants, fragmented critical tortoise habitat, and created a foothold for noxious weeds. The BLM would plant native creosote-bursage vegetation on burn scars and abandoned roads, beat back noxious weeds, mitigate future wildfires, and bolster ranger patrols. The project has been developed in concert with conservation and sportsmen's groups, the solar industry, and Las Vegas-area officials. The regional mitigation plan could offer more certainty for developers while yielding better conservation.

Burn scars from 2005 are still visible at Gold Butte. Mitigation fees from solar development would help BLM restore native vegetation.

U.S. Department of the Interior News Briefing for Monday, February 24, 2014

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

OBAMA'S NEXT ANNUAL BUDGET REQUEST TO CONGRESS TO INCLUDE SHIFT IN WILDFIRE FUNDING.

According to the New York Times (2/23, Davenport, Subscription Publication, 9.61M), Administration officials

said, "President Obama's annual budget request to Congress will propose a significant change in how the government pays to fight wildfires," which is "a move that they say reflects the ways in which climate change is increasing the risk for and cost of those fires." According to the Times, officials said that the proposal will include asking "Congress to pay the costs of fighting extreme wildfires in the same way it finances the Federal response to disasters like hurricanes and tornadoes." The Times reports that, "on Monday, Mr. Obama plans to describe his proposal at a meeting in Washington with governors of Western states that have been ravaged recently by severe drought and wildfires."

Also reporting on the story is the [Salt Lake \(UT\) Tribune](#) (2/23, 343K).

Meanwhile, the [Twin Falls \(ID\) Times-News](#) (2/23, 56K) urges lawmakers to pass the Wildfire Disaster Funding Act.

GAO REPORT POINTS TO PAY GAP FACING INTERIOR'S OIL, GAS PROGRAMS. [Politico](#) (2/22, Guillen, 464K) reports that the Interior Department is "facing major hurdles in hiring and retaining oil and gas oversight staff, like petroleum engineers and geologists, because of a slow hiring process and lower pay compared to the industry," according to the Government Accountability Office. The GAO says that "Interior is not doing everything it can to bridge the public-private salary gap." The report stated, "We recognize that the use of these incentives comes at a cost to other programmatic efforts. However, in the event that Interior applies for special salary rates for key oil and gas positions in the future... demonstrating that it has fully utilized its existing authorities can help support its request for such salary rates." The GAO recommends Interior "explore the bureau's expanded use of recruitment, relocation, retention, and other incentives and systematically collect and analyze hiring data."

Also commenting is John Kemp for [Reuters](#) (2/21). Paying higher salaries is not a panacea. Skill shortages are plaguing both the public and private sectors as soaring oil and gas production has outstripped the number of experienced petroleum engineers and geologists. But unless federal salaries become competitive, regulatory agencies will continue to suffer staffing problems, and the backlog of drilling applications and inspections will act as a bottleneck to the expansion of oil and gas production.

NORTH DAKOTA GOV. DALRYMPLE MEETS WITH CABINET MEMBERS. [KMOT-TV](#) Minot, ND (2/24) reports that North Dakota Gov. Jack Dalrymple met with members of President Obama's cabinet "to discuss issues that are important to North Dakota." Dalrymple urged Interior Secretary Sally Jewell to "recognize North Dakota's rights to the natural flows of the Missouri River and abandon any plans proposed by the U.S. Army Core of Engineers to restrict or charge a fee for access to the river." In addition, "tribal court and law enforcement issues were also addressed...including the need for stable tribal courts and the need to improve the sharing of information between tribal law enforcement, and local and state law enforcement agencies."

Also reporting on the story is [KFYR-TV](#) Bismarck, ND (2/24, 1K).

AUDIT FIND NUMEROUS FEDERAL LAWS BROKEN BY UDALL FOUNDATION. The [Arizona Daily Star](#) (2/23, 335K) reports that "more details are available about wasteful spending and financial management problems at the Tucson-based Udall Foundation," according to an audit report. Documents from Interior Department's Office of the Inspector General show that auditors discovered "numerous violations of federal laws and rules from 2006 through 2012 — some of which they believed could be criminal."

VIRGIN ISLANDS TO RECEIVE \$60.5 MILLION ADVANCE OF RUM COVER-OVER TAX REVENUES. The [Virgin Islands Daily News](#) (2/23, 49K) reports that "federal officials have reconsidered a decision about the territory's advance on rum excise tax revenues and are planning to release additional funding soon that could help the territory bridge an anticipated budget shortfall for Fiscal Year 2014." The funds that the Interior Department's Office of Insular Affairs has "decided to release, though, will only partially address the territory's projected \$70.5 million Fiscal Year 2014 budget gap, likely amounting to less than half of what is needed to close the shortfall." According to a spokeswoman for the Interior Department, Insular Affairs has approved a \$60,841,505 payment.

REP. BISHOP PRAISES LEGISLATURE ON PUBLIC LANDS STANCE. The [Salt Lake \(UT\) Tribune](#) (2/23, 343K) reports that Rep. Rob Bishop "told the Utah Legislature Friday he hopes to be named as chairman of the US House Committee on Natural Resources to help protect Utah's lands for the next session of Congress." He also "commended lawmakers for a strong stance on public lands in recent years and criticized the federal

government for its lands policy." Bishop said, "You've shown not only that the state of Utah cares about public lands, but the state of Utah has the ability to use those lands and protect those lands better than the federal government can do."

US, CANADA, AND MEXICO TO COLLABORATE ON CLIMATE ACTION. Bloomberg News (2/22, Adragna, 1.91M) reported that President Obama said that the US, Canada, and Mexico will "work together to adopt and meet new fuel efficiency standards for heavy-duty trucks" and reduce greenhouse gas emissions, and called for "immediate action" to help mitigate the devastating impact climate change will have on the economy and environment.

Environmentalists Vow To Emphasize Climate Change In Midterm Elections. The Washington Post (2/24, Eilperin, 4.28M) reported wealthy environmentalists have vowed to emphasize climate change in the midterm elections and threatened to withhold money from candidates supporting the Keystone XL oil pipeline, but adds that "the Democratic Party's relationship with the environmental movement remains...tom between fervent believers and centrists reluctant to go against traditional energy industry interests that play a major role in their state's economies." Republicans say that climate change is a losing issue for Democrats, "who will be seen as siding with environmental extremists."

ADDITIONAL COVERAGE: INTERIOR APPROVES TWO SOLAR PROJECTS. Additional coverage of the Interior Department's approval of two large-scale solar power projects in California and Nevada was provided by the [Palm Springs \(CA\) Desert Sun](#) (2/23, 110K).

HECHO DIRECTOR: LATINOS SUPPORT OUTDOOR RECREATION. In an op-ed for the [Albuquerque \(NM\) Journal](#) (2/23, 288K), Rod Torrez, Director, HECHO (Hispanics Enjoying Camping, Hiking, and Outdoors), notes that "43 percent of us (and more than half of all male Latinos) consider ourselves a hunter, angler or both, and enjoy public lands and outdoor recreation." In fact, according to Colorado College's bipartisan Conservation in the West "Latinos are more likely than other ethnic groups to vote for candidates who favor conservation and to vote against those who don't." He concludes that most Latinos "will vote to protect" the outdoors.

America's Great Outdoors:

National Park Service:

CONSEQUENCES OF INVESTIGATION ON BROWN FOUNDATION REMAINS UNCERTAIN. The [Topeka \(KS\) Capital-Journal](#) (2/22, 194K) reports that "the consequences the Brown Foundation of Education Equity, Excellence and Research may face as a result of a federal investigation that found financial irregularities and 'unallowable, unreasonable and unsupported' spending by the foundation remains uncertain." The US Attorney's Office for the District of Kansas has "declined to prosecute the case, but an administrative referral is being made to the National Park Service for appropriate action." David Smith, superintendent at the Brown v. Board of Education National Historic Site, said, "The National Park Service is still reviewing potential administrative actions."

The [Topeka \(KS\) Capital-Journal](#) (2/22, 194K) editorializes that "the recent federal report findings questioning spending of the Brown Foundation for Educational Equity, Excellence and Research should not detract from the legacy of the landmark 1954 US Supreme Court case overturning school segregation, nor from the important work that has been done to share the case's story and significance." According to the editorial, "while it doesn't excuse any spending that might not meet the stipulations of the cooperative agreement, the park service has a duty to follow up with the required oversight." It adds that the NPS "also must address a climate that has employees viewing grantees such as the foundation as 'untouchable.'"

NPS DIRECTOR JARVIS TO SPEAK MARCH 4. The [My Eastern Shore MD](#) (2/23) reports that NPS Director Jonathan Jarvis will "visit Washington College on Thursday, March 4, to talk about the mission of the NPS and its role in shaping national identity." Jarvis' presentation, "History, Heritage and the National Parks: Promoting the Relevance of the American Narrative," will be followed by a reception.

SEN. SCHUMER PUSHES FOR JAMAICA BAY FUNDING. The [Forum \(NY\)](#) (2/21) reports that "saying the

government needs to do more to better protect Jamaica Bay and the Rockaway peninsula from future storms," Sen. Chuck Schumer "urged federal officials to support five separate projects totaling \$17.5 million that he said would prove crucial during future weather events like Superstorm Sandy." Schumer is asking the Interior Department to "funnel millions into projects that would make the bay a more effective buffer against future coastal storms, as well as making Rockaway's coastline more resilient, the lawmaker announced last week." The article notes that "the projects Schumer is supporting include the Sunset Cove salt marsh and maritime forest restoration, Rockaway East resiliency preserve, Spring Creek salt marsh and coastal upland restoration, Jamaica Bay head of bay oyster restoration, and Jamaica Bay bathymetric and sediment model."

NPS, DCTO DISCUSS FUTURE OF CIRCULATOR BUS SERVICE. In its "Dr. Gridlock" blog, the Washington Post (2/21, Thomson, 4.28M) reports that "managers of the D.C. Circulator bus system will talk about potential new routes, including the one planned for the National Mall, and a possible fare increase at a forum Tuesday." According to the article, "topics for discussion at the forum include the location of stops for the Mall route," and "possibilities for further expanding the system also will be discussed, as will the question of whether it should maintain its schedule of service every 10 minutes on all routes or vary that to meet different demands on different routes."

NPS REVEALS PROPOSAL FOR NEW VISITOR CENTER AT THEODORE ROOSEVELT NATIONAL PARK. The AP (2/23, 417K) reports that the NPS has "unveiled its proposal for a new visitor center in the North Unit of Theodore Roosevelt National Park." According to Park Superintendent Valerie Naylor, the NPS is "moving as quickly as possible on the new project."

ZION NATIONAL PARK SEEKS TO ENSURE SUSTAINABLE POPULATION OF DESERT BIGHORN SHEEP. The Deseret (UT) News (2/24, 274K) reports that "what began as a dozen desert bighorn sheep reintroduced into Zion National Park in 1973 has now become the largest and possibly healthiest herd of bighorn sheep in Utah." On Feb. 14, Zion National Park "announced a proposal to partner with DWR in managing bighorn sheep in and outside the park to ensure a sustainable and healthy population."

WEATHER PREVENTS RANGERS FROM CHECKING WISCONSIN ICE CAVES. The AP (2/21, 417K) reports that NPS rangers have been "unable to check Lake Superior's ice to determine if it's safe for people to hike to the popular ice caves near the Apostle Islands." According to the NPS, "rangers were unable to go out Friday because of high winds and white-out conditions."

MONROE COUNTY COMMISSION CRITICIZES PROPOSED FISHING LIMITS IN BISCAYNE NATIONAL PARK. The Key West (FL) Keynoter (2/22, 34K) reports that the Monroe County Commission told Biscayne National Park's superintendent Wednesday to "shrink or move a proposed limited-fishing zone" in the park. Commissioners decided "to send a resolution to the National Park Service that states the county board's opposition to Alternative 6, apparently the preferred option for Biscayne National Park's updated management plan."

COLONIAL WILLIAMSBURG SHUTTLE TO BE SHUT DOWN. The AP (2/23, Press, 4.28M) reports that a free shuttle service that transported passengers from the Colonial Williamsburg Regional Visitor Center to Jamestown, Yorktown, Busch Gardens and Water Country will be discontinued. The Colonial Williamsburg Foundation "assumed the financial and operating responsibility for the bus service to Jamestown and Yorktown in 2012." However, "the foundation said this week that it's not feasible to continue the service in the future given its other priorities and financial pressures."

VOYAGEURS NATIONAL PARK RECEIVES \$150,000 GRANT. The AP (2/23, 2.88M) reports that the Voyageurs National Park Association has announced a three-year, \$150,000 grant for the park. The article notes that "the Landmark Grant kicks off three years of projects in celebration of Voyageurs and is meant to usher in the next 50 years." According to Voyageurs Superintendent Mike Ward, "the grant will help the park serve the public and protect its resources where its own budgets are lacking." The money will be "used to continue and jump start projects involving land preservation, site restoration, research, education, youth engagement and visitor services."

PUBLIC SUPPORT SOUGHT FOR NATIONAL PARK IN MAINE. The Portland (ME) Press Herald (2/23, 279K) reports that "the recently dubbed Katahdin Woods and Waters Recreation Area, the parkland owned and recently

opened to more user groups by Roxanne Quimby and her children, went on Facebook in the last month." Also, "in January, Elliottsville Plantation, the nonprofit agency that manages the land," launched its website, www.katahdinwoods.org. Elliottsville Plantation's new spokesman, Ian Grady said "the hope is to build use, to welcome a wide range of users and then take it from there – the end goal being the national park Quimby has wanted to build on the land for a decade."

KING: NATIONAL PARK SERVICE FLUBS MOVE OF NATIONAL ARCHIVES FOR BLACK WOMEN'S HISTORY. Colbert I. King writes in his *Washington Post* (2/22, 4.28M) column that the National Park Service may be "clueless" for its decision to relocate the collection of the National Archives for Black Women's History to a Maryland suburb and out of the Mary McLeod Bethune Council House National Historic Site in the District of Columbia. King points out that "when it comes to African American women, it's hard to come up with a more storied 20th-century figure than Mary McLeod Bethune," and the park service appears to be particularly clueless for getting into "an ironically timed struggle" over the archives during African American History Month. As a result, "it's cleanup time."

WOLVES OF ISLE ROYALE COULD MOVE THROUGH ICE BRIDGE. The *Chicago Tribune* (2/24, 2.32M) editorializes that "possible savior has intervened" for the wolves at Isle Royale, "in the form of the polar vortex." According to the paper, "a bitterly cold winter has created a rare ice bridge connecting Minnesota and Ontario to Isle Royale — the first one since 2008," and "wolves, which are far more numerous on the mainland, now have an avenue to make the move offshore."

Bureau of Land Management:

WILD HORSE AND BURRO DIVISION CHIEF WARNS OF CONSEQUENCES WITHOUT "DRASTIC CHANGES". The *AP* (2/23, Press, 4.28M) reports that "in a strongly worded internal memo" to an assistant director of the BLM, Wild Horse and Burro Division Chief Joan Guilfoyle "warned last summer that it is headed for financial collapse unless 'drastic changes' are made in the decades-old roundup policy she said could be setting US rangeland-improvement goals back 20 years." Guilfoyle "recommended suspending all roundups until thousands of mustangs currently in federal corrals are sold or adopted." Guilfoyle also said "sterilization should be considered, and she recommended for the first time euthanizing wild horses on the range 'as an act of mercy if animals decline to near-death condition as a result of declining water and forage resources.'"

Coverage by the AP was also picked up by the *Washington Times* (2/23, Sonner, 417K), *Yahoo!* (2/23, Sonner, 17.91M), the *Reno (NV) Gazette-Journal* (2/22, 165K), the *Salt Lake (UT) Tribune* (2/23, 343K), the *Bend (OR) Bulletin* (2/23, 94K), and the *Dubuque Telegraph Herald* (2/23, 88K).

BLM CREATING FULL-TIME BURNING MAN POSITION. The *AP* (2/21, 417K) reports that the BLM is "creating its full-time position dedicated to the annual Burning Man event in northern Nevada's Black Rock Desert." BLM officials say they "plan to hire someone to oversee contracts, coordinate law enforcement and maintain safety at the week-long counterculture festival leading up to Labor Day."

2,000 ACRES IN WASHOE VALLEY PROTECTED THROUGH TRANSFER TO BLM. The *Reno (NV) Gazette-Journal* (2/23, 165K) reports that the Washoe County Board of Commissioners has "received confirmation that nearly 2,000 acres of land in Washoe Valley known as Winters Ranch has been officially preserved for public open space through a transfer to federal ownership under the Bureau of Land Management (BLM) Jan. 17, 2014." Chairman David Humke said, "The land is now protected and that makes a lot of people throughout the County happy."

CONFEDERATED TRIBES OF THE GOSHUTE RESERVATION JOINS LAWSUIT AGAINST BLM. The *Indian Country Today Media Network* (2/23, 21K) reports that the Confederated Tribes of the Goshute Reservation has joined the Great Basin Water Network's recent lawsuit against the BLM and the Interior Department. The lawsuit "challenges BLM's decision to grant a right-of-way for a water pipeline that would destroy irreplaceable cultural and natural resources." CTGR Tribal Chairperson Madeline Greymountain said, "We cannot look the other way when the future of our people and homelands are in the hands of those who have their priorities mixed up. The federal government has failed in its trust responsibility, therefore CTGR has no recourse but to file suit against BLM for failure to protect our interests, which is a legal and moral obligation of the highest fiduciary standard."

FEDERAL AGENCIES CRITICIZED FOR SHOWING LITTLE CONCERN FOR NEVADA. The Ely Daily Times (2/21, 776) editorializes that the Sagebrush Ecosystem Council, "appointed by Gov. Brian Sandoval to try to stop the greater sage grouse from being listed under the Endangered Species act, has accused" the BLM and Forest Service of "creating an action plan that contradicts federal law mandates to manage public lands for multiple use." The council said the two federal agencies "largely ignored the concept of predator control as a means of keeping the grouse population viable, as well as the positive impact on the sagebrush ecosystem that comes from livestock grazing." The paper argues that "the federal land agencies are showing no concern for the welfare of Nevadans who have already been hard hit by the Great Recession."

REP. LABRADOR SUPPORTS GRAZING IMPROVEMENT ACT. In an op-ed for the Idaho Statesman (2/23, 205K), Rep. Raul Labrador writes in support of the Grazing Improvement Act. He argues that the Grazing Improvement Act will "help ranchers across Idaho who are increasingly burdened with red tape by providing them a streamlined permitting process by extending the Bureau of Land Management and Forest Service (BLM) livestock grazing permits from 10 to 20 years." According to Labrador, "this will preserve ranching jobs and give ranchers better economic security," and "it will also provide relief to federal land managers who battle a growing backlog of pending permits, largely delayed due to endless litigation often generated by environmental groups."

Fish and Wildlife Service:

FWS GRANTS PROTECTION FOR TWO TEXAS SALAMANDERS. The AP (2/21, 417K) reports the FWS announced Friday the granting of protections for the Georgetown salamander and the Salado salamander. The agency "says the small amphibians are endangered by habitat degradation and changes in the flow and quality of water in the springs where they live." The FWS also "proposes adopting a new Georgetown city ordinance aimed at reducing contamination from spills and creation of buffer zones around the salamanders' habitat."

Also reporting on the story are the Austin (TX) American Statesman (2/23, 456K), the Killeen (TX) Daily Herald (2/23, 40K), and KWTX-TV Waco, TX (2/23, 48K).

DESERT REFUGE VISITORS CENTER CELEBRATED. The Las Vegas Review-Journal (2/23, 437K) reports that the new Corn Creek visitor center at the Desert National Wildlife Refuge was celebrated on Friday. According to the article, FWS Director Dan Ashe was excited for the education about wildlife conservation the new visitor center will bring. In her opening speech refuge manager Amy Sprunger said, "This is really one of the best days of my life."

FWS TO STUDY "SWIMMING ABILITIES" OF FISH. The Washington Times (2/23, Elizabeth Harrington —, Beacon, 417K) reports that the FWS will "spend \$175,000 for a study on the 'swimming abilities' of fish in the Northern Rockies, the agency announced on Thursday." Montana State University's (MSU) Department of Ecology will administer the study in conjunction with the FWS Bozeman Fish Technology Center in Montana.

DUKE ENERGY SEALS SECOND NORTH CAROLINA COAL ASH SPILL. The Los Angeles Times (2/22, Zucchini, 3.07M) reported that North Carolina's Department of Environment and Natural Resources said on Friday that Duke Energy has managed to seal a second ruptured pipe that has been spilling toxic coal ash into the Dan River with a concrete plug. The state environmental agency reported on Friday that latest tests of river water show levels of aluminum and iron at levels exceeding state surface water standards, although levels are continuing the drop.

Federal Officials Probe Relationship Between North Carolina Regulators, Duke Energy. The Christian Science Monitor (2/22, Jonsson, 540K) reported that the EPA and US attorneys are now scrutinizing the relationship between Duke Energy and North Carolina regulators in light of claims that "regulators went easy on Duke Energy with regards to its inventory of aging and seeping coal ash lagoons." The North Carolina Department of Energy and Natural Resources maintains that they have "done nothing wrong" and "are actively pursuing fines and fines from Duke," which says that "it's cooperating fully with the federal probe;" however, environmental groups say that they have had to push the agency to pursue action against Duke Power's coal ash holdings.

This story is also reported by the AP (2/22) and the State (SC) (2/22, Fretwell, 280K).

REFORM OF ENDANGERED SPECIES ACT DEBATED. In an op-ed for the Salem (OR) Capital Press (2/20, 113K), Rep. Doc Hastings argues for reforming the Endangered Species Act. He notes that the ESA Congressional Working Group pointed out “four key areas where improvements could be made to make the law more effective for species and helpful for our communities.” According to Hastings, “the first is to restore the goal of species recovery and ensure greater transparency and prioritization of ESA decisions;” the second is “ESA litigation and settlement reform;” the third is “to empower states, local governments, tribes and private property owners on ESA decisions that affect them, their citizens, and their land;” and the fourth “is transparency and accountability of ESA data and science.”

On the other hand, in an op-ed for the Bozeman (MT) Daily Chronicle (2/23, 54K), Dave Chadwick, the executive director of the Montana Wildlife Federation, argues that “the ESA isn’t broken,” since “over the last 40 years, the law has functioned as intended to protect species that face imminent extinction.” According to Chadwick, “if our elected officials really want to improve how the law works, they would finish their promise to fund preventive conservation programs like the Wildlife Conservation and Restoration Program and State Wildlife Grants.”

FWS FACES DECISION ON GRAY WOLF. For the “Wild Things” blog of Slate Magazine (2/21, 9.37M), Lance Richardson writes that “the gray wolf is one of the most hotly contested symbols in the conservation debate today.” He notes that “this month, following a brief hiatus, arguments have reignited with the release of an independent review paper from the National Center for Ecological Analysis and Synthesis at the University of California-Santa Barbara,” which found that the “delisting proposal is not, in fact, based on the ‘best available science.’”

PLANS TO BUILD SPACEPORT IN MERRITT ISLAND NATIONAL WILDLIFE REFUGE CRITICIZED. For the Florida Times-Union (2/22, 427K), Ron Littlepage criticizes the plan to build a private launch site in the Merritt Island National Wildlife Refuge. He notes that Space Florida is “planning for 24 launches a year from a 200-acre site within the refuge,” but that would “require shutting down access to parts of the refuge in advance of each launch and would impact Mosquito Lagoon and Canaveral National Seashore, which generates another \$67 million in local economic impact.” Littlepage suggests that “a workable alternative would be for Space Florida to work from the NASA launch sites within the Kennedy Space Center, which have worked well in coordination with the refuge for decades.”

Securing America’s Energy Future:

Renewable Energy:

WILDLIFE GROUPS OPPOSE EAGLE PERMIT RULE. The Watertown (NY) Daily Times (2/23, 63K) reports that “concerned about the bald eagle population that nests along the St. Lawrence River, three conservation groups have joined together to oppose a federal rule allowing wind turbine operators to have a 30-year license to kill or injure the birds without penalty.” According to the article, “Save the River and 1000 Islands Land Trust, both of Clayton, and the Algonquin to Adirondacks Collaborative of Ontario endorsed a Feb. 18 letter sent to the US Department of Interior that urges the agency to withdraw its rule approved last December.”

In a column for the Oklahoma Daily (2/23, 32K), Corbin Brown criticizes the Interior Department’s decision to allow “wind farms permits to kill eagles, without legal ramifications, for up to 30 years.” Brown claims that “the grossly corrupt ties between the wind industry and the US federal government extend to other areas.” For instance, “in addition to issuing five-year-long, and now decades-long, licenses to kill numerous formerly protected bird species in the name of ‘clean’ energy, our government has provided the wind industry with tax credits worth tens of billions of dollars.” Brown concludes that “crony capitalism such as this demonstrates the federal government’s disregard for much of its environmental protectorate and the deadly influence of political favoritism.”

SOLAR PLANTS LEAD TO BIRD DEATHS. The Orange County (CA) Register (2/24, Danelski, 675K) reports that 380 birds were found dead on the grounds of three California solar farms during 2013, with 100 having died in October during migration. The Register reports that they do not have data on the amount of dead birds that would be found in a similarly sized stretch of desert land. Roger Johnson, California Energy Commission deputy director

for transmission and environmental protection, suggests that one solution may be a sonic signal at the edge of the farms that deters the birds from flying over the solar plant. The Register cites statistics from the American Bird Conservancy that 573,000 birds are killed annually by US wind farms, and between 300 million and one billion birds die due to glass windows.

Onshore Energy Development:

BUSH-ERA WATER RULES FOR COAL MINES STRUCK DOWN. The Environment & Energy Publishing (2/23, 705) reports that a D.C. federal judge has struck down controversial water regulations that rolled back stream protections near mountaintop removal coal mining sites, finding that the federal government violated the Endangered Species Act by ignoring evidence that the rule put critical habitats at risk. US District Judge Barbara J. Rothstein rejected the National Mining Association's arguments that the rule must be remanded to the OSM for consultation with the FWS. Rothstein found that OSM had failed to consult with the FWS before issuing the new standards.

Also reporting on the story is the Law 360 (2/23, 18K).

FORMER SECRETARY SALAZAR AT ODDS WITH OBAMA ADMINISTRATION OVER FRACKING RULES.

The SNL Financial (2/23, 22K) reports that "in a speech that put him at odds with the department he used to run," former Interior Secretary Ken Salazar "on Feb. 21 suggested that environmental concerns about new oil and gas drilling techniques are overstated and warned that attempts to rein in the shale boom could endanger the US economy." In his keynote address, Salazar "dismissed fracking fears." The article notes that "Salazar's views on fracking safety are markedly different from other former Obama administration officials who have begun to publicly question the benefits of increased natural gas drilling."

BLM: MOST COLORADO GAS LEASING IS ON PRIVATE LAND. The AP (2/23, Harmon, 417K) reports that "leasing for natural gas in Colorado is a largely private affair, though it is less so in the northwest corner of the state," according to the BLM. BLM spokesman David Boyd said that "ninety percent of drill-permit applications in Colorado in 2012, the most recent year available, were on other than federal lands," and "the remaining 10 percent were on federal lands."

PLANS FOR EVERGLADES OIL EXPLORATION RAISES ENVIRONMENTALIST CONCERNS. The South Florida Sun Sentinel (2/20, Gibson, 690K) reported that preparations to explore vast oil deposits at the western edge of the Everglades has raised concern among environmental activists that drilling will threaten endangered wildlife and pose a hazard to drinking water. Although leases obtained by energy companies for seismic exploration have not raised objections from state or Federal agencies, the EPA has scheduled a public hearing on March 11 to hear public concerns prior to issuing a permit for the construction of an injection well.

Offshore Energy Development:

BOEM LOOKS TO INCREASE CAP ON OIL SPILL LIABILITIES. FuelFix (2/21, Dlouhy, 7K) reports that the Bureau of Ocean Energy Management has proposed that the government increase the amount companies would have to pay for economic damage from oil spills from \$75 million to \$134 million. FuelFix reports that the liability cap has not been raised administratively since 1990. FuelFix reports that the liability cap "is waived entirely if there was gross negligence, willful misconduct or other violations" and that "companies also are required to pay the entire cost of cleaning up after offshore spills."

Also reporting on the story are The Hill (2/22, Devaney, 194K), the New Orleans Times-Picayune (2/23, 700K), the Law 360 (2/23, 18K), and the Upstream Online (2/23, 20K).

BP ECHOES FBI'S FREEH ON DISPUTED OIL SPILL CLAIM. The AP (2/21, McGill) reported BP is urging a Federal court to disallow a \$7.9 million Gulf oil spill claim awarded to Andry Law Firm, saying approval of the claim would undermine the integrity of the claims process. BP's filing in New Orleans on Friday cited a report by FBI director Louis Freeh alleging attorney Jon Andry and others tried to corrupt the settlement process, using a lawyer on the staff of claims administrator Patrick Juneau to expedite their firm's claims. Andry and his lawyers maintain his innocence, countering that Freeh had a conflict of interest in the case stemming from his connection

to a law firm that represents BP.

BP Said To Have "Buyer's Remorse" Over Claims Process. In a column for the Los Angeles Times (2/22, Hiltzik, 3.07M), Michael Hiltzik suggested that BP is having "buyer's remorse" regarding the terms of its oil spill damage claims process. Hiltzik asserts that the company has "mounted a frontal assault on the settlement," during "a time when one would expect it to display maximum agreeability and contrition." He argues that BP, who expected fraudulent claims, need not "upend the entire claims process" by asking judges for its complete halt, pointing out that a claims appeal process exists and that the company has "vigorously" taken advantage of it already.

Tackling America's Water Challenges:

BOR TELLS CALIFORNIA FARMERS NOT TO EXPECT FEDERAL WATER DELIVERIES. The CBS Evening News (2/21, story 2, 2:10, Pelley, 5.58M) reported, "The Federal government essentially told California farmers, 'You're on your own. Don't expect any water from Federal lands.' That could be devastating. Nearly 95 percent of California is in a drought. The state had already told farmers it had no water to share." Carter Evans added, "Scott, this is the first time California's central valley has been denied water from the Federal government's resources of reservoirs and canals. California's farmers grow half of America's produce."

The AP (2/23, Press, Subscription Publication, 9.61M) reports that "without a lot more rain and snow, many farmers caught in California's drought can expect to receive no irrigation water this year from a vast federally controlled system of rivers, canals and reservoirs interlacing the state, federal officials say." The BOR "released its first outlook of the year on Friday, saying the agency would continue to monitor rain and snowfall, but current levels confirmed that the state was in one of its driest periods in recorded history." The article notes that "farmers who rely on the federally run Central Valley Project received only 20 percent of their normal water allotment last year and were expecting bad news this year."

The Los Angeles Times (2/21, Boxall, 3.07M) reports that the BOR "even plans to give districts with the most senior water rights only 40% of their contract supply – the deepest cut ever for that group." As a result, "farm groups estimate that more than a half million acres of crop land will remain unplanted this year for lack of water." BOR spokesman Louis Moore said "if storms expected in Northern California next week and in early March improve conditions, the allocations could go up."

Coverage by the AP was also picked up by the Washington Post (2/21, Press, 4.28M), the Boston Herald (2/23, 643K), the Denver Post (2/23, Press, 949K), and USA Today (2/21, Ap, 5.82M).

Also reporting on the story is Bloomberg News (2/21, 1.91M), the San Francisco Chronicle (2/24, Alexander, 2.88M), the U-T San Diego (2/21, 647K), Reuters (2/21, 2.32M), the MarketWatch (2/22, 967K), and the Asheville (NC) Citizen-Times (2/22, 162K).

Additional coverage of the drought was provided by the Los Angeles Times (2/21, Boxall, 3.07M), the New York Times (2/23, Revkin, 9.61M), the Sacramento (CA) Bee (2/22, 749K), and the Santa Clarita Valley (CA) Signal (2/23, 13K).

DELTA TUNNELS REVIEW PERIOD EXTENDED BY 60 DAYS. The Fresno (CA) Bee (2/21, 327K) reports that state and federal officials have announced that the public will have more time to review and comment on immense documents describing Gov. Jerry Brown's proposed twin tunnels project. Instead of ending on April 13, as originally planned, the public comment period will be extended through June 13.

Also reporting on the story is the Stockton (CA) Record (2/22, 123K).

Additional coverage of the Bay Delta Conservation Plan was provided by the San Jose (CA) Mercury News (2/23, 731K) and the Sacramento (CA) Bee (2/20, 749K).

BOR FORECASTS FRYINGPAN-ARKANSAS FLOWS. The Pueblo (CO) Chieftain (2/23, 94K) reports that the BOR has "estimated a banner year for Fryingpan-Arkansas flows — with a disclaimer." Roy Vaughan, BOR's

manager for the Fry-Ark Project, said, "The forecast is based on average conditions for the rest of the spring. We've seen it continue to snow and rain, and we've seen everything stop in March."

Empowering Native American Communities:

ALTURAS ROCKED BY DEADLY SHOOTING AT TRIBAL MEETING. The Los Angeles Times (2/21, Willon, Dolan, Gold, 3.07M) reports that the killing of four people in Alturas has "left residents reeling and trying to understand the motive." According to the article, "the suspect, Cherie Lash Rhoades, 44, previously had been chairwoman of the small Northern Paiute tribe, but the meeting where the four were shot to death was being held to evict her and her son from the rancheria." The article notes that "the dead included Rhoades' brother and the current tribal chairman, Rurik Davis, 50; her niece Angel Penn, 19; and nephew Glenn Calonicco, 30. Lynn Russo, 47, the tribal administrator, also was killed."

The AP (2/22, Press, 4.28M) reports that the BIA "sent a team to Alturas on Saturday to provide grief counselling for anyone wanting it," according to agency spokeswoman Nedra Darling.

The Los Angeles Times (2/23, Willon, 3.07M) reports that "Rhoades' temper was well known among the many small Indian tribes settled in Modoc County, tribal members say."

Also reporting on the story is the Christian Science Monitor (2/23, Knickerbocker, 540K).

CHUKCHANSI DISPUTE HOLDS UP \$1 MILLION IN FUNDS. The AP (2/23, 417K) reports that "a dispute about tribal leadership is holding up about \$1 million in donations to Madera County schools, animal welfare agencies, tribal organizations and veterans groups." The Chukchansi tribe is "obliged to donate \$1 million annually to local groups under a contract with the county," but "a legal tussle between two factions of the tribe has brought its leadership and the funds into question." However, the BIA "last week said it intends to recognize seven members of the 2010 tribal council, including the second group's leader."

Also reporting on the story is the Merced (CA) Sun-Star (2/21, 86K).

GRAND RIVER TRIBAL RECOGNITION BEING "ACTIVELY CONSIDERED". The MLive (2/23, 334K) reports that the Grand River Bands of Ottawa Indians were "notified by the Office of Federal Acknowledgment in a Dec. 12 letter to the tribal chairman that its 1994 request for federal recognition was being 'actively considered.'" The BIA will decide by Dec. 1 a "proposed finding" to determine if the tribe has "met seven criteria to allow department Assistant Secretary for Indian Affairs Kevin Washburn to move toward a final decision." If Washburn "were to grant the tribe federal recognition, it would move forward plans of a development group to put an Indian casino at the Harbor 31 business park development on Muskegon Lake."

Top National News:

RICE WARNS RUSSIA NOT TO INTERVENE IN UKRAINE. The crisis in Ukraine continues to dominate front-page headlines in the nation's major dailies. In fact, several papers, including the Wall Street Journal, New York Times and Washington Post, have multiple front-page stories on the latest developments. However, only one of the two network news broadcasts that aired Sunday night reported the story.

As an interim government was sworn in Sunday, NBC Nightly News (2/23, story 3, 0:55, Holt, 7.86M) reported, the US said it "stands on the side of the Ukrainian people and...it will be a big mistake for Russia to intervene militarily in the crisis." NBC (Welker) added National Security Adviser Susan Rice, appearing exclusively on "Meet the Press" Sunday morning, "rejected the idea that Washington and Moscow were returning to Cold War-style tensions, saying they both agree Ukraine should remain unified, but strongly cautioned Russia not to get engaged militarily." Rice was shown saying: "That would be a grave mistake. It's not in the interest of Ukraine or of Russia or of Europe or the United States to see the country split. It's in nobody's interest to see violence return and the situation escalate."

Rice said on NBC's Meet The Press (2/23, Gregory), "From the US point of view, our interests have been clear all along. We want to see a de-escalation of the violence, constitutional change, we want to see democratic

elections in very short order. And the opportunity for the people of Ukraine to come together in a coalition.”

The Washington Post (2/24, Hicks, 4.28M) quotes Rice as saying, “This is not about the US and Russia. This is about whether the people of Ukraine have the opportunity to fulfill their aspirations and be democratic and be part of Europe, which they choose to be.” Regarding President Viktor Yanukovich’s whereabouts, she said he “left Kiev...in an orderly fashion,” taking his personal possessions with him.

The AP (2/24) reports Rice also said that in coming weeks, the Administration “will cooperate with Europe and international organizations to help the Ukrainian economy, which she described as fragile.” Bloomberg News (2/24, Lerman, 1.91M) quotes Rice as saying, “They need to reform and they need financing,” but “the United States will play a role, along with our partners in Europe.” Rice’s remarks are also reported by AFP (2/24), the Washington Times (2/24, Richardson, 417K), and The Hill’s (2/24, Devaney, 194K) “Global Affairs” blog.

The Wall Street Journal (2/24, A1, Solomon, Mock, Fidler, Subscription Publication, 5.91M) reports on its front page this morning that the Administration has already begun working with the EU on a bailout for Ukraine, but asked Moscow to participate in the effort as well. Treasury Secretary Lew reportedly discussed the issue with Russian Finance Minister Anton Siluanov on the sidelines of a G20 summit in Australia. And according to senior Administration officials, President Obama and other US officials have spoken with Russian President Vladimir Putin and his top aides over the weekend.

The AP notes that Secretary of State Kerry and Russian Foreign Minister Sergey Lavrov agreed during a phone call Saturday “on the need to resolve the situation without violence.” Reuters (2/24, Dunham, Krasny) notes that Kerry has also been in touch with some of Ukraine’s opposition leaders and Deputy Secretary of State Bill Burns will travel to Kiev this week.

Another Reuters (2/24, Zinets, Prentice) report says EU foreign policy chief Catherine Ashton is expected to arrive in Kiev later today to discuss a possible bailout. And AFP (2/24, Jean-Robert) reports that the interim leadership “made clear it will revive plans Yanukovich scrapped to push Ukraine closer to the European Union.”

On NBC Nightly News (2/23, story 2, 2:15, Holt, 7.86M), Richard Engel went on to report that “a new government is now being formed,” and, “in a series of rapid-fire votes, parliament made its speaker interim president and issued an arrest warrant for” Yanukovich’s arrest. But Engel added that “the challenges ahead may already be emerging,” and noted that in the eastern part of the country, “there were marches in support of Yanukovich and Moscow.”

The Washington Post (2/24, A1, Booth, 4.28M) reports on its front page that the opposition took “swift, bold action” on Sunday to “consolidate power and transform the government, sacking ministers, freeing jailed protesters and announcing detentions of former officials, even as ordinary Ukrainians confessed they weren’t really sure who was running the country or where it was headed.”

The Kyiv Post (2/24, Forina, 73K) reports the nation’s parliament “did a lot over the weekend,” but “big issues remain, including finding a new prime minister and forming a new government as well as renewing negotiations with the European Union over an association and free trade agreement that Yanukovich shelved.”

In a front-page story, the New York Times (2/24, A1, Herszenhorn, Subscription Publication, 9.61M) too says Ukrainian lawmakers “moved swiftly” to “assert control” and “restore calm” amid “sudden fears that the country might fall into civil war.” Parliament speaker Oleksandr V. Turchynov was granted “the authority to carry out the duties of the president of Ukraine,” and he later addressed the nation, seeking to “soothe any remaining fear of the police and security services.” But Yanukovich’s whereabouts “remained unknown,” and Russia’s Lavrov “continued to insist that Ukrainian opposition leaders had ‘seized power’ illegally” as Moscow recalled its ambassador to Kiev.

USA Today (2/24, Dorell, 5.82M) reports the country “remains on a precarious cusp and vulnerable to separatist elements and Russian intervention.”

The AP (2/24, Heintz, Charlton) says Russia’s “next moves in the crisis were not immediately clear, but Washington warned Moscow not to intervene militarily.” In a second, front-page story this morning, the

Washington Post (2/24, A1, Englund, 4.28M) says Yanukowych's ouster is a "big setback" for the Kremlin, but Putin "will play the hand he has now been dealt and is unlikely to waste time or energy regretting the ones he lost." Analysts say it is not "in Russia's interest to keep Ukraine churning."

In a front-page analysis, the New York Times (2/24, A1, Myers, Subscription Publication, 9.61M) says Yanukowych's ouster has "for now delivered a profound setback" to Putin's "strategy to deepen political and economic ties with the country and thus keep it from embracing Europe." Now, he "faces the task of reasserting Russia's influence," raising "fears that Russia would use the disenchanting populations there as a pretext to intervene."

Future Role For Tymoshenko Uncertain. The Wall Street Journal (2/24, Marson, Subscription Publication, 5.91M) reports former Ukrainian prime minister Yulia Tymoshenko was released from prison on Saturday and addressed crowds later that night in Kiev's Independence Square. Aides said Tymoshenko now plans to seek medical treatment outside Ukraine, and she said Sunday that she won't seek the office of prime minister.

AFP (2/24, Savochenko) says Tymoshenko "has remained coy about her political future" since being released Saturday, while Bloomberg News (2/23, Krasnolutska, Arkhipov, 1.91M) notes that her time in prison "has taken a toll" on her health and "may have been a factor in her request yesterday not to be considered for prime minister."

The New York Times (2/24, A1, Herszenhorn, Subscription Publication, 9.61M), in a front-page story, notes that while Tymoshenko was greeted Saturday with enthusiasm, some protesters may be "reluctant to automatically accept as a leader someone who was not with them in the streets." And while she said she is not interested in being prime minister, some believe she may instead be eyeing May's presidential election.

Details Of Yanukowych's Lavish Lifestyle Emerge. The New York Times (2/24, A1, Higgins, Erlanger, Subscription Publication, 9.61M) reports on its front page that even though President Viktor Yanukowych had agreed to a peace deal on Friday, by late afternoon "hundreds of riot police officers guarding the presidential compound and nearby government buildings had vanished." By the end of the day, Yanukowych was on a plane to the eastern city of Kharkiv.

The Wall Street Journal (2/24, A1, Cullison, Marson, Kolyandr, Subscription Publication, 5.91M) reports on its front page that Yanukowych never arrived in Kharkiv after having been abandoned by his closest allies. While he appeared determined to stay in office as recently as late Thursday, the Journal says even the Kremlin appeared caught off guard by his sudden departure.

AFP (2/24, Delany) reports that new evidence of Yanukowych's "pampered lifestyle and paranoia emerged on Sunday" as journalists "sifted through a trove of documents found hastily discarded when protesters seized" his residence on Saturday after he fled. While opposition activists "kept a close guard over the property to safeguard against looting, a team of Ukrainian journalists worked non-stop to scour the reams of documents for proof of possible corruption or eye-watering spending."

According to the AP (2/24, Danilova), the documents uncovered "lavish spending in an economy that is teetering on the verge of default."

US Lawmakers, Commentators Weigh In On Crisis. Senate Majority Whip Durbin said on Fox News Sunday (2/23, Wallace), "It was quite a relief yesterday. Yulia Tymoshenko has been in prison for two and a half years, but I've been working for almost two years for her release, and she was finally released by a unanimous vote in their parliament. I spoke to her just after she had addressed the crowd in the square. She sounded tired and looked frail on the reports that we'd seen, but she assured me that she's looking for a peaceful resolution to the problems in Ukraine, to follow the constitution and the law."

Sen. Kelly Ayotte said on Fox News Sunday (2/23, Wallace), "They need to focus on forming a unity government. Yanukowych needs to step aside, and I will say this: Now that the Olympics are over, we need to watch the behavior of the Russians. And I believe the President needs to up his game and send a clear unequivocal public message to Putin not to interfere in what is happening in Ukraine to let the Ukrainian people determine their future, to ensure that there is no interference in their sovereignty." The Washington Times (2/24, Eldridge, 417K)

also reports her remarks on Fox.

Sen. John McCain said on CBS' Face The Nation (2/23, Schieffer, 2.64M), "There's a sobering reality here that they recognize. ... Their economic situation is so dire that literally the economy is on the verge of collapse. They're going to need help immediately. The second issue I think that is not clear is, what does Vladimir Putin do? The eastern part of Ukraine is especially with older people more pro-Russian. Putin's major naval installation is there and what does Putin do here? I think the message has to be sent to him, let the Ukrainian people determine their own future."

David Brooks said on NBC's Meet The Press, "The crucial battlefield right now is in Putin's mind. He's just seen an autocrat fall on his border. He's got to be thinking about himself. So he's thinking this guy felt that he was a day late and a dollar short – he was not tough enough. So Putin is probably going to want to crack down more possibly sparking a counter-reaction. ... 'Do I let Ukraine break up? No, I don't. I do, if I have to, what I did in Georgia.'"

Thomas Friedman said on ABC's This Week (2/23, Raddatz, 2.73M), "I think the good news is the fact that this happened from the bottom up. The West didn't do this. The United States didn't do this. The EU didn't do this. The Ukrainian people did this. That's, I think, very, very important to remember. But what do we learn from experiences like Egypt, for instance, where we also saw bottom-up ousting of a long-time dictator? ... It's not about the morning after, it's all about the morning after the morning after."

William Kristol said on ABC's This Week (2/23, Raddatz, 2.73M), "Ten years ago, there was the Orange Revolution in Ukraine. It was one of the first color revolutions. ... We didn't do as much as we could have to help the newly democratic Ukraine. It was very corrupt, oligarchs have facilitated the corruption. Putin did not help at all. And so we ended up where we were. And now the people of the Ukraine have done it again."

Chris Matthews said on NBC's Meet The Press (2/23, Gregory), "We spent the entire Cold War avoiding a face-to-face military conflict with the Soviet Union. We did not want to fight them and I think we're on that same tricky slope right now. Make our values clear, our sympathies clear, but don't let it get too political. ... Don't let it become that because that means real trouble."

George Will said on Fox News Sunday (2/23, Wallace), "The President may not look upon this as a Cold War chessboard, but Putin clearly does, and it's going to be interesting when the Olympic flame is extinguished later today, and Putin is free from his public relations exercise at the Olympics, what is he going to do? The real danger is the dismemberment of the Ukraine, because the eastern Ukraine is Russian-speaking and associated culturally and historically with Russia, Western Ukraine much more close to Europe."

Fareed Zakaria said on CNN's Fareed Zakaria GPS (2/23, 456K), "Everything we know about these kinds of revolutions is that this is the thrilling moment which is often followed by turmoil, tension, violence, and chaos. This is going to be particularly true in Ukraine, which is riddled with corruption and in many ways is on the brink of economic collapse. The opposition will have to act with wisdom and include those whom it despises including the supporters of Yanukovich. Russia will not allow Ukraine to slip from its grasp."

Ukrainian Children In US Follow Revolution In Their Parents' Homeland. The New York Times (2/24, Correal, Subscription Publication, 9.61M) reports on children at the Ukrainian American Youth Association in Manhattan, noting that they have been "following the political crisis growing in their parents' homeland." The Times notes that as Yanukovich fled Kiev on Saturday, the children "printed out photos of anti-government protesters killed in clashes last week" and created a memorial outside, "taping the slain protesters' photos on a wall of the building."

More Commentary. In an editorial, the Wall Street Journal (2/24, Subscription Publication, 5.91M) says that a successful democracy in Ukraine could inspire reformers in Russia, and as a result, Russia is likely to attempt to destabilize Ukraine's new government. The Journal argues that the US and the EU should combat those efforts with diplomatic attention, financial aid and the hope of closer economic ties to the West.

In an op-ed for the New York Times (2/24, Subscription Publication, 9.61M), Ulrich Speck, a visiting scholar at Carnegie Europe, the European center of the Carnegie Endowment for International Peace, writes that the West

must first "send unequivocal messages to Moscow that any support by Russia for the southern and eastern regions of Ukraine to break away from the rest of the country would be met harshly, and result in a general reconsideration of relations with Russia on all levels." They must also "make sure that their own resources, and those of the European Union institutions in Brussels, are available to political leaders in Kiev to assist them in their transition to a new regime," and they must "work with the International Monetary Fund to provide a financial lifeline to Kiev and to prepare longer-term economic-assistance programs," and "be ready to give direct emergency aid by themselves, if needed."

In an op-ed for the New York Times (2/24, Subscription Publication, 9.61M) Dmitri Trenin, director of the Carnegie Moscow Center, takes a different view of Russia's intentions, arguing that it is unlikely to interfere in Ukraine. Trenin writes that Russia "has far less influence on it than is commonly appreciated," and that it is a "popular myth" that Yanukovich "has been but a puppet of President Vladimir V. Putin." Moscow, he writes, "is unlikely to try bringing about the breakup of Ukraine in order to annex its southern and eastern parts," because it would "mean civil war next door, and Russia abhors the idea." Trenin adds that Moscow's best option "is to stand back and wait, while quietly favoring decentralization in Ukraine."

OBAMA MEETING WITH GOVERNORS AT THE WHITE HOUSE TODAY. The Washington Post (2/24, Balz, Tumulty, 4.28M) reports that on Monday at the White House, President Obama "will host the nation's governors...with all signs pointing to Republicans and Democrats talking past each other as they lay the groundwork for this year's midterm elections." According to the Post, Louisiana Gov. Bobby Jindal (R) "set the tone for the meeting," when he said, "The president's going to try to lecture us on the same themes he's been campaigning on across the country, and our response is that his policies are actually making that division worse." The Post notes that on Thursday, the President "explicitly criticized Republican governors during remarks at a Democratic Governors Association fundraiser," claiming "They're pursuing the same top-down, failed economic policies that don't help Americans get ahead."

Governors Say They Can Show Congress How To Get Things Done. The Gannett News Service (2/24, Gaudiano, 7K) reports that governors attending the National Governors Association winter conference this weekend argued that Washington politicians can learn from them "as they collaborate on issues such as workforce development, transportation and public safety." For example, Oklahoma Gov. Mary Fallin (R), said, "We don't have the luxury of inaction as we see many times here in Washington. Governors are expected to solve problems, expected to address issues that face our states, which in turn, I believe helps our nation." Meanwhile, Colorado Gov. John Hickenlooper (D) said, "Unlike what you see in Congress ... we love to share and steal ideas from each other and see them improved. And then we steal them back."

WTIMES: OBAMA LIKELY TO WAIT UNTIL AFTER MIDTERMS TO DECIDE ON KEYSTONE PIPELINE. According to the Washington Times (2/24, Wolfgang, 417K), President Obama "appears willing to put off a decision on the Keystone XL oil pipeline at least until the midterm elections have passed," and "analysts say a court ruling last week — invalidating the pipeline's route through Nebraska and essentially putting the entire project on hold for the foreseeable future — means an ultimate decision...could be delayed another year or longer." The Times says that prior to the ruling, the President "was expected to make his decision this spring or early summer."

65 Miles Of Mississippi River Closed Following Oil Spill. The AP (2/23, 3.07M) reports that a 65-mile section of the Mississippi River, "including the Port of New Orleans, was closed to all water traffic Sunday as crews cleaned up oil that spilled from a barge after it ran into a towboat between Baton Rouge and New Orleans, the Coast Guard said." While officials don't know the extent of the spill, "only a sheen was reported on the river after the collision, which happened Saturday afternoon."

WSJournal Study Finds Heightened Risks From Shipping Bakken Crude By Rail. The Wall Street Journal (2/24, B1, Gold, Subscription Publication, 5.91M) reports that an analysis by the paper has found that crude oil from North Dakota's Bakken Shale region contains significantly more combustible gases than other crude, raising concerns about the safety of shipping it by rail. The Journal says that Federal investigators are attempting to determine whether those vapors were responsible for the explosions of crude-filled rail cars in Canada last summer. Sarah Feinberg, chief of staff at DOT, said, "Given the recent derailments and subsequent reaction of the Bakken crude in those incidents, not enough is known about this crude. That is why it is imperative that the petroleum industry and other stakeholders work with DOT to share data so we can quickly and accurately

assess the risks.”

Editorial Wrap-Up:

NEW YORK TIMES. “A Second Front In The Privacy Wars.” In an editorial, the New York Times (2/24, Subscription Publication, 9.61M) notes that the President has tapped special adviser John Podesta “to take another look at privacy and big data (the millions of records that businesses are collecting and using to increase sales and improve operations) and produce a fresh report in 90 days.” The Times argues that the President and the public need Podesta to provide “not only a thorough description of how businesses are collecting private data but also specific legislative proposals to give consumers more control of that information.”

“Let The E.P.A. Do Its Job.” The New York Times (2/24, Subscription Publication, 9.61M) in an editorial notes that the Clean Air Act “didn’t take greenhouse gases into account,” but argues that the EPA’s position is must be correct if it is “to remain effective,” praising the Supreme Court’s 2007 ruling finding that the agency has the “regulatory flexibility” to apply new “scientific developments.” The Times characterizes the dispute before the High Court this week as being “between the bottom-line economic concerns of business and the government’s reasonable efforts to protect human health and the environment,” adding that though it favors an updating of the Clean Air Act by Congress, in the meantime the EPA is acting “well within its authority to interpret the law.”

“Locked Away In Immigration Jails.” In an editorial, the New York Times (2/24, Subscription Publication, 9.61M) is critical of immigration detention policies, where detainees are “held inexplicably for years without criminal charges or bond hearings.” However, rulings by a Federal district judge and the Ninth Circuit US Court of Appeals reflect “the growing understanding — in the federal courts, if not at Immigration and Customs Enforcement — that the constitutional guarantee of due process demands that a detainee have a hearing within a ‘reasonable’ time and that more than six months is not reasonable by any definition.”

WASHINGTON POST. “Clearing The Air.” The Washington Post (2/24, 4.28M) in an editorial says that “the EPA has a better case than the critics,” arguing that its greenhouse gas emissions rule being considered by the Supreme Court this week is “closer to what Congress desired when it passed the Clean Air Act” than is the critics’ argument that the thresholds set in the act demonstrate that Congress could not have intended to regulate greenhouse gases as pollutants. While the Post acknowledges that Congress “didn’t anticipate” the threat from greenhouse gases, the EPA, it says, is acting according to Congress’ intent, while “the real villains” are recent Congresses that have failed to act on greenhouse gas emissions.

“How To Deal With Sugar.” In an editorial, the Washington Post (2/24, 4.28M) says the getting rid of price supports to agricultural industries “is the right thing to do economically,” and, with regard to sugar, the right thing to do for public health. The Post says that eliminating the subsidies for corn (the source of corn syrup) would be a good start, but eliminating the protections for the sugar industry would actually lower the price. The Post instead endorses a tax on sugary products.

“Dying At The Firehouse Door.”

WALL STREET JOURNAL. “The ‘Absurd Results’ Power Grab.” The Wall Street Journal (2/24, Subscription Publication, 5.91M) endorses the view that a case before the Supreme Court this week is a major challenge to the Administration’s greenhouse gas efforts, and argues that the rule of law requires that the EPA not be allowed simply to set a new regulatory threshold for carbon emissions because the act’s threshold for pollutants would be unworkable or absurd when applied to carbon. It argues that the Administration must persuade Congress to give it the power to regulate carbon emissions differently from other pollutants, something the Congress has so far refused to do.

“Fannie’s Fake Victory Lap.” In an editorial, the Wall Street Journal (2/24, Subscription Publication, 5.91M) says that Fannie Mae and Freddie Mac have now repaid the Federal government more than they were given in their bailout. However, the Journal says that doesn’t even come close to making up for the damage they did during the financial crisis. In addition, their continued existence as the dominant force in the mortgage markets, the Journal says, raises the specter of another round of bad mortgage writing that could end up in another housing bubble.

"Aiding Ukraine's Democrats." In an editorial, the Wall Street Journal (2/24, Subscription Publication, 5.91M) says that a successful democracy in Ukraine could inspire reformers in Russia, and as a result, Russia is likely to attempt to destabilize Ukraine's new government. The Journal argues that the US and the EU should combat those efforts with diplomatic attention, financial aid and the hope of closer economic ties to the West.

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

EVENT MEMORANDUM FOR THE SECRETARY

MEETING WITH THE CONFERENCE OF WESTERN ATTORNEYS GENERAL

DATE: February 26, 2014
LOCATION: Main Interior Building, Room 5160
TIME: 1:00PM – 2:00PM
FROM: Hilary Tompkins, Solicitor (202)208-4423; John Blair, Director, OIEA (202)208-6649

I. PURPOSE

The Conference of Western Attorneys General (CWAG) has met with past Secretaries on an annual basis when they are in Washington, D.C., for their spring meeting. The meeting will be in the format of a meet and greet. The Attorneys General appreciate the opportunity to meet you for the first time and highlight a few of their priorities.

This year, you are meeting with 11 AGs and CWAG staff.

II. BACKGROUND

The CWAG is a bipartisan group comprised of the chief legal officers of 15 western states and three Pacific territories. CWAG provides a forum for Western Attorneys General to address emerging legal topics along with focusing on common areas of interest to the west: water, fish and wildlife, public lands, minerals, environmental protection, and Indian law.

CWAG consists of 18 Western States and territories in the Pacific and 12 associate member States from across the country: Alaska, American Samoa, Arizona, California, Colorado, Guam, Hawaii, Idaho, Montana, Nevada, New Mexico, North Dakota, Northern Mariana Islands, Oregon, South Dakota, Utah, and Washington, Wyoming.

Associate members include: Arkansas, Connecticut, Florida, Iowa, Maryland, Nebraska, North Carolina, Oklahoma, Rhode Island, Texas, Vermont, and West Virginia.

III. PARTICIPANTS

DOI:

Laura Davis, Chief of Staff
Hilary Tompkins, Solicitor
Jack Haugrud, Acting Principal Deputy Solicitor
John Blair, Director of Intergovernmental & External Affairs

CWAG:

Michael C. Geraghty, AK Attorney General
Lawrence Wasden, ID Attorney General
Sherm Furey, ID Chief Deputy Attorney General
Gary King, NM Attorney General

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

Wayne Stenehjem, ND Attorney General
Sean Reyes, UT Attorney General
Parker Douglas, UT Chief Deputy Attorney General
Dustin McDaniel, AR Attorney General
Ross Dunn, AR Chief of Staff
Pam Bondi, FL Attorney General
Tyler Cathey, FL Chief Deputy Attorney General
Jim Hood, MS Attorney General
Ellen Rosenblum, OR Attorney General
David Louie, HI Attorney General
John Suthers, CO Attorney General
Scott Pruitt, OK Attorney General

CWAG Staff:

Karen White, CWAG Executive Director
Chris Coppin, CWAG Legal Director
Janine Knudsen, CWAG Meeting Manager and Event Coordinator

IV. AGENDA

This event will be closed press.

- 1:00pm - 1:15 pm **Welcome, Introductions**, You give introductory remarks, Hilary Tompkins gives introductory remarks
- 1:15pm – 1:30pm **CWAG Remarks** – Attorney General John Suthers (CO)
1:30pm – 1:50pm **Open Dialogue on Western Issues**
Floor will be open for Attorneys General questions for you, comments and discussion on the issues
- 1:50pm – 2:00pm **Wrap Up, Next Steps**
You will summarize any follow-up needed on issues discussed.

V. TALKING POINTS

- Thank you Attorneys General, CWAG staff for setting up this meeting.
- I look forward today to hear about the issues you are facing in your roles as chief legal counsel for your respective states/territories.
- One of the first things I quickly realized as Secretary was how almost everything we do at Interior ends up in court.
- We share the same challenge of making tough decisions both at the state and Federal level regarding:
 - management of our water resources in extreme drought conditions

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

- conservation efforts regarding the sage grouse
 - development of both renewable and conventional resources (onshore and offshore)
 - impacts of climate change, mitigation, and adaptive management
- I recently had the pleasure of meeting with all of your Governors at WGA.
 - One of the things I told them was how important it was that we in the Federal government work closely with our state partners.
 - You have an open invitation to talk with me or my senior team on any critical issues you may be facing with the Department.

VI. HOT TOPICS

Mineral Leasing Act Funds – Sequestration

ONRR collects royalties and lease payments for development on public lands. The Mineral Leasing Act mandates that the United States share these funds with states. The sequestration law provides for across-the-board cuts to this mandatory spending. In 2013, Congress reached a compromise that eliminated across-the-board cuts for discretionary spending in FY 2014 and 2015, but not mandatory spending. The cuts will apply to FY 2015. In FY 2013, there was a sequester rate of 5.1%. In FY 2014, the sequester rate is 7.2%.

Texas v. New Mexico Supreme Court litigation

The Supreme Court granted Texas' motion to sue New Mexico alleging violations of the Rio Grande Compact for failure to deliver sufficient water to Texas. The United States supported Supreme Court review and is supportive of the Texas position.

Sage Grouse Conservation

BLM, along with Forest Service, is in the process of amending 98 land use plans. The goal is to incorporate conservation measures by the end of FY 2014 into the plan amendments so minimize impacts to the species and habitat, which in turn may prevent a listing of the species under the ESA. NEPA documents have been released to the public. The states are pushing BLM to adopt their alternative as the preferred alternative in many of these plans. FWS must make a listing decision by the end of FY 2015.

R.S. 2477 (Utah)

Utah and certain counties have filed 31 lawsuits asserting ownership to over 12,000 rights-of-way crossing public lands. We are litigating a limited number of these cases and have stayed the rest. The State, Iron county, enviros, and BLM are in conversations to attempt to resolve RS 2477 claims to avoid litigation.

Hydraulic Fracturing Rule

BLM is in the process of reviewing the last round of comments (1.35 million). BLM has taken into consideration the request of states and tribes to not supplant their authority. The last proposal by BLM included a "meet or exceed" provision to allow for adoption of state/tribal laws. Variances could be obtained by operators to operate under state or tribal standards that meet or exceed the federal rule. DOI anticipates issuing a final rule in late 2014.

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

Drought

Western states, particularly CA, CO, OR, and NM, are suffering record droughts. ESA litigation is in the backdrop in CA, OR, and NM. Reclamation is working on all fronts to address issues regarding water allocations, shortage and carryover provisions, contract delivery obligations, refuge water needs, and endangered species act compliance.

Klamath Agreements (OR)

Under Senator Wyden's leadership, the Department is close to finalizing an agreement with federal and state entities, the Klamath Tribe, and local water users to address water usage and conservation measures in the Upper Klamath Basin. This would be the last piece to legislation that would approve the KBRA and KHSA authorizing dam removals and water rights claims.

Alaska Issues

- **Lease Sale 193 Chukchi Sea Litigation** - the State joined this case on our side against environmental and Alaskan Native plaintiffs who claim NEPA deficiencies with the lease sale. We just lost in the 9th Circuit on our oil production estimate for understating environmental impacts. We are considering whether to appeal during a 45 day time period.
- **Izembek Road** – Senator Murkowski has sought a reconsideration of our decision. Litigation has not been filed but is anticipated.
- **ANWR** – On September 20, FWS Director Dan Ashe denied Alaska Governor Parnell's appeal for a special permit to conduct seismic exploration in ANWR. This follows an earlier rejection of the permit from the FWS Alaska Regional Director based on the regulations promulgated by FWS for the ANILCA 1002 area during the Reagan Administration. Our position is that new exploratory activity is "prohibited by the Alaska National Interest Lands Conservation Act (ANILCA) and would require Congressional authorization." Alaska has not filed litigation.
- **Government Shut Down Refuge Closure Law Suit** - Alaska sued the Department for the closure of refuges in Alaska during the government shut down last fall. The United States recently filed a motion to dismiss the case as moot. The response of the State is not yet due.
- **Alaska Subsistence – Katie John Litigation** – This week, the United States filed its opposition to the State of Alaska request to the Supreme Court to hear an appeal of the 9th Circuit decision upholding the Department of the Interior and Agriculture regulations governing federal jurisdiction over navigable waters adjacent to parks and refuges under the federally run rural subsistence priority program in Alaska under ANILCA.

Hawaii Issues

- **Federal Rulemaking by DOI to implement the Hawaiian Homes Commission Act (1921) and the Hawaiian Home Lands Recovery Act (1995) –**

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

- Native Hawaiians receive housing and land benefits under these laws. Interior has administrative responsibilities to oversee land exchanges and approval/disapproval of amendments to eligibility criteria.
- A 1983 Task Force recommended that Interior adopt processes to help implement these laws. This was reinforced in a 1995 law.
- We are in the process of preparing a proposed rule for public comment. It contains procedures and timelines to streamline and standardize Interior's exercise of its review and approval authority.
- Interior has a trust responsibility to the Native Hawaiian beneficiaries.
- **Critical Habitat Designation in Kona, Hawaii** – On October 2, 2012, the Service published a Proposed Rule to designate critical habitat for three plant species in the Big Island. The proposed critical habitat designation consists of 18,766 acres (55% is already designated for other species). The Proposed Rule identifies several areas as “under consideration for exclusion” from the designation. The extended public comment period closed September 3, 2013.
 - Overall, approximately 64 percent of the proposed designation is owned by the State of Hawaii; approximately 34 percent is privately-owned; approximately 2 percent comprises Federal land managed by the National Park Service; and less than 1 percent is owned by the County of Hawaii.

VII. ATTACHMENTS

- Attorneys General Bios by State

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

ARKANSAS – Dustin McDaniel

Dustin McDaniel became the 55th Attorney General of Arkansas in 2007. He was sworn in to his second term in January 2011 after being re-elected with strong support from across the state. As Attorney General and the state's top consumer advocate, Dustin works tirelessly to protect the rights of Arkansas consumers. A lifelong Arkansan, Dustin was born in Fayetteville, grew up in Jonesboro, and attended public school there. He holds a bachelor's degree from the University of Arkansas at Fayetteville and received his law degree from the University of Arkansas at Little Rock Bowen School of Law. He was a uniformed patrol officer with the Jonesboro Police Department prior to entering law school. Upon graduation, he practiced law at his family's law practice, McDaniel and Wells in Jonesboro, before being elected to the Arkansas House of Representatives in 2004. Dustin is co-chairman of the National

Association of Attorneys General's Tobacco Committee. Dustin is married to Bobbi McDaniel and has one daughter and two stepchildren. In his free time, he enjoys being with his family. He is an avid hunter, a private pilot and owns a farm in Craighead County.

ALASKA - Michael Geraghty

Prior to his appointment as Alaska's Attorney General, Michael C. Geraghty was a partner in the Anchorage law firm DeLisio Moran Geraghty & Zobel, PC. Geraghty and began working at the firm in 1979 with a practice devoted exclusively to litigation and appeals before state and federal courts. Born and raised in Fairbanks, Alaska, Geraghty's private practice focused on areas and industries including natural resources, oil and gas, and construction. Geraghty has appeared before the Alaska Supreme Court in numerous cases involving sovereign immunity, administrative law, insurance and bad faith, attorney-client privilege, OSHA regulations, contract claims, shareholder disputes, products liability, and premises-landowner liability.

Geraghty received his undergraduate degree in Political Science from the University of Hawaii. He graduated with a *JD Cum Laude* from the University of Santa Clara. Geraghty and his wife Mishel have lived in Anchorage for 30 years and have five children. He and his wife have been active in Special Olympics for many years. Geraghty was one of the founding directors on the board of Life Alaska Donor Services, Alaska's only tissue and organ donor program."

COLORADO – John Suthers

John W. Suthers is a lifetime resident of Colorado. He graduated magna cum laude from the University of Notre Dame with a degree in Government in 1974 and from the University of Colorado Law School in 1977. On July 30, 2001, Mr. Suthers was nominated by President George W. Bush to be the United States Attorney for the District of Colorado. He was unanimously confirmed by the U.S. Senate. As U.S. Attorney, Mr. Suthers represented the United States in all criminal and civil matters within the District of Colorado. On January 4, 2005, Mr. Suthers was appointed Attorney General of Colorado. After serving as Attorney General for nearly two years, in November 2006, the voters of Colorado elected Mr. Suthers by a large margin to serve a four-year term. Mr. Suthers was again re-elected in 2010 by the biggest margin or any statewide race that year. As Attorney General, he represents and defends the interests of the people of the state of Colorado and is chief legal counsel and adviser to state government and its many state agencies, boards and commissions. John and his wife, Janet, have been married for 35 years and have two daughters.

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

FLORIDA – Pam Bondi

A native of Tampa, Pam Bondi became Florida's 37th Attorney General after being elected on November 2, 2010. Attorney General Bondi was sworn in to office January 4, 2011. AG Bondi is a graduate of University of Florida and Stetson Law School and has served as a front-line prosecutor for more than 18 years. As an assistant state attorney for the 13th judicial district, her investigative and courtroom experience includes the successful prosecution of numerous first-degree murder cases and two capital cases. Attorney General Bondi is focused on protecting Floridians and upholding Florida's laws and the Constitution. Some of her top priorities are: defending Florida's constitutional rights against the federal health care law; strengthening penalties against pill mills; aggressively investigating mortgage fraud and Medicaid fraud; and ensuring Florida is compensated for Gulf Horizon oil spill losses. Transparency and openness in government have been important throughout her career, and Attorney General Bondi continues to support Florida's Sunshine laws.

HAWAII - David Louie

Mr. Louie graduated from Occidental College (cum laude) in 1973 with an A.B. in Sociology, and received his J.D. from Boalt Hall School of Law at the University of California, Berkeley, in 1977. From 1977 to 1988, Mr. Louie was an attorney at Case & Lynch, practicing in the areas of civil litigation, personal injury, insurance defense, commercial litigation, contract disputes and construction defect litigation. From 1988 through 2010, Mr. Louie was the managing partner of the [Roeca Louie & Hiraoka] law firm, practicing in the areas of civil litigation, insurance defense, construction defect litigation, commercial litigation, legal malpractice, directors and officers liability, prison litigation, product liability, and aviation litigation. He served as a Lawyer Representative for the United States Court of Appeals (Ninth Circuit)(2005-2008). He was the Northwest Regional Governor for the National Asian Pacific American Bar Association (NAPABA) (2008-2010) and has served in various capacities as the President, Treasurer, and Director of the NAPABA Hawaii Chapter (1995 to present). He served as a Director (1998-2006) and the Chair (1999-2005) of the State of Hawaii Aloha Tower Development Corporation. He served as the Vice Chair of the Hawaii Supreme Court Rule 19 Special Committee on Judicial Performance (1999-2010). Mr. Louie has been married for 24 years to Johanna Chen Chuan. They have two grown children.

IDAHO – Lawrence Wasden

Lawrence Wasden is Idaho's 32nd Attorney General. He was elected to a third term on November 2, 2010 and is Idaho's longest-serving Attorney General. Attorney General Wasden, a 23-year veteran of the Office of the Attorney General, previously served as Chief of Staff to the Attorney General, Deputy Chief of Staff and as a Deputy Attorney General representing the Idaho State Tax Commission. He also served as a Deputy Prosecuting Attorney in Canyon County, Idaho, and as Prosecuting Attorney for Owyhee County, Idaho. Attorney General Wasden is Past Chair of the Conference of Western Attorneys General (CWAG). Attorney General Wasden obtained his J.D. from the University of Idaho and was admitted to the Idaho State Bar in 1985. He earned a Bachelor of Arts in political science from Brigham Young University in 1982. Lawrence and Tracey Wasden were married in 1980. They live in Nampa, Idaho, and are proud parents of four children.

MISSISSIPPI - Jim Hood

"Attorney General Hood is a passionate champion of children. He works tirelessly to prevent children from being abused and exploited, and to rescue those who have already fallen prey to those who do them harm.

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

As Attorney General, Jim Hood has established a Vulnerable Adults Unit, a Domestic Violence Unit, an Identity Theft Unit, and a Crime Prevention and Victims Services Division... He has launched initiatives to prevent workplace and school violence, and stalking and domestic assault. Attorney General Hood has also placed emphasis on protecting the utility ratepayers of Mississippi by ensuring that public utilities that hold monopolies on power operate with the utmost transparency so that consumers are not overcharged. He received his J.D. from the University of Mississippi in December 1988. After graduation he served as a clerk with the Mississippi Supreme Court, as an Assistant Attorney General for five years, and as District Attorney for the Third Judicial District for eight years. He was educated in the public schools of Chickasaw County. He is a fifth generation Mississippian and an avid outdoorsman and hunter.

NEW MEXICO - Gary King

Dr. King attended New Mexico State University and obtained a Bachelor's degree in Chemistry. He received his Ph.D. in organic chemistry from Colorado University at Boulder. He then attended law school at the University of New Mexico, where he received his J.D. In 1984, Gary formed the law firm of King and Stanley in Moriarty, where he carried out the general practice of law. In 1990, he assumed the position of Corporate General Counsel and Senior Environmental Scientist with Advanced Sciences, Inc., an environmental consulting firm. Gary served for 12 years in the New Mexico State Legislature. During 10 years as the Chairman of the Consumer and Public Affairs Committee, Gary used his leadership position to work vigorously on health care, environmental and civil rights issues. In 1998, Gary became the Policy

Advisor to the Assistant Secretary for Environmental Management at the U.S. Department of Energy (DOE) in Washington, D.C. Within a year, he became the Department's Director of the Office of Worker and Community Transition. While at the DOE, he developed and implemented a program fostering cooperation between federal, state, local and Native American governments to enhance cleanup activities.

NORTH DAKOTA – Wayne Stenehjem

Attorney General Wayne Stenehjem was born in Mohall, North Dakota. He graduated from the University of North Dakota and received his law degree from the UND School of Law in 1977. He is married to Beth Bakke Stenehjem and has a son, Andrew. Stenehjem was elected to the North Dakota House of Representatives in 1976, serving for two terms until his election to the ND Senate in 1980. He served for twenty years in the Senate until his election to the Office of Attorney General.

Stenehjem served on the Judiciary Committee throughout his tenure in the Legislature, and was Chairman of the Senate Judiciary Committee from 1995-2000. He was elected President Pro Tempore of the Senate for the 1999 Legislative Session. In January 2001, Stenehjem was sworn in as the State's 29th Attorney General. He was reelected in 2004, 2006 and 2010.

OKLAHOMA – Scott Pruitt

Attorney General E. Scott Pruitt was elected as the 17th Attorney General of the State of Oklahoma on November 2, 2010. He is the second Republican in the history of the state to hold the office, which oversees 80 attorneys. He is dedicated to fighting corruption, protecting Oklahoma's vulnerable citizens, championing public safety measures to reduce violent crime and advocating excellence in the

ATTORNEY CLIENT COMMUNICATION – Confidential & Privileged

administration of the law, justice and protecting the interests of the Great State of Oklahoma and its citizens. Before being elected Attorney General, Pruitt served Broken Arrow, Coweta and Tulsa in the Oklahoma State Senate where he served for eight years, four of those as Assistant Republican Floor Leader. In the Senate, he was the leading spokesman for workers' compensation reform, lawsuit reform and greater accountability for government spending. He championed traditional, faith-based legislation that included allowing faith-based organizations to partner with the state in helping prisoners successfully re-integrate into society after their sentences were fulfilled. Pruitt grew up in Lexington, Kentucky, where he graduated high school and earned a scholarship to play baseball as a second baseman at the University of Kentucky. He earned a bachelor's degree in communications and political science at Georgetown College before being accepted to the University of Tulsa College of Law. After working his way through law school and earning a Juris Doctorate, Pruitt ventured into private practice, specializing in constitutional and employment law. The Attorney General and his wife of 22 years, Marlyn, are raising two children, McKenna and Cade, in Tulsa.

OREGON – Ellen Rosenblum

Ellen Rosenblum was elected Oregon's 16th Attorney General in November, 2012. She is the first woman to serve as Oregon Attorney General. Ellen's priorities as Attorney General include advocating for and protecting Oregon's most vulnerable, including especially our families and children, our seniors, Oregonians whose first language is not English, and students who have incurred significant education-related debt. She is committed to continuing the AG's office long time practice of assisting district attorneys in prosecuting crime and has made internet and other crimes against children her highest priority. Ellen previously served in private practice, as a federal prosecutor, and as a state trial and appellate court judge. She has been active in local and national organizations of lawyers, judges and attorneys general and currently co-chairs the American Bar Association's only committee devoted exclusively to state AG issues.

UTAH - Sean Reyes

Sean Reyes is among the most dynamic and successful young professionals in the country today. He has been recognized nationally and locally for his legal skills and professionalism, local and national Bar leadership and unparalleled commitment to public service. He has lent his legal expertise to media outlets ranging from Fox National Business News to the Economist. After graduating summa cum laude from Brigham Young University in 1994, Sean earned his law degree with honors from U.C. Berkeley in 1997. He practiced for nearly fourteen years at Parsons Behle & Latimer, the largest law firm in the State, where he became one of the first minority lawyers to make partner at a major Utah firm. While there, Sean represented clients on some of the largest and most high profile litigation cases in the history of the State. He argued or briefed cases before state and federal courts throughout the country, including the Utah Supreme Court and Tenth Circuit Court of Appeals. For years, Sean has maintained an "AV" rating, the highest ranking possible as determined by peer ratings. In the legal community, Sean has served for over a decade as a small claims judge and spent two years serving on the governing body of the Utah State Bar. He was President of the Utah Minority Bar for which he received state and national honors and served in leadership for the Young Lawyers Division. Sean has lectured at both law schools, presented at numerous legal conferences and mentored countless students. His legal volunteer endeavors have included community education projects, free legal clinics, fundraising for pro bono legal services, clothing drives and service on various task forces and commissions.

Fwd: thank you

Subject: thank you

Carol and Anne,

I'm sitting here listening to Justin Welty give a presentation to the FWS sage-grouse team about the sage-grouse Conservation Effects Database that he has been working with us on.....and I just want to say THANK YOU for making this happen. Your support for his time to work with us on this is what made this possible and it is really shaping up nicely. I am impressed with the beta version and with his presentation.

Much appreciation,

Noreen

DOI in the News:

INTERIOR SET TO RELEASE ENVIRONMENTAL ANALYSIS ON ATLANTIC DRILLING. The Environment & Energy Publishing (2/27, 705) reports that the Interior Department is set to release a final environmental analysis this week that could help pave the way for the first seismic studies off the Atlantic Coast. The article notes that "a key lawmaker and an environmentalist today said the Bureau of Ocean Energy Management appears poised to open waters from Delaware to Florida to high-intensity air gun surveys used to reveal the depth and size of oil and

gas off the East Coast." House Natural Resources Committee ranking member Peter DeFazio said, "Unfortunately, I think they are going to move forward." He added, "We wanted to have an intensive study of the potential for wildlife, particularly marine mammal impacts. I don't know why we would go ahead with seismic testing at this point in time without knowing for certain that it isn't going to cause irrevocable harm to protected marine mammals." Meanwhile, Matthew Huelsenbeck, a marine scientist for the environmental group Oceana, said "sources at BOEM say the final plan will allow air gun surveys but with slightly enhanced buffers to protect endangered right whales."

FuelFix (2/26, 7K) reports that "going forward without considering the acoustic guidelines still being developed by the National Marine Fisheries Service could mean underestimating the auditory injuries to dolphins, whales and other sea life from the blasts of compressed air used in the seismic studies, 102 scientists and biologists said in a letter to President Barack Obama." Also, "nine senators underscored the scientists' concerns in their own missive to Interior Secretary Sally Jewell on Wednesday." According to the article, "led by Sens. Cory Booker, D-N.J., Sheldon Whitehouse, D-R.I., and Ed Markey, D-Mass., the group insisted that the coming environmental analysis should be put on hold until 'all of the best available science can be incorporated.'"

SECRETARY JEWELL TO SPEAK AT NATIONAL ASSOCIATION OF COUNTIES CONFERENCE. The West Hawaii Today (2/27, 26K) reports that Interior Secretary Sally Jewell will be among the special guest speakers scheduled for the National Association of Counties conference in Washington, D.C.

Also reporting on the story is the Hawaii Tribune-Herald (2/27, 63K).

SEN. BOXER TO HOST CONGRESSIONAL BRIEFING ON SALTON SEA. The Palm Springs (CA) Desert Sun (2/26, 110K) reports that "in hopes of raising the Salton Sea's profile among federal leaders," Sen. Barbara Boxer on Thursday is "hosting a congressional briefing about the need to revitalize California's largest lake and the related potential to develop renewable energy." The briefing will "feature a panel of five local, state and federal officials who are stakeholders in the long-discussed restoration," including Interior Department Assistant Secretary Anne Castle, "who joined Boxer at the Salton Sea in April 2013."

POINT ARENA-STORNETTA PUBLIC LANDS COULD BE PROTECTED UNDER PRESIDENTIAL AUTHORITY. The Pew Charitable Trusts (2/27) reports that the Point Arena-Stornetta Public Lands is "among the federal lands in numerous states that politicians and conservationists say are overdue for special protected status." The article notes that President Barack Obama's during his State of the Union speech said he would "use my authority to protect more of our pristine federal lands for future generations" and Point Arena-Stornetta is "teed up as a likely place for the president to use his authority."

DRONES COULD REVOLUTIONIZE OUTDOORS EXPERIENCE. For Outside (2/27, 55K), Eric Hansen writes that "camera-equipped flying robots have quickly become a staple of the adventure world, filming first ascents and nailing poachers." Now, "affordable consumer drones will revolutionize how we experience the outdoors. "

FEDERAL GOVERNMENT ON TRACK TO MEET SMALL-BUSINESS CONTRACTING GOAL. The Washington Post (2/27, Hamison, 4.28M) reports that "it appears the federal government has fulfilled its annual contracting promise to small businesses for the first time in seven years — and perhaps just in the nick of time, as lawmakers are looking to raise the bar going forward." According to government data, "federal agencies spent \$83.2 billion at small companies last fiscal year, representing slightly more than 23 percent of the \$355 billion in prime federal contracts officials consider viable for small firms." The article notes that "more than a quarter of the contracts were awarded by the Defense Department, while the SBA, Federal Communications Commission and Interior Department each spent most of their contracting dollars at small businesses, according to the federal government's online small business dashboard, which tracks government spending by agency."

ADDITIONAL COVERAGE OF ANNUAL MEETING OF INTERAGENCY GROUP ON INSULAR AFFAIRS.

Additional coverage of the annual meeting of the Interagency Group On Insular Affairs was provided by the Saipan Tribune (2/27, 641), the Caribbean News Now! (2/27) , and the National Journal (2/27, Subscription Publication, 427K).

ADDITIONAL COVERAGE OF ESSAY CONTEST WINNERS. Additional coverage of the essay contest winners who were scheduled to meet Interior Secretary Sally Jewell on Wednesday was provided by the Great Falls (MT)

Tribune (2/27, 90K) and the Casper (WY) Star-Tribune (2/27, 90K).

CHANGE IN WILDFIRE FIGHTING FORMULA WELCOMED. In an editorial, the Corvallis (OR) Gazette-Times (2/27, 31K) welcomes a proposal by President Barack Obama is to change to the way the federal government pays for fighting the nation's biggest wildfires. According to the paper, "removing...big fires from the regular budget could free up to \$412 million for agencies to use to fund fire prevention and fuel reduction projects – a small step, considering the amount of work to be done in our forests, but a significant one nonetheless."

Also covering the proposal is the "Govbeat" blog of the Washington Post (2/26, Wilson, 4.28M) and the Visalia (CA) Times-Delta (2/26, 42K).

SEN. MURKOWSKI PUSHES FOR ROAD THROUGH IZEMBEK NATIONAL WILDLIFE REFUGE. In an op-ed for the Indian Country Today Media Network (2/26, 21K), Alaska Sen. Linda Murkowski writes that a road through the Izembek National Wildlife Refuge "is common sense and desperately needed," but "to the federal government, it is not worth building." Murkowski claims that "a better understanding of what is at stake – and at risk – shows the breathtaking absurdity of Secretary Jewell's decision." She notes that "over the past 30 years, 19 deaths have been attributed to the lack of a road, either because of plane crashes or residents' inability to reach medical treatment in time," and the Aleut have "stewarded that area for thousands of years before the federal government came along." Murkowski concludes that "the federal government doesn't need to protect the area from them." Rather, "it should learn from the Aleut's example, and respect them by allowing the road to be built."

Also covering the issue are the Nation Sun News (2/27) and FOX News (2/26, 6.72M).

PRESIDENT OBAMA URGED TO KEEP PROMISE TO FULLY FUND LAND AND WATER CONSERVATION FUND. In an op-ed for Roll Call (2/27, Mott, Subscription Publication, 87K), Jared Mott, policy director of the Bull Moose Sportsmen's Alliance, urges President Barack Obama to keep his promise to fully fund the Land and Water Conservation Fund by 2014. According to Mott, "for American sportsmen and women, the conservation of wildlife, habitat and access to public lands are our highest priorities." He warns that "if we do not fully fund and reauthorize the Land and Water Conservation Fund, we stand to lose one of our defining characteristics as a nation."

US URGED TO PAY UNESCO DUES. In an op-ed for the San Antonio Express-News (2/27, 746K), Suzanne Dixon, the Texas regional director for the National Parks Conservation Association, writes that "the San Antonio Missions nomination will be considered by the UNESCO World Heritage Committee in the summer of 2015." According to Dixon, "while our standing with UNESCO should not jeopardize the missions' nomination, it's smart to do all we can to ensure we resume paying World Heritage dues so there is zero chance for politics to enter into a decision that should not be political." Dixon writes, "moving forward, we continue to support a waiver that allows the United States to pay its dues to UNESCO's World Heritage program."

INTERIOR'S SAGE GROUSE EFFORTS CRITICIZED. In his column for the Elko (NV) Daily Free Press (2/27, 22K), Thomas Mitchell criticizes federal efforts to save the greater sage grouse habitat for being inefficient by "canceling out one objective with another." Mitchell notes that "a study in the January issue of *The Condor: Ornithological Applications*. Authors Kristy Howe of the Wildlife Conservation Society and Idaho State University, Peter Coates of the US Geological Survey, and David Delehanty of Idaho State University found that in southeastern Idaho the number of ravens has increased eleven-fold between 1985 and 2009." According to Mitchell, "ravens are one of the primary sage grouse predators." Mitchell observes that "it is richly ironic that at the same time the US Fish and Wildlife Service is pressing to list the greater sage grouse as threatened or endangered under the Endangered Species Act that the Interior continues to encourage renewable energy projects such as wind turbines and solar panels in remote areas that must be connected to the grid via power lines that become sniper nests from which ravens can dispatch sage grouse eggs and hatchlings."

America's Great Outdoors:

National Park Service:

NPS TO PROCEED WITH RELOCATING ARCHIVES FROM BETHUNE HOUSE. The Washington Post (2/27,

Ruane, 4.28M) reports that the NPS says it will move forward with "a controversial plan to relocate a black women's history archive from Washington's Mary McLeod Bethune house but is taking more time to explain the move." NPS Director Jonathan Jarvis wrote in a letter submitted Tuesday to The Washington Post: "A survey by our museum professionals found this irreplaceable collection at high risk. . . . The building has neither fire protection nor adequate temperature and humidity controls." He continued, "Sixty percent of the Bethune archive has been [at the Museum Resource Center] for nearly a decade. It's the best place for the full archive to remain safe and accessible to researchers while we determine if the Council House can be fitted with necessary protective systems." However, "critics said the Park Service has known for years that the carriage house was inadequate," and "they argue that moving the collection would isolate the archive from a site that is holy ground to students of Bethune and the history of African American women."

TIGHTENING RULES ON THE MALL COULD THREATEN SMITHSONIAN FOLKLIFE FESTIVAL. The Washington Post (2/27, Parker, O'Connell, 4.28M) reports that "tightening of National Park Service restrictions on the use of the Mall for festivals and other activities potentially threatens the annual summer Smithsonian Folklife Festival, according to Smithsonian officials." According to the article, "though the festival will still be held on the Mall this year, in a letter this month to the National Park Service obtained by The Washington Post, Smithsonian Secretary Wayne Clough recounted years-long Smithsonian efforts to minimize the festival's impact on the Mall, but raised concerns about its viability there in the future." The Feb. 6 letter stated, "We are disappointed to learn that the final plans for the Mall incorporate too few of the accommodations that had been discussed for us to stage future Folklife Festivals in any form that would be recognizable to our patrons, fundamentally changing the character of this uniquely American Festival."

ATTORNEY: BROWN FOUNDATION PROBE LACKS "CONTEXT". The Topeka (KS) Capital-Journal (2/26, 194K) reports that "an attorney representing the Brown Foundation for Educational Equity, Excellence and Research says a recent federal investigation that found numerous instances of questionable spending by the foundation is 'lacking context.'" Clint Patty, an attorney with Frieden, Unrein and Forbes who represents the foundation, also alleges the NPS "had engaged in a 'long-term effort' to oust the Brown Foundation and Cheryl Brown Henderson, the foundation's president and CEO, from the Brown v. Board of Education National Historic Site, which housed the foundation's office." Patty said, "There were some veiled and not-so-veiled threats (for them) to leave the Brown site."

NEW GLACIER NATIONAL PARK SUPERINTENDENT FACES CHALLENGES. The Ravalli (MT) Republic (2/27, 19K) reports that after spending 21 of the last 25 years in Alaska, Jeff Mow has become the new superintendent of Glacier National Park, replacing Chas Cartwright, who retired in December. He "takes over at a critical time for Glacier." The article notes that "the park is in the process of producing a corridor management plan that addresses the traffic and congestion on its iconic highway, Going-to-the-Sun Road." Meanwhile, "sequestration has forced cuts in visitor services, and Mow must run a million-acre national park that draws roughly 2 million visitors annually on a \$12.5 million budget." Also, "Glacier's spectacular but creaking hotels are at or nearing their 100th year of operation," and "the concessionaire that ran them for the past 30 years, Glacier Park Inc., has been replaced by a new company after a bidding process." Finally, "the glaciers that are Glacier's namesake are rapidly disappearing in the face of a warmer world."

NPS REJECTS DAFT PUNK PROPOSAL FOR DEVILS TOWER. The Billings (MT) Gazette (2/27, 206K) reports that the NPS said Tuesday that it has rejected a proposal by Daft Punk to host a show on private land adjacent to Devils Tower National Monument. Reed Robinson, superintendent for Devils Tower National Monument, said "the park consulted with six American Indian tribes about the proposal, all of which generally agreed that it would be a disrespectful use of one of the country's most sacred American Indian sites." Robinson said, "No event is going to be occurring in Devils Tower. Anything that was proposed is a non-starter, is considered an adverse action according to the National Historic Preservation Act, and goes against the Park Service management approach."

NPS OPPOSES BILL TO RENAME YOSEMITE PEAK AFTER 19TH CENTURY PRESERVATIONIST. The Los Angeles Times (2/27, Simon, 3.07M) reports that Congress is considering a bill to rename a Yosemite peak for Jessie Benton Fremont, wife of John C. Fremont. However, the NPS is opposed. Victor Knox, the park service's associate director for park planning, facilities and lands, said at a congressional hearing Wednesday, "Though Jessie Benton Fremont was an important figure in the advocacy for and establishment of the Yosemite Grant, there is no direct or long-term association between her work and Mammoth peak." Rep. Tom McClintock, "the

bill's author, dismissed the National Park Service position as 'absolutely laughable' and 'rank partisanship.'

D.C. CIRCULATOR CONSIDERING NEW ROUTES, NEW FARES. In its "Dr. Gridlock" blog, the Washington Post (2/26, Thomson, 4.28M) reports that "managers of the D.C. Circulator bus system are set to re-introduce a route around the National Mall in 2015, but they also will consider other new routes and expansions of existing routes." According to D.C. transportation planner Circe Torruellas,, "the original intent of the city's bus system was to connect activity centers and that remains a top priority." Torruellas said DDOT is working with the NPS to "design Circulator stops for easy ingress and egress, something that should limit traffic difficulties along Madison and Jefferson drives, which are part of the planned Mall route."

GRAND CANYON NATIONAL PARK CELEBRATES 95TH ANNIVERSARY. KPTV-TV Portland, OR (2/27, 57K) reports that Grand Canyon National Park is celebrating its 95th anniversary. The article notes that "earlier this month, Arizona's largest public utility donated \$1 million to benefit trails at the Grand Canyon." Park Superintendent Dave Uberuaga said "the money from Arizona Public Service Co. will help reduce a backlog of trail maintenance that has topped \$40 million."

OLYMPIC NATIONAL PARK PROPOSES MINOR CHANGES TO RECREATION FISHING REGULATIONS. The Peninsula (WA) Daily News (2/27, 41K) reports that Olympic National Park is "proposing minor changes to recreational fishing regulations within the park." According to the article, the "proposed changes apply to non-tribal, recreational fisheries within the boundaries of Olympic National Park." The proposed changes would "clarify and simplify park regulations near the river mouths, improve consistency of the park's regulations regarding non-retention of wild fish, and eliminate the need for annual changes to gear and hatchery limits since they would conform to state regulations in those areas."

Bureau of Land Management:

SEN. REID THREATENS TO WITHDRAW SUPPORT FOR TULE SPRINGS MONUMENT BILL OVER AMENDMENT. The Las Vegas Review-Journal (2/27, 437K) reports that Sen. Harry Reid threatened to pull his support for the Las Vegas Valley Public Lands and Tule Springs Fossil Beds National Monument Act after last-minute changes to the measure by House Republicans Wednesday. Reid criticized what he called an effort by the House Natural Resources Committee to gut the Southern Nevada Public Land Management Act.

The Las Vegas Review-Journal (2/27, 437K) reports that House leaders agreed to delay committee votes Thursday on the bill.

BLM BACKS MESQUITE'S REQUEST FOR MORE TIME FOR FEDERAL LAND BUYS. The Las Vegas Review-Journal (2/27, 437K) reports that a request by Mesquite leaders for more time to buy federal land received support from the BLM Wednesday. A bill by Rep. Steven Horsford would extend the deadline to November 2021. Michael Nedd, a BLM assistant director, told the House public lands subcommittee that the bureau supported the extension.

Fish and Wildlife Service:

FWS PROPOSES DELISTING TWO DEATH VALLEY PLANTS. The Los Angeles Times (2/26, Sahagun, 3.07M) reports that on Wednesday, the FWS proposed that the Eureka Valley evening primrose and Eureka dune grass be "removed from" the endangered species list because "their populations have stabilized in a region that became part of Death Valley National Park in 1994." According to the article, "environmentalists were cautiously optimistic about the proposal announced in the Federal Register." Tierra Curry, a senior scientist at the Center for Biological Diversity, said, "This is an example of what can happen when off-road vehicles are no longer crushing rare desert plant species and habitat under their wheels." Curry added, "Beyond that, these two unique California plants join a growing number of vulnerable species saved from extinction by the Endangered Species Act, which has been hard at work for 40 years now."

A MEXICAN GRAY WOLF TO BE CAPTURED ALIVE FROM GILA NATIONAL FOREST. The Silver City (NM) Sun-News (2/27, 24K) reports that the Department of Fish and Wildlife Services "put out an order on Feb. 12 to capture an uncollared Mexican gray wolf in the area where the Fox Mountain Pack roams, south of Quemodo

near Fox Mountain in the Gila National Forest." According to the article, "the reason for the live capture of this endangered species is because of five reported livestock deaths within the past year." However, Michael Robinson, conservation advocate for the Center for Biological Diversity, said, "They're not likely to catch the animal that did the killing. This is an imprecise way of addressing livestock deprivation." In response, Maggie Dwire, assistant Mexican wolf recovery coordinator for the FWS, said, "Because wolves feed and kill as a pack, it is often difficult to distinguish which individual wolves are involved in the depredation. Given the background of the Fox Mountain Pack, we assume that all wolves within the pack may have been involved in depredations in the past."

SOME RESIDENTS DISAGREE WITH FWS ON HYDE COUNTY LAKE'S FUTURE. The AP reports that some residents disagree with the UFWs on the management of a Hyde County lake. According to the article, "a local business owner says managers of the Lake Mattamuskeet National Wildlife Refuge have allowed the water levels to decline too much over the past decade." Mark Carawan "leads an effort called 'Save Mattamuskeet Lake,' and worries that fishing is drying up on the 40,000 acre lake."

BREEDERS' LAWSUIT OVER REPTILE BAN CRITICIZED. In his column for the Miami Herald (2/27, Grimm, 806K), Fred Grimm criticizes the lawsuit by the United States Association of Reptile Keepers over the ban by the FWS on the sale and import of four kinds of giant constrictors. Grimm claims the snakes "can't be stopped" because the Everglades is "too vast and too similar to their native habitat." According to Grimm, "the damage being wreaked by discards of the exotic pet trade hereabouts incalculable," which "makes the lawsuit filed by the reptile keepers association, complaining about the economic damage members are suffering from a ban on the import and interstate sale of certain constrictors, seem utterly audacious."

US Geological Survey:

USGS STUDY TIES DROP IN POWDER RIVER WATER QUALITY TO METHANE PRODUCTION. The Casper (WY) Star-Tribune (2/27, 90K) reports that "water quality deteriorated at some sites along the Powder River after the boom in coal-bed methane production, according to a new government study." The USGS "found elevated levels of sodium at three testing sites downstream from the town of Arvada." The article notes that "those sites also registered higher alkalinity, which could indicate elevated bicarbonate levels, and increased sodium absorption rates between 1980 and 2010."

USGS RELEASES WATERSHED MAPS THAT CROSS U.S.-CANADA BORDER. The Ravalli (MT) Republic (2/27, 19K) reports that the USGS has "released a 'harmonized' set of maps of the watersheds that cross the U.S.-Canada border." The maps include 120 areas from the Alaska-Yukon to the Maine-New Brunswick border edges.

Securing America's Energy Future:

Renewable Energy:

CAPE WIND RECEIVES LOAN COMMITMENT FROM DANISH CREDIT AGENCY. The New York Times (2/27, Seelye, Subscription Publication, 9.61M) reports Cape Wind said yesterday "that it had received a new loan commitment that would allow it to finish its financing this fall and begin producing power by 2016." In an email, Cape Wind spokesman Mark Rogers said, "We expect to complete project financing in Q3. ... We will begin construction (on land) shortly thereafter. We will begin ocean construction in 2015 and commission the project in 2016." The "timetable" is the most recent "in a series of projected target dates from the company since it first proposed the wind farm in 2001." The project "still faces various hurdles, and opponents question whether it will be able to meet this new deadline."

The AP (2/27) reports that EKF, a Danish export agency, has granted approval to "a \$600 million loan to the Cape Wind offshore energy project, the project's president announced Wednesday." Cape Wind President Jim Gordon said, "EKF is a very knowledgeable and experienced investor in the offshore wind industry and they recognize that Cape Wind makes sense both economically and environmentally."

The Boston Herald (2/27, 643K), the Wall Street Journal (2/27, Bomsdorf, Subscription Publication, 5.91M),

Reuters (2/27, Valdmanis) and Bloomberg News (2/26, Doom, 1.91M) also provide coverage of this story.

BIA TO FILE FINAL ENVIRONMENTAL IMPACT STATEMENT FOR MOAPA SOLAR PROJECT. The Renewable Energy World (2/27, 2K) reports that the BIA "intends to file a final environmental impact statement for the proposed RES Americas Moapa Solar Energy Center on the Moapa River Indian Reservation in Clark County, Nevada." The BIA said "in a notice to be published in the Feb. 14 Federal Register that it is the lead agency on this review process, along with the Bureau of Land Management (BLM), the Environmental Protection Agency (EPA), the National Park Service (NPS), and the Moapa Band of Paiute Indians."

STUDY SUGGESTS OFFSHORE WIND FARMS COULD LESSEN IMPACT OF HURRICANES. WWAY-TV Wilmington, NC (2/26, 7K) reports that "a new study shows offshore wind farms could actually tame beastly storms, making them less deadly and less expensive." Mark Jacobson, an engineering professor at Stanford University, "and his team used complex modeling to figure out the impacts large wind farms would have had on three mega-storms: Sandy, Isaac, and Katrina." The researchers "found that more than 80,000 50ft wind turbines off the east coast could have reduced Sandy's winds up to 87 miles per hour and its storm surge up to 34%."

Onshore Energy Development:

ONRR ISSUES CIVIL PENALTY TO CHESAPEAKE OVER ROYALTY REPORTS. The Oklahoman (2/27, 345K) reports that the Department of the Interior's Office of Natural Resources Revenue has assessed Chesapeake Energy Company a \$428,400 civil penalty for "knowing or willful submission" of inaccurate royalty reports. ONRR Director Greg Gould said, "It is imperative that companies file accurate and timely reports required by existing law so ONRR can ensure American Indian and taxpayer assets are protected. It is simply unacceptable that a company continues to file inaccurate reports after an audit order instructed the company to make the necessary corrections."

Offshore Energy Development:

FORMER BP EXECUTIVE TRIAL DELAYED. The AP (2/27) reports that US District Judge Kurt Englehardt has thrown out obstruction-of-Congress charges for David Rainey, former BP vice president of exploration for the Gulf of Mexico during the 2010 spill, but prosecutors have appealed and brought a new indictment on the same charges. Englehardt has ruled that it is "not clear that the obstruction law applies to subcommittees and that the indictment failed to allege that Rainey knew of the pending congressional investigation he was charged with obstructing." The AP reports that the 5th US Circuit Court of Appeal has scheduled arguments for the week of April 28th.

BP FORCED TO CONTINUE SEAFOOD PAYMENTS. Bloomberg News (2/26, Feeley, 1.91M) reports that BP PLC will have to continue its \$1.3 billion in payments to seafood workers on the Gulf Coast affected by the oil spill. US District Judge Carl Barbier has rejected BP's argument that fraud allegations against Mikal Watts should lead to a suspension of payments. Bloomberg reports that Barbier told BP that he did not want to "hold up everyone else...until we sort out your case against Mr. Watts."

The AP (2/27, McGill) also reported on the story.

NO INJURIES IN LOUISIANA GAS WELL BLOWOUT. The AP (2/27) reports that there were no injuries in a Tuesday gas blowout at a Black Creek Drilling site in Acadia Parish, Louisiana.

OCEANA WELCOMES SHELL'S DECISION TO DROP ARCTIC DRILLING FOR 2014. For the Huffington Post (2/27, Danson, 11.54M), Oceana's Andrew Sharpless and Ted Danson the decision by Shell not to pursue exploration drilling in the Arctic Ocean in 2014 is "great news for the Arctic ecosystem – home to vast expanses of important habitat for marine life, including many species of fish." They claim that "Alaska has already seen more than its fair share of oil disasters, and drilling in the Arctic will inevitably bring another spill." The authors also urge the US government to "stop and fully evaluate the potential risks and benefits of Arctic drilling," because "when they do so, it will be clear that energy companies are not prepared to carry out oil and gas activities safely in the Arctic Ocean."

Tackling America's Water Challenges:

PROPOSED WATER CUTS IN SACRAMENTO VALLEY PROTESTED. The [Sacramento \(CA\) Bee](#) (2/26, 749K) reports that "the strain on water supplies in this serious drought year was evident this week, as major landowners in the Sacramento Valley protested the federal government's forecast that it will deliver only 40 percent of usual water supplies." According to the article, "the protests are coming from a range of interests: the Glenn-Colusa Irrigation District, which distributes water to farmers in the Sacramento Valley; the Conaway Preservation Group, which owns farmland in the Yolo Bypass; and the city of Redding." BOR spokesman Louis Moore said, "We know this is unprecedented. We know that it is difficult. But we really just don't have the resource available."

Additional coverage of the drought was provided by the [Baltimore Sun](#) (2/27, 812K) and the [Southern California Public Radio](#) (2/26, 57K).

SENS. UDALL, HEINRICH SUPPORT LEGISLATION TO SECURE WATER RESOURCES IN NEW MEXICO. [KRWG-FM](#) Las Cruces, NM (2/27, 5K) reports that Sens. Tom Udall and Martin Heinrich are supporting "legislation to conserve water resources and promote sustainability." According to the article, "the SECURE Water Amendments Act of 2014 would expand grants and increase funding for water conservation and drought projects, and provide resources for better data collection and analysis of water supply and use." The bill will receive a hearing on Thursday.

Empowering Native American Communities:

OBAMA ADMINISTRATION TO PAY 2015 TRIBAL CONTRACT SUPPORT COSTS IN FULL. The [Indian Country Today Media Network](#) (2/26, 21K) reports that "soon after the White House confirmed last week that 2014 tribal contract support costs would be fully funded, administration officials are confirming this week that the president's 2015 budget also calls for full funding in this area." The article notes that "the decision is a dramatic reversal from the White House's plan last year to cap tribal contract support costs owed to tribes." A White House official said, "While the discretionary funding caps in FY 2015 required tough decisions, the administration has given priority to Native American programs."

For the [Indian Country Today Media Network](#) (2/26, 21K), Mark Trahan, the 20th Atwood Chair at the University of Alaska Anchorage, writes that "President Obama's next budget, due to be released soon, will be good news for Indian country." Although austerity won't "end in Indian country," Trahan notes that the "budget is a new approach – and it will have many implications in Indian country."

CONNECTICUT GOV. MALLOY OPPOSES TRIBAL RECOGNITION PROPOSALS. The [AP](#) (2/27) reports that Connecticut Gov. Dannel P. Malloy on Monday delivered a letter to President Barack Obama expressing opposition to certain revisions to tribal recognition rules being considered by the BIA. Malloy said that "the proposals as written would unfairly affect the state of Connecticut because of criteria that would appear to benefit three tribes that already have lost bids for recognition." Malloy said "consequences of approval for those tribes would be 'devastating' because they have pending claims to vast areas of fully developed land."

Also reporting on the story are the [New London \(CT\) Day](#) (2/26, 76K) and the [Norwich \(CT\) Bulletin](#) (2/26, 47K).

ARIZONA EDUCATORS LAUD BIE EARLY-CHILDHOOD PROGRAM. The [Cronkite News](#) (2/27) reports that "Arizona educators Wednesday praised a Bureau of Indian Education program that gets Native American parents actively engaged in the education of their children from birth until kindergarten." The article notes that "Arizona has eight of the nation's 43 Family and Child Education, or FACE sites, which assist tribal families in home-based, early childhood and adult education, and job training." Jacquelyn Power, the superintendent and principal of Blackwater Community School, a school on the Gila River Indian Reservation, said, "The FACE model recognizes that education begins at birth and parents are the first and most important teacher of their child." Power was "one of five witnesses who testified at a Senate Indian Affairs Committee oversight hearing on the progress of early childhood development and education in Indian Country."

SEN. BEGICH DISCUSSES INDIAN AND ALASKA NATIVE CONCERNS. In an interview with the [Indian Country Today Media Network](#) (2/26, 21K), Alaska Sen. Mark Begich discussed Alaska Native and American Indian

issues. Begich talked about "how he is now turning his sights on achieving a 100 percent clean Carcieri fix to the controversial 2009 Supreme Court decision that negatively impacts tribal trust lands, fixing the broken justice system for Alaska Natives, and he vows not to be partisan in considering the nomination of Cherokee Nation citizen Keith Harper to become a UN human rights ambassador."

Top National News:

IN ST. PAUL, OBAMA MAKES HIS CASE FOR INFRASTRUCTURE INVESTMENTS. President Obama's appearance in St. Paul to make the case for increased Federal infrastructure spending was not covered by any of the three network newscasts Wednesday evening, nor was it a major topic of discussion on cable news. This morning's coverage emphasizes that the President proposed to pay for transportation projects with savings from tax reform, rather than a hike in the Federal gas tax, which some analysts say gives it a better a chance in Congress.

Bertha Coombs of CNBC (2/26, 1.52M) reported that the President "proposes paying for this spending with what we call ' pro-growth business tax reform,' In other words...closing tax loopholes." However, Coombs also reported that while the President "says the spending will stimulate the economy and create jobs...he knows it has little chance of happening this year with Republicans in control of the House." President Obama was shown saying, "Infrastructure didn't used to be a partisan issue. ... Unfortunately time and again over the past few years there's been some Republicans in Congress who have refused to act on common-sense proposals to create jobs and grow our economy." On Fox News' Special Report (2/26, 2.15M), Bret Baier briefly noted that the President had been in Minnesota "to push for more spending on infrastructure repairs."

The AP (2/27, Pickler) reports that on Wednesday, the President said he "will ask Congress for \$300 billion to update aging roads and railways, arguing that the taxpayer investment is a worthy one that will pay dividends by attracting businesses and helping put people to work." The AP adds that "funding for surface transportation programs expires later this year, and the White House says 700,000 jobs could be at risk." The President is quoted as saying, "At a time when companies are saying they intend to hire more people this year, we need to make that decision easier for them."

Under the headline "Obama Pitches Plan To Fix Crumbling U.S. Roads, Bridges," Reuters (2/27, Rampton) quotes the President as saying, "If Congress doesn't finish a transportation bill by the end of the summer, we could see construction projects stop in their tracks, machines sitting idle, workers off the job." Reuters notes that the President added, "Nobody knows better than Minnesotans, when we've gone through a winter like this – roads are wrecked, full of potholes, all across the country." The Los Angeles Times (2/27, Hennessey, 3.07M) reports that Transportation Secretary Foxx, "who traveled with the president, dubbed the deadlines the 'transportation cliff.'"

The New York Times (2/27, A15, Shear, Davenport, Subscription Publication, 9.61M) reports that the President "urged lawmakers to overhaul corporate and business taxes to pay for repairing and replacing the nation's aging roads, rails, bridges and tunnels." The Times goes on to note that the President "avoided the politically treacherous solution that most transportation experts say is necessary in the short term: raising the federal gas tax that has been frozen at 18.4 cents per gallon for the past two decades." The Times says the President "opposes a gas-tax increase," and, "instead...offered a stopgap proposal for fixing some of the nation's crumbling infrastructure that White House officials hope will appeal to" some Republicans.

The Washington Post (2/27, Eilperin, 4.28M) notes that also on Wednesday, House Ways and Means Chairman Dave Camp "unveiled his own plan to rework the U.S. tax code, with a proposal that would dedicate \$126.5 billion to fund highway and infrastructure investment," and, according to the Post, "the dueling proposals suggested the two parties might reach some sort of accord on the highway bill before funding expires in September." The Post adds that House Transportation and Infrastructure Chairman Bill Shuster "issued a statement praising Camp's plan," but said he is "willing to look at Obama's proposal as well."

According to the Los Angeles Times (2/27, Hennessey, 3.07M), on Wednesday in St. Paul, the President "offered cautious praise for" Camp's "tax reform effort that could help foot the bill for major infrastructure investments." The Bloomberg News (2/27, Keane, 1.91M) reports that "business groups have said infrastructure

spending is needed to boost U.S. economic growth," and that "transportation funding was one of the subjects that Obama discussed Tuesday during a private meeting at the White House with" House Speaker Boehner.

The Wall Street Journal (2/27, Favole, Subscription Publication, 5.91M) reports that on Wednesday in Washington, Boehner said, "We've got to find the funding mechanism to fund our infrastructure needs, and so the hunt has been under way for the last year and a half to find that funding source. I wish I could report to you that we've found it, but we haven't."

The Washington Times (2/27, Wolfgang, 417K) notes that also on Wednesday in St. Paul, the President "proposed another \$600 million in competitive grant funding through" the Transportation Department's Transportation Investment Generating Economic Recovery program (TIGER), "which began as a part of the president's 2009 stimulus package."

According to the Minneapolis Star Tribune (2/27, Mitchell, 1.14M), "the grant program has been generous to Minnesota" and "provided \$35 million to help fund the renovation of" St. Paul's Union Depot, but has also "been a popular target for Republican lawmakers looking to trim the federal budget." The St. Paul (MN) Pioneer Press (2/27, Salisbury, 540K) reports that "long lines formed early" at the Union Depot, and that the President "toured the Metro Transit Light Rail Operations and Maintenance Facility in St. Paul before making his speech." According to the Pioneer Press, "the Union Depot seemed a natural spot for the speech" since it "recently underwent a \$243 million makeover in hopes of creating a transportation hub."

In another article, the Pioneer Press (2/27, Melo, 540K) reports that former Minneapolis Mayor R.T. Rybak said, "Facing the worst economic crisis since the Depression, the president brought money here to St. Paul, and you see that today. He took massive grief for it, but he led." The Minneapolis-St. Paul (MN) Business Journal (2/27, Black, Subscription Publication, 13K) notes that the President "was greeted at Minneapolis-St. Paul International Airport by St. Paul Mayor Chris Coleman and Minneapolis Mayor Betsy Hodges."

FEDERAL JUDGE STRIKES DOWN TEXAS BAN ON SAME-SEX MARRIAGE. The New York Times (2/27, Fernandez, Subscription Publication, 9.61M) reports that Federal Judge Orlando Garcia of the US District Court for the Western District of Texas on Wednesday struck down Texas' ban on same-sex marriage, "ruling that the laws restricting marriage to a man and a woman violated the United States Constitution." The ruling hands "gay-rights advocates a major legal victory in one of the nation's biggest and most conservative states." Garcia said, "Without a rational relation to a legitimate governmental purpose, state-imposed inequality can find no refuge in our United States Constitution."

USA Today (2/27, Stanglin, Winter, 5.82M) reports Garcia "rejected the argument by the office of Texas Attorney General said each state has the right to define marriage as best fits the traditions of its citizens." Texas "also argued that traditional marriage best supports the state's interest in the area of procreation and child rearing."

ABC World News (2/26, story 4, 0:20, Sawyer, 7.43M) reported that in Texas, "a Federal judge struck down the Texas ban on same-sex marriage. No marriages can take place until the appeals court rules. But if it holds, Texas will join this map – 17 other states and the District of Columbia – where gay marriage is legal in America."

The Wall Street Journal (2/27, Koppel, Subscription Publication, 5.91M) reports that Texas Attorney General Greg Abbott, who is running for governor, is expected to appeal the ruling, though he didn't immediately comment. However, Gov. Rick Perry said, "Texans spoke loud and clear by overwhelmingly voting to define marriage as a union between a man and a woman in our [state] Constitution, and it is not the role of the Federal government to overturn the will of our citizens. We will continue to fight for the rights of Texans to self-determine the laws of our state."

The Los Angeles Times (2/27, Hennessy-Fiske, 3.07M) reports that the gay couple who were among those that filed the suit said, "Ultimately, the repeal of Texas' ban will mean that our son will never know how this denial of equal protections demeaned our family and belittled his parents' relationship. We look forward to the day when, surrounded by friends and family, we can renew our vows in our home state of Texas."

NYTimes/CBS News Poll Finds 40% Of Republicans Now Back Same-Sex Marriage. The New York Times (2/27, Martin, Thee-Brenan, Subscription Publication, 9.61M) reports that its latest poll with CBS News finds that

"Republican support for same-sex marriage is on the rise. In the fall of 2012, just 24 percent of Republicans backed legalizing the unions; now 40 percent of Republicans do so."

BREWER VETOES CONTROVERSIAL RELIGIOUS FREEDOM BILL. Arizona Gov. Janet Brewer on Wednesday vetoed a bill that would have allowed business owners to deny service to others on religious grounds, which was widely viewed as targeting gays and lesbians. She had come under pressure not just from the left, but also from numerous prominent Republicans.

The Arizona Republic (2/27, Sanchez, 1.19M) reports that facing "intense pressure from political and business interests," coupled to a "growing public outcry," Brewer on Wednesday vetoed Senate Bill 1062, "the divisive right to refuse service legislation." She said that bill "was unnecessary legislation that threatened the state's recovering economy by driving away high-profile events such as next year's Super Bowl and corporations looking to relocate to Arizona." The veto "capped a week of escalating furor over the bill that once again catapulted Arizona's political into the national spotlight."

The AP (2/27, Christie) reports that "loud cheers erupted outside the Capitol building" after Brewer announced her veto. Brewer said at a news conference, "My agenda is to sign into law legislation that advances Arizona. I call them like I see them despite the tears or the boos from the crowd. After weighing all the arguments, I have vetoed Senate Bill 1062 moments ago." Brewer warned that the bill "could divide Arizona in ways we could not even imagine and no one would ever want." The GOP-backed bill was "designed to give added protection from lawsuits to people who assert their religious beliefs in refusing service to gays," but critics said it was "an open attack on gays that invited discrimination."

The Washington Post (2/27, Blake, 4.28M) reports that Brewer said at her press conference that the bill "does not address a specific or pressing concern," adding, "I have not heard of one example in Arizona where business owners' religious liberty has been violated. The bill is broadly worded, and could result in unintended and negative consequences." The Post says that the legislation was "passed in response to a ruling by the New Mexico state Supreme Court against a wedding photographer who declined to work for a couple's same-sex wedding."

The Washington Times (2/27, Richardson, 417K) reports Brewer "defended her record on religious liberty," saying, "I have protected religious freedoms when there is a specific and present concern that exists in our state, and I have the record to prove it."

The Wall Street Journal (2/27, Audi, Subscription Publication, 5.91M) reports the decision earned plaudits from gay-rights groups, who argued that it would have allowed businesses to discriminate against gay and lesbian customers.

In a story written before the veto, the Arizona Republic (2/27, Sanchez, 1.19M) reports that Brewer's office "has been flooded with more than 20,000 e-mails, letters and phone calls from Arizonans and people across the USA" looking to influence her decision.

The AP (2/27, Christie) reports that Brewer held meetings with both opponents and proponents of the bill before her announcement on Wednesday.

All three network news programs broadcast coverage of the issue prior to Brewer's veto. In its lead story, the CBS Evening News (2/26, lead story, 1:55, Pelley, 5.58M) ran a lengthy overview and reported that "rarely has an impending decision by a state governor gotten so much national attention."

NBC Nightly News (2/26, story 9, 0:30, Williams, 7.86M) reported that the bill "would essentially allow business owners to turn away gays or lesbians or just about anyone for that matter based on their religious beliefs." ABC World News (2/26, story 3, 0:35, Sawyer, 7.43M) reported that "a lot of big names, like John McCain and Mitt Romney," warned Brewer "not to sign that bill," and adds that more than 65,000 "have joined the push, signing a petition, urging Brewer not to sign the bill."

Prominent Republicans Saw Bill As Distraction, Harmful. The New York Times (2/27, Santos, Subscription Publication, 9.61M) reports calls for a veto from "prominent Republicans," such as Romney and Ari Fleischer, "appeared on Twitter, among the thousands of posts on the microblogging site." Among those that Brewer met

with on Wednesday was state Sen. Steve Pierce, "who voted for the measure, approved on Thursday on a 17-13 party line vote, and then regretted it, joining two colleagues in a letter to the governor urging her to reject the bill."

Politico (2/27, Weinger, Mccalmont, 464K) reports that Sens. McCain and Jeff Flake, both Republicans, called on Brewer to veto the bill, while the "line from many national Republicans on the Arizona law was clear: Make it go away." The "firestorm" over the legislation "was taking critical time away from issues such as health care and the economy that those in the party would rather emphasize, several members of Congress told POLITICO earlier this week."

Some Conservatives Back Legislation. The Huffington Post (2/27, Ashtari, 11.54M) reports that while many Republicans nationally opposed the legislation, the Heritage Foundation "maintained support for the bill in a blog post on Tuesday." In addition, National Review ran an editorial on Monday backing the bill.

Other States Considering Similar Legislation. Politico (2/27, Drusch, Kopan, 464K) reports that other states have "moved toward similar measures within their own borders." For example, a Missouri state senator on Monday introduced a bill similar to Arizona's, while in Georgia "two versions of a similar bill in the state House and Senate are moving quickly through the Legislature." And in Kansas, "a similar bill already passed Republican-led House earlier this month." Other states considering such bills include Ohio, Mississippi, Idaho, South Dakota, Tennessee and Oklahoma.

Poll Shows Growing Support For Gay Marriage, Even Among Religious Americans. The Christian Science Monitor (2/27, Swan, 540K) reports that a new survey conducted by the Public Religion Research Institute shows that "support for gay marriage may have reached a tipping point, even among religious Americans, who have been traditionally opposed to the idea." In a Pew Survey ten years ago, "roughly one-third" of Americans supported gay marriage, but in the new survey, 53% said that "they believe gay and lesbian couples should be allowed to marry." However, the poll shows "that levels of support vary drastically by region, state, generation, and education level." The Monitor says that "what is surprising is that religion seems to play a much smaller role than it did a decade ago in how individuals decide where they stand on gay marriage."

More Commentary. In her column for the New York Times (2/27, Subscription Publication, 9.61M), Gail Collins writes that Brewer "is an erratic politician, but she's not crazy," and it "would have been hard to ignore the pressure." Noting that the business community was heavily opposed to the legislation, Collins writes that this "has been building up for a long time." Arizona's "old order" has "been fuming because it's been elbowed out of political control by people who are less interested in economic development than arresting illegal immigrants, exposing Barack Obama as a Kenyan and combating the scourge of same-sex marriage."

In his column for the New York Times (2/27, Subscription Publication, 9.61M), Charles Blow writes that the "backlash" to the bill was "swift and strong," but "the damage to the Republican brand has already been done." History, Blow writes, "doesn't look kindly on those who stand against equality," but that is "where conservatives have chosen to stand, much to my dismay and their detriment."

In his column for the Washington Post (2/27, 4.28M), E.J. Dionne writes that "social and religious conservatives should have been the first to oppose" the bill because pushing "conscience exemptions" "beyond reasonable limits threatens a long-standing American habit of having government go out of its way to accommodate the commitments of religious people." He adds that using conscience exemptions "to facilitate backdoor resistance to social change takes something precious and turns it into a cheap political tactic."

Editorial Wrap-Up:

NEW YORK TIMES. "A Simpler Tax Plan, Not A Better One." The New York Times (2/27, Subscription Publication, 9.61M) editorializes that House Ways and Means Chairman Dave Camp's tax overhaul plan "ensures that there will be no tax reform in the near future. It refuses to ask for greater sacrifice from the rich to bring in desperately needed revenue for rebuilding the country and improving education. ... Hard-line conservatives, on the other hand, insist that changing the tax code should include slashing revenue, which the proposal avoids." The Times says "the goal should not be a system that leaves the wealthy undertaxed, doing nothing to reduce income inequality."

"Better Lawyering For The Poor." The New York Times (2/27, Subscription Publication, 9.61M), in an editorial, praises Jonathan Lippman, the Chief Judge of the New York Court of Appeals, for "starting...a new program [that] will let third-year law students take the bar exam in February instead of July, in exchange for spending their last semester doing free legal work for the poor." According to the Times, Lippman "is also seeking to have more non-lawyers assist unrepresented litigants in housing, consumer debt and other cases."

"Liar's Jackpot."

WASHINGTON POST. "Dead On Arrival." The Washington Post (2/27, 4.28M) editorializes that "in a properly functioning Washington," House Ways and Means Chairman Dave Camp's tax overhaul proposal "would kick off a major debate over how to fix the federal government's inefficient system of revenue collection. ... In the actual Washington, alas, Mr. Camp's proposal has basically no chance of passage, or even of being acted upon this year." While the Post says "not everything" in the "fine print strikes us as sensible," Camp's "proposal is a serious approach to a serious problem."

"China's Uncharged Prisoners." In an editorial, the Washington Post (2/27, 4.28M) decries China's persecution of the families of dissidents, citing the house arrest of Liu Xia, wife of Liu Xiaobo, who is serving an 11-year prison term "on charges of subversion for his role in co-authoring and distributing Charter 08, a call for democratic freedoms in China." The Post argues that while the Obama Administration treats human rights as "something to be mentioned but not allowed to interfere with the important work of bilateral relations," the "new model of great-power relations' that China envisions cannot succeed as long as its rulers are silencing their own citizens."

"Shunning Voters In Virginia." In an editorial, the Washington Post (2/27, 4.28M) decries the fact that Republicans in Virginia have "been shunning primaries in recent years," and the "effect has been a string of losses in general elections by unimpeachably conservative candidates." Now, the state's Democrats "seem to be following suit – at least" in the open VA10 race. The Democrats "announced that, for two weeks starting March 29, it will hold something called 'unassembled caucuses' to select delegates affiliated with candidates, after which the delegates will hold a convention in late April to choose the party nominee." The Post says that the convoluted process will likely drive away "thousands of potential voters."

WALL STREET JOURNAL. "Tax Reform For Growth." The Wall Street Journal (2/27, Subscription Publication, 5.91M) says in an editorial that House Ways and Means Chairman Dave Camp spent three years working on his tax overhaul plan and has crafted a proposal that would be more fair, more efficient, and promote economic growth over redistribution of wealth. The Journal says the weaknesses in the plan are mostly in Camp's attempts to win Democratic support.

"Who Stabbed Kevin Lau?" An editorial in the Wall Street Journal (2/27, Subscription Publication, 5.91M) urges a investigation into the stabbing, in Hong Kong, of journalist Kevin Lau, who has been critical of the Hong and Chinese governments. The Journal argues that the widespread speculation that the attack was politically motivated is justified, and expresses hope that Hong Kong's chief executive, Leung Chun-ying, who called the attack a "savage act," will seek the attacker and any accomplices even if the search leads to mainland China.

"Ray Kelly Was Right." The Wall Street Journal (2/27, Subscription Publication, 5.91M), in an editorial, welcomes the move by Federal Judge William Martini to throw out a lawsuit over the New York Police Department's anti-terrorism surveillance. The Journal notes that in response to the plaintiffs claim that Muslims were unfairly targeted, Martini wrote that the NYPD focused on the Islamic community in an effort "to locate budding terrorist conspiracies" because it was Muslim terrorists who perpetrated the attacks on the September 11, 2011 and the "surveillance of the Muslim community began just after the attacks." The Journal points out that Martini added that the NYPD "could not have monitored New Jersey for Muslim terrorist activities without monitoring the Muslim community itself."

Moderator: Kathleen Newland, Director, Refugee Protection Program, MPI. Media Contact: Michelle Mittelstadt, 202-266-1910, mmittelstadt@migrationpolicy.org. Location: Migration Policy Institute, 1400 16th St. NW, Suite 300.

U.S. PIRG – CONSUMER COMPLAINTS – 10 a.m. U.S. PIRG Education Fund will release a report analyzing consumers complaints about debt collection, including the most common problems, the companies causing the most headaches for consumers, and how complaints are resolved. This is the fifth report in a series from the U.S. PIRG Education Fund that analyzes complaints in the Consumer Financial Protection Bureaus public Consumer Complaints Database. Contacts: Laura Murray lmurray@pirg.org (202-461-3830). On the Net: www.uspirgedfund.org. Notes: There will be no press event. This is the time the report will be posted to the www.uspirgedfund.org website.

WOMEN OF THE SENATE – 10 a.m. The third annual Allegheny College Prize for Civility in Public Life will be awarded to the “Women of the Senate”. President James H. Mullen, Jr. will award the 2014 Prize. U.S. Senators Susan Collins (R-ME) and Barbara Mikulski (D-MD), the ranking Republican and Democrat members of the women of the Senate, will accept the award on their colleagues behalf. Tom Ridge will also deliver remarks. States Represented by Women of the Senate are: Alaska: Lisa Murkowski (R); California: Barbara Boxer (D) and Dianne Feinstein (D); Hawaii: Mazie Hirono (D); Louisiana: Mary Landrieu (D); Maine: Susan Collins (R); Maryland: Barbara Mikulski (D); Massachusetts: Elizabeth Warren (D); Michigan: Debbie Stabenow (D); Minnesota: Amy Klobuchar (D); Missouri: Claire McCaskill (D); Nebraska: Deb Fischer (R); New York: Kirsten Gillibrand (D); New Hampshire: Kelly Ayotte (R) and Jeanne Shaheen (D); North Carolina: Kay Hagan (D); North Dakota: Heidi Heitkamp (D); Washington: Maria Cantwell (D) and Patty Murray (D); Wisconsin: Tammy Baldwin (D). Location: National Press Club, 529 14th Street NW. Contacts: Pam Higham, phigham@allegheny.edu, 814-

332-3576.

NEW AMERICA FOUNDATION – CONNECTED COMMUNITIES – 10 a.m. – 12 p.m. Event, “Connected Communities in an Age of Digital Learning.” Opening Remarks: Reed Hundt, CEO, Coalition for Green Capital, Former Chairman of the Federal Communications Commission. Featured Speakers: Richard Culatta, Director, Office of Educational Technology, U.S. Department of Education; Susan Hildreth, Director, Institute of Museum and Library Services; Melanie Huggins, CEO, Richland Library, South Carolina; Pam Moran, Superintendent, Albemarle County Public Schools, Virginia; Greta Byrum, Senior Field Analyst, New America’s Open Technology Institute. Location: 1899 L Street NW Suite 400.

AAF – ADMINISTRATIONS 2015 BUDGET PREVIEW – 10:30 a.m. Senator Rob Portman, AAFs President Douglas Holtz-Eakin, and Maya MacGuineas will preview the Obama Administrations 2015 budget during an event hosted by the American Action Forum. Location: American Action Forum Offices, 1747 Pennsylvania Ave., NW, 5th Floor.

BROOKINGS – MAYOR RAHM EMANUEL – 11:30 a.m. – 12:30 p.m. A Conversation with Mayor Rahm Emanuel. Location: The Brookings Institution, Falk Auditorium, 1775 Massachusetts Ave, NW. Contacts: 202.797.6105

KIND-CGRS – IMMIGRATION – CHILDREN – 11:30 a.m. – 12:30 p.m. The Center for Gender and Refugee Studies (CGRS) and the Kids in Need of Defense (KIND) release New Report on Reforming the U.S. Immigration System for Unaccompanied Children Important Changes Required to Ensure Protection for Growing Numbers of Kids Coming to the United States Alone. DIAL IN: 877-594-8353. Passcode: 52599217. CONTACTS: Julia Epstein – (415) 581-8835; epsteinj@uchastings.edu; Megan McKenna, (202) 824-8687; mmckenna@supportkind.org.

ABA – HESSE – 12 p.m. Deputy Assistant Attorney General for the Antitrust Division Renata B. Hesse will participate in a panel hosted by the American Bar Associations Section of Antitrust Laws Economics Committee on the topic, “Vertical and Complementary Products Mergers”. NOTE: Press inquiries regarding logistics should be directed to Alisha Cybulski at 202-662-1097 or Alisha. Cybulski@americanbar.org. Location: 51 Louisiana Ave., N.W.

MEI – U.S.-PAKISTAN RELATIONS IN 2014 – 12 p.m. – 1 p.m. The Middle East Institute’s Louis R. Hughes Lecture Series hosts Pakistan’s Ambassador to the United States H.E. Jalil Abbas Jilani for a conversation about the opportunities and challenges facing U.S.-Pakistan relations today. Location: Carnegie Endowment for International Peace, 1779 Massachusetts Ave. NW. Contacts: information@mei.edu (202)785-1141

U.S. CONFERENCE OF MAYORS – PRESS CALL – 1:15 p.m. The U.S. Conference of Mayors (USCM) will release the results from a new mayoral energy survey with key Conference energy and climate leaders. Specifically, the survey reports on the many benefits to cities made possible by the availability of the Energy Efficiency and Conservation Block Grant (EECBG) funding. Participants: Gresham, OR Mayor Shane Bemis, Chair, Energy Committee; Bridgeport, CT Mayor Bill Finch, Co-Chair, Energy Independence and Climate Protection Task Force; Carmel, IN Mayor Jim Brainard, Co-Chair, Energy Independence and Climate Protection Task Force. DIAL IN: 1-888-539-3612, Passcode: 6169839. Contact: Elena Temple 202-861-6719 5/8 etemple@usmayors.org; Lina Garcia 202-861-6113, lgarcia@usmayors.org; Karen Hinton 703-798-3109, karen@hintoncommunications.com.

VETERANS HOMELESSNESS – 1:30 p.m. A public forum to announce the initial results of a city-wide effort to end homelessness among U.S. military veterans in D.C. Veterans NOW is a team of D.C. government, Federal government, and community agencies, united in an effort to end veteran homelessness in Washington, D.C., by the Federal goal of 2015. Participants in the effort include: The Community Partnership for the Prevention of Homelessness, The Department of Veterans Affairs, the D.C. Housing Authority, the Department of Human Services, Miriams Kitchen, Pathways to Housing DC, and Friendship Place. Location: The Hill Center, 921 Pennsylvania Ave., SE. Contacts: Tom Murphy Miriams Kitchen (202-368-8571). Notes: The D.C. Group says they housed 207 Homeless Veterans in 100 days.

ASIA-PACIFIC CLEAN ENERGY PROGRAM – 2 p.m. – 4 p.m. The Overseas Private Investment Corporation

(OPIC), the U.S. Department of State, and the U.S. Trade and Development Agency (USTDA) will host a roundtable discussion highlighting the official launch of the Asia-Pacific Clean Energy Program. Representatives speaking at the event will include Carlos Pascual, the State Department's Special Envoy and Coordinator for International Energy Affairs, Scott Marciel, Principal Deputy Assistant Secretary, Bureau of East Asian and Pacific Affairs at the Department of State, Mimi Alemayehou, Executive Vice President, Overseas Private Investment Corporation, and Enoch Ebong, General Counsel, U.S. Trade and Development Agency. Location: OPIC headquarters, 1100 New York Avenue. Notes: RSVPs are strongly encouraged. To RSVP or for press inquiries, please contact Jenifer Joyce, ENR Press Officer at joycej@state.gov or 202-647-7959.

SAIS – JAPAN – ABENOMICS – 4:30 p.m. Discussion on “Abenomics: The Missing Arrow – Reform of Japan's ICT Sector” with Jim Foster, professor at Keio University Graduate School of Media and Governance, director of the Keio International Project on the Internet and Society, and former economic counselor and political minister at the U.S. Embassy in Tokyo. Location: Room 806, Rome Building, 1619 Massachusetts Ave., NW. Contacts: Francesca Di Marco SAIS (fdimarco@jhu.edu)

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Stephen Colbert: “Nation, I am so glad, I am so glad to hear that you are happy, because I used to be happy. But I learned something today that shook me to my core. And once my core is shaken, don't come a knocking. Here's the deal. Remember that one time I mentioned in passing that Obama is plotting to radically alter the founder's vision for America? He is. Ben Franklin would be horrified by Obamacare. It doesn't even cover leechcraft or bone-purging for female hysteria.”

Stephen Colbert: “But folks, what is most insidious about Obama's agenda is how it's now brainwashing our children. Take Michelle Obama's ‘Let's Move' campaign to combat childhood obesity. [Video of Kim Jong-Un appears] Oh, I'm sorry, I'm sorry. No, that's North Korean dictator Kim Jong-Un. It's so easy to mistake the two. They both look great in pant suits.”

Stephen Colbert: [Referring to recent childhood obesity report] “[Childhood obesity rates have dropped] over 40 percent in a decade. Nation, I believe the children are the future. And thanks to Mrs. Obama, America now has 40 percent less tomorrow. That's just math.”

Stephen Colbert: “I don't understand a First Lady accomplishing something. Everything they do is supposed to be a symbolic waste of time. Like Nancy Reagan's war on drugs or Laura Bush's fight to end presidential illiteracy.”

Stephen Colbert: “Thanks to Mrs. Obama, instead of care-free chubsters, we are now...breeding a generation of body-conscious tots doing tricycle spin classes desperately trying to get back to their birth weight.”

Stephen Colbert: “Worst of all, this is bad news for the GOP. They need to reach out to the preschool demo. And it won't be easy, since the Republicans are on record as trying to deport Dora and they condemn SpongeBob as a form of birth control. Plus, preschool itself is a left-wing, socialist training camp. Sharing toys, snack handouts, premarital napping, not to mention wasteful infrastructure projects.”

Jimmy Fallon: “Ralph Nader is now calling on super-rich people like Oprah to run for president. Yeah, President Oprah. A lot of people say this is an interesting idea, while Hillary calls it ‘that dream where I wake up screaming. That's not real, right? That's not real? Oh, my God. Please don't tell me that's real.’”

Seth Meyers: “Well, the next presidential election is still two years off, but speculation is already underway. A ‘New York Times' poll says that eight out of ten Democrats want Hillary Clinton to run for president in 2016. The same poll also shows that ten out of ten Democrats want Chris Christie to run against her.”

Seth Meyers: “President Obama has announced that four million people have signed up for Obamacare. Obama said he wants to hit seven million users by the end of March, at which point he'll sell it to Facebook for \$10

billion.”

Seth Meyers: “The Arizona state legislature passed a law that made it legal for businesses to deny service to gay customers. And Tucker Carlson told Fox News this week, ‘If I don’t want to bake you a cake for your gay wedding, that’s called tolerance. But when you try and force me to bake a cake for your gay wedding, and threaten me with prison if I don’t, that’s called fascism.’ I think the more important issue is, who is asking Tucker Carlson to bake all these wedding cakes?”

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL HIKES CHIMNEY TOPS TRAIL TO OBSERVE TRAIL RESTORATION PROJECT. The [Maryville \(TN\) Daily Times](#) (3/3, 64K) reports that Interior Secretary Sally Jewell "appeared in the Great Smoky Mountains National Park Sunday afternoon to hike the steep, two-mile long Chimney Tops Trail, and observe progress on the restoration work the trail is undergoing." Jewell "expressed interest in learning more about the key partnerships the Park has had with groups such as Friends of the Smokies and others, in order to continue to protect, preserve, restore and honor the Park's resources and history." Jewell heard about the park's work to restore the trail and learn about its partnerships to help preserve it.

Secretary Jewell To Discuss Joint Curatorial Collections Facility. The Chattanooga (3/2, 17K) reports that Sen. Lamar Alexander and Rep. John J. Duncan, Jr., announced Friday that Interior Secretary Sally Jewell will “join them at an event with Smokies partners and conservation groups on Monday, to discuss the future of the recently-approved Joint Curatorial Collections Facility that will house more than 800,000 historical artifacts and archival records from the Great Smoky Mountains National Park and four other Tennessee national park units.”

The Maryville (TN) Daily Times (3/2, 64K) reports that “Alexander, Duncan and descendants of those whose artifacts will be displayed will join Jewell for a press conference.”

HOUSE PANEL HOLDS HEARING ON HIRING CHALLENGES FACED BY INTERIOR. The Sierra (CA) Sun Times (3/2) reports that on February 27, the Subcommittee on Energy and Mineral Resources held an oversight hearing on the hiring challenges faced by the Interior Department. At the hearing, Frank Rusco, Director of Natural Resources and Environment, at the Government Accountability Office testified, “Interior and its three bureaus – BLM, BOEM, and BSEE – have taken some steps to address hiring and retention challenges but could do more. Interior has used special salary rates and incentive programs to increase hiring and retention of key oil and gas positions, but use of these incentives has been limited.” He added, “BSEE officials told us that fewer or less-thorough inspections may mean that some offices are less able to ensure operation compliance with applicable laws and regulations and, as a result, there is an increased risk to human health and safety due to a spill or incident.”

RIVERSIDE COUNTY SEEKS MONEY TO RESTORE SALTON SEA. The Riverside (CA) Press Enterprise (2/28, 465K) reports that “money to revive the ailing Salton Sea is a priority in the federal wish list approved by Riverside County supervisors Tuesday, Feb. 25.” According to the article, “the annual platform, which spells out what supervisors want legislatively from Washington, includes a request to retain language in a recently passed Senate bill that could help the sea get millions of dollars for restoration.” The platform read, “Legislative initiative coordinated by Riverside County may well determine whether the Sea devolves into an ecological and economic disaster, or whether the Sea is transformed into a healthy, attractive environment as America’s renewable energy powerhouse.”

IVORY DISCUSSED DURING MEETING OF FEDERAL ADVISORY COUNCIL ON WILDLIFE TRAFFICKING. For the Anchorage (AK) Daily News (2/28, 198K), Mike Dunham examines the minutes of a meeting of the Federal Advisory Council on Wildlife Trafficking held on Dec. 16. He notes that “ivory was the hot-button issue, the item most talked about,” but “every mention appeared to specifically refer to African elephant ivory.” Dunham “found no direct statement whatsoever regarding walruses or mammoths and no hint that the ivory of marine mammals or extinct species was ever under discussion.”

ADDITIONAL COVERAGE OF ESSAY CONTEST WINNERS. The Arizona Daily Sun (3/2, 33K) reports that “a group of young outdoor enthusiasts...met Feb. 26 with Interior Secretary Sally Jewell to discuss the importance of public lands to America’s heritage and economy.” The “youths traveled to Washington, D.C., from across the country after winning an essay contest sponsored by Sportsmen for Responsible Energy Development.” Jewell said that “engaging young people in conservation and nurturing their connection to the outdoors are critical to the health, economic and social benefits of conserving public lands.”

Also covering the story is the Roanoke (VA) Times (3/2, 259K).

NEW MEXICO WELL-REPRESENTED AT INTERIOR. For the Albuquerque (NM) Journal (3/2, 288K), Michael Coleman writes that the confirmation of Mike Connor as Deputy Secretary, Kevin Washburn as Assistant Secretary for Indian Affairs, and Hilary Tompkins as the solicitor general means that “these are heady days for New Mexico at the Department of the Interior.” According to the article, “Connor, Washburn and Tompkins belong to a rare set of Washington power players: They’re humble, genuine people who others actually enjoy working with.”

Additional coverage of Connor’s confirmation was provided by the Albuquerque (NM) Business First (3/2), the Indian Country Today Media Network (2/28, 21K), the Penn Energy (3/2, 128), and the Hydroworld (3/2, 151).

WHITE HOUSE’S WILDFIRE PROPOSAL PRAISED. In an editorial, the Denver Post (3/1, 949K) praises a

White House proposal that the US Forest Service and Interior Department be allowed to use a Federal Emergency Management Agency disaster fund for money to put out the most extreme wildfires. According to the paper, the move that would ease pressure on funds used for projects such as thinning dead forests, maintaining forest roads and creating buffer zones around homes vulnerable to wildfires. The paper concludes that it's time that wildfire disasters get the same consideration as other cataclysmic events.

SECRETARY JEWELL CRITICIZED OVER KING COVE ROAD DECISION. For the FrontPage Magazine (3/2, 18K), Daniel Greenfield writes that "in one of Alaska's most remote outposts, where a thousand hardy souls make their homes, the Obama administration has put the fate of birds and bears above the lives of people, blocking construction of an 11-mile gravel trail connecting a tiny fishing hamlet to a life-saving airport."

America's Great Outdoors:

National Park Service:

NPS DIRECTOR JARVIS DEFENDS DECISION TO MOVE BETHUNE ARCHIVES. In a letter to the Washington Post (2/28, 4.28M), NPS Director Jonathan B. Jarvis writes in response to Colbert I. King's Feb. 22 op-ed column, "Black women's history gets shipped out." Jarvis writes that "the Bethune archives belong at the Bethune House, but not at the expense of losing them." He argues that the new facility is "the best place for the full archive to remain safe and accessible to researchers while we determine if the Council House can be fitted with necessary protective systems without damaging the historic building." Jarvis concludes that "if we cannot physically return the archives to the Council House, we will do so digitally, to ensure that the voices of these African American women inspire future generations."

NATIONAL PARK SERVICE AWARDS \$525,000 TO PROTECT FOUR CIVIL WAR BATTLEFIELDS. The National Journal (3/2, Subscription Publication, 427K) reports that NPS Director Jonathan B. Jarvis has "announced more than \$525,000 in grants from the Land and Water Conservation Fund to help preserve more than 120 acres of land at four of America's threatened Civil War battlefields." According to the article, "the grant projects are at the Mill Springs (Ky.), Bentonville (N.C.), Appomattox Courthouse (Va.), and Aldie (Va.) battlefields." Jarvis said, "America's Civil War battlefields are places where we can learn about democracy, sacrifice, heroism and hope in the very places where those concepts shaped our history. These grants will allow future generations to walk these hallowed grounds and understand the sacrifice of former generations that helped define us as a nation and a people today."

DEATH OF ISLE ROYALE WOLF ADDS TO DEBATE. The Los Angeles Times (2/28, Dave, 3.07M) reports that "a female gray wolf's demise has added to the debate about whether authorities should try to save the wolves of Isle Royale National Park." Researchers want the NPS to "import fertile wolves from robust neighboring populations," but the proposal is "controversial," and the NPS has "not decided what to do." If the NPS "decides to let nature take its course and the wolves die out, researchers warn, the moose population could boom and destroy the park's ecosystem." Phyllis Green, Isle Royale's park superintendent, said "officials are summarizing the more than 1,000 public and expert comments they've gathered in the last two years," and "she expects to release a report in the late spring."

NEW EVERGLADES NATIONAL PARK PROPOSAL EARNS PRAISE FROM GUIDES, ANGLERS. The Miami Herald (3/2, Cocking, 806K) reports that "working with skiff guides, anglers and conservation groups," Everglades National Park has "revised its draft general management plan to provide more access for boating, fishing and paddling in Florida Bay than what it proposed a year ago." The new "preferred alternative" for "long-term management of park waters was generally well-received at a meeting of park officials and fishing guides Friday in Islamorada." At Friday's meeting, park superintendent Dan Kimball told guides, "We're trying to protect the resource but provide reasonable and appropriate access, and that's what you have helped us with. We've really listened to you. We've really incorporated that a lot in our plan."

WOLF KILLINGS BY ALASKA AGENCY ANGERS NPS. The Fairbanks (AK) News-Miner (3/2, 44K) reports that NPS officials are "fuming about the elimination of an Eastern Interior wolf pack by the Alaska Department of Fish and Game last week, including a pair that were wearing radio collars." On Feb. 21, the state agency "shot all 11 members of the Lost Creek pack near Yukon-Charley Rivers National Preserve." Yukon-Charley Superintendent

Greg Dudgeon said "the shootings are a setback for a long-term study of wolf behavior that began roughly 20 years ago."

Also reporting on the story is the [AP](#) (3/3).

TOURISTS STILL FLOCKING TO ICE CAVES NEAR APOSTLE ISLANDS. The [AP](#) (3/2) reports that "the ice caves near the Apostle Islands in northern Wisconsin are still proving to be very popular." According to the NPS, "nearly 78,000 people visited the caves along Lake Superior from Jan. 15 through the end of February." The article notes that "the last time the ice was thick enough for people to walk on to see the caves was in 2009, but only about 8,400 visited in January and February." Julie Van Stappen, with the Apostle Islands National Lakeshore, has said "social media is playing a bigger role this year in getting the word out."

WILDFIRE BURNS IN SHENANDOAH NATIONAL PARK. [WHSV-TV](#) Harrisonburg, VA (3/2, 6K) reports that the Rocks Mountain Fire in Shenandoah National Park has "grown to over 100 acres." Firefighters are "working along the park boundary to prevent the fire from leaving the park." The article notes that "currently 58 personnel are working to contain the fire."

YOSEMITE OPENS LOTTERY SYSTEM FOR HALF DOME. The [AP](#) (3/2) reports that Yosemite Park rangers say "hikers can now apply for permits to ascend the summit of Yosemite National Park's iconic Half Dome." According to the article, "the lottery system will end March 31, but about 50 additional permits per day will be available through a two-day-in-advance lottery during the hiking season."

LATIMES PRAISES NEW YOSEMITE PLAN. The [Los Angeles Times](#) (3/2, 3.07M) editorializes that the NPS's "latest proposal for the valley does more to balance tourism and conservation." According to the paper, "the plan, which will be reviewed at a public meeting on Thursday, does a far better job of preserving recreational activities in the valley than the draconian draft from a year ago that would have banned such environmentally friendly pastimes as bicycle and raft rentals." Although "the plan isn't perfect," the Times notes that the NPS was "under pressure from the public and some politicians to keep maximizing its concessions." It concludes that "given the lobbying from both sides, the service did a good job of balancing tourism with conservation."

MORE WORK TO PRESERVE D.C.'S TREES URGED. In an op-ed for the [Washington Post](#) (2/28, Hunter, 4.28M), Robert E. Hunter warns about "the destruction of much" of D.C.'s "canopy by the spread of invasive species and, hence, the slow erosion of the habitat of the fauna." He notes that "groups of volunteers, from time to time, hack away at the intruders, but they fight a largely losing battle." According to Hunter, "their efforts are not enough, and the National Park Service, which has authority over much of Washington's parkland, is too strapped for cash to mount the kind of large, sustained effort that would be necessary to turn the tide."

Bureau of Land Management:

INVESTIGATORS PUZZLED WILD BURRO MURDERS. [NPR](#) (3/2, O'Dowd, 465K) reports that "in the desert outside of Phoenix, there have been 18 shootings" of wild burros "in the last five years, a series of mysteries that has stumped federal investigators." The article notes that "people don't eat burro, and it doesn't look like anyone was harvesting the meat." The BLM "believes the motive is nothing more than target shooting."

PETITION SEEKS TO BLOCK LAND EXCHANGE BETWEEN BLM, TEXAS BILLIONAIRES. The [Billings \(MT\) Gazette](#) (3/2, 206K) reports that "some Montana advocates of public lands access seem to be in no mood to negotiate with Texas billionaire brothers Dan and Farris Wilks over land exchange or access deals in central and north-central Montana." According to the article, "petitions are circulating asking the Bureau of Land Management's state director to halt any talks about an exchange that would give the Wilkses possession of a landlocked parcel called the Durfee Hills, surrounded by their N Bar Ranch south of Lewistown, and to build a road around the Wilks' Anchor Ranch in Blaine County to access 50,000 acres of BLM lands in the Upper Missouri River Breaks National Monument." The article notes that "rumors have circulated in the region for two years about deals the BLM and Wilks brothers have discussed to come to an agreement, but since no formal proposal has been made, the process hasn't been open to any public scrutiny or comment." According to Ron Moody, a Lewistown resident and former Montana Fish and Wildlife commissioner, "that prompted the petition."

COMPREHENSIVE REVIEW URGED FOR WILD HORSE PROGRAM. The [Reno \(NV\) Gazette-Journal](#) (3/2, 165K) editorializes that "the federal government's wild-horse management is an expensive, ineffective mess that should be put out of its misery." The paper notes that "in 2012, the number of horses and burros in holding corrals around the country surpassed the number of 'wild' horses and burros on the range." It also notes that the BLM's Joan Guilfoyle, Wild Horse and Burro Division director, said "last summer that the program is in crisis and warned that without 'drastic changes' it's heading for financial collapse." The editorial concludes that "in this day of budget-cutting, when even the Pentagon is facing significant decreases in spending, Congress cannot long tolerate a program that is taking an increasing chunk of the budget while providing little of value in return."

SCIENTIST ARGUES SNWA PIPELINE WOULD HARM SAGE GROUSE. In an op-ed for the [Reno \(NV\) Gazette-Journal](#) (3/2, 165K), Rob Mrowka, senior scientist at the Center for Biological Diversity in North Las Vegas, highlights "the inevitable harm" that the Southern Nevada Water Authority pipeline project will "pose for the increasingly rare sage grouse." He notes that "the sage grouse requires large areas of sagebrush for its survival throughout all four seasons," which is "why it's so disturbing that the Bureau of Land Management estimates that more than 200 square miles of sagebrush and related shrub habitat could disappear because of this misguided project." Mrowka claims that the "groundwater development project could be the final threat to push the grouse into the protections of the Endangered Species Act."

Fish and Wildlife Service:

NORTH CAROLINA CITES DUKE FOR POLLUTION FROM COAL ASH PONDS. The [New York Times](#) (3/1, Gabriel, Subscription Publication, 9.61M) reported that under increasing attention on a deal between the Department of Environmental and Natural Resources and Duke Energy over pollution from coal ash ponds, the department announced on Friday that Duke will be cited "for two formal notices of violating environmental standards in connection with the spill." The department has denied accusations that they "made some smoky back-room deal" with Duke.

The [Los Angeles Times](#) (3/1, Zucchini, 3.07M) also reports the story.

North Carolina Resists Coal Ash Recycling, Cites Environmental Concerns. The [AP](#) (3/1, 4.28M) reported that there has been growing interest in recycling coal ash for use in concrete, asphalt, and other building products. The EPA is set to issue rules on the disposal of coal ash in December, but North Carolina Environmental Secretary John Skvarla said that it would be "unwise...to force the removal of Duke's leaky coal ash pits without long and careful study." The [AP](#) noted that state officials were unable to provide an example showing that the removal of coal ash has harmed the environment.

DIVISIONS REEMERGE IN NEVADA SAGE GROUSE PLANS. The [AP](#) (3/2, Chereb) reports that "deep divisions in Nevada's approach to sage grouse have resurfaced in the state's fragile attempt to keep the bird off the list of endangered species and avoid economic consequences for ranching, mining and alternative energy development across large swaths of land." According to the article, "at issue is whether the state's course emphasizes protecting industry interests over ensuring the bird's survival."

FWS SAYS BALD EAGLES DON'T HAVE TO DELAY BRIDGE REPAIR NEAR LONGMONT. The [AP](#) (3/2) reports that Boulder County doesn't necessarily have to delay a multimillion-dollar bridge replacement project because of the presence of nesting bald eagles in the neighborhood, according to FWS officials. County Transportation director George Gerstle said Thursday that the start of construction of a new East County Line Road bridge over the St. Vrain River might be postponed until August or September in order to protect the eagles and their hatchlings until the young birds have finally dispersed from the nesting territory. However, the FWS said Friday that under the Bald and Golden Eagle Protection Act, "the Service has the ability to issue ... permits for projects where appropriate."

Also reporting on the story are the [AP](#) (2/28) and the [Longmont \(CO\) Times-Call](#) (3/2, 66K).

GROUP SEEKS PROTECTION FOR PUFFINS. [Salon](#) (3/2, 613K) reports that the Natural Resources Defense Council has filed a petition with the FWS, "requesting that tufted puffins of the Lower 48 receive protections under the Endangered Species Act." The article notes that "in just 30 years, tufted puffin populations in Washington,

Oregon, and California have plummeted as much as 90 percent, thanks to habitat destruction, fishing practices, and troubles with invasive species.”

Securing America's Energy Future:

Renewable Energy:

HYDROPOWER GENERATION TO RESUME AT MT. ELBERT POWER PLANT. The Pueblo (CO) Chieftain (3/2, 94K) reports that “hydropower generation will resume at the Mt. Elbert Power Plant next week, creating unstable ice on Twin Lakes.” According to the article, “water entering the power plant from the Mt. Elbert Forebay and water exiting the plant into Twin Lakes might create unsafe conditions for winter activities like ice fishing on the lakes, located south of Leadville.” Scott Wik, Mt. Elbert Power Plant manager, said, “Our concern is that once we start operating the power plant, ice in the Forebay up above and ice right below the plant in Twin Lakes might become unstable.”

Onshore Energy Development:

HOUSE COMMITTEE TO SET UP RULE FOR STREAM BUFFER ZONE RULE BILL. Politico (3/1, Guillén, 464K) reports that the House Rules Committee will “meet on Monday to set up a rule for H.R. 2824, which blocks the administration from instituting a new stream buffer zone rule, a major coal mining regulation.” The bill would “require the implementation of the now-vacated rule, and stop Interior from implementing any new version of rule until the agency conducts a five-year assessment and submits a report to Congress.”

BLM TRIES TO KEEP UP WITH PERMIT APPLICATIONS. The Jamestown (ND) Sun (3/2, 850) reports that the BLM’s North Dakota field office is “inundated with permit applications for drilling on federal lands.” The bureau has “gotten creative to try to keep up with the workload — bringing in ‘strike teams’ to the Miles City district headquarters, using teleworkers from around the country and even securing land for employee housing to help recruitment for its base in Dickinson.” The article notes that “one of the more simple solutions has been to have the oil industry — which both created the backlog and would benefit most from winnowing it down — pay for more staff.”

TRIBES IN SOUTH DAKOTA PREPARING TO BLOCK PIPELINE'S DEVELOPMENT. McClatchy (3/2, Hotakainen, Subscription Publication, 95K) reported, “In South Dakota, home to some of the nation’s poorest American Indians, tribes are preparing for nonviolent battle with ‘resistance training’ aimed at TransCanada, the company that wants to develop” the Keystone XL pipeline. Organizers, according to McClatchy, are “considering vigils, civil disobedience and blockades to thwart the moving of construction equipment and the delivery of materials.” McClatchy added that company spokesman Terry Cunha “said TransCanada is now working with 17 tribes in South Dakota, Montana and Nebraska, where the company needs” President Obama’s approval to build.

EPA SEEKING TO BLOCK DEVELOPMENT OF ALASKA COPPER MINE. The New York Times (3/1, Johnson, Subscription Publication, 9.61M) reports that the Environmental Protection Agency is seeking “to block the development of a giant open-pit copper mine” in southwestern Alaska. The Friday decision on Pebble Mine “was not an outright death blow to the project,” but it “left little room for the mine and its supporters to persuade the agency otherwise.” EPA Administrator McCarthy said that the mine as proposed “would cause ‘significant and irreversible negative impacts’” to the Bristol Bay watershed.

The Washington Post (3/1, Eilperin, 4.28M) says Sen. Lisa Murkowski “accused the EPA of issuing a ‘preemptive veto’ that could set a dangerous precedent,” while Pebble Limited Partnership CEO “issued a statement calling the move ‘a major overreach onto an asset of the state of Alaska.’” McClatchy (3/1, Cockerham, Subscription Publication, 95K) also has a report.

NYTimes Hails Administration's Decision On Alaska Mining Project. In an editorial, the New York Times (3/3, Subscription Publication, 9.61M) hails the Administration’s decision on Friday to put “the brakes on a massive gold and copper mine proposed for the headwaters of Alaska’s Bristol Bay while it decides whether to prohibit it permanently.” The Times says that this “sounds like the death knell for a project, known as the Pebble Mine, that by any measure is an environmental disaster waiting to happen.”

TEXAS CONSIDERING WHETHER NATURAL GAS DRILLING DISPOSAL WELLS CAUSE EARTHQUAKES.

According to the Fort Worth (TX) Star-Telegram (3/2, Fuquay, 596K), the Texas Railroad Commission is "grappling with whether wastewater disposal wells used in natural gas drilling cause earthquakes." Arkansas, meanwhile, "permanently closed four injection wells after a swarm of quakes in 2011, and Ohio's governor stepped in to order a well in Youngstown shut down after it was linked to quakes." According to the Star-Telegram, a recent rise in the number of US quakes "coincides with increased underground disposal of wastewater associated with hydraulic fracturing, the oil and natural gas production technique that has boosted US output but has had environmental effects."

Offshore Energy Development:

MARINE SCIENTIST OPPOSES SEISMIC TESTING. In an op-ed for USA Today (2/28, Huelsenbeck, 5.82M), Matthew Huelsenbeck, a marine scientist at Oceana, argues that "seismic testing could use intense sound to hurt marine life." He notes that "the science on how sound impacts marine life is far from settled," but BOEM is "going rogue," by "looking to rush forward with their environmental review without using this new science because of an arbitrary political timeline." Huelsenbeck claims that "there is no rush to finish this environmental review or permit seismic airgun testing, since offshore drilling lease sales in the Atlantic are not available until at least 2017." Therefore, he argues, BOEM "should require that the best science be incorporated before any decision about seismic airgun testing is ever made."

Carolina Beach Officials United In Opposition Of Seismic Testing. The AP (3/1, 713K) reports that the Carolina Beach Town Council at a special meeting Friday evening unanimously passed a resolution opposing seismic testing off the North Carolina coast, a day after a federal agency endorsed the process along the eastern seaboard.

Also reporting on the story is the Wilmington (NC) Star News (2/28, 123K).

Additional Coverage. Also reporting on the story are the Greenville (SC) News (2/28, 204K), the Outer Banks (NC) Voice (3/1), the Guardian Liberty Voice (3/3, 64K), the UPI (2/28), the UPI (2/28), the Offshore Magazine (3/3, 143K), the Grist (3/3, 25K), the Scientific American (3/3, 2.8M), and the National Geographic (3/3, 40.49M).

BP FIGHTS LEGAL PAYOUTS FROM MACONDO SPILL. The Washington Post (3/1, Mufson, 4.28M) reports that court-appointed special master Patrick A. Juneau, who is responsible for administering payouts from the BP fund, "defends the process" by which his office has deemed claims eligible for payouts. BP argues that the New Orleans legal establishment is "taking unfair advantage of the settlement terms and years of close relationships."

JUDGE: BP NOT ENTITLED TO SEE DOCUMENTS USED BY GULF OIL SPILL CLAIMS INVESTIGATOR. On Friday, according to the AP (2/28, McGill), US District Judge Carl Barbier ruled that BP is "not entitled to see confidential documents used by" Louis Freeh. The former FBI director is a "court-appointed investigator who has alleged that some attorneys acted improperly in the claims process arising from the 2010 Gulf oil spill." Barber ruled, "BP has not established that it is more qualified to conduct the investigation than Mr. Freeh and the Freeh Group. This is a Court-supervised settlement program. If BP's relief is granted, there is risk it will become a BP-supervised settlement program."

Tackling America's Water Challenges:

SEN. UDALL SEEKS TO RAISE AUTHORIZATION CEILING FOR WATERSMART PROGRAM. The Durango (CO) Herald (3/1, 28K) reports that the WaterSMART program is authorized to spend only \$200 million on grants, and "without raising the funding cap, the program will end in the near future." Legislation "introduced Feb. 12 to the Senate and co-sponsored by Sen. Mark Udall, D-Colo., would raise the authorization ceiling for the water-conservation grants through 2023," but "funds still would need to be requested through the normal budgetary process." Udall said in a statement last week, "Population growth and widespread drought are forcing us to do more with less water. Now more than ever, it's essential that we make every drop count. These programs are helping our communities develop the technology we need to conserve water, save energy and cut costs."

CALIFORNIA COULD MAKE WITHDRAWAL FROM LAKE MEAD WATER BANK. The Las Vegas Review-Journal (3/2, 437K) reports that the extreme drought in California could force the state to make a large withdrawal from a virtual water bank in Lake Mead this year, even as the reservoir shrinks closer to an all-time low. The Metropolitan Water District of Southern California is considering a withdrawal that could cause the surface of the reservoir to decrease two feet and the shoreline to recede by as much as 60 feet.

SPANISH FLAT AREA AT LAKE BERRYESSA CLOSED FOR MAINTENANCE. The Vacaville (CA) Reporter (3/2, 57K) reports that Spanish Flat Recreation Area at Lake Berryessa is closed through March 7 for maintenance and upgrades to facilities. The BOR's Central California Area Office and Lake Berryessa concessionaire, Pleasure Cove Marina, said "the closure is to prepare the area for public use in summer by installing new picnic tables, fire rings and upright barbecue grills."

ADDITIONAL COVERAGE OF BAY DELTA CONSERVATION PLAN. Additional coverage of the Bay Delta Conservation Plan was provided by the Washington Post (2/28, Wilson, 4.28M) and the National Review (3/2, 805K).

OP-ED: SAVE WATER IN ORDER TO SAVE ENERGY. In an op-ed in the Los Angeles Times (3/3, Wolfram, Zetland, 3.07M), UC Berkeley professor Catherine Wolfram and Simon Fraser University visiting lecturer David Zetland that water conservation efforts undertaken by customers not only save water, but also save energy. The two note that "80 percent of the operating costs of a typical water utility are energy-related," and that if Los Angeles residents dropped their average daily water consumption from 152 gallons per person currently to 80 gallons, the energy saved would be roughly the equivalent of a medium-sized power plant. Wolfram and Zetland suggest using dynamic pricing for water in order to drive conservation efforts and "encourage lawmakers to adopt policies that reflect our water scarcity and prompt people to use less water and less energy."

Empowering Native American Communities:

CONFEDERATED SALISH AND KOOTENAI TRIBES SEE \$7.3 MILLION FOR BUYBACK. The Nation Sun News (3/2) reports that the Confederated Salish and Kootenai Tribes of Montana "expect to see \$7.3 million as part of the Land Buy-Back Program for Tribal Nations." The tribe expects offers from the Interior Department to be made from April through June.

WISCONSIN GOV. WALKER SEEKS ADDITIONAL 6 MONTHS TO MAKE DECISION ON KENOSHA CASINO. The AP (2/28, Bauer) reports that Wisconsin Gov. Scott Walker has asked the BIA to grant him a six-month extension for a decision on the Menominee Nation's proposal to build a Hard Rock casino in Kenosha. If granted, the deadline for the governor's action would move from Aug. 23 to Feb. 19, 2015, which "would push his deadline to beyond the November election." Walker and tribal chairwoman Laurie Boivin said in a letter to the BIA that more time is needed to "develop and analyze independent data, and facilitate discussions with the interested parties."

Also reporting on the story are the Milwaukee Journal Sentinel (3/2, 798K), the Kenosha (WI) News (3/2, 64K), and the Racine (WI) Journal Times (3/2, 85K).

CONNECTICUT GOV. MALLOY SEEKS BLOCK NEW TRIBAL RECOGNITION. The Connecticut Post (3/2, 298K) reports that Connecticut Gov. Dannel P. Malloy is asking President Barack Obama to "block proposed changes in the criteria for federally recognizing Indian tribes that could hand three Connecticut tribes permission to build casinos." The BIA is "considering a rule change that almost guarantees the Golden Hill Paugussett Indians in Trumbull, the Schaghticoke Indians in Kent and the Eastern Pequots in Stonington would gain recognition and the ability to offer gambling on reservation land." In the letter, Malloy said, "For Connecticut, the consequences would be devastating." He also said, "All of the petitioning groups have expressed interest in developing casinos and pursuing land claim lawsuits if they obtain federal recognition. I need your help in incorporating our proposed changes."

SEN. BEGICH URGES CONGRESS TO PAY NATIVE AMERICANS. In an op-ed for the The Hill (3/3, 194K), Sen. Mark Begich writes that "the president has finally submitted to Congress a plan to pay in full the nation's service contracts with Indian tribes." Begich points out the decades that American Indians and Alaska Natives

have fought to have these contracts honored. He says that "in order to fully close this chapter, tribes need to be fully compensated for the suffering they have endured over the years."

Top National News:

KERRY PREPARES TO TRAVEL TO UKRAINE AS PUTIN IGNORES US WARNING ON CRIMEA

OCCUPATION. The crisis in Ukraine continues to be the dominant story in the US news media, and the three network newscasts devoted more air time to reports on Ukraine than to all the rest of the day's news combined on Sunday evening. Secretary of State Kerry's appearances on television Sunday morning generated a great deal of coverage, and his planned trip to Kiev late Monday is widely noted, but reports this morning reflect widespread skepticism in the media regarding the leverage that Kerry claims the Administration possesses as it urges the Russian government to curtail its military intervention in Crimea.

On NBC Nightly News (3/3, 6.79M), Lester Holt said, "There was plenty of tough talk about the situation in Ukraine," but, "so far, it is only talk." According to NBC's Kristen Welker, the Russian government is "ignoring US warnings," and Kerry's "tough talk contrasts with" his "vague descriptions of how far the US is prepared to go." Kerry was shown saying, on NBC's Meet The Press (3/2, Gregory), "The last thing anyone wants is a military option in this kind of situation."

Similarly, on ABC World News (3/2, story 3, 1:35, Muir, 7.43M), Martha Raddatz reported that while Kerry insisted on Sunday that President Obama is "currently considering all options," so far "none of the [Administration's] warnings seems to have done any good." Raddatz added, "So right now you have the Russians occupying Crimea and what the US and allies have done in response is basically just cancel several meetings," which "doesn't seem to scare...Putin." NBC's Chuck Todd, on NBC's Meet The Press (3/2, Gregory), said, "This is not the first time with Putin – Putin acts, Obama warns. Putin acts, Obama warns. This is a pattern...he can't afford to stay in here and just continue to warn."

The AP (3/3, Pace) reported that Administration officials "indicated that the US was not weighing military action to counter Russia's advances, saying the Obama administration's efforts were focused on political, economic and diplomatic options." Politico (3/3, Ewing, 464K) also reports that while Kerry said Sunday that "all options" are "on the table," an anonymous "senior administration official" later clarified that Kerry "was describing the American 'menu' of non-military options," and that the Administration is "focused on political and economic and diplomatic and economic options."

According to the New York Times (3/3, A9, Gordon, Subscription Publication, 9.61M), the Administration's "strategy has been to present a united Western front with NATO and avoid casting the dispute as being mainly between Washington and Moscow." The Times adds that "the tangible steps the Obama administration has taken so far are very limited," and that some NATO members "were initially reluctant about condemning Russia."

On ABC's This Week (3/2, Stephanopoulos, 2.73M), Kerry said, "What has already happened is a brazen act of aggression, in violation of international law. ... Russia is engaged in a military act of aggression against another country, and it has huge risks. It's a 19th-century act in the 21st century." In a notably critical editorial this morning titled, "President Obama's Foreign Policy Is Based On Fantasy," the Washington Post (3/3, 4.28M) says that since he took office, President Obama's foreign policy has been "based more on how he thinks the world should operate than on reality." The Post charges that the Administration "often responds" to critics by "accusing" them of "being warmongers who want American 'boots on the ground' all over the world and have yet to learn the lessons of Iraq." The Post goes on to write that "as long as some leaders play by what Mr. Kerry dismisses as 19th-century rules, the United States can't pretend that the only game is in another arena altogether."

In one of the more widely repeated assessments of the situation, House Intelligence Committee chairman Rep. Mike Rogers (R-MI) said on Fox News Sunday (3/2, Wallace), "Putin is playing chess and we are playing marbles." On CNN's State Of The Union (3/2, Crowley), Sen. Lindsey Graham said, "We have a weak and indecisive president that invites aggression." While many Republicans are extremely critical of the President's "leadership," they also acknowledged that the Administration has no viable military options at this point and that all of the potential non-military sanctions are unlikely to prompt Putin to change course. The AP (3/3, Jakes)

reports that Sen. Marco Rubio, "discussing the potential of US military strikes against Russian troops in Crimea," said, "I don't think anyone is advocating for that." Rubio added that Putin has "weighed the costs of doing what he's done, and...clearly he has concluded that the benefits far outweigh the costs." According to Rubio, the US "need[s] to endeavor to change that calculus."

McClatchy (3/3, Clark, Kumar, Subscription Publication, 95K) says the President "now faces the greatest foreign policy challenge of his presidency," and adds that a "standoff with Russia evoking memories of the Cold War is scarcely the global legacy that Obama has sought." Former NATO ambassador Nicholas Burns, now on the Atlantic Council Board of Directors, says, "By any standard this is the most difficult, the most complex international crisis he's faced," because, according to Burns, "if Putin gets away with launching a military offensive, then Europe risks being divided."

Peter Baker, in a front-page article for the New York Times (3/3, A1, Subscription Publication, 9.61M), says that over the weekend, President Obama "approved a series of diplomatic and economic moves intended to 'make it hurt,' as one administration official put it," but he also "found himself besieged by advice to take more assertive action." Baker says the President "has left the harshest condemnations" of Putin to Kerry. Baker also writes that "the Russian occupation of Crimea has challenged Mr. Obama as has no other international crisis," and that the President must answer the implicit question from observers of the standoff: are you "tough enough to take on the former K.G.B. colonel in the Kremlin?"

On the CBS Evening News (3/2, lead story, 2:45, Glor, 5.58M), Jeff Glor said the situation involving Russian troops in Crimea is open to differing interpretations, and that while the Ukrainian Prime Minister "calls it a declaration of war," and the Administration says it is "an invasion," the Russian government "says it's protecting its people." Nevertheless, according to Glor, the White House "says Russian forces...appear [to be] preparing an occupation," and the EU and NATO agree that Russia "is violating international law." CBS's Charlie D'Agata reported from Kiev that Prime Minister Arseniy Yatsenyuk "warned that Russia's military intervention in Crimea has brought Ukraine to the 'brink of disaster,'" and his "newly formed government...called on men of fighting age, hundreds of thousands of reservists to be ready to take up arms" although Ukrainians are "well aware the Ukrainian forces don't have the firepower or hardware to match the Russian military."

According to Politico's (3/3, Epstein, 464K) Reid Epstein, Kerry "took great pains Sunday to say that the Ukrainian crisis isn't a replay of the Cold War, even as he described the situation and its implications in terms reminiscent of that era." Epstein added that Kerry's "attempt to walk a fine rhetorical line is more evidence of the problem faced by the United States: There are few good options to beat back Vladimir Putin's encroachment." Epstein also reported that State Department spokeswoman Jen Psaki said that in Kiev, Kerry "will reaffirm the United States' strong support for Ukrainian sovereignty, independence, territorial integrity, and the right of the Ukrainian people to determine their own future, without outside interference or provocation."

USA Today (3/3, Madhani, 5.82M) reports that the State Department "announced that Victoria Nuland, assistant secretary of State for European and Eurasian affairs was heading to Vienna on Sunday to meet with senior officials of the Organization for Security and Cooperation in Europe to discuss the Ukraine situation."

The Los Angeles Times (3/3, Loiko, Williams, 3.07M) reports that NATO Secretary-General Anders Fogh Rasmussen says Russia has "violated the UN charter with its military action in Ukraine." The Times notes that NATO "isn't obliged to defend Ukraine, which is not a member, but Kiev has taken part in NATO military exercises, and the country's new leaders are known to want eventual membership in the Western military alliance — a prospect that has unsettled Russia."

Ukrainian Ambassador to the UN Yuriy Sergeyev said on CNN's State Of The Union (3/2, Crowley), "Yesterday, we demanded the Security Council at United Nations have its meeting...and we declared that what is going on in Ukraine is an act of aggression from the Russian side against Ukraine."

Michael Singh, who worked on the Security Council during the George W. Bush Administration and now is managing director of the Washington Institute for Near East Policy, in an op-ed for the Washington Post (3/3, 4.28M) titled, "The US Makes Crises In Ukraine And Syria Worse By Not Planning For Them," says that in regards to the crisis in Ukraine, "the key moment for forethought passed us by in November, when then-President Viktor Yanukowych declined to sign an association agreement with the European Union." According to Singh, the

US and EU "had no response to the Russian gambit, high-mindedly wanting to avoid a 'bidding war' with Moscow or engage in geopolitical games."

Rep. Chris Van Hollen (D-MD) said on Fox News Sunday (3/2, Wallace), "We're 48 hours into an international crisis. I would hope Americans would focus on condemning the actions of Putin rather than knee-jerk criticizing the President of the United States. Let's stand together on this."

US Reportedly Offering Putin "Off-Ramp" To Allow Russian Troops To Return To Their Bases. The Wall Street Journal (3/3, Kendall, Dooren, Subscription Publication, 5.91M) reports that on ABC's This Week (3/2, Stephanopoulos, 2.73M), Secretary Kerry said President Obama has "made it clear that we are prepared to work with Russia" on the future of Ukraine, but added, "You just don't invade another country on phony pretexts in order to assert your interests."

According to the New York Times (3/3, A9, Gordon, Subscription Publication, 9.61M), the Administration has also "been trying to provide Mr. Putin with an 'off-ramp' by suggesting that international observers could take the place of Russian troops in Crimea to protect the rights of the Russian-speaking population there." USA Today (3/3, Madhani, 5.82M) is also reporting that "White House officials spoke to Moscow about an off-ramp to end the crisis, according to three senior administration officials."

Likewise, Politico (3/3, Ewing, 464K) says that "even as it threatened to isolate and sanction Moscow," the Administration "said it wanted to leave the door open for Putin to resolve the crisis through diplomacy." Politico adds that an anonymous "senior administration official" said Putin "had not completely 'closed the door' to diplomacy in his phone call with" the President on Saturday.

Kerry said on CBS' Face The Nation (3/2, Schieffer, 2.64M), "The President asked Mr. Putin, in fact told Mr. Putin, it was imperative to find a different path to roll back this invasion, and undo this active aggression."

In an op-ed for the Washington Post (3/3, 4.28M), William Taylor, who served as US ambassador to Ukraine from 2006 to 2009 and now works at the United States Institute of Peace; Steven Pifer, who was the US ambassador in Kiev from 1998 to 2000 and is now at the Brookings Institution; and John Herbst, who was the American ambassador from 2003 to 2006 and now directs the Center for Complex Operations at National Defense University, offer advice to the Ukrainian government. The Ambassadors urge the government in Kiev to "leave an opening for Putin to back down," while "continu[ing] to make clear that there is no threat to...Russian speakers in Ukraine," and "bring[ing] in moderate politicians from the east, including members of the Party of Regions who have disowned Viktor Yanukovich."

Analysts: US Options For Retaliation Against Russia Limited To Mostly Economic Measures. Bloomberg News (3/3, Lerman, Ellis, 1.91M) reported that over the weekend, President Obama "contacted overseas leaders, including Germany's Angela Merkel and the United Kingdom's David Cameron, on how to respond to Russia's incursion." According to Bloomberg, President Obama's "suspension of meetings to prepare for the Russian-hosted G-8 summit in June...represented his first concrete public action on the Ukrainian crisis and suggests the US could boycott the gathering altogether." Bloomberg also notes that Sen. Lindsey Graham "called for suspending Russian membership in the groups of industrialized nations known as the G-8 and G-20 for at least a year."

The Miami Herald (3/3, Caputo, 806K) reports that on NBC's Meet The Press (3/2, Gregory), Sen. Marco Rubio "suggested the US should help bolster Ukraine's military capability...and urged a restart of a missile-defense shield plan that has troubled Russia and, before it, the Soviet Union for decades." However, the Washington Times (3/3, Klimas, 417K) reports that on Fox News Sunday (3/2, Wallace), Rep. Mike Rogers (R-MI), the chairman of the House Intelligence Committee, cautioned that "the time to use military intervention has passed and sending Navy ships to the Black Sea isn't the best strategy."

McClatchy (3/3, Lightman, Subscription Publication, 95K) reports that on Sunday, "many of the specific ideas mentioned by Republicans were also embraced by some Democrats," including "admit Georgia to NATO" and "impose economic sanctions" on Russia. McClatchy adds that "six Republicans on the Senate Foreign Relations Committee...joined six Democrats Friday in writing a letter to Obama pledging bipartisan cooperation in developing policy, and outlined specific steps."

The Washington Post (3/3, A1, Gearan, 4.28M) reports that an anonymous "Administration official" said "actions against Russian banks are a possible avenue," saying, "This will have a cost on the Russian economy," and while "some of those costs will be imposed by the United States; some of that Russia has already invited on itself." The Washington Times (3/3, Klimas, 417K) reports that on ABC's This Week (3/2, Stephanopoulos, 2.73M), Rep. Adam Kinzinger (R-IL) "said he expected Congress would work closely with the president to send a strong message that Russia is a 'pariah state' through economic sanctions on Russia and aid to the Ukrainian people." But The Hill (3/3, Berman, 194K) said "it was unclear Sunday if Putin cared or was even listening to the condemnation."

The Wall Street Journal (3/3, Fidler, Torry, Benoit, Subscription Publication, 5.91M) reports that Kerry's suggestion that Russia could be kicked out of the G8 is already encountering opposition. The Journal notes that German Foreign Minister Frank-Walter Steinmeier said, "I'm really with those who say that the G-8 is the only format in which we from the West can still directly speak with Russia." As for sanctions against Russia, the Journal reports that Rolf Mützenich, a German Social Democrat legislator from Chancellor Merkel's governing coalition, said, "Sanctions are currently not the right option," and Philipp Missfelder, a Christian Democratic Union MP, adds, "Economic sanctions against Russia would damage Germany itself" because "sanctions are always bad for Germany as an export-driven nation."

Reid Epstein, in an analysis for Politico (3/3, Epstein, 464K), says Putin is not likely to be overly concerned about Russia's G8 membership, and that Putin "hardly places the emphasis on his international esteem as did Boris Yeltsin and Mikhail Gorbachev." Epstein adds, "So when Kerry warned that Russia's behavior in Ukraine does not befit a G-8 nation," his "message is intended as much for the other G-8 countries as it is for Putin."

Ben Judah, in a piece for Politico Magazine (3/3, Judah, 464K), writes, "Once upon a time the Kremlin feared a foreign adventure might trigger...economic sanctions where it hurts: export bans on key parts for its oil industry, even being cut out of its access to the Western banking sector," but "no more." Judah adds that "Russia's elites have exposed themselves" in that "everything they hold dear is now locked up in European properties and bank accounts," which, "theoretically...makes them vulnerable." However, according to Judah, rich Russians, "time and time again...have watched European governments balk at passing anything remotely similar to the US Magnitsky Act, which bars a handful of criminal-officials from entering the United States."

Eliot Cohen, who served as counselor of the State Department during the George W. Bush Administration, in an op-ed for the Washington Post (3/3, 4.28M), says while "Putin is not Hitler," the "precedents being set are ones that will haunt us for decades to come unless the US administration can act decisively and persistently against Russia." The Wall Street Journal (3/3, Subscription Publication, 5.91M), in an editorial, suggests that the Pentagon send ships to the Black Sea as a warning to the Russian government.

Michael O'Hanlon of the Brookings Institution said on CBS' Face The Nation (3/2, Schieffer, 2.64M), "As bad as what Putin may be, he hasn't killed people, and I think he's trying to show force in way that gets specific task done." O'Hanlon added, "We do have pretty strong set of potential economic sanctions and Putin knows it."

Senate Majority Whip Durbin said on CNN's State Of The Union (3/2, Schieffer), "Vladimir Putin and the Russians just spent \$50 billion on this Sochi charm offensive to try to redefine Russia in the 21st century. That Sochi charm offensive died on the streets of Sevastopol when he moved in thousands of troops days after the closing ceremony."

"Strong Popular Support For Russia" Among Crimeans Noted. The Christian Science Monitor (3/3, Ayres, 540K) reports that "by late Sunday it appeared the Russian military had silently taken control of" Crimea "with little objection from the pro-Russia population." On ABC World News (3/2, story 2, 2:45, Muir, 7.43M), correspondent Terry Moran reported that among the citizens of Crimea, "there is strong popular support for Russia." Moran also noted that Crimea is "where the Russian navy has based ships for two centuries."

Likewise, on the CBS Evening News (3/2, story 2, 1:40, Glor, 5.58M), Jeff Glor said that "the Russian forces are consolidating a grip of a largely friendly local population." Elizabeth Palmer, reporting from Crimea's capital, Simferopol, said that apart from "there are small pockets of resistance," much of the "Ukrainian security forces have switched sides, including the head of the navy here, who was only appointed by Kiev" on Saturday, but on

Sunday "announced, in essence, he would join the Russians." However, Palmer added, "Of course, there are thousands of residents of Crimea who are not happy to see the Russian soldiers...but for the moment, they're keeping their heads down."

AFP (3/3, Zaks) reported that "the biggest blow to the new Kiev leaders came when Ukrainian Navy Commander Denis Berezovsky announced a day after his appointment that he was switching allegiance to the pro-Russian authorities in Crimea after gunmen surrounded his building and cut off its electricity." AFP added that the new Crimean government "immediately named Berezovsky as head of" its "own independent navy."

The Washington Post (3/3, A1, Booth, Englund, 4.28M) reports that "at the Ukrainian military base at Perevalnoe...Ukrainian soldiers stood guard while soldiers whom locals described as Russian commandos milled around outside the walls" as "the Ukrainians refused to surrender their weapons."

The Los Angeles Times (3/3, Loiko, 3.07M) reports that in Simferopol, "Russian troops mostly kept a low profile Sunday." According to the Times, Crimean parliament speaker Vladimir Konstantinov said the Russian government is "expected to render economic assistance" to the citizens of Crimea. The Times notes that Crimea's parliament, which is "dominated by a Russian majority," has scheduled "a referendum on the future status of Crimea" for March 30.

On NBC Nightly News (3/3, 6.79M), Bill Nealy reported from Crimea that "Russia's takeover of Crimea is nearly complete...without firing a single shot," and that "there has been no sign so far that the Ukrainian soldiers are going to put up a fight."

The New York Times (3/3, Higgins, Smale, Subscription Publication, 9.61M) reports that "without a shot being fired, Russia and its allies in Crimea have already secured what would seem to be a prime objective: a thorough purge of Ukrainian authority from a region that Russia considers its own, having...lost it only in 1954 when the Soviet leader at the time, Nikita Khrushchev, himself partly of Ukrainian origin, gave it to the Ukrainian Soviet Socialist Republic as a gift."

Concerns Deepen Over Potential Unrest in Other Russian-Speaking Ukrainian Regions. On NBC Nightly News (3/3, 6.79M), Lester Holt noted that "while the Crimea region may be the closest tied to Russia, it is not the only part of Ukraine where Russian sympathies run deep." NBC's Ian Williams, reporting from Kharkiv, said, "There are fears that Eastern Ukraine could be the next region for Russian intervention."

The Christian Science Monitor (3/3, Ayres, 540K) reports that in Kharkiv, "pro-Russian demonstrators dragged opponents of ousted Ukrainian President Viktor Yanukovich from the regional government building they had occupied for the past week." According to the Monitor, such incidents "indicated that Kiev's new government," along with the situation in Crimea, is "also facing a growing crisis in the east, where a disenfranchised, mostly Russian-speaking population was becoming increasingly frustrated."

The Wall Street Journal (3/3, Kolyandr, Coker, Alpert, Entous, Subscription Publication, 5.91M) reports that Putin told President Obama on Saturday that "if the violence spreads further in the eastern regions of Ukraine and Crimea, Russia reserves the right to defend its interests and those of the Russian-speaking population that lives there."

The Washington Post (3/3, A1, Booth, Englund, 4.28M) reports that in Kharkiv, described as "a hotbed of pro-Russian activists in eastern Ukraine," some "few thousand protesters joined a rally Sunday to denounce the Russian move into Crimea." According to The New York Times (3/3, Erlanger, Subscription Publication, 9.61M), in Kharkiv, there is "a sprawling pro-Russian protest camp occupied the central square, and Russian flags were on display."

The Wall Street Journal (3/3, Alpert, Subscription Publication, 5.91M) reports that Dmitri Trenin, director of the Carnegie Moscow Center, says, "At this point, Mr. Putin has secured Crimea, and I don't think an invasion, quote-unquote, is something that is being contemplated." Trenin adds, "I think they felt if there had been resistance to Kiev in Crimea, it could have led to a civil war, into which they would have been drawn, but on someone else's terms, so Mr. Putin probably views this as conflict prevention."

The Wall Street Journal's (3/3, Subscription Publication, 5.91M) Matthew Kaminski, in an op-ed from Donetsk, Ukraine, maintains that for various strategic reasons, Putin is likely to work to split eastern Ukraine from Kiev, but Kaminski predicts that it will not be as easy a task as the occupation of Crimea. Kaminski says polling has never picked up a substantial secessionist tendency among eastern Ukrainians. The Wall Street Journal (3/3, Subscription Publication, 5.91M), has an editorial this morning that largely echoes Kaminski's analysis of the situation in eastern Ukraine and Putin's intentions in the region.

New Government in Kiev Appoints Two Billionaires To Provincial Governorships. The New York Times (3/3, Erlanger, Subscription Publication, 9.61M) reports that "Ukraine's besieged interim government raced to head off violence that might set off a Russian invasion of its eastern provinces...recruiting wealthy eastern businessmen to become provincial governors in an effort to dampen secessionist sentiment there." The Times says Ukrainian President Turchynov "announced the two appointments on Sunday of two billionaires – Sergei Taruta in Donetsk and Ihor Kolomoysky in Dnipropetrovsk – and more were reportedly under consideration for positions in the eastern regions." According to the Times, the appointments are a "recognition that the oligarchs represent the country's industrial and business elite, and hold great influence over thousands of workers in the east."

Under the headline, "Ukraine Turns To Its Oligarchs For Political Help," Andrew Kramer of the New York Times (3/3, Kramer, Subscription Publication, 9.61M) says the "Ukrainian news media" is reporting that the decision to "recruit...the country's wealthy businessmen, known as the oligarchs, to serve as governors" was the work of Yulia Tymoshenko, the former prime minister who was imprisoned until recently. According to the Times, on Saturday, Tymoshenko met with Turchynov and Prime Minister Yatsenyuk. The Times notes that the "oligarchs" will serve in areas that served as the base of "what had been the country's largest political party," former president Yanukowych's Party of Regions.

Will Englund, in an analysis for the Washington Post (3/3, 4.28M), says, "The new, pro-European government...has given those Ukrainians who opposed the protests" that toppled the previous government "very little reason to have confidence in it." Englund adds that the Yatsenyuk government's "swift downgrading of the status of the Russian language made it appear to many that this was just another case of one clan taking power from another – and probably getting ready to snatch the spoils."

Lew Says US Is Prepared "To Provide As Much Support As Ukraine Needs." Bloomberg News (3/3, Klimasinska, 1.91M) reports that on Sunday, Treasury Secretary Lew, after speaking with Ukrainian Prime Minister Arseniy Yatsenyuk, said, "the United States is prepared to work with its bilateral and multilateral partners to provide as much support as Ukraine needs." According to Bloomberg, Lew also said the new Ukrainian government "is ready to undertake 'urgently needed market reforms' to help restore financial stability and strengthen its economy." Under the headline, "Washington Could Give 'As Much Support As Ukraine Needs': Treasury's Lew," Reuters (3/3, Lange) also briefly notes Lew's statement.

On NBC Nightly News (3/3, 6.79M), Kristen Welker reported that on Sunday, Secretary of State Kerry "called on Congress to put together an economic package for the Ukraine, on top of a billion dollar proposed loan." Bloomberg News (3/3, Mazneva, Bierman, 1.91M) reports that OAO Gazprom, described as "Russia's gas-export monopoly," warned on Saturday that it "may end last year's agreement to supply Ukraine at a cheaper rate unless it's paid \$1.55 billion owed for fuel." According to Bloomberg, that was "the first time...that Russia has directly used its position as Ukraine's dominant energy supplier to pressure the new regime," which "can little afford to meet Gazprom's demand for back payment as it tries to negotiate a \$15 billion bailout with the International Monetary Fund."

The New York Times (3/3, Subscription Publication, 9.61M), in an editorial this morning, says the US and the EU "have few effective levers short of military force, which is not an option, to compel" Putin "to back down." But the Times adds, "whatever else they do, the Western powers must provide prompt and substantial assistance to the Kiev government, whose treasury" has been "left bare" by the previous government.

Russian Media Casts New Ukrainian Government As "Fascist." The AP (3/3, Mills) reports from Moscow that on Sunday, "thousands marched freely...in support of Russia using military force in neighboring Ukraine, while at an anti-invasion protest nearby dozens were detained." According to the AP, "Russian state television ratcheted up its pro-invasion rhetoric over the weekend and showed what it claimed were buses full of refugees pouring

across the Ukrainian border, fleeing what anchors call the "fascist thugs" who overthrew the democratically elected government of Viktor Yanukovich. The AP goes on to report that among "at least 10,000 people...in central Moscow" celebrating the Russian troop movement, "some dressed in Soviet military uniforms and shouted slogans like 'Fascism will not pass!'"

Georgetown's Charles King, in an op-ed for the New York Times (3/3, Subscription Publication, 9.61M), says "an estimated 58 percent of the population of two million" in Crimea "is ethnic Russian, with another 24 percent Ukrainian and 12 percent Crimean Tatar." King adds that "many of [Crimea's] inhabitants, regardless of ethnicity, are actually Russian citizens or dual-passport holders." King notes that a poll conducted last month "by the independent, Moscow-based Levada Center, 43 percent of Russians called the overthrow of Mr. Yanukovich a violent coup," and "a plurality...saw the entire affair as an orchestrated attempt by the West to draw Ukraine into its geopolitical orbit."

OBAMA'S BUDGET WILL NOT INCLUDE ENTITLEMENT SPENDING REFORM. USA Today (3/3, Madhani, 5.82M) reports that President Obama's budget for the next fiscal year, which he will introduce on Tuesday, will "disappoint" those "hoping to see a renewal of broad talks to cut the nation's debt" because the President has signaled that he "will step back from his earlier attempt to persuade Republicans to accept a grand bargain to reduce the soaring national debt that would include entitlement changes (something liberals abhor) and raising tax revenues (something conservatives hate)." USA Today also notes that the President "will take off the table what is known as 'chained-CPI', a proposal that would lead to less generous increases in Social Security benefits annually." Regarding the "chained CPI," On Fox News Sunday (3/2, Wallace), Rep. Chris Van Hollen (D-MD) the ranking minority member on the House Budget Committee, said, "The president included that in last year's budget, as part of an agreement...where he said 'Republicans you should join me in at least closing some tax loopholes,' even one for the purpose of reducing our long-term deficit," but "Republicans could not even identify a single tax loophole they would close."

Reuters (3/3, Felsenthal, Lawder) reports that as a result of the 2011 Budget Control Act, 2015 discretionary spending will be essentially the same as it is this year. Jason Furman, who chairs the White House Council of Economic Advisers, is quoted as saying, "We're on track to having discretionary spending the lowest as a share of the economy since we started recording discretionary spending in 1962," and "with that comes a lot of choices that we'd rather not be making." However, Rep. Tom Cole (R-OK) counters that "if we actually got entitlement reform that saved money over the course of a decade, there's no reason some of that savings couldn't flow toward infrastructure, or back toward the military, and still move us down the road on long-term deficit reduction."

Joe Davidson, in his column for the Washington Post (3/3, 4.28M), notes that the President's budget is expected to include funding for "federal employee training," although the Administration "isn't saying how large its initiative is."

PERSONAL INCOME GROWTH DRAWING CONCERN. The Wall Street Journal (3/3, Jakab, Subscription Publication, 5.91M) reports that one-time factors are likely to distort this week's personal income and spending data. The Journal says that the personal income data is likely to show a significant improvement over similar data a year ago. However, the data may hide some troubling trends – the most important of which is that personal income is rising at a far slower rate than at any similar point in post-World War II recoveries.

Western States Leading Nation In Job, Wage Growth. USA Today (3/3, Davidson, 5.82M) reports that seven of the 10 states with fastest job growth this year "will be in the West," a region that has benefited from "a stronger housing recovery and continued gains in its bread-and-butter energy, technology and tourism industries, according to forecasts by IHS Global Insight." Western states also lead the nation in payroll growth. However, many Western states "still trail the nation in recouping jobs lost in the recession."

Housing Boom Has Potential For Problems In San Francisco. In a blog entry for the New York Times (3/3, Bilton, 9.61M), Nick Bilton writes that the continued tech boom is driving housing prices through the roof in San Francisco. It's being driven by a lack of inventory, and with the city surrounded by water on three sides, there is little room for new housing. The problem is that "as more people move in, the city will also need more public-school teachers, police officers and firefighters," and living in there "on a city salary is difficult if not impossible." Bilton adds, "Even some tech entrepreneurs and programmers say they are being priced out."

Editorial Wrap-Up:

NEW YORK TIMES. "Where Have All the Raises Gone?" In an editorial, the New York Times (3/3, Subscription Publication, 9.61M) writes that wages "typically fall or stagnate in recessions, and the Great Recession was particularly severe, exerting a drag on pay that persists to this day." However, "that is only a partial explanation, because declining and stagnant wages predate the latest downturn." The Times says that one study shows that since 2000, college-education Americans have been taking jobs that did not require a college education. The Times says that increasing wages requires "policies like a higher minimum wage; trade pacts that foster high labor and regulatory standards; and more support for union organizing." The Times says it also requires more vigorous government spending.

"A Reprieve for Bristol Bay." In an editorial, the New York Times (3/3, Subscription Publication, 9.61M) hails the Administration's decision on Friday to put "the brakes on a massive gold and copper mine proposed for the headwaters of Alaska's Bristol Bay while it decides whether to prohibit it permanently." The Times says that this "sounds like the death knell for a project, known as the Pebble Mine, that by any measure is an environmental disaster waiting to happen."

"Russia's Aggression." The New York Times (3/3, Subscription Publication, 9.61M), in an editorial this morning, says the US and the EU "have few effective levers short of military force, which is not an option, to compel" Putin "to back down." But the Times adds, "whatever else they do, the Western powers must provide prompt and substantial assistance to the Kiev government, whose treasury" has been "left bare" by the previous government.

"Frustration With Afghanistan." The New York Times (3/3, Subscription Publication, 9.61M) in an editorial says that the threat by President Obama and NATO to "withdraw all troops from Afghanistan by year's end," is "understandable," yet "theatrical," because neither "wants to leave." The Times says it has become "obvious" that a security agreement with Afghanistan must wait "until after Mr. Karzai leaves office," and all probable successors "have signaled that they would sign the accord." The Times concludes by saying there are "serious questions" as to "whether the country will ever be able to stand on its own."

"Mr. Abe's Dangerous Revisionism." The New York Times (3/3, Subscription Publication, 9.61M) in an editorial says that Japanese Prime Minister Shinzo Abe's "brand of nationalism" is turning into a "threat to Japan's relations with the United States." Abe "wants to shed what he calls the self-effacing postwar regime and recreate a renewed patriotism." The problem, says the Times, is that Abe "whitewashes the history of the war" denying the reality of "the Nanjing massacre" as well as the enslavement of Korean women by Japanese soldiers.

WASHINGTON POST. "Hacking At A Free Press?" The Washington Post (3/3, 4.28M) in an editorial describes an attack on Kevin Lau Chun-to, former chief editor of the Chinese-language daily Ming Pao, "by a man wielding a meat cleaver" and comments that it may have been "an assault on the free press in Hong Kong." It notes that Ming Pao had been part of an International Consortium of Investigative Journalists story on "how the world's super-rich, including thousands of Chinese, have embraced the use of global tax havens," and his removal as editor was generally believed to be under pressure from China, which also exerted pressure on Bloomberg and "withheld visas from some New York Times reporters." The Post says that the attack on Mr. Lau was intended to "spread fear and deter journalists" but "mustn't be allowed to maim or kill the spirit of Hong Kong."

"President Obama's Foreign Policy Is Based On Fantasy." The Washington Post (3/3, 4.28M) says that since he took office, President Obama's foreign policy has been "based more on how he thinks the world should operate than on reality." The Post charges that the Administration "often responds" to critics by "accusing" them of "being warmongers who want American 'boots on the ground' all over the world and have yet to learn the lessons of Iraq." The Post goes on to write that "as long as some leaders play by what Mr. Kerry dismisses as 19th-century rules, the United States can't pretend that the only game is in another arena altogether."

WALL STREET JOURNAL. "Putin Declares War." The Wall Street Journal (3/3, Subscription Publication, 5.91M), in an editorial, suggests that the Pentagon send ships to the Black Sea as a warning to the Russian government.

"The FDA's Black Lung." In a scathing editorial, the Wall Street Journal (3/3, Subscription Publication, 5.91M)

says that the FDA is blocking a drug that can slow the progression of Idiopathic Pulmonary Fibrosis, from which about 200,000 people suffer. The Journal says the FDA rejected the drug pirfenidone in 2010, claiming it was not effective. However, the Journal says even more research has now shown that it is, and that the FDA rejected its approval simply to exercise its power.

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Hosts Israeli Prime Minister Benjamin Netanyahu at the White House to discuss progress in Israeli-Palestinian negotiations, developments in Iran and other regional priorities.

VICE PRESIDENT BIDEN — Meets with Prime Minister Iurie Leanca of Moldova.

US Senate: 2 p.m. — The Senate convenes and begin a period of morning business.

US House: 12 p.m. — House will meet for morning hour and at 2 p.m. for legislative business, with votes postponed until 6:30 p.m.

2 p.m. ENERGY AND COMMERCE — Hearing Examining Concerns Regarding FDA's Proposed Changes to Generic Drug Labeling. <http://energycommerce.house.gov/hearing/examining-concerns-regarding-fdas-proposed-changes-generic-drug-labeling> Location: 2123 Rayburn.

5 p.m. RULES — H.R.2641 – Responsibly And Professionally Invigorating Development (RAPID) Act of 2013; H.R.2824 – Preventing Government Waste and Protecting Coal Mining Jobs in America. Location: H-313. Other: 12:30 p.m. **NATIONAL PARKS-ECONOMY** — Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis will hold a press teleconference call to release a new report detailing the economic impact of national parks.

ISRAELI PRIME MINISTER — Benjamin Netanyahu, the Prime Minister of Israel, will hold various meetings in Washington. President Obama will host Israeli Prime Minister Netanyahu at the White House. Time TBA. 1 p.m. Secretary of Defense Chuck Hagel hosts an honor cordon to welcome Prime Minister Netanyahu to the Pentagon. The cordon will be held on the steps of the Pentagon River Entrance. Journalists without a Pentagon building pass will be picked up at the Pentagon River Parking Pedestrian Bridge only. Plan to arrive no later than 30 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort to the cordon. 3:45 p.m. Senators Harry Reid (D-NV) and Mitch McConnell (R-KY) will meet with Prime Minister Netanyahu. There will be a brief photo opportunity at the top of the meeting. Please be advised that no remarks will be given during the photo opportunity. S-219. 4:45 p.m. Photo opportunity and remarks with the Prime Minister of Israel, House Speaker John Boehner, Democratic Leader Nancy Pelosi and other Members of Congress prior to a bipartisan meeting. Camera crews may access the room no earlier than 2:30 p.m. ET. All gear must be in place by 3:45 p.m. ET for security sweep. All media must be credentialed through the appropriate media gallery. The Rayburn Room, H-207.

March 2 – 4. AIPAC 2014 — The annual American Israel Public Affairs Committee (AIPAC) Policy Conference is the largest gathering of the pro-Israel movement. <http://www.aipac.org/act/attend-events/policy-conference> Afternoon session: Secretary of State John Kerry; Senator Charles Schumer (D-NY); House Majority Leader Eric Cantor (R-VA); House Democratic Whip Steny Hoyer (D-MD). Morning Session. Senator John McCain (R-AZ). Location: Walter E. Washington Convention Center, 801 Mount Vernon Place, NW.

March 2 – 4. INTERNATIONAL BANKERS CONFERENCE — The Institute of International Bankers hosts their 25th Annual Washington conference. Confirmed government speakers include: Mary John Miller, Acting Deputy Secretary of the Treasury and Under Secretary for Domestic Finance, who will give the opening keynote address; Mark Wetjen, Acting Chairman of the CFTC, who will give the keynote luncheon address; Comptroller of the Currency Thomas Curry; FDIC Chairman Martin Gruenberg; SEC Commissioner Daniel Gallagher; New York State Superintendent of Financial Services Benjamin Lawsky; and Elke Koenig, President of Germany's Federal Financial Supervisory Authority. Confirmed private-sector speakers include: Irene Domer, President and CEO, HSBC USA; Karen Shaw Petrou, Managing Partner, Federal Financial Analytics; and political analyst Charlie Cook, who will discuss the outlook for the 2014 midterm elections. <https://m360.iib.org/event.aspx?eventID82930> 8:45 a.m. Acting Deputy Secretary and Under Secretary for Domestic Finance Mary Miller delivers remarks. Open press. Interested media may contact William Goodwin at wgoodwin@iib.org. Location: Four Seasons Hotel, 2800 Pennsylvania Ave. NW.

March 3 – 4. FAHS 2014 ANNUAL PUBLIC POLICY CONFERENCE — Annual public policy conference of the Federation of American Hospitals (FAH). The FAHs Annual Public Policy Conference provides attendees with an overview, updates and insight about the most topical and salient health policy issues of interest to FAH members, hospital leaders, private investor-owned hospitals, suppliers, buyers, sponsors and stakeholders.

Speakers: Rep. Paul Ryan (R-WI), Chairman, House Budget Committee; Marilyn Tavenner, Administrator, Centers for Medicare & Medicaid Services; Sen. Roy Blunt (R-MO), Vice Chairman, Senate Republican Conference; Sen. Patrick J. Toomey (R-PA), Member, Senate Finance Committee; James H. Hinton, Chairman, American Hospital Association; General Michael V. Hayden (USAF Ret.), Former Director, Central Intelligence Agency; Former Director, National Security Agency. 8 a.m. – 9 a.m. General Michael V. Hayden (USAF Ret.), Former Director, Central Intelligence Agency; Former Director, National Security Agency (NOTE: General Haydens presentation is off-the-record, and audio and/or video recording is prohibited.) Location: Marriott Wardman Park Hotel, 2660 Woodley Road, N.W.

March 3 – 4. NATIONAL RESEARCH COUNCIL'S ANNUAL SPACE SCIENCE WEEK — The standing committees of the National Research Council's Space Studies Board and Board on Physics and Astronomy will convene to discuss issues and advances in the fields of astronomy and astrophysics, earth sciences and applications from space, astrobiology and planetary science, and solar and space physics. 1 p.m. – 6 p.m. Plenary session will focus on international programs and planning in space science, with a keynote presentation on NASA Science Mission Directorate activities from Associate Administrator John Grunsfeld. Location: National Academy of Sciences building, 2101 Constitution Ave. NW.

U.S. CHAMBER – IRAQ – DEPUTY PRIME MINISTER — 10 a.m. – 4 p.m. Business Investment Climate and Opportunities in Iraq Forum. **Speakers:** H.E. Rowsch Shaways, Deputy Prime Minister, Republic of Iraq; H.E. Dr. Khairullah Hasan Babakir, Minister of Trade, Republic of Iraq; Dr. Sami al-Araji, Chairman, National Investment Commission of Iraq; Dr. Thamir Ghadhban, Chairman, Prime Ministers Advisory Council; H.E. Lukman Faily, Ambassador of the Republic of Iraq to the United States; Khush Choksy, Vice President of Turkey and Middle East Affairs, U.S. Chamber of Commerce. Media RSVP: press@uschamber.com or call 202-463-5682. Location: U.S. Chamber of Commerce, 1615 H St. NW.

MEDICARE PART D TELECONFERENCE — 11 a.m. A media teleconference to discuss proposed changes to Medicare prescription drug coverage and potential impact on patients. With U.S. Rep. Marsha Blackburn (R-TN), vice chair of the House Energy and Commerce Committee; former U.S. Rep. Patrick Kennedy, an advocate for accessible mental health coverage; Andrew Sperling, director of federal advocacy, National Alliance on Mental Illness; Mary R. Grealy, president, Healthcare Leadership Council. (The Healthcare Leadership Council is hosting the teleconference.)

SECRETARY DUNCAN – TEACHER OF THE YEAR FINALISTS — 5 p.m. Education Secretary Duncan will participate in a panel discussion during a meeting with finalists for the 2014 National Teacher of the Year. The discussion will focus on teaching and teacher leadership, as well as other topics raised by the audience and Secretary Duncan. The four finalists are: Dorina Sackman, Florida Teacher of the Year; Sean McComb, Maryland Teacher of the Year; Melissa Ann Porfiro, Virginia Teacher of the Year; and Ryan DeMin, Pennsylvania Teacher of the Year. Location: Council of Chief State School Officers, One Massachusetts Ave. NW, 7th Floor/DuPont Room.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Just saw that Mitt Romney and Chris Christie raised one million dollars last night at a fundraiser for the Republican Governor's Association. Well, Christie raised about \$1,000 dollars and Mitt accidentally left his wallet behind. But still, technically, it's a million dollars."

Sally Jewell (b)(6)@ios.doi.gov

Mon, Mar 3, 2014 at 8:42 PM

To: Kershaw Jessica L <jessica_kershaw@ios.doi.gov>

Jessica -

The TPs for NaCo weren't with the other docs you printed for me earlier today. If you have access to a printer at the hotel, will you please print me a copy? It is easier to work from paper. If possible, it would be helpful if they are in 14 pitch font with a space between bullets (perhaps this is just how it looks on my iPad). If you can't print easily, please ask whomever is meeting me at the event to provide a copy (although having it before the flight would be way more helpful).

Thanks,

Sally

Sally -

Attached are the suggested TPs for the NACo remarks tomorrow.

They are long - in part because there is about 1.5 pages of 'fast facts' that should be quick to read out to the audience if you want to do so. If there are any sections to shave down, I might suggest doing a brief-er overview of the youth initiative.

We'll work with the briefing book team to get these uploaded.

Let me know if there's anything else we can do/provide to support your appearance tomorrow.

My apologies these weren't ready to go last night.

Kate

Talking Points for Secretary Jewell
National Association of Counties Legislative Conference
Tuesday, March 4, 2014
Washington, D.C.

Suggested length: 15-20 minutes

I. ACKNOWLEDGEMENTS (1 min)

- **Sallie Clark**, NACo Second Vice President and Commissioner, El Paso County, CO (*introduces you*)
- Transportation Secretary **Anthony Foxx** (*speaks immediately before you*)
Note: You can thank Foxx for his help with reframing the Interior portion of the new Highway Bill – per your recent phone call and email.
- NACo (*you will meet many in green room before*)
 - President **Linda Langston** (Supervisor, Linn County, IA) and the officers and members of the NACo Board
 - **Mike Murray**, Chair of the Public Lands Steering Committee
 - **John Martin**, President of the Western Interstate Region Board
 - All the members of NACo who are tackling many of the complex natural resource and public land issues we share
- **Cynthia Moses-Nedd**, Interior's stellar Liaison to State & Local Governments
- From my roles past and present, I have a **great appreciation** for what you as County Officials and executives do on a daily basis on behalf of your communities
- I know that your work has an **incredible impact** on American's quality of life; **thank you for your public service**

II. BACKGROUND ON SALLY JEWELL + INTERIOR (3 min)

- Oil and gas engineer → Banking → REI CEO → Interior Secretary
- Interior has vast portfolio that intersects with economies and communities across the country

Interior Fast Facts:

- Manages more than **530 million acres** (about 20 percent of the land in U.S.); **700 million acres** of subsurface minerals; **1.7 billion acres** of the Outer Continental Shelf
- Together, those lands and offshore areas produce **21 percent of nation's energy** – both conventional and renewable
- **401** National Parks, **562** National Wildlife Refuges, **247 million acres** in the National System of Public Lands
- **70,000 employees** in approximately **2,400 locations** across the U.S., Puerto Rico, U.S. Territories, and Freely Associated States
- Largest supplier and manager of water in the **17 western states**; Reclamation manages 476 dams and 337 reservoirs that deliver water and power – including irrigation water to **one out of every five western farmers**
- Upholds trust responsibilities to the **566 federally recognized tribes**, including education services to nearly **41,000 students** through the Bureau of Indian Education
- Provides unbiased, multidisciplinary science to understand our earth, including through: **8,000 streamgages**, **2,700 earthquake sensors**, and **15 million satellite scenes** downloaded from Landsat since the archives were made available at no cost to the public

- Funds and oversees reclamation of **322,000 acres of abandoned coal mine** sites
- **Economic impact:**
- Estimated revenue collection in 2015 is **\$14.9 billion** (grazing, energy, minerals, land sales, timber). This money is shared with Federal, State and local governments to meet a variety of needs, including school funding, infrastructure improvements and water conservation projects
- Interior's programs contributed an estimated **\$371 billion** to the U.S. economy and supported **2.3 million jobs** in 2012
- That funding includes **\$45 billion** generated from the more than **417 million visits** to Interior's public lands – for outdoor recreation and tourism

III. PAYMENTS IN LIEU OF TAXES (1 min)

- Want to touch briefly on this program as I understand its importance to many of you – especially to rural, western counties where it can comprise a significant portion of your budget
- Pleased that the **Farm Bill** included authorization to make PILT payments in 2014
- PILT is **not subject to sequester this year**; the authorization came after the President's sequester order was issued. The estimated total for payments is \$432 million
- We are working on a tight schedule to get data from the states to calculate the payments, and **hope to complete payments in June**

- As always, we will issue and post information about the payments publicly to ensure maximum transparency

IV. PILT program is a good example of the way in which the **Federal government can be a good neighbor to local communities**, and we will continue to **work with Congress on reauthorization**

THREE FACTORS

Will spend rest of time talking about some of the top challenges facing Interior – and really all of us – and some of the things we’re doing about it

1. Constrained resources (2 min)

- Governments at every level grappling with constrained resources – examples present every time I visit Interior teams around the country
- President is proposing a budget for fiscal year 2015 later this morning
- Will show how we can invest in the things we need to grow our economy, create jobs, increase skills training and improve education – while continuing long term deficit reduction
- Importantly, it continues to dig us out of the ditch caused by sequester, gets back to regular order and helps provide certainty for the economy
- Look forward to working with Congress to implement the budget
- Will continue to look for opportunities to partner with businesses, better align our work, find efficiencies, and examine practices to ensure they are effective and consistent with our priorities
- Will want to work with you on the **PILT reauthorization**, in conjunction with authorization of **Secure Rural Schools** payments and the much needed

permanent authorization of the **Land and Water Conservation Fund**

2. **Climate Change (5 min)**

- Defining issue of our time
- Has major impacts on our land, water, wildlife, tribal communities and economy
- See real effects everywhere I travel: Alaska, Marshall Islands, California and Colorado River Basin, hotter, drier fire seasons
- **President's Climate Action Plan** – we have a moral obligation to act now to cut carbon pollution, prepare communities and business for impacts, and slow the effects of climate change
- **Interior's role:**
 - Build a better understanding – for example, Climate Science Centers
 - Build resilience – for example, Hurricane Sandy funding to strengthen coastal resilience and natural barriers
 - Develop homegrown, clean energy
 - Goal: approve 20 MW of renewable energy on public lands by 2020
 - Approved the 50th project in February. Incredible progress from 2009, when there were zero solar project permitted on public lands
 - Together, the 50 wind, solar and geothermal projects would generate 14,000 MW, enough to power 4.8 million homes, and support 20,000 construction and operations jobs

- **Mitigation**
- Under my leadership, we are taking the long view at Interior to **balance development and conservation**
- In October of last year, I issued my first **Secretarial Order** to develop a department-wide strategy to strengthen our mitigation practices
- The Order aims to ensure that we mitigate impacts by using tools such as **landscape-level planning**
- By guiding development to the areas of highest resource value and lowest environmental concern, we can **reduce the likelihood of conflict**, costly delays and litigation
- Important to me, coming from the business community, that the Order improve **certainty for all interests** that depend on public lands – energy, mining, agriculture, recreationists, hunters and fisherman, and communities
- **Stakeholders need to know** what’s expected of them up front when they use or impact public lands. And we need to improve our ability to work with them to help ensure that **development and conservation goals can be achieved in a more efficient, predictable, and cost-effective way**
- That way, we spend less time on the analysis of individual projects and more time trying to **identify the right places to develop** in advance of committing critical resources – including private capital – to projects

3. Engaging the Next Generation (5 min)

- Next generation of Americans is more urban and diverse; more connected through technology, but less connected to the natural world
- We need to reflect these realities in our workforce and in our practices if we are to stay effective and relevant
 - Nearly one-third of DOI workforce retirement eligible in next 5 yrs

- We must seek ways to **protect our nation's outdoor heritage** and **create opportunities** to develop next generation of outdoor stewards
- Launched ambitious youth initiative to inspire millions to **Play, Learn, Serve, Work** outdoors

To develop the next generation of lifelong conservation stewards and ensure our own skilled and diverse workforce pipeline, Interior will provide **100,000 work & training opportunities** to young people and veterans within our bureaus and through public-private partnerships

- Campaign to raise **\$20 million** from private partners that will help stand up the **21st Century Conversation Service Corps** to support youth work and training opportunities
- It's a **win-win-win**: develops lifelong connection to the outdoors, creates jobs, and helps our public lands

V. CONCLUSION (1 min)

- Appreciate your partnership on these complex challenges
- Examples of where engagement is making a difference:
 - **Moab County** (UT) officials in developing Master Leasing Plans
 - **King County** (WA) officials engaged on climate change
 - **Garfield County** (CO) officials utilizing conservation funding to hire local youth to rebuild trails, clear brush and learn principles of conservation
 - Counties throughout the West working to conserve sage grouse habitat
- You – more than anyone – know that these issues **do not stop at political boundaries. We must all work together** – across party lines, across state lines, at all levels of government, including with tribal communities
- Thank you for collective efforts to advocate on behalf the American public

U.S. Department of the Interior News Briefing for Tuesday, March 4, 2014

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

INTERIOR RELEASES NPS REPORTS ON ECONOMIC BENEFITS, SHUTDOWN COSTS. The National Journal (3/4, Subscription Publication, 427K) reports that "boosted by an additional 4 million visitors in 2012, national parks across the country continued to be important economic engines, generating \$26.75 billion in economic activity and supporting 243,000 jobs, according to a peer-reviewed report released today by Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis." Jewell said, "National parks like Yellowstone and Gettysburg are places of unimaginable beauty and powerful history that help tell America's story while connecting us with nature. At the same time, our national parks help propel our nation's economy, drawing hundreds of millions of visitors every year who are the lifeblood of the hotels, restaurants, outfitters, and other local businesses that depend on a vibrant and reliable tourism and outdoor recreation industry supported by our public lands." Jarvis said, "In 2012, the National Park Service welcomed more than 280 million visitors to their national parks. For nearly 100 years we have helped people discover places to explore, learn from and enjoy. These places of history, culture and natural wonder offer unparalleled experiences and return \$10 for every \$1 American taxpayers invest in the National Park Service. That's a successful formula we can all embrace as we prepare for the next 100 years of the National Park Service."

The AP (3/4, Daly) reports that in a separate report, "the government shutdown last fall resulted in nearly 8 million fewer visitors to national parks, costing the parks and surrounding communities an estimated \$414 million in lost visitor spending, the Interior Department said Monday." Jewell said "the 16-day shutdown was a striking reminder that national parks are a powerful economic engine for local economies across the country." She said, "The very unfortunate government shutdown of October had one silver-lining: Communities realized just how much benefit they get from the parks being open. Let's hope we never have to go there again." Coverage by the AP was also picked up by the Chattanooga (TN) Times Free Press (3/3, 226K), the Belleville (IL) News-Democrat (3/3, 167K), KPIX-TV San Francisco (3/3, 51K), KPBS-TV San Diego (3/3, 14K), and KSJR-FM Colleeville, MN (3/3, 34K).

Additional coverage was provided by the AP (3/4), the Washington Times (3/4, Dinan, 417K), the Washington Examiner (3/4, 319K), ABC News (3/4, 3.68M), NPR (3/4, Peralta, 465K), the Huffington Post (3/4, Sheppard, 11.54M), the US News & World Report (3/3, 620K), Government Executive (3/4, 28K), the Denver Post (3/4, Blevins, 949K), the Bozeman (MT) Daily Chronicle (3/4, 54K), NBC News (3/4, 6.79M), KULR-TV Billings, MT (3/4, 2K), WEVO-FM Concord, NH (3/4, 2K), and KUOW-FM Seattle (3/4, 15K).

Alabama. The AP (3/4) reports that "the national parks in Alabama had nearly 718,000 visitors in 2012" and "the visitors spent \$26.5 million," according to an NPS report.

Arizona. The AP (3/4) reports that "Arizona communities that serve as gateways to the Grand Canyon lost out

on \$17 million during last year's partial government shutdown," according to an NPS report. The report "found that Grand Canyon visitors typically spend \$37.6 million during October on gas, food, lodging, souvenirs and other things," but "that figure fell to \$20.6 million as Congress wrangled over the federal budget, forcing the closure of national parks." In total, "Arizona lost out on about \$27 million during the 16-day shutdown, coming in second to California." Coverage by the AP was also picked up by the [Arizona Republic](#) (3/4, 1.19M). Also reporting on the story is the [Cronkite News](#) (3/4),

[KCSG-TV](#) St. George, UT (3/4, 43) reports that "over 4.4 million visitors to Grand Canyon National Park in 2012 spent \$454 million in communities near the park." According to the report, "that spending supported 6,010 jobs in the local area." Superintendent Dave Uberuaga said, "Grand Canyon is proud to welcome visitors from across the country and around the world. We are delighted to share the story of this place and the experiences it provides, and to use the park as a way to introduce our visitors to this part of the country and all that it offers. National park tourism is a significant driver in the national economy- returning \$10 for every \$1 invested in the National Park Service- and it's a big factor in our local economy as well. We appreciate the partnership and support of our neighbors and are glad to be able to give back by helping to sustain local communities."

[KVOA-TV](#) Tucson, AZ (3/4, 7K) reports that "in 2012, 634,286 visitors to Saguaro National Park spent \$37.5 million in communities near the park," and "that spending supported 526 jobs in the local area." Superintendent Darla Sidles said, "Saguaro National Park is proud to welcome visitors from across the country and around the world. We are happy to share the story of the iconic saguaro cactus, the diversity of the Sonoran desert, and the experiences the park provides to all visitors."

California. The [Fresno \(CA\) Bee](#) (3/3, 327K) reports that "the federal government shutdown last October cost communities near Yosemite National Park an estimated \$6.7 million in reduced spending by visitors," according to an NPS report. Jarvis said the "timing of the shutdown was especially bad for businesses because 'October is a very important month for park visitation.'" Coverage was also picked up by the [Modesto \(CA\) Bee](#) (3/3, 208K).

Also covering the story are the [Merced \(CA\) Sun-Star](#) (3/3, 86K), the [Palm Springs \(CA\) Desert Sun](#) (3/3, 110K), the [Fresno \(CA\) Business Journal](#) (3/4, 160K) and the [Central Valley \(CA\) Business Times](#) (3/4, 206).

Colorado. [KWGN-TV](#) Denver (3/3, 1K) reports that "tourism to Colorado's national parks brought in \$347 million in economic benefits," according to an NPS report. Sue Masica, director of NPS's Intermountain Region, said, "From Mesa Verde to Dinosaur National Monument, the national parks of Colorado attract millions of visitors a year from across the country and around the world. This new report confirms that national park tourism is a significant driver in the national economy, returning \$10 for every \$1 invested in the National Park Service. This reality makes parks tourism an important factor in Colorado's economy as well."

Also reporting on the story are the [Longmont \(CO\) Times-Call](#) (3/4, 66K), the [Loveland \(CO\) Reporter-Herald](#) (3/4, 52K), and the [Estes Park \(CO\) Trail-Gazette](#) (3/4, 13K).

DC. The [AP](#) (3/4) reports that "visitors to parks in and around the nation's capital spent nearly \$929 million in surrounding communities in 2012," according to an NPS report. The report found that "visitor spending supported more than 12,000 jobs in Washington, Maryland, northern Virginia and West Virginia's Eastern Panhandle."

Florida. The [AP](#) (3/4) reports that "national parks in Florida received 10.6 million visitors and supported 8,064 jobs in the state in 2012," according to an NPS report. The report said that "visitors to national parks in Florida spent \$572.6 million."

Georgia. The [AP](#) (3/4) reports that "the more than 7.3 million people visited Georgia's national parks in 2012, and the tourism generated an economic benefit of more than \$343 million," according to an NPS report.

Hawaii. The [AP](#) (3/4) reports that "Hawaii's seven national parks drew 5.1 million visitors in in 2012," according to an NPS report. The report found "visitors spent \$314.5 million in the areas around the attractions, which include active volcanoes, lush trails and historic sites," and "that helped support more than 3,700 jobs."

[KHON-TV](#) Honolulu (3/3, 30K) reports that "the 1,483,928 visitors to Hawaii Volcanoes National Park spent \$113,376,400 in communities near the park," and "that spending supported 1,353 jobs in the local area." Park

superintendent Cindy Orlando said, "It's always exciting to share how much of a positive impact our national and international visitors have on the economic viability of our island community. On the same note, it's also worth contemplating what the park means to our Hawaii Island residents. That's difficult to define with a dollar amount."

Hawaii Reporter (3/4, 8K) reports that Regional Director Chris Lehnertz said, "The national parks of Hawai'i attract visitors from across the country and around the world. Whether they are out for an afternoon, a school field trip, or a month-long family vacation, visitors come to have a great experience, and end up spending a little money along the way. This new report shows that national park tourism is a significant driver in the national economy – returning \$10 for every \$1 invested in the National Park Service – and a big factor in Hawai'i's economy as well, a result we can all support."

Iowa. The Des Moines (IA) Business Record (3/4, 9K) reports "that 207,352 people visited its two sites in Iowa in 2012, spending \$11.5 million in area economies and supporting 176 jobs," according to an NPS report.

Maine. The AP (3/4) reports that "park visitors spent \$201 million and supported 3,138 jobs in Maine in 2012," according to an NPS report. Mike Caldwell, the park service regional director, said that "the report shows that national park tourism is a significant economic driver – returning \$10 for every \$1 invested in the National Park Service."

The Bangor (ME) Daily News (3/3, 166K) reports that Acadia National Park "lost almost 200,000 visits and \$16 million in visitor spending from the 16-day federal government shutdown in October 2013," according to an NPS report.

Also reporting on the story are the Portland (ME) Press Herald (3/4, 279K) and WCSH-TV Portland, ME (3/4, 21K).

Maryland. The Baltimore Sun (3/3, Sherman, 812K) reports that "almost 7 million people visited national parks in Maryland in 2012, generating some \$217.2 million in spending and 2,770 jobs," according to an NPS report. The article notes that Fort McHenry National Monument and Shrine "drew more than 744,000 visitors, who spent about \$40 million and sustained about 526 jobs."

Massachusetts. The New Bedford (MA) Standard-Times (3/3, 54K) reports that "the impact of Massachusetts' national parks is \$503 million." The article notes that "the New Bedford Whaling National Historical Park is an \$18 million economic boost for the SouthCoast."

The Lowell (MA) Sun (3/4, 142K) reports that Lowell National Historical Park "brought an estimated \$29 million in spending to the Lowell area in 2012, and Minute Man National Historical Park in Concord and Lexington attracted \$54 million in spending," according to an NPS report.

Michigan. ABC (3/4, 6.46M) reports that "more than two million Michigan visitors spent a combined \$181.7 million in State Parks in 2012, supporting close to 3,000 jobs," according to an NPS report. NPS Midwest Regional Director Michael Reynolds said the "data is a clear indication that tourism is a significant driver in the national economy, returning \$10 for \$1 invested." Reynolds also said that "the funding generated by National Parks has a swift and direct positive impact on local economies in Michigan."

Minnesota. The AP (3/4) reports that "Minnesota's national parklands drew over 600,000 visitors who spent over \$34 million and supported over 500 jobs in the state in 2012," according to an NPS report.

Montana. The Ravalli (MT) Republic (3/4, 19K) reports that "national parks drew almost 4.5 million people to Montana in 2012, and they spent more than \$400 million in the state," according to an NPS report. Glacier National Park "accounted for nearly 2.2 million visitors and \$172 million spent in communities near the park, the report says." Also picking up coverage is The Missoulian (3/4, 104K).

The Flathead (MT) Beacon (3/4, 15K) reports that Superintendent Jeff Mow said, "We are honored and proud to welcome visitors from across the country and around the world to Glacier National Park. Glacier is a special place and many times visitors travel to Montana specifically to visit Glacier, and are introduced to the many other wonderful amenities that Montana, and Northwest Montana have to offer."

Nebraska. WOWT-TV Omaha, NE (3/4, 104K) reports that “304,046 visitors to national parks in Nebraska spent \$13.2 million and supported 200 jobs in the state in 2012,” according to an NPS report.

Nevada. The AP (3/4) reports that Lake Mead National Recreation Area “saw a 43 percent decline in average visitation during the 16-day government shutdown last fall,” according to an NPS report. The report found “the number of visitors to the reservoir on the Colorado River near Las Vegas fell to about 267,000 in October, down from a three-year monthly average of 473,000.” According to the article, “that decline resulted in a drop of \$8.4 million in visitor spending, to \$10.9 million from \$19.3 million.”

New Hampshire. The AP (3/4) reports that the Saint-Gaudens National Historical Site in Comish “pumped \$1.5 million into the state’s economy in 2012,” according to an NPS report.

New York. The AP (3/4) reports that “New York state’s 22 national parks drew more than 12.6 million visitors who spent \$446.4 million in 2012,” according to the report. It also said that “national parks in the state supported 4,885 jobs in New York two years ago.”

North Carolina. The AP (3/4) reports that visitors to NPS sites “at both ends of North Carolina drew visitors who spent a lot of money in 2012,” according to an NPS report. The article notes that “the report shows there were 15.2 million visitors to the Blue Ridge Parkway who spent \$902 million in the communities near the park.” Also, “more than 3 million people visited Cape Hatteras National Seashore, Fort Raleigh National Historic Site and Wright Brothers National Memorial,” and “those visitors spent \$175 million in the vicinity of the park sites to support nearly 2,500 jobs.”

Oregon. The Salem (OR) Statesman Journal (3/3, 104K) reports that “about 875,000 people visited Oregon’s national parks in 2012, spending about \$58.5 million and supporting 924 jobs,” according to an NPS report.

Pennsylvania. The Main Line (PA) Media News (3/3, 2K) reports that “8,768,869 visitors to national parks in Pennsylvania spent \$444.4 million and supported 6,848 jobs in the state in 2012,” according to an NPS report. Mike Caldwell, NPS Northeast Regional Director said, “The national parks of Pennsylvania attract visitors from across the country and around the world. Whether they are out for an afternoon, a school field trip, or a family vacation, visitors come to have a great experience, and end up spending a little money along the way. This new report shows that national park tourism is a significant driver in the national economy – returning \$10 for every \$1 invested in the National Park Service – and a big factor in our state’s economy as well, a result we can all support.”

South Carolina. The AP (3/4) reports that “almost 890,000 visitors” to sites in South Carolina “pumped an estimated \$48 million into the local economy during 2012,” according to an NPS report. The report “found that the nearly \$48 million spent in the local area by park visitors supported almost 700 jobs locally.”

Tennessee. WRCB-TV Chattanooga, TN (3/4, 34K) reports that “8,414,094 visitors to national parks in Tennessee spent \$541 million and supported 7,868 jobs in the state in 2012,” according to an NPS report. Stan Austin, NPS Southeast Regional Director said, “Tennessee has become a world player in tourism. Beyond its beauty and recreation, the state has been home to presidents and poets. Some of the most ferocious fighting of the American Civil War occurred in the forests of Tennessee.”

WBIR-TV Knoxville, TN (3/3, 43K) reports that Jewell said, “In this park, you generated \$741 million dollars in visitor spending and support more than 10,900 jobs locally just because this park is here. So you are a model here in the Smokies for public, private partnerships, for working together as a community to take care of this resource.”

Texas. KTSM-TV El Paso, TX (3/4, 970) reports that “the 3,939,160 visitors to Texas national parks in 2012 spent \$188.1 million and supported 2,592 jobs in the state,” according to an NPS report. Sue Masica, director of the NPS’s Intermountain Region, said, “From Big Bend to Padre Island National Seashore, the national parks of Texas attract millions of visitors a year from across the country and around the world. Whether these park visitors are out for an afternoon, on a school field trip or taking a long family vacation, they come for a great experience – and they end up spending a little money along the way, too. This new report confirms that national park tourism

is a significant driver in the national economy, returning \$10 for every \$1 invested in the National Park Service. This reality makes parks tourism an important factor in the Texas economy as well. It's a result we all can support."

Utah. The AP (3/3) reports that "Utah's decision to dip into state funds and spend nearly \$1 million to reopen national parks during the partial government shutdown last fall paid off, according to a federal report released Monday." According to the report, "visitors to national parks in the state spent about \$10 for every \$1 the state paid the US government to reopen nine parks along with monuments and recreation areas during a six-day period in October." The article notes that "during that time, there were 154,000 visits that led to an estimated \$9.95 million in visitor spending." Coverage by the AP was also picked up by Yahoo! (3/4, Mccombs, 17.91M), ABC News (3/4, 3.68M), the Washington Times (3/4, Mccombs, 417K), the Deseret (UT) News (3/4, 274K), and the Minneapolis Star Tribune (3/4, Mccombs, 1.14M).

KCSG-TV St. George, UT (3/4, 43) reports that Sue Masica, director of NPS's Intermountain Region said, "From Zion and Bryce Canyon to Golden Spike National Historic Site, Utah's national parks attract more than 9 million visitors a year from across the country and around the world. Whether these park visitors are out for an afternoon, on a school field trip or taking a long family vacation, they come for a great experience – and they end up spending a little money along the way, too. This new report confirms that national park tourism is a significant driver in the national economy, returning \$10 for every \$1 invested in the National Park Service. This reality makes parks tourism an important factor in Utah's economy as well. It's a result we all can support."

Also reporting on the story are the Salt Lake (UT) Tribune (3/4, 343K), the Deseret (UT) News (3/4, 274K), and the Ogden (UT) Standard-Examiner (3/3, 147K).

Vermont. The AP (3/4) reports that "Vermont's lone National Park had \$1.7 million in economic impact in the state, creating 25 jobs," according to an NPS report. The report "found there were 32,403 visitors to the Marsh-Billings-Rockefeller National Historical Park in Woodstock." Coverage by the AP was also picked up by the Minneapolis Star Tribune (3/4, 1.14M) and Yahoo! (3/4, 17.91M).

Virginia. The AP (3/3) reports that "Virginia's national park sites yielded nearly \$1 billion in economic benefits with more than 23 million visits in 2012," according to an NPS report. The report said that "visitors in Virginia spent \$926.3 million while visiting national parks in 2012, supporting more than 13,250 jobs in Virginia." NPS Director Jonathan Jarvis said, "Virginia is a significant state in terms of its total visitation and visitors love to see these great parks in Virginia."

Also reporting on the story are the Roanoke (VA) Times (3/4, 259K) and the Newport News (VA) Daily Press (3/4, 206K).

Washington. The AP (3/3) reports that "the average number of visitors to Olympic National Park dropped 24 percent during the government shutdown last October," according to an NPS report. The article notes that "the 16-day partial government shutdown resulted in about 42,000 fewer visitors to the park on Washington's Olympic Peninsula." That "resulted in a loss of about \$3.4 million in visitor spending in communities that surround the parks." Meanwhile, "a separate National Park Service report" showed "in Washington state, 7.5 million people who visited national park lands spent a total of about \$419 million in 2012." Coverage by the AP was also picked up by the Washington Times (3/4, 417K) and KOMO-TV Seattle (3/4, 237K).

The Business Examiner (3/4, 39) reports that "just over one million visitors to Mount Rainier National Park in 2012 spent \$36.8M in communities surrounding the park," according to an NPS report. Park Deputy Superintendent Tracy Swartout said, "Mount Rainier National Park is an icon of the Pacific Northwest, and serves as inspiration today, as it has for centuries. The mountain attracts visitors from across the US and around the world. While their destination may be the park, they also spend time and money in our local communities."

Additional coverage was provided by the Seattle Post-Intelligencer (3/3, 768K).

Wisconsin. WITI-TV Milwaukee (3/3, 45K) reports that "273,933 visitors to national parks in Wisconsin spent \$28.4 million and supported 422 jobs in the state in 2012," according to an NPS report. NPS Midwest Regional Director Michael T. Reynolds said, "The national parks of Wisconsin attract visitors from across the country and

around the world and provide premiere historical, cultural, natural, and recreational experiences. This new report shows that national park tourism is a significant driver in the national economy – returning \$10 for every \$1 invested – and funding generated by national parks has a swift and direct positive impact on local economies in Wisconsin as well.”

West Virginia. The AP (3/4) reports that “just over 1.5 million people visited West Virginia’s national park sites in 2012,” according to an NPS report. The visitors “spent about \$63 million visiting the sites – spending that supported 863 jobs in West Virginia.” Coverage by the AP was also picked up by the Charleston (WV) Gazette (3/4, 154K).

Also reporting on the story is the Beckley (WV) Register-Herald (3/4, 63K).

Wyoming. The Casper (WY) Star-Tribune (3/4, 90K) reports that “Wyoming’s national parks and monuments create thousands of jobs and generate more than \$700 million in tourism spending in Wyoming,” according to an NPS report. The state’s “6,194,752 national park visitors in 2012 spent \$721 million and supported 9,372 jobs in the state, according to the report.”

SECRETARY JEWELL ANNOUNCES FUNDING OF SMOKIES HISTORY AND ARCHIVE CENTER. The Chattanooga (3/4, 17K) reports that “at an event on Monday at the Great Smoky Mountains Heritage Center,” Sen. Lamar Alexander welcomed Interior Secretary Sally Jewell “for the unveiling of construction plans of the Joint Curatorial Collections Facility that will house more than 800,000 historical artifacts and archival records.” Alexander said, “East Tennesseans feel like we own the park because many of our families did. This is an opportunity to celebrate the way of life of those mountain families who once lived here. This is great news for everyone who loves the Great Smoky Mountains, and I thank Secretary Jewell for making this happen. Her efforts, combined with the commitment of park service employees and generosity of friends of the Smokies, ensures that we will be able to preserve the history of those families.”

WVLT-TV Knoxville, TN (3/4, 8K) reports that Jewell announced that “she’d secured the funds to build” the Joint Curatorial Collections Facility for the Great Smoky Mountains. Jewell said, “It’s really important that we not just have these artifacts but that we take care of them because we won’t have them for generations to come if we don’t.” Jewell said “half the \$4.3 million comes from the federal government and the other half comes from private funds.” She said, “National Parks don’t operate by themselves they operate as a community. Public-private partnerships used to be the margin of excellence now it’s the margin of survival.”

The Maryville (TN) Daily Times (3/4, 64K) reports that Jewell said, “The construction bids will be going out immediately. We expect the contract to be awarded this summer. The goal is to have the facility completed sometime in the fall of 2015.”

Also reporting on the story are the Knoxville (TN) News Sentinel (3/4, 366K), WBIR-TV Knoxville, TN (3/3, 43K), and WATE-TV Knoxville, TN (3/4, 36K).

INTERIOR SIGNS MEMORANDUM OF UNDERSTANDING WITH SALTON SEA AUTHORITY. The Southern California Public Radio (3/3, 57K) reports that “local political leaders and their Washington counterparts are uniting to save the Salton Sea.” The Interior Department announced “it has signed a Memorandum of Understanding with Salton Sea Authority.” The MOU is a “commitment to find collaborative solutions to resource challenges, to share available technical and scientific information and expertise, and to prioritize partnerships to improve resource conditions in and around the Sea.”

FEDERAL AGENCIES SPENT MILLIONS ON UPGRADED FLIGHTS. The Washington Examiner (3/4, 319K) reports that “the federal government spent millions of dollars on thousands of upgraded flights for employees in 2012 and 2013, paying many times more for business and first-class seats than the same flights would have cost in coach or the government-contracted rate.” Premium travel expenses are reported to the General Services Administration each year, and the reports were obtained by the Washington Examiner through Freedom of Information Act requests. The article notes that Interior Department “flew to such exotic locations as Costa Rica, Denmark, Japan and South Africa in 2012.” Also, it notes that “then-Interior Secretary Ken Salazar took an April 2012 trip to Brazil for a ‘special agency mission’ that cost more than \$3,800 each way instead of the \$3,000 coach fare round-trip.”

OBAMA ADMINISTRATION OFFICIALS CALL FOR END TO ILLEGAL WILDLIFE TRAFFICKING ON WORLD WILDLIFE DAY. In an op-ed for the National Geographic (3/4, 40.49M), John Kerry, Secretary of State, Eric Holder, Attorney General of the United States, and Sally Jewell, Secretary of the Interior, call for an end to illicit trade in wildlife trafficking to celebrate the first ever World Wildlife Day. They note that the National Strategy for Combating Wildlife Trafficking is “leading the President’s whole-of-government fight against wildlife trafficking by pursuing a three-pronged strategy: strengthening domestic and global enforcement; reducing demand for illegally traded wildlife at home and abroad; and strengthening partnerships internationally and domestically with local communities, NGOs, private industry, and others to combat wildlife poaching and illegal trade.”

KING COVE DECISION CRITICIZED. For the National Review (3/4, 805K), Wesley J. Smith writes that Interior Secretary Sally Jewell’s King Cove decision is an example of how “anti-humanism has poisoned the environmental movement.” According to Smith, “if it were Jewell’s loved ones at threat, if it were the swells who attend Davos or fly private jets all over the world to urge we ‘save the planet,’ the Obama Administration would demand that a paved highway be built to provide shovel-ready jobs.” However, he claims that “they don’t care enough about the powerless people of King Cove to give them a better chance to live when they become seriously ill.”

PAPER ARGUES POLITICS SHOULD BE KEPT OF SAGE GROUSE HABITAT PROTECTION. The Reno (NV) Gazette-Journal (3/4, 165K) editorializes that “the easiest way to ensure that the sage grouse in Nevada ends up on the list of endangered species, a result that few in Nevada want to see occur, is for the process of developing a plan to protect the bird’s habitat to become enmeshed in state and local politics.” According to the paper, “if the state is to avoid that fate — which could do serious damage to some of Nevada’s most important industries, including mining, agriculture and energy development — it must convince federal officials of its credibility, that it is serious in its quest to develop a science-based plan that will ensure the long-range viability of the state’s sage grouse population.” It adds that “politics has no place in that process.”

COLORADO EFFORTS SEEN AS SOLUTION TO SAGE GROUSE ISSUE. The Grand Junction Daily Sentinel (3/4, 73K) editorializes that “it sounds counter-intuitive, but enacting federal measures to” protect the sage grouse “could cause more harm than good.” According to the paper, “it would likely unravel the coalition-building and spirit of cooperation that has taken place thus far in an effort to thwart a listing.” The paper warns that “the synergy among county commissions, ranchers, energy companies, environmental groups and state officials could give way to indifference about the fate of the birds.”

America’s Great Outdoors:

National Park Service:

NPS TO PREDICT DC CHERRY BLOSSOM DATES. The AP (3/4) reports that on Tuesday, the NPS is “expected to announce the predicted peak bloom dates for the trees.”

RESEARCH REVEALS UNDERGROUND FORTS, TUNNELS AT ALCATRAZ The Houston Chronicle (3/4, Christian, 2.26M) reports that “what started as repair of a tripping hazard at Alcatraz Island led to research that is revealing an old network of underground tunnels and fortifications.” According to the article, “early results appear to indicate that a ‘caponier,’ or part of an original fortified wall, still lies buried underground on the notorious island in San Francisco Bay.” The article notes that “the research began in 2010 when the National Park Service, which manages the former federal prison site, asked the Concrete Industry Management program at California State University, Chico, to fix a gaping hole in what was once the prison recreation yard.”

NEW HAMPSHIRE’S BEACH CLUB OF RYE BEACH ADDED TO NATIONAL REGISTER. The AP (3/4) reports that New Hampshire’s Beach Club of Rye Beach has been added to the National Register of Historic Places.

Fish and Wildlife Service:

FWS FINALIZES AGREEMENT TO PROTECT LESSER PRAIRIE CHICKEN FROM DRILLING. The Environment & Energy Publishing (3/4, 705) reports that the FWS has “finalized a voluntary agreement designed

to protect the lesser prairie chicken and its dwindling habitat from oil and gas drilling activity as the deadline approaches for the service to decide whether to list the colorful bird as threatened." The FWS and the Western Association of Fish and Wildlife Agencies "announced late Friday that they had signed the formal agreement, called the Range-wide Oil and Gas Candidate Conservation Agreement With Assurances." According to the article, "landowners and companies that enroll in the Candidate Conservation Agreement With Assurances (CCAA) through WAFWA agree to take steps to protect lesser prairie chicken habitat and to pay a mitigation fee if their actions harm the bird's habitat," and "in exchange, the service agrees not to impose any further restrictions or mandates on the participants if the bird is listed as threatened under the Endangered Species Act." FWS Director Dan Ashe said in a statement, "This landmark agreement between the Fish and Wildlife Service and the Western Association of Fish and Wildlife Agencies shows how cooperation between federal and state government agencies and private landowners can help advance conservation objectives while considering the economic needs of the nation. It is also another example of how flexibility in the Endangered Species Act helps us address the complex issues often associated with protecting our rarest wildlife and their habitats."

Securing America's Energy Future:

Renewable Energy:

OFFSHORE WIND STRATEGY EXAMINED. The [Maritime Executive](#) (3/3, 21) reports on the Interior Department "Smart from the Start" strategy to streamline renewable energy projects. The article examines how a federal agency could "propose measures that would greatly increase the risk of collisions, allisions, and environmental damage while also increasing the cost of tens of thousands of commercial vessel movements each year." It concludes that "as is usually the case in government, the reasons are many and complicated," and "while there are no villains in this story, America's essential commerce continues to be threatened by well-intentioned people and a process that considers the impact on maritime transportation last."

Onshore Energy Development:

HOUSE REPUBLICANS PUSHES THREE BILLS TO LIMIT ENVIRONMENTAL REGULATION. The [Environment & Energy Publishing](#) (3/4, 705) reports that House Republicans say "this week's three planned votes to limit environmental regulation would benefit working Americans and the economy that supports them." In a message to members on Friday, House Majority Leader Eric Cantor's office said that "this week's votes to curtail US EPA rules for greenhouse gas emissions, constrict environmental reviews under the National Environmental Policy Act and ease permitting for coal mines would help 'build an America that works.'" According to the article, "this week's debate is likely to center on" an Interior Office of Inspector General report that "found that OSM indeed told former contractors to use a different formula for calculating the economic impacts of an early version of the rule but didn't do so with political or nefarious motivations."

Additional coverage of the Stream Buffer Zone was provided by [WFPL-FM](#) Louisville, KY (3/4, 5K).

Offshore Energy Development:

FEDERAL COURT RULES BP MUST ADHERE TO AGREEMENT ON DEEPWATER HORIZON SPILL. The New York Times (3/4, B1, Robertson, Schwartz, Subscription Publication, 9.61M) reports on the front of its second section that Judge Leslie H. Southwick in writing for the Fifth US Circuit Court of Appeals dealt a "setback" to BP by ruling that it must "stick to its agreement and pay some gulf businesses for economic damage without their having to prove it was caused by the spill." The judge ruled that it "was bound by the agreement it had signed," finding that it was not "fundamentally unreasonable." In a "forceful dissent", Judge Edith Brown Clement argued that the agreement has been interpreted to exclude "causation" though that had been "a critical part" of the agreement.

Reuters (3/3, Stempel) reports that by a 2-1 vote, the 5th US Circuit Court of Appeals upheld a lower court's ruling rejecting BP's effort to block some businesses from receiving payouts from the 2010 Gulf spill settlement

fund even if they couldn't link their economic losses to the disaster. In the majority opinion, Circuit Judge Leslie Southwick wrote, "The settlement agreement does not require a claimant to submit evidence that the claim arose as a result of the oil spill." The terms, she added, "are not as protective of BP's present concerns as might have been achievable, but they are the protections that were accepted by the parties and approved by the district court."

The Wall Street Journal (3/4, Fowler, Subscription Publication, 5.91M) reports that BP believes many claimants are receiving payments despite not suffering financial losses. A BP spokesman said that the company is considering its options for appealing.

INDUSTRY'S CLAIMS OF ATLANTIC POTENTIAL QUESTIONED. The Bloomberg BusinessWeek (3/3, 4.93M) asks if President Obama is "really" opposed to oil and gas drilling. Noting that the Department of Interior announced on Thursday that companies would be allowed to conduct seismic explorations off the Eastern seaboard, Bloomberg says that "pretty much puts us back to where we were in March 2010," when the President "decided to open up vast tracts of the Atlantic Ocean to oil drilling," only to have the idea quashed after the Deep Horizon explosion three weeks later. The piece notes that API says that the Atlantic is a "potential gold mine" of oil and gas reserves, to which the piece says "maybe. We have almost no idea what's down there."

Tackling America's Water Challenges:

CALIFORNIA RECEIVES RAIN, BUT NOT ENOUGH TO EASE HISTORIC SHORTFALL. The Environment & Energy Publishing (3/4, 705) reports that California received "some much-needed precipitation over the weekend, but not nearly enough to ameliorate the state's persistent drought," according to weather and water experts. The article notes that "long-awaited storms in Northern and Southern California dumped several inches of snow and rain on parched mountains, fields and cities." However, "state and federal water managers cautioned that much of the state is still so far below normal that there is almost no way to recover this year." Meanwhile, "federal officials managing other parts of the state's water infrastructure, however, said that the storms could allow them to send more water to farmers grappling with record-low projected supplies."

Additional coverage of California water issues was provided by the Los Angeles Times (3/3, Boxall, 3.07M) and the San Luis Obispo (CA) Tribune (3/3, 126K).

Water Rights Holders Claim Contract Violation. The Western Farm Press (3/4, 2K) reports that "in a shot across the bow, several Sacramento River Settlement (SRS) contractors fired off a letter to David Murillo, regional director of the US Bureau of Reclamation regarding the USBR's decision to provide SRS contractors with a 40 percent water allocation in the wake of California's epic drought." According to the article, "the letter does not threaten legal action, though it is a stern recognition that the federal government is violating its contract with water rights holders." The letter "does ask for a conversation between the federal government and SRS contractors 'to address the current situation,' which on the surface seems to be how the government will honor its contractual obligations."

Empowering Native American Communities:

INDIAN TRIBES WITH CASINOS SEEK TO PREVENT NEW ENTRANTS. The New York Times (3/4, Lovett, Subscription Publication, 9.61M) reports that in California, the North Fork band of Mono Indians, is seeking to open a casino and the "Chukchansi Indians, with their own thriving casino just 30 miles away," are seeking to stop it. To do that, they and their investors "have spent more than \$2 million" for a ballot initiative to prevent the new casino, which has already been approved by Federal and state authorities. In California, there are already over 60 casinos owned by Indian tribes, and "six more tribes have applied to open new casinos, while 78 groups have applied for federal tribe recognition." Casino profits are said to be "stalling," which is blamed for the effort by tribes with casinos to stop new casinos being built. In addition, while the Bush Administration opposed casinos too distant from the tribe's reservation, the Obama Administration "has approved five off-reservation casinos" and that has led to increased competition among tribes for desirable sites.

ATTORNEY CRITICIZES INTERIOR'S BUY-BACK PLAN. For the Indian Country Today Media Network (3/3, 21K), Gabriel S. Galanda, the managing partner at Galanda Broadman, PLLC, writes that the Interior

Department's Indian Land Buy Back Program "now lifts off in hurried fashion at Makah and Pine Ridge, the program dishonors both the letter and spirit of Cobell." According to Galanda, "injustice to individual Cobell class members aside, assuming that financially supporting a tribe will benefit that tribe's members, one would hope that the buy-back wealth would be spread throughout Indian Country," but "it has recently come to light that Interior has limited the lion's share of the \$1.9 billion in buy back funding to only 40 tribes." Also, Galanda argues that "in all, the buy back process is simply not designed to obtain 'truly informed consent' from tribal member landowners." He concludes that "it is designed to serve federal interests – and it dishonors Cobell."

Top National News:

US PREPARING SANCTIONS TARGETING RUSSIAN INTERESTS IN RETALIATION FOR CRIMEA

OCCUPATION. The crisis in the Ukraine continues to be the dominant story in the US news media. On Monday evening, the three network newscasts devoted more than a third of their airtime to reports on various aspects of the situation, and both the CBS Evening News (3/3, lead story, 3:25, Pelley, 5.58M) and NBC Nightly News (3/3, lead story, 3:05, Williams, 7.86M) led with segments on Crimea. In an indication of the emphasis on Ukraine, President Obama's meeting with Israeli Prime Minister Netanyahu at the White House earlier on Monday did not get any coverage from the networks. As was the case on Sunday, most of the coverage indicates that the Administration will respond to the Russian military occupation of Crimea with nothing more than targeted sanctions, although several reports this morning state that even sanctions could be difficult to implement due to hesitancy on the part of several European governments, most notably Germany.

In the lead segment for the CBS Evening News (3/3, lead story, 3:25, Pelley, 5.58M), Scott Pelley reported that Secretary of State Kerry "is heading to Ukraine...to show support for the country at the center of the biggest US-Russian face-off since the Cold War." According to Pelley, the Russian government "has been sending troops across the border into Ukraine's Crimea region in continuing defiance of President Obama's warnings and threats of sanctions." Correspondent Elizabeth Palmer went on to report that, "without firing a shot, the Russians are now in control of Crimea," and that "the pro-Russian population has welcomed the soldiers." Palmer added that "it's estimated there are 20,000 Russian troops" in Crimea, and "US intelligence says that troop buildup is continuing, which fuels fears that Vladimir Putin plans to extend this invasion into eastern Ukraine."

At the opening of NBC Nightly News (3/3, lead story, 3:05, Williams, 7.86M), Brian Williams said, "It is very clear that Vladimir Putin is not troubling himself with what the rest of the world has to say," and "has moved into the Crimea region...of Ukraine, making sure that, in case there were any doubts, he considers it part of Russia by heritage." Andrea Mitchell reported from Andrew Air Force Base, where she was preparing to accompany Secretary Kerry to Ukraine, that the Administration is "considering tough economic sanctions against Russia," but "the question is – is Vladimir Putin even paying attention?" According to Mitchell, "the toughest of the sanctions would require approval of all 28 of the" European Union members, "and Europe is not united on how to punish Russia."

On ABC World News (3/3, story 2, 2:25, Sawyer, 7.43M), correspondent Terry Moran reported from Ukraine that Putin is "claiming he is defending ethnic Russians in Crimea," and that there is "fear...that the Ukrainian military...will try to stop him, touching off a bloody war." Moran added, "That's why...Kerry is racing to the region, making sure they hold their fire."

The AP (3/4, Lavender) reports that at the White House on Monday, President Obama said the Russian government is "on the wrong side of history" in regards to Ukraine, and "told reporters in the Oval Office...that the United States is considering economic and diplomatic options that will isolate Russia." Politico (3/4, Sinderbrand, 464K) noted that the President, appearing with Israeli Prime Minister Benjamin Netanyahu on Monday, said, "I think the world is largely united that the steps Russia has taken are a violation of international law," and added, "over time, this will be a costly proposition for Russia." The Wall Street Journal (3/4, Lee, Favole, Subscription Publication, 5.91M) quotes the President as saying, "What cannot be done is for Russia with impunity to put its soldiers on the ground and violate basic principles that are recognized around the world."

According to a front-page story in the New York Times (3/4, A1, Baker, Subscription Publication, 9.61M), the Administration is "prepar[ing]...to impose sanctions on high-level Russian officials involved in the military occupation of Crimea," and has already "suspended military ties to Russia, including exercises, port visits and

planning meetings, just a day after calling off trade talks." The Times adds that Administration officials are warning that "if Moscow does not reverse course...they will ban visas and freeze assets of select Russian officials in the chain of command as well as target state-run financial institutions." The Times also reports that members of Congress have "signaled that they would follow with sanctions of their own, plus quickly approve economic aid for the fragile new pro-Western government in Ukraine."

However, Politico (3/4, Raju, Everett, 464K) reported that on Monday, Senate Majority Leader Harry Reid "said Congress should let the situation play out for 'a while' before trying to impose any new sanctions on Russia," saying, "The most important thing is for us – the United States – to make sure that we don't go off without the European community." Reid added, "Their interests are really paramount if we are going to do sanctions of some kind," so "we have to have them on board with us."

On CNN's The Situation Room (3/3, 554K), correspondent Jim Sciutto reported that there has been "no decision made yet on whether to impose those sanctions or, indeed, which sanctions to impose." According to Sciutto, "The possible sanctions include freezing the overseas assets of Russian individuals and companies, banning travel for Russian leaders and businessmen, and – at the more extreme end – blocking some Russian banks from the international financial system, an enormously costly scenario for Russia." But Sciutto added that "all of these require unity within the western powers," and that it is far from clear that will be possible to achieve. In fact, Reuters (3/3, Maclellan) reports that the BBC photographed a senior UK official entering Prime Minister David Cameron's residence with a paper visible that read, according to the BBC, "The UK should not support for now trade sanctions or close London's financial center to Russians."

Politico (3/4, Bradner, 464K) reports that Treasury Secretary Lew, British Chancellor of the Exchequer George Osborne and French Finance Minister Pierre Moscovici have "agreed to seek an International Monetary Fund package that would help stabilize Ukraine, which is facing massive debts." Under the headline, "US Suspends Trade And Investment Talks With Russia," the Wall Street Journal (3/4, Mauldin, Subscription Publication, 5.91M) reports that the office of US Trade Representative Michael Froman issued a statement reading: "Due to recent events in Ukraine, we have suspended upcoming bilateral trade and investment engagement with the government of Russia that were part of a move toward deeper commercial and trade ties."

However, according to the AP (3/4, Jakes), "Critics said administration efforts were too little, too late after years of pressing for friendlier relations with Moscow." The AP adds that French Foreign Minister Laurent Fabius "said Russia's control of Crimea would not be easy to reverse," and drew attention to "how limited the options were for the US and Europe." Similarly, McClatchy (3/4, Hall, Subscription Publication, 95K) says the Administration is "scrambl[ing] to find meaningful ways to sanction a nation that does relatively little U.S. business and exports primarily energy products that allies in Europe badly need." McClatchy notes that Russia "isn't among the top two dozen export markets for US products" nor is it "among the top 12 nations from which the United States imports."

The Washington Times (3/4, Boyer, Sen, 417K) reports that State Department spokeswoman Jen Psaki said the Administration is "actively preparing sanctions as a response to Russian provocations," and that "it is likely that we will put those in place." On Monday, Psaki said, "We are far more forward on this than we were even yesterday."

On the CBS Evening News (3/3, story 3, 1:45, Pelley, 5.58M), Major Garrett reported that the President "knows that economic sanctions against Russia are the west's best weapon at this stage, but European nations are not yet ready to go down that road," and German Chancellor Merkel "has told the President she fears provoking an even bigger military response from Moscow." Garrett added that "despite a weekend of criticism that he has appeared weak, President Obama believes it is Putin who is playing the weak hand," and that his "invasion of Crimea" is "a desperate attempt to give Russia some role in Ukraine's new political future."

Also on the CBS Evening News (3/3, story 4, 1:50, Pelley, 5.58M), former CIA deputy director Mike Morell said that for the Administration, "There is no military option," while "some of the diplomatic options that are out there simply are not strong" and "are not going to get Putin's attention." Morell added, "The only option that would get his attention, economic sanctions, has potentially a huge downside for Europe and the United States."

Howard LaFranchi, in a piece for the Christian Science Monitor (3/4, Lafranchi, 540K), wrote, "It was not clear

Monday what concrete measures of support for Ukraine...Kerry would take with him to Kiev." According to LaFranchi, "Among Kerry's options" is "offer[ing] some immediate economic support for the crisis-laden government of President Oleksandr Turchynov and Prime Minister Arseniy Yatsenyuk."

Robert Kimmitt, who served as deputy secretary of Treasury in the George W. Bush Administration, and Stephen Myrow, managing partner of Beacon Policy Advisors, in an op-ed for the Wall Street Journal (3/4, Kimmitt, Myrow, Subscription Publication, 5.91M), make the case that a \$20 billion aid package would be sufficient to bolster the Ukrainian government. Kimmitt and Myrow also suggest that the US and the EU put restrictions on Russia's natural gas exports in an effort to shut down Moscow's access to currency. The Wall Street Journal (3/4, Subscription Publication, 5.91M), in an editorial, echoes Kimmitt and Myrow's suggestion that the allies of the newly established government in Kiev ought to hinder Russia's ability to report natural gas because that could starve the Russian treasury of foreign reserves.

The Hill (3/4, Pecquet, 194K) reported that the State Department's Psaki maintains that the US "believes political and economic pressure can force the Kremlin to back off." Psaki is quoted as saying, "We believe political steps, and sending a political message in coordination with the international community, will be effective in cooperation and in partnership with economic steps."

Nuland Proposes Stationing OSCE Monitors In Crimea. The Washington Post (3/4, DeYoung, 4.28M) reports that at the Organization for Security and Cooperation in Europe in Vienna, the US officials and their allies "threatened Russia with further isolation while offering what they described as a face-saving solution." Assistant Secretary of State Victoria Nuland said, "There is a way out of this situation," and, according to the Post, "the 'way out' included an OSCE monitoring mission sent Monday night to Ukraine to provide what Nuland called 'neutral facts [and] make a true assessment of the situation on the ground.'" Nuland is quoted as saying, "This monitoring mission can go first and foremost to Crimea to de-escalate tensions and can provide an out for the Russian Federation if it so chooses."

On Fox News' Special Report (3/3, 2.15M), correspondent Wendell Goler reported that "Russian officials say their troops are protecting ethnic Russians in Crimea," but Ambassador Samantha Power "said there's a better way to protect them." Power was shown saying, "We have proposed, and wholeheartedly support, the immediate deployment of international observers and monitors from the UN."

WSJournal A1: US Ceded Responsibility For Ukrainian Negotiations To The EU. The Wall Street Journal (3/4, A1, Entous, Norman, Subscription Publication, 5.91M), in a front-page article titled, "Behind The West's Miscalculations In Ukraine: US Had Let Europe Take Lead in Guiding Westward Drift of Former Soviet Republic," reports that the Administration had relied on the EU to negotiate with the now-deposed government of Viktor Yanukovich, and suggests that the relative distance from events on the ground undermined US influence in the region. According to the Journal, Vice President Biden did have a good relationship with Yanukovich. However, the Journal says Yanukovich nevertheless rejected a proposed EU aid deal late last year even after Biden signaled that the US would add more assistance in the future in an effort to convince Yanukovich to decline Putin's proffered loans.

Germany's Dependence On Russian Oil And Its High Level Of Trade With Russia Detailed. The New York Times (3/4, Thomas, Subscription Publication, 9.61M) reports that from "importing fuel from Gazprom" to "selling Mercedes-Benz to billionaire oligarchs," Germany's "trade with Russia has played an important role in" its "emergence as an economic superpower over the last decade." The Times adds that Germany "is now heavily reliant on Russia for its energy needs," and "import[s] more natural gas from Russia than any other country in Europe." However, the Times also reports that Chancellor Angela Merkel "has also shown a willingness to take a hard line with Mr. Putin," and "has been particularly forceful on human rights issues."

Reuters (3/4, Rohde) reports that Fiona Hill, a former National Intelligence Officer for Russia and Eurasia at the National Intelligence Council, says Germany's reliance on Russian natural gas makes it unlikely that the Merkel government would agree to really tough sanctions on the Russian government. Reuters (3/4, Kelly, De Carbonnel) reports that German Foreign Minister Frank-Walter Steinmeier met with Russian Foreign Minister Sergei Lavrov in Geneva on Monday.

Edward-Isaac Dove, in a piece for Politico (3/4, Dove, 464K), reported that on Monday, a day after Secretary

Kerry "began floating the idea of kicking Putin out of the G-8, the German finance minister told a German news service Monday that he wasn't sure this was a good idea."

John Vinocur, the former executive editor of the International Herald Tribune, in an op-ed for the Wall Street Journal (3/4, Vinocur, Subscription Publication, 5.91M), says it was Merkel who was behind the rejection of Ukraine's, and Georgia's, application to become a NATO candidate in 2008. Reuters (3/4, Kelly, De Carbonnel) notes that Merkel is a fluent Russian speaker.

US Athletes Will Compete In Sochi Paralympic Games, But Presidential Delegation Will Stay Home. The New York Times (3/4, Shpigel, Subscription Publication, 9.61M) reports that the US has "canceled its presidential delegation to the Paralympic Games in Sochi, Russia, citing Russia's intervention in Ukraine," but "the decision...will not affect the 80 American athletes scheduled to compete in the Games, which begin with Friday's opening ceremony."

OBAMA'S ELECTION-YEAR BUDGET AIMS FOR "UNITY AMONG DEMOCRATS." The budget proposal the President will unveil today is generally portrayed in print media as an election-year document aimed at addressing a number of Democratic agenda items in the run up to November's midterm elections.

The AP (3/4, Taylor) reports that the President on Tuesday will unveil "an election-year budget" that strives for "unity among Democrats rather than compromise with Republicans." The almost \$4 trillion plan "drops earlier proposals to cut future Social Security benefits and seeks new money for infrastructure, education and job training." The AP notes that the plan "is likely to have a short shelf life," coming "just three months after Congress and the White House agreed to a two-year, bipartisan budget pact that has already set the parameters for this election year's budget work."

The Washington Times (3/4, Wolfgang, Dinan, 417K) reports that the President's budget "bows more to political realities than it does to the government's fiscal picture, as the White House looks to do no harm to fellow Democrats in the run-up to November's elections." The document "will tick off a laundry list of Democratic agenda items." The Times notes that the President "is expected to argue that the deficit is now less than half what it was his first year in office, and so the federal government can afford to spend more on education, infrastructure, scientific and medical research, and manufacturing."

The Washington Post (3/4, A1, Goldfarb, Costa, 4.28M) reports in a front-page story that the President's budget "will set the stage for an election-year debate over government's role in creating economic opportunity." The President, the Post notes, "will make the case that government has the potential to help millions of Americans prosper." His budget request marks a return "to the populist, bread-and-butter themes that helped him win reelection and have played to Democrats' advantage for years."

The New York Times (3/4, Calmes, Subscription Publication, 9.61M) reports that the President will "grab his best opportunity of the year to show, in one comprehensive package of hard numbers and precise detail, how he would have the government address what he has called 'the defining challenge of our time' — economic inequality." The Times notes that along with the "perennial proposals on education, job training, research and more," the President "is adding one with echoes of Republicans' own ideas," and will "propose expanding a longstanding tax break to better benefit workers who are childless." By including the proposal and "emphasizing its limited Republican pedigree, Mr. Obama is underscoring his struggle to set an agenda that stands a chance to become law, at least in part — in this case, to try to reduce inequality of incomes and economic opportunity."

The Wall Street Journal (3/3, Paletta, Subscription Publication, 5.91M) notes that the President will propose larger tax credits for childless workers, an increased minimum wage, a revamped military and the elimination of some tax breaks for upper-income Americans, each of which has been proposed before or telegraphed for weeks, but have lacked momentum in Congress. While the budget will adhere to spending caps put in place in December, it will also propose \$56 billion in additional spending priorities, divided between military and domestic programs.

The Los Angeles Times (3/4, Hennessey, 3.07M) reports that the President "will propose a series of changes to the tax code" that would "shift benefits from top earners to middle- and lower-income Americans." The President "will propose expanding or making permanent tax credits aimed at the working poor, families with young children,

and college students." In addition, the plan would "expand access to retirement savings for people who do not have an employer-sponsored retirement plan." The cost of the new tax breaks "would be offset by eliminating tax rules that have benefited top earners."

USA Today (3/4, Madhani, 5.82M) reports that the President's budget "will include a proposal to expand the earned-income tax credit for 13.5 million low-income Americans by closing tax loopholes benefiting certain fund managers and high-income, self-employed workers." USA Today notes that with the expansion, the incomes of about 500 million people will be "lifted above the poverty line, and about 3.3 million young workers — ages 21 to 24 — would become eligible." In addition, the proposal "calls for expanding the EITC to workers ages 65 and 66 — currently ineligible for the tax credit." That expansion is expected to "affect about 300,000 workers in the older age group."

US MANUFACTURING ACTIVITY ACCELERATED LAST MONTH. Reuters (3/4, Mutikani) reports that the Institute for Supply Management's Manufacturing Index rose to 53.2 in February from 51.3 in January, which was its weakest reading since May 2013. A reading above 50.0 indicates that the sector is expanding. Reuters says that the strong report should encourage the Fed to continue tapering its stimulus program as expected.

Bloomberg News (3/4, Woellert, 1.91M) reports that the index shows that the economy is "making headway in emerging from the harsh winter weather that has slowed growth in early 2014." Bloomberg adds that the increase "would have been stronger if not for a slump in production caused by a shortage of parts, a sign orders will improve in coming months to replenish stockpiles."

The Wall Street Journal (3/4, Madigan, Subscription Publication, 5.91M) reports that economists it surveyed expected the index to come in at 52.5.

Consumer Spending Posts Solid Gain For January. The Wall Street Journal (3/4, Portlock, Subscription Publication, 5.91M) reports that consumer spending rose 0.4% in January, driven by a 0.9% increase in spending on services, according to data released Monday by the Department of Commerce. That more than offset a drop in spending on goods. However, December's originally reported increase of 0.4% was revised sharply downward to a 0.1% gain. However, several experts cited by the Journal indicate that the harsh weather that enveloped much of the nation in January makes drawing solid conclusions from this and other data difficult.

Automakers Report Tepid February New Vehicle Sales. The New York Times (3/4, Trop, Subscription Publication, 9.61M) reports that the harsh winter weather "stalled new-vehicle sales" last month, "even as sales of some trucks and sport utility vehicles remained strong, automakers reported on Monday." Sales fell 1% at GM and 6% at Ford, the second consecutive month of declines. However, Chrysler said that its sales were up 11% "for its best February performance in seven years, in part on the strength of its Jeep brand, which gained 47 percent for the month."

Editorial Wrap-Up:

NEW YORK TIMES. "Frustration With Afghanistan." An editorial in the New York Times (3/4, Subscription Publication, 9.61M) says that while the President's and NATO's "frustration" with Afghan President Hamid Karzai over his refusal to sign the bilateral security agreement is "understandable," but their threats to withdraw all troops by year's end is "theatrical" because neither the Administration nor NATO "wants to leave completely, and many neighboring countries want them to stay. So do many Afghans." The Times notes that concerns about Afghanistan's future, including "the possibility that the country would again become a haven for terrorists," if foreign troops do not remain, "would make it hard, politically and strategically, for this nation's leaders to simply walk away." While it "seems possible, even likely," that the President "will find a way to retain a limited force there this year, serious questions remain about whether the country will ever be able to stand on its own."

"Mr. Ryan's Small Ideas On Poverty." An editorial in the New York Times (3/4, Subscription Publication, 9.61M) opines that with his report on anti-poverty programs, Rep. Paul Ryan "provides polished intellectual cover for his party to mow down as many antipoverty programs as it can see." The report, the Times notes, gives congressional Republicans "a high-minded excuse" to "eviscerate programs like Medicaid, Head Start and food stamps." The Times argues that while it is easy "to find flaws or waste in any government program," the "proper

response is to fix those flaws, not throw entire programs away as Mr. Ryan and his party have repeatedly proposed."

"Florida's Unconstitutional Death Penalty." The New York Times (3/4, Subscription Publication, 9.61M) editorializes that while the Supreme Court "categorically banned the execution of people with intellectual disabilities as unconstitutional in 2002," some states, such as Florida, "continue to defy that principle by interpreting the court's words as narrowly as possible." The Times argues that Florida's aim "is not to comply with the Supreme Court's ruling, but to execute its death-row inmates whether or not they are intellectually disabled." The Times urges the court to once again reject that practice, "for those states that missed the message the first time."

WASHINGTON POST. "Ukrainian After Shocks." The Washington Post (3/4, 4.28M), in an editorial, says the Russian government's "blatant violation of the European borders it pledged to respect following the Cold War raises especially pressing concerns for countries that used to be Soviet republics, such as Moldova and Georgia," as well as Estonia, Latvia and Lithuania, which "are members of NATO and have substantial Russian minority populations that the Kremlin has sought to manipulate in the past." According to the Post, "Whether Mr. Putin seeks to replicate his Ukrainian adventure in these nations will depend...on how strongly the West responds to the Crimean invasion" and "whether it visibly strengthens other borders against Russia."

"The Fat Trap." In an editorial, the Washington Post (3/4, 4.28M) argues that despite a recent report which showed an improvement in the childhood obesity rate, "obesity remains a daunting problem that demands more effort — from Americans and their government." In addition to suggesting several steps the government can take to combat obesity, the Post says that health insurers "should continue looking for ways to reward people who improve their lifestyles."

"D.C. Schools' Next Steps." The Washington Post (3/4, 4.28M) in an editorial offers its ideas for continuing the progress that has been made in the District's schools. It urges candidates not to "waver now from the course of reform established" under Michelle A. Rhee, and her successor Kaya Henderson. Specifically, the Post urges support for Henderson's plans to focus attention on lagging schools and students with longer school days and school years and greater help for English-language learners, as well as "new rigor" for middle and high schools. In addition, the Post calls for supporting public charter schools and urges improvements for "the problem-plagued Office of the State Superintendent of Education, the mission-challenged University of the District of Columbia and the city's social services agencies."

WALL STREET JOURNAL. "Putin's Achilles' Heel." The Wall Street Journal (3/4, Subscription Publication, 5.91M), in an editorial, suggests that the allies of the newly established government in Kiev ought to hinder Russia's ability to export natural gas because that could starve the Russian treasury of foreign reserves.

"Flood Warning For The GOP." The Wall Street Journal (3/4, Subscription Publication, 5.91M) in an editorial criticizes Republican leaders in the US House with respect to the National Flood Insurance Program. It argues that the Biggert-Waters act to reform the program fell short in applying actuarially sound rates for flood insurance unevenly, but that a Senate vote to delay implementing those rates for four years and a new Cantor-Waters proposal would both end by repealing the effort to put the program on a sound basis. The Journal suggests that the Congress should reject the proposal and then recess until after the fall elections.

"Terror In Kunming." An editorial in the Wall Street Journal (3/4, Subscription Publication, 5.91M) warns if Muslim Uighur separatists were responsible for Saturday's deadly attack at a train station in Kunming, it would mark an escalation by the Uighurs, who have long protested China's policies in Xinjiang. The Journal argues that China does not help itself by melding legitimate political protest with acts of terrorism. The Journal adds that rather than targeting Uighur scholar Ilham Tohti or exiled World Uighur Congress leader Rebiya Kadeer, Beijing should focus on catching the perpetrators of Saturday's attack as quickly and transparently as possible.

SECRETARY SEBELIUS – HHS BUDGET — 2 p.m. HHS Secretary Kathleen Sebelius, joined by heads of HHS agencies, will present the President's HHS budget for FY 2015 at a press conference. The FY 2015 HHS Budget in Brief document will be available online at 2:00 PM (EST), Tuesday, March 4, 2014, at www.hhs.gov/budget Speakers: HHS Secretary Kathleen Sebelius Will Present the President's HHS Budget for FY 2015 WHAT: HHS Secretary Kathleen Sebelius, joined by heads of HHS agencies, will present the President's HHS budget for FY 2015 at a press conference. The FY 2015 HHS Budget in Brief document will be available online at 2:00 PM (EST), Tuesday, March 4, 2014, at www.hhs.gov/budget WHO: Kathleen Sebelius, Secretary, U.S. Department of Health & Human Services; Ellen Murray, Assistant Secretary for Financial Resources, U.S. Department of Health & Human Services, Heads of HHS Agencies. Location: Humphrey Building, 200 Independence Ave., SW. First Floor Auditorium (credentialed press only) Great Hall (live monitor for non-press)

SECRETARY DUNCAN – EDUCATION BUDGET — 2:30 p.m. U.S. Education Secretary Arne Duncan along with senior Department officials will host a conference call for members of the media to discuss the FY 2015 Education Budget. DIAL-IN: 800-619-7423 PASSCODE: BUDGET

SECRETARY VILSACK – @015 BUDEGT PRESS CALL — 3:15 p.m. Agriculture Secretary Tom Vilsack will host a media conference call to discuss President Obama's FY15 budget. DIAL-IN: 877-924-1746. PASSCODE: USDA (given verbally). Trouble number – 202-720-8560.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Of course, the world is still focused on the ongoing conflict in the Ukraine. And over the weekend, Sarah Palin reminded everyone that during the 2008 election, she predicted Russia would invade the Ukraine. Then John McCain said, 'Well at least one of us made a good call.'"

Jimmy Fallon: "And get this – Secretary of State John Kerry went on 'Meet the Press' yesterday, and actually criticized Russia for its action in the Ukraine. He said, quote, 'You don't just invade another country on phony pretext in order to assert your interest.' Then he said, 'I mean, we stopped doing that, like, months ago. Okay? We don't do that anymore.'"

Jimmy Fallon: "And while all of this is going on [Russian troops entering Ukraine], President Obama is staying very busy. That's right. On Friday, President Obama took a selfie with Bill Nye the Science Guy and astrophysicist Neil deGrasse Tyson."

David Letterman: "So, the Russians are at it again. Over the weekend, they – you know, the Olympics are done, they have nothing to do – so they invade Crimea. And so President Obama is steamed. And he says to Putin, he said, 'Look, pull your troops out of Crimea or the US will not attend the next G-8 summit.' And I said, 'Well that will show him. By God, that will teach him. Wait a minute. Putin will think twice about it now. Last thing he wants to do is offend the United States so they stay home from a summit meeting. That looks pretty bad on your record.'"

DOI in the News:

INTERIOR'S BUDGET WOULD INCREASE TO \$11.7 BILLION. In its "Federal Eye" blog, the [Washington Post](#) (3/4, Fears, 4.28M) reports that "President Obama requested \$11.7 billion for the Interior Department in fiscal 2015, a slight increase from the year before." The article notes that "the spotlight will be on the \$1 billion designated for the president's climate resilience plan, for research into the impacts of climate change, a touchy partisan subject in Congress."

[McClatchy](#) (3/5, Doyle, Subscription Publication, 95K) reports that Interior Secretary Sally Jewell told reporters at a budget briefing, "This is a solid budget. It's responsible."

Also covering the story are the [AP](#) (3/5), [Reuters](#) (3/5), the [Wall Street Journal](#) (3/5, 5.91M), [Bloomberg News](#) (3/5, 1.91M), and [Politico](#) (3/5, Epstein, 464K).

Office Of Insular Affairs. The [Pacific News Center](#) (3/5) reports that "President Obama has proposed a fiscal year 2015 budget of \$678.1 million for the Office of Insular Affairs." The article notes that "the budget request includes \$92.2 million in annual appropriations and \$585.9 million in permanent and indefinite appropriations for fiscal payments mandated by law to US Territories and Freely Associated States." Acting Assistant Secretary for Insular Areas Lori Faeth said, "The 2015 budget request demonstrates President Obama's continued commitment to the US insular areas. In the face of fiscal austerity, the President's proposal will enable OIA to continue to work toward building local government capacity, including skills, training, and education, and leverage resources in order to improve the quality of life in insular communities."

The [Pacific \(GUM\) Daily News](#) (3/5, 61K) reports that "President Obama's proposed budget for fiscal 2015 includes \$65 million that would go into the government of Guam pocket as a result of taxes withheld from military and federal government personnel working on Guam, a federal agency announced." The Office of Insular Affairs

stated, "It is estimated Guam would receive \$65.3 million for taxes collected in the territory via the IRS 'mirror' tax code that are by law transferred to the government of Guam to support its public safety, health care, education and other public services and operations."

NPS. The Environment & Energy Publishing (3/5, 705) reports that Interior Secretary Sally Jewell "touted an Obama administration plan to invest more than \$1.2 billion improving parks and public lands ahead of the National Park Service's centennial in 2016." Jewell "defended the Centennial Initiative as part of the Interior Department's overall \$11.9 billion fiscal 2015 budget request to Congress, a roughly 2.5 percent increase over current funding levels." Jewell called the initiative a "critical need" that will "enable the National Park Service to attract and host more visitors, leverage additional private philanthropy, and help build the institutional capacity to maintain the parks for the next 100 years."

The Ogden (UT) Standard-Examiner (3/4, 147K) reports that the "budget request for 2015 includes \$2.6 billion for the critical conservation, preservation, and recreation mission of the National Park Service (NPS) as it approaches its 100th anniversary." The proposal "boosts the Park Service's essential programs and operational needs by \$38.5 million and adds \$16.6 million for fixed cost increases." NNPS Director Jonathan B. Jarvis said, "As we prepare for our centennial, the President's budget request recognizes the importance of investing in an historic effort to attract and host more visitors, leverage additional private philanthropy for the parks, and help build the institutional capacity to maintain the parks for the next 100 years. The budget supports our core mission and proposes a comprehensive Centennial Initiative to help preserve these treasured lands and icons for this and future generations."

KXTV-TV Sacramento, CA (3/4, 25K) reports that Jewell said "\$30 million of proposed budget increase would be for the park service to operate the 401 parks, monuments, battlefields and other sites under its control." She said, "That (money) largely goes to beefing up the people side. We've had significant cuts to things like seasonal ranger programs and other visitor services because the budgets have been tightened."

BLM. The Grand Junction Daily Sentinel (3/5, 73K) reports that the BLM is "proposed to spend \$1.1 billion in 2015, on projects including preserving sage grouse in Colorado and other states, and increases spending by \$20 million on oil and gas."

The Alaska Business Monthly (3/5) reports that BLM Principal Deputy Director Neil Komze said, "This balanced and responsible proposal will advance the BLM's mission of multiple use and sustained yield of the public lands at a time of tight budgets. The BLM continues to be a major economic engine for many communities across the West and this budget makes smart investments that provide for a secure energy future, expanded outdoor recreational opportunities and thoughtful resource management."

FWS. The Washington Examiner (3/5, 319K) reports that the budget request "would hike duck stamp fees by \$140 million over the next decade." The article notes that "the additional federal revenue raised by duck stamp sales is intended for funding conservation efforts." It adds that "the White House budget proposal did not say how much the stamps would cost after the increase, but a group of Democratic senators proposed a \$10 increase in January, the first in 20 years."

Energy. The National Journal (3/5, Subscription Publication, 427K) reports that the budget proposal "highlights conservation as a priority while laying the groundwork for expanded oil and gas drilling on public lands, reflecting an administration belief that it can promote energy development without sacrificing environmental protection." The proposal would "provide permanent funding" for the Land and Water Conservation Fund. As Interior Secretary Sally Jewell "pointed out during a press call on Tuesday, 'ever since the fund has been around, with the exception of one year, it has been shorted in the appropriations process.'"

The Wall Street Journal (3/5, 5.91M) reports that the Interior's budget allocates \$95 million to prioritize the development of renewable-energy projects on public lands. Also, budget plan calls to eliminate certain payments related to oil, natural gas, coal and other mineral development on public lands, which would save \$2.7 billion over 10 years, according to the plan.

Platts (3/5, 2K) reports that "Obama also reiterated his request for a \$2 billion alternative fuels research effort to be funded through royalties from oil and gas development on federal land." Also, the proposal "includes new

inspection fees totaling \$48 million for onshore oil and gas drilling on federal lands that would be used to reform and speed permitting for the Bureau of Land Management's oil and gas program and strengthen oversight and enforcement."

The Maritime Executive (3/4, 21) reports that the BOEM would receive \$169.8 million. BOEM director Tommy P. Beaudreau said, "BOEM's priorities fully support the administration's vision for creating growth and opportunities as we pursue our mission. Our modest increase in the president's request reflects careful analysis of the resources needed to advance renewable and conventional energy, manage non-energy OCS mineral resources and invest in what's needed to grow the economy."

The Washington Examiner (3/5, 319K) reports that Obama "recommended a spending reduction" for the BSEE. The bureau "would get \$205 million under the 2015 proposal, compared with the \$222 million Obama proposed the previous year."

Lewis And Clark Regional Water System. The AP (3/5) reports that the Lewis and Clark Regional Water System will get an additional \$5.2 million in federal funding from the BOR. Lewis and Clark executive director Troy Larson said "the project still needs millions more in federal funds, but the additional money will allow about 5 more miles of pipeline to be built."

Also reporting on the story is the Worthington (MN) Daily Globe (3/5, 26K) and KELO-AM Sioux Falls, SD (3/5).

Salton Sea. The Palm Springs (CA) Desert Sun (3/4, 110K) reports that the budget request "seeks a fraction of the \$1 million that two local congressmen had sought for a Salton Sea restoration project." The proposal "seeks \$200,000 for the US Army Corps of Engineers to continue studying issues with the Salton Sea." The BOR "requested no funding for the Salton Sea for fiscal 2015, which begins Oct. 1."

BIA, OST. The Nation Sun News (3/5) reports that the budget request asks "Congress to provide \$2.4 billion" for the BIA. The article notes that "the amount represents only a small increase from 2014," but "it marks a big improvement from 2013, when the BIA took a big hit." However, "the \$2.4 billion for 2015 still falls below the \$2.5 billion that went to the BIA in 2012 and the nearly \$2.6 billion from 2011."

KUNM-FM Albuquerque, NM (3/5) reports that Kevin Washburn, Assistant Secretary of Indian Affairs, explained, "That funding includes \$90 million for the ongoing Navajo/Gallup water supply project which, when completed, will have the capacity to deliver clean running water to a potential future population of approximately 250,000 people."

The Nation Sun News (3/5) reports that the Office of the Special Trustee for American Indians will "see \$139 million under the fiscal year 2015 budget proposal that President Barack Obama released." Principal Deputy Special Trustee Michele F. Singer said, "OST is the premiere public service organization dedicated to the Indian Fiduciary Trust. The President's carefully crafted budget will allow us to continue our cost efficiency and program strengthening initiatives and provide consistent and effective service to Indian trust beneficiaries."

CONGRESS ADDS PART OF LAKE MICHIGAN SHORELINE TO NATIONAL WILDERNESS AREAS. The Wall Street Journal (3/5, Carlton, Subscription Publication, 5.91M) reports that yesterday the Congress approved the first addition to national wilderness areas in five years, adding Michigan's Sleeping Bear Dunes National Lakeshore, which was made a national park in 1973 and now will have development prohibited under the wilderness designation, to the existing 110 million acres of designated wilderness. The measure had no opposition. The park consists of an area noted for its large sand dunes along Lake Michigan.

Also reporting on the story is the Washington Post (3/4, Bernstein, 4.28M).

SECRETARY JEWELL TO SPEAK MARCH 14 AT MONTANA STATE UNIVERSITY. KBZK-TV Butte, MT (3/5, 785) reports that Interior Secretary Sally Jewell Sen. Jon Tester will "discuss a range of issues related to conservation, public lands and natural resources in the Rocky Mountain West at 5:30 p.m. Friday, March 14, in Linfield Hall 125 on the Montana State University campus."

INTERIOR INCLUDED AMONG TOP TEN WASHINGTONIANS TO FOLLOW ON INSTAGRAM. In a list of "10 of the best Washingtonians to follow on Instagram," for 94.7 Fresh FM (3/4), Tommy McFly picks the Interior

Department. He notes that the agency "contributes beautiful shots that make you shout 'yeah, America!' at least once a day."

INTERIOR ENGAGES TRAVELERS WITH TWITTER. Skift (3/4) lists the Interior Department among the tourism boards that "have sent at least two tweets a day during the past 14 days and reply to tweets in at least two hours."

PODESTA TAKES LEAD ON OBAMA'S ENVIRONMENTAL AGENDA. According to the Washington Post (3/5, Eilperin, 4.28M), "New White House counselor John Podesta is playing a central role in pushing the Obama administration to adopt a more aggressive posture on environmental policies...including rules that would provide greater protections for public lands, support for state and local efforts to cut carbon emissions and stricter oversight of mining near pristine waterways." The Post says Podesta's "role...provides the clearest indication yet that President Obama and his top aides are increasingly focused on cementing a presidential legacy on the environment during his remaining time in office." The Post adds, "That focus was on full display...in the administration's budget proposal, which asked for \$1 billion to cope with global warming's impacts...and proposed funding to redesign infrastructure projects to cope with rising sea levels."

ADDITIONAL COVERAGE OF REPORTS ON NATIONAL PARKS. Additional coverage of the reports on the economic benefits of national parks, and the shutdown's impact, was provided by the National Review (3/5, 805K) and CNBC (3/5, 1.52M).

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S VISIT TO GREAT SMOKY MOUNTAINS NATIONAL PARK. Additional coverage of Interior Secretary Sally Jewell's visit to Great Smoky Mountains National Park was provide by the Knoxville (TN) Daily Sun (3/5), the Sevierville (TN) Mountain Press (3/5, 28K), and the Cherokee One Feather (3/5, 8K).

America's Great Outdoors:

National Park Service:

NPS: CHERRY BLOSSOMS TO REACH PEAK BLOOM IN EARLY APRIL. The Washington Post (3/5, Svitek, 4.28M) reports that Washington's cherry blossom trees are expected to reach peak bloom between in April, the NPS said Tuesday. At a news conference at the Newseum, James Perry, chief of resource management for the NPS, "sought to assure a winter-weary crowd that the resilient trees braved the elements and should reach peak bloom between April 8 and 12." Perry said, "My message this morning is relax and let Mother Nature take her course. This has not been the coldest winter on record or the snowiest, and these trees have been around for 102 years. We know pretty well how they're going to react and what Mother Nature might have in store for us."

The AP (3/4) reports that "Perry made the bloom prediction as organizers announced plans Tuesday for this year's National Cherry Blossom Festival."

Also reporting on the story are the "Going Out Guide" blog of the Washington Post (3/4, Baldinger, 4.28M), the Washington Times (3/5, Somers, 417K), USA Today (3/4, Clark, 5.82M), and the Washingtonian Magazine (DC) (3/5, 338K).

NPS, GOOGLE HELD EXTENSIVE BARGE TALKS. The San Jose (CA) Mercury News (3/5, 731K) reports that Google "held extensive talks" with the NPS "about bringing its mysterious barge and floating tech exhibition studio to San Francisco's historic Fort Mason Center last fall, until the project was put on hold because of construction delays, according to documents obtained Tuesday." Discussions "began last March, when Google representatives met with park service officials including Frank Dean, superintendent of the Golden Gate National Recreation Area." According to the article, "over the next several months, federal officials toured the barge at nearby Treasure Island, held a series of meetings and phone consultations with Google, and exchanged proposed drafts of a multipage special use permit that would let Google use one of the piers at Fort Mason." However, "the project was postponed twice and went into 'temporary hibernation' last September, according to Steve Kasierski, a park service property manager, who notified other officials that constructing the barge and obtaining Coast Guard permits was taking 'much, much ... longer than anticipated.'"

BEARS TAKING FEWER PICNIC BASKETS AT YOSEMITE. The Christian Science Monitor (3/4, Oskin, 540K) reports that "the black bears at Yosemite National Park are relying less on human food and garbage, thanks to more stringent food storage rules," according to researchers. A new study found that "the park's stringent food storage rules slashed the amount of human food eaten by black bears by 63 percent." Jack Hopkins, lead study author and a wildlife ecologist at the University of California, Santa Cruz, said, "What we found was that the diets of bears changed dramatically after 1999, when the park got funding to implement a proactive management strategy to keep human food off the landscape. This suggests that the bear's diets are likely going back to their natural diet."

Also reporting on the story are Reuters (3/4) and the Los Angeles Times (3/4, Boxall, 3.07M).

COMPANY UPGRADED VIDEO SURVEILLANCE AT STATUE OF LIBERTY. The Professional Security (UK) (3/5) reports that as part of the refurbishment of the Statue of Liberty, "Total Recall designed, installed and maintained the CCTV as a donation by the company." The firm "migrated from analogue CCTV to in IP-based digital video, building a command centre for the NPS and US Park Police so that the park could cover areas with video surveillance that they could not reach before, such as the security screening facilities." Capt. Gregory Norman, Commander of Liberty District, US Park Police, said, "The National Park Service and Statue of Liberty National Monument greatly appreciate the comprehensive security system donated by Total Recall."

TIMBER THIEVES HACKING CALIFORNIA'S REDWOOD GIANTS. For the "Dot Earth" blog of the New York Times (3/5, Revkin, 9.61M), Andrew C. Revkin writes that "the United States has seen waves of timber thievery of late, with a particularly awful example being night-time raids in California's extraordinary redwood forests." According to Revkin, "timber thieves have been hacking burls — valuable growths with beautiful grain — from giant trees in Redwood National and State Parks in northern California."

Bureau of Land Management:

JUDGE REJECTS LAWSUIT CHALLENGING THINNING PROJECT. The Salem (OR) Capital Press (3/4, 113K) reports that a lawsuit over thinning on BLM land in Oregon has been tossed out by a federal judge. US District Judge Anna Brown has agreed with a magistrate judge's holding that BLM complied with environmental laws. US Magistrate Judge John Acosta "found that thinning isn't precluded by the snag deficit and the project is consistent with plans for the area."

Fish and Wildlife Service:

FWS DESIGNATES HABITAT IN SOUTHWEST FOR JAGUAR. The AP (3/4) reports that the FWS Service on Tuesday designated critical habitat for the jaguar in New Mexico and Arizona. The habitat includes more than 764,000 acres across Hidalgo County in southwestern New Mexico and in Pima, Santa Cruz and Cochise counties in Arizona. The FWS also said "the designation will not affect border security, including routine patrols by law enforcement." Coverage by the AP was also picked up by the Washington Times (3/5, Bryan, 417K) and the Arizona Republic (3/4, 1.19M).

The Cronkite News (3/5) reports that Jeff Humphrey, an FWS spokesman, said, "It serves as a yellow flag for federal agencies that now have an additional responsibility to protect the habitat." However, Michael Robinson, a conservation advocate for the Center for Biological Diversity, said "it isn't enough." Robinson said "the designation should have included the Chiricahua Mountains in southeastern Arizona and the Mogollon Rim."

Also reporting on the story are the Albuquerque (NM) Journal (3/5, 288K) and the Tucson (AZ) Sentinel (3/5, 1K).

FWS ANNOUNCES AVAILABILITY OF FINAL REVISED RECOVERY PLAN FOR PALLID STURGEON. KXLO-FM Lewiston, MT (3/5) reports that the FWS is "announcing the availability of the Pallid Sturgeon Revised Recovery Plan." Noreen Walsh, Mountain-Prairie regional director, said, "In order to keep pace with the rapidly changing and heavily used rivers the pallid sturgeon calls home, we updated its recovery plan to better meet the conservation challenges. It's our goal to conserve and protect this 'living dinosaur' from extinction for future generations of Americans."

FWS COMPLETES POST-SANDY CLEAN-UP AT LIDO BEACH WILDLIFE MANAGEMENT AREA. The [Long Island \(NY\) Exchange](#) (3/5, 1K) reports that the FWS has "completed a major cleanup effort of post-Hurricane Sandy coastal debris at the Lido Beach Wildlife Management Area." According to the article, "the operation will continue to Elizabeth A. Morton National Wildlife Refuge this week, and ultimately clean up 8 of the national wildlife refuge units on Long Island."

PADDLEFISH RETURN TO TEXAS LAKE. The [AP](#) (3/5) reports that "decades after the paddlefish was almost completely wiped out, it's coming back to Caddo Lake." The fish will "be closely tracked by scientists, researchers and students in 20 schools as part of a broad collaboration between private, state and federal agencies attempting to revitalize a long-damaged ecosystem by changing the water releases from a nearby dam." The FWS has "inserted transmitters into the paddlefish, which can grow to be 7-feet long and 200 pounds."

Securing America's Energy Future:

Renewable Energy:

BIRD GROUPS CONCERNED OVER SIX WIND TURBINES IN GREAT LAKES BIRD MIGRATION CORRIDOR.

The [Surfbirds News](#) (3/4) reports that "American Bird Conservancy (ABC) and Black Swamp Bird Observatory (BSBO) charge that millions of migrating and federally protected birds, including an active Bald Eagle nest, will be threatened by an Ohio wind development currently under construction." According to the February 26 letter to FWS Director Dan Ashe, "... this wind energy project is being built by the developer, SUREnergy, with no Environmental Assessment (EA) or Environmental Impact Statement (EIS) ever being conducted, and with no consultation whatsoever with any state or federal natural resource agency. ABC and BSBO are concerned that this project represents an even greater threat to our public trust resources than the turbine that was planned for Camp Perry, and encourages the Service to look into this project in more detail, and take decisive action as appropriate."

Onshore Energy Development:

APPEALS COURT REJECTS TRIBE'S CHALLENGE ON GAS-DRILLING ROYALTIES. The [Environment & Energy Publishing](#) (3/5, 705) reports that "federal appellate judges today dismissed a Native American tribe's challenge to an Interior Department ruling that the tribe claimed robbed it of natural gas royalties." The US Court of Appeals for the District of Columbia Circuit "tossed out the Jicarilla Apache Nation's challenge to a 2007 Interior Board of Land Appeals ruling." The article notes that "the case involves Merit Energy Co.'s gas development on the tribe's northwest New Mexico reservation from February 1993 to September 1995."

HOUSE PASSES FLATHEAD PROTECTION BILL. The [AP](#) (3/5) reports that the House "passed legislation Tuesday to prevent mining and oil and gas drilling on federal lands along the North Fork of the Flathead River." The bill "now goes to the Senate, where it has the backing of Montana's Democratic senators." The legislation "would withdraw federal lands from mineral and geothermal leasing in the area west of Glacier National Park."

Offshore Energy Development:

APPELLATE COURT RULES BP MUST HONOR BUSINESS CLAIMS RELATED TO 2010 GULF SPILL.

Bloomberg BusinessWeek (3/4, Barrett, 4.93M) reports that "for the second time in two months" a US court has ruled that BP is "stuck with the multibillion-dollar deal it made with plaintiffs' lawyers to settle one portion of its enormous liability stemming from the April 2010 Gulf of Mexico oil spill." The article points out the court's basic ruling that the company's legal team "agreed to a loosely worded settlement ... and now the company has to keep paying, even when there is no clear evidence—or any evidence at all—that business losses were related to the spill."

Reuters (3/4, Stempel) reports that the 5th US Circuit Court of Appeals panel was split 2-1 in its ruling, with Judge Leslie Southwick writing in the majority opinion that "the settlement agreement does not require a claimant to submit evidence that the claim arose as a result of the oil spill." Judge Edith Brown Clement gave the

dissenting opinion, claiming for her part that the agreement is flawed because it gives damages to those who had "absolutely nothing to do with Deepwater Horizon or BP's conduct."

Tackling America's Water Challenges:

US, MEXICO PLAN TO COLLABORATE ON PLAN TO RESTORE COLORADO RIVER DELTA. The U-T San Diego (3/4, 647K) reports that the United States and Mexico "plan to collaborate this month on a pilot project aimed at restoring wetlands in the Colorado River delta in Baja California through a one-time high-volume delivery of river water, a move hailed as historic by environmental groups on both sides of the border." According to the BOR, "the release at Mexico's Morelos Dam on the border west of Yuma is expected to start on March 23, and continue for about eight weeks." BOR spokesman Jack Simes said that "a binational ceremony celebrating the delivery is scheduled for March 27."

DELTA TUNNEL OPPONENTS SAY MAP SHOWS WATER WOULD BE USED FOR FRACKING. The Central Valley (CA) Business Times (3/5, 206) reports that "a new map shows that the peripheral tunnels pushed by Gov. Jerry Brown to take fresh water from the Sacramento River actually would mainly serve oil and gas basins that could be fracked, along with the largest agricultural users of Bay-Delta water exports, say two groups opposing the project, Restore the Delta and Food and Water Watch." Barbara Barnigan-Parrilla, executive director of RTD, said, "This map shows a remarkable overlay of where our water is going, how the public subsidizes unsustainable crops on drainage-impaired lands, selenium concentrations that pose a threat to the public, and underlying oil deposits that could be fracked with water from the governor's tunnels."

INFRASTRUCTURE IMPROVEMENTS HELP SOUTHERN CALIFORNIA DURING DROUGHT. The Wall Street Journal (3/5, Carlton, Subscription Publication, 5.91M) reports infrastructure improvements are responsible for Northern California residents being required to ration water, while Southern California residents face only a voluntary call to conserve. The Journal notes this is a reversal of past droughts, when the south was considered a drain on the state's water supplies. The Journal also highlights that the consequences of the drought reach beyond state borders, because the impact on California's agricultural sector could lead to higher produce prices.

Empowering Native American Communities:

BIA CHIEF EXPRESSES RELUCTANCE IN INTERVENING IN TRIBAL MEMBERSHIP DISPUTES. In an interview in the Indian Country Media Today (3/4, 21K), Interior's assistant secretary for Indian affairs, Kevin Washburn, suggested that once Interior decides to override tribal sovereignty and take on tribal membership or other issues, controversies might never end. Washburn said, "I think the question is, should tribes always be sovereign and self-governing? Or are there times when the United States should trample over their sovereignty and self-governance for some other purpose – the principle of justice or equity or something like that?" He continued, "One can make a solid argument that the United States never has any business trampling on tribal sovereignty and self-governance, but that's not satisfying to everyone because we all see occasionally a tribe doing something that well-thinking people outside the tribe disagree with. These are just agonizing decisions and I'm not convinced that the United States is better at making these decisions on average than tribes are at making them themselves ... We often get entreaties from both sides to get involved, but once we get involved how do we not get involved in the future?"

Also reporting on the story is the Bellingham (WA) Herald (3/4, 113K).

TRIBAL LEADER BLASTS CONNECTICUT GOV. MALLOY OVER STANCE ON FEDERAL RECOGNITION. The AP (3/5) reports that "a review that is expected to produce new US rules for recognizing American Indian tribes as early as this summer is stirring up heat in Connecticut, where the governor is leading efforts to block changes that could open the door to more tribal casinos." Gov. Dannel P. Malloy "argued in a letter he delivered last week to President Barack Obama that proposals under consideration could hurt the state by aiding tribal claims to vast areas of fully developed land." Alan Russell, the leader of one faction of the Schaghticoke tribe in Kent, has criticized Malloy "in a statement asking whether Malloy is a 'lapdog' for wealthy land owners in Litchfield County." Meanwhile, Nedra Darling, a spokeswoman for the BIA, said "Tuesday that it is still reviewing comments on the proposed regulations and revised rules are not likely to be made public, in the federal register, until this summer or later."

Top National News:

ANALYSTS: OBAMA'S FY'15 BUDGET IS MEANT TO BOOST DEMOCRATS AHEAD OF MIDTERMS.

Coverage of the introduction of President Obama's fiscal year 2015 budget plan was much lighter than might have been expected absent the media's continuing focus on the crisis in Ukraine.

Among the three network newscasts, only the CBS Evening News (3/4, story 7, 2:05, Pelley, 5.58M) covered the President's plan, and that was just a brief mention in an introduction to a segment on unemployed veterans. Scott Pelley said the President had "sent Congress a \$3.9 trillion budget for next year" that "includes tax increases on the wealthy and spending on things like roads and job training." Pelley added, "Little of it will pass the Republican House." Pelley went on to report that the President's budget "would also shrink the armed forces," and correspondent Mark Strassmann then described the challenges of veterans re-entering the workforce.

On the other hand, the budget request was covered on the front pages of the New York Times (3/5, A1, Calmes, Subscription Publication, 9.61M), the Washington Post (3/5, Goldfarb, 4.28M) and the Wall Street Journal (3/5, A1, Paletta, Subscription Publication, 5.91M). In an editorial titled, "Obama Budget Avoids Needed Entitlement And Tax Reform," the Washington Post (3/5, 4.28M) has some praise for aspects of the President's plan, but criticizes him for avoiding a debate over the future of "expensive entitlements." On the other hand, the New York Times' (3/5, Subscription Publication, 9.61M) editorial board says that "virtually every section" of the President's budget "is an important illustration of how many national goals – in particular, reducing inequality and rebuilding the economy – could be achieved if Congress would end unnecessary and unfair tax breaks for the rich."

Analysis this morning, from partisan and non-partisan sources alike, casts the budget plan as an attempt by the President to give Congressional Democrats populist proposals to campaign on this year. David Espo, in an analysis for the AP (3/5, Espo) titled, "Obama Budget Tries To Have It Both Ways," says the President "paid faint lip service to reducing federal deficits, then piled on about \$1 trillion in tax increases and hundreds of billions in higher spending designed to appeal to economically squeezed voters rather than congressional foes of red ink." According to Espo, the President's "objective is political rather than legislative."

In a front-page article titled, "Obama's Budget Is Populist Wish List And An Election Blueprint," the New York Times (3/5, A1, Calmes, Subscription Publication, 9.61M) calls the President's FY'15 budget "a platform for Democrats to run on in this election year," which is "full of policies intended to invite contrasts with Republicans rather than offer compromises as he did last year, without success." The Times says the President "seeks to energize Democratic voters with populist proposals like a more generous tax credit for the working poor, paid for with higher taxes on the rich," and notes that Republicans "were quick to condemn the...proposed spending and tax increases."

The Washington Post (3/5, O'Keefe, 4.28M) reported that on Tuesday, Sen. Charles Schumer said, "Everybody realizes that both sides are going to continue to put out their message documents to show what they would do if they gained seats in the House or Senate."

The AP (3/5) reports that the President "announced his \$3.9 trillion fiscal 2015 budget...that would boost taxes on the wealthy and expand tax credits for workers." According to the AP, the President "is pitching his budget proposal as 'a roadmap for creating jobs.'" In a front-page article, the Wall Street Journal (3/5, A1, Paletta, Subscription Publication, 5.91M) quotes the President as saying, "Even in the midst of recovery, too many Americans are working more than ever just to get by – let alone get ahead. And too many still are not working at all."

On Fox News' Special Report (3/5, 2.15M), correspondent Mike Emanuel reported that on Tuesday, Republicans "quickly pounced, saying the President's budget would increase spending by \$791 billion over ten years...and would add \$8.3 trillion to our debt in the neck decade."

Under the headline, "Obama's Budget Eyes \$1 Trillion Hike In Tax Revenue," USA Today (3/5, Korte, 5.82M) reports that the President wants to "raise more than \$1 trillion over 10 years through changes in the tax code by closing loopholes, raising some taxes and cracking down on enforcement." However, USA Today adds that his

budget “also cuts taxes for some taxpayers, most notably an expansion of the Earned Income Tax Credit for 13.5 million low-income Americans.”

Politico (3/5, Epstein, 464K) reported that “very little” of the budget proposal “is expected to become law — or even be seriously considered...on Capitol Hill” — and, according to Politico, the White House “isn’t even pretending that this year’s budget is a governing document.” Politico adds that Republicans “labeled Obama’s budget unserious as soon as he finished speaking,” and Speaker Boehner derided it as “his most irresponsible budget yet.”

The Washington Post (3/5, Goldfarb, 4.28M) emphasizes that the President “pledges to tame the national debt by raising taxes on the wealthy,” while also “slashing payments to health providers and overhauling the nation’s immigration laws.” The Post describes the budget request as “a smorgasbord of liberal policy ideas” that “includes some targeted spending cuts, but relies primarily on more than \$1 trillion in new taxes.” The Post adds that “while some of the proceeds would go toward deficit reduction,” the budget plan “also calls for more than \$55 billion in new spending on defense, roads and bridges, universal preschool education and expanded tax credits for the poor.”

USA Today (3/5, Madhani, 5.82M) reports that “after floating the idea of implementing ‘chained CPI’ — a less generous calculation for annual cost-of-living increases to Social Security...in last year’s proposal, Obama, as expected, downplayed deficit cutting this year and offered a budget that will be far more palatable to Democrats running for re-election.” USA Today says the President “would pay for half of his new spending by...cap[ping] tax-preferred saving on retirement funds for individuals who have already accumulated enough to finance an annual income of more than \$200,000 per year in retirement, or more than \$3 million per person,” and “the rest would be paid for through a series of spending changes, including reducing subsidies to the federal crop insurance program...raising TSA passenger fees...and preventing individuals from collecting unemployment insurance and disability insurance at the same time.”

According to Roll Call (3/5, Dennis, Subscription Publication, 87K), the President’s proposed budget “lives within the two-year deal reached last year” by House Budget Committee Chairman Paul Ryan and Senate Budget Chairwoman Patty Murray, but also “includes a \$56 billion sidecar wish list that would add spending to domestic and defense accounts.” Roll Call adds that Senate Democrats “aren’t planning to bring a budget resolution to the floor.”

Politico (3/5, Kim, 464K) reported that Ryan was “highly critical of Obama’s budget document,” saying, “This budget isn’t a serious document; it’s a campaign brochure,” while Murray “said she ‘strongly’ supported” the plan.

Under the headline, “Obama Proposes Budget, Democratic Playbook For Election,” McClatchy (3/5, Kumar, Lightman, Subscription Publication, 95K) reports that “Obama and his signature domestic achievement — the contentious new federal health care law — have become toxic for many in their party.” McClatchy goes on to say that the President’s budget “now becomes a roadmap for many of those Democrats, full of new spending and tax increases on the wealthy.” McClatchy notes that Senate Minority Leader Mitch McConnell said, “The president has once again opted for the political stunt — for a budget that’s more about firing up the president’s base in an election year than about solving the nation’s biggest and most persistent long-term challenges.”

The Wall Street Journal (3/5, Subscription Publication, 5.91M), in an editorial, criticizes the President for introducing new spending requests while simultaneously advocating reducing Pentagon funding as a percent of GDP from 3.4% in 2015 to 2.3% in 2023.

Dana Milbank, in his column for the Washington Post (3/5, Milbank, 4.28M), notes that on Tuesday, as White House press secretary Jay Carney joined “a quartet of President Obama’s top advisers...for the annual rollout of the budget...only 40 of the room’s 120 seats were occupied — and several of the reporters there had come to ask Carney about Ukraine.”

Obama Seeks \$100 Billion From Multinationals Over 10 Years. Bloomberg News (3/5, Rubin, 1.91M) reported that the President has “proposed raising about \$100 billion in revenue over the next decade through new taxes and restrictions on US multinational companies.” According to Bloomberg, “The changes...would affect digital goods, deductions for “excessive” interest and so-called hybrid arrangements that can lead to income that isn’t

taxed in any country." Bloomberg adds that the President "also wants to make it tougher for US-based companies to move to other countries."

The AP (3/5, Taylor) reports that the President said on Tuesday, "As a country, we've got to make a decision, if we're going to protect tax breaks for the wealthiest Americans or if we're going to make smart investments necessary to create jobs and grow our economy and expand opportunity for every American."

The Wall Street Journal (3/5, McKinnon, Subscription Publication, 5.91M) notes that the tax reform plan introduced by Rep. Dave Camp (R-MI), the chairman of the House Ways and Means Committee, last week also included new revenues from corporations. Former Treasury official Michael Mudica is quoted as saying that when it comes to revenue, "It does seem the first place both parties are looking is on the business side rather than on the individual side." Business Roundtable president John Engler released a statement on Tuesday reading: "The president's international tax proposals would move the U.S. economy in the wrong direction, placing U.S. companies in a worse competitive position than they face today."

According to McClatchy (3/5, Hall, Subscription Publication, 95K), "For all [their] major differences over the federal budget," the President and Republicans in Congress "might be tiptoeing toward common ground and the first major overhaul of the tax code in almost three decades." McClatchy reports that an anonymous "senior Treasury Department official" acknowledged that "the Obama budget has a 'significant amount of overlap' with Camp's plan." McClatchy notes that "both Camp's plan and the White House proposed budget would close a tax loophole that lets some Wall Street investment managers pay taxes at a much lower rate than managers of similar rank in other businesses."

White House Expects 3.1% GDP Growth This Year. Bloomberg News (3/5, Klimasinska, 1.91M) reports that the President's budget plan forecasts that the US economy "will grow this year at its fastest pace since 2005, helping reduce the annual average unemployment rate for a fourth straight year even as market borrowing costs rise." Bloomberg says the White House expects GDP to "expand [by] 3.1 percent in 2014 after rising 1.9 percent last year," and the unemployment rate to "average 6.9 percent this year, compared with 7.4 percent last year, and average 6.4 percent in 2015."

The AP (3/5, Raum) reports that the White House expects the unemployment rate to fall to "5.4 percent by 2018," but "projects a 6.7 percent unemployment rate for 2015." According to the Wall Street Journal (3/5, Sparshott, Subscription Publication, 5.91M), Presidential budgets tend to overestimate GDP growth.

Obama Wants To Expand The Earned Income Tax Credit. David Nather, in a piece for Politico (3/5, 464K), says Democrats "have been talking for years about expanding" the Earned Income Tax Credit "to do more for childless workers, since they don't get much out of it right now." Nather says the President's budget "would do that by doubling the maximum credit from \$500 to \$1,000 and making it available to young adults starting at age 21 (the minimum age is 25 now)." Nather adds that while "a beefed-up EITC is a central part of Democrats' proposals for addressing inequality," it also "has some appeal to Republicans," including Paul Ryan, who "has praised it as a successful antipoverty program."

The Wall Street Journal (3/5, Peterson, Subscription Publication, 5.91M) reports that an expanded EITC has also been championed by Sen. Marco Rubio and House Ways and Means Committee Chairman Dave Camp.

In an op-ed for Politico Magazine (3/5, Lew, 464K), Treasury Secretary Lew advocates raising the Eamed Income Tax Credit as set out in President Obama's latest budget proposal, saying it "has the power to raise living standards and lift millions of working Americans out of poverty." Lew points out that the EITC has a bipartisan pedigree and "has been one of the most effective anti-poverty programs we have seen," because it encourages work while bolstering the finances of working families.

Budget Request Includes Additional Funding For Regulatory Enforcement. According to The Hill (3/5, Goad, 194K), the President's FY'15 budget request "contains hundreds of millions of dollars to further a broad array of regulatory initiatives in the waning years of his administration." The Hill says the President proposes to "bolster [his] climate change initiative with additional funding and manpower, and add to the coffers of Wall Street regulators whose responsibilities have grown in the years since the Great Recession." The Hill adds that it would also "devote tens of millions of dollars more to regulations governing the nation's chemical plants and food safety

system.”

Senate Republicans Reportedly Want Ryan To Avoid Provoking Debate On Antipoverty Spending.

According to Roll Call (3/5, Shiner, Subscription Publication, 87K), “Democrats instead are looking to set a political trap for Republicans on income inequality issues and hoping the GOP takes the bait.” Roll Call goes on to report that “some Republicans, especially on the Senate side, are reluctant to have” House Budget Committee Chairman Paul Ryan “push forward with his annual budget framework, which he telegraphed this week would focus on the federal government’s antipoverty programs.” According to Roll Call, Senate Republicans, “several of whom are caught between primary challengers on the right and Democratic upstarts on the left, would rather” not be “forced to contend with issues better suited to the Democratic party line.”

According to the Washington Post (3/5, O’Keefe, 4.28M), “GOP aides said there are no current plans to hold votes on Ryan’s budget plan.”

Federal Workers Scheduled To Get A 1% Raise Next Year. Joe Davidson, in his column for the Washington Post (3/5, 4.28M), says that “when it comes to federal pay, ignoring President Obama’s proposed 1 percent pay raise is the same as passing it.” According to Davidson, the pay hike “will take effect in January by default if no law setting a different figure is enacted,” which is what “happened this January, when workers also received a 1 percent hike.”

IN KIEV, KERRY OFFERS \$1 BILLION IN AID, WARNS PUTIN AGAINST FURTHER INCURSION. Coverage of the crisis in Ukraine continues to dominate the media, with all three networks leading their broadcasts with the story and dedicating just under 19 minutes of combined airtime to the latest developments. While President Obama made brief remarks on Ukraine during an event Monday, Secretary of State Kerry’s visit to Kiev and Russian President Vladimir Putin’s remarks to reporters on the crisis are dominating coverage. The focus of much of the reporting on Kerry is a visit he made to a memorial in the Kiev’s main square for those who were killed during protests last month.

Noting his visit to the square, the AP (3/5, Jakes) says Kerry’s made a “a somber show of US support for Ukraine’s new leadership,” and “made a pointed distinction between the Ukrainian government and Putin’s,” saying, “The contrast really could not be clearer: determined Ukrainians demonstrating strength through unity, and the Russian government out of excuses, hiding its hand behind falsehoods, intimidation and provocations. In the hearts of Ukrainians and the eyes of the world, there is nothing strong about what Russia is doing.”

NBC Nightly News (3/4, lead story, 3:40, Williams, 7.86M), On Andrea Mitchell said Secretary Kerry made a “show of solidarity with the Ukrainian people” on Tuesday, paying an emotional visit to the memorial in Kiev’s Independence Square. Announcing \$1 billion in economic aid for Ukraine, Kerry also warned, “I think that it is clear that Russia has been working hard to create a pretext for being able to invade further.” But back in Washington yesterday, Mitchell said President Obama “tried to give Putin a way out,” saying, “There have been some reports that President Putin is pausing for a moment and reflecting on what’s happened.”

The CBS Evening News (3/4, story 3, 1:50, Pelley, 5.58M) showed the President saying, “There is a strong belief that Russia’s action is violating international law. I know President Putin seems to have a different set of lawyers, making a different set of interpretations.”

Martha Raddatz reported on ABC World News (3/4, story 2, 1:05, Sawyer, 7.43M) reported that there “are negotiations going on” and on Wednesday, Kerry will be meeting with Russian Foreign Minister Sergey Lavrov in Paris.

The Wall Street Journal (3/5, Solomon, Subscription Publication, 5.91M) says the aid announced Tuesday by Kerry marked the first tangible step taken by the Administration to aid the new government, but the Secretary also signaled to Putin that a diplomatic solution is still possible as he prepares to meet with Lavrov later today.

Kerry, USA Today (3/5, Jackson, 5.82M) reports, said Russia could “de-escalate the situation” by pulling its soldiers back “to the barracks.”

The CBS Evening News (3/4, story 3, 1:50, Pelley, 5.58M) reported Kerry said during his “short” and “incredibly

moving" visit to Kiev that "while he condemned Russia's act of aggression...it is still possible for Ukraine to have a peaceful political transition." He "promised the US would provide \$1 billion in loan guarantees, help Ukraine get its finances in order, and bring sanctions against Russia in the coming days." But he "also had a message for President Putin: back off." Kerry was shown saying: "It is not appropriate to invade a country and at the end of a barrel of a gun, dictate what you are trying to achieve."

But the New York Times (3/5, Gordon, Subscription Publication, 9.61M) says Kerry's visit and the promise of aid signaled both "support for Ukraine's fledgling government and a new swipe at Russia." And while Kerry told a woman during his "emotional visit" to Independence Square that he hoped Russia would "respect" upcoming elections here, the Times says "there was no indication that Russia was prepared to reverse its intervention in Crimea." Kerry himself even "later warned that...Putin might be preparing to expand the scope of his country's military operation into eastern Ukraine."

Still, the AP (3/5, Baetz) reports the US and EU continue to prepare sanctions against Russia. Kerry warned in Kiev that Russia must pull back or "our partners will have absolutely no choice but to join us to continue to expand upon steps we have taken in recent days in order to isolate Russia politically, diplomatically and economically."

According to another AP (3/5, Jakes) report, President Obama "spoke for more than an hour" Tuesday with German Chancellor Angela Merkel, and "US officials traveling with Kerry...said the Obama administration is considering slapping Russia with economic sanctions as soon as this week."

But Edward-Isaac Dove reports for Politico (3/5, Dove, 464K) that "senior administration officials told reporters Tuesday evening" they have "worked out the contours of what they're calling an 'off-ramp,' with Merkel taking a leading role in lobbying Moscow" to accept a deal that calls for international monitors, "de-escalating troop presence in the region," recognition of the interim government in Kiev, and international mediation.

According to McClatchy (3/5, Allam, Subscription Publication, 95K), US officials are "struggling to get Europe on board" with sanctions as officials there see "high risks for the continent and very little to suggest that any such action would sway a defiant Putin."

On the CBS Evening News (3/4, 6:32 p.m. EST, story 4, 2:20, Pelley, 5.58M), Anthony Mason reported that the threat of economic sanctions may not keep Russia "from taking a tighter hold on Ukraine's Crimean Peninsula." He noted that two-thirds of Europe's natural gas travels in pipelines from Russia through Ukraine, and "the US has little economic leverage, only two percent of its trade is with Russia." Instead, "the West's most effective move is to pump billions in economic aid into the new government in Kiev."

Politico (3/5, McCalmont, 464K) notes that in a joint statement with the White House, Treasury Secretary Lew said the \$1 billion aid package unveiled yesterday "will work in parallel with an international assistance package" coordinated by the IMF. And a Treasury official, Bloomberg News (3/5, Rastello, 1.91M) reports, said Tuesday that the Administration plans to include legislation increasing IMF "resources" in an aid package for Ukraine.

Congress, Politico (3/5, Everett, Kim, 464K) reports, is "poised to move quickly to provide Ukraine with economic assistance while lawmakers debate ways to punish Russia."

But in a report titled "High Stakes Limit Bid To Cow Putin," the Wall Street Journal (3/5, Kamitschnig, Williams, Mauldin, Subscription Publication, 5.91M) reports that sanction threats by the US and EU are unlikely to sway Russia, because they would suffer as well. Putin himself made this point at a press conference Tuesday saying, "Those who are thinking of imposing the sanctions should be the ones first of all to think about their consequences. I think in the modern world, when everything is so interconnected and everyone depends on everyone else in one way or another, it's of course possible to do some damage to one another, but it will be mutual damage."

According to the Wall Street Journal (3/5, Norman, Subscription Publication, 5.91M), the EU is ready to impose sanctions on former Ukrainian President Viktor Yanukovich and 17 other officials. And the AP (3/5, Jahn) reports that on Tuesday, the OSCE formed an observer mission at the request of Ukraine to monitor the situation in Crimea.

In Brussels, the Wall Street Journal (3/5, Fidler, Subscription Publication, 5.91M) reports, NATO said it would continue cooperation with Russia, but called for a peaceful solution to the crisis in Ukraine. In a statement, the body said: "Russia continues to violate Ukraine's sovereignty and territorial integrity, and to violate its international commitments."

New York Times Praises Administration's Response. In an editorial, the New York Times (3/5, Subscription Publication, 9.61M) praises the Administration, saying that "leadership and credibility in a crisis mean reacting coolly and rationally, not rattling sabers, or rushing into economic warfare that allies may or may not support, or painting 'red lines' that the other side can cross with impunity." To that end, the Times says the West should exert economic pressure on Russia, and these "are exactly the buttons Mr. Obama and Secretary of State John Kerry are pushing — threatening further isolation if Mr. Putin does not back down, and cooperation if he does, while rallying allies and pledging substantial assistance to the new authorities in Ukraine." So far, the Times says, Obama "is on the right track."

More Commentary. In his column for the New York Times (3/5, Subscription Publication, 9.61M), Thomas Friedman writes that there is "much nonsense" now being written about how Putin is "tougher" than Obama and how the Administration "needs to demonstrate his manhood." Friedman said that this "is how great powers get drawn into the politics of small tribes and end up in great wars that end badly for everyone." He endorses economic and diplomatic actions instead.

In his column for the Wall Street Journal (3/5, Subscription Publication, 5.91M), Holman W. Jenkins writes that once the furor over the seizure of Crimea settles down, Western governments will likely work to reaffirm Putin's international standing. In particular, Jenkins says that no one should be surprised if the June G-8 summit in Sochi takes place in some form. However, if the West is serious, Jenkins says that the EU should focus on anti-trust charges against Gazprom and withdraw support for pipelines Russia wishes to build. In addition, the US should rapidly expand its trade pacts with Europe and Asia, which would allow them to import US LNG, while Western governments should also let Western oil firms looking to work in Siberia and Russia's arctic know that their efforts are not acceptable.

McCain Raps Kerry For Frequent Travel. Al Kamen reports in his Washington Post (3/5, 4.28M) "In the Loop" column that Sen. John McCain has "taken of late to smacking his 'friend' Secretary of State John Kerry for being an overly frequent flier." But Kamen says a "look at the travel data" shows McCain "does a pretty solid amount of traveling himself," and while Kerry's trips "are hugely expensive...working on deals on Mideast peace, Syria's chemical weapons and Iran's nukes might be worth going an extra mile or two."

GLOBAL MARKETS SHAKE OFF UKRAINE CONCERNS; US STOCKS SOAR. Stock markets across the globe bounced back on Tuesday from their Monday declines, which the media almost universally credited to easing concerns about the situation in Ukraine.

ABC World News (3/4, story 3, 0:15, Sawyer, 7.43M) reported that the Ukraine situation is "causing a trampoline effect on the markets here at home. Last night, stocks were in a freefall. Tonight, a giant rally. The Dow up 227 points. The single-best day on Wall Street all year, reportedly based on a sense that the crisis is, for the moment, not moving closer to war in Ukraine."

The CBS Evening News (3/4, story 5, 0:15, Pelley, 5.58M) reported, "Financial markets rallied today. The Dow, which gave up more than 150 points during the crisis yesterday bounced back, posting a gain of 227 point, or 1.4%. That is the best showing of the year."

The New York Times (3/5, Jolly, Subscription Publication, 9.61M) reports that global markets on Tuesday "calmed" on "hopes of a cooling of tensions between Russia and Ukraine, helping stocks recover some of their losses from a sell-off on Monday." Stocks in the US, Europe and Asia "turned higher," while oil and natural gas prices "eased." In addition, the Russian Micex index rose 5% after dropping 10.8% on Monday.

The Wall Street Journal (3/5, Kieman, Subscription Publication, 5.91M) reports that in the US, the Dow Jones Industrial Average rose 227.85 points to 16,395.88, the biggest single-day increase since December. The S&P 500 rose 28.18 points to 1873.91, while the Nasdaq composite Index was up 74.67 points to 4351.97.

The AP (3/5, Freed) reports that with investors moving back to "riskier assets," the prices for "safe-play investments" such as gold and bonds fell. The "yield on the 10-year Treasury note rose to 2.68 percent from 2.60 percent late Monday."

USA Today (3/5, Shell, 5.82M) reports that the markets were calmed by the apparent Russian moves to de-escalate the Ukraine situation, along with the US decision "decision to put together a \$1 billion loan package for the Ukraine," which "reduced fears of a financial crisis in the beleaguered country."

Gold Traders Expect Prices To Rise. Bloomberg News (3/5, Roy, 1.91M) reports that gold traders are expecting gold to hit \$1,400 per ounce, "a price not reached since September, as the worst standoff between the West and Russia since the end of the Cold War increases demand for the metal as a haven." The "most-traded bullion option" on the Comex yesterday "was a call giving owners the right to buy at \$1,400 by April, with an estimated 4,547 lots changing hands." Investors are again moving to gold, "leaving prices poised for the biggest quarterly gain since 2007."

Crimea Crisis Generating Support For LNG Exports. Bloomberg News (3/4, Wingfield, Buurma, 1.91M) reports the Russia's seizure of Crimea is "bolstering the case for easing restrictions on exports of the U.S.'s booming natural gas production, according to energy analysts and industry groups." Increased access to US supplies would "blunt the ability of Russia to use energy as a weapon, according to supporters of lifting export curbs." House Speaker John Boehner said, "One immediate step the president can and should take is to dramatically expedite the approval of U.S. exports of natural gas."

Editorial Wrap-Up:

NEW YORK TIMES. "A Rational Response To Ukraine's Crisis." In an editorial, the New York Times (3/5, Subscription Publication, 9.61M) praises the Administration response to the crisis in Ukraine, saying that "leadership and credibility in a crisis mean reacting coolly and rationally, not rattling sabers, or rushing into economic warfare that allies may or may not support, or painting 'red lines' that the other side can cross with impunity." To that end, the Times says the West should exert economic pressure on Russia, and these "are exactly the buttons Mr. Obama and Secretary of State John Kerry are pushing — threatening further isolation if Mr. Putin does not back down, and cooperation if he does, while rallying allies and pledging substantial assistance to the new authorities in Ukraine." So far, the Times says, Obama "is on the right track."

"The What-Might-Have-Been Budget." The New York Times' (3/5, Subscription Publication, 9.61M) editorial board says that "virtually every section" of the President's budget "is an important illustration of how many national goals — in particular, reducing inequality and rebuilding the economy — could be achieved if Congress would end unnecessary and unfair tax breaks for the rich."

"Setting Up A Better Domino Plan." The New York Times (3/5, Subscription Publication, 9.61M) in an editorial comments on New York City Mayor Bill de Blasio's handing of a developer's plans for the "old Domino Sugar refinery in Brooklyn." The developer had agreed to include "660 apartments for low- and middle-income tenants, an unusually generous commitment," but the de Blasio Administration asked for "another 50,000 square feet of affordable housing." That caused some to fear that "de Blasio was putting the deal at risk," but Monday a new deal was announced including "about 700 affordable apartments." The Times sees this as an accomplishment for the mayor.

WASHINGTON POST. "Mr. Putin's Closed Mind." In an editorial, the Washington Post (3/5, 4.28M) says that Russian President Vladimir Putin's "rambling performance at a hastily arranged news conference Tuesday did support one disturbing observation: The Russian ruler's speech has become indistinguishable from the propaganda of his state television network." Putin's "bizarre performance vividly demonstrated how the political system he has created has insulated him from the truth about events both abroad and at home."

"Budget Comes Up Short." In an editorial, the Washington Post (3/5, 4.28M) has some praise for aspects of the President's budget plan, but criticizes him for avoiding a debate over the future of "expensive entitlements."

"Comeback Convicts." The Washington Post (3/5, 4.28M) editorializes that voters should not "be expected to embrace" the candidacies of Julius Henson and Tiffany Alston for the Maryland General Assembly, after both individuals were convicted of criminal charges in 2012. The Post notes that Henson was convicted of suppressing African American votes and Alston of theft for "using state funds to pay an employee of her law firm and diverting campaign money to cover her wedding expenses." The Post says, "a little memory should go a long way toward putting their electoral ambitions to rest."

WALL STREET JOURNAL. "The Back To Pelosi Budget." The Wall Street Journal (3/5, Subscription Publication, 5.91M), in an editorial criticizes the President for introducing new spending requests while simultaneously advocating reducing Pentagon funding as a percent of GDP from 3.4% in 2015 to 2.3% in 2023.

"Legal Fraud Of The Century." The Wall Street Journal (3/5, Subscription Publication, 5.91M) editorializes in support of Judge Lewis A. Kaplan's ruling that a legal effort to punish Chevron was tainted by fraud and corruption, arguing that attorney Steven Donziger engaged in legal fraud and praising Chevron for setting an example for other companies who are targeted by dishonest litigation.

"The Wages Of Yen Depreciation." In an editorial, the Wall Street Journal (3/5, Subscription Publication, 5.91M) writes that although base pay and nominal aggregate labor income in Japan appear to be on the rise, the country's rate of inflation has risen faster than wage growth, hitting a five-year high in January of 1.3% year-on-year excluding food. The Journal adds that real aggregate labor income fell 1.6% year-on-year in the last three months of 2013, after accounting for a quarter's worth of price increases. In addition, business capital spending excluding software declined 0.3% quarter-on-quarter at the end of 2013 after having dropped in the third quarter as well. The Journal concludes with a recommendation to Prime Minister Shinzo Abe to implement dramatic policy reforms to stimulate productivity-boosting investment in order to deliver on his promise of making Japanese voters better off.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “Yesterday, House Speaker John Boehner referred to Vladimir Putin as a thug, then called on President Obama to stand up to him. Which is sort of like throwing your drink on a big guy at a bar and then being like, ‘My friend here will take you.’ I personally wouldn’t mess with him.”

Jimmy Fallon: “Yesterday, Senator John McCain said that the situation in Ukraine is the result of a feckless foreign policy by the White House. The guy he was talking to asked for a handkerchief to wipe off his face. He was like, ‘All right, come on. Don’t say it again.’ Frankly, I’m fed up. That’s right, McCain said it’s the result of Obama’s feckless foreign policy. Then Obama was like, ‘What the feck did you say about my foreign policy?’”

Conan O’Brien: “Today, Washington, DC voted to decriminalize marijuana. Yeah. And we’re already seeing the effects at the Lincoln Memorial. The statue of Lincoln is now sitting on a beanbag chair.”

Dear Secretary Jewell - Sally,

As you know Utah, is a magnificent state that has been blessed with beautiful landscapes and abundant resources. The people dimension is what makes my job so fascinating here in Utah. Neil, put together a high quality BLM Leadership Team meeting here in Albuquerque - I am headed back to Utah via the Navajo Reservation and southern Utah. As I travel these roads, and watch this world as I drive, I ponder the breath of responsibilities we and you have - to add value to people's lives.

I hope you or your staff were able to use my government car from the office. My son (b)(6) was telling me last night that you were in Ogden (which I knew from last week). I do know most of the players that you mentioned and have and will continue to work with them to solve the issues they visits with yourself about.

I visit with Alan Gardner once or twice a week and have talked to him today. The private lands within the Red Cliffs we are poised to do some land exchanges this issue is to protect Desert Tortoise habitat that was agreed to 17 years ago in a Habitat Conservation Plan with the County and Fish and Wildlife Service. The BLM was asked to acquire the private properties within the HCP. There is one private land owner that has been a hold out for many years and Senator Hatch is unhappy that we are not resolving him, but I believe we have made it abundantly clear to him that this constituent does not want to do a land exchange or sell the property to a third party. Mr. Hatch has made it clear that we need to solve that issue and Alan is working hard to let the Senator know we are doing all we can with (b)(6) property.

I have called for a meeting of all the key players in Utah for the Sage Grouse issue. I will host them at the BLM office for two days starting this coming Thursday.

Thanks for all you do - and will keep the faith.

-Juan

Dear Sally,

Glad to hear you are taking a little R & R in the great state of Utah.

(b)(6). If there is anything I can do, please give me a call. Glad to hear Dan will be around tomorrow - as you know we love that bundle of energy.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

PRESIDENT OBAMA WILL EXPAND PROTECTIONS ALONG CALIFORNIA COAST. The [Environment & Energy Publishing](#) (3/11, 705) reports that President Obama will on Tuesdays "add 1,665 acres of public lands," known as the Point Arena-Stornetta Public Lands, to the California Coastal National Monument, "a signal that the White House is seeking to protect more lands as conservation bills stall in Congress." According to a White House official, "the expansion, made possible under the 1906 Antiquities Act, will protect coastal bluffs, tide pools, inland dunes, coastal prairies, and the mouth and estuary of the Garcia River." The monument will be managed by the BLM and "should offer an economic jolt to communities along the Mendocino County coast, including the city of Point Arena just to the south."

[KQED-FM](#) San Francisco (3/10, 13K) reports that Interior Secretary Sally Jewell will visit with community members Wednesday to celebrate the designation.

Also reporting on the story is the [Antioch \(CA\) Herald](#) (3/11, 81K).

SECRETARY JEWELL, MAYOR GARCETTI ANNOUNCE URBAN WILDLIFE REFUGE PARTNERSHIP. The [Southern California Public Radio](#) (3/10, 57K) reports that Interior Secretary Sally Jewell and Los Angeles Mayor Eric Garcetti was scheduled to "announce a new program for urban youths at 2 p.m. at the Los Angeles State Historic Park."

The [Echo Park-Silver Lake \(CA\) Patch](#) (3/11) reports that "a mobile visitor center for the Los Angeles River is getting support from the federal government as part of an initiative to teach Los Angeles youth about nature." The article notes that "the River Rover, which is funded and operated by the nonprofit Friends of the Los Angeles River, is one of eight pilot projects around the country benefiting from the US Fish and Wildlife Service's Urban Wildlife Refuge Initiative." Jewell said the partnership with the Friends of the Los Angeles River "will allow us to bring young people to the river and the river to young people."

SECRETARY JEWELL SELECTS COBELL SCHOLARSHIP TRUSTEES. The [Cherokee \(OK\) Phoenix](#) (3/11, 442) reports that Interior Secretary Sally Jewell "on Jan. 15 announced Dr. Jean O'Brien from the University of Minnesota and Pamela Agoyo from the University of New Mexico as the secretary's appointees to the Cobell Education Scholarship Fund board of trustees." Jewell said, "It is with great pleasure that I announce the selection of these two outstanding educational leaders whose accomplishments have opened the doors of higher education to all American Indians and Alaska Natives. Their experience and expertise will be exceptionally valuable to the board of trustees as the scholarship fund helps students across Indian Country access the higher education they need to succeed in today's world. The fund will help strengthen Indian communities, advance tribal progress and secure a better future for Native Americans, honoring Eloise Cobell's vision and perseverance."

INTERIOR BUSINESS CENTER DIRECTOR WARD INTERVIEWED. The [Federal Times](#) (3/10, 120K) interviewed Joseph Ward Jr., director of the Interior Business Center (IBC). The article notes that "after three years on the job," Ward has "pared the center's lines of business from eight to three to keep it focused on its core strengths: financial management, human resources management and acquisition services." He also "established a philosophy called ACT, which stands for accurate, courteous and timely service." During the interview, Ward "discussed his priorities."

INTERIOR'S CIO MAZER ON 2014 FEDERAL 100 WINNERS LIST. The [Federal Computer Week](#) (3/10, 263K) picks Bernard Mazer, CIO at the Interior Department, to be on the 2014 Federal 100 Winners List. According to FCW, "Mazer developed Interior's pioneering 10-year, \$10 billion Foundation Cloud Hosting Services contract, which supports multiple Obama administration initiatives" Also, Mazer "led Interior's migration of more than 90,000 email users to a secure cloud-based collaboration platform in less than three months and brought nine bureaus under one IT roof by using his collaborative leadership style to bridge Interior's distributed environment."

ADDITIONAL COVERAGE OF REPORTS ON NATIONAL PARKS. Additional coverage of the reports on national parks was provided by the [Los Angeles Times](#) (3/10, Martin, 3.07M) and [Yahoo!](#) (3/11, Oskin, Writer, 17.91M).

FORMER INTERIOR SECRETARY BABBITT SUPPORTS IZEMBEK NATIONAL WILDLIFE REFUGE ROAD DECISION. In an op-ed for the [Los Angeles Times](#) (3/11, 3.07M), Bruce Babbitt, who was secretary of the Department of the Interior from 1993 to 2001, supports Interior Secretary Sally Jewell's decision not to allow a road through the Izembek National Wildlife Refuge. Babbitt says that it was "a bad idea" when he headed the Interior Department, and it is still one now. According to Babbitt, "despite pledges and promises to the contrary, the real purpose for building the road is the same as it ever was: moving fish and workers to and from King Cove's canneries." He also notes that under a 1998 agreement, "US taxpayers have already accommodated alternative solutions to King Cove's concerns about medical emergencies, with the clear understanding that the road would therefore not be built."

However, the [Alaska Business Monthly](#) (3/11) finds irony in the FWS' conclusion that "fall waterfowl hunting is spectacular" at the Izembek National Wildlife Refuge. According to the Monthly, "this goes down as yet another example of how Interior's logic on the King Cove road simply doesn't add up." That is: "We can't build an 11-mile, one-lane, gravel road because it might disturb some birds – but if you want to go out and shoot them, by all means, it's 'spectacular.'"

BUDGET CHANGE FOR WILDFIRES LAUDED.. In an editorial, the [Seattle Times](#) (3/11, 1M) lauds a proposal by the Obama Administration for "changes in federal budget procedures in the Interior and Agricultural departments that would treat...devastating wildfires the same as hurricanes, tornadoes and other natural disasters." It notes that "current budgetary regulations fuel a raid on the funds intended to make federal land more resistant to fire and climate change."

America's Great Outdoors:

National Park Service:

EDMUND PETTUS BRIDGE DESIGNATED NATIONAL LANDMARK. The Montgomery (AL) Advertiser (3/11, 109K) reports that NPS Director Jon Jarvis joined "mayors of three historic Alabama cities met Monday to help designate the Edmund Pettus Bridge — the scene of a violent assault by state troopers on peaceful marchers in 1965 — as a national landmark." In his remarks, Jarvis said "the peaceful protest that had been scattered by law enforcement officers became 'a watershed event in the civil rights movement.'" Jarvis said, "The violence of 'Bloody Sunday' did not stop the marchers from their ultimate destination. In fact, it sped the country toward one of the most important pieces of civil laws ever passed by the U.S. Congress."

INTERNAL E-MAILS REVEAL NPS KNEW WORLD WAR II VETERANS WOULD BE LOCKED OUT. For the National Review (3/11, 805K), Jillian Kay Melchior, a Thomas L. Rhodes Fellow for the Franklin Center, writes that the Interior Department "knew beforehand that two groups of aging veterans would be visiting the World War II Memorial as the partial government shutdown began on Oct. 1 but decided to barricade the site anyway, according to e-mails obtained by National Review Online." The records also show NPS "employees busily monitoring the news for any bad publicity and making shutdown exceptions for their co-workers."

SOME HOTELS UTILIZE FEDERAL HISTORIC PRESERVATION TAX INCENTIVE PROGRAM. The New York Times (3/11, Zipkin, Subscription Publication, 9.61M) reports that "as the hotel industry shakes off recession doldrums and new hotels are being built," some hotels are being "repurposed from existing buildings like offices, warehouses and hospitals." The article notes that "some chains turn to the Federal Historic Preservation Tax Incentive Program of the National Park Service, administered with the Internal Revenue Service." For example, "one developer who has used the program is Mehul Patel, chief executive of NewcrestImage, a developer in Irving, Tex." Patel "converted the Fisk Medical Arts Building in Amarillo, Tex., to a Marriott Courtyard in 2010."

LAWSUIT SEEKS TO BLOCK WELCOME CENTER AT VANDERBILT MANSION. The AP (3/10, Press, 4.28M) reports that "neighbors of The Breakers estate in Newport are suing to block a new welcome center that's planned for the site of the mansion." The neighborhood association filed the lawsuit Friday in Newport Superior Court against the Preservation Society of Newport County. In its lawsuit, the neighbors group claims that "the plan violates a number of provisions of the city zoning ordinance, including because it is in a residential neighborhood and a museum and because it would house what the group says is a restaurant."

NPS SEEKS PROPOSALS FOR GUIDED TOURS IN YELLOWSTONE. The AP (3/11, 2.88M) reports that the NPS is seeking "proposals from businesses that are interested in providing guided interpretive vehicle snow tours and maintaining a skiers' camp in Yellowstone National Park." According to the article, "one new 10-year contract will be awarded next winter season, replacing the current contract for snowcoach tours and skiers' camp that expires in April."

WOLVES TRANSFORM RIVERS IN YELLOWSTONE NATIONAL PARK. The Indian Country Today Media Network (3/10, 21K) reports that "wolves are changing not only the wildlife of Yellowstone National Park since being reintroduced after a 70-year absence, but also the geography—namely, the rivers." A video narrated by investigative journalist George Monbiot shows the "trophic cascade" effect that wolves have had Yellowstone's geography. The article also notes that "two studies by researchers at the Oregon State University in the past couple of years have documented the transformation of wildlife as a result of the resurgence of the wolf at Yellowstone."

VOYAGEURS NATIONAL PARK MOVES FORWARD WITH CAMPSITE RESERVATION, FEE SYSTEM. The St. Paul (MN) Pioneer Press (3/11, 540K) reports that "after years of deliberations and public outreach, officials at Voyageurs National Park will move ahead in April with the park's first campground fee and reservation system." According to the article, "the new system will set aside 51 campsites this summer for advance reservations, allowing people to guarantee a site before they make the trip to the park near International Falls."

CEREMONY TO UNVEIL ARIZONA MEMORIAL POSTAGE STAMP. The AP (3/11, 417K) reports that the USS Arizona Memorial will be commemorated in the form of a US postage stamp. According to the NPS, "the priority

mail express stamp will be unveiled on Thursday."

LINK UNCOVERED BETWEEN SCIENTOLOGY FOUNDER AND MOUNT RAINIER TRAILS. The AP (3/11, Plog, 417K) reports that "four years of research and the discovery of a wooden sign have uncovered a historical link between Tacoma, the first trails at Mount Rainier and L. Ron Hubbard, the founder of the Church of Scientology." Carl Fabiani, a former NPS employee who retired in 2010 after 45 years working at Mount Rainier, "found a wooden sign about seven years ago while doing trail maintenance work just off the Wonderland Trail loop near Longmire." According to the article, "the sign turned out to be a key in the narrative that Issaquah resident Chris Finn has pieced together in the past four years," which linked Hubbard as "one of the 13 Scouts responsible for those first trails."

Bureau of Land Management:

CASCADE-SISKIYOU NATIONAL MONUMENT ADDS 900 ACRES. The AP (3/11, 417K) reports that the Cascade-Siskiyou National Monument has expanded by more than 900 acres, following the transfer of property from The Land and Water Conservation Fund to the BLM. The AP notes that the transfer is "part of a continuing effort to buy parcels within the monument held by the Hancock Timber Resource Group." The article adds that "the timber group still owns another 2,900 acres within the monument."

Also reporting on the story is the Medford (OR) Mail Tribune (3/10, 67K).

BLM PALEONTOLOGIST REMAINS HOPEFUL THAT STOLEN UTAH DINOSAUR FOOTPRINT IS STILL INTACT. The Deseret (UT) News (3/11, 274K) reports that "a fossilized dinosaur footprint that was illegally pried out of the ground near Moab may still be intact, despite having been dumped in the Colorado River," according to a paleontologist with the BLM. BLM district paleontologist ReBecca Hunt-Foster said Monday, "Instead of being just a pure sandstone, it has a limestone layer in it, which is a little harder than the sandstone itself. Its chemical compound is just a little bit different, which makes it a little more resistant (to erosion)."

MAN PLEADS GUILTY TO DAMAGING CULTURAL SITE. The Inyo (CA) Register (3/11, 18K) reports that Howard Walters has plead "guilty to one charge of misdemeanor vandalism and was ordered to pay \$3,823 in restitution to the Bureau of Land Management after he damaged a cultural site in the Chalfant area." BLM Field Office Manager Steve Nelson said "law enforcement caught Walters digging in a known historic site and had illegally collected artifacts in his possession."

Fish and Wildlife Service:

WINNER OF DALLAS SAFARI CLUB RHINO PERMIT DECIDES TO GO AHEAD WITH HUNT. The Dallas Morning News (3/11, Writer, 1.13M) reports that the winner of an auction held by the Dallas Safari Club for a permit to kill an endangered African black rhino has decided to go ahead with the hunt. Meanwhile, the Humane Society International is still trying to convince the FWS to deny Corey Knowlton "the permit that will let him ship his 'trophy' back home."

LISTING OF SAGE GROUSE OPPOSED. In an op-ed for the Las Vegas Sun (3/10, 155K), Terry Murphy, the president of Strategic Solutions, claims that listing the sage grouse will have a greater impact than when the FWS listed the desert tortoise as an endangered species in 1989. Murphy notes that "although the desert tortoise inhabits only a small portion of Southern Nevada, sage grouse habitat spans a whopping 20 million acres across the state." Furthermore, Murphy warns that "the economic effects of a threatened listing for sage grouse are mind boggling."

Securing America's Energy Future:

Onshore Energy Development:

INTERIOR, TRIBES COLLABORATE ON OIL, GAS OPERATIONS. The Riverton (WY) Ranger (3/11, 167) reports that the Interior Department and the Arapaho and Shoshone signed a memorandum of understanding Feb.

25 in Fort Washakie. Through the agreement, "the parties said they will engage in a cooperative environmental program to promote compliance on oil and gas properties by lessees and operators on the Wind River Indian Reservation." BIA acting Rocky Mountain regional director Darryl LaCounte said, "This MOU is a good opportunity for all of us to start fresh, to be on the same page and to work toward the same goals." BLM Wyoming state director Don Simpson said, "We look forward to working collaboratively with the Arapaho and Shoshone tribes, as well as with the BIA, to manage oil and gas activities on the Wind River Indian Reservation."

FWS SEEKS PUBLIC INPUT ON PROPOSAL TO DRILL IN OURAY REFUGE. The [Salt Lake \(UT\) Tribune](#) (3/11, 343K) reports that the FWS is seeking "public comment on two oil and gas exploration drilling projects inside Utah's Ouray National Wildlife Refuge." The agency "on Monday released separate draft Environmental Assessments for a nine-well proposal by Ultra Resource Inc. and a two-well proposal by Thurston Energy Operating Co."

WSJOURNAL WARNS ENDANGERED SPECIES ACT COULD END OIL AND GAS BOOM ON PRAIRIES. The Wall Street Journal (3/11, Subscription Publication, 5.91M) editorializes on possible action by the Interior Department to declare the greater sage grouse and the lesser prairie chicken endangered species. The Journal fears that such a declaration could have a major impact on land use on the prairie, particularly oil and gas production. It's chief concern is that private land that has been the site of most of the booming oil and gas production on the plains could become subject to extensive regulation under the Endangered Species Act, possibly ending further oil and gas development in the Permian Basin of Texas and North Dakota's Bakken Shale. The Journal notes that leaders in states that would be affected by such a listing including Senate Majority Leader Harry Reid are proposing alternative strategies to improve the situation of the birds.

Offshore Energy Development:

BOEM OUTLINES GULF OF MEXICO LEASE SALE OFFER. The [Offshore Magazine](#) (3/11, 143K) reports that the Interior Department will "offer more than 40 million acres for oil and gas exploration and development in the Gulf of Mexico in March lease sales." Lease Sale 231 in the Central Planning Area and Lease Sale 225 in the Eastern Planning Area will be held consecutively in New Orleans, Louisiana, on March 19. The article notes that "in addition to opening bids for these two sales, BOEM will open any pending bids submitted in Western Planning Area Sale 233 for blocks located or partially located within three statute miles of the maritime and continental shelf boundary with Mexico (the Boundary Area)."

ALASKA ARCTIC POLICY COMMISSION CO-CHAIRS MEET WITH OFFICIALS IN DC. The [Alaska Business Monthly](#) (3/11) reports that the Co-Chairs of the Alaska Arctic Policy Commission (AAPC), Senator Lesil McGuire and Representative Bob Herron, "met with several high-level federal officials," including BOEM Director Tommy Beaudreau, "in Washington, DC to promote Alaska's vision of the Arctic." Herron said, "These meetings are critical to not only ensure Alaska's voice is heard as the United States crafts its Arctic Policy, but that our great state leads the nation in forming a strategy which will benefit Alaskans and Americans as opportunities in the Arctic present themselves. I want to thank the White House staff and senior federal agency participants who engaged in these conversations. I look forward to continued collaboration as the United States prepares for its role as Chair of the Arctic Council in 2015."

ATTORNEY URGES TAMPA MAYOR TO JOIN BP LAWSUIT. The Tampa (FL) Tribune (3/10, Wiatrowski, 520K) reports that attorney Steven Yerrid is urging Tampa Mayor Bob Buckhorn "to sign on to lawsuit by states, counties and municipalities trying to recover tax revenue lost in the wake of the 2010 BP oil spill in the Gulf of Mexico." Yerrid noted that "together, the variety of governments and quasi-governmental agencies have claims in the billions of dollars," but that without concerted effort may not see a courtroom anytime in the near future.

ADDITIONAL COVERAGE OF DECISION ON ATLANTIC SEISMIC TESTING. Additional coverage the BOEM's decision on seismic testing in the Atlantic was provided by the [New Jersey](#) (3/11, 694K), the [New Bern \(NC\) Sun Journal](#) (3/11, 47K), and the [Offshore Magazine](#) (3/11, 143K).

Tackling America's Water Challenges:

COLORADO RIVER DAM OPENING FOR "PULSE FLOW EVENT". The [AP](#) (3/10, Press, 4.28M) reports that

beginning March 23, the gates of Morelos Dam on the Colorado River will open its gates to unleash "a man-made flood." The "pulse flow event" is scheduled to last eight weeks and send more than 100,000 acre-feet of water to the river's delta. Conservationists in both the US and Mexico "applauded the opening of the dam gates, which is expected to send water all the way to the Gulf of California once again, at least temporarily."

Also reporting on the story is the [Las Vegas Review-Journal](#) (3/11, 437K).

Empowering Native American Communities:

JUDGE DISMISSES LAWSUIT AGAINST BIA OVER LNG LEASE. The [Bangor \(ME\) Daily News](#) (3/11, 166K) reports that "a federal judge has dismissed a Maine Indian group's lawsuit against the Bureau of Indian Affairs over the leasing of Passamaquoddy tribal land for a proposed liquefied natural gas terminal but harshly criticized the way the agency conducted the process." However, US District Court Judge John Woodcock called the BIA's "handling of the case 'unskillful' and said that in the future he expects the bureau 'to proceed in a manner consistent with its special expertise and solemn charge.'" According to the article, "the judge's decision, if it withstands appeal, would send questions over the approval of the lease to the Interior Board of Indian Appeals." Woodcock said that the panel should have reviewed the BIA's "decision before the lawsuit was filed, as is stipulated in the bureau's rules."

JUDGE DISMISSES RESTRAINING ORDER REQUEST IN CHUKCHANSI MONEY DISPUTE. The [Fresno \(CA\) Bee](#) (3/10, 327K) reports that "a US District Court judge in Fresno dismissed a restraining order request in the continuing battle for control of the Chukchansi tribe after one group accused a competing faction of taking \$316,017 that should have gone into a casino bank account overseen by both sides." Judge Anthony Ishii held Friday that his court "does not have jurisdiction" over "a restraining order filed by the Reggie Lewis faction, which said that money was illegally taken by the other faction led by Tex McDonald." Ishii also said "he does not view the Lewis group as rightful leaders of the tribe even though the federal Bureau of Indian Affairs last month recognized a 2010 council election that included Lewis and four allies to lead the tribe."

TREASURY ISSUES TAX GUIDANCE ON PER CAPITA TRIBAL PAYMENTS. The [Yuma \(AZ\) News Now](#) (3/11) reports that the US Department of the Treasury and Internal Revenue Service have "issued interim guidance regarding per capita distributions made to members of Indian tribes from funds held in trust by the Secretary of the Interior." According to the article, "in response to feedback from tribal nations, the guidance clarifies that, generally, these per capita payments will not be subject to federal income tax."

AFTER MORE THAN 100 YEARS, TRIBES, GOVERNMENT STILL DISPUTING PIECE OF OKLAHOMA LAND. Politico (3/10, Rogers, 464K) reports that the farm bill asserts that the USDA holds the rights to a chunk of contested formal tribal land in Oklahoma, reopening wounds that go back more than a century. The land is the last piece of "a nearly 15-square mile tract" that was carved out of reservation lands to create Fort Reno in 1883. Oklahomans "are arguing still over who rightfully owns the Native American lands, now within miles of the state capital." The piece looks at the politics surrounding the fate of the land, and notes that Rep. Frank Lucas (R) believes that the current agricultural research station is the best use of the property.

INTERIOR TO DECIDE ON NEW MEXICO GAMING. In an editorial, the [Albuquerque \(NM\) Journal](#) (3/11, 288K) acknowledges that New Mexico and the Pojoaque Pueblo both have valid arguments regarding gaming. It notes that "New Mexico's gaming tribes are sovereign nations with a responsibility to their people to become/remain economically viable." Also it recognizes that "in New Mexico gambling and booze have serious consequences." But since "the state and tribes have" not "been able to negotiate a compromise," all eyes will be directed "on Interior to see if it can balance the odds, and in whose favor."

Top National News:

KERRY DECLINES MEETING WITH PUTIN AS RUSSIA CONTINUES TO ADVANCE IN CRIMEA. Media coverage of the crisis in Ukraine continues to decline as the mystery surrounding the disappearance of a Malaysian airliner deepens. Many of today's reports note Secretary of State Kerry's decision to decline an invitation to meet with Russian President Vladimir Putin to discuss Ukraine and Crimea. Also widely reported is Russia's continued military advance in Crimea ahead of this weekend's referendum. Two out of three network

newscasts last night reported on the crisis, and only the CBS Evening News (3/10, story 4, 2:30, Pelley, 5.58M) mentioned Kerry's decision not to visit Russia. Calling it "another major story developing," Kerry turned down the invite "apparently" because he "wants Putin to respond to some unspecified questions first."

The New York Times (3/11, Gordon, Myers, Subscription Publication, 9.61M) says the Administration's "effort to solicit Russia's help to defuse the crisis in Ukraine appeared to hit a roadblock" when Kerry turned down the invite and the two sides "issued dueling accounts of their recent diplomacy." In what the Times calls "an effort to portray the United States as the intransigent party," the Kremlin "took the unusual step of televising a brief exchange" between Putin and Russian Foreign Minister Sergey Lavrov, "in which they complained that Mr. Kerry had spurned an invitation to come to Russia for consultations." The State Department responded by "rushing out a statement saying that it was the Russians who were not prepared to engage in discussions on the United States' proposals." Spokesman Jen Psaki stated, "We are still awaiting a Russian response to the concrete questions that Secretary Kerry sent Foreign Minister Lavrov on Saturday in this regard."

Reuters (3/11, Mohammed, Holland) reports the State Department said it was still possible the two sides could meet this week, but said it "needs to see concrete evidence that Russia is prepared to engage on the diplomatic proposals we have made to facilitate direct dialogue between Ukraine and Russia and to use international mechanisms like a contact group to deescalate the conflict," Psaki said.

According to the Washington Post (3/11, DeYoung, 4.28M), Administration officials said the US is also insisting that Russia "stop their military advance in Crimea" before such a meeting will take place.

McClatchy (3/11, Allam, Subscription Publication, 95K) reports a "State Department official" said there is "no way would Kerry travel all the way to Russia just to 'have them say, 'No, no, no,' to everything.'" The official added, "We're not just going to go there and be rolled."

In a report titled "Putin Dismisses US Proposal On Ukraine," the Wall Street Journal (3/11, Solomon, Alpert, Subscription Publication, 5.91M) says Putin has rejected a US proposal to ease tensions in Ukraine, which led Kerry to delay plans to visit Russia. Nevertheless, US and Russian officials stressed Monday that talks are ongoing, and the State Department didn't rule out a visit by Kerry later this week.

But the AP (3/11, Danilova, Heintz) reports the Kremlin said Monday that it is "drafting counterproposals" to the US plan, "denouncing" the new Ukrainian government as "an unacceptable 'fait accompli'" and claiming that parts of eastern Ukraine "have been plunged into lawlessness." In a televised briefing with Putin, Lavrov said proposals made by Kerry are "not suitable" and Russia "decided to prepare new proposals of its own, though he did not say what they were."

Despite warnings from the US and EU, the Washington Post (3/11, Morello, Constable, 4.28M) reports Russia "seized control of more Ukrainian military bases and facilities in Crimea on Monday," signaling its "intention to play a significant role in the country's future." According to the Post, "at least four Ukrainian military bases, including one stocked with missiles, were overrun by armed men in uniforms who say they are members of local self-defense units, which are typically under the command of Russian military officers." In addition, the headquarters of the Ukrainian navy "had its electricity cut."

The New York Times (3/11, Chivers, Sneider, Subscription Publication, 9.61M) reports from Chomomorskoye that "Russian forces raided a Ukrainian naval missile base" in the city early Monday, according to the Ukrainian Ministry of Defense. The Times says the base's "seizure was one of a series of swift but thus far bloodless escalations as Russia tightened its grip on Crimea." It also notes that Russian forces yesterday "infiltrated" an air base in Novofedorivka, "took over a military hospital" in Simferopol, and "moved onto a Ukrainian base used by a motorized battalion" in Bakhchysaray.

Bloomberg News (3/11, Choursina, 1.91M) and Reuters (3/11, Osborn) also report on the Russian advances.

Celestine Bohlen, in a piece for the New York Times (3/11, Subscription Publication, 9.61M), says the "scale of Russia's propaganda effort" regarding the status of Ukraine and Crimea "has been breathtaking, even by Soviet standards," and "seems strangely anachronistic in a time when access to the Internet was supposed to undercut the influence of state-controlled media," but nevertheless "seems to be working." According to Bohlen, a poll from

last week "taken...by the state-sponsored VCIOM agency showed that 71 percent believe that it is necessary to protect Russian-language speakers in Crimea more vigorously."

The AP (3/11, Danilova, Heintz) reports Ukrainian Foreign Minister Andrii Deshchytsya said Monday that his country "was practically in a state of war with Russia," and "is counting on help from the West." The Los Angeles Times (3/11, Chu, Loiko, 3.07M) reports Ukrainian officials are "prepared to campaign in the United States this week for more international support" when Ukrainian Prime Minister Arseny Yatsenyuk visits the White House on Wednesday. He will also address the UN Security Council on Thursday.

On CNN's The Situation Room (3/10, 554K), Wolf Blitzer reported that "the pro-Russian Crimean parliament has appointed its prime minister commander-in-chief...clearing the way for him to form an army for the autonomous Republic of Crimea." On Fox News' Special Report (3/10, 2.15M), correspondent Amy Kellogg reported from Kiev that "most of the occupying soldiers in Crimea are believed to be Russian, despite Kremlin denials." According to Kellogg, "Russia says they are protecting Crimeans against a 'fascist invasion.'"

In an interview with USA Today (3/11, Dorell, 5.82M), Ukrainian lawmakers Pavlo Pizanenko warned Ukraine "may have to arm itself with nuclear weapons" if Russia doesn't withdraw its troops. "We gave up nuclear weapons," and "now there's a strong sentiment in Ukraine that we made a big mistake," he said.

Amid the Russian military movements, Reuters (3/11, Osborn, Zinets) reports the US began a previously planned military exercise in the Black Sea with Romanian and Bulgarian warships. And NBC Nightly News (3/10, story 4, 0:40, Williams, 7.86M) reported briefly that on Monday, "NATO announced it will start reconnaissance flights" to monitor "the Ukraine border." Although Ukraine "is not a NATO member...Russia's actions have alarmed countries that are part of the alliance and were once part of the Soviet Union."

According to the AP (3/11), the NATO aircraft will fly over Poland and Romania, and will not enter into either Ukrainian or Russian airspace. The alliance said the decision "was taken by the ambassadors of NATO's 28 member states Monday to intensify the assessment of the possible threat the crisis poses to the alliance."

Reuters (3/11, Croft) quotes a NATO spokesman as saying, "These flights will enhance the alliance's situational awareness and all will take place solely over alliance territory."

In his opening monologue for Fox News' Special Report (3/10, 2.15M), Bill O'Reilly said that, "to be fair, President Obama should be given some time to formulate an effective plan against Putin" because "it's not easy, and...our allies are cowardly." O'Reilly argued that "the way to hurt Russia is to diminish its currency, the ruble...by imposing banking sanctions" and "ordering US financial institutions not to accept the Russian currency." Responding to O'Reilly's remarks, Karl Rove said President Obama deserves "credit" for having "taken three concrete steps," which are providing "economic aid to the Ukrainian government," sending "US Navy vessels into the Black Sea" and "allow[ing] air defense exercises with the Baltic nations to go forward." According to Rove, "All three of these send a signal that the United States is active when the strategy that show control concrete prices."

The Washington Times (3/11, Klimas, 417K) reports that on MSNBC Monday, Rep. Gregory Meeks (D-NY) "lashed out at former Vice President Dick Cheney, who said Sunday...that...Putin sees President Obama as weak," saying, "Dick Cheney should just keep his mouth shut and stay at home" because "diplomacy is the only option here."

On Fox News' Special Report (3/10, 2.15M), Washington Post columnist Charles Krauthammer said former Defense Secretary Gates was correct when, on Sunday, he said the US has "no way of getting Putin out of Crimea." Krauthammer added, "I think it's likely that within a week or two, it will be a part of Russia." However, Krauthammer added, "If [Putin] is thinking about going west to Odessa or north to Kharkiv – Russian-speaking areas – we have to make it plain that he's got to stop where he is."

Regarding the US response to the annexation of Crimea, National Journal's Ron Fournier, appearing on Fox News' Special Report (3/10, 2.15M), said, "This is an Administration that likes to see the world as they want it to be rather than as it is." Fournier said President Obama "likes to think...I'm right about this, and if I lecture Putin enough, Putin will understand.' Well, that's not how people like Putin work."

Politico (3/11, Glueck, 464K) reports that in a speech on Monday in Delaware, former President Clinton "jabbed Russian President Vladimir Putin," saying, "Some people, including the Russian president...think of Ukraine as a giant, important piece on the international chessboard," while "the people underneath get lost."

US Seeks To Build Support For Isolating Russia; EU Moves Towards Sanctions. The AP (3/11, Lee, Pace) reports the Administration is "stepping up its attempts to court China's support for isolating Russia" over its military intervention in Ukraine. While "official comments from China appearing studiously neutral" since the crisis began, President Obama spoke to Chinese President Xi Jinping on Sunday "in a bid to get Beijing off the fence." But it "remained unclear" whether China would side with the US or with Moscow.

Reuters (3/11, Holland) and the Washington Times (3/11, Wolfgang, 417K) also report on the call, while the Daily Caller (3/11, Munro, 422K) says Obama's "outreach" to Xi "yielded nothing useful," citing Chinese state media accounts of the call. But the Daily Caller said the "White House's description of the conversation, however, painted a rosy picture," saying the two leaders "affirmed their shared interest in reducing tensions and identifying a peaceful resolution to the dispute."

According to another AP (3/11) report, the President also spoke Monday with Spanish Prime Minister Mariano Rajoy and Kazakh President Nursultan Nazarbayev "seeking to show a united front with world leaders on Ukraine."

Meanwhile, in Brussels on Monday, Reuters (3/11, Baker) reports, the EU moved closer to imposing travel bans, freezing assets and enacting other restrictions on Russia. While a final decision is not expected until a meeting Monday of the EU foreign ministers, an EU official said the moves are likely to be approved.

The New York Times (3/11, Barry, Subscription Publication, 9.61M) reports that with the threat of sanctions looming, some Russian business leaders are "now contemplating the damage that the crisis could inflict on Russia's economy." According to the Times, the "prospect of losing access to Western finance is a frightening thought for Russian business leaders," and some have "wondered whether Mr. Putin had been warned clearly about the magnitude of the possible damage to the economy."

SENATE DEMOCRATS TO HOLD ALL-NIGHT "TALKATHON" TO DRAW ATTENTION TO CLIMATE CHANGE. The AP (3/11, Daly) reports that a group of "at least 28" Democratic senators are planning to keep the Senate "in session all night to talk about global warming." However, "several Democrats who face tough re-election fights in the fall will not be there," including Louisiana Sen. Mary Landrieu and Arkansas Sen. Mark Pryor. Despite the move, the AP notes that Senate Democrats have "no plans" to bring climate change legislation to the floor.

The New York Times (3/11, Davenport, Subscription Publication, 9.61M) reports that the "talkathon" was scheduled to go from 6:30 pm on Monday to 9:00 am on Tuesday. The move is the "latest effort" by the group to "elevate the issue of global warming," though they "know that serious climate change legislation stands no chance of passage" in the current Congress, "where many lawmakers in the Republican-majority House deny the science of human-caused global warming."

The Los Angeles Times (3/10, Clozel, 3.07M) says that you "could look at it as a filibuster without the bill." While "some call it a political stunt," the Climate Action Task Force, which organized the event, "insist" it will "raise public awareness about global warming and how to stem it."

Politico (3/11, Goode, 464K) reports that the talkathon "is meant to show that the chamber's Democrats have reached a consensus on the urgent need to address climate change." However, it "also highlights the long odds against achieving legislation on the issue anytime soon."

Reuters (3/11, Ferraro, Volcovici) reports that 32 members of the Democratic caucus have signed up to participate. Sen. Sheldon Whitehouse, a leading member of the task force, said, "It's time for Congress to wake up and get serious about addressing this issue." He added that the event was the "opening salvo" of an effort to force action on climate change.

The Washington Times (3/11, Klimas, 417K) reports Sen. Bernie Sanders (I) said on MSNBC, "I think what we're trying to do now in terms of tonight is to make the American people aware that the debate about climate change really is over, that the scientific community is virtually unanimous in agreeing that climate change is real, that it is caused by human activities." Meanwhile, Brendan Buck, House Speaker John Boehner's press secretary, tweeted on Monday, "Can't wait to sleep tonight while Democratic senators are talking to themselves."

Roll Call (3/11, Shiner, Subscription Publication, 87K) reports that in addition to Landrieu and Pryor, other "vulnerable" senators up this year that will not speak include Mark Begich of Alaska, Kay Hagan of North Carolina, and John Walsh of Montana. Roll Calls says that "several moderate Democrats" said on Monday "suggested they were not invited to contribute to the event, while GOP campaigns hit Senate Democrats generally for staging such a stand on the floor."

The Huffington Post (3/11, Sheppard, 11.54M) says that the push is "notable," as it was the "Democratic-led Senate that killed climate legislation in 2010, after the House had passed a major cap-and-trade bill the previous year." At the time, Senate Majority Leader Harry Reid said the measure "didn't have enough votes to move forward," but he has "been taking a more aggressive stance on climate recently."

White House Backs Event. The Hill (3/11, Sink, 194K) reports in its "E2 Wire" blog that White House spokesman Jay Carney said on Monday that the Administration "absolutely" backs the "talkathon." He added, "We commend those who are participating because it's a very important subject that the president, as you know, is concerned about and has a climate action plan dedicated to addressing."

Milbank Mocks Democrats. In his column for the Washington Post (3/11, 4.28M), Dana Milbank writes that "this may be the first time in the history of the Senate that somebody has filibustered himself." While Milbank says that "seeking action on global warming is a worthy endeavor," the talkathon is "a peculiar way to go about it." Milbank says that if Reid really wants action on the issue, "all he has to do is bring a climate-change bill to the floor." The problem, however, is that "such legislation doesn't have majority support in the Senate."

Keystone Opponents Praise Kerry In Hopes Of Swaying His Decision. Bloomberg News (3/10, Snyder, 1.91M) reports that environmentalists are "praising" Secretary of State John Kerry, hoping that it will persuade him to block the Keystone XL pipeline. Former Obama press secretary Bill Burton, who is aide to a coalition opposed to the project, called Kerry "one of the great climate leaders of his generation," while Dan Weiss, climate strategy director for the Center for American Progress, "put Kerry on par with environmental icons like the naturalist John Muir and anti-pollution writer Rachel Carson." Bloomberg said that the "accolades are piling up" as Kerry "takes a more direct role in Keystone's review."

Heating Prices Expected To Rise As Federal Regulations Force Coal Plant Shuttering. The New York Times (3/11, Wald, Subscription Publication, 9.61M) reports that with the end of the "harshest winter in recent memory" approaching, Americans are receiving their growing natural gas and electricity heating bills. The Times says that "there might not be relief in future winters, as the coal-fired power plants that utilities have relied on to meet the surge in demand are shuttered for environmental reasons." While the "sticker shock" has been particularly severe in the Northeast, with its limited natural gas supplies, it has "spread to other regions of the country, including the Midwest, where utilities have had to draw on more expensive reserves to meet the demand." With coal plants shutting down due to Federal regulations, there could be even "bigger price increases" next year.

USCOC, RELIGIOUS GROUPS PRESSURE HOUSE TO PASS IMMIGRATION REFORM. Politico (3/11, Kim, 464K) reports that conservative groups are "intensifying pressure" on the House GOP to pass immigration reform this year. In "recent weeks," the US Chamber of Commerce, joined by a "broad coalition of Christian leaders," have "flooded Capitol Hill with letters stressing the urgency of immigration reform." While that is the sort of "grassroots lobbying" that would under normal circumstances "delight" immigration activists, but "with an overhaul seeming less likely with each passing day, liberal immigration groups say their allies on the right aren't going far enough." Now, the tension is "deepening" in the "diverse coalition," "threatening to upend the unusual alliance of advocates on the left and right that at one time seemed to ensure that some type of overhaul was inevitable."

Rubio Backs Path To Citizenship. Politico (3/11, Everett, 464K) reports that Sen. Marco Rubio (R), a potential 2016 candidate, speaking at Google's DC headquarters about the economy, was asked by CNSNews about creating a path to citizenship for illegal immigrants. Rubio said, "That's just a fundamental decision the country

will have to make." From his own perspective, Rubio said, "I don't think it's good for the country to have people that are forever permanently barred, who are legally here at this point but are permanently barred as citizens." Rubio "also emphasized that allowing future legal immigrants into the country based on merit rather than family unification will help" spur the economy.

NYTimes Critical Of Suffolk County's Treatment Of Immigrants. In an editorial, the New York Times (3/11, Subscription Publication, 9.61M) says that a Suffolk County, New York, police officer has been charged with robbing Latino men on Long Island after pulling them over. The Times says that the "accusation is another blot on a county with an ugly record of anti-immigrant hatred and violence." While "immigrant workers in the suburbs, especially the undocumented, are accustomed to low wages and scarce jobs," when "the armed man who steals from them is a police officer — this is a deeper and more disturbing form of rot."

Editorial Wrap-Up:

NEW YORK TIMES. "The Democrats Stand Up To The Kochs." In an editorial, the New York Times (3/10, Subscription Publication, 9.61M) praises the Democratic offensive against the Koch brothers, saying they have "for too long been passive in the face of vast amounts of corporate money." Democrats have decided "they should at least try to counter the tycoons with some low-cost speech of their own. Democrats may never have the same resources at their disposal — no party should — but they can use their political pulpits to stand up for a few basic principles."

"Harassment Of Troubled State Exchanges." The New York Times (3/11, Subscription Publication, 9.61M), in an editorial, takes issue with Republicans for "their criticisms" regarding the "several states that are experiencing problems enrolling people on their state-run exchanges." The Times says the Republicans' "attacks would be more credible if they showed the slightest desire to help fix the problems" instead of trying "to scare people away from the state websites and to discredit the health care reform law itself."

"Waiting For The Black Box." An editorial in the New York Times (3/11, Subscription Publication, 9.61M) says that questions surrounding the disappearance of the Malaysia Airlines flight "could remain a mystery until the recovery of the plane's 'black box,'" which raises the question of why black-box data is not "transmitted in real time." The Times notes that the technology to transmit live data via satellite exists but companies have not adopted it due to "the rarity of in-flight disasters, as well as the expense associated with equipment upgrades and more satellite connections."

"Immigrants, Robbed By The Police." In an editorial, the New York Times (3/11, Subscription Publication, 9.61M) says that a Suffolk County, New York, police officer has been charged with robbing Latino men on Long Island after pulling them over. The Times says that the "accusation is another blot on a county with an ugly record of anti-immigrant hatred and violence." While "immigrant workers in the suburbs, especially the undocumented, are accustomed to low wages and scarce jobs," when "the armed man who steals from them is a police officer — this is a deeper and more disturbing form of rot."

WASHINGTON POST. "New Pressure On Mayor Gray." The Washington Post (3/11, 4.28M) editorializes that despite Washington, DC Mayor Vincent Gray's reaction that the latest allegations are "lies," the "weight of evidence suggests that the person not telling the truth is Mr. Gray, who has consistently refused to answer questions, from prosecutors or reporters, about the scheme that helped subvert the 2010 election in which he defeated then-Mayor Adrian M. Fenty (D)." Federal prosecutors "have spent three years in a painstaking probe of the campaign" and have "obtained guilty pleas from eight people, including three longtime friends of Mr. Gray." The Post argues that "there can be no dispute that Mr. Gray's election was tainted" and notes that DC voters "will have to weigh the evidence that has emerged, and that continues to emerge, and decide who is lying and who isn't — and who deserves to be mayor, and who doesn't."

"Syria's Forgotten War." The Washington Post (3/11, 4.28M), in an editorial, says that the Ukraine crisis has benefited Syria's Bashar al-Assad and "diverted attention from the bankruptcy" of the Administration's Syria policy. As evidence the Post points to Syria's "merciless offensive" on Yabroud, as well as its siege of Yarmouk, and its "missing deadlines on the promised destruction of his chemical weapons arsenal." The Post concludes by saying that the situation in Crimea "does not lessen the critical threat to U.S. interests in Syria or excuse the

president's continuing passivity."

"New York's Charter Clash." The Washington Post, (3/11, 4.28M) in an editorial, criticizes New York City Mayor Bill de Blasio for his opposition to charter schools, specifically his decision to expel Success Academy Harlem 4 from "its building, leaving hundreds of parents wondering where their children will attend classes next fall." While the Post agrees with de Blasio in saying that Charter schools "aren't the silver bullet to fixing public education," it says that they can "play an important role, and it's illogical to deny them the support merited by their importance to poor and traditionally neglected students."

WALL STREET JOURNAL. "Sage Grouse Rebellion." The Wall Street Journal (3/11, Subscription Publication, 5.91M) editorializes on possible action by the Interior Department to declare the greater sage grouse and the lesser prairie chicken endangered species. The Journal fears that such a declaration could have a major impact on land use on the prairie, particularly oil and gas production. It's chief concern is that private land that has been the site of most of the booming oil and gas production on the plains could become subject to extensive regulation under the Endangered Species Act, possibly ending further oil and gas development in the Permian Basin of Texas and North Dakota's Bakken Shale. The Journal notes that leaders in states that would be affected by such a listing including Senate Majority Leader Harry Reid are proposing alternative strategies to improve the situation of the birds.

"The Medicare Drug Benefit Revolt." The Wall Street Journal (3/11, Subscription Publication, 5.91M), in an editorial, makes the case that Medicare Part D, which was Championed by the Bush Administration, has a more sustainable funding model than the Affordable Care Act, and notes that it has cost approximately 45% less than was initially anticipated in 2003.

"The Paranoid Style In Turkish Politics." The Wall Street Journal (3/11, Subscription Publication, 5.91M), in an editorial on Turkey and Prime Minister Recep Tayyip Erdogan's efforts to restrict access to the Internet in order to combat his opponents' use of social media such as YouTube and Facebook, says that these efforts are moving Turkey closer to authoritarianism, and making it more like Iran than like its fellow NATO members. The Journal urges President Obama to urge Erdogan not to follow this path to becoming more like Iran.

"Khodorkovsky In Kiev." The Wall Street Journal (3/11, Subscription Publication, 5.91M), in an editorial, welcomes the visit to Kiev from billionaire Russian oligarch Mikhail Khodorkovsky, who has emerged as among the Putin government's fiercest critics since being released in December from a Russian jail after serving a ten-year sentence for tax fraud. The Journal says Khodorkovsky told a crowd in Kiev that "Russian propaganda has been telling lies, as always," and insisted that "there aren't any fascists or Nazis here." The Journal also notes that Khodorkovsky asserted that "Russia and Ukraine have a common, shared European path of development."

NPC – HONOR VIOLENCE — 2 p.m. In an effort to draw attention to the prevalence of honor violence — including forced marriage, disfigurement and female genital mutilation (FGM) — and to promote passage of the International Violence Against Women Act now pending in the U.S. House of Representatives, Muslim women and human rights activists will address the issue at a National Press Club Newsmakers news conference. Speaking will be author Raheel Raza, president of the Council for Muslims Facing Tomorrow and founder of Canada’ Forum 4 Learning, and Manda Zand Ervin, an Iranian political refugee who is dedicated to publicizing the plight of Iranian women under the Islamic Sharia laws. They will be joined by Rep. Jan Schakowsky (D-IL), sponsor of the bipartisan International Violence Against Women Act, (IVAWA), and Kiersten Stewart of Futures Without Violence. Location: National Press Club, 529 14th Street NW.

HERITAGE – ASIA — 2 p.m. – 3:30 p.m. “ASIA 2014: The View from Capitol Hill.” Featuring Jamie Fly, Counselor for Foreign and National Security Affairs, Senator Marco Rubio; Nilmini Gunaratne Rubin, Senior Professional Staff Member, House Committee on Foreign Affairs; Brett Doyle, Legislative Assistant, Senator Pat Toomey. Location: Heritage Foundation, 214 Massachusetts Ave. NE

PAYCHECK TO PAYCHECK SCREENING — 7 p.m. – 9 p.m. HBO, The Shriver Report, and CAP to Host Exclusive Premiere Screening of ‘Paycheck to Paycheck. Speakers: Rep. Rosa DeLauro (D-CT). Opening remarks: Karen Skelton, CEO and editor-in-chief, The Shriver Report; Nancy Abraham, senior vice president of documentary programming, HBO. Panelists: Katrina Gilbert, subject of the film; Phil Acord, executive director, Childrens Home/Chambliss Shelter; Kristin Rowe-Finkbeiner, executive director, Moms Rising. Moderator: Neera Tanden, president, Center for American Progress. Location: Landmarks E Street Cinema, E Street between 10th

and 11th Streets, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "That's right, [Russian President Vladimir] Putin is really freaking everybody out right now. In fact, there's kind of a standoff with Russia over the situation in Ukraine. And on Saturday, President Obama called the leaders of Britain, France and Italy to talk about the crisis. Which also marked the first time ever that world leaders actually knew Obama was listening to them on the phone."

Jimmy Fallon: "Actually, Ukraine's interim Prime Minister Arseniy Yatsenyuk will travel to the US this week to talk about what's going on in his country. And also to, you know, buy a house and move here with his family."

Jimmy Fallon: "During her speech at the Conservative Political Action Conference, Sarah Palin reworked Dr. Seuss' 'Green Eggs and Ham' to make it a parody of Obamacare. Now, of course, this upset President Obama. But the one person it really upset – Sam I Am. He was so annoyed that she quoted Dr. Seuss that he issued a rebuttal of his own. Yep, he said, 'I do not like the speech you spoke. The speech you spoke was quite a joke. I found your words were lacking taste, you first hit copy then hit paste. I would not like this on a beach, so next time write your own [expletive] speech.'"

David Letterman: "US is talking about imposing sanctions on Russia. Vladimir Putin, here's what he had to say about the sanctions. He said if the United States imposes sanctions on Russia, they will hit back like a boomerang. New Jersey Governor Chris Christie said, 'Meringue, did I hear someone say meringue?'"

David Letterman: "Another evil dictator, Kim Jong-un – they held an election in North Korea, Kim Jong-un was reelected and it was a squeaker. He received 100 percent of the vote. And they say when the absentee ballots are counted, that percentage could even go higher. No one has ever won North Korea without winning Ohio. And he humiliated his opponent, Mitt Jong Romney."

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SECRETARY JEWELL VISITS NEWLY DESIGNATED NATIONAL MONUMENT. The [Federal News Radio](#) (3/12, 11K) reports that Interior Secretary Sally Jewell was scheduled to visit the Point Arena-Stornetta, a day after President Obama designated the "1,600 acres along the Mendocino County coast as a national monument."

The [Santa Rosa \(CA\) Press Democrat](#) (3/12, 156K) reports that "about 300 people gathered atop an ocean bluff in Point Arena on Wednesday to celebrate the country's newest national monument and applaud the community whose advocacy helped persuade President Barack Obama to ensure the coastal expanse was protected

forever." Interior Secretary Sally Jewell "attended the celebration with a host of local advocates, land conservation representatives and federal officials." Jewell, "wiping tears from her eyes, sang and clapped along with the audience during the students' rendition of 'This Land is Your Land.'" Asked about it later, Jewell said, "Kids. Beautiful landscape. Our future. Powerful stuff."

The Lake County (CA) News (3/13, 530) reports that Jewell said, "The rugged coastline of Point Arena-Stometta is simply breathtaking and a deserving addition to the California Coastal National Monument. President Obama is supporting the community's vision to conserve this landscape and, in doing so, strengthening the local economy through increased tourism and outdoor recreation."

Also reporting on the designation are the New York Times (3/11, Siddons, Subscription Publication, 9.61M), the Mendocino (CA) Beacon (3/13), the Fort Bragg (CA) Advocate-News (3/13, 16K), the Willits (CA) News (3/13, 10K), and the Environment News Service (3/12, 1K).

Amateur Photographer Credited With Sparking California Coastline Protection Drive. The CBS Evening News (3/12, story 11, 2:40, Pelley, 5.58M) ran a feature on Bob Wick, who gets "much of the credit" for President Obama's declaration this week of the California Coastal National Monument. CBS' Bill Whitaker said the Bureau of Land Management wilderness specialist "moonlights as an amateur photographer," and his "powerful images propelled the 2 1/2-year grassroots campaign to protect this rugged stretch of Mendocino County coastline."

SECRETARY JEWELL TOURS WATER PLANT, MEETS WITH FARMERS TO DISCUSS DROUGHT. The San Jose (CA) Mercury News (3/13, 731K) reports that Interior Secretary Sally Jewell "toured a federal water storage and pumping plant in Byron...to get a firsthand look at a key piece of California's water infrastructure as the state grapples with a historic drought." Jewell was joined by California Secretary for Natural Resources John Laird and UBOR Acting Commissioner Lowell Pimley during the afternoon tour of the C.W. "Bill" Jones Pumping Plant. Jewell "reiterated the administration's commitment to work with the state to provide relief and fiscal support as the drought continues." The story was also picked up by the Contra Costa (CA) Times (3/13, 302K) and the Inside Bay Area (CA) (3/13, 47K).

The Central Valley (CA) Business Times (3/13, 206) reports that Jewell "met behind closed doors with water contractors – the organizations that buy water from the federal irrigation project – but not with representatives of the Sacramento-San Joaquin Delta, she met with reporters in an outdoor press conference in front of the incoming Mendota Canal." According to the article, "the closest protesters from the Delta environmental group Restore the Delta got were at the front gate showing their Save the Delta and other twin tunnel protest signs as the Jewell cavalcade of cars entered the pumping station."

The Bay Area (CA) Indymedia (3/12, 2K) reports that Jewell "affirmed" the Obama Administration's "support for the Bay Delta Conservation Plan to build the peripheral tunnels – and failed to meet with Delta advocates protesting the tunnel plan." Jewell said, "The Administration is committed to long-term water supply improvements and environmental restoration in California. We are working closely with the state to complete the Bay Delta Conservation Plan and take other important actions that will achieve the dual goals of a reliable water supply for California and a healthy Bay Delta ecosystem that supports the state's economy."

Also reporting on the story is the Antioch (CA) Herald (3/13, 81K).

LOUISIANA REPUBLICANS PRESSURE SEN. LANDRIEU TO OPPOSE NOMINATION OF RHEA SUH.

Politico (3/13, Guillén, 464K) reports that Sen. David Vitter and Rep. Bill Cassidy are "pressuring" Energy and Natural Resources Chairwoman Mary Landrieu against advancing the nomination of Rhea Suh to be assistant Interior secretary for fish, wildlife and parks. The two have "been working to paint a potential Landrieu vote for Suh as a vote against Louisiana." According to the article, "in a letter Tuesday to the state's Republican lawmakers, Vitter says that the best chance to stop Suh's nomination is at the committee level, since Democrats changed the rules last year for nomination votes on the floor."

LAS CRUCES BUSINESSES USE PROPOSED MONUMENT NAME IN MARKETING EFFORTS. KDBC-TV El Paso, TX (3/13, 139) reports that "Las Cruces vendors and merchants have begun using the branding opportunities of the proposed Organ Mountains-Desert Peaks National Monument." For instance, Beck's Coffee, El Luchador, Milagro Coffee and Happy Dog are "using the monument name to market special coffee roasts and

food." Lucas Hemdon, executive director of Friends of the Organ Mountains-Desert Peaks, said, "We're really hoping we see something positive coming out very soon." However, the National Association of Conservation Districts has sent a letter to President Obama and Interior Secretary Sally Jewell "stating the monument would threaten the ability to implement and maintain conservation initiatives to improve watershed function – which could ultimately jeopardize public health and the natural resource base."

INTERIOR, EPA CRITICIZE KEY PART OF PROPOSED ILLIANA EXPRESSWAY. The Crain's Chicago Business (3/12, 158K) reports that the Interior Department and the EPA "want changes in a key portion of the proposed Illiana Expressway, a stance likely not enough to kill the already controversial road but one that could complicate its finances and spark a legal fight." In separate comments filed this week, the two Federal agencies "objected to a proposed Illiana interchange with State Route 53 in Will County." Both agencies said the Midewin National Tallgrass Prairie would be "jeopardized" by the big road, and "both recommended the state instead 'choose Design Option 6,' which calls for no intersection with State Route 53 at all."

FEDERAL OFFICIALS APPROVE WETLANDS PERMIT FOR ROAD CONNECTING ALPINE OIL FIELD TO NUIQSUT. The Alaska Dispatch (3/12, 7K) reports that Federal officials have approved "a wetlands permit for the 6-mile gravel ribbon that will connect the village of Nuiqsut with ConocoPhillips' Alpine oil field near the eastern edge of the National Petroleum Reserve-Alaska." Isaac Nukapigak, president of the Kuukpik Corp., said that "the Alaska Native village corporation for the Inupiaq village will build the gravel road – at a cost of \$10 million to \$13 million – to improve hunting for caribou and reaching fishing sites in the summer, and to access jobs in the oil patch, said Nukapigak." Sen. Mark Begich "issued a press release that noted that he'd pushed for the road, including meeting with EPA administrator Gina McCarthy and Interior Secretary Sally Jewell."

CACI WINS \$95 MILLION INTERIOR CONTRACT. The Washington Technology (3/12, Hoover, 118K) reports that CACI International has "won a \$95 million contract to continue providing operations and maintenance services to the Interior Department's Business Integration Office." Under the terms of the agreement, CACI will "provide O&M support for the SAP-based Financial and Business Management System run by DOI's Business Integration Office, which incorporates the majority of DOI's financial management functions into one system."

SEN. MURKOWSKI CRITICIZED FOR SUPPORT OF KING COVE ROAD. For "The Blog" of the Huffington Post (3/13, Starr, 11.54M), Mark Starr, Program Director, Vet Voice Foundation, criticizes Sen. Lisa Murkowski for pushing for the King Cove road. Starr notes that Interior Secretary Sally Jewell has "agreed with prior common-sense assessments by Congress and the Department of the Interior: a new road would simply be too damaging to Izembek's habitat and our conservation heritage." He suggests that Murkowski's "energy would be better spent advocating for investments that benefit all Americans, such as an enhanced military investment and force structure in Alaska, or the conservation of our natural resources."

FEDERAL LAND DESIGNATIONS CRITICIZED. In an op-ed for the Great Falls (MT) Tribune (3/12, 90K), Ron Poertner, secretary of the Missouri River Stewards, warns against "the preservation mania we see in Washington, especially because every designation represents new financial obligations in perpetuity for taxpayers." He argues that "it makes little sense to add to America's \$17 trillion dollar debt and to further encumber our federal land-managing agencies with more obligations while they struggle with multibillion-dollar maintenance backlogs."

America's Great Outdoors:

National Park Service:

JACKSONVILLE MAYOR BROWN APPOINTED TO NPS ADVISORY BOARD COMMITTEE. WJXT-TV Jacksonville, FL (3/13, 112K) reports that Jacksonville Mayor Alvin Brown was "appointed to a newly-formed committee" of the NPS Advisory Board Wednesday. According to the article, the Federal agency "wants to be more involved in urban communities and hopes the new committee will help its efforts by offering new strategies to better serve cities and figure out funding on the local level." Brown said, "Jacksonville's partnership with the National Park Service is very important and I am honored by this appointment. In Jacksonville, we appreciate the special value of our parks to our community. They are vital to our quality of life and they help define Jacksonville as one of America's great cities." NPS Superintendent Barbara Goodman said, "Mayor Brown will provide valuable input to the Urban Committee, which will help the National Park Service to more effectively engage the

country's diverse urban populations as the park service plans for its centennial in 2016."

LAKE SUPERIOR ICE CAVES TO CLOSE. The AP (3/13) reports that the NPS announced Wednesday that it will close access to the ice caves on Lake Superior near the Apostle Islands due to ice melt. According to Apostle Islands National Lakeshore Superintendent Bob Krumenaker, "access to the caves will close for the season no later than Sunday night." While the NPS "anticipates conditions to allow access through this weekend, rangers will monitor conditions very closely and close the area sooner if necessary."

Also reporting on the story are the St. Paul (MN) Pioneer Press (3/13, 540K) and the MinnPost (3/13, 6K).

NILE CROCODILES REMOVED FROM EVERGLADES NATIONAL PARK. The Fort Myers (FL) News-Press (3/12, 210K) reports that Everglades National Park, and "partners including the University of Florida, Florida Fish and Wildlife Conservation Commission, and the Swamp Apes (a volunteer organization), worked together over the weekend to capture a Nile crocodile that was reported in Everglades National Park, in the Chekika area of the park, which is currently closed to the public." Superintendent Dan Kimball said, "Exotic reptiles continue to challenge the health of south Florida ecosystems we are charged with protecting. Unfortunately federal and state agencies in Florida spend over 80 million dollars a year to remove invasive plants and animals to protect our natural resources. Our ongoing partnership with federal and state agencies and volunteers to remove exotic plants and animals from protected areas is essential!"

OLYMPIC NATIONAL PARK TO HOLD PUBLIC MEETINGS ON WILDERNESS STEWARDSHIP PLAN. The Tacoma (WA) News Tribune (3/12, 305K) reports that Olympic National Park will "have six public meetings to review its next steps in its Wilderness Stewardship Plan, the park announced Wednesday." Park superintendent Sarah Creachbaum said, "The public's review and comment at this key stage of the planning process will ensure that we are developing the best possible future for the Olympic Wilderness. Moreover, we want to ensure that we have accurately heard and addressed the public's comments as we move forward in developing the plan."

WILLIAMSBURGH SAVINGS BANK RESTORED. The New York Times (3/13, Dunlap, Subscription Publication, 9.61M) reports that the Williamsburgh Savings Bank has "been turned into an event space." According to the article, an incentive for the developers of "abjectly decrepit building" is "a credit against federal and state income taxes of an amount equaling up to 40 percent of their qualifying construction costs." The article notes that "this tax policy is intended to encourage substantial rehabilitation of commercial properties, like this one, that are on the National Register of Historic Places."

ST. AUGUSTINE WATERWORKS PUMPING STATION ADDED TO NATIONAL REGISTER. The Florida Times-Union (3/12, 427K) reports that the St. Augustine Waterworks Pumping Station at 184 San Marco Ave. has been added to the National Register of Historic Places.

ADDITIONAL COVERAGE: SENATORS INTRODUCE BILL TO REPAY STATES AFTER SHUTDOWN.

Additional coverage of the bill introduced to repay states for funds used to open national parks during the government shutdown was provided by the St. George (UT) News (3/12, 3K) and the Pueblo (CO) Chieftain (3/13, 94K).

PROTECTION URGED FOR NATIONAL PARKS. In a piece for the Pacific Standard (3/13), Casey N. Cep writes that "as their centennial approaches, it's time to remember why the National Parks are so worth protecting." Cep claims that "one of the reasons the NPS needs additional staff is to protect the parks from those of us who would enjoy them in our own perverse ways, whether it's carving and painting graffiti on 150-year-old cactuses in Arizona's Saguaro National Park or poaching the burls and bunions of 1,000-year-old redwoods in California's Redwood National and State Parks." Moreover, Cep argue s that "there are also economic reasons to establish such parks." Cep notes that the NPS "returns 10 dollars for every dollar of taxpayer investment, not only collecting admission and camping fees, but filling surrounding hotels and restaurants while emptying the shelves of local grocery stores and sporting goods outfitters."

"ECONOMIC ENGINES" OF NATIONAL PARKS TOUTED. In an op-ed for the Middlesex County (NJ) Home News Tribune (3/12, 134K), Michele S. Byers, the executive director of the New Jersey Conservation Foundation, writes that "parks — non-commercial by their very nature — are also powerful economic engines, contributing millions of dollars to local economies." According to a new study by the NPS, Byers notes, "national parks

across the country drew more than 280 million visitors in 2012, generating \$26 billion in economic activity in 'gateway' communities and supporting 243,000 jobs." According to Byers, "without national parks, these business sectors would suffer, as demonstrated by the federal government shutdown last October."

TRANSPARENCY IN GOVERNMENT URGED. In a piece for the Madison (VA) Eagle (3/13, 8K), Christian Trejbal, the open government chairman of the Association of Opinion Journalists, argues that government "functions best under public scrutiny." However, Trejbal warns that in recent years, transparency is "on the defensive against government agencies and lawmakers who fear disclosure and seek to allow greater secrecy." For instance, "when a writer for National Review Online asked the National Park Service for public records related to closing George Washington's Mount Vernon home during the recent federal government shutdown, she hit a wall." According to Trejbal, the Interior Department "ran a black marker over the most interesting passages."

Bureau of Land Management:

MAN INDICTED FOR THEFT OF DINOSAUR TRACK. FOX News (3/12, 6.72M) reports that a Utah man has been indicted on charges relating to the theft and damaging of a fossilized dinosaur track allegedly taken from an area administered by the BLM. Jared Ehlers is "facing up to 20 years in prison on the most serious of four counts."

Also reporting on the story are KSL-TV Salt Lake City (3/13, 242K), KSTU-TV Salt Lake City (3/12, 42K), and LiveScience (3/13, 670K).

BLM OFFERS ARTISTS-IN-RESIDENCE PROGRAM. The Fairbanks (AK) News-Miner (3/13, 44K) reports that the BLM will "host an artist for a week in April at the Wickersham Creek Trail Shelter in the White Mountains north of Fairbanks." Eastern Interior Field Manager Lenore Heppler said, "The lands managed by the BLM in Alaska have unique and special qualities. We're hoping that an artist's fresh perspective might help us shine more light on some of these local treasures like the White Mountains."

Fish and Wildlife Service:

SCOTT AIKIN APPOINTED NEW NATIONAL NATIVE AMERICAN LIAISON. The Bloomberg BusinessWeek (3/13, 4.93M) reports that FWS Director Dan Ashe has announced the appointment of Scott Aikin as the agency's new national Native American Liaison. Ashe said, "Indian country encompasses more than 100 million acres of the best remaining wildlife habitat in North America, stewarded by people who understand the value of their natural heritage. It's vital that we expand and our relationships with Tribes across the nation to ensure that they have a strong voice in wildlife conservation. Scott Aikin brings a wealth of experience and contacts to this role, and I'm excited for the opportunity to work together across the landscape to ensure that our shared wildlife legacy endures for future generations."

BIOLOGISTS MOVE RED-LEGGED FROG EGGS IN EFFORT TO EXPAND RANGE. The Los Angeles Times (3/13, Sahagun, 3.07M) reports that federal biologists "this week moved hundreds of red-legged frog eggs from a San Fernando Valley stream to carefully selected wetlands 10 miles away in the first attempt to expand the threatened species' range in Southern California." According to the article, "five hundred eggs transported from the Upper Las Virgenes Canyon Open Space Preserve to the Santa Monica Mountains are expected to hatch any day." When they hatch, "they will reintroduce red-legged frog tadpoles to historic haunts that are free of predatory fish, snails and crayfish that could tear them apart."

PUBLIC INPUT SOUGHT ON PLAN TO KILL MOSQUITOES. The Florida Keys Citizen (3/13, 36K) reports that "federal wildlife refuge and Florida Keys Mosquito Control District officials are asking for the public's input on a draft of plan for killing mosquitoes in the greater Big Pine Key area." The five-year plan, developed by the FWS and Florida Keys Mosquito Control District, is "designed to implement a program to kill mosquitoes, but not harm federally-listed endangered fish and wildlife species and their habitats." The article notes that "the plan was written to specifically address concerns about the Florida leafwing and Bartram's scrub-hairstreak butterflies, which are being proposed for listing on the Endangered Species List."

PROTECTION FOR MANATEES URGED. The Miami Herald (3/13, 806K) editorializes that "before the Miami-

Dade Commission considers changing one word of the county's 1995 manatee-protection plan, it should consult with the Florida Fish and Wildlife Commission and the US Fish and Wildlife Service, which both must approve any revision." The paper claims that "those wanting to loosen the restrictions" are using "backward logic" when they "point to the fact that deaths of manatees from boating collisions are down, and the overall manatee population is up." According to the editorial, "the reason there are fewer boat-related deaths of the slow-moving sea cows is precisely because of the state's regulations as they are written and enforced now."

GRAY WOLF DELISTING CRITICIZED. In an op-ed for the Tucson (AZ) Sentinel (3/13, 1K), Lori Udall, a program director for the Sacharuna Foundation, writes that "the gray wolf is an example of a species that is coming back but has not yet made it back, and yet now is caught in political limbo." Udall argues that "a single species can be delisted through legislation in Congress instead of scientific study of its recovery sets a dangerous precedent for the future of all protected species." She notes that "already, other members of Congress are following suit and have introduced amendments to defund recovery for the Utah prairie dog, the greater and Gunnison sage grouse, preventing a listing of prairie chickens, as well as other amendments to weaken the Endangered Species Act."

FWS PROPOSAL FOR CANADA LYNX HABITAT CRITICIZED. In an op-ed for the Columbia Falls (MT) Hungry Horse News (3/13), Larry Wilson writes that the FWS' "proposed critical habitat for Canada lynx is finally out, but the final rule will not be out until September 2014, and the financial assessment in April 2015 along with the environmental assessment." According to Wilson, "their broad-brush restrictions stop or slow management concerns and needs, especially as regards thinning and fuels management."

US Geological Survey:

USGS: ASIAN CARP EGGS FOUND IN UPPER MISSISSIPPI RIVER. WHBL-AM Sheboygan, WI (3/12, 432) reports that USGS scientists have found Asian carp eggs in water samples collected in 2013 from the Upper Mississippi River. According to the agency "carp eggs were recently collected as far north as Lynxville in southwest Wisconsin."

COTTONWOOD TREES UNLIKELY TO THRIVE IN MISSOURI RIVER BREAKS. The Billings (MT) Gazette (3/13, 206K) reports that "the odds are against cottonwood seedlings that sprout along the Missouri River in the badlands of the Upper Missouri River Breaks National Monument." According to Greg Auble, an aquatic systems research ecologist with the USGS, "only about one in a million seedlings will survive their first year to grow to maturity."

Securing America's Energy Future:

Renewable Energy:

ADDITIONAL COVERAGE OF MIT STUDY ON SUNZIA SOUTHWEST TRANSMISSION PROJECT. Additional coverage of the study by the Massachusetts Institute of Technology's Lincoln Laboratory on the SunZia Southwest Transmission Project was provided by the Albuquerque (NM) Business First (3/13).

Onshore Energy Development:

BLM GRANTS LEASE TO EXPAND COAL MINE IN NEW MEXICO. The AP (3/13) reports that the BLM has "issued a lease allowing for more than 9 million tons of coal to be mined in western New Mexico." The bureau said Tuesday it "issued the 640-acre lease to Peabody Natural Resources Co. after considering an appeal that stemmed from a lease sale in August 2013." The BLM said "it weighed potential environmental effects and determined there would be no significant impacts."

TENNESSEE LAWMAKERS SHELVE BILL GIVING OVERSIGHT OF SURFACE MINING TO STATE AGENCY. The Tennessean (3/13, 417K) reports that Tennessee's Senate Energy, Agriculture and Natural Resources Committee on Wednesday "halted a bill giving regulatory oversight of surface mining to the Tennessee Department of Environment and Conservation." Environmentalists "praised that move." Ann League, Tennessee campaign coordinator for Appalachian Voices, said the committee took a "sound course of action today on this

ill-conceived bill.”

FEDERAL GOVERNMENT URGED TO ISSUE FEDERAL ENERGY PERMITS FASTER. In an editorial, the Washington Examiner (3/13, 319K) criticizes the “chronically glacial pace” of energy permits issued by the Obama Administration. According to Institute for Energy Research President Thomas Pyle, the “permatorium” has “led to a 15 percent drop in oil and natural gas production on federal lands since 2010.” The paper concludes that “opening federal lands to speedier energy access will undoubtedly upset Obama’s Big Green allies, but it’s just common sense for most Americans.”

Offshore Energy Development:

BRADLEY BEACH OPPOSES OFFSHORE SEISMIC TESTING. The New Jersey (3/13, 526K) reports that Borough Council of Bradley Beach “unanimously passed a resolution opposing the use of seismic airgun testing in the Atlantic Ocean Basin at its meeting on Tuesday evening.” The borough’s resolution “cites concerns from ocean protection organizations, both local, like Clean Ocean Action, and international, like Oceana, that drilling may injure sensitive marine mammals.”

Additional coverage of seismic testing was provided by WTEV-TV Jacksonville, FL (3/13, 22K).

Tackling America’s Water Challenges:

COLORADO RIVER EXPERT TO LEAD BOR’S PUBLIC AND GOVERNMENT OUTREACH. The Environment & Energy Publishing (3/13, 705) reports that “an Interior Department veteran with extensive experience in Colorado River issues has been chosen to lead the Bureau of Reclamation’s public and government outreach.” Jennifer Gimbel, who “has most recently been serving as counselor to Interior’s assistant secretary for water and science, was named today by acting Reclamation Commissioner Lowell Pimley as the agency’s deputy commissioner for external and intergovernmental affairs.” Pimley said, “An important component of carrying out Reclamation’s mission is working with its customers, stakeholders and the public. Jennifer’s experience working in the water community at the state, regional and federal level will be a valuable asset as we continue to work alongside our partners in the West to confront widening imbalances between water supply and demand.”

HOUSE TO DEBATE WATER RIGHTS PROTECTION ACT. The Denver Post (3/13, Blevins, 949K) reports that the Water Rights Protection Act will be debated on the US House of Representatives floor Thursday. Rep. Jared Polis, was an early supporter of the legislation but said changes during its revision in committee “have caused the bill to snowball into an effort to hurt our nation’s river health and destroy recreational opportunities.” Polis said he was introducing an amendment to the legislation that would ensure that any new directive from the Forest Service does not condition ski area permits on the transfer of water rights or require ski areas to acquire water rights in the name of the United States.

The Durango (CO) Herald (3/12, 28K) reports that the White House on Thursday threatened to veto the legislation.

BOR RELEASES FRESNO IRRIGATION DISTRICT-FRIANT PUMPING DOCUMENTS. The Fresno (CA) Business Journal (3/13, 160K) reports that the BOR has “released for public review a draft environmental assessment and draft finding of no significant impact for a proposed temporary pumping facility to introduce water from the Fresno Irrigation District’s Gould Canal into Reclamation’s Friant-Kern Canal.” Gary Serrato, general manager of Fresno Irrigation District, said “the Environment Assessment comment period will last about two weeks and if no objections are filed, the district could begin pumping water into Friant-Kern Canal before the end of March.”

Empowering Native American Communities:

INTERIOR ADDRESSES CARCIERI LAND-INTO-TRUST DECISION IN LEGAL OPINION. The Nation Sun News (3/13) reports that the Interior Department “released a long-awaited legal opinion on Wednesday that addresses the US Supreme Court decision in *Carcieri v. Salazar*.” A legal opinion by Solicitor Hilary Tompkins “explains how recently recognized tribes, or tribes whose status was in doubt in 1934, can still follow the land-into-trust

process.”

LAND PUT INTO TRUST FOR KAW TRIBAL CASINO. The AP (3/13) reports that Assistant Secretary for Indian Affairs Kevin Washburn has announced that “21 acres in Kay County is being put into trust for” the Kaw Nation to build a small casino in north-central Oklahoma. Washburn said that “the project will provide significant opportunities for economic development in the Kaw Nation.”

INDIAN POLYTECHNIC RECEIVES “INITIAL ACCREDITATION”. The Albuquerque (NM) Journal (3/13, 288K) reports that “Albuquerque’s Southwestern Indian Polytechnic Institute has been awarded ‘initial accreditation’ status by the Higher Learning Commission of the North Central Association of Colleges and Schools, the US Department of the Interior said Wednesday.” According to the article, “the institute’s status was upgraded from ‘candidate for accreditation’ after a rigorous review.”

ATTORNEY ARGUES BUY BACK VIOLATES INTERNATIONAL HUMAN RIGHTS. In an op-ed for the Indian Country Today Media Network (3/12, 21K), Gabriel S. Galanda, the managing partner at Galanda Broadman, PLLC, argues that the Cobell Buy Back Program “runs counter” to United Nations Declaration on the Rights of Indigenous Peoples and other international human rights laws. Galanda notes that “the most troublesome part of the program is that it will facilitate the forced sale of tribal members’ allotted or restricted fee lands, and, in turn, forcibly and permanently remove individual Indians from their ancestral lands.” Under international laws, Galanda asserts, “American indigenous peoples enjoy an inviolable and sacred right to full enjoyment of their allotted or restricted fee lands,” but, “critically, unlike non-indigenous peoples’ property rights, lands owned by indigenous peoples cannot simply be taken ‘for public use’ or when ‘demanded by public necessity.’”

PROPOSAL TO CHANGE FEDERAL RECOGNITION PROCESS CRITICIZED. The Norwich (CT) Bulletin (3/13, 47K) editorializes that “with all the benefits that come with federal recognition, it should be a demanding process.” However, “the proposed changes make it far less so.” According to the paper, “if granted federal recognition, land claims will be filed seeking to take large tracts into trust, many of the parcels already developed,” and “that could cloud title to hundreds of properties and remove thousands of acres from tax rolls.”

Top National News:

OBAMA: US WILL NOT HEED CRIMEAN REFERENDUM. President Obama’s White House meeting with interim Ukrainian Prime Minister Arseniy Yatsenyuk on Wednesday generated remarkably little coverage given the media’s intense focus on the situation in Crimea as of last week. Only two of Wednesday’s network newscasts mentioned the meeting, and those two segments combined totaled just 43 seconds of air time. With few exceptions, the larger story regarding the status of Ukraine and Crimea, and Russia’s intentions in the region, is no longer a major topic of conversation on the most-watched cable news shows.

However, the ongoing situation remains on the front pages of the Washington Post (3/13, A1, Constable, 4.28M), which has a feature on the plight of the Crimean Tatars, and the Wall Street Journal (3/13, A1, Lee, Solomon, Subscription Publication, 5.91M), which suggests that President Obama has moved closer to accepting the likelihood that Crimea will no longer be part of Ukraine no matter what the US or the EU does from here on out.

Likewise, on Fox News’ O’Reilly Factor (3/12, 2.53M), Ed Henry, Fox’s chief White House correspondent, reported that White House officials had been “telling us privately in recent days that... ‘as long as [Russian President Vladimir] Putin doesn’t extend beyond Crimea, then, fine, he is not escalating the situation.’” According to Henry, that was “a direct signal that they are not going to do anything to stop [Putin] from keeping Crimea.” Henry went on to say that Administration officials have “already sent a tacit signal that Putin can have Crimea” and “they are not going to do anything to take it back as long as he doesn’t escalate beyond that.” Bill O’Reilly characterized that as “a big win for Vlad.”

David Ignatius, in his column for the Washington Post (3/13, 4.28M), also says the next few days of diplomacy are “unlikely to stop the planned referendum Sunday in which Crimeans are almost certain to vote to break away from Ukraine.” Ignatius adds that while it is a possibility that Putin will “encourag[e] unrest” in eastern Ukraine, “that risky course is unlikely.”

Scott Pelley, in a 30-second item for the CBS Evening News (3/12, story 6, 0:30, 5.58M), reported that at the White House on Wednesday, President Obama "sent a warning to Russia as he met...with Ukraine's new interim prime minister." According to Pelley, the President "said the US and its allies will 'be forced to apply a cost,' meaning economic sanctions, if Russia splits Crimea from the rest of Ukraine." Pelley also noted that Secretary of State Kerry testified before a House panel on Wednesday that "it can get ugly fast if the wrong choices are made."

In a segment that was just 13 seconds long, Ann Curry, on NBC Nightly News (3/12, story 5, 0:15, 7.86M), described the President's meeting with Yatsenyuk as a "show of solidarity." Curry also noted that Sen. John McCain "plans to lead a delegation of lawmakers to Ukraine tomorrow."

According to the AP (3/13, Pace, Klapper), the President "expressed a glimmer of hope...that a referendum on the future of Ukraine's Crimean Peninsula can be halted." The AP says the President added that "if the vote does occur...the US will 'completely reject' its results," and "urged Congress to quickly approve the \$1 billion loan guarantee to help Ukraine's fledgling government."

According to the New York Times (3/13, A12, Baker, Gordon, Subscription Publication, 9.61M), Obama and the "pro-Western" Yatsenyuk "opened the door on Wednesday to a political solution that could lead to more autonomy for Crimea if Russian troops withdraw." The Times says the President "hinted at a formulation that could be the basis for the coming talks between" Kerry and Russian Foreign Minister Sergey Lavrov that would "recogniz[e] Moscow's interest in helping the Russian-speaking population in Crimea while affirming that it is part of Ukraine." The Times adds that at the Atlantic Council following his White house meeting, Yatsenyuk "expressed willingness to consider concessions to Crimea," saying, "We the Ukrainian government are ready to start a nationwide dialogue how to increase the rights of autonomous Republic of Crimea, starting with taxes and ending with other aspects like language issues."

McClatchy (3/13, Clark, Allam, Subscription Publication, 95K) reports the President said on Wednesday that Ukraine's interim government "is willing to talk with Russia and engage in a process that he said 'could lead to different arrangements over time' for the Ukrainian region of Crimea," but added, "that's not something that can be done with the barrel of a gun pointed at you." According to USA Today (3/13, Madhani, 5.82M), Yatsenyuk also "urged Russia to start a dialogue with the new Ukrainian government."

On CNN's Situation Room (3/12, 554K) Jim Acosta reported that the President "reassured" Yatsenyuk "that the United States will oppose the upcoming referendum," which is "not legitimate in the eyes of the Obama Administration." According to Acosta, the President "said that he hopes in the days ahead that there will be a rethinking on the part of the Russians when it comes to this referendum."

On MSNBC's Last Word (3/12, 984K), Lawrence O'Donnell said the Administration is "maintaining if you're going to have this vote, it has to be all of Ukraine, but in Puerto Rico, for example, they are allowed to have their own vote whether they want statehood, commonwealth status [or] independence, and we don't say for them to get statehood, the entire United States would have to vote on it."

On Fox News' Special Report (3/12, 2.15M), correspondent Doug McKelway reported that Yatsenyuk, whom he described as "defiant in the face of Russian aggression," on Wednesday "received a promise of support from President Obama, one that lacked military muscle in favor of negotiation and the threat of sanctions."

Politico (3/13, Epstein, 464K) reported that as he peremptorily dismissed the vote to be held this weekend in Crimea, the President "praised Yatsenyuk and 'the courage of the Ukrainian people standing up on behalf of democracy.'" Politico notes that the President's meeting with Yatsenyuk was also attended by Vice President Biden, Kerry, and Treasury Secretary Lew, and that prior to the meeting, Kerry "hosted Yatsenyuk at the State Department."

The Washington Times (3/13, Wolfgang, 417K) reports that "it's unclear exactly what the White House and its allies are prepared to do" in response to the Crimean referendum.

Kerry Set To Meet With Russian Foreign Minister In London. On Fox News' Special Report (3/12, 2.15M), correspondent Doug McKelway reported that on Wednesday, Kerry offered "another reassuring take on

sanctions." Kerry was shown saying, "It can get ugly fast if the wrong choices are made – and it can get ugly in multiple directions." McKelway noted that on Thursday, Kerry will travel to London "for a meeting with Russian Foreign Minister Lavrov...only two days before Crimea votes on whether or not to secede." According to the AP (3/13), Kerry and Lavrov will meet in London on Friday.

According to McClatchy (3/13, Clark, Allam, Subscription Publication, 95K), Kerry and Lavrov's "hastily called summit...appears to be an 11th-hour attempt to get Putin to accept the White House's offer of an 'offramp' to ditch the secession referendum and open talks with the Ukrainians."

On CNN's Situation Room (3/12, 554K) Jim Acosta noted Kerry's upcoming meeting with Lavrov comes after the State Department "had said earlier this week that Kerry would not make such a trip unless Russia was showing concrete steps in terms of being open to a diplomatic path forward." According to Acosta, an anonymous "senior Administration official" confirmed that Kerry "would not be making that trip unless they saw those steps being taken."

Offering a similar take, Ali Weinberg, in a blog post for the ABC News (3/13, Weinberg, 3.68M) website, says, "It's possible Russia has sent signals that Kerry would not leave empty-handed...if he did meet Lavrov" because Kerry "presumably wouldn't be getting on a plane without the assurance of at least some progress."

Offering an alternative analysis, Ed Henry, on Fox News' O'Reilly Factor (3/12, 2.53M), noted that the State Department said Kerry would "not...meet with his Russian counterpart...unless there is 'concrete evidence' that Russia is, in fact, pulling back," but Henry added that while "there hasn't been any real concrete evidence of that," Kerry is nevertheless "meeting with Lavrov."

Michael Gordon, in an article for the New York Times (3/13, Subscription Publication, 9.61M), reports that on Saturday, the State Department "sent Mr. Lavrov a series of questions that were intended to probe whether the Kremlin was receptive to the American proposals," and "on Monday night, the Russians responded, but the answers did not signal a shift toward the Western position."

USA Today (3/13, Madhani, 5.82M) reports that at a House hearing on Wednesday, Kerry said, "In my discussions with Minister Lavrov, I have made it clear that there are many reasons for Russia to choose a path of de-escalation and of political solution here. We believe that interests can be met and that most importantly, the desires of the people of Ukraine can be respected, and that the international law can be respected."

According to McClatchy (3/13, Schofield, Subscription Publication, 95K), "Technically," this weekend's referendum "won't necessarily align Crimea with Russia," but it will "loosen" Crimeans' "ties to Ukraine." McClatchy reports that on Sunday, Crimeans "will have the option of checking one of two boxes," one of which "will indicate a vote in favor of Crimea joining the Russian Federation," while the other "will indicate a desire to return to Crimea's 1992 constitution." McClatchy says that under that 1992 constitution, Crimea "made its own foreign and trade policies," and was "essentially an independent republic."

G-7 Leaders Vow To Ignore Outcome Of Referendum. USA Today (3/13, Madhani, 5.82M) reports that on Wednesday, the "member countries of the Group of 8 – minus Russia – reiterated their opposition to the Crimea referendum...calling the vote illegal and vowing 'further action' if Russia annexes the peninsula."

According to the AP (3/13), "A statement from the seven nations released from the White House...calls on Russia 'to cease all efforts to change the status of Crimea contrary to Ukrainian law and in violation of international law.'"

The Los Angeles Times (3/13, Williams, 3.07M) notes that Russia "was admitted to the exclusive clique of powerful nations in 1998." However, the Times adds that "the G-7 leaders have sidelined Russia in confronting its intervention in Ukraine and suspended planning for a Russian-hosted summit in June."

Merkel Has Failed To Convince Putin To Rethink His Attitude Towards Ukraine. The Wall Street Journal (3/13, A1, Lee, Solomon, Subscription Publication, 5.91M) reports that German Chancellor Angela Merkel's government has concluded that there is no longer any chance of convincing the Putin government to pull back in Crimea.

The New York Times (3/13, A13, Smale, Subscription Publication, 9.61M) reports that Merkel "literally speaks [Putin's] language and, arguably, understands his view of the world better than any other European leader touched by the Ukrainian crisis. According to the Times, "Since the first Russian forces infiltrated Crimea, Merkel and Putin have spoken "at least four times on the phone." The Times goes on to report that Merkel "appears exasperated by [Putin's] unwillingness to avoid further provocative steps...and her government is increasingly signaling a willingness to depart from its preferred approach of consensus building and lead Europe toward a harder line on sanctions and other steps to pressure and isolate Russia."

Yatsenyuk Seeking \$35 Billion Aid Package As He Prepares To Sign Deal With The EU. AFP (3/13, Collinson) reports that while in the US, Yatsenyuk hopes to "iron out details of a \$35 billion aid package he says his nation's teetering economy needs to stay afloat over the coming two years." AFP also reports that on March 20 "European leaders" will attend a "summit to witness the signing of what German Chancellor Angela Merkel said would be an historic EU-Ukraine association agreement."

Robert Samuelson, in his column for the Washington Post (3/13, 4.28M), says the Russian government "may acquire Crimea," but it "may not be able to keep Ukraine in Moscow's economic orbit," and, instead, "the crisis may have accelerated efforts to reorient Ukraine westward."

NYTimes Profile: Yatsenyuk's Government Experience Helps Him Abroad, But Not Among Ukrainians. In a profile of Yatsenyuk titled "Leading Ukraine, A Technocrat Encircled By Problems," the New York Times (3/13, Herszenhom, Subscription Publication, 9.61M) reports that "for three months, throughout the uprising and upheaval in Kiev," Yatsenyuk "appeared regularly on stage in Independence Square, but often seemed out of his element." According to the Times, Yatsenyuk, who has served as "foreign minister, economics minister, speaker of Parliament and acting central bank chief," is "more at home in boardrooms, and in the corridors of power, than on the barricades." The Times says Yatsenyuk was "derided as an uninspiring technician during a failed presidential campaign in 2010," and "faces suspicion from a public that is deeply wary of his past service in the Ukrainian government, long known as a cesspool of corruption and mismanagement."

OBAMA TO EXPAND OVERTIME PAY PROTECTIONS. The news that President Obama will today direct the Labor Department to begin strengthening overtime pay protections by raising the pay level above which overtime must be offered is seen as significant in print coverage, but received coverage on just one broadcast network newscast. Print reports say the change will help millions, but tend to focus on industry criticisms of the plan as detrimental to hiring and economic recovery. Reports also note that this is the latest election-year example of the President making a change using executive authority that does not require the consent of Congress.

The CBS Evening News (3/12, story 7, 1:25, Pelley, 5.58M) reported the President "will expand overtime pay to millions of Americans who aren't currently getting it." Obama "intends to use his executive authority" to change Federal labor rules on overtime "without going through Congress." The AP (3/13) similarly says that the President, "bypassing Congress," intends to "order changes in overtime rules so employers would be required to pay millions more workers for the extra time they put in on the job."

The Washington Post (3/13, Goldfarb, Hicks, 4.28M) reports the White House said the President will direct Labor Secretary Perez to begin strengthening the overtime protections. The White House said "millions of salaried workers have had to work 50 or 60 hours a week without being paid overtime – and, in some cases, 'making barely enough to keep a family out of poverty.'" House Speaker Boehner said, "The President's policies are making it difficult for employers to expand employment," while Sen. John McCain "dismissed Obama's plans as another example of the president's unwillingness to engage with Congress."

USA Today (3/13, Davidson, Jackson, 5.82M) says "business groups and corporate lawyers assailed" the plan. Marc Freedman of the US Chamber of Commerce said, "We understand the Administration is looking for ways to put more money in people's pockets, but the only way to do this is to grow the economy and create more jobs. Adding more burdens to employers will not accomplish that goal." Bloomberg News (3/13, Coy, 1.91M) says International Franchise Association spokesman Matt Haller similarly said, "Raising the minimum wage is only going to impact jobs. We view this through the same lens. At the end of the day you're just layering additional costs to business owners."

The Wall Street Journal (3/13, Paletta, Nelson, Subscription Publication, 5.91M) reports that currently, many businesses are not required to offer overtime pay to certain salaried workers earning more than \$455 per week. It is unclear how much the Labor Department will raise that threshold. The Tampa Bay (FL) Times (3/13, Harwell, 78K) says the liberal Economic Policy Institute, which seeks a boost to all workers earning less than \$50,000 per year, would benefit "about 10 million Americans." The Kansas City (MO) Star (3/13, 1.11M) says in a headline that the change "could be a seismic shift."

Politico (3/13, Epstein, 464K) says the Labor Department set a threshold of \$250 per week in 1975, which was raised to \$455 in 2004. California and New York "have set higher thresholds – \$640 and \$600 per week, which are due to rise to \$800 and \$675 weekly in 2016." Reuters (3/13, Rampton, Becker) and the Huffington Post (3/13, Berman, 11.54M) also have reports.

More Commentary. The New York Times (3/13, Subscription Publication, 9.61M) says in an editorial that "for the first 40 years of its existence, a worker's right to time-and-a-half for overtime, established by federal law in 1938, operated as intended," but "the last meaningful update was in 1975." The Times says that "by reasserting a meaningful right to overtime," the President's directive "could lift pay for an estimated five million workers a week and, in the process, help to mitigate the wage stagnation and income inequality that increasingly plague the American economy."

The Wall Street Journal (3/13, Subscription Publication, 5.91M) says in an editorial that Obama's plan is timed for political impact as the midterm election season heats up, but that it will hurt the economic recovery and discourage the business model that has resulted in creativity and innovation in Silicon Valley and elsewhere, where workers are encouraged to think of themselves as owners with a vested interest in the company, and instead encourage more salaried employees to think like hourly wage earners.

OBAMA MEETS WITH DEMOCRATIC LEGISLATORS TO DISCUSS WOMEN'S ECONOMIC ISSUES. USA

Today (3/13, Madhani, 5.82M) reports President Obama has launched "a new effort...to highlight economic issues facing women, a key voting bloc whose turnout will be crucial to Democrats chances in the November mid-term elections," meeting with "several House and Senate Democrats who are focused on issues particularly resonant with women – including raising the minimum wage, the pay disparity between men and women, as well as the availability of affordable child care and early education programs."

The AP (3/13, Pickler) says the meeting came as the Council of Economic Advisers "issued a report decrying a gender wage gap. The report highlights that full-time working women continue to earn less than men, despite surpassing men in obtaining college degrees and making inroads into traditionally male-dominated occupations."

The Washington Post (3/13, Henderson, 4.28M) "She The People" blog reports the President said at the meeting, "We know that women continue to be disproportionately represented in low-wage professions, which means that something like an increase in the federal minimum wage is going to have a disproportionate impact on them. And women are still the ones that are carrying the greatest burden when it comes to trying to balance family and work." House Minority Leader Pelosi, who attended the meeting, praised Obama "for putting those issues at the forefront of his agenda."

Bloomberg News (3/13, Talev, Runnigen, 1.91M) notes that Senate Intelligence Chairwoman Dianne Feinstein, "one of the most senior women in Congress," did not attend. Bloomberg News notes that Feinstein and the Obama Administration "are at odds over her committee's investigation" of the CIA's treatment of detainees during the Bush Administration.

Editorial Wrap-Up:

NEW YORK TIMES. "Extra Pay For Extra Work." The New York Times (3/13, Subscription Publication, 9.61M) says in an editorial that "for the first 40 years of its existence, a worker's right to time-and-a-half for overtime, established by federal law in 1938, operated as intended," but "the last meaningful update was in 1975." The Times says that "by reasserting a meaningful right to overtime," President Obama's overtime directive "could lift pay for an estimated five million workers a week and, in the process, help to mitigate the wage stagnation and income inequality that increasingly plague the American economy."

“China Moves On Banking Reforms.” The New York Times (3/13, Subscription Publication, 9.61M) editorializes on China’s announcement this week that government limits on banks’ interest rates for deposits would be removed “sometime in the next two years” as well as the decision to let private operators to open more banks. The Times says that these moves “could significantly shake up the financial system” depending on their execution, citing the dominance of state banks and little-regulated “shadow banking system.” The editorial examines the current interest rates on deposit and the possible effects, both good and bad, of the new policies. According to the Times, China must find a balance in its reform, as moving too quickly to slow lending by both shadow and state banks “could precipitate a crisis,” while moving too slowly could increase the vulnerability of the financial system.

“High Mortality From Alzheimer’s Disease.” The New York Times (3/13, Subscription Publication, 9.61M) editorializes on a study from Chicago’s Rush University Medical Center which claims that Alzheimer’s disease was responsible for more deaths than initially estimated by the Centers for Disease Control and Prevention. The study, published recently in the journal *Neurology*, said the disease “was the underlying cause in more than 500,000 deaths in 2010 that were often attributed to” complications and conditions caused by Alzheimer’s, according to the Times. The Times concludes that Alzheimer’s will become “more of a burden” as the population ages, which “makes it imperative to intensify research into ways to treat and prevent the disease.”

“Welcomed Aboard, As Someone Else.” The New York Times (3/13, Subscription Publication, 9.61M) editorializes that the disappearance of a Malaysian Airlines flight illustrates “serious flaws in passenger identity procedures amid what has become a booming world market in stolen and counterfeit passports.” The Times says the problems “deserve remedial attention” because of the “risks they present to traveling.”

WASHINGTON POST. “China’s Defense Spending.” In an editorial, the Washington Post (3/13, 4.28M) examines China’s 12.2% increase in defense spending over the last year to nearly \$132 billion, questioning why the Asian nation needs such a high defense budget and what its “intentions and capabilities” could be. The Post points out China’s increasingly aggressive posturing on its territory which raise “the uneasy prospect of a military conflict,” and development of new weapons systems, which “pose asymmetric threats to the United States and its allies.” The editorial expresses a desire for increased transparency from China in order to ease concerns over the spending increase, and says that as the US reduces defense spending and moves focus toward Asia, China “will be a challenge to the United States and its allies for years to come.”

“Curbing Drug Abuse.” The Washington Post (3/13, 4.28M) discusses Attorney General Holder’s Monday address on an “urgent and growing” health issue, the abuse of prescription opioids. Federal and state officials have attempted to reduce illicit opioid abuse, and while critics say the more stringent regulation is forcing abusers to turn to heroin, Holder countered that the rise in heroin use was a “symptom of the significant increase in prescription drug abuse that we’ve seen over the past decade.” The Post argues that with a higher rate of prescriptions for opioids and higher death rates from overdoses, “government had no choice but to act in the face of an epidemic,” and if efforts continue, addiction levels of both heroin and prescription drugs should decline.

“Dividing The District.” The Washington Post (3/13, 4.28M) editorializes on Tuesday’s State of the District address by District of Columbia Mayor Vincent Gray, which he began by asking residents to reject claims that he was implicit in malfeasance during his first election. “To some in our city, I’m just another corrupt politician from the other side of town,” Gray said in what the Post calls an “unmistakable reference to the whiter areas of the city” west of his native Ward 7. The editorial states that while Gray is within his rights to deny allegations of wrongdoing, “his not-so-subtle references to race insult every voter” and tarnish his own image. The Post states that Gray must be more transparent with campaign details from 2010 if he wants public trust, and that his refusal rather than race or geography spurred the paper’s endorsement of Councilmember Muriel Bowser.

WALL STREET JOURNAL. “Riding The 2014 Wave.” In an editorial, the Wall Street Journal (3/13, Subscription Publication, 5.91M) says that the outcome of the FL13 race shows that the Affordable Care Act is likely to hurt Democrats in competitive races this fall, but for the GOP to further capitalize on the issue, Republicans should draw up legislation that both highlights and remedies perceived flaws in the law. The goal for the GOP, says the Journal, should be to craft legislation that the Republican-held House would approve, thereby putting pressure on the Democratic-controlled Senate.

"Moscow Malware Attack." The Wall Street Journal (3/13, Subscription Publication, 5.91M), in an editorial, contends that the findings of the UK's BAE Systems, which has tracked cyberattacks targeting unspecified Ukrainian sites starting early last year to Russia, is evidence that the Putin government has been planning to annex Crimea for some time.

"The President Goes To Overtime." The Wall Street Journal (3/13, Subscription Publication, 5.91M) says in an editorial that Obama's overtime pay plan is timed for political impact as the midterm election season heats up, but that it will hurt the economic recovery and discourage the business model that has resulted in creativity and innovation in Silicon Valley and elsewhere, where workers are encouraged to think of themselves as owners with a vested interest in the company, and instead encourage more salaried employees to think like hourly wage earners.

Media may begin arriving at 10:00 a.m. All cameras must be pre-set by 10:45 a.m. Press inquiries regarding logistics should be directed to the Office of Public Affairs at 202-514-2007.

NEMA 40TH POLICY AND LEADERSHIP FORUM – March 9 – 14. 'NEMA 2014 Mid-Year Emergency Management Policy & Leadership Forum'. Location: Hilton Alexandria Mark Center Hotel, Plaza C, 500 Seminary Rd., Alexandria, Va.

PETERSON – IMF PAPER – 12 p.m. The Peterson Institute for International Economics will cohost with the International Monetary Fund (IMF) the release of an important and timely new IMF paper titled "Fiscal Policy and Income Inequality". Mr. David Lipton, the IMF's First Deputy Managing Director, will present the paper and its conclusions, followed by discussion from Dr. Nancy Birdsall, President of the Center for Global Development; and Prof. Robert Z. Lawrence, PIIE non-resident Senior Fellow. Location: Bergsten Conference Center, Peterson Institute, 1750 Massachusetts Avenue, NW. Contacts: RSVP to Yvonne Priestley meetings@piie.com

STATE HEALTH EXCHANGE OFFICIALS TELECONFERENCE – 12 p.m. Teleconference for State Exchange Officials to Share Their Experiences Working toward 2014 Enrollment Goals and the March 31 Deadline under the Affordable Care Act. Participants: Peter V. Lee, Executive Director, Covered California; Patty Fontneau, Executive Director and CEO, Connect for Health, Colorado; Kevin Counihan, Chief Executive Officer, Access Health CT; Bill Nold, Deputy Executive Director, Office of the Kentucky; Health Benefit Exchange; Lisa Sbrana, Counsel, New York State of Health; Richard K. Onizuka, PhD, CEO, Washington Health Benefit Exchange; Ron Pollack, Executive Director, Families USA. Dial in toll-free: 888-337-8198. Confirmation code: 7991390. Contacts: Dave Lemmon, Bob Meissner Bob Meissner ((202) 628-3030)

ADVAMED – DIABETES – 12 p.m. – 2 p.m. Advamed will hold a Capitol Hill briefing on “how innovative medical devices and diagnostics are helping patients better manage diabetes, improving their quality of life and reducing overall healthcare costs associated with the disease.” With Richard Price, Senior Vice President, Advamed; Dr. Larry Hirsch, Worldwide Vice President, Medical Affairs, BD, & Type 1 Diabetes Patient; Jeff Hitchcock, Founder, Children with Diabetes; Martha Rinker, Chief Advocacy Officer, American Association of Diabetes Educators (AADE). Location: B-340 Rayburn. Notes: To cover the event, contact Danielle Blake at dblake@advamed.org.

PERSONALIZED MEDICINE – 12 p.m. – 2 p.m. The Tenth Annual State of Personalized Medicine Address Luncheon hosted by the Personalized Medicine Coalition. Patrick Conway, M.D., Deputy Administrator for Innovation and Quality and Chief Medical Officer, Centers for Medicare & Medicaid Services will discuss CMS' perspective on innovation and quality healthcare reform. Location: National Press Club Ballroom, 529 14th Street, NW. Contacts: Stacey Gross, sgross@spectrumsience.com, 202-955-6222

AEI – DEFENSE SPENDING – REP. FORBES – 12:15 p.m. – 1:30 p.m. Do defense plans and budgets add up? The Quadrennial Defense Review in context. 12:15 PM. Introduction: Christopher J. Griffin, Foreign Policy Initiative. Discussants: Steven Bucci, Heritage Foundation; Mackenzie Eaglen, AEI; J. Randy Forbes, US House of Representatives (R-VA); Todd Harrison, Center for Strategic and Budgetary Assessments. Location: 2226 Rayburn. Notes: Changes location of event from AEI to Rayburn.

HOBBY LOBBY BRIEFING – 1 p.m. Teleconference: “Supreme Court Birth Control Cases Call” with: Jane Perkins, Legal Director, National Health Law Program; Susan Berke Fogel, Director of Reproductive Health, National Health Law Program; Hal C. Lawrence III, MD, Executive Vice President and CEO, American College of Obstetricians and Gynecologists; Adam Sonfield, Senior Public Policy Associate, Guttmacher Institute; Jessica Gonzalez-Rojas, Executive Director, National Latina Institute for Reproductive Health. DIAL IN: 1-800-428-6220 Conference Code: 967619. Contacts: RSVP aabbas@veng-group.com

DOD BRIEFING – 1:30 p.m. Marine Corps Gen. John F. Kelly, commander, US Southern Command, will provide an update to the press in the Pentagon Briefing Room (2E973). Journalists without a Pentagon building pass will be picked up at the River Entrance only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort into the building.

MAYORS-CELEBRATE-CDBG – 2 p.m. Newton, MA Mayor Setti Warren, US Conference of Mayors Community Development and Housing Committee Chair, will lead a delegation of US Mayors to celebrate the success of the Community Development Block Program (CDBG) and to explain the importance of the Grants by providing specific examples of how they are used in their communities. CONTACT: Elena Temple, etemple@usmayors.org, 202-286-1100; Lina Garcia, lgarcia@usmayors.org 202-341-6113; Karen Hinton Karen@hintoncommunications.com, 703-798-3109. Location: USCM HQ, 1620 I St, NW, 4th Floor.

PENTAGON – AFGHANISTAN – 3 p.m. International Security Assistance Force and US Forces-Afghanistan Commander Marine Corps Gen. Joseph F. Dunford Jr. briefs the media to provide an update on the Afghanistan campaign. Location: Pentagon Briefing Room (2E973). Notes: Cameras will not be permitted in this media roundtable. Journalists without a Pentagon building pass will be picked up at the River Entrance only. Plan to arrive no later than 45 minutes prior to the event; have proof of affiliation and two forms of photo identification. Please call 703-697-5131 for escort into the building.

SYRIA BRIEFING – 3 p.m. – 4:30 p.m. Briefing on the humanitarian crisis in Syrian on the third anniversary of

the conflict with Representatives from Care, MercyCorps, Oxfam America, Save the Children, UNICEF and World Vision. Speakers: Dr. Rim Turkmani, Syrian activist, astrophysicist at the Imperial College, senior fellow at the Civil Society and Human Security Research Unit at the London School of Economics; Lisa Szarkowski, Vice President for Humanitarian Emergencies at the US Fund for UNICEF; Michael Klosson, Vice President of Policy and Humanitarian Response, Save the Children; Keith Proctor, Senior Policy Researcher, MercyCorps. Location: 419 Dirksen. Contacts: Francine Uenuma fuenuma@savechildren.org ((202) 450-9153)

WORLD BANK INFOSHOP – EUROPE, CENTRAL ASIA – JOBS – 3 p.m. – 4:30 p.m. Speakers: Moderator: Ana Revenga, Acting Vice-President, Poverty Reduction and Economic Management, World Bank Group. Authors: Carolina Sanchez Sector Manager, Poverty Reduction and Economic Management, Europe and Central Asia, World Bank Group; Omar S. Arias Lead Economist, Europe and Central Asia, World Bank Group. Discussants: Hans Timmer Chief Economist, Europe and Central Asia, World Bank Group; Arup Banerji Sector Director, Social Protection and Labor, World Bank Group; William F. Maloney Lead Economist, Development Economics Research Group, World Bank Group. RSVP to infoshopevents@worldbank.org. Location: World Bank infoshop, Auditorium J1-050, 701 18th Street, NW.

WOMEN AND GIRLS LEAD GLOBAL EVENT – 3 p.m. – 5 p.m. US Agency for International Development (USAID) Administrator Rajiv Shah will participate in a panel discussion highlighting Women and Girls Lead Global, a public-private partnership between USAID, CARE, the Ford Foundation and the Independent Television Service (ITVS). Location: Meridian's White-Meyer House, 1624 Crescent Place, NW. Notes: Press interested in attending, please RSVP to: rsvp@itvs.org

CSIS – US FOREIGN ASSISTANCE – 4 p.m. – 5:30 p.m. The CSIS Project on Prosperity and Development presents "Aid Effectiveness and the US Foreign Assistance Agenda." Keynote Remarks: US Rep. Ted Poe, Texas' 2nd Congressional District. Panel Discussion: Sheila Hertling, Vice President, Department of Policy and Evaluation, Millennium Challenge Corporation; Amb. John Simon, Founding Partner, Total Impact Advisors and Former US Ambassador to the African Union; J. Edward Fox, Principal, Fox & Associates and Former Assistant Administrator for Legislative and Public Affairs, US Agency for International Development; Porter DeLaney, Founding Partner, Kyle House Group; Gregory Adams, Director of Aid Effectiveness, OXFAM America. Location: 9th Floor Board Room, 1616 Rhode Island Avenue, NW, Notes: RSVP to PPD@csis.org.

INSA LEADERSHIP DINNER – 5:30 a.m. The Intelligence and National Security Alliance hosts a leadership reception and dinner program. Keynote speaker: NSA Director, General Keith Alexander. For registration questions or assistance please contact Toya Forman at tforman@insaonline.org. Location: Hilton Alexandria Mark Center, 5000 Seminary Road, Alexandria, VA. Contacts: (703) 224-4672. Notes: Rescheduled from March 3.

WORLD AFFAIRS COUNCIL GALA – 6 p.m. – 10 p.m. Her Highness Sheikha Moza bint Nasser, Chairperson of Qatar Foundation for Education, Science and Community Development; H.E. Mauro Vieira, Ambassador of Brazil to the United States; Dr. John DeGioia, President of Georgetown University; and CBS News will be the honorees at the World Affairs – HONORS Global Education Gala. Marillyn Hewson, Chairman, President and CEO of Lockheed Martin Corporation, will deliver the keynote address. Location: Ritz-Carlton Hotel, 1150 22nd St. NW. Contacts: Gabby LaVerghetta, glaverghetta@worldaffairsdcc.org, 202-293-1051

AMERICAN IRELAND FUND – BIDEN – 6:30 p.m. The American Ireland Fund 22nd Annual National Gala to Honor Vice President Joseph R. Biden, Jr. and UBS Americas CEO Robert McCann. Participants: The American Ireland Fund 22nd National Gala WHO: An Taoiseach, Enda Kenny, T.D.; Rt. Hon. Peter Robinson MLA, Honorary Chair; Martin McGuinness, MP MLA, Honorary Chair; H.E. Anne Anderson, Honorary Chair; Sir Peter Westmacott, Honorary Chair; Representative Peter King and Representative Richard Neal, Honorary Congressional Chairs. For More Information Contact: Washington, DC: Susan O'Neill & Associates at AIFGala@ONeillEvent.com / +1 301/320-8232 USA : Rachel Alabiso at ralabiso@irrfunds.org / tel. +1 617.901.2466 Ireland: Caitriona Fottrell at cfottrell@irrfunds.org / tel. +353. 86. 381 .7397. Location: The Ronald Reagan Building and International Trade Center, 1300 Pennsylvania Avenue, NW. Notes: Because of the Secret Service requirements, any camera equipment MUST be in the Building and set up by 1:00 p.m. Note that this only applies to your equipment and whoever is shooting or setting up.

NATIONAL ARCHIVES – CONGRESSIONAL LEADERSHIP – WOMEN – 7 p.m. The National Archives hosts the

Seventh Annual McGowan Forum on Women in Leadership. This year's special program "Women in Congressional Leadership" includes remarks from House Democratic Leader Nancy Pelosi. A panel discusses their personal journeys and advice they would offer to young women entering the field. Moderated by New York Times journalist Jackie Calmes, panelists include former Members of the House of Representatives Connie Morella (R-MD), Barbara Kennelly (D-CT), and Mary Bono (R-CA), and former Senators Carol Moseley Braun (D-IL) and Blanche Lincoln (D-AR). Contacts: programs line 202-357-5000, public affairs 202-357-5300.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: [Referring to President Obama's trip to New York] "And then, during the day, President Obama went shopping at the Gap. I'm telling you, there hasn't been so much security at the Gap since the time Lindsey Lohan showed up."

David Letterman: [Referring to John McCain's trip to New York] "And earlier today, John McCain, who was also in town, was seen shopping at the really Old Navy."

Stephen Colbert: [Referring to President Obama's interview with comedian Zach Galifianakis] "No one has signed up for Obamacare, give or take 4.2 million people, and our President has gotten so desperate that he appeared on this website 'Funny or Die'. By the way, funny or die is also the ultimatum you get from Obama's death panel. Now, this show he went on, 'Between Two Ferns,' it went viral, which is all part of Obama's sinister plan – spread a virus, then watch everyone scramble for signing up for healthcare."

Stephen Colbert: "Folks, by going on that Web show, Barack Obama undermined the authority of the presidency, and that is FOX News' job."

Jimmy Fallon: "Today, President Obama and Joe Biden met with the Ukrainian prime minister to show their support for his government. That's nice. The prime minister said, 'You guys should visit Ukraine sometime.' Obama said, 'Biden would love to.' Biden was like, 'What? I was watching the door. What's going on?'"

Jimmy Fallon: "I saw that President Obama...was in New York and he went shopping at a Gap store. ... The President ended up buying a sweater for each of his daughters and a workout jacket for the First Lady, because, you know, whenever someone visits New York, the one souvenir people really want is something from the Gap."

Seth Meyers: "There are new developments every day in the Ukraine, every single day. And new reports show that the Crimean vote to join Russia on Sunday did not include an option for 'no.' There were only two boxes on the ballot. One for 'yes' and one for 'murder my family.'"

Seth Meyers: "Some bad news today for the President. It looks like Obamacare will miss its enrollment target of seven million people by March 31st, as only four million...have signed up so far. Republicans haven't been this excited since the invention of khakis."

Secretary Jewell,

Attached are briefing materials that have been uploaded to Google Drive in your March 17, 18, and 19 folders. They will be printed out in hard copy and delivered to you.

Thank you,

Elizabeth

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL ESA DISCUSSION

DATE: March 19, 2014
LOCATION: Office of the Secretary
TIME: 9:30AM – 10:30AM
FROM: Colorado Ecological Services Field Office, Region 6; Dan Ashe, Director, FWS (202)208-4717; Noreen Walsh, Regional Director, Region 6, (303) 236-4579; Matt Hogan, Deputy Regional Director, Region 6; Gary Frazer, Assistant Director-Endangered Species

I. PURPOSE

The purpose of this meeting is to discuss with you the status of Final Listing Determination for the Gunnison Sage Grouse and the Lesser Prairie Chicken, as well as (1) the range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken, and (2) Conservation efforts for the Lesser Prairie-chicken.

II. BACKGROUND

Final Listing Determination for Gunnison Sage-grouse (GUSG)

On September 15, 2010, FWS determined that listing the GUSG as a threatened or endangered species was warranted but precluded by higher priority listing actions, and the species was added to the candidate list. Proposed rules to list the GUSG as endangered and to designate critical habitat were published on January 11, 2013. A six-month extension was obtained for completion of the final documents. Subsequent to that, an additional 6 week extension was obtained. The final determination is due to the Federal Register by May 12, 2014.

The current range of GUSG is limited to seven widely scattered and isolated populations in southwestern Colorado and southeastern Utah, with an estimated rangewide population of 4,700 individuals. Of the estimated 940,000 acres (ac) (380,000 hectares [ha]) of rangewide occupied habitat, approximately 54 percent occurs on Federal lands; 41 percent occurs on private lands; and 5 percent occurs on state lands.

The Gunnison Basin GUSG population contains approximately 87 percent of the total number of birds and 63 percent of rangewide occupied habitat for the species. The remaining six satellite populations are much smaller than the Gunnison Basin population.

During the public comment period we received information indicating substantial scientific disagreement regarding the interpretation of scientific literature, literature that we may have overlooked, GUSG population trends, the scope of Gunnison County's legal authority to address threats to GUSG, projections about the extent and pattern of future residential development within the range of the species, and what constitutes historical habitat and important current habitat for the species.

In terms of next steps, FWS is finalizing the rulemaking for GUSG. This includes a recommendation for a final rule to list the species as threatened, a final critical habitat designation, and a proposed special rule under section 4(d). The special rule would exempt take for certain practices associated with the Gunnison County development regulations, practices associated with grazing and ranching, and some activities under the Range Wide Conservation Strategy. The Service is considering delaying the effective date of the listing by six months to provide time to finalize the 4(d) rule.

In addition, the Service is working with partners to better articulate the actions necessary to reduce the remaining threats to the satellite populations. This may in turn include amending the Range Wide Conservation Plan for GUSG completed in 2005. A Biology Team has been established to determine the Targets and Actions that will provide sufficient confidence that, when they are achieved, a not warranted finding would result. Should the GUSG be listed, the completion of these actions would likely lead to a proposed delisting.

Biology Team Objectives:

1. Identify population and/or habitat targets within each sub-area that, if achieved, will increase FWS confidence in GUSG conservation. The population and habitat targets will be objective, measurable, and science-based.
2. Identify the Conservation Actions that will address the most important threats to the most important populations that can fulfill the population and habitat targets, sufficient that GUSG will be conserved.
3. In the event of a Threatened finding, to ensure continued conservation and provide input on a possible 4(d) rule.

The Service has asked for the assistance of Colorado Parks and Wildlife to review the 4(d) for clarity and completeness. Subsequent to the biological information being completed the Service will engage local partners on how to develop implementation programs to achieve the biological targets and objectives.

Time Line:

The Biology Team will complete recommendations for internal review by March 21, 2014. The final determination will be published May 12, 2014.

Final Listing Determination for the Lesser Prairie-Chicken

Below is background on the Service's final determination to list the lesser prairie-chicken as a threatened species, with a 4(d) special rule. [Note: see attached for map of historical and current range]

The lesser prairie-chicken (LPC) - a species of prairie grouse that currently occupies a five-state range including Texas, New Mexico, Oklahoma, Kansas, and Colorado - has been a candidate for listing under the Endangered Species Act since 1998. The LPC requires large expanses of

relatively intact native grasslands and prairies to maintain self-sustaining populations. The life history and ecology of the lesser prairie-chicken make it exceptionally vulnerable to changes on the landscape, especially at its currently reduced numbers. This vulnerability to habitat impacts results from the species' lek breeding system which requires males and females to be able to hear and see each other over relatively wide distances, the need for large patches of habitat that include several types of microhabitats, and the behavioral avoidance of vertical structures.

There has been a substantial decrease in the range of the LPC primarily as a result of habitat loss and fragmentation - the primary threat to the species (see attached map of historical and current range). Land use changes related to oil and gas activities, wind energy, transmission development, and agricultural conversion of native prairie, in combination with the potential loss of Conservation Reserve Program acres, present conservation challenges for the species. These ongoing threats, coupled with reduced population size due to the recent severe drought, makes the species especially vulnerable to continuing impacts on the landscape. The vast majority of LPC habitat occurs on private lands across its range and therefore partnerships are critical to conservation of the species.

The range-wide LPC population last year was a record low of roughly 17,600 birds, a nearly 50% decline from the previous year's estimate and likely due to the recent severe drought, habitat loss and fragmentation.

Discussion:

A number of voluntary conservation efforts for LPC have been developed in recent years (see attached summary of LPC Conservation Efforts). The most significant of these have been the LPC Range-wide Plan developed by the 5 state fish and wildlife agencies, under the auspices of the Western Association of Fish and Wildlife Agencies (WAFWA), and the NRCS' Lesser Prairie-chicken Initiative, which targets their conservation program funding toward implementing management practices beneficial to the LPC.

While implementation of these conservation efforts will produce a net conservation benefit to the species, the positive benefits of those efforts will largely be demonstrated in the future rather than now at the time of our listing decision. For example, even with the significant enrollment in the RWP in the short term, it will still take several years for habitat improvement practices to take effect. Complicating the issue of conservation delivery is the role of continued drought on the landscape. If there is rain, the improved management on agricultural lands could result in a quick upturn in the status of the species. However, if the drought continues, the habitats will likely not rebound to create additional usable habitat as quickly or at all, and the LPC population will likely not be able to successfully reproduce and grow, despite the efforts of enrolled landowners.

In light of the current precarious status of the population and the ongoing threats it faces, including the severe drought, the Service has concluded that the LPC warrants listing as a threatened species, i.e, one that is in danger of extinction within the foreseeable future throughout all or a significant portion of its range.

The 4(d) special rule that will accompany this listing determination is designed to encourage participation in voluntary conservation efforts, empower the state fish and wildlife agencies to continue to play the lead role in conservation of the LPC, and to remove ESA regulation from activities that are not significant threats to the bird.

Specifically, the 4(d) rule will exempt take of LPC that is incidental to implementing the WAFWA Range-wide LPC Conservation Plan. This plan covers a wide range of development and conservation activities, will be administered by the states through WAFWA, and will provide a vehicle for ESA compliance for all participating landowners. It will provide for an unprecedented state-federal cooperative partnership in managing a listed species.

Similarly, the 4(d) rule will exempt take incidental to implementing the conservation practices agreed to between NRCS and participating landowners through their Lesser Prairie-chicken Initiative. We expect that giving NRCS the ability to tell participating ranchers and farmers that ESA compliance is assured if they manage their operations using those conservation practices will encourage more voluntary conservation.

The 4(d) rule will also exempt take incidental to routine agricultural activities on existing cultivated land.

In terms of next steps, the final listing determination and 4(d) rule will be delivered to the *Federal Register* by March 31, 2014. The Service has developed a comprehensive outreach plan and will be working with the Department and other agencies to polish and deliver our message.

Range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken

The Western Association of Fish and Wildlife Agencies (WAFWA) will administer the CCAA and enroll oil and gas properties under the permit through certificates of inclusion. Region 6 issued an Enhancement of Survival Permit WAFWA on February 28, 2014, for the Range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken (CCAA).

The CCAA is a voluntary agreement intended to address the effects of oil and gas activities on the lesser prairie-chicken (LEPC) and its habitat in the species' five-state range in Kansas, Colorado, Oklahoma, New Mexico, and Texas. The CCAA will be administered by WAFWA with oversight by the Service. The CCAA was designed to help implement the conservation strategy of the Lesser Prairie-chicken Rangewide Conservation Plan (RWP), which is a comprehensive conservation plan developed by the Lesser Prairie-Chicken Interstate Working Group of WAFWA. While the RWP addresses the suite of development activities that impact the LEPC, the CCAA focuses on oil and gas impacts. Oil and gas operators can voluntarily enroll their properties in the CCAA to implement avoidance, minimization, and mitigation measures. In return, the Service provides them regulatory certainty through incidental take coverage and assurances that no more restrictions or commitments would be imposed should the species be listed. The conservation strategy is designed to incentivize oil and gas development in areas already impacted or of lower importance to LEPC. However, where LEPC may be

affected, participants would implement measures to minimize impacts and pay mitigation fees that will fund conservation efforts at a 2:1 ratio of acres of equal or greater habitat quality in important focal and connectivity areas. WAFWA would use the mitigation funds to contract willing landowners to implement habitat improvement practices, such as prescribed grazing, prescribed burning, and brush removal. When fully implemented, this CCAA will provide for the conservation and management of the LEPC and its habitat by reducing and/or eliminating threats to this species associated with non-Federal mineral development.

In terms of next steps, as of the date of this briefing paper, WAFWA is currently processing enrollment into the CCAA for about 500,000 acres for oil and gas properties with more expected soon. These numbers will likely change due to frequent requests for additional signups. WAFWA is also considering applications from landowners for habitat improvements on about 300,000 acres so far.

Conservation Efforts for the Lesser Prairie-Chicken

The final 4(d) special rule provides that take incidental to activities conducted by a participant enrolled in, and operating in compliance with the Lesser Prairie-Chicken Interstate Working Group's Lesser Prairie-Chicken Range-Wide Conservation Plan (rangewide plan) will not be prohibited. The Service has included this provision in the final 4(d) special rule in recognition of the significant conservation planning efforts of the five state wildlife agencies within the range of the lesser prairie-chicken.

On October 23, 2013, the Service endorsed the WAFWA Range-Wide Plan. The rangewide plan is a voluntary conservation strategy that establishes a mitigation framework which is administered by the Western Association of Fish and Wildlife Agencies (WAFWA) for the purpose of allowing plan participants the opportunity to mitigate any unavoidable impacts of a particular activity on the lesser prairie-chicken and provides financial incentives to landowners who voluntarily participate and manage their property for the benefit of the lesser prairie-chicken. The rangewide plan:

- (1) Identifies rangewide and sub-population level goals for the lesser prairie-chicken.
- (2) Identifies desired habitat amounts and conditions to achieve the population goals.
- (3) Uses a decision support tool that identifies focal areas and connectivity zones where lesser prairie-chicken conservation actions will be emphasized to produce the habitat conditions required to conserve the species at sustainable levels.
- (4) Enhances programs and cooperative efforts to encourage and expand voluntary landowner cooperation in the development and maintenance of the desired habitat conditions.
- (5) Promotes agreements designed to avoid and minimize impacts to lesser prairie-chicken habitat from various development activities and, where avoidance is not possible, mitigate impacts.

- (6) Establishes a mitigation framework administered by WAFWA that could be used by any entity to offset impacts to lesser prairie-chicken habitat with offsite mitigation.
- (7) Identifies research needs and implements monitoring.
- (8) Develops an adaptive management framework that will incorporate monitoring and new information into future adjustments to the conservation strategy to maximize benefits to the lesser prairie-chicken.
- (9) Addresses input and suggestions from agencies, organizations, landowners, industries, other stakeholders, and the general public on the conservation plan for the lesser prairie-chicken.

The mitigation framework used in the rangewide plan incentivizes avoidance and minimization of impacts to lesser prairie-chicken habitat. Developers agree to pay higher mitigation fees for impacts in high priority locations and in higher quality habitat, thereby incentivizing avoidance of areas important for lesser prairie-chickens. Developers can minimize or eliminate mitigation fees by locating new impacts in marginal habitat or by co-locating with existing developments. Developers agree to implement conservation measures to further minimize impacts to lesser prairie -chickens when developments do occur. For example, seasonal and daily timing restrictions on potentially disruptive activities, burying of power lines near leks, and surveys to determine presence or absence of lesser prairie -chickens are required by industry participants

Mitigation dollars will be offered to landowners within the lesser prairie-chicken range for voluntarily implementing conservation practices that benefit the species. Conservation practices are generally equivalent to practice standards defined by the NRCS, although some practices under the range-wide plan are more conservative to further benefit lesser prairie-chickens.

To incentivize conservation in the best places for lesser prairie-chickens landowners are paid under a performance-based system for producing high-quality habitat. Landowners receive increase payments as habitat quality increases. For example, landowners in high priority locations with optimal habitat will be paid 125 percent of the standard cost of implementing the needed conservation practice, as defined by the U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS). Additionally, landowners receive sign-up incentive payments based on habitat quality to further incentivize enrollment of high quality habitat.

The rangewide population goal, based on an annual spring average over a 10-year time frame, is set at 67,000 birds.

In concert with the RWP, an associated oil and gas Candidate Conservation Agreement with Assurances (CCAA) was issued by the Service on February 28, 2014, to WAFWA. Oil and gas companies can enroll in the CCAA and receive incidental take coverage for development activities within the range of the LPC if it is listed. As the master permit holder, WAFWA is currently processing enrollment for about 500,000 acres of oil and gas properties under

Certificates of Inclusion (CI). CI holders will pay mitigation fees and implement avoidance and minimization measures. WAFWA also has received applications from landowners for contracts to implement conservation practices funded by mitigation fees for about 300,000 acres.

Other Provisions of the 4(d) Special Rule for the Lesser Prairie-Chicken:

Agricultural Activities Conducted in Accordance with NRCS's Lesser Prairie-Chicken Initiative and Related NRCS Lesser Prairie-Chicken Conservation Activities: The final 4(d) special rule provides that take of the lesser prairie-chicken will not be prohibited provided the take is incidental to the conditioned conservation practices that are carried out in accordance with a conservation plan developed by NRCS in connection with NRCS's Lesser Prairie-Chicken Initiative (LPCI) and related NRCS activities focused on lesser prairie-chicken conservation consistent with the provisions of the November 22, 2013, conference opinion that was developed in coordination with the Service.

Continuation of Routine Agricultural Practices on Existing Cultivated Lands: The draft final 4(d) special rule provides that take of the lesser prairie-chicken will not be prohibited provided the take is incidental to activities that are conducted during the continuation of routine agricultural practices on cultivated lands that are in row crop, seed-drilled untilled crop, hay, or forage production. These lands must meet the definition of cropland as defined in 7 CFR 718.2, and, in addition, must have been cultivated, meaning tilled, planted, or harvested, within the previous 5 years. Thus, this provision does not include take coverage for any new conversion of grasslands into agriculture.

Other LPC Conservation Efforts:

Candidate Conservation Agreements and Candidate Conservation Agreements with Assurances (CCAs/CCAAs) have been in place for several years in three of the five LPC states - Texas, New Mexico and Oklahoma. CCAAs are voluntary and provide non-Federal landowners and developers the opportunity to implement conservation practices that address specific threats with assurances that, if the species is listed, they can continue to manage their land as outlined in their agreements with no additional requirements. Enrollment in a CCAA may only occur until the effective date of a listing.

In Texas, the Texas Parks and Wildlife Department (TPWD) holds the section 10 permit issued on November 2, 2006, for private landowner use and issues Certificates of Inclusion to participating landowners who are voluntarily implementing management plans for LPCs. Currently, 84 certificates covering 614,250 acres are enrolled in the CCAA; TPWD is currently processing other requests for enrollment.

In New Mexico, both a CCA and CCAA were issued on December 8, 2008, for surface and mineral activities and for private landowners for grazing activities. There are currently 31 oil and gas companies with a total of 883,000 mineral acres and the participating Federal agency is the BLM. In addition, 51 New Mexico ranchers have enrolled in the agreements, representing 1,750,000 enrolled acres. Partners in the New Mexico CCAA/CCA include BLM, Center of Excellence for Hazardous Materials Management (non-profit third party to manage restoration,

reclamation and funding), New Mexico Department of Game and Fish, and several oil and gas companies. On March 1, 2012, the New Mexico State Land Office enrolled all LPC habitat on state Trust lands in conservation pursuant to these agreements. Applications for enrollment have recently increased and we expect these numbers to change in the near future.

Oklahoma, under the leadership of the Oklahoma Department of Wildlife Conservation (ODWC), developed a CCAA for ranching activities. The CCAA was approved January 25, 2013. Currently, 16 certificates covering 18,649 acres are enrolled and ODWC is processing additional enrollments.

The USDA's NRCS is implementing the LPC Initiative (LPCI). The LPCI is a voluntary program that provides financial and technical assistance to landowners and operators for enhancing and maintaining chicken habitat in high priority areas and reducing threats to the species. The primary focus for the LPCI is upland wildlife habitat management. The LPCI participants can receive technical and financial assistance for a number of actions including brush management, prescribed grazing, prescribed burning, range planting and restoration of habitat. On November 22, 2013, the Service issued a conference opinion for the NRCS's LPCI and associated procedures, conservation practices, and conservation measures.

The USDA's Farm Services Agency's Conservation Reserve Program (CRP) has provided short-term protection and enhancement of millions of acres within the range of the LPC. CRP is a voluntary program that allows eligible landowners to receive annual rental payments and cost-share assistance to remove land from agricultural production and establish vegetative cover for the term of the contract. Contract terms are for 10 to 15 years. Farm Bill programs such as the CRP have provided funding that has resulted in millions of acres of habitat improvements across most of the range of the LPC. In particular, in the State of Kansas enrolled lands were planted in native grasses as the cover type, resulting in a considerable benefit to LPC conservation.

In January 2013, Farm Services Agency engaged the Service in a collaborative effort to develop a Conference Opinion (CO) to address CRP implementation on lands occurring within the estimated occupied range of the lesser prairie-chicken (OK, TX, NM, CO, and KS). The CO is intended to evaluate the cumulative landscape level effects of CRP implementation on the lesser prairie-chicken, prescribe conservation measures to avoid or minimize any adverse effects of CRP implementation, and if appropriate, provide incidental take coverage to CRP participants who adhere to the conditions in the CO. The target date for completion of the conference opinion is the end of March.

The Service's Partners for Fish and Wildlife Program is voluntary and provides financial and technical assistance for activities such as grazing management, upland restoration, and wetland enhancement.

III. ATTACHMENTS

- Map of historical and current Lesser-Prairie Chicken range

TALKING POINTS (20 minutes)

Environmental Law Institute – March 18, 2014

- Thank you John and ELI for inviting me.
- Thanks also, John, for your commitment to public service in your years in the Army and at the Department of Justice.
- Good luck on a speedy confirmation as Assistant Attorney General for the Environment and Natural Resources Division.

YOUR Observations as the 51st Secretary of the Interior (2 Items)

1. Public service

- no higher calling than public service – these are tough jobs but I believe we can **make a difference**
- **Moral obligation** to the next generation to leave our land, water, and wildlife better than we found it.
- We need to take the **long view**, particularly in the face of climate change and a growing population.

2. Budgetary Constraints

- Something new in this job is dealing with the absurd world of sequestration and government shutdown.
- Not only does the public suffer from loss of vital, critical govt services, but local economies also suffer.
- We need sustainable budgets that support our public lands. The American public wants to see common sense and bipartisanship.

- Recently announced Proposed FY 2015 Budget – highlights include:
 - Mandatory funding (\$900 million) for the **Land and Water Conservation Fund** in 2015.
 - **National Parks Centennial Initiative in 2016** (\$1.2B total permanent funding over 3 years)– celebrate “America’s Best Idea” where lands are set aside for everyone.
 - Supports the **President’s Climate Action Plan** to move the economy toward clean energy sources, cut carbon pollution.
 - Interior by 2020 – **20,000 Megawatts** of renewable energy (6 million homes)
 - \$1 billion govt-wide **Climate Resilience Fund** – finding solutions to climate change in technology and applied research

NOTE: The proposed FY 2015 Budget also includes **Legislative proposals**. The following **EXAMPLES** would generate \$2.5 B to Treasury from 2015 to 2024:

- royalty reforms (minimum rates, repealing mandatory royalty relief)
- diligent development of oil and gas leases (shorter lease terms, incentives to produce)
- improved revenue collection (simplified valuation process; repeal of in-kind payments)

Most Pressing Issues Facing Interior (4 Items)

1. Mitigation

- October 31, 2013, I signed a **Secretarial Order** that calls for a Department-wide mitigation strategy.
 - Good government – reduce conflicts and delays

- Simpler, more straightforward approach for businesses
- Provides certainty and clarity
- Instead of ad-hoc, project-by-project mitigation
- We have the tools to ensure that conventional and traditional energy development occurs in **the right place in the right way**. Examples include:
 - Work with **local communities** to learn their regional conservation priorities
 - Integrate mitigation considerations **early** in project planning
 - Make sure mitigation measures are **durable**.
 - Improve the **resiliency** of our Nation's resources in the face of climate change.
- I look forward to receiving the report from the Task Force in the near future

[NOTE: The Task Force relied on ELI studies of compensatory mitigation programs to learn from the experiences of the Army Corps of Engineers and EPA under Section 404 of the Clean Water Act.]

2. Landscape Level Planning

- My belief is that to serve as good stewards, we must take a **global, birds-eye view**.
- Conservation and development can both occur – it doesn't have to be an **“either or”** proposition
- At Interior, we have the **geospatial tools and data** to see what makes sense where.
- I just announced in February the **First National Interactive Map of Onshore Wind Turbines**.

- USGS map showed more than 47,000 wind turbine locations across the US
- Help improve siting of future projects and aid land managers
- In December, I met with western governors in Nevada. I emphasized the need to redouble our efforts on **Sage Grouse Conservation Planning** (also reaffirmed at WGA meeting in Feb)
 - We are working in a **holistic approach, across the landscape**—state, federal and private
 - Task Force consists of **11 states**, FWS, BLM, US Forest Service.
 - **98 land management plans** – amending to address sage grouse conservation. Final amendments by end of this year
 - Deadline of **Sept, 2015** for listing decision
- Other examples – Desert Renewable Energy Conservation Plan; Alaska National Petroleum Reserve

3. Drought in the West

- I recently visited California which is suffering from the **worst drought** since the 1970s.
 - I witnessed firsthand the dire situation talking to **agricultural water users** in the San Joaquin Delta
- We must use a **balanced and coordinated approach** to providing water for all needs – agriculture, business, power, and the environment.
- We must confront the **realities** of a changing climate, increasing population, and diminishing supply.

- The Administration is committed to an “**all in**” approach to federal response to drought conditions in the West.
- We are working closely with the State on the **Bay Delta Conservation Plan**.
- **WaterSMART** projects and funding (FY 2015 \$66.5 m) has a goal to increase by 840,000 acre-feet by 2015 the water supply for agricultural, municipal, industrial, and environmental uses in the west.

[NOTE: The 9th Circuit (CA) just issued a largely favorable ruling in the delta smelt litigation that upheld the FWS Biological Opinion, admonished the lower court judge for allowing the case to become a battle between the parties’ experts, and reaffirmed that judges should defer to the federal agency’s expertise.]

4. Engaging the Next Generation

- **Millennial Generation (18 to 33 yrs old)** – larger, more urban, more diverse
 - Disconnected from the outdoors. These are our future stewards of our public lands.
 - **Time to UN-PLUG!**
- **PLAY, LEARN, SERVE & WORK**
 - By 2017, develop partnerships in **50 cities** to create outdoor recreation opportunities for more than **10 million** young people.
 - Annually provide **educational** opportunities to **10 million** young people
 - Engage **1 million** volunteers on our public lands by 2017

- Provide **100,000** work and training opportunities for youth over the next 4 years
- **White House Champions of Change Event** – Engaging the Next Generation of Conservation Leaders
 - This morning, I participated in this important event that recognizes the amazing work of 14 young people who are connecting their peers with the outdoors, volunteering in our leading conservation organizations, and elevating the importance of protecting our natural spaces.
- **21st Century Conservation Service Corps Initiative**
 - In January, **American Eagle Outfitters** announced a \$1 million
 - **Camelback** \$100,000 commitment

How Do You Get Things Done in Washington DC (3 Items)

1. We cannot wait for Congress

- **National Monuments** – Antiquities Act authority
 - 10 national monuments under Obama (e.g., Rio Grande del Norte, Cesar Chavez, Harriet Tubman)
 - Just last week, **Point Arena- Stornetta** - 1,665 acres of a significant and spectacular stretch of public lands along the Mendocino coastline in Northern California.
 - Will continue to talk with communities and evaluate opportunities to protect our nation’s stories and landscapes.
- I applaud President Obama and Congress for designating wilderness in the **Sleeping Bears Dune National Lakeshore** (Michigan).

- Our 50th national park with wilderness
- It has been 5 years since Congress has taken steps to protect our precious landscapes
- I encourage Congress to pass other conservation proposals awaiting action

2. Public-private partnerships

- Last week, I announced with Los Angeles Mayor Eric Garcetti that LA has been selected as one of 8 pilot cities under the FWS' **Urban Wildlife Refuge Initiative** to connect urban youth with the great outdoors
- In February, I joined Senator Lamar Alexander on a visit to the **Great Smoky Mountains National Park** to focus on public-private partnerships in the region.
- I just got back from a trip to Montana where I met with ranchers who are leading collaborative efforts to conserve the **Crown of the Continent ecosystem** (includes LCWF conservation easements)

3. Highlight the economic benefits of conservation/outdoor recreation

- In 2012, Interior contributed an estimated \$371 billion to the economy and supported an estimated 2.3 million in American jobs.
- This month, I announced a peer-reviewed report showing that National Parks across the country generated \$26.75 billion in economic activity and support 243,000 jobs.

I am happy to take any questions at this time.

EVENT MEMORANDUM FOR THE SECRETARY

MEETING WITH THE IDAHO CONGRESSIONAL DELEGATION

DATE: March 17, 2014
LOCATION: National Interagency Fire Center, Boise, ID
TIME: 9:30AM – 10:00AM MDT
FROM: Tim Murphy, Acting BLM Idaho State Director (208)373-4001

I. PURPOSE

The purpose of this meeting is to meet with the Idaho Congressional delegation regarding Greater Sage-Grouse issues in the State.

II. PARTICIPANTS

- Senator Jim Risch
- Senator Mike Crapo
- Rep. Mike Simpson (tentative)

III. BACKGROUND

In 2011, the BLM and the Forest Service joined forces to develop, analyze and incorporate coordinated, long-term conservation measures and actions for the Greater Sage-Grouse to be in their LUPs. These planning measures must be incorporated into LUPs by the end of 2014 to give the FWS time to evaluate them before making a court-ordered, final listing decision in 2015.

Discussion

As part of the joint effort, the BLM and FS issued a draft LUP amendment and draft environmental impact statement (EIS) on November 1, 2013, that would amend BLM and FS land management plans covering Idaho and Southwestern Montana. The draft was developed through a coordinated effort between BLM, FS, USFWS, State of Idaho Department of Fish and Game, Office of Species Conservation, Montana Fish, Wildlife and Parks, the National Resources Conservation Service, and local cooperating agencies, including the National Park Service, Department of Defense, Idaho National Laboratory, and multiple counties in Idaho and Montana.

The Draft LUP Amendment/EIS would amend 21 BLM resource management plans and 8 Forest Service land management plans covering BLM and NF lands in Idaho and Southwestern Montana. Within this Sub-region are a total of 11 million acres of Greater Sage-Grouse habitat area, of which approximately 9 million acres are managed by the BLM and 2 million acres are managed by the FS. The Final Plan Amendment and EIS for the Great Basin Region Idaho and Southwestern Montana Sub-region is on schedule to be released in the summer of 2014, with the Record of Decision to be signed in the fall of 2014.

Throughout this effort, the BLM and FS have diligently coordinated and worked collaboratively with all interested parties. Through this, the BLM and the FS have identified Alternatives D (Idaho and Southwest Montana sub-regional alternative) and E (Idaho Governor's Alternative) as co-Preferred Alternatives for the purposes of public comment and review. BLM and Forest Service officials agree that portions of the management guidance described within each of these two alternatives respond best to Greater Sage-Grouse habitat threats within the Idaho and Southwestern Montana sub-region.

Next Steps

As we move towards crafting the proposed plan and final decision, the BLM and FS continue to work with FWS, the states of Idaho and Montana, and the other local cooperating agencies, particularly the Idaho Governor's Sage-Grouse Task Force. This includes working on a weekly basis with the State of Idaho to refine and further define the approach with the overall goal that we can all move forward in support of the final outcome. In support of this, we are working from the field and technical level to the manager and decision level.

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL ESA DISCUSSION

DATE: March 19, 2014
LOCATION: Office of the Secretary
TIME: 9:30AM – 10:30AM
FROM: Colorado Ecological Services Field Office, Region 6; Dan Ashe, Director, FWS (202)208-4717; Noreen Walsh, Regional Director, Region 6, (303) 236-4579; Matt Hogan, Deputy Regional Director, Region 6; Gary Frazer, Assistant Director-Endangered Species

I. PURPOSE

The purpose of this meeting is to discuss with you the status of Final Listing Determination for the Gunnison Sage Grouse and the Lesser Prairie Chicken, as well as (1) the range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken, and (2) Conservation efforts for the Lesser Prairie-chicken.

II. BACKGROUND

Final Listing Determination for Gunnison Sage-grouse (GUSG)

On September 15, 2010, FWS determined that listing the GUSG as a threatened or endangered species was warranted but precluded by higher priority listing actions, and the species was added to the candidate list. Proposed rules to list the GUSG as endangered and to designate critical habitat were published on January 11, 2013. A six-month extension was obtained for completion of the final documents. Subsequent to that, an additional 6 week extension was obtained. The final determination is due to the Federal Register by May 12, 2014.

The current range of GUSG is limited to seven widely scattered and isolated populations in southwestern Colorado and southeastern Utah, with an estimated rangewide population of 4,700 individuals. Of the estimated 940,000 acres (ac) (380,000 hectares [ha]) of rangewide occupied habitat, approximately 54 percent occurs on Federal lands; 41 percent occurs on private lands; and 5 percent occurs on state lands.

The Gunnison Basin GUSG population contains approximately 87 percent of the total number of birds and 63 percent of rangewide occupied habitat for the species. The remaining six satellite populations are much smaller than the Gunnison Basin population.

During the public comment period we received information indicating substantial scientific disagreement regarding the interpretation of scientific literature, literature that we may have overlooked, GUSG population trends, the scope of Gunnison County's legal authority to address threats to GUSG, projections about the extent and pattern of future residential development within the range of the species, and what constitutes historical habitat and important current habitat for the species.

In terms of next steps, FWS is finalizing the rulemaking for GUSG. This includes a recommendation for a final rule to list the species as threatened, a final critical habitat designation, and a proposed special rule under section 4(d). The special rule would exempt take for certain practices associated with the Gunnison County development regulations, practices associated with grazing and ranching, and some activities under the Range Wide Conservation Strategy. The Service is considering delaying the effective date of the listing by six months to provide time to finalize the 4(d) rule.

In addition, the Service is working with partners to better articulate the actions necessary to reduce the remaining threats to the satellite populations. This may in turn include amending the Range Wide Conservation Plan for GUSG completed in 2005. A Biology Team has been established to determine the Targets and Actions that will provide sufficient confidence that, when they are achieved, a not warranted finding would result. Should the GUSG be listed, the completion of these actions would likely lead to a proposed delisting.

Biology Team Objectives:

1. Identify population and/or habitat targets within each sub-area that, if achieved, will increase FWS confidence in GUSG conservation. The population and habitat targets will be objective, measurable, and science-based.
2. Identify the Conservation Actions that will address the most important threats to the most important populations that can fulfill the population and habitat targets, sufficient that GUSG will be conserved.
3. In the event of a Threatened finding, to ensure continued conservation and provide input on a possible 4(d) rule.

The Service has asked for the assistance of Colorado Parks and Wildlife to review the 4(d) for clarity and completeness. Subsequent to the biological information being completed the Service will engage local partners on how to develop implementation programs to achieve the biological targets and objectives.

Time Line:

The Biology Team will complete recommendations for internal review by March 21, 2014. The final determination will be published May 12, 2014.

Final Listing Determination for the Lesser Prairie-Chicken

Below is background on the Service's final determination to list the lesser prairie-chicken as a threatened species, with a 4(d) special rule. [Note: see attached for map of historical and current range]

The lesser prairie-chicken (LPC) - a species of prairie grouse that currently occupies a five-state range including Texas, New Mexico, Oklahoma, Kansas, and Colorado - has been a candidate for listing under the Endangered Species Act since 1998. The LPC requires large expanses of

relatively intact native grasslands and prairies to maintain self-sustaining populations. The life history and ecology of the lesser prairie-chicken make it exceptionally vulnerable to changes on the landscape, especially at its currently reduced numbers. This vulnerability to habitat impacts results from the species' lek breeding system which requires males and females to be able to hear and see each other over relatively wide distances, the need for large patches of habitat that include several types of microhabitats, and the behavioral avoidance of vertical structures.

There has been a substantial decrease in the range of the LPC primarily as a result of habitat loss and fragmentation - the primary threat to the species (see attached map of historical and current range). Land use changes related to oil and gas activities, wind energy, transmission development, and agricultural conversion of native prairie, in combination with the potential loss of Conservation Reserve Program acres, present conservation challenges for the species. These ongoing threats, coupled with reduced population size due to the recent severe drought, makes the species especially vulnerable to continuing impacts on the landscape. The vast majority of LPC habitat occurs on private lands across its range and therefore partnerships are critical to conservation of the species.

The range-wide LPC population last year was a record low of roughly 17,600 birds, a nearly 50% decline from the previous year's estimate and likely due to the recent severe drought, habitat loss and fragmentation.

Discussion:

A number of voluntary conservation efforts for LPC have been developed in recent years (see attached summary of LPC Conservation Efforts). The most significant of these have been the LPC Range-wide Plan developed by the 5 state fish and wildlife agencies, under the auspices of the Western Association of Fish and Wildlife Agencies (WAFWA), and the NRCS' Lesser Prairie-chicken Initiative, which targets their conservation program funding toward implementing management practices beneficial to the LPC.

While implementation of these conservation efforts will produce a net conservation benefit to the species, the positive benefits of those efforts will largely be demonstrated in the future rather than now at the time of our listing decision. For example, even with the significant enrollment in the RWP in the short term, it will still take several years for habitat improvement practices to take effect. Complicating the issue of conservation delivery is the role of continued drought on the landscape. If there is rain, the improved management on agricultural lands could result in a quick upturn in the status of the species. However, if the drought continues, the habitats will likely not rebound to create additional usable habitat as quickly or at all, and the LPC population will likely not be able to successfully reproduce and grow, despite the efforts of enrolled landowners.

In light of the current precarious status of the population and the ongoing threats it faces, including the severe drought, the Service has concluded that the LPC warrants listing as a threatened species, i.e, one that is in danger of extinction within the foreseeable future throughout all or a significant portion of its range.

The 4(d) special rule that will accompany this listing determination is designed to encourage participation in voluntary conservation efforts, empower the state fish and wildlife agencies to continue to play the lead role in conservation of the LPC, and to remove ESA regulation from activities that are not significant threats to the bird.

Specifically, the 4(d) rule will exempt take of LPC that is incidental to implementing the WAFWA Range-wide LPC Conservation Plan. This plan covers a wide range of development and conservation activities, will be administered by the states through WAFWA, and will provide a vehicle for ESA compliance for all participating landowners. It will provide for an unprecedented state-federal cooperative partnership in managing a listed species.

Similarly, the 4(d) rule will exempt take incidental to implementing the conservation practices agreed to between NRCS and participating landowners through their Lesser Prairie-chicken Initiative. We expect that giving NRCS the ability to tell participating ranchers and farmers that ESA compliance is assured if they manage their operations using those conservation practices will encourage more voluntary conservation.

The 4(d) rule will also exempt take incidental to routine agricultural activities on existing cultivated land.

In terms of next steps, the final listing determination and 4(d) rule will be delivered to the *Federal Register* by March 31, 2014. The Service has developed a comprehensive outreach plan and will be working with the Department and other agencies to polish and deliver our message.

Range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken

The Western Association of Fish and Wildlife Agencies (WAFWA) will administer the CCAA and enroll oil and gas properties under the permit through certificates of inclusion. Region 6 issued an Enhancement of Survival Permit WAFWA on February 28, 2014, for the Range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken (CCAA).

The CCAA is a voluntary agreement intended to address the effects of oil and gas activities on the lesser prairie-chicken (LEPC) and its habitat in the species' five-state range in Kansas, Colorado, Oklahoma, New Mexico, and Texas. The CCAA will be administered by WAFWA with oversight by the Service. The CCAA was designed to help implement the conservation strategy of the Lesser Prairie-chicken Rangewide Conservation Plan (RWP), which is a comprehensive conservation plan developed by the Lesser Prairie-Chicken Interstate Working Group of WAFWA. While the RWP addresses the suite of development activities that impact the LEPC, the CCAA focuses on oil and gas impacts. Oil and gas operators can voluntarily enroll their properties in the CCAA to implement avoidance, minimization, and mitigation measures. In return, the Service provides them regulatory certainty through incidental take coverage and assurances that no more restrictions or commitments would be imposed should the species be listed. The conservation strategy is designed to incentivize oil and gas development in areas already impacted or of lower importance to LEPC. However, where LEPC may be

affected, participants would implement measures to minimize impacts and pay mitigation fees that will fund conservation efforts at a 2:1 ratio of acres of equal or greater habitat quality in important focal and connectivity areas. WAFWA would use the mitigation funds to contract willing landowners to implement habitat improvement practices, such as prescribed grazing, prescribed burning, and brush removal. When fully implemented, this CCAA will provide for the conservation and management of the LEPC and its habitat by reducing and/or eliminating threats to this species associated with non-Federal mineral development.

In terms of next steps, as of the date of this briefing paper, WAFWA is currently processing enrollment into the CCAA for about 500,000 acres for oil and gas properties with more expected soon. These numbers will likely change due to frequent requests for additional signups. WAFWA is also considering applications from landowners for habitat improvements on about 300,000 acres so far.

Conservation Efforts for the Lesser Prairie-Chicken

The final 4(d) special rule provides that take incidental to activities conducted by a participant enrolled in, and operating in compliance with the Lesser Prairie-Chicken Interstate Working Group's Lesser Prairie-Chicken Range-Wide Conservation Plan (rangewide plan) will not be prohibited. The Service has included this provision in the final 4(d) special rule in recognition of the significant conservation planning efforts of the five state wildlife agencies within the range of the lesser prairie-chicken.

On October 23, 2013, the Service endorsed the WAFWA Range-Wide Plan. The rangewide plan is a voluntary conservation strategy that establishes a mitigation framework which is administered by the Western Association of Fish and Wildlife Agencies (WAFWA) for the purpose of allowing plan participants the opportunity to mitigate any unavoidable impacts of a particular activity on the lesser prairie-chicken and provides financial incentives to landowners who voluntarily participate and manage their property for the benefit of the lesser prairie-chicken. The rangewide plan:

- (1) Identifies rangewide and sub-population level goals for the lesser prairie-chicken.
- (2) Identifies desired habitat amounts and conditions to achieve the population goals.
- (3) Uses a decision support tool that identifies focal areas and connectivity zones where lesser prairie-chicken conservation actions will be emphasized to produce the habitat conditions required to conserve the species at sustainable levels.
- (4) Enhances programs and cooperative efforts to encourage and expand voluntary landowner cooperation in the development and maintenance of the desired habitat conditions.
- (5) Promotes agreements designed to avoid and minimize impacts to lesser prairie-chicken habitat from various development activities and, where avoidance is not possible, mitigate impacts.

- (6) Establishes a mitigation framework administered by WAFWA that could be used by any entity to offset impacts to lesser prairie-chicken habitat with offsite mitigation.
- (7) Identifies research needs and implements monitoring.
- (8) Develops an adaptive management framework that will incorporate monitoring and new information into future adjustments to the conservation strategy to maximize benefits to the lesser prairie-chicken.
- (9) Addresses input and suggestions from agencies, organizations, landowners, industries, other stakeholders, and the general public on the conservation plan for the lesser prairie-chicken.

The mitigation framework used in the rangewide plan incentivizes avoidance and minimization of impacts to lesser prairie-chicken habitat. Developers agree to pay higher mitigation fees for impacts in high priority locations and in higher quality habitat, thereby incentivizing avoidance of areas important for lesser prairie-chickens. Developers can minimize or eliminate mitigation fees by locating new impacts in marginal habitat or by co-locating with existing developments. Developers agree to implement conservation measures to further minimize impacts to lesser prairie -chickens when developments do occur. For example, seasonal and daily timing restrictions on potentially disruptive activities, burying of power lines near leks, and surveys to determine presence or absence of lesser prairie -chickens are required by industry participants

Mitigation dollars will be offered to landowners within the lesser prairie-chicken range for voluntarily implementing conservation practices that benefit the species. Conservation practices are generally equivalent to practice standards defined by the NRCS, although some practices under the range-wide plan are more conservative to further benefit lesser prairie-chickens.

To incentivize conservation in the best places for lesser prairie-chickens landowners are paid under a performance-based system for producing high-quality habitat. Landowners receive increase payments as habitat quality increases. For example, landowners in high priority locations with optimal habitat will be paid 125 percent of the standard cost of implementing the needed conservation practice, as defined by the U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS). Additionally, landowners receive sign-up incentive payments based on habitat quality to further incentivize enrollment of high quality habitat.

The rangewide population goal, based on an annual spring average over a 10-year time frame, is set at 67,000 birds.

In concert with the RWP, an associated oil and gas Candidate Conservation Agreement with Assurances (CCAA) was issued by the Service on February 28, 2014, to WAFWA. Oil and gas companies can enroll in the CCAA and receive incidental take coverage for development activities within the range of the LPC if it is listed. As the master permit holder, WAFWA is currently processing enrollment for about 500,000 acres of oil and gas properties under

Certificates of Inclusion (CI). CI holders will pay mitigation fees and implement avoidance and minimization measures. WAFWA also has received applications from landowners for contracts to implement conservation practices funded by mitigation fees for about 300,000 acres.

Other Provisions of the 4(d) Special Rule for the Lesser Prairie-Chicken:

Agricultural Activities Conducted in Accordance with NRCS's Lesser Prairie-Chicken Initiative and Related NRCS Lesser Prairie-Chicken Conservation Activities: The final 4(d) special rule provides that take of the lesser prairie-chicken will not be prohibited provided the take is incidental to the conditioned conservation practices that are carried out in accordance with a conservation plan developed by NRCS in connection with NRCS's Lesser Prairie-Chicken Initiative (LPCI) and related NRCS activities focused on lesser prairie-chicken conservation consistent with the provisions of the November 22, 2013, conference opinion that was developed in coordination with the Service.

Continuation of Routine Agricultural Practices on Existing Cultivated Lands: The draft final 4(d) special rule provides that take of the lesser prairie-chicken will not be prohibited provided the take is incidental to activities that are conducted during the continuation of routine agricultural practices on cultivated lands that are in row crop, seed-drilled untilled crop, hay, or forage production. These lands must meet the definition of cropland as defined in 7 CFR 718.2, and, in addition, must have been cultivated, meaning tilled, planted, or harvested, within the previous 5 years. Thus, this provision does not include take coverage for any new conversion of grasslands into agriculture.

Other LPC Conservation Efforts:

Candidate Conservation Agreements and Candidate Conservation Agreements with Assurances (CCAs/CCAAs) have been in place for several years in three of the five LPC states - Texas, New Mexico and Oklahoma. CCAAs are voluntary and provide non-Federal landowners and developers the opportunity to implement conservation practices that address specific threats with assurances that, if the species is listed, they can continue to manage their land as outlined in their agreements with no additional requirements. Enrollment in a CCAA may only occur until the effective date of a listing.

In Texas, the Texas Parks and Wildlife Department (TPWD) holds the section 10 permit issued on November 2, 2006, for private landowner use and issues Certificates of Inclusion to participating landowners who are voluntarily implementing management plans for LPCs. Currently, 84 certificates covering 614,250 acres are enrolled in the CCAA; TPWD is currently processing other requests for enrollment.

In New Mexico, both a CCA and CCAA were issued on December 8, 2008, for surface and mineral activities and for private landowners for grazing activities. There are currently 31 oil and gas companies with a total of 883,000 mineral acres and the participating Federal agency is the BLM. In addition, 51 New Mexico ranchers have enrolled in the agreements, representing 1,750,000 enrolled acres. Partners in the New Mexico CCAA/CCA include BLM, Center of Excellence for Hazardous Materials Management (non-profit third party to manage restoration,

reclamation and funding), New Mexico Department of Game and Fish, and several oil and gas companies. On March 1, 2012, the New Mexico State Land Office enrolled all LPC habitat on state Trust lands in conservation pursuant to these agreements. Applications for enrollment have recently increased and we expect these numbers to change in the near future.

Oklahoma, under the leadership of the Oklahoma Department of Wildlife Conservation (ODWC), developed a CCAA for ranching activities. The CCAA was approved January 25, 2013. Currently, 16 certificates covering 18,649 acres are enrolled and ODWC is processing additional enrollments.

The USDA's NRCS is implementing the LPC Initiative (LPCI). The LPCI is a voluntary program that provides financial and technical assistance to landowners and operators for enhancing and maintaining chicken habitat in high priority areas and reducing threats to the species. The primary focus for the LPCI is upland wildlife habitat management. The LPCI participants can receive technical and financial assistance for a number of actions including brush management, prescribed grazing, prescribed burning, range planting and restoration of habitat. On November 22, 2013, the Service issued a conference opinion for the NRCS's LPCI and associated procedures, conservation practices, and conservation measures.

The USDA's Farm Services Agency's Conservation Reserve Program (CRP) has provided short-term protection and enhancement of millions of acres within the range of the LPC. CRP is a voluntary program that allows eligible landowners to receive annual rental payments and cost-share assistance to remove land from agricultural production and establish vegetative cover for the term of the contract. Contract terms are for 10 to 15 years. Farm Bill programs such as the CRP have provided funding that has resulted in millions of acres of habitat improvements across most of the range of the LPC. In particular, in the State of Kansas enrolled lands were planted in native grasses as the cover type, resulting in a considerable benefit to LPC conservation.

In January 2013, Farm Services Agency engaged the Service in a collaborative effort to develop a Conference Opinion (CO) to address CRP implementation on lands occurring within the estimated occupied range of the lesser prairie-chicken (OK, TX, NM, CO, and KS). The CO is intended to evaluate the cumulative landscape level effects of CRP implementation on the lesser prairie-chicken, prescribe conservation measures to avoid or minimize any adverse effects of CRP implementation, and if appropriate, provide incidental take coverage to CRP participants who adhere to the conditions in the CO. The target date for completion of the conference opinion is the end of March.

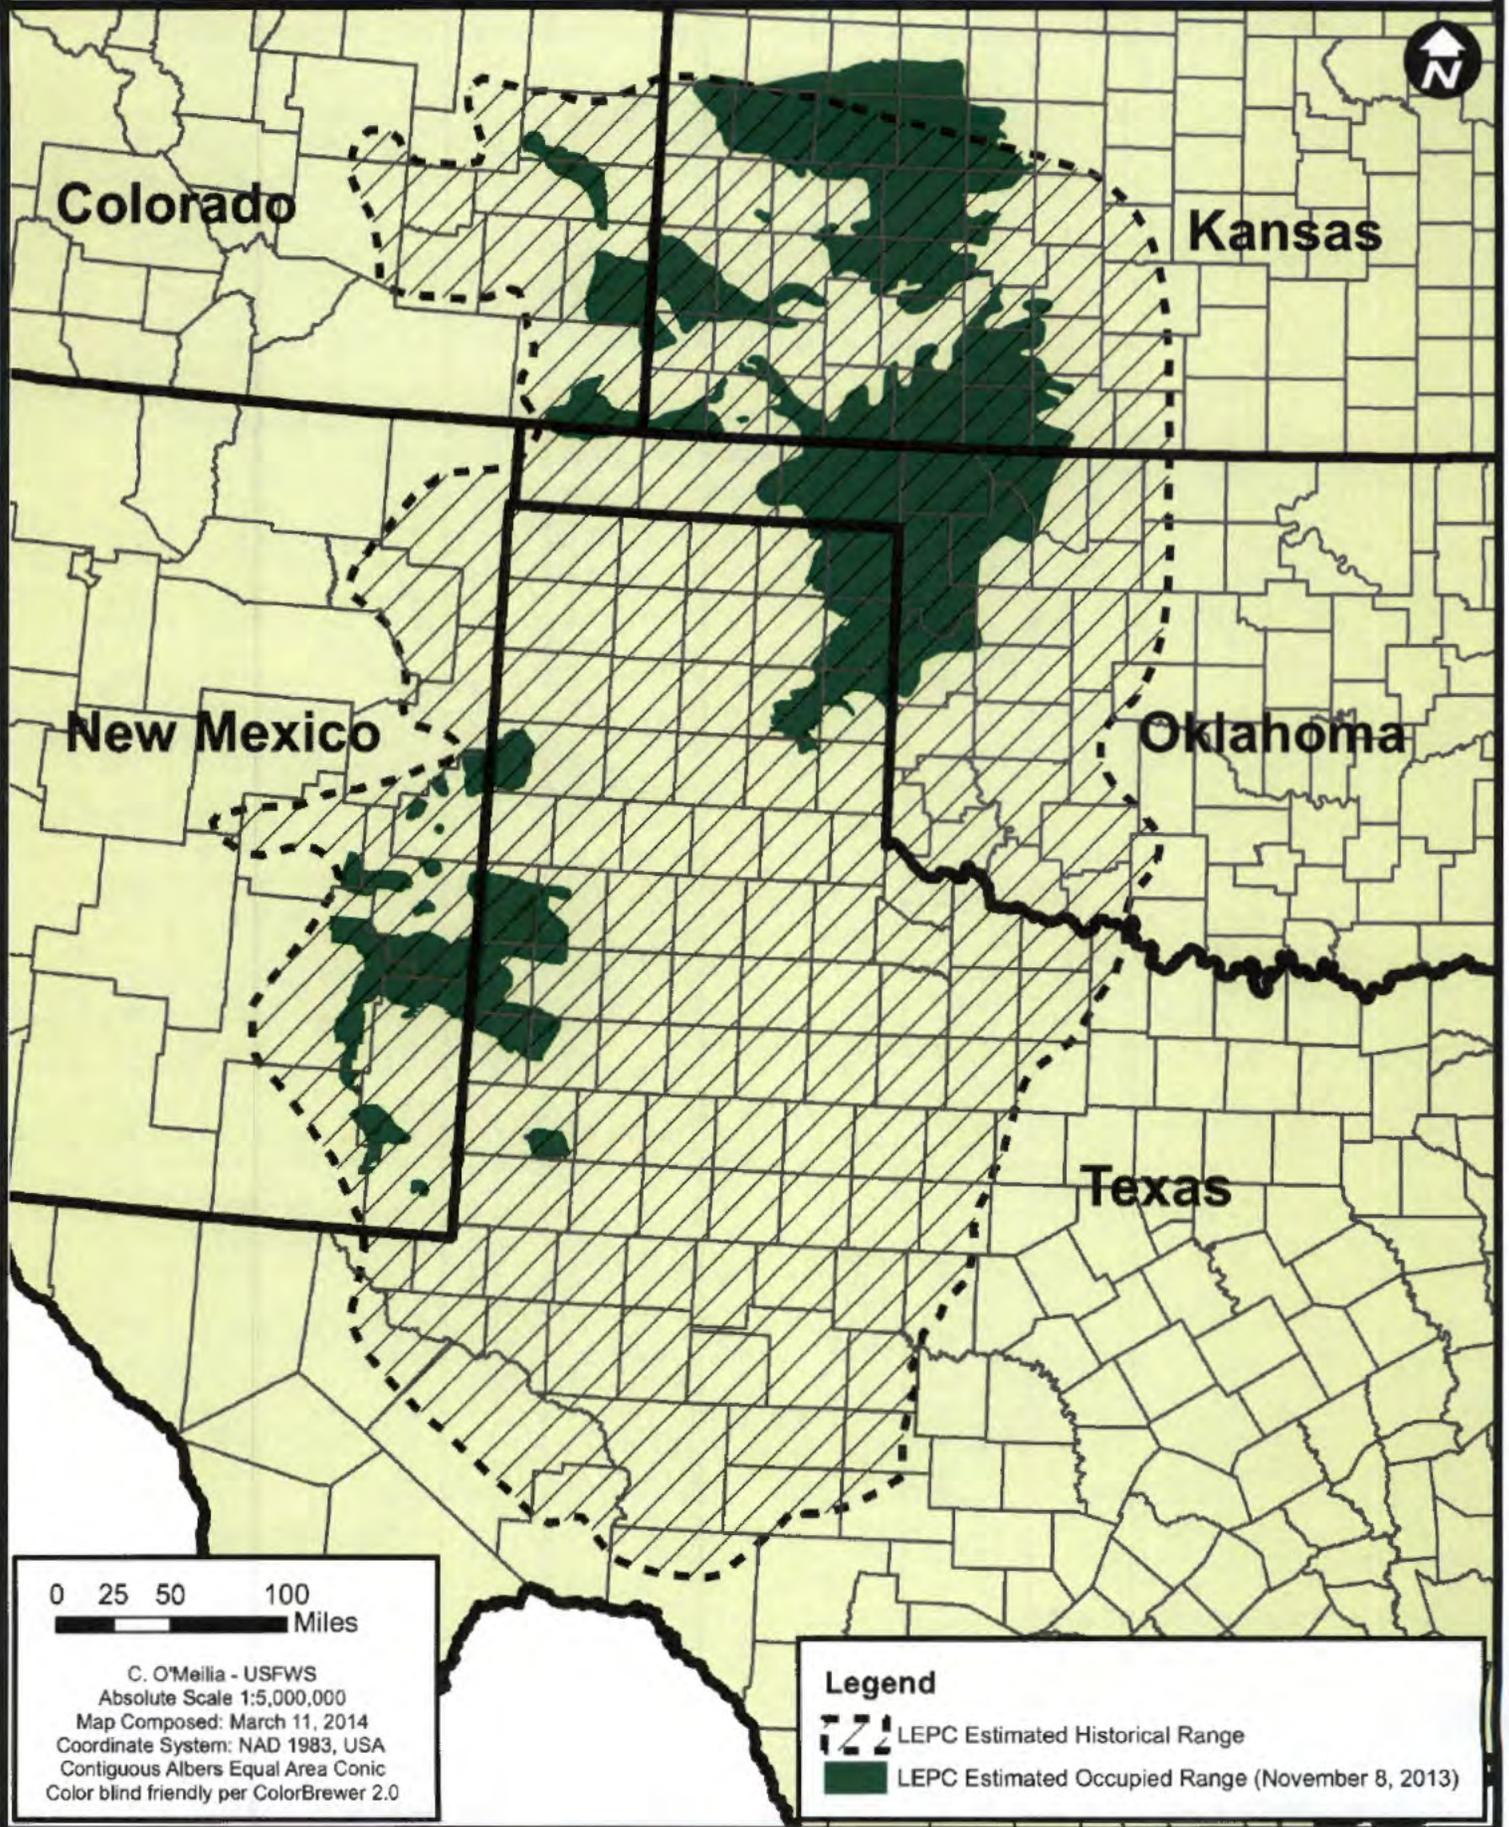

The Service's Partners for Fish and Wildlife Program is voluntary and provides financial and technical assistance for activities such as grazing management, upland restoration, and wetland enhancement.

**STATEMENT OF SALLY JEWELL, SECRETARY OF THE INTERIOR
BEFORE THE SUBCOMMITTEE ON INTERIOR,
ENVIRONMENT AND RELATED AGENCIES,
HOUSE COMMITTEE ON APPROPRIATIONS
ON THE 2015 PRESIDENT'S BUDGET REQUEST**

March 25, 2014

Mr. Chairman and members of the Committee, I am pleased to present the 2015 President's Budget for the Department of the Interior.

One of the first things I did on becoming Interior Secretary, was to meet with this subcommittee on the 2014 budget. This subcommittee remains an important partner in the accomplishment of Interior's mission and I appreciate our excellent working relationship, which allows us to resolve challenges and take advantage of opportunities. I appreciate the efforts of the Subcommittee in the development of 2014 appropriations that reversed the sequester and minimized legislative riders.

Today, I have the privilege of appearing before you, Chairman Calvert, at one of your first hearings as Chair of this Subcommittee and to extend my congratulations on the record. I am pleased this year the budget has resumed more "business as usual" circumstances and we can discuss 2015 in the context of an enacted 2014 Appropriation.

This budget is balanced and responsible and supports Interior's pivotal role as a driver of jobs and economic activity in communities across the country. It enables us to carry out core mission responsibilities and commitments. This budget allows Interior to uphold trust responsibilities to American Indians and Alaska Natives, provides a new approach for responsibly budgeting for wildland fire suppression needs, invests in climate resilience, continues smart and balanced all-of-the-above energy development on and offshore, and bolsters our national parks and public lands in advance of the National Park Service's 100th anniversary in 2016.

Interior's programs and activities serve as economic engines in communities across the Nation, contributing an estimated \$371 billion to the economy in 2012 and supporting an estimated 2.3 million American jobs. Of this total, energy and mineral development on Interior-managed lands and offshore areas generated more than \$255 billion of this economic activity and supported 1.3 million jobs. Recreation and tourism on Interior lands contributed \$45 billion to the economies of local communities and supported nearly 372,000 jobs. Water supply, forage and timber activities, primarily on public lands in the West, contributed more than \$50 billion and supported 365,000 jobs.

The President's 2015 budget for the Department of the Interior totals \$11.9 billion, an increase of 2.4 percent from 2014, which includes a cap exemption for fire emergencies. Without this exemption, Interior's budget totals \$11.7 billion, a 0.3 percent increase, essentially level with last year's funding.

This budget features three key legislative proposals: a new framework to fund wildland fire suppression requirements; additional investment in the infrastructure and visitor experience at our National Parks and public lands; and full and permanent funding for the Land and Wildlife Conservation Fund. Each of these proposals will significantly enhance our ability to conserve and manage the Nation's public lands.

The budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of 1985, to provide stable funding for fire suppression, while minimizing the adverse impacts of fire transfers on other Interior programs, and allowing Interior to reduce fire risk, manage landscapes more comprehensively, and increase the resiliency of public lands and the communities that border them. In this proposed new framework, \$268.6 million, or 70 percent of the funding need for suppression response is funded within the discretionary spending limits and \$240.4 million is available as an adjustment to the budget caps.

In advance of the 100th anniversary of the National Park Service in 2016, the 2015 budget proposes a comprehensive Centennial Initiative investment in the parks and public lands. The funding would provide targeted increases for a multi-year effort to recommit to the preservation of these special places, to invest wisely in the park system's most important assets, to use parks to enhance informal learning, engage volunteers, provide training opportunities to youth, and enhance the National Park Service's ability to leverage partnerships to accomplish its mission.

Finally, the President's budget continues to support full, permanent funding for the Land and Water Conservation Fund, one of the Nation's most effective tools for expanding access for hunting and fishing, creating ball fields and other places for children to play and learn, protecting historic uses, and protecting Civil War battlefields. The 2015 budget proposes total funding of \$900.0 million for LWCF in Interior and the U.S. Forest Service. Within this total, \$350.0 million is requested as current funding and \$550.0 million as part of a permanent funding proposal. Starting in 2016, the proposal would provide \$900.0 million annually in permanent funding.

Complementing the 2015 budget request is \$346.0 million identified for Interior programs as part of the President's Opportunity, Growth, and Security Initiative to spur economic progress and promote opportunity. If approved, these investments will enable significant progress to address long-term needs in the national parks and other public lands, research and development, infrastructure and permitting support, climate resiliency, and education and economic development in Indian Country.

2015 Budget

The 2015 budget request includes \$10.6 billion in current funding for programs under the jurisdiction of the Interior, Environment and Related Agencies Subcommittee. This is a \$104.9 million, or a one percent increase, compared to 2014. Total funding for the Department includes \$1.0 billion requested for the Bureau of Reclamation and the Central Utah Completion Act which are under the jurisdiction of the Energy and Water Development Subcommittee.

In addition to the proposals already discussed, the 2015 request sustains support for essential requirements and allows for targeted increases above the 2014 enacted level. Within the overall

increase for 2015, \$54.4 million covers unavoidable fixed cost increases for such things as Federal pay and rent. Reflecting the need to prioritize budget resources, this request includes \$413.3 million in proposed program reductions to offset other programmatic requirements.

Interior programs continue to generate more revenue for the American people than the Department's annual current appropriation. In 2015, Interior will generate estimated receipts of nearly \$14.9 billion, a portion of which is shared with State and local governments to meet a variety of needs, including school funding, infrastructure improvements and water-conservation projects. Also included with this request are revenue and savings legislative proposals estimated to generate more than \$2.6 billion over the next decade.

Putting this budget in context, Interior's complex mission affects the lives of all Americans. Nearly every American lives within an hour's drive of lands or waters managed by the Interior Department. In 2012, there were 417 million visits to Interior-managed lands. The Department oversees the responsible development of over 20 percent of U.S. energy supplies, is the largest supplier and manager of water in the 17 western States, maintains relationships with 566 federally recognized Tribes, and provides services to more than 1.7 million American Indian and Alaska Native peoples.

Celebrating and Enhancing America's Great Outdoors

Throughout American history, the great outdoors have shaped the Nation's character and strengthened its economy. The 2015 budget requests the resources and authorities to care for our public lands and prepare for the future. The budget invests in efforts to upgrade and restore national parks and other public-lands areas, while engaging thousands of Americans, including youth, and veterans. The budget strengthens the President's commitment to the America's Great Outdoors initiative with a request of \$5.1 billion in current funding for programs that include operation of public land management units in BLM, NPS and FWS; the Land and Water Conservation Fund; and grants and technical assistance to States and others. This is an increase of \$127.1 million compared to the 2014 enacted level.

Coupled with these efforts is a historic commitment to America's natural and cultural heritage through Land and Water Conservation Fund programs. The budget includes a combined request of \$672.3 million for Interior's LWCF programs that conserve lands and support outdoor recreation. Of this, the request in current funding for Interior's LWCF programs is \$246.0 million. In current funding, the request for land acquisition is \$147.9 million, with \$39.5 million identified for Collaborative Landscape Planning projects. A total of \$98.1 million is requested in current funding for LWCF conservation grants, including \$48.1 million for LWCF Stateside grants.

I could not highlight our stewardship efforts without discussing the upcoming centennial of the National Park Service. Through a combination of current and permanent funding and investments identified in the President's Opportunity, Growth, and Security Initiative, the budget proposes a Centennial Initiative with a total investment of \$1.4 billion over three years. This effort will bolster our national parks and public lands as the National Park Service heads toward its second century and will ensure 20 percent of priority park assets are restored to good condition.

The request for the Centennial Initiative proposes a \$40 million increase in current appropriations in 2015, plus an additional \$400 million in permanent funding each year for three years. That funding includes \$100 million for a Centennial Challenge to match private philanthropy, \$200 million for National Park Service facilities improvements, and \$100 million for a Centennial Land Management Investment Fund to competitively allocate funds to meet conservation and maintenance needs among Interior's land-management agencies and the U.S. Department of Agriculture's U.S. Forest Service. The President's Opportunity, Growth, and Security Initiative identifies investments of \$100 million for National Park Service deferred maintenance and an additional \$100 million for the Centennial Land Management Investment Fund.

Strengthening Tribal Nations

Sustaining the President's commitment to tribal sovereignty and self-determination and honoring Interior's trust responsibilities to the 566 federally recognized American Indian and Alaska Native Tribes and more than 2 million people served by these programs, the 2015 budget for Indian Affairs is \$2.6 billion, an increase of \$33.6 million above the 2014 enacted level. The budget invests in advancing tribal self-determination and nation-to-nation relationships, supporting and protecting Indian families and communities, sustainable stewardship of energy and natural resources, and improving education in Indian Country.

Recognizing this commitment to tribal self-governance and self-determination, the budget fully funds contract support costs Tribes incur as managers of the programs serving Native Americans. The budget requests \$251 million, a \$4.0 million increase over the 2014 enacted level, to fully fund estimated contract support needs in 2015.

Supporting families and communities, the 2015 budget launches the Tiwahe Initiative, with an increase of \$11.6 million in social services and job training programs to address the interrelated problems of child and family welfare, poverty, violence and substance abuse in tribal communities. Tiwahe is the Lakota word for "family." Through this initiative, social services and job training programs will be integrated and expanded to provide culturally appropriate programs to assist and empower families and individuals through economic opportunity, health promotion, family stability, and strengthened communities.

Promoting public safety and tribal community resilience, the 2015 budget request includes resources to build on BIA Law Enforcement's recent successes in reducing violent crime. A pilot program will be implemented to lower repeat incarceration rates in tribally operated jails on three reservations – Red Lake in Minnesota, Ute Mountain in Colorado and Duck Valley in Nevada – with a new Priority Goal to lower repeat incarcerations by a total of 3 percent by Sept. 30, 2015. The Alternatives to Incarceration Strategy will seek to address underlying causes of repeat offenses, such as substance abuse and social service needs, by using alternative courts, increased treatment opportunities, probation programs and intergovernmental and interagency partnerships.

The 2015 budget request is complemented by a proposal in the President's Opportunity, Growth, and Security Initiative to further invest in economic development and education to promote strong, resilient tribal economies and improve educational opportunities in Indian Country.

Powering Our Future

As part of the President's all-of-the-above energy strategy to expand safe and responsible domestic energy production, the 2015 budget provides \$753.2 million for conventional and renewable energy programs, an increase of \$40.7 million above the 2014 enacted level. The budget includes measures to encourage responsible, diligent development and a fair return for American taxpayers.

Funding for conventional energy and compliance activities totals \$658.4 million, an increase of \$37.5 million over the 2014 level. Spending from fees and permanent funding related to onshore oil and gas activities increase \$49.1 million from the 2014 level, primarily reflecting a proposal to expand onshore oil and gas inspection activities and to offset the Bureau of Land Management's inspection program costs to the taxpayer with fees from industry.

The budget includes \$169.8 million for the Bureau of Ocean Energy Management and \$204.6 million for the Bureau of Safety and Environmental Enforcement to support domestic energy production, including strong safety oversight of offshore operations, enhanced environmental enforcement functions, and expanded training and electronic inspection capabilities.

The 2015 budget includes \$94.8 million for renewable energy activities, a \$3.2 million increase over the 2014 level. This funding maintains the Department's emphasis on strategic investments to advance clean energy and meet the President's goal to approve 20,000 megawatts of renewable energy on public lands by 2020.

Engaging the Next Generation

The 2015 budget supports a vision to inspire millions of young people to play, learn, serve and work outdoors by expanding volunteer and work opportunities for youth and veterans. The budget proposes \$50.6 million for Interior youth programs, a \$13.6 million or 37 percent increase from 2014.

A key component of the Department's efforts will be partnering with youth organizations through the 21st Century Conservation Service Corps. The proposed funding includes an increase of \$8.0 million to expand opportunities for youth education and employment opportunities across the National Park Service; an additional \$2.5 million for the Fish and Wildlife Service's Urban Wildlife Refuges Partnership; and a total of \$4.2 million in Indian Affairs for youth programs including \$2.5 million to engage youth in natural sciences. Support for the National Park Service Centennial will create thousands of jobs, and engage more than 10,000 youth in service and training opportunities and more than 265,000 volunteers.

Ensuring Healthy Watersheds and Sustainable, Secure Water Supplies

The 2015 budget addresses the Nation's water challenges through investments in water conservation, sustainability, and infrastructure critical to the arid Western United States and its fragile ecosystems.

The budget includes \$66.5 million for WaterSMART programs in Reclamation and the U.S. Geological Survey, nearly a 17 percent increase from 2014, to assist communities in stretching water supplies and improving water management. In addition to \$1 billion requested for the Bureau of Reclamation within the jurisdiction of the Energy and Water Subcommittee, the budget also requests \$210 million for the U.S. Geological Survey's water programs to provide scientific monitoring, research, and tools to support water management across the Nation. This funding supports the Department's goal to increase by 840,000 acre-feet, the available water supply for agricultural, municipal, industrial, and environmental uses in the Western United States through water-conservation programs by the end of 2015.

Interior extends this commitment to Indian Country, honoring Indian water settlements with investments totaling \$172 million in Reclamation and Indian Affairs, for technical and legal support for water settlements. This includes \$147.6 million to bring reliable and potable water to Indian communities, more than a 9 percent increase from 2014. Among the investments is \$81 million for the ongoing Navajo-Gallup Water Supply Project, which, when completed, will have the capacity to deliver clean running water to a potential future population of approximately 250,000.

The drought in California and other Western States underscores the importance of improving the resilience of communities to the effects of climate change. The President's Opportunity, Growth, and Security Initiative includes a \$1 billion government-wide Climate Resilience Fund to invest in developing more resilient communities, and finding solutions to climate challenges through technology development and applied research.

Building a Landscape Level Understanding of Our Resources

The 2015 budget fosters the sustainable stewardship of the Nation's lands and resources on a landscape level. Funding includes increases for scientific monitoring, research and tools to advance our understanding and ability to manage natural resources more effectively, while balancing important conservation goals and development objectives. Reflecting the President's ongoing commitment to scientific discovery and innovation to support decision making for critical societal needs and a robust economy, the budget proposes \$888.7 million for research and development activities across the Department, an increase of \$60.4 million over 2014. This funding will increase understanding of natural resources and the factors impacting water availability, ecosystem and species resiliency, energy development, hazards mitigation, and climate resilience, among others.

Complementing this budget request are two components of the President's Opportunity, Growth, and Security Initiative: an investment of \$140 million for Interior research and development as part of a government-wide effort to jumpstart growth spurred by scientific discovery; and investments to address climate resilience to better prepare communities and infrastructure, and enable them to build greater resilience in the face of a changing climate.

In ecosystems across the Nation, Interior will continue to work with local communities to leverage its efforts to improve resiliency and achieve improved environmental and economic outcomes.

Major Changes in the 2015 Request

Bureau of Land Management – The 2015 request is \$1.1 billion, a decrease of \$5.6 million from the 2014 enacted level. The 2015 request assumes the use of \$54.5 million in proposed off-setting fees, which when included provides a program \$48.9 million above 2014. The 2015 request includes \$954.1 million for the Management of Lands and Resources account, and \$25.0 million in current appropriations for Land Acquisition, including \$2.0 million to improve access to public lands for hunting, fishing, and other recreation. The budget proposes \$104.0 million for Oregon and California Grant Lands, which includes a \$4.2 million decrease in Western Oregon Resource Management Planning reflecting expected completion of six revised plans in June 2015.

To advance America's Great Outdoors, the request includes \$3.5 million in program increases for recreation, cultural resources, and the National Landscape Conservation System to address the needs of recently designated units, implement travel management plans, improve visitor services, and address a backlog in cultural resources inventory and stabilization needs. The budget request also includes \$4.8 million for Youth programs, an increase of \$1.3 million from 2014, to put more young Americans to work protecting and restoring public lands and cultural and historical treasures.

The BLM continues to support the President's all-of-the-above energy strategy on the public lands including an initiative to encourage smart renewable energy development. The 2015 budget includes \$29.2 million, essentially level with 2014, for renewable energy to continue to aggressively support wind, solar, and geothermal energy development on BLM lands. Complementing this is a \$5.0 million increase in the Cadastral, Lands and Realty Management program for identification and designation of energy corridors in low conflict areas to site high voltage transmission lines, substations, and related infrastructure in an environmentally sensitive manner.

The 2015 request for Oil and Gas Management, including both direct and fee-funded appropriations, totals \$133.7 million, an increase of \$20.3 million in available program funding from 2014. In 2015, the budget proposes to shift the cost of oil and gas inspection and enforcement activity from current appropriations to inspection fees charged to industry, allowing for a reduction of \$38.0 million in requested appropriations. The proposed inspection fees will generate and estimated \$48.0 million, providing for a \$10.0 million increase in BLM's inspection and enforcement capability. The request for Oil and Gas programs supports increases of \$5.2 million for ongoing rulemaking efforts and to strengthen operations at BLM units; and \$4.6 million for oversight and permitting to better keep pace with industry demand and fully implement leasing reforms.

In 2015, BLM will release six rapid eco-regional assessments, in addition to four planned for 2014. The BLM will conduct training on the use of the data from these assessments and will work with a number of Landscape Conservation Cooperatives to begin development of regional conservation strategies. The budget includes an increase of \$5.0 million for Resource Management Planning to implement BLM's enterprise geographic information system and address high priority planning. The 2015 budget maintains a \$15.0 million increase to implement sage grouse conservation and restoration measures to help prevent the future listing of the species for protec-

tion under the Endangered Species Act.

Other program increases include \$2.8 million in the Wild Horse and Burro program to implement recommendations of the National Academy of Sciences regarding population control; and \$2.8 million in Abandoned Mine Lands to implement remediation plan efforts at Red Devil Mine in Alaska. The request includes \$19.0 million for the Alaska Conveyance program. Although a decrease of \$3.1 million from 2014, this funding coupled with efficiencies from an improved cadastral method, plots a course to complete all surveys and land transfers in ten years.

A proposed grazing administration fee will enhance BLM's capacity for processing grazing permits. A fee of \$1.00 per animal unit month, estimated to provide \$6.5 million in 2015, is proposed on a pilot basis. This additional revenue more than offsets a decrease of \$4.8 million in appropriated funds in Rangeland Management, equating to a \$1.7 million program increase to help address the grazing permit backlog.

Bureau of Ocean Energy Management – The 2015 operating request is \$169.8 million, including \$72.4 million in current appropriations and \$97.3 million in offsetting collections. This is a net increase of \$3.4 million in current appropriations above the 2014 enacted level.

The 2015 budget maintains a strong offshore renewable energy program at essentially the 2014 level of \$23.1 million for the total program. In 2013, BOEM held the first competitive OCS renewable energy lease sales, issued five other non-competitive commercial offshore wind energy leases, and approved the construction and operations plan for the Cape Wind project offshore Massachusetts.

Offshore conventional energy programs also remain essentially level with 2014, with a total of \$49.6 million in 2015. In 2013, BOEM held three sales generating over \$1.4 billion in high bids and three additional lease sales are scheduled during calendar year 2014. The request of \$65.7 million for Environmental Programs includes an increase of \$2.5 million for work on a Programmatic Environmental Impact Statement for the next Five-Year Program for 2017-2022.

Bureau of Safety and Environmental Enforcement – The 2015 budget request is \$204.6 million, including \$81.0 million in current appropriations and \$123.6 million in offsetting collections, an increase of \$2.0 million from 2014. The request for offsetting collections continues to assume \$65.0 million from offshore oil and gas inspection fees. The 2015 request allows BSEE to continue to strengthen regulatory and oversight capability on the OCS and maintain capacity in regulatory, safety management, structural and technical support, and oil spill response prevention.

The budget includes \$189.7 million for Offshore Safety and Environmental Enforcement, an increase of \$2.4 million in current appropriations. Included within this total is \$8.3 million for Environmental Enforcement activities. The request also includes \$0.9 million to evaluate and test new technologies and update regulations to reflect improved safety and oversight protocols. Funding for Oil Spill Research is maintained at the 2014 level of \$14.9 million.

Office of Surface Mining – The 2015 budget request for the Office of Surface Mining is \$144.8

million, a decrease of \$5.3 million from the 2014 enacted level. This includes a decrease of \$13.4 million in grants to States and Tribes to encourage these regulatory programs to recover a larger portion of their costs from fees charged to the coal industry, and an increase of \$4.0 million to provide additional technical support to State and tribal regulatory programs. The budget also includes an increase of \$1.9 million for applied science to advance reclamation technologies. This request proposes \$116.1 million for Regulation and Technology funding, \$28.7 million for Abandoned Mine Reclamation Fund activities, and an additional \$1.9 million in offsetting collections from recovered costs for services.

U. S. Geological Survey – The USGS budget request is \$1.1 billion, \$41.3 million above the 2014 enacted level. The President’s budget reflects the Administration’s commitment to investments in research and development to support sound decision making and sustainable stewardship of natural resources. This includes science, monitoring, and assessment activities critical to understand and manage the ecological, mineral, energy, and water resources which underlie the prosperity and well-being of the Nation. The budget includes increases for priorities in ecosystem restoration, climate adaptation, invasive species, environmental health, and earth observations. Funding provides increased support to enhance sustainable energy development, address water resource challenges, increase landscape level understanding of the Nation’s natural resources, and the Scientists for Tomorrow youth initiative.

The USGS budget includes investments in important science programs to help meet societal needs. A program increase of \$6.4 million above 2014 for WaterSMART will support State water use grants to develop regional water availability models, integrate and disseminate data through online science platforms, and support the National Groundwater Monitoring Network. The budget includes increases of \$2.4 million in Groundwater Resources for the National Groundwater Monitoring Network and \$1.2 million for the National Streamflow Information Program for streamgages to strengthen the Federal backbone at high priority sites sensitive to drought, flooding, and potential climate change effects.

Funding for the National Climate Change and Wildlife Science Center/Department of the Interior Climate Science Centers is funded at \$35.3 million, an increase of \$11.6 million from 2014. This includes an increase of \$3.0 million for grants focused on translational and applied science needed by resource managers for decision making. An increase of \$2.3 million supports coordination with other Federal climate science activities and ensures scientific results and products are available to the public in a centralized, web-accessed format. Program increases of \$2.5 million will support applied science and capacity-building for tribal climate adaptation needs in the CSC regions, and \$3.0 million will support additional research in drought impacts and adaptive management.

Program increases in the National Geospatial Program include \$5.0 million for the 3-Dimensional Elevation Program to collect Lidar data to enhance science and emergency response activities, resource and vulnerability assessments, ecosystem based management, and tools to inform policy and management. An increase of \$1.9 million is requested for modernization of The National Map, which provides critical data about the Earth, its complex processes, and natural resources. The 2015 budget includes a \$2.0 million increase for the Big Earth Data initiative to improve access to and use of data from satellite, airborne, terrestrial, and ocean-based Earth

observing systems. These investments will provide benefits in natural resource management and hazard mitigation, by improving access to critical information.

The budget includes \$40.7 million supporting conventional and renewable energy programs, \$8.1 million above the 2014 enacted level. A program increase of \$1.3 million will be used to study geothermal resources and build on ongoing work on wind energy impacts. The request includes \$18.6 million, \$8.3 million over 2014, to support the interagency effort to better understand potential impacts of energy development involving hydraulic fracturing. Work will address issues such as water quality and quantity, ecosystem, community, and human health impacts, and induced seismicity. Funding for other conventional energy programs, including oil, gas, and coal assessments, totals \$15.6 million.

The 2015 budget includes \$162.0 million for Ecosystems activities, \$9.2 million above the 2014 enacted level. Program increases include \$2.0 million for research on new methods to eradicate, control, and manage Asian carp in the Upper Mississippi River Basin and prevent entry into the Great Lakes. Total increases of \$2.5 million are provided for priority ecosystem restoration work in the Chesapeake Bay, California Bay-Delta, Columbia River, Everglades, and Puget Sound. Another \$2.0 million will support the science and integration of ecosystems services frameworks into decision making and implement efforts to assess and sustain the Nation's environmental capital. Program increases totaling \$1.8 million will address native pollinators, brown treesnakes, and new and emerging invasive species of national concern.

The budget provides \$128.3 million for Natural Hazards activities, which is essentially level with 2014. This activity provides scientific information and tools to reduce potential fatalities, injuries, and economic loss from volcanoes, earthquakes, tsunamis and landslides, among others. The 2015 budget includes an increase of \$700,000 in Earthquake Hazards for induced seismicity studies related to hydraulic fracturing.

Fish and Wildlife Service – The 2015 Fish and Wildlife Service budget includes \$1.5 billion in current appropriations, an increase of \$48.8 million above the 2014 level. This includes America's Great Outdoors related increases of \$71.7 million in the Resource Management account. Within this increase is \$2.5 million to establish an Urban Wildlife Refuge Partnership program. This effort will encourage city dwellers to enjoy the outdoors by creating stepping stones of engagement to connect them to the outdoors on refuges and partner lands, through experiences which build on one another.

Funding for FWS grant programs, with the exception of State and Tribal Wildlife Grants, remain level with 2014. In 2015, funding for State and Tribal Wildlife Grants totals \$50 million. The request also includes \$55.0 million for Land Acquisition and \$15.7 million for Construction. In addition to direct appropriations, an estimated \$1.3 billion will be available under permanent appropriations, most of which will be provided directly to States for fish and wildlife restoration and conservation.

The budget proposes \$16.7 million, an increase of \$2.5 million, for activities associated with energy development. Of this increase, \$1.4 million supports scientific research into the impacts of energy transmission and development infrastructure on wildlife and habitat. The research will

identify potential impacts associated with the development of energy infrastructure and strategies to minimize the impacts on habitat and species. An increase of \$1.1 million will support assessments of renewable energy projects proposed for development.

The budget request for the Resource Management account continues support for key programs and program increases of \$65.8 million above 2014. The request provides \$252.2 million in Ecological Services to conserve, protect, and enhance listed and at-risk species and their habitat, an increase of \$30.3 million. Within this request are increases of \$4.0 million to support conservation of the greater sage grouse across 11 western States and \$10.5 million to implement other species recovery actions.

The request includes funding within Law Enforcement and International Affairs to combat wildlife trafficking. The budget provides \$66.7 million for the law enforcement program to investigate wildlife crimes, enforce the laws governing the Nation's wildlife trade, and expand technical forensic expertise, with program increases of \$2.0 million over 2014.

The budget includes \$138.9 million for Fisheries and Aquatic Resource Conservation, a program increase of \$8.2 million. Within this request is \$48.6 million for operation of the National Fish Hatchery system to address top priorities, an increase of \$1.9 million for fish hatchery maintenance, and \$4.4 million to prevent the spread of Asian carp in the Missouri, Ohio, and upper Mississippi Rivers.

Funding for Cooperative Landscape Conservation activity is \$17.7 million, an increase of \$3.2 million, and funding for Science Support is \$31.6 million, an increase of \$14.4 million. The budget supports applied science directed at high impact questions to mitigate threats to fish and wildlife resources, including \$2.5 million to address white nose syndrome in bats, and an increase of \$1.0 million to study biological carbon sequestration.

The 2015 budget proposes a reduction of \$13.2 million for National Wildlife Refuge Fund payments to counties. An estimated \$8.0 million in permanent receipts collected and allocated under the program would remain available to counties. The budget also proposes cancellation of \$1.4 million in prior year balances from the Landowner Incentive and Private Stewardship Grant programs, which have not received new budget authority in several years.

National Park Service – The 2015 budget request for NPS of \$2.6 billion is \$55.1 million above the 2014 enacted level.

In 2015, a total of \$2.5 billion is requested for NPS as part of America's Great Outdoors. This includes \$2.3 billion for park operations, an increase of \$47.1 million over 2014. Within this increase is \$30.0 million to support the NPS Centennial Initiative. The Centennial increase includes \$16.0 million for repair and rehabilitation projects throughout the parks, \$8.0 million in competitively managed funds to support enhanced visitor services in the areas of interpretation and education, law enforcement and protection, and facility operations, \$4.0 million to engage youth in service and conservation projects, and \$2.0 million to support expanded volunteer opportunities at the parks. Across these Centennial increases, the budget provides an \$8.0 million increase for youth engagement and employment opportunities, and continues the NPS' efforts to

attract qualified veteran candidates to fill Federal positions. The request for Park Operations also includes increases of \$15.7 million to maintain park base operating levels in the face of increased fixed costs, and \$2.0 million to support new responsibilities at park units.

Also in preparation for the Centennial anniversary of the parks, the 2015 request includes \$10.0 million in a separate account for Centennial Challenge projects. This funding will provide a Federal match to leverage partner donations for signature projects and programs at the parks. This program will be instrumental in garnering partner support to prepare park sites across the country for the centennial and through the second century of the NPS.

The 2015 request for the Historic Preservation Fund is \$56.4 million, level with 2014. Of this total, \$46.9 million is requested for grants-in-aid to States and Territories, \$9.0 million for grants-in-aid to Tribes, and \$500,000 to be awarded competitively to address communities currently underrepresented on the National Register of Historic Places. The budget includes \$52.0 million within the National Recreation and Preservation account, which includes \$10.0 million for the Rivers, Trails, and Conservation Assistance program, essentially level with 2014, and \$1.2 million for American Battlefield Protection Program assistance grants, also level with 2014. The request includes a program reduction of \$9.1 million from Heritage Partnership programs to encourage self-sufficiency for these non-Federal organizations.

Programs funded out of the Land and Water Conservation Fund are a key component of America's Great Outdoors. The budget requests \$104.0 million for the Land Acquisition and State Assistance account, an increase of \$5.9 million. This includes \$48.1 million for the State Conservation Grants program, level with 2014, and \$55.9 million for NPS Federal land acquisition, a programmatic increase of \$5.8 million. Of this amount, \$13.2 million supports Collaborative Landscape projects in the California Southwest Desert and areas within the National Trails System.

Funding for Construction totals \$138.3 million, essentially level with 2014. Of this amount, the budget includes \$61.7 million for line-item construction projects, a \$1.1 million increase compared to 2014. The request includes \$6.7 million to reconstruct the historic cave tour trails in Mammoth Cave National Park and \$3.9 million to stabilize and repair exterior walls of the historic Alcatraz prison cell house at Golden Gate National Recreation Area.

Indian Affairs – The 2015 budget includes \$2.6 billion for Indian Affairs programs, an increase of \$33.6 million from the 2014 enacted level. This includes an increase of \$33.8 million for Operation of Indian Programs; and level funding of \$35.7 million for Indian Land and Water Claim Settlements, \$109.9 for Construction and \$6.7 million for the Indian Guaranteed Loan program.

Within Operation of Indian Programs, the budget includes full funding of \$251.0 million for Contract Support Costs and the Indian Self-Determination Fund, an increase of \$4.0 million from 2014. Consistent with the treatment of Contract Support Costs in 2014, the 2015 request provides the full amount based on the most current estimated need. The availability of contract support cost funding is a key factor in tribal decisions to assume responsibility for operating Federal programs important to the furtherance of self-governance and self-determination. In a further effort to facilitate Tribal 638 Contracting, the budget includes an additional \$1.2 million to increase services from the Department's Office of Indirect Cost Negotiations which negotiates in-

direct cost rates with non-Federal entities, including tribal governments. Consistent with Subcommittee direction, the Department held its first formal tribal consultation to discuss long-term solutions to Contract Support Cost issues on March 11. The Department remains committed to resolving this issue.

The 2015 budget for Indian Affairs includes an increase of \$11.6 million for the Tiwahe or “family” Initiative. The initiative takes a comprehensive and integrated approach to address the inter-related problems of poverty, violence, and substance abuse in Indian communities. The budget proposes a \$10.6 million program increase to build on social services, Indian child and family welfare, and job training programs. In recognition that adequate housing is essential to building stronger Indian families, the budget maintains the 2014 level for the Housing Improvement program. The goal of the Tiwahe initiative is to empower American Indian individuals and families in health promotion, family stability, and strengthen tribal communities as a whole. To better target funding and evaluate outcomes in meeting social service needs in Indian Country, the budget includes \$1.0 million as part of the initiative.

The budget proposes program increases of \$3.7 million for the sustainable stewardship of natural resources. Overall funding for trust land management and real estate services is essentially level with 2014 to assist Tribes in the management, development, and protection of Indian trust land and natural resources. An increase of \$2.0 million is provided for science and technical support for the sustainable stewardship and development of natural resources. Funding supports development of natural resource information tools including geospatial technologies, for application in energy and minerals, climate, oceans, water rights protection, and endangered and invasive species. The budget also includes a program increase of \$1.6 million for deferred maintenance on Indian irrigation projects to help address drought issues in Indian Country.

The budget request for the Bureau of Indian Education is \$794.4 million, an increase of \$5.6 million from 2014. The request includes an increase of \$500,000 for Johnson O’Malley Education Assistance Grants to support a new student count in 2015 and funding to address the projected increase in the number of eligible students. The budget includes \$1.0 million to support the ongoing evaluation of the BIE school system to improve educational outcomes. Within education construction, an increase of \$2.3 million supports site development at the Beatrice Rafferty School for which design funding was provided in 2014. The budget also includes \$2.3 million in increases for BIE funded post-secondary programs including \$1.7 million for post-graduate opportunities in science fields, and \$250,000 for summer pre-law preparatory scholarships.

Departmental Offices and Department-wide Programs – The 2015 request for the Office of the Secretary is \$265.3 million, an increase of \$1.3 million from the 2014 enacted level. Of this, \$122.9 million is for the Office of Natural Resources Revenue programs, an increase of \$3.5 reflecting increases for an onshore pilot and data integration in production verification and meter inspections. Other changes include the proposed transfer of the Indian Arts and Crafts Board from the Office of the Secretary to the Bureau of Indian Affairs of \$1.3 million, a decrease of \$865,000 reflecting a shift from direct appropriations to fee for service for Indirect Cost Negotiations, and a program decrease of \$266,000 in Valuation Services.

The budget request for the Office of Insular Affairs is \$92.2 million, a decrease of \$10.2 million

from the 2014 enacted level. The budget includes an increase of \$3.0 million to address urgent, immediate needs in the insular areas, and \$1.8 million to improve safety conditions in insular school facilities. A decrease of \$500,000 reflects completion of an aerial bait system for brown treesnake control. Compact Impact is funded at \$1.3 million, a decrease of \$1.7 million from 2014, and is supplemented by \$30.0 million annually in permanent Compact Impact funding. Funding of \$13.1 million for the Palau Compact Extension is not requested for 2015 as it is expected the Compact will be authorized and funded from permanent appropriations in 2014.

The Office of Inspector General request is \$50.0 million, a decrease of \$784,000 from 2014. The budget includes a decrease of \$2.0 million reflecting completion of an effort to reduce OIG's physical footprint. Increases of \$423,000 and \$355,000 are included to support the council of the Inspectors General on Integrity and Efficiency and provide additional FTE for information security audits, respectively. The Office of the Solicitor request is \$65.8 million, equal to the 2014 enacted level.

The Office of the Special Trustee request is \$139.0 million, \$648,000 below the 2014 enacted level. The 2015 budget decreases Business Management funding by \$1.6 million reflecting \$922,000 in efficiencies from the transfer of some mailing and printing services to the U.S. Department of the Treasury, a reduction of \$500,000 in litigation support, and a decrease of \$200,000 in funding for the Office of Hearings and Appeals.

The 2015 request for the Department-wide Wildland Fire Management program is \$794.0 million without the proposed fire cap exemption, and \$1.0 billion with it included. The request includes \$268.6 million for Suppression within the current budget cap, which is 70 percent of the 10 year suppression average spending. This base level funding ensures the cap adjustment of \$240.4 million would only be used for the most severe fires. The new budget framework for Wildland Fire Management eliminates the need for additional funds through the FLAME Act. The 2015 budget includes a program increase of \$34.1 million for Preparedness activities to enhance readiness capabilities. The budget includes \$146.3 million for Fuels Management activities, formerly known as Hazardous Fuels Management. This is equal to the 2014 enacted level with an increase of \$1.3 million for fixed costs. Complementing this request is \$30.0 million for Resilient Landscapes, a new component of the Wildland Fire Management program, to support treatments that improve the integrity and resilience of forests and rangelands.

The 2015 request for the Natural Resource Damage Assessment and Restoration Fund is \$7.8 million, a program increase of \$1.5 million. The increase includes \$1.0 million for a Department-wide onshore Oil Spill Preparedness plan, and additional resources for Restoration support. The budget includes \$10.0 million for the Central Hazardous Materials Fund, an increase of \$412,000 from 2014 to support additional cleanup work.

The Department's 2015 request for the Working Capital Fund appropriation is \$64.3 million, an increase of \$7.3 million from the 2014 enacted level. Within this request is \$53.9 million for the operation and maintenance of the Financial and Business Management System, an increase of \$1.0 million to continue support of the Department's Cultural and Scientific Collections Management initiative, a decrease of \$1.0 million from the Department's Service First initiative, and

an increase of \$8.4 million to support Interior's Office Consolidation strategy in the D.C metropolitan area.

Mandatory Proposals

The 2015 budget includes 15 legislative proposals affecting spending, revenue and available budget authority, which require action by the Congressional Authorizing Committees. Revenue and savings proposals will generate more than \$2.6 billion over the next decade. The 2015 budget includes four spending proposals estimated at \$9.9 billion in outlays over the next decade.

Land and Water Conservation Fund – The 2015 budget proposes \$900.0 million in current and permanent funding in 2015 and permanent authorization of \$900.0 million in mandatory funding for LWCF programs in the Departments of the Interior and Agriculture beginning in 2016. During a transition to permanent funding in 2015, the budget proposes \$900.0 million in total LWCF programs funding, comprised of \$550.0 million permanent and \$350.0 million current funding, shared by Interior and Agriculture.

Centennial Initiative – The Centennial Initiative includes a legislative proposal to authorize \$1.2 billion in permanent funding over three years beginning in 2015 in the following areas: \$300.0 million at \$100.0 million a year for a National Park Service Centennial Challenge fund to leverage private donations; \$600.0 million at \$200.0 million a year for NPS deferred maintenance; and \$300.0 million at \$100.0 million a year for a Centennial Land Management Investment Fund to competitively award grants to Interior land management agencies and the U.S. Forest Service for deferred maintenance and conservation projects.

Payments in Lieu of Taxes – The Agricultural Act of 2014 included a one-year extension of permanent PILT funding through 2014. The 2015 budget proposes to extend authorization of the program an additional year through 2015, while a sustainable long-term funding solution is developed for the PILT Program. The PILT payments help local governments carry out vital services, such as firefighting and police protection, construction of public schools and roads, and search and rescue operations. The cost of a one-year extension is estimated to be \$442.0 million in 2015.

Palau Compact – On September 3, 2010, the U.S. and the Republic of Palau successfully concluded the review of the Compact of Free Association and signed a 15-year agreement that includes a package of assistance through 2024. The 2015 budget assumes authorization of permanent funding for the Compact occurs in 2014. The cost for this proposal is estimated at \$178.3 million for 2015 through 2024.

Federal Oil and Gas Reforms – The budget includes a package of legislative reforms to bolster and backstop administrative actions being taken to reform the management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources. Proposed statutory and administrative changes fall into three general categories: 1) advancing royalty reforms, 2) encouraging diligent development of oil and gas leases, and 3) improving revenue collection processes. Collectively, these reforms will generate roughly \$2.5 billion in net revenue to the Treasury over ten years, of which about \$1.7 bil-

lion would result from statutory changes. Many States will also benefit from higher Federal revenue sharing payments.

Return Coal Abandoned Mine Land Reclamation Fees to Historic Levels – The budget proposes legislation to modify the 2006 amendments to the Surface Mining Control and Reclamation Act, which lowered the per-ton coal fee companies pay into the AML Fund. The proposal would return the fee to 35 cents a ton, the same level companies paid prior to the 2006 fee reduction. The additional revenue, estimated at \$362 million over ten years, will be used to reclaim high priority abandoned coal mines and reduce a portion of the estimated \$3.9 billion needed to address remaining dangerous coal AML sites nationwide.

Discontinue AML Payments to Certified States – The budget proposes to discontinue unrestricted payments to States and Tribes certified for completing their coal reclamation work. This proposal terminates all such payments, with estimated savings of approximately \$295 million over the next ten years.

Reclamation of Abandoned Hardrock Mines – To address the legacy of abandoned hardrock mines across the U.S. and hold the hardrock mining industry accountable for past mining practices, the Department will propose legislation to create a parallel Abandoned Mine Lands Program for abandoned hardrock sites. A new AML fee on hardrock production on both public and private lands would generate an estimated \$1.8 billion to reclaim the highest priority hardrock abandoned sites on Federal, State, tribal, and private lands.

Reform Hardrock Mining on Federal Lands – Interior will submit a legislative proposal to provide a fair return to the taxpayer from hardrock production on Federal lands. The legislative proposal will institute a leasing program under the Mineral Leasing Act of 1920 for certain hardrock minerals including gold, silver, lead, zinc, copper, uranium, and molybdenum, currently covered by the General Mining Law of 1872. The proposal is projected to generate revenues to the U.S. Treasury of \$80 million over ten years, with larger revenues estimated in following years.

Geothermal Energy Receipts – The Department proposes to repeal Section 224(b) of the Energy Policy Act of 2005. The repeal of Section 224(b) will permanently discontinue payments to counties and restore the disposition of Federal geothermal leasing revenues to the historical formula of 50 percent to the States and 50 percent to the Treasury. This results in savings of \$4 million in 2015 and \$42 million over ten years.

Federal Land Transaction Facilitation Act – The Department proposes to reauthorize this Act to allow Federal lands identified as suitable for disposal in recent land use plans to be sold using this authority. The sales revenues would continue to fund the acquisition of environmentally sensitive lands and administrative costs associated with conducting the sales.

Federal Migratory Bird Hunting and Conservation Stamps – Federal Migratory Bird Hunting and Conservation Stamps, or Duck Stamps, are the annual Federal license required for hunting migratory waterfowl. The receipts generated from the sale of these \$15.00 stamps are used to acquire important migratory bird areas for migration, breeding, and wintering. The Depart-

ment proposes legislation to increase these fees which have not increased since 1991, to \$25.00 per stamp per year beginning in 2015. This increase will add an estimated \$14 million for migratory bird conservation.

Bureau of Land Management Foundation – The budget proposes legislation to establish a congressionally-chartered National BLM Foundation. This Foundation will provide an opportunity to leverage private funding to support public lands, achieve shared outcomes, and focus public support on the BLM mission.

Recreation Fee Program – The Department of the Interior proposes to permanently authorize the Federal Lands Recreation Enhancement Act, which will expire in December 2015. The Department currently collects over \$200 million in recreation fees annually under this authority and uses them to enhance the visitor experience at Interior facilities.

Fire Suppression and the Discretionary Budget Cap

The 2015 budget proposes to amend the Balanced Budget and Emergency Deficit Control Act to establish a new framework for funding Fire Suppression Operations to provide stable funding for fire suppression while minimizing the adverse impacts of fire transfers on the budgets of other programs. Under this new framework, the 2015 budget request covers 70 percent of the 10-year suppression average within the domestic discretionary cap. Extreme fires requiring emergency response, fires threatening urban areas, or requirements of an abnormally high fire season, would be permitted to be funded through the adjustment to discretionary spending limits. The cap adjustment does not increase overall current spending, as it reduces the ceiling for the existing disaster relief cap adjustment.

Offsetting Collections and Fees

The budget includes the following proposals to collect or increase various fees, so industry shares some of the cost of Federal permitting and regulatory oversight.

New Fee for Onshore Oil and Gas Inspections – Through appropriations language, the Department proposes to implement an inspection fee in 2015 for onshore oil and gas activities subject to inspection by BLM. The proposed fee is expected to generate \$48.0 million in 2015, \$10.0 million more than the corresponding \$38.0 million reduction in requested appropriations, thereby expanding the capacity of BLM's oil and gas inspection program. The fee is similar to one already in place for offshore operations and will support Federal efforts to increase production accountability, human safety, and environmental protection.

Grazing Administrative Fee – The 2015 budget proposes a new grazing administrative fee of \$1 per animal unit month. The BLM proposes to implement this fee through appropriations language on a three-year pilot basis. The provision will generate an estimated \$6.5 million in 2015, to assist BLM in processing grazing permits.

National Wildlife Refuge Damage Cost Recovery – The budget proposes appropriations language to authorize the Fish and Wildlife Service to pursue and retain recoveries from responsible

parties, to be used to restore or replace damaged National Wildlife Refuge resources.

Cost Recovery for Nontoxic Shot Approvals – The budget proposes appropriations language to allow the Fish and Wildlife Service to retain and use fees collected for the review of nontoxic shot products for approval. Nontoxic shot is a substitute for lead shot, banned for waterfowl hunting since 1991.

Conclusion

Thank you for the opportunity to testify on the President's 2015 budget request for the Department of the Interior. This budget is responsible, and proposes to maintain core capabilities with targeted investments to advance the stewardship of lands and resources, renewable energy, oil and gas development and reforms, water conservation, youth employment and engagement, and improvements in the quality of life in Indian communities. I thank you again for your continued support of the Department's mission. I look forward to answering questions about this budget. This concludes my written statement.

DOI in the News:

SECRETARY JEWELL TO SPEAK ON CLIMATE CHANGE ISSUES IN CALIFORNIA. [The Hill](#) (9/19, Barron-Lopez, 241K) reports that the Obama Administration is preparing a "full-court press" ahead of a UN climate summit next week. Notably, Interior Secretary Sally Jewell will be in California to promote the White House climate agenda.

Also providing coverage is the [National Journal](#) (9/19, Subscription Publication, 626K).

Obama To Urge World Leaders To Be Ambitious On Climate Change Treaty. The [AP](#) (9/18, Lederman) reports that the President will attend a UN climate summit next week "where he will urge fellow heads of state to be as ambitious as possible as they negotiate a make-or-break global treaty to be finalized next year in Paris." According to White House officials, the President will "announce new contributions by the U.S. to help other nations become more resilient to changing temperatures, aiming to increase pressure on countries like India and China to show they're not laggards in the global campaign against climate change."

[Reuters](#) (9/18, Volcovici) reports that senior Administration officials say in his address to the summit, the President will emphasize US advances on climate change. Senior adviser John Podesta said the summit will provide the US with an opportunity "to showcase actions we are taking across the government and across the country."

[Bloomberg News](#) (9/18, Yoon, Martin, 1.94M) reports that next week's summit marks the start of "a new phase" in UN Secretary General Ban-Ki-moon's "strategy to forge a global climate agreement by 2015." Ban, who is

"turning up pressure for an international agreement to reduce emissions blamed for global warming," said Thursday, "Investing wisely in climate change or the environment will help all spectrum of lives and, policies of national governments. ... That will be my consistent message at this time." Next week's meeting "is a prelude to talks in Lima in December and Paris next year, when leaders will attempt to hammer out a pact on cutting emissions."

[The Hill](#) (9/19, Barron-Lopez, 241K) also provides coverage of this story.

Scientists Argue Reefs Threatened By Overfishing And Climate Change. In a [New York Times](#) (9/18, Jackson, Johnson, Subscription Publication, 9.9M) op-ed, Waitt Institute executive director Ayana Elizabeth Johnson and Jeremy Jackson, scientific director of the Global Coral Reef Monitoring Network and emeritus senior scientist of the Smithsonian Institution and Scripps Institution of Oceanography call for the defense of key fish species, the prevention of climate-change-induced ocean acidification, and better regulation of coastal developments to preserve predominately Caribbean coral reefs.

Krugman: Fighting Climate Change Is Cheap And Easy. Than In his column for the [New York Times](#) (9/19, Krugman, Subscription Publication, 9.9M), Paul Krugman notes that "two new reports on the economics of fighting climate change," say that "strong measures to limit carbon emissions would have hardly any negative effect on economic growth, and might actually lead to faster growth." Krugman calls the "idea that economic growth and climate action are incompatible" a "fuzzy-minded misconception," and argues that if we "get past the special interests and ideology that have blocked action to save the planet, we'll find that it's cheaper and easier than almost anyone imagines."

OFFICIALS TO DISCUSS RECOVERY OF FOX SQUIRREL AT BLACKWATER WILDLIFE REFUGE. [The Hill](#) (9/19, Barron-Lopez, 241K) reports that Interior Secretary Sally Jewell, FWS Director Dan Ashe, Sen. Ben Cardin and Maryland Gov. Martin O'Malley will travel to Maryland's Blackwater National Wildlife Refuge on Friday to announce "a milestone in the recovery of the endangered Delmarva fox squirrel."

In an article focusing on the work of Guy W. Willey Sr., the [Baltimore Sun](#) (9/18, Wheeler, 857K) notes that "a formal proposal to de-list the animal is expected to follow."

Also reporting on the story is the [AP](#) (9/19). Coverage by the AP was also picked up by the [Washington Post](#) (9/19, 4.9M) and the [San Antonio Express-News](#) (9/19, 904K).

OFFICIALS PUSH FOR PILT PAYMENTS. The [Salt Lake \(UT\) Tribune](#) (9/19, 479K) reports that local officials convened "in Washington this week to lobby Congress to fully fund a program that has doled out hundreds of millions of dollars since 1976 but is again, possibly on the chopping block." Rep. Chris Stewart "promised county leaders to do everything in his power to make it happen." Stewart said, "This is money that is absolutely essential. I will do everything I can to put this on more permanent funding [status], so we don't have to go year-to-year."

The [Helena \(MT\) Independent Record](#) (9/19, 37K) reports that "talks with representatives of Congress and their staff members are giving Lewis and Clark County Commissioner Mike Murray hope that the federal government will continue its payment in lieu of taxes to counties." Murray said that "there was support for another one-year bill to fund PILT at its full level and that this federal payment is not seen as a partisan political football." Murray noted that Sen. Ron Wyden has "two bills for PILT," and added that "one was a one-year measure and the other was to provide permanent funding."

Also providing coverage is the [Cronkite News](#) (9/19).

FLORIDA LAWMAKERS PRESS FOR EVERGLADES MONEY. The [Miami Herald](#) (9/19, 711K) reports that "hoping to hasten chronically delayed Everglades restoration, Florida lawmakers filed bipartisan legislation Thursday to authorize money for a \$1.9 billion suite of projects." The article notes that "the move comes after a plan to revive flows to the Central Everglades was derailed in April when the US Corps of Army Engineers balked at approving it — despite letters urging support from Gov. Rick Scott, US Secretary of the Interior Sally Jewell and several members of Congress."

ADDITIONAL COVERAGE: RHEA SUH TO BECOME NRDC'S NEW PRESIDENT. Additional coverage that Rhea Suh, an assistant secretary of the Interior Department, will become president of the Natural Resources Defense Council in January, was provided by the [Environment & Energy Publishing](#) (9/19, 705), [Politico](#) (9/19, Guillén, 977K), the [Honolulu Star-Advertiser](#) (9/19, 347K), the [Washington Free Beacon](#) (9/19, 81K), the [Daily](#)

[Caller](#) (9/19, Bastasch, 475K), and [Inside Climate News](#) (9/17).

ADDITIONAL COVERAGE OF WILDFIRES. Additional coverage of wildfires was provided by the [Washington Post](#) (9/18, Berman, 4.9M).

America's Great Outdoors:

National Park Service:

GROUP AIMS TO REHAB NEGLECTED SITE ON NATIONAL MALL. The [AP](#) (9/18) reports that "lakeside gardens, model boats and fine dining overlooking the nation's monuments could one day redefine a site on the National Mall that has languished for years with fetid water, dying fish and crumbling walkways." According to the article, "after holding a design competition to improve spaces on the mall in 2011, the nonprofit Trust for the National Mall selected the little-known Constitution Gardens for a major rehabilitation over the next five years." The article notes that "designers are still refining the concept but are developing an ambitious project whose budget totals about \$150 million."

Coverage by the AP was also picked up by the [Charlotte \(NC\) Observer](#) (9/18, 572K), the [Houston Chronicle](#) (9/19, Zongker, 2.47M), the [Miami Herald](#) (9/19, 711K), the [Sacramento \(CA\) Bee](#) (9/18, 646K), [ABC News](#) (9/19, 5.02M), [WJLA-TV](#) Washington (9/19, 119K), and [WRC-TV](#) Washington (9/19, 367K).

CELEBRATION TO MARK 60TH ANNIVERSARY OF C&O CANAL HIKE. The [Washington Post](#) (9/18, Sullivan, 4.9M) reports that this week, Cathy Douglas Stone "returned to Washington to help commemorate the 60th anniversary of a C&O Canal hike and 'raise funds for the canal's continued upkeep.'" Stone will "help headline a 'Park after Dark' celebration and fundraiser on Saturday at the historic Great Falls tavern along the towpath." According to Mike Nardolilli, president of the nonprofit C&O Canal Trust, "money raised will go to maintain the park."

NPS PLANS PUBLIC MEETING FOR DENALI TRANSPORTATION PLAN. The [AP](#) (9/19) reports that NPS officials say "a public meeting is scheduled to take place next week to discuss the long-range transportation plan for Alaska's Denali National Park and Preserve." The meeting "next Wednesday is scheduled to begin at 6 p.m. at the McKinley Village Community Center on the Parks Highway." Officials say "planners will be providing information about the plan and they also will seek public input."

Coverage by the AP was also picked up by the [Franklin \(IN\) Daily Journal](#) (9/19, 51K) and the [Houston Chronicle](#) (9/19, 2.47M).

HUNTERS FACE CHARGES AFTER KILLING MOOSE INSIDE DENALI NATIONAL PARK AND PRESERVE. The [Fairbanks \(AK\) News-Miner](#) (9/19, 44K) reports that "two Alaska hunters reportedly shot and killed a moose nearly a mile inside the boundaries of Denali National Park and Preserve, according to a news release from the park." Park rangers were "notified on Sept. 14 by a hunter in the Stampede Trail corridor that two men on an off-road vehicle had crossed the boundary into the park, and had shot a moose." According to the article, "the men, both from the Matanuska Valley, said they did not know they were inside the park."

DENALI ROAD OPEN TO PRIVATE VEHICLES AT SEASON END. The [AP](#) (9/19) reports that "visitors can now drive their private vehicles into Denali National Park and Preserve, weather permitting." The park says "the 92-mile road will be open to private vehicle traffic up to mile 30, the Teklanika Rest Area." However, "park officials urge visitors to call ahead for conditions because weather this time of year can change quickly."

HOLYOKE DESIGNATED AS CERTIFIED LOCAL GOVERNMENT. The [Springfield \(MA\) Republican](#) (9/19, 358K) reports that Holyoke now is a Certified Local Government. The designation by the NPS and the Massachusetts Historical Commission "qualifies the city to apply for certain grants previously unavailable," according to Olivia Mausel, Holyoke Historical Commission chairwoman.

GROUPS CALL FOR AGOURA HILLS WILDLIFE CROSSING. The [Los Angeles Times](#) (9/19, Groves, 4M) reports that "with the Griffith Park mountain lion as their poster puma, the National Wildlife Federation and the Santa Monica Mountains Fund have joined forces to raise money for a wildlife crossing at the 101 Freeway in Agoura Hills." The "Save L.A. Cougars" campaign will "kick off Friday at a public rally featuring legislators and schoolchildren at the site of the proposed crossing near Liberty Canyon Road, about 30 miles northwest of downtown Los Angeles." According to the article, "the crossing, long on the wish list of scientists and

transportation officials, would link protected habitat on either side of the freeway to give cougars, bobcats and other wildlife safe passage through the dense urban landscape to find food and mates."

PETITION SEEKS TO STOP REMOVE OF YELLOWSTONE BISON. [KPAX-TV](#) Missoula, MT (9/19, 1K) reports that "an emergency rule-making petition has been filed to stop the possible removal of 900 Yellowstone National Park bison." The petition is asking for the NPS "to consider new scientific advancements in their bison management plan."

ADDITIONAL COVERAGE: WHITE HOUSE VISITOR CENTER REOPENS. Additional coverage of the reopening of the White House Visitor Center was provided by the [Los Angeles Times](#) (9/19, Levine, 4M).

ADDITIONAL COVERAGE: NPS ANNOUNCES 2014 DIRECTOR'S PARTNERSHIP AWARDS. Additional coverage of the 2014 Director's Partnership Awards was provided by the [Pagosa \(CO\) Daily Post](#) (9/19).

Bureau of Land Management:

BLM WANTS DRONES KEPT AWAY FROM WILDFIRES. The [AP](#) (9/19) reports that BLM officials in Nevada are "warning drone pilots to keep their aircraft away from wildfires." The bureau says "it's counted at least four instances this year when a drone has flown in or near a wildfire zone where flights were temporarily restricted." BLM officials say "pilots who interfere with firefighting efforts could face fines or criminal charges."

Coverage by the AP was also picked up by [KLAS-TV](#) Las Vegas (9/19, 136K) and [KTNV-TV](#) Las Vegas (9/19, 59K).

Also reporting on the story is the [Nevada Appeal](#) (9/19, 49K).

GROUP PROTESTS WILD HORSE ROUNDUP PLAN. [KLAS-TV](#) Las Vegas (9/19, 136K) reports that the BLM "plans to roundup 80 percent of the horses" in Cold Creek in the winter. But "one group of wild horse advocates showed up at Thursday's BLM advisory meeting in Las Vegas to oppose the idea." President of the Spring Mountain Alliance Arelene Gawne said, "We have got a phenomenal tourist attraction. And if Las Vegas learned anything in 2008, we need to diversify our tourist draw." Gawne "wants to gather and sterilize most of the horses then release them back."

BLM PROPOSES IMPROVEMENTS FOR BRUNEAU CANYON OVERLOOK. The [Twin Falls \(ID\) Times-News](#) (9/19, 54K) reports that the BLM is proposing to make the Bruneau Canyon Overlook "safer and more accessible." According to the article, "improvements at the overlook in Owyhee County will include enhanced trail access to the canyon rim, additional educational signs, restrooms and more railings."

WOMAN CLAIMS BUNDY'S CATTLE CAUSED CAR CRASH. The [Talking Points Memo](#) (9/19, 218K) reports that "a woman sued Nevada rancher Cliven Bundy for negligence since a cattle he let roam on public land caused her to crash her car." In April, the BLM "let Bundy use federal land for his cattle even though he hasn't paid grazing fees in years after an intense standoff between the rancher's militia and the federal government." Just two days after the bureau "released Bundy's cattle, multiple cows wandered onto an interstate highway, where one collided with a car."

ADDITIONAL COVERAGE: FIVE CHARGED IN MAY ATV RIDE. Additional coverage of the charges filed against five men for their role in planning an illegal ATV ride in Utah was provided by [PBS](#) (9/19, 688K), the [Las Vegas Review-Journal](#) (9/19, 386K), the [Cache Valley \(UT\) Daily](#) (9/19, 639) and [KSL-TV](#) Salt Lake City (9/19, 1.07M).

Fish and Wildlife Service:

FWS DECIDES NOT TO LIST GEORGIA ASTER. The [AP](#) (9/18) reports that "federal wildlife officials say conservation efforts have helped keep the Georgia aster from being listed as endangered." FWS officials say "the aster, a purple-flowering plant found in Georgia, Alabama and the Carolinas has been a candidate for federal endangered species status since 1999." Officials say "the decision not to list the plant as endangered was based on a review of the number, size and health of aster populations, along with an appraisal of imminent threats to the plant."

Also reporting on the story is the [Asheboro \(NC\) Courier-Tribune](#) (9/19, 16K).

FWS PROVIDES \$300,000 FOR ZIMBABWE ELEPHANT, RHINO CONSERVATION. The [RadioVop \(ZWE\)](#) (9/19) reports that in 2014, the FWS "provided over \$300,000 for elephant and rhinoceros conservation in Zimbabwe, pushing the amount that the agency has donated in Zimbabwe since 2002 over the \$1 million mark to \$1.25 million." The article notes that "this year's contributions were matched with funds from other donors and non-governmental organizations for a total of over \$750,000 for conservation activities in Zimbabwe."

US Geological Survey:

RESEARCHERS WORKING ON SOFTWARE TO VISUALIZE EVACUATION SCENARIOS. [Government Computer News](#) (9/18, 1K) reports that "researchers and developers working with the US Geological Survey have been developing geographic information system software to assist pedestrian evacuation from disasters zones." According to the article, "researchers' recent efforts have focused on a 'path distance modeling approach that incorporates travel directionality, multiple travel speed assumptions and cost surfaces that reflect variations in slope and land cover.'"

Also providing coverage is [KQED-FM](#) San Francisco (9/18, 20K).

Securing America's Energy Future:

Renewable Energy:

UPDATE ON SUNZIA TRANSMISSION LINE PROVIDED FOR LINCOLN COUNTY COMMISSIONERS.

The [Ruidoso \(NM\) News](#) (9/19, 40K) reports that "representatives from all sides of the SunZia transmission line project updated Lincoln County commissioners Tuesday on a compromise routing of the line that may open the way for work to move forward toward a 2018 commercial operation date." BLM project director Adrian Garcia, Mark Matthews from the Socorro field office and Chuck Schmidt from the Roswell field office "led off the update for commissioners, because their agency is the lead on the SunZia project."

The story also appears at the [Las Cruces \(NM\) Sun-News](#) (9/19, 39K).

Onshore Energy Development:

GREEN GROUPS ASK OBAMA TO TARGET METHANE LEAKS. [Bloomberg News](#) (9/18, Snyder, 1.94M) reports the Obama Administration is being asked by environmental groups "to beef up its climate plan by targeting methane leaks in the web of valves, pipes and pumps drillers use to produce and deliver natural gas." Although "companies have a vested interest in keeping methane bottled up on its way to customers, some gas inevitably seeps out" and that is "worrisome because methane – the primary component of gas – is 25 times more potent than carbon at trapping heat." Clean Air Task Force advocacy director Conrad Schneider "said the U.S. won't meet its own climate commitment to reduce greenhouse gases by 17 percent from 2005 levels by 2020 without targeting methane." He stated, "It's a very potent global warming pollutant," and that regulating it "could be the great capstone to their climate efforts."

Also reporting on the story is the [FuelFix](#) (9/18, 7K).

USGS SAYS WASTE-WATER INJECTIONS CAUSED EARTHQUAKE.. [KUSA-TV](#) Denver (9/18, 226K) reports that the USGS says "waste-water injections done by the oil and gas industry" are to blame for "a 5.3 magnitude earthquake" that "rattled Southern Colorado three years ago near Trinidad." Arthur McGarr, a USGS Researcher, said, "We weren't very surprised. The earthquakes coincided pretty much with the time and history of the waste water injection in some fairly high volume wells."

HOUSE PASSES DOMESTIC ENERGY BILLS. The "Floor Action" blog of [The Hill](#) (9/19, Marcos, 241K) reports the House yesterday "passed a consolidated package of bills it has already passed to boost domestic energy." The bills include "previously approved measures such as allowing construction of the Keystone XL pipeline, expediting natural gas exports and limiting environmental regulations." Further, the package "includes the text of bills such as requiring the Department of Energy to study the impact of thermal insulation in federal buildings and prohibiting the Environmental Protection Agency from implementing regulations that are estimated to cost more than \$1 billion." House Republicans contend "the consolidated legislation would help keep energy costs low and spur the economy."

JONAH FIELD IN WYOMING IS BEING REVITALIZED UNDER NEW FIRM. The AP (9/18, Storrow) reports that Jonah Energy bought assets in Jonah Field last May from Encana Corp., and has been working to revitalize production in the field. According to Jonah Energy's regulatory director, Paul Ulrich, the company has focused solely on its Wyoming assets, and is "planning on continued drilling, enhanced drilling, other initiatives to grow our current base production."

Offshore Energy Development:

SEISMIC SURVEYING OFF EAST COAST MAY BEGIN NEXT YEAR. McClatchy (9/18, Subscription Publication, 27K) reports that as soon as Spring 2015, seismic surveying may begin along the East Coast. The "American Petroleum Institute said the seismic blasts are safe and are being overly restricted by the government." In a statement, the group explained, "Operators already take great care to protect wildlife, and the best science and decades of experience prove that there is no danger to marine mammal populations."

Coverage was also picked up by the [Columbia \(SC\) State](#) (9/18, 327K), the [Fort Worth \(TX\) Star-Telegram](#) (9/18, 489K), and the [Sacramento \(CA\) Bee](#) (9/18, 646K).

Seismic Testing Supported. In an op-ed for the [Charleston \(SC\) Post and Courier](#) (9/19, 295K), Cathy Novinger, Executive Director, Palmetto AgriBusiness Council, writes that "with the initial approval of the Bureau of Ocean Energy Management (BOEM) for seismic testing off the Atlantic states, South Carolina is presented with a unique opportunity to evaluate our available resources in an environmentally responsible manner." She asserts that "we must not let misinformation cause us to bypass this opportunity which could lead to creating thousands of jobs and boosting our state's economy." Novinger says "we need up-to-date and accurate information using the latest technology in order to assess what resources are off our coasts, which has not been done extensively in 40 years." She concludes that "we can continue to preserve our land, air and water resources, while at the same time explore our assets for the economic benefit of all South Carolinians."

COURT UPHOLDS DECISION TO ALLOW INVESTIGATION INTO ROLE OF TRANSOCEAN IN 2010 OIL SPILL. The AP (9/18, McGill) reports that a Federal appeals court in New Orleans upheld a lower court's ruling in a 2-1 decision allowing a Federal safety board's right to investigate the role of Transocean Deepwater Drilling Corp. in the 2010 Gulf of Mexico oil spill.

Tackling America's Water Challenges:

CONGRESS CONTINUES DISCUSSION ON CALIFORNIA WATER BILL. The [Sacramento \(CA\) Bee](#) (9/18, 646K) reports that "secret California water bill negotiations have a '55 percent to 60 percent chance' of success during the fast-fading 113th Congress, Democratic Sen. Barbara Boxer said Thursday." According to the article, "in her first extended public comments on the closely held water talks, Boxer voiced cautious optimism even as she criticized House Republicans for trying to exclude Northern California Democrats." Boxer said, "I'm very hopeful. I would say the discussions are going well."

TRIBES PERFORMS WAR DANCE AGAINST SHASTA DAM RAISE. The [Indian Country Today Media Network](#) (9/18, 78K) reports that "the Winnemem Wintu performed a War Dance at the Shasta Dam, their second in 10 years, September 11-14 to seek guidance from their ancestors as they try to stop a federal plan to raise the Shasta Dam 18.5 feet, which would submerge or damage about 40 sites integral to the tribe's religion, according to a 2012 study from the Stanford Center on Comparative Studies in Race and Ethnicity." The BOR is "currently finalizing a feasibility study and environmental impact statement on an 18.5-foot raise of the dam, which would increase statewide water storage by 1.5 percent and increase water of agriculture and metropolitan uses by 0.2 percent." Tribal members said "the War Dance was not about violence but about connecting with the spirit world and gaining strength and unity for the struggle ahead."

Empowering Native American Communities:

NATIVE AMERICANS RECEIVING FINAL SETTLEMENT PAYMENTS. The AP (9/19, Volz) reports that "hundreds of thousands of Native Americans across the nation have started receiving the final cash payments this week from one of the largest government settlements in US history." According to the article, "checks ranging from \$869 to nearly \$10 million were sent beginning Monday to more than 493,000 people by the administrators of the \$3.4 billion settlement."

Coverage by the AP was also picked up by the [Washington Post](#) (9/18, 4.9M), the [Great Falls \(MT\) Tribune](#) (9/18, 77K), the [Charlotte \(NC\) Observer](#) (9/18, 572K), the [Houston Chronicle](#) (9/19, Volz, 2.47M), the [Sacramento \(CA\) Bee](#) (9/18, 646K), and the [Missoulian \(MT\)](#) (9/19, 83K).

Also reporting on the story are the [Indian Country Today Media Network](#) (9/18, 78K), [KXLF-TV](#) Butte, MT (9/19, 2K), and [KFOR-TV](#) Oklahoma City (9/18, 130K).

BIA INVESTIGATING TODDLER'S DEATH. The [Cortez \(CO\) Journal](#) (9/18, 646) reports that the BIA is "investigating what is believed to be the drowning death of an 11-month-old in Towaoc." According to BIA Police Chief Mike McCoy, "the toddler was at a residence with the father when the death occurred on the afternoon of Friday, Sept. 12." McCoy said, "It's all preliminary at this time, but it appears to have been a drowning. We're waiting the autopsy report."

Top National News:

SENATE OKS TRAINING SYRIAN REBELS DESPITE BIPARTISAN SKEPTICISM ABOUT OBAMA'S WAR PLAN. While the 78-22 Senate vote on providing training and arms to militias in Syria fighting to overthrow the Assad regime, as well as ISIL, was not close – the [New York Times](#) (9/19, Weisman, Peters, Subscription Publication, 9.9M) calls it "overwhelming" – much of the coverage this morning focuses on those Senators who opposed the measure and what is perceived to be the half-hearted support it received from many of those who eventually backed it. For instance, [McClatchy](#) (9/19, Douglas, Subscription Publication, 27K) says the Senate "grudgingly approved" the measure after "several senators questioned the viability of Obama's strategy." McClatchy notes that even Senate Majority Leader Harry Reid said, "it is not perfect, that's for sure." But McClatchy also reports that President Obama "called it a victory nonetheless."

The [Los Angeles Times](#) (9/19, Mascaro, 4M) says the "vote...upended party allegiances and hardened opposition to the administration's strategy." The Times notes that "nine Democrats, 12 Republicans and one Independent voted no." Sen. Mark Begich is quoted as saying, "I disagree with my president."

Likewise, according to the [Washington Post](#) (9/19, O'Keefe, Kane, 4.9M), the vote "exposed a deep rift...among Democrats over waging war, with a large bloc of liberals staunchly opposed to the modest mission, fearing another long-term engagement in Iraq." The Post notes that "several of the party's rising stars, including" Sens. Elizabeth Warren and Kirsten Gillibrand "rejected the proposal, while in the House, Obama's proposal won approval only because a vast majority of Republicans backed him." The Post notes that Sen. Rand Paul also "voted no and used a combative floor speech to blast Obama and congressional colleagues for not holding a fuller war debate before the elections." The Post notes that Sen. Ted Cruz, who, like Paul, is expected to seek the GOP's presidential nomination in 2016, also opposed the measure, while Sen. Marco Rubio backed it.

[USA Today](#) (9/18, Davis, Today, 5.6M) points out that the authorization "sunset[s] on Dec. 11, ensuring that Congress will revisit" the debate after the midterm election. USA Today also reports that in the Senate, "resistance among Democrats in conservative-leaning states was notable" as Sens. Mark Begich, Jon Tester and Joe Manchin "all opposed the measure."

Scott Pelley reported on the [CBS Evening News](#) (9/18, story 3, 1:40, Pelley, 5.08M) that "a majority of senators have now voted to approve the President's plan" before moving on to a segment about the foiled terrorist plot hatched by ISIL sympathizers in Australia, and, on [NBC Nightly News](#) (9/18, story 2, 0:10, Williams, 7.86M), Brian Williams briefly noted the Senate vote in a ten-second aside.

The AP (9/19) reports that the President "says [the] bipartisan Senate vote...shows the world that Americans are united in combating the Islamic State group." The [Wall Street Journal](#) (9/19, Peterson, Crittenden, Subscription Publication, 5.62M) reports that on Thursday evening, the President said, "The strong bipartisan support in Congress for this new training effort shows the world that Americans are united in confronting the threat from ISIL."

The [New York Times](#) (9/19, Weisman, Peters, Subscription Publication, 9.9M) reports that the Senate "gave overwhelming approval" to the President's plan "then fled the Capitol...sidestepping the debate over the extent of American military action until the lame-duck session." The Times goes on to say that "the broader debate over Congress's role in blessing or expanding a new military campaign in the Middle East was one that few on Capitol Hill wanted six weeks before...elections." But the Times notes that Sen. Paul signaled his firm stance

on the larger issue when he said, "I'm not sending your son, your daughter, over to the middle of that chaos." Paul added, "Amid the interventionists' disjointed and frankly incoherent rhetoric, the only consistent theme is war. These barnacled enablers have never met a war they didn't like."

The [Wall Street Journal](#) (9/19, Peterson, Crittenden, Subscription Publication, 5.62M) reports that Sen. Bernie Sanders, who is reportedly mulling a presidential bid, voted against the measure, and said, "I worry very much that getting involved in that area could open the door to the United States once again being involved in a quagmire, being involved in perpetual warfare."

[The Hill](#) (9/18, Shabad, Cox, 241K) reported that some who voted "no" are "fearful that it could be difficult, if not impossible, for the administration to ensure the weapons do not end up in the wrong hands." Under the headline, "Conflicted Congress Passes Obama's New War Funding," the [Huffington Post](#) (9/18, Mcauliff, 11.54M) reported that the Senate was "voting to fund what amounts to the start of a new war without an actual war vote."

[Bloomberg News](#) (9/18, Hunter, 1.94M) says that "when lawmakers return in mid-November for a post-election session, they plan a broader – and likely far messier – debate over the use of military force to combat" ISIL. According to Bloomberg, "Senators in both parties said...the promise to hold that debate persuaded them to support the more narrow authority now." Sen. John Cornyn said on Tuesday, "We should be having this debate right now, not in December, and I think there are senators on both sides of the aisle who agree with me."

[Politico](#) (9/18, Everett, 977K) reported that after the midterm election, "the administration will have to sell lawmakers on a longer-term strategy and potentially even win congressional backing for a full-blown Authorization for the Use of Military Force, a much trickier proposition." According to Politico, Democrats are "worried that even the narrow Syrian rebel language approved by Congress on Thursday builds a slippery slope that could eventually commit significant U.S. spending to the Middle East and put more American lives at risk." Politico adds that Sen. Dick Durbin said his fellow Democrats' "reticence to loudly cheer for the president's plan stems from lingering distaste surround the long-term consequences of previous war authorizations — and fear that those same mistakes may be repeated." The [New York Times](#) (9/18, Peters, Subscription Publication, 9.9M) reported that ahead of Thursday's vote, Sen. Tammy Baldwin said, "I worry about an open-ended conflict."

The [Christian Science Monitor](#) (9/18, 426K) reports that the House Republican leadership "has indicated it's moving toward an overall authorization debate after the elections," and Senate Foreign Relations Committee Chairman Robert Menendez "is working on authorization legislation to fight [ISIL] but 'without an open-ended check.'"

The [New York Times](#) (9/19, Savage, Subscription Publication, 9.9M) reports that "legal specialists are saying that even legislative inaction could create a precedent leaving the executive branch with greater war-making powers." According to the Times, these "legal specialists" contend that "because Congress was on notice about how the executive branch was interpreting its 2001 and 2002 statutes, any failure to challenge that theory — especially as it enacted other legislation in connection with Islamic State policy — could be interpreted as ratifying it."

WPost A1: Generals Do Not Think Obama Should Have Ruled Out "Boots On The Ground." In a front-page article titled, "Rift Widens Between Obama, U.S. Military Over Strategy To Fight Islamic State," the [Washington Post](#) (9/19, Whitlock, 4.9M) reports that "a series of military leaders have criticized the president's approach against" ISIL, and on Thursday, retired Marine Gen. James Mattis "became the latest high-profile skeptic...telling the House Intelligence Committee that a blanket prohibition on ground combat was tying the military's hands." Mattis is quoted as saying, "Half-hearted or tentative efforts, or airstrikes alone, can backfire on us and actually strengthen our foes' credibility." The Post also reports that Rep. Buck McKeon (R-CA), the chairman of the Armed Services Committee, has "suggested that Obama should listen more closely to his commanders."

The [New York Times](#) (9/19, Landler, Subscription Publication, 9.9M) notes that when the President addresses the UN next week, "it will be the third time in three weeks that he makes the case for military action against the Islamic State — a remarkable sales campaign for a reluctant warrior." But the Times adds that "far from clarifying the war plan, the White House's public-relations blitz...has muddied several key issues, not least whether the offensive will require American ground forces." According to the Times, "the more the president and his aides have talked, the more confusion they have sown."

Bret Baier, on [Fox News' Special Report](#) (9/18, 1.53M), said the President and his advisers "continue to face skepticism about their strategy, their commitment, and their semantics." Correspondent Ed Henry added that

while "the President and his aides continue to stress US troops will not be part of a combat mission, they're fuzzier about whether they will be in a combat zone."

Bloomberg News (9/18, Dorning, 1.94M) notes that on Wednesday, the President "again drew a hard line on sending U.S. forces into 'another ground war in Iraq,'" but, according to Bloomberg, "that pledge may not preclude having American warriors coming under fire next to Iraqi troops as they root out Islamic State militants." Bloomberg says there could be "small groups of commandos operating in the shadows of Iraqi army units, giving advice and calling in airstrikes." And Bloomberg reports that on Thursday, White House press secretary Josh Earnest "acknowledged U.S. military personnel may be deployed 'in an advise-and-assist capacity.'"

Eugene Robinson, in his column for the **Washington Post** (9/19, 4.9M), says that even though the President has been "adamant that the war against [ISL] will not escalate to the use of U.S. ground troops," he "fear[s] that 'mission creep' – even if the president resists it – is baked in from the start." Robinson adds that "it is not hard to imagine the sequence: more trainers, more weapons, more support staff, more combat-like roles, more troops to execute missions beyond the capacity of our less-than-impressive proxies."

Peggy Noonan, in a column for the **Wall Street Journal** (9/19, Noonan, Subscription Publication, 5.62M) titled, "The Unwisdom Of Barack Obama," contends that the President has failed to inspire the public to enthusiastically back the war against ISIL and faults him for stating that his initial goal is to "degrade" the Sunni terrorists, which Noonan contends is insufficiently specific.

Dempsey: It May Take Year To Train Syrian Rebels To Fight ISIL. Ed Henry reported on **Fox News' Special Report** (9/18, 1.53M) that Gen. Martin Dempsey, the Chairman of the Joint Chiefs, had "made more news" on Thursday when he said "it may take up to a year to fully train the Syrian rebels." The **AP** (9/18, Burns) reports that Dempsey "cautioned...that it may be a year before the Syrian rebel force that" President Obama "calls a key element of his strategy for destroying" ISIL "is ready for action." According to the AP, Dempsey "said it will take three or four months to begin the \$500 million training program" because, "before training can start, the U.S. and certain allies must screen potential candidates in Syria for competence and loyalty." The AP says Dempsey also said "once training is underway, it will be necessary to figure out how the rebels would be linked to a political entity inside Syria...referring to this as the most difficult of the current unknowns."

In a front-page article, the **New York Times** (9/19, A1, Hubbard, Subscription Publication, 9.9M) reports that in Turkey, "intelligence agents from the United States and its allies are laying the groundwork for what they hope will become an effective force of Syrian rebels," but "even...the rebels themselves acknowledge that turning this relatively small group into a force that can challenge the well-funded and well-armed Islamic State is a challenge that will require tremendous support from its foreign backers." According to the Times, "At present the rebels are a beleaguered lot, far from becoming a force that can take on the fanatical and seasoned fighters of the Islamic State." The Times also reports that "while they long for greater international support and hate" ISIL, "ousting Mr. Assad remains their primary goal, putting them at odds with their American patrons."

AFP (9/18) reports that on Thursday, Abdel Ilah al-Bashir, identified as "the commander of moderate Syrian rebels," released a statement reading: "I hereby reaffirm the Free Syrian Army's continued commitment to removing the twin terrorists Bashar al-Assad and Abu Bakr al-Baghdadi from Syrian soil."

Paul: US Should Be "Destroying" ISIL, Not Arming "Fekless" Syrian Rebels. The **Daily Caller** (9/19, Pappas, 475K) reported that in his speech announcing his opposition to the President's plan to train and arm some Syrian militias, Sen. Rand Paul said, "Let's not compound the problem by arming feckless rebels in Syria who seem to be merely a pit stop for weapons that are really on their way to ISIS." Paul added, "I warned a year ago that involving us in Syria's civil war was a mistake, that the inescapable irony is that someday the arms we supply would be used against us or Israel." According to Paul, "That day's now" as "we are now forced to fight against our own weapons, and this body wants to throw more weapons into the mix."

In an article titled, "Rand Paul Adjusts Foreign Policy Stance," the **Wall Street Journal** (9/19, Reinhard, Subscription Publication, 5.62M) notes that while Paul opposes arming the militias in Syria fighting the Syrian military and ISIL, he is in favor of US strikes against ISIL. On Thursday, Paul said, "ISIS is now a threat. Let's get on with destroying them."

HOLDER ANNOUNCES FEDERAL PROGRAM AIMED AT BUILDING TRUST BETWEEN POLICE, COMMUNITIES. The **Los Angeles Times** (9/19, Serrano, 4M) reports that Attorney General Eric Holder on Thursday "announced a federal initiative Thursday to study racial bias and build trust between law enforcement

agencies and the communities they serve." Holder "cited growing divisions between police and residents as a topic of national importance since the protests" in Ferguson, MO, "sparked by the slaying of Michael Brown, an unarmed black man who was shot by a white police officer." Holder said "he hoped the program, supported by a \$4.75-million grant in five pilot communities, would help defuse future confrontations. 'The events in Ferguson reminded us that we cannot allow tensions, which are present in so many neighborhoods across America, to go unresolved,' Holder said. 'As law enforcement leaders, each of us has an essential obligation and a unique opportunity to ensure fairness, eliminate bias, and build community engagement,' he said."

DOJ Also To Review Police Force Bias. The [Washington Times](#) (9/19, Chumley, 373K) reports that Holder also announced on Thursday a "new campaign" that "puts the federal government in control of checking for bias within law enforcement agencies around the nation." Holder's announcement comes as the Justice Department conducts a review of the Ferguson police force "and whether that department's majority white composition – in a largely black community – drove biased policing." Holder said "his three-year campaign will look at five separate 'major activities' police perform in as-yet unnamed American cities," and "funding the initiative will be taxpayers, to the tune of a \$4.75 million grant."

NYTimes Urges Congressional Action On Police Militarization. The [New York Times](#) (9/19, Subscription Publication, 9.9M) editorializes that police forces "have become increasingly militarized in the last 40 years, many getting free Pentagon war-surplus material, supposedly to use against drug dealers and terrorists." At a hearing last week, lawmakers "questioned why local police needed the 11,959 bayonets distributed by the Pentagon since 2006, and why 13 local police forces with fewer than 10 officers are now equipped with anti-mine-and-ambush vehicles designed for the battlefields of Iraq and Afghanistan." Congress "first approved war-surplus materials for civilian police in the 1970s – no small coup back then for those interested in law-and-order politicking and currying favor with defense contractors." The Times notes "bipartisan proposals to have Congress take the lead in demilitarizing the police," and urges Congress to "move swiftly on these measures so that police forces don't become standing armies."

NYTimes Endorses Recording Of Police Interrogations. The [New York Times](#) (9/19, Board, Subscription Publication, 9.9M) editorializes that confessions "are among the most compelling and critical pieces of evidence in a criminal trial," but "false or coerced confessions are disturbingly common," and although "law enforcement officials have long resisted recording interrogations," that "resistance is ebbing as the benefits become clear." Recording interrogations "is insurance against claims of coercion or mistreatment," and for prosecutors, "it saves resources by encouraging plea deals." It can prevent wrongful convictions of innocent defendants, and "it protects the public by ensuring that the right people are charged and convicted."

FED: CONSUMER BORROWING, HOUSEHOLD WEALTH UP SHARPLY IN Q2. The [Wall Street Journal](#) (9/19, Shah, Subscription Publication, 5.62M) reports that US household wealth rose \$1.4 trillion in the 2nd quarter to \$81.5 trillion, a new record high, according to data released by the Federal Reserve. The report also showed that consumer borrowing rose at a 3.6% annual rate during the quarter, the fastest increase since Q2 2008. Economists hope that higher household wealth combined with more willingness to borrow will spur consumer spending, a major component of the economy.

Yellen Says Poor Americans Still "Vulnerable." [Bloomberg News](#) (9/18, Kearns, 1.94M) reports that in prepared remarks, Fed Chair Janet Yellen "said a large share of American families with few assets to fall back on remain 'extraordinarily vulnerable,'" even deep into the economic recovery. Yellen said, "We have come far from the worst moments of the crisis, and the economy continues to improve. But the effects of the recession are still being felt by many families, particularly those that had very little in savings and other assets beforehand." Yellen cited a Fed report that "showed the median net worth reported by the bottom fifth of households by income was just \$6,400 last year."

WPost Bemoans Asset Inequality. In an editorial, the [Washington Post](#) (9/19, 4.9M) says that the Fed's data shows that the "resurgent wealth" is "anything but equally shared." The Post says that "the rich are getting richer — and everyone else, not so much," and government and the private sector "need innovative approaches to help ensure opportunities for people at all income levels to save and profitably invest."

Editorial Wrap-Up:

NEW YORK TIMES. "Murder In The Mediterranean." An editorial in the [New York Times](#) (9/19, Subscription Publication, 9.9M) calls on Western countries to honor their promises to take in refugees "fleeing wars and conflict in Syria, Gaza and Africa," and to "set up asylum and refugee application centers in Egypt and Libya."

Crimea.

Estonian President Toomas Ilves said on CNN's Fared Zakaria GPS (3/16, Zakaria, 456K), "We have received assurances from President Obama and from Vice President Biden and certainly I think what has come home to all of us is the idea that...the security situation in Europe is not resolved in the way that we thought with the peace dividend in the 1990s."

Polish Foreign Minister Radosław Sikorski said on CNN's Fared Zakaria GPS (3/16, Zakaria, 456K), "Once you start using the argument used in 1938 to annex the Sudetenland, no borders in Europe are secure anymore. ... We are all reluctant to impose sanctions because Russia will probably respond and we'll all suffer as a result, but Russia is leaving us no choice."

Karl Rove said on Fox News Sunday (3/16, Wallace), "We should not be saying to the Ukrainians, don't bother us about weapons. The question ought to be what kind of assistance do you need and we should be willing to provide it. But it shouldn't be military only. If we have specific sanctions that are being authorized, let's go after specific individuals. Let's have a plan, a strategy to ramp those up, if something happens in Crimea today, there ought to be an action relatively soon, if they take further steps there ought to be continuing reactions. But we don't seem to have a strategy and a plan."

George Will said on Fox News Sunday (3/16, Wallace), "I would be surprised, given [Putin's] temperament and his actions so far, that he wanted to stop where he is with Crimea. ... When Lavrov met with John Kerry, it was clear he had no latitude to negotiate. He's not interested in an off-ramp. ... Hillary Clinton got in a lot of trouble for saying, correctly, that this is just what Hitler did with the Sudeten Germans, and then with the Germans in the Polish city of Danzig. So, we've seen this movie before."

Judy Woodruff said on Fox News Sunday (3/16, Wallace), "It has been jarring to see this reversion to what we thought of Cold War, or even pre-Cold War, scenario with tanks moving down country roads, with people disappearing who were critical of the regime, either in Ukraine or in Moscow, but, I think what's happening now, is no one knows for sure what Putin's going to do."

Fared Zakaria said on CNN's Fared Zakaria GPS (3/16, 456K), "The crisis in Ukraine was produced by two sets of blunders, neither emanating from Washington. The European Union's vacillations, and most significantly, of course, Russia's aggression produced the problem. But it will now be up to President Obama to show the strength and skill to resolve it."

Lawmakers Criticize Vote, Call For Sanctions. Bloomberg News (3/17, Lerman, Giroux, 1.91M) reports lawmakers from both parties on Sunday criticized Sunday's referendum in Crimea and called for sanctions on Russia, as well as "military assistance for Ukraine."

The Los Angeles Times (3/17, Mascaro, 3.07M) reports Sen. John McCain said Sunday that the US needs a "fundamental reassessment" of its relationship with Putin. "No more reset buttons," McCain said on CNN's State Of The Union. "Treat him for what he is. That does not mean re-ignition of the Cold War, but it does mean treating him in the way that we understand an individual who believes in restoring the old Russian empire," he added.

The Huffington Post (3/17, Edwards-Lewy, 11.54M) also reports his comments.

Senate Majority Whip Durbin said on NBC's Meet The Press (3/16, Gregory), "This is the single most serious act of aggression since the Cold War. He ended up the final ceremony at the Sochi Olympics...trying to make it a charm offensive for the world that this is a modern Russian nation, and within hours invading one of his neighbors sending the same troops protecting the athletes at Sochi into the Crimea. Now, are we going to stand by and say this is acceptable conduct? Because this isn't the end of his ambition."

Senate Foreign Relations Chairman Robert Menendez said on Fox News Sunday (3/16, Wallace), "President Putin has started a game of Russian roulette, and I think that the United States and the West have to be very clear in their response, because he will calculate about how far he can go. So that means they're having very robust sanctions ready to go, starting with the Crimea vote and moving onward depending upon Russia's continued actions after the Crimea vote."

House Intelligence Chairman Mike Rogers said on CBS' Face The Nation (3/16, Schieffer, 2.64M), "We've seen this movie before. We should be cautious. ... Right now Russia is feeling a unique set of pressures other than the international community, it's their economy starting to suffer. Russia is so dependent on energy as the propping up their economy, any disruption in that cash flow has serious and real consequences."

Sen. Bob Corker said on Fox News Sunday (3/16, Wallace), "We do have to show resolve. The European community has stepped up, and made commitments to do some things that they have never done before. The sanctions that we passed out of the Foreign Relations Committee the other day are very biting, one of a kind. We've never done this before where economic extortion and corruption are a part of those. ... This will be a major miscalculation on behalf of Putin if he were to move in to eastern Ukraine."

Sen. Jeff Flake said on NBC's Meet The Press (3/16, Gregory) that Ukraine's "military has been hollowed out over the past couple of years. They have, according to some Ukrainians, nothing that shoots, runs, or flies. It's because the Russians have had such close ties with the previous government that they hauled the military out. So they need a lot of help. But nothing that we can do will help the Ukraine withstand what Russia is going to do if they decide to go in."

Sen. Chris Murphy, who is in Ukraine, said on ABC's This Week (3/16, Stephanopoulos, 2.73M), "The mood is tense. ... This sham referendum isn't fooling anyone. You see additional troops being mustered by the Russians on the eastern border. ... I think as soon as we get back to Washington, you'll see the Senate and the House pass an economic aid package, along with sanctions. I think there are a lot of ways that we can assist in the resistance. I'm not sure that we're to the point of providing arms, but they need all sorts of non-lethal assistance, like MREs, that we can put on the ground."

GOP'S FL13 WIN ATTRIBUTED TO POOR DEMOCRATIC TURNOUT, OBAMA'S WEAK POLL NUMBERS.

E.J. Dionne, in his column for the Washington Post (3/17, 4.28M), warns that a "fog of nasty and depressing advertising" from the GOP and its allies "threatens to reduce the electorate to a hard core of older, conservative voters eager to hand the president a blistering defeat." According to Dionne, Democrat Alex Sink's loss in the FL13 special election last week "owed to many factors, but one of them is disaffection in Democratic ranks." Dionne notes that last week's NBC News/Wall Street Journal poll found that the President disapproval rating is now at 20% among Democrats.

Discussing Republican David Jolly's special election win in Florida's 13th district, RNC Chairman Reince Priebus, on CNN's State Of The Union (3/16, Crowley), said Jolly "had a position on Obamacare, which was obviously positive for him," but also "had a positive message besides Obamacare." However, also on CNN's State Of The Union (3/16, Crowley), Priebus added, "Obamacare is complete poison out there in the field and so the lesson is going to be, number one, you have to hit your main target, which is Obamacare."

Pollster Matthew Dowd, on ABC's This Week (3/16, Stephanopoulos, 2.73M), said of FL13, "everything was lined up...in this district for the Democrats to pull out this victory – they had the better candidate, better name ID, they actually had more money in this. And the Republican candidate actually was very flawed, a former lobbyist." According to Dowd, "This wasn't about some big pro-Republican candidate, it is the President's job approval."

Judy Woodruff, on Fox News Sunday (3/16, Wallace), noted that David Plouffe, who managed President Obama's 2008 campaign, "said this week this is a screaming siren warning to Democrats that turnout is going to be a much bigger problem than they have even anticipated."

BUSINESS OPTIMISM RISING. The Wall Street Journal (3/17, Cronin, Subscription Publication, 5.91M) reports that while businesses remain concerned about the Crimea situation and the potential for an economic slowdown in China, business optimism is on the rise. The Journal says that the Economic Policy Uncertainty Index, created by a Stanford professor, has now fallen to levels last seen at the start of the recession, down from a record high following the debt-ceiling battle in August 2011. The Journal credits the drop to an easing of partisan tensions in the Federal government.

Yellen To Address Fed's Direction This Week. USA Today (3/16, Davidson, 5.82M) reports that Fed Chair Janet Yellen "faces an important test" on Wednesday, as "her first news conference coincides with an anticipated

change in the central bank's guidance related to short-term interest rates." The Fed is expected to continue tapering its stimulus policy at its two-day meeting that begins Tuesday, but "less certain" is "how a Fed post-meeting statement and Yellen will convey that rates will stay low despite unemployment that's fallen faster than expected."

Samuelson Delivers Mixed Verdict On Stimulus. In his column for the Washington Post (3/17, 4.28M), Robert J. Samuelson delivers a post-mortem on the 2009 economic stimulus bill, which he says "remains controversial and divisive" five years later. While Samuelson says that the White House Council of Economic Advisers argues that the stimulus, along with follow on measures, "helped stop the free fall and propel recovery," but he argues that there is reason to doubt that. Samuelson accepts that the stimulus measures helped keep the economy from collapsing, but perhaps not much beyond that, and he concludes that "more stimulus won't cure underperformance and may perversely contribute to it."

Lazear Says Jobs Report Should Raise Concerns. In an op-ed for the Wall Street Journal (3/17, Subscription Publication, 5.91M), Edward Lazear, a professor and chair of the Council of Economic Advisers for President Bush, writes that while many commentators viewed the February job report, which showed a gain of 175,000 jobs, as a positive sign, he sees worrying signs in it. In particular, he notes that since September, the total hours worked by the labor force has fallen by 3/10ths an hour per worker. He argues that this actually represents the equivalent of the loss of several hundred thousand jobs.

Editorial Wrap-Up:

NEW YORK TIMES. "A Hard Turn." The New York Times (3/17, Subscription Publication, 9.61M) writes in an editorial that New Yorkers can expect "lurching and bumps" as Mayor De Blasio figures out how to effectively manage his new position. The paper recounts his efforts with the "quixotic quest" of his pre-k initiative that just got proposed funding in the budget, but not his proposed tax, from leaders in Albany. The paper also says that the new mayor has faced setbacks of a "substantive," "symbolic," and "silly" nature, and has been "outmaneuvered" by Governor Cuomo on several issues.

"Charter Schools." The New York Times (3/17, Subscription Publication, 9.61M) editorial board also comments on the state of charter schools in New York following Mayor de Blasio's comments on them. The Times urges de Blasio to look at the "most important dimension: educational quality," when evaluating the state of schools. The paper argues that the city should "shut down failing schools and allow only the best charter operators to expand" and that de Blasio should "reconsider" his proposal of charging charter schools rent for space in public schools. The Times concludes that as the debate over the state of charter schools continues, advocates should set aside their "hyperbole about being under siege" and that de Blasio should "renounce divisive rhetoric" that cast charter schools as "alien institutions."

"The Flute, The Flute Is Calling."

WASHINGTON POST. "Posturing Over The Holocaust." A Washington Post (3/16, 4.28M) editorial chides Maryland lawmakers and asks them to "stand down" on "posturing aimed at" Keolis North America. The paper finds the behavior of lawmakers "baffling" since Keolis and the French government have already apologized and made reparations for their involvement in transporting French Jews to Germany during WWII, and observes that foreign diplomats are working on reparations to the small number of Jewish families located in the United States. Never the less, Annapolis lawmakers are in a "state of high dudgeon" over the company's involvement and that the "symbolic stance" has been "torpedoing the Purple Line." The paper asks that reparations remain "in the realm of diplomacy, not in legislative corridors in Annapolis."

"A Tortured Debate." In an editorial, the Washington Post (3/17, 4.28M) says that the "heart of the dispute" between the Senate Intelligence Committee and the CIA is Leon Panetta's internal review of the "use of torture in the interrogation of suspected terrorists." The Post says that the CIA should allow the Senate to use the Panetta report in its review of the issue. The Post also says that it hopes that the move will aid to bringing the debate back around to the actions of President Bush.

"Muriel Bowser For Mayor." The Washington Post (3/17, 4.28M) editorial board urges readers to elect DC

Council member Muriel Bowser (D-Ward 4) as the new Mayor of Washington, DC. The paper hails Bowser as a "fresh start" because of her prior efforts and the "professionalism" of her campaign where she "articulated an agenda that promotes continued economic growth but doesn't ignore the challenges and inequities that growth can bring." The board also criticizes current Mayor Vincent Gray for the recent campaign scandal and say the he "would be a poor choice."

WALL STREET JOURNAL. "Consumer Financial Cover-Up." In an editorial, the Wall Street Journal (3/17, Journal, Subscription Publication, 5.91M) notes that in a letter to Consumer Financial Protection Bureau Director Richard Cordray, Rep. Jeb Hensarling concludes that the Bureau will not reveal how it determines when employers unintentionally discriminate against minorities. The Journal notes the damage a charge of racism can do to a business and adds that lenders cannot defend themselves if they do not know which practices the bureau believes are illegal. The Journal adds that while the House has voted to subject the bureau to Congressional funding and to replace the director with a five-member commission, the White House and Cordray know Senate Democrats will block the measure, so they will continue to and the White House know that Senate Democrats will block it, so they will continue to coerce lenders into settling claims.

"Death In Chinese Custody." In an editorial, the Wall Street Journal (3/17, Subscription Publication, 5.91M) says the case of Cao Shunli, a Chinese political prisoner who died last week after medical neglect, should be raised at this week's meeting of the UN Human Rights Council in Geneva. The Journal notes that since the Obama Administration justifies its membership on the Human Rights Council as a means of engaging oppressive regimes, it should engage on Cao's case and the issue of China's treatment of North Korean refugees.

"Welcome To The 19th Century." An editorial in the Wall Street Journal (3/17, Subscription Publication, 5.91M) argues that the result of the Crimea vote was a foregone conclusion and that Putin may now have his eye on eastern Ukraine, as the West has so far offered only threats of "consequences" that Putin sees no reason to take seriously. The Journal argues for measures designed to push back against Putin's aggression, including economic sanctions that give banks a choice between doing business with the US or doing business with Russia and a military deterrent in the form of military aid to Ukraine and the deployment of US and European forces to Poland, the Baltic states and other nearby NATO nations.

The Kaiser Family Foundation is hosting a panel discussion of U.S. Ambassadors, featuring Ambassador to Malawi Jeanine Jackson, Ambassador to Haiti Pamela White, and Ambassador to Papua New Guinea, Solomon Islands, and Vanuatu Walter North. The event will also feature remarks from Ambassador Leslie Rowe, acting special representative in the Secretary's Office of Global Health Diplomacy and former U.S. Ambassador to Mozambique and to Papua New Guinea, on the role of the new office. Jen Kates, Kaiser Family Foundation's vice president and director of global health and HIV policy, will provide opening remarks and moderate the panel discussion. Location: Barbara Jordan Conference Center, Kaiser Family Foundation Offices, 1330 G St. NW.

GEORGETOWN LAW – JUSTICE KAGAN — 4 p.m. Georgetown University Law Center presents the inaugural Dean's Lecture to the Graduating Class: A Conversation with U.S. Supreme Court Justice Elena Kagan, moderated by Dean William M. Treanor. Location: Georgetown University Law Center, Hart Auditorium, McDonough Hall, 600 New Jersey Ave.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: [Referring to the political unrest in Ukraine] "It just keeps getting more and more tense. And now, Vladimir Putin has moved 10,000 troops to the Russian-Ukrainian border. Russia says the troops are only there for a training exercise. When asked what they're training for, Russian officials are like, 'Invading Ukraine.'"

Jimmy Fallon: "It seems like everybody is on Obama's case right now. Facebook founder Mark Zuckerberg apparently called the President directly to complain about the NSA and how it spies on ordinary Americans. The guy who runs Facebook got mad at the NSA for spying on people. Talk about the pot unfriending the kettle."

Seth Meyers: "The situation in Crimea continues to develop. Secretary of State John Kerry told reporters today that America won't recognize Crimea's vote to secede from Ukraine. Which makes sense, since most Americans wouldn't recognize Crimea on a map."

Seth Meyers: "Well, the Obama Administration announced it is going to require colleges and vocational schools to demonstrate they're properly preparing students for jobs after college. Yeah. So don't be surprised if your next chemistry class is all about how to make a cappuccino."

**General Questions and Answers on the 2015 Budget
Table of Contents**

General Topics	GENERAL
Please provide a short description of your 2015 budget.....	1
 <i>Opportunity, Growth, and Security Initiative</i>	
What is this Initiative?.....	3
What is proposed in the Initiative for Interior?	3
Is the funding in the Initiative part of your budget request, is it real?.....	4
 <i>Payment in Lieu of Taxes</i>	
What is the 2015 budget proposal for this program?.....	4
What is your schedule for making the 2014 payments?	4
Will the 2014 PILT payments be reduced for sequestration?	5
 <i>Secure Rural Schools</i>	
What is the 2015 budget proposal for Secure Rural Schools?	5
What is the timing of the 2014 Secure Rural Schools payments?	5
Will the Secure Rural School payments be sequestered?.....	6
 Celebrating and Enhancing America’s Great Outdoors	 AGO
<i>Land and Water Conservation Fund</i>	
What are you requesting for the Land and Water Conservation Fund?.....	1
What is the rationale for a \$900 million annual investment in the LWCF?.....	1
Your budget includes a proposal for full, mandatory funding for LWCF. Why put this proposal forward now in a time of constrained budgets?	2
What role do you envision the Congress and appropriators would have in the oversight and decision making process?.....	2
 <i>Centennial Initiative</i>	
What is the Centennial Initiative?	3
Where is the funding requested?.....	3
What would the request buy?	4
<i>Examples of Outcomes</i>	
21 CSC Partnerships.....	5
Improving Facilities/Assets	5
Leveraged Investments	5
 <i>Grazing Administrative Fee</i>	
Why is the BLM proposing to add a fee for livestock grazing permit applicants?	6
Would this fund the entire grazing program?.....	6
Does this impact the current grazing fee?	7
Why should Congress support this new fee?	7

Strengthening Tribal Nations TRIBAL

What is in this budget for Indian Affairs? 1
The budget for Indian Affairs does not increase as much as NPS. Why? 1
The Committee directed Interior and HHS to submit a work plan to solve Contract Support Cost issues. How is this progressing?..... 2
The 2015 budget includes level funding for energy programs in the Bureau of Indian Affairs while providing significant increases (\$21.6 million) for BLM.
Can you explain? 2
What is in the budget for law enforcement? 3

Indian Education

Where are we with efforts to improve Indian Education? 3
What is in the budget for BIE Education? 4
The Committee provided funding for design work on the next BIE replacement school. Can you update me on the status? 5
What is the status of a new replacement school construction project list? 5

Land into Trust - Carcieri

What is included in the budget relating to the Carcieri v. Salazar decision? 6
Does your Solicitor's recent M-Opinion alleviate the need for Congressional action to address this problem?..... 6

Powering Our Future..... ENERGY

Would you describe what is in the 2015 budget for energy? 1

Renewable Energy

What progress have you made on renewable energy development?..... 2
What are you doing to protect eagles and other birds from wind energy development?..... 2

Conventional Energy

What is the status of the current Five-Year Plan for the OCS? 3
What is the status of onshore production on Federal lands?..... 4
Your 2015 budget proposes to impose an onshore inspection fee for oil and gas inspections. What will this allow you to do?..... 5
How do you determine the onshore inspection fee?..... 5
Is the American public getting a fair return on the use of public lands?..... 5
What is your philosophy on oil and gas reforms? 6
Are the reforms effective? 6
What is in the budget to implement oil and gas reform?..... 7
What is in the package of legislative Federal oil and gas reforms proposed in the budget? 7

General Oil and Gas Facts..... 8

Hydraulic Fracturing

I see you are requesting an \$8 million increase for Hydraulic Fracturing research.

What is this for? 8

What is the status of the proposed rule on hydraulic fracturing? 9

Engaging the Next Generation YOUTH

What is in this budget for youth oriented programs? 1

Can you give me some examples of projects? 1

Urban Wildlife Refuge Partnerships 1

Hurricane Sandy – NY Harbor Conservation and Resiliency Corps 2

San Joaquin Regional Conservation Corps..... 2

What goals do you have in youth engagement? 3

Ensuring Healthy Watersheds and Sustainable, Secure Water Supplies WATER

How does this budget address water issues? 1

Drought

What are you doing about the drought? 1

What is in the budget for drought? 2

Rural Water

Why is this funding cut so deeply? 2

What is the criteria for allocating funds for Rural Water projects? 3

Building a Landscape Level Understanding of Our Resources LANDSCAPE

Research and Development

What is in this budget for research and development?..... 1

Can you give me an example of R&D activities?..... 1

Can you give me an example of where the land management bureaus are working to apply science in the field? 2

Can you provide an example of how science is helping to implement your mitigation strategy? 2

Climate Change

What is in this budget for climate change? 3

Can you give me an example of what a Landscape Conservation Cooperative does? 3

Wildland Fire Management

What is the fire outlook for this season?..... 4

Would you describe the “new framework” for fire funding in the budget?.....	5
Would you describe the details of the proposal and how it would work?.....	5
Will this increase the amount spent on fighting fires?.....	6
What do you need in 2015 to fund the ten-year average?.....	6
Why 30% of the ten-year average for the cap exemption?.....	7
Why weren't all the funds available from the cap exemption put into the Fuels budget?	7
Why weren't all the funds available from the cap exemption put into the Wildland Fire budget?	8
Where were the funds allocated?	8
What else is in the Wildland Fire budget?	8

The Budget in General

Question: Please provide a short description of your 2015 budget.

Response:

- This is a responsible budget that conforms to the caps established by the Bipartisan Budget Act of 2013.
 - Interior's total request is \$11.9 billion, a 2.4% increase from 2014.
 - Without the fire cap exemption, the request is \$11.7 billion, a 0.3% increase or essentially level with 2014.
- It includes \$413 million in program reductions to make room for \$54 million in unavoidable fixed costs such as pay and rent, and higher priority activities and program increases of \$428 million.
 - Increases are included for youth engagement; science to inform land management and resource issues; full Contract Support Cost funding for Tribes; water conservation and sustainability; and smart, safe and environmentally responsible energy activities.
- The 2015 budget maintains core capabilities, particularly in the Bureau of Indian Affairs and the land management bureaus, paying close attention to maintenance needs across the Department.

Major Initiatives:

- The budget includes several reformative proposals that address critical needs for the Nation.
 - LWCF - \$246 million for LWCF programs as part of a legislative strategy to achieve full funding of \$900 million in the future.
 - Centennial - The budget includes \$40 million to gear up for the Centennial Anniversary of the National Park Service, complementing another legislative priority, the Centennial Initiative, to provide \$1.2 billion for the parks and other public lands over three years.
 - Fire - The budget confronts the escalating issue of fire suppression costs, head on, by proposing legislation to treat big fire costs consistently with other disaster costs.
 - Extreme fire emergencies, fires threatening urban areas, or abnormally peak fire seasons would be addressed through an existing budget cap adjustment.
 - With this proposal, the 2015 budget includes 70% of the 10-year average of fire suppression costs, \$269 million.

- It invests \$146 million in pro-active fuels management activities to reduce future fire risk, and includes an additional \$30 million to restore native habitat for resiliency.

Revenue and Partnerships:

- The Department expects to collect \$14.9 billion in revenue in 2015.
 - This includes \$3.9 billion from onshore oil and gas leasing, and \$8.2 billion in offshore oil and gas revenues.
 - Recreation Fee programs generate \$219 million annually, including \$179 million that NPS expects to collect.
- A significant portion of this will be shared with States and counties in payments.
 - Including \$2 billion in Mineral Revenue Payments that will be paid out to States in 2015. This is an increase of \$72 million or nearly 4% over 2014 payment levels.
- A total of \$4.8 billion in grants and payments will be made to States, counties and others in 2014.
 - This includes the proposed one-year authorization of PILT payments of \$442 million.

Fee Proposals:

- To ensure a fair return to the American taxpayer, the 2015 budget proposes fees:
 - \$48 million to be collected by the imposition of a fee for the inspection of oil and gas leases on public lands (including Indian lands).
 - \$6.5 million to be collected by the imposition of an administrative fee on grazing.

The Opportunity, Growth, and Security Initiative

Question: What is this Initiative?

Response:

- The President's budget includes this Initiative to show in tangible ways, how additional investments in 2015 can spur economic progress and promote opportunity.
- The proposal is fully paid for through a combination of spending cuts and closure of tax loopholes to demonstrate that additional pro-growth investments are affordable without increasing the deficit.

Question: What is proposed in the Initiative for Interior?

Response:

- The proposal includes \$346 million in investments for Interior programs. This components of this are:
 - Centennial Initiative - \$100 million for National Park Service deferred maintenance, and \$100 million to address conservation and maintenance in Interior's land bureaus and the U.S. Forest Service on a competitive basis.
 - Research and Development - \$140 to address natural resource challenges such as water sustainability, and the impacts of energy and mineral development.
 - Historic Preservation Fund program - \$6 million to digitize records and streamline permitting processes.
- Additional investments – without specific dollar levels – in Indian education and economic development, and climate resilience.
 - Investments in Indian education will include incentives and improvements for schools funded through BIE to improve childhood education and educational outcomes.
 - The Initiative also supports economic development and job growth in Indian Country, particularly for income vulnerable populations. Investments will target workforce development, economic development grants, and infrastructure development projects.
 - The climate resilience would be targeted to assist communities plan and invest in infrastructure to make them more resilient. Examples include breakthrough technologies to advance in

water treatment technologies to mitigate drought limited water supplies.

Question: Is the funding in the Initiative part of your budget request, is it real?

Response:

- The funding complements but is not included in the request for appropriations.
- Interior's budget is within the existing budget caps negotiated last year.
- Investments in the President's Initiative would be funded only if enacted with offsetting reductions as the President has proposed.

PILT

Question: The authorization for mandatory funding for the Payments in Lieu of Taxes program expires with the payments made in 2014. What is the 2015 budget proposal for this program?

Response:

- The 2015 budget includes a proposed one year extension for mandatory funding.
- If enacted by Congress, this would allow us to make a payment in 2015.
- The estimated payments total \$442 million.
- The budget also recommends we work with you to develop a longer-term solution for PILT.
- PILT pays over 1,800 counties each year as they are not able to tax Federal lands. PILT payments are provided in lieu of taxes and fund important services like emergency response, roads, and schools.

Question: Given the late reauthorization of the PILT program, what is your schedule for making the 2014 payments?

Response:

- We are planning to make the payments before July 1, as we normally would.
- The program was reauthorized for 2014 in the Farm bill.
- We would normally begin the process to formulate the payment amounts in the fall, but the program was not reauthorized until February 7.
- We are working on a very compressed schedule.

- The timing will depend on how quickly the data is submitted by the States. We asked for PILT data to be furnished by March 14, 2014.
- If the States were able to meet this deadline, we expect to ensure timely payments.

Question: Will the 2014 PILT payments be reduced for sequestration?

Response:

- No, PILT payments will not be sequestered in 2014.
- Our estimate of the payments totals \$432 million.
- The payments will not be sequestered in 2014 because the program was authorized after the issuance of the President's 2014 sequester order.

Secure Rural Schools

Question: The authorization for mandatory funding for the Secure Rural Schools program expires with the payments made in 2014. What is the 2015 budget proposal for Secure Rural Schools?

Response:

- The 2015 President's budget proposes to reauthorize Secure Rural Schools payments for five years, with all funding going through USDA's Forest Service.
- In this proposal, appropriations start with payments for 2014 that will be made in 2015.
- Interior would no longer make payments under this proposal, they would be consolidated in the Forest Service.
- The 2015 payments would total \$251 million and would decline over the succeeding years, ending with a payment of \$101 million in 2018.
- The proposal also revises the allocation split between the three portions of the program to emphasize forest ecosystems, restoration, and land health improvements.

Question: What is the timing of the 2014 Secure Rural Schools payments?

Response:

- The 2014 Secure Rural Schools payments were authorized in the Helium Bill enacted in September 2013.

- Payments will be made in the coming weeks. We are finalizing the payment calculations – the necessary information from the counties was recently received.

Question: Will the Secure Rural School payments be sequestered?

Response:

- No. The 2014 Secure Rural Schools payments were authorized in the Helium Bill enacted in September 2013.
- The payments would not be sequestered because the program was authorized after the President issued the 2014 sequester order.

Land and Water Conservation Fund

Question: What are you requesting for the Land and Water Conservation Fund?

Response:

- For both Interior and the Forest Service, the budget proposes \$900 million for LWCF in 2015, of which \$350 million is subject to appropriations and \$550 million is part of a legislative proposal.
- For Interior only, the request is \$246 million in appropriations, an increase of \$34 million from 2014, and \$426 million in a legislative proposal.

Question: What is the rationale for a \$900 million annual investment in the LWCF?

Response:

- The program's history has a rich legacy of conservation and recreation benefits, protecting land in every State and supporting over tens of thousands of State and local projects.
- **This is a smart investment** yielding 4 to 1 in returns for every dollar invested in LWCF.
- There are **tangible economic benefits to communities** across the country.
 - Nationally, visitation, tourism, and jobs related to nearby public lands contribute \$730 billion annually and support 6.5 million jobs.
 - Timely acquisition of important natural areas can avoid higher future costs from natural disruptions from fire or to water supplies. In 2012, more than 8 million acres burned in the U.S., resulting in \$1.9 billion in total economic losses.
 - For example, the request would expand a manageable fire buffer along the northwestern edge of Georgia's **Okefenokee Swamp**, helping to protect private lands, provide an economic benefit to the community, and streamline future fire-fighting activities.
- Communities benefit from **improved access to public lands for hunting, fishing and recreation**.
 - For example, the request would safeguard access to a heavily used trail along New York's **Upper Delaware Scenic and Recreational River** attracting over 255,000 recreational visitors in 2012. The project will maintain a key river access and recreational hiking opportunities.
- It enables smarter and more efficient management of the public lands.

- For example, the request would allow us to consolidate parcels in California's **Santa Rosa and San Jacinto Mountains National Monument** which will improve the efficiency of BLM management activities, resulting in overall long term savings.
- It is the best tool we have to **protect areas in imminent danger** from industrial or residential development.
 - NPS acquisition of 46.8 acres of undeveloped forested land in the heart of the Jackson Flank Attack Zone in Virginia's **Fredericksburg and Spotsylvania County Battlefields Memorial National Military Park** will protect the property from imminent development. The tract, a part of a larger piece of land, has recently been acquired by a developer.

Development or subdivision of this property will irrevocably scar one of the park's most important battlefield landscapes. The Civil War Trust, an active partner with NPS in Civil War areas, is working with the developer to acquire the lands inside the Federal boundary to facilitate preservation of this landscape through future Federal acquisition. NPS will only be able to acquire the portion of the land that lies inside the Battlefield's boundary, which will then preserve a significant landscape inside the park unit.

Question: Your budget includes a proposal for full, mandatory funding for LWCF. Why put this proposal forward now in a time of constrained budgets?

Response:

- The unpredictability of the 2013 budget cycle with sequestration reinforces the need for this legislative proposal.
- Full and mandatory funding would provide a more reliable source of funding for this important conservation program, and allow certainty for planning and negotiations with landowners.
- The 2014 levels are consistent with 2013, but are significantly below those we had planned in the budget. We will have to pare back our plans and turn back many willing sellers who want to sell their lands, and may instead have to sell to developers.

Question: What role do you envision the Congress and appropriators would have in the oversight and decision making process?

Response:

- We want to work with you on the legislative proposal to ensure there is a continuing role for the Congress and appropriators.

- We have examined several models, such as the creation of an advisory body that would have input on the overall program direction and the prioritization of program components.
- There are very effective programs funded through mandatory dollars to use as models --such as the Migratory Bird Conservation Account, that uses duck stamp revenues to acquire easements to protect migratory bird habitat.

The Centennial Initiative

Question: What is the Centennial Initiative?

Response:

- The budget proposes a three-pronged Centennial Initiative to realize the opportunity of the upcoming 100th Anniversary of the National Park Service in 2016.
- Through a combination of budget and legislative proposals, the Initiative seeks \$1.4 billion over three years.
- The funding will incentivize private support; address deferred maintenance needs; support youth hires and visitor services; and create a competitive fund open to all of Interior's land management bureaus and the U.S. Forest Service for conservation and infrastructure needs.
 - This investment would restore 1,700 or 20% of priority park assets to good condition and provide thousands of jobs.
 - It will provide over 10,000 work and training opportunities to young people and engage more than 265,000 volunteers.

Question: Where is the funding requested?

Response:

- Funding is requested in three ways:
 - \$40 million in the annual request for appropriations;
 - \$400 million in a legislative proposal, for three years; and
 - \$200 million in the President's Opportunity, Growth, and Security Initiative (OGSI).

Question: What would the request buy?

Response: Initiative funding supports the following outcomes:

- \$30 million to address deferred maintenance, **youth and veterans hiring**, youth partnership programs, **enhanced visitors services**, and **volunteer coordination**.
 - \$8 million in competitively-managed funds would enhance visitor services in interpretation and education, law enforcement and protection, and facility operations focusing on the recruitment of youth and veterans;
 - \$4 million would support 21CSC youth work opportunities to educate and engage;
 - \$2 million would support volunteer opportunities for young people; and,
 - \$16 million would be used to improve the condition of priority assets such as visitor use facilities, historic structures and trails.
- \$310 million to **leverage non-federal, philanthropic investment** in the national parks through Challenge projects (including \$10 million current and \$100 million permanent for 3 years).
- \$700 million to address **deferred maintenance needs** in the national park system (including \$200 million permanent for 3 years and \$100 million OGS).
 - This supplements the \$579 million in the 2015 budget for park maintenance and construction.
 - The NPS backlog is \$9-13 billion including \$4-5 billion in facilities and \$5-8 billion in roads, bridges and trails.
 - Transportation program in DOT (MAP-21) authorizes an additional \$240 million annually.
- \$400 million for a competitive **Centennial Land Management Investment Fund**, open to all of Interior's land management bureaus and the U.S. Forest Service, to address conservation and infrastructure needs (including \$100 million permanent for 3 years and \$100 million OGS).

Examples of Outcomes:

21CSC Partnerships

- Provide new opportunities to youth related to the preservation of historic structures, sites, artifacts, and landscapes incorporating regional heritage education.
- Youth would learn to stabilize historic structures and preserve cultural assets to qualify for sub-journey or journey level trades.
- An example is the Southwest Conservation Corps Ancestral Lands Conservation Corps program that connects tribal youth at the Pueblo of Acoma with the national park site near their home.
- The National Park Service Historically Black Colleges and Universities Internship program is a partnership between NPS and the Greening Youth Foundation. Interns gain a better understanding of the important role African Americans played in the development of the country by taking part in oral history projects, giving interpretive talks and tours, and participating in park operations.

Improving Facilities/Assets

- NPS owns and maintains nearly 8,700 assets (excluding roads and bridges) which are considered high priority resources. Over one-half have deferred maintenance needs.
- Examples of projects:
 - Rehabilitation of the Old Stone House at Rock Creek Park, Washington, D.C. Reconstruction of the foundation and walls; rehabilitation of 19 windows; replacement of shutters and doors; upgrade of the HVAC, plumbing, and electrical systems; plaster, painting and repointing; and addition of a fire suppression system.
 - Rehabilitation of Station Camp Creek Trail at Big South Fork National River and Recreation Area, Tennessee. Stabilization of this heavily used trail will reverse erosion, improve safety and protect aquatic habitat.

Leveraged Investments

- In FY 2008, the NPS implemented \$51 million in Centennial projects funded with an appropriation of \$24.6 million. Projects included:

- Expansion of the Junior Ranger program to a year-round basis at the Petrified Forest National Park in Arizona. The program offered education opportunities to children to learn about the park resources.
- Improvement of the condition of the cultural landscape and the park's ability to convey the story of Japanese American internment during World War II at Manzanar National Historic Site in California.
- Construction of a multi-use accessible trail at Kennesaw Mountain National Battlefield Park in Georgia.

Grazing Administrative Fee

Question: Why is the BLM proposing to add a fee for livestock grazing permit applicants?

Response:

- The BLM maintains about 18,000 grazing permits and leases for 22,000 allotments on over 155 million acres of public rangelands.
- Each permit is typically issued for 10 years. Under our budget proposal, the BLM would charge an administrative fee of \$1.00 per Animal Unit Month (AUM), which would be collected along with current grazing fees.
- The proposed administrative fee of \$1.00 per AUM would enable BLM to recover a portion of the costs of administering the permits and leases of the grazing program from the permittees who benefit from their use of public lands and resources.
- Requiring permittees of public lands and resources to support administration of the programs from which they benefit is common.
- Onshore Applications for Permits to Drill fees paid by the oil and gas industry is a prime example in which the users pay for services on the public lands.

Question: Would this fund the entire grazing program?

Response:

- This would fund about 25% of the costs to manage the grazing program.
- The total budget for the BLM Rangeland Management program is \$75 million.

Question: Does this impact the current grazing fee?

Response:

- No. This is a separate administration fee. The grazing fee for public lands – including BLM and Forest Service lands - in 2014 is the same as 2013.
- It is \$1.35 per Animal Unit Month (AUM). An AUM is the amount of forage needed to sustain one cow and her calf, one horse, or five sheep or goats for a month.
- The fee would not be changed by this proposal. It is based on a formula that is set in law (the Public Rangelands Improvement Act of 1978) and is adjusted annually. It cannot fall below \$1.35 per AUM.

Question: Why should Congress support this new fee?

Response:

- It would allow BLM to recover a portion of its costs for administering the grazing program and accelerate the issuance of grazing permits.
- In FY 2014, 1,318 expiring permits are expected to add to a total of 5,216 unprocessed permits, leaving 6,534 permits to be processed as part of the grazing permit workload in addition to 700 to 900 transfers of grazing preference.
- It would also allow BLM to invest resources to ensure grazing allotments are meeting land health standards.

Indian Affairs

Question: What is in this budget for Indian Affairs?

Response:

- As Chair of the White House Council on Native American Affairs, a strong 2015 budget for Indian Affairs is very important to me.
- This budget provides \$2.6 billion, \$34 million above 2014.
- Most importantly, the budget includes \$251 million for full funding of estimated Contract Support Costs.
 - This will allow federally recognized Tribes that contract with the United States the full funding they need to deliver federally-funded programs.
- The budget includes an increase of \$11.6 million for a new *Tiwahe* or Family initiative to address the interrelated problems of poverty, violence and substance abuse faced by Indian communities.
 - It includes an increase of \$5.6 million to help meet the educational and job training needs of our students.
- The budget maintains strong support to fulfill the terms of legislated water settlements with Native Americans. A total of \$147.6 million, a \$12.3 million increase from 2014, is included in the Reclamation and Indian Affairs budgets for tribal water settlements.
- The request is complemented by a proposal for education and economic development in Indian Country as part of the President's Opportunity, Growth, and Security Initiative.

Question: The budget for Indian Affairs does not increase as much as NPS. Why?

Response:

- The budget request for Indian Affairs is an increase of 1.3%.
- You can favorably compare this to the DOI request for current funding, which is an increase of 0.3%.
- Or compare this to the request for the bureaus and programs funded in the Interior and Related Agencies Appropriations bill (excluding Reclamation and CUPCA) which is an increase of 1%.

Response – Interior-wide Funding for Indian programs:

- Interior's FY 2015 budget includes \$612 million for programs in other bureaus in support of Native Americans and Tribes.

- This is an increase of 7.4% from 2014 enacted levels, primarily due to increases in the Wildland Fire program.
- Added together with the Indian Affairs budget, the total request for Indian programs is an increase of 2.5% from 2014 enacted levels.

Contract Support Costs

Question: The Committee directed Interior and HHS to submit a work plan to solve Contract Support Cost issues. How is this progressing?

Response:

- We are paying full contract support in 2014 – we appreciate the support of the appropriations committees in funding this important need.
- The budget also includes \$1.2 million to increase support for the negotiation of indirect cost rates with tribal governments.
- We are committed to working with the Indian Health Service and the Tribes to simplify and improve the management of contract support.
- The first formal consultation and open dialogue with the Tribes was held on March 11 as part of the National Congress of American Indians (NCAI) Executive Council Winter Session.
- Consistent with the Committee's direction, my staff also had an initial meeting with the Subcommittee staff on March 14.
- As requested, we are working closely with IHS, OMB, Tribes and Congress and we will submit our consultation plan to you by the May deadline.

Question: The 2015 budget includes level funding for energy programs in the Bureau of Indian Affairs while providing significant increases (\$21.6 million) for BLM. Can you explain?

Response:

- It is important to know that when there are increases for BLM's energy programs, there are direct benefits to Tribes.
- BLM provides direct support to Tribes in the permitting and inspection of tribal oil and gas leases.
- As of September 2013, there were 30,705 oil and gas cases (a collection of leases and units) in BLM's portfolio. This includes 4,154 cases on Indian lands or 13.5% of the total.
- The increases in the BLM budget for the oil and gas program will benefit Tribes with increases in the following areas:

- Increased funding for leasing, oversight and environmental studies;
- Increased inspection through a fee-based program;
- Better production accountability with rulemaking that will improve tracking of BTU content which is the basis for royalty determinations on gas;
- New metering technologies that are more efficient to manage; and,
- Accelerated processing with improvements to BLM's information technology that supports the oil and gas program.

Question: What is in the budget for law enforcement?

Response:

- The 2014 appropriations include a total of \$191 million for Criminal Investigations and Police Services, an increase of \$13.7 million or 7.7 percent above the 2013 level.
- The BIA will have increased funding to devote to criminal justice issues in 2015 based on the President's budget. For FY 2015, there is a \$1.7 million increase in the BIA's budget for Criminal Investigation and Police Services.
- This continues the robust funding support this Administration has provided for law enforcement programs in Indian Country. This has allowed us to achieve significant reductions in violent crime with our Priority Goal that tracked our efforts in community policing at four sites.
 - The funding for Indian Affairs Public Safety and Justice Services is 44% above the 2008 funding level.

BIE Education

Question: Where are we with efforts to improve Indian Education?

Response:

- The Administration is committed to improve educational outcomes for Indian students.
- We concur with the recommendations of the September GAO Report on BIE programs and are working to identify and implement true reform.
- Secretary of Education Arne Duncan and I co-chair an Interagency Working Group on American Indian and Alaska Native Education.
 - The group includes representatives from BIE, Education, leading academics and the Department of Defense educational system.

- The group held seven listening sessions across the U.S. to discuss the GAO recommendations.
- A team of educators and other experts is working with Kevin Washburn, Assistant Secretary for Indian Affairs, and Doctor Roessel, the BIE Director, to develop options for improved education programs in BIE.
- The group is about to hold tribal consultations to discuss BIE reform against a framework of five pillars including:
 - Organization and Management
 - Human Capital and Workforce
 - Budget Development and Execution
 - Instruction
 - Partnerships

***Background:** The GAO report “Better Management and Accountability Needed to Improve Indian Education” issued in September 2013, cited the following statistics.*

Based on estimates from a 2011 study using national assessment data, in 4th grade, BIE students on average scored 22 points lower for reading and 14 points lower for math than Indian students attending public schools. The gap in scores is even wider when the average for BIE students is compared to the national average for non-Indian students.

Additionally, the high school graduation rate for BIE students in 2011 was 61 percent, placing BIE in the bottom half among graduation rates for Indian students attending public schools in States where BIE schools are located.

BIE Funding

Question: What is in the budget for BIE Education?

Response:

- The 2015 budget includes \$794.4 million for BIE programs.
- The request for BIE programs is an increase of \$5.6 million to support:
 - a new student count and an anticipated increase in grants for Johnson O’Malley education assistance (\$500,000);
 - ongoing evaluation of the BIE school system to improve education outcomes (\$1 million);
 - growing enrollment needs at BIE-funded tribal technical colleges; and
 - fellowship and training opportunities in science and pre-law scholarships (\$1.9 million).

- There is another \$55.6 million requested for Education Construction, which is essentially level with 2014.

BIE Replacement School Construction

Question: The Committee provided funding for design work on the next BIE replacement school. Can you update me on the status?

Response:

- The \$954,000 funded in the 2014 bill provided for design of the next replacement school on the list, the Beatrice Rafferty School in Perry, Maine.
- Planning for the school has concluded. BIE owes a response to the school regarding the school's waiver request to re-evaluate the enrollment projections to increase allowable space.
- BIE is establishing the capital budget for design funding and the project manager is working with Maine Indian Education on the design statement of work. The Beatrice Rafferty design will be performed under a P.L. 93-638 contract modification anticipated within the next 30 days.
- The 2015 budget for Education Construction includes \$2.3 million to conduct the first phase of construction, site development, to keep the project moving.

Question: What is the status of a new replacement school construction project list?

Response:

- We have the Negotiated Rule-making Group's recommendations for a new formula/methodology to prioritize to prioritize BIE school replacement and repair from December 2012.
- Currently, Indian Affairs is working to validate the inventory and deferred maintenance needs for all 182 school locations, which we expect will be completed by September 30.
- After validation, Indian Affairs will work to develop the list with tribal consultation.
- For this reason, it is difficult to estimate when a new list will be completed.

Land Into Trust – Carcieri Decision

Question: What is included in the budget relating to the *Carcieri v. Salazar* decision?

Response:

- The 2015 budget proposes appropriations language to fix the issues raised in the *Carcieri* decision.
- It would allow any federally recognized Tribe to submit fee-to-trust applications to the Secretary of the Interior regardless of when the Tribe was acknowledged.
- The Supreme Court decision upset the settled expectations of both the Department and Indian Country, and led to confusion about the scope of the Secretary's authority to acquire land in trust for all federally recognized Tribes.
- Since the *Carcieri* decision, the Department must conduct a very workload intensive and complex analysis.
 - Interior examines whether Tribes seeking to have land acquired in trust under the Indian Reorganization Act were “under Federal jurisdiction” in 1934.
 - This analysis is done on a Tribe-by-Tribe basis; is time-consuming and costly for Tribes, even for those Tribes whose jurisdictional status is unquestioned.
 - It often entails considerable legal and historical research and analysis and has engendered new litigation.
 - Overall, it has made the Department's consideration of fee-to-trust applications more complex.
- Without enactment of the Department's proposed fix in the 2015 budget, both the Department and Indian Tribes will continue to face this burdensome process.
- On March 12, the Solicitor issued an M-Opinion that defined the meaning of “under Federal jurisdiction” for Tribes that seek to take land into trust.

Question: Does your Solicitor's recent M-Opinion alleviate the need for Congressional action to address this problem?

Response:

- No, it does not eliminate the need for a legislative fix.
- The M-Opinion formally institutionalizes the legal test developed by the Solicitor's Office to make the determinations since *Carcieri* was decided.

- The M-Opinion states the Department's interpretation of what it means for a Tribe to have been "under Federal jurisdiction" in 1934, which was not made clear by the Supreme Court.
- The M-Opinion actually demonstrates the need for legislation to avoid the highly fact intensive legal hurdles posed by the Carcieri decision and clarify the Secretary has authority to take land into trust under the Indian Reorganization Act for all federally recognized Tribes.

Background: Since Carcieri, the Department uses a two-part inquiry to determine eligibility to take lands into trust. Can the federally recognized Tribe show 1) in or before 1934, the Tribe had some course of dealings with the Federal government reflecting there were Federal obligations to or authority over the Tribe; and 2) that the Tribe remained under the authority or responsibility of the Federal government in 1934.

Energy

Question: Would you describe what is in the 2015 budget for energy?

Response:

- The budget continues to support the President's all-of-the-above energy strategy to expand safe and responsible energy production. Total funding for energy related activities, including development, oversight, and revenue collection, is \$753.2 million, an increase of \$40.7 million or 5.7%.
- Within this is \$658.4 million in fees, permanent, and current funding for **conventional energy** activities.
 - This is an increase of \$37.5 million, the majority of which supports onshore oil and gas inspection and reforms.
 - The budget also begins the underlying science and environmental work associated with the next Five-Year Plan for the Outer Continental Shelf (OCS).
 - The budget increases USGS scientific work in hydraulic fracturing and energy resource assessments; improvements in production oversight; and the capability to keep pace with emerging offshore technologies.
- This budget continues to aggressively support the President's goals to move the economy toward clean energy sources, reduce carbon pollution, and create jobs through renewable energy development.
- Total funding for **renewable activities** is \$94.8 million.
 - This is an increase of \$3.2 million or 3.5%, supporting consultation and planning for development, and research on potential impacts of wind energy and energy transmission on wildlife and habitat.
 - The budget continues robust funding levels for renewables. Since 2009, the budget has increased more than ten-fold for renewable programs.

Renewable Energy

Question: What progress have you made on renewable energy development?

Response:

- Interior is ahead of its goal to produce 10,000 megawatts of non-hydro renewable energy on public lands by 2015.
 - Our goal is to achieve 18,000 megawatts by the end of September, 2015.
 - Interior has approved 50 onshore renewable energy projects with the potential to provide more than 13,300 megawatts.
 - BLM is developing regulations to establish competitive leasing for solar and wind development in designated areas which we anticipate will be out sometime this year.
- Offshore we are moving ahead with leasing.
 - Last year we held the first two competitive offshore wind lease sales for wind energy areas offshore Virginia and Rhode Island/Massachusetts.
 - We announced a proposed auction for Maryland to be held later this year. We expect to announce additional auctions for Wind Energy Areas offshore New Jersey and Massachusetts later this year.
- Most importantly, we are pursuing this development smartly to mitigate impacts.
 - The Fish and Wildlife Service and USGS are engaged in energy planning and review to avoid and otherwise mitigate energy development impacts on fish and wildlife.
 - The FWS released onshore wind energy guidelines to help developers avoid and minimize impacts of land-based wind projects on wildlife and their habitats.

Question: What are you doing to protect eagles and other birds from wind energy development?

Response:

- The FWS and the USGS provide assistance and tools to developers to minimize wind energy impacts to birds and bats.
- The FWS released onshore wind energy guidelines to help developers avoid and minimize impacts of land-based wind projects on wildlife and their habitats.
 - These guidelines were developed through an intensive collaborative process with industry, States, and wildlife conservation groups.

- The FWS also helps to develop permit applications for eagle take that cannot be avoided.
 - FWS is processing about 13 applications at this time, and is working with over 100 energy projects to minimize impacts.
- USGS has developed innovative tools and techniques to get better and more timely information about the impacts to wildlife.
 - USGS has developed software and training to assist managers to apply findings, and is working directly with partners to solve challenges related to golden eagles in the Desert Renewable Energy Conservation Plan area of California and Nevada.

Conventional Energy – Offshore

Question: What is the status of the current Five-Year Plan for the OCS?

Response:

- The current 2012-2017 Program includes 15 potential lease sales in 6 offshore areas and includes those with the highest resource potential of any OCS areas.
- We've held three of 12 lease sales scheduled for the Gulf.
 - They generated over \$1.4 billion in bonus revenue.
 - On March 19, we held a sale of two areas in the Central and Eastern Gulf which brought in ___ in bonus bids. *(to be updated after sale)*
 - Another sale in the Western Gulf is on track for August.
- In 2013, BOEM offered a total of 59.3 million offshore acres for sale.
- In 2013, production from the Gulf averaged 39 million barrels a month.
 - As of February, there were 55 rigs in the Gulf, compared to 41 rigs in the Gulf in January of 2010.
- The Program calls for three potential sales offshore Alaska in 2016 and 2017.
 - BOEM continues to review the Ninth Circuit's decision on the 2008 Chukchi sale.
 - Any potential exploration in the challenging and sensitive environment of the Arctic must be done cautiously and with the highest regard for safety and environmental standards.
 - BOEM did not receive any nominations from industry in response to the Call for proposed Lease Sale 237 (Chukchi) issued in September 2013.

- Although the Program did not include any Atlantic sales, BOEM continues to expedite and facilitate updated resource evaluation to support future leasing decisions.

Background: For the Gulf, the March sales are Eastern Gulf of Mexico Lease Sale 225 and Central Gulf of Mexico Lease Sale 231. The sale scheduled for August is Western Gulf of Mexico Lease Sale 238.

For Alaska, Sale 237 in the Chukchi and Sale 244 in the Cook Inlet are scheduled for 2016. Sale 242 in the Beaufort Sea is currently scheduled for 2017.

Onshore

Question: What is the status of onshore production on Federal lands?

Response:

- In 2013, onshore Federal oil production increased 15% compared to 2012.
- In 2013, the BLM held 31 lease sales, selling 1,444 parcels covering 1.1 million acres, with over \$202 million in total revenue shared with the States.
 - BLM processed 4,892 applications for permits to drill and approved 4,472 in 2013.
- Industry interest in nominating parcels on Federal lands has increased since 2006. Between 2006 and 2013, expressions of interest increased by 64%.
- In 2013, the BLM postponed 6 lease sales:
 - 4 in California due to sequester, where inspection and enforcement for existing leases and processing applications for permits to drill (APD) were prioritized.
 - One in Nevada because the parcel proved ineligible.
 - One in New Mexico due to the government shutdown.

Background: Information is provided by DOI Office of Policy Analysis derived from information provided by BLM, BOEM and sales information from ONRR. Rig count information was provided from Baker Hughes.

Question: Your 2015 budget proposes to impose an onshore inspection fee for oil and gas inspections. What will this allow you to do?

Response:

- The 2015 budget, like the 2014 budget, proposes to impose an inspection fee for oil and gas programs managed by BLM.
- The fee charges industry for the costs we incur to inspect their facilities, operations, and production.
- The estimated collections to be generated from the fee are \$48 million.
- This proposal aligns onshore inspection costs consistent with offshore inspections by shifting them to the industry. This shift is appropriate as these programs are dedicated to the oversight of oil and gas production
- The fee proposal allows us to reduce the request for appropriations by \$38 million.
- The fee proposal enables a \$10 million increase in the onshore inspection program which will allow us to increase efforts to address GAO concerns, and ensure safe and environmentally compliant leasing on public lands and fair returns to the American taxpayers.

Question: How do you determine the onshore inspection fee?

Response:

- The fee schedule is based on the number of oil and gas wells per lease:
 - \$700 for each lease or agreement with no active or inactive wells, but with surface use, disturbance or reclamation;
 - \$1,225 for each lease or agreement with 1 to 10 wells;
 - \$4,900 for each lease or agreement with 11 to 50 wells; and
 - \$9,800 for each lease or agreement with more than 50 wells.

Question: What is the return on investment for the oil and gas programs? Is the American public getting a fair return on the use of public lands?

Response:

- We think the American public is getting a fair return for the use of the public lands. We've done some analysis of the collections contrasted with the amounts we spend.
- For FY 2013, Interior collected approximately \$13.3 billion in oil, gas, and coal revenues.
- Collecting those revenues and carrying out monitoring, enforcement, and environmental protection activities cost Interior about \$480 million.
- For each dollar Interior spent, we collected about \$28. In addition, the public also receives some non-monetary returns in the form of environmental protection, and increased workplace safety.

Question: You have experience working in the oil and gas area. What is your philosophy on oil and gas reforms?

Response:

- The key aspect of these efforts is to ensure that as part of a diverse all-of-the-above energy strategy, expanded onshore oil and gas development takes place through responsible management, ensuring safe and environmentally responsible operations.
- Continued implementation of these reforms is needed to provide a more orderly, open, and environmentally sound process for developing oil and gas on the public lands.
- These reforms are improving protections for land, water, and wildlife and reducing conflicts which lead to costly and time-consuming protests and litigation of leases.

Question: Are the reforms effective?

Response:

- I believe we are going in the right direction with our reforms.
- Besides improving the management and operations, we are reforming our procedures, processes, and regulatory framework to streamline and improve effectiveness and timeliness.
- For example, onshore we have significantly reduced the time it takes to approve a complete drilling permit. In FY 2006, it took an average of 127 days to approve an application, whereas in FY 2013, it took 95 days.
- By doing more of the work on the front end, we have reduced the protests of parcels offered for sale from 33% in 2008 to 18% in 2012.

Question: What is in the budget to implement oil and gas reform?

Response:

- The budget includes an increase of \$20.3 million in BLM's Oil and Gas program [including the inspection fee].

- This will fund increased leasing, oversight and environmental studies, rulemaking, and reforms.
 - BLM is currently working on rules for site security of facility production vessels and oil and gas measurement practices and metering.
 - In 2014, BLM will initiate a rule to regulate venting and flaring and royalty recovery for natural gas.
 - BLM is incorporating practices from the offshore program - that will allow them to establish variable royalty rates.

Question: What is in the package of legislative Federal oil and gas reforms proposed in the budget?

Response:

- The budget proposes a package of reforms including:
 - *Royalty Simplification* – To standardize and simplify transportation and processing deductions for both on and offshore production.
 - *Interest on Royalty Overpayments* – To eliminate interest paid by the Department on industry's royalty overpayments similar to the IRS' approach.
 - *Fee on Non-Producing Leases* – Similar to last year's proposal to encourage energy production on Federal lands and waters, it would charge a \$6.00 per acre fee for non-producing leases. The fee would apply to all new leases and would be indexed annually.
 - *Repeal Legislatively Mandated Royalty Relief* – Repeals Section 344 of the Energy Policy Act of 2005 that mandated royalty incentives for certain "deep gas" production on the OCS.
 - *Royalty-in-Kind* – Would permanently repeal Interior's authority to accept in-kind payments for royalties.
 - *Permit Processing Pilot Office Authority* – Would amend Section 365 of the Energy Policy Act to extend permit processing pilot office authority beyond 2015 and provide flexibility with regard to the location of offices.
Note: The Permit Processing Fund established in Section 365 would expire and BLM would need to issue a rule for cost recovery.
- To further improve the return to taxpayers, the Department is evaluating other reforms in royalties and efforts to encourage diligent oil and gas development.
- These administrative actions will not, in themselves, generate revenue; however, the associated reforms contained in new rules, when combined with

monetary incentives to get leases into production, would generate another \$800 million over the next ten years.

- *Royalty reforms include:* evaluating minimum royalty rates for oil, gas, and similar products; adjusting onshore oil and gas royalty rates; and analyzing a price-based tiered royalty rate.
- *Reforms to encourage diligent development include:* shorter primary lease terms, and stricter enforcement of lease terms such as limiting when lease suspensions are approved.

General Oil and Gas Facts

- In 2013, net crude oil imports represented about 33% of total U.S. supplies, down from 60% in 2004-2008.
- Total U.S. natural gas production has sent new records every year since 2007. In FY 2013, the U.S. produced an estimated 30 trillion cubic feet, a 15% increase over FY 2008.
- Production from Interior lands and waters accounts for 23% of the total for U.S. oil production, and 16% of total U.S. gas production.
- Production of “tight oil” from shale and other “tight” formations increased from 0.6 million barrels per day in 2008 to a forecasted 3.5 million barrels per day in 2014 and 4.8 million barrels per day in 2021.

Background: Information is provided by DOI Office of Policy Analysis derived from DOE’s Energy Information Administration.

Hydraulic Fracturing

Question: I see you are requesting an \$8 million increase for Hydraulic Fracturing research. What is this for?

Response:

- The 2015 budget for the USGS includes \$18.6 million for hydraulic fracturing research, an \$8.3 million increase from 2014.
- USGS collaborates with the Department of Energy and the Environmental Protection Agency to better understand the potential impacts of hydraulic fracturing.
 - BLM estimates about 90% of wells currently drilled on Federal and Indian lands are stimulated by these techniques.
- USGS is cataloging earthquakes induced by human activities.

- USGS is studying earthquake potential in relation to wastewater disposal by deep injection, geothermal power generation, and carbon sequestration.
- USGS is analyzing injection-disposal sites to guide changes in practices to inform development of new wells and injection methods.

Question: What is the status of the proposed rule on hydraulic fracturing?

Response:

- BLM published a revised proposed rule last May and received 1.35 million comments.
- BLM is analyzing comments and addressing them as it drafts the final regulation, which we expect will be published later this year.

Youth

Question: What is in this budget for youth oriented programs?

Response:

- It's critical that we work now to establish meaningful and deep connections between young people from every background to the great outdoors.
- I have set ambitious goals for the Department and our partners to inspire young people to play, learn, serve and work outdoors.
- The budget includes \$51 million to support partnership programs, hiring, and educational opportunities aimed at youth and veterans between the ages of 18-25. This is an increase of \$13.6 million from 2014.
- This includes \$21.5 million for the National Park Service, an \$8 million increase from 2014 as part of the Centennial Initiative.
- NPS would be able to support an additional 800 new opportunities for youth and veterans to work and learn in the outdoors while preserving historic structures, sites, artifacts, and landscapes.
- There's a \$2.5 million increase in the Fish and Wildlife Service budget to strengthen their new Urban Wildlife Refuge Partnership which reaches out to the many young people living in cities.

Question: Can you give me some examples of projects?

Urban Wildlife Refuge Partnership:

- I recently announced the selection of eight pilot cities under the Urban Wildlife Refuge Partnership which provide great examples of the type of engagement we want to support.

New Haven, Connecticut

- Schoolyards, vacant lots, city parks and front yards on public and private lands in New Haven will provide habitat for migratory birds and other species as part of an Urban Oases project.
- The project has been taking place in the city between the U.S. Fish and Wildlife Service, Audubon Connecticut, and other partners, and aims to use these lands to create a network of wildlife-friendly habitat oases and improvements throughout the city.
- The partnership is working to provide environmental education programs to students and establish wildlife-friendly habitat sites throughout New Haven.

Chicago, Illinois

- In Chicago, a project with the Forest Preserves of Cook County, Audubon, and Eden Place Nature Center is creating a ladder of nature learning and engagement opportunities that starts in urban neighborhoods and expands to the forest preserves, and ultimately, the refuges.
- The project aims to connect with new audiences through nature presentations, guided bird and nature walks, field trips, outdoor activities, and restoration workdays, with the help of youth hires from communities to conduct outreach activities and work in restoration projects.

Providence, Rhode Island

- Working with the Providence park system, the Rhode Island National Wildlife Refuge Complex and the Southern New England/New York Bight Coastal Program of the U.S. Fish & Wildlife Service are partnering with organizations to develop and implement an inclusive and cohesive environmental awareness and education program by bringing messages to over 100 parks, schools, and the Roger Williams Park Zoo.
 - Partners include the Partnership for Providence Parks, the Roger Williams Park Zoo, The Nature Conservancy of Rhode Island, Urban Pond Procession, Audubon Society of Rhode Island, and other conservation organizations.

Hurricane Sandy – NY Harbor Conservation and Resiliency Corps:

- As part of the response to Hurricane Sandy, I announced the National Park of New York Harbor Conservation and Resiliency Corps, a partnership with the City of New York and the Student Conservation Association.
- This project provided about 200 jobs for young people last year and enabled them to participate in Hurricane Sandy recovery and cleanup efforts.
- This pilot will serve as a blueprint for what is expected to be a multi-year program for young adults from around the region to help clean up the damage to the national parks, refuges and partner sites in New York City and New Jersey.
- The initial focus will be on Gateway National Recreation Area and adjoining New York City parklands at Jamaica Bay.

San Joaquin Regional Conservation Corps:

- Another great example is the San Joaquin River Weed Management and Jobs Creation Project, a partnership with River Partners and the San Joaquin Regional Conservation Corps to employ local youth, ages 18 to 25, in invasive species mapping, monitoring and management along the San Joaquin River in Merced County, California.

- The objective was to restore a self-sustaining population of native fish to the highly degraded San Joaquin River. This area reports high unemployment and poverty rates, as well as high rates of childhood obesity and asthma – maladies linked to lack of access and exposure to the outdoors.
- This effort was supported with \$72,000 from the Bureau of Reclamation and \$50,000 in non-Federal funds including Wells Fargo.

Question: What goals do you have in youth engagement?

Response:

- Interior's programs targeting young people run the gamut from K-12 to post-graduate internships. This multi-faceted approach is critical.
- We have goals to increase youth engagement through activities that include play, learn, serve and work.
 - Play. DOI will develop or enhance outdoor recreation partnerships in a total of 50 cities over the next four years, to create new, systemic opportunities for outdoor play for over 10 million young people.
 - Learn. In four years, DOI will provide educational opportunities to at least 10 million of the Nation's K-12 student population annually.
 - Serve. In four years, DOI will attain one million volunteers annually on public lands.
 - Work. DOI will provide 100,000 work and training opportunities to young people and veterans over four years within our bureaus and through public-private partnerships. In support of the 21st Century Conservation Service Corps, within four years, 60% of work opportunities provided will be via corps partners – tripling the current amount of work performed by the corps.
- Our priority goal focuses on youth employment with the objective to provide 40,000 work and training opportunities to individuals ages 15 to 25 during 2014 and 2015.
- The sequester set us back and we found that when funds are tight, youth programs are among the first to be deferred.
 - Our 2013 youth employment numbers dropped almost 19 percent from 2012.
 - In 2012 we hired 19,175 young people, and in 2013 it dropped to 15,546.
- This request will help to turn this around.

Water Funding

Question: How does this budget address water issues?

Response:

- The 2015 budget includes \$66.5 million for WaterSMART, an increase of \$9.5 million or 16% for activities in the Bureau of Reclamation and the U.S. Geological Survey.
- The WaterSMART program is focused on securing and stretching water supplies.
 - We work in partnership with States, cities, water districts and others to match funds and promote water conservation, water reuse and recycling.
 - We also conduct basin studies and cooperative watershed management to assist in improved management of water supplies on a landscape scale.
- In 2015, we will directly target drought response and resilient infrastructure needs, and expand State water use grants through the USGS to collect, disseminate and model water use and availability data.
- Through 2013, 730,000 acre-feet of water savings was achieved – about the amount of water needed for household use in Denver, Colorado and the surrounding metropolitan area each year.
 - For 2015, the goal is increased to achieve 840,000 acre-feet in water savings through 2015.

Drought

Question: What are you doing about the drought?

Response:

- Parts of the West are experiencing extreme drought. California is facing a historic drought, with estimates that are some of the worst in history.
- The Bureau of Reclamation, with the assistance of other Interior bureaus, is working with partners to increase the flexibility for water managers and users, providing assistance in planning, fast-tracking projects, and streamlining water transfers.
- Reclamation and the Natural Resources Conservation Service are making funds available for water districts and associated farmers to promote water conservation and management, including modernizing infrastructure.
- The USGS is working with communities to provide water availability information, evaluating groundwater availability and withdrawal, and monitoring impacts of drought.

Question: What is in the budget for drought?

Response:

- The 2015 budget proposes investments to promote longer-term resilience.
- The budget for the Bureau of Reclamation includes an increase of \$3.0 million for two new efforts to address drought, and help communities to become more resilient in the face of increasing water challenges.
 - The **Resilient Infrastructure Program** will identify resilient infrastructure investments and support for healthy watersheds (\$1.5 million).
 - The **Drought Response Program** funds drought planning and implementation actions that address water shortages (\$1.5 million).
- The 2015 budget funds enhanced monitoring needed for both near and long term drought response.
- Funding increases are for groundwater monitoring, additional streamgages, and State water use grants.
- USGS is also starting a pilot study to characterize drought in all regions, and will apply methods and tools to estimate drought streamflow during low-flow summer months based on previous time intervals.

Rural Water Project Funding

Question: The funding level for currently authorized rural water projects will result in unacceptable delays. Rural water projects are critical to get potable water supplies to communities, including Indian communities. The program takes a disproportionate reduction in the President's 2015 budget. Why?

Response:

- The President's 2015 budget includes \$34.1 million for rural water projects.
- This is a reduction of \$33.1 million below the 2014 enacted level of \$67.1 million.
- This was a difficult decision.
- With the constrained budget and in order to meet legal requirements, new construction is slowed in projects throughout the Bureau of Reclamation.
- The budget sustains an ongoing construction budget of \$16.3 million for rural water projects to make progress toward safe, reliable sources of drinking water for rural residents.

Question: What is the criteria for allocating funds for Rural Water projects?

Response:

- The Bureau of Reclamation uses a set of criteria to prioritize projects according to six elements:
 - Resource commitment,
 - Urgent need for water,
 - Economic impacts,
 - Size of watershed and population served,
 - Promotion of other goals including water conservation and energy efficiency, and
 - Native American Tribes served.
- Funds are allocated according to these priorities, and the ability of project sponsors to complete segments to deliver water or other project benefits.

Research and Development

Question: What is in this budget for research and development?

Response:

- The 2015 budget includes \$888.7 million for research and development which includes basic science conducted by the U.S. Geological Survey and applied science which the bureaus require.
- This is an increase of \$60 million from the 2014 level, demonstrating the need we are seeing within Interior from our land managers as well as resource managers at the State and local levels.
- A key element in our mitigation strategy to balance conservation and development is greater understanding of natural resources, and impacts upon them at a landscape rather than a local level.
- Scientific understanding and tools are vital to accomplishing our mission.
- USGS - The majority of this increase, \$35.6 million, is in the request for the U.S. Geological Survey to support work in invasive species such as the Asian Carp, contaminant biology, water availability and water quality, and the work conducted by the Climate Science Centers and the National Climate Change and Wildlife Science Center.
 - Funding for the NCCWSC and the eight Climate Science Centers is proposed to increase \$11.6 million in 2015. The increase primarily targets the need to translate current scientific research to address real world requirements affecting resource managers.
- FWS - The request for the FWS includes an increase of \$19.5 million to address specific high impact scientific questions to address threats to fish and wildlife.
 - The request for FWS includes increases to research the white nose syndrome and identify mitigation strategies for energy transmission corridors in the West.

Question: Can you give me an example of R&D activities?

Response:

- An example of work in the Climate Science Centers – in two of the CSC regions they are working to merge historical land change data which is pre-settlement with modern Landsat-based satellite data, to better understand the consequences of long-term land change.
 - This will be helpful in the Florida Everglades where water management practices have significantly reduced lakes and wetlands; and,
 - In the Colorado River Basin where water supply, demand and drought are key issues.

- Combining historical data with modern land change data will inform management of changes in the hydrology and ecology of both regions.

Question: Can you give me an example of where the land management bureaus are working to apply science in the field?

Response:

- An important example is the work BLM, FWS and USGS are doing together to manage the sagebrush landscape.
- The USGS, in collaboration with partners, recently completed a sage grouse National Research Strategy which defines high priority science needs for landscape scale-decisionmaking.
- USGS will conduct a pilot project to use geospatial information on a landscape level to aid in the refinement of the interagency sage grouse strategy, and assist FWS in making its upcoming listing decisions.
- This work supports significant efforts underway regarding sage grouse, which continues in the 2015 budget.
 - The BLM request includes \$15 million targeted toward sage grouse management using science to focus land treatments and limit impacts to key habitat.
 - The FWS request includes a \$4 million increase to help design, implement and align conservation efforts to meet the range-wide needs of the species.

Question: Can you provide an example of how science is helping to implement your mitigation strategy?

Desert Renewable Energy Conservation Plan

- A great example is the work taking place in the California desert through the Desert Renewable Energy Conservation Plan. This Plan is the work of Federal, State, and local lands managers to provide for renewable energy development and conservation of desert ecosystems.
- This work is taking information about the distribution of habitat of selected endangered species to guide conservation efforts and site solar development.
- A new desert tortoise habitat model to be completed in May of this year is expected to help forecast desert tortoise habitat as it might exist in 30 and 80 years.
- This model will produce information to guide adaptive management and inform BLM and FWS decisions.

Transmission Projects

- Another example is in BLM where they are using landscape approaches to site transmission projects.
- They are incorporating the use of geospatial data at the landscape level to improve their analysis, planning, and decisions about specific development projects.
- The BLM budget includes an increase of \$5.0 million to support this type of work.

Climate Change

Question: What is in this budget for climate change?

Response:

- As land and resource stewards, the changing climate is one of the greatest challenges this agency faces.
- The effects are pervasive. We confront these impacts daily.
 - With expanded seasons, severity and costs in our Wildland Fire program;
 - The damages to the Northeast from Hurricane Sandy where we are helping communities to rebuild for resiliency; and
 - Managing the extreme drought conditions in California.
- In 2015, \$176 million is budgeted for specific climate related work throughout Interior. Of this,
 - \$72 million supports climate variability science in the U.S. Geological Survey, and
 - \$104 million supports adaptive management programs in the bureaus.

Question: Can you give me an example of what a Landscape Conservation Cooperative does?

Response:

- A good example of work the LCCs are doing is on the Lower Missouri River – The Big Muddy, from Omaha, Nebraska to St. Louis, Missouri.
- The project is a “hydro-geomorphic” study which will enable local resource managers to understand the historical attributes of the floodplain.
- Two LCCs, Eastern Tallgrass Prairie and Big Rivers, are working with FWS and other partners, so that land managers can visualize the river in its pre-settlement state to help set conservation and management objectives for the future.

- Knowing the geology, soils, elevations, and flooding patterns, managers can get a sense of the plant communities and, in turn the diversity of wildlife, that were historically there.
- If we can understand the attributes, their distributions, and the physical features, we can apply that knowledge and model how to manage to sustain and or improve conditions for wildlife and communities.
- Refuge managers like Tom Bell of the Big Muddy National Fish and Wildlife Refuge in Missouri, will physically be able to see where surface topography will either promote or hinder wetland restoration, enabling better decisions on restoration activities and locations.

Wildland Fire Management

Question: What is the fire outlook for this season?

Response:

- The wildfire outlook for significant fires though May 2014 is above normal for California, below normal for the South, and normal elsewhere.
- The Forest Service has already been involved in multiple fires this season.
 - In December they battled a fire at Big Sur that claimed 15-20 homes.
 - There have been red flag warnings throughout southern California in March due to dry conditions and gusty winds.
 - The exceptional to severe drought conditions throughout the West are a concern as are predictions of a weak El Nino this summer.
- The budget projection for 2014 indicates a median for wildfire suppression expenditures of \$336 million.
- The 2014 appropriation for fire suppression funds the ten year average of \$377.9 million.
- In 2012, fire spending was 23 percent above the ten-year average.
- Over the last ten years the two agencies have spent one-third again as much as was budgeted for firefighting.

Question: Would you describe the “new framework” for fire funding in the budget?

Response:

- Modeled on the current disaster cap that funds FEMA, and other disaster programs, the budget would include a cap adjustment to fund emergency fires – these are the most severe one percent of fires.
- Fire seasons are now longer and more intense. The President’s budget proposes to change how fire suppression costs are budgeted to treat the requirements of extreme fire seasons in the same way as other emergency disaster needs.
- We budget for fire costs using a ten-year average of fire suppression costs; but in a peak season with catastrophic fires, we are forced to move funding from programs across the Department to meet the increased costs of wildfire suppression.
 - For example, in 2012, Interior’s fire suppression costs were 23 percent higher than the ten-year average calculation.
 - The Department took funds from other fire accounts – including fuels management and non-fire program accounts.
 - In 2013, the two agencies – Interior and the Forest Service – redirected or borrowed over \$650 million to fund increased firefighting costs.
- The proposal is in line with legislative proposals sponsored by Senators Wyden and Crapo (S.1875) and Representatives Simpson and Schrader (H.R. 3992) with Representatives DeFazio and Labrador as cosponsors.
- It allows for a balanced suppression and pro-active fuels management and restoration program, with flexibility to accommodate peak fire seasons but not at the cost of other Interior missions or by adding to the deficit.

Question: Would you describe the details of the proposal and how it would work?

Response:

- The request includes \$1.034 billion for the Wildland Fire program including a wildfire suppression cap adjustment of \$240.4 million.
 - The cap adjustment is a ceiling for spending that can only be used for firefighting.

- The amount is based on the forecast made by scientists using weather, climate, and drought data and evaluating historical expenditure data.
- Only extreme fires that require emergency response, are near urban areas, or occur during abnormally active fire seasons, which rightly should be considered disasters, would be permitted to be funded through the adjustment to the discretionary spending limits.
- Under this new framework, the 2015 budget request for suppression covers 70 percent of the ten-year suppression average within the domestic discretionary cap.
- Interior and the Forest Service would continue to be accountable for fire costs and track costs per fire, ensure elevation of spending approvals based on set protocols, and report on the results.
- The cap adjustment does not increase overall discretionary spending, as it would be taken from the existing disaster cap.

Question: Will this increase the amount spent on fighting fires?

Response:

- No.
- First the “cap adjustment” for fire will be taken from the existing disaster cap ceiling established by the Congress. We will not increase the size of the overall cap adjustment.
- Second, we will continue to be as efficient as possible in managing the costs of fighting wildfires. This approach simply provides a mechanism for protecting our regular program budgets from the effects of extraordinary fire costs.
- We will be accountable in how we spend all of our fire funds.

Question: What do you need in 2015 to fund the ten-year average?

Response:

- The total amount needed in 2015 to fund the ten-year average is \$383.7 million.
- The budget includes 70% of the ten-year average or \$268.6 million. The balance of the amount needed for the ten-year average is \$115.1 million.

- The cap adjustment of \$240.4 million includes the \$115.1 million and additional “head room” in case emergency fire funding needs exceed the ten-year average.

Question: Why 30% of the ten-year average for the cap exemption?

Response:

- The budget proposes a cap exemption based on 30% of the ten-year average – this is appropriate given the history of fire spending.
- One percent of the fires equate to 30% of the fire spending. That is, one percent of fires are the large, most costly emergency fires that consume 30% of the firefighting budget.
- In the last ten years, firefighting spending by Interior and the Forest Service has been about 35% above the amounts budgeted.
- The amounts spent by the two agencies for firefighting that are in excess of the budget and require borrowing, vary from year to year and between the agencies.
- In 2012, Interior’s fire suppression costs were 23 percent higher than the ten-year average calculation. In 2013, suppression costs were nearly 15% above the amount available for suppression.

Question: Why weren’t all the funds available from the cap exemption put into the Fuels budget?

Response:

- The 2015 budget includes \$146.3 million for Fuels Management, an increase of \$1.3 million (for fixed costs) and an additional \$30.0 million for a Resilient Landscapes program.
- Together these programs fund a level of \$176.3 million for improved management of habitats to reduce fire risk.
- At this funding level, the program is roughly comparable with the funding levels in 2011 and 2012.

Question: Why weren't all the funds available from the cap exemption put into the Wildland Fire budget?

Response:

- Interior's 2015 Wildland Fire budget is \$126 million higher than the 2014 President's budget, which was our point of reference during the budget formulation process. Using this comparison, more than the \$115 million made available by the cap exemption is reinvested in the Wildland Fire budget.
- The entire amount made available by the cap exemption in comparison to the 2014 enacted budget, \$115 million, is not put back into the fire budget as we needed to set priorities within a flat budget.

Question: Where were the funds allocated?

Response:

- The 2015 budget includes increases of \$70.3 million or 15.4 percent above the 2014 level for fire activities excluding suppression.
- The increases consume about 61% of the amount that was "freed up" by the reduction in suppression for the cap exemption.
- Given the constrained budget environment, this is a significant increase and compares favorably with the total Interior budget, which is 0.3% above the 2014 level (excluding the fire cap exemption).

Question: What else is in the Wildland Fire budget?

Response:

- Without the cap adjustment, the 2015 budget is \$794.0 million.
- Included within the request are increases totaling \$70 million for fixed costs, preparedness, burned area rehabilitation, and a new resilient landscape component to complement fuels management.
- The request for fuels management including the resiliency request is \$176 million, an increase of \$31 million above the 2014 amount for hazardous fuels.

The 2014 budget includes the following:

- **Suppression \$268.6 million, a reduction of \$17.3 million** to fund 70 percent of the inflation-adjusted ten-year suppression average to address the normally anticipated range for fire response.

- **Preparedness \$319.0 million, an increase of \$37 million for investments** in firefighters (BIA workforce, Veterans), aviation, and strengthening tribal capacities.
- **Burned Area Rehabilitation \$18.0 million, an increase of \$2 million for post-fire treatments** to strengthen our capacity to begin restoration of fire damaged lands that cannot recover naturally.
- **Fuels Management (previously called Hazardous Fuels; this term changed in 2015) \$146 million, an increase of \$1.3 million** to work with communities and others to reduce wildfire risk by eliminating fuel build up and promoting effective management of wildfire risk.
- **Resilient Landscapes, \$30 million for a new program** to conduct treatments that improve the integrity and resilience of forests and rangelands, including areas outside the wildland-urban interface. The treatments will be coordinated with and supported by the resource management programs of the four Interior wildland fire management bureaus, and supported by bureau matching funds.

Resilient landscape projects will address long-term restoration and maintenance of forest and rangeland health to increase resiliency to fire, improve habitat, protect watersheds, mitigate invasive species, and similar goals. These projects reduce the risks of fire but also incorporate other land and resource management objectives.

Subject: Bruce Babbitt speech this evening

All-

I just got a heads up that former Secretary Bruce Babbitt is speaking tonight at CU, topic BLM. Expectation is that he will hit his ongoing theme that BLM is behind in terms of keeping up with o&g development, that despite our efforts major structural and systemic challenges remain, and additional significant reform/overhaul is needed. The three issues he will hit on:

Conoco-Phillips in NPR-A: the draft EIS does not provide enough protective measures in particular not enough thinking about a roadless development approach

Roan Plateau: more on the layer cake monument theory

Sage grouse: the BLM state plans are inadequate to the task, falling short of what is needed to protect the SG, and a comprehensive, nationwide plan of approach is needed to address what is needed

He may call for a Commission a la oil spill commission to suggest needed reforms.

Laura

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL ESA DISCUSSION

DATE: March 19, 2014
LOCATION: Office of the Secretary
TIME: 9:30AM – 10:30AM
FROM: Colorado Ecological Services Field Office, Region 6; Dan Ashe, Director, FWS (202)208-4717; Noreen Walsh, Regional Director, Region 6, (303) 236-4579; Matt Hogan, Deputy Regional Director, Region 6; Gary Frazer, Assistant Director-Endangered Species

I. PURPOSE

The purpose of this meeting is to discuss with you the status of Final Listing Determination for the Gunnison Sage Grouse and the Lesser Prairie Chicken, as well as (1) the range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken, and (2) Conservation efforts for the Lesser Prairie-chicken.

II. BACKGROUND

Final Listing Determination for Gunnison Sage-grouse (GUSG)

On September 15, 2010, FWS determined that listing the GUSG as a threatened or endangered species was warranted but precluded by higher priority listing actions, and the species was added to the candidate list. Proposed rules to list the GUSG as endangered and to designate critical habitat were published on January 11, 2013. A six-month extension was obtained for completion of the final documents. Subsequent to that, an additional 6 week extension was obtained. The final determination is due to the Federal Register by May 12, 2014.

The current range of GUSG is limited to seven widely scattered and isolated populations in southwestern Colorado and southeastern Utah, with an estimated rangewide population of 4,700 individuals. Of the estimated 940,000 acres (ac) (380,000 hectares [ha]) of rangewide occupied habitat, approximately 54 percent occurs on Federal lands; 41 percent occurs on private lands; and 5 percent occurs on state lands.

The Gunnison Basin GUSG population contains approximately 87 percent of the total number of birds and 63 percent of rangewide occupied habitat for the species. The remaining six satellite populations are much smaller than the Gunnison Basin population.

During the public comment period we received information indicating substantial scientific disagreement regarding the interpretation of scientific literature, literature that we may have overlooked, GUSG population trends, the scope of Gunnison County's legal authority to address threats to GUSG, projections about the extent and pattern of future residential development within the range of the species, and what constitutes historical habitat and important current habitat for the species.

In terms of next steps, FWS is finalizing the rulemaking for GUSG. This includes a recommendation for a final rule to list the species as threatened, a final critical habitat designation, and a proposed special rule under section 4(d). The special rule would exempt take for certain practices associated with the Gunnison County development regulations, practices associated with grazing and ranching, and some activities under the Range Wide Conservation Strategy. The Service is considering delaying the effective date of the listing by six months to provide time to finalize the 4(d) rule.

In addition, the Service is working with partners to better articulate the actions necessary to reduce the remaining threats to the satellite populations. This may in turn include amending the Range Wide Conservation Plan for GUSG completed in 2005. A Biology Team has been established to determine the Targets and Actions that will provide sufficient confidence that, when they are achieved, a not warranted finding would result. Should the GUSG be listed, the completion of these actions would likely lead to a proposed delisting.

Biology Team Objectives:

1. Identify population and/or habitat targets within each sub-area that, if achieved, will increase FWS confidence in GUSG conservation. The population and habitat targets will be objective, measurable, and science-based.
2. Identify the Conservation Actions that will address the most important threats to the most important populations that can fulfill the population and habitat targets, sufficient that GUSG will be conserved.
3. In the event of a Threatened finding, to ensure continued conservation and provide input on a possible 4(d) rule.

The Service has asked for the assistance of Colorado Parks and Wildlife to review the 4(d) for clarity and completeness. Subsequent to the biological information being completed the Service will engage local partners on how to develop implementation programs to achieve the biological targets and objectives.

Time Line:

The Biology Team will complete recommendations for internal review by March 21, 2014. The final determination will be published May 12, 2014.

Final Listing Determination for the Lesser Prairie-Chicken

Below is background on the Service's final determination to list the lesser prairie-chicken as a threatened species, with a 4(d) special rule. [Note: see attached for map of historical and current range]

The lesser prairie-chicken (LPC) - a species of prairie grouse that currently occupies a five-state range including Texas, New Mexico, Oklahoma, Kansas, and Colorado - has been a candidate for listing under the Endangered Species Act since 1998. The LPC requires large expanses of

relatively intact native grasslands and prairies to maintain self-sustaining populations. The life history and ecology of the lesser prairie-chicken make it exceptionally vulnerable to changes on the landscape, especially at its currently reduced numbers. This vulnerability to habitat impacts results from the species' lek breeding system which requires males and females to be able to hear and see each other over relatively wide distances, the need for large patches of habitat that include several types of microhabitats, and the behavioral avoidance of vertical structures.

There has been a substantial decrease in the range of the LPC primarily as a result of habitat loss and fragmentation - the primary threat to the species (see attached map of historical and current range). Land use changes related to oil and gas activities, wind energy, transmission development, and agricultural conversion of native prairie, in combination with the potential loss of Conservation Reserve Program acres, present conservation challenges for the species. These ongoing threats, coupled with reduced population size due to the recent severe drought, makes the species especially vulnerable to continuing impacts on the landscape. The vast majority of LPC habitat occurs on private lands across its range and therefore partnerships are critical to conservation of the species.

The range-wide LPC population last year was a record low of roughly 17,600 birds, a nearly 50% decline from the previous year's estimate and likely due to the recent severe drought, habitat loss and fragmentation.

Discussion:

A number of voluntary conservation efforts for LPC have been developed in recent years (see attached summary of LPC Conservation Efforts). The most significant of these have been the LPC Range-wide Plan developed by the 5 state fish and wildlife agencies, under the auspices of the Western Association of Fish and Wildlife Agencies (WAFWA), and the NRCS' Lesser Prairie-chicken Initiative, which targets their conservation program funding toward implementing management practices beneficial to the LPC.

While implementation of these conservation efforts will produce a net conservation benefit to the species, the positive benefits of those efforts will largely be demonstrated in the future rather than now at the time of our listing decision. For example, even with the significant enrollment in the RWP in the short term, it will still take several years for habitat improvement practices to take effect. Complicating the issue of conservation delivery is the role of continued drought on the landscape. If there is rain, the improved management on agricultural lands could result in a quick upturn in the status of the species. However, if the drought continues, the habitats will likely not rebound to create additional usable habitat as quickly or at all, and the LPC population will likely not be able to successfully reproduce and grow, despite the efforts of enrolled landowners.

In light of the current precarious status of the population and the ongoing threats it faces, including the severe drought, the Service has concluded that the LPC warrants listing as a threatened species, i.e, one that is in danger of extinction within the foreseeable future throughout all or a significant portion of its range.

The 4(d) special rule that will accompany this listing determination is designed to encourage participation in voluntary conservation efforts, empower the state fish and wildlife agencies to continue to play the lead role in conservation of the LPC, and to remove ESA regulation from activities that are not significant threats to the bird.

Specifically, the 4(d) rule will exempt take of LPC that is incidental to implementing the WAFWA Range-wide LPC Conservation Plan. This plan covers a wide range of development and conservation activities, will be administered by the states through WAFWA, and will provide a vehicle for ESA compliance for all participating landowners. It will provide for an unprecedented state-federal cooperative partnership in managing a listed species.

Similarly, the 4(d) rule will exempt take incidental to implementing the conservation practices agreed to between NRCS and participating landowners through their Lesser Prairie-chicken Initiative. We expect that giving NRCS the ability to tell participating ranchers and farmers that ESA compliance is assured if they manage their operations using those conservation practices will encourage more voluntary conservation.

The 4(d) rule will also exempt take incidental to routine agricultural activities on existing cultivated land.

In terms of next steps, the final listing determination and 4(d) rule will be delivered to the *Federal Register* by March 31, 2014. The Service has developed a comprehensive outreach plan and will be working with the Department and other agencies to polish and deliver our message.

Range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken

The Western Association of Fish and Wildlife Agencies (WAFWA) will administer the CCAA and enroll oil and gas properties under the permit through certificates of inclusion. Region 6 issued an Enhancement of Survival Permit WAFWA on February 28, 2014, for the Range-wide Oil and Gas Candidate Conservation Agreement with Assurances for the Lesser Prairie-chicken (CCAA).

The CCAA is a voluntary agreement intended to address the effects of oil and gas activities on the lesser prairie-chicken (LEPC) and its habitat in the species' five-state range in Kansas, Colorado, Oklahoma, New Mexico, and Texas. The CCAA will be administered by WAFWA with oversight by the Service. The CCAA was designed to help implement the conservation strategy of the Lesser Prairie-chicken Rangewide Conservation Plan (RWP), which is a comprehensive conservation plan developed by the Lesser Prairie-Chicken Interstate Working Group of WAFWA. While the RWP addresses the suite of development activities that impact the LEPC, the CCAA focuses on oil and gas impacts. Oil and gas operators can voluntarily enroll their properties in the CCAA to implement avoidance, minimization, and mitigation measures. In return, the Service provides them regulatory certainty through incidental take coverage and assurances that no more restrictions or commitments would be imposed should the species be listed. The conservation strategy is designed to incentivize oil and gas development in areas already impacted or of lower importance to LEPC. However, where LEPC may be

affected, participants would implement measures to minimize impacts and pay mitigation fees that will fund conservation efforts at a 2:1 ratio of acres of equal or greater habitat quality in important focal and connectivity areas. WAFWA would use the mitigation funds to contract willing landowners to implement habitat improvement practices, such as prescribed grazing, prescribed burning, and brush removal. When fully implemented, this CCAA will provide for the conservation and management of the LEPC and its habitat by reducing and/or eliminating threats to this species associated with non-Federal mineral development.

In terms of next steps, as of the date of this briefing paper, WAFWA is currently processing enrollment into the CCAA for about 500,000 acres for oil and gas properties with more expected soon. These numbers will likely change due to frequent requests for additional signups. WAFWA is also considering applications from landowners for habitat improvements on about 300,000 acres so far.

Conservation Efforts for the Lesser Prairie-Chicken

The final 4(d) special rule provides that take incidental to activities conducted by a participant enrolled in, and operating in compliance with the Lesser Prairie-Chicken Interstate Working Group's Lesser Prairie-Chicken Range-Wide Conservation Plan (rangewide plan) will not be prohibited. The Service has included this provision in the final 4(d) special rule in recognition of the significant conservation planning efforts of the five state wildlife agencies within the range of the lesser prairie-chicken.

On October 23, 2013, the Service endorsed the WAFWA Range-Wide Plan. The rangewide plan is a voluntary conservation strategy that establishes a mitigation framework which is administered by the Western Association of Fish and Wildlife Agencies (WAFWA) for the purpose of allowing plan participants the opportunity to mitigate any unavoidable impacts of a particular activity on the lesser prairie-chicken and provides financial incentives to landowners who voluntarily participate and manage their property for the benefit of the lesser prairie-chicken. The rangewide plan:

- (1) Identifies rangewide and sub-population level goals for the lesser prairie-chicken.
- (2) Identifies desired habitat amounts and conditions to achieve the population goals.
- (3) Uses a decision support tool that identifies focal areas and connectivity zones where lesser prairie-chicken conservation actions will be emphasized to produce the habitat conditions required to conserve the species at sustainable levels.
- (4) Enhances programs and cooperative efforts to encourage and expand voluntary landowner cooperation in the development and maintenance of the desired habitat conditions.
- (5) Promotes agreements designed to avoid and minimize impacts to lesser prairie-chicken habitat from various development activities and, where avoidance is not possible, mitigate impacts.

- (6) Establishes a mitigation framework administered by WAFWA that could be used by any entity to offset impacts to lesser prairie-chicken habitat with offsite mitigation.
- (7) Identifies research needs and implements monitoring.
- (8) Develops an adaptive management framework that will incorporate monitoring and new information into future adjustments to the conservation strategy to maximize benefits to the lesser prairie-chicken.
- (9) Addresses input and suggestions from agencies, organizations, landowners, industries, other stakeholders, and the general public on the conservation plan for the lesser prairie-chicken.

The mitigation framework used in the rangewide plan incentivizes avoidance and minimization of impacts to lesser prairie-chicken habitat. Developers agree to pay higher mitigation fees for impacts in high priority locations and in higher quality habitat, thereby incentivizing avoidance of areas important for lesser prairie-chickens. Developers can minimize or eliminate mitigation fees by locating new impacts in marginal habitat or by co-locating with existing developments. Developers agree to implement conservation measures to further minimize impacts to lesser prairie -chickens when developments do occur. For example, seasonal and daily timing restrictions on potentially disruptive activities, burying of power lines near leks, and surveys to determine presence or absence of lesser prairie -chickens are required by industry participants

Mitigation dollars will be offered to landowners within the lesser prairie-chicken range for voluntarily implementing conservation practices that benefit the species. Conservation practices are generally equivalent to practice standards defined by the NRCS, although some practices under the range-wide plan are more conservative to further benefit lesser prairie-chickens.

To incentivize conservation in the best places for lesser prairie-chickens landowners are paid under a performance-based system for producing high-quality habitat. Landowners receive increase payments as habitat quality increases. For example, landowners in high priority locations with optimal habitat will be paid 125 percent of the standard cost of implementing the needed conservation practice, as defined by the U.S. Department of Agriculture's Natural Resources Conservation Service (NRCS). Additionally, landowners receive sign-up incentive payments based on habitat quality to further incentivize enrollment of high quality habitat.

The rangewide population goal, based on an annual spring average over a 10-year time frame, is set at 67,000 birds.

In concert with the RWP, an associated oil and gas Candidate Conservation Agreement with Assurances (CCAA) was issued by the Service on February 28, 2014, to WAFWA. Oil and gas companies can enroll in the CCAA and receive incidental take coverage for development activities within the range of the LPC if it is listed. As the master permit holder, WAFWA is currently processing enrollment for about 500,000 acres of oil and gas properties under

Certificates of Inclusion (CI). CI holders will pay mitigation fees and implement avoidance and minimization measures. WAFWA also has received applications from landowners for contracts to implement conservation practices funded by mitigation fees for about 300,000 acres.

Other Provisions of the 4(d) Special Rule for the Lesser Prairie-Chicken:

Agricultural Activities Conducted in Accordance with NRCS's Lesser Prairie-Chicken Initiative and Related NRCS Lesser Prairie-Chicken Conservation Activities: The final 4(d) special rule provides that take of the lesser prairie-chicken will not be prohibited provided the take is incidental to the conditioned conservation practices that are carried out in accordance with a conservation plan developed by NRCS in connection with NRCS's Lesser Prairie-Chicken Initiative (LPCI) and related NRCS activities focused on lesser prairie-chicken conservation consistent with the provisions of the November 22, 2013, conference opinion that was developed in coordination with the Service.

Continuation of Routine Agricultural Practices on Existing Cultivated Lands: The draft final 4(d) special rule provides that take of the lesser prairie-chicken will not be prohibited provided the take is incidental to activities that are conducted during the continuation of routine agricultural practices on cultivated lands that are in row crop, seed-drilled untilled crop, hay, or forage production. These lands must meet the definition of cropland as defined in 7 CFR 718.2, and, in addition, must have been cultivated, meaning tilled, planted, or harvested, within the previous 5 years. Thus, this provision does not include take coverage for any new conversion of grasslands into agriculture.

Other LPC Conservation Efforts:

Candidate Conservation Agreements and Candidate Conservation Agreements with Assurances (CCAs/CCAAs) have been in place for several years in three of the five LPC states - Texas, New Mexico and Oklahoma. CCAAs are voluntary and provide non-Federal landowners and developers the opportunity to implement conservation practices that address specific threats with assurances that, if the species is listed, they can continue to manage their land as outlined in their agreements with no additional requirements. Enrollment in a CCAA may only occur until the effective date of a listing.

In Texas, the Texas Parks and Wildlife Department (TPWD) holds the section 10 permit issued on November 2, 2006, for private landowner use and issues Certificates of Inclusion to participating landowners who are voluntarily implementing management plans for LPCs. Currently, 84 certificates covering 614,250 acres are enrolled in the CCAA; TPWD is currently processing other requests for enrollment.

In New Mexico, both a CCA and CCAA were issued on December 8, 2008, for surface and mineral activities and for private landowners for grazing activities. There are currently 31 oil and gas companies with a total of 883,000 mineral acres and the participating Federal agency is the BLM. In addition, 51 New Mexico ranchers have enrolled in the agreements, representing 1,750,000 enrolled acres. Partners in the New Mexico CCAA/CCA include BLM, Center of Excellence for Hazardous Materials Management (non-profit third party to manage restoration,

reclamation and funding), New Mexico Department of Game and Fish, and several oil and gas companies. On March 1, 2012, the New Mexico State Land Office enrolled all LPC habitat on state Trust lands in conservation pursuant to these agreements. Applications for enrollment have recently increased and we expect these numbers to change in the near future.

Oklahoma, under the leadership of the Oklahoma Department of Wildlife Conservation (ODWC), developed a CCAA for ranching activities. The CCAA was approved January 25, 2013. Currently, 16 certificates covering 18,649 acres are enrolled and ODWC is processing additional enrollments.

The USDA's NRCS is implementing the LPC Initiative (LPCI). The LPCI is a voluntary program that provides financial and technical assistance to landowners and operators for enhancing and maintaining chicken habitat in high priority areas and reducing threats to the species. The primary focus for the LPCI is upland wildlife habitat management. The LPCI participants can receive technical and financial assistance for a number of actions including brush management, prescribed grazing, prescribed burning, range planting and restoration of habitat. On November 22, 2013, the Service issued a conference opinion for the NRCS's LPCI and associated procedures, conservation practices, and conservation measures.

The USDA's Farm Services Agency's Conservation Reserve Program (CRP) has provided short-term protection and enhancement of millions of acres within the range of the LPC. CRP is a voluntary program that allows eligible landowners to receive annual rental payments and cost-share assistance to remove land from agricultural production and establish vegetative cover for the term of the contract. Contract terms are for 10 to 15 years. Farm Bill programs such as the CRP have provided funding that has resulted in millions of acres of habitat improvements across most of the range of the LPC. In particular, in the State of Kansas enrolled lands were planted in native grasses as the cover type, resulting in a considerable benefit to LPC conservation.

In January 2013, Farm Services Agency engaged the Service in a collaborative effort to develop a Conference Opinion (CO) to address CRP implementation on lands occurring within the estimated occupied range of the lesser prairie-chicken (OK, TX, NM, CO, and KS). The CO is intended to evaluate the cumulative landscape level effects of CRP implementation on the lesser prairie-chicken, prescribe conservation measures to avoid or minimize any adverse effects of CRP implementation, and if appropriate, provide incidental take coverage to CRP participants who adhere to the conditions in the CO. The target date for completion of the conference opinion is the end of March.

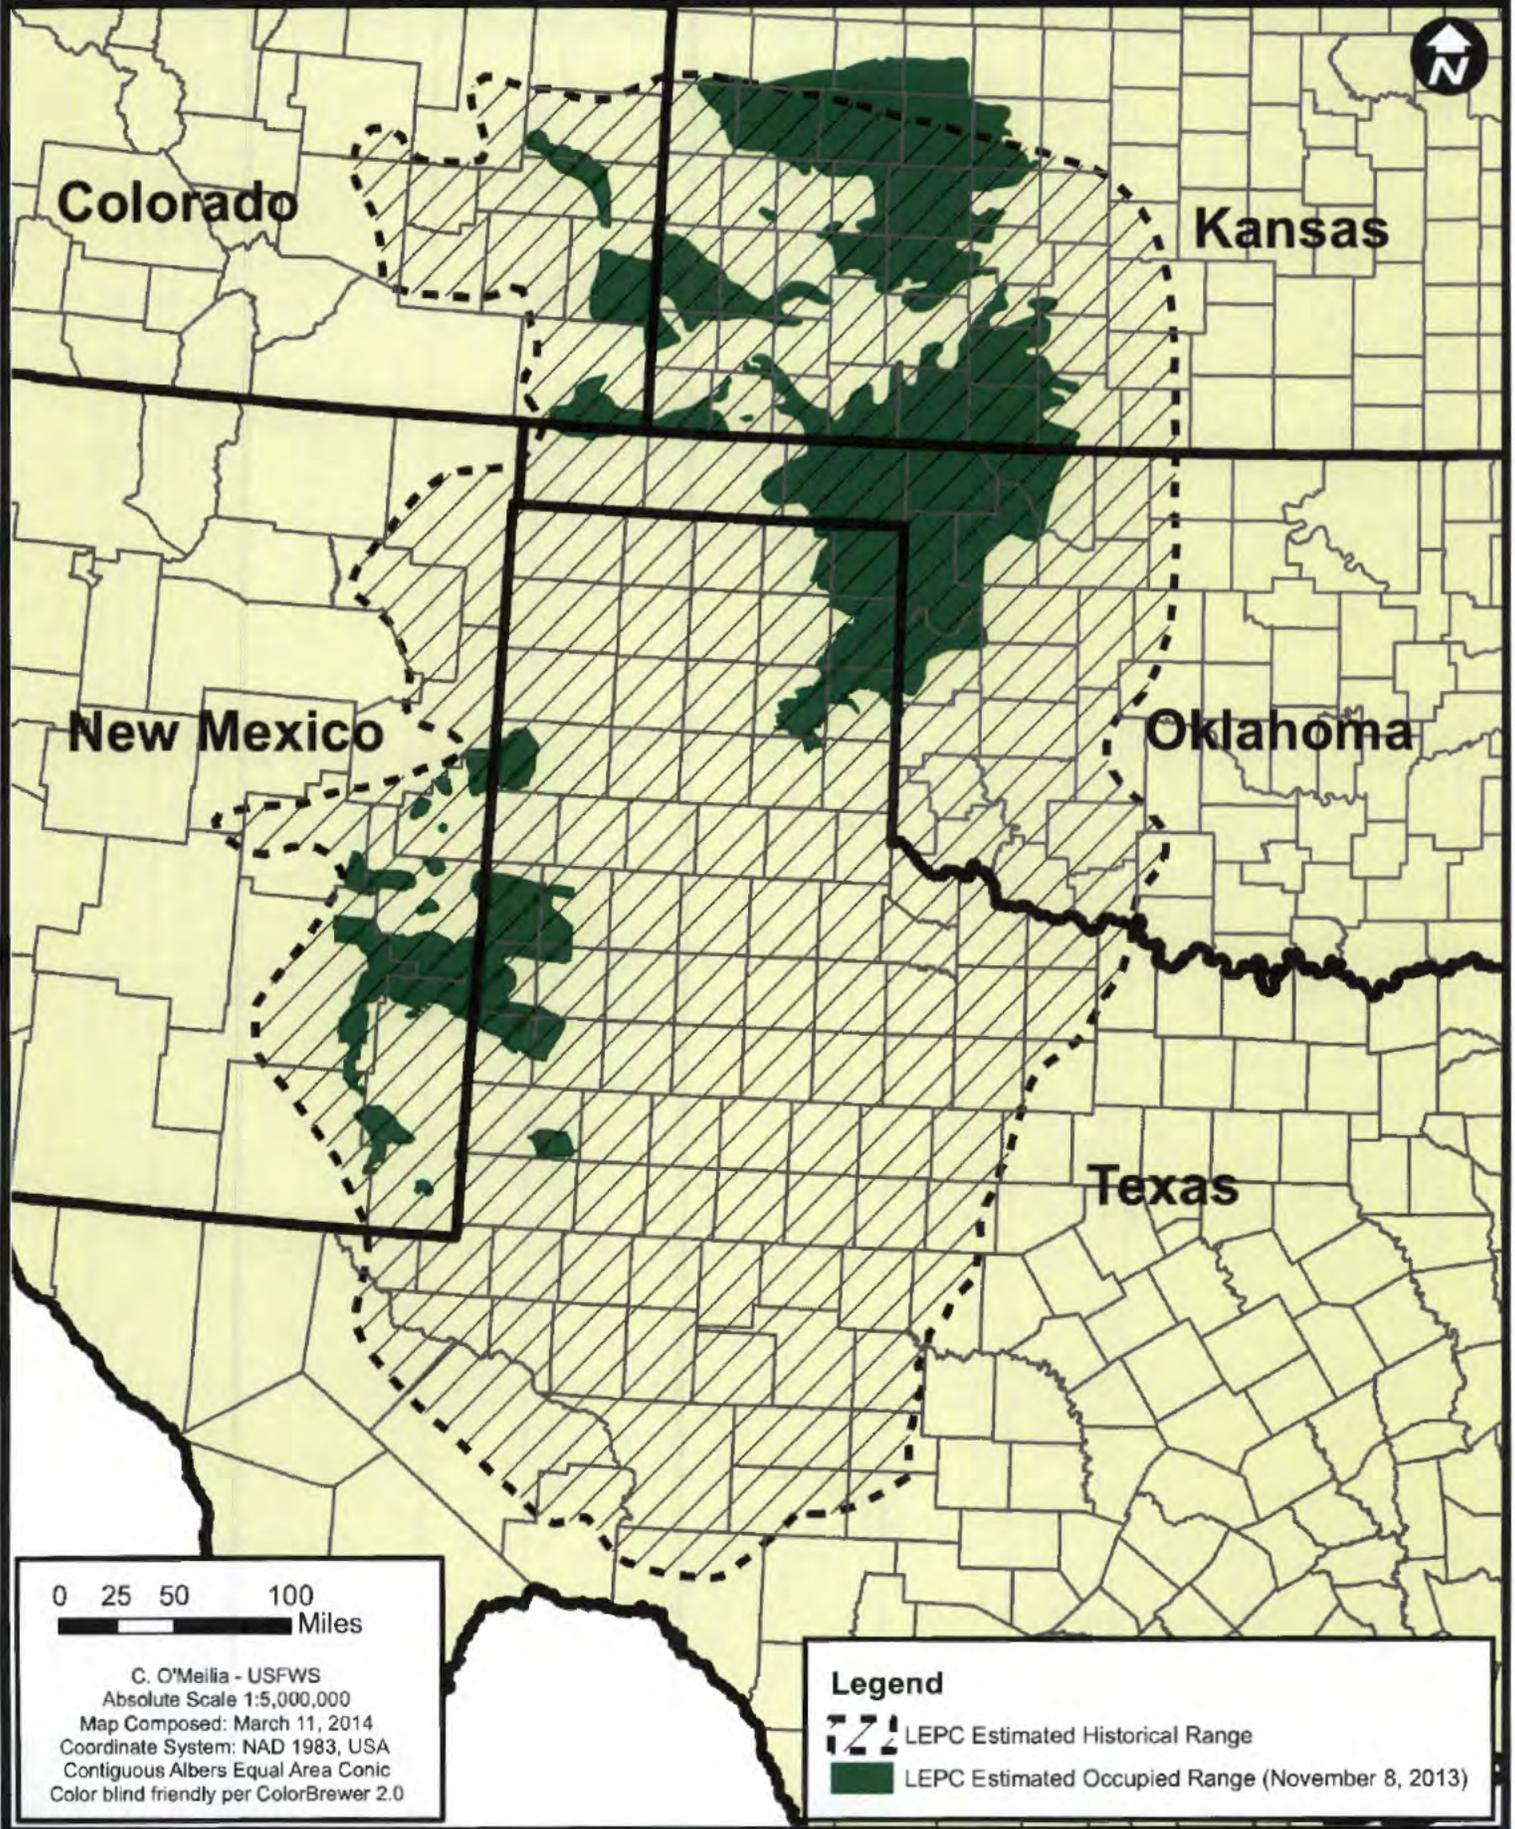

The Service's Partners for Fish and Wildlife Program is voluntary and provides financial and technical assistance for activities such as grazing management, upland restoration, and wetland enhancement.

Remarks For Delivery by Bruce Babbitt

University of Colorado Law School

March 17, 2014

Thank you.

I am pleased to return to the University of Colorado Law School to give the inaugural Getches-Wilkinson Center Distinguished Lecture. This school, and especially the Getches Wilkinson Center, have played a key and essential part in shaping our knowledge and understanding of evolving Western issues.

My topic today is the production of oil and gas on public lands. And that necessarily leads directly to the Bureau of Land Management, the agency that manages approximately 250 million acres of our public lands.

Let me begin with my conclusion. The BLM is not currently capable of managing our fossil fuel resources in a responsible manner. To put it succinctly, BLM is completely over matched by the resources and technical expertise of the oil and gas industry, by the pace of the energy boom, and by the overwhelming political pressure exerted by the industry. As a consequence, there is nobody effectively guarding the public interest in our public lands.

Nowhere is it more clear how outgunned the BLM is than here in Colorado. The ongoing expansion of exploration and development is running at record rates for all types of fossil fuels —coal bed methane in southwestern Colorado, shale oil in the northeast, fracking along the Front Range, oil and gas throughout the state, oil shale on the West Slope, and even the beginning of tar sands development - not in Canada - but along the Colorado Utah border.

The effects upon the land and water of this onrushing development are everywhere to be seen, with still more to come. In Wyoming, the Casper Star Tribune projects at least 20,000 new wells in the next decade. In Colorado, in Garfield County alone, officials are projecting at least another 3000 new wells, a pattern occurring throughout the state.

As an agency, the BLM simply does not have the technical expertise, resources or independence to effectively regulate and oversee this energy boom.

Every week and every month across the West and in Alaska BLM is revising resources management plans, drafting environmental impact statements and issuing leases and permits that bear witness to a deference to the demands of the oil and gas industry. Buried within thousands of pages of documents, these decisions go largely un-analyzed and unremarked by the

public. Taken together, these disparate decisions demonstrate a pervasive failure to protect the public interest.

We have seen what happens when the regulator fails to keep pace with the industry it is supposed to regulate. The Deepwater Horizon oil spill in 2010 exposed a Minerals Management Service that - like the BLM - was torn by the conflicting demands of promoting oil and gas production and policing the industry. And like the BLM today, the MMS was entirely outmatched by industry, unable to account for the scale of risk, to independently verify industry practices, or to assure adequate environmental safeguards.

Everyone shares some responsibility for the fact that BLM is decades behind where it should be today. I will be the first to acknowledge that, in the administration in which I served, we did not do enough to break the industry's grip on the agency. The subsequent administration then turned back the clock even further, pushing the BLM to become a rubber stamp for industry. And although the current administration has launched some reforms, fundamental systemic and structural problems remain.

For its part, the Congress has long served as a channel for oil and gas lobbyists to prevent BLM from becoming the regulator it should be. Western legislators, in particular, continually pressure the agency to acquiesce to industry demands.

For all its travails, I cannot fail to emphasize that there are many fine, dedicated public servants within the agency which I once had the honor to lead. BLM even in the best of times would still have the most difficult management task of any federal land management agency, that of balancing conservative imperatives with Congressional mandates for energy development.

ALASKA

I would like to discuss today three specific examples that illustrate

regulatory failures within BLM. The first is from Alaska, where BLM administers the largest remaining block of wild, unfragmented public land in American, the 20 million acres of the Arctic Slope stretching from the Colville River westward to the shores of the Bering Sea, known as the National Petroleum Reserve in Alaska (NPRA).

In the 1960s, oil and gas companies began exploring westward along the Arctic Slope from the original discoveries at Prudhoe Bay. In 1990, Atlantic Richfield, by then known as ARCO, made a major discovery at the Alpine field near the Colville River, which marks the boundary of the NPRA.

ARCO then made a farsighted decision to develop the Alpine field to the highest environmental standards. Here is an excerpt from a Company press release dated August 26, 1999:

“Because of Alpine’s small footprint design, the field’s surface development will encompass only about 97 acres, about two tenths of one percent of the 40,000 acre field. To minimize impact, Alpine was developed without permanent roads. Temporary ice roads, constructed during winter, are used to move construction equipment, production facilities, drilling rigs and drilling supplies to the site; access the rest of the year is limited from the air.”

ARCO’s innovations opened a hopeful new era in the far north. Industry experts hailed roadless development as the wave of the future. Members of the Alaska delegation arranged a Congressional hearing to showcase the ARCO development model.

Then it all came to an end. In 2001, the ConocoPhillips Company acquired the Alpine Field and began exploring westward from there across the Colville River into the NPRA.

ConocoPhillips rejected the roadless development model and then announced its intention to begin building a bridge across the Colville river and

plowing a road network into the pristine expanses of the NPRA.

In 2012, ConocoPhillips applied to BLM for a permit to expand road building into a tract called Moose's Tooth, located within the NPRA.

And just recently, in March 2014, BLM released its pre-decision environmental analysis for the Moose's Tooth permit. The agency summarily rejected the roadless alternative. Why? Because in the words of BLM a permanent bridge and a road network are necessary "to achieve economic and production goals" of the company.

What BLM is really saying is: "Conoco has told us it would be inconvenient and more expensive to use the roadless model. And it is our policy to accept the company's word without question." The BLM analysis does not even discuss the successful experience in adjacent Alpine Field, pioneered as a sustainable model by ARCO and now, ironically, operated by Conoco.

The six words "to achieve economic and production goals" used by BLM to rationalize its permit decision, are a revealing glimpse into the institutional lassitude that prevails within the BLM. The BLM template for leasing decisions in Alaska has no place for a careful consideration of the public interest or of the successful ARCO experience at the Alpine Field.

BLM in Alaska is coming perilously close to acting as a leasing agent of the ConocoPhillips Company.

ROAN PLATEAU

Let us next consider a current case closer to home, about which I have previously written: the Roan Plateau, a majestic mountain wilderness towering above the river valleys of western Colorado.

The heart of the Roan Plateau consists of some 33,000 acres of BLM land. In 2005, the BLM issued a permit to the Barrett Corporation to drill up to 3000 wells atop the Plateau, approximately one well on every ten acres. When combined with a maze of roads, pipelines and other facilities attendant to drilling and production, the Roan Plateau would be effectively transformed into yet another "sacrifice zone," its wildlife and natural values to vanish forever.

Last year, a Federal Court in Denver temporarily halted the leasing program, ruling that the agency had failed to do a proper environmental analysis. However, the Court made clear that it lacks the legal authority to direct BLM to modify its leasing program; it held only that BLM must dot the i's and cross the t's on its proposal before proceeding.

BLM officials have stated their intention to clean up the paperwork and to proceed to leasing by year-end. Given the extent of public outcry over the original proposal, it may well be that the agency will return with a reduction in the number of permitted wells.

However, just reducing the number of wells is not a sufficient plan to protect this incredible resource. Modern technology now makes it possible to access the entire gas resource without drilling a single well atop the Plateau.

The BLM lands on the Roan Plateau lie within a rectangle that measures less than eight miles north to south and about seven miles east to west. With a technology called ultra-extended reach drilling, it is possible to drill wells that reach outward below ground for a horizontal instance of at least five miles, a distance that is being continually extended by advancing technology. (The record is more than seven miles, and wells in the Alaska Arctic are now extending out four to five miles.) That means every acre of BLM land on the Plateau can be reached by drilling from outside that land and below the rim.

Why hasn't BLM considered mandating the use of ultra extended-reach drilling? The answer, here as in Alaska, is that the Barrett Corporation does

not wish to use that technology, and, deferring to the company, BLM is hesitant to even consider extended reach drilling. The Company will, of course, claim that extended reach drilling is not practicable and that in any event it is too expensive. And BLM will leave it at that, deferring to these self-serving opinions without serious independent inquiry.

Independent economic analysis would perhaps show some additional incremental expense attendant to extended-reach drilling. But since when is it the mission of the BLM to assign little or no value to public land and water resources so as to minimize costs and increase profits to oil and gas companies? And, in a proper analysis, BLM might even factor in that federal oil and gas leases are heavily subsidized by a below-market federal royalty of only twelve and one half percent. (Texas by comparison charges a royalty rate of 25% on its oil and gas lands).

The Roan Plateau would be a good place for this administration to back its rhetoric about responsible oil and gas regulation and to begin charting a new course for BLM. President Obama could use his power under the Antiquities Act to cut through the current legal and bureaucratic tangle by declaring the surface of the Plateau a National Monument, permanently off-limits to drilling.

With the surface of the Plateau thus secured, the President could then direct BLM to get on with leasing the subsurface resource, available by extended-reach drilling from outside the Monument boundaries. The result would be to establish the Roan Plateau as a "layer cake" National Monument, both protecting the surface and allowing subsurface energy production.

THE SAGE GROUSE

Finally, let's examine a case from northwestern Colorado. The subject is the greater sage grouse, an iconic bird that inhabits the remaining

sagebrush expanses

of the intermountain west.

The sage grouse is a candidate for the endangered species list. The cause of its peril, as with so many species, is the loss of habitat from multiple forms of development including mining, agricultural clearing, oil and gas and coal exploitation, damming of rivers, utility corridors and road building.

In 2008, the Fish and Wildlife Service identified the greater sage grouse as a candidate for listing. Litigation ensued, and, in a court settlement, the Service agreed to make a decision by September of 2015. Eager to avoid a listing, BLM and the Fish and Wildlife Service agreed to work with seven affected states to assess and take steps to manage sage grouse habitat so as to avoid a listing. Colorado, with more than four million acres of sagebrush habitat, mostly in the northwestern part of the state, agreed to join in the effort.

In Washington, the Fish and Wildlife Service gathered together a group of experts to consider conservation standards for habitat protection. The resulting document, known as the NTT report, laid out standards for the protection of those areas of land dominated by sagebrush.

What the report failed to recognize, however, is the actual nature of sagebrush lands in the west, many of which are and patchy and discontinuous, interspersed among other habitat types and barren expanses. The report, by focusing almost exclusively on sagebrush patches, ignores a fundamental premise of ecology, namely that to protect wildlife, including endangered species, landscapes must be managed as a whole. Sagebrush patches, arrayed like the spots on a Dalmatian, are not likely to sustain the sage grouse if the rest of the land matrix is left to be chopped up and degraded.

The ultimate result of this habitat partitioning approach is that oil and gas companies are left free in many areas to drill as many wells as they please, and to build as many roads and production facilities as they choose.

What follows next is a tale of avoidance and evasion by the Bureau of Land Management, with the Fish and Wildlife Service in passive acquiescence.

Rather than transforming the NTT recommendations, inadequate as they are, into uniform national standards for BLM management in sagebrush country, the agency simply passed the buck down to BLM state directors to decide what to do. And in Colorado, the State director then passed the buck down to its district offices.

At that point, the district office for Northwest Colorado, here being examined, prepared an environmental impact statement to assess the alternatives for management of lands within its administrative jurisdiction. The draft environmental impact statement has now been issued and is awaiting decision.

The draft EIS, more than a thousand pages long, with fifteen appendixes, is hardly an example of organization or clear expository prose. But it is possible to pick through the verbiage to discern the main outlines of the "preferred alternative" for management oil and gas resources.

And that "preferred alternative" is simply to let local managers decide whether to follow recommended management standards.

The preferred alternative does give lip service to the Dalmatian style emphasis on protection just for sagebrush patches. But this "preferred alternative" is overlain with a blanket of "Exceptions, Modifications, and Waivers," giving local managers discretion to relax standard requirements upon concluding that a local sage grouse population is "healthy and stable," without regard to the larger reality of overall population trends.

What started out as something resembling a national plan with some semblance of standards has been progressively watered down to incoherence, outsourced as far as possible from any overall accountability.

It may be objected that BLM does not have the resources or the sophisticated tools to do detailed land use planning. It is surely the case that BLM lacks the resources to match the firepower of the energy industry. However, it could make much better use of the geospatial data and software now widely available to both government and non profit groups, accessible even to students who might want to examine management alternatives. If you are interested, you can begin by going to ESRI.com to see the remarkable tools available from one public spirited company.

CONCLUSION

The examples I have discussed today of BLM submissiveness in the presence of overwhelming industry and Congressional pressure are not just isolated incidents.

These pending decisions in Alaska, on the Roan Plateau, and on the future of the sage grouse are just a few examples of many management decisions made each month across the West where BLM facilitates the wishes of the energy industry. Often these decisions come in increments, buried in thousands of pages of documents that typically go unnoticed and unremarked, but that nonetheless have important long-range cumulative consequences.

These practices extend back to a time when the lower elevation desert lands administered by BLM were considered of little public value, whether for wildlife, recreation or simply because they are beautiful, transcendent open spaces. Located far from population centers, these lands went largely unnoticed even by wilderness advocates. All too often they were written off as "sacrifice areas."

The BLM is, to be sure, a multiple use land management agency where there will always be a place for an extensive oil and gas leasing program.

However, the production of fossil fuels does not require that industry be given license to always use the least cost methods, that environmental values be devalued and subordinated to company demands, and that oil and gas resources lands be allowed to become to sacrifice zones.

What is needed now is high level attention to reform of the Bureau of Land Management. The actions taken by the Administration in the aftermath of the Deepwater Horizon oil spill provide an instructive precedent for BLM reform.

In the wake of the Deepwater Horizon oil spill, President Obama appointed a National Commission to investigate not only that incident, but also to pursue reform of offshore drilling regulation by the Interior agency then known as the Minerals Management Service. The ensuing Commission report has prompted major reforms in the oversight and regulation of offshore drilling practices.

It is now time for comparable attention to reform of onshore drilling regulation. There need not be a single disaster event to prompt such a thorough going review of industry and of agency practices in the leasing and regulation of public lands. President Obama could set a comparable reform process in motion by appointing a national commission to investigate and reform the regulation of energy production on public lands by the Bureau of Land Management.

The time is at hand to begin.

INTERIOR'S LEASE SALE MARKS BP'S RETURN TO GULF OF MEXICO. The AP (3/20, McConnaughey) reports that Wednesday, the Interior Department announced that 50 companies placed bids for 326 blocks of offshore central Gulf of Mexico acreage. Interior Secretary Sally Jewell said, "The Gulf is a critical component of our nation's energy portfolio and holds vital energy resources that spur economic opportunities for Gulf producing states as well as further reduce our dependence on foreign oil." According to BOEM Director Tommy Beaudreau, four states in the Gulf will share in the revenues from nine of the leases. Sen. Mary Landrieu (D-LA) said the states will earn \$2.2 million from the sale as well as 37.5% of royalty revenues.

Bloomberg News (3/20, Carroll, Snyder, 1.91M) reports that 326 blocks were offered in Wednesday's sale, with winning bids totaling \$851 million. BP won 24 of the blocks up for auction, paying \$41.6 million. In a BP spokesman Brett Clanton said, "BP is very pleased at the prospect of adding to our leading leasehold position in this key U.S. offshore region." However, Bloomberg notes that the blocks BP won may not begin producing crude until about 2025.

The Washington Post (3/20, Mufson, 4.28M) reports that Wednesday's auction was the first since 2012 in which BP was allowed to participate, following an agreement it reached with the EPA last week to lift a ban on BP's ability to participate in government contracts. The Post notes that the highest single-block bid during Wednesday's sale was \$68.8 million, submitted by Freeport McMoran.

US News & World Report (3/20, Neuhauser, 620K) said BP's "timing could not have been better," as it settled with the EPA "six days before bidding opened" on this latest Gulf of Mexico lease sale. US News notes that both BP and the EPA "declined to comment on this confluence of events."

The National Journal (3/20, Foran, Subscription Publication, 427K) reports that BP submitted 31 bids in total during Wednesday's auction. However, 7 of the bids submitted were not successful.

FuelFix (3/20, Dlouhy, 7K) notes that the last time BP bid in a Gulf auction, in June 2012, it paid a total of \$47.9 million for 43 blocks. Eight of the bids BP won on Wednesday are blocks in the Mississippi Canyon area, which is near the site of the 2010 Deepwater Horizon spill. In a statement BP said, "As the nation's largest energy investor, BP is committed to the deep-water Gulf of Mexico, where we have been an active player for a quarter century and have a multi-billion dollar investment program underway."

The Washington Examiner (3/20, Colman, 319K) notes that overall, Wednesday's lease sale spanned "1.7 million acres of the central Gulf of Mexico, generating more than \$872 million for the federal government."

FuelFix (3/19, 7K) reports that during Wednesday's Interior Department auction for Gulf of Mexico drilling rights, the oil industry demonstrated its "enthusiasm for offshore development," with 50 companies filing bids of \$1.1 billion for central Gulf drilling rights. American Petroleum Institute upstream and industry operations director Erik Milito urged the Interior Department to auction drilling rights off the Atlantic Coast in its next five-year outer continental shelf plan. Milito said, "Every lease sale held in the U.S. strengthens our hand as an energy superpower."

Also reporting on the story are the Environment & Energy Publishing (3/20, 705), the New York Times (3/20, Reed, Subscription Publication, 9.61M), Bloomberg News (3/20, 1.91M), Bloomberg BusinessWeek (3/19, 4.93M), Reuters (3/20, Hays), the San Francisco Chronicle (3/20, Dlouhy, 2.88M), the New Orleans Times-Picayune (3/20, 700K), the Lafayette (LA) Daily Advertiser (3/19, 111K), the Houston Business Journal (3/19, Subscription Publication, 91K), the Daily Telegraph (UK) (3/20, Trotman, 3.22M), the International Business Times (3/20, 237K), the Marine Link (3/20, 1K), the Offshore Magazine (3/20, 143K), the Penn Energy (3/20, 128), the Oil and Gas Journal (3/20, 1K), and the E&P Magazine (3/20).

Coverage by the AP was also picked up by the Washington Post (3/20, 4.28M), the Miami Herald (3/20, McConnaughey, 806K), the Macon (GA) Telegraph (3/19, 187K), the Minneapolis Star Tribune (3/20, McConnaughey, 1.14M), and Yahoo! Finance (3/20, 9.7M).

LAWMAKERS PRESS SECRETARY JEWELL TO KEEP GRAY-WOLF PROTECTIONS. The AP (3/20) reports that seventy-four House members "pressed" Interior Secretary Sally Jewell "on Wednesday to drop the administration's plan to end federal protections for gray wolves across most of the Lower 48 states." The lawmakers "signed onto a Wednesday letter to Jewell that cited a peer-review panel's recent conclusion the government relied on unsettled science to make its case that the wolves have sufficiently recovered." They "wrote that taking the animals off the endangered species list and putting them under state management would 'stifle gray wolf recovery' and undermine decades of restoration efforts." In the letter, the lawmakers also "criticized Interior for resurrecting a dormant government journal to publish a study from its own employees that justified the findings about the eastern wolf."

Coverage by the AP was also picked up by Yahoo! (3/20, Brown, 17.91M), the Washington Times (3/20, Brown, 417K), the Minneapolis Star Tribune (3/20, Brown, 1.14M), the Eureka (CA) Times Standard (3/20, 76K), the Idaho Statesman (3/19, 205K), the Myrtle Beach (SC) Online (3/19, 70K), the Quincy (IL) Herald-Whig (3/20, 82K), the Great Falls (MT) Tribune (3/19, 90K), The Missoulian (3/20, 104K), KTVZ-TV Bend, OR (3/20, 1K), and WMGM-TV Wildwood, NJ (3/20, 2K).

Also reporting on the story are [The Oregonian](#) (3/20, 888K), the [Salem \(OR\) Statesman Journal](#) (3/19, 104K), the [Salinas Californian](#) (3/19, 27K), and [KXTV-TV](#) Sacramento, CA (3/19, 25K).

EXTRACTIVE INDUSTRIES TRANSPARENCY INITIATIVE BOARD APPROVES US APPLICATION FOR CANDIDACY. The [Wall Street Journal](#) (3/19, 5.91M) reports that the Extractive Industries Transparency Initiative (EITI) board approved the United States' application for candidacy in the international organization. The Interior Department said it will move to produce its first report within the next two years.

The [Oil and Gas Journal](#) (3/20, 1K) reports that Interior Secretary Sally Jewell said, "This achievement marks another significant milestone on the road to US EITI implementation. In addition to global leadership by example, our goal in pursuing US EITI implementation complements the Obama administration's commitment to reforming and modernizing management of domestic natural resources overseen by the US Department of the Interior."

TOWN HALL PARTICIPANTS PAN PROPOSED SENATE BILL ON ORGAN MOUNTAINS NATIONAL MONUMENT. The [Las Cruces \(NM\) Sun-News](#) (3/20, 59K) reports that "Interior Secretary Sally Jewell's visit to Las Cruces earlier this year apparently sparked what turned out to be a standing-room-only public meeting Wednesday to talk about federal legislation that could lead to Organ Mountains, and possibly other peaks in Doña Ana County, being designated as a national monument." According to the article, "the auditorium at the New Mexico Farm and Ranch Heritage Museum was filled to capacity and an overflow crowd of as many as 100 more spilled into the museum hallway to talk about markedly different pieces of legislation that have been introduced into the U.S. Senate and U.S. House of Representatives, respectively, aimed at protecting the Organ Mountains." The article notes that "at the core of many of the concerns voiced at Wednesday's town hall was the vast difference in the size" of the national monuments proposed by the Senate and the House legislation.

The story also appears at the [Silver City \(NM\) Sun-News](#) (3/20, 24K) and the [El Paso \(TX\) Times](#) (3/20, Ramirez, 247K).

INTERIOR FACES DEADLINE TO CONVEY MINERAL RIGHTS TO CNMI. The [Saipan Tribune](#) (3/20, 641) reports that Gov. Eloy S. Inos said "yesterday that his administration has been reviewing a US Department of the Interior's draft patent conveying to the CNMI oil, gas, and mineral deposit rights." The department has "until this week to convey to the CNMI all rights, titles, and interests of the United States in deposits of oil, gas, and other minerals in the 3-mile submerged lands surrounding nine of its 14 islands."

KING COVE ROAD PRESSURE INCREASES WITH MEDEVACS. [KTUU-TV](#) Anchorage, AK (3/20, 4K) reports that "three U.S. Coast Guard medevacs from King Cove, including a father and son's during flights on one day, have escalated a clash between state and federal officials over what critics call a road to nowhere." According to the article, "last week, blizzard-like weather conditions prevented two medevacs in a single day from getting to the all-weather airport in Cold Bay." Those pushing "for a road say this incident only strengthens the argument that a road needs to be built."

ADDITIONAL COVERAGE OF WILDFIRE BRIEFING ATTENDED BY SECRETARY JEWELL. Additional coverage of the wildfire briefing at the National Interagency Fire Center in Boise attended by Interior Secretary Sally Jewell on Monday was provided by [NPR](#) (3/20, Rott, 465K) and the [Twin Falls \(ID\) Times-News](#) (3/20, 56K).

ADDITIONAL COVERAGE OF SECRETARY JEWELL'S VISIT TO MONTANA. Additional coverage of Interior Secretary Sally Jewell's visit to Montana was provided by the [Glasgow \(MT\) Courier](#) (3/19, 7K).

ADDITIONAL COVERAGE OF CHAMPIONS OF CHANGE AWARD RECIPIENTS. Additional coverage of the Champions of Change Award recipients was provided by the [Ravalli \(MT\) Republic](#) (3/20, 19K) and the [Arizona Public Media](#) (3/20, 2K).

ADDITIONAL COVERAGE OF NEW URBAN TRAILS APP. Additional coverage of the new urban trails app developed by UCLA and California State Parks was provided by the [Los Angeles Magazine](#) (3/19, 488K).

BLM CRITICIZED FOR FLAWED COAL LEASING. The [Billings \(MT\) Gazette](#) (3/20, 206K), Walter Archer, a member of the Western Organization of Resource Councils, writes that "two recent congressional investigations point to the loss of millions of dollars to the public due to flaws in the way the Bureau of Land Management

manages federal coal, including large holdings in the Powder River Basin of Montana and Wyoming." Archer raises concerns about "the fact that local and state governments are short-changed when the BLM gives away public coal at below market value." He argues that "these findings point to the need for Secretary Jewell to put the brakes on federal coal leases until the deep and pervasive problems can be thoroughly analyzed and reforms put in place to be good stewards of the public's assets."

America's Great Outdoors:

National Park Service:

NATIONAL CHERRY BLOSSOM FESTIVAL KICKS OFF THURSDAY. CNN (3/19, Imam, Cnn, 14.53M) reports that "this year's National Cherry Blossom Festival starts in Washington on Thursday." According to the article, "the festival is starting on the first day of spring, as always, but peak bloom is predicted to be later this season because of the brutal winter in the D.C. area." The NPS "says peak bloom, the day when 70% of the blossoms of the Yoshino cherry trees around the Tidal Basin are open, is forecast to fall between April 8 and 12."

CREWS WORKING TO REPAIR SEWER LINE IN VALLEY FORGE PARK. The AP (3/20) reports that "crews are working to replace a broken pipe at Valley Forge National Historical Park that has caused millions of gallons of raw sewage to flow into an environmentally sensitive creek that's a magnet for trout fishermen." According to the article, "the 30-inch sewer main owned by the Tredyffrin Township Municipal Authority burst Wednesday morning." After the main broke, "a torrent of sewage spilled" for hours "into Valley Creek at a rate estimated at around 5,000 gallons per minute." The NPS said "all roads in the park will remain closed until the main is repaired."

SAGUARO PARK OFFICIALS SEEK PERSON OF INTEREST IN CAR BREAK-INS. The Arizona Daily Star (3/20, 335K) reports that the NPS is "asking the public for help in identifying a person of interest in connection with thefts from vehicles at Saguaro National Park West." According to Andy Fisher, a Saguaro National Park spokeswoman, "a woman captured in a photo may have information regarding break-ins into unattended vehicles in late February and early March." Chief Ranger Paul Austin said, "We are asking for our community's assistance to identify this person of interest so that the perpetrator of this crime is held accountable."

NPS OPENS BIDDING ON GLACIER CHALET CONTRACT. The Missoulian (3/20, 104K) reports that Sperry Chalet and Granite Park Chalet, "two seasonal backcountry lodging chalets inside" in Glacier National Park, "will have a new concessions contract awarded later this year." The NPS "on Wednesday released a prospectus for the awarding of the new 10-year concessions contract for the chalets, currently held by Belton Chalets Inc."

JUDGE RULES IN FAVOR OF NPS ON ACADIA NATIONAL PARK'S CONCESSIONS CONTRACT. WLBZ-TV Bangor, ME (3/20, 2K) reports that "a judge ruled in favor of the National Park Service, paving the way for Dawnland, LLC, owned by New Mexico-Based Ortega Family Enterprises, to become the next concessioner to provide food and beverage service at Acadia National Park."

DELAWARE WATER GAP PARK RANGER EARNS NATIONAL RECOGNITION. The Pocono (PA) Record (3/19, 46K) reports that Michelle Schonzeit, a park ranger in the Resource Protection and Visitor Management Division of Delaware Water Gap National Recreation Area, has been selected as the 2014 recipient of the Harry Yount Award for the Northeast Region of the National Park Service (NPS). Delaware Water Gap National Recreation Area Superintendent John J. Donahue said, "We are all extremely proud of Ranger Schonzeit and her accomplishments. She is a highly valued member of our team and is very deserving of this honor. Everything she does to serve the American public is in the highest tradition of the NPS."

Also reporting on the story is WFMZ-TV Allentown, PA (3/20, 71K).

LINCOLN COUNTY COMMISSIONERS ASK NPS FOR CHANGES. The Star of Grand Coulee (WA) (3/19, 169) reprints a letter by Lincoln County commissioners to NPS Director Jon Jarvis requesting "a modification to the National Park Service Contingency Plan that becomes effective upon a lapse in appropriation from congress." They argue that "the application of a blanket policy that treats all 401 units of the National Park System identical in the event of a government shutdown just does not make good fiscal sense and in fact costs even more money,

all the while damaging local economies." According to the commissioners, the Superintendent of each specific National Park Unit "knows best how to manage their own unique area and has far better access to the local community and leaders to make the most pragmatic decision possible."

Bureau of Land Management:

BLM APPROVES NEW ROAD TO ACCESS DISCOVERY SKI AREA FROM NORTH. The Ravalli (MT) Republic (3/20, 19K) reports that the BLM has "given its OK for a road connecting the town of Philipsburg to Discovery Ski Area." The bureau "issued a decision record and finding of no significant impact Wednesday for building a road across a 160-acre parcel of public land three miles south of Philipsburg." According to the article, "the road would connect the existing Rumsey Road to another private road that leads to Discovery."

Fish and Wildlife Service:

AGENCIES, RANCHERS WORK TO PROTECT PRIVATE SAGE GROUSE IN 11 STATES. The Chicago Tribune (3/19, Barker, 2.32M) reports that "federal and state officials have concentrated their management strategy on the 5 million acres of public lands managed by the Bureau of Land Management." However, when the FWS "decides in 2015 whether to list the grouse as a threatened creature under the Endangered Species Act, it will be looking at the contribution private lands play in the survival of the bird." For this reason, "a partnership led by the Natural Resources Conservation Service is working with landowners to protect more than 25 million acres of private grouse habitat across 11 states."

IDAHO TO KILL THOUSANDS OF RAVENS TO PROTECT GREATER SAGE-GROUSE. Reuters (3/20, Zuckerman) reports that Idaho is planning to kill thousands of ravens to protect the greater sage-grouse. The ravens will be killed by baiting them with poisoned chicken eggs, shooting them and destroying a number of their eggs and nests, according to Idaho wildlife managers. The article notes that ravens are protected by federal law, and the FWS recently granted Idaho a permit to kill 4,000 ravens in four areas of the state over two years.

BIOLOGISTS EXCITED BY DISCOVERY OF RARE OCELOT KITTEN IN TEXAS. The Houston Chronicle (3/18, Parker, 2.26M) reports that "wildlife biologists in deep South Texas barely could control their excitement earlier this month when they saw the photo." Hilary Swarts, a wildlife biologist for the FWS, said, "We all jumped up and down and screamed." According to the article, "the scientists were admiring a black-and-white trail camera image of a two-month-old baby ocelot at the Laguna Atascosa Wildlife Refuge, which houses one of only two breeding populations of the mid-sized wild cats in the United States." The article notes that "the new kitten meant that the group of 11 free-ranging ocelots at the refuge in Cameron County had grown nearly 10 percent to 12."

OP-ED: PELICANS NEED MONITORING. In an op-ed for the Los Angeles Times (3/20, Harmon, 3.07M), Andrew Harmon, communications director for International Bird Rescue in California, writes that "this year marks the five-year anniversary of the US Fish and Wildlife Service's removal of the brown pelican from the endangered species list." However, "delisting a species is not the final step in its recovery." He notes that "by law, wildlife officials are required to monitor formerly threatened or endangered species for a minimum of five years to ensure they don't return to a fragile state."

US Geological Survey:

USGS LAUNCHES NEW VERSION OF WEBSITE. The Federal Computer Week (3/19, 263K) reports that the USGS "launched a beta version of its new website March 19 that combines modern design and improved access to scientific information for users to explore from any device." According to the article, "the new site is part of a two-year effort to ensure that consistent navigation, a positive user experience and mobile-friendly design become prominent fixtures in the agency's Web presence." USGS Social Media Lead Scott Horvath said "the beta site is just the tip of the iceberg, and a simplified design, mobile-responsiveness, improved navigation and search capabilities, and an enhanced user experience are still to come, likely by May or June."

Securing America's Energy Future:

Renewable Energy:

NPS OBJECTS TO SOLAR PROJECT NEAR MOJAVE PRESERVE. The Riverside (CA) Press Enterprise (3/19, 465K) reports that the NPS has "lodged strongly worded objections to a proposed 6.5-square-mile solar development about a half-mile from the Mojave National Preserve, saying the project would harm wildlife and suggesting that it be built elsewhere." Preserve Superintendent Stephanie Dubois "submitted an eight-page letter to the US Bureau of Land Management, which oversees the public land where the Soda Mountain solar project is planned and which is handling the environmental analysis of the development." Dubois' letter said the BLM "failed to adequately examine the project's potential to harm groundwater, threatened and endangered species, and scenic views, among other issues."

NEW JERSEY REGULATORS REJECT WIND FARM OFF THE COAST OF ATLANTIC CITY. The AP (3/20, Parry, 417K) reports that the New Jersey Board of Public Utilities on Wednesday rejected a \$188 million proposal by Fishermen's Energy to build an offshore wind farm near Atlantic City, "deciding it placed too much potential risk of soaring electric bills for ratepayers." The AP notes that the proposed project consisted of five turbines expected to generate roughly 25 megawatts, "but depended on a mixture of subsidies and federal grants to make sure ratepayers didn't get stuck with sky-high bills." Environmental groups, including the Sierra Club, were critical of the decision.

Onshore Energy Development:

BLM WORKING ON LAND USE PLAN IN MANCOS SHALE AND GALLUP SANDSTONE FORMATIONS. The Farmington (NM) Daily Times (3/20, 46K) reports that the BLM "wants to amend its resource management plan in northwest New Mexico to better accommodate a potential oil boom in the Mancos Shale and Gallup Sandstone formations." The BLM is "hosting a series of scoping meetings in northwest New Mexico, and the first one was Wednesday night at San Juan College." The bureau's "resource management plan was last amended in 2003," but "with expectations the area will increase oil production, the office is now trying to amend the plan to be more inclusive of land south of US Highway 550."

Also reporting on the story is KOB-TV Albuquerque, NM (3/20, 59K).

OIL INDUSTRY GROUP PUSHES BACK AGAINST CLAIMS LINKING FRACKING TO EARTHQUAKES. The Los Angeles Times (3/19, Reyes, 3.07M) reports the Western States Petroleum Association has "blasted a push by several members of the Los Angeles City Council to investigate whether hydraulic fracturing and other forms of oil well stimulation played any role in the earthquake that rattled Los Angeles on Monday, calling the move 'appallingly irresponsible.'" In a written statement yesterday, the association's president Catherine Reheis-Boyd said, "It does not surprise us that the handful of extremist environmental organizations ... would attempt to make an entirely unfounded connection between hydraulic fracturing and the earthquake." She went on to say, "But when three members of the Los Angeles City Council make similar statements, despite an overwhelming amount of scientific and other evidence that contradicts their assertions, it is time for responsible leaders to say, 'Enough.'"

Offshore Energy Development:

INTERIOR DELAYS PROPOSED RULE TO INCREASE OIL SPILL LIABILITY CAP. In its "RegWatch" blog, The Hill (3/20, 194K) reports that the Interior Department is "delaying a rule that would raise the penalties on offshore facilities that are responsible for oil spills amid pressure from industry groups." According to the article, "the Independent Petroleum Association of America (IPAA) and National Ocean Industries Association (NOIA) both wrote to the Interior Department requesting an extension of the comment period, which the agency granted Tuesday, so these groups will have more time to review and respond to the rule." The agency will "give the industry more time to respond by extending the comment period by another month, through April 25."

OFFICIALS REVIEW INFORMATION ON "LINGERING EFFECTS" OF EXXON VALDEZ. The AP (3/20) reports Alaska state and Federal government officials informed a Federal judge that they are reviewing information from studies on the "lingering effects" of the 1989 Exxon Valdez oil spill and will decide how to proceed in an ongoing legal case. The 1991 consent decree that resolved claims related to environmental damages contained a

"reopener" clause that allows the government "to seek additional work for restoration projects."

An updated article by the AP (3/20) included a discussion of the spill's impact on the oil industry, fishing, and wildlife in the region.

The AP (3/20) also reprints a 1989 report covering the spill.

Tackling America's Water Challenges:

CALIFORNIA FARMERS RALLY IN OPPOSITION TO REGULATIONS LIMITING WATER SUPPLIES. FOX News (3/19, 6.72M) reports that "thousands of farmers in drought-stricken California are rallying this week in opposition to regulations that have frozen water supplies across the state." According to the article, "at issue is a Ninth US Circuit Court of Appeals ruling last week that upheld federal guidelines limiting water deliveries from the northern part of the state to the southern part of the state – to protect an endangered fish called the Delta smelt." Environmentalists "fought to preserve those guidelines, but farmers say they're preventing vital water supplies from reaching the areas that need it most."

WATER AGENCIES RELAX DELTA FLOW REQUIREMENTS. The Hanford (CA) Sentinel (3/20, 25K) reports that "in the wake of public outcry, key water agencies announced Tuesday that they are dialing back on emergency pumping restrictions that could have eliminated all agricultural water pumping from the Sacramento-San Joaquin River Delta through the end of summer." According to the article, "Tuesday's decision, announced by a conference call involving the State Water Resources Control Board, the Bureau of Reclamation and the Department of Water Resources, still holds back significant amounts of water in reservoirs and limits delta exports to 1,500 cubic feet per second." However, "the announcement accomplishes a critical change sought by agricultural interests — allowing some of that water to flow to crop use."

BOR RELEASES CENTRAL VALLEY PROJECT INTEGRATED RESOURCE PLAN. The Red Bluff (CA) Daily News (3/20, 20K) reports that the BOR has "released the final report on the Central Valley Project Integrated Resource Plan." The bureau "investigated climate change impacts on water supplies and demands in the CVP service area and performed an exploratory analysis of potential adaptation strategies to address these impacts."

Empowering Native American Communities:

DEATH OF MAN IN FORT TOTTEN BEING INVESTIGATED. The AP (3/20) reports that "federal agents are investigating the death of a man whose body was found in Fort Totten." According to an FBI spokesman, "an autopsy has been scheduled." The article notes that "law enforcement officials with the Spirit Lake Indian Reservation and the Bureau of Indian Affairs are also participating in the investigation."

CROW TRIBE RECEIVES \$300,000 GRANT FOR BUS SERVICE. The Billings (MT) Gazette (3/20, 206K) reports that the Crow Tribe will "receive a \$300,000 federal grant to keep tribal transit buses running for another year." Sen. Jon Tester announced the grant Wednesday. Tester had "written the Federal Transit Administration last June asking that funding continue so that Crow Tribe bus service across the fifth-largest reservation in the United States could continue."

ADDITIONAL COVERAGE OF TRIBAL LAND BUY-BACK STARING ON PINE RIDGE RESERVATION.

Additional coverage of the land buyback offers sent to owners of parcels on the Pine Ridge Reservation in South Dakota was provided by the Nation Sun News (3/20), KOTA-TV Rapid City, SD (3/20, 890), and KCSR-AM Chadron, NE (3/20, 227).

Top National News:

OBAMA SAYS US WILL NOT INTERVENE MILITARILY IN UKRAINE; BIDEN REASSURES ALLIES. Coverage of the Ukraine crisis focuses primarily on comments from President Obama in local news interviews and by Vice President Biden in Eastern Europe, and on the continued deliberations in Washington and Europe over how to respond. Analyses and commentary pieces paint the US as in a difficult position over what steps to next pursue, with some in Congress calling for more action but no consensus on what that should be. Meanwhile, Ukraine's

announcement of withdrawal from Crimea is being interpreted as a de facto surrender of the region to Russia. The three broadcast networks gave the situation just under seven minutes of cumulative coverage, none at the top of their broadcasts.

The CBS Evening News (3/19, story 6, 2:20, Pelley, 5.58M) reported, "In the East/West standoff over Ukraine, President Obama said the US will not get involved militarily in Russia's annexation of the Crimea peninsula. The head of Ukraine's national security council said Ukrainian troops will be evacuated from the Crimean basis, which are surrounded by Russian forces."

NBC Nightly News (3/19, story 4, 2:50, Williams, 7.86M) reported President Obama, appearing on KSDK-TV St. Louis, "apparently tried to dial back the rhetoric." President Obama: "Look, obviously, you know, we do not need to trigger an actual war with Russia. The Ukrainians don't want that. Nobody would want that." Russian President Vladimir Putin, "having taken Crimea, says he does not intend to go any further into Ukraine. But many are worried tonight he will do just that."

President Obama said on KSDK-TV St. Louis (3/19, 100K), "We do not need to trigger an actual war with Russia. The Ukrainians don't want that. Nobody would want that. What we can do is stand up for principles, stand by the Ukrainian people. One of the most important things we can do is have Congress pass a piece of legislation that's working its way through the Senate and House that would allow to us give some critical aid and assistance to Ukraine right now."

Politico (3/20, Epstein, 73K) reports President Obama told KNND-TV San Diego that the US will not get involved militarily in the crisis. He said, "We are not going to be getting into a military excursion in Ukraine. What we are going to do is mobilize all of our diplomatic resources to make sure that we've got a strong international coalition that sends a clear message, which is that Ukraine should decide their destiny." The Washington Times (3/20, Boyer, 417K) reports White House Press Secretary Jay Carney said the President "is looking instead at imposing further economic sanctions" against Russia. The Los Angeles Times (3/20, Richter, Loiko, 3.07M) reports the US will announce "stiffer economic punishments as early as Thursday."

The Hill (3/20, Herb, 194K) says the US "has not provided military aid requested by the Ukrainian government beyond military rations." However, the AP (3/20) reports the Defense Department said the US will again participate in the Rapid Trident multinational military exercise in Ukraine this year. Pentagon spokesman Col. Steven Warren says it "is the only Ukraine exercise the U.S. military plans to participate in this year."

In an analysis, Julie Pace of the AP (3/20) writes that the Russian annexation of Crime "is testing central tenets" of Obama's "foreign policy philosophy: his belief in the power of direct diplomacy, his preference for using economic sanctions as punishment and his inclination to proceed cautiously in order to avoid creating larger long-term problems." The Administration is now faced with the question of what to do next given that such efforts "have done little to stop Russia" in Crimea.

Biden Says US Will Stand By Allies in Eastern Europe. Reuters (3/20, Rampton) reports Vice President Biden met with the leaders of Latvia and Lithuania and Latvia on a trip to reassure US allies that the US will stand with them. Ed Henry reported on Fox News Special Report (3/19, 2.15M) that the Vice President "spent his second day reassuring a NATO ally, this time, Lithuania, and said there will be military action if Russia expands what he called naked aggression into other Baltic states."

The Washington Post (3/20, Wilson, 4.28M) says Biden's "we're-all-in-this-together tour of Eastern Europe...highlighted not only the growing regional anxieties over Russia's designs on Ukraine – but also how much work the Obama administration has to do to convince allies of its support." Biden said, "President Obama and I view Article 5 of the NATO Treaty as an absolutely solemn commitment which we will honor. We will honor." The Washington Times (3/20, Boyer, 417K) reports Biden also warned "that Moscow would pay a price for 'naked aggression.'"

The New York Times (3/20, Landler, Subscription Publication, 9.61M) says Biden "found himself in a fraught but familiar place...holding the hands of American allies fearful of being bullied by a larger, aggressive neighbor." Three months ago, Biden attempted to reassure Japan and South Korea, "unnerved by China's sudden imposition of an air defense zone in the East China Sea." While the cases differ in many ways, both China and Russia are

"ambitious powers, riding a tide of nationalism and nursing grievances over historical slights at the hands of the West."

The Washington Times (3/20, Chumley, 417K) writes that Biden "uncorked his latest head-scratcher while visiting Warsaw" earlier this week, saying he "used his chairman post on the Senate Foreign Relations Committee to lead Poland to join NATO." Poland joined NATO in 1999, but Biden did not become committee chair until 2001. However, Biden did "take the reins on bringing Democrats into the fold" to sign onto a treaty resolution crafted by then-Chairman Jesse Helms.

NATO's Rasmussen: Ukraine Crisis "Gravest Threat" To Europe Since Cold War. The New York Times (3/20, Gordon, Subscription Publication, 9.61M) reports NATO Secretary General Anders Fogh Rasmussen, speaking at the Brookings Institution Wednesday, said the Russian invasion and annexation of Crimea "was the 'gravest threat' to European security since the end of the Cold War." He said, "We had thought that such behavior had been confined to history, but it's back and it's dangerous because it violates international norms of accepted behavior."

The Washington Post (3/20, DeYoung, 4.28M) says Rasmussen called Russian aggression "a 'wake-up call' for the Atlantic military alliance and other international institutions." The Post says the crisis is a test for NATO that could determine "whether the challenges that have plagued the alliance almost since its inception," such as US dominance, defense budget issues, and disagreements over burden-sharing in NATO's post-Cold War military operations, "are eased or aggravated."

West Has "All But Kicked Russia Out" Of G8. The Washington Times (3/20, Wolfgang, 417K) says "Russia's relatively brief foray into the world's most exclusive club of rich nations has been undone in just a few weeks," as Western economic powers "have all but kicked Russia out" of the G8. The seven remaining powers – the US, Canada, France, Germany, Italy, Japan, and the UK – will meet next week.

The New York Times (3/20, Subscription Publication, 9.61M) says in an editorial that "expelling Russia from the Group of 8...is the wrong way to punish" Putin for annexing Crimea. Within the group, "Putin comes face to face with the leaders of top democracies; expelled by them, he would retreat into his trademark claim that the West has always held Russia in disdain." The Times urges the seven nations that will meet next week to put forth "a unified front against Mr. Putin's arrogance and contempt for international law."

Congress Divided Over How US Should Respond. McClatchy (3/20, Mascaro, Subscription Publication, 95K) says that while "lawmakers are hammering" the President "for a stronger U.S. response," Congress "has so far been unable to provide a unified course of action." While Republicans want to step up natural gas exports to Europe, Democrats want the IMF to have greater loan-making authority "and are pushing for tougher enforcement actions against Russia in the World Trade Organization for previous rule violations."

Rubio Says Russia Must Face Consequences. In a Washington Post (3/20, 4.28M) op-ed, Sen. Marco Rubio writes that Putin's "annexation of Crimea is a direct challenge and long-term threat to the post-World War II international order for which the United States and our allies have made great sacrifices over the past seven decades." Rubio says if Putin is allowed to succeed in the annexation, "the precedent could have global repercussions, including in Asia." Rubio calls for broadening "visa and financial sanctions on Russian officials" to include Putin himself "and his network of political and business allies," and to immediately bar Russia "from every international forum not essential to resolving this crisis, including the Group of Eight."

Five House Members Urge Hagel To Terminate Contracts With Russian Arms Exporter. Reuters (3/20, Strobel) reports Reps. Rosa DeLauro (D-CT), Keith Ellison (D-MN), Elizabeth Esty (D-CT), Kay Granger (R-TX), and James Moran (D-VA) have written to Defense Secretary Hagel urging him to suspend contracts with Russian arms firm Rosoboronexport. They wrote, "Given Russia's recent actions that violate the sovereignty and territorial integrity of Ukraine, including its support of the illegal referendum for Crimean separation, we strongly urge you to terminate these contracts."

Shell Withdraws From Black Sea Oil Exploration Negotiations. The Wall Street Journal (3/20, Scheck, Subscription Publication, 5.91M) reports Royal Dutch Shell has withdrawn from negotiations over an offshore oil exploration agreement in the Black Sea. A spokesman said the decision to pull out was made in January, before

the current crisis.

More Commentary. The Washington Post (3/20, 4.28M), which has repeatedly editorialized that President Obama's response to the Ukraine crisis has been weak and disconnected from reality, does so again this morning, writing that "Western officials seem to be betting that Mr. Putin won't dare to extend his aggression beyond Crimea. But then, just last week they were saying they did not expect Moscow to move quickly on Crimean annexation." The US and Europe "have been too slow to grasp that Mr. Putin is bent on upending the post-Cold War order in Europe and reversing Russia's loss of dominion over Eastern Europe, the Caucasus and Central Asia."

Daniel Henninger writes in his Wall Street Journal (3/20, Subscription Publication, 5.91M) column that Putin had to wait out the Bush Administration and the post-9/11 military conflicts in order to begin to assert himself, and that Obama's different approach to foreign affairs along with US fatigue with international affairs worked to Putin's advantage.

E.J. Dionne writes in his Washington Post (3/20, 4.28M) column that the crisis "has exposed the paradoxes in U.S. attitudes toward foreign policy. Congress has been unusually united in condemning the Russian leader's aggression and calling for his isolation," a Pew poll "found that by a margin of 56 percent to 29 percent, Americans said it was more important that the United States "not get too involved" in the Ukrainian situation than to "take a firm stand against Russian actions.'" Dionne says the crisis gives Obama the opportunity to rebuild "a foreign policy consensus that has vanished."

Russian opposition politician Alexey Navalny, currently under house arrest, writes in a New York Times (3/20, Subscription Publication, 9.61M) op-ed that the West "could deliver a serious blow to the luxurious lifestyles enjoyed by the Kremlin's cronies who shuttle between Russia and the West. This means freezing the oligarchs' financial assets and seizing their property." He also says the West "must investigate ill-gotten gains from Russia within their jurisdictions."

ADMINISTRATION LAUNCHES ONLINE CLIMATE CHANGE INFO SYSTEM. The Christian Science Monitor (3/20, Swan, 540K) reports that with Congress "shunning" legislation to fight global warming, President Obama launched The Climate Data Initiative, "a new online resource to help businesses, citizens, and communities plan for climate change." The program "aims to ease access to federal data on climate issues including rises in sea level, storm surges, extreme heat, and drought," with the idea the population will use it for better preparedness. However, the CSM says that the site "is a work in progress," and partially incomplete.

The Hill (3/20, Cama, 194K) reports in its "E2 Wire" blog that White House adviser John Podesta told reporters that the Administration is looking to "leverage open data resources and other data sets to make communities more resilient." The initial data set "maps expectations for changes in coastal flooding and sea levels in an attempt to help localities prepare, Podesta said."

The Washington Post (3/20, Eilperin, 4.28M) reports that the effort "includes making federal data more accessible through climate.data.gov and launching a design competition to demonstrate the extent to which Americans are vulnerable to coastal flooding." The Administration "is enlisting Google, Esri and other private firms to distribute and store data." Podesta said, "This begins to make clearer what the risks are of inaction."

President Seen Facing Catch-22 On Keystone. Bloomberg News (3/20, Goldman, 1.91M) reports that President Obama's "advisers are lining up against" Keystone XL, "top" Democratic donors oppose the pipeline, and the President himself "dismisses claims that it will create many jobs." However, there remains "one big obstacle to the president saying no to Keystone: election-year politics." Bloomberg says that if the President rejects the pipeline, "it might sink Democratic candidates in states with big energy industries, such as Louisiana and Alaska," which could cost his party control of the Senate. Charlie Cook, of the Cook Political Report, said that if the President "approves the pipeline, he alienates environmentalists and the left; if he rejects it, he really hurts a number of endangered Democratic senators. The path of least resistance would be to continue to punt the decision until after the midterm election."

FED STAYS COURSE ON TAPER, SUGGESTS EARLIER RISE TO INTEREST RATES. Following the conclusion of the two-day Fed Open Market Committee meeting on Wednesday, the central bank announced

that it would continue tapering its bond-buying, as expected. However, it also suggested that interest rates could begin to rise sooner than expected by many investors, riling the stock and bond markets.

NBC Nightly News (3/19, story 5, 0:20, Williams, 7.86M) reported that Yellen "hinted at a hike in the interest rates sooner than some had expected. The markets didn't exactly cheer that news. The Dow fell over 100 points. NASDAQ, S&P were down, as well."

The CBS Evening News (3/19, story 7, 2:00, Pelley, 5.58M) reported that Yellen "said that interest rates will remain near zero" and also "revealed that the fed won't rely so much on the unemployment rate when deciding when those rates should rise again." CBS (Andrews) reports that Yellen said that the Fed "will be to keep interest rates near zero at least into 2015, and if needed, even longer."

The New York Times (3/20, Appelbaum, Subscription Publication, 9.61M) reports that the Fed "further curtailed its economic stimulus" as expected on Wednesday, announcing that it would drop its monthly bond purchases to \$55 billion in April from \$65 billion in March "because of the progress of the economic recovery." However, the Fed "emphasized" that it expected to continue "the suppression of short-term interest rates," announcing that they would remain at their current level "for a considerable time."

Reuters (3/20, Saphir, Hughes) reports that Fed Chairwoman Janet Yellen said that the central bank would likely wind-up its bond buying this fall, and could begin raising interest rates around six months.

Bloomberg News (3/20, Kearns, 1.91M) reports that Yellen, after her first time leading a Fed Open Market Committee meeting, said, "We know we're not close to full employment, not close to an employment level consistent with our mandate, and unless inflation were a significant concern, we wouldn't dream of raising the federal funds rate target."

The Washington Post (3/20, Mui, 4.28M) reports that Fed on Wednesday "began laying the groundwork" for the first rise in interest rates "since the Great Recession upended the economy." The Fed "said it will consider a broad swath of indicators to determine the moment of liftoff, including job market data, inflation expectations and financial developments." The statement "was a retreat from the blanket assurances that rates would remain untouched, which have dominated the Fed's message for the past five years."

The Washington Times (3/20, Hill, 417K) reports that the Fed "said in a statement that the U.S. economy grew more slowly this winter in part because of unusually cold and snowy weather in much of the country." However, the Fed "said the outlook for better growth and continuing job improvement was otherwise the same as it was late last year when the central bank first began paring back its stimulus."

The Wall Street Journal (3/20, Mcgrane, Hilsenrath, Subscription Publication, 5.91M) reports that a 13-3 majority of Fed officials expects to be raising short-term interest rates in 2015. Of the dissenters, one expected interest rates to begin to rise this year, while two expected them to begin to rise in 2016.

McClatchy (3/20, Hall, Subscription Publication, 95K) reports that that in announcing the continued taper, Yellen said that there is "sufficient underlying strength to support ongoing improvement in the labor market." McClatchy says that the markets "watched Yellen's first news conference closely for signs of daylight between her policies and those of her predecessor, Ben Bernanke," but "didn't like what they heard, or thought they heard, on the timing of future Fed actions."

Politico (3/20, White, 73K) reports that Yellen will "probably avoid much partisan criticism from either side following a performance in which she expertly wrapped some fairly significant policy changes in the kind of soothingly gauzy language that is the hallmark of successful central bankers." Politico adds that there were concerns among some Republicans and "moderate" Democrats that Yellen "would err heavily on the side of bringing down the long-term jobless rate even if that meant risking higher inflation," but that is "not happening."

In an editorial, the Wall Street Journal (3/20, Subscription Publication, 5.91M) expresses its pleasure that Yellen ditched the idea of forward guidance, which has issued definitive economic targets in the past. The Journal says that the Fed has now given itself the ability to do whatever they see fit for whatever reasons they want, which the paper says it has always done anyway, regardless of what kind of guidance it has given.

Stocks Fall On Fed Moves. The Wall Street Journal (3/20, Scaggs, Zeng, Subscription Publication, 5.91M) reports that stock and bond prices fell sharply on Wednesday after Yellen suggested that the Fed could begin raising interest rates earlier than expected. While the markets managed to recover some of their losses by the close of trading, the Dow Jones Industrial Average fell 114.02 points to 16,222.17, while the S&P 500 fell 11.48 points. The Nasdaq, meanwhile, fell 25.71 points to 4,307.60. The benchmark 10-year Treasury note fell 25/32 to a yield of 2.770%.

Editorial Wrap-Up:

NEW YORK TIMES. "Russia And The Group Of 8." The New York Times (3/20, Subscription Publication, 9.61M) says in an editorial that "expelling Russia from the Group of 8...is the wrong way to punish" President Vladimir Putin for annexing Crimea. Within the group, "Putin comes face to face with the leaders of top democracies; expelled by them, he would retreat into his trademark claim that the West has always held Russia in disdain." The Times urges the seven nations that will meet next week to put forth "a unified front against Mr. Putin's arrogance and contempt for international law."

"Hurricane Sandy And New Jersey's Poor." An editorial in the New York Times (3/20, Subscription Publication, 9.61M) criticizes Gov. Chris Christie and his Administration, noting that "the recovery effort following Hurricane Sandy was mismanaged from the start and, worse, has consistently shortchanged poor and minority victims." The Times notes that HUD Secretary Donovan told Sen. Bob Menendez during a recent Senate hearing that "the Christie administration had assured him that it would adopt new procedures and take steps to reach families that may have been wrongly denied aid," and adds that Donovan "should take nothing for granted."

WASHINGTON POST. "A New Russian Order." The Washington Post (3/20, 4.28M), which has repeatedly editorialized that President Obama's response to the Ukraine crisis has been weak and disconnected from reality, does so again this morning, writing that "Western officials seem to be betting" that Russian President Vladimir Putin "won't dare to extend his aggression beyond Crimea. But then, just last week they were saying they did not expect Moscow to move quickly on Crimean annexation." The US and Europe "have been too slow to grasp that Mr. Putin is bent on upending the post-Cold War order in Europe and reversing Russia's loss of dominion over Eastern Europe, the Caucasus and Central Asia."

"Sense In Sentencing." In an editorial, the Washington Post (3/20, 4.28M) praises efforts by Attorney General Holder and the US Sentencing Commission to "reform how the federal government punishes drug offenders," but notes that Congress "is best situated to reform sentencing policy; the law must change before the commission can do much more, and there are limits to the discretion Mr. Holder can or should use as chief prosecutor."

"Readjusting The Balance Of Power." An editorial in the Washington Post (3/20, 4.28M) praises efforts by Maryland Gov. Martin O'Malley to reform Maryland's correctional system in the wake of the Baltimore County Detention Center scandal. In particular, the Post notes that the O'Malley Administration has offered a measure to "at least partially restore the management prerogatives" that the "correctional officers' bill of rights" (COBR) "unwisely ceded." The COBR, the Post argues, has "tipped the balance of power within the prison hierarchy too far in favor of officers and their union."

WALL STREET JOURNAL. "A Gas Export Strategy." The Wall Street Journal (3/20, Subscription Publication, 5.91M) says in an editorial that opponents of exporting US natural gas are now citing the Ukraine crisis in their favor, saying that it is too late to save Crimea, but the argument does not make economic sense. Increasing production of liquefied natural gas (LNG) for export will reduce European dependence on Russia for its energy needs, the Journal says, and cites JCS Chairman Gen. Martin Dempsey's assertion before Congress last week that "we've got to pay more and particular attention to energy as an instrument of national power." The Journal says President Obama has been told this, but that he is too beholden to environmental interests to act.

"Non-Guidance Fed Guidance." In an editorial, the Wall Street Journal (3/20, Subscription Publication, 5.91M) expresses its pleasure that Federal Reserve Chair Janet Yellen ditched the idea of forward guidance, which it has issued definitive economic targets in the past. The Journal says that the Fed has now given itself the ability to do whatever they see fit for whatever reasons they want, which the paper says it has always done anyway,

regardless of what kind of guidance it has given.

"An Illinois Referendum." In an editorial, the Wall Street Journal (3/20, Subscription Publication, 5.91M) says that Republican Bruce Rauner captured the GOP gubernatorial nomination in Illinois by vowing to reform the state's public pension system, take on organized labor – which has long had a stranglehold on the state's politics – and oppose tax hikes. The Journal adds that Rauner, as governor, would bring a fresh approach to tackling the state's fiscal woes, while Quinn, if reelected, would simply continue with the status quo.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA – The President will travel to Orlando, Florida for an event on the economy. Following this event, he will travel to Miami, Florida to attend DNC and DCCC events.

VICE PRESIDENT BIDEN – No public schedule.

MICHELLE OBAMA – The First Lady will travel to China.

US Senate: Not in session.

US House: CONCORD COALITION – FEDERAL BUDGET PROCESS – 9 a.m. – 10:30 a.m. The non-partisan Concord Coalition and Rep. Reid Ribble of Wisconsin, a member of the House Budget Committee, will host a panel discussion on the breakdown of the Federal budget process and offer possible solutions that could put the country on a more responsible fiscal path. Speakers: Jim Kessler, senior vice president for policy of Third Way; Ed Lorenzen, senior advisor for The Committee for a Responsible Federal Budget; Robert L. Bixby, executive director of The Concord Coalition; Gordon Gray, director of fiscal policy at the American Action Forum; Steve Bell, senior director of economic policy at the Bipartisan Policy Center. Location: 210 Cannon. Contacts: Ben Ritz, Concord Coalition britz@concordcoalition.org ((831) 334-5673).

PELOSI WEEKLY BRIEFING – 9:45 a.m. Democratic Leader Nancy Pelosi will hold her weekly press conference. Location: HVC Studio A (Enter through HVC-117), Capitol Visitor Center, The Capitol.

COMMITTEE MEETINGS

EDUCATION AND THE WORKFORCE – FIELD HEARING – 9 a.m. Full Committee, "Reviving Our Economy: Supporting a 21st Century Workforce." Location: Arizona State University Polytechnic Campus, Student Union – Cooley Ballroom B, 7001 East Williams Field Road, Mesa, AZ.

HOMELAND SECURITY – FIELD HEARING – 9 a.m. Combating Human Trafficking in Our Major Cities. Witnesses: PANEL I: Brian M. Moskowitz, Houston Special Agent in Charge, Immigration and Customs Enforcement, US Department of Homeland Security; Steve McCraw, Director, Texas Department of Public Safety; Sheriff Adrian Garcia, Sheriffs Office, Harris County, Texas; Ann Johnson, Attorney, Office of the District

Attorney, Harris County, Texas. PANEL II: Dr. Robert "Bob" Sanborn, President, Children At Risk; Reena Isaac, M.D., Assistant Professor, Pediatrics, Baylor College of Medicine, Texas Childrens Hospital; Cheryl Briggs, Founder and Chief Executive Officer, Mission at Serenity Ranch; Kathryn Griffin-Townsend, Founder, We've Been There Done That. Location: Auditorium Room 116, Roderick R. Paige Education Bldg, College of Education, Texas Southern Univ Houston, TX 77004.

SMALL BUSINESS – FIELD HEARING – 10 a.m. Small Business Subcommittee on Health and Technology, "Expanding Broadband Access and Capabilities to Small Businesses in Rural New York." Witnesses: Mark Meyerhofer, Director, Government Relations of Northeast-Western New York, Time Warner, Lancaster, NY; Jill Canfield, Director, Legal & Industry and Assistant General Counsel, NTCA, The Rural Broadband Association, Arlington, VA; Robert Smith, General Manager, Frontier Communications, New York, Dansville, NY; Kendra Lamb, Owner, Lamb Farms Inc., Oakfield, NY – Testifying on behalf of the New York Farm Bureau. Location: Orleans County Legislature, 3 South Main Street, Albion, NY.

Other: **OAS ANTI-CORRUPTION COMMISSION – March 17 – 21.** The Twenty-Third Meeting of the Committee of Experts of the Follow-up Mechanism for the Implementation of the Inter-American Convention against Corruption (MESICIC) of the Organization of American States (OAS) will take place. Location: Padilha Vidal Room, OAS General Secretariat Building, 1889 F Street, NW. Contacts: 202-370-5437.

COSN ANNUAL CONFERENCE – March 19 – 22. The CoSN 2014 Annual Conference is designed for education leaders to better understand their changing roles in creating the new face of learning. Location: Washington Hilton & Towers, 1919 Connecticut Ave. NW. Contacts: Jennifer Cummings jcummings@cosn.org (202-496-2131), Michael Kaplun michaelkaplun@cosn.org (202-496-2120)

INSA SECURITY POLICY REFORM 2014 – INSA's Security Policy Reform Council for Security Policy Reform 2014: Maintaining Momentum for Transformational Change at the SI Organization in Chantilly, VA. This unclassified, but sensitive Symposium will be off the record. Stephanie OSullivan, Principal Deputy Director of National Intelligence to Deliver Keynote Address. TOPICS: View from Capitol Hill: Legislative trends in the year ahead; Snowden, Alexis and Mannings Impact on Security Reform; Reviewing the issues and considerations associated with the Presidents 120 Day Review and related studies; Fixing the Disconnects: Private sector input on reciprocity and metrics; Leveraging Emerging Technologies in the Security Clearance Process: Government insight and perspective on technological enhancements for background investigations and eligibility determinations; Future Technologies and the Art of the Possible: Discussing the average day of an IC security officer in 2020. Highlights: 8:15 a.m. Stephanie OSullivan, Principal Deputy Director of National Intelligence. 9:45 a.m. Impact of Government Plans for Continuous Evaluation: John Fitzpatrick, Director, Information Security Oversight Office, NARA Alex Joel, Civil Liberties Protection Officer, Civil Liberties Privacy Office, ODI; Stephen Lewis, Deputy Director of Security, Department of Defense; Brian Prioletti, Director, Special Security Division, National Counterintelligence Center (NCIX); Stan Sims, Director, Defense Security Service, DSS. 1 p.m. Perspectives from Agency Security Directors: Kemp Ensor, Director of Security, NSA; Mary Rose McCaffrey, Director of Security, CIA; Steve Norton, Director of Security, DIA; Brian Prioletti, Director, Special Security Division, NCIX. Location: The SI Organization, 15050 Conference Center Dr., Chantilly, VA. Contacts: Toya Forman tforman@insaonline.org.

CFA – CONSUMER ASSEMBLY – March 20 – 21. The consumer Federation of America holds their annual Consumer Assembly conference. Media may register (complimentary) by contacting Peter Kitchen at peter@jagillis.com. Highlights: 9:15 a.m. Pew Research, Scott Keeters Latest Research on Consumer Priorities of Americans. 10:00 a.m. Alan Rosenblatt, Turner Strategies – How Social Media Can Empower Consumers. 11:00 a.m. Deceptive and Unconscionable Auto Sales Practices Should Consumer Data Brokers be Regulated? Pitfalls and Success of Government Databases with Consumer Incident Information. 12:30 p.m. Norm Orstein, American Enterprise Institute and Author of Its Even Worse Than It Looks: How the American Constitutional System Collided With the New Politics of Extremism 2:00 p.m. How Prepaid Cards Can be Made Even More Consumer Friendly Mandatory Arbitration and Other Seller Restrictions on Consumer Remedies The Role of Government in Ensuring the Safety of New Technologies and Products. 3:30 p.m. How Improved Efficiency Can Reduce Consumer Energy Use and Costs. 8:45 a.m. Representative Chris Van Hollen – Congressional Priorities. Location: Embassy Suites Convention Center, Washington, D.C. 900 10th St. NW. Contacts: Anna Marie Lowery alowery@consumerfed.org (202-939-1005)

GLOBAL ANTI-CORRUPTION CONGRESS – March 20 – 21. Conference on "Ever Changing International Anti-

Corruption & Anti-Bribery Landscape." This event is sponsored by Momentum is registered with the National Association of State Boards of Accountancy (NASBA) as a sponsor of continuing professional education on the National Registry of CPE Sponsors. Highlights: 10:45 a.m. Acting Assistant Attorney General for the Criminal Division Mythili Raman will deliver the keynote address. NOTE: All media must present government-issued photo I.D. (such as a drivers license) as well as valid media credentials. Press inquiries regarding logistics should be directed to Sarah Horner by calling 202-296-0891 or via email at sarah.horner@kimptonhotels.com. Location: Hotel Monaco, 700 F St., N.W.

GW – CYBERSECURITY – 9 a.m. – 11:30 a.m. "Cybersecurity – The Much Admired Problem." Featured Speaker: Leonard M. Napolitano, Jr., Director, Computer Sciences and Information Systems, Sandia National Laboratories with Frank J. Cilluffo, Director, Homeland Security Policy Institute, Director, Cybersecurity Initiative, George Washington University. Location: City View Room, 7th Floor, The George Washington University, 1957 E Street NW.

CSIS – STATE OF THE EU – OBAMA'S TRIP – 9 a.m. – 12 p.m. Discussion on President Obama's upcoming trip to Europe as well as US and European perspectives on the future of the EU. Speakers: Roger Cohen Columnist, New York Times; Dr. Josef Joffe, Publisher/Editor, Die Zeit; Gideon Rachman, Chief Foreign Affairs Columnist, Financial Times. Moderator: Heather A. Conley Director and Senior Fellow, CSIS Europe Program. Location: 2nd Floor Conference Room, Center for Strategic and International Studies, 1616 Rhode Island Avenue, NW.

ATLANTIC COUNCIL – AFGHANISTAN RECONSTRUCTION – 9:30 a.m. 2014: A Critical Year for Afghanistan Reconstruction. Speakers: John F. Sopko, Special Inspector General for Afghanistan Reconstruction. Moderator: Shuja Nawaz, Director, South Asia Center, Atlantic Council. Location: 1030 15th Street, NW, 12th Floor.

EXXON VALDEZ 25TH ANNIVERSARY – 9:30 a.m. Oil spill, climate and offshore drilling experts will discuss the lingering impacts of the Exxon Valdez oil spill. Speakers: Gene Karpinski, president, League of Conservation Voters; Dune Lankard, board president and founder, Eyak Preservation Council, Cordova resident; Rick Steiner, professor, international oil spill expert, leader in Exxon Valdez oil spill response and restoration, Anchorage; Cindy Shogan, executive director, Alaska Wilderness League; Athan Manuel, director, Sierra Club Lands Protection campaign. Location: National Press Club, Zenger Room, 529 14th Street, NW. Contacts: Virginia Cramer Sierra Club (804-225-9113 x 102)

NOAA – SPRING OUTLOOK, FLOOD RISK – 11 a.m. NOAA will host its annual Spring Outlook media teleconference to discuss the spring flood potential across the country, and deliver the temperature, precipitation and drought outlooks for April through June. Speakers: Jon Gottschalck, acting chief, Operational Prediction Branch, NOAA's Climate Prediction Center; Robert Hartman, acting director, NOAA's Office of Hydrologic Development. Additional experts available during Q&A: Deke Arndt, chief, Climate Monitoring Branch, NOAA's National Climatic Data Center; Brad Rippey, meteorologist, US Department of Agriculture. The outlook will also coincide with NOAA's National Flood Safety Awareness Week, March 16-22. DIAL IN: For reporters only. To obtain the call-in number and passcode, contact Maureen O'Leary, maureen.oleary@noaa.gov, 301-427-9000.

CONTRACEPTION COVERAGE PRESS CALL – 12 p.m. Representatives from the American Civil Liberties Union, the National Women's Law Center, Planned Parenthood Action Fund, and NARAL Pro-Choice America will host a press conference call to discuss the upcoming cases to be heard at the US Supreme Court on March 25 brought by corporations challenging the Affordable Care Act's requirement that employers provide coverage for contraception as part of an employee's health plan. Cecile Richards, President of Planned Parenthood Action Fund; Marcia Greenberger, Co-President of the National Women's Law Center; Louise Melling, Deputy Legal Director of the American Civil Liberties Union; Ilyse Hogue, President of NARAL Pro-Choice America. Contacts: Robyn Shepherd, media@aclu.org, 212-519-7829. Planned Parenthood Action Fund, 212-261-4433 .Rachel Perrone (National Women's Law Center), 202-525-6262. Samantha Gordon, sgordon@prochoiceamerica.org, 202-973-3032. Notes: Members of the media who wish to join this call should RSVP for dial-in information.

HERITAGE – WISCONSIN – LT. GOV. KLEEFISCH – 12 p.m. Advancing Sound Policy Reforms: Wisconsin Success Story. Location: Lehrman Auditorium, 214 Massachusetts Avenue, NE. Contacts: (202) 546-4400.

NRDC – CARBON POLLUTION – 12 p.m. The Natural Resources Defense Council releases analysis which says

far more carbon pollution can be eliminated than originally projected under the "innovative approach" for Federal action outlined in December 2012 by NRDC. With Peter Lehner, executive director, Natural Resources Defense Council; Dan Lashof, director, Climate and Clean Air program, Natural Resources Defense Council; Richard Caperton, director, National Policy and Partnerships, Opower (Arlington, VA); Rob Gramlich, senior vice president, Public Policy, American Wind Energy Association; Dallas Burtraw, Darius Gaskins senior fellow, Resources for the Future. Location: National Press Club, 529 14th Street NW. Contacts: Ailis Wolf, aawolf@hastingsgroup.com, 703-276-3256. Jake Thompson, jthompson@nrdc.org, 202-289-2387

WILSON CENTER – STATE OF THE FUTURE REPORT – 12 p.m. – 1:30 p.m. Report Release: 2013 – 2014 State of the Future. Jerome Glenn, CEO, The Millennium Project, Dennis Bushnell, Chief Scientist, NASA Langley Research Center, and Paul Werbos, Program Director, National Science Foundation, will explore global strategic prospects and strategies drawn from the 2013-14 State of the Future report and the online Global Futures Intelligence System. Location: Woodrow Wilson Center, 5th floor, Ronald Reagan Building, 1300 Pennsylvania Ave. NW.

USDA – HEALTHIER MEALS – 2 p.m. Agriculture Secretary Tom Vilsack will host a national media call to discuss progress being made in the implementation of healthier meal standards for the National School Lunch Program and School Breakfast Program made possible by the Healthy, Hunger-Free Kids Act of 2010. The Secretary will be joined by Jessica Donze Black, Director of the Kids' Safe and Healthful Foods Project – a collaboration of The Pew Charitable Trusts and the Robert Wood Johnson Foundation. Contacts: USDA Communications, 202-720-4623. Notes: Audio Bridge Number: 800-369-1187. PASSCODE: Pew (Given Verbally). Trouble number – 202-720-8560. Callers will be joined to the conference in listen-only mode. To join the Q&A portion of the meeting, press (star)1 on your touch-tone phone.

AU – NATO – SHEA – 4 p.m. – 5 p.m. The American University hosts a discussion on "What Does the United States Still Need to Do in Europe" with Jamie Shea, Deputy Assistant Secretary General for Emerging Security Challenges of NATO. RSVP to J. Paul Johnson, American University Communications at 202-885-5943 or via email at jjohnson@american.edu. Location: American University School of International Service, Abramson Family Founders Room (Intersection of New Mexico and Nebraska Aves., NW).

INTER-AMERICAN DIALOGUE – HAITI – 4 p.m. – 5:30 p.m. Conversation with the head of the United Nations Stabilization Mission in Haiti (MINUSTAH) and Special Representative of the Secretary-General (SRSG), Ambassador Sandra Honore. Location: 1211 Connecticut Ave NW, Suite 510. Contacts: 202-822-9002.

GW – BRAZIL-US RELATIONS – VIEIRA – 6:15 p.m. – 7:15 p.m. GW's Elliott School of International Affairs presents Brazil's Global Moment: Brazil-US Relations with Mauro Vieira, Ambassador of Brazil to the United States. Media should RSVP to Angela Olson at olsona@gwu.edu. Location: Elliott School of International Affairs, Harry Harding Auditorium, Room 213, 1957 E Street NW.

CIVIL LIBERTIES – US BORDERS – 6:30 p.m. Panel to Examine 'Civil Liberties Dead Zone' at US Borders. Speakers: Moderator Marc Rotenberg, executive director of the Electronic Privacy Information Center; Frank Smyth, senior adviser for journalist security at the Committee to Protect Journalists; Neema Guliani, legislative counsel at the American Civil Liberties Union; Steven Bradbury, partner, Dechert LLP, and former head of the Justice Department's Office of Legal Counsel, 2005-2009. Location: National Press Club, 5First Amendment Lounge, 529 14th Street NW. Contacts: Rachel Oswald rachelm.oswald@gmail.com. Notes: This is a ticketed event.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Kimmel: "As is now the tradition, President Obama revealed his [NCAA Basketball Tournament] picks today. He has Florida, Arizona, Louisville and Michigan State in the final four, with Michigan State beating Louisville to win it. But I would take his picks with a grain of salt. He also picked Louie Anderson to win 'Splash.'"

Jimmy Fallon: "Here's what everyone is talking about. Of course, it's the standoff in Ukraine. It seems like it just

keeps getting worse, and now listen to this. There's a new poll that shows that Vladimir Putin's approval rating has actually gone up 10 percent since he's sent troops into Crimea. When he heard that, Obama just shrugged and sent troops to invade Canada. And he's like, 'I mean it worked for Putin.'

Jimmy Fallon: "It seems everybody is weighing in on the whole situation out there. In fact, Senator John McCain has released a list of 11 steps he thinks the White House should take to punish Russia. Of course, usually when McCain takes 11 steps, he just uses a stair lift."

Jimmy Fallon: "March Madness starts tomorrow. Obama is predicting that Michigan State will beat Louisville to win the national championship and, going by Obama's past predictions, I want to congratulate Louisville on their big win."

Jimmy Fallon: "Actually, let's look at the rest of Obama's bracket. He picked Florida, Arizona, Michigan State and Louisville to make the Final Four. Just out of curiosity, can we see Joe Biden's? He picked the Knicks, Lakers, Globetrotters, whatever team Air Bud is playing for."

Jimmy Fallon: "It's been a brutal winter here, a lot of crazy weather. Some say it's because of climate change. I guess that's why the White House just unveiled a new interactive website to warn the public about the dangers of global warming. When they heard that website was designed by the White House, the polar bear said, 'Well you had a good run. What are you going to do?'"

Jimmy Fallon: "Lawmakers here in New York are considering a plan to bring slot machines to LaGuardia. Of course, there's always the other way to gamble at LaGuardia – checking a bag."

Seth Meyers: "Well, President Obama released his March Madness bracket this morning, picking Michigan State to win the tournament. In response, Vladimir Putin started moving his troops into Gonzaga."

Seth Meyers: "In congressional news, Texas Representative Louie Gohmert used his time on the floor of Congress to defend Sarah Palin's 2008 quote about seeing Russia from Alaska. Oh, Louie, she's not going to go out with you, man. You have got to move on. She's got a first dude."

**STATEMENT OF SALLY JEWELL, SECRETARY OF THE INTERIOR
BEFORE THE SUBCOMMITTEE ON INTERIOR,
ENVIRONMENT AND RELATED AGENCIES,
HOUSE COMMITTEE ON APPROPRIATIONS
ON THE 2015 PRESIDENT'S BUDGET REQUEST**

March 25, 2014

Mr. Chairman and members of the Committee, I am pleased to present the 2015 President's Budget for the Department of the Interior.

One of the first things I did on becoming Interior Secretary was to meet with this subcommittee on the 2014 budget. This subcommittee remains an important partner in the accomplishment of Interior's mission and I appreciate our excellent working relationship, which allows us to resolve challenges and take advantage of opportunities. I appreciate the efforts of the Subcommittee in the development of 2014 appropriations that alleviated the need for indiscriminate sequester of discretionary funds and minimized legislative riders.

Today, I have the privilege of appearing before you, Chairman Calvert, at one of your first hearings as Chair of this Subcommittee and to extend my congratulations on the record. I am pleased this year the budget has resumed a more "normal business" process and we can discuss 2015 in the context of an enacted 2014 Appropriation.

This budget is balanced and responsible and supports Interior's pivotal role as a driver of jobs and economic activity in communities across the country. It enables us to carry out core mission responsibilities and commitments. This budget allows Interior to uphold trust responsibilities to American Indians and Alaska Natives, provides a new approach for responsibly budgeting for wildland fire suppression needs, invests in climate resilience, continues smart and balanced all-of-the-above energy development on and offshore, and bolsters our national parks and public lands in advance of the National Park Service's 100th anniversary in 2016.

Interior's programs and activities serve as economic engines in communities across the Nation, contributing an estimated \$371 billion to the economy in 2012 and supporting an estimated 2.3 million American jobs. Of this total, energy and mineral development on Interior-managed lands and offshore areas generated more than \$255 billion of this economic activity and supported 1.3 million jobs. Recreation and tourism on Interior lands contributed \$45 billion to the economies of local communities and supported nearly 372,000 jobs. Water supply, forage and timber activities, primarily on public lands in the West, contributed more than \$50 billion and supported 365,000 jobs.

The President's 2015 budget for the Department of the Interior totals \$11.9 billion, an increase of 2.4 percent from 2014, which includes a cap exemption for fire emergencies. Without this exemption, Interior's budget totals \$11.7 billion, a 0.3 percent increase, or nearly level with last year's funding.

This budget features three key legislative proposals: a new framework to fund wildland fire suppression requirements; additional investment in the infrastructure and visitor experience at our National Parks and public lands; and full and permanent funding for the Land and Wildlife Conservation Fund. Each of these proposals will significantly enhance our ability to conserve and manage the Nation's public lands.

The budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of 1985, to provide stable funding for fire suppression, while minimizing the adverse impacts of fire transfers on other Interior programs, and allowing Interior to reduce fire risk, manage landscapes more comprehensively, and increase the resiliency of public lands and the communities that border them. In this proposed new framework, \$268.6 million, or 70 percent of the 10-year average for suppression response is funded within the discretionary spending limits and \$240.4 million is available as an adjustment to those limits. In addition, it does not increase overall discretionary spending, as it would reduce the ceiling for the existing disaster relief cap adjustment by an equivalent amount as is provided for wildfire suppression operations.

In advance of the 100th anniversary of the National Park Service in 2016, the 2015 budget proposes a comprehensive Centennial Initiative investment in the parks and public lands. The funding would provide targeted increases for a multi-year effort to recommit to the preservation of these special places, to invest wisely in the park system's most important assets, to use parks to enhance informal learning, engage volunteers, provide training opportunities to youth, and enhance the National Park Service's ability to leverage partnerships to accomplish its mission.

Finally, the President's budget continues to support full, permanent funding for the Land and Water Conservation Fund, one of the Nation's most effective tools for expanding access for hunting and fishing, creating ballfields and other places for children to play and learn, protecting historic uses, and protecting Civil War battlefields. The 2015 budget proposes total funding of \$900.0 million for LWCF in Interior and the U.S. Forest Service. Within this total, \$350.0 million is requested as current funding and \$550.0 million as part of a permanent funding proposal. Starting in 2016, the proposal would provide \$900.0 million annually in permanent funding.

Complementing the 2015 budget request is \$346.0 million identified for Interior programs as part of the President's Opportunity, Growth, and Security Initiative to spur economic progress and promote opportunity. If approved, these investments will enable significant progress to address long-term needs in the areas of national parks and other public lands, research and development, infrastructure and permitting support, climate resiliency, and education and economic development in Indian Country.

The drought in California and other Western States underscores the importance of improving the resilience of communities to the effects of climate change. The President's Opportunity, Growth, and Security Initiative includes a \$1 billion government-wide Climate Resilience Fund to invest in developing more resilient communities, and finding solutions to climate challenges through technology development and applied research. This Fund includes about \$240 million for Interior programs that invest in research and development, assist Tribes and local communities in planning and preparing for extreme weather conditions and events, and support public land managers in landscape and watershed planning to increase resiliency and reduce risks.

2015 Budget

The 2014 budget request includes \$10.6 billion in current funding for programs under the jurisdiction of the Interior, Environment and Related Agencies Subcommittee. This is a \$104.9 million, or a one percent increase, compared to 2014. Total funding for the Department includes \$1.0 billion requested for the Bureau of Reclamation and the Central Utah Completion Act, which are under the jurisdiction of the Energy and Water Development Subcommittee.

In addition to the proposals already discussed, the 2015 request sustains support for essential requirements and allows for targeted increases above the 2014 enacted level. Within the overall increase for 2015, \$54.4 million covers fixed cost increases for such things as Federal pay and rent. Reflecting the need to prioritize budget resources, this request includes \$413.3 million in proposed program reductions to offset other programmatic requirements.

Interior programs continue to generate more revenue for the American people than the Department's annual current appropriation. In 2015, Interior will generate estimated receipts of nearly \$14.9 billion, a portion of which is shared with State and local governments to meet a variety of needs, including school funding, infrastructure improvements, and water-conservation projects. Also included with this request are revenue and savings legislative proposals estimated to generate more than \$2.6 billion over the next decade.

Putting this budget in context, Interior's complex mission affects the lives of all Americans. Nearly every American lives within an hour's drive of lands or waters managed by the Interior Department. In 2012, there were 417 million visits to Interior-managed lands. The Department oversees the responsible development of over 20 percent of U.S. energy supplies, is the largest supplier and manager of water in the 17 western States, maintains relationships with 566 federally recognized Tribes, and provides services to more than 2 million American Indian and Alaska Native peoples.

Celebrating and Enhancing America's Great Outdoors

Throughout American history, the great outdoors have shaped the Nation's character and strengthened its economy. The 2015 budget requests the resources and authorities to care for our public lands and prepare for the future. The budget invests in efforts to upgrade and restore national parks and other public-lands areas, while engaging thousands of Americans, including youth, and veterans. The budget strengthens the President's commitment to the America's Great Outdoors initiative with a request of \$5.1 billion in current funding for programs, including the operation of public land management units in BLM, NPS and FWS; the Land and Water Conservation Fund; and grants and technical assistance to States and others. This is an increase of \$127.1 million compared to the 2014 enacted level.

Coupled with these efforts is a historic commitment to America's natural and cultural heritage through Land and Water Conservation Fund programs. The budget includes a 2015 combined request of \$672.3 million (\$246.0 million discretionary and \$426.3 million mandatory) for Interior's LWCF programs that conserve lands and support outdoor recreation. In current funding,

the request for land acquisition is \$147.9 million, with \$39.5 million identified for Collaborative Landscape Planning projects. A total of \$98.1 million is requested in current funding for LWCF conservation grants, including \$48.1 million for LWCF Stateside grants.

I could not highlight our stewardship efforts without discussing the upcoming centennial of the National Park Service.

Overall, the Centennial Initiative—including mandatory, discretionary, and Opportunity, Growth, and Security Initiative resources—will allow NPS to ensure that 1,700 (or 20 percent) of the highest priority park assets are restored to good condition. The effort creates thousands of jobs over three years, provides over 10,000 work and training opportunities to young people, and engages more than 265,000 volunteers in support of public lands.

The request for the Centennial Initiative proposes a \$40 million increase in current appropriations in 2015, plus an additional \$400 million in permanent funding each year for three years. That funding includes \$100 million for a Centennial Challenge to match private philanthropy, \$200 million for National Park Service facilities improvements, and \$100 million for a Centennial Land Management Investment Fund to competitively allocate funds to meet land conservation and deferred maintenance needs among Interior's land-management agencies and the U.S. Department of Agriculture's U.S. Forest Service. The President's Opportunity, Growth, and Security Initiative identifies investments of \$100 million for National Park Service deferred maintenance and an additional \$100 million for the Centennial Land Management Investment Fund.

Strengthening Tribal Nations

Sustaining the President's commitment to tribal sovereignty and self-determination and honoring Interior's trust responsibilities to the 566 federally recognized American Indian and Alaska Native Tribes and more than 2 million people served by these programs, the 2015 budget for Indian Affairs is \$2.6 billion, an increase of \$33.6 million above the 2014 enacted level. The budget invests in: advancing nation-to-nation relationships and tribal self-determination, supporting and protecting Indian families and communities, sustainable stewardship of energy and natural resources, and improving education in Indian Country.

Recognizing this commitment to tribal self-governance and self-determination, the budget fully funds contract support costs Tribes incur as managers of the programs serving Native Americans. The budget requests \$251 million, a \$4.0 million increase over the 2014 enacted level, to fully fund estimated contract support needs in 2015.

Supporting families and communities, the 2015 budget launches the Tiwahe Initiative, with an increase of \$11.6 million in social services and job training programs to address the interrelated problems of child and family welfare, poverty, violence and substance abuse in tribal communities. Tiwahe is the Lakota word for "family." Through this initiative, social services and job training programs will be integrated and expanded to provide culturally appropriate programs to assist and empower families and individuals through economic opportunity, health promotion, family stability, and strengthened communities.

Promoting public safety and tribal community resilience, the 2015 budget request includes re-

sources to build on BIA Law Enforcement's recent successes in reducing violent crime. A pilot program will be implemented to lower repeat incarceration rates in tribally operated jails on three reservations – Red Lake in Minnesota, Ute Mountain in Colorado, and Duck Valley in Nevada – with a new Priority Goal to lower repeat incarcerations by a total of 3 percent by September 30, 2015. Through an Alternatives to Incarceration Strategy, this pilot will seek to address underlying causes of repeat offenses, such as substance abuse and lack of adequate access to social service support, through intergovernmental and interagency partnerships.

The 2015 budget request is complemented by a proposal in the President's Opportunity, Growth, and Security Initiative to further invest in economic development and education to promote strong, resilient tribal economies and improve educational opportunities in Indian Country.

Powering Our Future

As part of the President's all-of-the-above energy strategy to expand safe and responsible domestic energy production, the 2015 budget provides \$753.2 million for conventional and renewable energy programs, an increase of \$40.7 million above the 2014 enacted level. The budget includes measures to encourage responsible, diligent development and a fair return for American taxpayers.

Funding for conventional energy and compliance activities totals \$658.4 million, an increase of \$37.5 million over the 2014 level. Spending from fees and permanent funding related to onshore oil and gas activities increase \$49.1 million from the 2014 level, primarily reflecting a proposal to expand onshore oil and gas inspection activities and to offset the Bureau of Land Management's inspection program costs to the taxpayer with fees from industry, similar to what the offshore industry now pays.

The budget includes \$169.8 million for the Bureau of Ocean Energy Management and \$204.6 million for the Bureau of Safety and Environmental Enforcement to support domestic energy production, including new leasing, strong safety oversight of offshore operations, enhanced environmental enforcement functions, and expanded training and electronic inspection capabilities.

The 2015 budget includes \$94.8 million for renewable energy activities, a \$3.2 million increase over the 2014 level. This funding maintains the Department's emphasis on strategic investments to advance clean energy and meet the President's goal to approve 20,000 megawatts of renewable energy on public lands by 2020 (relative to 2009 levels).

Engaging the Next Generation

The 2015 budget supports a vision to inspire millions of young people to play, learn, serve and work outdoors by expanding volunteer and work opportunities for youth and veterans. The budget proposes \$50.6 million for Interior youth programs, a \$13.6 million or 37 percent increase from 2014.

A key component of the Department's efforts will be partnering with youth organizations through the 21st Century Conservation Service Corps. The proposed funding includes an in-

crease of \$8.0 million to expand opportunities for youth education and employment across the National Park Service; an additional \$2.5 million for the Fish and Wildlife Service's Urban Wildlife Refuges Partnership; and a total of \$4.2 million in Indian Affairs for youth programs including \$2.5 million to engage youth in natural sciences. Support for the National Park Service Centennial will create thousands of jobs, and engage more than 10,000 youth in service and training opportunities and more than 265,000 volunteers.

Ensuring Healthy Watersheds and Sustainable, Secure Water Supplies

The 2015 budget addresses the Nation's water challenges through investments in water conservation, sustainability, and infrastructure critical to the arid Western United States and its fragile ecosystems.

The budget includes \$66.5 million for WaterSMART programs in Reclamation and the U.S. Geological Survey, nearly a 17 percent increase from 2014, to assist communities in stretching water supplies and improving water management. In addition to \$1 billion requested for the Bureau of Reclamation within the jurisdiction of the Energy and Water Subcommittee, the budget also requests \$210.4 million for the U.S. Geological Survey's water programs to provide scientific monitoring, research, and tools to support water management across the Nation. This funding supports the Department's goal to increase by 840,000 acre-feet, the available water supply for agricultural, municipal, industrial, and environmental uses in the Western United States through water-conservation programs by the end of 2015.

Interior extends this commitment to Indian Country, honoring Indian water settlements with investments totaling \$171.9 million in Reclamation and Indian Affairs, for technical and legal support for water settlements. This includes \$147.6 million for implementation of authorized settlements to bring reliable and potable water to Indian communities, more than a 9 percent increase from 2014. Among the investments is \$81 million for the ongoing Navajo-Gallup Water Supply Project, which, when completed, will have the capacity to deliver clean running water to a potential future population of approximately 250,000 people.

Building a Landscape Level Understanding of Our Resources

The 2015 budget fosters the sustainable stewardship of the Nation's lands and resources on a landscape level. Funding includes increases for scientific monitoring, research and tools to advance our understanding and ability to manage natural resources more effectively, while balancing important conservation goals and development objectives. Reflecting the President's ongoing commitment to scientific discovery and innovation to support decision making for critical societal needs and a robust economy, the budget proposes \$888.7 million for research and development activities across the Department, an increase of \$60.4 million over 2014. This funding will increase understanding of natural resources and the factors impacting water availability, ecosystem and species resiliency, sustainable energy and mineral development, climate resilience, and natural hazard mitigation, among others.

Complementing this budget request are two components of the President's Opportunity, Growth,

and Security Initiative: an investment of \$140 million for Interior research and development as part of a government-wide effort to jumpstart growth spurred by scientific discovery; and investments to address climate resilience to better prepare communities and infrastructure, and enable them to build greater resilience in the face of a changing climate.

In ecosystems across the Nation, Interior will continue to work with local communities to leverage its efforts to improve resiliency and achieve improved environmental and economic outcomes.

Major Changes in the 2015 Request

Bureau of Land Management – The 2015 request is \$1.1 billion, a decrease of \$5.6 million from the 2014 enacted level. The 2015 request assumes the use of \$54.5 million in proposed off-setting fees, which when included provides an effective increase of \$48.9 million above 2014. The 2015 request includes \$954.1 million for the Management of Lands and Resources account, and \$25.0 million in current appropriations for Land Acquisition, including \$2.0 million to improve access to public lands for hunting, fishing, and other recreation. The budget proposes \$104.0 million for Oregon and California Grant Lands, which includes a \$4.2 million decrease in Western Oregon Resource Management Planning, reflecting expected completion of six revised plans in June 2015.

To advance America's Great Outdoors, the request includes \$3.5 million in program increases for recreation, cultural resources, and the National Landscape Conservation System to address the needs of recently designated units, implement travel management plans, improve visitor services, and address a backlog in cultural resources inventory and stabilization needs. The budget request also includes \$4.8 million for Youth programs, an increase of \$1.3 million from 2014, to put more young Americans to work protecting and restoring public lands and cultural and historical treasures.

The BLM continues to support the President's all-of-the-above energy strategy on the public lands including an initiative to encourage smart renewable energy development. The 2015 budget includes \$29.2 million, essentially level with 2014, for renewable energy to continue to aggressively support wind, solar, and geothermal energy development on BLM lands. Complementing this is a \$5.0 million increase in the Cadastral, Lands and Realty Management program for identification and designation of energy corridors in low conflict areas to site high voltage transmission lines, substations, and related infrastructure in an environmentally sensitive manner.

The 2015 request for Oil and Gas Management, including both direct and fee-funded appropriations, totals \$133.7 million, an increase of \$20.3 million in available program funding from 2014. In 2015, the budget proposes to shift the cost of oil and gas inspection and enforcement activity from current appropriations to inspection fees charged to industry. The proposed inspection fees will generate and estimated \$48.0 million, providing for a \$10.0 million increase in BLM's inspection and enforcement capability and allowing for a net reduction of \$38.0 million in requested BLM appropriations. The request for Oil and Gas programs includes increases of \$5.2 million for ongoing rulemaking efforts and to strengthen operations at BLM units and \$4.6 million for oversight and permitting to better keep pace with industry demand and fully implement leasing reforms.

In 2015, BLM will release six rapid eco-regional assessments, in addition to four planned for 2014. The BLM will conduct training on the use of the data from these assessments and will work with a number of Landscape Conservation Cooperatives to begin development of regional conservation strategies. The budget includes an increase of \$5.0 million for Resource Management Planning to implement BLM's enterprise geographic information system and address high priority planning. The 2015 budget maintains a \$15.0 million increase to implement sage grouse conservation and restoration measures to help prevent the future listing of the species for protection under the Endangered Species Act.

Other program increases include \$2.8 million in the Wild Horse and Burro program to implement recommendations of the National Academy of Sciences regarding population control; and \$2.8 million in Abandoned Mine Lands to implement remediation plan efforts at Red Devil Mine in Alaska. The request includes \$19.0 million for the Alaska Conveyance program. Although a decrease of \$3.1 million from 2014, this funding coupled with efficiencies from an improved cadastral method, plots a course to complete all surveys and land transfers in ten years.

A proposed grazing administration fee will enhance BLM's capacity for processing grazing permits. A fee of \$1.00 per animal unit month, estimated to provide \$6.5 million in 2015, is proposed on a pilot basis. This additional revenue more than offsets a decrease of \$4.8 million in appropriated funds in Rangeland Management, equating to a \$1.7 million program increase to help address the grazing permit backlog.

Bureau of Ocean Energy Management – The 2015 operating request is \$169.8 million, including \$72.4 million in current appropriations and \$97.3 million in offsetting collections. This is a net increase of \$3.4 million in current appropriations above the 2014 enacted level.

The 2015 budget maintains a strong offshore renewable energy program at essentially the 2014 level of \$23.1 million for the total program. In 2013, BOEM held the first competitive Outer Continental Shelf (OCS) renewable energy lease sales, issued five other non-competitive commercial offshore wind energy leases, and approved the construction and operations plan for the Cape Wind project offshore Massachusetts.

Offshore conventional energy programs also remain essentially level with 2014, with a total of \$49.6 million in 2015. In 2013, BOEM held three sales generating over \$1.4 billion in high bids, and three additional lease sales are scheduled during calendar year 2014. The request of \$65.7 million for Environmental Programs includes an increase of \$2.5 million for work on a Programmatic Environmental Impact Statement for the next Five-Year Program (2017-2022) for oil and gas leasing on the OCS.

Bureau of Safety and Environmental Enforcement – The 2015 budget request is \$204.6 million, including \$81.0 million in current appropriations and \$123.6 million in offsetting collections, an increase of \$2.0 million from 2014. The request for offsetting collections continues to assume \$65.0 million from offshore oil and gas inspection fees. The 2015 request allows BSEE to continue to strengthen regulatory and oversight capability on the OCS and maintain capacity in regulatory, safety management, structural and technical support, and oil spill response preven-

tion.

The budget includes \$189.7 million for Offshore Safety and Environmental Enforcement, an increase of \$2.4 million in current appropriations. The request includes a program increase of \$0.9 million to evaluate and test new technologies and update regulations to reflect improved safety and oversight protocols. Funding for Oil Spill Research is maintained at the 2014 level of \$14.9 million.

Office of Surface Mining – The 2015 budget request for the Office of Surface Mining is \$144.8 million, a decrease of \$5.3 million from the 2014 enacted level. This includes a decrease of \$13.4 million in grants to States and Tribes to encourage these regulatory programs to recover a larger portion of their costs from fees charged to the coal industry, and an increase of \$4.0 million to provide additional technical support to State and tribal regulatory programs. The budget also includes an increase of \$1.9 million for applied science to advance reclamation technologies. This request proposes \$116.1 million for Regulation and Technology funding, \$28.7 million for Abandoned Mine Reclamation Fund activities, and an additional \$1.9 million in offsetting collections from recovered costs for services.

U. S. Geological Survey – The USGS budget request is \$1.1 billion, \$41.3 million above the 2014 enacted level. The President’s budget reflects the Administration’s commitment to investing in research and development to support sound decision making and sustainable stewardship of natural resources. This includes science, monitoring, and assessment activities critical to understanding and managing the ecological, mineral, energy, and water resources which underlie the prosperity and well-being of the Nation. The budget includes increases for priorities in ecosystem restoration, climate adaptation, invasive species, environmental health, and earth observations. Funding provides increased support to enhance sustainable energy development, address water resource challenges, increase landscape level understanding of the Nation’s natural resources, and the Scientists for Tomorrow youth initiative.

To support sustainable management of water resources, the USGS budget includes increases totaling \$6.4 million for WaterSMART programs. This includes increases for State water information grants, regional water availability models, and the integration and dissemination of data through online science platforms. The budget includes increases of \$2.4 million to support implementation of the National Groundwater Monitoring Network and \$1.2 million for the National Streamflow Information Program for streamgages to strengthen the Federal backbone at high priority sites sensitive to drought, flooding, and potential climate change effects.

To better understand and adapt to the potential impacts of a changing climate, the USGS budget invests in research, monitoring, and tools to support resilient decision making. The National Climate Change and Wildlife Science Center and DOI Climate Science Centers are funded at \$35.3 million, an increase of \$11.6 million from 2014. This includes an increase of \$3.0 million for grants focused on applied science and information needed by resource managers for decision making at regional levels. An increase of \$2.3 million will enhance the leveraging of these investments with other Federal climate science activities and make the scientific information and products developed through these programs available to the public in a centralized, web-accessed format. Program increases of \$2.5 million will support applied science and capacity-building for

tribal climate adaptation needs in the CSC regions, and \$3.0 million will support additional research in drought impacts and adaptive management.

The USGS Budget invests in providing critical data and tools to promote understanding and managing resources on a landscape-scale. Program increases in the National Geospatial Program include \$5.0 million for the 3-Dimensional Elevation Program to collect Lidar data to enhance science and emergency response activities, resource and vulnerability assessments, ecosystem based management, and tools to inform policy and management. An increase of \$1.9 million is requested for modernization of The National Map, which provides critical data about the Earth, its complex processes, and natural resources. The 2015 budget includes a \$2.0 million increase for the Big Earth Data initiative to improve access to and use of data from satellite, airborne, terrestrial, and ocean-based Earth observing systems. These investments will provide benefits in natural resource management and hazard mitigation, by improving access to critical information.

To support the sustainable development of energy resources, the USGS budget includes \$40.7 million for conventional and renewable energy programs, \$8.1 million above the 2014 enacted level. A program increase of \$1.3 million will be used to study geothermal resources and build on ongoing work on wind energy impacts. The request includes \$18.6 million, \$8.3 million over 2014, to support research and development to better understand potential impacts of energy development involving hydraulic fracturing. Conducted through an interagency collaboration with the Department of Energy and Environmental Protection Agency, this work addresses issues such as water quality and quantity, ecosystem, community, and human health impacts, and induced seismicity. Funding for other conventional energy programs, including oil, gas, and coal assessments, totals \$15.6 million.

Supporting the sustainable management and restoration of ecosystems, the 2015 budget includes \$162.0 million for Ecosystems science activities, \$9.2 million above the 2014 enacted level. Program increases include \$2.0 million for research on new methods to eradicate, control, and manage Asian carp in the Upper Mississippi River Basin and prevent entry into the Great Lakes. Increases of \$2.5 million are provided for ecosystem restoration work in the Chesapeake Bay, California Bay-Delta, Columbia River, Everglades, and Puget Sound. Another \$2.0 million will support the science and integration of ecosystems services frameworks into decision making and efforts to assess and sustain the Nation's environmental capital. Program increases totaling \$1.8 million will address native pollinators, brown treesnakes, and new and emerging invasive species of national concern.

Supporting understanding, preparedness, and mitigation of the impacts of natural hazards, the budget provides \$128.3 million for Natural Hazards activities, which is essentially level with 2014. This activity provides scientific information and tools to reduce potential fatalities, injuries, and economic loss from volcanoes, earthquakes, tsunamis and landslides, among others. The 2015 budget includes an increase of \$700,000 in Earthquake Hazards for induced seismicity studies related to hydraulic fracturing.

Fish and Wildlife Service – The 2015 Fish and Wildlife Service budget includes \$1.5 billion in current appropriations, an increase of \$48.8 million above the 2014 level. This includes America's Great Outdoors related increases of \$71.7 million in the Resource Management account.

Within this increase is \$2.5 million to establish an Urban Wildlife Refuge Partnership program. This effort will encourage city dwellers to enjoy the outdoors by creating stepping stones of engagement to connect them to the outdoors on refuges and partner lands, through experiences which build on one another.

Funding for FWS grant programs, with the exception of State and Tribal Wildlife Grants, remain level with 2014. In 2015, funding for State and Tribal Wildlife Grants totals \$50 million. The request also includes \$55.0 million for Land Acquisition and \$15.7 million for Construction. In addition to direct appropriations, an estimated \$1.3 billion will be available under permanent appropriations, most of which will be provided directly to States for fish and wildlife restoration and conservation.

The budget proposes \$16.7 million, an increase of \$2.5 million, for activities associated with energy development. Of this increase, \$1.4 million supports scientific research into the impacts of energy transmission and development infrastructure on wildlife and habitat. The research will identify potential impacts associated with the development of energy infrastructure and strategies to minimize the impacts on habitat and species. An increase of \$1.1 million for the Ecological Services Planning and Consultation program supports assessments of renewable energy projects proposed for development.

The budget request for the Resource Management account continues support for key programs with program increases of \$65.8 million above 2014. The request provides \$252.2 million in Ecological Services to conserve, protect, and enhance listed and at-risk species and their habitat, an increase of \$30.3 million. Within this request are increases of \$4.0 million to support conservation of the greater sage grouse across 11 western States and \$10.5 million to implement other species recovery actions.

The request includes funding within Law Enforcement and International Affairs to combat wildlife trafficking. The budget provides \$66.7 million for the law enforcement program to investigate wildlife crimes, enforce the laws governing the Nation's wildlife trade, and expand technical forensic expertise, with program increases of \$2.0 million over 2014.

The budget includes \$138.9 million for Fisheries and Aquatic Resource Conservation, a program increase of \$8.2 million. Within this request is \$48.6 million for operation of the National Fish Hatchery system to address top priorities, an increase of \$1.9 million for fish hatchery maintenance, and \$4.4 million to prevent the spread of Asian carp in the Missouri, Ohio, upper Mississippi Rivers, and other high priority watersheds.

Funding for Cooperative Landscape Conservation activity is \$17.7 million, an increase of \$3.2 million, and funding for Science Support is \$31.6 million, an increase of \$14.4 million. The budget supports applied science directed at high impact questions to mitigate threats to fish and wildlife resources, including \$2.5 million to address white nose syndrome in bats, and an increase of \$1.0 million to study biological carbon sequestration.

The 2015 budget proposes to eliminate the current funding contribution to the National Wildlife Refuge fund, a reduction of \$13.2 million below 2014. An estimated \$8.0 million in permanent

receipts collected and allocated under the program would remain available to counties. The budget also proposes cancellation of \$1.4 million in prior year balances from the Landowner Incentive and Private Stewardship Grant programs, which have not received new budget authority in several years.

National Park Service – The 2015 budget request for NPS of \$2.6 billion is \$55.1 million above the 2014 enacted level.

In 2015, a total of \$2.5 billion is requested for NPS as part of America's Great Outdoors. This includes \$2.3 billion for park operations, an increase of \$47.1 million over 2014. Within this increase is \$30.0 million to support the NPS Centennial Initiative. The Centennial increase includes \$16.0 million for repair and rehabilitation projects to improve high priority projects throughout the parks, \$8.0 million in competitively managed funds to support enhanced visitor services in the areas of interpretation and education, law enforcement and protection, and facility operations, \$4.0 million for 21 CSC youth work opportunities to engage youth in service and conservation projects, and \$2.0 million to support expanded volunteer opportunities at the parks. Across these Centennial increases, the budget provides an \$8.0 million increase for youth engagement and employment opportunities, and continues the NPS' efforts to attract qualified veteran candidates to fill Federal positions. The request for Park Operations also includes increases of \$15.7 million for increased fixed costs, and \$2.0 million to support new responsibilities at park units.

Also in preparation for the Centennial anniversary of the parks, the 2015 request includes \$10.0 million in a separate account for Centennial Challenge projects. This funding will provide a Federal match to leverage partner donations for signature projects and programs at the parks. This program will be instrumental in garnering partner support to prepare park sites across the country for the centennial and through the second century of the NPS.

The 2015 request for the Historic Preservation Fund is \$56.4 million, level with 2014. Of this total, \$46.9 million is requested for grants-in-aid to States and Territories, \$9.0 million for grants-in-aid to Tribes, and \$500,000 to be awarded competitively to address communities currently underrepresented on the National Register of Historic Places.

The budget includes \$52.0 million within the National Recreation and Preservation account, which includes \$10.0 million for the Rivers, Trails, and Conservation Assistance program, essentially level with 2014, and \$1.2 million for American Battlefield Protection Program assistance grants, also level with 2014. The request includes a program reduction of \$9.1 million from Heritage Partnership programs to encourage self-sufficiency for these non-Federal organizations.

Programs funded out of the Land and Water Conservation Fund are a key component of America's Great Outdoors. The budget requests \$104.0 million for the Land Acquisition and State Assistance account, an increase of \$5.9 million. This includes \$48.1 million for the State Conservation Grants program, level with 2014, and \$55.9 million for NPS Federal land acquisition, a programmatic increase of \$5.8 million. Of this amount, \$13.2 million supports Collaborative Landscape projects in the California Southwest Desert and areas within the National Trails System.

Funding for Construction totals \$138.3 million, essentially level with 2014. Of this amount, the budget includes \$61.7 million for line-item construction projects, a \$1.1 million program increase compared to 2014. The request includes \$6.7 million to reconstruct the historic cave tour trails in Mammoth Cave National Park and \$3.9 million to stabilize and repair exterior walls of the historic Alcatraz prison cell house at Golden Gate National Recreation Area.

Indian Affairs – The 2015 budget includes \$2.6 billion for Indian Affairs programs, an increase of \$33.6 million from the 2014 enacted level. This includes an increase of \$33.8 million for Operation of Indian Programs; and level funding of \$35.7 million for Indian Land and Water Claim Settlements, \$109.9 for Construction, and \$6.7 million for the Indian Guaranteed Loan program.

Within the Operation of Indian Programs, the budget includes full funding of \$251.0 million for Contract Support Costs and the Indian Self-Determination Fund, an increase of \$4.0 million from 2014. Consistent with the 2014 Operating Plan, the 2015 request provides full funding based on the most current estimated need. The availability of contract support cost funding is a key factor in tribal decisions to assume responsibility for operating Federal programs important to the furtherance of self-governance and self-determination. To further facilitate Tribal 638 Contracting, the budget includes an additional \$1.2 million to increase services from the Department's Office of Indirect Cost Negotiations which negotiates indirect cost rates with non-Federal entities, including tribal governments. Consistent with Subcommittee direction, and in collaboration with the Indian Health Service (IHS), the Department held its first formal consultation on March 11, 2014 with tribes to discuss long-term solutions to Contract Support Cost issues. The Department remains committed to working with IHS, tribes, and Congress to develop a long-term strategy for addressing this important issue.

The 2015 budget for Indian Affairs includes an increase of \$11.6 million for the Tiwahe or "family" Initiative. The initiative takes a comprehensive and integrated approach to address the inter-related problems of poverty, violence, and substance abuse in Indian communities. The initiative builds on and expands social service, Indian child and family welfare, and job training programs. In recognition that adequate housing is essential to building stronger families, the budget maintains the 2014 level for the Housing Improvement Program. The goal of the Tiwahe Initiative is to empower American Indian individuals and families in health promotion and family stability, and to strengthen tribal communities as a whole. To better target funding and evaluate outcomes in meeting social service needs in Indian Country, the budget includes \$1.0 million as part of the initiative.

The budget provides strong support for the sustainable stewardship of land and resources in Indian Country, sustaining funding for trust land management and real estate services at 2014 levels and proposing program increases of \$3.6 million for the stewardship of natural resources. Funding supports the development of natural resource science, information, and tools for application in the development and management of energy and minerals, water, forestry, oceans, climate resilience, and endangered and invasive species. Demonstrating the Administration's commitment to resolving tribal water rights and ensuring that tribes have access to meet their water needs, \$171.9 million is provided across the Department for implementation of, and technical and legal support for, Indian water rights settlements, an increase of \$13.8 million over 2014. A program increase of \$1.0 million is also provided in Indian Affairs for deferred maintenance on Indian

irrigation projects to help address drought issues in Indian Country.

The budget supports improving educational outcomes in Indian Country, providing \$794.4 million for the Bureau of Indian Education, an increase of \$5.6 million from 2014. The request includes an increase of \$500,000 for Johnson O'Malley Education Assistance Grants to support a new student count in 2015 and funding to address the projected increase in the number of eligible students. The budget includes \$1.0 million to support ongoing evaluation of the BIE school system to improve educational outcomes. Within education construction, an increase of \$2.3 million supports site development at the Beatrice Rafferty School for which design funding was provided in 2014. The budget also includes \$2.3 million in increases for BIE funded post-secondary programs including \$1.7 million for post-graduate opportunities in science fields, and \$250,000 for summer pre-law preparatory scholarships.

Departmental Offices and Department-wide Programs – The 2015 request for the Office of the Secretary is \$265.3 million, an increase of \$1.3 million from the 2014 enacted level. Of this, \$122.9 million is for the Office of Natural Resources Revenue programs, an increase of \$3.5, reflecting increases to strengthen production verification and meter inspections activities, including implementing an onshore production verification pilot and funding related data integration. Other changes include the proposed transfer of the Indian Arts and Crafts Board from the Office of the Secretary to the Bureau of Indian Affairs of \$1.3 million, a decrease of \$865,000 reflecting a shift from direct appropriations to fee for service for Indirect Cost Negotiations, and a program decrease of \$266,000 in Valuation Services.

The budget request for the Office of Insular Affairs is \$92.2 million, a decrease of \$10.2 million from the 2014 enacted level. The budget includes an increase of \$3.0 million to address urgent, immediate needs in the insular areas, and \$1.8 million to improve safety conditions in insular school facilities. A decrease of \$500,000 reflects completion of an aerial bait system for brown treesnake control. Compact Impact is funded at \$1.3 million, a decrease of \$1.7 million from 2014, and is supplemented by \$30.0 million annually in permanent Compact Impact funding. Funding of \$13.1 million for the Palau Compact Extension is not requested for 2015 as it is expected the Compact will be authorized and funded from permanent appropriations in 2014.

The Office of Inspector General request is \$50.0 million, a decrease of \$784,000 from 2014. The budget includes a decrease of \$2.0 million reflecting completion of an effort to reduce OIG's physical footprint. Increases of \$423,000 and \$355,000 are included to support the council of the Inspectors General on Integrity and Efficiency and provide additional FTE for information security audits, respectively. The Office of the Solicitor request is \$65.8 million, equal to the 2014 enacted level.

The Office of the Special Trustee request is \$139.0 million, \$648,000 below the 2014 enacted level. The 2015 budget decreases Business Management funding by \$1.6 million reflecting \$922,000 in efficiencies from the transfer of some mailing and printing services to the U.S. Department of the Treasury, a reduction of \$500,000 in litigation support, and a decrease of \$200,000 in funding for the Office of Hearings and Appeals.

The 2015 request for the Department-wide Wildland Fire Management program is \$794.0 mil-

lion without the proposed fire cap adjustment, and \$1.0 billion including the adjustment. The request includes \$268.6 million for Suppression within the current budget cap, which is 70 percent of the 10 year suppression average spending. This base level funding ensures the cap adjustment of \$240.4 million would only be used for the most severe fires, since it is one percent of the fires that cause 30 percent of the costs. The new budget framework for Wildland Fire Management eliminates the need for additional funds through the FLAME Act. The 2015 budget includes a program increase of \$34.1 million for Preparedness activities to enhance readiness capabilities. The budget includes \$146.3 million for Fuels Management activities, formerly known as Hazardous Fuels Management. This is equal to the 2014 enacted level with an increase of \$1.3 million for fixed costs. Complementing this request is \$30.0 million for Resilient Landscapes, a new component of the Wildland Fire Management program, to support treatments that improve the integrity and resilience of forests and rangelands. Resilient landscape projects will receive bureau matching funds. The budget request also includes a \$2.0 million increase for the Burned Area Rehabilitation program to address greater post-fire rehabilitation needs caused by the 2012 and 2013 fire seasons.

The 2015 request for the Natural Resource Damage Assessment and Restoration Fund is \$7.8 million, a program increase of \$1.5 million. The increase includes \$1.0 million for a Department-wide onshore Oil Spill Preparedness Program, and additional resources for Restoration support. The budget includes \$10.0 million for the Central Hazardous Materials Fund, an increase of \$412,000 from 2014 to support additional cleanup work.

The Department's 2015 request for the Working Capital Fund appropriation is \$64.3 million, an increase of \$7.3 million from the 2014 enacted level. Within this request is \$53.9 million for the operation and maintenance of the Financial and Business Management System, an increase of \$1.0 million to continue support of the Department's Cultural and Scientific Collections Management initiative, a decrease of \$1.0 million from the Department's Service First initiative, and an increase of \$8.4 million to support Interior's Office Consolidation strategy in the D.C metropolitan area.

Mandatory Proposals

The 2015 budget includes 15 legislative proposals affecting spending, revenue and available budget authority, which require action by the Congressional Authorizing Committees. Revenue and savings proposals will generate more than \$2.6 billion over the next decade. The 2015 budget includes four spending proposals with an estimated \$9.9 billion in outlays over the next decade.

Land and Water Conservation Fund – The 2015 budget proposes \$900.0 million in current and permanent funding in 2015, and proposes permanent authorization of \$900.0 million in mandatory funding for LWCF programs in the Departments of the Interior and Agriculture beginning in 2016. During a transition to permanent funding in 2015, the budget proposes \$900.0 million in total LWCF programs funding, comprised of \$550.0 million permanent and \$350.0 million current funding, shared by Interior and Agriculture.

Centennial Initiative – The Centennial Initiative includes a legislative proposal to authorize

\$1.2 billion in permanent funding over three years beginning in 2015 in the following areas: \$300.0 million (\$100.0 million a year for 3 years) for a National Park Service Centennial Challenge fund to leverage private donations; \$600.0 million (\$200.0 million a year for 3 years) for NPS deferred maintenance; and \$300.0 million (\$100.0 million a year for 3 years) for a multi-agency Centennial Land Management Investment Fund to competitively award grants to Interior land management agencies and the U.S. Forest Service for deferred maintenance and conservation projects.

Payments in Lieu of Taxes – The Agricultural Act of 2014 included a one-year extension of permanent PILT funding through 2014. The 2015 budget proposes to extend authorization of the program an additional year through 2015, while a sustainable long-term funding solution is developed for the PILT Program. The PILT payments help local governments carry out vital services, such as firefighting and police protection, construction of public schools and roads, and search and rescue operations. The cost of a one-year extension is estimated to be \$442.0 million in 2015.

Palau Compact – On September 3, 2010, the U.S. and the Republic of Palau successfully concluded the review of the Compact of Free Association and signed a 15-year agreement that includes a package of assistance through 2024. The 2015 budget assumes authorization of permanent funding for the Compact occurs in 2014. The cost for this proposal is estimated at \$178.3 million for 2015 through 2024.

Federal Oil and Gas Reforms – The budget includes a package of legislative reforms to bolster and backstop administrative actions being taken to reform the management of Interior’s onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources. Proposed statutory and administrative changes fall into three general categories: 1) advancing royalty reforms, 2) encouraging diligent development of oil and gas leases, and 3) improving revenue collection processes. Collectively, these reforms will generate roughly \$2.5 billion in net revenue to the Treasury over ten years, of which about \$1.7 billion would result from statutory changes. Many States will also benefit from higher Federal revenue sharing payments.

Return Coal Abandoned Mine Land Reclamation Fees to Historic Levels – The budget proposes legislation to modify the 2006 amendments to the Surface Mining Control and Reclamation Act, which lowered the per-ton coal fee companies pay into the AML Fund. The proposal would return the fee to 35 cents a ton, the same level companies paid prior to the 2006 fee reduction. The additional revenue, estimated at \$362 million over ten years, will be used to reclaim high priority abandoned coal mines and reduce a portion of the estimated \$3.9 billion needed to address remaining dangerous coal AML sites nationwide.

Discontinue AML Payments to Certified States – The budget proposes to discontinue unrestricted payments to States and Tribes certified for completing their coal reclamation work. This proposal terminates all such payments, with estimated savings of approximately \$295 million over the next ten years.

Reclamation of Abandoned Hardrock Mines – To address the legacy of abandoned hardrock

mines across the U.S. and hold the hardrock mining industry accountable for past mining practices, the Department will propose legislation to create a parallel Abandoned Mine Lands Program for abandoned hardrock sites. A new AML fee on hardrock production on both public and private lands would generate an estimated \$1.8 billion to reclaim the highest priority hardrock abandoned sites on Federal, State, tribal, and private lands.

Reform Hardrock Mining on Federal Lands – Interior will submit a legislative proposal to provide a fair return to the taxpayer from hardrock production on Federal lands. The legislative proposal will institute a leasing program under the Mineral Leasing Act of 1920 for certain hardrock minerals including gold, silver, lead, zinc, copper, uranium, and molybdenum, currently covered by the General Mining Law of 1872. The proposal is projected to generate net revenues to the U.S. Treasury of \$80 million over ten years, with larger revenues estimated in following years.

Geothermal Energy Receipts – The Department proposes to repeal Section 224(b) of the Energy Policy Act of 2005. The repeal of Section 224(b) will permanently discontinue payments to counties and restore the disposition of Federal geothermal leasing revenues to the historical formula of 50 percent to the States and 50 percent to the Treasury. This results in estimated savings of \$4 million in 2015 and \$42 million over ten years.

Federal Land Transaction Facilitation Act – The Department proposes to reauthorize this Act to allow Federal lands identified as suitable for disposal in recent land use plans to be sold using this authority. The sales revenues would continue to fund the acquisition of environmentally sensitive lands and administrative costs associated with conducting the sales.

Federal Migratory Bird Hunting and Conservation Stamps – Federal Migratory Bird Hunting and Conservation Stamps, or Duck Stamps, are the annual Federal license required for hunting migratory waterfowl. The receipts generated from the sale of these \$15.00 stamps are used to acquire important migratory bird areas for migration, breeding, and wintering. The Department proposes legislation to increase these fees which have not increased since 1991, to \$25.00 per stamp per year beginning in 2015. This increase will add an estimated \$14 million for migratory bird conservation annually.

Bureau of Land Management Foundation – The budget proposes legislation to establish a congressionally-chartered National BLM Foundation. This Foundation will provide an opportunity to leverage private funding to support public lands, achieve shared outcomes, and focus public support on the BLM mission.

Recreation Fee Program – The Department of the Interior proposes to permanently authorize the Federal Lands Recreation Enhancement Act, which will expire in December 2015. The Department currently collects over \$200 million in recreation fees annually under this authority and uses them to enhance the visitor experience at Interior facilities.

Fire Suppression and the Discretionary Budget Cap

The 2015 budget proposes to amend the Balanced Budget and Emergency Deficit Control Act of

1985, as amended, to establish a new framework for funding Fire Suppression Operations to provide stable funding for fire suppression while minimizing the adverse impacts of fire transfers on the budgets of other programs, as well as reduce fire risk, manage landscapes more comprehensively, and increase the resiliency of public lands and the communities that border them. Under this new framework, the 2015 budget request covers 70 percent of the 10-year suppression average within the domestic discretionary caps and a portion is funded in a budget cap adjustment. Extreme fires requiring emergency response, fires threatening urban areas, or requirements of an abnormally high fire season, would be permitted to be funded through the adjustment to discretionary spending limits. The cap adjustment does not increase overall current spending, as it reduces the ceiling for the existing disaster relief cap adjustment.

Offsetting Collections and Fees

The budget includes the following proposals to collect or increase various fees, so industry shares some of the cost of Federal permitting and regulatory oversight.

New Fee for Onshore Oil and Gas Inspections – Through appropriations language, the Department proposes to implement an inspection fee in 2015 for onshore oil and gas activities subject to inspection by BLM. The proposed fee is expected to generate \$48.0 million in 2015, \$10.0 million more than the corresponding \$38.0 million reduction in requested appropriations, thereby expanding the capacity of BLM’s oil and gas inspection program. The fee is similar to one already in place for offshore operations and will support Federal efforts to increase production accountability, human safety, and environmental protection.

Grazing Administrative Fee – The 2015 budget proposes a new grazing administrative fee of \$1 per animal unit month. The BLM proposes to implement this fee through appropriations language on a three-year pilot basis. The provision will generate an estimated \$6.5 million in 2015 to assist BLM in processing grazing permits.

National Wildlife Refuge Damage Cost Recovery – The budget proposes appropriations language to authorize the Fish and Wildlife Service to pursue and retain recoveries from responsible parties, to be used to restore or replace damaged National Wildlife Refuge resources.

Cost Recovery for Nontoxic Shot Approvals – The budget proposes appropriations language to allow the Fish and Wildlife Service to retain and use fees collected for the review of nontoxic shot products for approval. Nontoxic shot is a substitute for lead shot, banned for waterfowl hunting since 1991.

Conclusion

Thank you for the opportunity to testify on the President’s 2015 budget request for the Department of the Interior. This budget is responsible, and proposes to maintain core capabilities with targeted investments to advance the stewardship of lands and resources, renewable energy, oil and gas development and reforms, water conservation, youth employment and engagement, and improvements in the quality of life in Indian communities. I thank you again for your continued support of the Department’s mission. I look forward to answering questions about this budget. This concludes my written statement.

U.S. Department of the Interior News Briefing for Monday, March 24, 2014

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Interior Leadership Shuffling May Allow Sen. Landrieu To Avoid Vote On Controversial Nominee.
- + Montana Areas Considered For Wilderness Designation.
- + NRA, Musicians Decry Ivory Regulations.
- + BOR Seeks To Recruit Workers For Hoover Dam.
- + Documents Sought Regarding Closures Of Private Firms During Shutdown.
- + Additional Coverage Of Expansion To California Coastal National Monument.
- + Additional Coverage Of "Champions Of Change" Award Recipients.
- + Public Involvement In The Creation of National Monuments Act Criticized.
- + Support For Proposed Organ Mountains-Desert Peaks National Monument Urged.
- + Support For Wildfire Disaster Funding Act Urged.
- + Full Funding For Land And Water Conservation Fund Urged.
- + Rep. Bishop Urged To Support Wilderness.

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + Commission Opposed To Scope Of Killdeer Mountain Battlefield Study.
- + NPS To Close Back-road Entrance To Chickamauga Battlefield.
- + Businesses Concerned About Fate Cumberland Island National Seashore Ferry.
- + NPS Holds Hearings On Proposed Sport Hunt Restrictions.
- + Blue Ridge Parkway Attractions Reopening.
- + Ten North Carolina Spots Added To National Register Of Historic Places.
- + Commissioner Criticizes Olympic National Park's Wilderness Stewardship Plan.

Bureau of Land Management:

- + Grand Canyon-Parashant National Monument Receives International Night Sky Province Designation.
- + Federal Officials Close Boat Launches On Upper Missouri.
- + Timber Industry Files Two New Lawsuits.
- + Jury Selection For New Mexico Potash Plant's Lawsuit To Begin.
- + Additional Coverage Of Proposed Montana Land Exchange.
- + Ethics Of Eliminating Wild Horses Examined.

Fish and Wildlife Service:

- + Agreement Reached To Restore Provo River Delta.
- + Ranchers Concerned About Impact Of Protecting Greater Sage Grouse.
- + FWS Allowing South Dakota Hunters To Shoot Snow Geese This Spring.
- + Wildlife Officials Investigating Death Of Second Red Wolf In 2014.

- + FWS Urged To Rewrite Proposal To Delist Gray Wolves.
- + Partnership Looks To Find Solutions To Lesser Prairie-Chicken Issue.
- + Additional Coverage Of Lawsuit Over "Sue-and-Settle" Tactics.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Interior To Evaluate Interest Developing Wave Energy Off Oregon Coast.
- + Senators Call For Renewal Of Wind Production, Investment Tax Credits.
- + New Jersey Falling Behind On Offshore Wind Energy.
- + Officials Break Ground On New Solar Project In Moapa.

Onshore Energy Development:

- + BLM Seeks Public Comment On Oil, Gas Lease Sales.

Offshore Energy Development:

- + New Emails Shed Light On Anadarko Role In BP Oil Spill.
- + New Interest In Once-Spurned Gulf Leases.

TACKLING AMERICA'S WATER CHALLENGES:

- + Morelos Dam Gates To Be Opened.
- + New Mexico Heads Into New Year Of Severe Drought.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + House To Hold Hearing On Handling Of Cobell Settlement.

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

INTERIOR LEADERSHIP SHUFFLING MAY ALLOW SEN. LANDRIEU TO AVOID VOTE ON CONTROVERSIAL NOMINEE. The Environment & Energy Publishing (3/23, 705) reports that "a major leadership shuffle at the Interior Department could help resolve a political impasse over a top nominee while aiding a key Senate Democrat's re-election campaign." The announcement that Tommy Beaudreau will become Interior Secretary Sally Jewell's new chief of staff in April "means he'll be withdrawing his nomination to become Interior's assistant secretary for policy, management and budget, the post now held by Rhea Suh." The change "means Suh could keep her job if her nomination for assistant secretary for fish and wildlife and parks remains stalled in the Senate." This would also spare Energy and Natural Resources Chairwoman Mary Landrieu "from having to cast an awkward vote in favor of Suh, whom Landrieu's political opponents are portraying as a threat to

Louisiana's energy industry, a major constituency in the Bayou State."

Also reporting on the story are the [New Orleans Times-Picayune](#) (3/23, 534K) and the [Bayou Buzz \(LA\)](#) (3/23, 4K).

Additional Coverage Of Promotion Of Beaudreau To Chief Of Staff. The [Alaska Native News](#) (3/23, 245) reports that Sen. Mark Begich released the following statement: "Tommy Beaudreau has deep Alaskan ties and continues to be a great resource to our state at the Department of the Interior. He has done good work in his current position at Interior and I am confident his knowledge of Alaska's unique conditions and needs will carry over into his new role as chief of staff. Tommy has been a fair advocate for responsible oil and gas development so I hope his influence will be broad in his new position."

Also covering the story is the [Penn Energy](#) (3/23, 128).

MONTANA AREAS CONSIDERED FOR WILDERNESS DESIGNATION. The [Helena \(MT\) Independent Record](#) (3/23, 45K) reports that "Montana's congressional delegation has two wilderness bills pending at the Capitol." The Rocky Mountain Front Heritage Act passed the Senate Energy and Natural Resources Committee and awaits a floor vote. Sen. Jon Tester's Forest Jobs and Recreation Act has also passed the Energy and Natural Resources Committee, and "would authorize 637,000 acres of new wilderness in three regions of Montana and another 360,000 acres of recreation area, combined with commitments to commercially log or thin about 100,000 acres of public land over 15 years."

NRA, MUSICIANS DECRY IVORY REGULATIONS. The [AllGov](#) (3/23, 1K) reports that new rules seeking to block the sale of ivory in the United States "have sparked outrage from a coalition of musicians, gun owners and others who say the ban unfairly restricts the sale of their own possessions that feature ivory elements." According to the article, "many owners of ivory-inlaid goods say they sympathize with the plight of the elephants, but say the regulations unfairly punish them." Interior Secretary Sally Jewell said, "We are seeing record high demand for wildlife products that is having a devastating impact, with species like elephants and rhinos facing the risk of significant decline or even extinction. A commercial ban is a critical element in the President's strategy to stop illegal wildlife trafficking and to shut down criminal markets that encourage poaching."

Hunter Files Complaint Over Seizing Of Ivory Tusks. [KXTV-TV](#) Sacramento, CA (3/22, 25K) reports that "a big-game hunter from Folsom is trying to stop the federal government from destroying a prize pair of elephant tusks." According to the article, "the tusks were taken legally during a hunting safari in Africa, but they were shipped to the US without the proper permit."

BOR SEEKS TO RECRUIT WORKERS FOR HOOVER DAM. The [Las Vegas Review-Journal](#) (3/23, 437K) reports that about two-fifths of the workforce at the Hoover Dam will be eligible to retire within five years, leaving the BOR scrambling to recruit and train skilled workers at the facility. Terry Fulp, who heads up the BOR's Lower Colorado River region said, "It's certainly something we're concerned about. We are an aging workforce. There's no doubt about it." Interior Secretary Sally Jewell noted the problem in a December speech to Colorado River water users meeting in Las Vegas. Jewell said, "That's not so good. We need to make sure that we are back-filling."

DOCUMENTS SOUGHT REGARDING CLOSURES OF PRIVATE FIRMS DURING SHUTDOWN. For the [Examiner](#) (3/23, 1.05M), Hans Bader writes that he "filed a series of Freedom of Information Act (FOIA) requests with agencies that carried out...closures" of or "blocked cases to" private business during October 2013 government shutdown. Also, he notes that House Natural Resources Committee Chairman Doc Hastings has sent letters to the FWS Director Dan Ashe and US Forest Service Chief Tom Tidwell "regarding the Obama Administration's actions to unnecessarily and arbitrarily restrict public access to wildlife refuges and Forest Service lands during the government shutdown."

ADDITIONAL COVERAGE OF EXPANSION TO CALIFORNIA COASTAL NATIONAL MONUMENT. Additional coverage of the addition of the Pt. Arena-Stornetta public lands to the California Coastal National Monument was provided by the [Santa Cruz \(CA\) Sentinel](#) (3/23, 151K).

ADDITIONAL COVERAGE OF "CHAMPIONS OF CHANGE" AWARD RECIPIENTS. Additional coverage of the

"Champions Of Change" Award recipients was provided by the [Hendersonville \(NC\) Lightning](#) (3/23).

PUBLIC INVOLVEMENT IN THE CREATION OF NATIONAL MONUMENTS ACT CRITICIZED. For the [Los Angeles Times](#) (3/21, Martelle, 2.38M), Scott Martelle criticizes the Public Involvement in the Creation of National Monuments Act According to Martelle, "the bill, House Resolution 1459, effectively strips the president's authority under the Antiquities Act of 1906 to move with speed — not Congress' strong suit — to preserve lands that are deemed of public interest." Martelle asks, "Why is Congress wasting so much time and energy on petulance, at the cost of doing something meaningful about creating jobs, fighting global warming, protecting privacy and a host of other A-level issues?"

Also criticizing the bill is Tom McKay for the [PolicyMic](#) (3/23, 229K).

SUPPORT FOR PROPOSED ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT URGED. In an op-ed for the [Las Cruces \(NM\) Sun-News](#) (3/23, 59K), Billy G. Garrett, chairman of the Doña Ana County Commission, Ken Miyagishima, mayor of Las Cruces, and Nora Barraza, mayor of Mesilla, write that "local input and extensive public dialog are primary reasons to support the proposed Organ Mountains-Desert Peaks National Monument." They argue that "the most recent monument proposal by Senators Udall and Heinrich offers a reasonable plan for the protection of our cultural history, scenic beauty and traditional land uses."

SUPPORT FOR WILDFIRE DISASTER FUNDING ACT URGED. In an op-ed for [The Oregonian](#) (3/23, 819K), Tom Insko, inland region manager of Boise Cascade company, and Mark Stern, forest conservation director of The Nature Conservancy, urges support for efforts by our Sen. Ron Wyden and Rep. Kurt Schrader "to bring a new bipartisan solution to the problem of funding forest wildfire suppression." According to the authors, "their Wildfire Disaster Funding Act (S. 1875 and H.R. 3992) would provide a reliable funding structure for the cost of suppressing the wildfires that have become all too common on federal forests throughout Oregon, without changing policies on whether or how we fight those fires."

FULL FUNDING FOR LAND AND WATER CONSERVATION FUND URGED. In an op-ed for the [Charlotte \(NC\) Observer](#) (3/22, 495K), Tim Gestwicki, CEO of the North Carolina Wildlife Federation, and Ben Gregg, Executive Director of the South Carolina Wildlife Federation, call for "full and dedicated funding" for the Land and Water Conservation Fund. According to the authors, "for the last half century LWCF has created and helped protect some of the finest recreational, historic, and public places across the country, all without using a single taxpayer dollar." They argue that "as the stewards of this remarkable inheritance, we must be vigilant in its upkeep and support full funding for LWCF, to ensure that we leave these lands in better condition than when we found them."

REP. BISHOP URGED TO SUPPORT WILDERNESS. In an editorial, the [Salt Lake \(UT\) Tribune](#) (3/23, 260K) notes that the Center for American Progress' new study "concludes that political maneuvering by Republicans in Washington has prevented passage, or even debate, on dozens of bills to create wilderness across the country." The paper argues that Rep. Rob Bishop "could be in a position to help restart the stalled process," because he "soon could become chairman of the critical House Natural Resources Committee, where conservation bills are first heard." However, "considering Bishop's history on public lands and conservation, a more sure bet is that no additional wilderness would be designated under his chairmanship." The paper argue sthat "wild lands have value beyond exploitation for energy or motorized recreation," and urges Bishop should to "protect that value, which Utah has in abundance."

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (3/24, 260K).

America's Great Outdoors:

National Park Service:

COMMISSION OPPOSED TO SCOPE OF KILLDEER MOUNTAIN BATTLEFIELD STUDY. The [AP](#) (3/23, 230K) reports that "county commissioners who represent an area in North Dakota near the historic Killdeer Mountain Battlefield say they are opposed to the scope of a study by historians." Dunn County Commissioner Daryl Dukart said that "he made the motion to get the county in front of any potential impact to its ability to develop roads or do other public work in the 17,000-acre study area."

NPS TO CLOSE BACK-ROAD ENTRANCE TO CHICKAMAUGA BATTLEFIELD. The [Chattanooga \(TN\) Times Free Press](#) (3/23, 219K) reports that NPS employees on Monday will "close a back road into Chickamauga Battlefield that they believe has served as a short-cut for thieves responsible for car break-ins and vandals who damage monuments that commemorate Civil War soldiers." Chickamauga and Chattanooga National Military Park officials have "decided to close the Long Hollow Road Extension directly west of the Wilder Brigade Monument – but the park will still allow pedestrian and bicycle access." Chickamauga and Chattanooga National Military Park Superintendent Cathy Cook said, "We've had an increase in car burglaries, so we think that's used [by burglars] as a quick access out of the park. We're [also] concerned about vandalism to the monuments."

BUSINESSES CONCERNED ABOUT FATE CUMBERLAND ISLAND NATIONAL SEASHORE FERRY. The [AP](#) (3/21, Jackson, 230K) reports that "the operating contract for the vendor who has provided the ferry service" to Cumberland Island National Seashore "for the past 25 years is about to expire, and one potential bidder wants visitors to depart to the national seashore from Fernandina Beach, Fla." According to one business owner, the change "would have a catastrophic impact on his business and others in the city dependent on Cumberland Island tourists."

NPS HOLDS HEARINGS ON PROPOSED SPORT HUNT RESTRICTIONS. The [Dutch Harbor \(AK\) Fisherman](#) (3/23, 2K) reports that the NPS "held hearings this month to gather public opinion on a few proposed restrictions to sport hunting on preserve lands in Alaska." According to spokesperson John Quinley, "the restrictions...are in response to the Alaska Board of Game offering more sport hunting effort aimed at predator control, specifically for bears, wolves, and coyotes." Quinley said, "We've asked the board to exempt national preserves from these liberalizations of hunting regulations. On more than one occasion they've suggested that if we wanted restrictions, we should do them ourselves."

BLUE RIDGE PARKWAY ATTRACTIONS REOPENING. The [AP](#) (3/23, Press, 2.33M) reports that "several Blue Ridge Parkway attractions that were closed last year because of federal budget cuts are reopening this spring." According to the article, "some of the facilities will be open on a limited basis."

TEN NORTH CAROLINA SPOTS ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [AP](#) (3/23, 65K) reports that "ten North Carolina properties and districts ranging from a cotton mill to an estate are now part of the National Register of Historic Places." The article notes that "the newly named properties include the Eureka Manufacturing Co. Cotton Mill in Lincolnton and the Flat Top Estate near Blowing Rock. Other properties are in Alamance, Brunswick, Durham, Mecklenburg, New Hanover, Nash and Henderson counties."

COMMISSIONER CRITICIZES OLYMPIC NATIONAL PARK'S WILDERNESS STEWARDSHIP PLAN. In an op-ed for the [Peninsula \(WA\) Daily News](#) (3/23, 41K), John M. Calhoun, a Port of Port Angeles commissioner, criticizes Olympic National Park's Wilderness Stewardship Plan. According to Calhoun, "the preliminary draft alternatives offered by ONP are bad news for those working to enhance tourism on the Olympic Peninsula." He also claims that "they offer nothing but the false choice between encouraging visitors to the park and saving the wilderness from the influence of mankind."

Bureau of Land Management:

GRAND CANYON-PARASHANT NATIONAL MONUMENT RECEIVES INTERNATIONAL NIGHT SKY PROVINCE DESIGNATION. The [St. George \(UT\) News](#) (3/22, 3K) reports that the Grand Canyon-Parashant National Monument was "heralded on March 21 by the International Dark Sky Association, or IDA, for the unspoiled quality of its pristine and breathtaking night skies." The monument "received the official IDA designation as 'Parashant International Night Sky Province,' joining other international Night Sky Places." BLM Principal Deputy Director Neil Komze said, "IDA's recognition is an ideal match with the Monument's focus on conserving pristine natural resources. BLM's National Conservation Lands, including the Monument, comprise a natural scientific laboratory that attracts scientists from around the world." Grand Canyon-Parashant National Monument Manager Pam McAlpin said, "We celebrate this prestigious designation which recognizes what visitors to the Monument have known and treasured since its inception – that the Parashant's flawless night skies represent another portion of the impeccable, cherished, cultural and natural resources tied directly to the management of these public lands."

FEDERAL OFFICIALS CLOSE BOAT LAUNCHES ON UPPER MISSOURI. The [AP](#) (3/21, 230K) reports that "flooding and ice jams have prompted federal officials to close most boat launches along a 149-mile stretch of the Upper Missouri River in central Montana." According to the article, "floods that began in early March pushed ice blocks up to 4 feet high into campgrounds and recreation areas overseen by the US Bureau of Land Management." BLM spokesman Jonathan Moore said Friday the "ice has blocked the launches and could delay campground openings later this spring."

TIMBER INDUSTRY FILES TWO NEW LAWSUITS. The [Salem \(OR\) Statesman Journal](#) (3/23, 104K) reports that "Oregon's timber industry has filed two new federal lawsuits, one following up on a court victory last year and the other renewing a battle the industry began two decades ago." According to the article, "both lawsuits, filed in US District Court in Washington, D.C., have the goal of forcing the Bureau of Land Management to increase logging on Oregon & California Railroad trust lands." Both lawsuits "allege the BLM has failed to carry out the 1937 O&C Act, which makes timber production a priority, said Ann Forest Burns, vice president of the American Forest Resource Council, a plaintiff in the case."

JURY SELECTION FOR NEW MEXICO POTASH PLANT'S LAWSUIT TO BEGIN. The [AP](#) (3/23, 230K) reports that "jurors will be chosen starting Monday to hear arguments in a 2010 lawsuit filed by Mosaic Potash against Devon Energy Production Co." Mosaic officials say Devon Energy "trespassed on two sections of land that fall into the boundaries of a mineral lease held by them." Mosaic claims that "despite moving the drilling location under the orders of the Bureau of Land Management, Devon still drilled in the original area."

ADDITIONAL COVERAGE OF PROPOSED MONTANA LAND EXCHANGE. Additional coverage of the proposed land exchange by brothers Dan and Farris Wilks was provided by the [Billings \(MT\) Gazette](#) (3/23, 132K).

ETHICS OF ELIMINATING WILD HORSES EXAMINED. For the Magazine of the [New York Times](#) (3/21, Klosterman, Subscription Publication, 5.41M), Chuck Klosterman argues that "wild horses have become part of the environment itself," so "horses alter the ecological landscape, but we'd be altering the landscape by eliminating the horses." Klosterman claims that "it's unethical to protect wild horses (which are currently not categorized as endangered) if our only reasoning is that we happen to like horses and believe they deserve preferential treatment." He adds that "our policy and criteria for horse populations should be the same as our policy for pronghorns or coyotes or any other mammal," and "none of these species should be radically culled unless they pose a direct threat to human well-being, which does not appear to be the case."

Fish and Wildlife Service:

AGREEMENT REACHED TO RESTORE PROVO RIVER DELTA. The [Salt Lake \(UT\) Tribune](#) (3/24, 260K) reports that "agencies plan to acquire 310 acres where the Provo River meets Utah Lake and restore braided river channels in hopes of saving the endangered June sucker, a native fish that lives in Utah Lake and its tributaries." Under a compromise local landowners reached with the Interior Department, "the preferred plan now targets a smaller tract of pasture to the north of the Robins property."

RANCHERS CONCERNED ABOUT IMPACT OF PROTECTING GREATER SAGE GROUSE. The [Bend \(OR\) Bulletin](#) (3/23, 94K) reports that "federal protection for the greater sage grouse, a chicken-sized bird found on the rangeland east of Bend, could put restrictions on ranching, which ranchers say would make doing business difficult." However, Angela Sitz, a FWS biologist and a sage grouse protection advocate, is hopeful "that a balance can be found between raising cattle and restoring sage grouse." The service has "been working with ranchers in Hamey County on managing the range for the betterment of sage grouse while keeping cattle on it, she said."

FWS ALLOWING SOUTH DAKOTA HUNTERS TO SHOOT SNOW GEESE THIS SPRING. The [AP](#) (3/23, 65K) reports that a FWS "conservation order is allowing hunters to shoot snow geese this spring." In South Dakota, the conservation order "runs from Feb. 15 through May 4, 2014." The order is "specific to snow and blue geese as well as Ross' geese."

WILDLIFE OFFICIALS INVESTIGATING DEATH OF SECOND RED WOLF IN 2014. The [AP](#) (3/21, 230K)

reports that "state and federal wildlife officials are looking into the death of a red wolf in northeastern North Carolina, the second found dead in 2014." The FWS said Friday "the radio-collared red wolf was found with an apparent gunshot wound on March 11 southwest of Creswell in Washington County."

FWS URGED TO REWRITE PROPOSAL TO DELIST GRAY WOLVES. The San Jose (CA) Mercury News (3/23, 555K), Paul Paquet, senior scientist at Raincoast Conservation Foundation, and Bob Ferris, executive director of Cascadia Wildlands, write that the UFWS has recently "shown contempt" for science and innovation "when it comes to the recovery of gray wolves." They base this "assessment" from "the peer review of the service's 2013 proposal to strip Endangered Species Act protections from most wolves in the West." The authors "wholeheartedly agree with the peer reviewers' troubling conclusions, and we are disappointed that the service pursued political expediency rather than abiding by the lawful provisions of the ESA."

For "The Blog" of the Huffington Post (3/21, Peterson, 11.54M), novelist Brenda Peterson criticizes the proposal to delist gray wolves.

PARTNERSHIP LOOKS TO FIND SOLUTIONS TO LESSER PRAIRIE-CHICKEN ISSUE. In an op-ed for the Juneau County (WI) Star Times (3/23, 9K), Robert Bonnie, Agriculture Under Secretary for Natural Resources and Environment, writes that "as part of the Natural Resources Conservation Service Lesser Prairie-Chicken Initiative, the agency is partnering with Pheasants Forever, a national wildlife conservation organization, to jointly invest \$5 million over three years to support technical assistance, including hiring non-federal field conservationists to help farmers and ranchers voluntarily maintain and improve lesser prairie chicken habitat in the Southern Great Plains." Also, Bonnie notes that the Conservation Service and the FWS "recently finalized a plan that can provide regulatory predictability for farmers and ranchers improving lesser prairie-chicken habitat, should the species be listed as threatened or endangered under the Endangered Species Act." According to Bonnie, "the partnership between the US Fish & Wildlife Service, Pheasants Forever, state fish and wildlife agencies and others is will provide crucial tools and resources for voluntary conservation on lands that can benefit the lesser prairie-chicken."

ADDITIONAL COVERAGE OF LAWSUIT OVER "SUE-AND-SETTLE" TACTICS. In an editorial, the Oklahoman (3/24, 387K) calls the lawsuit "a worthy fight." According to the paper, "if nothing else," the lawsuit "highlights the complete absence of logic involved when federal officials make far-reaching regulatory decisions."

Additional coverage of the lawsuit filed over "sue-and-settle" tactics was provided by Marita Noon in the Town Hall (3/23, 44K).

Securing America's Energy Future:

Renewable Energy:

INTERIOR TO EVALUATE INTEREST DEVELOPING WAVE ENERGY OFF OREGON COAST. The Environment & Energy Publishing (3/23, 705) reports that the Interior Department has "announced it will evaluate whether there's competitive interest in developing federal waters off the Oregon coast where a university is proposing to test wave energy." The BOEM is "allowing one month to gauge public interest in the waters about 5 miles off Newport, Ore., as well as the proposal's potential environmental impacts." BOEM Director Tommy Beaudreau said in a statement, "Today's announcement marks an important milestone in siting a national grid-connected research facility to support the testing of commercial-scale marine hydrokinetic devices. We look forward to our continuing partnership with Oregon and key stakeholders to support the advancement of promising offshore renewable energy technologies."

Also reporting on the story are the FuelFix (3/21, 7K) and the reNews (3/23).

SENATORS CALL FOR RENEWAL OF WIND PRODUCTION, INVESTMENT TAX CREDITS. Roll Call (3/22, Lesniewski, 67K) reported that 26 senators sent a letter to Finance Chairman Ron Wyden and Orin G. Hatch calling the renewal of the wind production tax credit and the investment tax credit. The senators wrote that "the American wind industry's growth, its cost competitiveness and its creation of American jobs have been partially driven by successful, bi-partisan federal tax policy, namely the PTC and the ITC," arguing that without stability

"we once again risk losing many of the jobs, infrastructure and investment that the wind industry has created."

The Hill (3/22, Cama, 76K) also reports the story in its "E2 Wire" blog.

NEW JERSEY FALLING BEHIND ON OFFSHORE WIND ENERGY. The Press of Atlantic City (NJ) (3/23, 178K) reports that New Jersey "may have missed being a national leader in offshore wind energy as neighboring states move forward with their projects." According to the article, "despite Gov. Chris Christie's signing of legislation in 2010 that would have positioned the state as a hub for the new industry — complete with a port on the Delaware River where windmill components would be developed — the state is no closer to its goal of generating 1,100 megawatts per year from wind farms off its coast." Advocates "blame the state's flagging resolve — the energy market for the new industry has yet to be established — and the rise of inexpensive natural gas from fracking in neighboring states."

OFFICIALS BREAK GROUND ON NEW SOLAR PROJECT IN MOAPA. KTNV-TV Las Vegas (3/23, 19K) reports that "energy industry leaders broke ground on Friday on the 250 Megawatt solar project in Moapa." The article notes that "the project is the first ever utility-scale solar power plant to be built on tribal land. It's being constructed on the Moapa River Indian Reservation." Officials from the Department of Energy, the BLM and the BIA, along with Nevada Senator Harry Reid participated in the event.

Onshore Energy Development:

BLM SEEKS PUBLIC COMMENT ON OIL, GAS LEASE SALES. The St. George (UT) News (3/22, 3K) reports that the BLM, Utah West Desert District, is seeking public input on "two environmental assessments (EA) analyzing the BLM's proposal to offer a total of 66,673 acres comprised of 35 parcels at the August 2014 oil and gas lease sale." The article notes that "the Salt Lake Field Office proposes to offer 64,610 acres comprised of 33 parcels and the Fillmore Field Office proposes to offer 2,063 acres comprised of two parcels."

Offshore Energy Development:

NEW EMAILS SHED LIGHT ON ANADARKO ROLE IN BP OIL SPILL. Bloomberg News (3/22, Feeley, Calkins, 392K) reports that the DOJ lost its effort to have US District Judge Carl Barbier in New Orleans to consider emails from Anadarko calling on BP to drill deeper into the Macondo well, even after the latter said that proceeding would not be safe in recently divulged emails. Judge Barbier stated that the emails did not show that Anadarko faced any "heightened culpability" for the 2010 oil spill, given the "lack of direct operational involvement." Anadarko is still potentially liable under the Oil Pollution Act and the Clean Water Act, and the technical details, as well as concerns over safety, revealed in the email shows "Anadarko was more than just a passive investor," according to David Uhlmann, a University of Michigan law professor and former head of the Justice Department's environmental crimes division. Anadarko has already paid \$4 billion for its liability in private-party suits.

NEW INTEREST IN ONCE-SPURNED GULF LEASES. Starr Spence writes in Platts (3/24, 2K) "Barrel Blog" that while recycling in Gulf of Mexico leases "is nothing new," bids on abandoned leases there have been at "premium prices in recent years," well above the prices previously paid for those tracts. Furthermore, operators sometimes are bidding on tracts they previously leased. Charlie Miller, chief technology officer with offshore consultants Waring & Associates, said that previously unseen targets could be revealed by improved seismic data. Spence goes on to detail some of these bids.

Tackling America's Water Challenges:

MORELOS DAM GATES TO BE OPENED. The National Geographic (3/23, 42.25M) reports that "thanks to a landmark agreement between the United States and Mexico, the parched Colorado River Delta will get a rejuvenating shot of water this spring for one of the first times in five decades, just in time for World Water Day on March 22." The article notes that "on March 23, 2014, the gates of Morelos Dam on the Arizona-Mexico border will be lifted to allow a 'pulse flow' of water into the final stretch of the Colorado River." According to the article, "officials and scientists hope the water will help restore a landscape that has long been arid but that once supported a rich diversity of life."

NEW MEXICO HEADS INTO NEW YEAR OF SEVERE DROUGHT. The AP (3/21, Bryan, 230K) reports that the worst-case drought scenario – dry March winds – is eating into New Mexico's already meager snowpack, state and federal officials were told at a Friday meeting of the state's Drought Monitoring Working Group. Raymond Abeyta with the BOR, said, "It's terrible. We're looking at the snowpack levels and they're just blowing away. What has us concerned is the soil moisture levels." However, the drought team also heard the first good news in a while – the growing chance of an El Niño, a shift in the weather patterns that could finally bring a wetter winter of 2014-15.

Also reporting on the story is the Albuquerque (NM) Journal (3/23, 281K).

Empowering Native American Communities:

HOUSE TO HOLD HEARING ON HANDLING OF COBELL SETTLEMENT. KHQ-TV Spokane, WA (3/23, 30K) reports that the House Natural Resources Subcommittee on Indian and Alaska Native Affairs will hold a hearing on April 3 to see how the Interior Department is handling the Cobell Settlement. Rep. Steve Daines said that "the government has been slow to implement the settlement and Montana's Native American tribes deserve more." Daines said, "Our Montana tribes deserve transparency from the Department of Interior as it relates to this land buyback program and how it is being implemented."

Top National News:

IN TRIP TO EUROPE, OBAMA TO SEEK UNITED FRONT AGAINST RUSSIA. As President Obama heads to Europe, media reports cast his talks with European allies this week as an attempt to forge a united front against Russia in the wake of its annexation of Crimea. Coverage of the crisis in Ukraine, meanwhile, continues to dwindle. Only one of the two networks that aired Sunday night mentioned the President's trip. Print coverage is also lighter than it was in weeks past. Reports this morning focus largely on Russia's capture of a Ukrainian military base in Crimea, and on a NATO general's warning that Russia also poses a threat to Moldova's breakaway region of Transnistria.

Alex Marquardt reported on ABC World News (3/23, story 7, 1:40, Muir, 7.43M) that the President is traveling to Europe "looking to form a united economic front against Russia and to comfort Eastern European allies, nervous" that Russian President Vladimir Putin "isn't finished yet." While top Russian officials, including Putin, "have repeatedly insisted they have no plans to invade eastern Ukraine," after "Russia's takeover here in Crimea, there is very little trust between Washington and Moscow."

The New York Times (3/24, Shear, Smale, Herszenhom, Subscription Publication, 5.41M) similarly says the President and the US' allies in Europe will meet in The Hague "in an effort to develop a strong, united response despite their diverging interests in dealing with the Kremlin." National security adviser Susan Rice "acknowledged that the president's weeklong trip...would be overshadowed by Ukraine," but "expressed confidence" that the G7 meeting on Monday would "deepen" coordination. The Times, however, says "it may be difficult for Mr. Obama to bring along European allies."

The Washington Post (3/24, Wilson, 2.33M) quotes Rice as saying, "What will be clear for the entire world to see is that Russia is increasingly isolated and that the United States is leading the international community in supporting the government of Ukraine and the people of Ukraine, and in imposing costs on Russia for its aggression against Ukraine."

Bloomberg News (3/24, Krasnolutska, Kudrytski, 392K) reports G7 leaders are "seeking to mobilize opposition to Russia's incursion into Crimea," and Reuters (3/24, Pawlak) says they will seek to coordinate possible additional sanctions against Russia, as well as discuss an upcoming G8 meeting planned for June in Sochi, Russia.

The President, Politico (3/24, Harris, 73K) reports, has made "a series of statements and warnings, combined with economic sanctions, designed to show how seriously he takes Putin's incursion," but he "risks looking irrelevant unless he follows up this week with even more dramatic gestures."

Josh Gerstein writes in another piece for Politico (3/24, 73K) that Obama's "official dealings with Europe have been surprisingly rocky," and "it's unclear how much the US and Obama really value the European Union as an institution to begin with."

Deputy national security adviser Tony Blinken, the AP (3/24) reports, didn't rule out Sunday the possibility that Russia could invade eastern Ukraine. Blinken told CNN's "State of the Union" that "Russia seems to be trying intimidate Ukrainians by massing thousands of troops along the border," saying, "It's possible they are preparing to move in."

Blinken said on CNN's State Of The Union (3/23, Crowley), "It's deeply concerning to see the Russian troop buildup along the border. It creates the potential for incidents, for instability. It's likely that what they are trying to do is intimidate the Ukrainians. It's possible that they are preparing to move in. ... And what we've seen the President do in recent weeks, and what we'll see him do this week, is bring the world together in support of Ukraine."

ABC World News (3/23, story 7, 1:40, Muir, 7.43M) reported that "around 20,000 Russian troops have massed along the border with eastern Ukraine. Ukraine's acting foreign minister" told ABC's "This Week" that the "chances of war are very high." Foreign Minister Andrii Deshchytzia was shown saying, "We don't know what Putin has in his mind and what will be his decision. That's why this situation is becoming even more explosive than it used to be a week ago."

Deshchytzia said on ABC's This Week (3/23, Raddatz, 2.73M), "We are very much concerned about this development and deployment of Russian troops on our eastern borders. We are ready to respond. And as you know, the Ukrainian government is trying to use all their peaceful means and diplomatic means to stop Russians. But the people are also ready to defend their homeland."

Bloomberg News (3/24, Lerman, 392K) and the New York Daily News (3/24, Edelman, 3M) also report the comments by Blinken and Deshchytzia.

Over the weekend, the Washington Post (3/24, Morello, Englund, 2.33M) reports, "Russian forces in armored personnel carriers...broke through the walls of one of the last Ukrainian military outposts in Crimea, then quickly overpowered Ukrainian troops armed only with sticks." According to the Post, the "fall of the Belbek air base, along with the loss of a second Ukrainian air base Saturday near the Crimean town of Novofedorivka, removed one of the last barriers to total Russian control of the Crimean Peninsula."

The AP (3/24, Heintz) reports that Col. Yuliy Mamchur, commander of the Belbek Air Force base, is "being held...by pro-Russian forces," and Ukraine President Oleksandr Turchynov called for his release Sunday. The Los Angeles Times (3/24, Loiko, 2.38M) also reports on Col. Mamchur's capture.

The Wall Street Journal (3/24, Shishkin, Subscription Publication, 4.25M) reports on the non-violent vigils by Ukrainian troops stationed in Crimea, noting that one by one their bases are being overrun by Russian troops. And AFP (3/24, Trukhan) reports that Tatars have begun fleeing Crimea since Russia's annexation.

Another Wall Street Journal (3/24, Norman, Subscription Publication, 4.25M) report notes NATO's supreme allied commander, US Air Force Gen. Philip Breedlove, warned Sunday that Russia's "very sizeable" force positioned along Ukraine's eastern border that could easily seize Moldova's breakaway region of Transnistria.

The Washington Post (3/24, Morello, DeYoung, 2.33M) reports that both US and Ukrainian officials warned Sunday that Russia "may be poised to expand its territorial conquest into eastern Ukraine and beyond." The Post notes comments Sunday by Ukraine's Deshchytzia and Gen. Breedlove, who it quotes as saying, "There is absolutely sufficient force postured on the eastern border of Ukraine to run to Transnistria if the decision was made to do that, and that is very worrisome." Such a move, the Post says, "would mark an extraordinary deepening of Russia's military thrust into former Soviet territory and sharply escalate tensions with the West."

Breedlove, Bloomberg News (3/24, Wishart, 392K) reports, said, "We need to think about our allies, the positioning of our forces in the alliance and our readiness of our forces in the alliance, such that we can be there to defend against them if required." USA Today (3/24, Bacon, 5.82M) and the Christian Science Monitor (3/24,

Murphy, 384K) also report Gen. Breedlove's comments.

Elsewhere on Sunday, AFP (3/24) reports, Putin and German Chancellor Angela Merkel "voiced their support for an OSCE observer mission to Ukraine, in a telephone conversation on Sunday, the Kremlin said." Reuters (3/24, Gutterman) notes that Russia agreed Friday to a six-month OSCE mission in Ukraine, but said it had no mandate in Crimea. Germany, however, rejected Russia's assertion.

The New York Times (3/24, Smale, Subscription Publication, 5.41M) reports that OSCE monitors have begun "assembling" in Kiev and "will start fanning out across the troubled region on Tuesday, a spokeswoman said Sunday."

German Foreign Minister Frank-Walter Steinmeier, the Wall Street Journal (3/24, Torry, Subscription Publication, 4.25M) reports, also warned Sunday that Russia faces additional sanctions if it moves into eastern Ukraine or other parts of the former Soviet Union. "We're not at that point [of annexations of further regions] and I hope that it won't come to that, but one thing is clear: should Russia reach beyond Crimea, we in Europe will pass decisive measures—even if we have to accept economic damage for that," Steinmeier said in an interview with Germany's Welt am Sonntag.

In a column in the Washington Post (3/24, 2.33M), Fred Hiatt writes that the invasion of Crimea "is not Obama's fault," but it shows that this is not the world Obama expected to deal with when he was elected. The President's policies pulled back from foreign intervention and focused on domestic improvements, but, "as the United States retrenched, the world became more dangerous," with a Chinese military buildup, continued North Korean nuclear buildup, and the Syrian civil war. Hiatt warns that while the Administration may be tempted to continue its current strategy in response to political opponents seeking to "use overseas setbacks to score points," the US no longer can "choose between nation-building at home and leadership abroad; it has to do both."

In an op-ed in the New York Times (3/24, McFaul, Subscription Publication, 5.41M), former Ambassador Michael A. McFaul writes that the invasion of the Crimea ended the post-Cold War era in Europe and the sense the Russia was moving towards joining the international order. Based on the previous conflict with Moscow, McFaul urges "selective containment and engagement." McFaul calls for making sure Ukraine succeeds as "a democracy, a market economy and a state"; militarily protecting other states on our side; and isolating Russia. While Putinism doesn't have international appeal, Russia lacks allies, and its military is reduced, the US is currently disengaged in world affairs and lacks the moral authority it had before the invasion of Iraq. McFaul calls for restoring "the United States as a model" and using "a sober, realistic strategy" to deal with Russia.

NYTimes Analysis: US Now Trying To Counter Putin, Rather Than Work With Him. In an analysis piece titled "3 Presidents And A Riddle Named Putin," Peter Baker writes for the New York Times (3/24, Subscription Publication, 5.41M) that former Presidents Bill Clinton and George W. Bush, and now President Obama have tried varying approaches to dealing with President Vladimir Putin, but the Russian leader has "confounded" all three American presidents "as they tried to figure him out, only to misjudge him time and again." After Russia's annexation of Crimea, Baker says, the debate has "shifted from how to work with Mr. Putin to how to counter him."

MILLIONS WILL REMAIN UNINSURED DESPITE ACA ENROLLMENT PUSH. The AP (3/24, Cass) reports that despite this week's "final, frenzied push" to enroll people for health coverage under the ACA, millions of people "will remain uninsured." Many, the AP notes, "just don't know much about the health overhaul and its March 31 deadline for enrolling in plans that can yield big discounts, researchers say." According to an Associated Press-Gfk poll, "only one-fourth of the uninsured had tried to sign up through the state or federal insurance marketplaces." However, "the complexities of the Affordable Care Act can stymie even the well-informed." The AP provides several examples of people "who will remain on the sidelines of Obama's big enrollment push."

Fear Of Financial Penalty Could Be Motivating Late ACA Enrollments. The Wall Street Journal (3/24, Radnofsky, Subscription Publication, 4.25M) reports that concerns about financial penalties appear to be motivating many people to enroll for coverage as the final deadline to sign up approaches. The Journal notes that polls indicate that people are more familiar with the potential penalties than other features of the law, and pollsters have said that enrollment could be stronger if groups made explicit mention of the penalty.

Analysts Say Few Will Use ACA's Hardship Exemption. The Washington Times (3/24, Klimas, 230K) reports that while Republicans have "seized on a new hardship exemption to Obamacare, saying it punches a hole in President Obama's health law," analysts "expect relatively few people to actually use it." The exemption "excuses Americans from the individual mandate requiring them to have health coverage if they 'experienced another hardship in obtaining health insurance.'" The Times notes that House Majority Leader Cantor said that the exemption's "loose wording essentially excludes everyone from the individual mandate." Despite "analysts' assurances that the exemption would be limited, Mr. Cantor stood by his claim it could apply to almost everyone."

SUPREME COURT TAKES UP KEY ACA CHALLENGE THIS WEEK. The AP (3/24, Reilly, 11.54M) reports that the Obama Administration "and its opponents are renewing the Supreme Court battle over" healthcare reform "in a case that pits the religious rights of employers against the rights of women to the birth control of their choice." The court will hear arguments on Tuesday "in a religion-based challenge from family-owned companies that object to covering certain contraceptives in their health plans as part of the law's preventive care requirement." Under the ACA, employers must offer healthcare plans offering a range of services at no extra cost, "including all forms of birth control for women that have been approved by federal regulators." The AP notes that the firms involved in the cases at bar "are willing to cover most methods of contraception, as long as they can exclude drugs or devices that the government says may work after an egg has been fertilized."

The Christian Science Monitor (3/24, Richey, 384K) reports that the court "is set to hear two consolidated cases in which business owners are seeking a religious exemption from the ACA's requirement that large employers provide their workers cost-free contraceptives." The Monitor notes that the Administration "has granted a complete exemption to churches and other houses of worship," and "has offered a special accommodation to non-profit religious-affiliated groups – including those organized as corporations," but government attorneys "insist that for-profit corporations are not entitled to exercise religious rights and must comply with the full terms of the ACA's contraception mandate."

The Washington Times (3/24, Howell, 230K) reports that that court "consolidated two cases for Tuesday's arguments, with each side chalking up a win at the circuit court level." Hobby Lobby, "an Oklahoma-based crafts supplies company, found favor before the 10th U.S. Circuit Court of Appeals in Denver last summer, but the government trumped Conestoga Wood Specialties – owned by Mennonites in Pennsylvania – before the 3rd Circuit in Philadelphia."

Personal Religious Views Of Justices Examined. The Washington Post (3/24, Barnes, 2.33M) reports on its front page that the court this week "weighs religious conviction versus legal obligation in the latest challenge to the Affordable Care Act." Chief Justice John Roberts and Justice Samuel Alito "are devout Catholics" and Justice Clarence Thomas "is a former seminarian who says God saved his life." Justice Antonin Scalia "is the most outspoken," as he has "urged fellow intellectuals to be 'fools for Christ' and used an interview last fall to underscore his belief in the existence of the Devil, whose latest maneuver, he said, 'is getting people not to believe in him or in God.'" Justice Elena Kagan, "not religious like the others, nonetheless has reminded Jewish groups she undertook years of three-days-a-week religious instruction as a child." The Post notes that the current court has "six Catholics and three Jews," and "is the first without a Protestant member."

Cases Discussed On Sunday Shows. Rep. Tom Cole (R-OK) said on ABC's This Week (3/23, Raddatz, 2.73M) that the cases were "about the free exercise of religious beliefs in your business. They follow these precepts in terms of not opening their businesses on Sunday, that sort of thing. ... I think they have a strong argument. They won at the district level. I think they'll win at the Supreme Court."

Rep. Keith Ellison (D-MN) said on ABC's This Week (3/23, Raddatz, 2.73M), "Do we want a corporation to have religious views and impose them on its employees? What would that mean for the separation of church and state and for individual liberty? What would it mean about corporate personhood? This is scary territory and the people need to win."

Dan Senor said on ABC's This Week (3/23, Raddatz, 2.73M), "I think the Administration's case is weak and I think it has enormous political implications. If Hobby Lobby chooses to avoid providing this coverage for four contraceptives out of the 20 they are required to, they will get fines of half a billion dollars a year. ... All the selective implementation of ObamaCare combined with huge fines for business that are actually employing

Americans, I think is terrible for the overall debate over ObamaCare.”

More Commentary. In an op-ed for the Wall Street Journal (3/24, Subscription Publication, 4.25M), Robert P. George, a professor of jurisprudence at Princeton University and a board member of the Becket Fund for Religious Liberty, which is representing Hobby Lobby, and Hamza Yusuf, co-founder and president of Zaytuna College in Berkeley, CA, write that the religious exemptions in the ACA are vital to the protection of religious liberty, and they urge the court to side with the challengers in these cases.

In an op-ed for the Washington Post (3/24, 2.33M), attorney Walter Dellinger writes that the cases “implicate equality of access to effective methods of family planning,” and he argues that the court has ruled “that any accommodation of religion ‘must be measured so that it does not override other significant interests,’ especially those of third parties.” Dellinger contends that giving “legal force to corporations’ objections to covering the use of contraceptives by their employees would deny to thousands of women affordable access to the most effective methods of birth control – a benefit that those women, or the female dependents of employees, earn as part of their employment compensation package.”

Editorial Wrap-Up:

NEW YORK TIMES. “Willfully Endangering Drivers.” The New York Times (3/24, Subscription Publication, 5.41M) editorializes that the delayed recalls “of millions of defective cars by Toyota and General Motors put the American public at risk and shows glaring deficiencies in enforcement of auto safety regulations.” Toyota last week agreed to pay \$1.2 billion “to settle a four-year-long federal criminal investigation that found the company had concealed information from regulators and the public in 2009 and 2010 about” a sudden acceleration defect, and GM “recently recalled 1.6 million cars to replace ignition switches that the company, for more than a decade, knew to be faulty.” The Times notes that Congress failed in 2010 to pass the Motor Vehicle Safety Act, “a sensible measure” that faced “opposition from the auto industry and Republican lawmakers” that would have given the National Highway Traffic Safety Administration greater power to investigate auto defects and make that information publicly available. The Times urges Congress to give NHTSA the resources it needs to police automobile safety.

“Urbanizing China.” An editorial in the New York Times (3/24, Subscription Publication, 5.41M) note that while China’s plan “to move more people from the countryside to cities could help raise the standard of living for millions of people,” it “does not go far enough to protect migrants and farmers.” The Times argues that China’s urbanization plan is “intriguing,” but China “has a lot more work to do to make sure its ideas are designed and carried out in ways that benefit its people.”

WASHINGTON POST. “A 21st-Century D.C.” In an editorial, the Washington Post (3/24, 2.33M) bemoans the unanimous vote by the DC city council to oppose raising the “Height Act,” which limits the size of buildings in DC. The Post says that the city is expanding, and lacks sufficient affordable housing, and the “obvious answer is to let the city become denser, with care to ensure that it is walkable and bikeable, allowing more people to live and work where and how they want to.”

“The Tarnished Silver Line.”

WALL STREET JOURNAL. “ObamaCare’s Latest Legal Challenge.” The Wall Street Journal (3/24, Subscription Publication, 4.25M) editorializes that the DC Circuit Court of Appeals on Tuesday will hear another ACA challenge in *Halbig v. Sebelius*, in which the plaintiffs are asking the court to order the Obama Administration to execute the plain language of the statute with regard to insurance exchanges. The Journal notes that the best way to change the ACA is through congressional action, but it urges the court to remind the Administration that it must stick to the language of the statute as enacted.

“California’s Pension Mugging.” In an editorial, the Wall Street Journal (3/24, Subscription Publication, 4.25M) bemoans the demise of a California ballot measure designed to allow municipalities to limit pension reforms. The measure was proposed by San Jose Mayor Chuck Reed (D), but he dropped the measure after state Attorney General Kamala Harris wrote the language for the measure in a manner that Reed viewed as designed to make it unpalatable. The Journal says that the major impact is that Democratic politicians in the state are suborning the

ballot initiative process to protect their interests and allies.

DOI in the News:

SECRETARY JEWELL TO DEFEND INTERIOR BUDGET BEFORE HOUSE AND SENATE PANEL. The [Environment & Energy Publishing](#) (3/25, 705) reports that Interior Secretary Sally Jewell "this week will defend her agency's \$11.9 billion fiscal 2015 budget before the House and Senate in hearings sure to spark debate over the Obama administration's energy and conservation agendas." Jewell will appear on Tuesday before the House Interior, Environment and Related Agencies Appropriations Subcommittee, and on Wednesday "before the Senate panel of the same name." according to the article, "both hearings will give lawmakers a chance to debate an Interior budget that's heavy on conservation and that contains familiar, but so far unsuccessful, proposals to raise \$2.5 billion in new fees from oil and gas and mining on federal lands."

King Cove Residents To Attend Senate Appropriations Meeting. [KUCB-FM](#) Unalaska, AK (3/25) reports that "ever since the Interior Department turned down a request to build a road through a federal wildlife refuge in December, the village of King Cove has been lobbying hard to keep the proposal alive." According to the article, "a group of King Cove residents and tribal officials" have "traveled to the nation's capital so they can attend a Senate appropriations meeting on Wednesday." Sen. Lisa Murkowski said she will "grill" Interior Secretary Sally Jewell about the proposed road.

Additional Coverage. Additional coverage was provided by the [Nation Sun News](#) (3/25), the "In The Loop" blog of the [Washington Post](#) (3/24, Itkowitz, 2.33M), the "E2 Wire" blog of [The Hill](#) (3/25, 76K), the "E2 Wire" blog of [The Hill](#) (3/25, 76K), and [Bloomberg News](#) (3/24, 392K).

GROUP LAUNCHES ADS AGAINST BILL SEEKING TO LIMIT NATIONAL PARK DESIGNATIONS. In its "E2 Wire" blog, [The Hill](#) (3/25, 76K) reports that the League of Conservation Voters "launched ads on Monday urging lawmakers to vote against a bill seeking to limit national monument declarations." The group "launched the web ads pressing 18 Republican and Democratic members of Congress spanning 12 states to vote no on Rep. Rob Bishop's (R-Utah) bill, H.R. 1459, which will head to the House floor on Wednesday." The conservation group claims "the bill creates unnecessary red tape that prevents new parks from being created."

Additional coverage was provided by the [International Business Times](#) (3/25, 496K) and the [Huffington Post](#) (3/25, Sheppard, 11.54M).

ADDITIONAL COVERAGE OF REPORT ON LAND CONSERVATION BILLS. Additional coverage of the report released by the Center for American Progress on ten stalled land conservation bills was provided by the [Twin Falls \(ID\) Times-News](#) (3/25, 56K).

America's Great Outdoors:

National Park Service:

NPS LAUNCHES NEW WEBSITES FOR 2016 CENTENNIAL. [The Oregonian](#) (3/25, 819K) reports that the NPS will "make the centerpiece of its 2016 Centennial a broad public engagement campaign to reintroduce the work of the National Park Service to a new generation of Americans, according to the park service's partner, the National Park Foundation." According to the article, "the two-year effort will begin in 2015 and run throughout the National Park Service's 100th anniversary year in 2016." Also, the NPS and National Park Foundation "both launched Centennial web pages today, the start of a robust communications effort that will kick into high gear in early 2015 across all digital platforms to invite engagement in Centennial activities."

The [AdWeek](#) (3/25, 399K) reports that the NPS has updated its log. According to the article, "it's all part of a new campaign rolling out in the next two years called 'Find Your Park,' meant to expose the national park system to millennials and multicultural communities." NPS Director Jonathan Jarvis said, "The centennial is the perfect time to completely align our two organizations, and with partners throughout the parks community, introduce—or reintroduce—the national parks and the National Park Service's work with communities to every American."

NPS GIVING MONEY TO PAIR OF WEST MICHIGAN PARKS. The [AP](#) (3/25) reports that the NPS is "giving money to a pair of West Michigan parks to increase accessibility for people living with disabilities and expand and improve facilities." According to the article, "the funding for Cutler Park in Byron Center and Meinert Park in Muskegon was recently announced by U.S. Sens. Debbie Stabenow and Carl Levin." The article notes that "the \$98,785 for Cutler Park and the \$31,284 for Meinert Park are courtesy of the National Park Service's Land and Water Conservation Fund."

BILL WOULD GIVE MAINE LEGISLATURE LAST WORD ON ALLOWING ANOTHER NATIONAL PARK. The [Bangor \(ME\) Daily News](#) (3/24, 166K) reports that "new legislation put forward by Gov. Paul LePage appears to take aim at proponents of a national park in Maine by giving the Legislature final say on large federal projects that would require the acquisition of state land." Rep. Doug Thomas, who is sponsoring "An Act To Limit Consent Regarding Land Transfers to the Federal Government," said "the bill would require state approval for federal projects exceeding 5 acres." The legislation "amends the blanket consent the state allows the federal government to acquire lands required for government purposes."

CHERRY BLOSSOMS ENTER SECOND STAGE OF DEVELOPMENT. In its "Going Out Guide" blog, the [Washington Post](#) (3/24, Ely, 2.33M) reports that the peak bloom of the cherry blossoms is a little more than two weeks away, according to the NPS. The trees are now in their second stage of bud development.

Also reporting on the story is [WJLA-TV Washington](#) (3/25, 118K).

YELLOWSTONE DECIDES AGAINST USING "BIOBULLETS" FOR BISON. The [AP](#) (3/25) reports that the NPS has "decided against shooting wild bison with vaccine-laced 'biobullets' to prevent the spread of an animal disease." NPS Regional Director Sue Masica "signed a record of decision earlier this month that leaves in place

the occasional syringe vaccination of bison calves and yearlings that are captured outside the northern boundary of the park."

Also reporting on the story is the [Casper \(WY\) Star-Tribune](#) (3/25, 90K).

OLYMPIC NATIONAL PARK'S ENCHANTED VALLEY CHALET ENDANGERED BY EROSION. The [AP](#) (3/25, Ollikainen) reports that "a four-foot section of the iconic Enchanted Valley Chalet hangs precariously over the bank of the East Fork of the Quinault River in the heart of Olympic National Park." Park officials said "there is little they can do to protect the 84-year-old structure against the forces of nature because of its remote location within a designated wilderness." Olympic National Park Superintendent Sarah Creachbaum said, "Within what is technically and economically feasible, we continue to do our very best to protect the area's natural and cultural resources and its wilderness character. Our options are limited, however, given the size and force of the river and the valley's remote location within the Olympic wilderness."

Also reporting on the story is [The Oregonian](#) (3/25, 819K).

BURNSIDE BRIDGE REOPENS. The [AP](#) (3/24) reports that the NPS says "a stone bridge that played a key role in the Civil War Battle of Antietam near Sharpsburg has reopened to pedestrians after a two-month closure." Battlefield Superintendent Susan Trail said Monday that "a chain-link fence running down the center of Burnside Bridge will keep people away from the damaged wall on the upstream side." Trail said "repairs and an engineering assessment will begin in April."

NPS CLOSING TUNNEL ALONG MEADOW RIVER. The [AP](#) (3/25) reports that the NPS says "a tunnel along the Meadow River isn't safe and will be closed." The agency said Monday that "an inspection last fall found that the Camifex Tunnel's "ceiling is crumbling."

EVERGLADES NATIONAL PARK SUPERINTENDENT RETIRING. The [AP](#) (3/25) reports that Dan Kimball, Everglades National Park's superintendent, will be "retiring this month after three decades in the National Park Service." The deputy director of the park service's southeast region will serve as acting superintendent.

ZION NATIONAL PARK FINDS BODY OF MISSING BASE JUMPER. The [AP](#) (3/24) reports that The body of a missing BASE jumper has been found in Zion National Park, officials said Monday. It is the second such fatality in the park in just over a month and the third in Utah in two months.

Also reporting on the story are the [Los Angeles Times](#) (3/24, Muskal, 2.38M) and [Reuters](#) (3/25, Dobner).

SIX NEW SITES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The [AP](#) (3/25) reports that Beattie's Prairie, "a site where Cherokee Indians disbanded following the Trail of Tears," is "among six new properties on the National Register of Historic Places." The other sites are the Logan Apartments in Norman, the Woodward Park and Gardens Historic District in Tulsa, Bartlesville's Washington County Memorial Hospital, the Masonic Temple and the First Methodist Episcopal Church, both in Muskogee.

FORMER NEW JERSEY GOVERNORS WARN OF THREAT TO THE PALISADES. In an op-ed for the [New York Times](#) (3/25, Byrne, Kean, Florio, Whitman, Subscription Publication, 5.41M), Brendan T. Byrne, Thomas H. Kean, James J. Florio, and Christine Todd Whitman, all former governors of New Jersey, warn that the Palisades are "under threat" by plans from consumer electronics maker LG Electronics USA "to construct a towering headquarters building along the Hudson River north of the George Washington Bridge, breaking the natural sweep of parkland and scenic vistas." They argue that "the project would set an unfortunate precedent for the construction of more high-rises along the ancient cliffs." The authors note that they "not alone in calling for LG to choose a low-rise design." Notably, NPS Director Jonathan B. Jarvis "recently wrote to the planning board in Englewood Cliffs that LG's plan 'threatens the nationally significant, historic scenic integrity of the Palisades in a major way' and would 'introduce a massive incompatible feature that will be visible for miles along the river.'"

Bureau of Land Management:

BLM RELEASES MANAGEMENT PLAN FOR COLORADO RIVER VALLEY. The [Glenwood Springs \(CO\) Post](#)

Independent (3/25, 27K) reports that the BLM on Monday "released its proposal for the first revision of the Resource Management Plan for the Colorado River Valley in 30 years." According to the article, "the plan will eventually guide management decisions on 505,200 surface acres and 707,200 acres of subsurface mineral estate administered by the BLM's Colorado River Valley Field Office in Eagle, Garfield, Mesa, Pitkin, Rio Blanco and Routt counties for about two decades." Steve Bennett, field manager for the Colorado River Valley Field Office in Silt, said, "The extensive involvement from the public as well as our local, state and federal cooperating agencies for the past six years has been critical to developing this Resource Management Plan. We have developed a plan that balances protection of sensitive resources with resource use."

Also reporting on the story is the [Grand Junction Daily Sentinel](#) (3/25, 73K).

BLM BEGINS COUNTDOWN ON BUNDY "RANGE WAR". The [St. George \(UT\) Spectrum](#) (3/24, 48K) reports that "in the latest and most intense salvo in the Cliven Bundy/Bureau of Land Management (BLM) 'range war,' the federal government Monday started a one-year countdown during which it plans to impound the rancher's cattle from several areas in Southern Nevada." According to the article, "Bundy, in turn, filed three notices including a 'Range War Emergency Notice and Demand for Protection' directed toward numerous county, state and federal officials including Clark County Sheriff Doug Gillespie, county commissioners and district attorney; Nevada Gov. Brian Sandoval, state attorney general, Department of Agriculture and legislature, and US representatives in Nevada."

MONTANA SPORTSMEN OPPOSE DURFEE HILLS LAND EXCHANGE. The [Lewistown \(MT\) News-Argus](#) (3/24, 12K) reports that Central Montana sportsmen are opposed to a proposed land exchange between the BLM and Texas billionaire brothers Dan and Farris Wilks. A group of sportsmen called the Central Montana Hunters for Public Access has "created a petition that asks the Montana office of the Bureau of Land Management to 'cease any effort or involvement in any land exchange proposal that would result in the loss of public ownership and management control of what is known as the Durfee Hills BLM Land Parcel located in southern Fergus County.'"

Fish and Wildlife Service:

ADVOCATES SEEK PROTECTION FOR GRAY WOLF. The [Missoulian](#) (3/25, 92K) reports that "a dozen wolf advocates gathered at Caras Park on Monday to plead for restored Endangered Species Act protection for the predator, while their colleagues in Helena and five other state capitals demanded the attention of their respective governors with civil disobedience efforts." Missoula protest organizer Seth Hogue of the recently formed Wolf and Wildlife Group said "similar protests were set for capitals in Idaho, Wyoming, Minnesota, Minnesota and Wisconsin, with supporting rallies in four more states, Germany and South Africa." Hogue "argued that returning gray wolves from the brink of extinction to a viable population 'should be a cause for celebration, not a reason to open hunting season again.'"

Also reporting on the story is [KPLU-FM Tacoma, WA](#) (3/25, 16K).

FWS WANTS TO EXPAND HANFORD REACH. The [Tri-City Herald \(WA\)](#) (3/24, Cary, 100K) reports that the FWS has notified the Department of Energy that "it wants to look into opportunities to expand the Hanford Reach National Monument with newly cleaned-up Hanford nuclear reservation land." However, "that concerns the Tri-City Development Council, which said Fish and Wildlife control of the land could mean it would remain largely off-limits to the public." The article notes that "it also could interfere with efforts to create a new Manhattan Project National Historical Park that would include Hanford's historic B Reactor and other historic Hanford sites."

FWS TARGETS CONSERVATION IN PRAIRIE POTHOLE REGION. The [Progressive Farmer](#) (3/25, 1K) reports that the FWS is "partnering with conservation groups to highlight problems with grassland conversions to crop production in the Prairie Pothole Region." The agency announced the "Prairies Conservation Campaign" on Monday to "note that grasslands and wetlands are being converted to crop production in the upper Plains states at levels not seen since the 1920s or 1930s." Noreen Walsh, Regional Director for the Mountain-Prairie Region of the FWS, said, "More than 50 percent of North American migratory waterfowl depend upon the mix of wetlands and grasslands found in the prairie pothole region. This area is called America's 'duck factory' because it is the most productive area for nesting waterfowl on the continent, perhaps the world. These prairies and all the wildlife that they support are currently stressed by many factors acting together to threaten our natural heritage. By

joining together as stewards, we can shed light on this problem and find solutions.”

REPORT DETAILS EFFORTS BY ELEVEN STATES TO PROTECT SAGE GROUSE. The Deseret (UT) News (3/25, 276K) reports that “a new report by the Western Governors’ Association details notable conservation efforts undertaken in 2013 by 11 western states that have populations of the bird, including Utah.” The governors’ association report notes that “2013 saw a tremendous amount of work undertaken by the states on sage grouse issues and also notes what is happening on the federal level.” The article notes that “in addition to the individual state plans, the Bureau of Land Management and the Forest Service are in the midst of revising 98 land use plans, with final proposals slated to be released throughout the summer and fall of this year.”

REWARD STILL BEING OFFERED FOR MONTEREY OTTER KILLERS. The San Francisco Chronicle (3/24, 1.47M) reports that a reward of \$21,000 still stands for information on “the shootings of three sea otters on the Monterey Peninsula.” Rebecca Roca, an agent with the FWS, said, “We’re still working on it. I can’t release any details on our progress.” She added, “The reward still stands.”

Also reporting on the story is the SFist (3/24, 59K).

NENE GEESE ON OAHU SPOTTED IN WILD FOR FIRST TIME SINCE 1700S. The AP (3/25, Mcavoy) reports that “endangered Hawaiian geese have been spotted in the wild on Oahu for the first time in centuries, a federal agency said Monday.” According to the FWS, “a pair of nene nested and successfully hatched three goslings at a national wildlife refuge near Kahuku on the North Shore.” Ken Foote, a spokesman for the FWS, said that “the nene pair at the James Campbell National Wildlife Refuge near Kahuku found their own way to Oahu and weren’t transported by humans.”

VIETNAM CONSIDERING DESTRUCTION OF ITS ILLEGAL IVORY, RHINO HORN AND TIGER BONE. The LiveScience (3/25, 206K) reports that Vietnam “could be the latest country to destroy its stockpiles of illegal wildlife products.” According to the Wildlife Conservation Society, “officials with the Ministry of Agriculture and Rural Development of Vietnam say they are considering crushing rhino horn, elephant ivory and tiger bone.” The article notes that “Vietnam would join other countries that have recently destroyed their stockpiles of confiscated illegal wildlife items,” including the US.

ADDITIONAL COVERAGE: RANCHERS CONCERNED ABOUT IMPACT OF PROTECTING GREATER SAGE GROUSE. Additional coverage of the concerns raised by Oregon ranchers about protecting the greater sage grouse was provided by the AP (3/25).

Securing America’s Energy Future:

Offshore Energy Development:

ALASKA STATE SENATE PANEL HEARS EXXON VALDEZ FUNDING RESOLUTION. The AP (3/25, Bohrer) reports that on the 25th anniversary of the Exxon Valdez spill on Monday, Alaska’s Senate Judiciary Committee heard a resolution urging the state and Federal governments to seek additional funds for restoration. No action occurred on the resolution yet.

BSEE Director Salerno Wants To Create “Safety Culture.” NPR (3/25, Brady, 260K) reports that “while BSEE sets rules for offshore drillers, director Brian Salerno says he’s also focused on changing the culture of oil companies.” Salerno said, “Regulations will only get you so far. We have to do more.” He added that he “wants every oil company to create a ‘safety culture.’”

Oil Spill Consultant Says Area Still Not Restored 25 Years After Exxon Valdez Spill. Al Jazeera America (3/25, Lak, 79K) reports on the 25th anniversary of the Exxon Valdez oil spill in Seward, AK. Exxon has noted that it spent \$1 billion cleaning up the spill and has paid out twice that to settle “other legal claims” since the spill. However, University of Alaska scientist and oil spill consultant Rick Steiner calls the term “clean-up” problematic. He showed “a small jar of greasy pebbles,” which he said is Elanor Island beach gravel, still “covered in oil from the Exxon Valdez” after 25 years. Though he said Alaska’s oil industry “takes the possibility of spills much more seriously than it used to,” he cautioned that “there are no better guarantees,” and that “once oil has

spilled, you cannot clean it up, you cannot restore an oil-injured ecosystem and you can't adequately rebuild human communities that are unravelled by these big industrial disasters."

Additional coverage was provided by the [Huffington Post](#) (3/25, Sheppard, 11.54M).

RESEARCH TEAM PROBES GULF OIL SPILL'S IMPACT. The [Environmental Protection](#) (3/24, 293) reports that "a research team that includes Chris Horrell, a Historic Preservation Officer and Senior Marine Archaeologist for the federal Bureau of Safety and Environmental Enforcement, has been visiting Gulf of Mexico shipwreck sites this month as its members try to determine how oil spilled after the Deepwater Horizon explosion in 2010 is affecting organisms living on them." The article notes that "all six shipwrecks – three wooden-hulled sailing ships dating to the 19th century (Ewing Bank wreck, Viosca Knoll wreck, and Mica wreck) and three World War II-era steel-hulled vessels (Halo, Anona, and U-166) – are relatively close to the Macondo well site where the spill occurred, and they all were discovered and examined before the spill by archaeologists."

NOAA Study: Deepwater Horizon Spill Left Area Fish Embryos With Heart Defects. The [Washington Post](#) (3/25, Fears, 2.33M) reports that according to a new study led by the National Oceanic and Atmospheric Administration, young tuna and other fish exposed to oil from the BP Deepwater Horizon spill "developed heart defects that are likely to limit their ability to catch food." According to NOAA's Northwest Fisheries Science Center ecotoxicology program head Nat Scholz, fish that were embryos in the northern Gulf of Mexico in April 2010 and exposed to oil from the spill are "not going to be able to survive" as they become adult fish. The article notes that studies following the 1989 Exxon Valdez spill reported "similar findings," but the population exposed to oil was smaller. The [New York \(NY\) Times](#) (3/25, Wines, Subscription Publication, 5.41M) also covers the story.

Tackling America's Water Challenges:

MORELOS DAM GATES OPENED. The [Inland News Today \(CA\)](#) (3/25, 102) reports that "the gates of the Morelos Dam at the border have been opened to create a man-made flood." Jack Simes of the BOR said, "The intent is to replicate a major spring storm that will re-germinate willow and cottonwood trees. There is a lot of science work engaged in this." The article notes that "the experimental flow toward the Gulf will continue for the next 8-weeks."

OFFICIALS URGE CAUTION AS SNAKE RIVER FLOWS INCREASE. The [Ogden \(UT\) Standard-Examiner](#) (3/24, 146K) reports that the BOR will "increase flows along the Upper Snake River this week as part of normal reservoir operations to prepare for spring runoff and irrigation deliveries. People are advised to exercise caution near rivers and canals." Roland Springer, Upper Snake Field Office manager for the BOR said, "As melting snow and water delivered for irrigation raises water levels, we want people to be careful around riverbanks and canal systems. Late winter precipitation points to a good water supply for Snake River water users, and increases the potential for flooding so we want everyone to keep safety in mind."

The [Twin Falls \(ID\) Times-News](#) (3/25, 56K) reports that John Redding, the bureau's public affairs officer, said, "We want to make sure that people are aware of the potential dangers when they are near the riverbanks either fishing or recreating and that they need to use caution. The same is true for canal banks as they are being charged up. They can be very dangerous, and caution needs to be used there as well."

BOR TO INCREASE RELEASES FROM BOYSEN DAM. The [AP](#) (3/25) reports that "flows on the Bighorn River will increase this week as the Wyoming Game and Fish Department takes action to improve conditions for trout." The BOR will increase releases from Boysen Dam starting Tuesday. According to the article, "the flows will fluctuate from 475 cubic feet per second up to 5,000 cfs this week."

BOR'S FACEBOOK PAGE OFFERS INFORMATION ON SPRING RUNOFF. The [Estes Park \(CO\) Trail-Gazette](#) (3/25, 13K) reports that the BOR has "started a new Facebook page to offer information about the upcoming spring runoff and its effects on Olympus Dam and Lake Estes."

Empowering Native American Communities:

HOUSE TO HOLD HEARING ON HANDLING OF COBELL SETTLEMENT. The [Nation Sun News](#) (3/25) reports

that the House Subcommittee on Indian and Alaska Native Affairs will “hold an oversight hearing next week to discuss the Land Buy-Back Program for Tribal Nations.” The hearing will examine how the Interior Department has been handling the program. Rep. Steve Daines said, “Since the authorization of the Cobell settlement passed Congress, tribes have dealt with needless uncertainty and delays, and are rightly concerned that the program is being designed without transparency and input from those in Indian country.”

DESERT WATER AGENCY APPEALS LAWSUIT DISMISSAL. The Palm Springs (CA) Desert Sun (3/24, 86K) reports that Desert Water Agency is “appealing a judge’s decision to dismiss its lawsuit” against the Interior Department “over regulations on Indian land it fears could cost it millions of dollars.” The water authority filed an appeal Friday to the US Court of Appeals for the Ninth Circuit. The article notes that “the action comes two months after US District Court Judge Dolly Gee dismissed the lawsuit because she believed DWA failed to prove that the federal regulations were harming its operations.”

TRIBES IN EVERGLADES TRY TO PRESERVE WAY OF LIFE. USA Today (3/24, Gillis, 5.82M) reports that “Indian life was uprooted” in the “mid-1900s when state and federal agencies learned how to efficiently drain South Florida’s massive wetlands and subtropical forests.” According to the article, “unlike the past, when children were taught to stay away from Americans and other cultures, Indians today are increasingly communicating with the outside world.” They say that “it’s their last resort to save the Everglades and their way of life.”

Top National News:

G-7 LEADERS SUSPEND RUSSIA, WARN OF ADDITIONAL SANCTIONS. Media coverage of the crisis in Ukraine picked up again as leaders of the G-7 nations held an emergency meeting Monday in The Hague, where they voted to suspend Russia. Leaders also warned that Moscow would face additional sanctions if it moved into eastern Ukraine. The move is receiving heavy media coverage, including reports on all three networks last night, but it was not the top story on any of the broadcasts.

NBC Nightly News (3/24, story 6, 0:20, Williams, 7.86M) reported briefly that “the G-8 is going back to the G-7” after leaders “voted to kick Russia out,” and ABC World News (3/24, story 6, 1:35, Sawyer, 7.43M) reported President Obama and other world leaders “turn[ed] the heat up on Russia,” and “pledged to stand with Ukraine.” The President was shown saying, “Europe and America are united in our support of the Ukrainian government and the Ukrainian people.”

The CBS Evening News (3/24, story 5, 1:15, Pelley, 5.58M) reported the G-7 leaders also “scuttled” a G-8 summit scheduled for June in Sochi, Russia. Major Garrett reported from The Hague that the G-7 nations “will now hold their own summit in Brussels in June, excluding Russia from all economic talks until the standoff over Crimea is resolved.” They also “agreed that any new economic sanctions against Russia would hit its arms, energy and finance industries and would be tied directly to any new military moves into Ukraine,” but will not take further action at this time.

USA Today (3/25, Dumalaon, Dorell, 5.82M) reports G-7 leaders met “to solidify their resolve to isolate Russia.” The AP (3/25, Pace) too says Monday’s moves were aimed a further isolating Russia. In a statement, the leaders said, “Today, we reaffirm that Russia’s actions will have significant consequences.” They also discussed “plans for increasing financial assistance to Ukraine’s central government,” and “vowed to launch coordinated sanctions on key sectors of the Russian economy” if Putin presses further into Ukraine. According to US officials, Obama “managed to win support for those potentially bruising sanctions from European leaders, who have been wary.”

British Prime Minister David Cameron, the Wall Street Journal (3/25, Winning, Subscription Publication, 4.25M) reports, said Monday, “We need to send a very clear message to the Russian government and to President Putin that it would be completely unacceptable to go further into Ukraine and that would trigger sanctions from the EU, from the US, from other countries as well, and we need to be very, very clear about that.”

But another Wall Street Journal (3/25, A1, Lee, Dalton, Troianovski, Subscription Publication, 4.25M) report notes that the G-7 leaders didn’t specify exactly what actions they would take if Russia continued its current course, though a US official said any future sanctions would be more biting than those already imposed. According to AFP (3/25, Zaks), the G-7 will “intensify” what it called “coordinated sectoral sanctions that will have an

increasingly significant impact on the Russian economy, if Russia continues to escalate" the situation.

Bloomberg News (3/25, Neuger, 392K) reports the leaders' warnings "focused on potential military moves by the Kremlin into Russian-speaking areas of eastern and southern Ukraine, leaving open whether the West hopes to dislodge Putin's forces from Crimea."

Monday's actions, the New York Times (3/25, Shear, Smale, Herszenhom, Subscription Publication, 5.41M) reports, were "intended as another signal of the West's condemnation of Russia's actions," but leaders said they represented "only part of a series of punishments that might still escalate if Russia refuses to turn back its aggressions."

Politico (3/25, Brown, Kopan, 73K) calls Monday's actions "yet another bid to punish...Putin for annexing part of Ukraine," while The Hill (3/25, Sink, 76K) says it is a "rebuke to Moscow."

The Washington Post (3/25, A1, Wilson, Morello, 2.33M) says the moves "followed a push by President Obama for a united stand," but Russia "dismissed" them "as unimportant." Russian Foreign Minister Sergei Lavrov told reporters in The Hague, "The G-8 is an informal club. No one hands out membership cards, and no one can be kicked out of it."

Reuters (3/25, Holland, Vasovic) similarly says Lavrov played down the move, while McClatchy (3/25, Clark, Subscription Publication, 13K) quotes him as saying Russia's expulsion from the G-8 would be no "great tragedy."

In an editorial, the Wall Street Journal (3/25, Subscription Publication, 4.25M) hails the move to keep Russia out of the G-7, though it argues an outright expulsion (not just a suspension) would have been even more effective. The Journal also proposes that G-7 nations pull out of the 2018 World Cup, which Russia will host.

Lavrov Demands Ukraine Grant More Autonomy To Its Regions. The AP (3/25, Mills, Leonard) reports that Russian Foreign Minister Sergei Lavrov met with his Ukrainian counterpart Andriy Deshchytzia on Monday in the Hague to demand "more autonomy for Ukraine's regions." The "unexpected" meeting was "the highest level" one "yet between the Russian government and a representative of the new Ukrainian government that Moscow has opposed vociferously over the past month."

The Wall Street Journal (3/25, Troianovski, Subscription Publication, 4.25M) notes Lavrov also met with Secretary of State Kerry on the sidelines of the Nuclear Security Summit. For their part, the AP (3/25) reports, Kerry and Deshchytzia expressed concern about Russia's military buildup along its border with eastern Ukraine.

Reuters (3/25, Deutsch) reports Kerry expressed "strong concern" about the buildup of Russian troops during his meeting with Lavrov, a senior State Department official said.

Breedlove: Moldova's Transnistria Could Be Russia's Next Target. ABC World News (3/24, story 6, 1:35, Sawyer, 7.43M) reported Russia continues to mobilize "tens of thousands of troops" along its border with Ukraine. Jonathan Karl said there are "now 30,000 Russian forces there, 10,000 added just over the past week." President Vladimir Putin says the troops "are there for military exercises and nothing more, but officials don't believe that. As one official put it, we have every reason to be skeptical about what the Russians are saying."

The Washington Post (3/25, Englund, 2.33M) notes that over the weekend, the commander of NATO forces in Europe, US Air Force Gen. Philip Breedlove expressed concerns that Moldova's breakaway province of Transnistria "will very soon become Europe's next crisis point." The Post also notes that there's a "Russian army base in Transnistria, with 1,200 soldiers."

NYTimes Analysis: Putin's Actions Rooted In Sense Of West's Betrayal, Dislike Of US Unilateralism. The New York Times (3/25, Herszenhom, Subscription Publication, 5.41M) analyzes Russia's motivation in the current Ukraine crisis, and points that to Vladimir Putin and many Russians the conflict stems from the West's actions in the aftermath of the Cold War – "drawing into Europe's fold not just former Eastern bloc nations like Poland and Bulgaria, but the ex-Soviet republics...in the Baltics." Moreover, "Putin and many Russians believe that the Soviet leader Mikhail S. Gorbachev had received assurances that the NATO alliance would not extend

beyond a reunited Germany," and thus "consider it a betrayal that NATO now includes the Baltics, reaching Russia's borders." Moreover, adds the Times, "Putin has been maneuvering for some time to thwart what he views as American unilateralism in global affairs, especially after what he has said were serious mistakes in Iraq, Libya, Egypt and Syria. But only in the Syria case, Putin's supporters say, did Russia gain footing, outmaneuvering President Obama."

Bret Stephens, in the Wall Street Journal (3/25, Subscription Publication, 4.25M), criticizes liberals and "realists" who, according to him, are lending their support to Putin's moves. In effect, says Stephens, neither NATO's expansion nor historical claims account for Russia's actions. Instead, Putin is pursuing his self-interest a leader of a corrupt economy rich in commodities.

Richard Cohen, in the Washington Post (3/25, 2.33M), notes the key role played by nefarious individuals in the violent tragedies of the 20th century, and argues that "this is why the study of Vladimir Putin is so important." While "Russian nationalism is an indigenous force, and Russian grievance is somewhat the same...another leader may not have fanned either one."

DeWayne Wickham, however, in his column for USA Today (3/25, 5.82M) likens Putin's actions to "the series of events that brought about the creation of Panama in 1903." Panama had been a province of Colombia, and when its government "rejected a treaty that would have allowed the United States to build a canal across its territory to connect the Atlantic and Pacific Oceans, a plot was hatched to make Panama an independent nation." The US sent warships "to stop Colombia from reinforcing its beleaguered troops in its Panama province," and a newly independent Panama "responded by quickly giving America the treaty it sought." Wickham adds that "Panama is in the geopolitical backyard of the USA. It's inside America's sphere of influence, just as Crimea is inside Russia's."

Sanctions Already Hurting Russia By Creating "Panic" Among Investors. The Washington Times (3/25, Hill, 230K) paints a dire picture of the effect of the crisis on Russia's economy, with "financial markets crashing, economic growth falling, and foreign investors and citizens pulling money out of the country at a frenetic pace." The "limited sanctions imposed by the US and European Union...have helped create panic that has prompted investors and businesses to pull \$70 billion out of the country in the first quarter after having withdrawn \$63 billion in all of 2013."

SUPREME COURT TO HEAR RELIGIOUS CHALLENGE TO ACA'S CONTRACEPTIVE MANDATE. Reuters (3/25, Hurley) reports that on Tuesday, the Supreme Court will consider whether business owners can object to the ACA's contraceptive mandate on religious grounds. The Court will consider whether those challenging the mandate have a case under the 1993 Federal law called the Religious Freedom Restoration Act (RFRA) and the First Amendment to the US Constitution, which ensures the free exercise of religion. The Court is expected to rule by the end of June.

Opinion pieces this morning generally oppose the corporations' attempt to be exempted from the mandate. An editorial in the Washington Post (3/25, 2.33M) argues that the firms seeking exemptions from the contraceptive mandate are wrong because "no one's religious practices are being burdened to a 'substantial' degree." Moreover, The Post argues that it is "not feasible for a corporation to easily opt out of any generally beneficial law that happens to offend its owners."

In an op-ed for the Washington Post (3/25, Fluke, 2.33M), social justice attorney Sandra Fluke, who is a candidate for California State Senate, casts the cases before the Supreme Court as a threat to women's rights, arguing that if "religious rights are extended to corporations, it puts us on a slippery slope where any private company could argue that religious beliefs prevent it from offering vital employee protections." The outcomes of these cases, she writes, "could deny millions of women coverage of any or all forms of birth control, limiting women's ability to control their reproductive health, plan their pregnancies and manage their lives."

In an op-ed for USA Today (3/25, Robinson, 5.82M), Rev. V. Gene Robinson, the IX Episcopal bishop of New Hampshire and a senior fellow at the Center for American Progress, writes that "most American women, regardless of what religion they are, use contraception at some point in their lives." Robinson argues that Christianity "should be about more love, not less; more dignity, not less." He argues that a decision in favor of Hobby Lobby in this case "would not be a victory for religious freedom, but a victory for discrimination and a

repudiation of the vital progress the court has made in securing equal justice for all.”

APPROVAL OF LNG EXPORT PROJECT MET WITH MIXED REACTION ON HILL. The Wall Street Journal (3/25, Harder, Subscription Publication, 4.25M) reports that the Administration has given conditional approval for the construction of the Jordan Cove liquid natural gas export project, a move that drew praise from Democrats on the Hill but was seen as insufficient by House Speaker Boehner. Jordan Cove, which would export LNG from Oregon, is the seventh project that has gotten the go-ahead from the DOE to begin development, though, like five of the others, it has not received final approval from FERC. While Colorado Sen. Mark Udall (D), who is facing a tough reelection bid and whose state is home to significant energy resources, praised the move, a spokesman for Boehner said that while it was welcome, it took two years and there are many similar projects that need swift Administration action.

McClatchy (3/25, Cockerham, Subscription Publication, 13K) reports that Louisiana Sen. Mary Landrieu (D), who chairs the Senate Energy and Natural Resources Committee and is facing a tough reelection bid in an energy-industry-heavy state, praised the move as a way to counter Russia. However, McClatchy adds that it is “questionable how much increased American exports” of LNG “could hurt” Russian President Putin, “since most are destined for Asia, not Europe, and are years from reality.”

In an editorial, the Wall Street Journal (3/25, Subscription Publication, 4.25M) says that the approval of Jordan Cove is a positive step, but barely sufficient, as there are still 24 more proposals awaiting action. The Journal portrays the move as an attempt to forestall Congressional action to boost LNG exports.

Editorial Wrap-Up:

NEW YORK TIMES. “Lethal Liquid Nicotine.” An editorial in the New York Times (3/25, Subscription Publication, 5.41M) says the Obama Administration is “asleep at the switch” as “makers of electronic cigarettes and liquid nicotine, which is extracted from tobacco, are expanding rapidly with no meaningful regulatory oversight.” The Times argues that the FDA should be allowed “to propose rules and begin taking public comment.” Proposed rules should include limiting “the amount of liquid nicotine in any container sold to consumers,” banning Internet sales, requiring childproof packaging, and banning “labels and flavorings that appeal to children.” In addition, the Times argues for prohibiting “the sale of liquid nicotine in very high concentrations; 10 percent and 7.2 percent solutions are widely available on the Internet and are lethal even in small quantities.”

“Under The Streets, A Lurking Danger.” In an editorial, the New York Times (3/25, Subscription Publication, 5.41M) says that while investigators have yet to determine the cause of the gas explosion that killed 8 in East Harlem earlier this month, “there is more that can be done to make New York and other cities safer, starting now.” The Times says that Congress should back two Senate bills from Massachusetts Sen. Ed Markey (D), “which seek to hasten the replacement of old, leaking natural-gas pipelines nationwide.” In addition to preventing explosions, the Times says that a “a concerted effort to repair obsolete gas pipes would also help reduce emissions that worsen climate change and save money, because when gas disappears, customers pay for it anyway.”

“Egypt’s Miscarriage Of Justice.” In an editorial, the New York Times (3/25, Subscription Publication, 5.41M) calls the conviction and death sentences for 529 supporters of ousted Egyptian President Mohammed Morsi “a uniquely shocking example of a judicial system run amok” and “an outrageous escalation of the military-led government’s ruthless crackdown against the Muslim Brotherhood and Islamist supporters of...Morsi.” The Times adds that “inexplicably,” the US and UK “issued separate, similarly weak statements” which are “unlikely to have much effect on Egypt’s military and a population that largely seems willing to tolerate its abuses.”

WASHINGTON POST. “A ‘Compelling’ Interest.” An editorial in the Washington Post (3/25, 2.33M) argues that the firms seeking exemptions from the contraceptive mandate are wrong because “no one’s religious practices are being burdened to a ‘substantial’ degree.” Moreover, The Post argues that it is “not feasible for a corporation to easily opt out of any generally beneficial law that happens to offend its owners.”

“Flawed Military Justice.” In an editorial, the Washington Post (3/25, 2.33M) argues that the Sinclair and Midshipman Joshua Tate cases “show why trained, independent prosecutors, not commanding officers with

competing concerns, should be in charge of deciding which cases come to trial," and goes on to offer support for "legislation championed by Sen. Kirsten Gillibrand (D-N.Y.) that would have brought about this critical reform" and "got 55 votes in the Senate this month, a clear majority but unfortunately five short of the 60 needed to overcome a filibuster." Congress, concludes the Post, "needs to revisit this issue."

"A Malaysian Catastrophe." In an editorial, the Washington Post (3/25, 2.33M) criticizes the Malaysian government saying it has been "ham-handed in its dealings with grieving families and the global glare of attention." While the situation would be difficult for any government, the Malaysian government, the Post argues, "has shown signs of a deeper malaise that comes from a half century of rule without challenge or transparency." The Post calls on Malaysia's rulers "to draw lessons from their unsteady performance of recent weeks and commit themselves to transparency and openness."

WALL STREET JOURNAL. "NATO's Military Decline." In an editorial, the Wall Street Journal (3/25, Subscription Publication, 4.25M) criticizes Western governments' military cuts since the end of the Cold War, with only four members of NATO (US, UK, Greece and Estonia) spending more than 2% of their GDP on defense. Russia, meanwhile, has increased defense spending by 79% in the last 10 years, says the Journal.

"One Down, 24 To Go." In an editorial, the Wall Street Journal (3/25, Subscription Publication, 4.25M) says that the approval of the Jordan Cove LNG export project is a positive step, but barely sufficient, as there are still 24 more proposals awaiting action. The Journal portrays the move as an attempt to forestall Congressional action to boost LNG exports.

"Putin Gets The Boot." In an editorial, the Wall Street Journal (3/25, Subscription Publication, 4.25M) hails the move to keep Russia out of the G7, though it argues an outright expulsion (not just a suspension) would have been even more effective. The Journal also proposes that G7 nations pull out of the 2018 World Cup, which Russia will host.

TODAY'S EVENTS IN WASHINGTON.

White House:

PRESIDENT OBAMA — Meets with President Nursultan Nazarbayev of Kazakstan, US Ambassador's residence, The Netherlands, closed press; arrives at the World Forum at the Hague to participate in the Nuclear Security Summit, The World Forum; attends the leaders-only plenary session, The World Forum, The Hague; participates in a working lunch with plenary discussion, The World Forum, The Hague, closed press; attends the closing session, The World Forum, The Hague, closed press; holds a joint press conference with Prime Minister Rutte, Gemeentemuseum Den Haag, The Netherlands, open press; hold a bilateral meeting with the Crown Prince of Abu Dhabi Mohammed Bin Zayed Al Nahyan of the United Arab Emirates, US Ambassador's residence, The Netherlands, closed press; holds a trilateral meeting with President Park Geun-Hye of the Republic of Korea and Prime Minister Shinzo Abe of Japan, US Ambassador's residence, The Netherlands; meets and greets with Embassy personnel, US Ambassador's residence, The Netherlands; departs The Netherlands en route to Brussels, Belgium.

VICE PRESIDENT BIDEN — Visits a NH Works Center in Nashua, New Hampshire with the Secretary of Labor.

FIRST LADY MICHELLE OBAMA — Visits Chengdue from March 25-26.

US Senate: 11 a.m. BORLAUG STATUE UNVEILING – HOUSE AND SENATE LEADERS — The unveiling of a new statue in the National Statuary Hall Collection of Iowan Norman Borlaug, on the 100th anniversary of Borlaug's birth. Borlaug is one of only five people to have been honored with the Nobel Peace Prize, the Presidential Medal of Freedom and the Congressional Medal of Honor. Participants: House Speaker John Boehner; Secretary of Agriculture Tom Vilsack; Senate Majority Leader Harry Reid; Senate Republican Leader Mitch McConnell; House Democratic Leader Nancy Pelosi; Governor of Iowa Terry Branstad; Members of the Iowa Congressional Delegation.

11:30 a.m. DEMOCRATIC WOMEN – MINIMUM WAGE — Joint Economic Committee Senate Chair Amy Klobuchar (D-MN), Debbie Stabenow (D-MI), Kirsten Gillibrand (D-NY), and Tammy Baldwin (D-WI) will hold a press conference to highlight "the importance of raising the minimum wage for women and the economy."
 Location: S-120.

10 a.m. — The Senate convenes and begins a period of morning business. Thereafter, senators resume consideration of the motion to proceed to S.2124, the Ukraine Aid bill.

9:30 a.m. ARMED SERVICES — Meets To receive testimony on U.S. Pacific Command and U.S. Forces Korea in review of the Defense Authorization Request for Fiscal Year 2015 and the Future Years Defense Program. Witnesses: Admiral Samuel J. Locklear III, USN, Commander, U.S. Pacific Command; General Curtis M. Scaparrotti, USA, Commander, United Nations Command, Combined Forces Command, U.S. Forces Korea. http://www.armed-services.senate.gov/hearings/us-pacific-command-and-us-forces-korea_03/25/2014 Location: G50 Dirksen.

10 a.m. APPROPRIATIONS — Subcommittee on Military Construction, Veteran Affairs, and Related Agencies meets on the overview on the Department of Veterans Affairs Fiscal Year 2015 Budget Request to Congress. Witnesses: Eric K. Shinseki, Secretary, Department of Veterans Affairs. Accompanied by: Robert A. Petzel, MD, Under Secretary for Health; Allison A. Hickey, Under Secretary for Benefits; Steven L. Muro, Under Secretary for Memorial Affairs; Stephen Warren, Executive in Charge for Information and Technology; Helen Tierney, Executive in Charge for the Office of Management and Chief Financial Officer. Location: 124 Dirksen.

10 a.m. ENERGY AND NATURAL RESOURCES — Hearing "Importing Energy, Exporting Jobs Can it be reversed?" Witnesses: Adam Sieminski, Administrator, U.S. Energy Information Administration; Jaroslav Neverovic, Minister, Ministry of Energy of the Republic of Lithuania; Dr. David Montgomery, Senior Vice President, NERA Economic Consulting; David L. Goldwyn, Nonresident Senior Fellow, Energy Security Initiative at the Brookings Institution; Edward C. Chow, Senior Fellow, Energy and National Security Program, Center for Strategic and International Studies. Location: 366 Dirksen.

10 a.m. FOREIGN RELATIONS — Witness: John F. Kerry, Secretary of State, U.S. Department of State. <http://www.foreign.senate.gov/hearings/national-security-and-foreign-policy-priorities-in-the-fy-2015-international-affairs-budget/032514> Location: 419 Dirksen.

Notes: Secretary Kerry's official schedule still has him on foreign travel – Secretary Kerry accompanies President Obama on foreign travel to The Hague, Rome, Vatican City, and Riyadh. <https://usaive.ap.org/r/pa/prs/ps/2014/03/DanaInfowww.state.gov+223813.htm>

2:15 p.m. ARMED SERVICES – CLOSED — Meets to receive a briefing on challenges to maintaining U.S. military technology superiority. Witnesses: Frank Kendall III, Under Secretary of Defense, Acquisition, Technology, and Logistics, Department of Defense; Alan R. Shaffer, Acting Assistant Secretary of Defense, Research and Engineering, Department of Defense. <http://www.armed-services.senate.gov/hearings/challenges-to-maintaining-us-military-technology-superiority> Location: Room SVC-217, Capitol Visitor Center.

2:30 p.m. HEALTH, EDUCATION, LABOR, AND PENSIONS — Hearing on "Teacher Preparation: Ensuring a Quality Teacher in Every Classroom." Location: National Press Club, 529 14th Street NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Everyone's talking about the situation in Ukraine, still. And over the weekend, Vladimir Putin ordered fireworks to go off in Moscow to celebrate Crimea joining Russia. And also the fact that he had Stanford

beating Kansas in his March Madness bracket."

Jimmy Fallon: "Seems like everyone's weighing in on the situation in Ukraine. In a new interview, Mitt Romney criticized President Obama for being naive, unprepared and using bad judgment. Which is also how people describe Romney when he's buying jeans."

Jimmy Fallon: "But Obama has other things to worry about. Today, he was in the Netherlands for a nuclear summit with 50 other world leaders. Not saying Obama's unpopular right now, but every time he puts down his tray in the cafeteria, all the other leaders move to another table."

Jimmy Fallon: "Oh, Edward Snowden is in the news again. I can't believe this guy. Now, intelligence officials are accusing Snowden of helping the Russian government get around NSA surveillance. Snowden said, 'Look, what I do with my computer on my time with your information is nobody's business but mine, okay?'"

David Letterman: "But President Obama is meeting with the G-7 leaders and it must be fun for him now to put faces with the voices on the wiretaps."

David Letterman: "Let's talk about your March Madness – do you know what I'm talking about with March Madness? It starts out with 68. Then it goes to 32. And then it drops to 16. You know what it's like? It's like President Obama's approval rating."

Seth Meyers: "On Sunday, Mitt Romney suggested that he had a power to see into the future and could have stopped Russia from invading Crimea, if he had been elected this 2012. Though if he could really see the future, he wouldn't have run for president in 2012."

DOI in the News:

INTERIOR OFFICIALS TO DEFEND 2015 BUDGET AT CONGRESSIONAL HEARINGS. The [Environment & Energy Publishing](#) (4/1, 705) reports that Interior Department officials will this week defend the Obama Administration's 2015 budget request before House lawmakers at several hearings. The Natural Resources Committee will hear Interior Secretary Sally Jewell "defend the department's \$11.9 billion budget request, a proposal heavy on conservation and that contains familiar, but so far unsuccessful, proposals to raise \$2.5 billion in new fees from oil and gas and mining on federal lands." Also, the Interior, Environment and Related Agencies Appropriations Subcommittee will hear from the heads of the NPS, FWS, BLM, BSEE, and BOEM.

Also covering the story are the "E2 Wire" blog of [The Hill](#) (4/1, 76K) and the "In The Loop" blog of the [Washington Post](#) (4/1, Itkowitz, 2.33M).

HOUSE PANEL TO CONSIDER REAUTHORIZATION OF RECREATION FEES. The [Environment & Energy Publishing](#) (4/1, 705) reports that House lawmakers on Friday will "consider ways to reauthorize the law that allows the Interior Department and the Forest Service to charge user fees for properties with restrooms, picnic tables or other facilities." The Natural Resources Subcommittee on Public Lands and Environmental Regulation will "discuss a draft bill by panel Chairman Rob Bishop (R-Utah), as well as two other measures."

REPUBLICANS HOPE TO MAKE SEN. LANDRIEU'S RHEA SUH VOTE AN ELECTION ISSUE. The [Washington Examiner](#) (4/1, 247K) reports that Louisiana Republicans are "angling to make" Rhea Suh "a problem in a key Senate race." Sen. Mary Landrieu, "one of the most vulnerable Democrats in the upper chamber, voted last week to confirm Suh as assistant secretary of fish, wildlife and parks in the Department of the Interior." Republicans "looking to oust her hope to make that vote a liability."

SEN. HAGAN APPLAUDS FUNDS FOR OUTDOOR RECREATION. The [Asheville \(NC\) Citizen-Times](#) (3/31, 162K) reports that Sen. Kay Hagan has "applauded the announcement of \$1 million for North Carolina for outdoor recreation." Hagan said, "North Carolina's sportsmen and women pay an excise tax to fund projects that enhance outdoor recreation, conserve wildlife habitats and provide hunting and boating safety education. These funds are a major reason our state is among the best places to hunt, fish and enjoy the outdoors in the country, and I am pleased this vital money will be released to North Carolina to help keep it that way."

Also reporting on the story is the [Jacksonville \(NC\) Daily News](#) (4/1, 1K).

SUPREME COURT REJECTS ALASKA APPEAL OVER FISHING RIGHTS. The [AP](#) (4/1) reports that the Supreme Court has "turned away an appeal by the state of Alaska in a long-running fight over the control of rivers and the fishing and hunting rights of Alaska Natives." The court on Monday "declined to review a federal appeals court ruling that upheld US Interior Department rules enforcing the fishing and hunting rights on some rivers that otherwise would be under state control."

Also reporting on the story is the [Alaska Dispatch](#) (3/31, 4K).

OIA OPTIMISTIC ABOUT CHC, RESERVATIONS ON CUC. The [Saipan Tribune](#) (4/1, 641) reports that "visiting officials of the US Department of the Interior's Office of Insular Affairs walked away impressed with the progress and changes seen at the public hospital, while admitting that they have a number of questions about the islands' utilities company." Acting Assistant Secretary for Insular Area Lori Faeth and OIA Director Nik Pula said "last week that besides the Executive Branch, they also had a series of meetings on Thursday and Friday with other agencies that OIA has aided: the Public School System, the Commonwealth Healthcare Corp., and the Commonwealth Utilities Corp., among others." Faeth said, "I would say that we're encouraged by the progress they have made in the public hospital and we've seen the commitment to continue to go forward at this time."

US OIL PRODUCTION CONCENTRATED IN A FEW STATES. The "Real Time Economics" blog of the Wall Street Journal (3/31, Madigan, 4.25M) reports that preliminary Energy Information Administration data show that 74 percent of all oil produced in the US in 2012 was in Texas, North Dakota, California, Alaska, and the Federal Gulf of Mexico. Texas alone produced 35 percent of all oil, and North Dakota's production has risen 177 percent over the last three years.

NEW APPROACH IN FUNDING FIGHT AGAINST WILDFIRES SUPPORTED. The [Casper \(WY\) Star-Tribune](#) (4/1, 90K) editorializes that "it's time for a fresh approach to how we fund the fight against wildfires." The paper supports "a new funding model currently garnering bipartisan support in Congress," and calls "on Wyoming's delegation to champion it in the House and Senate."

DUE DILIGENCE URGED FOR ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT PROPOSAL. In an op-ed for the [Las Cruces \(NM\) Sun-News](#) (4/1, 59K), Jerry G. Schickedanz, a former dean of New Mexico State University's College of Agriculture and Home Economics, writes that the proposed Organ Mountains-Desert Peaks National Monument is "equivalent to a massive federal land zoning change without due diligence." According to Schickedanz, "our two US senators are promoting the idea of effectively making a major zoning change on 489,815 acres of land in Doña Ana County without the data to support or deny a change in land use designation." By asking President Obama to permanently designate a land use designation, Schickedanz argues

that "they are attempting to make an end run around the democratic process of input and debate that has served this nation well for over 200 years."

America's Great Outdoors:

National Park Service:

REPUBLICANS CALLS FOR REVIEW OF NPS SPENDING. In its "E2 Wire" blog, The Hill (3/31, 76K) reports that Sens. Lisa Murkowski, Mike Enzi, and Tom Coburn are calling on the called on the US Government Accountability Office (GAO) to review the NPS' administrative structure and spending habits. In a letter to the GAO on Monday, the senators said "the growing backlog of maintenance projects raises questions about the efficiency and priorities of the park service." They "want the GAO to investigate inefficiencies, identify solutions for reducing the current maintenance backlog, including a look at improving revenue streams and review the recreational fee program."

Also reporting on the story is the National Journal (4/1, Subscription Publication, 505K).

COURT ORDERS NPS TO REVIEW CLAIMS OVER LAND SOLD FOR FLIGHT 93 MEMORIAL. The Washington Times (4/1, Mcelhatton, 230K) reports that a Federal judge has ordered the NPS "to review a scrap dealer's claims that the federal government shortchanged his company when buying land for the Flight 93 National Memorial in Pennsylvania." On Friday, US Court of Federal Claims Judge Charles F. Lettow "put the case on hold, despite a move by the Park Service to have the lawsuit tossed on procedural grounds." Instead, Lettow ordered the NPS to review the Rollock Company's claims for six months.

FRIENDS OF MARIE ZIMMERMAN CUTS TIES WITH NPS. The Pocono (PA) Record (4/1, 46K) reports that "the Marie Zimmerman House in Delaware Water Gap National Recreation Area will be closed this year, and the nonprofit group that restored it is ending its relationship with the National Park Service." The Friends of Marie Zimmerman terminated a five-year agreement with NPS in January. The agreement, signed in 2010, should have gone to 2015. NPS spokeswoman Kathleen Sandt said, "Further improvements to the site to meet legal requirements, such as accessibility, will be pursued before the site reopens to the public."

MINT TO ISSUE QUARTER HONORING SHENANDOAH NATIONAL PARK. The AP (4/1) reports that the US Mint is "issuing a quarter honoring Shenandoah National Park this week." According to the article, "the launch ceremony is set for 10 a.m. Friday at Skyline High School in Front Royal."

NPS RANGERS LEARNING RESCUE TECHNIQUES AT MARYLAND PARK. The AP (4/1) reports that NPS rangers are "rigging up at Catoctin Mountain Park near Thurmont to learn how to rescue people in the mountains." According to the article, "about 30 rangers and partner agency members are participating in five days of basic technical rescue training, starting Monday." The agency says "participants will learn basic rigging and rappelling techniques indoors."

EVERGLADES NATIONAL PARK'S INTERIM CHIEF NAMED. The AP (4/1) reports that Shawn Bengel, "who managed the agency's response to the 2010 oil spill in the Gulf of Mexico has been appointed acting superintendent of Everglades and Dry Tortugas national parks." Beginning Monday, Bengel will "lead the parks for 90 days." Bengel is "taking over for Dan Kimball, who is retiring after 10 years as the parks' superintendent."

NATIONAL PARK SERVICE TO BEGIN PRESCRIBED FIRES IN THEODORE ROOSEVELT NATIONAL PARK. The AP (4/1) reports that the NPS is set to begin prescribed fires in Theodore Roosevelt National Park. The agency says "nearly 3,000 acres could be burned between April and May."

Also reporting on the story is the Bismarck (ND) Tribune (4/1, 10K).

THREE SOUTH DAKOTA PROPERTIES ADDED TO NATIONAL REGISTER OF HISTORIC PLACES. The AP (4/1) reports that the Sievers School in rural Faulk County, the Nansen Store in Howard and Iron Nation's Gravesite on the Lower Brule Indian Reservation in Lyman County in South Dakota have been added to the National Register of Historic Places.

Bureau of Land Management:

ENVIRONMENTAL GROUP PLANS TO SUE BLM OVER SPECIES PROTECTION. The Palm Springs (CA) Desert Sun (4/1, 86K) reports that environmental groups have notified the BLM that “they plan to file a lawsuit over what they call a failure to adequately protect desert tortoises and other threatened species in the California desert.” The Center for Biological Diversity, the Sierra Club, Public Employees for Environmental Responsibility, and Desert Survivors “sent two letters to federal agencies on Monday, accusing the BLM of violating the Endangered Species Act by failing to submit annual reports about impacts to tortoises and other species from off-road vehicles and cattle grazing.” The groups said “the BLM is supposed to provide those reports to the U.S. Fish and Wildlife Service for conservation areas in the Mojave and Colorado deserts, but hasn’t submitted the reports for the past seven years.”

BLM PLANS ROCK SPRINGS WILD HORSE ADOPTION EVENT. The AP (4/1) reports that the BLM “plans a wild horse adoption event May 2-3 at its Rock Springs horse holding facility.” According to the article, “horses gathered from the Salt Wells Creek herd Management Area will be available for preview and adoption.”

In a separate story, the AP (4/1) reports that about 800 horses will be available for adoption.

MESA COUNTY APPROVES ROAD RESOLUTION. The AP (4/1) reports that the Mesa County Commission is “planning to assert control over roads and rights of way in a potential confrontation” with the BLM. The bureau is “studying proposed changes to the Grand Junction office’s resource management plan, including transportation on more than 1 million acres it manages in Mesa County and in some adjoining counties.” A county resolution “calls on Congress to develop legislation to improve procedures for respecting rights-of-way and road access.”

KJCT-TV Grand Junction, CO (4/1, 2K) reports that Mesa County Commissioners and the BLM are “cooperating to make sure public roads stay open for recreation, while also protecting the environment.” According to the article, “the commissioners unanimously approved the resolution Monday morning, reaffirming the county’s authority to help manage federal roads.”

Fish and Wildlife Service:

REPUBLICANS RENEW ATTACK ON ENDANGERED SPECIES ACT. The Summit County (CO) Citizens Voice (3/31, 506) reports that the Republican “anti-environment cadre in the House is once again taking aim at the Endangered Species Act by introducing legislation that would make it even harder for federal agencies to protect animals and plants that are at risk of going extinct.” According to the article, “two of the bills, H.R. 4316 and H.R. 4318, would limit the ability of citizens to challenge government decisions in court.” The “measures are also ostensibly aimed at reducing the government’s legal costs associated with responding to endangered species lawsuits, but conservation advocates said that is an ideological red herring.” The article notes that “government data shows that the Department of Interior has spent far more money responding to frivolous demands for documents than on settling lawsuits.”

In an editorial, the Ogden (UT) Standard-Examiner (3/31, 146K) supports changes to the Endangered Species Act. In particular, it agrees with Rep. Chris Stewart that the act “could do with a small change in how species are counted.” It argues that “animals have to be counted on public and private lands; otherwise the numbers are tainted and subject to dispute.”

FWS TAKES LIZARD OFF THREATENED LIST. The AP (4/1) reports that the FWS on Monday said that “a tiny lizard found only on Southern California’s Channel Islands has been removed from the federal list of threatened species after 37 years.” The agency said that “the island night lizard is no longer subject to its threatened status under the Endangered Species Act.” According to the article, “the move came after recovery efforts that included removing non-native species like goats and feral cats from the three islands the lizard calls home.”

WESTERN GOVERNORS ASSOCIATION REPORT DETAILS MONEY SPENT ON SAGE GROUSE CONSERVATION. The Casper (WY) Star-Tribune (4/1, 90K) reports that a new report by the Western Governors Association inventories “the efforts of 11 western states to protect the bird and its habitat.” The article notes that

"in Wyoming, the state spent \$7.9 million to create the Game and Fish sage grouse program, support local sage grouse working group projects like habitat treatment, enhanced population monitoring and applied research, the report said." Meanwhile, "Utah, by comparison, spent \$8.8 million on improvements to sage grouse habitat in 2013 alone."

FWS TO FUND \$1.6 MILLION BEACH RESTORATION ALONG DELAWARE BAY. WMGM-TV Wildwood, NJ (4/1, 2K) reports that the FWS will be "funding a \$1.65 million beach restoration project on the Delaware Bay." The work "aims to restore five beaches along the bay in Cape May County." It "intends to make coastline more resilient to storms and flooding while restoring seasonal spawning grounds for endangered horseshoe crabs."

FWS PLANS TO RELEASE WATER TO BENEFIT WHOOPING CRANES. KOLN-TV Lincoln, NE (4/1, 27K) reports that the FWS "plans to release water from their Environmental Account (EA) to benefit the endangered whooping cranes." The article notes that "whooping cranes use the Platte River in Nebraska as a stopover site during their migration in the Central Flyway north to Canada for the summer," and "additionally, hundreds of thousands of other migratory birds, including over half a million sandhill cranes, use the Platte River to roost and feed during the months of March and April."

PAPER ARGUES PUBLIC ACCESS KEY TO HANFORD REACH NATIONAL MONUMENT. In an editorial, the Tri-City Herald (WA) (3/31, 100K) raises concerns that the FWS "sees itself as legally obligated to consider bringing additional Hanford lands under its stewardship." According to the paper, "that has alarm bells sounding for local leaders, who already see too much public land in the monument that is off limits." The paper suggests that "as it pursues its obligations, Fish and Wildlife must take care not to appear as if it's attempting to make an end run around stakeholders," and "its next step ought to be some fence-mending with the community."

US Geological Survey:

USGS WARNS OF HOAX EARTHQUAKE LETTER IN SOUTHERN CALIFORNIA. The Los Angeles Times (4/1, Lopez, 2.38M) reports that USGS officials were "advising Southern California residents Monday evening about a hoax letter that is warning of an 'impending large quake.'" According to the article, "the letter with the agency's logo was apparently being sent to residents in Orange County, urging them to be prepared for a large quake."

Securing America's Energy Future:

Renewable Energy:

UTILITY FILES LAWSUIT CLAIMING FRAUD IN MONTANA WIND FARM DEAL. The AP (4/1, Brown) reports that "a California utility that invested in a Montana wind farm has accused the developer of fraudulently concealing that federal wildlife officials recommended the project get a permit in case it harms eagles." According to the article, "San Diego Gas & Electric and a subsidiary of Spanish wind developer NaturEner filed dueling lawsuits in California and Montana stemming from a dispute over the wind farm near Cut Bank." At issue is whether NaturEner "followed through on contractual obligations to protect eagles and other birds that nest near the 126-turbine Rim Rock wind farm."

GOVERNORS FROM FOUR STATES URGE CONGRESS TO EXTEND WIND ENERGY TAX CREDITS. In its "E2 Wire" blog, The Hill (4/1, Barron-Lopez, 76K) reports, "A bipartisan group of governors is calling on congressional leaders to pass a multi-year extension of tax credits for the wind energy industry." In a letter sent to Congress on Monday, governors from Iowa, Oregon, South Dakota, and the state of Washington "urged lawmakers to extend" the credit, which expired at the end of 2013. The letter from the Governors of the Wind Energy Coalition stated, "The livelihood of our citizens should not be sacrificed while longer-term, economy-wide tax code solutions are debated." But, notes The Hill, wind energy tax credit opponents "say the renewable source has grown enough to survive on its own in a competitive market."

Onshore Energy Development:

BLM EXTENDS LIFE OF THOMPSON DIVIDE LEASES. The Glenwood Springs (CO) Post Independent (4/1,

27K) reports that the BLM on Monday said "it would extend gas leases held by two energy companies in the disputed Thompson Divide area south of Glenwood Springs for another two years, while the agency works to remedy an admittedly 'deficient' environmental analysis that resulted in the leases being issued 11 years ago." The article notes that "the decision, which was expected to be formally announced by the BLM today, went against the wishes of several local governments and conservation groups that had objected to SG and Ursa requests for the lease extensions." On the other hand, "two energy industry groups said in a joint statement issued Monday afternoon that the BLM made the right decision."

Also reporting on the story is the [Grand Junction Daily Sentinel](#) (4/1, 73K).

OIL IMPACT ON THEODORE ROOSEVELT NATIONAL PARK TO BE DOCUMENTED. The [Bismarck \(ND\) Tribune](#) (4/1, 10K) reports that the National Parks Conservation Association will "team up with oil and gas data mappers FracTracker to document the oil boom experience of Theodore Roosevelt National Park." The group is "looking for up to 20 volunteers willing to spend an expense-paid weekend in the park documenting how oil and gas development affect the park to help educate the nation."

POSSIBLE EXPANSION OF COAL-MING AT FOUR CORNERS POWER PLANT CONCERNS CONSERVATIONISTS. The [Cronkite News](#) (4/1) reports that "conservation groups are worried that a proposed expansion of coal-mining at the Four Corners Power Plant could reverse recent environmental gains at the plant that last year was on a list of dirtiest in the country." However, "officials with Arizona Public Service, which is a majority owner in the plant, said the proposal is a step forward for the plant both economically as well as environmentally."

Offshore Energy Development:

COURT DISMISSES ENVIRONMENTALISTS' CHALLENGE TO GULF OF MEXICO LEASE SALE. The [Charlotte \(NC\) Observer](#) (3/31, 495K) reports that "a federal judge on Monday rejected environmentalists' challenge to a Gulf of Mexico lease sale." Oceana and the Natural Resources Defense Council had "joined with other groups in fighting what they described as the 'first new lease sale since the Deepwater Horizon disaster,' in which some 200 million gallons of oil spilled into the Gulf in April 2010." But "in a 64-page decision, US District Judge Rudolph Contreras sided with the Bureau of Ocean Energy Management's handling of Lease Sales 216/222 and 218." According to the article, "among many other arguments, Contreras said it was not unreasonable that the National Marine Fisheries Service won't have its Biological Opinion assessing the lease sale finished until March 2015."

Also reporting on the story is the [Law 360](#) (4/1, 18K).

BOEM EXTENDS COMMENT PERIOD ON ENVIRONMENTAL GUIDELINES FOR OIL, GAS TESTING. The [AP](#) (4/1) reports that the BOEM has "added 30 more days for the public to weigh in on its guidelines for seismic testing in Atlantic waters for oil and gas reserves." The bureau says "the public now has until May 7 to comment on the rules."

WORKSHOPS PLANNED ON OFFSHORE VOLUNTARY NEAR-MISS REPORTING SYSTEM. The [Oil and Gas Journal](#) (4/1, 1K) reports that "workshops will be held Apr. 22 in Los Angeles and Apr. 24 in Houston to discuss the federal government's new voluntary near-miss reporting system for oil and gas producers," the BSEE announced in a Mar. 31 Federal Register notice. According to the article, "the workshops will give producers, drilling contractors, service and supply companies, other stakeholders, and the general public opportunities to discuss the system and contribute to its development, it indicated."

Tackling America's Water Challenges:

MOST NEW MELONES LAKE RECREATION FACILITIES TO OPEN APRIL 1. The [Stockton \(CA\) Record](#) (4/1, 123K) reports that "most recreation facilities at New Melones Lake will be open to the public on April 1," according to the BOR's Central California Area Office.

9TH CIRCUIT DECISION ON DELTA SMELT LAUDED. In an op-ed for the [San Jose \(CA\) Mercury News](#) (4/1,

555K), Trip Van Noppen, the president of Earthjustice, and Barbara Barrigan-Parilla, the executive director of Restore the Delta, applaud the ruling handed down by the 9th Circuit Court of Appeals, which upholds protections for the Delta smelt. They claim that "our efforts to improve flows through the Delta for the smelt have beneficial effects on the entire ecosystem and the complex web of life it supports." They conclude that "the Delta smelt decision doesn't just protect a fish so tiny it's not even used as bait. It protects people and their very way of life."

Empowering Native American Communities:

INDIAN EDUCATION STUDY GROUP SEEKS INPUT. The Indian Country Today Media Network (3/31, 16K) reports that "the Department of the Interior, in conjunction with the US Department of Education (ED), will conduct a series of consultation sessions with Indian tribes to review and provide feedback on the draft actionable recommendations prepared by the American Indian Education Study Group." According to the article, "the study group previously engaged with tribal leaders and Indian educators in six listening sessions on improving Indian education for BIE to develop draft actionable recommendations," and "based on input from these listening sessions, the study group has identified a framework for reform with a goal of high-achieving tribally controlled schools."

INFANT'S DEATH ON WIND RIVER INDIAN RESERVATION UNDER INVESTIGATION. The Casper (WY) Star-Tribune (4/1, 90K) reports that the FBI is assisting the BIA and the Fremont County Coroner "in an investigation into the death of an infant on the Wind River Indian Reservation, the FBI reported Monday." According to Special Agent Chris Calarco of the FBI, "an infant died on the reservation on or around Wednesday and that an autopsy was conducted Friday."

Top National News:

HEALTHCARE.GOV "GLITCHES" MAR FINAL-DAY ACA ENROLLMENT SURGE. The last day of open enrollment for Affordable Care Act coverage garnered a great deal of media attention, including almost eight minutes of coverage from the three network newscasts Monday evening. Much of the coverage reflects the Administration's recent optimism regarding the expected enrollment totals. On the CBS Evening News (3/31, story 3, 1:15, Pelley, 5.58M), for example, Scott Pelley reported that the Administration "expected seven million would sign up by today," and President Obama now anticipates that the total will be "just short of that." CBS also played a clip of the President detailing the progress that has been made in regards to the ACA's implementation from an interview the President sat for with Pelley last week. However, the Administration's efforts to draw attention to the surge of enrollees were overshadowed somewhat by HealthCare.gov's persistent technical problems, which caused the site to be offline for several hours on Monday morning and prevented applications from being submitted later in the day.

In a report for NBC Nightly News (3/31, story 5, 2:25, Williams, 7.86M), correspondent Peter Alexander said that "a few months ago, there were real questions whether or not the law would work at all," but on Monday, "the White House...tout[ed] a new flood of sign-ups." The AP (4/1, Alonso-Zaldivar, Lederman) reports that according to unidentified "government officials," the ACA is "on track to sign up more than 7 million Americans for health insurance," which the AP says is a "target...thought to be out of reach by most experts." Likewise, under the headline, "Health Sign-ups Surge Toward 7M," USA Today (4/1, O'Donnell, Madhani, Locker, 5.82M) reports that by "late Monday," an anonymous "government official" said "the administration is on track to sign up 7 million people by the midnight deadline."

At the opening of MSNBC's The Ed Show (3/31, 449K), Ed Schultz predicted that the President will extend the enrollment period "again" in order to get as many people signed up as possible. According to Schultz, "estimates reveal that 13 million people gained health care" as a result of the ACA's passage "if you factor in the young people under 26 staying on their parents' policy."

On MSNBC's The Rachel Maddow Show (3/31), Rachel Maddow contended that the last-minute crush of uninsured online and at enrollment centers is proof that the ACA will not collapse into a "death spiral" as predicted by many of the law's critics. According to Maddow, "This is not too few people signing up; this is too many people trying to sign up." Maddow then made the case that Republicans' midterm strategy "to crow about the obvious failure of health reform" is no longer viable because "health reform isn't failing."

On NBC Nightly News (3/31, story 5, 2:25, Williams, 7.86M), Brian Williams reported that “with the last minute surge and people rushing to beat the clock today came new glitches with the website.” Peter Alexander went on to report that “for a while today it seemed like the healthcare.gov website may finish the way it started – offline briefly this morning due to a software bug, and again this afternoon preventing new applicants from logging in.”

On ABC World News (3/31, story 2, 2:10, Sawyer, 7.43M), correspondent Jon Karl reported that there are “still glitches” hampering healthcare.gov, which was “down for hours” on Monday. Karl also reported that “many questions are still unanswered, including how many people have actually paid to enroll,” and “how many of those who have signed up have actually paid?”

At the opening of Fox News’ Special Report (3/31, 2.15M), Bret Baier said, “The same type of failures, glitches, and misinformation that have haunted the [ACA] from day one are still lurking, even today.”

The site’s “glitches” were covered by all three networks on Monday, and many print and online reports reference the technical problems in their headlines. For instance, the Washington Post (4/1, A1, Goldstein, Sun, 2.33M) has a front-page article titled online, “HealthCare.gov Stumbles On Deadline Day As Consumers Race To Sign Up For Insurance.” The AP (4/1, Alonso-zaldivar) uses the headline, “Glitches Slow Health Care Sign-ups,” and the Wall Street Journal (4/1, Ante, Subscription Publication, 4.25M) titles its report, “HealthCare.gov Glitch Prevents Users From Creating New Accounts.” The online version of a front-page piece in this morning’s New York Times (4/1, Pear, Subscription Publication, 5.41M) is headlined, “Health Website Failures Impede Signup Surge As Deadline Nears,” but the print edition uses, “On Final Day, Health Signups Reach Frenzy.” Notably, like the New York Times, the print edition of the Washington Post also uses a shorter, less critical headline employing the word “frenzy” in its print edition – in the Post’s case, it is “HealthCare.gov Hiccups Amid Deadline-Day Frenzy.”

On the CBS Evening News (3/31, story 2, 1:55, Pelley, 5.58M), Scott Pelley reported that “since Saturday, healthcare.gov has had more than four million visits,” which “overwhelmed the site,” causing it to go “down twice” on Monday. Correspondent Vincente Arenas reported from an “enrollment center” in Miami established by insurance agent Odalis Arevalo where “people started lining up...at 3:30 this morning,” and “by noon more than a thousand had come...to try to sign for Obamacare.” Arevalo was shown saying, “It’s very difficult. ... We’ve had very angry people...lined up since very early and walking away with just nothing.”

The AP (4/1, Alonso-zaldivar) reports that “deadline day...brought long, frustrating waits and a new spate of website ills.” According to the AP, “at times” on Monday, “more than 125,000 people were simultaneously using HealthCare.gov, straining it beyond its capacity,” and so “for long stretches...applicants were shuttled to a virtual waiting room where they could leave an email address and be contacted later.” The AP also reports that healthcare.gov “stumbled early in the day – out of service for nearly four hours as technicians patched a software bug” – and then “another hiccup in early afternoon temporarily kept new applicants from signing up.”

Politico (4/1, Kenen, Cheney, 73K) also focuses on HealthCare.gov’s “glitches,” reporting that the site “endured renewed technical problems on Monday, creating serious obstacles for people trying to sign up before the midnight deadline and stirring up bad memories of the botched October launch.” According to Politico, “The website was down six hours early in the day,” and then “around noon...people trying to start accounts for the first time couldn’t do so.”

In an article titled, “HealthCare.gov Falters, But Enrollments Continue As Official Sign-up Period Ends,” McClatchy (4/1, Pugh, Subscription Publication, 13K) also reports that HealthCare.gov “faltered several times on Monday due to problems from heavy usage.” On Monday, The Hill (3/31, Easley, 76K) reported that the Administration was “taking to Twitter to tell those experiencing problems that they’ll be accommodated in the case that they don’t make it through on Monday.”

The Washington Post (4/1, A1, Goldstein, Sun, 2.33M) reports that HealthCare.gov “faltered on and off throughout the day.” However, according to the Post, “The outpouring of last-minute interest reinforced arguments by the Obama administration and its allies...that [the ACA] would become popular once Americans had a chance to get the new health plans that it spawned – and, in most cases, with federal subsidies to help pay for them.” Likewise, according to the Huffington Post (4/1, Young, 11.54M), “evidence appears to be mounting that what

started as a disaster may turn out a success.”

Carney: “No One Expected Us To Come Back From The Brink.” On NBC Nightly News (3/31, story 5, 2:25, Williams, 7.86M), correspondent Peter Alexander reported that the White House says “substantially more than six million people have signed up,” but “it will be a couple of weeks before we get the final enrollment numbers” and “may be a couple of years before we truly know how well the law works.” According to Jon Karl, on ABC World News (3/31, story 2, 2:10, Sawyer, 7.43M), the White House “says six million have signed up, but they haven’t been able to say how many of them were previously uninsured.”

Robert Pear, in a front-page analysis for the New York Times (4/1, Pear, Subscription Publication, 5.41M), reports that on Monday, the White House “embarked on a kind of victory lap,” and that “Administration officials” are “confident that they would reach their original goal of having seven million people sign up for private health plans.” However, according to Pear, “the end of the open enrollment period, which began six months ago with the disastrous debut of healthcare.gov, “starts a new phase likely to be defined by the economics of health insurance as well as by politics.”

Similarly, the Washington Times (4/1, Howell, 230K) reports that White House Press Secretary Jay Carney “did a victory lap of sorts Monday and said the law’s foes are ‘grasping’ for criticism when they say the administration cooked up its enrollment numbers.” Carney is quoted as saying, “If we were cooking the books, don’t you think we would have cooked them in October and November? We could have saved ourselves a lot of pain.”

McClatchy (4/1, Wise, Subscription Publication, 13K) notes that on Sunday, Sen. John Barrasso said he “didn’t believe the enrollment numbers released by the administration,” and alleged that the Administration is “cooking the books.”

Reuters (4/1, Morgan) reports that on Monday, Carney said, “We’re looking at a number substantially larger than 6 million people enrolled.” According to Reuters, Carney added, “No one expected us to come back from the brink, but we have – and I think that merits noting in your reports.”

Mark Trumbull, in an analysis for the Christian Science Monitor (4/1, Trumbull, 384K), says that as for “Obamacare’s central stated goal of reducing the number of uninsured Americans, the law is having an impact but maybe not as fast as hoped.” Trumbull adds, “don’t assume that all the enrollees are people who were previously uninsured,” and notes that a “survey by the consulting firm McKinsey found in February that only about 1 in 4 enrollees came from the ranks of the uninsured.”

Sebelius Claims That 80 To 90% Of Enrollees Have Paid Premiums. McClatchy (4/1, Pugh, Subscription Publication, 13K) notes in an interview Monday, HHS Secretary Sebelius “estimated that ‘80, 85, some say as high as 90 percent,’ of new enrollees have paid their premiums.”

Aaron Blake, in a online piece for the Washington Post (4/1, Blake, 2.33M) reports that on Oklahoma City’s KWTW, Sebelius said, “What we know from insurance companies ... tell(s) us that, for their initial customers, it’s somewhere between 80, 85, some say as high as 90 percent, have paid so far.”

The Hill (3/31, Easley, 76K) reported that in the same interview, Sebelius “declined to respond” when a reporter said that “at last check, 64 percent of Oklahomans aren’t buying into the healthcare plan, they don’t like ObamaCare, and they’ve been pretty vocal about it.” According to The Hill, “The reporter didn’t ask a question, and Sebelius didn’t respond to the criticism, leading to several moments of dead air.”

The Daily Caller (3/31, May, 135K) says Sebelius “did not respond, instead staring blankly into the camera for about six seconds without saying a word,” which caused the reporter to “question...if the audio had gone out on her end.” Sebelius replied, “I can hear you, but I — thanks for having me.”

Biden Urges The Uninsured To “Get In The Queue.” On NBC Nightly News (3/31, story 5, 2:25, Williams, 7.86M), Peter Alexander noted that on Monday “on daytime TV, Vice President Joe Biden tried to reassure those who waited,” and “the First Lady even enlisted help to make a pitch.” On ABC World News (3/31, story 2, 2:10, Sawyer, 7.43M), Jon Karl also reported that Biden “visited an enrollment center in Washington and made a last-minute pitch with Rachael Ray.” Biden: “Any young person listening, if you don’t need this for your peace of

mind, do it for mom. Do it for your dad. Get health coverage, do it for mom.”

USA Today (3/31, Madhani, 5.82M) reported that Biden “appeared in a pre-taped video call on the Rachael Ray Show,” and “underscored that any Americans who are in process of signing up for health care as of midnight will be eligible to sign up even if they aren’t able to complete enrollment by the end of the day.” Biden is quoted as saying, “It’s a little bit like people when the polls close at 8 and there are 100 people waiting, they get to vote. ... Get in the queue. There is still time today.”

In his opening monologue for Fox News’ The O’Reilly Factor (4/1, 2.53M), Bill O’Reilly said that, in practice, “there is no deadline” for ACA enrollment because the law’s “rollout” is in “complete chaos, so sign up when you want – just tell the IRS you had trouble with the web site, everybody does, that’s all you got to do.”

The Daily Caller (3/31, Hurtubise, 135K) noted that “while Monday is technically the final day of the open enrollment...the Obama administration will allow anyone who checks a box claiming technological problems while signing up to enroll until an unspecified date in mid-April.”

The AP (4/1, Lederman, 11.54M) reports that at the Carlos Rosario International Public Charter School, “a few miles from the White House,” Biden also “told people waiting at the school that once they have health care, they won’t have to stay in a job they don’t like.”

Enrollment Period In Oregon Extended Through The End Of April. In an article published Monday morning titled, “Obamacare In Oregon: A Failed Exchange,” Politico (3/31, Haberkorn, 73K) reported that while Oregon “had all the right ingredients for a sparkling Obamacare success story,” including “a Democratic doctor as governor,” the state nevertheless “ended up with Obamacare’s biggest technological disaster.” According to Politico, CoverOregon.com is “the only insurance exchange in the country on which people still cannot buy coverage,” and its “flaws are so deep that Gov. John Kitzhaber concedes the state may give up on its own exchange and move to the federal HealthCare.gov next year.” Politico notes that Oregon’s “challenges were so persistent that the state received federal permission to add a full month to its open enrollment season.”

LA Times Analysis: California’s Enrollment Extension Is “Essentially On The Honor System.” The Los Angeles Times (4/1, Terhune, Levey, Karlamangla, 2.38M) reports that on Monday, California officials “overrun by last-minute demand for Obamacare coverage...gave many consumers until April 15 to enroll.” According to the Times, “anyone who tried to enroll by Monday and faced difficulties now has until April 15 to finish an application,” and “no proof is required, so it’s essentially on the honor system.”

Celebrities, Planned Parenthood Assist Last-Day Signup Campaign. The Los Angeles Times (4/1, Reston, 2.38M) reports that on Monday, “longtime Obama allies in Hollywood and the music industry, including John Legend, Kerry Washington, Connie Britton, Zooey Deschanel and Sarah Silverman took to Twitter” to urge their followers to seek coverage via the ACA exchanges. The Times reports that also on Monday, Planned Parenthood “said its 600 canvassers had been knocking on an average of 29,000 doors a day, armed with tablets that allowed families to complete their applications online right then.”

Several States’ Incomplete Enrollment Totals Noted. The Miami Herald (4/1, Chang, Borns, 667K) reports that HHS has reported that “of the more than 6 million Americans who selected health plans through February, more than 440,000 were Floridians — exceeding every other state relying on the federally-run insurance exchange” — and “an additional 125,000 Floridians were assessed eligible for Medicaid.”

Politico (3/31, Haberkorn, 73K) reported that the state of Washington “had enrolled more than a half-million people as of March 20 — more than 125,000 of whom who got private insurance coverage in the exchange, (plus another 66,000 who have chosen a plan but not yet paid) and about 380,000 newly enrolled in Medicaid.”

The Milwaukee Journal Sentinel (4/1, Boulton, 604K) reports that “through February, 71,443 people in Wisconsin had picked a health plan sold on the federal marketplace, with 90% of them eligible for subsidized coverage,” while “an additional 68,655 people were found to be eligible for BadgerCare Plus, the state’s largest Medicaid program.”

GOP HAMMERING OBAMA’S “IMPERIAL PRESIDENCY” AHEAD OF MIDTERM ELECTIONS. The New York

Times (4/1, Parker, Subscription Publication, 5.41M) reports, "If Republicans have a rallying cry" to fire up their base ahead of this year's elections, it's the party's "unified anthem" charging that President Obama "is presiding over an 'imperial presidency' that is exercising power that verges on dictatorial." For the GOP, says the Times, it's a rallying cry "that encapsulates their criticisms about government overreach through Mr. Obama's prolific use of executive action." The slogan "not only captures existing voter frustration over the Affordable Care Act and turns it, Republicans believe, into a broader referendum on" Obama's presidency, "but also reflects an underlying conservative philosophy about the appropriate role of government."

Study: Administration Skirting Congressional Review Of Regulations. The Washington Times (4/1, Boyer, 230K) reports that the Obama Administration "is skirting congressional review of some major federal regulations by failing to designate the rules as economically significant, according to a study" set for release today by the American Action Forum, "a center-right nonprofit group." The organization says in its report that "it found at least eight administration regulations that have an annual economic impact of \$100 million or more, but which were not designated as 'major' rules by the White House Office of Information and Regulatory Affairs (OIRA) and therefore don't fall under the Congressional Review Act." However, White House Office of Management and Budget spokesman Frank Benenati "disputed the study's accuracy," saying that "even the most cursory read [of the report] shows that it is deeply flawed. For example, some of the rules it cites were clearly identified as 'major' rules on reginfo.gov."

YELLEN SUGGESTS THAT STIMULUS EFFORTS TO CONTINUE FOR SOME TIME. Reuters (4/1, Spicer) reports that Fed Chair Janet Yellen on Monday publicly defended the central bank's easy money policies during a stop in Chicago. Yellen highlighted the struggles of three Americans during her speech, as she sought to show the impact of the current economy on the jobs prospects of everyday people. It was Yellen's first public speech in her new role.

Bloomberg News (4/1, Kearns, Torres, 392K) reports that at a community development conference, Yellen, "easing investor concern that interest rates may rise earlier than previously forecast," said that the economy will continue to need the Fed's stimulus efforts for a considerable time. Yellen said, "This extraordinary commitment is still needed and will be for some time, and I believe that view is widely shared by my fellow policy makers. The scars from the Great Recession remain, and reaching our goals will take time." Bloomberg adds that the large number of unemployed Americans, stalled wage growth, a drop in labor-force participation and long periods of unemployment show that "there remains considerable slack in the economy and the labor market," Yellen said.

The New York Times (4/1, Appelbaum, Subscription Publication, 5.41M) reports that Yellen "devoted more than an hour last week talking by telephone with three Chicago area residents struggling to find jobs," and on Monday, "made their stories the centerpiece of the first public speech in her new job." She delivered "a strong statement about her concern over unemployment, her conviction that the Fed has the power to help, and her determination to do so."

The Wall Street Journal (4/1, Costa, Hilsenrath, Subscription Publication, 4.25M) describes Yellen's speech as unusually personal for a Fed chair. The Journal reports she said, "While there has been steady progress, there is also no doubt that the economy and the job market are not back to normal health. The recovery still feels like a recession to many Americans, and it also looks that way in some economic statistics." Yellen followed her speech with a tour of a local community college.

Stocks Rally, Post Solid Gains On Final Day Of Quarter. On the final day of a quarter that saw the markets churn, the Wall Street Journal (4/1, Strumpf, Subscription Publication, 4.25M) reports that stocks rose strongly. The Dow Jones Industrial Average was up 135 points to 16458, while the S&P 500 rose 15 points to 1872. The Nasdaq Composite Index rose 43 points to 4199. For the quarter, the Dow was down 0.7%, while the S&P 500 was up 1.3%.

Feldstein Says Fed Needs To Enunciate Inflation Response Plan. In an op-ed for the Wall Street Journal (4/1, Feldstein, Subscription Publication, 4.25M), Harvard professor Martin Feldstein argues that Yellen needs to make it clear what the Fed will do if inflation exceeds its target of 2%. Feldstein says that history has shown that inflation can rise rapidly and unexpectedly. In the current situation, it could arise if banks begin to loan substantial sums to businesses, leading to inflationary increases in demand. Feldstein says Yellen need to assure the nation that, should this occur, the Fed will move rapidly and decisively to curb inflation.

Editorial Wrap-Up:

NEW YORK TIMES. *"Climate Signals, Growing Louder."* An editorial in the New York Times (4/1, Subscription Publication, 5.41M) calls a UN panel's report on climate change the "most powerful and sobering assessment so far" and notes that its conclusions "mirrored those of a much shorter but no less disturbing report issued two weeks ago by the American Association for the Advancement of Science." The studies "suggest virtually no disagreement" and advocates hope "that the latest show of scientific solidarity will clear up any confusion about the causes and consequences of climate change and the need for action."

"Leading The Country On Pre-K." In an editorial, the New York Times (4/1, Subscription Publication, 5.41M) says that NYC Mayor Bill de Blasio "has every right to call the agreement between Gov. Andrew Cuomo and legislative leaders in Albany to finance a vast expansion of prekindergarten in New York City a major victory," both for the mayor politically and for "tens of thousands of children who will be put on a path to a better future." Now, the city is "poised to make a commitment to preschool on a larger scale than any city in the country."

"Prime Minister Erdogan's Revenge." An editorial in the New York Times (4/1, Subscription Publication, 5.41M) calls Turkish Prime Minister Recep Tayyip Erdogan's response to Sunday's election results "deeply disturbing and undemocratic," noting that his "postelection threats were particularly ominous, as he told thousands of supporters that his enemies will be 'brought to account' and 'we will enter their lair.'" His response, notes the Times, "shows how far Mr. Erdogan has departed from democratic principles that allow dissent." Erdogan "seems determined to crush anyone or anything who crosses him — a strategy almost certainly guarantees more dangerous political polarization and instability in Turkey."

WASHINGTON POST. *"Shutting Out Ukraine."* An editorial in the Washington Post (4/1, 2.33M) argues that the Obama Administration approach to seeking a diplomatic solution to the Ukraine crisis "is unbalanced." The Administration "should insist that Ukraine's representatives be present in all meetings and that Crimea be put back on the agenda." In addition, as negotiations move forward, "so should work on sanctions."

"Back In The Breakdown Lane." In an editorial, the Washington Post (4/1, 2.33M) says that for GM, "still struggling to shake off the 'Government Motors' stigma, the [recall] fiasco is a reminder that, despite much progress, its renaissance is incomplete." CEO Mary Barra "must use her testimony before Congress on Tuesday to demonstrate credibly that she is on top of the company's quality problems, past and, more important, future."

"The Post's Endorsements."

WALL STREET JOURNAL. *"The Definition Of Insanity."* In an editorial, the Wall Street Journal (4/1, Subscription Publication, 4.25M) excoriates the actions of Samhsa, arguing it uses its \$3.6 billion annual budget to undercut the effective treatment of the mentally ill. The Journal says that instead of backing traditional drug treatment, psychiatric care and related treatments, Samsha backs alternative treatments based on the recovery model. While the Journal acknowledges that the recovery model can aid those with minor mental illnesses, it says that is basically useless for treating serious mental disorders. The Journal says that if Congress can't find a way to abolish Samsha, it should at least pass legislation to provide greater oversight.

"Decamping Congress." In an editorial, the Wall Street Journal (4/1, Subscription Publication, 4.25M) says that Rep. Dave Camp's (R) retirement is a major loss for Congress, as he has been a serious and thorough proponent of needed tax reform. The Journal also bemoans the retirement of Rep. Mike Rogers (R), who announced last week he would not seek reelection, saying that Congress needs his seriousness on intelligence issues.

"Erdogan Marches On." An editorial in the Wall Street Journal (4/1, Subscription Publication, 4.25M) notes that in the wake of his Justice and Development Party's (AKP) victories in Sunday's municipal elections, Turkish Prime Minister Recep Tayyip Erdogan declared that "tomorrow there may be those who have to flee. But we will go into their caves. They will pay the price." The Journal says that Erdogan has polarized Turkey as he has become more willful and authoritarian, and notes that Erdogan is demonstrating that populist democracy can lead to sectarian autocracy.

"Pakistan Punts On India Trade." In an editorial, the Wall Street Journal (4/1, Subscription Publication, 4.25M) argues that Pakistani Prime Minister Nawaz Sharif should reconsider his decision not to extend most-favored-nation trade status to India, noting that doing so would help to improve Pakistan's economy.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Receives the Presidential Daily Briefing; honors the 2013 World Series Champion Boston Red Sox, South Lawn; meets with House Democratic Leader Pelosi for lunch, Private Dining Room, closed press; meets with Secretary of Commerce Pritzker, Oval Office, closed press.

VICE PRESIDENT BIDEN — Receives the Presidential Daily Briefing; meets with Secretary of Commerce Pritzker, Oval Office, closed press.

US Senate: April 1 – 4. LANDMINE AWARENESS — The Mines Advisory Group (MAG) along with Senator Patrick Leahy and the reception hosted by Senator Bob Casey with remarks planned from Senator Leahy (VT), Senator Bob Casey (PA), Congressman Jim McGovern (MA), and Undersecretary of State for Arms Control and International Security, Rose Gottemoeller hosts exhibit on Capitol Hill to celebrate its 25th anniversary and honor the International Day for Mine Awareness and Assistance in Mine Action, MAG America. Surviving the Peace: Landmines, Mortars and Munitions -25 Years of Humanitarian Mine Action. NOTE: Reception and speakers on the 2nd at 4p.m. Contact: Patricia Loria, MAG America (202)531-6513 5/8 patricia.loria@maginternational.org 4 p.m. – 6 p.m. Reception and remarks by Senators, Congressmen, and State Department officials. Location: The Rotunda of the Russell Senate Office Building.

10 a.m. IGNITION SWITCH – FAMILIES — Families of victims of the GM ignition switch problem hold a press conference in advance of the House Energy and Commerce Subcommittee on Oversight and Investigations Hearing, "The GM Ignition Switch Recall: Why Did It Take So Long?" (Hearing begins at 2 p.m. in 2123 Rayburn House Office Building – GM CEO Mary Barra and NHTSA Acting Administrator David Friedman to testify). Press conference speakers: Joan Claybrook, President Emeritus of Public Citizen, and former Administrator of the National Highway Traffic Safety Administration; Senator Edward Markey (D-MA); Senator Richard Blumenthal (D-CT); Rosie Cortinas (Idaho) Mother of Amador Cortinas (Homedale, ID) who was killed on October 18, 2013, while driving a friend home in a Chevy Cobalt. Amador lost control of the car, and his air bags did not deploy.

Terry DiBattista (South Carolina) and Laura Christian (Maryland) Mother and birth mother of Amber Marie Rose (Marbury, MD), killed on July 29th, 2005 when the car she was driving struck multiple trees. Her airbags did not deploy. Emergency medical personnel have indicated that she would still be alive if her air bags had worked. The car was in the accessory position.

Ken and Jayne Rimer (Wisconsin) and Douglas Weigel (Minnesota) Parents of Natasha Weigel (Albert Lea, MN), killed on October 24, 2006, when she was riding in the car with two of her friends. The driver, who suffered brain damage as a result of the crash, lost control of the car and hit a tree. The airbags did not deploy; Mary and Leo Ruddy (Pennsylvania) Parents of Kelly Erin Ruddy (Scranton, PA), killed on January 10, 2010, when she burned alive after losing control of her vehicle. It is unknown whether her car was in the accessory position, as GM took possession of the black box and will not return it or share the information found on it; Clarence Ditlow, Executive Director of the Center for Auto Safety. Location: Senate Swamp, in front of the U.S. Capitol Building, Senate side.

10:15 a.m. 'PAYCHECK FAIRNESS ACT' — Sen. Barbara A. Mikulski (D-MD), a senior member of the Senate

Health, Education, Labor and Pensions (HELP) Committee, will be joined at a press conference by Rep. Rosa DeLauro (D-CT) and Sens. Mary Landrieu (D-LA.), Amy Klobuchar (D-MN), Jeanne Shaheen (D-NH), Tammy Baldwin (D-WI) and Elizabeth Warren (D-MA) along with representatives of the American Civil Liberties Union (ACLU) and the National Women's Law Center (NWLC) to urge the Senate to take up and pass the Paycheck Fairness Act, legislation which will "help close the wage gap between women and men working equivalent jobs." Location: Mike Mansfield Room (S-207).

5 p.m. – 7 p.m. SENATE AEROSPACE CAUCUS RECEPTION — Senate Aerospace Caucus Reception "Defending Innovation: Modern Life Redefined." Senate Aerospace Caucus Co-Chairs: Sen. Patty Murray (D-Wash.); Sen. Saxby Chambliss (R-Ga.); Dr. Arati Prabhakar, Director of DARPA; Marion C. Blakey, AIA President and CEO. Location: 902 Hart Senate Office Building, Constitution Ave, between First and Second Streets, NE.

9:30 a.m. ARMED SERVICES — Committee hearings to examine U.S. European Command and U.S. Transportation Command in review of the Defense Authorization Request for fiscal year 2015 and the Future Years Defense Program. Witnesses: General Philip M. Breedlove, USAF Commander, U.S. European Command/Supreme Allied Commander, Europe; General William M. Fraser III, USAF, Commander, U.S. Transportation Command. http://www.armed-services.senate.gov/hearings/us-european-command-and-us-transportation-command_04/01/14 Location: G50 Dirksen

9:30 a.m. HOMELAND SECURITY & GOVERNMENTAL AFFAIRS — Permanent Subcommittee on Investigations Hearing, "Caterpillar's Offshore Tax Strategy." The Subcommittee will continue its examination of the structures and methods employed by multinational corporations to allocate income outside of the United States and how such activities are affected by the Internal Revenue Code and related regulations. Witnesses will include representatives of Caterpillar Inc. and PricewaterhouseCoopers LLP, as well as tax experts: Witnesses: PANEL ONE: Bret Wells, Assistant Professor of Law, University of Houston Law Center, Houston, TX; Reuven Avi-Yonah, Irwin I. Cohn Professor of Law, The University of Michigan School of Law, Ann Arbor, MI. PANEL TWO: Steven Williams, Managing Director, PricewaterhouseCoopers LLP, McLean, VA; James Bowers, Tax Partner, PricewaterhouseCoopers LLP, Dallas, TX; Thomas Quinn, Tax Partner, PricewaterhouseCoopers LLP, Chicago, IL. PANEL THREE: Robin Beran, Chief Tax Officer, Caterpillar Inc., Peoria, IL; Rodney Perkins, Former Senior International Tax Manager, Caterpillar Inc., Peoria, IL; Julie Lagacy, Vice President, Finance Services Division, Caterpillar Inc., Peoria, IL. <http://www.hsgac.senate.gov/subcommittees/investigations/hearings/caterpillars-offshore-tax-strategy> Location: 106 Dirksen.

10 a.m. BUDGET — Committee hearings to examine opportunity, mobility, and inequality in today's economy. Witnesses: Joseph Stiglitz, PhD., University Professor of Economics, Columbia University; Raj Chetty, PhD., William Henry Bloomberg Professor of Economics at Harvard University; Keith Hall, PhD., Senior Research Fellow, Mercatus Center. <http://www.budget.senate.gov/republican/public/index.cfm/hearing-schedule?ID=e0eb88a8-56e8-4f6d-856d-92a5a019ab43> Location: 608 Dirksen

10 a.m. JUDICIARY — Committee hearings to examine certain nominations. <http://www.judiciary.senate.gov/meetings/judicial-nominations-2014-04-01> Location: 226 Dirksen

2:15 p.m. ARMED SERVICES — Subcommittee on Emerging Threats and Capabilities hearings to examine proliferation prevention programs at the Department of Energy and at the Department of Defense in review of the Defense Authorization Request for fiscal year 2015 and the Future Years Defense Program; with the possibility of a closed session in SVC-217 following the open session. Witnesses: Anne M. Harrington Deputy Administrator For Defense Nuclear Nonproliferation National Nuclear Security Administration Department Of Energy; Rebecca K. C. Hersman, Deputy Assistant Secretary Of Defense For Countering Weapons Of Mass Destruction Department Of Defense; Kenneth A. Myers III, Director Of The Defense Threat Reduction Agency Department Of Defense, Director of the U.S. Strategic Command Center For Combating Weapons Of Mass Destruction Department Of Defense. http://www.armed-services.senate.gov/hearings/proliferation-prevention-programs-at-the-department-of-energy-and-at-the-department-of-defense_04/01/14 Location: 222 Russell

2:15 p.m. FOREIGN RELATIONS — Business meeting to consider Protocol Amending the Convention between the and the Swiss Confederation for the Avoidance of Double Taxation; Protocol Amending the Convention between the Government of the and the Government of the Grand Duchy of Luxembourg for the Avoidance of

Double Taxation and the Prevention of Fiscal Evasion; Convention between the Government of the US and the Government of the Republic of Hungary for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion; Convention Between the Government of the US and the Government of the Republic of Chile for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion; Protocol Amending the Convention on Mutual Administrative Assistance in Tax Matters, expressing the sense of the Senate concerning the humanitarian crisis in Syria and neighboring countries, resulting humanitarian and development challenges, and the urgent need for a political solution to the crisis. <http://www.foreign.senate.gov/hearings/business-meeting-04-01-14> Location: S-116

2:30 p.m. COMMERCE, SCIENCE, AND TRANSPORTATION — Subcommittee on Communications, Technology, and the Internet hearings to examine reauthorization of the "Satellite Television Extension and Localism Act". Witness Panel 1: William T. Lake, Chief, Media Bureau, Federal Communications Commission; Gordon Smith, President and Chief Executive Officer, National Association of Broadcasters; Michael W. Palkovic, Executive Vice President, Operations, DirecTV; Michael K. Powell, President and Chief Executive Officer, National Cable & Telecommunications Association; Thomas S. Rogers, President and Chief Executive Officer, TiVo, Inc.; Matt Wood, Policy Director, Free Press. http://www.commerce.senate.gov/public/index.cfm?p=Hearings&ContentRecord_id=23352a01-e1a7-47b0-9a56-27e88e76e378&ContentType_id14f995b9-dfa5-407a-9d35-56cc7152a7ed&Group_idb06c39af-e033-4cba-9221-de668ca1978a Location: 253 Russell

2:30 p.m. HEALTH, EDUCATION, LABOR, AND PENSIONS — Committee hearings to examine equal pay with the "Paycheck Fairness Act." Witnesses: Professor Deborah Thompson Eisenberg, Associate Professor of Law, University of Maryland Francis King Carey School of Law, Baltimore, MD; ReShonda Young, Operations Manager, Alpha Express, Inc., Waterloo, IA; Kerri Sleeman, Mechanical Engineer, Houghton, MI; Camille Olson, Partner, Seyfarth Shaw, Chicago, IL. <http://www.help.senate.gov/hearings/hearing/?id=f5239448-5056-a032-52ba-0aa8f38ca69f> Location: 430 Dirksen

2:30 p.m. INTELLIGENCE — Closed hearings to examine certain intelligence matters. <http://www.intelligence.senate.gov/> Location: 219 Hart.

US House: 11 a.m. HOYER PEN AND PAD — Democratic Whip Hoyer holds regular pen and pad briefing. No cameras allowed. Location: H-144 in the U.S. Capitol.

2 p.m. REP. VAN HOLLEN – GO ATLANTIC COUNCIL – SEN. WARNER – DEFENSE INDUSTRY — Budgets & the Future of America's Defense Industry. Speakers: Mark Warner, Senator (D-VA), @MarkWarner; Welcome remarks by Jon M. Huntsman Jr., Chairman, Atlantic Council @JonHuntsman; Introduction by MajGen Arnold Punaro, USMC (Ret.), Chairman, National Defense Industrial Association. <http://www.atlanticcouncil.org/events/upcoming-events/detail/senator-mark-warner-budgeting-for-the-us-defense-we-need> Location: 1030 15th Street, NW, 12th Floor.

P BUDGET — Maryland Congressman Chris Van Hollen, Ranking Member of the House Budget Committee, will hold a pen and pad briefing to discuss the Republican budget. NO CAMERAS WILL BE ALLOWED. Location: Democratic Leader's Office, H-204 Conference Room.

12 p.m. — The House will meet for morning hour and 2:00 p.m. for legislative business. Votes will be postponed until 6:30 p.m. Legislation Considered Under Suspension of the Rules: 1) Concur in the Senate Amendment to H.R. 4152 – To provide for the costs of loan guarantees for Ukraine (Sponsored by Rep. Harold Rogers / Appropriations Committee / Foreign Affairs Committee) 2) S. 2183 – United States International Programming to Ukraine and Neighboring Regions (Sponsored by Sen. Mitch McConnell / Foreign Affairs Committee) 3) H.R. 2413 – The Weather Forecasting Improvement Act of 2014, as amended (Sponsored by Rep. Jim Bridenstine / Science, Space, and Technology Committee) 4) H.R. 4005 – Coast Guard and Maritime Transportation Act of 2014, as amended (Sponsored by Rep. Duncan Hunter / Transportation and Infrastructure Committee) 5) H.Con. Res. 92 – A bill to authorize the use of the Capitol Grounds for the National Peace Officers Memorial Service and the National Honor Guard and Pipe Band Exhibition (Sponsored by Rep. Lou Barletta / Transportation and Infrastructure Committee) 6) H.Con. Res. 88 – A bill to authorize the use of the Capitol Grounds for the Greater Washington Soap Box Derby (Sponsored by Rep. Steny Hoyer / Transportation and Infrastructure Committee) 7) S. 1557 – Childrens Hospital GME Support Reauthorization Act of 2013 (Sponsored by Sen. Robert Casey / Energy and Commerce Committee)

2 p.m. ENERGY AND COMMERCE — Subcommittee on Oversight and Investigations hearing: "The GM Ignition

Switch Recall: Why Did It Take So Long?" Witnesses: Mary Barra, CEO, General Motors; David Friedman, Acting Administrator, NHTSA. <http://energycommerce.house.gov/hearing/%E2%80%9C-gm-ignition-switch-recall-why-did-it-take-so-long%E2%80%9D> Location: 2123 Rayburn

3 p.m. APPROPRIATIONS — Subcommittee on Financial Services and General Government budget hearing on Securities and Exchange Commission. Witness: Mary Jo White, Chair Securities and Exchange Commission. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=373851> Location: 2359 Rayburn

3 p.m. ENERGY AND COMMERCE — Subcommittee on Health hearing: Examining Concerns Regarding FDA's Proposed Changes to Generic Drug Labeling. Witnesses: Janet Woodcock, M.D., Director Center for Drug Evaluation and Research (FDA); Michael D. Shumsky, Partner Kirkland & Ellis LLP; Ralph G. Neas, President and CEO Generic Pharmaceutical Association; Allison M. Zieve, General Counsel Public Citizen. <http://energycommerce.house.gov/hearing/examining-concerns-regarding-fdas-proposed-changes-generic-drug-labeling> Location: 2322 Rayburn

4:30 p.m. PERMANENT SELECT COMMITTEE ON INTELLIGENCE — Full Committee CLOSED-Ongoing Intelligence Activities. <http://intelligence.house.gov/hearing/ongoing-intelligence-activities-55> Location: HVC304 Capitol.

5 p.m. RULES — Business Meeting: H.R. 2575 Save American Workers Act of 2014.

<http://rules.house.gov/news/announcement/meeting-announcement-hr-2575> . Location: H-313 The Capitol.

Other: ATLANTIC COUNCIL – SEN. WARNER – DEFENSE INDUSTRY — 8:30 a.m. Budgets & the Future of America's Defense Industry. Speakers: Mark Warner, Senator (D-VA), @MarkWarner; Welcome remarks by Jon M. Huntsman Jr., Chairman, Atlantic Council @JonHuntsman; Introduction by MajGen Arnold Punaro, USMC (Ret.), Chairman, National Defense Industrial Association. <http://www.atlanticcouncil.org/events/upcoming-events/detail/senator-mark-warner-budgeting-for-the-us-defense-we-need> Location: 1030 15th Street, NW, 12th Floor.

CFR – JIM YONG KIM — 8:30 a.m. – 9:30 a.m. The Council on Foreign Relations hosts a conversation with World Bank President Jim Yong Kim. Location: Council on Foreign Relations 1777 F Street NW, Washington, DC 20006

MILITARY CAREGIVERS — 11 a.m. RAND Corporation and the Elizabeth Dole Foundation will release results of the "largest-ever study" of military and veteran caregivers. The study includes an environmental scan of services available, a gap analysis, and recommendations from which government, private sector, nonprofit, and faith leaders can develop sound policies and programs to ensure the long-term well-being of military caregivers who support the nation's wounded warriors. Speakers: Sen. Elizabeth Dole, The Elizabeth Dole Foundation; Temi Tanielian, RAND Corporation; Rajeev Ramchand, RAND Corporation. Location: National Press Club, 529 14th Street NW.

FAMILIES USA – HEALTH CARE ENROLLMENT — 12 p.m. Families USA will hold a teleconference to recommend ten changes in outreach and enrollment practices to expand health coverage pursuant to the Affordable Care Act's private coverage opportunities and the Medicaid expansion. With Ron Pollack, Executive Director, Families USA; Rachel Klein, Enrollment Program Director, Families USA.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: [Referring To NCAA Men's Basketball Tournament] "Actually, Connecticut beat Michigan State, the team that President Obama had picked to win the whole tournament. Obama picked them to win. Completely busted his bracket. Which explains why today Connecticut got a fruit basket from Vladimir Putin saying, 'You're welcome to Crimea any time.'"

Jimmy Fallon: "I saw that this weekend was the four-year anniversary of President Obama's 'Race to the Top' program to help schools boost their performance. The President says he's pleased with the program, while students were like, 'It gone good.'"

DOI in the News:

SECRETARY JEWELL ANNOUNCES CONTRACT FOR NAVAJO-GALLUP WATER PROJECT. The AP (4/2) reports that Interior Secretary Sally Jewell announced that the federal government has "awarded a nearly \$20 million construction contract to a Wyoming company to build the first pumping plant for the Navajo-Gallup pipeline project." The contract was awarded to Moltz Constructors Inc. According to Jewell, "the pipeline will bring drinking water to tribal and rural communities along the Arizona-New Mexico border."

The [Albuquerque \(NM\) Journal](#) (4/2, 281K) reports that Navajo President Ben Shelly said, "The current pumping plant will help many Navajo families east of Gallup, NM, get near-term groundwater for domestic use before the San Juan River water comes."

SECRETARY JEWELL DISCUSSES CLIMATE CHANGE DURING INTERVIEW. On [MSNBC](#) (4/2, 950K), Interior Secretary Sally Jewell talked with Andrea Mitchell about "a landmark new UN report about the global impact of climate change." Jewell said, "We play a role in regulating methane emissions and working alongside states and companies to reduce methane emissions, whether that's from oil or gas production or other sources of methane emissions. We need to work collectively with industry, with state partners and policymakers. The other thing I would mention is renewable energy. We are working alongside states to stand up projects. We have 50 that have been permitted on public lands since 2009. And those are done in states where they have renewable energy standards. So the states are creating a market, facilitating public lands and companies step in with projects that make sense for them."

HOUSE REPUBLICANS INTRODUCE BUDGET PLAN. The [Environment & Energy Publishing](#) (4/2, 705) reports that "government energy spending on programs without defense purposes would fall by nearly half under a budget House Republicans unveiled today that also slashes climate change and advanced scientific research programs while promoting more oil and gas drilling on federal land." House Budget Chairman Paul Ryan's fiscal framework also "would limit the lands Interior Department agencies can purchase under an expired law that uses proceeds from Bureau of Land Management land sales." The proposal would "stipulate that Interior may use no more than 30 percent of the proceeds from lands sales under the expired Federal Land Transaction Facilitation Act to purchase high-quality habitat, a break from current law that allows all the money for that purpose."

OBAMA ADMINISTRATION TO CONTINUE PRESSURE ON ICELAND TO END WHALE HUNTING. [Bloomberg News](#) (4/2, Valdimarsson, 392K) reports that President Barack Obama "directed US officials to continue pressuring Iceland's government to abide by the International Whaling Commission's moratorium on whaling." In a memo to his cabinet officers, Obama wrote that "senior officials and delegations meeting the representatives of the north Atlantic island's government should be notified that cooperation with the US is based 'on the Icelandic government changing its whaling policy.'" The article notes that "the presidential memo follows a Jan. 31 statement from the Interior Secretary Sally Jewell in which she expressed concern over Iceland's whaling."

COAST GUARD MEDEVACS INJURED FISHERMAN FROM KING COVE. The [Ketchikan \(AK\) SitNews](#) (4/2) reports that the US Coast Guard "medevaced a 58-year old fisherman from King Cove yesterday (March 31, 2014) during stormy conditions after he was injured on board a Seattle-based processor near Unimak Island in the North Pacific Ocean." The fisherman injured his eye when he was accidentally sprayed with a high-pressure hose at about 1 a.m. It's the fifth such incident in the King Cove area where Coast Guard assistance was required to transport a severely injured individual for treatment, King Cove officials noted.

Meanwhile, the [Alaska Public Radio Network](#) (4/1, 2K) reports that "a group of tribal and government officials from King Cove are back from a week of lobbying in Washington, D.C. — and they've come home with a new assignment." Interior Secretary Sally Jewell has asked them to provide "suggestions from the people that live in the area on what alternatives would be potentially viable to them if a road does not go through." Laura Tanis of the Aleutians East Borough said that "local officials will put together information on road alternatives and send them to the Interior Department within the next two weeks." The story also appears at [KUCB-FM Unalaska, AK](#) (4/2).

Also reporting on the story are the [Alaska Business Monthly](#) (4/2) and [KTUU-TV Anchorage, AK](#) (4/2, 4K).

DIRECTOR OF INTERIOR DEPARTMENT'S PACIFIC ISLANDS CLIMATE SCIENCE CENTER TO MAKE PRESENTATION. The [Pacific News Center](#) (4/2) reports that David Helweg, the newly selected director of the Interior Department's Pacific Islands Climate Science Center will be presenting on the "Vision and Framework of Science at the Department of Interior Pacific Islands Climate Science Center" at 3:00 p.m. today at the University of Guam Water and Environmental Research Institute Tomorrow, Helweg will also be meeting with the Lt. Governor and other officials this week.

Also reporting on the story is the [Pacific \(GUM\) Daily News](#) (4/2, 61K).

OPPONENTS OF BOULDER-WHITE CLOUDS DESIGNATION CRITICIZED. For the [Twin Falls \(ID\) Times-News](#) (4/2, 56K), Chris Carlson criticizes “the many Republicans who think they can make a politically-winning issue out of the president using his authority under the 1906 Antiquities Act to declare the Boulder-White Clouds a national monument.” According to Carlson, Interior Secretary Sally Jewell “cares too much about the views of Sen. Risch, Gov. Otter and Rep. Raul Labrador, all of whom viscerally hate the president.”

SUPREME COURT’S REFUSAL TO HEAR KATIE JOHN CASE CRITICIZED. For the [Anchorage \(AK\) Daily News](#) (4/1, 136K), Mike Dingman criticizes the Supreme Court for declining what has become known as the Katie John Case. According to Dingman, “by celebrating the defeat of Alaska’s self-determination we are doing more harm than the good that comes from Katie John.”

America’s Great Outdoors:

National Park Service:

PROPOSAL UNVEILED TO TURN COLORADO NATIONAL MONUMENT INTO NATIONAL PARK. The [Denver Post](#) (4/2, Lofholm, 770K) reports that the effort to turn the Colorado National Monument into a national park moved forward Tuesday when Sen. Mark Udall and Rep. Scott Tipton unveiled a proposal that could lead to legislative action on the change this year. Udall said, “It is never too late. There is a broad cross section of western Colorado that still believes John Otto’s vision was the correct vision.” The proposal would not only upgrade the monument to park status, but it would also give it a new name: Rim Rock Canyons National Park.

DETAILS RELEASED IN SHOOTING BY NPS RANGER. The [AP](#) (4/2) reports that “newly released court documents say a National Park Service ranger fired on an occupied boat near Kettle Falls last September after his partner was shoved from a gangplank into the water, and the ranger heard ‘pops’ that sounded like gunfire.” According to the article, “Michael Sublie, the owner of the boat, has been charged with assaulting a federal agent and obstructing justice stemming from the incident at a campground on the Kettle River last Sept. 14.” Boat passenger Casey Hartinger was shot in the side by a bullet fired by NPS Ranger Matthew Phillipson. Court documents “filed Tuesday by the government lists Phillipson as the shooter and Joshua Wentz as the ranger shoved by Sublie, who was approached for playing music too loud on his houseboat after quiet hours.”

Also reporting on the story is the [Spokane \(WA\) Spokesman-Review](#) (4/1, 208K).

CRITICS BLAME TOUR COMPANIES FOR ARIZONA MEMORIAL TICKET HOARDING. The [AP](#) (4/2) reports that “officials say more tickets to visit the USS Arizona Memorial are being picked up online in bulk orders of 65.” Tour companies are being blamed by critics, and “they say no tickets are left by the time individual visitors try to reserve them.” The NPS “issues 4,500 tickets each day to visit the memorial to sailors and Marines killed in the Dec. 7, 1941, attack.”

NPS SAYS 106 DEER REMOVED FROM ROCK CREEK PARK SINCE BEGINNING OF YEAR. The [DCist](#) (4/2, 21K) reports that “as part of a controversial plan to manage the deer population in Rock Creek Park,” the NPS says “106 of the animals were shot ‘safely and without incident’ between January and March 31.” The article notes that “all suitable venison will be donated to the a D.C. food bank.”

PADRE ISLAND NATIONAL SEASHORE BEACHES CLOSED TO ALLOW FOR OIL CLEANUP. [KIII-TV](#) Corpus Christi, TX (4/2, 11K) reports that the NPS is “taking some precautions in hopes of keeping the Padre Island National Seashore clean after last week’s oil spill in the Gulf of Mexico.” Beginning Tuesday, “they have temporarily closed the park’s beaches to drivers.”

NPS SCHEDULES BURNS AT TWO VIRGINIA CIVIL WAR SITES. The [AP](#) (4/2) reports that the NPS has scheduled prescribed burns at two areas of the Richmond National Battlefield Park over the next week. According to the article, “the first burn involves about 40 acres of park property at Malvern Hill in suburban Richmond,” and “the other burn entails about 20 acres in Cold Harbor, which is located in Hanover County.”

NPS-SPONSORED PROGRAM TO HONOR MAINE REGIMENT. The [Bangor \(ME\) Daily News](#) (4/1, 166K) reports that “during a National Park Service-sponsored event titled ‘Reverberations — Commemorating the

Overland Campaign,' Maine will honor a battle-shattered Civil War regiment as part of 11 observances taking place across the United States on Saturday, May 24." Ann Blumenschine, a park ranger and the public information officer at Petersburg National Battlefield in Virginia, said, "The purpose of this Civil War 150th event is to help people understand that the suffering on the battlefields in Virginia led to suffering in the communities, North and South, where the soldiers hailed from."

PHILADELPHIA SEEKS WORLD HERITAGE DESIGNATION. The Philly (4/2, 1.06M) reports that Global Philadelphia Association, "in conjunction with Mayor Nutter's administration, is pressing the city's case that it should be added to the list of World Heritage Cities, a designation seen as a further boost to Philadelphia as an attraction for international tourists." Philadelphia is "pressing on two fronts." According to the article, "one is the traditional path, which requires the National Park Service first to promote the city's candidacy to the US Department of the Interior, which in turn must advance it to the State Department." The other is through the Organization of World Heritage Cities.

Bureau of Land Management:

IRON COUNTY COMMISSIONERS SUPPORT NEVADA RANCHER IN FIGHT WITH BLM. The St. George (UT) Spectrum (4/1, 48K) reports that "Clark County rancher Cliven Bundy has been fighting a range war with the federal government for nearly 20 years, but this time around, he's getting help from unexpected sources located about 85 miles away in Iron County." In a notice sent Tuesday directed to BLM deputy director Neil Kornze and the Nevada BLM state director Amy Lueders, the Iron County Commissioners and Sheriff Mark Gower "warned that any action taken by the BLM to gather and confiscate Bundy's cattle currently grazing on Clark County public lands would warrant Iron County to begin immediately taking steps to reduce the number of feral horses in Southern Utah."

Also covering the dispute is the Las Vegas Review-Journal (4/2, 437K).

SHEEP BACK GRAZING ON FORT ORD NATIONAL MONUMENT. The Sierra (CA) Sun Times (4/2) reports that "more than 600 ewes and their lambs are back at work, grazing on the Bureau of Land Management's Fort Ord National Monument in Monterey County." The article notes that "the grazing program is part of a cooperative strategy to improve rangeland conditions in this ecologically unique area." Eric Morgan, BLM's Fort Ord monument manager, said, "The sheep grazing program at Fort Ord National Monument has a proven track record at reducing wildfire hazards, and stimulating native plant regeneration. The sheep have also been effective in controlling invasive thistle populations."

MOTOCROSS EVENT TO KICK OFF AT BLM'S DUNES OFF-HIGHWAY VEHICLE RECREATION AREA The Farmington (NM) Daily Times (4/2, 46K) reports that "two days of motocross mania will kick at 10 a.m. Saturday with the New Mexico Restart Enduro race at the Bureau of Land Management's Dunes Off-Highway Vehicle Recreation Area, an 800-acre area south of Farmington."

BLM SEEKS PUBLIC COMMENT ON EVENT AT THREE PEAKS SPECIAL RECREATION MANAGEMENT AREA. The St. George (UT) News (4/1, 3K) reports that the BLM's Cedar City field office is seeking public input on "an environmental assessment analyzing the potential impacts of a proposed competitive off-road event at the Three Peaks Special Recreation Management Area."

ADDITIONAL COVERAGE: ENVIRONMENTAL GROUP PLANS TO SUE BLM OVER SPECIES PROTECTION. Additional coverage that "four environmental groups are taking legal action" against the BLM, "contending the agency has failed to track the consequences of off-roading and cattle grazing on at-risk species on public land in Southern California's deserts" was provided by the Riverside (CA) Press Enterprise (4/1, 398K).

Fish and Wildlife Service:

FWS DIRECTOR ASHE DEFENDS TRADE CONTROLS ON IVORY. In a letter to the New York Times (4/2, Subscription Publication, 5.41M), FWS Director Dan Ashe responds to critics of the FWS' "decision to tighten United States trade controls on African elephant ivory to address the poaching crisis" in the March 27 op-ed titled "The Wrong Way to Protect Elephants." Ashe notes that "one of the Op-Ed writers represents the International

Ivory Society, a trade group with a vested interest in keeping commercial ivory flowing." Ashe adds that "adjusting trade controls is just part of a government strategy to combat wildlife trafficking," and "includes working with the international community to protect wild populations, arrest traffickers and reduce consumer demand for ivory and other products."

FWS PARTICIPATING IN COMMERCIAL TARGETING AND ANALYSIS CENTER. The Yuma (AZ) News Now (4/2) reports that US Customs and Border Protection has announced the addition of the US Food and Drug Administration (FDA), US Fish and Wildlife Service (FWS) and National Marine Fisheries Service (NMFS) to the Commercial Targeting and Analysis Center (CTAC) in Washington, D.C. The agencies "are partnering with US Customs and Border Protection (CBP), and seven other participating federal agencies, to enhance targeting efforts on commercial imports posing a threat to the health and safety of the American public or other border management goals such as conservation of species." The agreement was finalized on March 15. FWS Director Dan Ashe said, "Broadening the scope of CTAC to encompass illegal wildlife trade and other management issues helps support the Nation's high-priority fight against wildlife trafficking. Participating in the CTAC will give our law enforcement officers access to new intelligence and increased opportunities to partner with Customs and other Federal counterparts in keeping our borders closed to illegal products of all types."

FWS LOOKING INTO LAW CREATING IDAHO WOLF DEPREDATION CONTROL BOARD. The Idaho Statesman (4/2, 163K) reports that the FWS is "looking into whether a new law creating the Idaho Wolf Depredation Control Board violates" the Pittman-Robertson Wildlife Restoration Act and the Dingell-Johnson Sport Fish Restoration Act "by transferring hunting and fishing license dollars to a fund used for the killing of wolves." The legislation, "signed into law last week by Gov. Butch Otter, requires the Idaho Department of Fish and Game to transfer \$110,000 annually to the fund, which will be overseen by a board appointed by the governor." The FWS said that "it is working with Fish and Game to make sure that funds provided to the state through the Wildlife and Sport Fish Restoration Program meet the federal criteria."

ELKS CAPTURED FROM SAN LUIS NATIONAL WILDLIFE REFUGE AND RELOCATED. The Merced (CA) Sun-Star (4/1, 71K) reports that the FWS and the California Department of Fish and Wildlife have "completed the capture of 36 tule elk from the San Luis National Wildlife Refuge near Los Banos," the departments announced Tuesday. The article notes that "the weekend's capture was the first of its kind since 2005."

Also reporting on the story is the Modesto (CA) Bee (4/1, 192K).

FWS TO HOLD LOTTERY FOR HANFORD REACH WILDFLOWER TOUR SEATS. The Walla Walla (WA) Union-Bulletin (3/31, 38K) reports that the FWS is "trying something new on its popular spring wildflower tours on the normally closed portion of the Hanford Reach National Monument." This year, "the seats on the tour will be filled using a lottery." Also, the agency is "doubling the number of tours to eight, with 20 seats on each bus that heads out to the Arid Lands Ecology Reserve on the monument."

FWS ASKS FOR INFORMATION ON THREAT OF INDUSTRIAL WASTE IN HATCHIE RIVER. WBBJ-TV Jackson, TN (4/2, 1K) reports that "the possibility of industrial waste being dumped in the Hatchie River has several Haywood County residents protesting" and the FWS "stepping in." According to the article, "last week, after several residents protested," the FWS "wrote to Tennessee Department of Environment and Conservation (TDEC) with concerns about the possible pollution to the Hatchie." The federal agency "asked TDEC for more detailed information about how the permit would affect the many species of wildlife in the river."

SQUAW CREEK NATIONAL WILDLIFE REFUGE MANAGER TO RETIRE. The Nodaway (MO) News Leader (4/2, 9K) reports that Squaw Creek National Wildlife Refuge Manager Ron Bell will retire on April 3, "concluding a 40-year career" with the FWS. According to the article, "to celebrate his career, the many friends he has made and the projects he has been a part of, an open House reception will be from 1 to 4 pm, Thursday April 3."

ATTACKS AGAINST "SUE-AND-SETTLE" STRATEGY LAUDED. In his column for the Washington Examiner (4/2, 247K), Ron Arnold lauds Oklahoma attorney general Scott Pruitt's lawsuit over "Big Green's outrageously destructive sue-and-settle attacks using endangered species as a weapon to obliterate America's burgeoning oil and gas production." Arnold urges "every state with standing to sue...to come and stand beside these heroes — they're up against a defiant Goliath that scoffs at the rule of law and will resort to any scheme to cheat and bully its citizens." Arnold also notes that "Congress has also formed ranks against Big Green's 'sabotage by species'

scam with four bills drafted to 'update the Endangered Species Act' — framed narrowly enough that bipartisan support is possible — including one with the title, Endangered Species Litigation Reasonableness Act, aimed directly at sue-and-settle arrangements."

ADDITIONAL COVERAGE: FWS TAKES LIZARD OFF THREATENED LIST. Additional coverage that the island night lizard has been taken off the list of federally endangered species was provided by the [Los Angeles Times](#) (4/2, Sahagun, 2.38M).

MONTANA LAWMAKER: LISTING SAGE GROUSE WOULD HURT ECONOMY. In an op-ed for the [Elko \(NV\) Daily Free Press](#) (4/2, 22K), Montana state Rep. Nicholas Schwaderer, writes sage grouse has become the "the spotted owl of the prairie." He argues that listing the bird under the Endangered Species Act would "dramatically impact Montana's economy." Schwaderer claims that "the duplicity shown by the Obama administration in applying the law underscores the point that the ESA is more about politics than it is protecting and restoring endangered animals."

Securing America's Energy Future:

Renewable Energy:

BOEM TO HOLD MASSACHUSETTS OFFSHORE WIND LEASE SALES. The [Recharge News](#) (4/2, 633) reports that the BOEM "expects to hold commercial competitive lease sales for offshore wind energy off of Massachusetts towards the end of this year or in early 2015," according to director Tommy Beaudreau. He said, "We're finalizing the proposed sale notice and trying to finalize what we think the leasing configuration should be. How to divvy that up in terms of how many leases should be issued."

BOEM PUBLISHES ENVIRONMENTAL ASSESSMENT FOR GEORGIA OFFSHORE WIND RESEARCH. The [Recharge News](#) (4/2, 633) reports that the BOEM has "published its environmental assessment (EA) of an area offshore Georgia that Southern Company wants to lease for wind and other met-ocean research." Southern Company would "like to lease an area covering three outer continental shelf blocks three to 11 nautical miles (5.5 to 20.3km) facing the coast of Tybee Island."

Also reportgin on the story is the [reNews](#) (4/2).

Onshore Energy Development:

OSMRE RAISES MINING VIOLATION PENALTIES TO MATCH INFLATION. The [Law 360](#) (4/2, 18K) reports that the Office of Surface Mining Reclamation and Enforcement has "increased penalties for mining violations, releasing a final rule Tuesday that raises fines by as much as 45 percent to account for inflation over the past 17 years." The agency "hiked civil monetary penalties as part of a four-year review process, according to a final rule scheduled for publication in the Federal Register on Wednesday."

BLM BEGINS REVIEW OF 65 OIL, GAS LEASES. The [Grand Junction Daily Sentinel](#) (4/2, 73K) reports that the BLM will "likely hear plenty at three upcoming meetings as it launches a retroactive environmental review of 65 existing oil and gas leases, an action that potentially could result in leases being voided." The article notes that "the leases include ones in what's known as the 220,000-acre Thompson Divide area southwest of Glenwood Springs, where the Thompson Divide Coalition and other entities are trying to keep drilling from occurring." The bureau "on Tuesday said it is beginning a 30-day public scoping period for an environmental impact statement analyzing the leases."

REVIVAL OF NORTHERN CHEYENNE COAL SWAP SOUGHT. The [AP](#) (4/2, Brown) reports that "leaders of Montana's Northern Cheyenne tribe on Tuesday sought to revive a three-way coal swap involving the federal government and a Texas company after an earlier proposal stumbled in Congress." According to the article, "the swap would fix a mistake made in 1900, when the government expanded the reservation but failed to acquire the underlying minerals." A proposal "introduced on behalf of the tribe by US Rep. Steve Daines calls for the government to turn over an estimated 112 million tons of publicly-owned coal to Houston-based Great Northern Properties," and "in exchange, Great Northern would transfer to the tribe an estimated 117 million tons of coal

lying beneath its reservation, according to representatives of the tribe.”

BLM SEEKS COMMENTS ON NEW CASTLE-AREA DRILLING PLAN. The Glenwood Springs (CO) Post Independent (4/2, 27K) reports that the BLM is seeking public input “on a plan by Bill Barrett Corp. to develop up to 127 natural gas wells southwest of New Castle, part of which would be on BLM land.” The Jackson Gulch Master Development Plan “proposes drilling from new well pads in eight locations, and construction of up to 4.9 miles of new access roads and 4.2 miles of new pipelines.”

BLM SEEKS INPUT ON PLAN TO GUIDE MANCOS SHALE DEVELOPMENT. The Farmington (NM) Daily Times (4/2, 46K) reports that officials from the BLM’s Farmington Field Office “briefed the San Juan County Commission on Tuesday about a plan to guide development of the Mancos Shale and Gallup Sandstone formations on BLM land.” BLM Farmington District Manager Dave Evans “told the commission development of the formation is certain.” Evans “encouraged commissioners to submit any comments concerning the plan’s revision to BLM.”

ADDITIONAL COVERAGE: THOMPSON DIVIDE LEASES EXTENDED TWO MORE YEARS. Additional coverage that the BLM is “extending gas leases for two energy companies in the disputed Thompson Divide area for another two years while the agency works to resolve environmental issues” was provided by the AP (4/2).

“REGULATORY ASSAULT” AGAINST FOSSIL FUEL INDUSTRY CRITICIZED. For Forbes (4/1, 6M), David Blackmon writes that “while the Obama Administration frequently touts its commitment to an ‘all of the above’ energy policy, its ongoing devotion to handing out massive subsidies (wind, solar) and demand quotas (ethanol, biofuels) to some forms of energy while ramping up taxes and heavy-handed regulations on others reveals this commitment to be highly qualified and selectively applied.” According to Blackmon, “nowhere is the downside of this picking-and-choosing approach to energy policy more evident than as it relates to the oil and gas industry, upon which the Administration’s ongoing withering regulatory assault continued last week on several fronts.” One example that Blackmon points to is the listing of the Lesser Prairie Chicken as “threatened” under the Endangered Species Act.

Offshore Energy Development:

BSEE SEEKS INDUSTRY’S PARTICIPATION IN TRACKING PROGRAM. FuelFix (4/1, Dlouhy, 7K) reports that eight months after the BSEE first pledged to create a tracking system for oil and gas industry “near-miss incidents” that could suggest larger offshore safety issues, Federal regulators are asking the industry to participate. Though reports are confidential, the program is voluntary, meaning “industry buy-in is essential to making it work.”

PROFESSOR SAYS OFFSHORE DRILLING COULD CREATE UP TO THOUSANDS OF JOBS. The Wilmington (NC) Star News (4/1, 123K) reports that “a N.C. State University professor Tuesday said drilling off the coast of North Carolina could create anywhere from a few hundred to several thousand jobs.” Michael Walden, who “provided a presentation to a group of state lawmakers in Raleigh titled ‘The Economic Potential for Developing North Carolina’s On-shore and Off-shore Energy Resources,’” said, “If I took the most pessimistic and optimistic combination focusing on jobs this is the range of jobs you get.” He said that “environmental impacts are also difficult to quantify.” Walden said, “Oil spills happen. But if you look at the research the probability of an oil spill happening is relatively small. They don’t happen that often.”

SENTENCING OF FORMER BP EMPLOYEE DELAYED UNTIL AUGUST. The AP (4/1, 7K) reports on former BP engineer Kurt Mix, who “has been granted a delay in his sentencing on an obstruction of justice charge related to the 2010 Gulf oil spill.” The article notes that Mix requested sentencing after July 30, as his lawyers argue that “it would enable Mix to seek temporary employment.” US District Judge Stanwood Duval approved the delay, setting the sentencing for August 6.

Tackling America’s Water Challenges:

CALIFORNIA WATER MANAGERS EASE DELTA PUMPING LIMITS. The Los Angeles Times (4/2, Boxall, 2.38M) reports that “officials announced Tuesday that they are temporarily waiving an endangered species

protection to enable water managers to send more Northern California water south." According to the article, "the changes are unlikely to help most of the state because the additional exports will either be kept in storage south of the delta as a hedge against another dry year, or they will go to irrigation districts with senior water rights." The article notes that "most growers supplied by the federal Central Valley Project have been told they won't get any deliveries this year." David Murillo, regional director of the BOR, said, "We don't see that those numbers would go up from zero."

Empowering Native American Communities:

STUDY ON YOUTH WELL-BEING FIND SOUTH DAKOTA WORST FOR INDIAN KIDS. The AP (4/2, Crary) reports that "a new report on child well-being, measured by state and race, has turned an unflattering spotlight on some places not used to being at the bottom of such lists, including Wisconsin, with a worst-in-the-nation ranking for its black children, and South Dakota, with abysmal results for its American Indian youth." According to the article, "the report, released Tuesday by the Annie E. Casey Foundation, detailed nationwide racial disparities that put Asian and white children in a far more advantageous position than black, Latino and American Indian children." The article notes that "in the Casey index for American Indian children, the South Dakota score of 185 was the lowest of any racial group in any state — a result of the deep poverty that prevails on many of South Dakota's Indian reservations."

TRIAL SET FOR MAN ACCUSED OF ASSAULTING BIA POLICE OFFICER. The Riverton (WY) Ranger (4/2, 167) reports that "a Northern Arapahoe man is charged with assault on a Bureau of Indian Affairs officer." Kevin Paul Brown pleaded not guilty March 31. Brown was "released on a \$10,000 unsecured bond and faces trial June 2."

Top National News:

MEDIA: DESPITE ENROLLMENT SURGE, QUESTIONS REMAIN ABOUT ACA'S VIABILITY. President Obama's announcement that the Administration has surpassed its initial goal of 7 million Affordable Care Act signups by the end of March generated a great deal of coverage echoing the President's contention that the recent enrollment surge is evidence that "Obamacare," as he referred to the ACA on Tuesday, is proving to be a success. However, many reports last night and this morning, including those on all three network newscasts, indicate that the enrollment total may not be an accurate gauge of the law's success, and note that some unknown portion of the 7.1 million cited by the President lost the health insurance they had previously as a result of the ACA's rules, and some of those who signed up will not actually pay for their coverage.

On ABC World News (4/1, story 2, 1:45, Sawyer, 7.43M), Diane Sawyer said the President "took a kind of victory lap" after having "beat[en] the goal the White House had set" for ACA enrollment, and Jon Karl said, "in the four years since the Affordable Care Act passed, when it comes to healthcare, this is the best day that Democrats have had." Likewise, USA Today's (4/2, A1, Madhani, 5.82M) front page reads: "Health Care's Comeback Kid: Obama Exults In 7M Enrollment Mark."

The New York Times (4/2, A1, Shear, Pear, Subscription Publication, 5.41M), in a front-page article under the headline, "Obama Claims Victory in Push for Insurance," says the enrollment total announced by the President is "somewhat remarkable considering the bureaucratic and technical nightmare that surrounded [healthcare.gov's] debut last October." The Times adds that on Tuesday, the President "proclaimed himself mystified by the continuing assault on the law, and said the enrollment figures should finally put an end to the repeated attempts by Republicans to repeal it."

Under the headline, "Behind The Obamacare Surprise," Politico (4/2, Dove, Brown, 73K) reports that "the story of how the administration turned around a historic management failure surprised even many of the people involved." Politico goes on to give "a lot" of the credit to the President's appearance on the online comedy show "Between Two Ferns" last month. In its "In The Loop" column, the Washington Post (4/2, Kamen, Itkowitz, 2.33M) reports that on Monday, White House Chief Technology Officer Todd Park "counted down until the midnight Obamacare deadline and celebrated surpassing 7 million enrollments with a champagne toast."

After playing several minutes of the President's remarks from the Rose Garden on Tuesday, Rachel Maddow, on

MSNBC's The Rachel Maddow Show (4/1), said, "We do not often see this side of the President or of this administration: taking credit for something that they have done, that they are proud of and wanting credit for it."

On the other hand, in a report for NBC Nightly News (4/1, story 2, 2:35, Williams, 7.86M), Chuck Todd said that while there was a "sense of relief at the White House," there is "a lot we don't know about these enrollment figures, including how many people were previously uninsured versus how many had coverage before this law." Todd also said there remains the potential that "premiums for all of us could skyrocket next year."

Similarly, on ABC World News (4/1, story 2, 1:45, Sawyer, 7.43M), Jon Karl said the President's appearance on Tuesday "looked like a victory celebration," but "there are still big unanswered questions," including, "how many signs up were previously uninsured, and how many signed up because their old plans were canceled?" Karl added that despite "all the celebrating here at the White House, Republicans haven't backed off one bit," and "argued again today that Obamacare is killing jobs and causing premiums to rise."

On the CBS Evening News (4/1, story 2, 2:35, Pelley, 5.58M), Major Garrett also said, "questions remain," including "how many enrollees have paid for a policy?" According to Garrett, "we don't know how many people enrolled after having their original policy canceled under Obamacare rules." Sam Stein, in a report for the Huffington Post (4/1, 11.54M), says "questions remain about the law's viability," and notes that "the number of people who have paid their first month's premium, for one thing, is unknown."

The AP (4/2, Pace, Lederman) also reports that the Administration "hasn't said how many of those people have closed the deal by paying their first month's premiums," or "how many were previously uninsured – the real test of Obama's health care overhaul." The AP also notes that the Administration "hasn't yet released an updated demographic breakdown of enrollees, such as the number of younger people whose participation is critical to the law's success."

According to Roll Call (4/1, Dennis, Subscription Publication, 67K), at the White House press briefing on Tuesday, "reporters...questioned how many would actually pay for their coverage and how many were forced onto the exchanges because their old plans were canceled," but White House press secretary Jay Carney replied that "those are numbers the White House doesn't yet have."

The Huffington Post (4/1, 11.54M) reports that Republicans in Congress "weren't impressed" by the 7.1 million total, and quotes Senate Minority Leader Mitch McConnell as saying, "We don't know, of course, exactly what they have signed up for, we don't know how many have paid." McConnell added, "What we do know is that all across the country our constituents are having an unpleasant interaction with Obamacare."

Politico (4/2, Kenen, 73K) reported that Sen. Lamar Alexander maintained that "the news is not the number of enrollees – the news is the number of policies being canceled, the number of co-pays and deductibles going up and the enormous dissatisfaction with the Health Care Act." Bloomberg News (4/2, Talev, Keane, 392K) notes that WellPoint, "the largest exchange insurer, has warned it may propose 'double-digit plus' premium increases for the next enrollment period, which begins in November." Politico (4/2, Dovere, Brown, 73K) reports that Administration officials "know May 1 is going to be a whole new kind of trouble trying to educate the newly insured on how to use the plans they've now got."

At the opening of Fox News' Special Report (4/1, 2.15M), Bret Baier said, "Like an athlete snatching victory from the jaws of defeat, President Obama is celebrating what is being presented as a big, last-second win for his healthcare law." Baier said that on Tuesday, the President "basked in the spotlight, mocked and chastised his critics, and declared the debate over repealing the law is 'over.'" However, chief White House correspondent Ed Henry went on to report that "White House aides...struggled to explain how many people getting insurance had previously been uninsured, versus how many were booted from their plans and are moving to the exchanges."

On NBC Nightly News (4/1, story 2, 2:35, Williams, 7.86M), Brian Williams reported that on Tuesday, President Obama "referenced the disastrous start of the website," and "conceded future fixes." Chuck Todd went on to report that the President "was in a feisty mood against his Republican foes," although "Republicans still believe an anti-Obamacare message is a political winner." According to Todd, President Obama "wants to make sure Democrats don't run away from healthcare."

On the CBS Evening News (4/1, story 2, 2:35, Pelley, 5.58M), Scott Pelley reported that "a late surge has pushed enrollment in Obamacare over the top." Major Garrett went on to report that "the enrollment surge...reflects a White House media campaign that targeted the 20 cities with the highest number of uninsured residents." The CBS Evening News (4/1, story 3, 1:50, Pelley, 5.58M) also had a segment on the enrollment process in California where the sign-up deadline has been extended to April 15.

The Wall Street Journal (4/2, Favole, Nelson, Radnofsky, Subscription Publication, 4.25M) reports that the President's defense of the ACA on Tuesday was more forceful than those he has offered in remarks on the topic since healthcare.gov's rollout in October. The Hill (4/1, Sink, 76K) reported that on Tuesday, the President "was clearly buoyed by the enrollment figures and challenged Republicans to 'explain why we should go back to the days when seniors paid more for their prescriptions, or women had to pay more than men.'"

The Huffington Post (4/1, 11.54M) reported that the President "also hit back at critics of the law, saying the problems they predicted haven't come to pass." The President is quoted as saying, "There are still no death panels, Armageddon has not arrived." USA Today (4/2, Jackson, Madhani, 5.82M) reports that the President said the enrollment figure mean "the Affordable Care Act is here to stay," and "denounced Republican attacks on the new system." According to USA Today, the President contended that "if the GOP continues to pursue to repeal," they "will have to explain to millions of newly insured Americans why they want to take away their policies." USA Today adds that the President went on to "urge...Republicans to work with him...to improve the law where needed, including expansion of Medicaid in states that have resisted the plan."

The Los Angeles Times (4/2, Parsons, 2.38M) also reports that "while previously uninsured Americans are getting used to their new access to healthcare, the White House wants to drive home the message that the benefits may be at risk" if Republicans get their way. The Times reports that Jay Carney said on Tuesday, "Now there are at least 7,040,000 Americans who have enrolled through the marketplaces for affordable quality health insurance, and those who run against it, who run on repeal and offer nothing in return but the old status quo, are going to have some explaining to do to those millions of Americans who now have the security of affordable health insurance."

Politico (4/2, Kenen, 73K) reported that "with special enrollment, extra special enrollment, slightly extended state enrollment and very extended state enrollment, the sign-up tally will keep climbing beyond...7.1 million." Politico also notes that the 7.1 million total "doesn't account for Medicaid," and "a few recalcitrant states may yet take up the Obamacare Medicaid expansion," something New Hampshire "decided to do so just last week."

McClatchy (4/2, Pugh, Wise, Subscription Publication, 13K) noted that on Tuesday, Jay Carney said, "I think it's fair to say we surpassed everyone's expectations." The Hill (4/1, Sink, 76K) reports that Carney also reiterated that the President "has had and has confidence in" HHS Secretary Sebelius. On Fox News' Special Report (4/1, 2.15M), Ed Henry noted that in his Rose Garden appearance Tuesday, "there was no shout-out for" Sebelius although he singled out several others for praise.

However, Politico (4/1, Epstein, Dovere, 73K) says that "while the president did sound like he was enjoying a victory lap...he made clear that some bumps still lie ahead," and, according to Politico, "White House officials pushed back ahead of time on the notion that the event was a victory lap." Politico adds that "Republicans have made clear that they aren't giving up on dismantling the law," and Speaker Boehner "reiterated Monday that he will continue to push to repeal it."

According to the New York Times (4/2, A1, Shear, Pear, Subscription Publication, 5.41M), the "milestone" hailed by the President on Tuesday "may be more significant politically than for what it says about the law's potential impact on the American health system, which remains unclear."

The Washington Post (4/2, A1, Goldstein, Eilperin, 2.33M) says "the six-month sign-up period achieved results that congressional budget analysts had first anticipated — and more recently had thought would be impossible." According to the Post, "As surprise about the high total rippled among the Obama administration's friends and foes alike, they agreed that the law had met the threshold test of whether it could attract large numbers to...[the] marketplaces."

Bloomberg News (4/2, Talev, Keane, 392K) reports that on Tuesday, "Republicans questioned how many of those

who signed up have actually paid premiums for coverage," and "cited the continued rise in health-care costs and the cost to businesses." According to Bloomberg, "Attention now will turn to the quality of coverage Obamacare enrollees receive" and "their access to medical services."

The Washington Times (4/2, Howell, 230K) says that on Tuesday, the President "rattled off anecdotes about a bartender and other people who found a path to affordable coverage under his law, but Republican critics are sure to hit back with stories of rising premiums in their districts." According to the Daily Caller's (4/1, 135K) Neil Munro, the President was "suggest[ing] to his supporters that people oppose the law because they don't like him personally" when he said, "Regardless of your politics or your feelings about me," the ACA is "good for our economy, and it's good for our country."

Vulnerable Democrats Remain Wary Of Embracing ACA. Politico (4/1, Hohmann, 73K) reports that on Tuesday, Democrats "outlined plans...to step up attacks on Republicans for wanting to repeal the health care law." However, according to Politico, "Democrats on the ballot this year continue to tread cautiously," and those who supported the ACA "but have distanced themselves" from the law in recent months "have no plans to suddenly embrace it," planning instead to "continue emphasizing the ways they want to 'fix it' and 'make it work.'"

The AP (4/2, Pace, Lederman) also says "the late enrollment surge may do little to change the political dynamics heading into the midterm elections, particularly for Democrats running in conservative states where the health law and the president himself remain deeply unpopular." The AP reports that on Tuesday, "in a preview of his party's midterm messaging," the President "declared...that while the health law isn't perfect, it is 'here to stay.'"

However, the Daily Caller (4/1, Bordelon, 135K) reported that also on Tuesday, House Minority Leader Nancy Pelosi "appeared hesitant" to make the ACA "the central plank in her party's push to win in 2014, telling reporters that 'while we're proud of the Affordable Care Act, we now pivot to jobs.'" According to the DC, when asked on Tuesday "whether this represented 'vindication' and a 'turning of the tide' on the unpopular law, she stopped short of declaring Obamacare a winning issue," saying, "We'll see. ... I think the fight for the election — elections are always about jobs. So I think that while we're proud of the Affordable Care Act, we now pivot to job creation."

Roll Call (4/1, Dennis, Subscription Publication, 67K) notes that Pelosi, "who took on the most congressional responsibility for delivering Democratic votes to pass the legislation — and lost the speaker's gavel as a result"—had lunch with the President on Tuesday and then "spoke to reporters outside of the West Wing for a celebratory press conference of her own." Pelosi is quoted as saying, "It never for one instant occurred to me that the Affordable Care Act would collapse."

The Washington Post (4/2, A1, Goldstein, Eilperin, 2.33M) reports that Sen. Mary Landrieu, "one of the most vulnerable" incumbent Senate Democrats up for re-election in November, released a statement reading: "Today's enrollment announcement confirms what I have said since day one — the Affordable Care Act holds great promise and is getting stronger every day."

The Wall Street Journal (4/2, Subscription Publication, 4.25M), in an editorial, makes the case that vulnerable Democrats' reluctance to campaign as champions of the ACA's reforms is evidence that they do not believe the optimistic narrative from the White House regarding the progress made in implementing the law. The Journal notes several of the Senate Democrats facing tough campaigns are actively touting their support for plans to fix some of what are perceived to be the ACA's flaws.

RYAN UNVEILS HOUSE REPUBLICANS' 2015 BUDGET. House Budget Committee Chairman Paul Ryan on Tuesday unveiled the House Republican 2015 budget, which seeks to reduce Federal spending by \$5 trillion. Print reports this morning almost universally cast the plan as a political document which lays out Republican priorities ahead of the midterm elections, and note that it stands no chance of being enacted into law.

Politico (4/1, French, 73K) reports that the proposal seeks to "shave federal spending by \$5 trillion by offering changes to social welfare programs, ending government ownership of Fannie Mae and Freddie Mac and repealing Obamacare." Politico notes that while the budget "is little more than a political document to serve as an outline of Republican priorities going into the November election," it could "set off a round of intraparty squabbling due to the House Budget Committee chairman's broad proposed changes to Medicare, including a controversial proposal

subsidizing private health insurance for those 54 and younger." Ryan said that the measure "serves to show voters that Republicans are not just an 'opposition party.'"

The AP (4/2, Bondioli) reports that the plan would "slash \$5.1 trillion in federal spending over coming decade and promises to balance the government's books with wide-ranging cuts in programs like food stamps and government-paid health care for the poor and working class." In addition, it would "cut Pell Grants for low-income students and pensions for federal workers, while steering away from cuts to benefits for senior citizens, at least in the short term." While the plan is likely to "skate through the Budget Committee on Wednesday," it "faces challenges on the floor next week since it endorses a bipartisan pact — negotiated by Ryan and Senate Budget Committee Chairwoman Patty Murray, D-Wash., in December — to increase agency operating budgets this year and next."

The Washington Post (4/1, O'Keefe, 2.33M) reports that while Ryan and senior GOP leadership aides predicted that the plan "will eventually pass the House with sufficient Republican support because it is similar to the one passed last year," Democrats dismissed it "as unrealistic and signaled that they would once again use it to draw contrasts for voters before November's midterm elections." Meanwhile, the White House rejected the plan, saying in a statement that it "would slow the economy, stack the deck against the middle class and threaten the guaranteed benefits seniors have paid for and earned."

USA Today (4/2, Davis, 5.82M) reports that the plan "is not expected or really even intended to become law." Rather, "it is designed to outline Republican priorities and goals for taxes and spending over the long term."

The New York Times (4/2, Weisman, Subscription Publication, 5.41M) reported that the measure "will serve more as a 2014 Republican campaign manifesto than a legislative agenda."

Bloomberg News (4/1, Wallbank, 392K) describes the proposal as "a declaration of party priorities seven months before the midterm election," and notes that Ryan called it a "blueprint for the country's future."

The Washington Times (4/2, Dinan, 230K) reports that the plan, which is "likely Mr. Ryan's last one as the head of the committee," is seen "as one final test of the GOP's 2012 vice presidential nominee." Ryan said his plan "marks a rejection of the last five years under President Obama, who championed tax hikes and higher government spending as a way to stabilize the economy."

McClatchy (4/1, Lightman, Subscription Publication, 13K) reports that the proposal has "no chance of winning approval."

The Washington Post (4/2, Davidson, 2.33M) reports in its "Federal Diary" column that the Federal employee unions "unanimously denounced" the Ryan plan. The plan, the Post notes, "repeats previous proposals to increase the amount federal employees would pay toward retirement, with no increase in benefits," which "would be a pay cut." Rep. Elijah Cummings said that Republicans "want 'to squeeze more from hard-working, middle-class federal employees,'" adding that the proposal "unfairly targets federal employees who have been used repeatedly over the past three years as the Republicans' piggy bank for deficit reduction."

More Commentary. An editorial in the Wall Street Journal (4/2, Subscription Publication, 4.25M) says Ryan's budget demonstrates his priorities and reaffirms House Republicans' desire to balance the budget via spending restraint and entitlement reform. The Journal contrasts this with Democrats, noting that they plan to go through the election without informing voters of their tax and spending plans.

A New York Times (4/2, Subscription Publication, 5.41M) editorial is less complimentary, noting that because Ryan's proposal "will never come close to being law," it "doesn't have to pretend to be serious." The plan, the Times argues, is "designed solely to be reduced to a few bullet points so House Republicans can have something to show their most antigovernment voters." The Times says the Ryan plan is "destructive to the country's future" and urges voters to "look closely at the details to see if they would choose the same course."

An editorial from Bloomberg View (4/1) is also critical of the plan, calling it "a partisan wish list, comforting Republican constituencies and upsetting Democratic ones," which "stands in stark contrast to the bold tax-reform plan produced in February by [Rep. Dave] Camp, chairman of the Ways and Means Committee, which spread its

pains and gains more equitably." Bloomberg notes that it is "hard to see how cuts to income support and social services in the midst of a weak labor market will improve many lives."

MANUFACTURING ACTIVITY, AUTO SALES UP LAST MONTH. Reuters (4/2, Mutikani) reports that the Institute for Supply Management announced on Monday that its manufacturing activity index rose to 53.7 in March from 53.2 in February, indicating that the sector's expansion accelerated last month. The increase came despite a harsh winter, and Reuters says that data raises hopes that the economy will grow stronger as spring sets in.

The Wall Street Journal (4/2, Leubsdorf, Madigan, Subscription Publication, 4.25M) is a bit more negative on the data, saying that the increase is short of what many forecasters expected by this time this year. It also notes that the employment growth portion of the index fell to its lowest level since June 2013, a potential troubling sign.

The Wall Street Journal (4/2, Rogers, Kell, Subscription Publication, 4.25M) also reports that most major automakers posted solid US sales gains in March, setting the industry on course for renewed growth this year following a slump this past winter. Fiat Chrysler reported that its sales were up 13%, while GM's rose 4% and Ford's were up 3.3%. Toyota saw its sales rise 4.9%, while Nissan's were up 8.3%. However, Honda's sales fell 2%. The numbers are all over March 2013. The data eases the concerns of many in the industry who feared that new car sales were going to taper off after several strong years.

The New York Times (4/2, Ruiz, Subscription Publication, 5.41M) says that the "auto market rebounded in March from a harsh winter that had stunted steady sales gains in the United States." The Times says that many "brands and models had double-digit declines in January, and overall industry sales for that month dropped by more than 3 percent, to about one million vehicles." Sales continued to be "sluggish" in February, with "a total 1.2 million vehicles sold and top automakers like Ford and General Motors posting a second straight month of declines."

Editorial Wrap-Up:

NEW YORK TIMES. "Mr. Ryan's Faith-Based Budget." A New York Times (4/2, Subscription Publication, 5.41M) editorial notes that because House Budget Committee Chairman Paul Ryan's proposal "will never come close to being law," it "doesn't have to pretend to be serious." The plan, the Times argues, is "designed solely to be reduced to a few bullet points so House Republicans can have something to show their most antigovernment voters." The Times says the Ryan plan is "destructive to the country's future" and urges voters to "look closely at the details to see if they would choose the same course."

"Bad Move On Jonathan Pollard." The New York Times (4/2, Subscription Publication, 5.41M) editorializes that the use of Jonathan Pollard as "a bargaining chip" is a sign of "America's desperation to keep" the Israelis and Palestinians engaged in negotiations. The Times says peace between the parties "can be achieved only if they want it for themselves," and recent actions indicate that is "in doubt." The Times argues that freeing Pollard is "a bad idea and would do nothing to advance progress on the core issues." The Times says it "might conceivably be worth relapsing him early" if it helped encourage Israel to make "a truly big decision, like a final peace agreement."

"Albany's Perilous Oil Boom." The New York Times (4/1, Subscription Publication, 5.41M) editorializes that oil "tank cars are accidents waiting to happen" and regulators should "take all possible steps to reduce the risks." The Times argues that the US should phase out old tank cars and "should follow through" on proposed rules to force oil shipments to "avoid populated areas," and regulate oil like "other toxic materials," requiring "more security, better spill-response plans and assurances the cargo is properly identified."

"Keeping Track: April 2, 2014." The New York Times (4/2, Subscription Publication, 5.41M) has launched a new feature on its editorial page called "Keeping Track," which provides "updates on issues and subjects we follow." In this edition, the Times examines Arizona's abortion law, the enforcement of pay rules, and the Senate's passage of the so-called "doc fix."

WASHINGTON POST. "Diplomatic Quid Pro Quo." The Washington Post (4/2, 2.33M) editorializes that the reason the US is "in the position of offering its own concessions," such as the release of Jonathan Pollard, "rather

than brokering compromise" between Israel and the Palestinians is Secretary of State Kerry "has failed to persuade either to budge" from their views. The Post argues that releasing Pollard "looks like a way to buy time – and avoid admitting defeat." The Post says that until the Israelis and Palestinians display "a genuine willingness...to compromise," the US should "refrain from its own extraordinary gestures."

"0 Percent Of Precincts." In an editorial, the Washington Post (4/2, 2.33M) criticizes the D.C. Board of Elections over the slow reporting of voting totals in Tuesday's election, saying, "It really shouldn't be too much to expect that an agency whose job is to tabulate and report results will do so in a more expeditious manner." Over "two hours after polls closed, only a few thousand votes had been tabulated and reported," says the Post, which isn't "the kind of performance to inspire confidence in the democratic process."

"Metro's Failing Grade."

WALL STREET JOURNAL. "The ObamaCare Copperheads." The Wall Street Journal (4/2, Subscription Publication, 4.25M), in an editorial, makes the case that vulnerable Democrats' reluctance to campaign as champions of the ACA's reforms is evidence that they do not believe the optimistic narrative from the White House regarding the progress made in implementing the law. The Journal notes several of the Senate Democrats facing tough campaigns are actively touting their support for plans to fix some of what are perceived to be the ACA's flaws.

"Meltdown In Palestine." The Wall Street Journal (4/2, Subscription Publication, 4.25M) editorializes that while President Obama has been ambitious in dealing with the Middle East during his second term, he has not been very successful. The Journal notes the Syria talks did not produce a favorable outcome and the Israeli-Palestinian peace talks are on the verge of collapse. The Journal argues that diplomacy should focus on realistic solutions, rather than implausible outcomes.

"The Ryan Priorities." An editorial in the Wall Street Journal (4/2, Subscription Publication, 4.25M) says that House Budget Committee Chairman Paul Ryan's budget demonstrates his priorities and reaffirms House Republicans' desire to balance the budget via spending restraint and entitlement reform. The Journal contrasts this with Democrats, noting that they plan to go through the election without informing voters of their tax and spending plans.

"Righting Hollande." The Wall Street Journal (4/2, Subscription Publication, 4.25M) editorializes the French government should implement policies that stop negatively impacting foreign investors and the wealthy. The Journal says that if the appointment of Prime Minister Manuel Valls indicates the government is moving towards the right, then the Socialist Party might receive more support in the next election, than it did in last weekend's municipal votes.

Other: April 2 – 3. MEMA LEGISLATIVE SUMMIT — The Motor & Equipment Manufacturers Association holds its 2014 Legislative Summit. 11:45 a.m. Remarks by U.S. Rep. John Dingell of Michigan. 3 p.m. Remarks by Secretary of Energy Ernest Moniz. Location: W Hotel, 515 15th St. NW.

FEDSCOOP SECURITY THROUGH INNOVATION SUMMIT — The Security Through Innovation Summit will bring together over 1000 IT leaders and innovators from the Gov IT community to collaborate and discuss top trends in technology. Topics will include: Innovation, Mobility, Big Data Analytics, Virtualization, Cloud and CyberSecurity. Speakers will include: Roberta Stempfley, Acting Assistant Secretary of the Office of Cybersecurity and Communications, DHS; Steve VanRoekel, CIO, Executive Office of the President; Teri Takai, CIO, DoD; Don Good, Chief, Cyber Division, FBI; Michael DeCesare, President, McAfee; Malcolm Harkins, VP & Chief Security and Privacy Officer, Intel. <http://fedscoop.com/securityinnovationsummit/> 10:35 a.m. NPPD CS&C Senior Strategist and Chief Architect Brian Done will participate in a panel discussion entitled "Advanced Threat

Detection." 1 p.m. NPPD CS&C Acting Assistant Secretary Roberta Stempfley will deliver remarks on the Departments cybersecurity initiatives and programs. Location: Ritz Carlton, 1150 22nd St., NW.

CIVIL SERVICE SYSTEM REPORT RELEASE — 9 a.m. – 10:30 a.m. The nonprofit Partnership for Public Service will release a comprehensive report calling for major reforms to the federal governments decades-old civil service system, "laying out a plan to modernize areas that include the outdated pay and hiring policies" .- Building the Enterprise: A New Civil Service Framework report release and panel discussion. Speakers: Moderator: Max Stier, president and CEO, Partnership for Public Service. Panelists include: The Honorable Edward Kaufman, former U.S. Senator (DE); The Honorable Anthony Miller, former deputy secretary and chief operating officer, Department of Education; and Robert Tobias, former president, National Treasury Employees Union. Location: Partnership for Public Service, 1100 New York Ave, NW, Suite 200 East.

NPC NEWSMAKER – STEVE ISRAEL — 10 a.m. Rep. Steve Israel, Democratic Congressional Campaign Chair, to discuss state of play in 2014 congressional races. Location: National Press Club, Zenger Room.

MANAGING CLIMATE RISKS IN THE SOUTHWEST — 11 a.m. – 12:30 p.m. The Environmental and Energy Study Institute EESI hosts a briefing on Drier and Hotter: Managing Climate Risks in the Southwest. Speakers: Eleanor Bastian, Legislative Director, Office of Rep. Diana DeGette (D-CO); Patrick Gonzalez, Ph.D., Climate Change Scientist, U.S. National Park Service; Chris Treese, External Affairs Manager, Colorado River District; Margaret Bowman, Acting Environment Program Director, Walton Family Foundation; Louis Blumberg, Director, California Climate Change Program, The Nature Conservancy. Webpage: www.eesi.org/040214southwest RSVP: www.eesi.org/040214southwestRSVP Livecast: www.eesi.org/040214southweststream Location: 340 Cannon.

BREAST CANCER SURVIVOR ROUNDTABLE — 1:30 p.m. – 3:30 p.m. Media kickoff event for the Susan G. Komen Global Race for the Cure. With Josh Morgan, Former Washington Redskin, Susan G. Komens Global Race Ambassador; Shyrea Thompson, Komen grantee, Executive Director, Capital City AHEC (DC Pink Divas); Dr. Michelle Gaskins Craig, DC Pink Diva and Susan G. Komen 2013 Survivor of the Year; Rep. Aaron Schock, Global Race for the Cure Honorary Co-Chair; Rep. Debbie Wasserman Schultz, Global Race for the Cure Honorary Co-Chair; Malaak Compton-Rock, Founder, Angel Rock Project; Dr. Judy Salerno, President and CEO, Susan G. Komen. Location: Brown Memorial AME Church, 14th & North Carolina Avenues, NE.

U.S. CHAMBER – TUNISIA PM — 2:45 p.m. – 5:30 p.m. The U.S. Chamber's Africa Business Initiative (ABI) will host a public forum focused on a new era of economic cooperation between the U.S. and Tunisia with a keynote address by Tunisian Prime Minister Mehdi Jomaa. Speakers: H.E. Mehdi Jomaa, Prime Minister of Tunisia; Myron Brilliant, Executive Vice President and Head of International Affairs, U.S. Chamber of Commerce; H.E. Hakim Ben Hammouda, Tunisian Minister of Economy & Finance; H.E. Taoufik Jelassi, Tunisian Minister of Higher Education, Scientific Research, and ICT. Location: U.S. Chamber of Commerce, 1615 H Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: "Well, yesterday was the big deadline to sign up for Obamacare and the White House seems very happy. They said that seven million people have signed up. When asked how many people tried to sign up, they were like, 'Thirty million.'"

Jimmy Fallon: "That's right, the White House said that it surpassed its goal for people enrolled in Obamacare. It's amazing what you can achieve when you make something mandatory and fine people if they don't do it. And then keep extending the deadline for months. It's like a Cinderella story. It's just a beautiful thing."

Jimmy Fallon: "Isn't it great how many people did it [signed up for Obamacare]? But if you still haven't enrolled, you might have to pay a penalty called the 'individual shared responsibility payment,' which is one percent of your salary. Then Americans said, 'Man, good thing I don't have a job.'"

Jimmy Fallon: "Of course, Obama still got his hands full with Russia, and get this – officials in Finland say that the Russian army is now conducting drills on its border. Or as Putin calls it, 'Window shopping.'"

Additional Memo for April 3, 2014

Javaid, Zaina <zaina_javaid@ios.doi.gov>
To: Sally Jewell (b) (6) <[REDACTED]@ios.doi.gov>
Cc: Nicole Buffa <nicole_buffa@ios.doi.gov>

Wed, Apr 2, 2014 at 8:15 PM

Sally--

This briefing memo for tomorrows Committee Hearing came in as well. I have also uploaded it to Google Drive.

Thank you,

Zaina

91K

INFORMATION/ BRIEFING MEMORANDUM FOR THE SECRETARY

HNR COMMITTEE HEARING – POTENTIAL QUESTIONS FROM MEMBERS

DATE: April 3, 2014
LOCATION: 1324 Longworth HOB
TIME: 10:00AM – 12:30PM
FROM: OCL

OVERVIEW:

Sally—These are the questions we have heard from House Natural Resources Committee staff may be asked by members. Of course it is not a complete list, but does provide a sense of what some of the parochial issues for the Democratic side. I would also note that the Majority has solicited questions online, but has only received 7 suggestions, the majority of which are on the Merced River Plan in Yosemite NP. Finally, 178 bipartisan members including 25 Republicans signed onto a letter supporting LWCF, including 4 HNR Republicans – Daines, Runyan, Benishek and Tipton.

QUESTIONS:

Rep. DeFazio:

How will the BLM comply with Judge Leon's court order to increase harvest volumes if the O&C budget is reduced as included in the President's budget request?

- There are a number of things mixed in with the O&C budget.
- A \$4.2 million decrease reflects lower funding needs as the Western Oregon Resource Management Planning program moves to complete the six revised RMPs in June, 2015.
- BLM is working on a sustained yield level for Oregon and has a plan in place to cut 200 million board feet a year.
- The BLM expects increased salvage timber sales resulting from 2013 fires, temporarily increasing the volume offered in 2014.
- While the President's budget request includes a reduction in appropriated funding of \$4.4 million, the proposal is accompanied by a plan to draw funding from two permanent appropriations supporting timber and forest health to sustained approximately 200 MMBF, a level comparable with 2012 and 2013 program activities.
- The BLM plans to spread the proposed FY 2015 reductions in appropriated funding to those program components that have the least near-term impact to forest management, multiple resource use benefits, and services to the local communities and broader public, while continuing to manage these lands for sustained yield.

***Support for LWCF and oversight investigations MAY come up, but the Ranking member's main question will be O&C.**

Rep. Garcia:

C-111 South Dade Canal Project:

- The Modified Water Deliveries to Everglades National Park (Modified Water Deliveries) and C-111 South Dade projects are federal projects designed and constructed to restore more natural hydropatterns to Everglades National Park.
- Both projects are nearing completion of the construction phase; both efforts are pre-requisites to implementing several key components of the Comprehensive Everglades Restoration program (CERP), including current Central Everglades Planning Project (CEPP).
- The U.S. Army Corps of Engineers is the lead Federal agency. The USFWS and NPS serve as federal partners. Key non-federal partners are the South Florida Water Management District and the Florida Department of Environmental Protection

Everglades Restoration: The Administration has a sustained commitment to restoring and protecting the Everglades. Federal leadership in the effort has been reinvigorated, investing \$1.7 billion in Everglades projects and initiatives that will make a measurable impact on the ground. The strong partnership we have with the State of Florida, Tribes and other stakeholders is instrumental in achieving these goals. The FY15 budget supports continued bridging of the Tamiami trail and efforts to restore this critical ecosystem while creating jobs and strengthening Florida's economy.

- I've visited the Everglades twice, most recently in January to get a first hand look at our restoration efforts there and met with key stakeholders in the region.
- Some big ticket accomplishments since last year include:
- Securing a \$90 million commitment from Florida for the implementation of the next 2.6 mile bridge on the Tamiami trail. Our budget proposal outlines our strategy for how we will secure the necessary federal share of this project and we expect to move forward on a design build contract with the Florida department of transportation this fall to get this project started
- We are working closely with the Army Corps as it completes its plans, including a Chief's Report that will be forward to congress his summer to secure and authorization for the central Everglades plan that will provide the capacity to increase water supplies for the environment while meeting water related needs for others users. This is a huge step forward and responds directly to the national Academy of Sciences recommendations to focus on the remaining natural Everglades
- We are working closely with private landowners to implement the Everglades headwaters national wildlife refuge and conservation area. Appraisals are underway and we are in active discussions with landowners and securing the necessary easements from willing sellers

Del. Sablan:

Marianas Trench National Monument Co-Management: If asked for the current status of negotiations between Interior and NMFS regarding the co-management of submerged lands around the Islands Units in Marianas Trench Marine National Monument?

- First of all, I would like to thank you for your efforts surrounding passage of legislation to transfer three miles of submerged lands surrounding the CNMI.
- We were pleased that most of these lands were conveyed to CNMI on January 16, 2014, and that on March 26, 2014, CNMI accepted a patent conveying oil, gas and other minerals underlying the submerged lands to CNMI.
- I believe we must expeditiously develop an agreement for coordination of management that ensures the protection of the resources of the Monument and have asked the U.S. Fish and Wildlife Service and our counterparts at the National Marine Fisheries Service to expeditiously complete the agreement.

Existing Leases/Mineral Rights on Submerged Lands: If asked if the mineral rights in the submerged lands surrounding CNMI are subject to any lease, permit, or interest previously granted by the U.S.?

- It is my understanding that the Department is not aware of any outstanding lease, permit, or interest previously granted by the U.S. for mineral rights in the submerged lands now owned by CNMI.

Northern Marianas Islands Being Added to OCSLA: If asked for your views on amending the OCSLA to include CNMI:

- It is my understanding that attorneys in our Solicitor's office have been looking into the legal issues associated with issue, and I will be happy to follow-up with you once further analysis has been conducted.

Insular ABC Initiative: If asked for your views on OIA's ABC report initiative:

- It is my understanding that OIA commissioned a study by the U.S. Army Corps titled, "Assessment on Buildings and Classrooms", which identified the needed repairs and renovations of school facilities in insular areas.
- I know OIA is focusing on ensuring healthy and safe environments for schoolchildren, and it is our hope that each insular government will join us in that effort.
- It is my understanding that OIA's CIP funding is available for this initiative.

Technical Assistance Grants: If asked for your opinions on the value of technical assistance grants to U.S. territories:

- OIA's \$17.5 million in technical assistance activities (up \$3 million from FY 14 enacted) have always been considered its most effective tool to implement Administration

policy, and to achieve mutually desired improvements in the insular areas.

- Many of the technical assistance activities are evolving from application-based grant programs, which reacted to problems identified, to programs that rely on the implementation of result-oriented plans.

Palau: The Administration has indicated strong support for the approval of the new financial agreement under the Palau Compact of Free Association. However, the Administration has refused to provide an offset to the agreement that Congress can accept. What are you doing to ensure the authorization of the Palau financial agreement?

- The Administration continues to strongly support approval of the Palau financial agreement, and looks forward to continuing the United States partnership with Palau.
- Although the Administration has proposed several offsets, I look forward to working within the Administration and with Congress to identify an appropriate offset to ascertain approval of this important agreement.

Rep. Lowenthal:

Is the BLM working with the Ground Water Protection Council to make FracFocus comply with the President's Executive Order Supporting Safe and Responsible Development of Unconventional Domestic Natural Resources?

- Yes. In compliance with the President's Executive Order Supporting Safe and Responsible Development of Unconventional Domestic Natural Gas Resources, the BLM is working together with the Groundwater Protection Council and FracFocus to assure fracking fluid chemical disclosure transparency.
- The model being developed is similar to Colorado's, by requiring public disclosure to the FracFocus website, while allowing companies to use an affidavit asserting trade secret protection for certain information.
- The BLM will maintain authority to require disclosure of that information.

Rep. Horsford:

Sage Grouse

- I remain committed to the principle that collaboration is the key to these difficult issues, and am committed to having FWS and BLM continue to work with state and local governments and landowners to take action that will hopefully avoid the need to list the species.
- I am aware that good work has been accomplished through these existing partnerships, for example on state grazing plans, which are important for healthy rangeland, and we hope we can continue that momentum forward.
- The FY 2015 President's Budget requests \$15 million to implement BLM's planning

strategy, continue large-scale habitat assessment, and improve sage grouse habitat.

- The FWS request includes a \$4 million increase to help design, implement and align conservation efforts to meet the range-wide needs of the species.
- The 2015 request also supports an important collaboration between BLM, FWS and the USGS to manage the sagebrush landscape.
- The BLM has incorporated state-proposed plans into the alternatives considered in draft EISs.
- All 15 EIS drafts were released for public comment in 2013.
- The BLM did not extend the comment periods because the U.S. Fish and Wildlife Service was under court-appointed deadlines in regard to potential listing of sage grouse.
- BLM plans to issue final EISs in the Summer/Fall of 2014, with RODs to be signed by the end of the calendar year.
- The Department has collaborated with 11 governors of sage-grouse states through the Western Governors' Sage Grouse Task Force.

Rep. Costa:

Water and the Bay Delta: In California, severe dry conditions in 2013/2014 are considered the worst in 160 years of record keeping, even surpassing the previous driest years of 1976-1977 when California's population was 22 million; today the population is 38 million.

What are you doing right now to address the drought?

- The Administration will continue to work closely with the state to ensure a balanced approach to providing for the water needs of people, agriculture, businesses, power, and the environment.
- Reclamation, with the assistance of other Interior bureaus, is working with partners to increase the flexibility for water managers and users, providing assistance in planning, fast-tracking projects, and streamlining water transfers.
- Reclamation and the Natural Resources Conservation Service are making funds available for water districts and associated farmers to promote water conservation and management, including modernizing infrastructure.
- The USGS is working with communities to provide water availability information, evaluating groundwater availability and withdrawal, and monitoring impacts of drought.

ESA - tricolor blackbirds:

- The Tricolored Blackbird is not listed as a T&E species under the ESA, but is considered a "species of conservation concern".
- This status acknowledges that the FWS is aware of population reductions.
- The bird is fully protected under the Migratory Bird Treaty Act and is protected under California law.

Rep. Grijalva:

Wild Horses and Burros:

- The 2015 budget includes \$80.2 million for the program, an increase of \$2.8 million from 2014.
- This increase, plus another \$2 million in the 2014 appropriation, allows BLM to aggressively implement the National Academy of Sciences recommendations including expanding ongoing research on population control methods.
- If left unmanaged, wild horse and burro populations will double in size every four years. It makes sense that we look to research to provide answers and offer management options.

Wilderness Act 50th Anniversary: 2014 marks the 50th anniversary of the Wilderness Act. What are you doing to mark this important milestone?

- The 50th Anniversary of the Wilderness Act provides an important opportunity to commemorate our legacy and celebrate the importance of its continued preservation for future generations.
- Surveys indicate that 12 million Americans take between 16 and 35 million trips to wilderness each year, either on their own or with a guide.
- To local economies and members of the outdoor industry, Wilderness equals jobs. Parks, monuments, and wilderness areas are the infrastructure for the outdoor industry, which generates \$646 billion annually to the economy, supports 6.1 million jobs and generates nearly \$80 billion in federal, state and local taxes.
- The three Interior agencies who manage wilderness, the Bureau of Land Management, the Fish and Wildlife Service, and the National Park Service, are participating in Wilderness50, a diverse and growing national coalition of government agencies, non-profit organizations, and academic institutions that have come together to plan and conduct 50th Anniversary celebration events and activities.
- A wide variety of commemoration events are being planned in communities throughout the country to raise public awareness of this historic year so that more people understand and appreciate wilderness, its values, and its benefits. I plan to be involved in many of these.
- One of our key goals is to engage youth and underserved communities; and foster wilderness stewardship by better connecting the broad wilderness network.
- We continue to highlight the importance of Wilderness, and to stress that Wilderness is relevant to all Americans, as it supports diverse lifestyles, boosts local economies, and helps to keep our air and water clean.
- DOI Agencies and Wilderness
 - BLM 221 wilderness units comprising nearly 9 million acres
 - FWS 71 wilderness units comprising over 20 million acres
 - NPS 61 wilderness units comprising approximately 44 million acres

Oil and Gas Spill in Grand Staircase Escalante National Monument: There have been news

reports about a serious oil spill in the Grand Staircase-Escalante National Monument. What is the BLM doing to address the spill, get it cleaned up, and avoid future such spills?

- The Department and the BLM are taking this matter very seriously. A special interoffice interdisciplinary team has been assembled to address the situation.
- Oil and Gas production in the Upper Valley oil field predates the establishment of the GSENM. There are five production wells and two injection wells within the GSENM. This is the only oil and gas production within the boundaries of the GSENM.
- After an initial on-the-ground inspection the BLM suspects that the vast majority of the spill may be as much as three decades old.
- A small nearby pipeline appears to have leaked from time to time with perhaps as much as 10 barrels of oil having leaked fairly recently. That has been repaired and the leak has stopped.
- The BLM is currently reviewing best options for ensuring safe rehabilitation and restoration of both the recent small leak as well as the older spill.
- The BLM in Utah is conducting a complete inspection of the entire oil field with experts brought in from other Utah BLM offices.
- The company that operates the Upper Valley oil field has been very cooperative and immediately shut the well down and is working with the BLM to determine best next steps.
- I would be happy to have the BLM keep you and your staff informed of any further updates.

IPCC report: Regarding the IPCC report, these are the top level talking points prepared for you for Tuesday's interview with Andrea Mitchell:

CONSISTENT WITH THE PRESIDENT'S CLIMATE ACTION PLAN

- The report reflects scientists' confidence that climate change will have growing adverse impacts on human health, livelihoods, ecosystems, and economies.
- The major findings of this report further strengthen the case for many of the policies and steps described in the President's Climate Action Plan

STRENGTHENING THE CASE FOR IMMEDIATE ACTION

- Observed impacts of climate change are widespread and consequential.
- People, societies, and ecosystems around the world are vulnerable and exposed to climate change, in different ways.
- Large magnitudes of warming increase the likelihood of severe and pervasive impacts that may be surprising or irreversible.
- Effective climate-change adaptation can help build a richer, more resilient world in the near-term and beyond

U.S. LEADERSHIP

- Since the 1990 passage by Congress of the Global Change Research Act—and across

four Administrations—the Federal Government has supported world class research to understand how the planet is changing; how humans are contributing to climate change; the impacts of climate change on people, communities, and ecosystems; and ways to address and minimize those impacts.

- Of the 300+ lead authors and review editors who produced this report, more are from the U.S. than from any other nation (almost 20%) and over a dozen are U.S. Federal scientists

Ruiz:

Salton Sea is his top priority (he has an appropriations letter circulating on this topic at the moment.)

The Salton Sea is a shallow, saline, closed-basin lake located in Southern California. The primary concerns are air quality issues related to exposed land as the Sea recedes and the continued increase in the sea's salinity, which will eventually result in habitat unsuitable for the remaining fish and loss of habitat for migratory birds. Rep. Ruiz has expressed an interest in Federal funding to support Salton Sea restoration efforts. On April 26, 2013, Rep. Ruiz hosted a day-long meeting with federal officials, including Assistant Secretary for Water and Science, Anne Castle, to discuss Salton Sea habitat restoration projects, salinity control, proposed legislation, and renewable energy production.

If asked for your support for Salton Sea restoration:

- It is my understanding that the Administration's FY15 budget requests funding for the Bureau of Reclamation to continue water quality monitoring and oversight of other activities including wetlands development and monitoring, geothermal desalinization feasibility studies, and technical support to stakeholders.
- We have a common interest in this ecosystem and I pledge to you the full support for moving forward and finding real, common-sense solutions to the myriad of challenges facing the Salton Sea.
- DOI is entering into a Memorandum of Understanding with the Salton Sea Authority (Authority) to facilitate collaboration and exchange of technical and scientific information regarding the resources of the Sea.
- The Department of the Interior (DOI) committed to find funding and partners for the Red Hill Bay project, expected to cost approximately \$3.5 million, and designated Assistant Secretary Castle as the lead departmental official.

Tsongas:

Wild and Scenic Designation for the Nashua River: Rivers that may be included in the Wild and Scenic Rivers program are normally first studied for their suitability. Rep. Tsongas introduced legislation to authorize NPS to study whether the Nashua River and two of its tributaries in Massachusetts and New Hampshire are worthy of "wild and scenic" river designation.

- I understand that we have testified in support of this bill
- The NPS is currently working on approximately 30 previously authorized studies for potential units of the National Park System, potential new National Heritage Areas, and potential additions to the National Trails System and National Wild and Scenic Rivers System that have not yet been transmitted to Congress.
- If enacted, we look forward to working with you to implement this study.

Rep. Carol Shea Porter

Are we developing oil and gas on public lands responsibly?

- Federal lands are an important part of America's energy security.
- We must produce oil and gas in a responsible manner that returns fair value to the taxpayer and make smart choices up front about where we develop.
- In that effort, last week the President rolled out a Strategy, as part of the Climate Action Plan, to reduce Methane Emissions.
- As part of the Strategy, DOI will lead efforts to reduce methane emissions from coal mining operations and capture of methane from venting and flaring during oil and gas development on public lands.

Rep. Bordallo

Illegal Fishing: Del. Bordallo has expressed concern about illegal, unreported, and unregulated fishing around Guam and other Pacific Islands. Bordallo has introduced legislation (HR 69) to strengthen enforcement mechanisms to stop these activities, noting that illegal fishing threatens the economic and social infrastructure of fishing communities, and the security of the United States and our allies around the world, by decreasing opportunities for legitimate and conscientious fishermen.

If asked for help from the Department of the Interior to stop illegal, unreported and unregulated fishing practices:

- It is my understanding that the Administration is aware of the problems and challenges posed by illegal, unregulated and unreported fishing in the Pacific.
- It is also my understanding that the U.S. Coast Guard is the lead agency charged with combating this destabilizing activity.
- We stand ready to assist in any way we can, within our existing authorities.

Rep. Jason Smith

NPS unit in MO: The NPS is revising its General Management Plan (GMP) for the Ozark

National Scenic River (NSR). The preferred alternative would establish more formal horse trails, set zones for motorboats, and review lands for wilderness characteristics. Smith opposes the preferred alternative, and submitted detailed comments on the GMP to the NPS on 2/4/14. Smith has sponsored legislation to return the park to state management and supported an amendment to another bill requiring the NPS to continue managing the park according to existing, pre-GMP policies. Smith asserts that the NPS should give greater weight to the comments and desires of local residents for access and recreation activities. The NPS Superintendent will meet with Rep. Smith on April 2, 2014.

If asked whether you believe that the interests of the local residents should be given greater weight in determining the management of the national scenic river:

- I understand that the NPS is currently in the process of reviewing the public comments received on the draft GMP, including your submitted comments.
- The NPS is balancing the needs for diverse recreational opportunities and access to support visitor enjoyment with the need to preserve the specialness of the Ozark NSR for generations to come
- NPS anticipates completing this process early next year.

White River Blueways designation: Representative Smith sent a letter to you on June 6, 2013, requesting that you rescind the Blueways designation for the White River. He also sent a letter regarding the Blueways program with other members of the Missouri and Arkansas congressional delegations. The Department did not respond in writing to either letter as the action taken to rescind the designation was viewed as the response by the Department. In addition, the leads on the second letter responded in writing they did not need a follow up letter. Rep. Smith's staff called on Wednesday, April 2nd to ask why he never received a response to his June 6th letter and OCL provided our answer.

If he raise this during the hearing,

- The Department did not respond to the letters on this issue individually, but rather by rescinding the designation as requested by the delegation and stakeholders.

If asked to discuss the decision to rescind the National Blueways System and what "lessons were learned" about public involvement that could be applied to limit federal overreach:

- The program was initiated to recognize and support locally-led efforts to sustain the economic, recreational, and natural values of rivers and watersheds of national significance
- The decision to dissolve the program was made after careful review of the program.
- The Department will continue to encourage collaborative, community-based watershed partnerships that support sustainable and healthy water supplies.

Del. Pierluisi: He is concerned about securing funding for the NPS Centennial for New Spain/Puerto Rican heritage, specifically funding to support old San Juan Fort. And other historic structures in old San Juan. What is in your proposed Centennial Budget for Old San Juan? What are you doing to support the development of the Porsayo Del Moro National Recreation trail?

- The President's budget includes a proposal for funding to celebrate the NPS' Centennial.
- I understand that NPS is in the process of completing a special resource study that was authorized in 2009 regarding the feasibility of adding Fort San Geronimo to the San Juan National Historic Site.
- The Porsayo del Moro Trail was designated a National Recreation Trail in 2011. The NPS has entered into a partnership with the Puerto Rico Tourism Company for security, maintenance and landscaping. NPS is continuing to work with the Commonwealth on the management plan for this trail.
- With respect to the issues related to the National Recreation Trail, I look forward to learning more about this trail and working with you on it.

Rep. Holt

Offshore Wind: Secretary Jewell, the Department's budget request includes \$33.4 million for the Renewable Energy activity within the Bureau of Ocean Energy Management which will be used to support development of offshore commercial wind projects and implementation of a renewable energy leasing program. The Department has done a good job of prioritizing offshore wind, but there are still significant obstacles to the development of wind energy in the Atlantic. For example, in my home state of New Jersey, even as the Department looks to proceed with lease sales off our coast, the Christie Administration has failed to develop the criteria necessary to support the actual development of these projects. Most recently, the New Jersey Board of Public Utilities rejected a proposal by Fishermen's Energy that would have allowed for construction of a small demonstration project of the coast of New Jersey.

My question is, how has DOI been working with the State of New Jersey to ensure that offshore areas are not simply leased, but are ultimately developed?

- Since 2009 BOEM has held five Task force meetings to coordinate with federal, state, local and tribal governments on this development.
- In April 2011 BOEM published the Call for Nominations for commercial leasing for Wind Power on the OCS offshore New Jersey. They received 11 commercial indications of interest to obtain a commercial lease.
- On Feb. 3, 2012, BOEM published in the Federal Register a Notice of Availability of an Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for commercial wind lease issuance and site assessment activities on the Atlantic OCS offshore New Jersey, Delaware, Maryland, and Virginia.

- Based on comments received to the “Call,” BOEM has determined that competitive interest exists for wind energy development offshore New Jersey. BOEM is working to publish in the near future a “Proposed Sale Notice,” which will provide proposed lease terms and conditions, as well as details regarding how the lease sale could be conducted.

Oil and Gas Trends: Secretary Jewell, within this Committee and particularly on the Energy Subcommittee there has been an ongoing debate about the status of oil and gas production on federal lands in the United States. My colleagues are quick to say that production is down as a result of President Obama’s secret agenda against fossil energy, but in my analysis the facts simply do not support these conclusions.

I’ll acknowledge that offshore production is down slightly—understandable considering it is four years ago this month when the BP Deepwater Horizon explosion led to one of the worst environmental disasters in history. Of course, even offshore, EIA has projected increases in production in the coming years. Onshore oil production on federal and Indian lands is up by, even as much natural gas production has shifted to private lands where more ample reserves can be developed.

Could you please settle this debate for us today? What is the status of production on federal lands and what is the Administration doing to develop an “all of above” energy plan for federal lands and offshore?

- **Total oil production from Federal and Indian lands** (onshore and offshore) was 652 million barrels in FY 2013, an increase of 4% over FY 2012 and an increase of 13% over FY 2008.
 - **Onshore federal oil production** was 133 million barrels in FY 2013, an increase of 7% over FY 2012 and an increase of 30% over FY 2008.
 - **American Indian oil production** was 45.5 million barrels in FY 2013, an increase of 47% over FY 2012 and an increase of 80% over FY 2008.
 - Together, **Federal and Indian onshore oil production** increased 15% in FY 2013 compared to FY 2012 and increased 37% compared to FY 2008.
 - **Oil production from the federal Outer Continental Shelf (OCS)** was 473 million barrels in FY 2013, a decrease of 1% compared to FY 2012 and an increase of 2% compared to 2008.
- **Total natural gas production from Federal and Indian lands** (onshore and offshore) was 4 billion cubic feet in FY 2013, a decrease of 10% compared to FY 2012 and a decrease of 30% compared to FY 2008.
 - **Federal onshore natural gas production** was 2.7 billion cubic feet in FY 2013, a decrease of 9% from FY 2012 and a decrease of 13% from FY 2008.
 - **American Indian gas production** was 0.2 billion cubic feet in FY 2013, a decrease of 5% from FY 2012 and a decrease of 14% from FY 2008.
 - Together, **Federal and Indian onshore natural gas production** decreased 9% in FY 2013 compared to FY 2012 and decreased 14% compared to FY 2008.
 - **Federal offshore natural gas production** was 1.2 billion cubic feet in FY 2013, a decrease of 13% from FY 2012 and a decrease of 53% from FY 2008.

And what role do the economics of the energy markets play in these trends?

- As someone who started their career in the oil and gas industry I can tell you the market and the location of the resource drives development. For example the low price of Natural gas today (which was \$4.37 mbtu as of 5pm 4.2.14) has changed where many companies are investing their resources today and shifting from natural gas to oil.

Briefing Materials for Friday, April 4, 2014

Ossowski, Elizabeth <elizabeth_ossowski@ios.doi.gov>

Thu, Apr 3, 2014 at 4:58 PM

EVENT MEMORANDUM FOR THE SECRETARY

INTERVIEW WITH SALT LAKE TRIBUNE REPORTER TOMMY BURR

DATE: April 4, 2014
LOCATION: Theodore Roosevelt Island
TIME: 11:00AM – 12:00PM
FROM: Jessica Kershaw, Press Secretary, OCO 202-669-0968
Emily Beyer, Press Assistant, OCO 202-205-5205

I. PURPOSE

The purpose of this interview is to give you an opportunity to provide insight to Tommy Burr for a year in review article that he writing both for the Salt Lake Tribune and the Denver Post. We expect the article to be published to coincide with your confirmation date of April 12.

This interview will focus on your view of what you've accomplished during your first year as Secretary, as well as what you intend to focus on for the balance of your term. You will have an opportunity to react to what other sources quoted in the article have to say about your tenure so far and we recommend you use this opportunity to discuss your pragmatic approach to your responsibilities, drawing upon your experience from the business world and to provide examples of how you've done that in your first year as part of the Obama Administration.

II. PARTICIPANTS

- Tommy Burr
- Jessica Kershaw

III. AGENDA

11:00 AM	Burr meets you, Jessica at Main Interior Building
11:05 AM	Burr, you, Jessica depart MIB en route Teddy Roosevelt Island
11:10 AM	Arrive Teddy Roosevelt Island
11:15-:50AM	You, Burr have an on the record conversation re: your first year Note: Jessica will staff
12:00PM	Burr, you, Jessica depart en route to MIB

IV. BACKGROUND

Background on Tommy Burr

Tommy Burr is the senior Washington D.C. correspondent for *The Salt Lake Tribune*, covering Utah's congressional delegation and all relevant federal agencies including Interior. He currently serves as a member of the National Press Club Board of Governors,

and was appointed to the Gridiron Club in 2013, making him the group's youngest member.

In 2012, he covered former Governor Mitt Romney's presidential campaign for the *Tribune*. Prior to this, Burr served as a senior reporter and also worked for the paper as a community reporter and stringer. In 2011, for the second year in a row, he received the National Press Club Award for Best Regional Reporting. He has a bachelor's degree in journalism from Southern Utah University. **Note: You met Tommy at the NPC speech on 10/31/13 where he moderated the discussion and Q/A.**

Expected Major Topics of Conversation, Suggested Answers

- **Discussion of the major differences between CEO of REI to Secretary of DOI**
 - Personal Reflection
 - Dedicated public servants, working with a less than full political team
 - Extreme Budget Constraints/Shutdown
- **Your views of what you think are your most significant accomplishments to date**
 - Pragmatic Approach to Development, Conservation
 - Ex: Landscape level approach to planning, mitigation strategy, wildlife conservation (sage grouse)
 - Rely on Strong Business Background for Sound Decisions
 - Youth Initiative, Upcoming Fracking/Safety Regs, MLPs
 - Trust the Science, Make Informed Decisions
 - Rely on the experts, lift up their work (USGS, FWS, etc)
- **Your view of what you think you'd like to focus on in year 2 and beyond**
 - Continue to work on President's Climate Action Plan
 - Continue to stand up the 21st CSC
 - Continue to strengthen our trust relationships with Native Americans
 - Balanced approach to development and conservation
- **Discussion around your decision to re-open parks during the shutdown – pragmatic approach**
 - Made good economic sense – 10 to 1 analogy
 - Willing to work with Governors, listen to states
 - Honest about payback
- **Antiquities Act: How do you deal with Bishop? What do you want to see?**
 - Note – we're on TR Island – TR brought Antiquities Act into existence
 - Strongly stated – Administration will act where Congress does not – been used 16 Presidents
 - Rely on strong local and public support; point to Stornetta Public Lands NM
- **Youth Initiative and Leveraging Private Dollars for Public Good**
 - Rely on business background to help raise funds in constrained budget times
 - Build the next generation of outdoor stewards
- **Colorful Insights**
 - Use of Walk and Talk Meetings
 - Stairs over elevators

- How you spend your free time (what nearby parks/lands/refuges have you visited)

Articles of Note

House passes Bishop's bill on creating monuments

March 26, 2014

Washington – A proposed national monument would first have to go through an environmental review under legislation approved Wednesday by the House.

The House voted largely along party lines — 222 to 201 — to pass Utah Rep. Rob Bishop's legislation that would restrict a president's unilateral power to protect large swaths of public land without congressional approval.

Bishop said this approach is necessary to allow public input into monument designations that currently are done with a stroke of a pen and without environmental review. The bill, which would mark the first major change to the 1906 Antiquities Act in decades, now heads to the Democrat-controlled Senate, where passage is less likely.

Bishop, R-Utah, said good intentions were associated with the original act, but in recent times it's been used as a "political weapon, a gotcha effort, a power play," done to appease presidential supporters.

"The way it has been used has changed radically," Bishop said. President Barack "Obama has already used it eight times and counting."

Rep. Chris Stewart said a thorough environmental review is a good idea and that any valid designation would withstand scrutiny.

"You have to twist yourselves into pretzels in order to object to this bill," said Stewart, R-Utah, whose district includes the Grand Staircase-Escalante National Monument. Its creation in 1996 raised the ire of some Utahns.

Democrats countered that Bishop and Republicans were simply trying to hamper a president's ability to protect sensitive areas and slow down — or kill — the power to designate public lands as monuments. About half of America's national parks began as monuments under the Antiquities Act, including four of Utah's five national parks.

Arizona's Rep. Raul Grijalva, a Democrat on the Natural Resources Committee, said Bishop's legislation was another GOP attempt to stall protection of public lands. He noted that only one bill to set aside wilderness has passed Congress in recent years.

Grijalva called the bill "another feather in the anti-environment cap," and said environmental reviews of monuments aren't needed.

"I hate to break it to the majority, but the conservation and the establishment of national monuments don't have the same footprint as open-pit mines and oil wells," he said.

Rep. Peter DeFazio, D-Ore., called Bishop's bill "horrible legislation," and said that while there have been some more controversial monuments — like the Grand Staircase — there hasn't been legislation to repeal it.

"No one — no one has proposed legislation to repeal that designation by President Clinton," DeFazio said. "Perhaps because it enjoys tremendous popular support."

A 2011 poll of Utahns found that 69 percent of voters felt the Grand Staircase monument was "very good" or "somewhat good," as opposed to 16 percent who said it was "somewhat bad" or "very bad."

Environmentalists were dismayed by Wednesday's vote. Craig Obey, senior vice president for government affairs of the National Parks Conservation Association, called the action shortsighted.

"This is a sad day for our national parks, which are universally appreciated throughout our country and the world," Obey said. "The parks, including those added via the Antiquities Act, enjoy overwhelming public support, which makes action to reduce presidential authority to protect such places under the Antiquities Act all the more mystifying."

Democrats also tried Wednesday to hijack the conversation about the Antiquities Act to push comprehensive immigration reform and to raise the minimum wage.

One after one, Democratic House members asked for consent to bring up the immigration reform package — one that would allow a path to citizenship for the estimated 12 million people in the country illegally — while Bishop tried to talk about his Antiquities Act legislation. Bishop objected several times, and then the acting speaker began objecting for Bishop.

"I would be happy to talk about the bill that is before us because it's a wonderful bill," Bishop said about his legislation, visibly annoyed at the Democrats' attempts.

Later on, before final passage of the bill, Rep. Nick Rahall, D-W.Va., tried to attach a measure to raise the minimum wage to Bishop's bill. It was defeated 193-227.

Bishop's bill would require a president to go through a study under the National Environmental Policy Act before designating a national monument. The president can do that now without any study.

The measure does let a president name a small monument in an emergency, without a review. But without a congressional endorsement, the designation would expire in three years.

Utah's CUP doesn't runneth over in Obama's budget

March 4, 2014

Washington – President Barack Obama is proposing \$5 million toward a construction project to bring water from the Wasatch Back to the populated areas in Salt Lake and Utah counties — a fourth of what the government spent two years ago.

Obama's fiscal 2015 budget, released Tuesday, suggests \$5 million, plus another \$1 million in administrative costs, for the Central Utah Project, a line item that has been targeted for cuts in previous Obama budgets. In 2008, the project was tagged at \$40 million in the budget but has seen steady decreases since.

"Of course we're disappointed to see that level," says Christine Finlayson, CUP's government-affairs director. "Every year we delay adds a cost increase. When we have to ratchet back our construction projects, it becomes more difficult and extends that time line out."

Officials behind the decades-old project had hoped to complete its mission of bringing water from the Uinta Basin to Utah's metropolitan areas by 2021, though funding cuts could hamper that goal. While the system's main components are largely built, major pieces tying it together remain under construction.

The CUP has created many waterways and man-made lakes in Utah, including Strawberry reservoir, which was built during the initial incarnation of the project.

CUP is estimated to receive about \$7 million this fiscal year, ending Sept. 30, about a third of the \$20 million it got in the previous cycle.

In addition to the CUP, Obama's budget tweaks the amount of money it proposes for the removal of uranium tailings near the Colorado River in Moab.

The current fiscal year projects about \$38 million be spent on the removal, while Obama's spending plan proposes \$35.8 million. That's more than the effort received in fiscal 2013, when it got \$31.48 million.

On an unrelated line item, the president's budget proposes about \$7.8 million to renovate the Wallace F. Bennett Federal Building in downtown Salt Lake City.

Of course, Obama's budget is mainly symbolic these days. Congress isn't likely to take it up in part or in whole. The spending plan hit with a thud on Capitol Hill.

"A full month late, and the president's budget recycles the same old spending surges, tax hikes and budgetary smoke and mirrors that have repeatedly failed to right the nation's economic ship and provide financial security and prosperity for Americans across the

country," said Sen. Orrin Hatch, R-Utah. "It's no wonder Washington has already dubbed this plan dead on arrival."

The spending blueprint did excite some sectors. It calls for fully funding the Land and Water Conservation Fund, which takes money from oil and gas extraction to buy up new lands to preserve across the country.

"The president's budget is a significant victory for the conservation of America's shared outdoor heritage," said Alan Rowsome, a senior official with The Wilderness Society.

Less enthusiastic were House Republicans, who have tried to tamp down the fund, arguing that the nation already has an \$11 billion maintenance backlog for its national parks and doesn't need more land to manage.

"That probably won't happen," said Rep. Jason Chaffetz, R-Utah.

What will happen, Chaffetz said, is that he and other members of Utah's delegation will make sure that the CUP receives the money it needs to prevent cost increases and blown deadlines. The House and Senate included the \$7 million for CUP construction in fiscal 2014 in its budget deal last year.

"We'll obviously have to do the same this time," Chaffetz said. "We get good support from both sides of the aisle for these projects."

As it has for several years, Obama's budget calls for bringing the CUP under the auspices of the federal Bureau of Reclamation, a move that local officials have rejected. Congress had separated the program from the bureau in 1992, charging that the federal government was taking too long to complete the water system.

Interior's Jewell: no partisan motive in closing monuments

October 31, 2013

Washington – Interior Secretary Sally Jewell said Thursday there was "absolutely no political motive" in erecting barriers around some of Washington's most iconic monuments during the government shutdown despite Republican critics who say the White House wanted to make the closure sting more for Americans.

"The people of the National Park Service did not want to barricade the monuments, but the monuments don't take care of themselves," Jewell said at the National Press Club. "The barricades protect the resources, and we worked as best as we could" to accommodate groups, like veterans' Honor Flights, who came to Washington during the shutdown to visit memorials.

Jewell, in her first public remarks since the 16-day partial government closure, said that federal law prohibited her from employing park rangers to staff the monuments or

national parks, both of which became the public face of the shutdown when Republican members of Congress helped push through the barriers around the World War II Memorial for veterans to visit.

In wide-ranging remarks, Jewell also said members of Congress who say the Interior Department can repay states for re-opening national parks during the shutdown are spreading "misinformation," and that in the 1995-96 shutdown, the department didn't send a check to states, either.

"We had to do some digging in historical records to understand that, but our records are going to be much more helpful should this crazy thing ever happen again," she said.

Pressed on a new report by Sen. Tom Coburn, R-Okla., arguing that the National Park Service shouldn't buy new tracts of land when it has a burgeoning maintenance backlog on sites it already owns, Jewell said that was a "common refrain" from critics.

"I will say that these are the same people that squeeze our budget, so we end up with a larger maintenance backlog," Jewell said. "You can solve the maintenance backlog by taking care of the maintenance backlog; it's not that complicated. As a business person that's what we did on a regular basis; that's what kept the economy going."

Jewell called on Congress to pass a regular budget instead of temporary, stopgap measures, and she said the "real test" of supporting conservation isn't when the cameras are rolling but when "you fight for it in budget conferences."

The Interior secretary said that Congress should act to preserve some treasured landscapes supported by local communities but that President Barack Obama would step in and use the Antiquities Act, which gives him unilateral power to name monuments if the legislative branch doesn't. Jewell added that controversial monuments are not a priority.

"I guess I haven't seen anything yet where everybody agrees on everything, but certainly where there is a groundswell of support we will focus our energies," she said. "We won't be focusing our energies where there is a tremendous amount of conflict."

V. ATTACHMENTS

- Background Summary of Accomplishments (provided to Burr in advance of interview)

Secretary Jewell

After having served 35 years in the private sector as a successful businesswoman, Sally Jewell has entered public service as President Obama's Secretary of the Interior.

Jewell has moved quickly to fully understand the complex issues facing Interior, to get to know the resources and to support the more than 70,000 employees at the Department – especially during the challenging time of sequester and the government shutdown.

In the year she's been on the job, Jewell has traveled to 32 states to see firsthand our nation's public lands and held dozens of meetings with employees and stakeholders to hear directly about local challenges and opportunities (including to separate visits two Colorado and three visits to Utah).

Early on, Jewell **outlined priorities** for the Department that include celebrating and enhancing America's great outdoors; strengthening tribal nations; powering our future; engaging the next generation; assuring healthy watersheds and sustainable, secure water supplies; and building a landscape-level understanding of our resources.

When it comes to building on the **President's strong conservation agenda**, Jewell is off to a running start. As she underscored in her remarks to the National Press Club, Jewell believes that we have a moral obligation to the next generation to leave our land, water, and wildlife better than we found it. To that end, Jewell laid out a conservation vision that includes:

- Calling on Congress to pass **sustainable budgets** for land management agencies and to adopt President Obama's proposal to **enact mandatory, full-funding of the Land and Water Conservation Fund**. Jewell has been instrumental in getting the FY15 budget proposal to include a **new framework for funding fire suppression** operations.
- **Protecting the places that Americans care about most**. This includes encouraging Congress to pass the dozens of locally-supported land conservation bills – introduced by both Republicans and Democrats. Jewell made clear that President Obama is ready and willing to step up where Congress falls short.
 - In March, Secretary Jewell joined federal, state and community leaders in celebrating President Obama's designation of the Point Arena-Stornetta Unit of California Coastal National Monument. The event marked the culmination of years of work from Point Arena community and businesses for increased protection of the significant and spectacular stretch of public lands along the Mendocino coastline in Northern California.
- **Encouraging balanced energy development** in the right way and in the right places – and recognizes that some places are too special to develop. Her first Secretarial Order ensures that whenever public lands or resources are impacted by development activity, that we are also considering how to mitigate those impacts at a landscape level through strategic conservation and restoration.
- **Launching an ambitious youth initiative** to engage millions of young people on our nation's public lands. Jewell will work to expand education, employment and volunteer opportunities for youth – in part, by **strengthening public-private partnerships**.
 - In March, the Secretary issued her second Secretarial Order to formalize the initiative across the Department. The Order calls for the expansion of recreational, educational, volunteer and career opportunities for millions of youth

and veterans on the nation's public lands, including partnerships with businesses and youth organizations to support the Obama Administration's 21st Century Conservation Service Corps.

- **Implementing the President's Climate Action Plan** to slow the effects of climate change. Jewell is working to meet the President's goal of permitting 20,000 megawatts of renewable energy on public lands by 2020. For example, Jewell oversaw the nation's first-ever offshore wind lease sales that could help to power more nearly two million homes along the eastern seaboard and has overseen the permitting of several onshore renewable energy projects, including wind, solar and geothermal, bringing the total of renewable and associated transmission projects to 50 since the beginning of the Obama Administration.

Jewell has continued to make inroads on upholding our sacred trust and treaty obligations to Native Americans. One of the first meetings she held as Secretary of the Interior was with tribal leaders, in recognition of the President's commitment to upholding a nation-to-nation relationship with tribal governments.

Jewell has been tapped to serve as chair of the recently established White House Council on Native American Affairs, where she is working to strengthen tribal self-determination and self-governance and promote prosperous and resilient tribal nations. Jewell has already held three meetings of the Council, including hosting the 2013 White House Tribal Nations Conference, which was attended by President Obama and thirteen members of the Cabinet.

The Interior Department has a number of complex issues before it – from potential exploration and development in the Arctic exploration, to implementing common sense guidance for hydraulic fracturing; to executing the Cobell settlement for Indian Country. Already, Jewell has demonstrated that she is a practical leader that takes the long-view. She makes decisions guided by science and after having considered all the facts and merits of the case.

DOI in the News:

SECRETARY JEWELL APPEARS BEFORE HOUSE NATURAL RESOURCES COMMITTEE. [Politico](#) (4/4, Guillén, 73K) reports that Interior Secretary Sally Jewell was scheduled to "testify before the House Natural Resources Committee on Interior's budget at 10 a.m. in Longworth 1324."

Rep. Young Berates Secretary Jewell Over Izembek Road. The [Alaska Dispatch](#) (4/3, 7K) reports that a "furious" Rep. Don Young "laid into" Interior Secretary Sally Jewell on Thursday "about her decision to reject a potentially life-saving road through an Alaska refuge." Young also chided Jewell and "another top Interior official for what he believes are their evasive answers." Young added that Jewell "should be ashamed of herself when

someone dies in King Cove." Also reporting on the story is the [Alaska Public Radio Network](#) (4/3, 2K).

Coast Guard Estimates Air Base Would Cost Over \$100 Million. The [Environment & Energy Publishing](#) (4/4, 705) reports that the Coast Guard "estimates it would cost well over \$100 million to build a year-round air station in Cold Bay, Alaska, far more than what the Interior Department estimates it would cost to build a road through the Izembek National Wildlife Refuge." According to the agency, "short of an air station, it would cost up to \$583,000 annually for the Coast Guard to provide year-round search-and-rescue staff at its Cold Bay forward operating location (FOL)." The article notes that "the estimates adds fodder to the debate over whether Interior Secretary Sally Jewell should allow a road through the refuge to allow King Cove residents better access to Cold Bay's airport."

Additional Coverage. Additional coverage of the road was provided by the [Alaska Business Monthly](#) (4/4).

SECRETARY JEWELL SAYS INTERIOR HAS NO GLOBAL-WARMING LITMUS TEST. The [National Journal](#) (4/4, Subscription Publication, 561K) reports that at a congressional hearing, Interior Secretary Sally Jewell's 2013 remark that "I hope there are no climate-change deniers in the Department of Interior" was brought up. Questioned by Louisiana Republican and climate skeptic John Fleming, Jewell responded, "There is no litmus test [on climate change] for people at the Department of the Interior."

SECRETARY JEWELL SAYS INTERIOR WORKING ON FRACKING RULE. The [Houston Chronicle](#) (4/4, 2.23M) reports that Interior Secretary Sally Jewell "told lawmakers on Thursday that regulators are still sifting through more than a million public comments on a proposal to stiffen mandates for oil and gas drilling on public land, which suggests the final regulation could be a long way off." Testifying before the House Natural Resources Committee, Jewell "stressed the importance of getting the mandates right." Jewell said the BLM is "combing through the comments lodged on the proposal and making progress in addressing concerns with the rule."

IG REPORT FINDS AGENCY'S INJECTION WELLS A "THREAT TO THE NATION'S DRINKING WATER". The [Environment & Energy Publishing](#) (4/4, 705) reports that the Interior Department has "thousands of mismanaged injection wells on federal lands, threatening the nation's underground supply of drinking water, according to a newly released inspector general report." Interior's agencies also have "inconsistent guidelines on how to comply with US EPA's underground injection rules and have not effectively tracked or managed their wells, the IG report found." The report said, "With hundreds of thousands of acres under the management of the department's bureaus, the possible impact of non-compliance with EPA's safe drinking water regulations is significant."

LAWMAKERS PRESS SECRETARY JEWELL ON PUBLIC LAND USE. The [Public News Service](#) (4/4, 306) reports that state lawmakers from the West asked Interior Secretary Sally Jewell "for more balance for public lands development." Specifically, they asked Jewell to "issue a Secretarial Order to ensure that conservation, recreation and wildlife habitat are considered equally with energy development."

COLORADO WILDERNESS BILLS LOST IN PARTISAN CONGRESSIONAL GRIDLOCK. The [Boulder \(CO\) Weekly](#) (4/4, 104K) reports that "after the budget battles of the last few years, it's clear that Congress is fiscally dysfunctional, but our elected lawmakers also face challenges in other areas — including finding the political will to support public land preservation bills that have local bipartisan support." The article notes that "that includes several proposals in Colorado, where the Hermosa Creek Watershed Protection Act, the San Juan Mountains Wilderness Act and the Browns Canyon National Monument and Wilderness Act are all stalled in the fog of partisan gridlock." According to the article, "the San Juan bill has been reported out of committee and is on the Senate calendar, while the Hermosa Creek bill has been heard in the House and Senate, but hasn't been reported out of committee yet." Meanwhile, "the Browns Canyon bill has been introduced, but not heard in committee yet."

DIRECTOR OF INTERIOR'S CLIMATE SCIENCE CENTER VISITS GUAM. The [Pacific News Center](#) (4/4) reports that the newly selected Director of the US Department of Interior's Pacific Islands Climate Science Center David Helweg is visiting Guam to establish a partnership with the University of Guam and members of the administration. Helweg said "chunks of federal funds are ready to be given to UOG for more research and looks forward to the work that will be done."

PROTECT OUR TREASURE OF NATIONAL PARKS, MONUMENTS. In an editorial, the [Bellingham \(WA\) Herald](#)

(4/4, 113K) criticizes legislation introduced by Rep. Rob Bishop to limit the use of the Antiquities Act. The paper notes that "it's a curious bill for a Republican from Utah, a state that benefits economically from five national parks, seven national monuments, two national recreation areas and the Golden Spike National Historic Site – the place where the Union and Central Pacific railroads joined to complete a transcontinental link." The paper claims that "Bishop's bill also contradicts the Republicans' desire to cut federal spending," because "the bill would cost taxpayers \$2 million over four years."

SCHOLAR SAYS ENERGY BOOM HAS WIDESPREAD BENEFITS. In an op-ed for USA Today (4/4, 5.82M), Mark P. Mills, a senior fellow at the Manhattan Institute, writes that superficial knowledge about the US energy "boom" is common, but that some myths persist. For example, he says that the profits aren't "all going to Big Oil." Instead, the boom benefits "more than 20,000 small and midsize oil and gas firms in America, with a median size of 15 employees." He also says that energy isn't "an old dirty business," but part of an ongoing "tech boom" leading to new production methods. Finally, he argues that new jobs "reach far beyond hard-hat work in a few obvious states such as Texas and North Dakota." Mills says that the Federal government should work to extend the boom by allowing natural gas exports and "resist the temptation to layer job-killing federal regulations on top of state efforts."

America's Great Outdoors:

National Park Service:

SENATORS WANT REVIEW OF NATIONAL PARK SPENDING. The Billings (MT) Gazette (4/4, 174K) reports that Sens. Mike Enzi, Tom Coburn, and Lisa Murkowski "want to put the National Park Service's budget under a microscope." The senators "sent a letter to the Government Accountability Office to request a review of the park service's spending in hopes of finding ways to pay for the park service's maintenance backlog, an estimated \$11.5 billion worth of necessary repairs and maintenance upgrades." They "hope an overview of the park service's spending will shine light on a solution."

PROGRAM TEACHES MOUNTAIN RESCUE SKILLS. The Washington Post (4/4, Ruane, 4.22M) reports that on Wednesday, students and instructors were "dangling from, or clinging to, the jagged gray cliffs of Maryland Heights as part of the National Park Service's mountain rescue training." According to the article, "the annual week-long program, called basic technical rescue training, teaches students how to reach and rescue victims who have fallen or are trapped in rugged terrain."

OFFICIALS CALM FEARS SURROUNDING YELLOWSTONE BISON-ON-RUN VIDEO. The Los Angeles Times (4/4, Sahagun, 3.46M) reports that "a brief video of bison purportedly 'running for their lives' to escape a pending eruption of Yellowstone National Park's 'super-volcano' had federal officials scrambling Thursday to allay fears in the region recently rattled by a spate of earthquakes." According to Leo Leckie, a sales associate of the nonprofit Yellowstone Assn., an educational partner of Yellowstone National Park, "the spreading anxiety was caused by baseless rumors and deliberate misrepresentations of what those bison were actually doing in the video." Leckie said, "Those bison were running for the sake of running. There was nothing chasing them. There was no mudslide. They were just running." Also, Al Nash, a spokesman for Yellowstone National Park, said, "We've seen no signs to suggest that Yellowstone's volcano is about to erupt."

BISON HYBRIDS TRAMPLING GRAND CANYON PARK LANDS, SACRED SITES. The Christian Science Monitor (4/4, Fonseca, 566K) reports that the herds of bison roaming in the Grand Canyon are being seen by officials as a nuisance. According to the article, the Grand Canyon bison have "traveled into Mexican spotted owl habitat, knocked over walls at American Indian cliff dwellings below the North Rim, defecated in lakes and left ruts in wetlands." Federal and state officials are "looking at methods to manage the estimated 350-450 bison in a way that rids them from the park and allows for a free-ranging population that can be hunted on nearby forest land." On Wednesday, officials "announced a trio of public meetings to be held in southern Utah and Arizona and a 60-day scoping period."

CAPE HATTERAS LIGHTHOUSE FOUNDATION STONES TO BE MOVED TO NEW HOME. The AP (4/4) reports that "the former foundation stones of the Cape Hatteras Lighthouse now threatened by erosion should have a new home near the beacon by Memorial Day." NPS spokeswoman Cyndy Holda said Thursday that "staff

will put material between the stones that will keep grass from growing but that's also soft enough for people to walk on."

MOOSE POPULATION GROWS WHILE WOLVES STRUGGLE ON ISLE ROYALE. The [Milwaukee Journal Sentinel](#) (4/4, 893K) reports that "wildlife researchers who spent the winter on an island in Lake Superior report that Isle Royale's moose population is booming while wolf numbers remain near an all-time low." According to the article, the relationship between predator and prey has "tipped clearly in favor of moose, whose population the biologists said has been increasing at an annual rate of more than 20% in each of the past three years." The dwindling "population has sparked a debate about human intervention: Should wolves be imported to the island to boost the genetic pool?"

ADDITIONAL COVERAGE OF BIOBLITZ. Additional coverage of BioBlitz, held at Golden Gate National Recreation Area, was provided by the [Half Moon Bay \(CA\) Review](#) (4/4, 22K).

Bureau of Land Management:

BLM ACTING DIRECTOR NEIL KORNZE TO APPEAR BEFORE HOUSE APPROPRIATIONS COMMITTEE. In its "On The Money" blog, [The Hill](#) (4/4, 237K) reports that the House Appropriations Committee will continue "its efforts on Friday to shake out spending priorities for next year" in a hearing with BLM Acting Director Neil Kornze.

IRON COUNTY WANTS BLM TO REMOVE WILD HORSES. The [Salt Lake \(UT\) Tribune](#) (4/4, 470K) reports that Iron County commissioners have presented the BLM "an ultimatum: Come up with an immediate plan to remove hundreds of wild horses from the area or residents will do it themselves." A March 30 letter signed by Commissioner David Miller and Iron County Sheriff Mark Gower stated, "Inaction and no-management practices pose an imminent threat to ranchers who are being pushed to reduce their allotments by 50 percent thereby damaging the value of their private rights." The letter, addressed to BLM Principal Deputy Director Neil Komze, gives the bureau "until noon Friday to present a plan for removing horses by a 'time acceptable to mitigate the threats and adverse conditions' in Iron County."

Also covering the story is the [Las Vegas Review-Journal](#) (4/4, 437K).

COURT DENIES MOTION BY RAGS OVER THE ARKANSAS RIVER. The [Canon City \(CO\) Daily Record](#) (4/4, 22K) reports that US Senior District Judge John L. Kane on Friday "denied a motion by Rags Over the Arkansas River, a group formed to oppose OTR, to supplement the extensive Bureau of Land Management analysis of bighorn sheep in the Environmental Impact Statement administrative record." In his ruling, Judge Kane held, "the attack on the BLM's methodology is mild" and "does not show that the BLM failed to consider important impacts." The decision states that ROAR's expert appears "to do no more than challenge the BLM's wisdom and to inject [his] personal views about the project's social utility."

BLM RESPONDS TO DEADLY SHOOTING NEAR RED ROCK. [KTNV-TV Las Vegas](#) (4/4, 19K) reports, The BLM is "now responding to Congressman Steven Horsford, in connection with a deadly officer-involved shooting near Red Rock." Horsford has "demanded answers from the BLM about what led up to the Valentine's Day shooting." In a letter, the BLM said "it will not comment on the case since it's an ongoing investigation." However, the BLM is "offering to provide information on its use of force policy."

BLM ASKS PUBLIC TO RESPECT WILDLIFE SANCTUARIES. The [Durango \(CO\) Herald](#) (4/3, 28K) reports that the BLM wants the public to "hold off for two weeks before going into areas closed as winter habitat for elk and deer." According to BLM spokeswoman Shannon Borders, "the closures will be vacated April 15." Borders said, "Law enforcement officers are still finding people hiking or walking their dog in the areas. It's normal to want to get out when it's warm and there are long hours of daylight, but the animals need the additional time."

BLM SIGNS RECORD OF DECISION FOR WATERTON'S HOLLISTER MINE. The [Elko \(NV\) Daily Free Press](#) (4/4, 22K) reports that the BLM Tuscarora Field Office "issued a record of decision on the final environmental impact statement for Waterton Global Mining Company's Hollister Underground Mine Project."

ADDITIONAL COVERAGE OF DISPUTE BETWEEN BLM AND NEVADA RANCHER. Additional coverage of the

dispute between the BLM and Nevada rancher Cliven Bundy was provided by the [St. George \(UT\) News](#) (4/3, 3K).

Fish and Wildlife Service:

FWS DIRECTOR DAN ASHE INTERVIEWED. In an interview with [Outdoor Life Magazine](#) (4/4, 1.12M), FWS Director Dan Ashe discussed wolves, hunting, and open lands. The magazine notes that "Ashe has almost universally supported every single instance in which Refuge lands were recommended to be opened for hook-and-bullet pursuits." According to the article, "perhaps it's because he understands the importance of hunting and fishing to a sound, science-based management plan," or "perhaps it's because he's actually a hunter himself."

TEXAS, NORTH CAROLINA WORRY ABOUT IMPACT OF RED KNOT PROTECTIONS. The [Wilmington \(DE\) News Journal](#) (4/3, 288K) reports that "so many people visit Delaware each May to catch a glimpse of the red knot shorebird – a bird that federal officials are considering for threatened species status – that state officials view the annual migration as an eco-tourism bonanza." However, in North Carolina and Texas, "some local and state officials worry about a potential negative impact from federal protections that endangered species listing might afford the robin-sized birds." On Tuesday, the FWS "reopened the public comment period for the rufa red knot threatened species listing proposal, after they received three requests last year to hold public hearings on the threatened species listing plan." Federal officials will also "hold two public hearings next month: one in Morehead City, N.C., and the other in Corpus Christ, Texas," and "they will allow additional written comments to be included in the record through May 19."

UNIFIED VISION URGED FOR FUTURE OF HANFORD REACH. The [Tri-City Herald \(WA\)](#) (4/3, 115K) editorializes that Ridges to Rivers has "long been vocal about its interest in the fate of cleaned lands at the Hanford site as they are transitioned out of Department of Energy control." The paper notes that "most recently it sent a letter to Sen. Patty Murray, pushing for the transfer of newly cleaned land to the Hanford Reach National Monument, putting it under the management of the US Fish and Wildlife Service." However, the editorial thinks Ridges to Rivers is "overstating its clout when it indicates it's the voice of the community, especially considering another Tri-City consortium has been working on a proposal for the land as well, requesting public input on how the community would like to see those specific lands used." It notes that the Tri-City Development Council has "taken the lead in making it clear to the federal government that the public wants access to that land." According to the paper, "the two groups have similar goals but are not working together," and "that's a problem."

US Geological Survey:

REPORT FINDS SAGE GROUSE LOSING HABITAT TO FIRE. The [Science Daily](#) (4/4, 104K) reports that "as fires sweep more frequently across the American Great Basin, the US Bureau of Land Management (BLM) has been tasked with reseeding the burned landscapes to stabilize soils." The bureau's "interventions have not helped to restore habitat for the greater sage grouse (*Centrocercus urophasianus*) reported scientists from the US Geological Survey (USGS) and US Forest Service in the Ecological Society of America's journal *Ecosphere* last week, but outlier project sites with good grouse habitat may yield clues to successful management scenarios." Author Robert Arkle, a supervisory ecologist for the USGS Forest & Rangeland Ecosystem Science Center at the Snake River Field Station in Idaho, said, "The most common species, big sagebrush, doesn't re-sprout from the stump. After it burns, it's dead and it has to reseed, and it's not very good at dispersing seeds long distance. Seeds aren't viable very long. Some years they don't reproduce at all, without the right spring conditions. Getting sage established out in the middle of these big burned areas is a difficult task."

Securing America's Energy Future:

Renewable Energy:

SENATE FINANCE COMMITTEE VOTES TO RESTORE WIND TAX CREDIT. The "E2 Wire" blog of The Hill (4/4, Cama, 237K) reports that the Senate Finance Committee yesterday approved "a package of tax break extensions that restores the production tax credit (PTC) for wind energy, which expired in 2013." By a voice vote, the committee voted "to send the bill to the full Senate." The legislation "would extend the PTC for two years, along with numerous provisions that incentivize alternative fuels and energy efficiency for vehicles and homes."

Bloomberg News (4/4, Rubin, Bender, 2.76M) reports the committee "voted to revive almost all of the 55 tax breaks that expired Dec. 31, providing benefits for wind energy, U.S.-based multinational corporations and motor sports track owners." Chairman of the committee, Sen. Ron Wyden, said that "he supports the package of U.S. tax breaks totaling more than \$86 billion while adding that he wants to avoid future temporary extensions. Instead, he said, Congress should revamp the entire tax code." Wyden said, "This will be the last tax extenders bill the committee takes up as long as I am the chairman."

Former Pennsylvania DEP Secretary Says Wind Tax Credit Increases Carbon Emissions. Mike Krancer, former secretary of the Pennsylvania Department of Environmental Protection, writes in an op-ed Roll Call (4/4, Krancer, Subscription Publication, 76K) that Production Tax Credit subsidies for the wind industry will increase carbon emissions. Krancer contends that the subsidy encourages production even when not needed and "crowds out other low-carbon generation sources, particularly nuclear," with Krancer noting the premature closure of the Vermont Yankee and Kewaunee nuclear plants. Noting that nuclear power is declining nationwide, he cites a study by Third Way that says shutting down a third of U.S. nuclear power capacity would increase carbon emissions by eight percent. He also argues that deactivating and reactivating coal and gas power plants is worse for the environment than continuously running them. Krancer concludes by saying the PTC is "costly and inefficient," calling it a "wolf in lamb's clothing."

Onshore Energy Development:

POLL SHOWS AMERICANS BACK OPENING FEDERAL LAND FOR OIL EXPLORATION. FuelFix (4/3, 7K) reports that a Gallup poll released on Wednesday shows that Americans support "opening federal land for oil exploration, but generally prefers energy policy focused on conservation." In the survey, 58% said they favored opening Federal land to oil exploration, while 41% were opposed. The survey also showed that 57% "said the nation's energy problems are best addressed by emphasizing consumer conservation of existing energy resources," while 34% "said they favored a focus on mining more oil, gas and coal."

LEGISLATION TO PROTECT NORTH FORK FLATHEAD RIVER BLOCKED IN SENATE. The AP (4/4) reports that Sen. Pat Toomey objected on behalf of Republican Sens. Ted Cruz of Texas and Tom Coburn of Oklahoma of "a floor vote on legislation to protect the North Fork Flathead River." Sens. Jon Tester and John Walsh called for the vote Thursday afternoon. Tester and Walsh are sponsoring the bill, "which would bar mining and oil and gas development on hundreds of thousands of acres of federal land west of Glacier National Park."

JUDGE TOSSES OUT CHALLENGES TO WYOMING MINING. The Courthouse News (4/3, 7K) reports that "coal-mining leases in Wyoming's Powder River Basin did not come at the expense of protecting an elk herd and other natural resources, a federal judge ruled." US District Judge Barbara Rothstein granted the government summary judgment Friday. Rothstein held, "Given the crucial importance of security habitat to the viability of the elk herd, it was reasonable for BLM to focus on loss of security habitat in the southern range ... because that is the type of habitat 'necessary for maintaining the herd.'"

Offshore Energy Development:

INTERIOR OFFICIALS TO TESTIFY BEFORE HOUSE SUBPANEL. In its "E2 Wire" blog, The Hill (4/4, 237K) reports that on Friday, a House Appropriations subpanel will hold a hearing on the 2015 budget request for the Bureau of Ocean Energy Management (BOEM) and Bureau of Safety and Environmental Enforcement (BSEE). Tommy Beaudreau, director of the Interior Department's BOEM, will testify along with Brian Salemo, director of BSEE. According to the article, "the discussion could turn to the possibility of Interior opening up the Atlantic to offshore oil-and-gas exploration."

COAST GUARD REPORT FINDS NUMEROUS PROBLEMS LED TO SHELL RIG GROUNDING. The AP (4/4, D'oro, 1.48M) reports that a Coast Guard report finds that "poor risk assessment and management were factors that led to the grounding of a Shell oil drilling rig in the Gulf of Alaska in 2012." The report, released Thursday, also said that Alaska's "tax laws influenced the decision to tow the Kulluk to Seattle." Shell "believed the drill vessel would have qualified as taxable property on Jan. 1, 2013, if it was still in Alaska waters." The report says that "sufficient evidence exists" for authorities to issue penalties, though service spokeswoman Lisa Novak

indicated that the report is a "fact-finding" report and does not issue direct penalties. Shell spokeswoman Kelly op de Weegh said that "we appreciate the US Coast Guard's thorough investigation into the Kulluk towing incident and will take the findings seriously."

McClatchy (4/4, Cockerham, Subscription Publication, 23K) says that the report found that a "disregard for the risk, possible negligence, inexperience and equipment problems led to the grounding of a Shell drilling rig in a winter storm off the Alaska coast." The report said Shell's towing plan was "inadequate," particularly as it relied on only a single towing vessel despite the potential for severe weather, while the crew of the towing vessel lacked "enough experience" for the environment.

The Los Angeles Times (4/3, Ganga, 3.46M) reports that the Coast Guard report "blasted" Royal Dutch Shell for "legal violations, poor management and taking undue risks."

The Anchorage (AK) Daily News (4/3, Demer, 251K) reports that in addition to the poor decisions by Shell, the review found "potential violations of law or regulation by Aiviq officers and crew" and "numerous deficiencies in pre-voyage inspections." The coast guard recommends that several members of the crew of the towing vessel, the Aiviq, "be evaluated for possible actions against their Coast Guard licenses."

Bloomberg News (4/4, Snyder, 2.76M) quotes the report, "A complex series of events contributed to the error chain that resulted in the grounding. The most significant factor was the decision to attempt the voyage during the winter in the unique and challenging operating environment of Alaska." While Shell "has spent billions of dollars in its effort to drill for oil Alaska's Beaufort and Chukchi seas," the company "hasn't resumed work in Alaska waters, and said in January that it didn't plan to return to the Arctic this year."

BSEE FUNDING OIL SPILL RESPONSE RESEARCH. The [Marine Link](#) (4/4, 1K) reports that the BSEE has "announced that it is investing up to \$600,000 for targeted oil spill response research in drift ice conditions." In a Broad Agency Announcement released on the federal government's business opportunities website, the bureau "called for white papers on new mechanical technologies for cleaning up oil spills in drift ice conditions that could be found in an Arctic environment." The BSEE will "select up to three designs for prototype development and testing at Ohmsett, the bureau's National Oil Spill Research and Renewable Energy Test Facility."

DEEPWATER HORIZON FINES TO FUND LA BEACH RESTORATION. The AP (4/4) reports that \$144.5 million from the foundation overseeing the use of fines from the 2010 Gulf of Mexico oil spill has been approved to restore nearly 7.5 miles of beachfront near Grand Isla, LA, according to The National Fish and Wildlife Foundation. The project will create about 490 acres of habitat by "pumping more than 5 million cubic yards of sand from the Gulf of Mexico through a pipeline," the AP writes.

ADDITIONAL COMMENTARY ON NEW "NEAR MISS" TRACKING SYSTEM. Additional coverage of the BSEE's new "near-miss" tracking system was provided by Loren Steffy for [Forbes](#) (4/3, 6.28M). Steffy writes that "the industry claims it has an excellent safety record, and if that's true, it should be confident that compiling near-miss data would prove the point." But "instead, it prefers to wrap itself in the blanket of self-delusion, as if the absence of disaster is a synonym for safety."

Tackling America's Water Challenges:

SEN. FEINSTEIN APPLAUDS DECISION TO PUMP MORE WATER IN CENTRAL VALLEY. The [Salinas Californian](#) (4/3, 27K) reports that Sen. Dianne Feinstein on Wednesday "applauded a decision by federal and state officials to release more water in the Central Valley, and pushed for much more supplies to be made available to the parched farming region." According to the article, "at a Senate appropriations subcommittee hearing that she presided over, the California Democrat said the latest fish surveys show a negligible number of deaths among endangered species like chinook salmon and the Delta smelt." Feinstein argued that "diverting more of the water meant to shore up fish habitats for human use makes sense...given that the region's farmers are currently getting no water from the federal Central Valley Project."

Handling Of Drought Relief Criticized. In an op-ed for the [Wall Street Journal](#) (4/4, Finley, Subscription Publication, 5.51M), Allysia Finley writes that the increase of water exports from the Sacramento-San Joaquin

Valley River Delta is too little and too late. According to Finley, almost all of this additional water will go toward building up the San Luis Reservoir to prepare for the inevitable future shortages when pumping is again restricted to protect fish. In conclusion, Finley blames government imprudence.

BAY DELTA CONSERVATION PLAN CRITICIZED. In an op-ed for the Salem (OR) Capital Press (4/3, 113K), Bruce Colbert, executive director of the Property Owners Association of Riverside County, writes that “the joint state and federal Draft Bay Delta Conservation Plan and Draft Environmental Impact Report/Environmental Impact Statement does not meet its goals and not be funded.” Colbert claims that “though the goals of the plan are to restore the Sacramento-San Joaquin Delta ecosystem and to secure California water supplies, the plan fails to secure California water supplies.” Colbert concludes that “since the plan cannot meet its goals, it does not warrant further investment.”

Empowering Native American Communities:

TRIBAL LEADERS CRITICIZE LAND-BUYBACK PROGRAM. The AP (4/4) reports that “tribal leaders from Montana, Oklahoma, Oregon and Washington state told a congressional panel Thursday that they feel shut out of decisions being made in a \$1.9 billion land-buyback program managed” by the Interior Department. The Interior Department is “identifying parcels, entering into cooperative agreements to purchase the land and turning the parcels over to the tribes.” The tribal leaders said “they know the land and their people, so they want to be more involved in identifying parcels, approaching landowners and shaping cooperative agreements.” Lawrence Roberts, the deputy assistant secretary for Indian affairs in the Interior Department, said the agency is “looking to streamline the process after hearing complaints of it being burdensome and complex.”

Coverage by the AP was also picked up by the Washington Times (4/4, Volz, 455K), the Minneapolis Star Tribune (4/4, Volz, 1.48M), the Bellingham (WA) Herald (4/3, 113K), the Fort Worth (TX) Star-Telegram (4/3, 595K), the Quincy (IL) Herald-Whig (4/4, 85K), the Tri-City Herald (WA) (4/3, 115K), The Missoulian (4/4, 122K), and Yahoo! (4/4, Volz, 17.91M).

Also reporting on the story is KECI-TV Missoula, MT (4/4, 2K).

BIA WORRIES ABOUT UPCOMING BLACKFEET ELECTION. The Flathead (MT) Beacon (4/4, 15K) reports that “with two months until the June primary, the divided Blackfeet Tribal Business Council has yet to seat an election board and officials with the Bureau of Indian Affairs are now worried that the upcoming election is in ‘jeopardy.’” In a letter to Blackfeet Chairman Willie Sharp, the acting superintendent of the BIA Blackfeet Agency said “if the full tribal council does not agree on an election board on or before April 3, it will be hard for the government to organize and run a fair election on June 3, as required by the Blackfeet Constitution and election rules.” Acting Superintendent Thedis Crowe wrote, “Failure to do so puts the 2014 Tribal Election in jeopardy. This timeframe leaves the Tribal Election Board with a compressed schedule of approximately 60 days to coordinate, organize, advertise, certify candidates, order ballots, and schedule the primary election to occur on June 3.”

TRIBE CONSIDERS HUNTING BISON INSIDE YELLOWSTONE. Reuters (4/3) reports that some Nez Perce tribal leaders want to revive the practice of hunting bison in Yellowstone National Park. Nez Perce Chairman Silas Whitman said, “Before there was a park, there was a tribe. Some of our members already feel we have the right to hunt in the park, but it hasn’t been exercised because we feel it would be remiss in going forward that way.”

Top National News:

SURVEY ESTIMATES THAT 5.4 MILLION PREVIOUSLY UNINSURED AMERICANS GOT COVERAGE SINCE SEPTEMBER. Media coverage of the progress in the implementation of the Affordable Care Act has dropped precipitously from earlier this week, and on Thursday evening, none of the three network newscasts included a segment on any aspect healthcare reform. Also, notably, the ACA enrollment figures announced by President Obama and touted by the Administration and its allies throughout the week were not covered in depth on MSNBC’s Rachel Maddow Show, All In, or The Last Word.

On the other hand, Al Sharpton opened MSNBC’s Politics Nation (4/3, 894K) with a segment on the “GOP freakout” following the news that “millions of Americans are getting insured under the President’s healthcare law.”

Sharpton said, "You'd think all those who predicted failure would be pretty embarrassed, but instead, the success has driven them completely off the rails." Rep. Jim McDermott (D-WA) said his Republican colleagues "don't know what to do" because "it's turned out exactly as [HHS Secretary] Sebelius predicted." According to McDermott, "They have lost and they can't admit it."

Likewise, on MSNBC's *Hardball* (4/3, 689K), Chris Matthews said, "For months, conservative critics have predicted the total failure of the President's healthcare law, so when the President announced this week the law had enrolled over seven million people into the healthcare exchanges," they "flat out accused the White House...of lying." Salon's Joan Walsh said the reaction from the right is "a new firm of birtherism," and added, "these guys loved the numbers when the Administration was admitting in October and November those numbers were low."

Earlier on Thursday, *National Journal* (4/4, Ritger, Subscription Publication, 561K) reported that "the latest Health Reform Monitoring Survey, funded by the Robert Wood Johnson Foundation, an organization focused on public health, and conducted by the Urban Institute," found that "5.4 million uninsured Americans have gained health coverage since September, the first estimate of how many of the nation's uninsured are benefiting from Obamacare," while "the percent of uninsured Americans fell to 15.2 percent in March from 17.9 percent in September." *National Journal* notes that the survey also found that "states that expanded Medicaid had lower uninsured rates than states that did not," with "some 12.4 percent of residents in states that expanded Medicaid remain[ing] uninsured, compared with 18.1 percent in states that did not."

In a post for PBS' (4/4, Kane, 1.22M) *The Rundown* blog, Jason Kane notes that "most of the survey was completed by March 6 – before the final open enrollment surge took place – meaning the final insurance tally could be even higher."

Michael Hiltzik, in his column for the *Los Angeles Times* (4/4, 3.46M), says that "if all those newly insureds were among those who signed up on the individual exchanges, that would mean that of the 7.1 million enrollees, 77% were previously uninsured," but "the researchers say...that their figures include people who will receive their insurance from Medicaid."

In an article for the *New Republic* (4/4, 195K) titled "Urban RWJF Report: Ted Cruz Wrong, Obamacare Helping Uninsured," Jonathan Cohn says the "lack of hard, reliable data has made settling this debate difficult, although that hasn't stopped the likes of Ted Cruz from suggesting that the net effect of the law will be to increase the number of people without coverage." Cohn says the study released Thursday "shows pretty clearly that Cruz is wrong," and that, instead, "the number of Americans without health insurance is almost certainly falling." However, Cohn concedes that "in order to match the progress that the experts predicted for 2014, the number of uninsured Americans would still have to fall by a lot more," and, according to Cohn, "it's a very open question whether that will happen."

The *New Orleans Times-Picayune* (4/4, Alpert, 678K) reports that on Thursday, Rep. Bill Cassidy (R-LA), who is challenging Sen. Mary Landrieu and "is basing a good part of his run...on his opposition to health law," said, "Until the President releases more enrollment information, we cannot evaluate the claim that 7.1 million people have signed up for Obamacare." According to Cassidy, "We need more information before the President declares this law a success."

Paul Krugman, in his column for the *New York Times* (4/4, Subscription Publication, 9.65M), says "you don't find many Obamacare opponents admitting outright that 7.1 million and counting signups is a huge victory," but, according to Krugman, "their reaction to the results – It's a fraud! They're cooking the books! – tells the tale." Krugman contends that "Republican political strategy were based entirely on the assumption that...Obamacare's rollout would be an unremitting tale of disaster," and so "they have no idea what to do now that it's turning into a success story."

The *Washington Post* (4/4, 4.22M), in an editorial, says, "this week's news is among the first of what we hope will be many signs that the health-care law is working toward its primary goal: enrolling many Americans into decent, comprehensive plans in sustainable marketplaces." However, the *Post* notes that "tens of millions of people, including undocumented immigrants, will still be uninsured."

Networks Reportedly Nixed Plans For Obama To Deliver Primetime Address On ACA Signups. On Thursday afternoon, BuzzFeed (4/4, McMoms-Santoro, 10.34M) reported that the White House "sought valuable primetime air for a rare, impromptu Tuesday night address to tout the accomplishment of signing up more than 7 million people under the Affordable Care Act," but "network officials refused," so President Obama was "left instead cutting into the much smaller audiences of Ellen and other daytime shows." BuzzFeed noted that the White House "rarely asks for primetime broadcast TV time for Obama," and, according to BuzzFeed, "the Oval Office message is one of the traditional venues for presidential communications Obama's team has shunned in favor of digital and nontraditional media tools."

On Fox News' Special Report (4/3, 2.15M), Ed Henry reported that Congressional Republicans contend that the decision by the networks "shows the President has got less clout."

Eighteen House Democrats Join Republicans On Vote To Redefine "Full-Time" Work. The AP (4/4, Werner) reports that on Thursday, Republicans in the House "renewed their election-year assault" on the Affordable Care Act, and that "their opposition [is] undimmed just days after" the White House "celebrated news that more than 7 million Americans had signed up for coverage under the law." The AP says the House "voted 248-179 to change the law's definition of full-time work from 30 hours a week to 40 hours a week." According to the AP, the CBO has concluded that if the definition were changed "hundreds of thousands more people would be uninsured."

The Washington Post (4/4, O'Keefe, 4.22M) notes that "eighteen House Democrats voted with Republicans...to change the definition of full-time work," including some of those "most at risk of losing reelection this year," such as Reps. Ron Barber (D-AZ), Ami Bera (D-CA), Patrick Murphy (D-FL), and Nick Rahall (D-WV).

According to the Washington Times (4/4, Howell, 455K), "Critics say the 30-hour threshold...will harm workers in the food service industry and other sectors because it incentivizes employers to slash hours and avoid the costs of providing health coverage." The Times notes Sen. Joe Donnelly, a Democrat, "has worked with Sen. Susan Collins, Maine Republican, on a bill in the upper chamber to change the Obamacare definition from 30 hours to 40 hours."

The Wall Street Journal (4/4, Peterson, Subscription Publication, 5.51M) notes that along with Donnelly, Sen. Joe Manchin has also said he supports changing the ACA's definition of full-time work, and Sen. Mark Begich has indicated he might be open to something along those lines.

The Hill (4/3, Kasperowicz, 237K) reported that the sponsor of the bill that passed in the House on Thursday, Rep. Todd Young (R-IN), "said some workers could see up to a 25 percent cut in their hours," and House Majority Leader Cantor "went further by saying Democrats are trying to offset the lost ObamaCare wages with the minimum wage hike."

According to the Christian Science Monitor (4/4, Khadaroo, 566K), "already a number of colleges have said that they are cutting the hours and course loads of many of their adjunct staff because they won't be able to afford the insurance or the government fines for not covering those who work more than 30 hours."

Gibbs Predicts ACA's Employer Mandate Will Never Be Enforced. Politico (4/4, McCalmont, 73K) reported that on Wednesday, "during a speech at the 2014 Benefits Selling Expo in Colorado Springs," former White House press secretary Robert Gibbs "predicted...that the employer mandate will be 'one of the first things to go,' during lengthy remarks on Obamacare." Gibbs is quoted as saying, "I don't think the employer mandate will go into effect. It's a small part of the law. I think it will be one of the first things to go."

The Hill (4/3, Sink, 237K) reported that in response to Gibbs' remarks, White House Press Secretary Jay Carney insisted that Gibbs "was wrong to predict that the administration would not implement the employer mandate," and pledged that the Administration "would not again delay the penalty on businesses who do not offer their employees healthcare."

On Fox News' Special Report (4/3, 2.15M), Ed Henry reported that President Obama "was on defense today over healthcare, but not from Republicans." Instead, the White House was forced to respond to "friendly fire from a former press secretary, forcing the current man at the podium to insist there will be no further delays to the

employer mandate." Carney was shown saying, "The final rules were put out in February and this will be phased in starting next year in accordance with the final rules."

Also on Fox News' Special Report (4/3, 2.15M), the Daily Caller's Tucker Carlson said he agreed with Gibbs' prediction, and added, "Once you fail to enact or repeal the corporate mandate, then you can't...defend the individual mandate once," and "at that point, the whole system falls apart because, unless you compel healthy people to buy in, they won't, and when they don't buy in, that means insurance companies will be unable...to turn a profit." Carlson added, "This is the beginning of the end for the entire Obamacare law." On the other hand, Juan Williams disagreed with Carlson's analysis and said Gibbs "was...just talking about common sense tweaks that they can make to improve the law."

House Members Ask State Officials To Account For Funds Spent On Broken ACA Exchanges. The Los Angeles Times (4/4, Reston, 3.46M) reports that in testimony before the House Oversight Committee, "directors of troubled state insurance exchanges said Thursday that they could fix continuing Obamacare glitches with grant money they have already received and would not ask for federal bailouts." However, according to the Times, "Hawaii signaled an urgent need for financial assistance next year" after having "signed up about 7,596 people in private plans" so far.

The New York Times (4/4, A14, Pear, Subscription Publication, 9.65M) reports that Tom Matsuda, "the interim executive director of the Hawaii exchange, said that it had received \$205 million in federal grants and enrolled only 7,600 people," which "works out to an average of \$27,000 for each person enrolled."

According to the Los Angeles Times (4/4, Reston, 3.46M), on Thursday, House Republicans "focused considerable attention...on Maryland, which received \$180 million in federal grant funds but ultimately dismissed its primary contractor."

The Washington Post (4/4, Johnson, 4.22M) reports that Joshua Sharfstein, Maryland's secretary of health, "kept facing questions about how much the state spent on its troubled health insurance marketplace," and "did not always have firm answers to those questions." According to the Post, Maryland "has spent about \$129 million on its exchange," and "hopes that it can salvage some of the current system's hardware and software" but "only plans to keep \$8 million worth."

According to the AP (4/4, Witte), "Maryland auditors who examined the state's badly flawed health exchange website were given redacted documents." The AP reports that Thomas Barnickel, "the state's legislative auditor, wrote that about 26 percent of the documents were redacted," and noted that "procurement documents were 'heavily redacted.'"

The Wall Street Journal (4/4, Dooren, Subscription Publication, 5.51M) notes that the Oregon exchange still does not allow the uninsured to purchase plans, so the state has extended its open enrollment period for another month and is considering its exchange in favor of healthcare.gov for next year's open enrollment.

The Oregonian (4/4, Budnick, 992K) reports that at the hearing on Thursday, Greg Van Pelt, "an advisor to Gov. John Kitzhaber, had something going for him that helped deflect committee members' hostile grilling to other states: he didn't know the answers to their questions" because he "didn't join the effort until after the state realized its problems were worse than thought, and turned to hiring workers to process applications by hand."

The St. Paul (MN) Pioneer Press (4/4, Davis, 656K) reports that on Thursday, Rep. Paul Gosar (R-AZ) shot his first question to MNsure interim CEO Scott Leitz, asking why the state would pay nearly \$27,000 in bonuses to people responsible "for a blotched website?" According to the Pioneer Press, MNsure "launched...with numerous website and other problems, including wait times at the telephone call center of up to an hour, after which customers were disconnected.

The St. Cloud (MN) Times (4/4, Neely, 77K) notes that Leitz testified that he "he took immediate action after he became interim chief executive in December," and reported that "software problems have been resolved, and call center wait times came way down by the time open enrollment closed Monday."

MSNBC's Schultz: ACA Is "The First Step" Towards A Single-Payer System. In a brief item for MSNBC's Ed

Show (4/3, 449K), Ed Schultz said, "I'll guarantee you every Democrat in the House wants single-payer," and "that's why the Republicans are fighting so hard to defeat Obamacare." Schultz continued, "Incrementally, [the ACA] is the first step...to eventually get to single-payer." According to Schultz, "Consumers are going to see how good the Affordable Care Act is, they'll want state exchanges everywhere, they'll go to the next stage, it will evolve, and, yes, single-payer will be a reality."

ALLEGED FORT HOOD SHOOTER'S BACKGROUND SHOWED NO INDICATION OF LIKELY VIOLENCE. The Wednesday shootings at Fort Hood, Texas that left four dead – including alleged shooter Spc. Ivan Lopez – and 16 injured led all three broadcast network newscasts Thursday evening. Most reports focus on the emerging details about Lopez, particularly the lack of indicators of potential violence in his military and psychiatric backgrounds. There are also stories about the ease in bringing a weapon onto the premises of Fort Hood, as well as on regulations that prohibit soldiers from arming themselves on base.

ABC World News (4/3, lead story, 5:20, Sawyer) reported, "We're learning new details about the moment of crisis at Fort Hood...where the war veteran picked up a gun and started shooting, and we also know more tonight about his mental state." ABC (Muir) added that Lopez was "a father of three, a husband, a soldier...with a clean record." He served in Iraq for four months in 2011, but "the Pentagon says he never saw combat." Martha Raddatz said on ABC World News (4/3, story 2, 1:55, Sawyer) that the 34-year-old "spent nearly half his life in the Army, serving as a peacekeeper in the Sinai, an infantry man in the deserts of Iraq, first joining the guard in his native Puerto Rico, where his former supervisor, today, had nothing but praise." Command Sgt. Maj. Nelson Bigas of the Puerto Rico National Guard was shown saying: "He was an outstanding and disciplined soldier."

On the CBS Evening News (4/3, lead story, 3:10, Pelley), Anna Werner reported that Lopez "used a semiautomatic handgun in his attack." Commanding general Lt. Gen. Mark Milley "says there is no signs yet that he had specific targets." A neighbor of Lopez's at the apartment where he moved a few weeks ago said she "saw him yesterday at lunchtime." Shanice Banks: "He looked fine. He didn't look, you know, anxious or, you know... there's no signs of it could have been him. That's why it was so mind-boggling." Bob Orr said on the CBS Evening News (4/3, story 2, 2:15, Pelley), "Investigators have been told the gunman may have been upset that the Army refused to grant him personal leave and witnesses say Ivan Lopez argued with another soldier just before those shootings, but investigators cannot yet say if any of that prompting the attack." His "military career was unremarkable."

NBC Nightly News (4/3, lead story, 3:45, Williams, 7.86M) reported that "while there's still no known motive, we're learning more about his mental health history. This is, of course, the second tragedy, the second mass shooting, in five years at Fort Hood." Jim Miklaszewski reported on NBC Nightly News (4/3, story 2, 2:40, Williams, 7.86M) that officials describe Lopez "as an underachiever who in 15 years of military service went largely unnoticed until now." After his return from Iraq, "Lopez did suffer depression, anxiety and sleep deprivation. But a psychiatric exam at Fort Hood last month raised no red flags."

The New York Times (4/4, Montgomery, Fernandez, Williams, Subscription Publication, 9.65M) reports Secretary of the Army John McHugh told the Senate Armed Services Committee that Lopez was being evaluated for PTSD and "had been examined by a psychiatrist within the last month...but showed no signs that he might commit a violent act." McHugh said, "The plan forward was just to continue to monitor and treat him as deemed appropriate." The Wall Street Journal (4/4, A1, Barrett, Barnes, Koppel, Subscription Publication, 5.51M) reports that officials were reviewing Lopez's records for any disciplinary actions linked to mental health problems, but had yet to find any.

The Washington Post (4/4, A1, Whitlock, Leonnig, Goldman, 4.22M) reports that McHugh, who did not mention Lopez by name, "said the investigation was still unfolding and did not comment on a possible motive." The Washington Times (4/4, Wolfgang, 455K) reports that White House Press Secretary Jay Carney also said Thursday that it is "too early to speculate on the cause" of the Wednesday shooting, but "said there is 'work that remains to be done' to ensure the nation's veterans have the care and treatment they need."

The Washington Post (4/4, Londoño, 4.22M) reports Defense Secretary Hagel said Thursday "that the Pentagon will be looking for 'any new lessons learned' from the latest Fort Hood shooting." Hagel, in Honolulu for a summit of Asia-Pacific defense leaders, told reporters, "We need to let investigators do their work and help us understand how this happened."

The AP (4/4, Weissert, Weber) also reports that Lopez had no previous signs of violence, while Politico (4/3, Wright, 73K) reported that McHugh and others said he had no apparent ties to any radical organizations, though that possibility was still being investigated.

Guns Easy To Bring Into Fort Hood. USA Today (4/4, Hughes, 5.82M) writes that “an unsettling sense of *deja vu* has descended” on the Fort Hood community after the shooting. One restaurant worker told USA Today, “You figure that since it happened before, they’d be more prepared.” However, the New York Times (4/4, Fernandez, Schmitt, Subscription Publication, 9.65M) reports that nearly five years after the last shooting incident at Fort Hood, “it remained easy for a soldier and even a visitor to bring in a firearm.” The base’s “weapons rules for soldiers who are not police officers rely in large part on the honor system.”

The Los Angeles Times (4/4, Hennessy-Fiske, Simon, 3.46M) says the two shooting incidents “are stoking debate over whether Congress should repeal a two-decade-old ban on carrying personal firearms on military bases,” which was intended “to protect military personnel against accidental or indiscriminate shootings” but has some saying it prevents soldiers from self-defense in such situations. After the shootings at the Washington Navy Yard last year, Rep. Steve Stockman (R-TX) introduced legislation to lift the ban. It “has languished,” but is “drawing new interest” following the latest incident.

Politico (4/3, Wright, 73K) reported Senate Minority Whip Cornyn said Thursday at Fort Hood that he is “confident” there’ll be a ‘thorough review’ of the Pentagon’s policies on concealed weapons.” But the Huffington Post (4/3, Siddiqui, 11.54M) reported Senate Majority Leader Reid had a different reaction, calling for Congress “to reconsider legislation to expand background checks.” Reid said, “This young man bought his gun a day or two before he killed these people. Couldn’t we at least have background checks so that people who are ill mentally, or who are felons, shouldn’t be able to buy guns?”

The Hill (4/4, Berman, 237K) reported House Speaker Boehner said Thursday that there is “no question” that mentally ill people should be prevented from buying guns.” Roll Call (4/4, Newhauser, 76K) reported that Boehner said Thursday that Congress had recently “passed a provision to address whether people with mental health issues have access to weapons,” but the author of the measure, Rep. Tim Murphy (R-PA), said his mental health bill did not do that. Murphy said, “It’s a whole different issue. I think he confused that.”

Politico (4/4, Bade, 73K) wrote that after the shooting, President Obama, Defense Department officials “and others in Washington agreed more must be done to spot ‘insider threats’ before they strike. But what almost no one is saying: change gun laws.” Politico says the shooting is the “latest in a string of mass shootings...where the response from Washington has shifted from guns – to the shooters who wield them.”

Counselor Killed In Shooting Profiled. The Washington Post (4/4, Hamburger, Itkowitz, 4.22M) has a feature on Fort Hood counselor Timothy Wayne Owens, who was killed after being “shot five times after trying to calm Lopez in a post parking lot.” Military officials have not released the names of the victims, “but friends of Owens said the account provided by his family fits the man they knew.”

Combat Stress’ Impact On Post-Service Violence Examined. The Christian Science Monitor (4/4, Knickerbocker, 566K) has a story on the correlation between “combat stress and violence,” highlighting “the rising incidence of suicide and attacks on family members” among veterans of the Iraq and Afghanistan wars.

WSJournal Says Shooting Differs From Past Incidents. The Wall Street Journal (4/4, A12, Subscription Publication, 5.51M) says in an editorial that Wednesday’s Fort Hood shooting seems to have little in common with the 2009 shootings there, which were an act of terrorism, or the Washington Navy Yard shootings, whose perpetrator had a history of violence. Rather, Lopez seems to have snapped, which again shows the need for better services for mental illness.

SERVICE-SECTOR GROWTH ACCELERATED IN MARCH. The Wall Street Journal (4/4, Madigan, Subscription Publication, 5.51M) reports that the Institute for Supply Management’s Non-Manufacturing Index for March came in at 53.1 on Thursday, up from 51.6 in February, showing that service-sector economic activity accelerated last month. However, economists surveyed by the Journal expected the index to come in at 53.5. ISM’s Anthony Nieves said, “The index may be below expectations but is still holding steady.”

Bloomberg News (4/4, Smialek, 2.76M) reports that the increase in service-sector activity is a sign that the "biggest part of the U.S. economy began to recover from the unusually harsh winter weather, showing growth will speed up in the second quarter." March's increase "was paced by a rebound in hiring as companies from retailers to construction firms and government agencies filled vacancies," which is "bolstering expectations" that the March jobs report, due out from the Department of Labor Friday morning, will "show the labor market improved."

The AP (4/4, Rugaber) calls the ISM report "a positive sign the economy is rebounding after an unusually cold winter." Further, the AP says that many companies that participated in the index "said that weather still weighed on their business, particularly earlier in the month," which "suggests business could improve further in April."

Jobless Claims Up Modestly Last Week. The Wall Street Journal (4/4, Portlock, Subscription Publication, 5.51M) reports that, according to Department of Labor data released on Thursday, first-time claims for new jobless benefits rose 16,000 for the week ending March 29 to 326,000. However, it was the fifth straight week of a reading coming in below 330,000, a good sign for the economy. The four-week moving average, which irons out week-to-week volatility, edged up to 319,500, a gain of 250.

Trade Deficit Expanded Sharply In February. The AP (4/4) reports that the trade deficit rose 7.7% in February to \$42.3 billion "as demand for American exports fell while imports increased slightly," according to the Department of Commerce. Exports fell 1.1% to \$190.4 billion "as sales of commercial aircraft, computers and farm goods fell," while imports rose 0.4% to \$232.7 billion, "reflecting gains in imports of autos and clothing, which offset a drop in crude oil to the lowest level in more than three years." The AP says that the February increase "prompted some economists to reduce their estimate for overall economic growth for the January-March quarter."

The Wall Street Journal (4/4, House, Subscription Publication, 5.51M) says that the report prompted Macroeconomic Advisers to lower its expected Q1 GDP growth rate to 0.9% from its previous forecast of 1.4%, while Morgan Stanley dropped its forecast from 1.5% to 1.2%. The Journal notes that economists it surveyed expected the trade deficit to come in at \$42.3 billion in February.

Mortgage Rates Edged Up Last Year. The AP (4/3) reports that Freddie Mac announced on Thursday that mortgage rates "rose slightly this week but remained near historically low levels." The average rate on a 30-year fixed loan rose to 4.41% from 4.40% the prior week, while the average rate on a 15-year loan rose to 3.47% from 3.42%.

Bloomberg News (4/4, Gopal, 2.76M) reports that rates rose "as investors awaited this week's jobs report and signs that the economy is rebounding after the disruption caused by harsh winter weather." Bloomberg said that rising home prices and higher borrowing costs, combined with "poor weather" across much of the nation, "have contributed to a slowdown in home purchases in recent months."

Consumer Confidence Rebounded Last Week. Bloomberg News (4/4, Chandra, 2.76M) reports that consumer confidence rose last week "from an almost two-month low, paced by improving perceptions of personal finances and the buying climate that signal shoppers will return to U.S. retailers as temperatures warm." The Bloomberg Consumer Comfort Index "rose to minus 30 in the period ended March 30 from minus 31.5 which was the weakest since early February."

Stocks Tepid On Thursday As Traders Await Jobs Report. The Wall Street Journal (4/4, Dieterich, Subscription Publication, 5.51M) reports that the major stock indices were mixed on Thursday, with the Dow and S&P 500 essentially flat, but the Nasdaq Composite Index falling. The Dow Jones Industrial Average fell 0.45 points to close at 16,572.55, while the S&P 500 fell 2.13 points to 1,888.77. However, the Nasdaq was down nearly one percent, falling 38.72 points to 4,237.74. The Journal says that traders were cautious, awaiting Friday's jobs report from the Department of Labor.

Bloomberg News (4/4, Ciolli, Costa, 2.76M) reports that stocks fell "after benchmark indexes climbed to records, while Treasuries rose before the government releases its monthly jobs report."

USA Today Reviews Top CEO Compensation. USA Today (4/4, 5.82M) runs a pictorial review of the top 10

CEOs among the 200 S&P 500 companies "that filed proxy statements with the Securities and Exchange Commission between Jan. 1 and March 27, 2014." Including cash, "plus the value of exercised options and vested stock in 2013 that was awarded in previous years," Gilead Science's John Martin comes in at the top of the list at \$169 million.

Editorial Wrap-Up:

NEW YORK TIMES. "How To Squeeze The Political Parties." The New York Times (4/4, Subscription Publication, 9.65M) editorializes that political donors "will now have a wide array of choices in where to spend their political dollars," as a result of the Supreme Court's *McCutcheon v. FEC* decision, and can now "give as much as \$3.6 million to joint fund-raising committees set up by the parties, which can be used to benefit individual candidates." The Times says Chief Justice Roberts, "showing insincere naïveté," does not see the "purchase of access to be corruption, which he apparently detects only in bribery. But the donors know that American politics is now for sale, and they are ready to buy."

"Europe Moves Ahead On Internet Rules." An editorial in the New York Times (4/4, A26, board, Subscription Publication, 9.65M) praises Europe for "taking the lead in protecting what makes the Internet great: its openness," noting that the European Parliament has voted for rules "that would restrict Internet service providers from blocking or slowing down services like Skype and Netflix on their networks." The Times adds that Congress "has refused to enact strong anti-blocking rules and courts have twice struck down the Federal Communications Commission regulations in this area," and argues that "lawmakers and regulators in Washington could learn something from their European counterparts."

WASHINGTON POST. "Obamacare's Solid Start." The Washington Post (4/4, 4.22M), in an editorial, says that this week's news that the Affordable Care Act met its enrollment target "is among the first of what we hope will be many signs that the health-care law is working toward its primary goal: enrolling many Americans into decent, comprehensive plans in sustainable marketplaces." However, the Post notes that "tens of millions of people, including undocumented immigrants, will still be uninsured."

"Burma's Unspeakable Violence." The Washington Post (4/4, 4.22M) editorializes that current violence against Burma's Rohingya population have taken a "discouraging turn at a time when Burma...appeared to be making strides toward openness, democracy and modernization." The Post says while Burma "has earned applause for its tentative opening toward democracy," the "progress is threatened" by the ethnic divisions and violence. Burma's leadership needs to "come to grips with the volatile situation and conduct credible investigations into the violence," according to the Post.

"Bailing Out A Broken System." The Washington Post (4/4, 4.22M) in an editorial argues for reform of Maryland's bail bond program. Maryland lawmakers are considering "reforming a bail bond system in such a shambles that a state court has ordered it overhauled," and the state Senate "has embraced legislation that would establish a new agency that would employ computer modeling to decide which defendants can go home to await trial." The Post says the Senate plan "makes sense to us," noting that while there "may be no perfect system for setting pretrial limits on the liberty of defendants," the "current method seems imperfect in the extreme."

WALL STREET JOURNAL. "The Culture Of General Motors." An editorial in the Wall Street Journal (4/4, Subscription Publication, 5.51M) notes that many of the lawmakers who attacked the "culture" at General Motors during hearings with GM CEO Mary Barra supported the 2009 Federal intervention that enabled that culture to continue. If the government had not intervened, the Journal argues, the culture those lawmakers lamented might have been corrected or eliminated entirely. The Journal further argues that the GM and Chrysler bankruptcies were designed to protect union jobs and benefits, adding that keeping companies alive in service of a political agenda is not good for consumers.

"Mass Murder Returns." The Wall Street Journal (4/4, A12, Subscription Publication, 5.51M) says in an editorial that Wednesday's Fort Hood shooting seems to have little in common with the 2009 shootings there, which were an act of terrorism, or the Washington Navy Yard shootings, whose perpetrator had a history of violence. Rather, Lopez seems to have snapped, which again shows the need for better services for mental

illness.

"Japan's VAT Ratchet." The Wall Street Journal (4/4, Subscription Publication, 5.51M), in an editorial, notes that just this week, Japan increased its value-added tax rate from 5% to 8%, and plans to hike the VAT to 10% in 2015. The Journal predicts that the increases will slow Japan's economic growth.

Ernestine Berry and Della Wolfe, from the United Keetoowah Band of Cherokee Indians in Tahlequah, Okla.; and the cultural presenters of the three Cherokee bands. Location: Smithsonian National Museum of the American Indian, 4th and Independence Avenue, S.W. Contacts: Media: Leonda Levchuk levchukl@si.edu ((202) 633-6613). Eileen Maxwell maxwelle@si.edu (202-436-6805). Notes: Two films screened daily: “Trail of Tears: A Cherokee Legacy” and “Indian Country Diaries: Spiral of Fire”.

DWINDLING FORESTS – INDIGENOUS PEOPLE – April 4 – 6. Speakers include: Marina Silva, former Environment Minister, Brazil; John H. Knox, UN Independent Expert on Human Rights and the Environment; Edwin Cisco, Firestone Agricultural Workers Union of Liberia; Auntie Joan Hendriks, Aboriginal Leader and Educator, Australia; ; Norman Jiwan, Transformation for Justice, Indonesia; Chief Liz Logan, Fort Nelson First Nation, Canada; Godfrey Massay, Land Rights Research and Resources Institute, Tanzania; Raimundo Mendes de Barros, Federation of Agricultural Workers of Acre, Brazil; Cristian Otzin, Association of Mayan Lawyers and Notaries, Guatemala; Cristhian Prado Andrade, San Sebastian Indigenous Community, Ecuador; Gomercindo Rodrigues, Associate of Chico Mendes, Human Rights Attorney, Brazil; Hiparidi Toptiro, Mobilization of Indigenous Peoples of the Cerrado, Brazil; Ernesto Tzi, Maya Q’eqchi Indigenous Community, Guatemala; Tek Vannara, NGO Forum, Cambodia; Taily Terena, Indigenous Youth Movement of Brazil; Franco Viteri, Governing Organization of the Indigenous Nationalities of the Ecuadorian Amazon. The planning committee of the event Chico Vive consists of Eve Bratman (American University), Janet Chemela (University of Maryland); John Garrison (World Bank), Laura R. Graham (University of Iowa), Christine Halvorson (Rainforest Foundation); Thomas Lovejoy (Heinz Center); Biom Maybury-Lewis (Cambridge Institute for Brazilian Studies), Andrew Miller (Amazon Watch); Andrew Revkin (New York Times), and Gomercindo Rodrigues (attorney, Acre, Brazil); Linda Rabben (American University/Rainforest Foundation) is the conference organizer. Location: American University School of International Service, 4400 Massachusetts Ave NW. Contacts: Treici Schwengber treicibs@gmail.com. Notes: Media interviews, please contact Susan Tonassi at 626 487 9681 or stonassi@bumesscommunications.com

GEORGETOWN LAW – CONSUMER SYMPOSIUM – 9 a.m. – 5:35 p.m. The Consumer Law Society at Georgetown University Law Center and Citizen Works present “Making the Fine Print Fair – Consumer Law Symposium,” featuring keynote addresses by Edith Ramirez, Chairwoman of the Federal Trade Commission, Meredith Fuchs, General Counsel of the Consumer Financial Protection Bureau, and consumer advocate Ralph Nader. Location: Georgetown University Law Center, Gewirz Student Center, 12th Floor, 120 F Street, NW. Notes: Media interested in attending should email mediarelations@law.georgetown.edu.

AEI – ECONOMICS – CORPORATE INCOME TAX – 9 a.m. – 10:30 a.m. Major surgery needed: A call for structural reform of the US corporate income tax. Introduction: David Wessel, Brookings Institution. Presenters: Eric Toder, Urban Brookings Tax Policy Center; Alan D. Viard, AEI. Commentators: Pamela Olson, PricewaterhouseCoopers; Martin A. Sullivan, Tax Analysts. Location: AEI, Twelfth Floor, 1150 Seventeenth Street, NW.

U.S. CHAMBER – BRAZILIAN MINISTER OF PORTS – 9:30 a.m. – 10:30 a.m. U.S. Chambers Brazil-U.S.

Business Council to Host Discussion with Brazilian Minister of Ports – Minister of Ports Antonio Henrique Pinheiro Silveira on the new regulatory framework designed to modernize port infrastructure and logistics in Brazil. During an open discussion, Pinheiro Silveira will explore how this new legal framework, as well as the second phase of Brazil's national dredging program, could impact business and investment opportunities in the country. Chamber press contact: Tyler Hernandez – thernandez@uschamber.com. Location: U.S. Chamber Headquarters, 1615 H St. NW.

ISRAELI-PALESTINIAN IMPASSE – 9:30 a.m. – 11 a.m. The Washington Institute hosts discussion on the current round of negotiations and discuss the future of Israeli-Palestinian peace. What went wrong? How can the obstacles be overcome? Speakers: Dennis Ross, the Institute's William Davidson Distinguished Fellow, served in the Obama Administration as senior director for the central region on the National Security Council; Robert Satloff is the Institute's executive director and Howard P. Berkowitz Chair in U.S. Middle East policy. Location: Washington Institute, 1828 L Street NW, Suite 1050. Contacts: RSVP 202-452-0677. Notes: Media wishing to cover the event with cameras should call 202-230-9550.

INTEGRATED CARE – 10 a.m. "Benefits of Integrated Care." The American Psychiatric Association brings together a diverse group of leaders in Washington, D.C., for a special breakfast and roundtable discussion hosted by the American Psychiatric Association on the promise of integrated behavioral and primary care models. Michael F. Hogan, PhD, Former Commissioner of the New York State Office of Mental Health will provide keynote remarks. Location: National Press Club, 529 14th Street NW. Contacts: Caroline Campbell, ccampbell@gymr.com, 202-745-5062

LEGISLATIVE PROCESS – PUBLIC ACCESS – 10:30 a.m. – 12 p.m. Congressional Data Coalition Launches to Strengthen Public Online Access to Legislative Process. Witnesses: Daniel Schuman, Policy Director, Citizens for Responsibility and Ethics in Washington (CREW); Director, Congressional Data Coalition (opening remarks) Jim Harper, Senior Fellow, Cato Institute; Global Policy Counsel, Bitcoin Foundation; (Moderator); Steve Dwyer, Senior Policy Advisor and Digital Director, Democratic Whip Steny Hoyer; Kirsten Gullickson, Senior Systems Analyst, Clerk of the U.S. House of Representatives; Nick Schaper, Senior Vice President, Engage; former Director of Digital Media, Speaker John Boehner; Josh Tauberer, Founder, Govtrack.us. Location: 1310 Longworth. Contacts: Derrick Crowe 202.408.5565 (dcrowe@citizensforethics.org).

LANTOS COMMISSION – INDIA – 10:30 a.m. – 12:30 p.m. "The Plight of Religious Minorities in India." Witnesses: Dr. Katrina Lantos Swett, Vice Chair, United States Commission on International Religious Freedom; John Sifton, Asia Advocacy Director, Human Rights Watch; Robin Phillips, Executive Director, The Advocates for Human Rights; John Dayal, Member, National Integration Council, Government of India. Location: 2322 Rayburn. Notes: For any questions, please contact the Tom Lantos Human Rights Commission at 202-225-3599 or tlhrc@mail.house.gov.

FPI- AFGHANISTAN – CONFERENCE CALL – 11 a.m. The Foreign Policy Initiative holds Conference Call: Is Afghanistan Ready for April 5th Elections? Participants: David S. Sedney, Former Deputy Assistant Secretary of Defense for Afghanistan, Pakistan and Central Asia; Hamid Arsalan, Program Officer, Middle East and North Africa, National Endowment for Democracy; Robert Zarate, Policy Director, Foreign Policy Initiative. Contacts: Questions in advance – info@foreignpolicyi.org. Ryan Richardson richardson@foreignpolicyi.org (202-360-6959)

WORLD HEALTH DAY – 11 a.m. – 12 p.m. A press briefing on a "call to action to step up the fight against vector-borne diseases in the Americas." Participants will urge international collaboration to control the threats from these diseases. With Dr. Tom Frieden, Director, Centers for Disease Control and Prevention (CDC); Rear Adm. Tim Ziemer, U.S. Global Malaria Coordinator; Dr. Jarbas Barbosa, Secretary for Health Surveillance of Brazil; Dr. Fenton Ferguson, Minister of Health of Jamaica; Dr. Carissa F. Etienne, Director, PAHO/WHO. Location: PAHO/WHO headquarters, 525 23rd St. NW. Contacts: Donna Eberwine-Villagran, eberwind@paho.org, 202-974-3122

DOE – JAZZ APPRECIATION MONTH – 11:30 a.m. The Department of Education celebrates Jazz Appreciation Month Celebration with a Jazz Performance Orchestrated by the Thelonious Monk Institute of Jazz. Speakers: The Thelonious Monk Institute of Jazz Educator; Dr. J.B. Dyas Jazz Recording Artist, Trumpeter and Educator; Terell Stafford Newark's Arts High School Jazz Combo; Acting General Counsel Phil Rosenfelt, U.S. Department of Education. Location: U.S. Department of Education, LBJ Building (Auditorium), 400 Maryland Avenue, S.W.

Contacts: Press Office press@ed.gov ((202) 401-1576)

NEW AMERICA FOUNDATION – PCAST SPECTRUM – 2 p.m. – 3:30 p.m. “Implementing the PCAST Spectrum Sharing Report: A Citizens Broadband Service and Beyond.” Featured Speakers: Jason Furman, Chair, President’s Council of Economic Advisors; John Leibovitz, Deputy Bureau Chief, Wireless Telecommunications Bureau and Spectrum Advisor to the Chairman, Federal Communications Commission; Craig Mundie, Member, President’s Council of Advisors on Science and Technology (PCAST) and Senior Advisor to the CEO, Microsoft Corporation; Mark Gorenberg, Member, President’s Council of Advisors on Science and Technology (PCAST) and Founder and Managing Director, Zetta Venture Partners; Milo Medin, Vice President of Access Services, Google Inc., and Invited Expert, PCAST. Location: 1899 L Street NW, Suite 400. Contacts: Kirsten Holtz, holtz@newamerica.org, 202-735-2806

DISASTERS AND DISPLACEMENT – Disasters and Displacement: Challenges, Solutions and Linkages. Moderator: Elizabeth Ferris, Senior Fellow and Co-Director, Brookings-LSE Project on Internal Displacement, The Brookings Institution. Panelists: Chaloka Beyani, UN Special Rapporteur on the Human Rights of IDPs, Co-Director, Brookings-LSE Project on Internal Displacement, Brookings Institution; Ambassador Claude Wild, Head of Human Security Division, Federal Department of Foreign Affairs, Government of Switzerland; Walter Kdlin, Nonresident Senior Fellow, The Brookings Institution, Envoy, Chairmanship of the Nansen Initiative; Jane McAdam, Nonresident Senior Fellow, The Brookings Institution, Director, Andrew & Renata Kaldor Centre for International Refugee Law. Location: The Brookings Institution, Saul/Zilkha Rooms, 1775 Massachusetts Ave NW. Contacts: 202.797.6105

CUA KARL HERZFELD MEMORIAL LECTURE – 4 p.m. “From New Jersey to Stockholm and the Beginning of the Universe. The 33rd Annual Karl Herzfeld Memorial Lecture will feature John C. Mather, 2006 Nobel laureate in physics and project scientist for the James Webb Space Telescope at the NASA/Goddard Space Flight Center in Greenbelt, Md. Mathers talk is titled “From New Jersey to Stockholm and the Beginning of the Universe. For more information, visit physics.cua.edu or call 202-319-5315. Location: The Catholic University of America, Karl Herzfeld Auditorium in Hannan Hall (Room 108), 620 Michigan Ave., N.E.

MLK MEMORIAL CANDLELIGHT VIGIL – 7 p.m. The Memorial Foundation, Inc., the builders of the Martin Luther King, Jr. Memorial, will host a candlelight vigil to honor and remember the life of Martin Luther King, Jr. Remarks, prayers and a participatory song will honor Dr. King’s legacy. The event will conclude with a wreath laying at the Monuments Stone of Hope. Speakers to include: Vincent Gray, Mayor of the District of Columbia; Bob Vogel, National Park Service Superintendent of the National Mall and Memorial Parks; Robert Stanton, Sr. Advisor to the Secretary of the Department of Interior Sally Jewel; The Rev. Dr. Derrick Harkins, Senior Pastor to the Historic 19th Street Baptist Church, Washington, DC; Jeff Johnson, Columnist; Harry E. Johnson, Sr., President and CEO, Friends of the Memorial Foundation. Contact: ilee@thememorialfoundation.org 202-737-5420. Location: Martin Luther King, Jr. Memorial, 1964 Independence Avenue SW.

SECONDARY SCHOOL PRINCIPLES – DUNCAN – 7 p.m. Secretary Duncan will deliver remarks at the National Association of Secondary School Principals National Assistant Principal of the Year Program Awards Gala. Location: Hyatt Regency Crystal City, Ballroom ABCD, 2799 Jefferson Davis Highway, Arlington, Va. Contacts: Press Office press@ed.gov ((202) 401-1576)

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: “Well, Chris Christie. What a guy... He closes, allegedly closes, down the George Washington Bridge. Everybody goes crazy. There’s investigations, there’s subpoenas, and he says, ‘I’ll handle this. I’m going to investigate myself.’ So, he investigates himself. He finds out that he, in fact, is innocent. He came up with a classic defense – ‘If the pants don’t fit you must acquit.’”

Stephen Colbert: “Now, nation, everybody knows I’m a huge fan of the five conservative Justices on the Supreme Court. They’re like a judicial version of ‘One Direction’ in that all their rulings go in one direction. But two years ago, I was betrayed by the cute one, Chief Justice John Roberts, because, in an act of judas-prudence, he voted

to uphold Obamacare, and that broke my heart. And even worse, under Obamacare, I am covered for cardiac breakage.”

Stephen Colbert: [Referring to the Supreme Court's decision on campaign contribution limits.] “Now, the case in question is *McCutcheon v. FEC*, and in a 5-4 decision, the court eliminated the \$123,200 cap on the total amount you can donate, which is great for all of us, if by ‘us’ you mean the 591 people who gave the maximum allowable donation in 2012. And if you’re not one of us, you really should be.”

Jimmy Fallon: “The big news is that House Budget Committee Chairman Paul Ryan just released his budget proposal for 2015 and a lot of people are criticizing it. For example, during a speech yesterday, President Obama referred to the budget as a ‘stink-burger’ and a ‘mean-wich.’ Ryan called Obama immature, while Chris Christie called to see if they had any more of those ‘stink-burgers’ or ‘mean-wiches.’”

Jimmy Fallon: “The Russian government just confirmed that Vladimir Putin has finalized his divorce from his wife of 30 years. You can tell Putin’s depressed, because today he invaded a Haagen-Dazs factory.”

Jimmy Fallon: “Putin is out there dating again and you can tell he’s single because he’s already working on his pickup lines. First, there’s, ‘Do your legs hurt? Because you’ve been running from my military all night.’ Next we have, ‘Is your father a baker? Because I would wait in breadline for three days for you.’ And then here’s the last one, ‘Are you an angel? Because I thought I had you killed months ago.’”

Seth Meyers: “Unfortunately, I feel bad that I have to start us off tonight with a little bit of sad news. I’m afraid the Kremlin announced yesterday that Vladimir Putin and his wife have officially divorced. Yeah. Over their 30-year marriage, the couple shared two daughters, several homes, and one laugh.”

Seth Meyers: “On tomorrow’s ‘Today’ show, former President George W. Bush will unveil 24 portraits he’s painted of world leaders. This is true, and if the ‘Today’ show likes them, they’ll put them up on their refrigerator.”

EVENT MEMORANDUM FOR THE SECRETARY

INTERNAL GREATER SAGE GROUSE BRIEFING

DATE: April 7, 2014
LOCATION: Office of the Secretary
TIME: 2:15PM – 3:15PM
FROM: James Lyons, Counselor to the Assistant Secretary for Lands and Minerals
Michael Bean, Counselor to the Assistant Secretary for Fish, Wildlife & Parks
Sarah Greenberger, Senior Advisor to the Secretary (202)219-2140

PURPOSE

The purpose of this meeting is to discuss the status of Greater Sage Grouse (GSG) planning efforts, provide you with an update on key activities, and provide relevant Colorado Trip background information. This memo provides an update on the status of the Department's work on GSG conservation strategy including: (1) progress on key issues/activities since January; (2) an update on key activities over the next 3 months; and (3) a potential opportunity to address make an important announcement and address key issues at the WGA summer meeting on June 9-11 in Colorado Springs, CO.

DISCUSSION

Progress Since January

BLM, FWS, and the Forest Service (FS) continue to work together to improve understanding of and help revise the draft sage grouse conservation strategies embodied in the remaining 14 subregional plans developed by the two land management agencies (the Lander plan has been essentially completed and is awaiting release). In total, these plans will revise or amend 98 BLM regional management plans (RMPs) and 21 FS land and resource management plans (LRMPs).

The BLM has issued – and the comment periods have closed on – all of their draft plans. In addition, the FWS has commented on each of the drafts providing their assessment – in writing and through the creation of so-called “stop light matrices”-- of the extent to which each draft plan addresses threats to the GSG.

The BLM, FWS, and FS convened two “Federal family meetings” to review the draft plans and discuss the FWS comments on the plans. These meetings revealed that the BLM state directors sometimes approached the same issues in different ways. For example, some draft plans left areas with low potential for mineral resource development open, while other plans closed such areas, reflecting different responses to a perceived low risk.

The meetings also made clear that there was still confusion between the agencies on how BLM planning actions translate into protection on the ground. One important outcome of these meetings was the recognition of the need to create a common vocabulary for land use allocations and further clarity regarding how individual plans were developed. To address this issue, BLM

has decided to write a narrative description of the conservation strategy reflected in each plan and how it addresses the threats affecting each population as described in the Conservation Objectives Team (COT) report.

Through the family meetings, BLM, FS, and FWS leadership identified issues that remain to be resolved (and are currently being discussed). These issues include:

- Land use allocations, definitions, and descriptions (e.g., for oil and gas, minerals, solar and wind energy development, transmission and pipeline rights of way);
- Disturbance caps (i.e., how much land disturbance will be permitted in each PAC or population and how is disturbance defined);
- Mitigation;
- Monitoring;
- Adaptive management; and
- Fire (prevention and post-fire restoration).

Key Activities over the Next Three Months

Metrics for Assessing Conservation Efforts

The FWS has led an effort, in collaboration with the states, to develop a common set of metrics for measuring conservation actions in response to COT-identified threats across the range of the SGS. Efforts are continuing to bring closure to this discussion and agree on the key metrics to be used. FWS is working with USGS to provide a geospatial display of the conservation efforts captured by these metrics.

Resolution of Identified Issues

Bureau and departmental staff continue to meet to resolve the issues identified above. Another meeting is scheduled for this week. Any remaining issues will be resolved by the agency leadership.

Finalizing Plans

(b) (5)

An Opportunity at the WGA meeting in mid-June

The WGA summer meeting will occur June 9-11 in Colorado Springs, CO. The main focus of the meeting will be on water and fire issues. Mike Conner has been invited to discuss water management issues at the meeting. You spoke at the WGA winter meeting in Las Vegas and co-convened a meeting with the Governors to discuss the status of the collaborative GSG conservation efforts over lunch. You could build on that discussion.

Opportunities to consider include:

Hickenlooper: Bird listing ominous

By [Gary Harmon](#)

Friday, March 28, 2014

A listing of the prairie chicken as threatened bodes ill for efforts on the West Slope to forestall similar listings for the Gunnison and greater sage-grouse, Gov. John Hickenlooper said Friday.

On the other hand, Hickenlooper told the Club 20 board of directors on Friday, Interior Secretary Sally Jewell seemed to have been influenced by the cooperation she saw in Moffat County when she earlier this year visited a ranch managed to preserve the greater sage-grouse.

“She walked away very impressed by what we are doing with the sage-grouse,” Hickenlooper said to an audience that has said listing the grouse species as threatened or endangered could harm local economies as well as ultimately boomerang on efforts to preserve the bird.

Hickenlooper spoke in the Colorado Mesa University Center.

Jewell, who closed a town hall meeting in Craig to the press, was trying to encourage debate by doing so, Hickenlooper said.

“She in no way was trying to close things off,” he said. “She wasn’t trying to be evil or anything.”

The U.S. Fish and Wildlife Service, an agency of the Interior Department that Jewell heads, is considering the status of both birds.

The Gunnison variety, the smaller of the two birds, is further along in the process and has been the subject for decades of cooperative conservation efforts in 11 counties that involve local governments, landowners and others.

That effort might keep the Gunnison sage-grouse from being listed, he said.

If not, the state would file an amicus brief in any court challenge to a listing, Hickenlooper said.

The Fish and Wildlife Service on Thursday listed the prairie chicken as threatened, but there had been no cooperative effort to help that bird as there has been with preserving the grouse, Hickenlooper said.

The spring meeting of Club 20 continues today in the university center.

Weekly Look Ahead

Iacobucci, Francis <francis_iacobucci@ios.doi.gov>

Sun, Apr 6, 2014 at 7:09 PM

To: Sally Jewell (b)(6)@ios.doi.gov>

Sally,

Attached is the weekly scheduling look ahead for tomorrow's 8:30am. Highlighted are (1) important items for the week (2) items you have requested follow-up on, and (3) bigger items scheduled for the next 30 days.

Have a great night.

Booch

Scheduling - Weekly Look-Ahead

Week of April 7, 2014

Monday

External: 1:00pm: Meeting with Citizen's Coal Council (60 minutes)
Comms: 3:30pm: SIPI Commencement Address Discussion (60 minutes)
Other: 2:15pm: Internal Greater Sage Grouse Briefing (60 minutes)

Tuesday

External: 11:30am: Courtesy Visit with DOI Museum Artists (20 minutes)
3:15pm: President's Interagency Task Force to Monitor and Combat Trafficking (75 minutes)
Comms: Sisseton Cooperative Agreement Announcement
Other: 12:30pm: Lunch with Katherine Archuleta (60 minutes)

Wednesday

External: 9:00am: Meeting with Northern California Representatives (60 minutes)
11:00am: Remarks at the 75th Anniversary of Marian Anderson's Concert Event (45 minutes)
1:30pm: Conservation Group Leaders Meeting on Mitigation Report (50 minutes)
5:30pm: Call with Secretary Pritzker regarding the Restore Council (15 minutes)
Comms: 2:30pm: National Wildfire Strategy Press Call (30 minutes)
Other: 3:00pm: Meet and Greet with Point Arena Students (30 minutes)

Thursday

External: 12:00pm: Courtesy Visit with Peter Goldmark (30 mins)
2:00pm: Principals Meeting on Climate and Energy (60 mins)
6:30pm: Remarks at the TRCP BBQ
Comms: Mitigation Report
Other: N/A

Friday

External: N/A
Comms: N/A
Other: 8:00am: Visit to NCTC for the USFWS Director's Forum and Meeting

Next 30 days

April 12 National Youth Leadership Council Day of Service
April 14 Meeting with Assistant Secretaries and Bureau Directors
Internal Prep for White House Council on Native American Affairs
April 17 BIE Commencement Address in Albuquerque (Additional Prep set for April 15)
April 18 Klamath Signing Ceremony in Oregon (Mike Connor will not participate)
April 19 National Park Week kickoff in Oregon (Jon Jarvis will participate)
April 24 Tribal Summit in Washington
April 25 Kokanee Salmon Release with USFWS in Washington
April 28 Youth MOU Signing in Minnesota

April 30

Cabinet Ladies Dinner

DOI in the News:

SECRETARY JEWELL DISCUSSES CLIMATE CHANGE REMARK, FRACKING REGULATIONS. The Environment & Energy Publishing (4/6, 705) reports that Interior Secretary Sally Jewell said Thursday at a House Natural Resources Committee budget hearing that "agency employees face no 'litmus test' for their views on global warming but argued that anyone who has visited federal lands will see that climate change is real." She "defended a speech she delivered last July to Interior employees in which she said, 'I hope there are no climate change deniers in the Department of Interior'" and "invited any skeptics to view the impacts of droughts, wildfires, storms and coastal erosion on federal lands." Jewell said "her remarks were taken out of context and that she also said in the speech that her visits to Interior lands and waters make it 'very difficult' to 'deny that climate change is going on.'"

The FuelFix (4/5, 7K) reports that Jewell told lawmakers that "regulators are still sifting through more than a million public comments on a proposal to stiffen mandates for oil and gas drilling on public land, which suggests the final regulation could be a long way off." Jewell said the BLM is "combing through the comments lodged on the proposal and making progress in addressing concerns with the rule." She added that "she expects a final proposal before the end of the year."

Additional coverage of the hearing was provided by the Durango (CO) Herald (4/5, 28K).

KING COVE ROAD DISPUTE HAS LONG ROOTS. Politico (4/4, Restuccia, 73K) reports that "in the fall of 1998, Frank Murkowski took to the Senate floor to make an impassioned plea for the authority to build a one-lane gravel road from the isolated southwestern Alaska village of King Cove to a neighboring community with an all-weather airport." Now, "more than 15 years later, his daughter, Republican Sen. Lisa Murkowski, is still fighting for the road, insisting it's the only viable way to ensure that King Cove's 965 largely native Alaskan residents have access to emergency medical care."

King Cove Road Decision Criticized. The Fairbanks (AK) News-Miner (4/6, 44K) editorializes that Jewell "apparently doesn't understand Alaska." It also argues that "the issue of the King Cove road should be seen as a statewide issue and not just an issue for the small community in the Aleutians East Borough," because "if a misplaced emphasis can happen there, it can happen in the Interior and elsewhere." The paper urges Alaska's state and federal officeholders "to keep up the pressure on the Interior secretary and even the president to get a reconsideration of the road decision."

In an editorial, the Alaska Journal of Commerce (4/6, 14K) calls the decision "reckless." The paper argues that "the opposition to the King Cove road is not because Jewell or anybody else really believes it is going to destroy waterfowl habitat." The editorial asserts that "it's not about conservation; it's about preservation of a precedent that no road has ever been built through a national wildlife refuge."

Additional Coverage. Additional coverage was provided by the Alaska Journal of Commerce (4/6, 14K) and the Alaska Dispatch (4/6, 7K).

ILLINOIS WETLAND PROJECT AWARDED FEDERAL GRANT. The AP (4/6) reports that "a northern Illinois environmental group is getting a \$50,000 grant to help restore habitat for waterfowl and marsh birds." The article notes that "the funding for the Putnam County project comes from the Migratory Bird Conservation Commission." The Wetlands Initiative applied for the grant for the Oak Ridge Wetland Restoration at Hennepin and Hopper lakes.

SECRETARY JEWELL WELCOMES CHERRY BLOSSOM RUN PARTICIPANTS. WRC-TV Washington (4/7, 312K) reports that "a lack of blooming cherry blossoms did not deter the enthusiasm of the thousands of runners taking part in the 42nd running of the Credit Union Cherry Blossom Ten Mile Run." Interior Secretary Sally Jewell welcomed 15,000 runners to the National Mall and sounded the horn to start the elite women's and men's races.

INTERIOR OFFICIALS SAYS GUAM LIKELY WON'T BE PAID BIG COMPACT CHECK. The Pacific (GUM)

Daily News (4/5, 61K) reports that "in this era of congressional budget cuts, it's unlikely that the government of Guam will be paid hundreds of millions of dollars for hosting immigrants from the Micronesia region," according to acting Assistant Secretary Lori Faeth, with the Department of the Interior's Insular Affairs section. Faeth said: "The migrants also bring positive things to your community; they are workers, they will be ... leaders, so it's looking from both sides of the equation." Faeth added that the federal government "is certainly fiscally constrained, ... and I certainly don't see an opportunity that Congress is suddenly gonna come up with hundreds of millions of dollars."

CONSERVATION GROUPS CLAIM TWO KEY VICTORIES IN FARM BILL. The AP (4/6) reports that "wildlife and environmental groups are claiming victory for conservation practices in the new farm bill," which includes "two of their top priorities." The bill requires farmers "to use good conservation practices on highly erodible lands and protect wetlands to qualify for crop insurance subsidies," and also "requires 'sodsaver' protections to discourage farmers from plowing up native grasslands in several Plains and Midwest states." The bill also creates a Regional Conservation Partnership Program for resource protection "in areas such as the Great Lakes, the Mississippi River basin and Chesapeake Bay." There are some limitations – \$4 billion less for conservation programs overall in 10 years – but otherwise "I think we're going to get a quite a lot of bang for the buck," said Bill Wenzel of the Isaak Walton League America.

REPORT FINDS FIGHTING FIRES CUTS FOREST SERVICE FUNDS FOR OTHER PROGRAMS. The Yakima (WA) Herald-Republic (4/6, 86K) reports that "the escalating costs of fighting wildfires is forcing the Forest Service to raid other programs, including fire prevention work, to make up the difference." The article notes that "a move to treat the most destructive, expensive wildfires as natural disasters, funded through a separate budget, would allow the Forest Service and the Department of the Interior to protect the funding for other programs."

ADDITIONAL COVERAGE OF CALL TO DEVELOP FERAL CAT POLICY. Additional coverage of the petition sent to the Interior Department asking "the agency to develop a policy for how to deal with the nation's tens of millions of feral cats" was provided by the U-T San Diego (4/5, 648K) and the Summit (CO) Daily News (4/6, 37K).

COOPERATION ON COLORADO RIVER PROGRESS FLOWS TOUTED. In an op-ed for the Arizona Republic (4/6, 1.45M), Sally Jewell, is US Secretary of the Interior, and Juan José Guerra Abud, Mexico's secretary of Environment and Natural Resources, write that "innovative and improved partnerships are the best approach to addressing Colorado River challenges." They note that "last month, the Colorado River began to flow once again toward the Gulf of California as part of an unprecedented agreement to improve the riparian environment of the river and the Colorado River Delta." However, they write that "even more important than the riparian-area restoration and scientific studies that will result from this effort is that the action is part of a new and historic agreement between Mexico and the United States."

WPOST CALLS FOR NEW RULES ON METHANE GAS EMISSIONS. The Washington Post (4/5, 4.22M) editorializes that President Obama's recently announced strategy to regulate methane gas emissions is "not perfect," and fails to account for possible necessary improvements to natural gas transportation networks, even though some are known to be "extremely leaky." The Post argues that new rules "tightening up drilling and transportation so that less methane escapes on its way from the ground to power plants" are "critical to making natural gas a decent alternative to coal in the emissions-heavy electricity sector."

OBAMA ADMINISTRATION URGED TO CONSIDER ALL USERS FOR ORGAN MOUNTAINS-DESERT PEAKS NATIONAL MONUMENT PLAN. The Las Cruces (NM) Sun-News (4/6, 59K) editorializes that "the visit by Interior Secretary Sally Jewell in January to tour the proposed Organ Mountains-Desert Peaks National Monument suggests the Obama administration is looking seriously about using its powers under the Antiquities Act to declare the monument." The paper asserts that "a national monument, with provisions for grazing, law enforcement and flood control, would provide permanent protection for and draw renewed attention to some of our most prized areas." In conclusion, it urges "the president to act, but also to ensure that any designation include clear provisions that allow for machinery needed for flood control, watershed maintenance and ranching."

America's Great Outdoors:

National Park Service:

NPS SUFFERS \$12 BILLION MAINTENANCE BACKLOG. WJLA-TV Washington (4/6, 118K) reports that the NPS has "a \$12 billion maintenance backlog, but according to its conservation spokesperson John Garder, 'the National Park Service is a huge return on investment,' and that 'every dollar invested returns \$10 in economic activity.'"

PANEL REJECTS DESIGN FOR EISENHOWER MEMORIAL. The AP (4/6) reports that "a federal commission that oversees plans for monuments in the nation's capital voted Thursday to reject the current design for a memorial honoring President Dwight D. Eisenhower, sending the concept back to its architects for revisions." The National Capital Planning Commission "voted 7-3 to endorse its staff's report opposing the current design." The article notes that "the objections focus primarily on the scale and placement of columns that would hold large stainless steel tapestries framing a memorial park honoring Eisenhower."

MAINE LAWMAKERS HOPS TO SAVE BILL TARGETING QUIMBY'S EFFORT FOR A NATIONAL PARK. The Bangor (ME) Daily News (4/5, 166K) reports that state Sen. Doug Thomas "hopes to rescue legislation put forward by Gov. Paul LePage targeting the Quimby family's efforts to create a northern Maine national park." Thomas said, "I am sad. I am disappointed. It is an important bill and we need to make people understand how important it is that the state of Maine has some say when land is acquired by the federal government. Once it is acquired, we lose all jurisdiction. If they don't want us to snowmobile, hunt, or fish on that property, that is the end of it."

ROAD REPAIRS TO BEGIN IN THEODORE ROOSEVELT NATIONAL PARK. The AP (4/6) reports that "crews plan to begin making emergency road repairs in the north unit of Theodore Roosevelt National Park." Officials say that "several wet years have resulted in a small but substantial road failure and continued erosion of a major slope onto the roadway on the north unit's scenic drive." According to the article, "repairs will include excavating the entire width of the road above the closure gate at the Caprock Coulee parking area and rebuilding the embankment slope."

SHARPSHOOTERS KILL 156 DEER IN CATOCTIN MOUNTAIN PARK . The AP (4/6) reports that the NPS says "government sharpshooters killed 156 white-tailed deer in the fifth year of a herd-reduction program at Catoctin Mountain Park near Thurmont." Park Superintendent Mel Poole said that the "tally is close to the agency's goal of culling 160 deer from the herd."

HEAVY RAINFALL AROUND OHIO PROMPTS FLOOD WARNINGS. The AP (4/6) reports that "flooding concerns in northeast Ohio led the National Park Service to temporarily close the Ohio and Erie Canal Towpath Trail in Cuyahoga (ky-uh-HOH'-guh) Valley National Park."

NEW GLACIER CONCESSIONAIRE PREPARES FOR SEASON. The AP (4/6, Mann) reports that "gearing up for a busy summer in Glacier National Park in just a matter of a few months has been a big challenge for Marc Ducharme, but being the general manager of the Glacier Division for Xanterra Parks and Resorts also comes with promising opportunities." Ducharme said, "It was a great career opportunity for me, a big step up. The sky is the limit. We have all kinds of different businesses." Ducharme was "brought on board in December, and the few months since then have been spent preparing to operate five lodging facilities in the park, along with retail, food and beverage outlets and the park's iconic fleet of red buses."

Also providing coverage on Xanterra is the Ravalli (MT) Republic (4/7, 19K).

ADDITIONAL COVERAGE: YELLOWSTONE FIGHTING ONLINE SUPERVOLCANO RUMORS. Additional coverage of the rumors generated by a video showing bison fleeing a possible explosion of a "supervolcano" in Yellowstone National Park was provided by the AP (4/6) and the Washington Post (4/4, 4.22M).

ADDITIONAL COVERAGE: GRAND CANYON MULLING BISON ISSUE. Additional coverage that Grand Canyon National Park managers are working on a plan to manage bison was provided by the Arizona Republic (4/6, 1.45M).

Bureau of Land Management:

BLM PRINCIPAL DEPUTY DIRECTOR KORNZE LAYS OUT FIVE AGENCY PRIORITIES. The [Environment & Energy Publishing](#) (4/6, 705) reports that Neil Kornze, the BLM's principal deputy director was prepares to "lay out five priority items that BLM wants to focus attention on in the coming year" during his appearance before House appropriators to defend the agency's proposed fiscal 2015 budget. Among the priorities for the agency are a non-profit foundation, a fee system to cover BLM's oil and gas inspection and enforcement activities, fertility control for wild horses and burros, an updated online data and mapping system, and Sage-Grouse habitat conservation. Celia Boddington, BLM spokeswoman in Washington, D.C., ssaid, "It's our overarching vision of some of the areas we want to focus attention. These areas provide focus on some of the key areas of where we want to go as an agency."

Also reporting on the story is the [AP](#) (4/7).

BLM RESPONDS TO IRON COUNTY ULTIMATUM. The [St. George \(UT\) Spectrum](#) (4/4, 48K) reports that "after receiving an ultimatum from the Iron County Commission this week about the confiscation of a Nevada rancher's cattle," officials from the Utah office of the BLM "responded Friday with short note promising to work to develop a plan that will remove wild horses off the western range." Utah BLM State Director Juan Palma, "who met with the Iron County commissioners Thursday, sent an email to Commissioner Dave Miller stating he is committed to working with the county in developing a plan to reduce the number of wild horses currently on the west desert in Iron County." Palma wrote, "Both the BLM and Iron County have a shared interest in the well-being of the range and all who rely in its health, additionally, our shared interest in the well-being of sustainable populations of our wild horses. With these shared interests this email is to state that Utah BLM will work with Iron County to more fully develop the concept plan we discussed yesterday at the meeting."

The [St. George \(UT\) News](#) (4/5, 3K) reports that Iron County officials and the BLM "reached a resolution Friday concerning the county's ongoing feral horse problems." According to the article, "while the BLM will need time to formalize things on its end in relation to dealing with the feral horses and burros, Iron County has opted to go ahead with its original plan of action."

Also reporting on the story are the [Salt Lake \(UT\) Tribune](#) (4/6, 470K) and the [St. George \(UT\) News](#) (4/4, 3K).

BLM BEGINS ROUNDUP OF CATTLE. The [St. George \(UT\) Spectrum](#) (4/4, 48K) reports that "a host of federal employees — including Bureau of Land Management (BLM) law enforcement and other personnel, National Park Service representatives, private contractors and others — have spread out across about 600,000 acres surrounding Mesquite in preparation to impound between 500 and 900 cattle owned by Bunkerville rancher Cliven Bundy." Kirsten Cannon, BLM Southern District public affairs specialist, said the BLM is "withholding the exact number of federal authorities participating in the cattle roundup or the estimated cost of the effort, but Bundy said both are sizable."

The [AP](#) (4/6) reports that Bundy said, "These people are thieves. I haven't even started fighting yet. You think I'm going to lay down and just give up. I'm going to fight for the Constitution and state sovereignty."

Meanwhile, [NBC News](#) (4/7, 7.5M) reports that "a son of Mesquite rancher Cliven Bundy has been arrested by Bureau of Land Management rangers." Dave Bundy was "arrested about 4:30 p.m. Sunday as he was in a car parked along State Route 170 near Mesquite." Bundy said, "He was there to do some filming when about 11 federal agents pulled up and arrested him. They said he was outside of the First Amendment area and they took him down. We don't know where he is now."

Also reporting on the story are the [Las Vegas Review-Journal](#) (4/6, 437K) and [KLAS-TV Las Vegas](#) (4/6, 36K).

WILD HORSES POSE CHALLENGES FOR BLM. The [Santa Fe New Mexican](#) (4/6, 58K) reports on the challenges posed by wild horses. Tom Gorey, spokesman for the BLM's Wild Horse and Burro Program said, "There's no quick fix. There's no magical solution waiting to be had or waiting in the wings. We wish there were. We wish there was a fertility control method that would resolve things." Gorey acknowledged, "we're in a tough situation and Congress needs to be involved. People with constructive ideas need to be involved."

BLM HOLDS MEETINGS FOR INPUT ON LAND USE PLAN IN THE MANCOS AND GALLUP PLAY AREAS.

The Farmington (NM) Daily Times (4/6, 46K) reports that the BLM "wants to amend its resource management plan in northwest New Mexico to better accommodate a potential oil boom in the Mancos Shale and Gallup Sandstone formations." The BLM is "hosting a series of scoping meetings in northwest New Mexico, and the first one was Wednesday night at San Juan College." The scoping period for amendments to the plan ends May 28.

BLM ASSISTANT FIELD MANAGER RECEIVES SOCIETY FOR RANGE MANAGEMENT AWARD.

The Billings (MT) Gazette (4/6, 174K) reports that BLM Assistant Field Manager Mike Phillips has "received the prestigious Trail Boss Award from the Society for Range Management." The award recognizes Phillips for "his outstanding, long-term contributions and promotion of the art and science of range management."

Fish and Wildlife Service:**FWS DIRECTOR ASHE WANTS CONGRESS TO WORK WITH ADMINISTRATION ON ESA**

IMPROVEMENTS. The Environment & Energy Publishing (4/6, 705) reports that FWS Director Dan Ashe told lawmakers on Thursday that "Congress should work with the administration to update the Endangered Species Act, but he expressed skepticism that such an exercise in bipartisanship was possible." Ashe told the House Interior, Environment and Related Agencies Appropriations Subcommittee, "I believe it is appropriate for Congress to look at the law. My fear is that in this environment, it's very difficult to do that because taking up a law like the Endangered Species Act requires building consensus around objective, and I'm not certain there is consensus around objective." At the hearing, Ashe said "his agency was willing to work with the panel on reforming the act on a 'bipartisan basis.'" He said, "I think we could find some opportunities to make incremental improvements."

2013 NORTHERN ROCKY MOUNTAIN WOLF POPULATION NUMBERS RELEASED. The Denver Post (4/6, Noon, 940K) reports that a report on the 2013 Northern Rocky Mountain (NRM) Gray Wolf Population numbers suggests wolf populations have recovered to a point that they no longer need to be protected by the Endangered Species List. As of December 31, 2013, there were at least 78 breeding pairs and 1,691 wolves in Montana, Idaho, Wyoming, Utah, Washington and Oregon. The wolf population remains well above the recovery levels identified by FWS and partner biologists in the recovery plan.

Also reporting on the story are the AP (4/6), KCSG-TV St. George, UT (4/6, 43), and KSTU-TV Salt Lake City (4/4, 42K).

In an editorial, the Denver Post (4/7, 940K) trusts the FWS to intervene, as it promises, "if relisting is ever warranted."

GROUPS SUE OVER BULL TROUT RECOVERY PLAN. The AP (4/6) reports that "conservation groups have filed a lawsuit demanding" the FWS "finish developing recovery plans for bull trout, a threatened species that has gone 15 years without a blueprint for saving it from extinction." Michael Garity of the Alliance for the Wild Rockies says the agency "produced draft recovery plans about 10 years ago, but has not finished any of them." FWS spokesman Brent Lawrence says "the agency plans to offer new draft recovery plans this year."

Also reporting on the story is the AP (4/6).

FWS SAYS PROPOSED MINE IN MONTANA WON'T HARM THREATENED SPECIES. The AP (4/6) reports that "a silver and copper mine proposed for northwestern Montana won't harm grizzly bears or other threatened or endangered species in the area, federal wildlife officials have found." The FWS on Monday "issued its final biological opinion on the proposed Montanore Silver-Copper Project about 17 miles south of Libby." The FWS said the proposed mine by Mines Management Inc. "could lead to the loss of one federally protected grizzly bear." However, "it said required mitigation – including the purchase of 5,000 acres of grizzly habitat at risk for development – will make up for the loss."

PALM BEACH COUNTY MINE EXPANSION COULD KILL PROTECTED SNAKES. The South Florida Sun Sentinel (4/4, 779K) reports that "the expansion of a rock mine in southwestern Palm Beach County could kill up to a dozen federally protected eastern indigo snakes, the longest native snake in North America, according to a

wildlife agency report." According to the article, "the Star Ranch is seeking permission from the Army Corps of Engineers to expand its limestone mine by 1.4 square miles to produce construction materials for roads, Everglades restoration and other projects." The FWS says the project could "crush indigo snakes, their nests and eggs," killing up to 12 of the 23 that may live there.

GRASSROOTS EFFORT COULD REVIVE GRAND KANKAKEE MARSH. The AP (4/6, Bierschenk) reports that the FWS "once hoped a refuge in Northwest Indiana might provide some additional habitat for such birds and other local wildlife, but the proposal was viewed as an unwelcome intrusion by some deep-rooted residents of the area who have turned much of the wetlands into productive farmland." According to the article, "restoration of the restoration effort may depend on a grassroots effort and changed attitudes by both sides." Tom Larson, chief of the division of conservation planning for the FWS, said, "We definitely have not dropped our interest in the area."

FATE OF GREERS FERRY NATIONAL FISH HATCHERY UP IN THE AIR. The Heber Springs (AR) Sun Times (4/4, 17K) reports that "the fate of the Greers Ferry National Fish Hatchery is a topic of discussion once again." Petitions have been circulated "for locals to express their concerns about the possible closing of the Hatchery." The article notes that "Arkansas State Senator for District 19, Missy Irvin, collected around 500 signatures of support and the petitions will be sent to Arkansas' Congressional delegation."

LA QUINTA URGED TO BUILD FENCE TO PROTECT BIGHORN. The Palm Springs (CA) Desert Sun (4/5, 111K) reports that "three bighorn ram deaths and regular golf course sightings at SilverRock, PGA West and The Quarry of La Quinta have spurred state and federal wildlife agencies to demand an 8-foot-high fence be built within two years near the base of the mountain range to keep the sheep off the courses and away from predators and unnatural plants." The article notes that "the fence could cost as much as \$2 million." Jane Hendron, spokeswoman for the FWS, said, "It's like a smorgasbord — the lush green grass — but that poses risk. We don't want sheep to get used to people. Sheep need to be wild. It's healthier for them. It's better for them."

FWS SEEKS COMMENTS ON RED KNOT PROPOSAL. The Fort Myers (FL) News-Press (4/5, 210K) reports that the FWS has opened a comment period on its proposal to list red knots as threatened under the Endangered Species Act. The article notes that "during the comment period, which runs through May 19, Fish and Wildlife officials are particularly interested in learning about the public's observations of red knots."

EXOTIC ANIMAL TRAFFICKING THRIVES IN SOUTHERN CALIFORNIA. NPR (4/6, Hajek, 519K) reports that "exotic animal trafficking is big business, and Southern California is a hub." FWS agent Erin Dean says "there are many ways to traffic wildlife in Southern California." Dean says "smuggling avenues include LAX, the sixth-busiest airport in the world; the Port of Los Angeles, the busiest port in the nation; and the Mexican border." She said, "Currently we have 207 special agents and 126 wildlife inspectors around the country. So we're a very small law enforcement agency with a big job."

ADDITIONAL COVERAGE OF ISLAND NIGHT LIZARD DELISTING. Additional coverage of the delisting of the island night lizard was provided by the Christian Science Monitor (4/6, Swan, 566K).

LESSER PRAIRIE-CHICKEN LISTING CRITICIZED. In an op-ed for the Amarillo (TX) Globe News (4/5, 133K), Dennis Palmitier writes that the listing of the lesser prairie-chicken "places a damper on the region's two most important drivers of our economy — agribusiness and oil/gas." Palmitier claims that the FWS is "a classic example of federal government overreach and immense power — made all the more despicable by individuals with agendas contrary to the well-being of their true employer, the American taxpayer." He concludes that "something is inherently wrong when an animal's wellbeing is more important than mankind."

Securing America's Energy Future:

Renewable Energy:

WIND POWER RECEIVES "DOUBLE BLOW," BUT MAY STILL SEE TAX CREDIT RENEWED. Bloomberg News (4/6, Martin, 2.76M) reports that wind power recent received a "double blow": cheap natural gas "unleashed" by the fracking "revolution" and the "death" of the Federal wind Production Tax Credit that made it the "most competitive of all renewable energy sources in the US." Still, Bloomberg News reports that the Production Tax

Credit is part of a package of 50 lapsed tax breaks the Senate Finance Committee "agreed on April 4 to extend." Bloomberg News casts the credit as appealing to Democrats and Republicans alike "in places that have strong wind resources such as South Dakota and Texas, as well as those with turbine and blade factories," but notes that the Republicans in the House may block the tax credit ahead of the November midterm election.

Onshore Energy Development:

OFFICE OF NATURAL RESOURCES REVENUE HITS W&T OFFSHORE WITH PENALTY. Politico (4/6, Guillén, 73K) reports that the Office of Natural Resources Revenue has "slapped W&T Offshore with a \$2.333 million civil penalty for the knowing or willful submission of inaccurate royalty payments, the agency said Thursday." ONRR said the company was "warned about improper deductions for transportation costs on Gulf of Mexico leases in 2010, but the company continued to make the deduction in the years after."

Also reporting on the story is the Law 360 (4/6, 18K).

SEISMOLOGISTS: OKLAHOMA EARTHQUAKES MAY BE LINKED TO OIL AND GAS EXPLORATION.

Reuters (4/6, Gillam) reports a series of earthquakes in Oklahoma on Saturday have put the state on track for record quake activity in 2014. Some seismologists believe the quakes may be linked to oil and gas work underground, which "can alter pressure points and cause shifts in the earth."

AUTHOR HIGHLIGHTS SUGGESTIONS FOR MAKING FRACKING SAFER. In an opinion piece for the Wall Street Journal (4/5, Gold, Subscription Publication, 5.51M), Russell Gold, author of "The Boom: How Fracking Ignited the American Energy Revolution and Changed the World," suggests that since fracking will continue whether we "like it or not," steps should be taken to make the process "safer for people and the planet." Gold highlights three suggestions that he deems "eminently reasonable," including stopping methane leaks, implementing more testing procedures to ensure that fracking is not contaminating groundwater, and constructing better gas wells.

Offshore Energy Development:

INTERIOR SAYS SURVEYS FOR ATLANTIC DRILLING COULD BEGIN THIS YEAR. The Hill (4/5, Devaney, 237K) reported in its "E2 Wire" blog that a Tommy Beaudreau, director of the Interior Department's Bureau of Ocean Energy Management, said on Friday that the department has received several applications from companies to conduct seismic testing in the Atlantic to determine the feasibility of drilling and what impact it may have on the environment. Beaudreau added that it is possible that the first survey could begin as early as this year.

REPORT: SHELL'S POOR ASSESSMENT, RISK MANAGEMENT CONTRIBUTED TO 2012 ARCTIC RIG GROUNDING. The Hill (4/5, Barron-Lopez, 237K) reported in its "E2 Wire" blog that a new US Coast Guard Report blamed Royal Dutch Shell's "poor assessment and management of risks" for the grounding of one of Shell's Arctic rigs in 2012. The report said that the "single most significant factor" in the grounding was the decision to move the vessel "during the winter in the unique and challenging operating environment of Alaska" in order to avoid state taxes in Alaska.

The Anchorage (AK) Daily News (4/5, 251K) editorializes that the report "gives evidence that Shell is not fully prepared for Arctic operations." Although "all-ahead slow – with unblinking oversight – still makes sense in the long run for Arctic oil and gas exploration," the paper argues that "Shell and any other operators need to make clear that they have both learned and applied the hard-earned lessons of the Kulluk grounding." It concludes that "Coast Guard's Kulluk report provides reason to stop and reassess Arctic operations."

ATLANTIC DRILLING OPPOSED. In an op-ed for the LiveScience (4/6, 612K), Chase Martin, a media relations intern for US Campaigns at Oceana, write that "even after four years, trash from the Deepwater Horizon oil disaster is still washing ashore and devastating coastal environments and communities." He notes that "policymakers, especially many powerful officials in Washington, D.C., are inclined to believe the Gulf has fully recovered and things are more or less back to 'normal,'" and "with the BP disaster still rearing its oily head, the nation could soon be faced with similar disasters." Recently, the BOEM "released a final proposal to allow

controversial seismic airgun blasting for locating oil and gas deposits off the Atlantic coast." Martin urges officials "to consider the BP explosion not merely as an unfortunate accident, but as a reminder and a lesson learned. "

BEINECKE: WE MUST DEMAND INVESTMENT IN OIL-SPILL SAFEGUARDS AND CLEAN-UP

TECHNOLOGY. In an op-ed in the Pittsburgh Tribune-Review (4/6, 614K), Natural Resources Defense Council president Frances Beinecke uses the Exxon Valdez and BP Deepwater Horizon oil spills to frame his argument that, in light of Shell Oil's plans to drill in the Arctic Ocean, "our country can learn from experience" to preserve "marine riches for generations to come." Beinecke argues that we must demand Congress enact better safeguards for offshore drilling and that the oil industry invest in better technology to clean up spills.

Tackling America's Water Challenges:

ENVIRONMENTAL GROUPS SEEK TO STOP ROLLING BACK DELTA PROTECTIONS. The Central Valley (CA) Business Times (4/6, 206) reports that "a group of environmental organizations says it's time for the Department of Water Resources and the federal government to stop knuckling under to political pressure from farmers in the San Joaquin Valley." In a letter to Interior Secretary Sally Jewell, California Natural Resources Agency Secretary John Laird, Commerce Department Secretary Penny Pritzker and California EPA Secretary Matt Rodriguez, the groups said, "Ignoring scientific evidence of potential environmental impacts during the drought due to the political demand of South of Delta agricultural interests, will make it far more difficult to reach an effective long-term solution in the Delta." The letter notes that "state and federal authorities have rolled back environmental protections, citing the need to pump more water out of the Sacramento-San Joaquin Delta."

Also reporting on the story is the Fresno (CA) Business Journal (4/6, 160K).

FEDERAL BIOLOGISTS STUDYING DROUGHT'S IMPACT ON SAN JOAQUIN. The Fresno (CA) Bee (4/5, 352K) reports that over the last few weeks, biologists have "trucked nearly 900 young fall-run salmon to where the Merced River empties into the San Joaquin and reconnects this long river to the Pacific Ocean." Biologists have "scrambled to get a close look at how the river and the fish react to this extreme dry time." Federal biologists Don Portz and Charles Hueth "are studying survival numbers, water temperature and flow, habitat condition, diet of the young fish and other factors involved in the restoration program." Portz said, "This is an important year to learn about the river. We need to see how this looks in a critically dry time."

PLAN FOR PALLID STURGEON PASSAGE ON YELLOWSTONE RIVER UNVEILED. The Billings (MT) Gazette (4/6, 174K) reports that "creating a twisting, 3-mile-long channel around Intake Diversion Dam on the lower Yellowstone River to allow endangered pallid sturgeon and other native fish to swim around the dam would cost an estimated \$58.9 million and the moving of more than a million cubic yards of dirt and gravel while adding hundreds of tons of rock to protect the work from flood waters, large chunks of ice and debris." The details are "found in the US Army Corps of Engineers' draft supplement to its 2010 environmental assessment released last week." Jerry Benock, BOR project manager, said in a statement, "This supplemental EA results from an extensive, collaborative effort from the stakeholders and interested parties that have focused their energy on the goal of finding the most acceptable solution that will benefit the pallid sturgeon, the Lower Yellowstone Irrigation District and the local economy."

BOR MAKES CHARGING STATIONS AVAILABLE AT NEW MELONES RESERVOIR. The Calaveras (CA) Enterprise (4/6, 18K) reports that "New Melones Reservoir is now the site of a groundbreaking effort by the Bureau of Reclamation to test the waters of green energy use." Beginning Tuesday, April 1, the BOR "made two state-of-the-art charging stations available to the public in order to charge electric vehicles that may visit the reservoir." Margaret Gidding, spokeswoman for the bureau, said, "New Melones was proactive in agreeing to take on this project. We asked for two units similar to a pilot project to see how much use (and) interest we get."

Empowering Native American Communities:

TRIBAL LEADERS CRITICIZE LAND-BUYBACK PROGRAM. The Environment & Energy Publishing (4/6, 705) reports that American Indian leaders and House lawmakers on Thursday "criticized the Interior Department for its slow implementation of a multibillion-dollar land deal." At a House Natural Resources Subcommittee on Indian and Alaska Native Affairs yesterday, tribal leaders said "they are still waiting for payments more than one year

after the agreement was finalized." At the hearing, Lawrence Roberts, Interior's principal deputy assistant secretary for Indian Affairs, "cited the program's size and scope in explaining why the settlement hasn't moved any faster." Roberts said, "The department hopes to enter into as many cooperative agreements with tribes as [soon as] possible."

The Nation Sun News (4/6) reports that Rep. Don Young, the chairman of the House Subcommittee on Indian and Alaska Native Affairs, said "he was open to extending the time-frame for the Land Buy-Back Program for Tribal Nations."

LIVESTOCK BREEDER SUING BIA OVER HORSE SEIZURE. The AP (4/6) reports that livestock breeder James Leachman of Billings is suing several officials with the BIA "over the seizure and sale of more than 800 horses that he failed to relocate and care for after he lost his ranch in a foreclosure sale." Leachman filed a complaint in US District Court on Wednesday seeking \$2.2 million in damages. Leachman's complaint said the BIA "seized 820 of his horses southeast of Billings in April 2011 and sold them at auction without his consent." The BIA said "it seized the horses because they were trespassing on tribal land."

Also reporting on the story is the Billings (MT) Gazette (4/6, 174K).

SPIRIT LAKE STILL HAS VACANCIES FOR FOUR SOCIAL WORKER POSTS. The Forum of Fargo-Moorhead (ND) (4/6, 10K) reports that "the Spirit Lake social service program still has vacancies for social workers filled by personnel brought in to serve temporary stints." According to Russell McDonald, the tribe's chairman, "social service programs at the Spirit Lake Indian Reservation were taken over by the Bureau of Indian Affairs on Oct. 1, 2012, but the agency has yet to fill four social work slots." To try to fill the positions, the Spirit Lake Tribal Council "recently waived the BIA's American Indian hiring preference, McDonald said."

ADDITIONAL COVERAGE OF NAVAJO-GALLUP PROJECT CONTRACT. Additional coverage of the \$19.6 million construction contract awarded to build the Tohlakai Pumping Plant was provided by the Indian Country Today Media Network (4/4, 45K).

ADDITIONAL COVERAGE: INTERIOR MAKES FIRST TRANSFER FOR COBELL SCHOLARSHIPS. Additional coverage that Interior Department announced that "quarterly transfers of nearly \$580,000 are set to begin this week to the American Indian College Fund" was provided by the Indian Country Today Media Network (4/6, 45K).

Top National News:

OBAMA TO SIGN EXECUTIVE ORDERS ADDRESSING GENDER WAGE GAP. The announcement that on Tuesday, President Obama will sign two executive orders meant to address gender disparities in compensation for Federal contractors did not generate a great deal of national coverage. On Sunday evening, for example, none of the three network newscasts covered the story, while the Washington Post is running an AP (4/7, Kuhnhen) report inside its A section. What coverage there is this morning emphasizes the political aspect of the gender compensation issue.

According to CNN (4/7, Acosta, Merica, 77.95M), the "executive orders are just as much about politics as policy" because Democrats "feel that equal pay is a winning issue in the 2014 midterm elections." CNN goes on to report that "Democratic strategists...see equal pay as a way to galvanize the base and raise money." In the second-to-last paragraph in an article on the Senate's progress on a jobless benefits extension, the New York Times (4/7, Weisman, Subscription Publication, 9.65M) reports that Democrats "are trying to shift their focus away from issues like unemployment and the minimum wage to matters with broader appeal," including "pay equity, which they will paint not only as a women's issue but as a middle class concern, since so many dual-income homes are affected."

The AP (4/7, Kuhnhen) reports that the President, "lacking congressional support to raise wages or end gender pay disparities...is again imposing his policies on federal contractors." The AP says that on Tuesday, the President "will sign an executive order Tuesday barring federal contractors from retaliating against employees who discuss their pay with each other," an another "direct[ing] the Labor Department to adopt rules requiring federal contractors to provide compensation data based on sex and race." The AP says the orders are "in

keeping with presidents' tradition of exerting their powers on a fraction of the economy they directly control."

Politico (4/6, Dove, 73K) noted that the President will sign the executive orders "as Senate Democrats move for a show-vote on the Paycheck Fairness Act – launching Democrats' first large-scale coordinated message effort ahead of this year's midterms." Politico reports that the President "will make a speech calling on Congress to pass the Paycheck Fairness Act." And, according to Politico, Democrats "say their polls and focus groups are showing them that pressing Republicans on their opposition to the bill is quickly ticking up to be one of their most effective negative messages for persuadable voters this year."

Bloomberg News (4/7, Mattingly, 2.76M) reports that "a White House official" says that "while the executive order prohibiting federal contractors from retaliating against employees for discussing pay wouldn't require workers to discuss their pay, it may provide a tool for workers and groups looking to address pay transparency." According to Sam Frizell, in a post for TIME (4/7, Frizell, 24.1M), "the aim...is to make it easier for underpaid women to discover unfair differences in pay." Frizell also notes that "the measures would only apply to federal contractors, not to women in the broader workforce."

The Los Angeles Times (4/7, Parsons, 3.46M) reports that Deborah Vagins, the ACLU's senior legislative counsel and co-chair of the National Paycheck Fairness Coalition, said, "This is a huge victory for the one in five American workers employed by federal contractors," and "we're one step closer to achieving pay equity thanks to this White House." The Times notes that the President "plans...to appear with Lilly Ledbetter, whose suit over pay disparities became the center of a Supreme Court case and then the inspiration for a new law."

According to the Huffington Post (4/6, Bassett, 11.54M), Ledbetter "worked for nearly 20 years at Goodyear Tire and Rubber Co. before discovering that men in her same job with equal or lesser experience were earning significantly more money than she was." The Huffington Post notes that research from the American Association of University Women has concluded that after having "taken into account factors...including industry, education, college major and location...men get paid 7 percent more than women."

CNN (4/7, Acosta, Merica, 77.95M) quotes an unidentified "White House official" as saying, "If women do not even know that they are underpaid, they cannot take steps to remedy the pay gap." The "White House official" went on to note that Ledbetter "was paid less than her male co-workers for decades without realizing it until someone took a risk and slipped her an anonymous note."

The Hill (4/6, Goad, 237K) notes that Tuesday is "Equal Pay Day," which is "the name given to the point in the year at which an average woman's pay catches up to what a man doing the same job made in the previous year." The Hill also reports that on Sunday, Rep. Laura DeLauro (D-CT) said, "This is not just about women; it is about ensuring families, who are more reliant on women's wages than ever, are not being shortchanged." DeLauro added, "Collecting data is a necessary step if we are to identify and end patterns of pay disparity."

NPR (4/7, Chappell, 519K) reported that in a statement released on Saturday, the RNC said the "misleadingly named" Paycheck Fairness Act will "reduce flexibility in the workplace, and make it far easier to file frivolous lawsuits that line the pockets of trial lawyers." Reuters (4/7, Mason) previews the President's plans for Tuesday under the headline, "Obama To Launch Executive Actions On Equal Pay For Women."

Daily Caller: Women On White House Staff Are Paid 11.8% Less Than Men. Caroline May, in a piece for the Daily Caller (4/6, May, 408K), says that "according to...[an] analysis of '2013 Annual Report to Congress on White House Staff,' the most recent available data on White House pay, the White House paid women an estimated 11.8 percent less than men in 2013." The DC adds that in 2012, the "White House paid women 13 percent less than men — and in 2011, according to the Free Beacon, women were paid 18 percent less."

PRESIDENT, FIRST LADY TO ATTEND MEMORIAL SERVICE AT FT. HOOD WEDNESDAY. ABC World News (4/6, story 3, 1:50, Muir) reported that the President and First Lady "will attend a memorial for victims of the Ft. Hood shooting this week." NBC Nightly News (4/6, story 6, 2:00, Potter, 7.86M) also noted that the President on Wednesday "will return to Fort Hood for a memorial service."

The AP (4/7) reported that a spokesman for Ft. hood "confirms there will be a remembrance ceremony that day, and presidential adviser Dan Pfeiffer tells CBS' 'Face the Nation' that Obama will be there."

USA Today (4/7, Madhani, 5.82M) reports that on CBS' "Face the Nation," Pfeiffer said, "It's a terrible tragedy what happened at Fort Hood." Pfeiffer said on CBS' Face The Nation (4/6, Schieffer, 2.64M), "It's clear from what happened at Fort Hood we have to do more to ensure that our men and women feel safe when they come home. It is a tragedy what happened at Fort Hood. The President and the First Lady send their thoughts and prayers to the people on the base."

Lawmakers Call For Reevaluation Of Military's Mental Health Treatment. The New York Times (4/7, Blinder, Fernandez, Subscription Publication, 9.65M) reports that on the Sunday political talk shows, members of Congress "emphasized the need to re-evaluate mental health treatment in the military." Rep. Tim Murphy (R-PA) said on CNN, "We have this crazy standard in the United States that says unless a person is on the verge of holding a knife to their own throat or someone else, we're not going to step in. ... We need to understand the dynamics of mental illness for in the military and outside the military."

Murphy said on CNN's State Of The Union (4/6, Crowley), "It could have happened anywhere. There are special concerns on a military base but really all throughout the nation the concern is how do we handle mental illness. Quite frankly, we're not doing a very good job of it. The military has beefed up a lot of their support but there is a lot of questions involved with how this happens or how any family deals with this."

Rep. John Carter (R-TX) said on ABC's This Week (4/6, Raddatz, 2.73M), "The issue of the mental health among service members is critical. ... We have to provide more resources both at the DOD level and at the VA level, and that transition needs to be smooth, because these folks, and...you can have posttraumatic stress in an ordinary job. It depends on the level of stress you can carry. Some can carry tons, others can carry none."

Rep. Tulsi Gabbard (D-HI) said on CNN's State Of The Union (4/6, Crowley), "You're dealing with a conversation about dramatic troop cutbacks and what effect that is having on people, wondering if they are going to have an ability to provide for their families. ... It is important to make sure that people don't automatically assume that because someone is seeking help that that is an automatic correlation to violence and taking action in that way. We've got to take away that stigma."

Mullen Says Number Of Veterans Confronting Mental Health Issues Is Likely To Grow. The Washington Times (4/7, Wolfgang, 455K) reports that former Joint Chiefs of Staff Chairman Adm. Mike Mullen said Sunday that "the nation must prepare for growth in the number of veterans dealing with mental health issues and other challenges as they return from Iraq and Afghanistan." Mullen said that "it will be critical in the coming years for the U.S. to do all it can to help the nation's fighting men and women transition back into society," telling NBC's "Meet the Press," "I think our force, because it has been away so much, has not had to deal with those [mental health and other issues] as directly as they may have in the past and now that we're going to be home more, I think we're going to actually see an increased number of challenges associated with that. ... We all need to wrap our arms around the force to help us deal with those."

Mullen said on NBC's Meet The Press (4/6, Gregory, 3.08M), "I think we need to certainly take a look at securing our bases for our people. Right now, in our 13th year of war, it's a time of great stress for our military. We've been through a lot. And as we come out of these wars and come back home, I think just what I've seen in this particular example indicates the mix of characteristics and issues that are associated with that stress."

General Says Most Returning Vets Do Not Suffer From Mental Disorders. Gen. Peter Chiarelli said on ABC's This Week (4/6, Raddatz, 2.73M), "It's a horrible, horrible tragedy. I think even a bigger tragedy would be if the public at large came to the conclusion that everyone who returns from Iraq or Afghanistan, who served in the military, has these issues. We've got to understand that the vast majority of our servicemen and women have been on multiple deployments, multiple deployments, and returned home unscathed."

McCaul Supports Allowing Military Members To Carry Concealed Weapons On Base. Politico (4/6, Parti, 73K) reported in its "Politico Live" blog that during an appearance on "Fox News Sunday," House Homeland Security Committee chairman Mike McCaul "continued to push for legislation to allow members of the military to carry concealed weapons on base." McCaul said, "We should be looking at the idea of senior leadership at these bases, give them the ability to carry a weapon. ... They defend us overseas and defend our freedom abroad, so the idea that they are defenseless when they come on our home bases, I think, Congress should be looking at

that and having a discussion with the bases about what would be the best policy." McCaul added that he is "also pushing for Congress to take action to require a mental health evaluation in addition to a physical for when soldiers enlist."

McCaul said on CBS' Face The Nation (4/6, Schieffer, 2.64M), "Our hearts go out to the families and the victims. ... We do know that Mr. Lopez applied for leave of absence. He appeared to be a disgruntled employee. But at the end of the day you are dealing with a mental health illness issue, not unlike what we saw at the Navy Yard shooting. I'm disturbed about the uptick in shootings and violence at our military installations across the nation."

McCaul said on Fox News Sunday (4/6, Wallace), "Can we stop this in the future? I don't think you can ever 100% secure a military base from something like this happening. But I do think it requires a review, re-analysis of the force protection policies that we have at our military installations to see how can we better secure them? We also need to look at the possibility of whether we can hire more military police at these installations."

Kaine: Military Leaders Should Decide Whether Guns Are Allowed On Base. The Washington Times (4/7, Wolfgang, 455K) reports that Sen. Tim Kaine argued on "Fox News Sunday" that military leaders should decide whether military personnel can carry weapons on bases. Kaine said, "I trust the military leadership on this. I don't live on a military base, and I don't serve in the military. ... For those of us in Congress to say 'here's what they should do,' I worry that it would be a little political rather than really about safety or security." Kaine said that "if the military reviews the issue and determines more personnel should be armed, he would support that decision."

Kaine said on Fox News Sunday (4/6, Wallace), "Some of the recent shootings, there is always an element from the outside world coming on to the base. The two Fort Hood shootings were guns purchased out in the community and brought on in this instance, this week, against regulation, the gun that was used. ... Perimeter security is probably a place that we definitely should look. Mental health we should look. ... We do need to acknowledge that our military after 13 years of war, that's a stress."

Mental Health Experts, Soldiers Take Issue With PTSD Label For Ft. Hood Shooter. The Christian Science Monitor (4/7, Knickerbocker, 566K) reported that in the wake of last week's shooting, "many were quick to label the shooter as a soldier with post-traumatic stress disorder (PTSD)." But to soldiers and mental health experts, "this snap judgment stigmatizes combat veterans diagnosed with this signature ailment of wars in Iraq and Afghanistan, and it's a simplified and short-hand reading of a far more complicated issue." US Marine Sgt. Dakota Meyer, "who struggled with post-traumatic stress after returning from Afghanistan and who once contemplated suicide," said, "PTSD does not put you in the mind set to go out and kill innocent people. ... The media label this shooting PTSD, but if what that man did is PTSD, then I don't have it."

General Who Recently Returned From War Zone Finds Himself Comforting Victims Of Ft. Hood Shooting. The Washington Post (4/7, A1, Jaffe, 4.22M) reports in a front page story on Lt. Gen Mark A Milley, who spent more than a decade visiting hospitals in Iraq and Afghanistan "to check in on his wounded troops and offer words of encouragement." Milley had just returned to Ft. hood after a one-year tour in Afghanistan and eleven days later, the Ft. Hood shootings occurred. As a result, Milley found himself visiting the victims of the shooting and their families. The Post notes that Milley's staff called the day "battlefield circulation," which is "the same phrase that Army commanders, including Milley, routinely used in Afghanistan and Iraq to describe a day spent moving around those war zones." For Milley, "the time spent with the wounded was almost exactly the same: The same words of encouragement. The same simple gestures intended to show kindness, compassion and care."

JOBLESS BILL EXTENSION FACES UNCERTAIN FATE IN HOUSE. The New York Times (4/7, Weisman, Subscription Publication, 9.65M) reports that on Monday, the Senate is expected to "easily approve" a bill to renew extended jobless benefits that expired in December through June 1, which will send the legislation "to a divided House where Republicans favor starkly different approaches to the issue." In the House, seven Republicans are planning to send House Speaker John Boehner a letter "coinciding with Senate passage to urge him to take up the Senate bill or a similar measure." However, other Republicans are pushing to attach the Senate bill to "what they call job-creation measures," including building the Keystone XL pipeline, consolidating job training programs, or "raising employer-mandated health care coverage to employees who work 40 hours a week."

Private-Sector Employment Hit New Record In March. The CBS Evening News (4/6, story 8, 1:50, Glor)

reported that the jobs market "hit a milestone in March," as businesses added 192,000 jobs, "finally regaining all the jobs lost in the great recession." Private sector jobs "are now at a record high 116 million." CBS (Schlesinger) said, "I think is great news but we lost a lot of government jobs. So in order to get back to total payroll employment where we were before the recession we have to add over 400,000 more position, so we still do have a ways to go."

Temp Jobs Becoming Increasingly Common. The Wall Street Journal (4/7, Paletta, Subscription Publication, 5.51M) reports that temp jobs are undergoing a boom, accounting to more than 10% of all job growth since 2009. While temp employment tends to accelerate during economic downturns, the fact that the trend has continued during the recovery is considered by economists to be a sign that it is the new normal. The Journal says that the change comes as companies discovered during the recession that they could save money on wages and benefits by using temps, as well as boost their flexibility.

Krugman Blames Class Issues For Push For Lower Inflation. In his column for the New York Times (4/7, Krugman, Subscription Publication, 9.65M), Paul Krugman writes that the IMF's World Economic Outlook "makes a compelling case for raising inflation targets above 2 percent, the current norm in advanced countries." However, Krugman says that the "conventional wisdom" prevents the IMF from arguing for higher inflation. Krugman argues that only the "0.1%" of top earners would oppose such a policy, as they would be the only ones to really suffer from an inflation rate of about 4%.

Editorial Wrap-Up:

NEW YORK TIMES. "The Mentally Ill, Behind Bars." The New York Times (4/7, Subscription Publication, 9.65M) editorializes that New York City Mayor Bill de Blasio and his new correction commissioner, Joseph Ponte "have inherited a city jail system in which nearly 40 percent of the 12,000 inmates have mental illnesses – up from about a quarter just seven years ago," and yet "despite the stark shift, the system has not been redesigned to serve the complex needs of inmates with mental illnesses." The Times urges de Blasio and Ponte "to focus on three area: improving mental health care behind bars; ensuring that all mentally ill inmates are enrolled in Medicaid before they are released, so they have access to care and medication; and encouraging the growth of an important new program that steers mentally ill people who present no danger to the public into mental health programs instead of jail."

"Abusive And Frivolous Patent Suits." The New York Times (4/7, Subscription Publication, 9.65M) editorializes that "abusive and frivolous lawsuits brought by holders of patents are costing the American economy billions of dollars," but a "large bipartisan majority in the House approved a bill last year that would reduce such litigation" and the Senate, "where a similar bill is being negotiated, may soon follow." The Times contends that providing judges "more freedom to award fees in patent cases can reduce the number of abusive cases," but argues that Congress "should be careful not to adopt a standard that is so tough that it effectively closes the courthouse door to small inventors, universities and other patent holders."

"Behavior Detection Isn't Paying Off." In an editorial, the New York Times (4/7, Subscription Publication, 9.65M) argues that the TSA's "multiyear experiment in behavior detection" is not paying off and is "only worsening" the agency's "reputation for wastefulness." In November, the GAO told Congress "that T.S.A. employees could not reliably single out dangerous passengers and that the program was ineffective" and "urged Congress to limit future funding." The Times calls on Congress to "take the G.A.O.'s advice."

"A Rush To Overbuild Downtown." In an editorial, the New York Times (4/7, Subscription Publication, 9.65M) decries a package devised by developer Larry Silverstein and his allies at the Port Authority to double the level of Port Authority support Silverstein receives to build a second skyscraper at the World Trade Center site, arguing that the "rush to subsidize the next tower makes little sense at this time." Such a move "could easily create a glut of office space" when the "104-story 1 World Trade Center — is about half-leased." The Times notes that Port Authority commissioners "are divided over whether to give Mr. Silverstein a new deal," and argues that the "wisest course, for now, is to stick with the present one."

WASHINGTON POST. "The Right Call In Cuba." An editorial in the Washington Post (4/7, 4.22M) argues that critics who "object to the fact that the administration operated the Cuba [ZunZuneo] program under the auspices

of the U.S. Agency for International Development (USAID), an institution ill-suited for such a politically sensitive operation," may have a point. However, it is "one thing to question the administration's methods in Cuba and quite another to trash its goals." The Post calls the effort "an updating of the United States' admirable past efforts to pierce the Iron Curtain, and a rather innovative one at that." The Post adds that critics of the program should "spare come outrage" for the Castros, who "insist on a level of political control that has gone out of style everywhere except Havana and Pyongyang."

"Missile Malaise." In an editorial, the Washington Post (4/7, 4.22M) that the cheating on routine tests by officers at the 341st Missile Wing at Malmstrom Air Force Base "is inexcusable," but could not "happen without a larger context." The Post criticizes the "intense" pressure that make missileers believe they needed to always score perfectly on over 50 tests a year. The Post concludes that the incident shows "the Air Force needs to train effective stewards of the nuclear arsenal" who will have "integrity and a sense of mission, rather than distracted duty officers playing on their smartphones, just dying to get out of the silos."

"Blunting Special Interest Cash." In an editorial, the Washington Post (4/7, 4.22M) notes that Montgomery County, Maryland is considering a system of public financing for local elections, "aiming to use taxpayers' money to offset the clout of special-interest cash in campaigns and to promote competitive races." The Post says that while the details "may shift as the all-Democratic County Council grapples with it," the "concept deserves support." The Post says that the proposal "seems to strike the right balance," as it "offers a decent chance of blunting the influence of unions, developers and other special interests to some degree."

WALL STREET JOURNAL. "Second Climate Thoughts." In an editorial, the Wall Street Journal (4/7, Subscription Publication, 5.51M) reports that the IPCC's Fifth Assessment Report on the impact of climate change is generating a lot of headlines, but the paper says that many dire predictions are being toned down as past predictions have failed to play out. While the Journal welcomes those changes, it takes exception to the call for significant payments by wealthier countries (in the \$70 to \$100 billion range per year) to poorer countries to help them adapt to climate change.

"Afghans Step Up For Democracy." An editorial in the Wall Street Journal (4/7, Subscription Publication, 5.51M) argues that while there were some problems with Saturday's vote in Afghanistan, the overall achievement should not be understated. The Journal notes that the leading candidates are moderates who favor forming a pro-Western government, and the US has an opportunity to start anew with a leader who will sign the bilateral security agreement.

"Blacklisted At Mozilla." In an editorial, the Wall Street Journal (4/7, Subscription Publication, 5.51M) writes that Mozilla co-founder and CEO Brendan Eich's resignation is bad for corporate governance and tolerance, adding that it vindicates the paper's warning about the left personally vilifying opponents. The Journal argues this is an example of the problem with campaign-finance disclosure laws. The Journal concludes by noting that Southern racists sought to subpoena NAACP membership lists during the Jim Crow era.

Washington Schedule:**TODAY'S EVENTS IN WASHINGTON.**

White House:

PRESIDENT OBAMA — Travels to Prince George's County Maryland to host an event on the economy, meets

France; Senior Fellow, New America Foundation; Jed Ober Director of Programs, Democracy International; Moderated by Caroline Wadhams Senior Fellow, Center for American Progress. Location: 2212 Rayburn.

3 p.m. APPROPRIATIONS — Financial Services and General Government Subcommittee, Budget Hearing – Internal Revenue Service. Witness: John A. Koskinen, Commissioner, Internal Revenue Service. Location: 2359 Rayburn.

3 p.m. ENERGY AND COMMERCE — Subcommittee on Health, “Improving Predictability and Transparency in DEA and FDA Regulation.” Witness: H.R. 4299, the “Improving Regulatory Transparency for New Medical Therapies Act” H.R. 4069, the “Ensuring Patient Access and Effective Drug Enforcement Act” H.R. 4250, the “Sunscreen Innovation Act”. <http://energycommerce.house.gov/hearing/hearing-notice-subcommittee-healthsthash.5PcbHazH.dpuf> Location: 2123 Rayburn.

5 p.m. RULES — Meeting: H. Con. Res. __ Establishing the budget for the United States Government for fiscal year 2015 and setting forth appropriate budgetary levels for fiscal years 2016 through 2024. <http://docs.house.gov/Committee/Calendar/ByEvent.aspx?EventID=102116> Location: H-313 The Capitol. Other: April 5 – 7. MEDICAL MARIJUANA CONFERENCE — Medical marijuana advocacy group, Americans for Safe Access (ASA) hosts its second annual Unity Conference, “Navigating Medical Cannabis in the Mainstream.” Speakers include: Some of the featured speakers at the conference include: Sebastopol Mayor Robert Jacob, American Herbal Pharmacopoeia Executive Director Roy Upton, Pediatrician Dr. Stephen Com, M.D., cannabis researcher Dr. Jahan Marcu, PhD., University of Massachusetts Amherst Botany Professor Lyle Craker, Center for Regulatory Effectiveness Director Jim Tozzi, author Martin Lee, Criminal Justice Policy Foundation President Eric Sterling. Media RSVP: http://www.safeaccessnow.org/request_unity_press_pass CONTACT: ASA Executive Director Steph Sherer 510-872-7822 or ASA Media Spokesperson Kris Hermes 510-681-6361. 11 a.m. ASA hosts a press conference on the Capitol grounds, which will be followed by a briefing for Hill staff from Noon-1pm, and a lobby day to bring the issues of medical marijuana to Members of Congress. Location: The Mayflower Renaissance Hotel, 1127 Connecticut Ave. NW.

April 5 – 8. AACC CONVENTION — More than 2,000 community college presidents and other senior leaders are expected to attend the 94th Annual Convention of the American Association of Community Colleges (AACC). The 2014 theme is “Great Expectations: Implementing a 21st-Century Student Success Agenda.” 10 a.m. – 11 a.m. Keynote address by Vice President Joe Biden. PRESS PRE-SET TIME: 5-5:30 a.m. RESTRICTED ACCESS: 6-8 a.m. PRESS ARRIVAL TIME: 8:30-9:30 a.m. FINAL MEDIA ACCESS TIME: 9:30 a.m. Location: Marriott Wardman Park Hotel, 2660 Woodley Park Rd. NW.

HERITAGE – HEALTH CARE – CONGRESS — 12 p.m. Special Treatment: The Presidents Unlawful Health Care Handout to Congress. Speakers: Special Treatment The Presidents Unlawful Health Care Handout to Congress with Keynote Address by Ron Johnson (R-WI), United States Senator. <http://www.heritage.org/events/2014/04/special-treatment> Followed by a Panel Discussion with Andrew Kloster, Legal Fellow, The Heritage Foundation; Joseph Morris, General Counsel of the United States Office of Personnel Management, 1981-1985. Hosted b Robert Moffit, Senior Fellow, Center for Health Policy Studies, The Heritage Foundation. Location: 214 Massachusetts Ave. NE.

BPC – LONG-TERM CARE — 1 p.m. The Bipartisan Policy Center’s (BPC) Health Project’s Long-Term Care Initiative (LTCI) will release a white paper identifying the major challenges to the financing and delivery of long-term services and supports for seniors and individuals with disabilities under 65. (A final report of LTC policy recommendations will be released in late 2014.) With Sen. Tom Daschle, Co-chair, BPC Health Project; Sen. Bill Frist, Co-chair, BPC Health Project; Dr. Alice Rivlin, former White House Budget Director and Co-chair, BPC Long-Term Care Initiative; Dr. Bruce Chermof, President and CEO, The SCAN Foundation; Jason Grumet, BPC President. Location: 1225 ‘Eye’ Street NW Suite 1000, 10th floor.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “President Obama invited the US Olympic team to the White House yesterday to congratulate

them on their performance in Sochi. Of course, it got awkward when Biden told the biathletes, 'I won't rest until you guys can get married.'"

Jimmy Fallon: "And Hillary Clinton was in the news yesterday. She made some very strong remarks about the media. She said that the media treats powerful women with a double standard. Or, as it got reported in most places, 'Hillary Clinton shows off sassy new hair cut.'"

DOI in the News:**US TO PAY \$554 MILLION TO NAVAJO NATION TO SETTLE CLAIMS OVER MISMANAGED FUNDS.**

The [Los Angeles Times](#) (9/24, Lee, 4M) reports that the Obama Administration "has agreed to pay the Navajo Nation \$554 million to finalize a lawsuit stemming from claims of mismanaged funds on the reservation that date back several decades." The agreement, "which marks the largest settlement with an American tribe in U.S. history, brings to an end a long-standing dispute, with some of the claims dating back more than 50 years. 'This landmark resolution ends protracted and burdensome litigation. It will provide important resources to the Navajo Nation. And it fairly and honorably resolves a legal conflict over the accounting and management of tribal resources,'" Attorney General Eric Holder said in a statement on Wednesday. Obama Administration officials "are scheduled to join members of the Navajo Nation on Friday in Window Rock, Ariz., to sign and finalize the settlement."

The [Washington Post](#) (9/24, Horwitz, 4.9M) reports that the settlement "resolves a long-standing dispute

between the Navajo Nation and the U.S. government, with some of the claims dating back more than 50 years." The "sprawling Navajo reservation, located in parts of Arizona, Utah and New Mexico, is the largest and most populous Indian reservation, with 14 million acres of trust lands, which are leased for farming, grazing, and oil, gas and other mineral extraction," and the land "is also leased for businesses, rights-of-way, easements and housing." Holder said in a statement that the settlement "demonstrates the Justice Department's firm commitment to strengthening our partnerships with tribal nations." Under the agreement, the Navajo Nation "will dismiss its current lawsuit and forgo further litigation against the U.S. government for its historic management and accounting of Navajo funds and resources held in trust by the government."

The [New York Times](#) (9/25, Turkewitz, Subscription Publication, 9.9M) reports that the settlement "is the latest agreement made between the Obama administration and Indian tribes that say the government did not act in their best interests when managing their natural resources." The funds "the Navajos will receive exceeds agreements with other tribes by more than \$170 million; the arrangement will be formally announced Friday at the Navajo Nation headquarters in Window Rock, Ariz."

The [Albuquerque \(NM\) Journal](#) (9/25, 234K) reports that Interior Secretary Sally Jewell is "visiting the Navajo Nation to announce and sign a \$554 million settlement on Friday." Jewell will "travel to Window Rock, Ariz., to participate in a signing ceremony with tribal officials for a major tribal trust settlement agreement with the tribe."

Also providing coverage are the [Wall Street Journal](#) (9/25, Frosch, Subscription Publication, 5.62M), [Reuters](#) (9/25, Gorman), the [Cronkite News](#) (9/25), the [Tucson \(AZ\) Sentinel](#) (9/25, 1K), the [Salt Lake \(UT\) Tribune](#) (9/25, 479K), the [South Florida Sun Sentinel](#) (9/24, 739K), the [Durango \(CO\) Herald](#) (9/24, 28K), the [Baltimore Sun](#) (9/24, 857K), the [Chicago Tribune](#) (9/24, 2.26M), the [Pittsburgh Tribune-Review](#) (9/25, 687K), the [Sacramento \(CA\) Bee](#) (9/24, 646K), [TIME](#) (9/25, 23.35M), and [KOB-TV Albuquerque, NM](#) (9/25, 59K).

DESERT RENEWABLE ENERGY CONSERVATION PLAN DRAWS CRITICISM. The [E&E Daily](#) (9/24) reports that "the draft of a sweeping new plan to guide renewable energy development in the Southern California desert has met with mostly positive reviews from conservation groups that have long argued that properly siting commercial-scale projects should be a priority." However, "while it will take weeks for most to thoroughly review the multivolume, 8,000-page draft Desert Renewable Energy Conservation Plan (DRECP) covering 22.5 million acres of public and private lands in the Mojave and Colorado deserts, some groups have already begun to question components of the proposed plan." The article notes that "among the concerns are that the plan does not appear to address three proposed renewable energy projects within the DRECP planning area that would be sited near national park units and that have drawn criticism from the National Park Service, the Fish and Wildlife Service, US EPA and others." Also, "representatives of the California Wind Energy Association issued a strongly worded statement condemning the draft DRECP and its approach to wind power development in the desert."

Also providing coverage are the [Modesto \(CA\) Bee](#) (9/23, 174K), the [Inland Valley \(CA\) Daily Bulletin](#) (9/23, 99K), the [High Country \(CO\) News](#) (9/25, 74K), the [Rutland \(VT\) Herald](#) (9/24, 38K), the [Durango \(CO\) Herald](#) (9/24, 28K), the [UPI](#) (9/24), the [Renewable Energy World](#) (9/25, 14K), the [CleanTechnica](#) (9/24, 5K), and the [Alternative Energy Magazine](#) (9/24).

PRESIDENT OBAMA TO ANNOUNCE EXPANSION OF PACIFIC OCEAN PRESERVE THURSDAY. The [AP](#) (9/25, Lederman) reports that President Obama is expected to announce Thursday the expansion of the Pacific Remote Islands Marine National Monument to "six times its current size." The expansion of the sanctuary "will make roughly 490,000 square miles off limits to drilling, fishing and other actions that could threaten wildlife."

The [Washington Post](#) (9/25, Eilperin, 4.9M) reports that the move will create "the world's largest fully protected marine reserve in the central Pacific Ocean." The effort, the Post says, demonstrates the President's "increased willingness to advance a conservation agenda without the need for congressional approval."

OBAMA ADMINISTRATION SEEKS \$900 MILLION FOR LAND AND WATER CONSERVATION FUND. [The Hill](#) (9/25, Cama, 241K) reports that the Obama Administration has "pushed Congress to triple the amount of money available for the Land and Water Conservation Fund, which officials use to acquire land, build recreation facilities and maintain parks." According to the article, "the program is likely to be renewed before it expires next year, given the strong bipartisan support for conservation, but President Obama's push for a funding increase is meeting resistance." Interior Secretary Sally Jewell has "led the administration's promotional efforts for the fund, touring the country, joined at times by agency leaders, other federal officials, lawmakers, state or local officials." The article notes that "in addition to renewing the 50-year-old program, Jewell wants

access to the full \$900 million annual budget it is supposed to have."

GLEN CANYON DAM TO CELEBRATE 50TH ANNIVERSARY. The [Arizona Daily Sun](#) (9/25, 34K) reports that Glen Canyon Dam will call "attention to its 50th anniversary with a series of speeches, commemorative displays and music from noon to 4 p.m." Marie Memmer for the BOR said, "It'll be a community party. We will celebrate 50 years of power production and water management." The article notes that "anticipated featured speakers for Saturday's event at the crest of the dam" include Interior Secretary Sally Jewell and Assistant Secretary Anne Castle.

EPA UNVEILS NEW PLAN TO CONTINUE GREAT LAKES CLEANUP. The [Science Recorder](#) (9/25) reports that the EPA has "unveiled the second phase of a new plan to clean up the Great Lakes." In a press release, Gina McCarthy, the Administrator of the EPA, said that "the plan contained necessary steps to make sure that the future environment of the Great Lakes was secure." In the same press release, Assistant Secretary of the Interior for Water and Science, Anne Castle, said that "her department is committed to the cleanup of the lakes." Castle said, "The Great Lakes are a key economic driver and Interior is committed to help restore healthy watersheds in the region."

Also providing coverage are the [Latin Post](#) (9/24), the [Soundings](#) (9/25, 15K), and the [Trade Only](#) (9/25).

FOREST SERVICE PROPOSES REQUIRING PERMIT FOR MEDIA FILMING. The [AP](#) (9/24) reports that the US Forest Service is "proposing permanent new rules that would require media organizations to obtain a permit to film and shoot photographs in more than 100 million acres of the nation's wilderness." Under the plan, the agency would "consider the nature of a proposed project before approving a special use permit then charge fees of up to \$1,500 for commercial filming and photography in federally designated wilderness areas." However, Mickey H. Osterreicher, general counsel for the National Press Photographers Association, said "such rules would be a clear violation of the First Amendment and raises concerns about press freedom, including whether denying a permit would amount to prior restraint."

Also reporting on the story are [The Hill](#) (9/25, Cama, 241K) and [USA Today](#) (9/25, Urness, 5.6M).

"NEW YORK DECLARATION ON FORESTS" SEEKS TO END DEFORESTATION BY 2030. The [E&E Daily](#) (9/24) reports that "an ambitious new commitment to halve global deforestation by 2020 and end it by 2030 was announced yesterday at the UN Climate Summit." Dubbed the "New York Declaration on Forests," it is "backed by a coalition of governments, agribusinesses, environmental groups and indigenous peoples organizations." The pledge also "commits to restore forests on 150 million hectares (about 370 million acres) of degraded lands by 2020."

ADDITIONAL COVERAGE OF WILDFIRES. Additional coverage of wildfires was provided by the [AP](#) (9/24), the [AP](#) (9/25), and the [Los Angeles Times](#) (9/25, Rocha, 4M).

America's Great Outdoors:

National Park Service:

EISENHOWER MEMORIAL PLAN ADVANCES. The [New York Times](#) (9/25, Smith, Subscription Publication, 9.9M) reports that on Wednesday, the Dwight D. Eisenhower Memorial Commission "endorsed a design" for the former president's memorial "that Eisenhower family members have criticized as undignified and too costly." The panel "voted to present the design Oct. 2 to the National Capital Planning Commission, but the controversy is far from over" as the Commission is expected to be critical and legislators have been "withholding funding."

ELIZABETH DOLE CALLS FOR MUSEUM OF WOMEN'S HISTORY ON MALL. In an op-ed for the [Washington Post](#) (9/24, Dole, 4.9M), former Sen. Elizabeth Dole (R) writes that women's role in US history needs to be recognized with the construction of a National Women's History Museum on the Mall. She writes, "Until we recognize the many achievements and contributions of women to our nation's history, gender will continue to be a key factor not only in career choices but in how women feel about themselves, how men perceive them and so much more."

GRAND CANYON MAKES CUTS TO REPAY \$100 MILLION LOAN. The [AP](#) (9/25, Fonseca) reports that the Grand Canyon is "imposing millions of dollars in cuts to make a concessions contract more attractive to bidders." The article notes that "the cuts include cave monitoring, parking lot lighting, a children's nature program

and preventative search and rescue." According to Grand Canyon Superintendent Dave Uberuaga, "the money from those projects and others will help repay a \$100 million loan from the National Park Service."

Coverage by the AP was also picked up by the [Washington Post](#) (9/24, 4.9M), the [Houston Chronicle](#) (9/25, Fonseca, 2.47M), the [Sacramento \(CA\) Bee](#) (9/24, 646K), the [Minneapolis Star Tribune](#) (9/25, Fonseca, 1.48M), the [Charlotte \(NC\) Observer](#) (9/24, 572K), and [Yahoo!](#) (9/25, Fonseca, 65.94M).

AI WEIWEI BRINGS EXHIBIT TO ALCATRAZ. The [AP](#) (9/25) reports that "an exhibition by Chinese artist and activist Ai Weiwei has transformed the former island prison of Alcatraz into a tribute to the world's political prisoners, some famous and some forgotten." According to the article, "called '@ large: Ai Weiwei on Alcatraz,' the installation opens Saturday at the former maximum-security prison in the San Francisco Bay."

Coverage by the AP was also picked up by the [Washington Post](#) (9/24, 4.9M), the [Charlotte \(NC\) Observer](#) (9/24, 572K), the [Houston Chronicle](#) (9/25, 2.47M), the [Sacramento \(CA\) Bee](#) (9/24, 646K), and the [US News & World Report](#) (9/24, 661K).

CANNON BACKFIRES AT FORT MCHENRY. The [AP](#) reports that the NPS said that "an iron reproduction historic cannon exploded during a celebratory firing Sept. 16 at Fort McHenry in Baltimore, launching a 100-pound mound of metal on the cannon's rear more than 300 feet afield and sending some other debris even further." According to the article, "the cannon was filled with powder and fired during a send-off for a fleet of tall ships that visited Baltimore for the Star-Spangled Spectacular, a weeklong celebration of the Star-Spangled Banner's 200th anniversary." The article notes that "no spectators were injured during the incident, though one crew member sustained minor flash burns and cuts during the explosion."

Coverage by the AP was also picked up by the [Washington Post](#) (9/24, 4.9M), the [Charlotte \(NC\) Observer](#) (9/24, 572K), the [Houston Chronicle](#) (9/25, Linderman, 2.47M), the [Sacramento \(CA\) Bee](#) (9/24, 646K), and [Newsday](#) (9/25, 1.38M).

GERMAN MAN BANNED FROM YELLOWSTONE FOLLOWING DRONE CRASH. The [AP](#) (9/25) reports that "a German citizen who crashed a drone into a lake in Yellowstone National Park this summer has been banned from the park for a year and was ordered to pay \$1,600 in fines and restitution." Andreas Meissner of Koenigswinter, Germany, was "charged with four federal misdemeanors after a drone he was using to shoot video of a charity bicycle ride through the park crashed into Lake Yellowstone on July 18."

Coverage by the AP was also picked up by the [Washington Post](#) (9/24, 4.9M), the [Denver Post](#) (9/25, 1.12M), the [Houston Chronicle](#) (9/25, 2.47M), and the [Sacramento \(CA\) Bee](#) (9/24, 646K).

JUDGES MOVES SUIT PITTING CATTLE AGAINST RARE CACTI IN CAPITAL REEF NATIONAL PARK. The [Courthouse News](#) (9/24, 7K) reports that "environmentalists' claims that grazing cattle decimated rare cacti in the Capital Reef National Park is a local dispute that belongs in the Beehive State rather than Washington, D.C., a federal judge ruled." According to the article, "in granting a motion to transfer the case filed by Secretary of Interior Sally Jewel and the National Park Service, US District Judge Christopher Cooper said on Tuesday that he was merely following the 'well-worn path of other courts.'" Cooper "cited similar rulings over the past decade, in which three separate cases were transferred by courts in his district to Utah."

MILITARY PILOTS FLY OVER NATIONAL PARKS. [TIME](#) (9/25, 23.35M) reports that "the military services regulate flights over national parks (Air Force, Army), but those rules don't always apply when the park is part of a military training range." The article notes that "while the FAA urges civilian aircraft to fly no lower than 2,000 feet—and orders them to stay above 500 feet—such altitude restrictions don't apply to military planes." The NPS says, "Congress and the FAA have given the military authority to deviate from standard flight regulations in the training complex."

NPS RANGERS TRAIN INTERNATIONAL PARK STAFF. The [Sevierville \(TN\) Mountain Press](#) (9/25, 23K) reports that "a group of 10 female park officials from Cambodia and Thailand have been in the Great Smoky Mountains National Park this week, training with local park rangers and national law enforcement officers." The article notes that "the training is the result of a partnership between the US State Department's Global Women's Issues Office, the Maddox Jolie-Pitt Foundation and ranger instructors from the National Park Service Law Enforcement Training Center in Georgia." Jill Hawk, superintendent of the National Park Service Law Enforcement Training Center, said, "The National Park Service has an international role to play in sharing our expertise in conservation law enforcement. This program was designed, with our partners, to provide an opportunity for the women of the Lower Mekong countries in Southeast Asia to learn the concepts of law

enforcement and park management.”

Also reporting on the story is [WBIR-TV](#) Knoxville, TN (9/24, 56K).

NPS NAMES NEW ZION SUPERINTENDENT. The [St. George \(UT\) Spectrum](#) (9/24, 45K) reports that the NPS has “named a new superintendent for Zion National Park, replacing longtime park Superintendent Jock Whitworth.” Jeff Bradybaugh, “the superintendent at Bryce Canyon National Park since 2010 and a former Zion officer, will take over as the director of Zion’s operations on Oct. 20.” NPS Regional Director Sue Masica said, “Jeff is an effective communicator and manager with a proven ability as a consensus builder with external organizations and groups.”

Bureau of Land Management:

COMMISSION FOR THE PUBLIC STEWARDSHIP OF PUBLIC LANDS HOLDS MEETING. The [Deseret \(UT\) News](#) (9/25, 538K) reports that the Commission for the Public Stewardship of Public Lands “held its meeting Wednesday at the Homestead Resort in Midway at the conclusion of the Utah Association of Counties’ daylong session on public lands.” According to the article, “tasked with crafting a management and stewardship plan should the state gain control of certain federal lands within its borders, the commission sought input from county leaders on what effective land management practices might look like in their particular area.” Rural county leaders “begged” the commission “to do what they say the federal government is not — take an active management role on the lands and allow working families to make a decent living.” The article notes that “rampant bark beetle kills in national forests, overpopulation of wild horses, reduced grazing permits and a federal government beholden to special interest groups were among the litany of complaints” paraded before the commission.

SECTION OF RED ROCK CLOSED TO PUBLIC. [KLAS-TV](#) Las Vegas (9/25, 136K) reports that “a section of Red Rock Canyon National Conservation Area will be closed for five years because of last year’s Carpenter 1 fire,” the BLM announced. The bureau said Wednesday “it will close more than 5,000 acres of land, including Harris Spring Road starting at where it intersects with State Route 157 and heading west for five miles to where US Forest Service jurisdiction starts.” The BLM says “heavy rains and flash flooding in the section of land that was burned by the fire has caused washout and soil loss.”

Also reporting on the story is [Las Vegas \(NV\) Review-Journal](#) (9/25, 386K).

ADDITIONAL COVERAGE: FIVE CHARGED IN MAY ATV RIDE. Additional coverage of the charges filed against five men for their role in planning an illegal ATV ride in Utah was provided by [USA Today](#) (9/24, Hughes, 5.6M) and the [Moab \(UT\) Sun News](#) (9/25).

Fish and Wildlife Service:

JUDGE PUTS WYOMING WOLVES BACK UNDER FEDERAL PROTECTION. The [E&E Daily](#) (9/24) reports that “Wyoming’s wolf hunt set to begin next week is in jeopardy after a federal judge in Washington, D.C., yesterday reinstated Endangered Species Act protections for the iconic predator.” The decision by US District Judge Amy Berman Jackson “found Wyoming provided no reasonable assurances that it would keep wolf numbers above a minimum threshold set by federal scientists when wolves were delisted in 2012.” The FWS’ “delisting rule was ‘arbitrary and capricious,’ she said.”

The [AP](#) (9/25, Neary) reports that “responding to a stinging legal setback, the governor of Wyoming on Wednesday asked a federal judge to reverse an order ending state management of wolves and returning them to protections under the Endangered Species Act.” Gov. Matt Mead “on Wednesday started the process of making the state’s minimum wolf population pledge legally enforceable.” Mead “signed and filed an emergency rule to that effect which could last up to 240 days.”

Also providing coverage are [KAML-FM](#) Gillette, WY (9/25, 1K) and [KGWN-TV](#) Cheyenne, WY (9/25, 519).

FWS PRESENTING PARTNERS FOR CONSERVATION. [WTVB-TV](#) Columbus, MS (9/25, 7K) reports that the FWS is “teaming up with Wildlife Mississippi and Mississippi State to present Partners for Conservation.” According to the article, “people from all across the nation toured Amory today for the Partners for Conservation program to recognize Martha Dalrymple.” Dalrymple’s “been selected because of her efforts in conserving the land with the way she handles her trees and her cattle.” The article notes that “the tour continues through Friday

which concludes the Mississippi section of Partners for Conservation.”

SHORT'S BLADDERPOD ON ENDANGERED LIST. The [AP](#) (9/25) reports that the FWS announced recently protections for the Short's Bladderpod. The article notes that the “Short's Bladderpod is the third Indiana plant to be listed as federally endangered, joining Short's goldenrod and running buffalo clover.”

ADDITIONAL COVERAGE OF SETTLEMENT WITH CENTER FOR BIOLOGICAL DIVERSITY. Additional coverage of the settlement with the Center for Biological Diversity was provided by the [AP](#) (9/25).

BIOLOGIST DISMISSES COLLABORATING ON SAGE GROUSE. In an op-ed for the [Missoulian \(MT\)](#) (9/25, 83K), Erik Molvar, a wildlife biologist with WildEarth Guardians, writes that “as pressure mounts on the oil and ranching industries to protect” the greater sage grouse “and the landscape it inhabits, some are arguing that collaboration – not the law and not the science – is the solution.” But Molvar argues that “collaboration is the elixir of the status quo, giving veto power to each entrenched interest.” He claims that “for the sage grouse, the status quo is a path to extinction, the result of ongoing habitat loss and populations declining toward zero.”

US Geological Survey:

USGS' PATUXENT WILDLIFE RESEARCH CENTER RAISES WHOOPING CRANES. The [Environment News Network](#) (9/25, 260) reports that “four whooping crane chicks raised in captivity began their integration into the wild Saturday as part of the continuing effort to increase the wild population of this endangered species.” The cranes, hatched and raised by their parents at the USGS' Patuxent Wildlife Research Center, were released on the FWS' Necedah National Wildlife Refuge. The article notes that “the chicks, about six-months old, are part of an experimental rearing and release method referred to as ‘parent-rearing.’”

USGS STUDY SHOWS VALUE OF LANDSAT. The [Directions Magazine](#) (9/25, 114K) reports that “a recent White House-led assessment found that Landsat is among the Nation's most critical Earth observing systems, second only to GPS and weather.” A new USGS study, “Landsat and Water — Case Studies of the Uses and Benefits of Landsat Imagery in Water Resources, provides examples of why Landsat is so valuable.”

Securing America's Energy Future:

Renewable Energy:

LAWSUIT CHALLENGES BIA'S APPROVAL OF WIND PROJECT IN CALIFORNIA. The [E&E Daily](#) (9/24) reports that “a conservation group and two private landowners are suing the Interior Department and the agency's Bureau of Indian Affairs for approving the expansion of a California wind farm in alleged violation of environmental laws and despite objections from federal and state wildlife officials who warned of significant impacts to eagles.” According to the article, “the group Protect Our Communities and the two landowners filed a federal lawsuit today in US District Court for the Southern District of California, claiming BIA's record of decision last year approving a lease that authorizes the second phase of the Tule Wind Energy Project in eastern San Diego County threatens golden eagles and other migratory birds, such as red-tailed hawks.” The article notes that “the 33-page complaint – which names as defendants BIA Director Michael Black and Interior Secretary Sally Jewell, among others – claims that BIA was obligated by the National Environmental Policy Act (NEPA) to conduct additional environmental studies to evaluate new information about impacts to eagles that postdate the Bureau of Land Management's approval in 2011 of the 65-turbine first phase of the Tule Wind Energy Project.”

Onshore Energy Development:

BLM DRAWS CONTROVERSY FOR PROPOSED DRILLING SITES IN UTAH. The [Salt Lake \(UT\) Tribune](#) (9/25, 479K) reports that “the BLM's latest package of parcels up for oil and gas leasing encompasses much of the southern Utah town of Bluff and surrounding areas precious to the Hopi Indian Tribe, opening the agency up to claims of cultural insensitivity.” The bureau “is taking public comment on the proposed sale of minerals administered by its Moab and Monticello field offices through Oct. 20.” Hopi leaders have “warned public land managers the lease sale is jumping a step.” Terry Morgart from the Hopi Cultural Preservation Office says “cultural resources in many of the parcels have not yet been sufficiently inventoried.”

REPORT SAYS MINE PERMITTING SYSTEM IS “OUTDATED, INEFFICIENT”. The [E&E Daily](#) (9/24)

reports that "the US has an 'outdated' and 'inefficient' mine permitting system that could be a barrier for economic development in downstream industries, according to a report released today by the National Mining Association." The article notes that "the report, prepared for NMA by SNL Metals & Mining, an arm of SNL Financial LC, is part of the lobby group's ongoing efforts at persuading Congress to reform mine permitting, particularly for hardrock mineral extraction on public lands." The report says, "A key finding of this report relates to a gross structural mismatch between domestic mineral supply and demand. Although the United States is a major mining country, it enjoys a much higher global ranking as a manufacturer than it does as a miner."

BLM MOVING FORWARD WITH NEW MINERAL RESOURCE REGULATIONS. [The Hill](#) (9/25, Devaney, 241K) reports that the BLM is "moving forward with new mineral resource regulations." The bureau is "raising the fees it charges for companies to participate in the minerals program."

REPORT: EAGLE FORD SHALE POISED TO OVERTAKE BAKKEN IN OIL PRODUCTION. The [E&E Daily](#) (9/24) reports that "the Eagle Ford Shale in South Texas has become a magnet for 'the most capital investment of any shale field in the US,' according to an economic survey released yesterday." Researchers at the University of Texas, San Antonio say "oil and gas activity in the Eagle Ford is continuing to expand, equating to a huge economic impact to Texas counties in and around the giant shale oil, gas and condensates play." Thomas Tunstall, director of UTSA's Institute for Economic Development and "head of the Eagle Ford economic research project, said the pace of production growth has been so swift and strong in that region that it's reasonable to expect the Eagle Ford will soon overtake the Bakken Shale in terms of daily oil flow."

OIL EXPORT DEBATE CRITICIZED FOR NOT INCLUDING REFORM OF FEDERAL LAND LEASING. In an op-ed in [The Hill](#) (9/24, Zimmerman, 241K) Greg Zimmerman, policy director at the Denver-based Center for Western Priorities, writes that if the federal government is going to allow the export of US crude, it should also reform the rents and royalties it charges oil and gas companies for the right to drill on federal lands "in order to make sure taxpayers get a fair return." Zimmerman supports a policy shift to loosen energy export restrictions, however, he is against "giving oil and gas companies a sweetheart deal on public lands," particularly if they are going to export more and more oil and gas abroad.

Offshore Energy Development:

BIG OIL LOBBY WASHINGTON OVER ARCTIC DRILLING RULES. The [National Journal](#) (9/24, Geman, Subscription Publication, 626K) reports that efforts by "oil giants Royal Dutch Shell and ConocoPhillips" to shape upcoming standards for drilling operations in the Arctic Seas are part of a "high-stakes political and legal battle." The oil companies are concerned that the new federal regulations could be too rigid, and have requested that the White House and Interior Department "adopt performance standards rather than prescriptive technology standards." Environmental groups who oppose Arctic drilling have criticized Shell for its "call for leeway under the rules."

Also providing coverage the [FuelFix](#) (9/24, 7K) and the [Anchorage \(AK\) Dispatch News](#) (9/24, 146K).

JUDGE DENIES BP'S REQUEST TO RECOVER DEEPWATER HORIZON SPILL CLAIM PAYOUTS. The [New York Times](#) (9/25, Schwartz, Subscription Publication, 9.9M) reports that on Wednesday US District Judge Carl Barbier denied a request by BP to recoup overpayments to some Deepwater Horizon spill claimants "under an old accounting method." Last year BP was successful in arguing that the old methods "were too generous," and Judge Barbier ordered claims processors to "adopt an accounting procedure more to the company's liking." However, Wednesday Judge Barbier ruled that the earlier claims "were paid under the settlement's terms as it was interpreted by the claims administrator and the court at that time."

TENGASCO CHALLENGES FINE OVER MISSING SAFETY RECORDS. The [Law 360](#) (9/25, 18K) reports that "oil and gas company Tengasco Inc. has sued the US Department of the Interior, saying the agency unfairly upheld a \$386,000 fine imposed after the company failed to turn over certain safety records following a 2011 platform inspection." The company "claims that the fine was unfair because the alleged infraction amounted to nothing more than a temporary record-keeping violation that posed no actual threat of harm, according to the complaint, filed Monday in Louisiana federal court."

Tackling America's Water Challenges:

BOR ENGINEERS INSPECT "SLOUGHING" OF STEINAKER DAM FACE. The [Salt Lake \(UT\) Tribune](#) (9/25, 479K) reports that BOR engineers were "dispatched to eastern Utah's Steinaker Dam on Wednesday to

investigate reports of sloughing on the 162-foot-high earthen structure's riprap facing was reported." The article notes that "the dam, located 3.5 miles north of Vernal, was not deemed in danger of failing." BOR spokesman Matt Allen "on Wednesday afternoon could not immediately detail what, if any repairs would be needed at the dam."

DELTA FARMERS MAY NEED TO MEASURE WATER. The [Stockton \(CA\) Record](#) (9/24, 121K) reports that "accused of stealing water released from upstream reservoirs, more than 1,000 Delta farmers may soon be required to report exactly how much water they've been diverting — a request that their attorneys argue could be burdensome and unnecessary." The government says "it merely wants a better accounting of how much water is being used by the farmers." Paul Fujitani with the BOR said, "I think additional information would be helpful for us to determine what is happening out there in the Delta." However, "attorneys for Delta farmers called for formal hearings to resolve the larger issue of whether the diversions are illegal, which could make the question of how much water those farmers are taking a moot point."

KLAMATH FISH MONITORING CONTINUES FOLLOWING RELEASE OF TRINITY WATER. The [Weaverville \(CA\) Trinity Journal](#) (9/25, 12K) reports that "the emergency release of a large volume of water to the Trinity River to avert fish die-off in the lower Klamath River is completed, and the release is back to normal for this time of year." According to the article, "after the ich parasite was found in chinook salmon in the lower Klamath, the federal Bureau of Reclamation started increasing the flows Sept. 16, building up from the normal release for this time of year of 450 cubic feet per second to 3,400 cfs the following day." On Sept. 22, the BOR "began reducing the flows to reach 450 cfs this morning, Sept. 24."

Empowering Native American Communities:

TREATY SEEKS FREE FLOW OF BISON BETWEEN US, CANADIAN TRIBAL LANDS. The [E&E Daily](#) (9/24) reports that "eleven American Indian tribes and Canadian First Nations yesterday inked the first inter-tribal treaty in more than a century to repopulate the Rocky Mountains and Great Plains with the bison that once sustained their forebears." According to the article, "at a daylong ceremony on Montana's Blackfeet Reservation, tribal leaders from Montana and Alberta signed the 'Buffalo Treaty,' which hopes to ultimately allow bison to traverse the international border."

INDIAN EDUCATION SUMMIT TO BE HELD THIS WEEKEND. The [Yankton \(SD\) Press & Dakotan](#) (9/25, 25K) reports that "the 2014 Indian Education Summit will be held Sept. 28-30 at the Best Western Ramkota Hotel in Pierre." According to the article, "keynote speakers include Brian Frejo and John Gritts." The summit will "also feature a school board panel, student-led discussions and a speaker from the Bureau of Indian Education."

Top National News:

OBAMA URGES OTHER NATIONS TO JOIN FIGHT AGAINST TERRORISM. Media reports on the President's speech at the UN generally cast it as a significant departure from previous Obama rhetoric on foreign policy and terrorism. Particularly on print, the speech is said to represent a break from the President's long-held insistence that the US ought to shift to a more modest foreign policy focused on the employment of soft power rather than military might.

Typical of much of this morning's coverage is a front-page article in the [New York Times](#) (9/25, A1, Landler, Subscription Publication, 9.9M), which reports that the President "charted a muscular new course for the United States in a...bluntly worded speech" and "spoke more like a wartime leader." The Times describes the President as a "once-reluctant warrior now apparently resolved to waging a twilight struggle against Islamic extremism for the remainder of his presidency." As do many other outlets, the Times says the President's rhetoric was "starkly different" from that which he used in his address to the UN General Assembly last year "two weeks after calling off a missile strike on Syria." The Times says a year ago, the President "offered a shrunken list of American priorities in the Middle East and showed little appetite for the charged rhetoric or interventionist policies of his predecessor, George W. Bush."

Again on Wednesday, all three networks led their newscasts with updates on the US war against ISIL, but only the [CBS Evening News](#) (9/24, lead story, 5.08M) covered President Obama's address to the UN in its lead story, while the other newscasts concentrated on new information regarding the threat from Khorasan. The three networks combined devoted about 22 minutes of air time to reports related to the US campaign in Syria, about 25% less than on Tuesday evening, and there was some notable disparity in the attention given to the war by the three networks. The CBS Evening News gave the first ten minutes of its broadcast, about half its air time,

to war reports, while NBC Nightly News gave those stories eight minutes and ABC World News moved on to other topics after only about four minutes.

[Reuters](#) (9/24, Holland) quotes the President as saying on Wednesday at the UN: "The only language understood by killers like this is the language of force. So the United States of America will work with a broad coalition to dismantle this network of death."

Dana Milbank, in a column titled, "In UN Speech, Nobel Peace Prize Laureate Obama Makes Case For War" for the [Washington Post](#) (9/25, 4.9M) suggests that the President's phrase "network of death" is a "linguistic heir" to President Bush's 2002 reference to an "axis of evil." On [CNN's The Situation Room](#) (9/24, 554K), Jim Sciutto said the world was introduced to "a new and more aggressive foreign policy for a President until now defined by his decisions to end wars in Iraq and Afghanistan, and avoid military action in others, including, until now, in Syria."

However, the [AP](#) (9/25, Pace, Lederer) notes that the President also "declar[ed] that he has no intention of sending US troops to occupy foreign lands," and "pressed Middle Eastern nations to look beyond military action and take steps to reject the ideology that has spawned groups like" ISIL.

In the lead story for the [CBS Evening News](#) (9/24, lead story, 5.08M), Scott Pelley said that as "the US and its Arab allies are keeping up the aerial assault on ISIS terrorists in Syria," the President "asked the world to join the war." Correspondent Major Garrett reported that on Wednesday at the UN, the President "warned ISIS soldiers to leave the battlefield while they can." According to Garrett, "Five Arab nations have joined the US...yet Mr. Obama pressed them to do more," and "scolded countries that have ignored or sometimes even facilitated extremist activities." Garrett went on to report that "the President's top advisers admit the President was at a crossroads...and he needed this speech to compensate, they say, for a summer of sometimes failing to project strong US leadership."

[McClatchy](#) (9/24, Kumar, Subscription Publication, 27K) also says the President "had been criticized for months for not having a strategy as one global problem after another erupted." McClatchy adds that "in recent weeks," the President "has taken a stronger role in foreign issues, earning praise from even some of his critics."

According to [Bloomberg News](#) (9/24, Runnigen, 1.94M), "Any global leaders who arrived at the UN expecting to debate the merits of avoiding a conflict" in Syria "instead found themselves trumped by an American president who had already decided to strike."

About five-and-a-half minutes into [NBC Nightly News](#) (9/24, story 3, 2:35, Williams, 7.86M), after segments on the US airstrikes in Syria and the threat from Khorasan, Brian Williams reported that the President had "delivered a high stakes address to the world community...making the case for more nations to join in this fight." Correspondent Chris Jansing went on to say that "this was a very different President Obama than we saw just a year ago here at the UN, when he was talking about moving the US away from a perpetual war footing."

In the middle of an [ABC World News](#) (9/24, lead story, 4:00, 5.84M) segment on the US airstrikes in Syria, David Muir briefly noted that on Wednesday, President Obama was "chairing the U.N. Security Council meeting, calling ISIS and the terrorists being targeted killers who only understand force." Correspondent Martha Raddatz said the President was "using his toughest talk yet" about ISIL in his address to the UN.

The [Washington Post](#) (9/25, A1, Nakamura, 4.9M) says that on Wednesday, the President was "seeking to reassert American leadership abroad." The Post describes the President's address as a "forceful, and at times searing, critique of the threats to international order that he said required collective attention and action from the more than 150 countries assembled." The Post also says "the tone of the remarks contrasted sharply with Obama's address here last year when he said that 'the world is more stable than it was five years ago.'"

[USA Today](#) (9/24, Jackson, 5.6M) also reports that the President "called on the world's nations and religions – including Islam – to confront violent extremism among their citizens and adherents, calling it 'a cancer' that threatens all people." According to USA Today, the President said "the Muslim community must also address violent extremists who are perverting their religion."

The [Huffington Post](#) (9/24, Bendery, 11.54M) says the President "conveyed a strong message of collectivism," and notes that he "used the word 'collectively' four times; 'together' 12 times; and 'cooperation' four times." But the [Washington Times](#) (9/25, Boyer, 373K) notes that the President "was not interrupted once by applause" as "foreign heads of state showed no noticeable reaction and gave the president a brief, polite ovation at the end of

his 40-minute address."

According to [Roll Call](#) (9/24, Subscription Publication, 90K), because Congress has not taken action on a range of issues, "It's Obama's policies that will carry the day – or not – on Ukraine, Iran's nuclear ambitions, the Ebola epidemic, or fighting ISIS." But Roll Call says "this week, at least, the president's soaring rhetoric hasn't been clipped by the fact his agenda has crashed and burned in Congress again and again and again."

Author James Robbins, in an op-ed for [USA Today](#) (9/25, 5.6M), notes that in his UN address on Wednesday, the President "said the word 'war' more than 20 times without ever saying that the United States was at war" with ISIL. Robbins contends that "if Obama wants to continue to claim the vast array of powers that he has used to justify various aspects of his approach to counterterrorism...he should not distance himself from the idea that this is war."

The Drudge Report's Joe Curl, in his column for the [Washington Times](#) (9/25, 373K), takes issue with the President for saying on Wednesday that "Islam teaches peace." According to Curl, "Islam and the holy Koran on which Muslim militant groups like al Qaeda and the Islamic State base their actions...call for the extermination of all who do not follow Islam" and "demand that followers kill anyone who leaves the religion."

Britain Will Not Join Attacks On ISIL In Syria, But Will Vote On Strikes In Iraq. The [Washington Post](#) (9/25, Witte, Adam, 4.9M) reports that "after weeks of largely staying on the sidelines...Britain moved toward a more direct military intervention Wednesday when Prime Minister David Cameron recalled Parliament to debate airstrikes." According to the Post, the British Parliament "will probably" approve "British strikes against Islamic State targets in Iraq, following a request for assistance from the Iraqi government." However, the Post notes that MPs will not even "consider an expanded campaign that would also include targets in Syria."

Dutch To Launch Airstrikes Against ISIL In Iraq, Deploy 130 Military Advisers. The [AP](#) (9/25) reports that the Dutch government "is sending six F-16 fighter jets to strike at the Islamic State extremist group in Iraq," and "also will send about 130 military trainers to Iraq to school Iraqi and Kurdish fighters." However, Deputy Prime Minister Lodewijk Asscher said that the Dutch government "doesn't currently see an international mandate for joining airstrikes in Syria."

UNSC Approves Resolution Targeting Those Who Fund Or Otherwise Enable Terrorists. The [AP](#) (9/25, Pace, Lederer) reports that "in a rare move," the President "also chaired a meeting of the U.N. Security Council where members unanimously adopted a resolution requiring all countries to prevent the recruitment and transport of would-be foreign fighters preparing to join terrorist organizations such as the Islamic State group."

The [Washington Post](#) (9/25, Gearan, 4.9M) reports that the President "told the council in an unusual session that some 15,000 fighters from more than 80 nations have traveled to Syria and Iraq to join the Islamic State or the al-Qaeda affiliate known as Jabhat al-Nusra." The Post says the resolution approved by the UNSC "strengthens the legal framework for international action in response to the threat posed by foreign fighters," and "tells nations to take steps to prevent suspected foreign terrorist fighters from entering or passing through their territories."

Deputy National Security Adviser Ben Rhodes said on [CNN's Situation Room](#) (9/24, 554K), "We have to reject the extremism, ideology, the financing, the sectarianism, that creates conditions for terrorism – that has been a consistent message" from the President.

The [New York Times](#) (9/24, Subscription Publication, 9.9M) reported that on Wednesday, Human Rights Watch "warned...that the adopted resolution risked 'repeating many of the mistakes of the post-September 11 era.'" and "does nothing to prevent governments from carrying out abusive counterterrorism policies and practices."

The [New York Times](#) (9/25, Subscription Publication, 9.9M), in an editorial, says the resolution "would give...political cover" to "American allies in the Middle East," including Turkey, which the Times says "needs to tighten controls on its border," as well as Saudi Arabia and Qatar, who "need to stop clerics and others from raising money for extremist groups." But the Times also says the "the potential for exaggerating the terrorism threat and overreaching with criminal laws that encourage the use of racial profiling to target some citizens, like Muslims, or persecution of adversaries is very real."

Obama Criticized For Praising Muslim Cleric. According to the [Washington Free Beacon](#) (9/25, Kredo, 81K), on Wednesday, the President "favorably quoted and praised" Sheikh Abdallah Bin Bayyah, "a controversial Muslim cleric whose organization has reportedly endorsed the terror group Hamas and supported a fatwa condoning the murder of US soldiers in Iraq." The Beacon quotes the President as saying, "Look at the new

Forum for Promoting Peace in Muslim Societies – Sheikh bin Bayyah described its purpose: "We must declare war on war, so the outcome will be peace upon peace." The Beacon says that last year, "outrage ensued after [Bayyah] was reported to have met with Obama's National Security Council staff at the White House."

IN UN SPEECH, OBAMA POINTS TO FERGUSON TO NOTE RACIAL TENSIONS IN US. [Politico](#) (9/24, Epstein, 977K) reports that in a speech to the United Nations on Wednesday that dealt mainly with the ISIL threat, the President also spoke "about the need to reduce racial tensions and respect human rights." Obama "pointed to the shooting of" Michael Brown in Ferguson, MO last month "as an example of America's own failure to honor its moral values." In what Politico calls "an unusual reference to domestic US shortcomings during a speech devoted to international issues," Obama "noted that the death of 18-year-old African-American Michael Brown and the ensuing unrest had drawn worldwide attention even as major crises raged elsewhere on the planet."

Josh Gerstein of [Politico](#) (9/25, Gerstein, 977K) says the President "was so intent on avoiding the image of the US as a moral hegemon that he surprised many in the audience by bringing up the recent shooting and subsequent racial strife in Ferguson." According to Gerstein, a White House "aide" said the President "referenced Ferguson to make clear to his audience that 'we're not perfect.'"

Fresh Protests Rock Ferguson Over Memorial Fire. The [Christian Science Monitor](#) (9/24, Jonsson, 426K) reports that on Tuesday night, "some 200 protesters on West Florissant Avenue again pushed Ferguson, Mo., over the edge of anger and into looting, rock-throwing, and arrests," while several miles away "the members of the Ferguson City Council were wrestling with the very decisions that some say have pushed members of the city's black community into believing that they have no choice but to loot, throw rocks, and be arrested." The Monitor notes that one of the "three makeshift memorials for Michael Brown, the unarmed black teenager killed by a white cop last month, caught fire Tuesday," and the "immediate reaction of some residents was suspicion. 'We know it wasn't an accident,' one protester told KSDK-TV."

OBAMA SAYS "EVERY MAJOR POWER" MUST FIGHT CLIMATE CHANGE, DURING UN ADDRESS WEDNESDAY. The [Hill](#) (9/24, Barron-Lopez, 241K) reports "President Obama said 'every major power' needs to battle climate change during his address to the United Nations (UN) General Assembly on Wednesday." On the day "after his forceful speech during a U.N. climate summit on Tuesday, Obama wove the issue again into his remarks delivered to the general assembly." Obama stated, "America is pursuing ambitious reductions in our carbon emissions, and we have increased our investments in clean energy. ... We will do our part, and help developing nations to do theirs. But we can only succeed in combating climate change if we are joined in this effort by every major power. That's how we can protect this planet for our children and grandchildren."

Ban Touts Achievements At Climate Summit. [Fox News](#) (9/24, 6.72M) reports U.N. Secretary General Ban Ki-moon praised "the achievements of world leaders attending the Climate Summit in New York this week, touting, in particular, initiatives around carbon pricing and cutting emissions." In his Chair's Summary of the event released late Tuesday, Ban said, "Today's Summit has shown that we can rise to the climate challenge." Ban said in the document "that world leaders committed to limit global temperature rise to less than 2 degrees Celsius from pre-industrial levels." He wrote, "Many leaders called for all countries to take national actions consistent with a less than 2 degree pathway and a number of countries committed to doing so."

Bachelet: Climate Change, Gender Equality Are Linked. The [Christian Science Monitor](#) (9/24, Anderson, 426K) reports that the head of UNWomen said this week that "women must take a greater leadership role in fighting climate change because its effects fall hardest on women." Executive director of the agency Phumzile Mlambo-Ngcuka said, "Women are on the frontlines, bearing the brunt of climate change." Earlier this week, she spoke "at the start of a discussion focused on the needs of women in terms of climate policy." In her keynote remarks Chile's President Michelle Bachelet said that "climate change and gender equality are inextricably linked."

Indian Official Has No Plans To Offer Cuts To GHG Emissions At Next Year's Climate Summit. The [New York Times](#) (9/25, Davenport, Subscription Publication, 9.9M) reports that "in a blow to American hopes of reaching an international deal to fight global warming," the new environment minister in India, Prakash Javadekar, "said Wednesday that his country would not offer a plan to cut its greenhouse gas emissions ahead of a climate summit next year in Paris." In an interview, Javadekar said "that his government's first priority was to alleviate poverty and improve the nation's economy, which he said would necessarily involve an increase in emissions through new coal-powered electricity and transportation." He went on to place "responsibility for what scientists call a coming climate crisis on the United States, the world's largest historic greenhouse gas polluter, and dismissed the idea that India would make cuts to carbon emissions."

Fein: Most UN Initiatives Are "Pointless." Columnist Bruce Fein writes in the [Washington Times](#) (9/24, Fein, 373K) that the UN "acts in a fantasy theater divorced from earthbound politics. Everything it does other than humanitarian endeavors — like giving a podium to endless blather by national leaders — are pointless" and "the current initiative to negotiate global reductions in greenhouse gas emissions to diminish global warming is emblematic."

Van Noppen: Small Island States Most At Risk From Climate Change. Trip Van Noppen, president of Earthjustice, writes in a piece for [USA Today](#) (9/25, Van Noppen, 5.6M) "for the citizens of the nations represented by the Alliance of Small Island States (AOSIS), climate change is not an abstract threat" and "they face immediate danger today. Low-lying islands like Tuvalu and Vanuatu in the Pacific and the Maldives in the Indian Ocean are at risk of becoming uninhabitable as sea level rises in the coming decades." Van Noppen concludes that "global leaders must find the political will to act now, before it is too late — for all of us."

Editorial Wrap-Up:

NEW YORK TIMES. "A New Focus On Foreign Fighters." The [New York Times](#) (9/25, Subscription Publication, 9.9M), in an editorial, says the UN Security Council resolution aimed at stemming the flow of foreign fighters "would give...political cover" to "American allies in the Middle East," including Turkey, which the Times says "needs to tighten controls on its border," as well as Saudi Arabia and Qatar, who "need to stop clerics and others from raising money for extremist groups." But the Times also says the "the potential for exaggerating the terrorism threat and overreaching with criminal laws that encourage the use of racial profiling to target some citizens, like Muslims, or persecution of adversaries is very real."

"Long Lines At Minority Polling Places." The [New York Times](#) (9/25, Board, Subscription Publication, 9.9M) editorializes that some "of the longest lines on Election Day occur at polling places in black and Hispanic neighborhoods," and a new report by the Brennan Center for Justice "says that's not a coincidence." The report finds that in the three states "with the longest lines in 2012, precincts in minority neighborhoods were systematically deprived of the resources they need to make voting operate smoothly — specifically, voting machines and poll workers." The report's "data show the growing need for federal supervision of voting rights, though ensuring supervision is harder than ever since the Supreme Court removed the teeth from the Voting Rights Act of 1965 last year," and adds that many state and local officials "see voting as a partisan game they can manipulate and will continue to do so unless challenged in court, or until Congress steps in and makes voting a universal right that cannot be infringed."

"Warnings On Big Medical Bills." An editorial in the [New York Times](#) (9/25, Board, Subscription Publication, 9.9M) notes that it is "not an uncommon situation" for patients to receive unexpectedly high bills for medical services and argues that more states should follow New York's example and pass protections for consumers to guard against the problem.

WASHINGTON POST. "Prioritizing The Fight Against Ebola." In an editorial, the [Washington Post](#) (9/25, 4.9M) urges the government, researchers and the private sector to make the development of therapies and vaccines against Ebola "a high priority in case the worst-case scenarios come true."

"Obama Recommits To Democracy." An editorial in the [Washington Post](#) (9/25, 4.9M) argues that while "democracy has been in retreat around the world" for more than a decade, the President this week "sounded something like the beginning of a counterattack." In remarks to the Clinton Global Initiative and the UN General Assembly this week, the President "mentioned democracy sparingly," but he "left no doubt about his meaning when he pledged 'to stand with the courageous citizens and brave civil society groups who are working for equality and opportunity and justice and human dignity all over the world.'" The Post notes that the President's pledge that we "are heirs to a proud legacy of freedom, and we are prepared to do what is necessary to secure that legacy for generations to come," would be "a sound foundation for a reinvigorated, and more successful, foreign policy over the coming 28 months," and urges him to "act on his resolution when he meets with Egypt's dictator" on Thursday.

"The Goal Of Justice." The [Washington Post](#) (9/24, Board, 4.9M) editorializes that five times in the last five years, the Washington, DC US Attorney's office "has admitted to mistakes that resulted in wrongful convictions," so "it is a promising development that a special unit is being established to determine whether others have been similarly wronged" and to "come up with recommendations to fix the problems that cause wrongful convictions so as to prevent future miscarriages of justice." DC US Attorney Ronald C. Machen

announced the creation of a conviction integrity unit within his office earlier this month "that will identify and investigate cases in which there may have been wrongful convictions and recommend practices for police and prosecutors to avoid future errors." The Post notes that several cities "have established similar units," and that experts say the success of the units "depends on setting up rules that allow for the useful exchange of information and clear protocols on how cases will be reviewed and evidence evaluated."

WALL STREET JOURNAL. "The Big Money Democrats" In an editorial, the [Wall Street Journal](#) (9/25, Subscription Publication, 5.62M) says that the major untold story of this election cycle is the fact that Democrats are significantly out-raising Republicans, boosted by the major donors and special interest they often defy. For example, the DSCC has brought in \$111 million this cycle, \$30 million more than the NRSC, while Senate Majority Leader Harry Reid's Senate Majority super PAC has brought in \$32 million, with two-thirds of its donations topping \$500,000.

"The Latest Mideast Breakdown." An editorial in the [Wall Street Journal](#) (9/25, Subscription Publication, 5.62M) blames the Administration's failure to oversee a peaceful transition in Yemen for the fact that the Iran-backed Houthi rebels have seized most of Sana'a, and argues that the US may be forced to help Saudi Arabia in its efforts to help Yemen's legitimate government retake power.

"Germany's Coal Binge." In an editorial, the [Wall Street Journal](#) (9/25, Subscription Publication, 5.62M) argues that Germany is on pace to miss its goal for reducing carbon emissions by 2020 as a result of its green energy mandates which have driven utilities to coal plants for power generation.

Notes: Launch windows subject to change.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

David Letterman: "Here's something bad about autumn – how about the traffic. Did anybody have to get around town yesterday or today? I'll tell you, it's crazy. It's because the UN General Assembly is back in session. President Obama is in town. It's like Chris Christie – every major artery is clogged."

David Letterman: "The UN General Assembly is open – 135 representatives from countries all over the globe, from Great Britain, of course, David Cameron. From France, François Hollande. From North Korea, Dennis Rodman. They're all here."

David Letterman: "Did you see...this picture of President Obama getting off the helicopter? I think it's – is it Marine One? Is that what they call it, the helicopter? And he's got a cup of coffee in his hand, and there are the Marines, the guard there, waiting as he gets off, and he salutes the marine guards with a cup of coffee. And people are now...referring to it as 'The Starbucks Salute.' I think that's great. What other country – every time our president screws up, it's sponsored."

David Letterman: "But President Obama addressed the UN the same day, coincidentally, Chris Christie addressed the International House of Pancakes."

David Letterman: "It's quite a responsibility for the President of the United States, addressing the UN General Assembly. And yesterday he spoke on climate change. Today, he spoke on terrorism. And tomorrow he talks about how to buy real estate with no money down."

David Letterman: "I think the speech was well received. Obama's speech was interrupted 10 times for applause, three times for guys hopping the fence."

Jimmy Fallon: "President Obama, he is facing criticism over an incident yesterday, where he was holding a cup

of coffee in his hand and he used that same hand to salute a Marine. Though with all that's going on in the world, I'm surprised he didn't salute with a bottle of Jack Daniels and a cigarette in the other hand."

Jimmy Fallon: "Obama had a coffee cup in his hand while he was saluting a Marine, which got even worse when Biden did the same thing with a Capri Sun."

Jimmy Fallon: "Yesterday, President Obama said that over 40 countries have offered to help the US fight ISIS. Yeah. Of course, they said it the same way your friends do when they promise to help you move."

Jimmy Fallon: "I also read that the Federal government is starting to plan for climate change by making extended forecasts that can help people plan for extreme weather, because what can go wrong when you combine the efficiency of the government with the accuracy of weathermen?"

Seth Meyers: "President Obama today addressed the UN General Assembly and asked young people to focus on education and innovation rather than religious extremism. And if there's one place to reach young people, it's the UN General Assembly."

Seth Meyers: "During the speech, President Obama said about the militant group ISIS, 'The only language understood by killers like this is the language of force.' So, I guess, talk to them like this, we will."

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

ALASKA TO SUE FOR ROAD THROUGH IZEMBEK NATIONAL WILDLIFE REFUGE. The AP (4/8) reports that "the state of Alaska announced Monday it will sue the federal government to open a road through" the Izembek National Wildlife Refuge "so that residents of a village will have improved access for emergency flights at an all-weather airport." Gov. Sean Parnell said the federal government's decision on the road was "unconscionable." In a statement, Parnell said, "In just the last several weeks, serious health-related evacuations have shown just how critical a road for medical evacuations is for residents." According to Parnell, "the grounds for the lawsuit...would be the Mining Act of 1866, which grants rights of ways based on historic use."

Coverage by the AP was also picked up by the Anchorage (AK) Daily News (4/7, 251K), the Sacramento (CA) Bee (4/7, 687K), the Seattle Post-Intelligencer (4/8, 857K), the York (SC) Enquirer-Herald (4/7, 18K), the Hilton Head (SC) Island Packet (4/7, 116K), and WHEC-TV Rochester, NY (4/8, 8K).

Also covering the story are the AP (4/8), the Alaska Dispatch (4/6, 7K), the Juneau (AK) Empire (4/7, 21K), the Nation Sun News (4/8), and KTVA-TV Anchorage, AK (4/8, 1K).

DEMOCRATS PUSH FOR AGENCY DECISIONS TO BOOST REELECTION BIDS. The Washington Post (4/8, Kane, 4.22M) reports that Democrats are pushing the Obama Administration for agency decisions that they thinks would boost their reelection chances. The article notes that "the biggest fights...come down to Alaska's push for more energy production, which often runs up against the Obama administration's liberal instincts to protect the environment." Another point of contention is "a road project connecting the remote town of King Cove to a nearby airport."

SECRETARY JEWELL TO COMMEMORATE 75TH ANNIVERSARY OF MARIAN ANDERSON'S CONCERT AT LINCOLN MEMORIAL. The Broadway World (4/8, 151K) reports that on April 9, Interior Secretary Sally Jewell "will join the Washington Performing Arts Society and local high school and elementary school children on the plaza of the Lincoln Memorial to commemorate Marian Anderson's historic Easter Day concert in 1939."

REP. HASTINGS CRITICIZES INTERIOR FOR NOT CUTTING SPENDING IN BUDGET REQUEST. The Fierce Government (4/8, 224) reports House Natural Resources Committee Chairman Doc Hastings during an April 3 hearing "criticized the White House budget proposal for the Interior Department for not prioritizing programs or making spending reductions." Hastings said, "With a budget proposal that is higher than last year's enacted levels, I'm afraid the Interior Department's budget misses the mark." Hastings also "spoke out against full funding for the Land and Water Conservation Fund."

SECRETARY JEWELL PRESSED TO SPEED UP CO-MANAGEMENT PLAN. The Saipan Tribune (4/8, 641) reports that Delegate Gregorio Kilili C. Sablan "pressed" Interior Secretary Sally Jewell to "speed up" the co-management agreement "governing federal and CNMI submerged lands in the Marianas Trench Marine National Monument, three months after President Barack Obama signed a proclamation temporarily withholding the transfer to the CNMI of submerged lands around five islands that are either part of a national marine monument or under lease to the US military." Sablan raised the co-management issue during the US House Natural Resources Committee's hearing on the US Department of the Interior's fiscal year 2015 budget proposal.

America's Great Outdoors:

National Park Service:

NATIONAL PARK ADVOCATES WATCHING NPS BUDGET. The Public News Service (4/7, 306) reports that national park advocates are "watching carefully as Congress puts President Obama's budget under the microscope in April." Obama is "proposing an increase of \$55 million in the National Park Service budget for 2015, including \$10 million as a 'Centennial Initiative' to get the parks ready for the agency's 100th anniversary celebration in 2016." John Garder, budget and appropriations director for the National Parks Conservation Association, said "it is a promising start, after years of budget-trimming have taken a toll on park maintenance and staffing."

Also providing coverage is the Public News Service (4/7, 306).

NPS RELEASES NEW VIDEO TO PROMOTE NATIONAL PARK WEEK. The Tacoma (WA) News Tribune (4/7, 338K) reports that the NPS announced Monday the release of an internet video promoting National Park Week. According to the article, "the video shows visitors and rangers jumping in front of images from the 401 national parks."

CHICAGO MAYOR EMANUEL DECRIES PROCESS OF DESIGNATING PARK. In an interview with the New Republic (4/8, 195K), Chicago Mayor Rahm Emanuel compared the difference between the federal government and local government. Emanuel claims that the federal government suffers from "a diffusion of power," whereas

there is "a focus of power" in Chicago. As an example, he notes that "every playground in the city of Chicago" has been redone and they are "adding parks everywhere." On the other hand, the city is "trying to get the Interior Department to designate a local park to be a national designation, and it is like a three-year process." Emanuel added, "They have interest in doing it, but my God. In Chicago, I wanted to make sure every child in four years time was a ten-minute walk from a new park or playground. It's done. We are going to get there one year ahead of time."

DC'S CHERRY BLOSSOM BUDS NEARS PEAK BLOOM. In its "Capital Weather Gang" blog, the Washington Post (4/8, Samenow, 4.22M) reports "the buds on Washington, D.C.'s famed cherry trees today reached their final stage before bursting and reaching peak bloom." The NPS "declared the buds are 'puffy white', which on average signifies peak bloom is just 4-6 days away."

Also reporting on the story is WJLA-TV Washington (4/8, 118K).

BILL INTRODUCED TO UPGRADE DC'S GOLF COURSES. The AP (4/8) reports that Del. Eleanor Holmes Norton says "the public golf courses in the nation's capital are in desperate need of an upgrade." Norton "introduced a bill Monday calling for a study of the possibility of public-private partnerships to operate the three courses." The article notes that "the courses — East Potomac, Langston and Rock Creek — are owned by the National Park Service and operated through concession contracts."

MASSIVE AMOUNT OF ROCKS FALL IN YOSEMITE NATIONAL PARK. The AP (4/8) reports that "officials at Yosemite National Park say a massive amount of rock has fallen from a cliff, closing a hiking trail." The NPS said Monday that "nobody was hurt when the 16,000 tons of rock fell 500 feet from a cliff near Hetch Hetchy Reservoir on March 31."

BEARS COME OUT OF HIBERNATION AT GRAND TETON NATIONAL PARK. The AP (4/8) reports that "bears are out of hibernation at Grand Teton National Park and officials say both residents and park visitors should be alert for them." Staff workers at Grand Teton "recently received reports of a group of bears just east of the park's headquarters campus in Moose."

JOSHUA TREE NATIONAL PARK SEEKS "CITIZEN SCIENTISTS". The Palm Springs (CA) Desert Sun (4/7, 111K) reports that "researchers are starting a long-term project to measure the impacts of climate change on the plants and animals in Joshua Tree National Park and are enlisting 'citizen scientists' who will participate in the research during a weekend class on Saturday and Sunday." According to the article, "participants also will help assess the long-term impacts of climate change on Joshua trees, collecting data on how the trees are faring at different elevations."

ADDITIONAL COVERAGE: PANEL REJECTS DESIGN FOR EISENHOWER MEMORIAL. Additional coverage of the National Capital Planning Commission's rejection of the current design for a memorial honoring President Dwight D. Eisenhower was provided by Roll Call (4/8, 76K).

Bureau of Land Management:

AUDIT FINDS BLM MISSED OUT ON MINERAL REVENUE. The Environment & Energy Publishing (4/8, 705) reports that the BLM "lost almost \$1 million in revenue from the improper management of mineral material, the Interior Department's Office of Inspector General said in a new report." According to the report, the bureau "may have missed out on more than \$846,000 because of program deficiencies." The audit "faulted BLM for using outdated sales guidance and problems with calculating the materials' value."

Also reporting on the story is the Washington Times (4/8, Swarts, 455K).

NEVADA RANCHER'S SON FREED AS BLM ROUNDS UP CATTLE. The AP (4/8, Ritter) reports that "the son of a rural Nevada cattle rancher was freed from federal custody Monday, a day after Bureau of Land Management police arrested him amid a long-running family dispute with the government over cattle grazing in remote rangeland northeast of Las Vegas." Dave Bundy was "issued a court summons on criminal charges that he refused to disperse and resisted officers, said Natalie Collins, spokeswoman for the US attorney's office in Las

Vegas." Meanwhile, "about 100 protesters rallied Monday against the BLM roundup of cattle that Bundy's father, Cliven Bundy, says belong to him."

Additional coverage was provided by [FOX News](#) (4/7, 74.23M), [ABC News](#) (4/8, 3.58M), the [Los Angeles Times](#) (4/8, Glionna, 3.46M), the [St. George \(UT\) Spectrum](#) (4/7, 48K), the [St. George \(UT\) News](#) (4/7, 3K), the [Las Vegas Review-Journal](#) (4/8, 437K), [KUTV-TV](#) Salt Lake City (4/8, 7K), and [KSL-TV](#) Salt Lake City (4/8, 242K).

MAN AGREES TO RESTITUTION FOR VANDALIZING MONUMENT. The [AP](#) (4/8) reports that "a Minnesota man who carved the names of himself and his wife near the 1806 signature of explorer William Clark on a national monument in Montana has agreed to pay \$4,400 in restitution and fines," the BLM said Monday. According to the article, "the fine came after the US attorney's office filed a misdemeanor vandalism charge against Cole Randall of Plymouth, Minn., for the carving in sandstone at Pompey's Pillar that reads 'Cole + Shpresa 10/10/2013.'" Randall "agreed to pay \$3,400 in restitution and a \$1,000 fine to settle the case."

Also reporting on the story are the [Minneapolis Star Tribune](#) (4/8, Walsh, 1.48M), the [St. Paul \(MN\) Pioneer Press](#) (4/8, 656K), the [Chicago Tribune](#) (4/8, Walsh, 1.48M), and the [Colorado Springs \(CO\) Gazette](#) (4/8, 153K).

WILD HORSE ROUNDUP PROPOSED BY IRON COUNTY COMMISSIONERS CRITICIZED. The [Salt Lake \(UT\) Tribune](#) (4/8, 470K) reports that "opponents of an emergency wild horse roundup proposed by Iron County Commissioners say the wrong animals are being targeted for reduction in the drought-stricken lands of western Utah." Suzanne Roy, director of the American Wild Horse Preservation Campaign, said that the county plan "is retaliation for the Bureau of Land Management saying they needed to reduce grazing levels. They are scapegoating, once again, wild horses for the problems created by the large number of livestock grazing on our public lands." Iron County Commission chair Dave Miller said Monday that "at least a partial roundup of the horses could happen this week."

In an op-ed for the [Elko \(NV\) Daily Free Press](#) (4/8, 22K), the American Wild Horse Preservation Campaign, and its founding organization, Return to Freedom, warned the BLM and the Iron County Commissioners that "any removal of wild horses from federal lands would be in violation of federal laws." At the same time, wild horse advocates "released BLM-based data that shows that wild horses are greatly outnumbered by livestock on public lands in Utah and Nevada."

DECISION OPENS NEW AREAS OF IMPERIAL SAND DUNES RECREATION AREA TO VEHICLES. The [Riverside \(CA\) Press Enterprise](#) (4/7, 435K) reports that "ending a 14-year closure, about 40,000 acres of the popular Imperial Sand Dunes Recreation Area will be opened to off-road vehicles this fall after a federal court judge overruled environmentalists' objections." The article notes that "the land had been placed off limits to protect the Peirson's milk vetch, a perennial herb listed as threatened under the federal Endangered Species Act." The ruling by US District Judge Susan Illston of the Northern District Court of California in San Francisco "last week upholds a 2013 management plan adopted by the US Bureau of Land Management that includes lifting most of the milk-vetch closure."

Also reporting on the story is the [Courthouse News](#) (4/7, 7K).

Fish and Wildlife Service:

MUSICIANS RAISE CONCERNS ABOUT PROPOSED IVORY REGULATIONS. [NPR](#) (4/8, Ragusea, 519K) reports that "new Obama administration rules aimed at protecting African elephants are causing widespread anxiety in the music world." The proposed regulations would "place a near-total ban on anything made with ivory moving in and out of the US" Working musicians claim "the policy will make them think twice about touring abroad." Says Craig Hoover, who heads up the Wildlife Trade and Conservation Branch of the FWS, said, "The reason for that is ... we have seen, over the past five to 10 years, a dramatic, alarming and unprecedented increase in the slaughter of African elephants to supply the global ivory trade, and populations of both savannah elephants and forest elephants have dropped precipitously."

FWS Issues Temporary Ban Of Elephant Trophy Imports From Zimbabwe And Tanzania. The [Nature World News](#) (4/7) reports that "game hunters who've taken elephants as trophies in Tanzania and Zimbabwe are banned

from importing any of the animals into the US," according to new ruling by the FWS. The agency "announced it would suspend imports of all sport-hunted elephant trophies taken from the two African nations for the remainder of the 2014 calendar year, citing poor regulations in Tanzania and Zimbabwe and a growing need to address the impact of illegal poaching on the countries' elephant populations."

FWS PROPOSES PROTECTIONS FOR NEW MEXICO MEADOW JUMPING MOUSE. In its "RegWatch" blog, [The Hill](#) (4/8, 237K) reports that the FWS "announced Monday a rule that would classify the New Mexico meadow jumping mouse as endangered and designate a critical habitat for it." The article notes that "the rule was originally announced last year, but the agency is now reopening the comment period for an additional 30 days so the public will have more time to comment."

COMMENT PERIOD EXTENDED ON SAGE GROUSE. The [Reno \(NV\) Gazette-Journal](#) (4/7, 166K) reports that the FWS on Monday "announced it would extend the public comment period on a proposal to designate the so-called 'bi-state' population of sage grouse as a threatened species by 60 days, with comment now being accepted until June 7." Also, the agency is "extending by six months its final determination as to whether the bi-state sage grouse should be listed as threatened under the Endangered Species Act, with that decision now due on or before April 28, 2015." Ted Koch, Nevada state supervisor for the FWS, said, "Extending the comment period provides additional time for the public and other stakeholders to review the proposal and provide comments and information that will help inform our decisions about protections that may be needed to conserve this distinct population of greater sage grouse. This process helps ensure that any decisions made by the service are grounded in the best available science."

GROUP THREATENS LAWSUIT OVER ALABAMA'S SLENDERCLAW CRAYFISH. The [Alabama Live](#) (4/8, 75K) reports that the Center for Biological Diversity "announced Monday that it intends to sue the U.S. Fish & Wildlife Service for failing to add Alabama's slenderclaw crayfish to the list of federally-endangered species."

Securing America's Energy Future:

Renewable Energy:

FWS REPORT LABELS IVANPAH SOLAR PROJECT A "MEGA-TRAP". The [Palm Springs \(CA\) Desert Sun](#) (4/7, 111K) reports that "a new report from the U.S. Fish and Wildlife Service has labeled BrightSource Energy's Ivanpah project a 'mega-trap' for insects and birds that may get singed or in some cases, burned alive flying through the intense solar radiation reflecting off the thousands of mirrors surrounding three solar towers at the plant in eastern San Bernardino County." The Center for Biological Diversity "posted the report to the California Energy Commission website on Monday as part of its testimony opposing BrightSource's 500-megawatt Palen project, located east of the Coachella Valley, which would use similar technology — soaring solar towers surrounded by thousands of reflecting mirrors." The report said, "Although not analyzed in detail, there was also significant bat and insect mortality at the Ivanpah site, including monarch butterflies. It appears that Ivanpah may act as a 'mega-trap,' (original emphasis) attracting insect-eating birds, which are incapacitated by solar flux injury, thus attracting predators and creating an entire food chain vulnerable to injury and death."

WIND POWER SETS NEW JANUARY GENERATION RECORD. Bloomberg News (4/8, Randall, 2.76M) reports that in January wind power was responsible for 4.8 percent of US electricity generation, the highest January total ever, according to data from the US Energy Information Association. Bloomberg News casts the US's rising wind power as "unstoppable" because in many areas of the country wind has become cheaper than coal and natural gas. Bloomberg News also casts competition between wind and natural gas as "fierce," and writes that although wind power is currently able to compete due to a tax subsidy, even without it "wind prices are getting cheaper as technology improves."

Onshore Energy Development:

JUDGE DENIES ENVIRONMENTAL CHALLENGE TO PROPOSED WYOMING COAL-BED METHANE PROJECT. The [AP](#) (4/8, Neary) reports that "a federal judge in Washington, D.C., has ruled against environmental groups that challenged the US Interior Department's plan to open the Fortification Creek area in northeastern Wyoming to coal-bed methane development." Judge Barbara J. Rothstein "on March 28 released a

42-page ruling against the National Wildlife Federation and two Wyoming groups: the Powder River Basin Resource Council, based in Sheridan; and the Wyoming Outdoor Council, based in Lander." The groups had sued in 2012, claiming the BLM "improperly analyzed how opening the area to development would affect the local elk herd." However, Rothstein held the BLM had "analyzed properly the cumulative effects of development on the 100,000-acre Fortification Creek Planning Area." Rothstein "rejected claims that the agency had failed to do an adequate job of considering the effects of development on the elk and on water and soil resources."

LEASE REVIEW BY BLM EXTENDS BEYOND THOMPSON DIVIDE. The Glenwood Springs (CO) Post Independent (4/8, 27K) reports that "a new environmental analysis being undertaken by the Bureau of Land Management to review oil and gas leases issued on the White River National Forest south of the Colorado River over the past two decades extends well beyond the embattled Thompson Divide area." The bureau "recently announced that it plans to analyze a total of 65 leases issued under a 1993 US Forest Service Environmental Impact Statement (EIS), which the Department of Interior Board of Land Appeals determined to be deficient." The review will "include 25 leases held by two energy companies, SG Interests and Ursa Resources Group, within the 221,000-acre Thompson Divide area southwest of Glenwood Springs."

OK EXPERIENCES 109TH EARTHQUAKE OF MAGNITUDE 3 OR HIGHER, MATCHING 2013 TOTAL.

Bloomberg News (4/8, Efstathiou Jr., 2.76M) reports that on April 6 Oklahoma experienced its 109th earthquake of a magnitude 3 or higher, "matching the total for all of 2013," according to Oklahoma Geological Survey research seismologist Austin Holland. Bloomberg News casts the quakes as having been "overwhelming" to state officials "who are trying to determine if the temblors are linked to oil and natural gas production." Bloomberg News writes that Holland said that it's "likely" Oklahoma has "cases of earthquakes being caused by different oil and gas activity," but that "evaluating those carefully can take significant amounts of time, especially when we're swamped." Bloomberg News also casts the recent uptick in earthquakes in Oklahoma as coming amid quakes "thought to be tied to wastewater disposal wells" in Azle, TX; Jones, OK; and northeastern Ohio.

Offshore Energy Development:

BSEE OFFERS GRANT FOR ARCTIC OIL SPILL RESPONSE. The Upstream Online (4/8, 20K) reports that the BSEE is "offering grant money for research into developing technologies to respond to oil spills in icy Arctic conditions." The bureau said in a "broad agency announcement" on Friday that it is seeking "new and innovative mechanical technologies" for "cleaning up oil spills in drift ice conditions." The announcement added, "Collection systems should be able to efficiently collect oil while operating in drift ice conditions that might be found in an Arctic environment."

MURKOWSKI CALLS FOR US TO TAKE LEADERSHIP ROLE IN ARCTIC DEVELOPMENT AND

EXPLORATION. The "E2 Wire" blog of The Hill (4/7, Barron-Lopez, 237K) reports that yesterday on the Senate floor, Sen. Lisa Murkowski pressed "the administration on Arctic development and exploration." Murkowski "has made the case for the U.S. to take a leadership role in the Arctic as new opportunities arise from its changing landscape." She indicated that "she is not optimistic the U.S. is on the same trajectory as other nations like China, Japan and Russia, which are already making headway in the uncharted region." Murkowski "stressed the untapped potential for further oil and gas exploration in the region, a contentious issue between industry and environmentalists, who say the Arctic should be left untouched as the impacts of climate change grow."

SHELL MOVED ILL-FATED RIG IN PART FOR TAX PURPOSES. Picking up on earlier news, Bloomberg News (4/8, Snyder, 2.76M) reports that Shell's decision to move a drilling rig from Alaska's waters to Seattle was driven, in part, by a "desire to avoid millions of dollars in Alaska state taxes," according to a Coast Guard report. Shell "had decided to move the Kulluk drill rig to Seattle for repairs because it might have been subject to a state property tax had it remained in Alaska waters beyond Jan. 1, 2013, according to the report released April 3 that offered eight recommendations to improve safety." The rig ultimately broke free of its tow and ran aground.

Tackling America's Water Challenges:

SUPPORT GROWS FOR CHANGE IN LAKE BERRYESSA OVERSIGHT. The Napa Valley (CA) Register (4/8, 36K) reports that "a bill from US Rep. Mike Thompson that would make sweeping changes to recreation at Lake Berryessa has built support in Congress and Napa County." The bill "proposes to take management of recreation

at the lake from the US Bureau of Reclamation (BOR), which has had that responsibility since Napa County relinquished it in the 1970s, and give it to the US Bureau of Land Management (BLM)." Thompson "announced last week that his bill has 60 bipartisan coauthors in the House of Representatives, and it has also received the Napa County Board of Supervisors' endorsement."

ENVIRONMENTAL GROUPS CLAIM DELTA TUNNELS WOULD FORCE THOUSANDS TO RELOCATE. The Central Valley (CA) Business Times (4/8, 206) reports that "thousands of residents of Byron and possibly Discovery Bay and other communities might be forced from their homes because of health threats from construction to massive twin water tunnels, environmental groups charge Monday." Restore the Delta Executive Director Barbara Barrigan-Pamilla said, "The Brown Administration admits the tunnels would have '52 significant and unavoidable adverse impacts' on the Delta region, including permanently degraded groundwater quality, long-term reduction of navigation opportunities, and exposure to unhealthy air quality bad enough in Byron to require people to move in order to avoid an increased cancer risk. Hidden deep in the 40,000 page project proposal, and further buried in a footnote ... is the news that Byron area children, elderly and people with conditions like asthma will be so threatened by air toxins from the tunnels project that they would have to leave town. What about the thousands of people just up the road in Brentwood and Discovery Bay?"

Empowering Native American Communities:

MACKINAC TRIBAL NATION SEEKS RECOGNITION AS INDIAN TRIBE. The AP (4/8) reports that the Mackinac Tribal Nation has filed a lawsuit seeking federal recognition. The tribe says "it filed a request March 20 seeking tribal jurisdiction and recognition for land claims, hunting and fishing rights, the protection of religious freedom and other treaty obligations under the Indian Reorganization Act."

Also reporting on the story are the Escanaba (MI) Daily Press (4/8, 1K) and the Nation Sun News (4/8).

SEN. TESTER TACKLES EDUCATION, HEALTH CARE AS NEW INDIAN AFFAIRS CHAIRMAN. In an interview with the Flathead (MT) Beacon (4/8, 15K), the newly seated chairman of the US Senate's Indian Affairs Committee, Sen. Jon Tester "addressed a gamut of issues facing the Native American community, including the government turmoil on the Blackfeet Reservation and the controversy surrounding the Washington Redskins' name."

NEW DIRECTOR OF COMPLIANCE FOR NATIONAL INDIAN GAMING COMMISSION TAKES POST. The Muskogee (OK) Phoenix (4/8, 29K) reports that "Muskogee native Doug Hatfield, a former compliance manager for the Cherokee Nation Gaming Commission, is now the director of compliance for the National Indian Gaming Commission in Washington, D.C."

Top National News:

OBAMA ANNOUNCES \$107 MILLION IN NEW GRANTS FOR HIGH SCHOOL PROGRAMS. President Obama's appearance at a Maryland high school, where he announced the disbursement of Federal grants meant to encourage innovative curricula that promise to prepare students for jobs thought likely to be in high demand in coming years, did not generate significant national media coverage, and was not mentioned by any of the three network newscasts Monday evening. MSNBC (4/8, 45.1M) did air about 20 minutes of the President's remarks during their 11 AM hour of programming.

The AP (4/8) reports that on Monday, the President "announced more than \$100 million in grants for two dozen schools across the country that are helping students gain work experience for what he called the 'in-demand jobs of the future.'" According to the AP, "The money...comes from fees that companies pay for visas to hire foreign workers for specialized jobs." The AP notes that the President "announced the grants before cheering high school students" at Bladensburg High School, "one of three high schools in Washington's Maryland suburbs that have created a Youth CareerConnect Program that is the recipient of \$7 million under the announcement."

The Hill (4/7, Sink, 237K) reported that on Monday, the President told the Bladensburg students: "We want an education that engages you, an education that equips you with the rigorous and relevant skills for college and your career." The President added, "Schools that have entered this competition have changed the way they

prepare their students for the better.”

McClatchy (4/8, Schoof, Subscription Publication, 23K) reports that “the \$107 million grant program focuses on fields where jobs are in demand, such as information technology and health care.” McClatchy says Bladensburg High “plans to expand its program that helps high school students earn industry-recognized certifications in nursing and pharmacy.” The Washington Times (4/8, Wolfgang, 455K) reports that Bladensburg “biomedical students can earn college credit from the University of Maryland.”

According to the Washington Post (4/8, Wiggins, 4.22M), the awarding of the grants “continues the president’s pledge to use executive authority to move forward in areas where Republicans have not supported him.” The Post adds that Youth CareerConnect grant recipients “include the Los Angeles Unified School District, which is receiving a \$7 million grant to build career academies...that will focus on health care, biotechnology and other technology-related industries,” and “the New York City Education Department, which is getting nearly \$7 million to fund two ‘early college’ high schools where students can obtain associate’s degrees.”

In a brief article, the New York Times (4/8, Baker, Subscription Publication, 9.65M) reports that the White House “said it hoped the program would enhance job-shadowing and mentoring opportunities, make it easier for students to enter high-demand industries like information technology, health care and other science and technology sectors, and expand credits available for students working toward postsecondary degree certificates.”

Bloomberg News (4/8, Runnigen, 2.76M) says the “\$107 million in grants” will “help schools revamp their curriculum to better prepare students for success in their chosen career.” Bloomberg also reports that CareerConnect, “a competitive grants program run by the Departments of Education and Labor, entices schools to link their education programs with specific skills or experiences to help ensure success.”

The St. Paul (MN) Pioneer Press (4/8, Koumpilova, 656K) reports that schools in St. Paul and Apple Valley, Minnesota “are among the winners of the Obama administration’s latest national grant competition.” According to the Pioneer Press, St. Paul “won \$3.7 million...and Rosemount-Apple Valley-Eagan district lined up \$3 million.” The Toledo (OH) Blade (4/8, Sielicki, 241K) notes that the Toledo Public Schools were “awarded nearly \$4 million by the Obama Administration as part of a national program to make students career-ready through rigorous academic and career-focused curriculum.”

In an editorial, the Baltimore Sun (4/8, 925K) says the President’s appearance at Bladensburg High “was an example of the president using his bully pulpit to urge states to do more to help young people prepare for the work world even if they aren’t college bound.” The Sun says the President is “recasting for contemporary use an idea that had its roots in the beginnings of the industrial age, namely that high schools should offer students the opportunity to learn a trade that enables them to support themselves and their families as productive members of society.” The Sun adds that the President’s remarks “should serve as a wake-up call to the state’s school districts that it’s not enough to just send the cream of their graduating classes off to college.”

Obama: “We’ve Got To Make It Easier To Repay Student Loans.” Neil Munro, in a post for the Daily Caller (4/7, 408K), noted that also on Monday, the President “suggested that’s he’ll pressure Congress to reduce voters’ student-loan payments before the November elections” when he said, “We’ve got to make it easier to repay student loans.”

Biden Announces New Apprenticeship Program For Community College Students. US News & World Report (4/8, 645K) reported that also on Monday, in a speech to the American Association of Community Colleges, Vice President Biden “announced the creation of a new apprenticeship consortium comprised of community colleges, businesses, labor unions and industry organizations.” US News says that as part of the Registered Apprenticeship-College Consortium – “which is administered by the departments of Labor and Education – students will be able to earn college credit while being paid to learn a trade.” Biden is quoted as saying, “Through training at a community college...folks can transition to become welders, truckers, pipefitters, or one of the more than 100 different jobs involved in working at a natural gas site.”

According to USA Today (4/8, Bash, 5.82M), the Registered Apprenticeship College Consortium “will act as a way to bridge the gap for students coming from low- and middle-class families who have to decide whether to go straight to work or continue their education.” USA Today adds that Biden noted that the consortium “includes

community colleges, businesses, labor unions and industry organizations, all committed to creating paid apprenticeships that would qualify for academic credit." USA Today goes on to report that on Monday, the RNC "fired back, blaming the employer mandate within the Affordable Care Act for forcing colleges to cut hours for professors." RNC spokesman Jahan Wilcox said, "Obamacare is literally crushing community colleges across the country."

Study: Teachers Getting More Experienced. The Wall Street Journal (4/8, Banchemo, Subscription Publication, 5.51M) reports that new research from the Graduate School of Education at the University of Pennsylvania has found that in the 2011-12 school year, public school teachers were, on average, more experienced than they were as of 2007-08, reversing a trend. The Journal says researchers have found evidence to suggest that much of the cohort of new teachers who began work in 2007, as the unemployment rate began to pick up ahead of the recession, have kept on teaching, which also reversed a trend from the years previous.

WHITE HOUSE RESPONDS TO CLAIM THAT WOMEN ON ITS STAFF MAKE \$8,000/YR LESS THAN MEN.

The Washington Post (4/8, Eilperin, 4.22M) reports that on Tuesday, President Obama "will take two executive actions...aimed at narrowing the wage gap between men and women." The Post says the President will unilaterally "forc[e] federal contractors to let their workers discuss their earnings with each other" and "disclose more information about what their employees earn." According to the Post, the actions, which coincide with "National Equal Pay Day," are "part of a broader effort by Democrats to increase turnout among female voters during the 2014 midterm elections." White House senior adviser Valerie Jarrett is quoted as saying, "Unfortunately, pay inequity is a real and persistent problem that continues to shortchange women, their families and our economy as a whole."

At the opening of Fox News' Special Report (4/8, lead story, 2.15M), Bret Baier said, "President Obama again advocates equal pay for women, but apparently that does not include his own White House." White House correspondent Ed Henry went on to report that on Monday, the President's "aides faced tough questions about why the President does not seem to be setting a good example since one recent study found that the median salary for females at the White House is 88 cents for every \$1 a male staffer earns."

Under the headline, "As Obama Spotlights Gender Gap In Wages, His Own Payroll Draws Scrutiny," the New York Times (4/8, A14, Shear, Lowrey, Subscription Publication, 9.65M) reports that "critics of the administration are eager to turn the tables" and point to a "study released in January showed that female White House staff members make on average 88 cents for every dollar a male staff member earns" even as the White House and other Democrats "are trying to portray Republicans as insensitive to the concerns of women." The Times says the "recent study" from the "conservative American Enterprise Institute" found that "the median annual salary for women in the White House last year was \$65,000, while the median annual salary for men was \$73,729."

The Hill (4/7, Sink, 237K) reported that on Monday, White House press secretary Jay Carney "was peppered by questions from reporters about...[the] study that found the salary for the median female White House staffer was 12 percent lower than for a male staffer." Carney is quoted as saying, "What I can tell you is that we have, as an institution here, have aggressively addressed this challenge, and obviously, though, at the 88 cents that you cite, that is not a hundred, but it is better than the national average." According to the Hill, "The discrepancy is likely explained by concentrations of women in lower-paying jobs at the White House" and "more men holding higher-level positions."

USA Today (4/8, Madhani, 5.82M) reports that the executive orders represent the President's "latest effort to circumvent Congress and highlight an issue that he hopes can help fellow Democrats' chances at the polls in November." USA Today notes that the President's "latest foray into the issue also comes with the Senate set soon to consider the Paycheck Fairness Act, which would impose new regulations on how companies pay employees."

Republicans Plan Response To Obama's Messaging On Gender Pay Gaps. Politico (4/7, Palmer, 73K) reported that last week, "More than a dozen female Republican lawmakers gathered...with GOP operatives" for a "broad discussion on conservative ideas to empower female voters." According to Politico, "the GOP has spent the last year coming up with these new ideas to blunt a repeat of 2012, when key Senate races slipped through their fingers amid controversial Republican comments about rape," and their "strategy faces its first big test Tuesday, when a coalition of Republican committees will release its response to a Democratic push to make 'fair

pay; a campaign issue." Politico reported that the RNC, the NRSC and the NRCC "will blast a joint memo Tuesday on how the party supports equal pay for equal work and calling Democrats' tactics a 'desperate political ploy.'"

According to the Huffington Post (4/7, Bassett, 11.54M), "conservatives say Democrats are using the 'misleading' wage gap to galvanize women voters." AEI's Mark Perry and Andrew Biggs, in an op-ed for the Wall Street Journal (4/8, Perry, Biggs, Subscription Publication, 5.51M) titled, "The '77 Cents On The Dollar' Myth About Women's Pay," claim that women who work at least 40 hours a week earn about 88% of what men who work 40 hours make, and unmarried women make 96% of what men take home.

Activists Want More Statues Of Women In The Capitol. The Los Angeles Times (4/8, Simon, 3.46M) reports that a group called Equal Visibility Everywhere "aims to promote gender parity in the symbols and icons of the United States," and "has been working to increase the number of women represented in the Capitol's collection" of statuary, "a popular tourist attraction." According to the Times, "Of the 100 statues in the National Statuary Hall Collection, nine are women."

SENATE EASILY APPROVES JOBLESS BENEFITS EXTENSION. The Senate's passage of an unemployment extension drew heavy print coverage, which generally portrayed the move as an election-year gambit that was unlikely to clear the House.

USA Today (4/8, Davis, 5.82M) reports that on Monday, the Senate voted 59-38 to extend expired long-term jobless benefits, "but the proposal faces opposition from House Republicans who say it doesn't do enough to spur job creation." The Senate bill would retroactively reauthorize benefits back to their expiration in December, and continue them through May. The "nearly \$10 billion" price of the extension "would be paid for by extending custom user fees through 2024 and by allowing companies to change the way they pay in to their pension programs."

The Washington Times (4/8, Klimas, 455K) reports Democrats "had been trying for months to get unemployment benefits approved but struggled to come up with offsetting cuts." The Times says that "finally," they "cobbled together a package acceptable to a handful of Republicans, which helped them clear a GOP-led filibuster and waive budget rules."

Roll Call (4/7, Sanchez, Subscription Publication, 76K) reported that the five Republicans "who helped negotiate the measure" joined the Democrats in backing the legislation. Roll Call adds that Senate Majority Leader Harry Reid "teed up the vote with another screed against the billionaire Koch brothers."

The AP (4/8, Espo) reports that the vote capped "a three-month struggle," and similarly says that it has received "a hostile reception in the House, where majority Republicans generally oppose it." The AP says the legislation is "the linchpin of a broader campaign-season agenda meant to showcase concern for men and women who are doing poorly in an era of economic disparity between rich and poor."

Politico (4/7, Everett, 73K) reported that the bill has "an uncertain future in the House." The "Democratic push on unemployment benefits is part of a broader election-year strategy to highlight income inequality."

The Huffington Post (4/7, Delaney, 11.54M) reported that Democrats hope that the vote "will increase pressure" on House Speaker John Boehner "to move the bill through his chamber." However, Boehner "has said the bill fails to create jobs and is 'unworkable,' partly because state unemployment agencies will have trouble finding all the people who've missed out on the benefits since they lapsed in December." On Monday night, Boehner spokesman Michael Steel said, "we are willing to look at extending emergency unemployment insurance as long as it includes provisions to help create more private-sector jobs – but, last week, Senate Democratic Leaders ruled out adding any jobs measures at all."

The Los Angeles Times (4/8, Mascaro, 3.46M) reports that after the Senate passage, a "beleaguered group of House Republicans from states with high unemployment rates" called on Boehner to "follow suit." However, the GOP lawmakers "are fighting an uphill battle against their leaders, and Boehner has shown little interest in passing an unemployment insurance extension, panning the Senate bill as unworkable."

Politico (4/7, French, 73K) reported that the “fate of expired unemployment benefits tied the Senate in knots for nearly four months,” but the “response in the House: a nonchalant shrug.” The legislation isn’t “high on the House agenda this week,” and “won’t be much higher when the House returns from a two-week recess at the end of the month.” There is “talk of amending the bill and sending it back to the Senate with provisions favored by Republicans — but even that seems to be on the back burner.”

The Washington Post (4/8, Lowrey, 4.22M) reports that Democrats “intend to force the issue” in the House. The “starting point for Democrats” is enlisting the backing of a group of moderate Republicans who “in December signed a letter to Boehner asking the Republican House leadership to consider a temporary extension to the unemployment benefits.”

Editorial Wrap-Up:

NEW YORK TIMES. “A Familiar Script In Ukraine.” In an editorial, the New York Times (4/8, Subscription Publication, 9.65M) notes the similarities between events “taking place in Donetsk and elsewhere in eastern Ukraine” to “those that led up to the Russian annexation of Crimea.” The Times notes that the US and Europe have warned that “further Russian aggression would prompt a stern and painful response,” and argues that it is now time “to prepare it.” The Times calls on the Europeans “to look beyond their internal problems and join Washington in agreeing to a package of extensive and strong sanctions that can be put in place immediately should that be necessary, including restricting the access of Russian banks and corporations to Western financial markets.”

“Afghanistan’s Vote.” An editorial in the New York Times (4/8, Subscription Publication, 9.65M) calls it “good news” that “an estimated 60 percent of 12 million eligible voters in Afghanistan faced down Taliban threats and cast ballots in Saturday’s presidential election,” adding that it is “a further sign that the time has come to end America’s combat role there after 13 years of conflict.”

“Ten Cents A Bag? That’s About Right”

WASHINGTON POST. “An Off-Base Idea.” In an editorial, the Washington Post (4/8, 4.22M) says that after any “mass shooting, a vocal faction in Congress insists that Americans would be safer if more people carried guns into restricted public places.” The Post notes that several Republicans have called for allowing more military personnel to carry weapons on base, but “many current and former commanders disagree.” The Post says that these officers are correct, and “lawmakers should not impose their views on those who run these military bases.”

“India’s Man With A Plan.” An editorial in the Washington Post (4/8, 4.22M) argues that Bharatiya Janata Party leader Narendra Modi “may be as repellent to India’s Muslims and secular liberals as he is attractive to the business community.” Modi has “abandoned anti-Muslim rhetoric,” he “has not apologized for or even explained his actions in the 2002 riots.” Noting that while critics “had similar worries when the BJP’s first government took office in 1998, they were mostly not borne out,” the Post argues that the Obama Administration, “which in February broke its freeze-out of Mr. Modi, is right to bet that he will follow through on his promise to build the economy rather than picking sectarian fights.”

“Undoing A Blunder.” The Washington Post (4/8, 4.22M) editorializes that a Federal judge’s ruling last week that Washington, DC “won’t have to pay millions of dollars in extra labor costs for the massive CityCenterDC complex, which is under construction at the downtown site of the former convention center,” is “a model of lucidity and common sense that could spare not only the District but also other jurisdictions a lot of hassle and expense.” A Labor Department officials ruled in 2011 that CityCenterDC “was subject to the Davis-Bacon Act,” which requires builders to pay “a kind of super-minimum wage to construction workers on federally funded public works projects and all public projects in the semi-federal nation’s capital.” Last week’s ruling by US District Judge Amy Berman Jackson “vindicates all those who thought that the administration was blatantly distorting the Davis-Bacon Act’s language and purpose; the law was meant to apply to post offices and other clearly public facilities, not hotels.”

WALL STREET JOURNAL. “Putin’s Latest Escalation.” An editorial in the Wall Street Journal (4/8, Subscription Publication, 5.51M) says that Russian President Vladimir Putin is on the offensive again in his effort

to undercut Ukraine's post-revolutionary democracy and preclude alignment with the West. The Journal argues that while the President warned last month that if Russia continues its aggression, sanctions "will expand, and the toll on Russia's economy, as well as its standing in the world, will only increase." since then the US and Europe have done next to nothing to show Putin that the threat had any meaning.

"The IRS Reconsiders." In an editorial, the Wall Street Journal (4/8, Subscription Publication, 5.51M) says that IRS Commissioner John Koskinen last week revealed that his agency would back off its proposed limits on political activity by 501(c)(4) organizations. The Journal says that the fact that the IRS didn't reconsider the proposal until liberal groups joined conservative groups in objecting is a sign of concern.

"Off The ObamaCare Deep End." The Wall Street Journal (4/8, Subscription Publication, 5.51M), in an editorial, contends that the only reason conservatives opposed lifting a \$2000 deductible limit for insurance plans sold to small businesses is that they want the Affordable Care Act to cause as much pain for Americans as possible in furtherance of their goal of repealing the law. The Journal says it supports inevitable repeal, but urges Republicans to support moves to make the ACA work better for consumers in the meantime because voters will appreciate that the GOP is on their side as they deal with the downsides of "Obamacare."

Save The Date:

POSTERITY: WPA'S ART LEGACY AND AMERICA'S PUBLIC LANDS. From 1938 to 1941, the National Park Service employed artists via the Works Progress Administration (WPA) to produce silk screened promotional posters for national park sites. The U.S. Department of the Interior Museum has united for the first time six WPA originals and a full complement of the contemporary designs by Doug Leen which follow the tradition of the WPA poster project, for this visually stunning retrospective. Featured are nearly 50 classic posters associated with 36 national parks, the Arctic National Wildlife Refuge and the Interior Museum. On view April 8, 2014 – Spring 2015. Museum hours: Monday – Friday, 8:30 AM – 4:30 PM.

RANGER OF THE LOST ART. Learn about rediscovery of the WPA/Federal Art Project poster series and the continued tradition today. Artists Doug Leen and Brian Maebius will discuss the history of the program and how, using one surviving poster and photographs found through 20 years of research, they painstakingly reconstructed the original set. Today over 30 national parks are represented through their contemporary designs. Tuesday, April 8. 1:15 p.m. – 2:15 p.m. Yates Auditorium.

DOI EMPLOYEE SOCIAL. The Interior Museum is reopening with the temporary exhibit, Posterity: WPA's Art Legacy & America's Public Lands. Use the same method as the WPA artists to pull your own screen-printed canvas bag or poster at our booth or join us for a brief Curator-led tour of the new exhibit. Thursday, April 10. 4:00 p.m. – 6:00 p.m. Bison Bistro

WILDLIFE RESPONDS TO CLIMATE CHANGE. the American pika (*Ochotona princeps*) as a model, scientists are illustrating the nuanced ways by which climate changes are already affecting wildlife and some of the most protected, but least understood ecosystems in the western United States. U.S. Geological Survey Research Ecologist Dr. Erik Beever will discuss the collaborative effort that has collected data on wildlife and microclimate across western mountains for 21 years. Wednesday, April 16. 12:15pm – 1:15pm. Rachel Carson Room
 *Presented in collaboration with the US Geological Survey

LUNCHTIME LECTURE WITH INTERIOR MUSEUM CURATOR TRACY BAETZ AND SCREEN PRINTING

WORKSHOP. Special Assistance – For those in need of special assistance (such as an interpreter for the hearing impaired) or inquiries regarding the accessible entrance, please notify museum staff at (202) 208-4743 in advance of the program. Special needs will be accommodated whenever possible. Wednesday, May 7. 12:15pm – 1:15pm. Rachel Carson Room RSVP required, 202-208-4743 or Diana_Ziegler@ios.doi.gov

Washington Schedule:

TODAY'S EVENTS IN WASHINGTON.

10 a.m. WAYS AND MEANS — Hearing on those expired business tax provisions that would be extended by the tax reform discussion draft released on February 26, with a particular emphasis on how permanent tax policy can promote certainty for American businesses and generate additional economic growth. <http://waysandmeans.house.gov/calendar/eventsingle.aspx?EventID=374899> Location: 1100 Longworth.

10:15 a.m. ENERGY AND COMMERCE — Subcommittee on Health, “Examining the Implementation of the Tobacco Control Act.” Witness: Marcia Crosse, Ph.D. Director, Health Care U.S. Government Accountability Office. <http://energycommerce.house.gov/hearing/examining-implementation-tobacco-control-actsthash.bw8eb8Ap.dpuf> Location: 2322 Rayburn.

10:30 a.m. APPROPRIATIONS — Subcommittee on Labor, Health and Human Services, Education, and Related Agencies Budget Hearing – Department of Education. Witness: Ame Duncan, Secretary, Department of Education. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=374542> Location: 2358-C Rayburn.

11 a.m. APPROPRIATIONS — Subcommittee on Homeland Security CLOSED: Budget Hearing – Cybersecurity. Witnesses: Suzanne Spaulding, Under Secretary, National Protection and Programs Directorate; Dr. Phyllis Schneck, Deputy Undersecretary for Cybersecurity, National Protection and Programs Directorate; Larry Zelvin, Director of National Cybersecurity Communication Integration Center, National Protection and Programs Directorate. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=374544> Location: HVC-301 The Capitol.

1 p.m. APPROPRIATIONS — Subcommittee on State, Foreign Operations, and Related Programs Budget Hearing – United States Agency for International Development. Witness: Dr. Rajiv Shah, Administrator, United States Agency for International Development. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=374545> Location: H-140 The Capitol.

1 p.m. APPROPRIATIONS — American Indian and Alaska Native Public and Outside Witness Hearing. Multiple witnesses: <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=371189> Location: B-308 Rayburn.

1:30 p.m. APPROPRIATIONS — Subcommittee on Defense CLOSED MEMBERS ONLY: Budget Hearing – United States Special Forces Command. Witness: Admiral William H. McRaven, United States Special Forces. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=374546> Location: H-405 The Capitol.

1:30 p.m. OVERSIGHT AND GOVERNMENT REFORM — Full Committee, “Reducing Waste in Government: Addressing GAO’s 2014 Report on Duplicative Federal Programs.” Witness: Gene L. Dodaro, Comptroller General of the United States, U.S. Government Accountability Office. <http://oversight.house.gov/hearing/reducing-waste-government-addressing-gaos-2014-report-duplicative-federal-programs/> Location: 2154 Rayburn.

2 p.m. APPROPRIATIONS — Subcommittee on Financial Services and General Government Budget Hearing – General Services Administration. Witness: Dan Tangherlini, Administrator, General Services. <http://appropriations.house.gov/calendar/eventsingle.aspx?EventID=374547> Location: H-309 the Capitol.

2 p.m. ARMED SERVICES — Subcommittee on Intelligence, Emerging Threats & Capabilities hearing on The FY15 Budget Request for the Defense Threat Reduction Agency and the Chemical Biological Defense Program: Combating Weapons of Mass Destruction in a Changing Global Environment. Witnesses: Rebecca K. C. Hersman, Deputy Assistant Secretary of Defense for Countering Weapons of Mass Destruction, Department of Defense; Kenneth Myers, Director, Defense Threat Reduction Agency; Carmen Spencer, Joint Program Executive Officer for Chemical and Biological Defense, Department of Defense; Andy Weber, Assistant Secretary for Defense for Nuclear, Chemical, and Biological Defense Programs, Department of Defense. http://armedservices.house.gov/index.cfm/hearings-display?ContentRecord_idFDD452D4-95C2-42DB-8997-AEF0A5C741BF Location: 2212 Rayburn.

2 p.m. FOREIGN AFFAIRS — Subcommittee on Terrorism, Nonproliferation, and Trade hearing on Is al-Qaeda Winning? Grading the Administration’s Counterterrorism Policy. Witnesses: Panel I: Joseph Lieberman, (Former United States Senator). Panel II: Seth Jones, Ph.D., Associate Director, International Security and Defense Policy Center, RAND Corporation; Frederick W. Kagan, Ph.D., Christopher DeMuth Chair and Director, Critical Threats Project, American Enterprise Institute for Public Policy Research; Benjamin Wittes, Senior Fellow, Governance Studies, The Brookings Institution. <http://foreignaffairs.house.gov/hearing/subcommittee-hearing-al-qaeda-winning-grading-administrations-counterterrorism-policy> Location: 2172 Rayburn.

2 p.m. NATURAL RESOURCES — Energy and Mineral Resources Subcommittee Oversight Hearing on “American Energy Jobs: Opportunities for Women and Minorities.” <http://naturalresources.house.gov/calendar/eventsingle.aspx?EventID=373322> Location: 1334 Longworth.

2 p.m. NATURAL RESOURCES — Subcommittee on Fisheries, Wildlife, Oceans and Insular Affairs Legislative Hearing on: H.R. 187, To correct the boundaries of the John H. Chafee Coastal Barrier Resources System Unit L06, Topsail, North Carolina; H.R. 277, To revise the boundaries of John H. Chafee Coastal Barrier Resources System Sachuest Point Unit RI-04P, Easton Beach Unit RI-05P, Almy Pond Unit RI-06, and Hazards Beach Unit RI-07 in Rhode Island; H.R. 1810, To revise the boundaries of John H. Chafee Coastal Barrier Resources System Gasparilla Island Unit in Florida; H.R. 1811, To remove from the John H. Chafee Coastal Barrier Resources System areas included in Florida System Unit P-16, and for other purposes; H.R. 2057, To remove from the John H. Chafee Coastal Barrier Resources System the areas comprising Bay County Unit P-31P in Florida; H.R. 3226, To remove from the John H. Chafee Coastal Barrier Resources System certain properties in South Carolina; H.R. 3227, To remove from the John H. Chafee Coastal Barrier Resources System certain properties in South Carolina; H.R. 3572, To revise the boundaries of certain John H. Chafee Coastal Barrier Resources System units in North Carolina; H.R. 4222, To correct the boundaries of John H. Chafee Coastal Barrier Resources System in Gulf County Florida, and for other purposes. <http://naturalresources.house.gov/calendar/eventsingle.aspx?EventID=373987> Location: 1324 Longworth.

2 p.m. VETERAN'S AFFAIRS — Economic Opportunity Subcommittee “Markup of Pending Legislation: H.R. 2942, H.R. 3056, H.R. 3614, H.R. 4037, H.R. 4038, H.R. 4147, H.R. 4150 and H.R. 4151.” <http://veterans.house.gov/markup/markup-of-pending-legislation-11> Location: 334 Cannon.

2 p.m. WAYS AND MEANS — Subcommittee on Health will hold a hearing on the implications of the recently released final regulations implementing the employer mandate and employer information reporting requirement provisions of the Affordable Care Act. <http://waysandmeans.house.gov/calendar/eventsingle.aspx?EventID=374855> Location: B-318 Rayburn.

3:30 p.m. ARMED SERVICES — Subcommittee on Strategic Forces, “Fiscal Year 2015 Atomic Energy Defense and Nuclear Forces.” Witnesses: Vice Admiral Terry Joseph Benedict, U.S. Navy, Director, Strategic Systems Programs; M. Elaine Bunn, Deputy Assistant Secretary of Defense for Nuclear and Missile Defense Policy, Department of Defense; Major General Garrett Harencak, U.S. Air Force, Assistant Chief of Staff for Strategic Deterrence and Nuclear Integration, U.S. Air Force; Edward Bruce Held, Acting Administrator and Acting Undersecretary for Nuclear Security, National Nuclear Security Administration; David G. Huizenga, Acting Assistant Secretary, Office of Environmental Management; Admiral John M. Richardson, U.S. Navy, Director, Naval Nuclear Propulsion Program; Andrew C. Weber, Assistant Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs, Department of Defense; Dr. Peter S. Winokur, Chairman, Defense Nuclear Facilities Safety Board. http://armedservices.house.gov/index.cfm/hearings-display?ContentRecord_id31CD0F47-6015-4D76-A80A-8BDE886CD89B Location: 2118 Rayburn.

4 p.m. ENERGY AND COMMERCE — Energy and Power subcommittee meeting. Opening statements only on markup of H.R. 6, the Domestic Prosperity and Global Freedom Act. <http://energycommerce.house.gov/markup/markup-notice-subcommittee-vote-Ing-exports-bill-next-week> Location: 2123 Rayburn.
Other: April 7 – 9. SEA-AIR-SPACE EXPOSITION — Hosted by The Navy League, the event is billed as “the largest maritime exposition in the U.S.” 9 a.m. Naval Sea Systems Command Commander Vice Adm. William H. Hilarides and Naval Air Systems Command Commander Vice Adm. David Dunaway deliver remarks during “Innovation and Supporting the Warfighter” panel. 12 p.m. U.S. Fleet Forces Command Commander Navy Adm. William E. Gortney delivers remarks. 3 p.m. Navy Quadrennial Defense Review Director Rear Adm. Kevin M. Donegan and Assistant Deputy Chief of Naval Operations Rear Adm. James G. Foggo III deliver remarks at “Peace and Prosperity in the Maritime Domain” roundtable. 3 p.m. Navy Staff Director Vice Adm. Scott H. Swift delivers remarks at “Rebalancing the Sea Services’ Team for the 21st Century Pacific” roundtable. 6 p.m. Chief of Naval Operations Adm. Jonathan W. Greenert delivers remarks at the Sea-Air-Space Convention reception and banquet. 8 p.m. U.S. Coast Guard Commandant Admiral Robert Papp Jr. will be presented the Navy Leagues highest honor: the Admiral Arleigh Burke Leadership Award. Location: Gaylord National Hotel & Conference Center, 201 Waterfront Street, National Harbor, MD.

April 8 – 9. SAVE THE CHILDREN ADVOCACY SUMMIT — Youth from across the country will be gathering in

Washington, D.C. to advocate for children's issues. Speakers include Secretary Arne Duncan (4:30 p.m. 8th); Disney Channel star and singer Bridgit Mendler, Sen. John Boozman (R-AR), Sen. Tim Kaine (D-VA), Congressman Richard Hanna (R-NY), MSNBC's Andrea Mitchell, CNN's Stephanie Cutter, others. 4:30 p.m. Education Secretary Arne Duncan remarks. Location: Hyatt Regency on Capitol Hill, 400 New Jersey Ave. NW.

April 8 – 10. NDIA – TECHNOLOGY CONFERENCE — The National Defense Industrial Association holds its 15th Annual Science & Engineering Technology Conference/Defense Tech Exposition. Theme: "Leveraging the DoD Science and Technology Program to Create Future Warfighting Capabilities Through Rapid Prototyping and Emerging Concept Demonstration." 8:15 a.m. Under Secretary of Defense for Acquisition, Technology and Logistics Frank Kendall delivers remarks on technological superiority. 10:30 a.m. Deputy Assistant Secretary of Defense for Rapid Fielding Earl Wyatt delivers remarks on the Path for Emerging Concept and Capability Prototyping. Location: College Park Marriott Hotel & Conference Center.

NATIONAL JOURNAL LIVE – 'NEXT AMERICA' — 8 a.m. – 11:15 a.m. The latest event in National Journal's "Next America" series, which explores how America's changing demography impacts the national agenda, "The Next America: Points of Leverage" will discuss the types and timing of successful education interventions. Keynote remarks by Secretary of Labor Thomas Perez, RSVP: njnextamerica.eventbrite.com Location: Grand Hyatt Washington, 1000 H Street NW.

CSIS – TRADE – SEN. HATCH — 8:30 a.m. – 10 a.m. "Making Trade Work for America." Keynote Address by Sen. Omin Hatch (R-UT), Ranking Member, U.S. Senate Committee on Finance. Panel: Ambassador Ira Shapiro, General Counsel, Office of the U.S. Trade Representative (former); Timothy J. Keeler, Chief of Staff, Office of the U.S. Trade Representative (former). Location: Center for Strategic and International Studies, Second Floor Conference Center, 1616 Rhode Island Avenue, NW.

CAP – MINORS – SEX TRAFFICKING — 9:30 a.m. – 10:30 a.m. OSen. Klobuchar, Panelists to Discuss Strategies to Combat Sex Trafficking of Minors in the United States. Opening remarks: Neera Tanden, President of the Center for American Progress, Counselor to the Center for American Progress Action Fund. Panelists: Sen. Amy Klobuchar (D-MN); Malika Saada Saar, Executive Director, Human Rights Project for Girls; John Temple, Attorney-in-Charge, New York County District Attorneys Office Human Trafficking Program. Moderator: Chelsea Parsons, Associate Director for Crime and Firearms Policy, Center for American Progress Action Fund. Contact Anne Shoup at ashoup@americanprogressaction.org or 202.481.7146. <http://www.americanprogressaction.org/events/2014/03/31/86796/combating-sex-trafficking-of-minors-in-the-u-s/?eMcrsvp> Location: Center for American Progress Action Fund, 1333 H St. NW, 10th Floor.

FAST FOR FAMILIES – REP. WOLF'S OFFICE — 11:30 a.m. "Fast for Families Bus Tour" Arrives in Herndon, VA and will hold a press conference outside Office of Congressman Frank Wolf (VA-10) to "urge him to show leadership on immigration reform". Participants: Virginia community fasters, faith leaders, labor, and elected officials including: Eliseo Medina, former Secretary-Treasurer at SEIU and "Fast for Families" leader; DJ Yoon, NAKASEC and "Fast for Families" leader; Jaime Contreras, 32BJ SEIU; Virginia Kase, CASA in Action; Hector Sanchez, LCLAA; Tefere Gebre, Executive Vice President, AFL-CIO; Larry Cohen, President of the Communication Workers of America; Local Elected Officials: Herndon Councilmember Grace Han Wolf and Walter Tejada member of the Arlington County Board (Virginia). and Delegate Mark Keam; Rev. Dr. Carmelo Santos, Evangelical Lutheran Church in America. CONTACTS: Susana Flores, 240-706-2624, sflores@casadeva.org; Julie Karant, 646-584-9001, jkarant@seiu32bj.org; Beatriz Lopez, 202-412-7396, beatriz.lopez@seiu.org Location: Congressman Frank Wolf office – 13873 Park Center Rd Ste. 130., Herndon, VA 20171.

PENTAGON – AFRICA — 1:30 p.m. Deputy Assistant Secretary of Defense for African Affairs Amanda Dory and the Commander of U.S. Africa Command General David Rodriguez will conduct a briefing in the Pentagon Press Briefing Room (2E973).

STEM4US! — 1:30 p.m. – 4 p.m. Speakers include: Dr. Nicol Tumer Lee, STEM4US! Chairwoman. Welcoming Remarks from Congressional Host; Senator Mary Landrieu, Chair, Senate Energy and Natural Resources Committee (invited); Congressional Leaders Remarks (Invited); Senator Tim Scott; Congressman Bobby Scott; Congressman Cedric Richmond. Tech and industry leaders: Fred Humphries, Microsoft; Tanya Lombard, ATT; Marne Levine, Facebook Global Public Policy; Larry Bock, USA Science & Engineering Festival; Kyle B.

Isakower, API; Dan Turton, Entergy; Donna Cooper, Pepco; Michael Blake, Green for All. Entertainment leaders: David S. Weaver, NASA Associate Administrator for the Office of Communications; Ted Leonsis, SnagFilms; Percy Miller (Master P), Record Industry Executive; Dr. Gracie Lawson-Borders, Dean, Howard University School of Communications; Lynne Robinson, TV Producer, Black Robin Media. Closing remarks: Talib I. Karim – STEM4US! Executive Director. Location: US Capitol VisitorsCenter, Room SVC201.

HELPING TEENS GRADUATE — 2 p.m. The Taco Bell Foundation for Teens and Boys & Girls Clubs of America unveil a “groundbreaking partnership” to make a “profound and measureable impact” on the lives of more than half a million teens – enabling them to graduate from high school and be college or career-ready. With House Speaker John Boehner; Kelly Rowland, Grammy Award Winning Singer and Actress; Brian Niccol, President, Taco Bell U.S., and Chairman, Taco Bell Foundation for Teens; Jim Clark, President and CEO, Boys & Girls Clubs of America; Kiana Knolland, 2013-2014 Boys & Girls Clubs of America Youth of the Year. Location: Cannon Caucus Room, 3rd Floor

MILITARY MENTAL HEALTH – BURR, STAVENOW — 5:30 p.m. – 8 p.m. Give an Hour to Host A Celebration of Service Honoring Senators Burr and Stabenow. A Celebration of Service. Give an Hour, a national nonprofit providing free mental health services to members of military, veterans, and their families, hosts VIP Reception and Performance of Water by the Spoonful. U.S. Senator Richard Burr (R-NC), U.S. Senator Debbie Stabenow (D-MI), and, USMC veteran Brendan OToole to be honored with “Commitment to Service award.” RSVP to: Lauren Iitzkowitz at litzkowitz@giveanhour.org or at 240-533-1669 Location: Studio Theatre. 1501 14th Street, NW.

Last Laughs:

LATE NIGHT POLITICAL HUMOR.

Jimmy Fallon: “David Ortiz is facing some backlash after he took a selfie with President Obama as part of a promotion using his Samsung phone. Take a look. It’s a very famous selfie. Yep, and so because of this, the White House is considering banning the selfie. And it’s not the first time they’ve had to do something like this. Just a few years ago, they had to ban planking after Joe Biden was caught doing it in the Oval Office.”

Noreen Walsh <noreen_walsh@fws.gov>
To: Sally Jewell (b)(6)@ios.doi.gov

Tue, Apr 8, 2014 at 1:45 PM

Secretary Jewell,

Thank you so much for your note. (b)(6) I was looking forward to visiting with you Monday about our sage-grouse efforts, but it means a great deal to know that I have your support and Dan's to (b)(6)

Sincerely,

Noreen

Noreen Walsh

Regional Director

Mountain-Prairie Region

U. S. Fish and Wildlife Service

303 236 7920

The Mountain-Prairie Region of the U. S. Fish and Wildlife Service: We provide conservation stewardship of some of America's most scenic lands, to ensure healthy fish and wildlife for the enjoyment and benefit of all people.

From: Sally Jewell [mailto:(b)(6)@ios.doi.gov]
Sent: Monday, April 07, 2014 4:28 PM
To: noreen_walsh@fws.gov
Subject: (b)(6)

Dear Noreen –

Dan passed along your message. (b)(6)

(b)(6)

(b)(6)

Your team is continuing to do a terrific job, and the sage grouse briefing today was very helpful – lots of progress being made on all fronts.

Take care,

Sally

EVENT MEMORANDUM FOR THE SECRETARY

MITIGATION STAKEHOLDER MEETING

DATE: April 9, 2014
LOCATION: Office of the Secretary
TIME: 1:30PM – 2:20PM
FROM: Letty Belin, Counselor to the Deputy Secretary (202)208-1671

I. PURPOSE

You will meet with leaders in the conservation community to discuss the release of the Mitigation Strategy in response to your Secretarial Order of October 31, 2013. The report itself will be released on the morning of Thursday, April 10. We will be doing additional briefings with various stakeholders and staff on the Hill later this week.

II. PARTICIPANTS

- Jamie Rappaport Clark, President, Defenders of Wildlife
- Jeff Trandahl, Executive Director and CEO, National Fish and Wildlife Foundation
- Laurel Angell, Director, Western Energy Project
- Larry Selzer, President and CEO, The Conservation Fund
- Sharon Buccino, Director, Land and Wildlife Program, NRDC (surrogate for Francis Beinecke)
- Dave Alberswerth, Senior Policy Advisor, Energy, The Wilderness Society (surrogate for Jamie Williams)
- Lynn Scarlett, Managing Director for Public Policy, The Nature Conservancy (surrogate for Mark Tercek)
- Ed Arnett, Director of the Center for Responsible Energy Development, Theodore Roosevelt Conservation Partnership (surrogate for Whit Fosburgh)
- DOI Staff: Jim Lyons, Counselor, ASLM; Michael Bean, Counselor, ASFWP; Letty Belin, Counselor, Deputy Secretary

Note: Joel Clement and Ted Boling will be on travel at the time of this meeting.

III. AGENDA

- You will open meeting, conduct introductions (5 mins)
- You will provide opening remarks (5 mins)
- Mitigation team provides quick review of strategy and next steps (10 mins) – Letty will do a brief run through some highlights of the strategy and then Jim Lyons can do a few highlighting key next steps.
- SJ leads general discussion and Q and A (25-30 mins)
 - Suggested opening question: *I know you've only had the report for a few hours and may not have had a chance to review it in detail, but I'd be interested in your*

thoughts and what you see as important next steps for this Department to take as we implement it.

- You conclude the meeting

IV. TALKING POINTS

- **Thanks** to you (conservation leaders) for coming here today **and for helping us to develop and implement our mitigation strategy**. I know that **you have been working on these issues for a long time**, beginning well before I became secretary.
- I don't need to tell you why our mitigation strategy is so important -- you know as well as I do. **Shifting this department and its agencies to a landscape-scale mitigation approach is a huge undertaking**. And it is a **paradigm shift** – from our historic reactive, project-by-project and species-by-species approach to a more active and comprehensive approach that steers development to the best places while protecting the resources and areas most in need of preservation.
- **We have benefited hugely from all the wisdom and knowledge you have shared with our team on this much-needed new approach**.
- I'd like to **turn to members of our mitigation team** to run through key parts of our strategy, and to talk about our next steps. Then, we can answer questions and talk about what roles you all might play as we move forward.

[Turn to Letty, Michael, Jim]

WRAP UP:

- We are **counting on your continued help** -- and your **strong participation** in all of the many mitigation initiatives that the Department will be advancing.
- If you see good opportunities to advance this initiative that we might miss, let us know. **If you think we are making mistakes, let us know, and help us make it right**.
- This is both really important and really hard – we are counting on you to help usher this Department and hopefully our sister agencies into the next generation of active and thoughtful federal land use management.

V. Q&A

Q&A is attached as a separate document.

VI. BACKGROUND

- Your Secretarial Order directed the Department's Energy and Climate Change Task Force (which includes all Assistant Secretaries and Heads of Bureaus and is chaired by the

Deputy Secretary) to develop a coordinated Department-wide, science-based strategy to strengthen mitigation practices so as to effectively offset impacts of large development projects of all types through the use of landscape-level planning, banking, in-lieu fee arrangements, or other possible measures.

- The Task Force has written a report summarizing the above evaluation and the strategy for implementing improvements in the Department's mitigation practices and policies. An advance copy of the report and strategy is being provided to the above conservation leaders who have been most directly involved in promoting landscape-level mitigation.
- This briefing/discussion with key conservation stakeholders is in advance of the report's public release. Other stakeholders will be contacted by phone and through briefings.

Summary of Key Aspects of Mitigation Strategy

The report identified some **key Mitigation Challenges**:

- Natural and cultural resources are at increased risk due to growing pressures for development (e.g., oil and gas) and the cumulative impacts of that development
- Ensuring that we use the full mitigation hierarchy (emphasizing avoidance FIRST, then minimizing impacts, then compensating for unavoidable effects)
- Climate change is increasing uncertainty and redefining how we plan for mitigation, requiring us to consider how we build resilience into our mitigation strategies
- Better utilizing the wealth of existing science assessments information from public and private sources to improve mitigation planning, monitoring and evaluation
- Creating mitigation solutions that are durable (considering the science and legal limitations affecting agencies like the BLM)
- Ensuring that compensatory mitigation measures are additional – that they provide real benefits to offset development impacts and would not occur absent a specific mitigation requirement
- Determining what scale is appropriate to deciding what mitigation is needed to address the impacts of a project on cultural or natural resource values
- Providing that mitigation is implemented in a timely way – that will effectively offset project impacts when they occur
- Improving transparency and certainty in designing mitigation, and
- Emphasizing collaboration

In response, the Task Force recommended the following **Guiding Principles**:

1. **Landscape-scale:** *Use a landscape-scale approach in all facets of development, conservation, and mitigation planning.*
2. **Full Hierarchy:** *Utilize the full mitigation hierarchy - in project planning and review.*
3. **Promote Certainty:** *Improve operational certainty for project proponents and ensure greater certainty of conservation outcomes for environmental stakeholders.*
4. **Advance mitigation planning:** *Incorporate mitigation and landscape objectives into the design and development of projects from the beginning.*

5. **Science and Tools:** *Develop and utilize the scientific information and geospatial tools necessary to identify the most efficient and effective means of mitigating the effects of development and to inform monitoring and evaluation of mitigation efforts.*
6. **Foster Resilience:** *Identify and promote mitigation efforts that improve the resilience of our Nation's resources in a rapidly changing climate.*
7. **Durability:** *Mitigation measures need to be effective for the length of a project's impacts.*
8. **Transparency:** *Promote transparency and consistency in the development of mitigation measures and in providing clarity with regard to expected outcomes.*
9. **Collaboration:** *Coordinate with other federal and state agencies, tribes, and stakeholders in conducting assessments of existing and projected resource conditions, forming mitigation strategies, and developing compensatory mitigation programs.*
10. **Monitoring:** *Monitor and evaluate the results of mitigation over time to ensure that the intended outcomes are achieved and to guide adaptive management where they are not.*

BLM Dry Lake SEZ mitigation pilot

Recently the BLM released a mitigation plan for the Dry Lake SEZ in advance of announcing that it would be soliciting interest in developing solar projects in the SEZ. The Dry Lake mitigation plan is a pilot effort intended to explore ways of designing effective mitigation for solar development in solar zones and to provide prospective developers with a clear understanding of the costs of mitigating project impacts in solar zones. BLM will be participating in a workshop to receive public input that will help inform the development of mitigation plans for future solar energy zones.

Next Steps

- The report describes planned outcomes, next steps, and a number of near-term deliverables for the Department and its bureaus.

- Departmental bureaus are currently advancing this landscape approach to mitigation in various contexts, and the strategy will evolve over time.
- Examples include:
 - FWS is in the process of revising its mitigation policy.
 - BLM is implementing a draft Regional Mitigation Policy that will be updated and finalized to be consistent with the guidance contained in the Departmental report.
 - BLM recently released its first regional mitigation plan for the Dry Lake solar energy zone (SEZ) and will be planning a workshop to receive feedback and to aid in designing future SEZ regional mitigation plan.
 - BLM, FS, and FWS are working together to develop a mitigation strategy as a part of the larger Greater Sage Grouse conservation initiative.
 - BLM continues to develop the concept of Master Leasing Plans (MLPs) which are based on the concept of directing oil and gas development to low conflict areas – BLM released the EIS for the North Park MLP¹ last week.
 - BLM, FWS, NPS, and CA state officials continue work on development of the Desert Renewable Energy Conservation Plan (DRECP) which represents an innovative effort to plan for the development and conservation of 21 million acres in the Mojave Desert.

VII. BIOGRAPHIES

Jamie Rappaport Clark, President, Defenders of Wildlife (Defenders) - Jamie Rappaport Clark has been with Defenders of Wildlife since February 2004, and began serving as the President in October 2011. Jamie came to Defenders after a 20-year career in conservation with the federal government, including the U.S. Fish and Wildlife Service (FWS). From 1997 – 2001, Jamie served as Director of FWS during the Clinton Administration. During her tenure as director, Jamie oversaw the establishment of 27 new refuges and the addition of over two million acres to the National Wildlife Refuge System and presided over the recovery of key endangered species such as the bald eagle, gray wolf and the Aleutian Canada goose.

Jeff Trandahl, Executive Director and CEO, National Fish and Wildlife Foundation (NFWF) - Jeff Trandahl joined NFWF in November 2005 and, as the Executive Director and CEO, he has been instrumental in making NFWF one of the world's largest conservation grant-makers. NFWF works with both the public and private sectors to protect and restore our nation's fish, wildlife, plants and habitats, and supports conservation efforts in all 50 states, U.S. territories and abroad. Their grants – more than 12,100 since their founding – are made through a competitive process and awarded to some of the nation's largest environmental organizations, as well as some of the smallest. He came to NFWF after serving on Capitol Hill for 23 years, where he served as Clerk of the U.S. House of Representatives, a post he held from 1998 to 2005.

¹ The North Park MLP is one of 16 BLM is developing in Colorado, Montana, Utah and Wyoming; none has been completed and put into place. The plans seek to identify large blocks of unleased federal lands with high mineral potential that also hold special importance to hunters, anglers, hikers, off-roaders and wildlife. To avoid conflicts, the MLPs would place some lands off limits to leasing while requiring that others be developed in phases, with tighter pollution controls or with a lower density of roads and well pads.

Larry Selzer, President and CEO, The Conservation Fund (the Fund) - As president and chief executive officer of the Fund since 2001, Larry Selzer leads an executive team that charts the organization's strategy and equips the staff to succeed. Under Larry's leadership, the Fund has brought an entrepreneurial spirit to conservation, launching efforts to seed small green business, manage working forests and better integrate economic and environmental goals. Prior to joining the Fund, Larry started his professional career at the Manomet Center for Conservation Science, conducting research on marine mammal and seabird populations. Today, he serves on the boards of the American Bird Conservancy, The Outdoor Foundation, and the Sustainable Forestry Initiative.

Sharon Buccino, Director, Land and Wildlife Program, Natural Resources Defense Council (NRDC) - Sharon Buccino is a senior attorney and director of NRDC's land and wildlife program. Based in Washington D.C., Sharon has led NRDC's litigation, challenging oil and gas drilling in Wyoming, Colorado, and Utah. She is also leading NRDC's fight to stop new coal mining outside Bryce Canyon National Park. Her current work focuses on energy policy and transparent government. Prior to joining NRDC, Sharon practiced environmental and administrative law with a private firm in Washington, D.C. She also served as a law clerk for the Alaska Supreme Court.

Dave Alberswerth, Senior Policy Advisor - Energy, The Wilderness Society (TWS) - David Alberswerth joined TWS in 2001 and currently serves as a Senior Policy Advisor on energy matters. Prior to joining TWS, Dave served in various capacities within the Department of the Interior, including Director of the Department's Office of Congressional and Legislative Affairs, Special Assistant to the Secretary of the Interior, and Senior Advisor to the Assistant Secretary for Land and Minerals Management. Prior to joining the Interior Department in 1993, he was the Director of the National Wildlife Federation's Public Lands and Energy Program.

Ed Arnett, Director of the Center for Responsible Energy Development, Theodore Roosevelt Conservation Partnership (TRCP) - Ed joined TRCP in April 2012 after a career as a wildlife biologist for the U.S. Forest Service and then for the U. S. Fish and Wildlife Service's Klamath Basin National Wildlife Refuge system. Ed is an Adjunct Professor in the Department of Natural Resources Management at Texas Tech University, serves as an Associate Editor for The Wildlife Society Bulletin, is a scientific advisor for the American Wind and Wildlife Institute, and serves on the Association of Fish and Wildlife Agencies' energy and wind energy committees. He served on a U.S. Department of Interior Federal Advisory Committee for guidelines for wind energy and wildlife, and also chaired The Wildlife Society's technical review committee on wind energy impacts on wildlife.

Wed, Apr 9, 2014 at 7:00 AM

U.S. DEPARTMENT OF THE INTERIOR NEWS BRIEFING

Mobile version and searchable archives available at interior.bulletinintelligence.com.

DATE: WEDNESDAY, APRIL 9, 2014 7:00 AM EDT

TODAY'S TABLE OF CONTENTS

DOI IN THE NEWS:

- + Senate Confirms BLM Director.
- + Secretary Jewell To Deliver Whitman Commencement Address.
- + Secretary Jewell To Commemorate Marian Anderson's Concert.
- + Secretary Jewell Encourages Groups To Engage New Hunters.
- + Interior Relies On FedRAMP.
- + Report Finds Agencies Failed To Assess Security Risks At Federal Facilities.
- + Additional Coverage Of Proposed Road Through Izembek National Wildlife Refuge.
- + Initiatives To Reconnect Youth With Nature Supported.
- + Environmentalists Warn Against Climate Change "Scare Tactics."

AMERICA'S GREAT OUTDOORS:

National Park Service:

- + NPS Looking At Cherry Blossoms.
- + Joshua Tree Couple Meets With Officials To Discuss National Park Air Quality.
- + NPS, Guam EPA To Launch Pilot Project To Fight Invasive Species.

Bureau of Land Management:

- + 234 Cows Corralled In Nevada Range Dispute.
- + Iron County To Begin Horse Roundup On Thursday.
- + Finney County Commission Wants Input On Prairie Chicken Regulations.
- + Legislation Would Require BLM To Up With Sage Grouse Habitat Restoration Funding.

Fish and Wildlife Service:

- + Indiana Receives \$17 Million From FWS For Conservation Projects.
- + Habitat Degradation Compromises Waters Of Westslope Cutthroat Trout.
- + Rep. Hastings Issues Subpoena For Bladderpod Documents.
- + FWS Finalizes Listing Of Four Washington Gophers.
- + Hunters Urged To Prepare Opinions On Teal Season Decision.

US Geological Survey:

- + Study Finds Northern Sea Otters Infected With Flu.
- + USGS: Above-average Precipitation Helped Spur Deadly Washington Landslide.
- + Conservation Group Sues USGS For Grizzly Information.

SECURING AMERICA'S ENERGY FUTURE:

Renewable Energy:

- + Sen. Reid Asks Federal Agencies To Work Together On SunZia Project Line.
- + BOEM Hears Criticism Of Offshore Wind Lease.
- + FWS Report Documents Bird Injuries At California Solar Power Plants.

Onshore Energy Development:

- + Data Shows Obama Administration Leased Lowest Amount Of Federal Land In 25 Years.
- + State Officials Investigate Link Between Fracking, Earthquakes.

Offshore Energy Development:

- + BSEE Says It Will Propose Rules On Arctic Drilling Soon.
- + Report Says Dolphins, Turtles Dying In Record Numbers In Gulf.
- + Additional Coverage: BSEE Offers Grant For Arctic Oil Spill Response.

TACKLING AMERICA'S WATER CHALLENGES:

- + Groups Claim American River Flows Too Slow, Warm For Chinook Salmon And Steelhead.
- + BOR Temporarily Lowers Water Level Of Pinewood Reservoir.
- + Houseboats From New Melones Landing In Stockton.

EMPOWERING NATIVE AMERICAN COMMUNITIES:

- + Sisseton-Wahpeton Enters Land Buyback Program.
- + Interior Announces First Transfer For Cobell Scholarships..

TOP NATIONAL NEWS:

- + Obama Blasts Republicans For Blocking Paycheck Fairness Act.
- + Obama, Former Presidents To Honor Civil Rights Act This Week.
- + IMF Sees Increased US Growth Boosting Global Economy.

EDITORIAL WRAP-UP:

- + New York Times.
- + Washington Post.
- + Wall Street Journal.

BIG PICTURE:

- + Headlines From Today's Front Pages.

WASHINGTON SCHEDULE:

- + Today's Events In Washington.

LAST LAUGHS:

- + Late Night Political Humor.

DOI in the News:

SENATE CONFIRMS BLM DIRECTOR. The [AP](#) (4/9) reports that the Senate voted 71-28 Tuesday to confirm Neil Kornze as director of the BLM. Kornze joined the bureau "in 2011 and has been leading the agency as principal deputy director for the past year."

The [Elko \(NV\) Daily Free Press](#) (4/9, 22K) reports that Interior Secretary Sally Jewell said in a statement, "I'm thrilled that the Senate has confirmed Neil so that he can continue to serve at the BLM on behalf of the American people." She added, "With strong Western roots and a deep understanding of the issues, Neil for more than a decade has proven himself to be a creative and results-oriented professional, and has been a great asset to the Interior Department when it comes to promoting smart energy development and driving thoughtful landscape-level planning efforts. The BLM is one of the most complex federal land management agencies, and I know that Neil's practical and commonsense approach to problem solving will help the Bureau fulfill its multiple use and sustained yield mission."

The [Las Vegas Review-Journal](#) (4/9, 437K) reports that after the vote, Sen. Harry Reid said, "Neil is just perfect for this position. Neil really understands the role of public lands in rural America, and natural resources across the West. His expertise is going to be invaluable to the Bureau of Land Management. I have every bit of confidence that Neil Komze will be the best director we have ever had at BLM."

Also covering the story are the "Floor Action" blog of [The Hill](#) (4/9, 237K), the "In The Loop" blog of the [Washington Post](#) (4/9, Itkowitz, 4.22M), and [KTVN-TV Reno, NV](#) (4/9, 1K).

SECRETARY JEWELL TO DELIVER WHITMAN COMMENCEMENT ADDRESS. The [Walla Walla \(WA\) Union-Bulletin](#) (4/8, 38K) reports that Interior Secretary Sally Jewell will deliver the 2014 Whitman College commencement address in Walla Walla, Wash. Jewell said, "I look forward to returning to the Northwest to celebrate this milestone with the Whitman Community. Whitman is widely known for its engaged, curious and vibrant student body, and I'm honored to deliver the commencement address to the class of 2014."

Also reporting on the story is [KVEW-TV Kennewick, WA](#) (4/8, 283).

SECRETARY JEWELL TO COMMEMORATE MARIAN ANDERSON'S CONCERT. The [AP](#) (4/9) reports that Interior Secretary Sally Jewell is "joining a commemoration of Marian Anderson's concert at the Lincoln Memorial 75 years after the historic event." Jewell will "join the Washington Performing Arts Society and local school children at the memorial Wednesday."

SECRETARY JEWELL ENCOURAGES GROUPS TO ENGAGE NEW HUNTERS. For [Outdoor Life Magazine](#) (4/9, 1.12M), Ben Lamb provides highlights of his discussion with Interior Secretary Sally Jewell on "conservation, access, and the imperative to bring new folks into our hunting and fishing ranks." The conversation also included "folks from Boone & Crockett Club, Rocky Mountain Elk Foundation, Theodore Roosevelt Conservation Partnership, Montana Wildlife Federation, Backcountry Hunters & Anglers, and Trout Unlimited." Lamb notes that Jewell "challenged each group in the room to reach out beyond their memberships and to engage people whom have no concept of hunting or fishing."

INTERIOR RELIES ON FEDRAMP. The [NextGov](#) (4/9, 2K) reports that the Interior Department is "among the few agencies renting computer space in the commercial cloud without testing for security holes, according to Federal Risk and Authorization Management Program officials." The department is "throwing its trust behind FedRAMP, a cloud evaluation program that offers all agencies documentation showing that a vendor's storage, streaming video or other online service meets basic safeguards, including data backups." According to the article, "the intention is to cut acquisition costs by recycling security paperwork."

REPORT FINDS AGENCIES FAILED TO ASSESS SECURITY RISKS AT FEDERAL FACILITIES. The [Fierce Government](#) (4/9, McDermott, 224) reports that "agencies with large property holdings are failing to assess security risks at their combined 52,000 facilities across the country, a recently released Government Accountability Office report says." The GAO "doesn't state in a March 5 report that agencies are necessarily putting federal employees at risk by not following the security assessment guidelines," but "it does say that the group tasked with laying out the security guidance doesn't monitor agency compliance or have any authority to ensure it's followed." Notably, the GAO says the Interior Department, "which occupies almost 35,000 facilities, didn't follow any of the guidance laid out by the Interagency Security Committee for assessing security risks at federal facilities."

ADDITIONAL COVERAGE OF PROPOSED ROAD THROUGH IZEMBEK NATIONAL WILDLIFE REFUGE. In an op-ed for the [Anchorage \(AK\) Daily News](#) (4/8, 251K), Jim Lieb, a wildlife biologist, argues that the Interior Department's issue with a road through Izembek National Wildlife Refuge has "little to do with disturbance of waterfowl." He asks, "If a gravel road through a small portion of Izembek has a significant impact on visiting waterfowl, wouldn't that mean that there was some visual and/or auditory stimuli from the road or use of such a road reaching the waterfowl on Izembek Lagoon – is that possible, 2 miles away?" Lieb notes that "most of the waterfowl using this refuge are exposed to much higher levels of disturbance on their nesting grounds to the north, where they and their eggs are taken by subsistence users, and to south on their wintering areas, adjacent to much greater number of roads, traffic and noise – plus hunting seasons."

Additional coverage of Alaska's intent to sue for a road through the Izembek National Wildlife Refuge was provided by the [Environment & Energy Publishing](#) (4/9, 705) and the "Govbeat" blog of the [Washington Post](#) (4/8, 4.22M).

INITIATIVES TO RECONNECT YOUTH WITH NATURE SUPPORTED. In an op-ed for the [Asbury Park \(NJ\) Press](#) (4/9, 372K), Michele S. Byers, the executive director of the New Jersey Conservation Foundation, writes in support of the "Children's Outdoor Bill of Rights," which was introduced recently in the New Jersey state Senate. He notes that "Go outside and play" is "a message that's spreading across the nation." In March, Interior Secretary Sally Jewell "announced an ambitious federal initiative to reconnect America's young people to the outdoors."

The piece also appears at the [Morristown \(NJ\) Daily Record](#) (4/9, 72K).

ENVIRONMENTALISTS WARN AGAINST CLIMATE CHANGE "SCARE TACTICS." In an op-ed for the New York Times (4/9, Subscription Publication, 9.65M) titled, "Global Warming Scare Tactics," Ted Nordhaus and Michael Shellenberger, chairman and president, respectively, of the Breakthrough Institute, "an environmental research organization," write that "if you were looking for ways to increase public skepticism about global warming, you could hardly do better than" Showtime's "forthcoming...series on climate change" titled, "Years of Living Dangerously," which is "replete with images of melting glaciers, raging wildfires and rampaging floods." According to the authors, "there is every reason to believe that efforts to raise public concern about climate change by linking it to natural disasters will backfire." They go on to note that since Al Gore's "An Inconvenient Truth" helped "popularize...the idea that today's natural disasters are increasing in severity and frequency because of human-caused global warming," the percent of those "telling Gallup that the media was exaggerating global warming" has climbed to "42 percent...from about 34 percent."

America's Great Outdoors:

National Park Service:

NPS LOOKING AT CHERRY BLOSSOMS. [WRC-TV Washington](#) (4/9, 312K) reports that Tuesday was "originally predicted as the beginning of peak bloom for the cherry blossoms along the Tidal Basin," but "the trees aren't quite there yet." On Tuesday, the NPS "will be looking at trees to pinpoint exact peak, which is when 70 percent of the Yoshino Cherry trees along the Tidal Basin have bloomed."

JOSHUA TREE COUPLE MEETS WITH OFFICIALS TO DISCUSS NATIONAL PARK AIR QUALITY. The [Hi-Desert \(CA\) Star](#) (4/9, 23K) reports that "a Joshua Tree couple recently traveled to the nation's capital to voice their concerns over poor air quality in Joshua Tree National Park." Melissa and Peter Spurr "met with officials from the Environmental Protection Agency and the Department of the Interior on March 25." The couple "told lawmakers that poor air quality could harm the area's economy."

NPS, GUAM EPA TO LAUNCH PILOT PROJECT TO FIGHT INVASIVE SPECIES. The [Pacific \(GUM\) Daily News](#) (4/9, 61K) reports that in partnership with the NPS, the Guam EPA will "launch a pilot project using an air curtain burner to dispose of green waste without spreading invasive species." According to the article, "the pilot project will begin 2 p.m. Monday at the War in the Pacific National Park in Asan with a demonstration using the air curtain burner and how it works."

Bureau of Land Management:

234 COWS CORRALLED IN NEVADA RANGE DISPUTE. The [AP](#) (4/9) reports that "officials say cowhands rounded up more cattle from federally controlled range land where a southern Nevada rancher claims a longstanding right to graze his herd." The BLM and NPS said Tuesday that "234 cows have been corralled since Saturday from a 1,200-square-mile area closed to the public for the operation about 80 miles northeast of Las Vegas."

Meanwhile, the [Los Angeles Times](#) (4/9, Glionna, 3.46M) reports that "federal authorities were on the defensive Tuesday during the fourth day of their planned monthlong offensive to remove an outspoken rancher's cattle from

lands administered by the Bureau of Land Management." According to the article, "as dozens of protesters chanted slogans in designated 'First Amendment areas,' armed federal officials oversaw the roundup of hundreds of cattle belonging to Nevada cattle rancher Cliven Bundy, who for decades has thumbed his nose at Washington, refusing to pay grazing fees to run 900 cattle on federal land." Critics are "questioning the rationale of the cash-strapped BLM spending resources to round up the cattle."

Additional coverage was provided by the [Deseret \(UT\) News](#) (4/9, 610K) and [KUTV-TV Salt Lake City](#) (4/9, 7K).

BLM Backs Off Plan To Sell Seized Cattle in Utah. The [Salt Lake \(UT\) Tribune](#) (4/9, 470K) reports that "cattle seized from public land in Nevada were once headed to Richfield for auction — but federal officials have changed their plans after Utah leaders argued the animals would threaten the state's \$1 billion livestock industry." Utah Gov. Gary Herbert and "other Utah political leaders say the cows should remain in Nevada." In an April 2 letter, Herbert wrote, "There are serious concerns about human safety and animal health and well-being if these animals are shipped to and sold in Utah."

BLM Urged To Sell Land To Local Owners. In an editorial, the [Las Vegas Review-Journal](#) (4/9, 437K) criticizes the roundup. Instead, the paper suggests that the BLM should sell off more of its land holdings to local owners who would be far better caretakers.

IRON COUNTY TO BEGIN HORSE ROUNDUP ON THURSDAY. The [Salt Lake \(UT\) Tribune](#) (4/9, 470K) reports that Iron County officials and ranchers will begin "rounding up and moving horses Thursday from Bureau of Land Management (BLM) range in southwestern Utah." David Miller, chair of the Iron County Commission, on Tuesday said, "Rather than putting ourselves in a position to end up getting injunctions and lawsuits, we are going to stay in the clear and start by gathering horses on private land. We will focus on astray and feral horses so we don't get into a sticking point with state or federal laws." Miller said that "the roundup will focus on branded horses with 'no apparent owner.'"

The [St. George \(UT\) Spectrum](#) (4/8, 48K) editorializes that "the county is embarking on a big gamble." It notes that "it's easy to make strong statements about rounding up horses with or without the federal government's help. It's quite another matter, however, to commit taxpayers to a potentially expensive action."

Additional coverage was provided by the [Salt Lake \(UT\) Tribune](#) (4/9, 470K).

FINNEY COUNTY COMMISSION WANTS INPUT ON PRAIRIE CHICKEN REGULATIONS. The [AP](#) (4/9) reports that Finney County commissioners are "asking the federal government to ensure they will have input into regulations for the lesser prairie chicken, which was designated last month as a threatened species." The commission sent a letter Monday to the BLM "asking for coordinating status while the agency revises its management plan for the lesser prairie chicken and its habitat." The BLM had "asked in a letter for input from Kansas counties affected by the decision, but commissioners were unhappy that the letter mentioned cooperation, rather than coordination."

LEGISLATION WOULD REQUIRE BLM TO UP WITH SAGE GROUSE HABITAT RESTORATION FUNDING. The [Reno \(NV\) Gazette-Journal](#) (4/8, 166K) reports that Rep. Mark Amodei "introduced legislation Tuesday to ensure the federal agencies that manage the bulk of Nevada terrain populated by the greater sage grouse come through with funding for habitat restoration." Amodei said "his bill aims to prevent the state and private landowners from bearing the brunt of costs associated with restoring sagebrush habitat needed by grouse, which the US Fish and Wildlife Service could list as a threatened or endangered species by late 2015." Amodei said, "You own the land, you have responsibility. We're trying to wake up the federal land managers that they need to take care of their own property. They have our attention. We're trying to get theirs."

Fish and Wildlife Service:

INDIANA RECEIVES \$17 MILLION FROM FWS FOR CONSERVATION PROJECTS. The [Franklin \(IN\) Daily Journal](#) (4/9, 51K) reports that "the state of Indiana is receiving \$17 million from the U.S. Fish and Wildlife Service for conservation and recreation projects." The funds come "from excise taxes on fishermen, hunters and boaters."

HABITAT DEGRADATION COMPROMISES WATERS OF WESTSLOPE CUTTHROAT TROUT. The New York Times (4/9, Santella, Subscription Publication, 9.65M) reports that “modern times have been hard” on the Westslope cutthroat trout, “which require cold, clean water to thrive.” The article notes that “habitat degradation — in part from poor logging, grazing and mining practices — has compromised some cutthroat waters.” Wade Fredenberg, a fishery biologist with the FWS, based in Kalispell, said, “The biggest threat to genetically pure westslope cutthroat is hybridization with rainbows. People like to catch rainbows, as they grow larger than the cutts. But when the rainbows breed with the native cutts, the resulting progeny” — called cutt-bows — “are not as well adapted to the ecosystem, and less likely to survive in the long run. Having rainbows and cutt-bows in these rivers is like finding feral pigs instead of mountain goats as you drive the Going-to-the-Sun Road in Glacier.”

REP. HASTINGS ISSUES SUBPOENA FOR BLADDERPOD DOCUMENTS. The Tri-City Herald (WA) (4/8, 115K) reports that Rep. Doc Hastings has “issued a subpoena to try to get answers on the US Fish and Wildlife Service’s recent decision to list the White Bluffs bladderpod as a threatened species.” Hastings said in a statement, “This step is necessary to put an end to this deliberate stonewalling by the administration. Americans have a right to know what science and data went into a listing decision that could have serious economic impacts.”

FWS FINALIZES LISTING OF FOUR WASHINGTON GOPHERS. The Environment & Energy Publishing (4/9, 705) reports that the Interior Department has “listed four kinds of Mazama pocket gophers as ‘threatened’ under the Endangered Species Act while also issuing a special rule designed to protect farmers, ranchers and airports from new regulations.” The FWS “listings include the Olympia, Roy Prairie, Tenino and Yelm pocket gophers in Washington state’s Thurston and Pierce counties along the southern edge of Puget Sound.” The agency “also designated 1,607 acres in Thurston as critical habitat for the Olympia, Tenino and Yelm gophers.”

Also reporting on the story are the Tri-City Herald (WA) (4/9, 115K) and the Bellingham (WA) Herald (4/9, 113K).

HUNTERS URGED TO PREPARE OPINIONS ON TEAL SEASON DECISION. In his column for the St. Cloud (MN) Times (4/8, 77K), Jerry Carlson write that if the FWS “opens the option for a teal season, there will probably be an opportunity for hunters to share their thoughts with the DNR.” He adds that “this is a good time to formulate opinions so ideas are ready if the time comes.”

US Geological Survey:

STUDY FINDS NORTHERN SEA OTTERS INFECTED WITH FLU. In a press release, the USGS (4/9) announces that “northern sea otters living off the coast of Washington state were infected with the same H1N1 flu virus that caused the world-wide pandemic in 2009,” according to a new USGS and Centers for Disease Control and Prevention study. According to the agency, “during an August 2011 health monitoring project, USGS and CDC scientists found evidence that the Washington sea otters were infected with the pandemic 2009 H1N1 virus, although the exact date and source of exposure could not be determined.” The findings suggest that human flu can infect sea otters.

USGS: ABOVE-AVERAGE PRECIPITATION HELPED SPUR DEADLY WASHINGTON LANDSLIDE. The Environment & Energy Publishing (4/9, 705) reports that “many unanswered questions remain surrounding last month’s massive, deadly landslide in northwest Washington, but geologists are fairly certain that higher-than-average rainfall played an important role.” Experts with the USGS say “precipitation in the region surrounding Oso during February and March was 150 to 200 percent of the long-term average, likely helping to destabilize the 10 million cubic yards of sediment that buried 30 homes on March 22.” Jonathan Godt of USGS’s Geologic Hazards Science Center in Denver, said, “It traveled exceptionally far and exceptionally fast, and that’s why it was exceptionally destructive.”

CONSERVATION GROUP SUES USGS FOR GRIZZLY INFORMATION. The AP (4/9) reports that a conservation group is suing the USGS “for information on threatened grizzly bears in northwestern Montana.” The Alliance for the Wild Rockies says the USGS “failed to respond to a Freedom of Information Act request for reports and findings on the Cabinet-Yaak Grizzly Bear DNA Project.”

Securing America’s Energy Future:

Renewable Energy:

SEN. REID ASKS FEDERAL AGENCIES TO WORK TOGETHER ON SUNZIA PROJECT LINE. The Environment & Energy Publishing (4/9, 705) reports that Senate Majority Leader Harry Reid is "nudging the Defense Department to drop objections to a massive New Mexico-to-Arizona transmission line project near an Army missile testing range and to work with the Interior Department to devise a plan to get the power line built." Reid "recently submitted a two-page letter to Defense Secretary Chuck Hagel and Interior Secretary Sally Jewell asking DOD to work with Interior 'to find and deploy' a workable solution that 'provides for the rapid construction' of the proposed SunZia Southwest Transmission Line Project."

BOEM HEARS CRITICISM OF OFFSHORE WIND LEASE. Newsday (4/9, 1.5M) reports that "tensions between ocean fishing interests and offshore-wind-energy planners were evident at a meeting in Montauk Tuesday as federal regulators set the stage for leasing hundreds of miles of the Atlantic for wind farms." BOEM representatives "got an occasional earful from local fishermen and -women who worry the plans could damage or close off large swaths of fishing grounds." Maureen Bornholdt, program manager for the bureau's renewable-energy programs, "emphasized that Tuesday's meeting was designed to address such concerns." Bornholdt "acknowledged more information is needed to understand the impacts and encouraged fishermen to stay in contact with the bureau as the leasing process proceeds."

Also reporting on the story is the North Fork (NY) East End Beacon (4/8).

FWS REPORT DOCUMENTS BIRD INJURIES AT CALIFORNIA SOLAR POWER PLANTS. KCET-TV Los Angeles (4/9, 15K) reports that a report by the FWS "documents a disturbing amount of bird injuries at three large California desert solar power plants, and says that there are no easy fixes to the issue." The report, compiled by the FWS's National Fish and Wildlife Forensics Laboratory, "describes the results of examinations of 233 carcasses of birds found at the Ivanpah Solar Electric Generating System (ISEGS) south of Las Vegas, the Desert Sunlight facility near Joshua Tree National Park, and the Genesis Solar project west of Blythe in Riverside County." According to the article, "the occasionally gruesome report indicates that injuries from concentrated solar flux and from impact with mirrors or photovoltaic panels constitute the two largest solar facility threats to wild birds, and suggests that the limited scope of carcass surveys at solar projects may be obscuring the true magnitude of bird mortalities they cause."

Onshore Energy Development:

DATA SHOWS OBAMA ADMINISTRATION LEASED LOWEST AMOUNT OF FEDERAL LAND IN 25 YEARS. The Daily Caller (4/9, Bastasch, 408K) reports that the Obama Administration has "issued the lowest number of drilling leases since at least 1988," according to government data. The BLM said that "the total number of oil and gas drilling leases issued in 2013 reached a nearly three-decade lows." The agency "says it issued 1,468 drilling leases last year, totaling 1.17 million acres of federal land — the lowest figures since 1988, which is the oldest year for which the BLM has data." And "when it comes to actually approving drilling permits in 2013, the Obama administration approved the lowest number since 2002 — only 3,770 drilling permits."

STATE OFFICIALS INVESTIGATE LINK BETWEEN FRACKING, EARTHQUAKES. Drawing on a Bloomberg News article, The Hill (4/9, Cama, 237K) reports in its "E2 Wire" blog that officials in states with high natural gas production are looking in to whether fracking has caused a recent uptick in earthquakes. The Hill reports that the Bloomberg News story indicated that "between the beginning of the year and April 6, Oklahoma had more magnitude 3 or higher earthquakes than in all of 2013." The Hill casts research on the subject as "inconclusive," noting Oklahoma has stopped operations at two fracking sites while investigators look in to earthquakes in the area.

Offshore Energy Development:

BSEE SAYS IT WILL PROPOSE RULES ON ARCTIC DRILLING SOON. A report online for the "E2 Wire" blog of The Hill (4/8, Cama, 237K) covers the anticipation surrounding Arctic drilling rules soon to be proposed by the Interior Department's Bureau of Safety and Environmental Enforcement. According to BSEE Director Brian

Salerno yesterday on the agency's website, "This forthcoming rule will put important safeguards in place for future Arctic drilling operations," dealing with potential problems such as preparedness for oil spills. Salerno continued in his post online, "We hope to release the proposed rule shortly and open it for public comment, continuing an important dialogue on drilling operations in the Arctic that has already included numerous consultations and public meetings."

Also reporting on the story is the [Law 360](#) (4/9, 18K).

REPORT SAYS DOLPHINS, TURTLES DYING IN RECORD NUMBERS IN GULF. The [National Geographic](#) (4/9, 42.25M) reports that "four years after the biggest oil spill in US history, several species of wildlife in the Gulf of Mexico are still struggling to recover, according to a new report released today." In particular, "bottlenose dolphins and sea turtles are dying in record numbers, and the evidence is stronger than ever that their demise is connected to the spill, according to Doug Inkley, senior scientist for the National Wildlife Federation, which issued the report." Inkley said, "The oil is not gone: There is oil on the bottom of the Gulf, oil is washing up on the beaches, and oil is still on the marshes."

ADDITIONAL COVERAGE: BSEE OFFERS GRANT FOR ARCTIC OIL SPILL RESPONSE. Additional coverage that the BSEE is offering grant money for research into developing technologies to respond to oil spills in icy Arctic conditions was provided by the [US News & World Report](#) (4/9, Neuhauser, 645K).

Tackling America's Water Challenges:

GROUPS CLAIM AMERICAN RIVER FLOWS TOO SLOW, WARM FOR CHINOOK SALMON AND STEELHEAD. The [Sacramento \(CA\) Bee](#) (4/8, 687K) reports that "the federal government's operation of Folsom and Nimbus dams is harming fall-run Chinook salmon and steelhead in the American River, several environmental and fishing groups allege in a complaint filed this week with the state." The groups are pressing the State Water Resources Control Board to amend the BOR's "permits to require colder and faster river flows from the two dams." Stephen Green, president of Save the American River Association, said, "We've got to have a guaranteed higher flow, and there have to be modifications to Folsom Dam that will allow them to tap the coldest (water) pool in the reservoir. When temperatures are high and flows are low, we know that fish are being killed, and it's not just this year. It's been going on for decades."

BOR TEMPORARILY LOWERS WATER LEVEL OF PINWOOD RESERVOIR. The [Estes Park \(CO\) Trail-Gazette](#) (4/9, 13K) reports that "water managers lowered the water level in Pinewood Reservoir over the weekend to get ready for some maintenance work on a canal downstream." According to BOR spokeswoman Kara Lamb, the agency is performing "routine maintenance this week on the Charles Hansen Feeder Canal, which takes water north to Horsetooth Reservoir."

HOUSEBOATS FROM NEW MELONES LANDING IN STOCKTON. [KXTV-TV Sacramento, CA](#) (4/8, 25K) reports that "the Stockton waterfront is becoming a busier spot because of California's drought and the low water level at New Melones Reservoir." The BOR has "told boat owners they need to remove their boats from the reservoir."

Empowering Native American Communities:

SISSETON-WAHPETON ENTERS LAND BUYBACK PROGRAM. The [AP](#) (4/9) reports that the Sisseton-Wahpeton Oyate Tribe has "agreed to enter a federal land buyback program that aims to help Native American tribes purchase parcels of reservation land that are owned by multiple people." The agreement will "help the tribe in the Lake Traverse Reservation, located in northeast South Dakota and southeast North Dakota, host outreach programs and solicit interest from owners in an effort to consolidate so-called fractionated interests." Interior Secretary Sally Jewell said in a statement, "We know that Nation-to-Nation cooperation and collaboration is the key to successfully implementing this historic opportunity to reduce fractionation and strengthen tribal sovereignty." Coverage by the AP was also picked up by the [Rapid City \(SD\) Journal](#) (4/9, 141K), [KOTA-TV Rapid City, SD](#) (4/9, 890), and [KELO-TV Sioux Falls, SD](#) (4/9, 25K).

The [Nation Sun News](#) (4/9) reports that Chairman Robert Shepherd said, "The Sisseton-Wahpeton Oyate of the Lake Traverse Reservation has been actively acquiring fractionated lands for over three decades in an effort to

reduce fractionation on the reservation. The Cobell Land Buy-Back Program will further our efforts to acquire more fractionated lands, increase the tribal land base and significantly decrease further fractionation for our children and future generations. Our previous and continued efforts are made in the spirit of our inherent tribal sovereignty and as a means of self-determination."

INTERIOR ANNOUNCES FIRST TRANSFER FOR COBELL SCHOLARSHIPS.. The Indian Country Today Media Network (4/6, 45K) reports that on April 2 the Interior Department that "quarterly transfers of nearly \$580,000 are set to begin this week to the American Indian College Fund." Interior Solicitor Hilary Tompkins said, "The Scholarship Fund is an important tool to help students across Indian country pursue higher education opportunities imperative to their success in the workplace and to the creation of the next generation of Indian leaders."

Top National News:

OBAMA BLASTS REPUBLICANS FOR BLOCKING PAYCHECK FAIRNESS ACT. President Obama's appearance at the White House on Tuesday, during which he touted two executive orders meant to address the gender pay gap and called on Republicans to support the Paycheck Fairness Act, generated a substantial amount of very positive coverage for the Administration and Democrats in Congress. All three network newscasts had segments on the pay equity debate, including reports from NBC Nightly News (4/8, story 2, 0:35, Williams, 7.86M) and ABC World News (4/8, lead story, 2:40, Sawyer), which led with the story, that closely echoed the White House's narrative. On ABC World News (4/8, lead story, 2:40, Sawyer), Mara Schiavocampo noted that the Paycheck Fairness Act is "set to be considered by the Senate soon, but it is unlikely to get through the GOP-led House" where "the right" has "call[ed] it a 'bizarre obsession.'"

Much of the print and online coverage is critical of the statistics employed by the President and his allies, and casts the executive orders as part of a "concerted election-year push," as the AP (4/9, Kuhnenn, Fram) puts it. Likewise, under the headline, "Democrats Hope Equal Pay Issue Will Mobilize Women Voters," McClatchy (4/9, Wise, Lightman, Subscription Publication, 23K) says the "Democratic blitz this week for new orders and laws promising equal pay for women is a key agenda item the party hopes will boost turnout this fall among its most loyal voters." McClatchy adds that "by reviving a familiar line of attack from the 2012 campaign – that Republicans are waging a 'war on women'... Democrats aim to capitalize on the party's longstanding edge among women voters," and "hope to force Republicans to oppose popular measures...thus alienat[ing] women voters."

On NBC Nightly News (4/8, story 2, 0:35, Williams, 7.86M), Brian Williams reported that "April 8th is an important date for women because they say for the average American woman to earn what the average American male was paid last year – she has to work all of 2013 plus all the way through today into 2014." Williams said that on Tuesday, "both parties staged events to show their support for women," and "the President issued executive orders." However, Williams added, "At the end of the day the protests nor the orders changed anything, American women still make an estimated 77 percent of what men do."

At the opening of ABC World News (4/8, lead story, 2:40, Sawyer), Diane Sawyer said "the explosive issue of equal pay for equal work is front and center in the news" as "President Obama said it's time to take action, signing an executive order aimed directly at a workplace secret – the gap in pay between men and women doing the same job." ABC's Mara Schiavocampo went on to report that on Tuesday, the President said it is "time to go on the attack." President Obama was shown saying, "I have two daughters and I expected them to be treated like anyone else's sons." According to Schiavocampo, "The White House hopes highlighting the issue of fair pay will help Democrats at the polls in November."

On the CBS Evening News (4/8, story 2, 3:10, Pelley), Scott Pelley said the President "signed an executive order designed to boost equal pay for women," which "makes it easier for women who work for Federal contractors who find out what their coworkers are paid." Pelley added that the President "says...the Census Bureau found that women make 77 cents for every dollar earned by a man," but, according to Pelley, "that is one of the more lopsided figures in an issue that is hotly debated," and "another Federal study...said disparity is more like 88 cents for every dollar." Correspondent Dean Reynolds went on to report that "while working mothers seek flexibility, corporations value long hours men put in," and "women...tend to hold jobs that pay less," including teaching positions.

The Daily Caller (4/8, Stafford, 408K) reported that at Tuesday's White House briefing, Reuters White House correspondent Jeff Mason noted that "outside economists say that the data that the president is citing, the 77 cents phrase, is wrong." According to the Daily Caller, White House press secretary Jay Carney replied, "Well that's absolutely not the case, there's some economists who have different views on what it means but to say 'economists,' I mean from Reuters I would expect something a little more precise." The Daily Caller says that "off hand barb at a well respected news agency brought boos and jeers from the assembled reporters." Mason, in his report for Reuters (4/9, Mason), notes that AEI's Andrew Biggs says, "The idea that there's a 23 percent pay gap between men and women based on discrimination is flat-out false."

USA Today (4/9, Madhani, 5.82M) reports that on Tuesday, the President "touted executive action he was taking to help narrow the gender pay gap, while pressing Republican lawmakers to get behind the proposed Paycheck Fairness Act," which USA Today says "has little chance in the GOP-controlled House." The President is quoted as saying, "I don't know why you would resist the idea that women should be paid the same as men and then deny that that's not always happening out there." The Wall Street Journal (4/9, Favole, Subscription Publication, 5.51M) reports that the President also said, "A woman's got to work about three more months in order to get what a man got, because she's paid less. That's not fair. That's like adding an extra 6 miles to a marathon."

Under the headline, "Democrats Use Pay Issue In Bid For Women's Vote," the New York Times (4/9, Weisman, Subscription Publication, 9.65M) reports that "in a coordinated effort...that bracketed President Obama's signing of executive measures," Democrats "marched to the Senate floor to inveigh against pay inequity and their Republican counterparts." The Times notes that on Wednesday the Senate will vote on the Paycheck Fairness Act even though Democrats "know the legislation will fail." In fact, according to the Times, "that is part of the plan."

The AP (4/9, Kuhnenn, Fram) notes that the President, "surrounded by women advocates and accompanied by Lilly Ledbetter, a woman whose namesake legislation on pay equity was the first bill Obama signed into law in 2009," said, "This is about Republicans seemingly opposing any efforts to even the playing field for working families."

Jennifer Epstein, in a piece for Politico (4/8, Epstein, 73K), says the President's actions "fit squarely into the playbook he's been executing this year: using executive orders in lieu of congressional action, arguing that Republican opposition shows just how out-of-touch they are with the needs of working Americans." In a blog post for TIME (4/8, Alter, 24.1M), Charlotte Alter notes that Republicans make the case that "the wage gap is a trumped-up issue Democrats are using to bolster female support."

Dana Milbank, in his column for the Washington Post (4/9, 4.22M), says Democrats "are indeed making partisan attempts to embarrass Republicans on issues important to women," and adds that "when one side complains that the other is 'playing politics,' it's a safe bet that those doing the complaining are losing."

White House's Own Wage Gap Continues To Draw Media Attention. On ABC World News (4/8, lead story, 2:40, Sawyer), Mara Schiavocampo reported that Republicans "point...out that women in White House make 88 cents to a man's dollar." Notably, earlier on Tuesday, ABC's chief White House correspondent Jon Karl had long, contentious back-and-forth with White House press secretary Jay Carney on the White House's use of gender pay gap statistics and its own 12% disparity, but ABC did not show any of that exchange, and Karl did not appear at all on ABC World News on Tuesday. RealClearPolitics (4/8, 182K) has posted a clip of Karl and Carney debating the data from the White House press briefing.

USA Today (4/9, Madhani, 5.82M) reports that on Tuesday, "Republicans dismissed Obama's executive action and Senate Democrats' push on the Paycheck Fairness Act as a 'desperate political ploy,'" and "noted that the White House has its own gender pay gap."

The New York Times (4/9, Baker, Subscription Publication, 9.65M) reports that on Tuesday, the President "made no mention of a recent study that found that women in his own White House make 88 cents for every dollar men do." According to the Times, White House officials "have said women earn the same salary as men of the same rank but that there are more women in lower-paying jobs," which is "an explanation similar to that often given by private-sector employers." The Times adds that "critics have said both of those statistics are misleading because

they are averages of all men and women in all jobs, rather than apples-to-apples comparisons of men and women in equivalent jobs with equivalent experience.”

Under the headline, “In Obama’s White House, Women Earn 89 Cents On The Dollar,” Vox’s (4/8) Danielle Kurtzleben notes that “an analysis from the right-leaning American Enterprise Institute found” that “women working in the White House have a median pay of nearly \$62,000, while the median pay for men is \$70,000.” Kurtzleben adds that “in his 2014 State of the Union, Obama called it an ‘embarrassment’ that women made 77 percent of what men made, meaning 89 percent might not exactly be a point of pride.” Joe Coscarelli, in a post for New York’s Daily Intelligencer (4/8, 710K) blog, also points out that some “say the White House is part of the problem, paying women, on average, 88 cents to a man’s dollar.”

Elizabeth Barber, in a piece for the Christian Science Monitor (4/8, 566K), says that on Tuesday, Comey “said that men and women who work the same White House jobs make the same salaries,” and “the pay difference results from the fact that women outnumber men in the administration’s lower-level jobs.”

Melinda Henneberger, in an analysis for the Washington Post (4/9, Henneberger, 4.22M) titled, “Equal Pay Legislation – Desperate Political Ploy Or Good Politics?” says “conservatives continue to argue simultaneously that the wage gap is a myth and that the wage gap does exist – at the White House, that is.”

The Washington Times (4/9, Wolfgang, 455K) reports that the RNC “released data Tuesday showing that a number of Senate Democrats pay their male staffers more than their female staffers.” In another post, the Washington Times (4/9, Beacon, 455K) notes that “the average female salary is \$11,505 lower than the average male salary in” Sen. Richard Durbin’s office, and “four of the five highest paid staffers on Durbin’s staff are men.”

White House Economist Retracts Claim That Women Make 23% Less Than Men Who Have Same Jobs.

Linda Feldmann, in a piece for the Christian Science Monitor (4/8, 566K), says one “lingering question is whether it’s fair to say that women are paid 77 cents on the dollar compared with men.” Feldmann notes that during a “conference call Monday, White House economist Betsey Stevenson had to correct herself on that point.” Stevenson claimed that “women are stuck at 77 cents on the dollar...and we see it when men and women are working side by side doing identical work.” However, according to Feldmann, “when asked for clarification...Stevenson corrected herself,” saying, “If I said 77 cents was equal pay for equal work, then I completely misspoke.”

Collins, Murkowski, Ayotte And Fischer Offer PFA Alternative. However, according to Roll Call (4/8, Sanchez, Subscription Publication, 76K), Senate Republicans “aren’t sweating a ramped-up push...for new pay equity legislation,” and are “pushing forward women Republicans to rebut charges they have a woman problem.” Roll Call notes that Republicans “offered a GOP alternative to the Democrats’ bill, sponsored by Republican women senators” Deb Fischer, Susan Collins, Kelly Ayotte and Lisa Murkowski. Roll Call reports that Fischer “said her amendment would address issues Republicans have with the Democratic proposal, including negative effects to merit pay, rigid pay scales and removal of caps on punitive actions.”

Similarly, Politico (4/8, Everett, 73K) reported that Senate Republicans “aren’t worried about suffering a political backlash if they follow through with plans to block the Paycheck Fairness Act,” despite “risking legions of negative headlines and coordinated Democratic attacks on the GOP as a party out of touch with women.” Politico notes that Ayotte called the PFA “a trial lawyer’s giveaway.”

The Huffington Post (4/8, Mcauliff, 11.54M) reports that on Tuesday, Rep. Lynn Jenkins (R-KS) said, “Many ladies I know feel like they are being used as pawns, and find it condescending [that] Democrats are trying to use this issue as a political distraction from the failures of their economic policy.”

Davidson: Obama Should Use Executive Action To Implement EDNA. Joe Davidson, in a Washington Post (4/9, 4.22M) Federal Diary column titled, “Obama’s Actions On Equal Pay Are Good, But Not Enough,” says “another executive order...seems to be languishing in the White House,” the “proposed executive action would prohibit federal contractors from discriminating against lesbian, gay, bisexual and transgender (LGBT) people.” Davidson adds that “like the Paycheck Fairness Act, the Employment Non-Discrimination Act (EDNA)...is stalled in Congress because of Republican opposition.” Davidson says that the President “could take action to ban discrimination by contractors on the basis of sexual orientation and identification, just as he did to combat pay

discrimination against women," and adds, "why he won't is a mystery."

OBAMA, FORMER PRESIDENTS TO HONOR CIVIL RIGHTS ACT THIS WEEK. USA Today (4/9, Jackson, 5.82M) reports that President Obama and three of his predecessors will honor the 50th anniversary of the Civil Rights Act with speeches at the LBJ library in Austin this week. At the opening of the summit on Tuesday, Jimmy Carter said that while the Act did many "wonderful things," the country is still "falling short" in some areas, "notably racial disparities in employment and education." Bill Clinton will speak on Wednesday, while George W. Bush will speak on Thursday. Obama will also give the keynote address on Thursday.

The New York Times (4/9, Montgomery, Subscription Publication, 9.65M) reports Carter "targeted the mistreatment of women for the next front in the civil rights movement, calling for a multifaceted attack against abuses from pay discrimination in the workplace to rape on college campuses and global sex-trafficking." Carter argued that most sexual assaults at colleges and universities, as well as in the military, go unreported.

NYTimes, WPost Analyses: Democrats Increasingly Embracing LBJ. In a front-page analysis piece, the Washington Post (4/9, A1, Tumulty, 4.22M) reports that in the run-up to the 1992 election, Bill Clinton delivered a 20-minute address at the LBJ library, but "never once mentioned the name Lyndon B. Johnson." On Wednesday, the Post says, Clinton will "embrace Johnson and his legacy as a liberal reformer — as Democrats have finally begun to do." The Post says that the "new warmth" towards LBJ "comes as his party has moved to the left in recent years."

Also on its front page, the New York Times (4/9, A1, Baker, Subscription Publication, 9.65M) reports that Obama's limited actions on gender equality on Tuesday raise questions about whether it is "even possible for a president to do big things anymore." LBJ "represented the high-water mark for American presidents pushing through sweeping legislation," and no president since "has approached that level of legislative success, although there are people who argue that is a good thing because government should not be so intrusive." At this point, Obama "has become a symbol of liberal frustration over his inability to use government to bring about change."

IMF SEES INCREASED US GROWTH BOOSTING GLOBAL ECONOMY. Bloomberg News (4/9, Rastello, 2.76M) reports that the IMF said on Tuesday that rising US growth this year and next "will help the world economy withstand weaker recoveries in emerging markets including Brazil and Russia." The IMF said that the US is "providing a 'major impulse' to global growth that's still lumbering amid weakness in Japan and parts of Europe." The IMF also "urged emerging markets to prepare for flows of capital back to advanced economies," and called on the ECB to increase monetary easing to avoid deflation.

The New York Times (4/9, Lowrey, Subscription Publication, 9.65M) reports that the IMF sees the global economy growing 3.6% this year and 3.9% next year, up from 3% in 2013. The IMF projected that the US economy will grow about 3% both in 2014 and 2015, up from 1.9% in 2013.

EIA Projects No Jump In Gas Prices This Summer. The New York Times (4/9, Krauss, Subscription Publication, 9.65M) reports that the Energy Information Agency projects that this summer season, "average gasoline prices should actually be lower than current prices and close to or slightly below those of last summer." EIA "projected on Tuesday that a gallon of regular gasoline would cost \$3.57 on average nationally, down a penny from last summer." According to AAA, the average price of a gallon of regular gas in the US on Tuesday was \$3.59.

Stocks Up Slightly On Tuesday. The Wall Street Journal (4/9, Kilgore, Subscription Publication, 5.51M) reports that US stock markets rose modestly on Tuesday as investors waited for the Q2 earnings to be released. The Dow Jones Industrial Average rose 10.27 points to 16256.14 following a day of volatile trading. The S&P 500 rose 6.92 points to 1851.96, while the Nasdaq Composite Index rose 33.23 to 4112.99.

Harsh Winter May Weigh On Earnings, Stocks. USA Today (4/9, Shell, 5.82M) reports that since the start of the year, stocks have been "dragged down" by the Ukraine crisis, a "mini-crash" in the Internet and biotech sectors, and concerns about the Fed's taper. Now, the paper says, "a potential new worry is the dearth of profit growth expected from companies in the Standard & Poor's 500-stock index in the first quarter, due in large part to business disruptions caused by nasty winter weather."

Editorial Wrap-Up:

NEW YORK TIMES. "After Rwanda's Genocide." In an editorial, the New York Times (4/9, Subscription Publication, 9.65M) says that in the two decades since the genocide by Hutu extremists, Rwanda "has done an impressive job of rebuilding its institutions and economy." However, the genocide "has left a legacy of unanswered questions and uncorrected failures." The Times calls on France "to open its records to public examination," noting that France "had close relations to the Hutu-dominated government that planned and incited the genocide." In addition, the Times says President Paul Kagame must be "be held accountable for abuses in Rwanda and outside its borders, where he has gone after critics in Uganda, Kenya, South Africa and Europe."

"Gov. Cuomo Drops The Ball." An editorial in the New York Times (4/9, Board, Subscription Publication, 9.65M) says that New York Gov. Andrew Cuomo seemed to be "caught off-guard" by state lawmakers' resistance to his plan "to provide public financing for basic college-education programs in state prisons." The Times argues that the opposition "was predictable wailing by upstate Republicans espousing retrograde views and trying to protect their valuable prison industry." The Times adds that while that Cuomo "insists the program will still begin this year, financed instead by as-yet-unnamed private donors and nonprofit organizations," for the program to "thrive and expand over the long term, it will need the stability of public financing."

"Keeping Track: April 9, 2014." In this week's edition of the New York Times' (4/9, Subscription Publication, 9.65M) "Keeping Track" feature on its editorial page, the Times examines House Speaker Boehner's refusal to hold a vote on extending jobless benefits for the long-term unemployed and the need for a financial transactions tax.

"Closing Ports To Stolen Fish"

WASHINGTON POST. "Increase The Pressure." An editorial in the Washington Post (4/9, 4.22M) argues that it is "not too late to prevent Russia from destroying Ukraine," but "the West must act quickly." The US and the EU "can counter the Russian strategy in the short term by fully backing the Ukrainian government in taking the necessary measures to restore order" and applying "meaningful new sanctions, not just against individual Russians but against sectors of the economy." During a congressional hearing on Tuesday, Secretary of State Kerry said that the President "has already approved such actions, adding that 'energy, banking, mining — they're all on the table,'" but also "spoke optimistically about a 'four-party' meeting Russia had agreed to attend next week." The Post argues that the chances that those talks "will lead to a genuine de-escalation of the crisis will be greater if, in the meantime, Russia is subjected to significant economic punishment."

"Deportation Costs." In an editorial, the Washington Post (4/9, 4.22M) reports that in FY13, the US "deported almost 370,000 immigrants, continuing a record-setting pace begun late in the Bush administration and sustained by the Obama administration." The Post says that it opposes such a policy, but says it is forced upon the President by the GOP. However, the Post says that since Republicans are not willing to pass immigration reform despite the President's deportation push, that push should end.

"Bottom Dollar." In an editorial, the Washington Post (4/9, 4.22M) argues that the Earned-Income Tax Credit "is one of the government's most effective poverty-fighting, work-encouraging tools," but its "Achilles' heel" is "implementation." The Post says that often the vast overpayments made by the program are the fault of paid tax preparers, and it backs regulating them to ensure a better outcome.

WALL STREET JOURNAL. "Putin Invades, Obama Dismantles." In an editorial the Wall Street Journal (4/9, Subscription Publication, 5.51M) criticizes the Pentagon announcement of nuclear force reductions, arguing that the President is moving the US toward nuclear deficiency compared to Russia. While the Cold War may be over, the Journal argues that Russia's recent actions are proof the old rivalries still exist, and questions the timing of the announcement given that Putin is considering what to do next in Ukraine and what the Western response might be.

"A Tale Of Two L.A.s." In an editorial, the Wall Street Journal (4/9, Subscription Publication, 5.51M) reports that a new study by the UCLA Anderson School of Management finds that Los Angeles has lost 3.1% of its employment base since 1990, which is even worse than Detroit. The Journal says that other major cities, such

as Phoenix, Orlando, Houston and Dallas, have seen massive job gains during that period by being far friendlier to businesses.

"Jeb Bush's Immigration Heresy." In an editorial, the Wall Street Journal (4/9, Subscription Publication, 5.51M) praises Jeb Bush's remarks on undocumented workers, saying that the comments recalled Ronald Reagan in tone and philosophy. The Journal adds that Bush's message is much more appealing than that offered by anti-immigration Republicans in the 2012, which hurt the party in that year's elections.
