The Department appreciates the support of the Alaska delegation in this effort. Chaired by the Department of the Interior Assistant Secretary for Water and Science, the AMEC has led the Alaska Mapping Initiative since 2012, with an initial focus on acquiring statewide high-resolution elevation data derived from interferometric synthetic aperture radar (ifsar). To date, ifsar elevation data collection has been completed for approximately 53 percent of the State. In July 2014, the AMEC endorsed a 3-year strategy (2015–2017) to complete the remaining ifsar elevation data acquisition for Alaska, contingent on funding. Progress to date is the result of very effective coordination and cooperation among the partners and funding contributions from participating Federal agencies and the State of Alaska.

The State of Alaska is acquiring SPOT satellite imagery and will have complete State coverage by 2016. The U.S. Geological Survey will use the topographic contours derived from the ifsar elevation data in conjunction with the SPOT satellite imagery, high-resolution National Hydrography Dataset information, and other base geospatial information to create updated 1:25,000-scale topographic maps. These maps will replace the outdated and less accurate topographic maps which currently exist for Alaska.

To date, approximately 1,100 new maps have been completed, for which new ifsar elevation data and imagery have been acquired, representing 10 percent of the State, with another 600 maps scheduled for production in 2015. The current goal is to complete the coverage of Alaska with new maps over the next 6–8 years.

*Question.* I have expressed my frustration with the mitigation requirements associated with the Greater Moose's Tooth (GMT) permitting process. Getting through the permitting process on public lands is not easy by design. There are strict environmental laws that industry must comply with. This is reasonable. However, I am concerned that the uncertainties the Greater Moose's Tooth faced in the process are going to be formalized and exported to the lower 48 via Secretarial Order 3330 on mitigation, which was signed on October 31, 2013.

As we saw with Greater Moose's Tooth, the Department is free to accept voluntary mitigation efforts as part of the permitting process. Please describe to me the legal justification for the idea that the Department has the authority to require them to make a payment into a mitigation fund in order to authorize an otherwise permissible activity under the Federal Land Policy Management Act (FLPMA).

*Answer.* As discussed in the GMT1 Record of Decision (ROD), BLM's authority for management of NPR–A and to issue land use authorizations for the GMT1 project comes from several statutes, including the Federal Land Policy and Management Act (FLPMA), the Naval Petroleum Reserves Production Act (NPRPA), Title VIII of the Alaska National Interest Lands Conservation Act (ANILCA), and section 28 of the Mineral Leasing Act. Each of these statutes and their implementing regulations require BLM to consider impacts to the environment and other resources and uses during processing of applications for land use authorizations. Additionally, each of these authorities provide broad authority for BLM to impose measures requiring applicants to mitigate adverse impacts to resources and uses, including measures that avoid or reduce impacts and measures that will compensate for unavoidable impacts.

The congressional declaration of policy for FLPMA requires that, “the public lands be managed in a manner that will protect the quality of scientific, scenic, historical, ecological, environmental, air and atmospheric, water resource, and archeological values . . . .” (43 USC §1701(a)(8)). The FLPMA directs that “[i]n managing the public lands the Secretary shall, by regulation or otherwise, take any action necessary to prevent unnecessary or undue degradation of the lands” (43 USC §1732(b)).

The NPRPA provides BLM with additional mitigation authority specific to oil and gas operations in the NPR–A, directing the Secretary to “include or provide for such conditions, restrictions, and prohibitions as the Secretary deems necessary or appropriate to mitigate reasonably foreseeable and significantly adverse effects on the surface resources of the National Petroleum Reserve in Alaska . . . .” (42 USC §6506a(b)).

Title VIII of ANILCA further requires Federal land managing agencies to evaluate impacts of proposed actions on subsistence uses, and provides that any action which would significantly restrict subsistence uses cannot be approved unless the agency takes reasonable steps to minimize impacts to subsistence uses and resources resulting from such actions (16 USC §3120).

Additionally, section 28 of the Mineral Leasing Act provides BLM with authority to issue rights-of-way across Federal lands for oil and natural gas pipelines and related facilities, and provides that such rights-of-way “shall be subject to such terms and conditions as the Secretary or agency head may prescribe regarding extent, duration, survey, location, construction, operation, maintenance, use, and termination” (30 USC §185). Specific to environmental protection, subsection 28(h) of the Act requires BLM to impose stipulations which are “designed to control or prevent damage to the environment (including damage to fish and wildlife habitat)” and that “protect the interests of individuals living in the general area of the right-of-way or permit who rely on the fish, wildlife, and biotic resources of the area for subsistence purposes” (30 USC §185(h)).

According to BLM interim draft mitigation policy (IM 2013–142),<sup>1</sup> offsite compensatory mitigation is generally appropriate when the agency determines that impacts cannot be mitigated to an acceptable level onsite, and it is expected that the land use authorization as proposed would not be in compliance with law or regulations, or consistent with land use plan decisions or other important resource objectives.

In the case of the GMT1 development project, the BLM conducted a public review process under the National Environmental Policy Act (NEPA) and determined the preferred alternative for the project would result in major impacts to subsistence hunting and fishing activities that were not able to be mitigated through changes to siting or project design. In order to address these unavoidable impacts and allow development to proceed, the BLM worked with the project applicant to identify compensatory mitigation measures to offset those impacts consistent with these authorities. These funds will be directed, as part of a broader regional mitigation strategy process, to projects that will compensate for impacts to subsistence hunting and fishing opportunities caused by the project.

*Question.* The Secretarial Order describes new policies, handbooks, and manual updates that will result from the Order. What information is the Department using to formulate these changes and when can we expect to see them?

*Answer.* The Department is in the process of updating policies, handbooks, and manuals to provide greater consistency in how mitigation is planned for and considered in the process of permitting projects. The Department and its bureaus are taking as inclusive an approach as possible for this effort. We rely on the insight and knowledge of our managers, specialists, and biologists on the ground that have a long history of permitting projects and collaborating with project proponents, States, communities, and other stakeholders. Such input is based on best-practices examples that have worked on the ground. Where appropriate, we have also sought public input. For example, BLM took the unusual step of publishing its interim draft mitigation guidance in 2013, to allow for public input and coordination with stakeholders and partners. The BLM's final mitigation guidance, due out this summer, has improved as a result of this engagement. Likewise, FWS plans to propose their mitigation policy revision in the Federal Register for public comment and review. Other policies, such as a new Departmental Manual codifying Secretarial Order 3330, have also been informed by discussions with bureaus receiving public comment and from direct discussion with stakeholders and project proponents.

*Question.* Projects across the Department's holdings have different mitigation ratios. What is the mechanism that will determine what the mitigation ratios are for a specific project?

*Answer.* Compensatory mitigation measures are analyzed as part of a project's public review under NEPA and are based on the impacts the project would have on important resources as defined by FLPMA, the Endangered Species Act (ESA), and other statutes. As mentioned above, the BLM and FWS are currently updating guidance that will bring greater consistency to the assessment of mitigation measures, though local conditions and public input will remain important considerations, and project decisions will continue to be made with the relevant line officer. In order to bring further predictability to mitigation and permitting decisions, the Department implements landscape strategies for areas of intensive development or special resource concern. For example, FWS routinely works with partners and stakeholders to implement Habitat Conservation Plans and Candidate Conservation Agreements that provide for conservation of species while providing assurance to developers and landowners. Similarly, BLM is working to develop regional mitigation strategies for Solar Energy Zones under the Western Solar Plan and routinely works with oil and gas companies to define mitigation measures for field-wide development plans. With these strategies, BLM is able to provide prospective developers with knowledge of where best to site projects as well as the certainty of foreseeable compensatory mitigation requirements, e.g. ratios, etc., if projects produce residual impacts. A similar regional mitigation strategy has been undertaken pursuant to the ROD for the GMT1 project, which will provide greater predictability for subsequent development projects in the northeastern portion of the NPR-A.

*Question.* There seems like potential for a tremendous amount of subjectivity. Given the idea that the Department thinks there is the authority to require this, how would you determine a mitigation ratio, particularly in the context of a project proponent who is not volunteering this?

*Answer.* For decades, the Department has determined mitigation measures for a range of resources and project types. When determining appropriate mitigation for

<sup>1</sup> Interim Policy, Draft—Regional Mitigation Manual Section—1794, June 13, 2013. [http://www.blm.gov/wo/st/en/info/regulations/Instruction\\_Memos\\_and\\_Bulletins/national\\_instruction/2013/IM\\_2013-142.html](http://www.blm.gov/wo/st/en/info/regulations/Instruction_Memos_and_Bulletins/national_instruction/2013/IM_2013-142.html).

a proposed project on Federal land, the BLM bases the need for compensatory mitigation on what is necessary and effective to offset residual impacts to resources considered important, scarce, or fragile as typically identified by applicable statute, regulation, or land use plan. In identifying appropriate mitigation measures, the BLM ensures there is an appropriate connection between the reasonably foreseeable impacts of a land use activity and the benefits of the compensatory mitigation. In some cases, the rough proportionality of mitigation requirements may be expressed in terms of ratios to reflect: (1) the fact that mitigation is not always successful (e.g., if on average restoration succeeds only half the time, then a 2:1 ratio is needed to offset expected losses of habitat), and (2) differences in conservation value (e.g., 2 acres of low value habitat must be enhanced for each acre of high value habitat lost).

The updated policies referenced above will provide greater consistency to how project managers consider these impacts and account for them in project reviews under NEPA. The Department is also improving how it plans for mitigation in advance of individual project reviews, including through the use of landscape strategies. Where these strategies exist, they provide project developers with an upfront and predictable framework for how the Department seeks to manage a particular set of resources or type of impact. For example, in the case of the Dry Lake Solar Energy Zone (SEZ) Regional Mitigation Strategy, a ratio of less than 1:1 was recommended to account for the solar development impacts to a landscape in a previously disturbed state. Generally, these strategies can provide increased certainty for developers in advance of project reviews.

*Question.* And, in the context of the Order, what qualifies as a “large development” project that requires the Order to “effectively offset impacts?” Will projects not classified as “large” be exempt from the mitigation order?

*Answer.* The development and consideration of landscape-scale strategies and plans will help to inform planning and permitting decisions relating to infrastructure projects of all types and sizes. Because large infrastructure projects often result in large-scale and complex impacts to the land and water resources, landscape-scale strategies and plans are particularly useful for these projects. Such strategies and plans can also be valuable when working to mitigate the impacts of a smaller project, such as a mine expansion or the siting of an oil and gas well. Opportunities identified by landscape-scale mitigation strategies and plans should be available to all appropriate development projects, regardless of size or type.

*Question.* I am concerned that, rather than creating efficiencies, the actions the Department is planning to take related to the Order will add duplicative requirements, give too much flexibility to agency personnel and create situations where “surprising” requirements at points in the process create an atmosphere of undue leverage. This will make responsible development on public lands even more difficult than it already is. What steps is the Department taking to promote clarity and predictability for both investors and agency personnel so that plans can proceed with less uncertainty and potential for conflict?

*Answer.* Improving consistency, predictability, and timeliness of permit decisions is a primary goal of this effort. Advancing development of landscape strategies department-wide and ensuring consideration of the mitigation hierarchy up-front in the project planning process can dramatically increase operational certainty. As noted in a report to the Secretary, “identifying mitigation needs early in the project development process can provide greater predictability and certainty in the design, development and implementation of projects by avoiding the need for late project revisions and analyses, and by providing for coordination and consistency among agencies. This can serve to reduce project costs and increase the confidence of investors, purchasers, and other project beneficiaries in the ultimate success of the project.”<sup>2</sup>

With established landscape strategies, project developers are better armed with a comprehensive description of management objectives for resources that may be impacted by their project. As a result, project proponents can better design and develop projects that avoid and minimize risk, and then compensate for unavoidable impacts when they do occur. More transparency and coordination will save time and money for developers and agencies alike.

In the case of the GMT1 project, the proposal represented the first oil and gas production from Federal lands in the National Petroleum Reserve-Alaska. As noted above, the ROD for that project provides for the development of a regional mitigation strategy that will allow the public to weigh in on how to direct the existing

<sup>2</sup>A Strategy for Improving the Mitigation Policies and Practices of the Department of the Interior, April, 2014. [http://www.doi.gov/news/upload/Mitigation-Report-to-the-Secretary\\_FINAL\\_04\\_08\\_14.pdf](http://www.doi.gov/news/upload/Mitigation-Report-to-the-Secretary_FINAL_04_08_14.pdf).

compensatory mitigation efforts for the GMT1 project and will provide greater predictability and efficiency for subsequent projects located in the northeastern portion of the NPR-A.

*Question.* On February 23, 11 State regulators sent a letter to Office of Surface Mining Director Joseph Pizarchik. The letter expressed concern from the State regulators that the Office of Surface Mining had not “provided for meaningful participation by the cooperating agency States in preparation of the [Environmental Impact Statement] and it seems unlikely the agency will do so prior to release of the Draft EIS and proposed rule this spring.”

Does the Department disagree with their assertion that there has not been “meaningful participation by cooperating agency State?” If not, how has “meaningful participation” been achieved?

*Answer.* When Office of Surface Mining Reclamation and Enforcement (OSMRE) prepared the 2008 stream buffer zone rule, it did not include State coal mine regulators as cooperating agencies. However, when OSMRE began the development of the stream protection rulemaking to replace the now vacated 2008 rule, OSMRE, for what is believed to be the first time in its history, invited State regulators to be cooperating agencies. The cooperating State agencies provided meaningful input and comments. Their help is appreciated and has been used by OSMRE. OSMRE provided a report to the States on the status of the rulemaking in October 2014. The OSMRE also recently invited the cooperating State agencies to meet in late April regarding the analysis in the current draft EIS, specifically with regard to the issues they raised previously.

*Question.* What is the schedule for release of the Draft EIS and proposed rule?

*Answer.* Dependent on the timing of that review, the OSMRE hopes to release the Draft EIS in fiscal year 2015. The draft EIS is with the Office of Information and Regulatory Affairs at OMB.

*Question.* What is the total amount of funding spent by the OSM in development of the Draft EIS and proposed rule?

*Answer.* OSMRE has spent approximately \$9.5 million to develop the rule, including the evaluation of multiple options, review of current science and technology, and consultation with stakeholders.

There have been significant advances in science and technology since the promulgation of the 1983 rule that were not addressed in the 2008 Stream Buffer Zone Rule. Incorporating the most up-to-date science, technology, and knowledge concerning the effects of surface coal mining is essential to developing maximally beneficial modern regulations. In addition, the 2008 Stream Buffer Zone Rule did not provide objective standards for certain important regulatory decisions, such as a requirement to collect baseline information about pre-mining conditions so the regulatory authority can accurately assess the impacts of mining and assure proper reclamation. Therefore, OSMRE began work to modernize its regulations, incorporating new science, technology, and knowledge in areas that can improve, update, and more completely implement the Surface Mining Control and Reclamation Act (SMCRA).

Many scientific advances have occurred in the past 30 years. Under SMCRA, OSMRE can and should consider those advances when modernizing its rules. That is one reason why, combining OSMRE’s on-the-ground experience with peer-reviewed academic study, they are modernizing rules and using the best available technology and science to improve mining practices to minimize and mitigate environmental damage from surface coal mining. A revised rule that incorporates modern science, technology, and knowledge will enable the coal industry to do a better job of reclaiming land and restoring natural resources, and in many cases, will lead to that work being done in a more economical and efficient manner.

*Question.* I appreciate the Secretary’s pledge to cooperate in providing answers to my further questions regarding the Revised Comprehensive Conservation Plan and Final Environmental Impact Statement for the Arctic National Wildlife Refuge (“CCP” and “FEIS” respectively). Will the Secretary appoint a senior Departmental official (e.g. your Chief of Staff, Mr. Tommy Beaudreau) to discuss the most productive means to provide my questions to the Department such that you may provide thorough and complete answers promptly?

*Answer.* Tommy Beaudreau, the Chief of Staff, will be the point person.

---

#### QUESTIONS SUBMITTED BY SENATOR THAD COCHRAN

*Question.* It is my understanding that the North American Wetlands Conservation Fund received \$100 million as part of the BP settlement following the *Deepwater Horizon* oil spill. Is it true that these funds are intended to be used for the purposes

of wetlands restoration and conservation located in States bordering the Gulf of Mexico to benefit migratory species and other wildlife affected by the oil spill? Is it true that of the total \$100 million in funding received, approximately \$30 million has been spent, and only 25 percent of it has been spent in the Gulf States? Is it true that these funds are supposed to help the areas most affected by the oil spill, and there is no shortage of public and private entities in Mississippi ready to help leverage these funds? If so, do you expect this trend to continue with the remaining expenditure of the funds?

Answer. Through the *Deepwater Horizon* oil spill settlement with BP, the North American Wetlands Conservation Fund (Fund) will receive \$100 million over a 6-year period, made in annual payments that started in 2013, and were available to spend in 2014. As of March 1, 2015, \$40,041,992 has been deposited into the Fund under the court-approved payment schedule. Of this amount, and consistent with 16 U.S.C 4407(a)(1), \$1.4 million (4 percent of the total deposited to date) has been used for administrative costs consistent with the authorizing statute, and nearly \$3 million has been withheld due to sequestration. Settlement funds will continue to be withheld due to sequestration through fiscal year 2023, unless subsequent legislation is enacted eliminating sequestration.

After considering sequestration and administrative costs, the settlement has provided \$35.6 million to the North American Wetlands Conservation Act (NAWCA). The settlement requires these funds be used “for the purpose of wetlands restoration and conservation projects located in Gulf Coast States or otherwise designed to benefit migratory bird species and other wildlife and habitat affected by the Macondo oil spill.” To date, the North American Wetlands Conservation Council (Council), which oversees the Fund, has followed this direction carefully, funding projects with the greatest potential benefit to migratory bird species affected by the oil spill and where habitats supporting those species are facing urgent and widely acknowledged threats in Gulf States as well as others. For example, the Prairie Pothole Region of the Upper Midwest is undergoing a land conversion crisis and migratory birds affected by the spill are highly vulnerable to further losses of vital breeding habitat. Furthermore, the settlement funding is subject to the North American Wetlands Conservation Act (Act), which requires no less than 30 percent and no greater than 60 percent of available funds must be spent in Canada and Mexico. The Council decided to allocate the minimum (30 percent) to Canada and Mexico and is directing these funds to benefit species affected by the spill.

Based on that guidance, approximately \$18 million (50 percent) has been awarded to projects in the United States and \$5.2 million (15.5 percent) to projects in Canada and Mexico. During its April 29, 2015 meeting, the Migratory Bird Conservation Commission will consider awarding \$3.8 million for eligible domestic projects and \$8.6 million will remain in the Fund to support future projects.

The total funding available from the settlement for domestic projects is \$70 million, less the costs of administration and sequestration. Of this amount, \$22 million has been identified for projects in the five Gulf States, including two projects in Mississippi. The Council will continue to prioritize and fund high quality projects in Gulf States, in addition to those high quality projects that will provide the greatest benefit to affected migratory bird species, such as those within the prairie potholes.

*Question.* Residents and private landowners in South Mississippi are very concerned about the proposed rule published by the U.S. Fish and Wildlife Service designating the Black Pinesnake as “threatened” under the Endangered Species Act. The prohibitions and conservation actions that could be required as a result of this designation, should the rule become final, could have a negative impact on one of the main economic drivers in the area—timber and forestry production. I certainly hope the U.S. Fish and Wildlife Service will take this into consideration moving forward. Should the Service issue a final rule on this determination, what type of restrictions would be placed on timber harvesting activities? If forestry management activities are drastically reduced on the DeSoto National Forest, how will the counties containing large tracts of Federal land be compensated for the lack of revenue from timber production?

Answer. The U.S. Fish and Wildlife Service (FWS) proposed listing the black pinesnake as threatened under the Endangered Species Act (ESA), with a special rule under authority of section 4(d) of the Act that would tailor regulatory prohibitions to only those necessary for conservation of the species. The proposed special rule reduces the regulatory burden on landowners, while promoting forestry activities that provide an overall conservation value to the snake. Activities such as riparian and longleaf pine restoration, herbicide treatment, burning, and thinning are covered under the special rule, meaning those activities could continue to take place if the conservation measures in the rule are followed.

The black pinesnake depends on open longleaf pine habitats. As a result, much of the forested land in southern Mississippi is not considered black pinesnake habitat. Forest management activities in areas not occupied by the snake would be unaffected by the proposed listing. In areas where the black pinesnake is known to occur, the FWS is working with the forest industry and landowners to minimize and avoid potential impacts to the snake from activities such as clearcutting and stump removal.

The FWS worked closely with the U. S. Forest Service as they prepared the proposed listing of the black pinesnake to find conservation measures that will protect the snake while allowing for timber harvest and other forest management activities. If the proposed listing is made final, FWS does not expect forest management activities to be reduced on the DeSoto National Forest. Under the Forest Plan, activities in the DeSoto National Forest would accelerate timber management treatments, such as thinning, to restore the longleaf pine ecosystem. These efforts will have a number of benefits, including restoring habitats for the black pinesnake and other threatened and endangered species also present in the DeSoto National Forest, such as the red-cockaded woodpecker, gopher tortoise, and dusky gopher frog.

*Question.* Pearl River Elementary School on the Mississippi Choctaw Reservation was originally built to serve approximately 300 students, is now serving more than 700. On February 27, the Government Accountability Office released a document stating that “information on the physical condition of Bureau of Education schools is not complete or accurate as a result of longstanding issues with the quality of data collected by the Department”. Does the administration’s fiscal year 2016 budget proposal provide adequate funding to improve data collection and address the construction needs at Bureau of Indian Education schools? What steps is the Department taking to help tribes recruit quality teachers, particularly in States where funding available to pay teachers at tribal schools is significantly lower than public school teacher salaries?

*Answer.* Indian Affairs is in the process of finalizing the verification of an up-to-date, accurate database of deferred maintenance needs for each school. The data update and verification process is important at all times, but especially critical at this point in time when Indian Affairs is developing a list of schools eligible for the next list of BIE-funded schools slated for replacement and renovation. In fiscal year 2014 and fiscal year 2015 to date, BIA has actively conducted outreach to notify schools to update information in the deferred maintenance database. BIA has also provided technical assistance where necessary. The fiscal year 2016 education construction budget request includes \$1.3 million to continue triennial facilities condition assessments at BIE schools. Going forward, the scope of the condition assessments will expand to provide a more in-depth assessment to assure data accuracy, deferred maintenance, and programmatic needs for BIE schools.

To address the education construction needs, the fiscal year 2016 budget includes \$45.5 million for replacement of the last two schools on the 2004 Replacement School Priority List and to begin planning and design of the schools on the next replacement and renovation priority list, currently under development. In addition, the fiscal year 2016 education construction request revitalizes the Facilities Component Replacement Program (FCRP) and funds it at \$11.9 million. This program is an important part of the Indian Affairs’ plan to bring all BIE schools into good condition. The FCRP identifies individual buildings on a school campus where it is more cost effective to replace the building than repair it but where the whole campus does not need replacement. Indian Affairs is currently re-establishing criteria for buildings to be prioritized for FCRP. The fiscal year 2016 budget request also includes significant increases for education facilities improvement and repair projects and for education employee housing repair.

BIE-funded schools are operated by the BIE or under grant by a tribe or tribal organization. BIE is only able to report on strategies at BIE-operated schools. Tribally controlled schools are not required to report to BIE regarding any aspects of tribal operation of a BIE-funded school. With respect to strategies to recruit quality teachers, BIE is partnering with Tribal Colleges and Universities to create programs to align aspiring teachers with BIE-funded schools. BIE is also working with the National Board for Professional Teaching Standards to provide teachers an opportunity to work on a multi-year program to yield an advanced teaching credential to exceed State requirements. Tribally controlled BIE-funded schools may work with the BIE to participate in either of these strategies.

## QUESTION SUBMITTED BY SENATOR JOHN HOEVEN

*Question.* Due to the growth in western North Dakota, this part of our State has experienced a dramatic cost of living increase while Federal wages in these areas have remained the same. I have urged OPM to address these salary issues for Federal employees in western North Dakota, and I understand that OPM is waiting until it can review a special rate request for North Dakota from the Department of the Interior before taking any action. When will your department complete its special rate request?

*Answer.* The Department of the Interior submitted a special pay rate request for mission critical energy occupations, including positions in the Bakken region, to OPM in November 2014. The Department has been working together with OPM and other Federal employers in the Bakken region to collectively address recruitment and retention issues there through the use of available pay flexibilities. These flexibilities include recruitment, retention, and relocation incentives as well as special rates of pay. Federal agencies have been using recruitment and retention incentives in the short term. OPM recently approved agency requests to establish special wage rates for around 160 skilled trades positions in the region, including certain Department of the Interior positions, and is engaged in an interagency coordination of agency special rate requests for certain General Schedule positions. OPM informs us that it expects to complete its interagency coordination and respond to agencies with a decision on the special rate requests in the near future.

## QUESTIONS SUBMITTED BY SENATOR BILL CASSIDY

*Question.* Recently you stated that States on the Atlantic will have a chance to pull themselves out of the running for possible Federal approval of offshore drilling. What are your thoughts here? Your quote suggests that States along the coast have a role?

Based on the logic you just gave, how can you then claim that revenue shouldn't have been shared with States since they do have a role and an impact in hosting energy production offshore?

*Answer.* States clearly have a role in decisions about whether and/or how to develop Federal energy resources off their shores, both as a statutory matter and as a general principle. In fact, section 18 of the Outer Continental Shelf Lands Act (OCS Lands Act) requires the Secretary to consider eight factors in determining the timing and location of Outer Continental Shelf (OCS) oil and gas activities. One of those factors is "(a)(2)(F) laws, goals, and policies of affected States which have been specifically identified by the Governors of such States as relevant matters for the Secretary's consideration;" For the Secretary to consider such information, comments from affected States are solicited and considered by the Bureau of Ocean Energy Management (BOEM) during the Program development process. Per section 18(c)(1) of the OCS Lands Act, the Secretary of the Interior shall invite and consider suggestions for the leasing program ". . . from the Governor of any State which may become an affected State under such proposed program . . .".

How the Federal revenues generated from those Federal leasing and development decisions are spent is a different matter, and the administration stresses its commitment to ensuring American taxpayers receive a fair return from the sale of public resources and that taxpayers throughout the country benefit from the development of offshore energy resources owned by all Americans. Any revenue sharing of OCS revenues must be provided for by statute. The Secretary of the Interior does not have the authority to expand, extend, or otherwise revise revenue-sharing provisions. Congress would have to implement legislation to authorize any new revenue sharing arrangements. The administration proposes to work with the Congress on legislation to redirect funds currently allocated for GOMESA revenue-sharing payments to select States from Gulf of Mexico oil and gas leases. The administration proposes to redirect these payments, which are set to expand substantially starting in 2018, to programs that provide broad natural resource, watershed and conservation benefits to the Nation, help the Federal Government fulfill its role of being a good neighbor to local communities, and support other national priorities. Such programs could include the Land and Water Conservation Fund, Payments in Lieu of Taxes, State and Tribal Wildlife Grants, Federal coastal restoration and resilience programs, and other national priorities.

*Question.* The Department recently proposed the Draft Proposed Program for the 2017–2022 OCS 5-Year Leasing Program. Given that the 5-Year OCS Leasing Program development process involves multiple iterations and is designed to whittle down the areas under consideration for leasing at each stage of the process, can you

explain the decision to remove areas from consideration in certain planning areas without having the benefit of a full environmental analysis or compatibility study?

Answer. The Draft Proposed Program (DPP) analyzed all 26 planning areas and reflects a balanced proposal that would make nearly 80 percent of the undiscovered technically recoverable resources available while protecting special areas and reducing potential multiple-use conflicts. The options in the DPP include sales in the offshore areas that have the highest oil and gas resource potential, highest industry interest, and are off the coasts of States that expressed a strong interest in potential OCS energy exploration. The selection of these areas also considered potential environmental impacts, stakeholder concerns, and competing uses of ocean and coastal areas. Public involvement is an important step in the development of the Program and will help the Department determine whether and how it should be further refined in the next stages of 5-Year Program development.

Using authority granted in section 12(a) of the OCS Lands Act, 43 U.S.C 1341(a), the President withdrew certain areas within the Beaufort and Chukchi Seas to protect areas of critical importance to subsistence use by Alaska Natives, as well as for their unique and sensitive environmental resources. The majority of the withdrawn areas have a long history of being deferred in 5-Year Programs and lease sales. Even with these withdrawals, the DPP contains 90 percent of the undiscovered technically recoverable resources in the Beaufort and Chukchi Seas.

The DPP proposes a sale in the Program at least 50 miles offshore the coasts of Virginia, North Carolina, South Carolina, and Georgia in a portion of the Mid-Atlantic and South Atlantic Planning Areas. This option allows for consideration of a targeted area with resource potential, while limiting potential impacts to the environment and other ocean uses. The 50-mile coastal buffer was included for the Atlantic sale to minimize many multiple use conflicts, such as those from Department of Defense activities, renewable energy activities, and commercial and recreational fishing, while making available the vast majority of potential resources in this area. Further environmental analysis regarding minimizing potential impacts will be performed as part of the 5-Year Programmatic Environmental Impact Statement.

*Question.* In 2010, the Atlantic was not open for leasing and Congress had a moratorium for the Eastern Gulf of Mexico (EGOM). BOEM announced in March 2010 that the 2010–2017 5-Year Program would include lease sales in the Atlantic and some additional portions of the Eastern Gulf of Mexico contingent on Congress lifting the EGOM moratorium. After the Macondo incident, those plans were scrapped. You have now proposed opening the Atlantic, but refuse to consider the EGOM. More is understood about the EGOM's potential resources and because of the proximity to the Central Gulf of Mexico the infrastructure is also there. Why did you not include the EGOM in the draft plan using the same contingency that was proposed in 2010?

Answer. The vast majority of the Eastern Gulf of Mexico (EGOM) is under congressional moratorium and is unavailable for leasing consideration through June 30, 2022, pursuant to the Gulf of Mexico Energy Security Act of 2006.

With regard to the Atlantic OCS, this area has not been under Presidential withdrawal since July 14, 2008, and has not been subject to congressional moratoria since October 1, 2008.

*Question.* The Department included one sale for the Atlantic in the draft proposed program. Unfortunately, the sale has been put at the end of the planning period, 2021. Given the frontier nature of the Atlantic, it would be useful to have the sale earlier in the plan to give time for companies to analyze data and use the information from that sale to inform the Department for the 2022–2027 program. Why did you push the sale so late into the program?

Answer. Current geological and geophysical (G&G) information regarding the oil and gas resources potentially available in the Mid- and South Atlantic Planning Areas is based on older data collected in the 1970s and 1980s. Significant advances in instrumentation and technology for the acquisition and analysis of G&G data have been made in the intervening decades. The proposed sale is late in the Program to afford companies more time to collect and analyze data on the location of potential hydrocarbon resources. It also allows the government more time to consider this data, as well as gather new information on the environment and multiple use conflicts. As part of the lease sale process, the Department must also prepare an Environmental Impact Statement of the sale area, which will require additional time in an area not recently analyzed.

*Question.* In your announcement for the Draft Proposed Program (DPP) you were quick to point out that you can narrow or take away areas altogether away. With such a limited proposal to begin with it's hard to understand how or why you would limit it any further especially given all of the support for offshore drilling in the

regions you've proposed? Are you, through your current authority able to expand the DPP or are you only able to subtract leasing acreage?

Answer. The DPP analyses examined and compared all 26 of the planning areas. As required under section 18 of the OCS Lands Act, the Secretary must consider and balance critical needs, and this resulted in the decision to include a schedule of 14 potential lease sales in 8 planning areas in the Draft Proposed Program, which would make nearly 80 percent of the undiscovered technically recoverable resources available.

If an area or sale is not included at the DPP stage, it cannot be added back into the DPP without analyzing the option and rebalancing the entire DPP decision. Therefore, the DPP decision is the broadest Program decision available for further consideration, per the OCS Lands Act. As additional comments are received, an Environmental Impact Statement is prepared, and section 18 criteria are further analyzed and balanced, the Department will refine the DPP analysis and develop a Proposed Program.

*Question.* Why are you allowing environmental groups to dictate the 5-year leasing program? I ask because last year the Request for Information had a 45-day comment deadline as dictated by the planning process but yet, the Department extended the deadline an additional 15 days and I must assume it was because there weren't enough comments submitted from anti-drillers.

Answer. The Bureau of Ocean Energy Management (BOEM) granted the extension of the comment period in response to requests from several State governments along the Atlantic coast. BOEM recognizes the importance of input from stakeholders and the public and wanted to be responsive to requests to provide additional time for those States in particular that had not had OCS activity in many years to understand the process in order to provide critical information, recommendations, and concerns to help apprise the Department on preparation of the DPP.

---

QUESTION SUBMITTED BY SENATOR ROY BLUNT

*Question.* The report language in the fiscal year 2014 and fiscal year 2015 Omnibus included the Committees' continuing support for park partnerships and urged the Department of the Interior "to continue reassessing recent policy interpretations and review procedures to promote the greater use of partnerships" . . . that have historically proven beneficial to national parks and partners.

What further steps have you taken to adopt policies and an internal organization addressing management of truly collaborative operating and conservancy relationships in order to encourage the shared stewardship and funding so essential for the National Park Service to fulfill its mission?

Answer. The National Park Service (NPS) encourages shared stewardship and funding through its partnership authorities and policies. In June 2014, the NPS issued a policy memorandum to help the NPS connect with broader philanthropic communities, offer updated tools to help current partners engage new and more diversified philanthropic partners, support more robust engagement of partners for the upcoming Centennial in 2016, and provide the framework and standards for testing philanthropic practices that could be implemented more broadly. The National Defense Authorization Act of 2015 also set guidelines for the NPS to accept and acknowledge donations to parks and programs; which is intended to help generate private donations in advance of the Centennial. Additionally, NPS Director's Order 21—Partnerships and Philanthropic Stewardship—is currently being revised and will be released in the coming months. The NPS is also working with the National Park Foundation to support its multi-million dollar capital campaign in support of the 2016 Centennial of the NPS.

The fiscal year 2015 Appropriations Act included \$10.0 million for the NPS Centennial Challenge program, an innovative public-private partnership program that requires a 1:1 non-Federal match to accomplish high priority projects in national parks. The NPS received over 200 project submissions, with many projects leveraging more than 50 percent in donations. The fiscal year 2016 NPS budget proposal seeks to build upon fiscal year 2015 enacted by requesting an additional \$40.0 million in discretionary funding, as well as a mandatory proposal for \$100.0 million annually over 3 years, to provide additional resources for this cost share program for these signature projects.

## QUESTIONS SUBMITTED BY SENATOR TOM UDALL

## NATIONAL PARK SERVICE BUDGET

*Question.* I was pleased that Congress authorized the Manhattan Project National Historical Park to honor important American scientific and military achievements. I understand that the Department's fiscal year 2016 budget request includes \$180,000 in start-up funding for this new park, and that you are now working with the Department of Energy to determine future management needs. Can you explain how the planning process with DOE will work and what you expect the outcome to be? How will you ensure that this new park has the resources it needs to operate?

*Answer.* The National Park Service (NPS) and the Department of Energy (DOE) are working on a memorandum of agreement on the roles of the two agencies in administering the facilities proposed to be included as part of the Manhattan Project National Historical Park. The purpose of the park is "to improve the understanding of the Manhattan Project and its legacy through interpretation of the historic resources". The park offers an excellent opportunity for people from around the world to visit these historic sites and gain a deeper understanding of the history and world-changing events that happened as part of the Manhattan Project as well as engage in learning about innovations in science, engineering, and technology.

The new park will preserve and interpret the historic properties at three major sites associated with the Manhattan Project: Los Alamos, New Mexico, where the scientific laboratory that designed and tested the bomb was located; Oak Ridge, Tennessee, where facilities were built to produce enriched uranium; and Hanford, Washington, dedicated to the production of plutonium. To help identify future management needs, an interagency team conducted site visits and public meetings at Oak Ridge, Tennessee March 25–26, 2015. Site visits and public meetings will take place in Hanford, Washington April 14–16, 2015, and Los Alamos, New Mexico June 3–5, 2015.

The Department of the Interior is committed to working with DOE, as well as engaging with State, county, local and other stakeholders during the planning process. As the planning and discussions on the memorandum of agreement proceed, NPS, in concert with DOE, will continue to evaluate operating priorities for the park.

*Question.* What is the Park Service's long-term strategy to address your maintenance backlog? With respect to the Centennial Challenge, how does the Park Service plan leverage its Federal funds with partner contributions to specifically address capital needs?

*Answer.* The NPS strategy to address deferred maintenance needs provides for the long-term sustainability of essential NPS assets by prioritizing capital investment funding for the most important assets, such as historic buildings and mission critical infrastructure. The fiscal year 2016 President's budget request includes an increase of \$242.8 million in discretionary funding and a proposal to create a mandatory appropriation funded at \$300.0 million annually for 3 years to address the deferred maintenance backlog on the NPS' highest priority non-transportation assets. Overall, the Centennial Initiative, including discretionary and mandatory proposals, will allow the NPS to ensure all of its highest priority non-transportation park assets are restored and maintained in good condition over 10 years.

The fiscal year 2015 appropriation provided \$10.0 million for the Centennial Challenge program. The evaluation criteria for Centennial Challenge project proposals prioritizes projects that leverage higher rates of partner contributions and address critical high priority deferred maintenance needs. The NPS is nearing final selection of the fiscal year 2015 Centennial Challenge projects, many of which support deferred maintenance or related needs, such as accessibility of facilities for visitors with disabilities. While the NPS can and will demonstrate success with many of the deferred maintenance and capital improvement projects to be accomplished with partner support, donors and partners ultimately determine the projects they wish to support. It is unlikely that a match can be found for many of the lower-profile, but no less critical, projects that keep the parks open for visitors, such as repaving parking lots or fixing wastewater treatment systems.

*Question.* Can you please provide additional detail about the investments you are proposing in your budget to put "Every Kid in a Park"? How will the dollars be allocated, and how will you measure success for this initiative? In particular, how are you going to reach out to urban and underserved communities to get those children and their parents connected with national parks?

*Answer.* As part of President Obama's commitment to protect our Nation's unique outdoor spaces and ensure that every American has the opportunity to visit and enjoy them, he launched the "Every Kid in a Park" initiative to provide all fourth grade students and their families with free admission to national parks and other

Federal lands and waters during the 2015–2016 school year. This initiative will help us build lasting partnerships with kids, parents, and educators far beyond that timeframe, cultivating a better understanding and appreciation of the spectacular natural and cultural resources and recreational experiences offered in the national park system. Some of these students will come as part of organized field trips, and others will come with their families and friends.

The fiscal year 2016 President's budget request prioritizes engaging youth and expanding programs and services to help support this initiative, including a request for \$20 million to support transportation and visitor services for Every Kid in a Park outings. This request, combined with the public-private partnerships being grown and strengthened across the Federal family, will allow this initiative to build off successful models already in existence for connecting young people to the outdoors. The request includes \$11.5 million to transport more than one million students from Title I elementary schools in urban areas to nearby national parks and \$8.5 million to support park-level youth engagement coordinators.

To track usage and measure success, NPS will work with schools and partner organizations that run youth outings to report their visits. Over time, this initiative can help develop better baseline data for youth visitation to national parks and other public lands and waters.

While the U.S. Department of Education does not have outdoor education statutory authorities, it has offered to help NPS connect with education partners and will be working in a communications capacity to get the word out about this opportunity to State, local, and school officials; teachers; key non-profit groups; and education-related associations.

#### ENERGY DEVELOPMENT ON PUBLIC LANDS

*Question.* I understand that the Department is close to completing work to revise and implement a new rule increasing disclosure and strengthening operating requirements where hydraulic fracturing is being used on public lands. Can you update us on the current timeline for the rule?

Are there aspects of the inspection program in your budget request that will specifically help to ensure that hydraulic fracturing on Federal lands is properly regulated?

*Answer.* On March 20, 2015, the Department of the Interior (DOI) finalized its hydraulic fracturing (HF) regulations. The rule provides a strong framework for the environmentally safe and economically viable development of onshore oil and gas resources. It addresses key issues such as the protection of water resources, well-bore integrity, and the public disclosure of materials used in the process, among other things. Until now there have been no Federal rules in place that specifically address the increasingly complex nature of hydraulic fracturing processes taking place on public and tribal lands. The new rule updates regulations that are more than three decades old. It will be effective 90 days after the date of Federal Register publication, which was March 26, 2015.

The 2016 budget request for the BLM inspection program does not contain a specific component related to hydraulic fracturing, as the implementation of the rule will be part of the oil and gas program's overall oversight responsibilities. However, the budget request would provide the resources to enable the BLM to fulfill all of its annual inspection responsibilities, which include better oversight of hydraulic fracturing operations on Federal and tribal lands, along with other deficiencies identified by the February, 2011, GAO report on the Federal management of oil and gas resources. Instituting the administration's proposed new inspection fees, which are analogous to fees already charged for offshore operations, is a key component of this effort.

#### BUREAU OF INDIAN EDUCATION

*Question.* I appreciate the large increases in your budget request for tribal education programs, and I want to commend you for making Indian education programs such a high priority for the Department. In particular, I'm glad to see that your budget includes a \$59 million increase for school construction and renovation programs in Indian Country. Can you talk more about how these funds will be used, and how you will allocate them to ensure that the highest priority infrastructure needs get met?

*Answer.* The Indian Affairs fiscal year 2016 budget proposal includes a total of \$133.2 million for BIE Education Construction, an increase of \$58.7 million over the fiscal year 2015 budget. Within this request is \$45.5 million, an increase of \$25.3 million, for replacement of the last two schools on the 2004 Replacement School Priority List and to begin planning and design of schools on the next school replace-

ment and renovation priority list currently under development. In addition, the fiscal year 2016 education construction request revitalizes the Facilities Component Replacement Program (FCRP) with a request of \$11.9 million. This program is an important part of the Indian Affairs plan to bring all BIE schools into good condition. The FCRP identifies individual buildings on a school campus where it is more cost effective to replace the building than repair it but where the whole campus does not need replacement. Indian Affairs is currently re-establishing criteria for buildings to be prioritized for FCRP. The fiscal year 2016 budget request also includes \$68.2 million for education facilities improvement and repair projects, an increase of \$17.7 million, and \$7.5 million for education employee housing repair, an increase of \$3.7 million.

*Question.* What is the administration's plan to update a new school construction priority list to address the needs of other schools?

*Answer.* In fiscal year 2014 and fiscal year 2015 to date, BIA has been actively conducting outreach to notify schools to bring their database of deferred maintenance needs up to date, providing technical assistance where necessary. Indian Affairs is in the process of verifying the updated database to ensure accurate data is used to determine initial eligibility for a new school replacement and renovation priority list. After verification of the data, Indian Affairs will calculate each school's Facility Condition Index (FCI) to determine schools in "poor" condition, one of the requisites for eligibility for replacement or major renovation. Another way to be eligible is for a school to be both 50 years or older and educating 75 percent or more of students in portables, regardless of its FCI.

Schools eligible to apply for the School Replacement and Renovation Program will be invited to complete applications for consideration. Applications received from these schools will be evaluated by using the method determined by a Negotiated Rule Making Committee. After a review and scoring of the applications by the Review Committee, the top 10 schools will be invited to present to the Review Committee in a Public Meeting. After the presentations, the Review Committee will identify five projects and forward their recommendations to the Assistant Secretary—Indian Affairs for acceptance. Indian Affairs anticipates the new School Replacement and Renovation priority list identifying five schools will be completed by the end of July 2015. After the list is finalized, DOI will present the list to Congress.

*Question.* Ensuring access to technology is a critical way to make sure American Indian and Alaskan Native students receive the world-class education that they deserve, no matter where they live. I was pleased to see that your budget includes \$34 million in new funding to connect tribal schools to broadband.

How many schools do you expect to reach with these funds? Do you expect this to be a multi-year investment? What is your ultimate goal for this funding?

*Answer.* The budget proposal requests a \$34.2 million increase as part of a 3 year plan for all schools and dormitories in the BIE-funded school system to achieve the ConnectED standard for bandwidth and have access to prevailing technology for Internet connectivity. Most of the request will fund non-recurring charges for bandwidth upgrades over 3 years. After the upgrades are accomplished, some funding will be needed for increased operations costs due to higher monthly broadband costs and to upgrade information technology as it becomes outdated.

The overarching goal of the plan to provide BIE-funded schools with bandwidth and information technology, including computers and other mobile devices, is to enrich the education experience for Native American students and to provide a means for students and teachers to have access to online testing, distance learning, and multimedia resources.

*Question.* Infrastructure programs are important—but to be effective they must be accompanied by efforts to recruit and retain good teachers and improve curriculum. Can you tell us more about the \$10 million in your request to fund school reform efforts? How do these funds fit into the administration's larger vision for reforming the Bureau of Indian Education? What metrics will you use to define success?

*Answer.* The \$10.0 million increase requested for Education Program Enhancement will be used for multiple purposes. The additional funding will allow BIE to provide targeted support and interventions focused on school improvement efforts and other activities that promote student achievement. School improvement efforts include establishing a tribally managed school reform plan and expansion of curriculum areas like Native language immersion. Other activities include the consolidation of professional development delivery to multiple schools, content specialists providing technical assistance to schools and tribes, and programs to improve the quality of instruction and leadership across the school systems.

We agree that efforts to recruit and retain good teachers are fundamental to BIE reform efforts. BIE is partnering with Tribal Colleges and Universities to create

teacher pipelines to BIE-funded schools. BIE is also working with the National Board for Professional Teaching Standards to provide teachers an opportunity to work on a multi-year program that yields an advanced teaching credential that goes above and beyond the State requirements.

These efforts with the tribes, teachers, and partners fit into the administration's larger vision to transform the Bureau of Indian Education into a 21st century education system grounded in both high academic standards and tribal values. The reform focuses on five areas which include (1) having highly effective teachers and principals in the schools, (2) building a responsive organizational environment, (3) promoting educational self-determination for Tribal Nations, (4) fostering partnerships, and (5) developing a budget that is aligned with and supports BIE's mission of tribal capacity-building.

We are working now to establish a strong set of indicators and an evaluation strategy to assess and refine all of the components of the transformation effort. We will conduct ongoing evaluation of school administration, best practices, graduation rates, and school facility condition, however, the real measure of success will be in the achievement of the students themselves.

*Question.* Secretary Jewell, the last official Johnson O'Malley student count was taken in 1995. Relying on 20-year old data is no way to run a program, which is why the Appropriations Committee has been asking the Bureau of Indian Education to release a new student count for the Johnson O'Malley program for several years. Yet we have had little success. Where are you in the process of developing the new Johnson O'Malley student count? When can we expect the Department to release those figures to the public, and what is your plan to engage tribes once they are released?

*Answer.* The updated Johnson-O'Malley (JOM) count was electronically delivered to Congress on March 30, 2015. The total 2014 JOM student count is 341,126. The BIE announced four tribal consultation sessions on the JOM count in the March 4, 2015 Federal Register. There will be two on-site consultations and two Webinar-teleconference consultations. These consultations are scheduled between March 31 and April 10. During these consultations, the BIE will ask for tribal input on how to ensure the count data is accurate and to discuss funding distributions under the new count.

*Question.* While I appreciate the emphasis on K-12 education in this request, I am concerned that tribal colleges haven't received the attention that they deserve. Overall, your budget includes flat funding for tribal colleges—and it does nothing to provide forward funding for the remaining tribal colleges that do not receive it. These schools have struggled to operate without funding certainty under continuing resolutions, and I am told that it was particularly hard for them to keep their doors open during the 2013 shutdown. The administration has supported forward funding for other tribal colleges in the past. Will you work with me to find a solution to provide forward funding for these remaining schools?

*Answer.* BIE understands how difficult multiple CRs and uncertainty at the start of the fiscal year can be in operating an educational institution. We would like to work with you to address this problem. The 28 tribally controlled colleges and universities that receive funding through BIE under authority of Public Law 95-471, the Tribally Controlled Community Colleges and Universities Act of 1978, as amended, have been forward funded since 2010. The other four colleges funded in the BIE budget, two BIE owned and operated colleges (Haskell Indian Nations University and Southwestern Indian Polytechnic Institute) and two tribal technical colleges (United Tribes Technical College and Navajo Technical College) are not forward funded.

#### LAND AND WATER CONSERVATION FUND (LWCF)

*Question.* Can you talk about your experience using the LWCF program as a conservation tool for the Department? As you seek to address the many pressing needs of the Department of the Interior, how do you see the role of LWCF funds in supporting local economic needs and addressing agency management challenges?

*Answer.* The Land and Water Conservation Fund—established with overwhelming and bipartisan support by Congress 50 years ago—is one of the most important conservation tools we have to safeguard the Nation's natural areas, water resources and cultural heritage, and to provide recreation opportunities to all Americans. Americans care deeply about our outdoor heritage, want to enjoy and protect it, and are willing to take collective responsibility to protect it for their children and grandchildren. Over its 50 year history, the Fund has protected conservation and recreation land in every State and supported tens of thousands of State and locally driven projects through grants to States.

Dollar for dollar, the Land and Water Conservation Fund (LWCF) is one of the most effective conservation programs we have. For every \$1.00 invested in Federal land acquisition through LWCF, there is a return of \$4.00 in economic value from natural resource goods and services, as published in *Return on the Investment from the Land and Water Conservation Fund*, 2010, a study conducted by the Trust for Public Land. LWCF frequently leverages significant funding match from States, cities and other partners. The Land and Water Conservation Fund also plays an important economic role for local communities. Recreation activities in national parks, wildlife refuges, forests, marine sanctuaries, and other federally managed lands and waters contributed approximately \$51 billion and 880,000 jobs to the U.S. economy in 2012, as published in the Federal Interagency Council on Recreation, *Fact Sheet on Outdoor Recreation: Jobs and Income*, 2014. Nationally, outdoor recreation activities contribute \$646 billion to the economy annually and support 6.1 million jobs, as published in *The Outdoor Recreation Economy*, 2012, by the Outdoor Industry Association.

The Department of the Interior LWCF programs work in cooperation with local communities, rely on willing sellers, and maximize opportunities to partner with private landowners on conservation easements where conservation and management objectives can be achieved without fee-simple acquisition. Proposed Federal land acquisition projects are developed with the support of local landowners, elected officials, and community groups.

Acquisition of inholdings does not generally require additional operating costs as no new staff or equipment are required to manage new lands within existing boundaries. Occasionally, agencies may incur up-front costs to remove existing improvements (fences, buildings, etc.) from an acquired property. By removing unwanted structures on newly acquired land, agencies avoid adding to ongoing operation and maintenance requirements.

In fact, acquisition of inholdings can greatly simplify land management for Federal managers and neighboring landowners. Eliminating checkerboard ownership within Federal units simplifies nearly every aspect of land management:

- Wildland fire managers can apply appropriate fuels reduction, planned burns, and fire suppression treatments more easily across an unfragmented landscape; fire management is more challenging and costly when private inholdings and developed properties are intermixed with federally managed forests and public lands.
- Law enforcement and public safety personnel can more easily patrol and respond to emergencies when public ownership is consolidated. An unfragmented unit allows unified signage, road networks, and other infrastructure that will best enable safe public access and allow for the efficient movement of emergency personnel and vehicles to locations frequented by visitors.
- Recreation managers can more easily provide access for the public to enjoy their public lands. In some cases checkerboard ownership can cause confusion among the public about acceptable land uses, and can restrict the public's ability to access some areas of public land.
- Natural resource management is simplified in an unfragmented landscape. When checkerboard ownership is eliminated, biologists, geologists and other natural resource professionals can move freely across the land that they are responsible for surveying, and natural resource management actions can be applied more efficiently across a landscape in single ownership.

An example of management efficiency gained through LWCF acquisition is the St. Vincent National Wildlife Refuge (NWR). St. Vincent NWR is an island off the panhandle coast of Florida in Apalachicola Bay, off the Gulf of Mexico. Acquisition of a 5-acre tract on the mainland of Apalachicola Bay provides permanent deep water mooring with a launch site, secure parking and equipment storage. An important point is that dredging and channel maintenance are allowed in Apalachicola Bay, activities that are prohibited in other nearby areas. The lease at Indian Pass, the current deep water mooring and launch site, was ending and would not be renewed as the owners were looking to develop the mainland at the launch site. In addition, the upland portion of the leased Indian Pass site had been significantly reduced due to severe, continuing, and progressive erosion that the landowner failed to address.

As the refuge is only accessible by water, the new deep water mooring and launch site enables site management and reduces staff travel time from the refuge office to transfer supplies and heavy equipment. Daily boat access for St. Vincent NWR staff is required 24/7 for all island management activities, such as sea turtle nest monitoring and protection, habitat management, prescribed burning, hunting and fishing management and protection, and response to visitor emergencies.

## WILDLAND FIRE BUDGET REFORMS

*Question.* I am very pleased to see that your budget request again proposes to pay for a portion of fire suppression funding with a new disaster cap adjustment. The disaster cap adjustment is the key to breaking the cycle of fire borrowing and putting an end once and for all to the need to steal funds from land management programs to pay for emergency firefighting needs. Many of the programs that we borrow funding from to fight fires are the same programs that create a more resilient landscape to resist wildfire. Can you talk about how important this proposal is to the administration's overall vision for reducing the threat of wildfires?

*Answer.* Fire is a normal occurrence that is beneficial to landscapes when managed properly, however, population growth near forests and rangelands, past management practices, and changing climate have dramatically increased fire risk and fire costs. For the past couple of decades we have budgeted for fire suppression using the rolling average of suppression costs of the prior 10 years. When those funds are insufficient, as is often the case, funding for real-time firefighting costs is provided by transfers and borrowing of funds from other fire management activities (e.g. fuels management) and other Forest Service and Department of the Interior programs and activities. This practice of transferring and borrowing funds has undermined Department of the Interior and Forest Service programs, including critically important forest and rangeland management and fire risk reduction activities. The cap adjustment proposal provides a mechanism to fund the extraordinary costs of approximately 1 percent of our wildland fires by providing an alternative to transferring and borrowing funds from other programs, including programs important to reducing future fire risk. This proposal treats extraordinary fires in the same way the Nation treats other natural, unpredictable disasters. The President's budget includes a wildfire suppression cap adjustment of \$200.0 million for the Department of the Interior for this purpose. These funds would only be available under those extraordinary instances.

The budget cap adjustment proposal is designed to improve the wildland fire management program's ability to adequately invest in preparedness, forest and rangeland health, and other fire risk-reduction work. The new funding approach would stabilize the fuels and prevention programs' ability to plan and execute treatments mitigating the costs of future wildfires. Under this approach diverting funds from these important programs to pay for wildfire costs would be eliminated.

## WILDLIFE TRAFFICKING

*Question.* Secretary Jewell, the demand for ivory and rhino horns has skyrocketed. Congressional Research Service (CRS) reports that a rhino horn is worth more than \$50,000 per kilogram—more than even gold and platinum. The profit incentive is just staggering—so it's no surprise that terrorist networks such as al-Shabab and the Lord's Resistance Army are turning to poaching to support their operations. Can you tell us what the Department is doing to address the market demand that is fueling wildlife destruction AND financing terrorist organizations?

*Answer.* The Department, particularly through the Fish and Wildlife Service (FWS), is actively engaged in addressing poaching and wildlife trafficking throughout the entire trade chain. As identified in the recently released implementation plan for the National Strategy on Combating Wildlife Trafficking, we are undertaking activities supporting all three strategic priorities for the U.S. Government: strengthening enforcement, reducing demand for illegally traded wildlife, and expanding international cooperation and commitment. We are supporting on-the-ground protection of wild populations of elephants, rhinos and other species targeted by wildlife traffickers through grant programs that provide training and material support to rangers and other foreign enforcement officials. We are stationing special agents overseas, engaging in bilateral and multilateral wildlife trafficking investigations, supporting demand reduction efforts overseas, and working through the Convention on International Trade in Endangered Species (CITES) and other international agreements to build capacity to combat wildlife trafficking and hold countries accountable when they fail to live up to their commitments. Domestically, we are strengthening our ability to effectively regulate illegal trade in elephant ivory while also implementing a partnership-driven demand reduction campaign.

*Question.* The Fish and Wildlife Services has so far placed one special agent in Bangkok to help combat wildlife trafficking, and plans to place four more this year in Tanzania, Botswana, Peru, and Asia. The fiscal year 2016 request would place five more agents overseas. How will these agents help combat wildlife trafficking? What has been the experience in Bangkok? What is being done at embassies without special Fish and Wildlife staff?

Answer. The FWS agents are training African and Asian wildlife officers at the International Law Enforcement Academies in Botswana and Thailand, increasing the intelligence shared among law enforcement agencies with common missions, enhancing the targeting of illegal wildlife shipments, and utilizing wildlife detector dogs to support frontline wildlife inspectors and special agents.

The special agent stationed at the U.S. Embassy in Bangkok, Thailand, has been addressing wildlife trafficking issues throughout Southeast Asia. He has supported not only U.S. based investigations, but also provided expertise to other U.S. law enforcement agencies, a variety of foreign law enforcement agencies, and supported training efforts. Working closely with the Department of State, Bureau of International Narcotics and Law Enforcement Affairs, Bangkok, the special agent has briefed several other regional embassies on wildlife trafficking issues and is supporting local efforts.

The FWS anticipates that the deployment of additional special agents will expand enforcement capabilities to other regions by working with other embassies to combat illegal wildlife trafficking.

*Question.* The administration's National Strategy for Combating Wildlife Trafficking included nearly 200 specific tasks for the Fish and Wildlife Service and partners at the Departments of Justice, Commerce, Homeland Security, Agriculture, Treasury, and State. How will the administration track progress on this massive plan so that in the future, we can target resources to what has worked best?

Answer. As indicated in the recently released implementation plan, we will continually evaluate our progress, both by assessing the extent to which we are able to achieve the specific objectives identified in the National Strategy and by looking more broadly at the effectiveness of these objectives to advance our strategic priorities and the ultimate goal of ending wildlife trafficking. Robust and effective enforcement of wildlife trafficking laws at home and abroad, measurably reduced poaching and other trafficking in wildlife, and increases in wildlife populations will provide overarching measures of our efforts to combat wildlife trafficking. The Task Force agencies will meet regularly to assess progress toward these objectives, with the lead agencies responsible for ensuring that progress remains on track for each objective. The Task Force will prepare and make public progress assessments on an annual basis. These annual assessments should guide the allocation of resources to areas where we have made substantial progress and where resources can have the greatest impact.

---

QUESTIONS SUBMITTED BY SENATOR PATRICK J. LEAHY

*Question.* As I mentioned at the hearing I am concerned about maintaining economic incentives for private landowners to own and maintain forest habitat, which is essential to the northern long-eared bat, while we address the real cause of the problem, which is white-nose syndrome. I would like to know what support, financially or through technical assistance, your Department can provide at the Federal and State level for the inventory and monitoring of maternity colonies and hibernation sites, and to study the status and trends of these populations that we still know so little about?

Answer. Prior to the advent of white-nose syndrome (WNS), population information for bat species not federally listed under the Endangered Species Act (ESA) was generally only collected, if collected at all, as part of monitoring efforts for listed species. At this time, no standardized, rangewide monitoring program exists for North American bat species not federally listed, including the northern long-eared bat. The FWS, U.S. Geological Survey, National Park Service, U.S. Forest Service, and other partners, have been working to develop the North American Bat Monitoring Program, or NABat, which is an international interagency program designed to monitor bat distributions and abundances on public and private lands, and provide trend data at State, provincial, tribal, regional, and rangewide scales. The FWS has contributed over \$1.2 million to develop and implement this program, with additional contributions from other Federal and private partners.

Since WNS began afflicting bat populations but prior to the establishment of NABat, the Department has used several funding sources to provide financial and technical assistance for bat inventories, monitoring, and status assessments. These sources include agency base funds for species conservation and inventory and monitoring programs. The FWS also provides grants from programs, such as the State and Tribal Wildlife Grants, which can be used to support bat conservation. In addition, FWS has provided over \$4 million since 2011 in grants to State wildlife agencies for the WNS National Response, which includes inventory, monitoring, and technical assistance efforts to determine the population status and trends of bat spe-

cies. For example, in 2014 the FWS WNS program funded and provided technical assistance for a population monitoring project of an important bat hibernaculum near Dorset, Vermont.

*Question.* Does the Department have any resources available to support conservation measures on private or public lands that would reduce non-white-nose syndrome threats to surviving and still-unaffected populations to aid in the recovery of the species?

*Answer.* Federal agencies receive funds for species and habitat conservation, some of which have been directed to address non-WNS threats to the species. The FWS funding sources to support conservation measures on private and non-Federal lands include species conservation funding within the Resource Management account, Partners for Fish and Wildlife and Coastal program funding, Cooperative Endangered Species Conservation grants to States, and State and Tribal Wildlife Grants. Also, the FWS provides technical assistance to private landowners for planning and implementing conservation measures.

*Question.* I am pleased to see your budget requests to address wildlife trafficking, particularly the increase for law enforcement support for efforts on the ground in Africa and here in the U.S. to combat the growing threat from poaching. I hope this leads to better prosecution of the perpetrators of these horrendous crimes. Last February, the Fish & Wildlife Service released new prohibitions on the import, export, and sale of products containing ivory. While I am very supportive of the administration's work to combat illegal wildlife trafficking, I would not want to see the initial criticism of the prohibition threaten its viability in the long run and hamper your work to fight wildlife trafficking.

I would like to know if and when the Department expects to update the ivory import/export restrictions to address the concerns that have been raised about de minimis amounts of ivory and also concerns from those who might not be able to provide some of the documentation that the Department has required for family heirlooms and antiques?

*Answer.* We have made great strides to significantly restrict commercial trade in elephant ivory within the U.S. and across our borders—including a ban on all commercial ivory imports—making it harder for criminals to disguise the source of poached and trafficked ivory.

The FWS issued Director's Order 210 on February 25, 2014, which re-affirmed enforcement of the African Elephant Conservation Act moratorium and addressed how the FWS would enforce the Endangered Species Act (ESA) antiques provision. Following issuance of the Director's Order, the FWS met with a wide array of stakeholders, including individuals and groups representing antiques dealers, auction houses, musical instrument makers, museums, and orchestras. As a result of these constructive meetings, we revised the Director's Order to address several of their concerns, allowing a broader class of noncommercial items to be imported into the United States and clarifying how we intend to enforce the ESA antiques provision, while still maintaining our goal of ensuring the United States is not contributing to poaching of elephants and illegal trade in ivory.

We also improved our ability to protect elephants, rhinos, and other CITES-listed wildlife by publishing a final rule in June 2014, revising our CITES regulations, including "use after import" provisions that limit sale of CITES-listed wildlife within the United States. The result of this rule is that items, such as elephant ivory, imported for noncommercial purposes may not subsequently be sold within the United States.

We are currently working on a proposed rule, which will be made available for public comment, to revise the ESA special rule for the African elephant. This proposed rule will include proposed limitations on the interstate sale of African elephant ivory. As part of this rulemaking effort, we also intend to propose common-sense exceptions for activities and items that we do not believe are contributing to the ongoing poaching crisis.

*Question.* I was encouraged to see the news in late February that China is taking some steps to reign in its exploding ivory trade by placing a 1 year ban on carved ivory imports. However, I remain concerned that the Chinese are not doing nearly enough to address the high stockpile of ivory already in their country.

How are you encouraging other countries to reduce demand for ivory that is the driver of the skyrocketing poaching levels we are seeing in Africa?

*Answer.* We are working on several fronts to address the demand for ivory in other countries, including supporting non-governmental organizations who are working on demand reduction campaigns in China, Vietnam, and other key consumer countries through our species and regional grants programs, engaging in bilateral discussions with China and other countries about how we can work cooperatively

to address wildlife trafficking, and ensuring that these countries are following through on their CITES commitments.

For example, CITES requires several key consumer countries of particular concern with regard to illegal ivory trade, including China, Malaysia, the Philippines, Thailand, and Vietnam, to develop and implement National Ivory Action Plans (NIAPs). The United States played a key role in negotiating these mandates and serves, as the North American regional representative and as the Vice Chair, on the CITES Standing Committee, the body responsible for evaluating these NIAPs and their implementation. On March 19, the CITES Standing Committee recommended a suspension of trade with Lao People's Democratic Republic, Nigeria, and the Democratic Republic of Congo for failure to develop adequate NIAPs.

By lending support and ensuring that commitments are met, we believe that we are making substantial progress in several key consumer countries.

*Question.* What more do we need to do to increase/support prosecution of these wildlife trafficking cases in this country?

*Answer.* The 2016 President's budget sufficiently supports FWS efforts to prosecute wildlife trafficking, including a \$4 million increase for Law Enforcement (OLE) to combat wildlife trafficking. With this funding, the FWS will hire 25 new personnel to focus on daily detection, interdiction, and investigation, both domestically and abroad, of illegal commercial exploitation. The 2016 budget also requests another \$4 million increase to hire a class of 20 new special agents. Additional special agents are needed to address officer safety, efficiency of cases, and staffing shortfalls that affect OLE's ability to perform ongoing investigations. After training, the new agents will be deployed to the field for direct interdiction of illegal commercial exploitation by organized criminal elements.

Current violations for most wildlife trafficking laws carry only a maximum 1 year sentence and minimum fines. Additional tools are needed as a means of deterrence to combat global wildlife trafficking, including increasing the penalties for conducting illegal trade. Granting the Federal Government the authority to prosecute a criminal violation of the Endangered Species Act, the African Elephant Conservation Act, or the Rhinoceros and Tiger Conservation Act with more stringent fines and sentencing would further deter would-be poachers.

*Question.* The White River National Fish Hatchery (WRNFH) in Bethel, Vermont, is a fine Federal facility in very good physical and operational condition. The main mission of the WRNFH has sunset, however, with discontinuation of the Connecticut River Atlantic Salmon Restoration Program. I am aware that the Fish and Wildlife Service is exploring a repurposing of this facility, possibly to serve as a regional watershed conservation center for the upper Connecticut River and Long Island Sound. This makes great sense to me, as I am well aware of how well the Fish and Wildlife Service does on partnership projects and of the significant conservation needs in the Connecticut basin. It would be a nationally unique and innovative project.

Will you support the Northeast Region of the Fish and Wildlife Service as they transition the White River National Fish Hatchery to an innovative valuable new Federal asset for the region?

*Answer.* Thank you for your interest in White River National Fish Hatchery (NFH). We sincerely appreciate your support during the years we worked to restore the facility after the damage from Hurricane Irene in 2011. As you recognize, the current state of the facility and infrastructure at White River NFH is excellent. The completed renovation has fully restored large-scale fish production capabilities.

As your inquiry points out, the facility's primary operational activity—restoration of Atlantic salmon in the Connecticut River—was discontinued several years ago.

The U.S. Fish and Wildlife Service staff in Vermont is exploring opportunities to ensure optimum public benefits accrue from this public investment. The FWS is looking forward to determining how to best use the White River NFH for hatchery production to support species recovery, restoration, and fisheries in New England, and is exploring areas where we share a common mission for activities in the Connecticut River watershed. We have initiated discussions with others whose facilities serve as potential models for addressing dynamic aquatic conservation needs and are investigating prospective partnerships where benefits can be derived from collaborative or co-located use of the assets and infrastructure at White River NFH.

Evolving conservation challenges require us to be adaptable and we support innovative solutions to meet our mission and address aquatic conservation goals. Our State, Federal, and other partners are vital to developing cohesive and complementary purposes for the National Fish Hatchery System and we value their input. Naturally, working with our partners is our top priority as we move forward. We will be talking more with you and other partners as we continue to explore opportunities at White River NFH. Thank you for your support and encouragement.

SUBCOMMITTEE RECESS

[Whereupon, at 11:53 a.m., Wednesday, March 4, the subcommittee was recessed, to reconvene subject to the call of the Chair.]

# United States Senate

COMMITTEE ON APPROPRIATIONS

## PROOF FOR FINAL REVIEW

Attached please find a PDF file of the hearing held on Wednesday, May 13, 2015 for the Department of the Interior, Environment, and Related Agencies Appropriations for Fiscal Year 2016. If you have any changes please mark up the PDF file and send back the marked-up document as a PDF attachment. Inserts can be sent to me by email or fax inserts and/or corrected pages only (202-228-2348).

If you have any questions or concerns about the attachment please don't hesitate to contact me. Also, please send me an email if the final proof is acceptable to you.

Thank you.

DUE DATE: [Friday, March 18, 2016].

**DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES APPROPRIATIONS FOR FISCAL YEAR 2016**

WEDNESDAY, MAY 13, 2015

U.S. SENATE,  
SUBCOMMITTEE OF THE COMMITTEE ON APPROPRIATIONS,  
*Washington, DC.*

The subcommittee met at 10:07 a.m., in room SD-124, Dirksen Senate Office Building, Hon. Lisa Murkowski (chairwoman) presiding.

Present: Senators Murkowski, Cochran, Hoeven, Daines, Cassidy, Udall, and Merkley.

DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

**STATEMENT OF NEIL KORNZE, DIRECTOR**

OPENING STATEMENT OF SENATOR LISA MURKOWSKI

Senator MURKOWSKI. We will call to order the Senate Appropriations Subcommittee on the Interior, Environment, and Related Agencies.

Welcome to the committee, Mr. Kornze. We appreciate you being here today.

I think it is fair to say that in recent years discussions about the Bureau of Land Management (BLM) budget or oversight issues in this subcommittee have been wrapped up into the bigger, broader budget hearing for the entire Department of the Interior. As we move toward marking up a bill, I do think that it is beneficial for subcommittee members to have an opportunity to discuss the operations and programs of the largest land manager in the United States in greater detail than can be accomplished at the broader department-wide budget hearing for the Interior.

For fiscal year 2016, the President's budget has requested \$1.2 billion for the BLM. This is a \$107.6 million amount more than the current level. As I have noted in our subcommittee hearings, the President's request assumes Congress does not have to comply with spending limits. But with the budget that we passed last week, that assumption is no longer relevant. This subcommittee will have to make some tough choices about where to spend limited resources given the spending limits that we face in a way that the President's budget was able to avoid.

(1)

The BLM is responsible for managing roughly 250 million acres of Federal land—this is about 38 percent of the entire Federal surface estate—and 700 million acres of subsurface estate. The vast majority of this land is in our 11 Western States and Alaska.

BLM has a multiple use mission, part of which is facilitating most Federal onshore natural resource development. Consequently, BLM-managed lands are important economic drivers beyond recreation and conservation, and this is especially true in Alaska.

While BLM only manages a small portion of the Alaska land base because of the large size of my State, nearly one-quarter of all BLM lands are located in the State of Alaska, the largest portion of this land is within the National Petroleum Reserve Alaska, NPRA. It is no secret that I believe responsible development of our Nation's energy resources is important to both our economic and our national security. The resources within NPRA can and must be developed in a responsible manner, and as a Nation we are relying on the BLM to make this responsible development possible.

The work to bring affordable energy to our homes has come with some challenges. Prior to 1982, the Federal Government drilled more than 130 exploratory wells in an effort to determine the extent of oil and gas resources in the region. But unfortunately, those wells were abandoned and many of them are awaiting cleanup to this day.

Passage of the Helium Stewardship Act a couple years ago provided BLM with the funding needed to make progress on cleanup of these blights, and we have made some headway in that area. We recognize that there is more to be done here, and I look forward to asking you, Mr. Kornze, about both the contaminated well issue and implementation of the Helium Stewardship Act.

The BLM has made considerable progress on issues important to me and to Alaskans. I would like to thank you, Mr. Kornze, as well as Alaska State Director Bud Cribley. The team that has been working to complete the transfer of the economic tracks to see Alaska has worked well, and I appreciate that. I did have the opportunity to meet with Mr. Cribley a couple weeks ago. We are making some progress on the conveyance of Alaska lands under the Alaska Native Claims Settlement Act (ANCSA). It has been a long time in coming, though. It was the Alaska Lands Conveyance Act of 2004 that we passed and was signed into law, and the promise at that time was that the completion of the conveyances would be done by the 50th anniversary of statehood, which of course was 2009. We are sitting here in 2015. While we may be on track, we still have a ways to go there.

We have some other challenging issues that need to be addressed. The Greater Mooses Tooth Project. I have expressed my frustration with the mitigation requirements and other process issues that have proceeded throughout that process. And some of the issues have been settled, but we are still in a place where the Federal Government is proposing to put conditions on the project that threaten to make it unaffordable to move forward.

This is really about prioritization and pace of responsible energy development on public lands not only in Alaska but in the Lower 48 as well. I think many of my colleagues from the West can relate to the struggles that we face in Alaska.

The most challenging issue facing the interior West, where most of the BLM-managed lands in the lower 48 are located, is potential regulatory action relating to the Greater sage-grouse. While the threat of an Endangered Species Act listing looms, there are significant fears that regulations put in place to preserve sage-grouse habitat are perhaps even more restrictive and provide less certainty in the permitting process than an ESA listing. It is my understanding that the land use plan amendments that will govern management for sage-grouse on BLM and Forest Service lands will be made public at the end of this month. And like my colleagues, I look forward to the release, the evaluation, and reception by impacted States. The contents of those plans will help this subcommittee determine the merits of the requested \$45 million increase BLM requested for sage-grouse activities in the fiscal year 2016 budget.

The BLM included several other notable budget proposals, including the request to once again raise fees on public land users like grazers and onshore oil and gas producers. Oil and gas activities on public lands contributed more than \$5 billion to the Federal Treasury in 2014. So I am not convinced that raising fees will not reduce this contribution by discouraging activity on our Federal lands. Less activity will ultimately result in less revenue to the Treasury and the communities which rely on these activities for economic sustainability.

So, Mr. Kornze, I look forward to hearing from you this morning about BLM's national priorities, including renewable energy development, their role in the Secretary's wildfire strategy, and many other important issues before the committee.

So again, thank you for agreeing to be with us this morning.

And with that, I turn to my friend and ranking member, Senator Udall.

STATEMENT OF SENATOR TOM UDALL

Senator UDALL. Thank you, Chairman Murkowski. Good morning.

And I would also like to welcome Director Kornze. Thank you for joining us today as we discuss the fiscal year 2016 budget request for the Bureau of Land Management.

The lands managed by BLM in New Mexico are vital to our economic vitality and to our natural and cultural heritage. Oil and gas production, mineral extraction, renewable energy, grazing, and hunting and recreational opportunities from hiking to class 6 rapids all can be found on BLM lands and are a part of what makes New Mexico *la tierra encantada*.

I am proud to have worked with my constituents and this administration to designate two of BLM's newest conservation units, the Organ Mountains-Desert Peaks National Monument in the south and the Rio Grande del Norte National Monument in northern New Mexico. Director Kornze, I really appreciate that you came to the State personally to walk the land we were talking about protecting. You and the BLM employees in New Mexico were so supportive and helpful to work with us on these designations. And I appreciate the outreach that is taking place now to include the local communities in the planning process. Both monuments are up

for increased spending in the President's budget. We will talk about that today.

I am also glad that we will have time to discuss oil and gas production. We hear a lot about offshore production, but Federal lands are an important energy producer as well. In 2014, Federal lands were responsible for 41 percent of U.S. coal, 40 percent of geothermal, 11 percent of domestic natural gas, and 5 percent of domestically produced oil.

BLM also approved renewable energy projects for up to 16,000 megawatts of power. That is enough energy to take care of 4.8 million homes.

And BLM provides key access to minerals, including uranium, gold, silver, potash, gypsum, and building stones, sand, and gravel. This all makes a difference to our economy, our vitality, and our security.

I believe in responsible energy production and have long called for a "do it all, do it right" approach. Despite what its detractors may say, this administration has overseen a remarkable increase in oil development. We have seen an incredible 81 percent increase in production on public and tribal lands in 2014 versus 2008. Energy development is important to our economy in my State and elsewhere. But we also need to protect the environment and drinking water and make sure that the American public receives its fair share of revenue from industry's production of public resources.

The Government Accountability Office has had the Interior Department's oil and gas programs on its high risk list for many years. There are two major concerns: the BLM's lack of authority to collect inspection fees and the difficulty in hiring and retaining a skilled workforce. The President's budget once again proposes to collect \$48 million from new inspection fees for onshore oil and gas producers. This would bring onshore production in line with offshore production where Congress instituted an inspection fee in fiscal year 2012. And it would put the responsibility for paying for inspections on leaseholders not the American taxpayer.

Director Kornze, another issue is the sage-grouse. I know that you have spent a good deal of time on this. I would like to talk about the next steps with you this morning. While not on the same scale in New Mexico as we have recently dealt with the endangered species issues from the lesser prairie chicken and the sand dune lizard, listing and delisting of species by Congress goes against the intent of the Endangered Species Act. It requires that the Government make these decisions based on science not politics.

I believe that in New Mexico, we have created an effective model. In the case of the sand dune lizard, the U.S. Fish and Wildlife Service found that enough acres were enrolled voluntarily for legally binding conservation agreements for that protection to last and to take care of the species. It concluded that a listing was not warranted. For the lesser prairie chicken, Fish and Wildlife found that the significant conservation efforts were able to avoid an endangered species listing, but it was not enough to prevent a threatened listing. And the Service is working closely with the States to provide maximum flexibility under the law. I believe the process is working, bringing all stakeholders in to discuss how to protect species and habitat while ensuring economic growth.

So I look forward to talking with you, Director Kornze, about oil and gas, national monuments, sage-grouse conservation efforts, and other important matters. Thank you again for being here this morning.

Thank you, Madam Chair.

Senator MURKOWSKI. Thank you, Senator Udall.

Mr. Kornze, welcome to the committee. Mr. Kornze is the Director of the Bureau of Land Management for the U.S. Department of the Interior. You have generated a crowd this morning, which I am assuming is a good thing. It could be fan club. It could be lots of people with equal interests in this aspect of the Department of the Interior. So, again, we thank you for being here before the subcommittee this morning. We look forward to your opening statement and for the opportunity to ask some questions. So, Mr. Kornze, if you want to begin with your comments. Thank you. Welcome.

#### SUMMARY STATEMENT OF NEIL KORNZE

Mr. KORNZE. Thank you very much. Chairman Murkowski, Ranking Member Udall, Chairman Cochran, members of the subcommittee, thank you for the opportunity to be here with you today.

The Bureau of Land Management manages nearly 250 million acres of land across the country and 700 million acres of subsurface estate. That means 10 percent of the Nation's surface or more and nearly a third of the Nation's minerals and soils. We manage these lands under the dual framework of multiple use and sustained yield.

As you know, the BLM also manages nearly 20 percent of the State of Alaska.

I recently traveled to Alaska to meet with the Governor to discuss our innovative approach for surveying for land conveyances and hosted a Federal roundtable related to contaminated lands. We appreciate your partnership and support as we address the unique issues on public lands in places like Alaska and New Mexico.

Today, the entire Bureau's work is more complicated than ever, and the professionals at the BLM have to work hard to make quality choices in a difficult environment every day. And we make sure that the public has a strong voice in the work that we do. We play a major role in the economies of many States in supporting oil and gas development, all kinds of recreation, hunting and fishing, helium production, timber, coal production, ranching, wildland fire fighting, and even beekeeping.

Last year the BLM and the lands we manage supported more than 450,000 jobs across the country, and we are one of only a handful of agencies that returns more revenue to the Government than we receive in appropriations. In fact, for every dollar you provide, we return \$5.

In terms of the 2016 budget, I want to highlight four different programs today.

First is sage-grouse. The Bureau of Land Management is leading the west-wide effort with Western Governors from 11 States to strengthen management of sage-grouse habitat including extensive collaboration with State agencies, the Forest Service, the Fish and

Wildlife Service, counties, and many other partners. The President's budget requests a total \$60 million to engage our partners and implement projects on the ground that will reduce the threat of wildfire, that will slow and reverse the spread of invasive species, that will improve riparian areas, and that will remove hundreds of thousands of pinyon juniper trees. Without this investment in proactive sage-grouse conservation, the agency is more likely to be faced with difficult decisions in the future regarding balancing the conservation of this bird and many other important resources.

The second program I want to highlight is our National Conservation Lands. The President requests an important increase in this program this year. These special areas make up roughly 10 percent of the lands that we manage, but they receive roughly 25 percent of the visitors that we have to the Nation's public lands. Additional support for these congressionally and presidentially protected areas will allow us to provide basic levels of service to our many visitors and will boost the economies of local communities that rely on visitation to these areas.

The third program is the BLM Foundation. In connection with this budget, the President has moved forward language that would allow Congress to establish a chartered foundation, a nonprofit, that would support the Bureau in a manner very similar to the work done by the National Park Foundation, the National Forest Foundation, and the National Fish and Wildlife Foundation. I would submit to you that the Bureau of Land Management has the most complicated mission of any of these agencies, and we could greatly use the support and the outside facilitation that would come with the BLM Foundation.

The fourth program I would like to highlight today is the oil and gas fee proposal. In the last 10 years, the BLM has authorized more than 50,000 new oil and gas wells, bringing our total portfolio to nearly 100,000 wells nationwide. We are proud of oil and gas production on lands that we have a role in regulating. The production on those lands closely tracks comparable production on State and private lands. From 2008 to 2014, the years during this administration, oil production from lands requiring a BLM permit has increased 81 percent, from 113 million barrels to 205 million barrels. With the modest fee that we are requesting, we are seeking the ability to be responsive to the ups and downs of the oil and gas industry, ensuring that these activities are done safely on the public lands, and our expanding portfolio requires that we have more inspectors than ever before. It is a natural consequence of the success of the oil and gas program that we have. Today we have roughly 160 inspectors. We need 220. In order to get to where we need to be for a safe and responsible program, we need your help.

In conclusion, this is a very important time for the American West, for the Bureau of Land Management. And we greatly appreciate the relationship that we have had with this committee in years past and we look forward to working with you on the 2016 budget. Thank you.

[The statement follows:]

## PREPARED STATEMENT OF NEIL G. KORNZE

Madam Chairman and members of the subcommittee, I am pleased to join you today to discuss the President's fiscal year 2016 budget request for the Bureau of Land Management (BLM). The BLM manages nearly 250 million acres of land and 700 million acres of subsurface estate. That's more than 10 percent of the Nation's surface and nearly a third of its minerals. The BLM manages this vast portfolio on behalf of the American people under the dual framework of multiple use and sustained yield. This means the BLM manages public lands for a broad range of uses including renewable and conventional energy development, livestock grazing, timber production, hunting, fishing, recreation, and conservation. We manage lands with some of the most significant energy development in the world and some of North America's most wild and sacred landscapes.

The professionals at the BLM make hard choices every day and we take pride in making sure the public has a strong voice in the work we do. Compared to many other Federal agencies, we are relatively small in number—just 9,700 full-time equivalent (FTE)—but the impact of the BLM and BLM-managed resources is tremendous. Recent Interior studies indicate BLM's management of the public lands provides an outstanding economic return to the American public. In 2013, activities on lands under the BLM's management were estimated to contribute over \$107 billion to the Nation's economic output and support more than 440,000 jobs across a broad range of industries. While the BLM receives just over a billion dollars in annual appropriations to support our programs nationwide, our programs support the collection and distribution of more than five billion dollars to the U.S. Treasury and to State governments each year.

Our fiscal year 2016 budget continues our tradition of serving the American public by supporting economic development and jobs in traditional and emerging industries, conserving our natural resources, reducing our dependence on foreign energy, protecting our Nation's cultural heritage, and preserving some of our Nation's most cherished places.

## BLM BUDGET REQUEST

The fiscal year 2016 BLM budget request is \$1.2 billion, an increase of \$107.6 million from the 2015 enacted level. The budget proposes \$1.1 billion for the Management of Lands and Resources appropriation and \$107.7 million for the Oregon and California Grant Lands appropriation, the BLM's two operating accounts. The budget also proposes \$38.0 million in discretionary funding for Land Acquisition, to complement \$55.4 million proposed in mandatory Land Acquisition funding. These investments fall under the following program areas.

## SUPPORTING AND MODERNIZING MANAGEMENT OF INCREASED ENERGY PRODUCTION

The 2016 budget advances the President's all-of-the-above energy strategy to continue to promote safe and responsible energy development. The fiscal year 2016 budget request advances the goals of this strategy with priority funding for both renewable and conventional energy development on public lands.

*Renewable Energy.*—In the past 6 years, the BLM has worked to facilitate a clean energy revolution on public lands through the approval of scores of utility-scale renewable energy generation and transmission projects. This includes 29 utility-scale solar facilities, 11 wind farms, and 12 geothermal plants, with associated transmission corridors and infrastructure to connect with established power grids. When completed, these projects will provide more than 14,000 megawatts of power, or enough electricity to power about 4.8 million homes, and provide over 20,000 construction and operations jobs.

The 2016 President's budget requests \$29.4 million for Renewable Energy Management, which maintains funding at the 2015 enacted level plus an increase of \$295,000 for fixed costs. This would provide the BLM the necessary resources to continue to actively facilitate and support solar, wind, and geothermal energy development on BLM lands, which will create jobs, provide clean energy, and enhance U.S. energy security by adding to the domestic energy supply. It will also support the President's aggressive goal of increasing the permitting of new renewable electricity generation on public lands to 20,000 megawatts by 2020. The BLM is committed to contributing to this goal by permitting environmentally responsible projects on public lands.

*Conventional Energy.*—The agency has also overseen continued natural gas production and a significant increase in oil production from public lands in recent years. Oil production from Federal and Indian lands in 2014 rose 12 percent from the previous year and is now up 81 percent since 2008—113 million barrels to 205

million barrels per year. For comparison, nationwide oil production over the same period increased 73 percent. It is also worth highlighting that the BLM continues to make public lands available for oil and gas development well in excess of industry demand.

The BLM works closely with partners across the country to ensure development of renewable and conventional energy occurs in the right places and projects are managed safely and responsibly. The President's budget proposes significant investments for improving how the BLM leases, permits, and inspects oil and gas wells, including updating regulations to reflect current industry practices and putting needed technology in the hands of BLM employees.

The 2016 budget for oil and gas management activities from all sources represents an increase of \$29.1 million over the 2015 enacted level, a roughly 20 percent increase. This additional funding will help make the BLM faster and more effective in responding to management challenges, public concerns, and the needs of industry. The President's budget reflects a new approach to providing resources to the field with a proposal to strengthen BLM's inspection program by charging a fee comparable to that charged in offshore oil and gas development. The new fee is estimated to generate \$48 million in 2016, which will provide a program increase of \$6.9 million for these activities, while reducing the need for direct discretionary appropriations.

The increased funding will allow the BLM to hire additional inspectors who are sorely needed to fulfill the agency's high priority inspection workload. Approximately 220 inspectors are required nationwide to complete the agency's large and growing inspection workload. While last year's budget provided a small increase for this program area, we remain understaffed in this important program, with only 155 inspectors. This increase is critical for the BLM to be more responsive to industry demand and a constantly changing inspections workload. Significantly, it will also support BLM efforts to address ongoing program management concerns that have placed the program on the Government Accountability Office's (GAO's) High Risk list. Finally, the President's budget also reflects the BLM's commitment to improving its processes for responsibly permitting oil and gas operations, requesting an increase of \$4.0 million to complete the final phase of the BLM's transition to a new electronic permitting system.

Coal produced from Federal lands is the source of over 20 percent of all U.S. electricity. The BLM is working to strengthen management of coal leasing activities and address recommendations made by GAO and the Inspector General (IG) in 2013 and 2014 reports. These efforts enhance the appraisal process and determination of fair market value when conducting lease sales, help ensure a consistent and efficient coal lease sale process, and enable BLM to account for export potential through analysis of comparable sales and income. An increase of \$1.1 million in Coal Management will support the automation and tracking of licenses, leases and permitting as well as inspection activities, including production verification associated with coal. A \$1.1 million increase is also requested for a similar automated tracking system in the Other Mineral Resources Management program.

*Transmission.*—The BLM also supports the modernization of energy transmission infrastructure. To support necessary upgrades for reliability and increased capacity, the budget includes a \$5.0 million increase to identify and designate energy corridors in low conflict areas and to site high-voltage electrical transmission lines, substations, and related infrastructure in an environmentally sensitive manner.

#### RESTORING SAGE-GROUSE HABITAT THROUGH PARTNERSHIPS AND COLLABORATION

To ensure the long-term viability of sage-grouse and the continued vitality of western economies, the BLM is leading an unprecedented, collaborative west-wide effort to update and strengthen management of sage-grouse habitat. Key collaborators include western Governors, State wildlife agencies, counties, the U.S. Fish and Wildlife Service, U.S. Geological Survey, and the U.S. Forest Service. The 2016 BLM budget request includes a total of \$60 million—a \$45.0 million increase over the 2015 enacted level—for implementing the Sage-Grouse Conservation Strategy to enhance sage steppe conservation and restoration; a landscape which supports significant economic activity and more than 350 species.

These funds will allow the agency and its many partners to take meaningful steps forward on restoring rangelands, minimizing the threat of wildfire, controlling invasive plants, and improving riparian areas. Since 2013, the BLM has targeted \$15.0 million per year toward the implementation of broad-scale sage-grouse planning and conservation activities. These efforts involve extraordinary collaboration between the BLM, western Governors, and non-governmental partners to conserve the sage steppe ecosystem.

SUPPORTING THE BLM NATIONAL CONSERVATION LANDS, AMERICA'S NEWEST  
CONSERVATION SYSTEM

The President's budget includes an \$11.2 million program increase for the BLM National Conservation Lands, which celebrate their 15th anniversary this June. This investment will address high-priority needs in conservation areas, including providing basic support for recreation and visitor services. While National Conservation Lands represent only a small portion of the lands managed by BLM, one-quarter of all visitors to BLM lands visit these special areas. This investment will help to ensure these untamed places remain a legacy for all future generations.

Although visitation to BLM-managed lands has grown, financial investment in the Recreation and Visitor Services program has not kept pace with this growth. This request proposes an additional \$6.6 million to implement a National Recreation Strategy that aligns BLM Recreation & Visitor Services Program resources with the desired benefits sought by local communities. A strong commitment to conservation also means proactive management of cultural and paleontological resources. The 2016 budget also includes increases for programs funded through the Land and Water Conservation Fund, a vital component of the America's Great Outdoors initiative. The 2016 budget proposal includes a total of \$93.4 million for conservation land acquisition from willing sellers, including \$38.0 million in requested discretionary appropriations and \$55.4 million in mandatory funding.

## OTHER PRIORITY INITIATIVES

*Helium.*—Additionally, the BLM has begun implementation of the Helium Stewardship Act of 2013, which authorized the program to transition out of the role it has played for a century. With the start of Phase B Helium Auctions and Sales last year, the BLM conducted its first ever helium auction that offered 92.8 million cubic feet (MMcf) and a sale that offered 835.3 MMcf of helium for delivery in fiscal year 2015 and an additional 250 MMcf of helium for delivery in fiscal year 2016. The auctioned helium sold for an average price of over \$161 per Mcf, much higher than anyone expected. The average auction price was factored into the helium sale price, which was set at \$106 per Mcf. As a result of the auction and sale, the BLM collected nearly \$130 million. Currently, the BLM is preparing for the next Helium Auction and Sale scheduled for this summer and expects to offer 25 percent of the helium available for auction which equals 300 MMcf of helium and the remaining Phase B Helium Sale volume for fiscal year 2016 of 600 MMcf. The BLM is expecting to use the average auction price to set the helium sale price. The BLM's crude helium sales are generating revenue for the American taxpayers and providing 22 percent of the world's annual Helium supply.

The BLM plays a significant role in Alaska and Arctic resource management and provides significant support to Native Alaskans. The 2016 BLM budget includes \$78.9 million for Alaska and Arctic activities, an increase of \$1.8 million above the 2015 enacted level. Some of BLM's priority activities in this region are highlighted below.

*Legacy Well Remediation.*—The BLM continues to prioritize clean-up of abandoned Federal wells in Alaska and has spent approximately \$70 million dollars towards this clean-up through fiscal year 2014. In fiscal year 2014, BLM spent over \$800,000 on priority wells on Simpson Peninsula preparation for winter remediation. Thanks to the leadership of Senator Murkowski and others who made the passage of the recent Helium Act possible, the BLM has spent nearly \$10.5 million on remediation of priority wells identified in the 2013 Legacy Well Strategic Plan. In March-April 2015, the BLM completed subsurface work in Umiat through an Inter-Agency Agreement with the United States Army Corps of Engineers, and with full coordination with the Alaska Oil and Gas Conservation Commission. Umiat #1, #3, and #11 were plugged, and wellheads were removed at the previously plugged wells, Umiat #4, #8, #10. The BLM is currently preparing to conduct surface clean-up in August 2015 at the Simpson Core Test sites 26, 30 and 30A, and take additional sampling to verify there are no remaining contaminants from the wells drilled in the early 1950s. This work is expected to cost \$1.03 million. Additionally, the BLM expects to have contracts in place for the winter of 2016 to plug and complete surface sampling of 7 legacy wells in the Barrow area.

*Alaska Land Transfer Program.*—For decades, the Bureau of Land Management has been surveying and monumenting lands based on standards outlined in a 1973 agreement between the agency and the State. The Bureau has recently taken a close look at the best available practices for this program and has determined that, using modern tools and techniques, the remaining surveys and conveyances can be accomplished in a substantially shorter amount of time while providing the State of Alaska with higher quality data than was ever envisioned in 1973. The new approach

also has the potential to save millions of dollars for the American taxpayer, while fulfilling the promise of land conveyances called for in the Alaska Statehood Act. This new approach is a significant opportunity for the State of Alaska and the Bureau of Land Management to jointly innovate and demonstrate meaningful progress on an issue important to many Alaskans. We look forward to formalizing these new and significantly improved procedures with an update of the 1973 MOU between the Governor of Alaska and the BLM Director.

In fiscal year 2015, BLM Alaska plans to survey nearly 4 million acres of Alaska Statehood Entitlement land, which will allow for patent issuance within 3 years. The BLM will also fulfill entitlements for 15 Alaska Native Claim Settlement Act (ANCSA) village corporations this fiscal year, which means the BLM will have completely fulfilled 50 percent of village entitlements in Alaska. Additionally, the BLM will undertake a number of surveys this field season including final entitlement surveys for seven ANCSA village corporations, survey of nearly 130,000 acres of regional entitlements (including three tracts of land for Sealaska Corporation conveyed pursuant to the 2015 National Defense Authorization Act), and three post-conveyance obligation surveys (ANCSA 14(c)) providing the affected village corporations site control for community development.

*Alaska Native Claims Settlement Act Contaminated Lands.*—The BLM is on schedule to submit a report to Congress in June of this year as an update to the 1998 Report to Congress. In recent years, the agency has focused on developing a comprehensive database of potential contaminated sites conveyed to ANCSA corporations based on inventories compiled by State and Federal partners in Alaska. To date, the BLM has reviewed the land status of over 6,000 sites within the database to determine whether they are on land conveyed to ANCSA corporations and which agency is responsible for the existing contamination. The BLM is currently facilitating a collaborative effort with Alaska Native corporations, Department of Defense agencies, the Federal Aviation Administration, the State of Alaska, and Alaska Native regional and village corporations to enhance the inventory data by verifying site ownership and site cleanup status on lands conveyed to ANCSA Native entities.

A preliminary review of inventoried sites in the database has found that a majority of sites are not on land conveyed to an ANCSA entity, most contaminated sites on conveyed land are on parcels that were not managed by the BLM before conveyance, and cleanup is complete or institutional controls have been established for approximately two-thirds of all known contaminated sites conveyed to an ANCSA corporation.

*Arctic Council.*—The Arctic Council is a consensus-based international body made up of the eight Arctic nations and six Permanent Participant organizations representing Arctic indigenous groups, four of which are rooted in Alaska. It allows for non-voting participation of observer nations and organizations, and manages six working groups that address matters of concern to the Council. The United States assumed the 2-year Arctic Council Chairmanship in late April, a responsibility that will require participation and engagement from all of the Federal agencies engaged in the Arctic. Interior has perhaps the most substantial Federal management role in the region, as we manage 74 percent of the U.S. landmass above the Arctic Circle and all of the Outer Continental Shelf beyond 3 miles from the coast. BLM Alaska alone manages 31 percent of the landmass in the U.S. Arctic and 40-percent of the landscape north of the Brooks Range (North Slope of Alaska).

Of the six working groups under the Arctic Council, the Conservation of Arctic Flora and Fauna (CAFF) Working Group is the foundation for the marine, terrestrial, freshwater and coastal environments. Currently, the BLM and North Slope Science Initiative co-lead a subgroup of CAFF, the Circumpolar Biodiversity Monitoring Program (CBMP), with the Kingdom of Denmark (Denmark, Greenland and Faroe Islands). The CBMP harmonizes data from many disparate sources and Arctic ecosystems across all eight Arctic nations to support effective and collaborative large-landscape management. These efforts provide critical information that U.S. Arctic resource managers leverage to make informed, defensible land management decisions in the Arctic.

#### LEGISLATIVE PROPOSALS

*Establishing a BLM Foundation.*—In connection with the budget request, the administration sent to Congress a legislative proposal for a congressionally chartered non-profit foundation for the BLM. A foundation would strengthen the BLM's efforts to link Americans to their public lands through an organization that would raise and spend private funds and foster constructive partnerships in support of the BLM's mission. The foundation would operate in a manner similar to the National

Park Foundation, the National Fish and Wildlife Foundation, and the National Forest Foundation, all of which were approved by Congress.

*Oil and Gas Management Reforms.*—The administration proposes a package of legislative reforms to bolster and backstop administrative actions being taken to reform the management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources and on improving transparency and oversight. Proposed statutory and administrative changes fall into three general categories: advancing royalty reforms, encouraging diligent development of oil and gas leases, and improving revenue collection processes.

Royalty reforms include evaluating minimum royalty rates for oil, gas, and similar products; adjusting onshore royalty rates; analyzing a price-based tiered royalty rate; and repealing legislatively mandated royalty relief. Diligent development requirements include shorter primary lease terms, stricter enforcement of lease terms, and monetary incentives to get leases into production, for example, through a new per-acre fee on nonproducing leases. Revenue collection improvements include simplification of the royalty valuation process, elimination of interest accruals on company overpayments of royalties, and permanent repeal of Interior's authority to accept in-kind royalty payments. Collectively, these reforms will generate roughly \$2.5 billion in revenue to the Treasury over 10 years, of which an estimated \$1.7 billion will result from statutory changes. Related to these initiatives, the BLM recently released an Advance Notice of Proposed Rulemaking that seeks comments on whether: royalty rates for new competitively-issued leases should be changed; annual rental payments and minimum acceptable bids should be increased; and bonding requirements and civil penalty assessments should be changed.

*Hardrock Mining Reform.*—The 2016 budget includes two legislative proposals to reform hardrock mining on public and private lands by addressing abandoned mine land hazards and providing a better return to the taxpayer from hardrock mineral production on public lands. The first component of this reform addresses abandoned hardrock mines across the country through a new Abandoned Mine Lands fee on hardrock mineral production. The second legislative proposal institutes a leasing process under the Mineral Leasing Act of 1920 for certain minerals—gold, silver, lead, zinc, copper, uranium, and molybdenum—currently covered by the General Mining Law of 1872. Under this proposal, mining for these metals on Federal lands would be governed by the new leasing process and subject to annual rental payments and a royalty of not less than 5 percent of gross proceeds.

*Recreation Fee Program.*—The budget proposes legislation to permanently authorize the Federal Lands Recreation Enhancement Act, which will expire on September 30, 2016. The BLM currently collects approximately \$18.0 million in recreation fees annually under this authority and uses them to enhance the visitor experience at recreation facilities. These funds represent a significant portion of all the resources BLM has to devote to supporting recreational activities on public lands.

*Reauthorize the Federal Land Transaction Facilitation Act (FLTFA).*—The 2016 budget proposes to reauthorize the Act, which expired in July 2011, to allow lands identified as suitable for disposal in recent land use plans to be sold using the FLTFA authority. The sales revenues would continue to be used to fund the acquisition of environmentally-sensitive lands and to cover the administrative costs associated with conducting sales. Utilization of the FLTFA authority would help simplify the land patterns of the American West, promoting both conservation and community development goals.

#### CONCLUSION

The President's fiscal year 2016 budget request for the BLM makes important investments at a critical time for our agency and for the lands we manage across the Nation. The BLM has a unique and broad mission to manage public lands for multiple-uses and for sustained-yield. I am incredibly proud of the work done by BLM employees every day to ensure the agency is engaging with and listening to our partners and the communities we serve. I look forward to continuing our close partnership with this subcommittee as we strive to provide BLM's professionals with the tools and resources they need to succeed and to make our public lands an even larger contributor to the success of communities across the United States.

Thank you for the opportunity to present this testimony.

Senator MURKOWSKI. Thank you, Director Kornze.

As a courtesy to the chairman of our full committee, I am going to turn to Senator Cochran for any comments that he might make and he may ask the first question.

PINEY WOODS SCHOOL

Senator COCHRAN. Well, thank you very much, Madam Chairman. I am pleased to join you in welcoming our witnesses today to review the BLM's budget request for fiscal year 2016.

In my State of Mississippi, the Piney Woods School is located in the central part of the State and has an agreement with the Bureau of Land Management to house a wild horse and burro short-term holding facility. That agreement ended in March, and it is my understanding that there have been some complications related to closure of the facility. I hope we can get your commitment to personally look into this and work with the Piney Woods School to reach a reasonable resolution of this issue.

Mr. KORNZE. Chairman, I appreciate your raising this issue. I just recently became aware of the parting of ways between our program and the Piney Woods School, and I have asked my State director to head down there. She will be there before the end of the month. And we will take a close look at what is going on and see what we can do.

Senator COCHRAN. Thank you very much.

I yield back. Thank you.

Senator MURKOWSKI. Thank you.

I will go ahead and turn to Senator Udall for his questions, and the next is Senator Cassidy.

CHACO CANYON

Senator UDALL. Madam Chair, thank you very much.

Chaco Canyon is critically important to my State as an incredibly rich cultural destination, as well as a sacred place to the tribes of the Southwest. But as you know, Chaco Canyon is situated right in one of the most productive oil and gas production areas in the country. It appears that many new leases are getting closer to the Chaco Cultural National Historic Park, which really concerns me. Our congressional delegation in a letter we sent yesterday—I believe you have a copy of that. It was sent to Secretary Jewell and the assistant secretaries. And what we are requesting is that the assistant secretaries take a personal look at this issue and come to New Mexico to hear the concerns of our constituents.

I have a couple of questions here. One, can I get your commitment to work with me to ensure that oil and gas leasing near this iconic site are handled with the utmost consideration for the archaeological value that Chaco holds?

Mr. KORNZE. Absolutely, sir. I have not had the pleasure of seeing Chaco myself, but I look forward to it. And I know that this is an issue that we have been taking very seriously and we will continue to work with you on.

Senator UDALL. Thank you. Thank you very much.

I understand there is some potential for increased production in the San Juan Basin both for shale gas and shale oil. What is the status of the regional resource management plan, and how will it address future increased production in and around Chaco?

Mr. KORNZE. Right now we are operating under a plan from 2003 for the Mancos shale area, or the San Juan Basin. We initiated a new plan last year in 2014. It will take us reasonably another 3

or 4 years to complete that plan. But in the time since 2003, there has been the revolution in shale production, and we will address that and look at the future prospectivity and make sure that is built into our operations.

Senator UDALL. And you work through these issues in all your resource plans I believe.

Mr. KORNZE. We do.

NEW MEXICO/ARIZONA STATE OFFICES

Senator UDALL. Shifting direction here a little bit, you and I have talked about a possible proposal to merge the New Mexico and Arizona State BLM offices. As you know, I am very skeptical of this idea. Having a State director in New Mexico focused on New Mexico's many unique public lands issues has served us well for decades. Many New Mexico stakeholders, including former Bureau managers, are concerned that a merger might mean less for a State director to focus on New Mexico. And I share those concerns.

What I want is for the people on the ground to have the best customer service. How can you assure us that services will not suffer? Will there not be a negative local impact?

Mr. KORNZE. I appreciate you raising this issue. Your priority is also my priority in making sure that we have the best customer service in the offices where we have the most contact with the public. In the last 5 years, we have seen a reduction of 12 percent in BLM employees in full-time equivalents (FTE's). It is a major reduction in our workforce. It means less public contact. It means more work falling on the shoulders of fewer people. I am very proud of the work that the agency does, but it really puts us in a very difficult position in terms of serving the needs of the communities that are important to you and important to us.

So part of the Arizona-New Mexico concept, which no decisions have been made on, is we have to run on two tracks.

One is working with you. We have a budget in front of you that we think is a great blueprint for success and allows us to move in the direction of fulfilling our mission better and more fully.

On the other hand, we frequently receive requests from Congress to figure out, within the pie that we have, how could we run more efficiently. And so one of the tools that we have is to look within our management structure and see if there are ways where we can push more of the resources that have previously been invested there to our field offices, to our district offices, so that our boots on the ground are there and that we have the people and the support for the communities that see the greatest impact in places where the permitting gets done or plans get done.

So I look forward to working with you on this. I think a lot more conversation should take place, and I appreciate you keeping an open mind about it as we proceed.

Senator UDALL. I could not agree with you more, Director Kornze. I want to work with you on this and hear all of your proposals that you lay out.

I have two additional questions that I will give you for the record because I know you are preparing some things to move us down the right road here. What is your plan for stakeholder outreach in the five States that will be impacted by this proposal?

[The information follows:]

POTENTIAL CONSOLIDATION OF ARIZONA AND NEW MEXICO STATE OFFICES

The BLM has commissioned a small team of employees from both the Arizona and New Mexico organizations to take a hard look at workload in the two States to identify more precisely where efficiencies can be gained and assess where there are critical, unmet needs. This will identify where the BLM may focus any resources made available by gains in efficiencies. Once this information is in hand the BLM will conduct outreach to all groups who may be affected by this potential change.

And do you have the metrics from past efforts that demonstrate the pros and cons of this kind of consolidation?

[The information follows:]

As for the pros, consolidating administrative and oversight functions increases the efficiency of the organization because less of the BLM's budget will be invested in these functions and more will be invested in on the ground work. Consolidating the administrative and oversight functions increases the productivity of the people engaged in these functions since they will provide services to a larger number of employees. Consolidating the two organizations allows for BLM resources to be focused at lower levels in the organization where more direct service to the public takes place.

As for the cons, requests for reconsideration of District Manager decisions may take longer to process. In addition, there are likely to be some implementation costs to consolidating the two State offices.

But my next question—and I am running out of time here—is pretty quick. But New Mexico has these two new national monuments I talked about. And the President's budget includes \$4.4 million for New Mexico's national monuments and national conservation areas, including Organ Mountains-Desert Peaks and the Rio Grande del Norte. One of the reasons I supported creating these national monuments was to increase awareness across the country of the uniqueness of these landscapes.

Have you already seen an uptick in visitors to these areas? What can you report there in terms of what is happening on the ground?

Mr. KORNZE. One of my favorite examples of the power of some of these protected areas is the Rio Grande del Norte. In the 1 year after designation, the local county saw a 30 percent uptick in room taxes, and they expect that was corresponding to a 40 percent increase in visitorship. So the local economy was very excited about that. There were a lot of businesses on board, and I think that is paying dividends for the investment that they are making in their nearby public lands.

Senator UDALL. Thank you very much.

Thank you, Madam Chair.

Senator MURKOWSKI. Senator Cassidy.

LAND ACQUISITION

Senator CASSIDY. Hi, sir.

So Louisiana has 738 acres in the BLM. But then I look at this map, and you guys own Nevada.

Mr. KORNZE. We manage quite a bit of it. We do.

Senator CASSIDY. And he tells me you own a third of—or the Feds own a third of Montana. And Alaska—I believe I learned more about Alaska, since becoming a Senator, than I ever thought I wanted to know.

But you are impressive on this map. Why do you want \$38 million more to buy more land? I mean, I am looking at this thinking,

wow, let us break the addiction. You see what I am saying? We need some rehab. So why do you want to buy more?

Mr. KORNZE. So I think you are talking about the Land and Water Conservation Fund and potential land acquisitions that would come with that. It has been a very important program for the Nation in terms of a decision that this Congress made to reinvest proceeds from the Outer Continental Shelf—

Senator CASSIDY. We are billions behind in maintenance. And you got, Mr. Udall, 12.5 million acres in New Mexico?

Senator UDALL. That is right.

Senator CASSIDY. It seems like we should be selling. I say that in all seriousness. If I was Nevada, I would be really angry. Do you see what I am saying? They do not control their destiny. You do. Why are we buying more?

Mr. KORNZE. Well, I think the simple answer from the perspective of the Bureau of Land Management is this Congress and a previous President decided that—and made a very bold decision in the 1970's—that the estate that we have should remain in Federal management for the benefit of the public good. So that is our organic act that lays out that desire.

Now, the estate that we help manage is more scattered than other agencies. If you work for the Park Service or the Fish and Wildlife Service, you have a nice bright line around the lands that they manage. For us, however, sometimes it is checkerboard, you know, across much of northern Nevada where I am from.

Senator CASSIDY. So we you want to fill in the checkerboard.

Mr. KORNZE. There is a very significant pattern of complexity, and so in many cases, whether it is in a conservation unit or elsewhere, acquisitions can, in fact, decrease our management costs by providing a more unified—

#### ROYALTY RATES

Senator CASSIDY. I accept that rationale, though I am skeptical of the kind of overall kind of, my gosh, how much are we going to own.

I want to move on, not to be rude, but because I have other things.

You want to increase the royalty payments. Now, there is going to be some price point by which a well is profitable. Obviously, there is going to be transportation costs. There is going to be production costs. So if it is \$50 per barrel, as required for something to remain open, have you all done modeling of the assets that you lease, their economic viability given the current price of oil, and what your additional royalty payments will do to the economic viability of that? I am asking because of the jobs, and so I ask kind of as an academic, if you will.

Mr. KORNZE. Well, I think in order to put some baseline here, most States have an oil and gas royalty rate of more than 16 percent. Sixteen to twenty-five percent is what most States have. The Federal Government operates at 12.5 percent. So you already see a distinction there.

The Government Accountability Office (GAO) has put us on their high risk list, and part of it is because of the royalty rate and their

concerns about our ability to have a fair return for the American taxpayer.

So we have not made any decisions related to a royalty increase. We have an advance notice of proposed rulemaking out to the public, which has a number of questions so that we can look at questions like what you have raised in terms of what the impact of potential increases would be or potential models that might not simply raise the rate but under certain economic conditions would allow the rate to rise.

Senator CASSIDY. So you mentioned your tiered royalty rate. It would go up under certain circumstances not under others?

Mr. KORNZE. Well, under offshore, for instance—

Senator CASSIDY. No. Onshore.

Mr. KORNZE. Yes, but I think it is important to note for the audience that offshore, the rate is 16 percent and a little bit, and on a lease-by-lease basis, they raise that. So usually it is more than 18 percent. And so we would be looking at whether or not models like that or related models would be something that would be of benefit to the American taxpayer.

Senator CASSIDY. Got you. I do not know this, and so I am asking as purely a question to inform myself. You mentioned repeal legislatively mandated royalty relief. I am not familiar with that legislatively mandated royalty relief. What does that pertain to?

Mr. KORNZE. I would need more context.

Senator CASSIDY. It is in your testimony.

Mr. KORNZE. There are a number of proposals that the Office of Management and Budget (OMB) and others have pulled together for potential revenue raisers. I think within the oil and gas lexicon there are some fairly complicated tax law and other financial pieces. We could get back to you with more detail.

[The information follows:]

#### FEDERAL ONSHORE OIL AND GAS REFORMS

The 2017 President's budget includes a package of legislative reforms to bolster and backstop administrative actions being taken to reform management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources and on improving transparency and oversight. One of the components of this package of proposed reforms is the repeal of legislatively mandated royalty relief. Specifically, the budget would repeal section 344 of the Energy Policy Act of 2005, which provides incentive for natural gas produced from deep wells in shallow water in the Gulf of Mexico. The repeal does not pertain to existing leases that incorporate the section 344 relief authority. It would only apply to new leases issued after enactment of the proposed legislative.

Senator CASSIDY. Please. I am unfamiliar with that, so I would appreciate that.

And I think I will yield back now. Thank you.

Senator MURKOWSKI. Senator Merkley.

#### TRANSMISSION LINES

Senator MERKLEY. Thank you, Madam Chair, and thank you, Director Kornze.

A couple questions I wanted to get through. One of the issues—and you mentioned it in your testimony—is the challenge of draft guidance regarding sage-grouse. And under the BLM's preferred alternative, it mentions the potential strategy of burying trans-

mission lines as a mitigation measure. And this particular provision has produced a lot of feedback in Oregon from our electrical co-ops. The estimate is it would cost about \$3 million a mile to bury a line.

And to give you one example, in eastern Oregon, Harney Electric—they have 42 miles of transmission lines through sage-grouse habitat and 201 miles of distribution lines. So primary lines and then distribution lines. The estimated cost to bury those lines would be \$400,000 per customer. Obviously, we stretched a lot of wire to reach communities that were small communities so they could be electrified.

Is this strategy one that remains high consideration by the BLM, and how would a small electrical co-op possibly pay to bury lines at \$3 million a mile?

Mr. KORNZE. In terms of burial of lines, it is something that we are looking at more and more in our analysis. It is not necessarily something we are requiring. But as the West fills in, and as we have more needs, more uses and more sensitivities on the public lands, it is one of those tools in the toolbox, and I cannot tell you it is something that is going to be required.

In New Mexico, for instance, we were working on a very long line called SunZia and worked with the military with the idea that some small portions of that might need to be undergrounded to prevent impacts to the White Sands Missile Range.

Similarly, if new lines were built, in some areas we might look at undergrounding as a way to limit impacts on important bird populations.

So it is a tool in the toolbox. It might be part of an analysis.

Senator MERKLEY. Under your preferred alternative, I do not think that it referred specifically to new power lines, but is that your clarification that you are offering today is that that is the context within which you look at that?

Mr. KORNZE. Well, we will be releasing those plans in a few weeks, so I do not want to get into fine details today. But this is an issue where I think there is going to be flexibility for your teams. My sense is we are not looking retrospectively.

#### HYDRAULIC FRACTURING

Senator MERKLEY. That is helpful. Thank you very much.

I want to turn to fracking on BLM land. We have about 100,000 active wells, others that are not active. 90 percent of those wells use fracking. And I am pleased that the agency finalized a rule in March to update the fracking regulations, but I have some concerns about it.

It is weaker than many States. For example, Wyoming requires publication of the proposed chemical components before fracking occurs so that a baseline can be established to compare the impact afterwards. Unfortunately, the BLM rule does not match Wyoming.

Also, there is a loophole in the BLM rule regarding trade secrets. And specifically, as I understand it, all that a fracking operator has to do is assert that they believe that they meet the standard for trade secrets, and that is just a done deal. So it is very easy. I just say, yes, my chemicals probably meet this, so therefore this information is not going to be disclosed, which is a pretty big loophole.

That pretty much violates or wipes out the entire fling of the disclosure. This is chemicals on public land. This is our public land. This is not private land. And that is a pretty big deal to have a secret soup of chemicals that the BLM loophole is going to allow to continue to be private.

And there is also not even, in that situation, a disclosure provision for first responders and medical professionals. Colorado has such a program. Pennsylvania has such a program. Texas has such a program. Why did the BLM have such deficient provisions in its rules in March?

Mr. KORNZE. Well, I consider the hydraulic fracturing rule to be a major step forward. A lot of our oil and gas regulation at the Bureau of Land Management dates back to the 1980s. Some of it dates back to the time of Dwight D. Eisenhower. So it is time for a fresh look at a lot of our rules. Hydraulic fracturing has just been finalized as a rule, as you noted. Our three big pieces—

Senator MERKLEY. But should the public not have a right to know what chemical soup is put into the ground on public lands?

Mr. KORNZE. Yes. And so one of the key pieces of the three is disclosure. There is an exception for trade secrets.

Senator MERKLEY. But does that not wipe out the self-assertion of trade secrets, wipe out the requirement for disclosure?

Mr. KORNZE. We are operating in a similar way to most States. So Wyoming, which you pulled as a best case scenario under a different piece—they have a trade secrets exception. We do as well.

However, we have the ability to go and get that information. So it is held by the company. They have to sign an affidavit that the information that they are withholding meets a whole set of standards, and they have to sign that at a fairly high level within their company. If we have doubts about that or if we have a medical incident or we have other concerns, we can access that information and we can use that information in an appropriate way. So it is not as though that information is off to the side and is some sort of secret soup.

Senator MERKLEY. So I am out of time, but it is secret soup if it is not posted for the public to be able to access it and if a company can easily assert, as I understand they can, the trade secrets provision. You say they have to sign an affidavit. However, that is a signature. That is a pretty simple standard there.

And the information under your rule is put on an industry-funded website that has been reported to be inconsistent information, limited information, and very difficult for the public to search. And so it does not meet the Federal standards for databases.

So these are real concerns, and I think it is important to keep looking at it. The public deserves to know what chemicals are put into the ground on public land.

Mr. KORNZE. I am saying on the trade secrets that there are trade secret laws that have been passed by this country. So we are trying to honor that while also having disclosure that is meaningful for the public. So it is a balancing act.

And in terms of the disclosure mechanism, FracFocus, we are now a member of the FracFocus board. We have commitments from FracFocus to make significant improvements related to the searchability of their database and the information that is on there.

And part of the use of that system, frankly, is a matter of just practicality. Many States—I believe somewhere in the ballpark of 20 States—are already using it. So we are trying to go in a place where industry has some experience. Department of Energy is doing a lot of funding of that system now. But also when the Secretary of Energy's advisory board estimated what it would cost the Bureau of Land Management to stand up and maintain a system like that, it was somewhere in the realm of \$25 million. So I am trying to scrape together every dollar I can for work, the sage-grouse, land conveyances, other programs, and if there is an outside system that we think can get to a quality standard that meets public standards, it is important that we head in that direction.

Senator MERKLEY. Thank you.

Senator MURKOWSKI. Senator Daines.

#### HYDRAULIC FRACTURING

Senator DAINES. Thank you, Madam Chair.

It is good to see you here this morning, Director Kornze. Also, you notice we have a lot of Western States here. We have got Oregon. We have got New Mexico. We have got Alaska. We have got Montana.

And I know Senator Cassidy was talking about, I think, less than 1,000 acres of BLM ground there in Louisiana. I will say he made the comment about the Land and Water Conservation Fund. It is a very important tool in the tool chest in my opinion as it relates to our ability actually to improve our access to our public lands. We have 2 million acres in Montana of public lands that we do not have access to, and the LWCF is a tool that we use to provide better access for the public to their lands.

But thank you for being here this morning.

As we have spoken before, Montanans rely heavily on their natural resources for energy, for mineral development, for jobs, for tax revenues to fund our teachers and our schools. And we understand that acting safely and responsibly is the only option when exploring and producing these resources.

Unfortunately, developing our Federal land in Montana has become laden with red tape and creating challenges both in terms of time and money for responsible development.

As I mentioned in April at the Energy and Natural Resources Committee hearing on hydraulic fracturing, Montana updated its rules in 2011. And as Senator Merkley was talking about the regulations, we have some of the most robust hydraulic fracturing rules and regulations in Montana developed there in the State in the Nation. And our State depends on hydraulic fracturing to be able to access these mineral resources to create the jobs, generate the tax revenues I talked about.

The question for you is, how exactly is BLM proceeding in implementing the final rule for hydraulic fracturing, and how much do you believe it will cost BLM to do that?

Mr. KORNZE. So I appreciate the opportunity to continue our conversation from a previous hearing on this.

We are moving ahead through a lot of public outreach, number one. We have had a number of conversations with State regulators to make sure that we are sitting down and we are understanding

the best ways to work together because there is some flexibility built into our rule to make sure that we can honor higher standards like the ones that you are calling out for the State of Montana, and then similarly sitting down with industry and making sure they understand what the regulations are. We have sat down with hundreds of operators. And so we are being very aggressive about that outreach to make sure there are no surprises and that we have a fluid, successful implementation.

Senator DAINES. Do you have idea what it might cost? And the reason I ask that question is here we are struggling in Washington, wanting to achieve balance in our budgets, safeguarding the taxpayer. And yet, there is a redundancy now coming in in Montana. We have very robust regulations for hydraulic fracturing, and now we have the BLM coming in saying we also want to be a part of this equation, when we think we could save the taxpayer a lot of money, as well as ensure that we are safeguarding our resource with these very robust regulations. Any idea what it might cost BLM to implement these regs?

Mr. KORNZE. Well, I will give you some numbers to work with on potential costs. But I think it is important to point out that we work in a Federalist system, and the Bureau of Land Management has oil and gas leases in 32 different States for which we have oversight responsibility. Montana may have done a knock-out job. Alaska may have done a knock-out job with their rules locally, but only roughly half of the States that we have to regulate have stepped forward and put forward hydraulic fracturing rules. So we designed a rule to be a basic layer or basic standard largely modeled off of efforts throughout the West.

Related to cost, we think this is going to take us on average for your average drilling permit, application for permit to drill (APD), about an additional 4 hours. So when you add that together against all the APD's that are coming in, we think it will be about an additional 12 positions that we will have to fill.

#### SAGE-GROUSE

Senator DAINES. I want to pivot over and talk about sage-grouse. Another potential major challenge to responsible energy development in Montana is the potential listing of the Greater sage-grouse and specifically the proposed stipulations in BLM's resource management plans. Now Montana recently approved and funded its sage-grouse conservation plan. It is good news. It is investing significant resources. It is my understanding the Montana plan is significantly different than the draft Federal plans, including when it comes to surface occupancy around leks.

My question is when is the BLM scheduled to release the final resource management plans in Montana?

Mr. KORNZE. I would note we have had a fantastic dialogue with Governor Bullock and Tim Baker, a lot of folks in your State. We do appreciate them stepping forward and your entire legislature recently in funding a very good system on the State side.

The BLM plans will be coming out within a few weeks, so before the end of the month.

Senator DAINES. And how will these plans reflect Montana's plan?

Mr. KORNZE. So we will have to see in the final, when it comes out, the fine details. But I will tell you that we have built in special flexibility related to the needs of each State. Oregon has a special system. Idaho has a special system. Montana has a special system. Wyoming has a special system. There is commonality amongst all of them, but we have been at the table and listening intently and working closely with partners in the State of Montana to make sure that we can get as close to something that works for them as possible.

#### ROYALTY RATES

Senator DAINES. I appreciate the flexibility you have been able to give on that so we can come together with a solution that will ensure that the sage-grouse is not listed. So we look forward to further discussions.

Last question is regarding the increased royalty rates. Director Kornze, I am aware of the Department of the Interior's proposed budget requesting reforms to Federal onshore royalty rates and also the Department of the Interior's advance notice of proposed rulemaking. Now, according to a Department of the Interior report for 2011, increasing Federal royalty rates could result in a competitive disadvantage for energy production on Federal lands.

Has your Department done analysis how increasing royalty rates on Federal land would increase or potentially decrease production on Federal lands?

Mr. KORNZE. So we are at the first step of a multi-step process in a potential rulemaking related to royalty rates. So we will have an analysis on those questions as part of what we do.

One thing to point out about the GAO concerns and the reason that we are on the high risk list, which is a list you do not want to be on if you are a Government agency—there are only 25–30 different programs on it—is that they believe—and they have put this in their reports—we are passing up on billions of dollars in revenue annually that belong to the American taxpayer.

So we will balance all these things out, but the ability for industry to lean forward and produce and make American energy is something that we care greatly about.

#### PRODUCTION ON FEDERAL LANDS

Senator DAINES. Yes. And I look forward to further discussions. I know I am out of time, Madam Chair. I know we have seen production certainly on private and State lands is up 60 percent since the President took office. It is down 6 percent on Federal lands. So I look forward to further discussions as it relates to how we are continuing to help out the taxpayer, creating jobs. Those jobs are paying taxes and certainly have been a big boost to this economy.

Thank you.

Senator MURKOWSKI. Thank you, Senator Daines.

And I will just follow up with some comments here. It is somewhat interesting in recognizing it was out of the Department of the Interior in 2013, the report that was commissioned by the Department of the Interior (DOI), that did conclude that raising the royalty rates on the onshore oil and gas production would discourage

investment and thus bring less money into the Treasury and thus was not warranted.

So now GAO comes out with a report, and what we see is, in the budget proposal, we are going to increase the—the proposal is to increase the rates.

I appreciate the fact that you are saying you are going to do an analysis, but one would think that you would do the analysis before you move to advance it through a budget proposal. So I agree with Senator Daines. That is something that I am concerned about because I think it is going to have an unintended consequence or perhaps intended, depending on your perspective. I think it is important that we do what we can to increase production on our public lands and thus increase revenues to our Treasury because production is up.

It is interesting to me that when you look at the leasing statistics through BLM over the past couple decades, we are seeing a decline in the leasing. Throughout the Clinton administration, the average acres leased per year was 3.3 million. Then in the Bush administration, the average was 3.6 million per year. During the first 6 years of the Obama administration, the number drops to an average of about 1.6 million acres per year. So this is a trend that in my view is not good for us, and then when you overlay the hydraulic fracking rules, the proposals to increase regulation on methane, possibly this proposal to increase royalty rates, I see that just pushing it down further.

Can you give me any hope that in fact we are not going to continue this downward trend but that we are going to see increased production on our public lands?

Mr. KORNZE. I can give you a lot of hope.

Senator MURKOWSKI. Good. I want a lot of hope.

Mr. KORNZE. Because we have seen an 81 percent increase. On the places where you need a BLM permit to operate, we have seen an 81 percent increase in oil production during this administration.

Senator MURKOWSKI. So not necessarily new leases but on existing leases, you are seeing increased production.

Mr. KORNZE. It would be a combination of both. So we have seen a huge increase, which we are very proud of being part of.

And then there are also some important numbers out there. One is that 34 million acres of land have been leased. Only a third of that is producing. So within industry's hands today there is significant head room for development.

Senator MURKOWSKI. Would you agree that some of the limitations on the ability to produce have been related to some of the regulatory issues? I mean, all you need to do is look at National Petroleum Reserve Alaska (NPRÁ), and it is a perfect case in point in terms of acreage out there that is being leased. But we are not seeing a drop of anything at this point in time, and it is not because you do not have operators that are willing and able to move forward. You have got a lot of going at one another through regulatory requirements that is just stalling out any initiative there.

Mr. KORNZE. Well, I am not sure that is always the case. So in the Lower 48, there is an average of about 3,000 wells drilled on public and Indian lands each year. We, however, have 6,000 permits that we have approved and are ready to go. So industry has

come in. They said we would like to drill here. We have approved that application. It needs no further work from us at all. They can start today.

Senator MURKOWSKI. How do you respond, though, to those—and I was out in North Dakota with Senator Hoeven some years ago, and you talk to the operators that are ready, willing, and able to go. They have got Federal leases. But quite honestly, they can move to production so much more quickly on State and private lands than they can on the Federal that they will literally go around Federal lands. They will look for every opportunity to be anywhere except our public lands.

Mr. KORNZE. Well, I think when you look at the fact that we have a 2-year front-log essentially of permits that are ready to go, I think somewhere there is a disconnect that is very important because there is huge opportunity out there for industry to produce today.

Senator MURKOWSKI. We understand that there is huge opportunity, and as I am talking to those who are ready, willing, and able to go, they tell me their biggest obstacle is our Federal Government. It is not that they do not have the technology. It is not that they do not have the capital to invest. It is the regulatory hurdles that they face in accessing our public lands.

#### ONSHORE PERMITTING

Mr. KORNZE. And I hear that occasionally too. Those 6,000 permits, the 2 years' worth of work that can be done today—there are no hurdles. There is nothing. So there are 2 years' worth of work. There are billions of dollars of investment that is available.

And I do appreciate that we need to have a forward-leaning system for developing American energy. We are doing that. There are places where we certainly can improve. Our permitting times are one of those. So a few years ago, when I joined the Bureau of Land Management, we were at 300 days per permit. We are down to roughly 200–225 days.

Senator MURKOWSKI. That is certainly not in Alaska.

Mr. KORNZE. Well, we are headed in the right direction. One thing that we are doing system-wide is we are going to an online system so that instead of passing paper back and forth, which is a big time-killer, we potentially can get down to averages like they have seen at times in Carlsbad, New Mexico where it is in the 60–70 day realm. So we are moving aggressively. We are trying to find some of the efficiencies that I think you are pointing at.

Senator MURKOWSKI. Well, and we need to find those efficiencies. I wish I had the chart with me today that shows how long it takes to get to permitting on State, private lands versus how long it is taking us through our BLM lands. And the contrast is extraordinary. And there are lands that are literally side by side, and in many cases, operators that clearly know what they are doing. So saying that we can do a better job I think belies the obvious, and I think this is one of those things that we need to get down to.

I know that within the Department of the Interior, you have got a stated goal of permitting 10,000 megawatts of renewable energy production on Federal lands. We met that goal back in 2012, I am

told. But it does not seem that we are willing to dedicate equal focus to our more traditional energy sources on public lands.

Do you even have a measurable goal for conventional production of oil and gas on our public lands?

Mr. KORNZE. I would say that our budget reflects a serious commitment to conventional energy.

CONVENTIONAL ENERGY PRODUCTION

Senator MURKOWSKI. But I mean, do you have a goal? As you stated earlier within the Department in terms of what it is that we want to see with renewables, you set a goal out there. You met it. Do we do the same for conventional?

Mr. KORNZE. We do not.

Senator MURKOWSKI. Why is that?

Mr. KORNZE. Well, the renewable energy goal that you noted was created here in Congress. It was part of the 2005 Energy Act.

Senator MURKOWSKI. So we would just need to create in Congress a goal for our conventional fuels on public lands.

Mr. KORNZE. Well, I am saying that in the 2005 Energy Act, there was an aspirational goal saying that by 2015, we would like to see the Department of the Interior authorize 10,000 megawatts. We exceeded that. At this point, we are at 14,000 megawatts plus. We are very proud of that. We took a program that basically did not exist and turned it into something pretty spectacular.

On the oil and gas side, we need the resources to do the same. So that is part of our roughly 20 percent budget increase request for our oil program—

Senator MURKOWSKI. Well, wait a minute. When you say you need the resources to do the same, you have got the private sector that is out there that is ready, willing, and able to go after the resource. So it is not as if you and BLM need to reinvent the wheel. In my view, you need to have a more expedited process. In many cases, you just need to get out of the way. So I do not understand why you would say we need more resourcing to do this.

Now, you mentioned earlier that you do need additional resources for inspectors. We know that we have got to have a level of safety and protocol out there. I certainly understand that.

But again, I think when you are looking at those ways, those measures that you can enhance production on our Federal lands to increase jobs, to increase revenues, it is not something that as a Department you need to increase your budget to do that. I think you have got an industry that is ready to go to work, but we make it so hard on our public lands. We make it so difficult that those that are ready, willing, and able will go out of their way to avoid the production on our public lands. And you have cited that you are pleased with the level of leasing that you have, but in fact what we have seen is a very direct and clear trajectory downward in terms of leasing on our public lands over this past 6 years here.

And so, yes, we might be able to say that production is up. Production is up because you have got a commitment to extract as much as you can out of these existing leases. But it is tough to be able to explain to people who believe very strongly that our energy assets are something that we should value when we say on our Federal lands, it is just that much more difficult. It is just that

much more complicated. And yet, you have got good operators making things happen on State and private lands, contributing to jobs, contributing to our energy security.

And there is a disconnect here, and I am trying to drill down to how we can do the reconnect. And we need to be working with you on these initiatives to make that difference.

I have gone over my time. I want to turn to the Senator from North Dakota.

VENTING, FLARING AND RIGHTS OF WAY

Senator HOEVEN. Thank you, Madam Chairman.

Director, good to see you and thanks for being here today.

We are trying to reduce flaring in our State. Actually the highest flaring is on Federal lands and particularly on some of our Native American lands. Now, the right-of-way is the issue. Getting the right-of-way fast enough is the issue with getting these gas-gathering systems put in place.

And so how can the BLM help? And I know that BIA is primarily responsible here, but can you help in some way to expedite getting this right-of-way so that we can get these gathering systems put in place to reduce natural gas flaring?

Mr. KORNZE. Flaring is very important, and we appreciate that North Dakota has stepped out on this issue. So thank you for being part of that leadership team.

Related to the rights-of-way for the capture systems, absolutely part of the equation. Around the Bureau of Land Management, we have been focused on getting the right realty staff in the right places to help make sure that we are not part of the holdup. I do think that we could—we are in the course of getting the right people in places like Dickinson where we have had huge human capital challenges. Folks can walk across the street and often make twice as much. And so we have been working hard to get special pay rates and locality pay for folks in those offices so they have got a reason to stay and to make sure that we do not have the turnover, which also impacts our ability to get those rights-of-ways and other efforts completed.

Senator HOEVEN. Is there something Congress can do to help expedite the process?

Mr. KORNZE. Well, having the right people matters. So I will tell you our special pay rate for our petroleum engineers and petroleum engineer techs expires at the end of this year. We have had it for 2 years. It has been a very important thing for our oil and gas system across the board. We would be interested in working with you on a potential extension of that.

Senator HOEVEN. Well, one of the things—before 2008, I think there was one oil well drilled on the Three Affiliated Tribes reservation. I then signed an agreement—I was Governor at that time—with the tribe whereby they agreed to have the State regulatory process apply on the reservation too. So that was an agreement we signed. And, of course, now I think if that reservation were a State, it would be like the eighth largest oil-producing State in the country. I mean, they are just doing tremendously well, which of course necessitates the need for more infrastructure.

So is there some kind of cooperative agreement or something we could do interagency here, or is there legislation that would help expedite this right-of-way process? And you know, the chairwoman, Senator Barrasso, and myself have got some legislation in to try to expedite these gas-gathering systems and getting this right-of-way. Is that something you can work with us on? Do you see some ability to help get some tools out there so we can leverage the manpower that you have?

Mr. KORNZE. I do. And so I would be very interested to have some offline conversations with you about how we can use tools like the Bakken Executive Group to put a focus on this—

Senator HOEVEN. Right.

Mr. KORNZE [continuing]. And see if there are other national resources we need to bring to bear.

#### HYDRAULIC FRACTURING

Senator HOEVEN. Between BIA, BLM, Grasslands, I think there is enough people. We could certainly better leverage our efforts, and if there is some legislation required, I would be very interested in getting your assistance on a number of bills that we have proposed to expedite this process.

Along that same line, BLM has come out recently with its hydraulic fracturing rule. So now we have a situation where States like North Dakota, Alaska, Texas—you know, I think there are 27 States that produce 99.9 percent of the country's oil and natural gas. And so we have these hydraulic fracturing rules that require disclosure. They require using FracFocus. They require making sure that your seals and your cement and all these things are properly in place and that you are monitoring the integrity of the well, the catch basin, the very things that apply in the Federal rule.

So now we have got this duplicate situation. We have got the State regulation, and then we have also got the Federal hydraulic fracturing regulation. So now the energy producers face two sets of regulation, and they are largely the same. So you could say, well, what is wrong with that? Right? I mean, they are the same except now you have got to go through the State regulatory process and you have got to go through the Federal regulatory process, and we are back to this long period of time and delays.

How do we work with BLM so that the State can get primacy for the regulatory oversight as long as they are properly overseeing all these things that we both agree should be there? We do it with air. We do it with water. How do we accomplish that with hydraulic fracturing?

Mr. KORNZE. Well, we specifically designed the hydraulic fracturing rule to allow for variances, and what that means essentially is you nest the Federal and the State rule together. Wherever the higher standard is, that is what we are going to follow. So if North Dakota has higher standards than what we put forward, we will be following the North Dakota standard.

And I think it is important to note that this is how oil and gas has always worked. So the State of North Dakota and the Bureau of Land Management have not had completely parallel and completely matching rules and regulations in all areas of drilling and oversight. But yet, we have found a way through decades to work

together and to make sure that we have an efficient system. This is no different. And we have been quite explicit in this rule to make sure folks understand that if there are local standards that are better, that we look at those and we will adopt those.

Senator HOEVEN. Where are we in that process of providing variances to the States? As you know, you have got litigation going with a number of States. It seems to me this might be, again, a way we work together to address the challenge. If we can make that variance process a very clear, understandable process that States can go through in a straightforward way, maybe we can address it. So, again, if there is some help needed from Congress—or you tell me how do we make sure that then States can go through that process in a straightforward way so that we are not duplicating regulation.

Mr. KORNZE. So I believe that Lynn Helms, your regulator, and our team are in conversation. If that has not taken place, all they need to do is pick up the phone and call Jamie or call myself, and we can get that conversation—

Senator HOEVEN. But essentially your intent is, through this variance process, to enable States to play that primacy role as long as they go through the process and you are comfortable that the oversight is there.

Mr. KORNZE. The way that we are going to work this. You put the two standards side by side. There is going to be a lot of commonality. And so if the State standard is equal to or better than ours, that will continue to be what we enforce on the Federal lands.

Senator HOEVEN. Okay, but there just has to be a straightforward way to get through that in a timely way so we do not get back to this we are taking a long time and we are not getting through the process. That is what I am after here is a rational process that we can get through in a straightforward and timely way.

Mr. KORNZE. And the rule is fairly straightforward, and our team has a great relationship with your team.

Senator HOEVEN. Yes.

Mr. KORNZE. So I do not see a problem there.

Senator HOEVEN. So you will work with us on it to see if we cannot make sure that process works.

Mr. KORNZE. Absolutely.

Senator HOEVEN. Thanks. I appreciate it, Director.

Senator MURKOWSKI. Thank you, Senator Hoeven.

Senator Udall.

#### INSPECTION FEES

Senator UDALL. Thank you, Madam Chair.

As has been mentioned several times, the President's budget proposes a new inspection fee for onshore oil and gas leases. How will instituting this fee impact your inspection and enforcement programs, or asked another way, what are you not able to do today without these fees in place?

Mr. KORNZE. Thank you for the question.

We have roughly 30,000 oil and gas inspections that we have to do on an annual basis. About half of those are high priority. Without the right number of folks, it puts us in a position where we

have to really juggle resources and perhaps stretch them in a way that is not maximizing our full system on the production side. We have to be able to cover those inspections and make sure that we have a safe and responsible system. That has got to be the foundation of what we do. From there, you have got your APD's that you are working on, and then above that, you have got your leasing system. So we have to do multiple systems at once. We need the resources to do all of that.

What the fee, which would be roughly \$1,000 per lease on average—would do is allow us, similar to the offshore oil and gas system, which has a similar fee, which is significantly higher than what we are asking for—it would allow us to go in places like North Dakota where there is going to be a huge amount of production. It allows us to staff up there because those fees go to those local offices and it returns into the system. So we need to be able to make sure we have a safe, responsible program that allows us to build in areas like production.

SAGE-GROUSE

Senator UDALL. Thank you for that answer.

Shifting over on the sage-grouse, I understand that your land use plans covering the priority areas for conservation are almost finalized and will be public very soon. Can you preview for us what we can expect from the release of these plans and what has been the preliminary reaction from cooperating States?

Mr. KORNZE. So the Fish and Wildlife Service has been very clear with us that they need essentially—they see a three-tiered stool or a three-legged stool hopefully getting to a point where they do not have to list the Greater sage-grouse.

And I would note that there was success recently on the bi-State sage-grouse population on the Nevada-California border where the Fish and Wildlife Service declared that as not warranted based on plans the Federal agencies and local partners put forward.

So there are three pieces that the Fish and Wildlife Service has asked for. One is strong Federal plans to make sure that we have allocations and plans in place that will limit disturbance in places that are important to the sage-grouse to allow those important population areas to prosper.

The second is making sure that there are similar conservation-oriented efforts and allocations when possible on private and State lands. So you have States like Idaho that have just stepped forward on their State lands to do something similar.

And then thirdly, they want to make sure that there is activity in fire to make sure that—the greatest threat to Greater sage-grouse in the Great Basin, for instance, is fire and the invasive plants that come in afterwards—and make sure that we are making headway there with things like the fire fix and then also efforts related to making sure simply that we are not losing that habitat. We are working carefully with our fire teams to make sure the sage-grouse and rangeland priorities are built into the way that we operate this summer and in all future years.

Senator UDALL. Now, how are you ensuring that the most important sage-grouse habitat is protected while still fulfilling your mandate for multiple use and providing access to resources?

Mr. KORNZE. So our multiple use and sustained yield mission is a continuum. In some places, you are going to have very significant development and use. In other places, you are going to have less use, and that can change over time. So it is well within the bounds of the BLM's mission to have some places that are set aside for certain uses like wildlife habitat and for helping this bird recover. And we will have other uses, traditional uses like grazing on those lands. So it is part of the balancing act we do on a daily basis.

Senator UDALL. The President's budget request proposes an increase of \$45 million for the restoration and protection of the sage steppe ecosystem for a total of \$60 million. This is a major increase for this program. What will BLM do with this funding? How is this funding critical to ensure that we can avoid a listing of the sage-grouse?

Mr. KORNZE. So we will do a few things. One, we need to have an investment in our partners. We do not know everything about the bird. We have got ranchers. We have got counties. We have got State agencies that we have to be working hand in hand with. So part of that money is to build on those partnerships and make sure that we have those links firmly in place.

Another piece is making sure simply that we have boots on the ground. In places like Elko County where I was last week to check on the drought conditions and the fire season, we have one range conservationist, one range con, for about every million acres. We are going to have to do better than that in terms of giving our teams the resources to be working with grazers and working with other land users to make sure that we are doing the best thing for multiple use and the best thing for the bird. So we will be taking steps along those lines.

Senator UDALL. And my understanding is it takes a lot of time and effort and people on the ground to work in a collaborative way to try to make sure you are moving in the direction of not listing.

Mr. KORNZE. Absolutely.

And the other thing we will do is we will be doing projects related to making sure that our wet meadows are of high quality, that our springs are good, that our riparian areas are supporting good wildlife habitat.

And pinyon juniper encroachment, which is the situation that is largely in the Great Basin, is a spectacular and sometimes terrifying thing to look at these valleys that used to have pinyon juniper at a high elevation and because of the changed fire regime and climatic changes, these trees are choking out the sagebrush and sage-grouse and almost completely filling in these giant, say, 500,000-acre valleys. You can see it marching down year by year. So we will be making sure that we are pushing back on those trees and making sure that the sagebrush that we have that is high quality is protected and preserved.

Senator UDALL. Thank you, Madam Chair.

#### ALASKA CONTAMINATED LANDS

Senator MURKOWSKI. Thank you.

Let me talk a little bit or let us have a discussion here about where we are with the contaminated lands that were conveyed to Alaska Natives, as well as the abandoned well cleanup there in Na-

tional Petroleum Reserve Alaska (NPRA). I am going to be sitting down with Mr. Cribley in Alaska over the Memorial Day week and be able to go through some certain maps. So I am not going to drill down too hard here.

But it is my understanding that with the lands that were conveyed to natives under the Alaska Native Claims Settlement Act (ANCSA), that we are building out the database, the inventory that needs to be completed. And it is my understanding that we are going to find out that a majority of the sites are not on BLM lands. So identifying the responsible party is clearly important, but that is just one step of it. Then we need somebody who serves as the point person, the point agency, if you will, to work with all the responsible Federal agencies.

Is this something that BLM will agree to do, to be that facilitator once we have identified the inventory and just the priorities there? Is BLM prepared to be able to step up to then coordinate with all the Federal agencies?

Mr. KORNZE. Let me give you a description of where we are.

Senator MURKOWSKI. Okay.

Mr. KORNZE. So we have worked with the State and looked for how many known contaminated sites there are across the State. Roughly it is around 6,000. We did an overview to see how many of those were on conveyed lands. We got down to about 900. We have found that about two-thirds of those, so ball park 600, are either cleaned up or are in a state of some sort of remediation. So we have got about 300 that are open question. You will see that roughly half of those, our current information suggests, would be DOD-related, and then the other half is sort of a rainbow of different organizations.

So going forward, I would like to have a conversation with you about whether or not BLM is the right agency because part of what you need is someone to compel action. I think you were looking for cleanup.

Senator MURKOWSKI. Yes.

Mr. KORNZE. And I think potentially the Environmental Protection Agency (EPA) or the State with delegated authorities from EPA would have a better handle on that kind of work than we do traditionally.

Senator MURKOWSKI. Well, what I would like to do is figure that out because, again, it is one thing to identify that these are these areas. It is another thing to have the action plan and have everybody understand what that action plan is and the level of expectation. So probably after my sit-down with Mr. Cribley in Alaska, we will have an opportunity to better identify that.

On the abandoned wells, the good news for us is that we were able to secure some resources to address the abandoned well cleanup through the Helium Stewardship Act. It was really just kind of fortuitous. Actually it was a long of dang hard work. Thank you very much. And we have been able to finish up work on three of the wells this month at Umiat. So that is good.

But this is, again, an area where we need to be looking beyond those one-time monies that we received within the Helium Stewardship Act to better define how we are going to address the cost of this cleanup, how we are going to be working with the State to

make sure that there is some efficient use of dollars here for the cleanup. So we need to address that further just in terms of how much more you are going to be looking at to complete the cleanup after we expend the monies that were received under the Helium Stewardship Act.

Do you want to comment on that?

Mr. KORNZE. Yes.

So, first, I want to thank you and Senator Wyden for all the work that you did to get that funding. It was very significant.

So we have cleaned up the wells in Umiat, as you noted. The next group that we will be working on is around Barrow. There are around seven wells there. The next step after that will be the Simpson Peninsula. So at that point, we will likely have expended most of the \$50 million. That will be a 2- to 3-year work plan from now. And we are thinking carefully about what that larger universe of costs might be. Once we get past those clusters of wells on those sites that I noted, they get more spread out. And so we are going to have to get more creative about potentially piggybacking on new infrastructure that is built and other opportunities.

Senator MURKOWSKI. Well, and this is where really having somebody that is coordinating and helping to facilitate, again, some efficiencies—the costs are extraordinary.

Mr. KORNZE. They are.

#### GREATER MOOSES TOOTH

Senator MURKOWSKI. We acknowledge that. But the obligation is paramount as well.

Sticking to issues up within the north there and related to NPRA and Greater Mooses Tooth 1, as I mentioned in my opening comments, we are kind of at a stall-out or a standstill here with GMT1 regarding the outstanding issue of measuring production. I think we are, hopefully, done with the mitigation piece.

But BLM is proposing this dedicated test separator as opposed to the multi-phase metering and allocation methodologies that are currently being used on State land, have been used on State land for decades. The Alaska Oil and Gas Conservation Commission, AOGCC, has been working with EPA for years. There has never been an issue. There has never been a problem. But now we have got coming out of Interior and BLM saying, well, you have to have this separate metering system, this test separator, and an appreciation and understanding in terms of what the costs then do to the project.

It has not only been the operator Conoco that is saying this just is not reasonable. You have got the State of Alaska that has weighed in. You have the Arctic Slope Regional Corporation, which has objected to the requirement because of the added costs without appreciable benefits.

So I guess the question to you is have you engaged with the Alaska Oil and Gas Conservation Commission (AOGCC) regarding this added requirement and why you think that the way it has been done for the past several decades is not sufficient and what we can do to resolve this because I think it is somewhat telling that it has been decades now that Conoco has been trying to get

something going within the NPRA and we still have not seen a drop of anything. So we would like to get there. We thought that Conoco was going to be able to sanction this project this season and of course they have not. Where are we with this additional requirement for a test separator?

Mr. KORNZE. So the question that we are trying to work out is basically the error rates. What kind of confidence can we have in how much oil is flowing through those pipelines?

Senator MURKOWSKI. But have you talked with AOGCC about the confidence that they have and have had for years now?

Mr. KORNZE. So the system that ConocoPhillips has put forward, as you noted, has been used on State lands and under AOGCC authority. We look at that. ConocoPhillips operates on BLM lands in southern Alaska and places like New Mexico, and they have been meeting the standard that we have in place, which is roughly a .35 error rate. The system that they are putting forward likely has an error rate of somewhere between 4 and 10 percent, and it is hard to verify.

Senator MURKOWSKI. Have we ever had problems, though, with the Alaska methodology?

Mr. KORNZE. Well, I am not sure there have been problems, but we certainly have some difference in the demand we are putting forward in terms of the error rate. So we have a very important responsibility to make sure that the American taxpayer and the tribes that we work with and other native populations—

Senator MURKOWSKI. Well, right now, the American taxpayer is getting 100 percent of nothing, and the tribes, the native corporations are not being benefited at all because there is no production. So we have got a situation where Conoco is prepared to say we cannot make this pencil out. We just cannot make it pencil out. And so if you are trying to talk benefits here, again, if those that are willing to invest hundreds of millions of dollars into a project and have nothing to show for it and may be forced to walk away from this project, walk away from this investment because of an overlay of a requirement that, again, adds substantial cost, with again minimal to no appreciable benefit, it causes people to say this does not make any sense.

And this is where I think the administration gets the black mark in saying, you know, you say you support an all-of-the-above energy policy. You say you support increased production or production on the National Petroleum Reserve Alaska, but you are not doing much to facilitate it. We just cannot figure out how we cannot come together to make sense on this. You see my point.

Mr. KORNZE. I do.

And our goal is to get to production on Greater Mooses Tooth, and I believe we will get there. Part of the more complicated situation that we are within is that, one, ConocoPhillips is meeting the standard elsewhere where they operate on BLM lands in Alaska and in the lower 48. So there are no surprises here.

Senator MURKOWSKI. But they would have to build a completely separate system—a completely separate system—up north within NPRA, a redundant system at extraordinary cost.

Mr. KORNZE. It depends on what your standards are. We are held to a very high standard at the Bureau of Land Management.

Senator MURKOWSKI. And I think Alaska has led in terms of the standard. If the system was not working for us up there, I think that there is probably more room for a discussion, but nobody has ever questioned the soundness, the validity, the reliability. And that is where I think we have got somewhat of an impasse.

Let me go to my colleague here for further questions.

Senator UDALL. Madam Chair, I have a couple more questions for the record, but I think I will submit those. So I have completed my questioning.

Senator MURKOWSKI. I just have a couple more, if I may.

Senator UDALL. Please go ahead.

#### LAND CONVEYANCES

Senator MURKOWSKI. And very quickly to you, as you know, with the land conveyances, we have been trying to get moving forward. We have been held back in being able to do the surveys. I appreciate the Department moving forward and saying there are other ways that we can do the surveys through GPS. Are we any closer to getting that level of acceptance and cooperation with the State on BLM's proposal for Global Positioning System (GPS) surveys?

Mr. KORNZE. I strongly share your desire to fulfill the Alaska Statehood Act and what is owed to the native corporations. I think this is an important step. I went up to Alaska 2 months ago to sit down with the Governor and the Lieutenant Governor and tell them how much faster we can go and at what a decreased cost to the Federal Government and to the State potentially and then also truly if we can come together on this, I think it is a huge opportunity for all of us. So that was a positive conversation.

Our teams have been meeting since then. Ed Vogel's team and Mark Meyers' team have been sitting down with ours.

I am interested in, hopefully, seeing if we can alter our MOU with the State, which was signed in 1973. Technology was very different then. We can provide the State of Alaska with a much better product with much finer detail that they can use going forward. So any support you can provide on that front is greatly appreciated.

#### HELIUM STEWARDSHIP ACT

Senator MURKOWSKI. Well, it is something that we are all trying to achieve the same goal here, and if we can utilize technologies to our advantage, it seems to me to make sense. So let us work on that.

Let me ask about the helium issue. I mentioned a couple times the Helium Stewardship Act, which I think there was a good deal of benefit that came out of that, not the least of which was some revenues that helped.

But just a few weeks ago, we saw a report from GAO raising questions about BLM's implementation of the act, which certainly has some repercussions for the helium industry and taxpayer.

The first area that GAO raised concerns is with regard to these tolling agreements between the refiners and non-refiners. And unless both sides can reach agreements on tolling, one of the central elements of the Helium Stewardship Act, to bring more competition into the helium program, it is not going to be achieved.

So can you give me your response to this GAO report? It is something that there is some real concern about. And we want to make sure that the provisions of that act function and that in fact we are able to see a level of competition that will allow for greater access to helium on the market. So can you address the GAO?

Mr. KORNZE. Absolutely. I think we appreciate the revision of the system a few years ago through legislation, which I know was not an easy lift. That legislation was designed at a time when the Bush Dome, the system that we operate out of Amarillo, Texas, was a much larger player. So since then, Qatar, Algeria, a plant in Wyoming have all either come on line or increased their production significantly, and it has really changed the dynamics around the system.

Related to tolling, the idea is that we have producers that are on the system, and if they have excess capacity, they need to be allowing that to be used by folks who are off the system that might also have helium that needs to be processed. One of the things that we are seeing in our gas reservoir is that the pressure is going down significantly. We are not able to push as much gas to these producers as they would want to consume for their own production. So we are seeing significantly less gas being refined than sort of at an optimal level that they would need to hit in order to get to this concept of the requirement that they use their excess capacity for tolling.

I think it is a fairly complex situation, but we are talking to GAO about some of the complexity. We do not necessarily see eye to eye with 100 percent of what they came out with. We would be happy to visit with your staff further about the situation.

EASTERN AND WESTERN INTERIOR RESOURCE MANAGEMENT PLANS

Senator MURKOWSKI. Yes. I know that we want to explore this further. I want to make sure that we have got this right and, again, that we are achieving the progress.

My last issue is one that I probably should not have saved for the end because it is going to be really animated and agitated. We have had an opportunity to talk about the BLM's eastern interior resource management plan. This is the management plan up in the interior of the State that will withdraw close to 700,000 acres in the district from mineral entry. This is something that the small miners in the Fortymile District are just beside themselves about. These are small operators, small operators in an extraordinarily remote part of the country. And to them, they are looking at this proposal and saying decisions that are being made 4,000 miles from here we cannot comprehend.

As you know, there is a meeting in Chicken on the 29th of May. You had been invited to attend. I had asked that you attend. I understand that you will not be, but I understand that Bud Cribley is going up. Is anybody from Washington, DC, going up, do you know?

Mr. KORNZE. So I am looking at my schedule to see if it is possible to go.

Senator MURKOWSKI. That would be fabulous. That would be fabulous. I think it would be extraordinarily important for you to hear

directly from the men and women on the ground in their place as to what this means.

And the frustration here is that you have got a proposal to withdraw, again, nearly 700,000 acres in the Fortymile District, and you have these miners—not just miners. You have Alaskans that say, wait a minute. Tell me how this does not violate the intent of the Alaska National Interest Lands Conservation Act (ANILCA) and the no-more clause when you have in place a proposal like this. And I look at it and say I do not see how, other than a difference in terminology, this is not just a flagrant, in-your-face violation of the no-more clause under ANILCA.

And then it is not just the eastern interior land plan, it is this current planning effort for the Bering Sea western interior area plan. These are areas that are being proposed for set-aside for environmental protection as areas of critical environmental concern, ACEC's. I can tell you most people in Alaska have never heard of an ACEC, but the proposals that we have here in terms of limitations on opportunity for access are really quite extraordinary, proposing to place off limits most any form of development.

Now, I do understand that the current version of the plan reduces from 11 to 8 the number of existing ACEC's in western Alaska, but it also proposes to create eight new conservation areas. Some like the Unalakleet River ACEC are pretty large. You have another, the new sheefish spawning area just south of McGrath surrounding the Big River. You cannot see it from here, but you look at the map here along the rivers, and the impact for any level of development is considerable. It is beyond considerable. It will potentially block the route for a pipeline to bring any kind of energy to proposed Donlin Creek mine, an opportunity that the folks in that region have been keyed in intently. But in order to access mineral resources there, you have got to have some form of energy other than just diesel.

But again, we have got provisions within ANILCA that make it illegal. You cannot do it. You cannot withdraw more than 5,000 acres in Alaska for any single use without congressional approval. But under many of the agency's pending ACEC's, you are administratively affecting far more than 5,000 acres for single purposes, whether it is the sheefish spawning, even though their original spawning areas are actually outside of these proposed ACEC's.

So I wander around with a map in my everyday folder that is what gets me up in the morning. It is what reminds me of my purpose here in the United States Senate. And these are Alaskan lands and waters that are withdrawn from development. And it is things like wilderness and NPRA withdrawals and withdrawals in the North Aleutian Basin and critical habitat proposed and wilderness and national park and Federal lands. And the colors just make a brilliant patchwork.

But what this then does is take that patchwork and muddy all the colors so that it is even more restrictive so that in those areas where we thought we might have an opportunity for a small placer miner to engage in a little bit of income or for a community to perhaps have an opportunity for some jobs in a region or for some cheaper energy in a region, but if we are not going to be able to even allow for a pipeline corridor because now we have all of these

ACEC's, we are going to be looking at the ESA, the Endangered Species Act, and critical habitat as chump change because everything else around the State is going to be blocked off.

And I know I sound apocalyptic, but you have to appreciate the frustration, the anxiety. We felt that we had in place laws that are specific and unique to Alaska. Alaska is the "A" in ANILCA, and we thought we had a pretty good understanding as to what the no-more clause meant. And yet, what we are finding now is our Federal agencies are coming up with changes in semantics basically to get around what was clearly a well-defined law. When it says that you cannot withdraw more than 5,000 acres without congressional approval, we kind of thought that it meant what it said.

And so now we are dealing with areas of critical environmental concern, but it effectively puts you again in a state of de facto wilderness, not unlike what the President did with his proposal up in the Arctic National Wildlife Refuge (ANWR). So it seems like anyway you slice it, any term that you want to call it, what it ends up being is withdrawal, restriction, and an inability of a State and a people to access a resource—resources that we were promised at statehood, land that we were promised at statehood. So we are feeling a little burned.

I would encourage you—encourage you—to go to Alaska and to hear the people. And I thank you for the trips that you have made. And I know that they are not easy because Alaskans are pretty unfiltered. We will tell you what is on our mind, but I think that that is important. I think that that is important because this is our life. This is our livelihood, and we want to make sure that our lands are cared for. And we are kind of proud of how we have done it over the decades. But sometimes we feel like you all are trying to protect us from ourselves, and that makes us pretty angry.

So I would encourage you to go to Chicken. I would encourage you to listen to the people on the ground. We have some things that we need to be working on together, clearly. I appreciate the efforts that you are making on the cleanup and the obligation that the Federal Government has there. We have got some other things that we need to do. But we must—must—address some of these withdrawal issues that are strangling Alaskans. So I appreciate your attention to that as well.

Mr. KORNZE. It will have my attention, and let me say thank you both for your significant investment in issues related to the Bureau of Land Management and the Department of the Interior. The personal attention is greatly appreciated.

Senator MURKOWSKI. Thank you.

#### CONCLUSION OF HEARINGS

With that, we stand adjourned.

[Whereupon, at 11:46 a.m., Wednesday, May 13, the hearings were concluded, and the subcommittee was recessed, to reconvene subject to the call of the Chair.]

COMMITTEE ON APPROPRIATIONS

## TRANSCRIPT FOR REVIEW

Attached please find a PDF file of the Interior Appropriations Hearing for Fiscal Year 2017 held on Wednesday, March 2, 2016 for the Department of the Interior. We send PDF files of the hearing transcripts to eliminate picking up the paper copy. You can print a copy in your office, mark it up, and send back the corrected pages via PDF, in person, or by fax (to 202-228-2348).

DUE DATE: **[Wednesday, March 30, 2016].**

### CORRECTIONS

If possible, please mark corrections within the body of the text; otherwise, utilize marginal space. Do not use flair or marking type pens.

Please Note: We maintain (or change) capitalization and numeral style to reflect the Government Printing Office Style Manual. Please refer to hearing and transcript instructions.

### HEADINGS

Insert a minimum of one heading on each 3 pages of transcript or when subject matter changes.

Insert a heading after each insert.

### INSERTS

Furnish clean, legible copy (suitable for reproduction). All inserts should be proofread before being submitted.

All inserts (i.e., statements, questions and answers, and any other inserts) should be e-mailed to Editorial, Printing, and Documents at:

[elmer\\_barnes@appro.senate.gov](mailto:elmer_barnes@appro.senate.gov)

OR

[print-ed@appro.senate.gov](mailto:print-ed@appro.senate.gov)

All inserts should follow the pages where indicated. Do not attach to manuscript.

For further information call 202-224-7266.

If hand delivering, return the corrected manuscript (Do not return a Xerox copy) to:

Elmer L. Barnes Jr.  
Committee on Appropriations  
Editorial, Printing, and Documents  
SD-126  
Dirksen Senate Office Building

Thank you.

## **PROCEDURES TO FOLLOW IN PREPARING AND EDITING HEARING TRANSCRIPTS AND SUBMITTED QUESTIONS FOR THE RECORD**

Because of time constraints placed on the Senate Appropriations Committee in processing hearings, the Committee requests you to observe the following instructions when preparing hearing transcripts.

### **GENERAL**

One copy of the transcript (the original will be sent to you as soon as possible after each hearing. This original copy is to be returned to the Committee Editorial, Printing, and Documents Office (Room SD-126) by the due date posted on the transcript (usually 3 weeks). The returned transcript should include all inserts and responses to any questions asked during the hearing which required further explanation.

PLEASE E-MAIL ALL WITNESSES' STATEMENTS AND ANY INSERTS TO:

[Valerie Hutton@appro.senate.gov](mailto:Valerie.Hutton@appro.senate.gov)

OR TO

[Print-ed@appro.senate.gov](mailto:Print-ed@appro.senate.gov)

INCLUDE IN THE E-MAIL THE AGENCY SUBMITTING THE DATA AND THE DATE OF THE HEARING.

If there should be an insert or explanation which requires a longer time to prepare than the due date given on the transcript, indicate what insert or question is missing when returning the transcript. This privilege should not be abused. It is extremely important that the transcript be returned to the Committee by the date specified.

Responses to questions for the record submitted to the agency at the close of the hearing should be returned to the Committee (with one photocopied set) within 3 weeks of receipt.

All statements, inserted material, and record questions and answers should be e-mailed. Any questions may be answered by calling the Editorial, Printing, and Documents Office (202) 224-7265.

It will be the responsibility of the Budget Liaison Officers to make certain that Committee instructions on transcripts and submitted questions are followed by offices contributing material to transcripts or answers submitted to questions. Material not submitted in proper format will be returned for correct form.

### **THE TRANSCRIPT**

Transcripts can be returned from the Department either by hard copy, fax, or PDF file e-mailed of the corrected pages.

Short headings should be inserted at a minimum of one heading every three pages of transcript copy. A new heading should be added after each insert.

If a subcommittee member requests information to be provided for the hearing record during the hearing, the information should be inserted at the proper place following the request. One additional copy should be furnished to the subcommittee staff.

All inserts should be original copy, whenever possible, free from punched holes, contain no staples, and if two sided, two copies must be furnished.

Inserts should be inserted following the appropriate pages in the hearing record. The transcript page number where the material should be inserted, together with an identifying letter, encircled in pencil, should be arrowed in between the lines of the transcript, as "Insert 23A follows". The insert should then be inserted behind the page referred to with the notation

“23A” in the top right corner.

Be certain to spell out acronyms the first time used.

Spell out “million” instead of using M to indicate amount. Show dollar figures as decimal to one place as follows: “\$7.8 million”; or full numerical figure when rounding to one decimal is not appropriate: “\$7,845,000”. “Thousands” should be written in full figures (e.g. \$25,000, not “\$25 thousand”).

Any charts used in oral testimony should be numbered (1, 2, etc.) and should be placed in appropriate place of the transcript.

A Senator’s remarks should be corrected only for typographical errors. If there is a misstatement of fact or some other reasons which you believe justifies making a change, do not make the change, but attach a note with the suggested change on the page where you believe the change should be made.

Any photographs or graphs to be reproduced in hearing record must be clear and legible. If a PowerPoint file or other data file is available please e-mail to

[Valerie.Hutton@appro.senate.gov](mailto:Valerie.Hutton@appro.senate.gov)

### **SUBMITTED RECORD QUESTIONS**

Submitted questions will be given to the appropriate budget officer after each hearing. Record questions must be returned to the Committee 3 weeks after date of receipt.

An original and one copy of submitted questions and answers should be provided to the Committee. The copy is for transmittal to the Senator submitting questions.

In order to obtain conformity in style in typing submitted questions and answers, please observe the following:

Answers to written questions submitted by the presiding Senator or subcommittee staff shall carry the heading centered:

“QUESTIONS SUBMITTED BY SENATOR \_\_\_\_\_”

Each question submitted should be retyped in full prior to respondent's answer. Questions should be prefaced by the word “Question.”, and the answer prefaced by the word “Answer.” (each followed by a period)

Center headings should be typed in all capitals in space provided with only one blank line above and below heading

Each question and answer should be typed single-spaced. You may answer more than one question on a page. Double space between the answer and the next question. Indent each paragraph five spaces.

Do not number questions.

Avoid personal or individual references. It is the Department or Agency responding, not individuals.

In a series of submitted questions relating to the same subject matter, answer each question separately. In other words, do not type all the questions and then all the answers. There may be a few exceptions where one or two questions may best be combined in a single answer. Check with the Committee staff to determine whether this is appropriate.

Any charts, tables, etc. in an answer should follow as soon thereafter as possible any written explanation. In other words, do not identify a table as Table A, and then insert the table after an entire series of questions and answers. Insert the pertinent chart or table following reference to it.

Indicate in charts and tables whether figures are in thousands, millions, etc. All tables

should have totals. (For example, a listing and description of R&D contracts should include a total at the end.)

If similar questions are submitted which require identical answers, refer the questions and answers to the attention of the Committee staff, so they may determine whether it is appropriate to modify or delete one of the questions.

## **PROOFS**

Proofs must be returned to the Committee by date requested.

Check proofs of all material submitted to see that they have been inserted in the appropriate places in the proofs.

All corrections on proofs should be made with colored pen or pencil, preferably red, in the main. Make corrections easy to find and read.

Make note of, and supply, any missing inserts as indicated by the printer.

Corrected pages can be faxed or e-mail a PDF file.

ATTACHMENT: Sample sheet for preparation of record questions

## INSTRUCTIONS FOR PREPARING QUESTIONS AND ANSWERS

More than one question and answer may appear on a page. In fact, it is preferable to fill the page. Group questions and answers by Senator.

Any questions, please call 224-7265, 7266, 7217, or 7267

### SAMPLE AS TYPED BY AGENCY

#### QUESTIONS SUBMITTED BY SENATOR HATFIELD

##### PROGRAM PARTICIPATION

Question. In all the Child Nutrition Programs, there is an anticipated increase in the number of free and reduced price meals served. To what do you attribute this increase?

Answer. The anticipated increase in the number of free, reduced price and paid meals served is based on increased school enrollments and higher.

##### STATE ADMINISTRATIVE EXPENSES

Question. Within the Child Nutrition account, there is a line item called "State Administrative Expenses," (SEA), which provides matching funds to the States for administering Child Nutrition Programs.

Answer. There has been continuing concern with the fact that almost one-half the amount allocated for State administrative expenses remains unused. SAE funds which remain unobligated by a State on September 30, 1986.

OFFICE	FY 1993	FY 1994	FY 1995
Policy and Direction	\$26,600	\$25,500	\$25,500
Aviation Safety	11,000	11,000	11,000
Surface Transportation	5,500	8,000	8,000
Research and Engineering	5,500	8,000	8,000
Administration	5,500	5,500	5,500
TOTAL	54,100	58,000	58,000

### DO NOT TYPE QUESTIONS AND ANSWERS AS FOLLOWS

Question: In all the Child Nutrition Programs, there is an anticipated increase in the number of free and reduced price meals served. To what do you attribute this increase?

Answer. The anticipated increase in the number of free, reduced price and paid meals served is based on increased school enrollments and higher.

1 DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES  
2 APPROPRIATIONS FOR FISCAL YEAR 2017

3 -----

4 WEDNESDAY, MARCH 2, 2016

5

6 U.S. Senate,  
7 Subcommittee of the Committee on Appropriations,  
8 Washington, DC.

9 The subcommittee met at 10:02 a.m., in room SD-124,  
10 Dirksen Senate Office Building, Hon. Lisa Murkowski (chairman)  
11 presiding.

12 Present: Senators Murkowski, Cochran, Blunt, Daines,  
13 Cassidy, Udall, Feinstein, Leahy, Reed, Tester, and Merkley.

14 DEPARTMENT OF THE INTERIOR

15 STATEMENT OF HON. SALLY JEWELL, SECRETARY

16 ACCOMPANIED BY:

17 MICHAEL CONNOR, DEPUTY SECRETARY

18 KRISTEN SARRI, PRINCIPAL DEPUTY ASSISTANT SECRETARY

19 OPENING STATEMENT OF SENATOR LISA MURKOWSKI

20 Senator Murkowski: Good morning. I would like to welcome  
21 everyone to our first hearing of the Interior Appropriations  
22 Subcommittee for fiscal year 2017. We are here to review the  
23 budget request for the Department of the Interior.

24 I would like to welcome our witnesses this morning. We  
25 have the Honorable Secretary Sally Jewell, who is accompanied

1 by Deputy Secretary Mike Connor as well as Principal Deputy  
2 Assistant Secretary Kris Sarri. So welcome to all of you.

3 Since this is our first hearing this year, I will just  
4 remind colleagues that we will follow past practices and adhere  
5 to the early bird rule for recognizing members for questions.  
6 I will call on members in the order they arrive, going back and  
7 forth between majority and the minority. We will do 6-minute  
8 rounds of questions.

9 My expectation this morning is that we will likely do two  
10 to three rounds of questions, depending on votes and schedules  
11 of the members and the witnesses. I will try to accommodate  
12 everyone so that they have an opportunity to address the issues  
13 that they wish to raise.

14 I also want to thank and welcome my ranking member,  
15 Senator Udall. We managed to mark up this bill in Interior  
16 Appropriations for the first time in 6 years in fiscal year  
17 2016. While we didn't agree on everything that was in the  
18 bill, things were never disagreeable. I really appreciate  
19 that. I think that my friend from New Mexico has an overall  
20 good nature and a passion for the issues that are important to  
21 this subcommittee and I greatly respect it. So I am looking  
22 forward to another productive year for the subcommittee,  
23 working with both you and all the members of the subcommittee.

24 Turning to the budget request for the Department of the  
25 Interior, it is \$12.25 billion for programs within this

1 subcommittee's jurisdiction. This includes \$290 million for a  
2 proposal similar to last year, which allows certain  
3 firefighting costs to be appropriated as disaster funds. This  
4 total is 2 percent above the enacted level.

5 But I should note for my colleagues that the department's  
6 request does not include funds for Payments in Lieu of Taxes  
7 (PILT) as part of the discretionary budget.

8 Funding for PILT was provided within our bill last year at  
9 the fully authorized level of \$452 million. So when you look  
10 at an apples-to-apples comparison to fiscal year 2016, my  
11 assessment is that the President's request is roughly 5.8  
12 percent above current levels.

13 Secretary, as I noted when you appeared before the Energy  
14 Committee last week, there are a number of aspects of the  
15 President's budget proposal that I do find troubling. It  
16 includes a number of mandatory spending proposals without  
17 providing any offsets.

18 I mentioned the mandatory spending for the Land and Water  
19 Conservation Fund (LWCF) at \$425 million without an offset.  
20 Similarly, for the National Park Service, the budget proposes  
21 mandatory spending of \$1.5 billion over a 3-year window, again  
22 with no offsets.

23 This administration has engaged in this somewhat  
24 questionable practice of proposing mandatory funding for albeit  
25 popular programs with no offsets during the last several budget

1 cycles. This approach raises, then, expectations that funding  
2 will materialize when we all know that finding payfors even for  
3 the most popular programs is extremely difficult in this budget  
4 environment.

5 And when the authorizing committees are unable to find  
6 offsets in their jurisdiction to pay for these proposals, it  
7 then puts more pressure on this subcommittee to find funds out  
8 of our limited resources.

9 It also prioritizes certain programs within this  
10 subcommittee's jurisdiction over others, and it essentially  
11 places them on autopilot at the expense of other dire needs.  
12 Some of those needs, and I am sure we will hear about them this  
13 morning, are the needs in Indian country, where our schools are  
14 failing and suicide rates are so far above the national average  
15 that it is just heartbreaking.

16 I know, Secretary, that you share that concern with me.

17 The health care system is strained to its limits, often  
18 providing services in facilities that are over 100 years old.

19 So you have a situation where funding increases, as  
20 proposed for LWCF and the National Park Service, are elevated  
21 and prioritized each year among all the programs over which  
22 this subcommittee has oversight. And this budget does not  
23 appear to have done that.

24 I don't want to send the wrong impression here. I will  
25 work with the administration and my colleagues on a

1 responsible, bipartisan National Park Service centennial bill.  
2 I think that is important. But I do think the \$1.5 billion  
3 proposal put forward is not realistic. So I hope we can be  
4 creative in the use of public/private partnerships and other  
5 means to stretch our Federal funding further and to reach  
6 consensus on a bill that appropriately celebrates the 100th  
7 anniversary of our national parks.

8 I am also concerned that, yet again, when oil prices have  
9 fallen dramatically and many companies are on the verge of  
10 bankruptcy, the department indicates in its budget request that  
11 it will propose a host of new fees and royalty rate increases  
12 on energy producers that will exceed \$1.7 billion. There are  
13 also new fees on grazing and hard-rock mining.

14 I just don't see how making it more expensive to do  
15 business on public lands is sound policy or good for the United  
16 States Treasury.

17 I am pleased that this budget fully funds contract support  
18 costs and adopts the approach that I put forward in the Senate  
19 mark for fiscal year 2016, which establishes a separate,  
20 indefinite appropriation for these costs to ensure that these  
21 legal obligations are met and other programs will not be  
22 affected.

23 I do think that we have come a long way since a couple  
24 years ago when the administration proposed circumventing the  
25 tribes' victory in the Ramah decision and sought to cap these

1 costs. So I thank all my colleagues both here in the Senate  
2 and in the House for their support in this effort.

3 Finally, Madam Secretary, there remains King Cove, still  
4 totally unresolved. I know we discussed this issue last week  
5 again in your testimony before the Energy Committee. But,  
6 again, I don't see anything in this budget request to help  
7 those whose lives are in needless danger. You did agree last  
8 week, Secretary, to publicly release the nonroad, nonsolutions  
9 study that Interior commissioned for King Cove during the  
10 budget hearing. So when we get to the questions time, I do  
11 plan to ask you about the timing on this report.

12 I have talked I think to virtually all of my colleagues  
13 about the need for a lifesaving road to King Cove. I mention  
14 it again here, particularly for the information of members who  
15 are not on the Energy Committee, so that they remain aware that  
16 I remain committed to do everything in my power as the chairman  
17 of that committee and as chairman of the Interior Subcommittee  
18 to fight for the construction of this critical road.

19 With that, I want to thank, again, the Secretary and the  
20 Deputy Secretaries, and my colleagues for their appearance here  
21 this morning.

22 And I will now turn to Ranking Member Udall for any  
23 comments that he would like to make.

24

1 STATEMENT OF SENATOR TOM UDALL

2 Senator Udall: Good morning. Thank you, Madam Chair, for  
3 those very kind comments at the beginning. I will reciprocate  
4 here in a minute with some also.

5 Good morning, also, Secretary Jewell. We are very pleased  
6 to have you appear before the subcommittee to discuss the  
7 Department of the Interior's fiscal year 2017 budget request.  
8 I am also pleased to welcome Deputy Secretary Mike Connor and  
9 Deputy Assistant Secretary Chris Sarri before the subcommittee.

10 Before we turn to the budget, I want to thank Chairman  
11 Murkowski for working with me to produce what I think is a very  
12 good budget for the department in 2016. Madam Chairman, we  
13 have had some challenging policy issues to work through, so I  
14 am very pleased that we were able to pass a bill that included  
15 critical increases for national parks, tribal programs, Land  
16 and Water Conservation Fund, and many of the programs that we  
17 will discuss this morning.

18 I also want to recognize, Madam Chair, your hard work and  
19 your leadership of this subcommittee. I know it will be a  
20 pleasure to work with you again this year, and to work with  
21 your very fine staff to support our common interests in this  
22 bill.

23 That said, this subcommittee's job is not going to be  
24 easy. Under the Budget Control Act, discretionary spending for  
25 nondefense programs is essentially flat in 2017. At the same

1 time, we have to fund certain must-do increases across the  
2 government, including firefighting and tribal contract support  
3 costs for this subcommittee. So that flat funding level  
4 effectively means a cut.

5 On paper, the department's discretionary request also  
6 looks flat compared to fiscal year 2016, in keeping with the  
7 budget caps. But if you dig a little deeper, it is clear that  
8 the President used savings from a number of proposals to create  
9 room for some significant increases. These proposals include  
10 funding part of the firefighting budget with a new disaster cap  
11 authorization and providing mandatory funding for the Payment  
12 in Lieu of Taxes program.

13 In fact, when you factor in all the sources of funding,  
14 this budget is really a 2 percent increase overall for the  
15 department. I like many of the increases that this budget  
16 proposes. It provides a 9 percent increase for our national  
17 parks and a 5 percent increase for the Bureau of Indian Affairs  
18 to support tribal education and social service needs.

19 I could not agree, Chairman Murkowski, with you more, in  
20 talking about the dire state and dire situation in Indian  
21 country, in terms of education.

22 This budget also expands on the increases that we provided  
23 in the 2016 omnibus to the Land and Water Conservation Fund.  
24 It proposes \$475 million for LWCF programs funded by this bill,  
25 and proposes to transition the program to its full authorized

1 level of \$900 million in future years.

2       There are many important increases as well for wildlife  
3 refuges, energy development, science and climate change  
4 programs -- all very important investments. But let's be  
5 clear. Since funding is tight, our ability to fund many of  
6 these increases depends on getting agreement to reform the  
7 wildland firefighting budget and enacting a long-term mandatory  
8 funding source for the Payment in Lieu of Taxes program.

9       Until we are successful in enacting those changes, we will  
10 have to prioritize what we fund very carefully, and that means  
11 very tough trade-offs.

12       The budget also includes some important legislative  
13 proposals that I expect we will discuss today. In particular,  
14 I want to applaud the administration's leadership to reform  
15 energy and mining activities on public lands and make sure that  
16 taxpayers are getting a fair return from the development of  
17 those lands. I am pleased to see that your budget addresses  
18 hard-rock mining reforms, including setting a fair royalty for  
19 mining operations on public lands and proposing a hard-rock  
20 abandoned mine fee to address legacy cleanup issues.

21       I have also sponsored legislation to take on this issue.  
22 We need real mining reform, and we have needed it for a long  
23 time. It makes no sense that we still rely on an antiquated  
24 law that is nearly 150 years old as the framework for mining in  
25 this country.

1           Events like the Gold King Mine disaster should serve as a  
2 wake-up call for all of us. We have to get serious about  
3 cleaning up abandoned mines. There are abandoned toxic mine  
4 sites throughout the West. These mines are ticking time bombs.  
5 They are releasing a slow-motion stream of lead, arsenic,  
6 cadmium, and toxins into water supplies, water we need for  
7 drinking, irrigation, and recreation.

8           The cleanup costs are absolutely astronomical. I have  
9 seen estimates between \$9 billion and \$21 billion. In New  
10 Mexico alone, the cost is estimated between \$385 million and  
11 \$840 million.

12           Today's mining industry has much better standards, but  
13 this toxic legacy cannot be left unaddressed. The damage has  
14 been done, and taxpayers should not be left holding the bag for  
15 the mess as well as for future cleanup costs. The cost of  
16 inaction on mining reform has been too great already. We  
17 cannot afford to wait, and it is time that we act.

18           You are doing the right thing, Secretary Jewell, and I  
19 want to work with you to enact common-sense reforms.

20           Thank you again for appearing before us. I look forward  
21 to hearing your testimony and having a good discussion and  
22 dialogue.

23           Thank you, Madam Chair.

24           Senator Murkowski: Thank you, Senator Udall.

25           We have the chairman of the full Appropriations Committee

1 with us this morning.

2 Mr. Chairman, would you care to make any comments or

3 statements before we hear from the Secretary?

4

1           Senator Cochran: Madam Chair, I appreciate the  
2 recognition. I am delighted to be able to announce that, this  
3 year, the City of Natchez, Mississippi, is celebrating its  
4 tricentennial anniversary, a very rich history. A historically  
5 significant area of the Lower Mississippi River Valley will be  
6 brought together with local municipalities and counties in  
7 helping make sure that tourists know of this destination site  
8 where you will learn a lot and meet a lot of fine people. So  
9 come to Natchez and help us celebrate. Thank you.

10           Senator Murkowski: Thank you, Mr. Chair.

11           I just had to think, tricentennial. As a State, we are  
12 about 58 years old in Alaska. So boy, if that does not remind  
13 you --

14           Senator Cochran: To be 58 again. [Laughter]

15           Senator Murkowski: To be 58 again, yes. America is a  
16 beautiful place.

17           With that, let us go to the Secretary of the Interior.  
18 Welcome this morning. We appreciate you being here and look  
19 forward to your comments and the questions that will follow.

20

1 SUMMARY STATEMENT OF HON. SALLY JEWELL

2 Secretary Jewell: Thank you. And congratulations on the  
3 tricentennial. It would be fun to be there.

4 Chairman Murkowski, Ranking Member Udall, and Chairman  
5 Cochran, and members of the subcommittee, thank you so much for  
6 the opportunity to discuss the fiscal year 2017 budget request  
7 with the Department of the Interior. This is the  
8 administration's final budget, and I want to take the  
9 opportunity to thank all of you and your capable staffs for  
10 working with me over the last 3 years to help the department  
11 meet its mission for the American people.

12 I would like also to take a moment to mention the incident  
13 at the Malheur National Wildlife Refuge in Harney County,  
14 Oregon. Through tremendous patience and professionalism, the  
15 FBI, with support from State and local law enforcement, ended  
16 the occupation on February 11 as quickly and safely as possible  
17 after more than 40 days.

18 It was an incredibly disruptive and distressing time for  
19 our employees, their families, and the Harney County community.

20 I am proud of our Department of the Interior law enforcement  
21 personnel who supported the response and helped keep our  
22 employees safe.

23 We continue to cooperate with DOJ, the FBI, and others, as  
24 the investigations move forward. And we remain committed to  
25 working with local communities on the management of public

1 lands.

2 Interior's overall fiscal year 2017 budget request is  
3 \$13.4 billion, a lion's share within this subcommittee.  
4 Specifically for programs within this subcommittee's  
5 jurisdiction, as mentioned, is \$12.3 billion.

6 It builds on the successes we are achieving through  
7 partnerships, the application of science and innovation, and  
8 balanced stewardship. It gives us the tools to help  
9 communities strengthen resilience in the face of climate  
10 change, conserve natural and cultural resources, secure clean  
11 and sustainable water, engage the next generation with the  
12 great outdoors, promote a balanced approach to safe and  
13 responsible energy development, and expand opportunities for  
14 Native American communities.

15 These areas are core to our mission and play a vital role  
16 in job creation and economic growth.

17 The budget invests in our public lands, providing \$5  
18 billion to support operation of our national parks, historical  
19 cultural sites, wildlife refuges and habitats, and managing  
20 multiple use and sustained yield on our Nation's public lands.

21 It focuses investment on important working landscapes like  
22 the western Sage-Steppe in the Arctic, and proposes a 10-year,  
23 \$2 billion coastal climate resilience program to support at-  
24 risk coastal States and local governments, including funding  
25 for communities in Alaska to prepare for and adapt to climate

1 change.

2 As the National Park Service begins its second century,  
3 the budget provides \$3 billion and includes a proposal to  
4 dedicate significant funding to reducing the deferred  
5 maintenance backlog. It calls for full and permanent funding  
6 of the Land and Water Conservation Fund and extends the expired  
7 authority for the Historic Preservation Fund.

8 It reflects the administration's strategy to more  
9 effectively budget for catastrophic wildfires, as you pointed  
10 out. And in response to drought challenges across the West, it  
11 continues to safeguard sustainable and secure water supplies.

12 We continue to engage the next generation of Americans to  
13 play, learn, serve, and work outdoors with \$103 million for  
14 youth engagement. This includes mentoring and research  
15 opportunities at the U.S. Geological Survey; urban community  
16 partnerships; scholarships and job corps training for tribal,  
17 rural, and urban youth; and work opportunities within our  
18 bureaus. There is \$20 million for the Every Kid in a Park  
19 initiative, which introduces America's fourth-graders to their  
20 public lands, providing education programs across the country  
21 and transportation support for low-income students.

22 We continue to promote a balanced approach to safe and  
23 responsible energy development that maximizes a fair return for  
24 taxpayers with \$800 million for renewable and conventional  
25 energy development, a \$42 million increase. We are on track to

1 meet the President's goals of permitting 20,000 megawatts of  
2 renewable energy capacity on public lands by 2020, with nearly  
3 \$100 million for renewable energy development and  
4 infrastructure.

5 Offshore, this budget supports the Bureau of Ocean Energy  
6 Management and the Bureau of Safety and Environmental  
7 Enforcement with funding to reform and strengthen  
8 responsiveness, oversight, and safety for oil and gas  
9 development.

10 Onshore, \$20 million supports the Bureau of Land  
11 Management's (BLM's) efforts to develop a landscape-level  
12 approach to oil and gas development, modernize and streamline  
13 permitting, and strengthen inspection capacity.

14 We are expanding educational and job opportunities for  
15 Native American communities with \$3 billion for Indian Affairs,  
16 a 5 percent increase to support native youth education,  
17 American Indian and Alaskan Native families, public safety, and  
18 building resilience to climate change. The President's budget  
19 calls for a \$1 billion investment in Indian education as part  
20 of Generation Indigenous, and \$278 million to fully fund  
21 contract support costs, a cornerstone of tribal self-  
22 determination.

23 The budget supports our commitment to resolve Indian water  
24 right settlements and supports sustainable water management in  
25 Indian country with \$215 million, a \$5 million increase.

1           The budget includes funding to strengthen cybersecurity  
2 controls across all agencies. It also invests in science and  
3 innovation with \$150 million for natural hazards at the USGS,  
4 an \$11 million increase. Funding will continue development of  
5 Landsat 9, a critical new satellite expected to launch in 2021.

6           This is a smart budget that builds on our previous  
7 successes and strengthens partnerships to ensure we balance the  
8 needs of today with opportunity for future generations. So  
9 thank you, members of the committee. I look forward to any  
10 questions you may have.

11           [The statement follows:]

12           **INSERT SECRETARY SALLY JEWELL STATEMENT**

13

1 Senator Murkowski: Thank you, Secretary.

2 Mr. Connor or Ms. Sarri, were either of you prepared to  
3 provide an opening statement or should we just go to questions?

4 Secretary Jewell: Just questions.

5 Senator Murkowski: Okay, thank you.

6 Let me start off, Madam Secretary, as I mentioned to you  
7 in my opening statement, and as we discussed in the Energy  
8 Committee hearing last week, my ongoing concern about the  
9 situation in King Cove, the promise that you had made to me and  
10 to the committee to do what you could to help the people of  
11 King Cove. As I noted, I do not see anything in the  
12 President's budget that would help to facilitate that.

13 You have indicated that the report that you had requested  
14 has been completed. I asked if that would be released. You  
15 indicated that it would be. Can you give me an indication as  
16 to when we might expect that?

17 Secretary Jewell: I did ask my chief of staff, as you  
18 know, an Alaskan, to follow up on that, which he is doing. One  
19 complication I did not realize last week is it is actually the  
20 Army Corps' report, so we will need to work with them on  
21 posting it. But Tommy is working through it, and we will make  
22 sure we get it to your office as soon as we are able to do  
23 that.

24 Senator Murkowski: We conveniently have a hearing with  
25 the Army Corps this afternoon, so perhaps I will have a chance

1 to ask them that question at that point in time.

2 Are you able to provide me any details of the report at  
3 this point time?

4 Secretary Jewell: I am happy to go through just a high-  
5 level overview. As I expressed in the letter from July, three  
6 alternatives were identified in that report. And as we  
7 discussed, and I know we differ on this point, I do not support  
8 a road through the refuge because of the extraordinary damage  
9 we believe --

10 Senator Murkowski: I understand that. If what you are  
11 telling me is that what we will see in this report is what we  
12 have seen before, then I would rather not take the  
13 subcommittee's time to have you detail that right now, because,  
14 as you know, that was unacceptable not only to me before, but  
15 it was unacceptable to the people of King Cove.

16 So we will continue this discussion, but let me move to  
17 another issue that is equally unsettling to the people of  
18 Alaska right now. That is the proposed regulations from the  
19 Park Service and Fish and Wildlife on the proposal to govern  
20 wildlife management and procedures to close areas that are  
21 currently open to hunting and fishing in the State.

22 Of course, these are controversial because it calls into  
23 question State management authority over fish and game, over  
24 resources within their borders, contrary and inconsistent with  
25 the Alaska National Interest Lands Conservation Act (ANILCA), a

1 process clearly that has gone forward, which gives the State of  
2 Alaska and the Department of Fish and Game management inside  
3 our preserves, our refuges, and our parks. Do you believe that  
4 the State of Alaska has the right to manage its wildlife within  
5 the borders of the State?

6 Secretary Jewell: Certainly, Senator Murkowski, I believe  
7 the State has the right to manage its wildlife. I also,  
8 though, say that the Fish and Wildlife Service and the Park  
9 Service must operate within the congressional mandates that  
10 they have. What they have struck in this is really around non-  
11 subsistence take of predators, things like --

12 Senator Murkowski: Let me ask about that subsistence  
13 take, because I know you have said that these regs do not  
14 impact subsistence. But since the amount of game that is  
15 available for natives around the State is definitely impacted  
16 by the take of wildlife by predators, how can you suggest that  
17 somehow or another the subsistence rights of our native people  
18 are not impacted by these new predator control policies?

19 I guess a bigger question is whether you think it is  
20 proper for the Federal Government to effectively reverse the  
21 State Board of Game decisions, because that is effectively what  
22 we are seeing here. So, from Alaska's perspective, we have  
23 ANILCA that says the State has the right to manage. Now you  
24 have the Federal Government, the Park Service, the Wildlife  
25 Service, saying, yes, except for when we think that what we are

1 doing is more appropriate.

2 It is a violation really of what has been set out not only  
3 within ANILCA but within the United States Constitution. So, I  
4 hope you appreciate the anxiety that has been created right now  
5 in the State because of these proposed regulations.

6 I know you had a discussion with Congressman Young about  
7 this yesterday. You know where he is coming from, clearly. I  
8 think you know where myself and Senator Sullivan are coming  
9 from on it.

10 But we have a collision -- we have a collision going on  
11 right now between your Federal agencies within Park Service and  
12 within Fish and Wildlife stepping in and telling a State that,  
13 effectively, we do not think that you can manage what by  
14 Constitution and Federal law we have given you that authority  
15 to do.

16 So, that is more of a rhetorical question for you, but you  
17 need to understand how significant an issue this has become in  
18 the State of Alaska. It may be right up there with the fight  
19 on the Arctic National Wildlife Refuge (ANWR) and King Cove.  
20 It may surpass them all, because this truly does go to a  
21 State's rights issue.

22 I am out of my 6 minutes already, so I am going to turn to  
23 my ranking member, but we will have time for multiple rounds  
24 here.

25 Senator Udall.

1           Senator Udall: Thank you, Madam Chair.

2           Several Senators on my side have urgent hearings to

3 actually chair, so I am going to defer my questions and call on

4 Senator Leahy to ask questions at this point. Thank you very

5 much, Madam Chair.

6

1 Senator Leahy: Thank you, Madam Chair.

2 Thank you, Senator Udall.

3 Secretary Jewell, as I mentioned to you earlier, it is  
4 great to see you here. I was thinking, as we were looking at  
5 the picture, when you were in Vermont this time for the Leahy  
6 Environmental Summit, I am glad you were able to enjoy a day of  
7 snowshoeing in Vermont's Green Mountains, something both my  
8 wife and I love to do at our home.

9 But you know what? Last year, you had about 6 feet of  
10 snow in Vermont's backcountry. If you were there today, the  
11 grass would be sticking up through the little bit of snow on  
12 the ground. At our home, we have not been able to snowshoe or  
13 cross-country ski. It has just been strange, so let me ask you  
14 a couple questions.

15 I understand you got an earful on the House side  
16 yesterday. Members blamed you and the administration for all  
17 sorts of harm to the States, almost suggesting you personally  
18 control the price of fossil fuels. Oil just went up, so I am  
19 sure they are all going to call you this morning and give you  
20 credit for that, too.

21 But I want to praise you for your foresight and leadership  
22 in addressing this problem. We have an obligation not only to  
23 current taxpayers, but to future generations to see that all  
24 Federal programs deliver a fair return to American taxpayers.  
25 That can be coal mining activity, offshore oil exploration,

1 logging, even our Federal grazing permits. The price to  
2 extract these natural resources should not be so heavily  
3 subsidized that it encourages damage to our Federal lands or  
4 wildlife or causes, as it could, permanent damage to the  
5 taxpayers of this country.

6 My question is, does your proposed fiscal year 2017 budget  
7 provide the resources to complete a full evaluation of the coal  
8 leasing program? Will it include a cost-benefit analysis to  
9 consider, among other things, carbon emissions and medium-and  
10 long-term impacts of climate change? Could you do a similar  
11 valuation on oil exploration?

12 Secretary Jewell: Thank you very much, Senator Leahy. It  
13 was a pleasure to be in your State.

14 I will say, a year ago, when I was in Senator Murkowski's  
15 State, the green grass was poking through, because they did not  
16 have snow.

17 We are launching a programmatic environmental impact  
18 statement on the coal program. It has not been done for 30  
19 years. It is very evident that from a Government  
20 Accountability Office (GAO) report and our own inspector  
21 general report, there are not only questions about the adequacy  
22 of payment to the taxpayers, but it does not take into account  
23 the impact of climate change.

24 The assessment that we will launch with this programmatic  
25 environmental impact statement (PEIS) will take into account

1 climate change and the impact broadly of the coal program, as  
2 well as the returns and the royalties.

3 I cannot get it done within the time that I am here. It  
4 is too complicated. It takes too long. So we will have an  
5 interim report, which will scope out exactly what will be done,  
6 with a timeline through which we intend to complete that work.

7 I have not at this point contemplated a similar program on  
8 the oil and gas activities. Coal has been criticized, as I  
9 mentioned, by our own inspector general and the OIG, so I am  
10 prioritizing that.

11 Senator Leahy: There are other programs that you have for  
12 development of renewable energy projects. You have wind energy  
13 on Federal land. I wrote to the department last week on Bat  
14 Week. I will point out that I don't talk about fictional  
15 Batman. I talk about real bats and what they do helping with  
16 our crops, keeping down pests, and other all these other  
17 things.

18 If you have wind energy, you also have this question of  
19 bat and bird interaction, migrating birds, bats, and so on. If  
20 additional resources are available, what could your department  
21 do to, one, make progress on wind energy, but also in a way  
22 that would help with flights of birds and flights of bats, all  
23 of which are so important to our whole ecosystem.

24 Secretary Jewell: Thank you very much for pointing out  
25 the importance of bats, in particular, as pollinators and in

1 real trouble right now because of White-Nose Syndrome, which  
2 you are well aware of.

3 I have seen through the USGS the work that we are doing  
4 with the wind energy industry and others on early warning  
5 systems to detect when there are avian species like bats and  
6 birds in the area, and that will proactively shutdown wind  
7 turbines. It is a relatively modest amount, and I would say  
8 that if we had more, we could probably accelerate that work.  
9 Some of it is being paid for by industry, which is also  
10 appropriate, to reduce those impacts. And it is a concern of  
11 the Fish and Wildlife Service.

12 So, where we site these wind energy projects on public  
13 lands, it does take into account the migration patterns and the  
14 potential impact.

15 But with more resources, we certainly could do more.

16 Senator Leahy: Let me and my office help you with that,  
17 and also, help you with industry, because people are concerned,  
18 as you know. And I know you are.

19 One last question. Your department, like others, relies  
20 on temporary employees for programs we have funded either  
21 through partnership agreements or the discretion of Congress.  
22 I worry sometimes these temporary employees are on permanent  
23 things.

24 For example, at the risk of being at all parochial in this  
25 committee of all committees, we have the Lake Champlain sea

1 lamprey control. The Fish and Wildlife Service has run this  
2 continuously now for 25 years. Some of the employees are  
3 classified as temporary. We always have money in there for  
4 this program.

5 I worry these temporary -- they have to be experts. If  
6 they are temporary, they say, I can get a job somewhere else,  
7 and they leave and we lose all the expertise. How do we make  
8 these people permanent?

9 Secretary Jewell: Madam Chair, do you mind if I respond?  
10 I know we are over time.

11 Senator Leahy: I am sure she has similar things in  
12 Alaska, for that matter.

13 Secretary Jewell: Well, quickly, I will say that our  
14 budget does support an increase for the wildlife refuge system.  
15 That would enable us to take some positions that are temporary  
16 and make them permanent.

17 Specific to the sea lamprey, we actually have four  
18 positions that are supported by the State Department because of  
19 the cross-border things with Canada. Those, because they are  
20 not funded by our department, are term positions, and,  
21 therefore, temporary. We certainly would be willing to look at  
22 a more permanent authorization for them.

23 So, there is a blend of the Fish and Wildlife budget being  
24 lower in the past, and we asked for increases, but also part of  
25 it is being supported by the State Department. But, we

1 appreciate the challenge.

2 Senator Leahy: Thank you.

3 Thank you, Madam Chair.

4 Senator Murkowski: Senator Cassidy.

5

1           Senator Cassidy:  If one of my colleagues has a hearing to  
2 chair, they can go ahead.

3           Senator Reed:  I have a hearing.  Thank you.  Very  
4 gracious.

5           Senator Murkowski:  Senator Reed.

6

1           Senator Reed: Thank you, Madam Chairman. Let me begin by  
2 commending you and your colleague for your great leadership.  
3 Thank you very much.

4           Madam Secretary, thank you. One of the major developments  
5 in Rhode Island, as you know, is the creation of the Blackstone  
6 National Historic Park. Thank you, because you were there with  
7 us kayaking along the Blackstone River. We thank you for that.

8           The way it is envisioned, it is a partnership park. The  
9 existing Blackstone Valley Heritage Corridor, a federally  
10 funded entity, is going to work in partnership with the  
11 National Park Service to develop the plan to implement it and  
12 to do all those things.

13           But there is a growing concern, and I would like your  
14 comments about how you balance these two entities, so that they  
15 have adequate resources to continue their jobs and one does not  
16 suffer at the expense of the other as we go forward and  
17 coordinate their operations. Could you comment on that, Madam  
18 Secretary?

19           Secretary Jewell: I will make a quick comment. We have  
20 just slightly above funding recommended for 2017 versus 2016.  
21 So 2017, it is \$932,000. In 2016, the funding with the  
22 National Heritage Areas was \$501,000. Once we get the 2017  
23 amount, the Park Service will work closely with the National  
24 Heritage Areas to figure out what the appropriate split is.

25           But I certainly understand how important that funding is,

1 and I will pass that along to the Park Service.

2 Senator Reed: Thank you. I think both entities now have  
3 to continue at an appropriate pace. At some point, there might  
4 be a transition point where the Park Service accumulates more  
5 support and activities as we go forward. But at this point, I  
6 think it is important to keep both those entities empowered,  
7 resourced, and working together.

8 Another issue with respect to the park, because it is such  
9 a major undertaking, the first one in our State, and we are all  
10 looking forward to its successful implementation, one of the  
11 first sites is likely to be Slater Mill, which is really the  
12 beginning of the Industrial Revolution in the United States.  
13 It is the first really factory in America.

14 That is likely to be the first component of the park. Do  
15 you have any notion about how that transfer will be completed  
16 in this fiscal year, the resources available, and sort of  
17 anything else you might want to add?

18 Secretary Jewell: I have been to the Slater Mill site. It  
19 is extraordinary, and compliments to the community on that. I  
20 have not spoken with the Park Service specifically about plans  
21 for Slater Mill, so let me get back to you on the record for  
22 that one.

23 Senator Reed: Thank you, Secretary, and your staff.

24 And I want to thank the chairwoman again, and particularly  
25 thank Senator Cassidy for his graciousness. Because I have to

1 get back to another hearing, I will just wish you well.

2 Thank you.

3 Senator Murkowski: So, theoretically, that was the  
4 majority's turn. We should go to this side, but Senator  
5 Cassidy was gracious, so I do not know, we will ask you,  
6 Senator Cassidy.

7 Senator Reed: We all vote for Senator Cassidy.

8 Senator Murkowski: Thank you.

9

1           Senator Cassidy: Secretary Jewell, when you put out the  
2 well control rule and the Bureau of Land Management (BLM)  
3 venting rule, I am told that you used \$80 oil and \$4 natural  
4 gas to justify the economics. Is that correct?

5           Secretary Jewell: I do not know specifically what was  
6 used in the economics in that. That probably is correct, given  
7 the timing that it was done, but we can get back to you and  
8 confirm that.

9           Senator Cassidy: Is it fair to say that probably the  
10 economics of that are now different because of the lower  
11 prices?

12           Secretary Jewell: To the extent that the economics are  
13 dependent on oil prices, it would be, but oil prices, of  
14 course, are a commodity and they fluctuate from \$100 to below  
15 \$30. So, I do not know how much that specifically impacts the  
16 cost of the well control rule. It certainly impacts the  
17 industry.

18           Senator Cassidy: Now, when it impacts the economics of  
19 the industry, it is fair to say that a well that could be  
20 economically developed at \$80 a barrel probably cannot be at  
21 \$30. That just goes without saying. There is a marginal cost  
22 to compliance with regulation, and if that marginal cost is on  
23 \$30 as opposed to \$80, it is going to make a difference in  
24 economics. I think that goes without saying.

25           Secretary Jewell: Well, if I can just say that there are

1 a lot of things that will impact the economics. The cost of  
2 the rig, the cost to drill, the risk, and all of those things  
3 are factored in.

4 Senator Cassidy: Absolutely.

5 Secretary Jewell: I used to do this for a living, so I  
6 certainly understand that.

7 Senator Cassidy: I get that. But, marginal cost of  
8 regulation is a cost.

9 Now, according to a Wood Mackenzie report, the well  
10 control rule, the cost of compliance, could cause a decline of  
11 55 percent in exploratory wells by 2030. I just say that for  
12 the record. Others may fuss with that.

13 But at the same time, it is fair to say that there is some  
14 cost associated with the well control rule.

15 That said, one of the concerns that has been raised with  
16 me regarding the well control rule is that the Bureau of Safety  
17 and Environmental Enforcement (BSEE) is promulgating this, and  
18 they are promulgating it, but it apparently violates a  
19 congressional mandate that specifically is the National  
20 Technology Transfer and Advancement Act, the NTTAA, which bars  
21 the use of government unique technical standards in lieu of  
22 voluntary consensus standards. Again, I have a document here  
23 that goes through the statement of it.

24 Any thoughts about that? Because it does seem, what I  
25 have heard about the well control rule is being given kind of

1 ex cathedra as opposed to from a voluntary consensus  
2 methodology.

3 Secretary Jewell: I have never heard of the act that you  
4 referenced, but I am confident through our solicitors that  
5 everything that we are doing in regard to the well control rule  
6 is within our rights and consistent with what we believe we  
7 must do for the safe and responsible development of offshore  
8 resources, particularly in the wake of the *Deepwater Horizon*  
9 spill.

10 Senator Cassidy: It isn't insofar as -- believe me, I  
11 care about the *Deepwater Horizon*. It is not insofar as  
12 regulations are not required but rather that BSEE is supposed  
13 to show that voluntary consensus standards are impractical. I  
14 am not sure that it is clear that the voluntary consensus  
15 standards are impractical, and I am not sure that it has been  
16 shown.

17 So, it is not so much the regulation should not be  
18 promulgated but rather the technique should be first the  
19 consensus standards, and then only, again, my term, if you  
20 will, is ex cathedra being prescribed without the consensus  
21 standards being formed.

22 Obviously, that might be something a little technical, but  
23 if you could address that for the record, I would appreciate  
24 that.

25 Secretary Jewell: We are happy to follow.

1           Senator Cassidy: Related to that, and again on the well  
2 control rule, is that, clearly, if we are going to have an  
3 impact upon the ability of oil wells to be drilled, that is  
4 going to affect the energy supply in the United States. I am  
5 told that under Executive Order 13211, from May 18, 2001, such  
6 things require a statement of energy effects.

7           BSEE has denied that there is an impact upon energy supply  
8 from these regulations, which seems a little crazy. But  
9 nonetheless, if they do, it means that they have another  
10 reporting requirement.

11           Any thoughts about that? It just seems so self-evident  
12 that if you are going to have an impact upon the supply of oil  
13 and gas that you are going to have an energy effect. That may  
14 be a little technical for this conversation. I do not know if  
15 you are prepared to comment on that.

16           Secretary Jewell: I will just comment briefly that the  
17 well control rule really codifies many of the practices  
18 currently in place in the gulf that were addressed after the  
19 *Deepwater Horizon* spill. I do not support the notion that the  
20 regulation itself would impact energy supply. I am happy to  
21 get back to for the record.

22           Senator Cassidy: Please. And I will say that, speaking  
23 to folks, they actually feel like the initial rules that came  
24 out after the Macondo were actually fairly reasonable. It is  
25 those that were proposed that would go beyond it that are again

1 being given almost, in effect, by fiat, not with consensus  
2 standards.

3 According to at least one consultant, it is going to have  
4 a significant impact upon the drilling of exploratory wells.

5 So we will fashion these for the record, and look forward  
6 to your reply.

7 Secretary Jewell: If I could just say briefly, there was  
8 a lot of industry input after the draft rule. Those have been  
9 taken into account, and I believe you will see significant  
10 changes from the draft rule to the final when it is released.

11 Senator Cassidy: Sounds great.

12 On the Land Buy-Back Program, what is the cost basis for  
13 the sale of the land? Does that include the mineral rights  
14 that might be beneath it, the grazing rights, et cetera?

15 Secretary Jewell: Mike.

16 Mr. Connor: We are not typically acquiring land through  
17 the Land Buy-Back Program with mineral rights on it. We are  
18 right now excluding--

19 Senator Cassidy: I thought this is where the Indian  
20 tribes were allowed -- the Native American tribes were allowed  
21 to buy land back from the United States. Did I misunderstand  
22 that program?

23 Mr. Connor: This is one where resources are provided to  
24 acquire these fractionated interests in lands and restore to  
25 tribal ownership. So there are significant tracks out there

1 that do not have mineral interests. We are doing appraisals of  
2 those lands and restoring those to tribal --

3 Senator Cassidy: I see. So, those typically do not have  
4 mineral and grazing rights associated with them.

5 Mr. Connor: That is correct.

6 Secretary Jewell: Just to clarify, they are not Federal  
7 lands. Typically, they are in fractionated private ownership  
8 consolidated for the tribes.

9 Senator Cassidy: Okay. I yield back. Thank you.

10 Senator Murkowski: Senator Tester.

11

1 Senator Tester: Thank you, Madam Chair.

2 I, too, want to thank Senator Cassidy for his courtesy.  
3 That happens seldom around here, so we thank you for that very,  
4 very much, even though I was not the beneficiary directly.

5 Secretary Jewell, thank you for being here. I want to  
6 talk about the Land and Water Conservation Fund for a second.  
7 We have been over the numbers before. You know the impact it  
8 has on Montana's overall economy -- \$5.8 billion in consumer  
9 spending in a State of 1 million people. Seventy percent of  
10 Montana businesses list public access as a major reason they do  
11 business in our State.

12 In 1978, this fund was funded at \$900 million -- 1978, the  
13 year I graduated from college, a long time ago. Now we are  
14 finally back up to \$900 million, \$475 million discretionary,  
15 \$425 million mandatory. I appreciate that.

16 Back in 1978, it was supposed to be funded by offshore oil  
17 revenue. When we had this debate on the Senate floor, people  
18 said there was lots of money in this account, lots of money in  
19 this account. It was my understanding it flows into the  
20 general fund.

21 The question for you is, do we need an offset for the Land  
22 and Water Conservation Fund? When it was set up in 1978, it  
23 was set up to be at \$900 million, and somebody took that money  
24 and we never heard a word about offset back in those days.

25 Secretary Jewell: There are people here with much more

1 history on this body than I have. It was authorized at \$900  
2 million. It has fluctuated wildly, and less than half, I  
3 believe, has actually been appropriated, and the rest has been  
4 used for other purposes.

5 Senator Tester: Was is it appropriated at \$900 million  
6 back then, do you know?

7 Secretary Jewell: It was.

8 Senator Tester: And it has been appropriated at that  
9 level a few times since that.

10 The reason I bring this up is because in my opinion at  
11 least these places are not going to be around forever. They  
12 might not be around in 10 or 20 years. When you are looking at  
13 proposals, what are you looking at when you utilize this fund  
14 money?

15 Secretary Jewell: There is a stateside program, which is  
16 prioritized by States. That is very, very important. On the  
17 Federal programs, we really have a list that is far longer than  
18 what we are able to do for things like sportsman's access,  
19 critical parcels between pieces of public land that promote  
20 access, inholdings where it is costing us money to provide  
21 rights-of-way that would actually reduce our costs. There are  
22 a number of different things.

23 Senator Tester: Does the \$900 million bring you up to a  
24 point where you can address all of the requests?

25 Secretary Jewell: No.

1 Senator Tester: Half the requests?

2 Secretary Jewell: No. It would just enable us to make  
3 progress. There is a much longer list of requests.

4 Senator Tester: I appreciate you trying to get back that  
5 \$900 million figure. It actually should have been indexed so  
6 it would be more than that now, in my opinion. These are  
7 special ecosystems that are not going to be around much longer.

8 I want to talk about the Federal coal program for a  
9 second. I believe in transparency. I believe in a fair return  
10 to the taxpayer. These public lands are owned by every citizen  
11 in this country, contrary to what some might say.

12 I think that it is critical that we get a fair return on  
13 those coal dollars. I think, and I correct me if I am wrong,  
14 the last time there was an assessment done on Federal land,  
15 coal leasing was in the early 1980s. Is that correct?

16 Secretary Jewell: It was 30 years ago. It was 1986.

17 Senator Tester: Nineteen eighty-six, the year that I  
18 bought a brand-new Chevy pickup four-wheel drive, three-quarter  
19 ton for \$12,000. That same pickup would cost around \$38,000  
20 now, by the way, because I am looking to trade it off.

21 But that aside, can you tell me, I think it is a good idea  
22 to do the research and it is a good idea to make sure we are  
23 getting a fair return, but this cannot go on forever. I mean,  
24 it has to be a date certain.

25 I have heard 3 years. Is 3 years a reasonable amount time

1 to get this survey done? And, if it is, would you support  
2 legislation saying that?

3 Secretary Jewell: I would support legislation putting a  
4 date certain. Three years, we believe, is as fast as we could  
5 do it. The program done in the 1980s was longer than that.  
6 The pause on coal leasing extended longer than that, as a  
7 result.

8 So, I will be putting in place a date certain timeline  
9 when I leave, but that could be undone by a successor and I  
10 would welcome a clear timeline so that we can complete this in  
11 a timely way.

12 Senator Tester: Okay, Madam Chairman brought up the  
13 Federal grazing fee. It was raised up to \$2.11 in this budget,  
14 correct me if I am wrong, maybe it was not. Maybe it was done  
15 before that.

16 The point I want to make is this. There are some who want  
17 to transfer our Federal lands to our States. The amount of  
18 grazing fees that are charged by the States are much, much,  
19 much higher. And the private grazing fees are much higher than  
20 the State fees.

21 Could you talk about, because I do not know that a lot of  
22 people are talking about this -- we have more cattle in Montana  
23 than we have people, by the way. Can you talk about the impact  
24 of transferring these Federal BLM or Forest Service lands to  
25 States would have on grazing fees?

1 Secretary Jewell: The impact would be dramatic. The  
2 Federal Government charges \$2.11, which was set by Congress  
3 many years ago. While our budget asks for an administrative  
4 fee of \$2.50, right now we cannot even cover 35 percent of our  
5 costs of administering the program.

6 Just to give you some examples, in your home State, the  
7 State charges \$19.57 compared to the Federal Government's  
8 \$2.11. In Colorado, it varies between \$9 and \$15.25. In  
9 Wyoming, it is \$6.14. On private lands, it is \$21, 10 times  
10 what the Federal Government rate is. That is pretty  
11 consistent.

12 So I would say that for the grazing interests, people are  
13 getting an incredibly good deal on BLM lands right now. The  
14 increase that we are talking about still would not even fully  
15 cover our costs just to administer the program.

16 Senator Tester: Thank you very much. I look forward to  
17 working with you on this budget.

18 Thank you, Madam Chair.

19 Senator Murkowski: Thank you, Senator Tester.

20 Senator Daines.

21

1 Senator Daines: Thank you, Madam Chair.

2 Good to see you again, Secretary Jewell.

3 Last week in the Energy Committee, I mentioned my concerns  
4 about the programmatic review and the pause on coal leasing.  
5 It is very troubling for many back home in Montana and for the  
6 Crow tribe. I think we need to be careful to not make  
7 producing Federal coal completely uneconomical.

8 That is a reality that is dangerously close under the  
9 current administration's moratorium on coal leasing, and if not  
10 inevitable, if our States and I think our tribes are left out  
11 of the process.

12 At last week's hearing, I asked about gathering input from  
13 the States and the tribes, and you mentioned six listening  
14 sessions the department has had, and that there is a very open  
15 process. Several tribal members and others who rely on these  
16 coal jobs to provide for their families for the revenues, for  
17 the general fund, expressed strong concern regarding potential  
18 administration actions at the listening session that was  
19 actually held in Billings, Montana. In fact, most present  
20 there expressed concern.

21 Yet the administration is moving forward with this  
22 programmatic review and a coal leasing moratorium. Quite  
23 frankly, I think there needs to be something more formal to  
24 allow the States and tribes and other stakeholders a more  
25 predictable and impactful seat at the table, like the Royalty

1 Policy Committee, which actually you allowed to lapse in 2014.  
2 I think Congresswoman Lummis mentioned that yesterday in a  
3 hearing.

4 The question was, why did the agency allow the proposed  
5 rulemaking initiative to move forward when the Royalty Policy  
6 Committee, which was important -- it has members from the  
7 States, from the tribes, from non-governmental organizations  
8 (NGOs), from industry, the committee lapsed in 2014, a very  
9 important voice in this process. Why did we go forward with  
10 rulemaking initiatives when you allowed that committee to  
11 lapse?

12 Secretary Jewell: Let me say a couple things, if I may.  
13 First, I will have to look into the committee lapsing, but  
14 royalty rates on the Federal coal program have not changed in  
15 30 years, so I am not sure of the function of the committee.

16 There are minimum royalty rates set, and then a lot of  
17 exceptions that actually reduce the royalty rates. We have  
18 seen a real decline in revenue coming in from the coal program,  
19 and the decline in production is really due to economic factors  
20 like the switch to natural gas and like a change in the  
21 interest in exports of coal, which I know the Crow tribe was  
22 interested in.

23 The bonuses over the last 10 years were about \$.875 per  
24 ton. And in 2015, \$.315 a ton, so the price is collapsing on  
25 coal due to market conditions.

1           Senator Daines: Right. I understand the dynamic nature  
2 certainly of what is going on. I guess, it makes it in my  
3 opinion even more important -- why wouldn't we want to have the  
4 States' voice, the tribes' voice, industries' voice, NGOs'  
5 voices there in a more formal process as far as their input  
6 goes, which was a key part of this Royalty Policy Committee,  
7 which lapsed in 2014?

8           Secretary Jewell: I just had some more recent information  
9 handed to me.

10           The Royalty Policy Committee last met in 2008. The  
11 charter was renewed in 2010, but did not meet because of other  
12 events -- *Deepwater Horizon*, the Minerals Management Service,  
13 which was reorganized and created the Office of Natural  
14 Resource Revenue. It was set up to expire in 2012.

15           It was renewed as a potential vehicle for the extractive  
16 industries transparency initiative multi-stakeholder group, but  
17 the most recent charter expired in 2014, and our Office of  
18 Natural Resources Revenue did not feel it made sense to  
19 reestablish it.

20           But we are happy to look into that more for the record.  
21 That is as much information as I have right now.

22           Senator Daines: The concern I hear back home is that we  
23 want to make sure the States' voices are heard in that process,  
24 that the tribes' voices are heard in that process, the industry  
25 voices are in that process, as well as NGOs. I think the

1 stakes are perhaps much higher now than they might have been in  
2 the past and why it is so important.

3 I believe this policy needs to be reinstated. And I am  
4 concerned why rulemaking is going forward here without having  
5 that important body functioning, given I think the dynamics and  
6 the stakes are a lot higher today than they might have been in  
7 the past.

8 Secretary Jewell: Just to adjust a little bit, rulemaking  
9 is not what is happening. It is a programmatic and  
10 environmental impact statement, which is a review of the  
11 overall program. We absolutely will be listening to industry.  
12 We will be listening to tribes. We will be listening States,  
13 local stakeholders, local communities. People impacted by this  
14 on the ground will be a very robust part of this process, I  
15 promise you.

16 Senator Daines: I appreciate Senator Tester's concerns  
17 voiced a little earlier about trying to get a 3-year date  
18 certain, in terms of this programmatic review. I have an  
19 amendment that I am trying to work to get bipartisan support on  
20 that to, again, deliver some certainty here in what is very  
21 much an uncertain process in many regards.

22 I want to pivot over and talk about the meaningful  
23 consultation with Indian tribes. The Crow tribe I do not think  
24 believes they have had meaningful consultation.

25 What does meaningful consultation look like to you,

1 Secretary Jewell, because they are saying that they do not  
2 really feel like they have had a meaningful consultation.

3 Secretary Jewell: I have not met with the Crow for  
4 probably 1.5 years, maybe a bit more. But, if they feel the  
5 consultation they had is not meaningful, please have them let  
6 us know, and we will make sure that we are responsive.

7 I would say meaningful consultation is not necessarily  
8 reaching an agreement on a position that a tribe necessarily  
9 wants, but it is making sure that their position is known and  
10 heard. We have been committed to that throughout this  
11 administration.

12 Senator Daines: As you know, their unemployment rate  
13 today is about 40 percent. The loss of these jobs takes the  
14 unemployment rate to north of 80 percent. It is devastating  
15 for the tribe.

16 Secretary Jewell: I understand, and I know you  
17 understand, too, that the economics of coal are changing  
18 dramatically. What we are looking to do is not the cause of  
19 that. There is a multifaceted global market for coal that is,  
20 in fact, going down dramatically.

21 Senator Daines: I would argue that the EPA power plan is  
22 having a tremendous impact right now in creating uncertainty  
23 there as well.

24 I understand the economic dynamics. The EPA power plan is  
25 probably the single most devastating impact right now on the

1 coal business up there in Montana. Thank you.

2 Senator Murkowski: Senator Daines, I appreciate you

3 bringing up the issue, though, of tribal consultation.

4 Secretary, I am going to turn to Senator Feinstein, but I would

5 just like to put you on notice.

6 I have a large delegation of Alaskan Native leaders that

7 are in Washington, DC, this week. Every single one of them is

8 bringing up with me the breakdown that they are seeing with

9 tribal consultation with the agency. So I will put that on

10 your plate as well, and I can speak with you about specifics.

11 Senator Feinstein.

12

1 Senator Feinstein: Thank you very much, Madam Chairman.

2 I just want to say, it is fortuitous you are also chairman  
3 of the Energy Committee, and the subject I want to bring up  
4 today is a bill that we have submitted for your consideration,  
5 and that is a California water bill, which would hopefully be  
6 part of a Western water bill.

7 I cannot express too strongly how serious this drought is  
8 for California. A lot of people have counted on El Niño. It  
9 may or may not bear real fruition, but the State has really had  
10 dramatic problems. Let me just give you a few.

11 We have 69 California communities that face significant  
12 water supply and water quality issues. In other words, most of  
13 them do not have water. We have lost 2.7 billion from the  
14 drought in just 2015. More than 1 million acres of California  
15 farmland have been fallowed in 2015. The drought has led to a  
16 loss of 35,000 permanent jobs in the State.

17 Land subsidence in the southern Central Valley has caused  
18 large areas to begin to sink because of overpumping  
19 groundwater, and it is sinking as much as 2 inches per month.  
20 As a result, bridges, aqueducts, and roads have begun to crack.

21 So, I would like to ask a couple questions of the Deputy  
22 Secretary on the subject. Deputy Secretary Connor, is it true  
23 that we have worked closely with Reclamation and your office in  
24 the drafting, redrafting, and amending of this bill?

25 Mr. Connor: It is absolutely true.

1           Senator Feinstein: Deputy Secretary Connor, is it true  
2 that every amendment or suggestion, and there have been many,  
3 made by Reclamation and your office has been worked through and  
4 incorporated into the bill?

5           Mr. Connor: Senator, a great many. I would hesitate to  
6 say all, but I think for the most part, most of the very  
7 substantive ones have been addressed. I believe there may be  
8 some technical issues that we still are discussing. But yes,  
9 in general, I agree with your statement.

10          Senator Feinstein: Okay, I would like to know, not now,  
11 but what those technical issues are.

12          Do you believe that the bill, if enacted, would increase  
13 operational flexibility and increase water supply during this  
14 drought?

15          Mr. Connor: I agree, yes, on both counts.

16          Operational flexibility in the bill incorporates  
17 provisions that reflect the flexibility that we have tried to  
18 maintain in our water operations, and that we have over the  
19 past couple years developed, consistent with our drought  
20 contingency plan.

21          So, it institutionalizes those provisions. It provides  
22 greater resources for monitoring activities that greatly help  
23 in our operations. It facilitates transfer. So I think in the  
24 midst of this drought, it does increase flexibility and has the  
25 capacity to provide for more water. I would say, in the long-

1 term, it absolutely, unquestionably will provide for more water  
2 supply reliability for California.

3 Senator Feinstein: Thank you very much. I appreciate  
4 that.

5 Madam Secretary, if I may, I want to thank you for your  
6 efforts related to the President's designation of three new  
7 national monuments in the California desert. The California  
8 desert has been a very big deal for me. We have done two  
9 desert bills. As a city girl, the California desert is such a  
10 wonderful place to visit. At night, the shadows, the dawn, the  
11 flora, the fauna, the petroglyphs, it is just an incredible  
12 place. So I am very delighted to see these monuments.

13 If I understand your budget request, it includes \$6.5  
14 million for the BLM office in California that is responsible  
15 for managing the national monuments. That is an increase of  
16 \$1.9 million when compared with last year.

17 While I understand the monuments were designated after  
18 submission of the President's fiscal year 2017 budget, do you  
19 believe the additional \$1.9 million will be enough for BLM to  
20 manage the 1.7 million acres of land it is now responsible for?

21 Secretary Jewell: I am just going to do a high level, and  
22 then turn it to Chris for the direct answer.

23 I want to say a profound thank you for your work on the  
24 drought legislation -- hard, hard work -- and also for your  
25 tireless work over many, many years on the protection of the

1 California deserts.

2 Senator Feinstein: You might be interested to know, Madam  
3 Secretary, we have done 26 drafts of that legislation and made  
4 41 amendments to it, as the time has gone on, and as we have  
5 talked and consulted with others. So, that has been 2 years of  
6 work, and I might say, much harder than the desert bill.

7 Secretary Jewell: It was very constructive. And the  
8 subsidence you pointed out is something few people know about.

9 We have increased money in the budget overall for the  
10 National Landscape Conservation System in BLM that does include  
11 the California deserts. There is not specific money in the  
12 budget for them beyond an allocation for that, because of the  
13 timing of the monuments. We will be doing a lot of planning  
14 associated with that, and future budgets will reflect that.

15 But, Chris, do you want to jump in?

16 Ms. Sarri: Sure.

17 Senator, thank you very much for the question. As the  
18 Secretary mentioned, there is an increase for BLM's  
19 conservation lands. We are up to \$50 million for the request.  
20 That does include the \$1.9 million increase for the California  
21 areas. BLM thinks that will be sufficient if they get the  
22 budgetary increase to take care of the new monument.

23 Senator Feinstein: Thank you. That is very helpful. I  
24 appreciate it.

25 Just a quickie, one of the prior Senators mentioned the

1 problem with abandoned mines. It is a serious problem in our  
2 State. We have some 24,422 abandoned mines. According to BLM,  
3 there are 1,672 known mine sites on or near BLM property. BLM  
4 estimates that there were an additional 22,730 sites that have  
5 yet to be even inventoried.

6 BLM says that will require \$118 million just to complete  
7 the inventory. That is an enormous cost just to inventory.

8 My question is, would you take a look at that cost? I am  
9 concerned about these. I know we get \$1 million, \$2 million a  
10 year to deal with these, and some have been boarded up where  
11 people can fall into them. But I am very concerned that we  
12 could still have some kind of a catastrophic event.

13 So, if you would take a look, BLM has requested \$20  
14 million in discretionary funding for its nationwide Abandoned  
15 Mine Lands program. You propose \$1.8 billion in mandatory  
16 funding from a new fee that most people think will not go  
17 anywhere in Congress.

18 So, if you have some suggestions, Madam Secretary, I would  
19 love to hear them.

20 Secretary Jewell: I will just say thank you for pointing  
21 out this issue, as did Senator Udall. He does have some  
22 legislation he is proposing.

23 This is an enormous problem. We will certainly look into  
24 the cost and get back to you on the record for that, because I  
25 do not have a great answer, except that I know that just to

1 inventory across landscape is hundreds of millions of dollars.  
2 That is because these are remote sites. To inventory them, we  
3 have to understand kind of what is happening, the features  
4 within those sites. That is very labor-intensive work.

5 But we will look into that and be happy to work with this  
6 subcommittee and others on bringing a long-term solution.

7 Senator Feinstein: Let me ask you just quickly this  
8 question. To inventory them first, so much money, could there  
9 be another criteria for selecting abandoned mines to take care  
10 of? It seems to me those would be the mines where you have  
11 hikers, visitors, where there is the most jeopardy of an  
12 accident. Could it be done on that basis?

13 Secretary Jewell: I will talk to do the BLM and ask them.  
14 I am fairly confident those are the ones they have prioritized  
15 within the National Park Service, those that do have close  
16 visitor access. But we will check into that, and I will get  
17 back to you on it. Thank you very much.

18 [The information follows:]

19 **INSERT CRITERIA FOR SELECTING ABANDONED MINES**  
20 **TO TAKE CARE OF**

21 Senator Feinstein: Thank you, Madam Chairman.

22 Senator Murkowski: Senator Blunt.

23

1 Senator Blunt: Thank you, Chairman.

2 Secretary Jewell, I want to thank you for mentioning the  
3 arch in your written testimony. It is one of the very first  
4 projects, and maybe in terms of private funding the largest  
5 project in terms of local funding that is going into that  
6 partnership.

7 It does seem to me that we have a real opportunity there  
8 and in other places to really usher in what I believe is your  
9 vision of the second century of the Park Service. I would say  
10 that I hope it would not hurt his reputation in the service,  
11 but the new regional director, Cam Sholly, appears to fully  
12 understand the importance of setting this model. We are  
13 enjoying working with him, as, more importantly, the people  
14 locally are enjoying working with him.

15 We were able to get some language in the omnibus  
16 appropriations bill. Chairman Murkowski supported that  
17 legislation that just would help attract private dollars.

18 What that language does is direct the Treasury Department  
19 to invest the dollars privately raised in interest-bearing  
20 accounts. I know in the case of the arch the goal is to raise  
21 \$29 million of endowment funding. I would hope the endowment  
22 funding and any future funding raised for that and other  
23 projects benefits from that new sense of direction to the Park  
24 Service and, more importantly, to the Treasury. I do not think  
25 the Park Service ever resisted the idea that private money

1 should actually benefit the project it had been raised for as  
2 opposed to any interest going into the general treasury.

3 Secretary Jewell: We share a common interest in that. I  
4 have to compliment the St. Louis community. \$250 million of  
5 private money raised for that CityArchRiver project, which is  
6 extraordinary.

7 And thank you for your efforts, so that they could, in  
8 fact, use the interest during the interim time frame as opposed  
9 to going to the Treasury. That is very helpful. And we will  
10 continue to advocate for that, broadly.

11 Senator Blunt: Right. There is another study going on  
12 that should be released any time. I will just bring it to your  
13 attention to be sure that you spend a little time looking at  
14 it. This is on Ste. Genevieve, Missouri, which is just south  
15 of St. Louis on the Mississippi River.

16 It is a French settlement that still actually has a  
17 substantial number of 18th-century French buildings in that  
18 community, some of which have been under the direction of the  
19 State parks system for some time.

20 But my belief is that both the State parks system and  
21 study that the National Park Service is about to do will reach  
22 the conclusion that a better place to preserve that unique part  
23 of our history is probably as a unit of the National Park  
24 Service. I would expect that to come out any day. I hope you  
25 have a chance to look at it.

1           Like I said, these are 18th-century structures west of the  
2 Mississippi River. A lot of them are the vertical log  
3 structure that was unique to the way the French were building  
4 housing compared to the horizontal structure that other people  
5 were. I am interested in that and hope you will be, too.

6           Just to follow up a little bit on one of Senator Daines'  
7 comments, on the 3-year date certain on the coal study, I  
8 actually do not know how much there is to figure out about coal  
9 that we do not already know. I was going to suggest that I  
10 thought 3 years was an excessive amount of time for that study.

11           So, you hear that point of view, as well as just promise  
12 us that you will get it done in 3 years.

13           I really think you should look at this and determine what  
14 you are going to know that takes 3 years as opposed to half  
15 that time or 2 years or sometime that is less than 3 years. I  
16 think the questions on coal have already been well asked.

17           I will say that, in Missouri, we are 80 percent coal-  
18 dependent for utilities. Ninety percent of that coal comes  
19 from the Powder River Basin. The fact that a taxpayer should  
20 get a fair return there is important, but it is also important  
21 in the other energy resources. While oil and gas on State and  
22 private lands have almost doubled between 2010 and 2014, there  
23 have been no changes, no appreciable change, on Federal  
24 Government lands.

25           I do think return to taxpayers for what we can minimize

1 the intrusiveness of in terms of oil and gas is an important  
2 return.

3 I also know that on a significant amount of Federal land,  
4 over 30 solar projects have been approved since 2010. I am not  
5 opposed to solar at all, but if you are worried about impacting  
6 the way the landscape should look, or it would look if people  
7 were not involved in the landscape, I am sure 30 solar projects  
8 have more impact on that topic.

9 And there is no Federal return, there is no taxpayer  
10 return, on solar. I am not objecting to that. I am not  
11 opposed to solar. I am not opposed to wind. I am actually  
12 truly an all-of-the-above person.

13 But if we are interested in fair taxpayer return, it would  
14 seem to me that we would be looking pretty aggressively at why  
15 we have 89 percent more production in State and Federal lands  
16 and essentially no more production on Federal lands. I will  
17 let you respond to that.

18 Secretary Jewell: Let me just clear up one point. We do  
19 actually charge solar energy companies when they are leasing  
20 Federal land for solar, for wind. There is a charge to them.  
21 Just as we are doing offshore wind in the Atlantic, we are  
22 doing lease sales similar to what we do in the Gulf of Mexico  
23 for offshore oil and gas.

24 Senator Blunt: Good. Would you provide me or the  
25 subcommittee how that works?

1 Secretary Jewell: Yes, we are happy to.

2 [The information follows:]

3 **INSERT HOW SOLAR ENERGY COMPANIES ARE CHARGED**  
4 **WHEN THEY LEASE FEDERAL LAND**

5 Senator Blunt: If that is a one-time payment or an  
6 ongoing payment, as you would have from production from other  
7 facilities. I would like to see that.

8 Secretary Jewell: Yes, we are happy to do that. It is an  
9 ongoing rental payment. There is a bonus paid upfront, and  
10 then there is an ongoing rental payment. I think it is per  
11 acre or per tract, but we will get back to you on that.

12 Also, just to point out, because I had not said it earlier  
13 today, on the programmatic EIS for coal, it actually is  
14 complicated. There are a lot of different interests at stake  
15 and a number of different States at stake. There is  
16 metallurgical coal. There is steam coal.

17 So we do believe, based on how long it takes us, for  
18 example, to do a programmatic EIS on an offshore leasing  
19 program, that 3 years is a pretty expedited time frame.

20 I will be not in this job, clearly. That will change in  
21 about 11 months, maybe were down to 10.5. We do have 20 years  
22 of supply of Powder River Basin coal, Federal coal, under lease  
23 to companies already. And we do have emergency provisions in  
24 the pause that we put on the leasing program during the PEIS to  
25 allow companies to continue to mine and to get a permit, if

1 their mine is at risk of closing because of the pause or if a  
2 coal-fired power plant is at risk of closing because of the  
3 pause. We also grandfathered projects that were nearing their  
4 completion.

5 So we do not believe there will be disruption in the  
6 supply of coal or to the jobs.

7 Senator Blunt: Let me make one point there before the end  
8 of my time, and we are at the end of my time, but I noticed  
9 last time was little extensive too.

10 How long the study would take if the study hadn't put  
11 long-term government program in abeyance until the study was  
12 over, I think that is two different questions. Patriot Coal in  
13 St. Louis just went into bankruptcy. Shortly after they went  
14 into bankruptcy, as I understand it, I have not talked to them,  
15 but everything I have read about this would indicate that one  
16 of the things they thought would bring them out of bankruptcy  
17 was that they were right at the end of the permit process to  
18 get access to some coal mining area that they hadn't previously  
19 had.

20 That is now postponed until the study is over. I do not  
21 know what impact that is going to have on the company, but I  
22 assume it is significant. They, as many others would have,  
23 would have pursued what they understood to be government  
24 policy, which just suddenly stopped so the government can  
25 figure out what they were doing. It does seem to me the

1 government can figure out what they are doing without  
2 necessarily stopping everything we have been doing for a long  
3 time.

4 Thank you, Chairman.

5 Senator Murkowski: Senator Merkley.

6

1 Senator Merkley: Thank you, Madam Chairman.

2 And thank you, Madam Secretary, for being here and helping  
3 us understand a variety of things.

4 When you started out your commentary, you mentioned Harney  
5 County and Malheur Refuge. That has been a traumatic  
6 experience for Oregon. We are hoping to work with the  
7 Department of Justice in terms of some compensation back to the  
8 completely overstrapped local system of justice that was  
9 dealing with that, in partnership with FBI.

10 But also the Burns Paiute Tribe, and this would be more  
11 relevant to Interior, had to incur a lot of increased costs and  
12 damage to sacred sites. It is still being evaluated.

13 Is it possible that the BIA could assist the tribe in some  
14 of these expenses that they are going to incur?

15 Secretary Jewell: It is certainly something we would be  
16 happy to look at. I know that the FBI left recently, and we  
17 are just now doing an inventory of the damage. But certainly,  
18 we can work with the Bureau of Indian Affairs (BIA) if there  
19 are costs incurred by the tribes in addressing that.

20 I did meet with the tribes on the phone beforehand. I did  
21 meet with Judge Grasty from the county recently in my office.  
22 And I will be making a trip there when the time is right to  
23 visit. We will make sure that we encompass the tribes and I  
24 engage with the BIA as well.

25 Senator Merkley: Thank you. I really appreciate that. I

1 know the tribe appreciates that as well.

2 One of the ironies is that that particular county where  
3 the occupation occurred has had some terrific successes on  
4 collaboration, the types of successes that we all say need to  
5 happen through dialogue and cooperation and sharing  
6 perspectives and so forth, one including sage-grouse  
7 conservation, another being the Malheur Refuge itself,  
8 management of the refuge.

9 Judge Grasty, who you mentioned, has thought that, given  
10 their successes in Federal-county collaboration, this would be  
11 a very good place to have a center that helped advance that  
12 type of collaboration, both from the local experiences, but  
13 bringing in the issues from throughout the West.

14 So, I think it is a terrific idea. There are tensions  
15 that certainly are natural between a longstanding landlord, the  
16 Federal Government, and a longstanding ranching and grazing  
17 tenants, and issues over the use of the land. And having a  
18 center to facilitate collaboration, it seems like a pretty cool  
19 thing.

20 Any chance we could get some support for that idea from  
21 the administration?

22 Secretary Jewell: This is a new concept I have not really  
23 considered, so we would be happy to consider it.

24 I will say that what happened in advance of the occupation  
25 of the refuge and the cooperation that has happened throughout

1 Oregon with not just our own agencies, but also the Natural  
2 Resources Conservation Service has been extraordinary. I think  
3 there are models there to learn from.

4 I would hope that it will set a model for every office --  
5 Fish and Wildlife Service, BLM -- working cooperatively across  
6 the landscape. But we are happy to do give that consideration,  
7 and I will chat with Judge Grasty the next time we talk.

8 Senator Merkley: Thank you very much. I appreciate that.

9 I also appreciate the administration's support for the  
10 Klamath settlement efforts. We had substantial development  
11 with the process of decommissioning the dams being taken  
12 offline and, therefore, removing some of the obstacles. There  
13 is still a lot of work to be done to capture through  
14 legislation the water certainty for the irrigators, the land  
15 for the Klamath Tribes, habitat restoration, and so on and so  
16 forth. You have been a great partner.

17 Can we continue to ask you to assist us?

18 Secretary Jewell: We absolutely will be there. We know  
19 there is a legislative fix that is needed to move this forward,  
20 and we are fully supportive.

21 Senator Merkley: Thank you. I appreciate it.

22 And there was, by the way, \$3 million appropriated in  
23 fiscal year 2016 to support the agreements, specifically  
24 habitat restoration. Because the agreements were not concluded  
25 or the legislation was not concluded, we just want to try to

1 make sure that the \$3 million actually does get spent on the  
2 habitat restoration efforts, so it would be helpful to keep  
3 moving the process forward as much as possible.

4 Mr. Connor: I believe that process will continue with  
5 additional funds that were made available from the reclamation  
6 with the spending plan. The upper basin agreement with the  
7 Klamath Tribes is still in effect, and there is some  
8 restoration activity that is contemplated as part of that  
9 agreement, and we want to carry forward with that.

10 Senator Merkley: Great. Thank you. Thank you for all  
11 your assistance on this, Michael.

12 Turning to coal leasing, I think it flies to the top of  
13 the chart for questions that you have been asked. It shows how  
14 much different Senators care about this from substantially  
15 diverse perspectives.

16 I certainly agreed with Senator Blunt when he was saying  
17 that we should be able to figure out the answer in a shorter  
18 period of time. To me, the answer is already obvious, but it  
19 is probably the opposite of what Senator Blunt might conclude.

20 Currently, we have, I believe, in terms of leases, already  
21 granted about a 20-year supply of coal already leased out for  
22 extraction. Am I in the ballpark on that?

23 Secretary Jewell: That is correct. It is 20 at current  
24 production rates, and production rates are declining, so it is  
25 likely more than 20.

1           Senator Merkley: So we have a tremendous supply that  
2 already has been leased. And we also know that when you do a  
3 new lease, that lease might be exploited for decades  
4 thereafter. So if we do a new lease now -- there are occasions  
5 where a lease has been exploited for 30, 40, even 50 years --  
6 we are essentially locking in a contract for many decades in  
7 the future. Am I still on track?

8           Secretary Jewell: That is correct.

9           Senator Merkley: So here is the thing, we are seeing the  
10 impact of burning fossil fuels all over Oregon from the growth  
11 of the pine beetle because winters are warmer and so damage to  
12 our forest.

13           We have three of the worst ever droughts in the last 15  
14 years in Klamath Basin, a huge impact on agricultural families.

15           The winter sports in the Cascades have declined as the  
16 snowpack has declined. The trout streams are getting smaller  
17 and warmer, which nobody who fishes likes to see smaller,  
18 warmer streams.

19           Our oysters on the coast are having trouble reproducing  
20 because the ocean is more acidic, 30 percent more acidic than  
21 before the Industrial Revolution. If that is not a canary in  
22 the coal mine, I do not know what it is.

23           So we have the knowledge, not just in some theoretical  
24 model in the future, but right now facts on the ground. We  
25 know there is extensive damage to our forestry, to our fishing,

1 to our farming, to our natural resources. And therefore, why  
2 would we possibly do a new lease locking in more extraction and  
3 combustion decades into the future?

4 So that is the conclusion I would come to. If the  
5 administration reaches the same conclusion, as you put it,  
6 before your time is up, I would love to see the coal leasing  
7 program ended.

8 Secretary Jewell: All right. Thank you.

9 Senator Merkley: Thank you.

10 Senator Murkowski: Senator Udall.

11

1 Senator Udall: Madam Chair, thank you very much.

2 Secretary Jewell, I am pleased to see that you have  
3 proposed a 9 percent increase for national parks, including  
4 major investments in construction and maintenance programs to  
5 address the estimated \$11.9 billion maintenance backlog at  
6 parks nationwide. It is mind-boggling, that number.

7 We have a particular issue with park maintenance in New  
8 Mexico I want to briefly raise. The public elevators at  
9 Carlsbad Caverns National Park have been out of service since  
10 early November, leaving visitors to hike in and out of the  
11 caverns if they want to visit.

12 Obviously, the lack of elevator service creates a problem  
13 for visitors who have accessibility issues as well as a problem  
14 for the general public.

15 I have had the chance to raise this issue with you  
16 personally. And you know how important it is to me for the  
17 Park Service to restore temporary elevator service at the park  
18 as possible and to come up with a plan to permanently upgrade  
19 the elevators. I appreciate you working with me on this to  
20 resolve this issue as quickly as possible and to ensure that  
21 the local communities know what to expect.

22 I also would like to thank you for your strong support of  
23 the Valles Caldera National Preserve during its recent  
24 transition to become part of the national park system. I am  
25 also pleased to note that you have included \$3.3 million in

1 your budget request to continue funding for the preserve into  
2 2017.

3 Now that you have visited, I know you will agree with me  
4 that the preserve is one of the crown jewels of the national  
5 park system. What makes it so special is not just a stunning  
6 landscape, however. There is recreation, hunting, fishing, and  
7 grazing at Valles Caldera. All those make it a vibrant park  
8 for New Mexico's community and for our local economies.

9 That is why I am concerned to hear that the Park Service  
10 is still weighing whether to continue traditional grazing  
11 permits on the preserve for this upcoming season. The law that  
12 transferred the Valles Caldera to the National Park Service  
13 allows these longstanding permits to remain in place while the  
14 Park Service develops its long-term management policies. These  
15 ranchers deserve to know now that they can count on their  
16 grazing permits for the season.

17 Can I have your commitment that you will work with me and  
18 other members of the congressional delegation who are also very  
19 concerned about this to resolve this issue quickly and avoid  
20 any further disruption to these traditional grazing permits?

21 Secretary Jewell: Certainly, Senator, we will be happy to  
22 engage directly with you. And the Park Service is well aware  
23 of the need to act fast on this.

24 I will say that there are some complexities, an endangered  
25 species, for example, that needs to be incorporated into their

1 planning process, and figuring out the market rates for  
2 appropriate grazing fees. But we are very happy to work with  
3 your office to keep the priority high for the Park Service.

4 Senator Udall: Thank you very much. I think on the  
5 endangered species issues, there are areas where there are not  
6 endangered species issues, and I think the park superintendent  
7 is very aware of those, and the local people on the ground.

8 Another issue related to the transition of the Valles  
9 Caldera is the importance of continuing a multiyear stewardship  
10 contract with the Jemez Pueblo. This project supports vital  
11 landscape restoration work and jobs for tribal members.

12 As you know, I worked to include \$1.5 million in the 2016  
13 omnibus to support forest restoration projects at new parks  
14 like Valles Caldera. Could you tell me what work you expect to  
15 accomplish this year with the funding we provided? Is funding  
16 included in your fiscal year 2017 budget to continue this  
17 effort?

18 Secretary Jewell: So the short answer is yes, funding is  
19 included. It is going to be used for thinning about 1,200  
20 acres of forest. As we are both aware, they had devastating  
21 forest fires, and that is really important. So that will  
22 continue.

23 Senator Udall: Great. Thank you very much for that  
24 response.

25 As you know, I am very supportive of the department's

1 efforts to develop new rules related to methane venting and  
2 flaring. New Mexico's natural resources provide jobs and  
3 royalty payments that are an important part of our State's  
4 economy, but outdated requirements are resulting in over \$100  
5 million worth of natural gas being wasted, which has cost my  
6 State \$43 million in lost royalties since 2009.

7 There is also a serious health component to this issue.

8 I understand that you are now in the public comment period  
9 on the methane venting and flaring rule. Could you give us a  
10 sense of the timeline for the final rule? What are some of the  
11 issues you are hearing from industry that you believe will be  
12 addressed in the final rule?

13 Secretary Jewell: At this point, the public comment  
14 period ends next month on April 8. So far, we have had two  
15 public listening sessions, one in Farmington, New Mexico, the  
16 other one in Oklahoma City. So, we will be taking input on all  
17 of those comments.

18 I cannot tell you what all of them are because we have not  
19 analyzed them yet. I am sure you are aware of what some of  
20 them are, in terms of cost and methodology and the importance  
21 of doing this. But once we have all of those comments in, we  
22 will be happy to analyze them and factor that into the  
23 rulemaking.

24 Senator Udall: Great, thank you very much.

25 I have a question here on coal, but that one is kind of

1 like beating a dead horse. Senator Wyden and I have a piece of  
2 legislation on that, and I think I will submit that one for the  
3 record.

4 I am very pleased that this subcommittee was able to  
5 provide an 85 percent increase for Indian school construction  
6 and improvements in the 2016 omnibus. That amount includes  
7 funds to finish the schools on the 2004 school construction  
8 priority list. It also provides a down payment to begin work  
9 on new schools that the Bureau of Indian Education (BIE) is in  
10 the process of selecting. I am glad that you were able to  
11 include another \$45 million for replacement school construction  
12 in your 2017 budget.

13 I know that BIE is currently considering applications for  
14 schools that want to be considered for the next round of  
15 funding. There are four schools in New Mexico that are  
16 currently competing for a place on the final list, and they are  
17 all very anxious to find out whether they will get selected.

18 In addition, this subcommittee needs to know how the funds  
19 in your budget will be used so that we can support your efforts  
20 during the appropriations process.

21 When do you expect to finalize your new school  
22 construction list? And what is your plan for providing the  
23 subcommittee with more detail on how year 2017 budget request  
24 will align with that list?

25 Secretary Jewell: The Indian Affairs team is hard at

1 work, and they are nearing finalizing the list. We narrowed  
2 the list down from many, many schools to 10 that submitted  
3 additional information. That has been received. It is being  
4 analyzed, and I would expect that sometime in the coming weeks  
5 to see the final version of the list for the new school  
6 construction.

7 There are also replacement buildings, which would be  
8 considered afterwards.

9 So we are very happy to provide you with information on  
10 how the funding would be used. We are happy to work with the  
11 committee and provide you with an inventory of that.

12 But as you pointed out, this is a much bigger issue than  
13 we have money in the budget to address. We can just begin to  
14 chip away at the list and work on stemming the increase in  
15 deferred maintenance.

16 But we need a longer-term solution, as happened with the  
17 Department of Defense schools, to really address this long-term  
18 systemic problem, which is afflicting fully a third of our  
19 schools that are considered in poor condition, including a  
20 bunch of them in your State.

21 Senator Udall: Thank you. I know you have a real passion  
22 for this.

23 Madam Chair, I see I am well over time here. I do not  
24 know whether we are doing another round or not.

25 Senator Murkowski: I have some more questions. We have

1 given our colleagues some latitude here so they can move on to  
2 other things, but if we can continue for a little bit longer,  
3 that would be great.

4 Madam Secretary, I want to go back to some of the lands  
5 issues. Again, something that has caused a level of concern is  
6 where we are in this big discussion about mitigation.

7 As you know, the President has issued this memorandum on  
8 mitigation, and then you have your Secretarial Order Number  
9 3330, again, I think causing more questions than resolving any  
10 issues.

11 As you know, just a couple years ago, as we were dealing  
12 with issues within the National Petroleum Reserve, the concern  
13 there was the metrics that were relied on to arrive at a \$8  
14 million cost for mitigation within the National Petroleum  
15 Reserve-Alaska (NPRA). BLM at that time had indicated, in  
16 terms of a real rigorous understanding in terms of how this  
17 impacted subsistence use, it seemed to so many that were  
18 observing that this was just kind of divined from different  
19 individuals, agencies, that had come to a point where it was,  
20 how much can we get? That is not a standard that I think  
21 anyone would suggest is reasonable.

22 But I think to the bigger question is whether or not there  
23 is authority to require mitigation for projects on public lands  
24 in the first place. When you move forward on natural resource  
25 development, responsible natural resource development by

1 definition includes reclamation of disturbed lands and our  
2 Federal laws require that reclamation then occur. Laws that  
3 govern multiple use on public lands do not have this mitigation  
4 requirement.

5 So a couple questions for you, with regards to mitigation.

6 I led a letter that went out just about a week ago with about  
7 18 other colleagues here in the Senate outlining a series of  
8 questions to DOI, to where we are with developing this program  
9 guidance not only for DOI but the relevant agencies that are  
10 involved.

11 So a couple questions on mitigation. Status update as to  
12 program guidance, really, again, to the bigger point is the  
13 authority that the department has to require mitigation for  
14 projects on public lands in the first place, and then the  
15 bigger problem and the considerations that we face in Alaska  
16 where you have multiple agencies that have seemingly different  
17 standards or different approach to mitigation. As a  
18 consequence of the lack of certainty at all, not being even  
19 able to begin a project, because whose standards are we going  
20 to be looking to?

21 So, probably a longer question that hopefully has a clear  
22 answer. But we have not gotten the guidance that we have asked  
23 for.

24 We are going to be having a hearing in the Energy and  
25 Natural Resources Committee on this within this month to

1 hopefully gain more clarity. But if you can give me a little  
2 bit of guidance here from your perspective.

3 Secretary Jewell: Let me do a high level and then I am  
4 going to turn it over to Mike Connor, who has worked on the  
5 details for me on this.

6 First, we believe that the individual, localized  
7 mitigation does not actually address sometimes the bigger issue  
8 that development has on the landscape. This is something that  
9 I looked at from day one.

10 When you have the fragmentation of habitat, when you have  
11 road networks and so on, there tend to be impacts to the  
12 landscape, the animal migration patterns, and so on, that are  
13 not necessarily contained within the footprint of that area.  
14 So we are looking at landscape-level mitigation, understanding  
15 what those impacts are.

16 Good examples of that, I would say, in the National  
17 Petroleum Reserve in Alaska, understanding the caribou calving  
18 grounds, understanding the oil and gas development potential,  
19 understanding that if there is offshore development, how do you  
20 move that. All of those things were factored in.

21 As a project gets done, there is now a greater  
22 understanding of what the impact will be. That is the whole  
23 concept of mitigation.

24 Senator Murkowski: Can I interrupt on that then? What  
25 you are describing then is it is going to be a case-by-case

1 determination. How can you give some level of certainty then  
2 to anybody who is looking to develop a project, whether it is  
3 oil and gas or whether it is a new runway or whether it is a  
4 driveway? How can there be any level of certainty and  
5 understanding?

6 Because what you described is, well, it is going to depend  
7 on what is happening with the landscape around it. Every  
8 landscape is going to be different.

9 Secretary Jewell: The intent is to bring certainty.  
10 Another example, the Desert Renewable Energy Conservation Plan,  
11 what are the areas that are set aside for development? What are  
12 the areas critical to conserve?

13 So as this gets developed, the mitigation would be used on  
14 the area that is highest priority for conservation, not  
15 necessarily on that footprint. So that is the overall intent,  
16 to bring greater certainty, not less.

17 I am going to turn it over to Mike for the specifics on  
18 what he is working on.

19 Mr. Connor: I think I would just continue along the lines  
20 with the view that the President's memo I think gets to the  
21 point that you are trying to have us do, which is having more  
22 consistency across the agencies in developing our mitigation  
23 criteria and not doing it project-by-project, by doing these  
24 planning efforts, which I do think have demonstrated that they  
25 do facilitate permitting processes because they need to add

1 more certainty as we work with companies.

2 A perfect example is the Western Solar Plan and the Solar  
3 Energy Zones that we did in Dry Lake in Nevada. We identified  
4 the corridors of development, the appropriate mitigation  
5 standards, that should apply there. We worked with companies  
6 taking environmental analysis that used to take 18 to 24 months  
7 and taking it down to 6 months to complete those environmental  
8 analyses.

9 I think the NPRA is a situation I am particularly familiar  
10 with having been involved in the discussions with  
11 ConocoPhillips. The mitigation was not pie-in-the-sky what can  
12 we get. It was very specifically related to the intrusion on  
13 the Fish Creek barrier. That was the issue that we were  
14 discussing with ConocoPhillips. We talked about specific ways  
15 to compensate for that. We had a disagreement about  
16 methodology.

17 Quite frankly, we all agreed that here was the range of  
18 dollar figures that we were talking about to compensate for  
19 that particular intrusion, and it could best be applied toward  
20 developing a regional mitigation plan with the affected  
21 communities, including the Alaskan Native communities. That is  
22 the process that is ongoing right now, which should add greater  
23 clarity to further developments in the NPRA, quite frankly.

24 Senator Murkowski: I think what you established there is  
25 a precedent that basically says, if you want to operate within

1 this area, you are going to pay, not mitigation -- it is not  
2 being viewed as mitigation by those who are looking -- a  
3 penalty. And I think we would differ mightily in terms of the  
4 specific project with Conoco and whether or not that \$8 million  
5 that was ultimately arrived at or settled upon was where it was  
6 started. I think we recognize that was not where the  
7 conversation started. It was being used more as a bargaining  
8 tool for Conoco to be able to move forward.

9 So, again, we have a letter out there that we are looking  
10 for concrete answers on, and we will have an opportunity to  
11 have this before us in the Energy Committee to get a better  
12 understanding.

13 But I think this is a concern that, again, we are not  
14 talking just about development of oil and gas opportunities in  
15 my State or in others. It is the opportunity to advance any  
16 kind of a project, whether it might be an area for school or  
17 runway or what have you.

18 I want to recognize that Senator Udall will have more  
19 questions, too, but let me follow on to a couple comments that  
20 were made by Senator Udall in his opening, and by Senator  
21 Feinstein.

22 She was talking about abandoned mines, developing  
23 potential for an inventory. As you all know, legacy wells,  
24 which is horribly, horribly misnamed, these are these abandoned  
25 oil and gas wells in Alaska that were drilled by the government

1 and then just left in varying states of disrepair. We have  
2 been making some progress. We have identified the universe  
3 there in terms of the cleanup.

4 To Senator Feinstein's point, when she talks about an  
5 inventory, I think we have established at least in Alaska,  
6 okay, you identify what it is that you have, now you have to  
7 prioritize how we are going to be spending the money. We were  
8 successful in getting \$50 million, with helium funding last  
9 year.

10 I appreciate the fact that we have a path, an action spend  
11 plan, for that \$50 million. But my concern is that there is  
12 still going to be a significant number of wells that will need  
13 to be attended to when that fund is exhausted.

14 Now you have included \$3.8 million in this budget for next  
15 year. I understand that this is a budget for this year. But  
16 what we are still hoping to get is an understanding as to how  
17 we intend to deal with all of the Federal Government's  
18 obligations to clean up these wells up on the North Slope.  
19 Because if you are suggesting that it is \$3.8 million this  
20 year, and perhaps a like amount next year, I do not know what  
21 your calculations are, but I am told we are looking at 30, 40  
22 years to clean up these wells, if that is the case.

23 Do you have an estimate of the likely cost to finish this  
24 environmental cleanup project, in both money and time?

25 Secretary Jewell: I will give you the information I do

1 have, and we will get back to you on the record for what I do  
2 not have.

3       There are 136 wells, these legacy wells. Fifty were  
4 identified in 2013 as requiring remediation.

5       Senator Murkowski: I want to make sure that we are both  
6 clear on that, because I have heard that there is some  
7 disagreement still between the State and Interior in terms of  
8 whether or not some of these wells require that level of  
9 remediation. So I understand what you are saying, Secretary,  
10 and I do not dispute that, but I want to make sure that we are  
11 in alignment between State and Feds on what the responsibility  
12 is.

13       Secretary Jewell: Okay. I am not aware of that dispute,  
14 but I will say, because of the work that you did with the  
15 helium fund, that we will have 29 left requiring work at the  
16 end of 2016. We will have three to five wells that we can do  
17 with what is in the budget for 2017. It is called the Wolf  
18 Creek cluster. I think because they are together, we will be  
19 able to address that.

20       That still will leave somewhere on the order of mid-20s  
21 that need to be cleaned up. What I do not have is the  
22 estimated cost to do that or the amount of time it would take.

23       Of course, we would welcome the opportunity to work with  
24 you on a more permanent funding solution for this, just as we  
25 would on abandoned mines, just as we would on school

1 construction. It is very difficult putting small amounts of  
2 money toward a program each year that is much larger than what  
3 we can address in the regular budget cycle.

4 Senator Murkowski: Understood. Absolutely. But I think  
5 this is one of those glaring examples where our Federal  
6 Government is just in the spotlight being absolutely  
7 hypocritical when it comes to environmental standards. When it  
8 is the government that has drilled it, the government that has  
9 walked away, the government acknowledges that we left a mess,  
10 and yet we cannot prioritize that.

11 I think part of the problem is unlike perhaps abandoned  
12 mines in California where you have a lot of people who are  
13 wandering around and hiking, the North Slope is a long way  
14 away, and there are not that many people on that North Slope.

15 But you and I both agree that we have a responsibility to  
16 that land. We have a responsibility to those subsistence  
17 hunters and fishers up there who are worried about the  
18 contamination. And our Federal Government left a mess, and  
19 they have an obligation.

20 So know that I am going to continue my push on this, and  
21 we need to be working together.

22 I also want to raise, and then I am going to turn to my  
23 colleague, the contaminated lands issues, these lands that have  
24 been conveyed to Alaskan Natives under the Alaska Native Claims  
25 Settlement Act separate and above from the legacy wells were

1 the Federal Government drilled.

2 Here we have a situation where lands have been conveyed  
3 that were contaminated. These are Native lands, again, given  
4 to Natives as part of a settlement.

5 So, what we have done on this is there has been an  
6 inventory. We have asked that inventory be updated. At the  
7 budget hearing last year, you said the survey was nearing  
8 completion that year, and that it would be soon released.

9 We are still sitting here a year later. It still is not  
10 public. I am told by BLM officials that it will be soon. But  
11 we were told it was going to be last year.

12 So assuming that this inventory is completed and publicly  
13 available, what I would like to have is an assurance that,  
14 along with legacy wells, there is going to be an action plan  
15 from the Department of the Interior to accelerate the cleanup  
16 of contamination on Native lands, either that the BIA, the BLM,  
17 the Fish and Wildlife, National Park Service, or Bureau of  
18 Mines actually caused.

19 And then to know that there is going to be some level of  
20 coordination in terms of how we are going to clean this up,  
21 because there are other Federal agencies, as you know, that  
22 have responsibilities, whether it is DOD or FAA.

23 But trying to understand how we are going to meet our  
24 Federal responsibility for this cleanup is something that we  
25 are going to continue to knock on your door, bang on the drum,

1 raise our voices, because it is a responsibility that we have.

2 So can you give me any updates on when we might see the  
3 inventory, the updated inventory?

4 Secretary Jewell: The information that I have says next  
5 month. That is the best I can do. I do not know why it has  
6 taken so long, but that is the best information I have at this  
7 point.

8 Senator Murkowski: And that will be made public?

9 Secretary Jewell: I do not know.  
10 Do you know?

11 Ms. Sarri: I will get back to you on that one after I  
12 talk to BLM a little bit more about it.

13 [The information follows:]

14 **INSERT INFORMATION ABOUT UPDATED INVENTORY OF**  
15 **CONTAMINATED NATIVE LANDS AND WILL IT BE MADE**  
16 **PUBLIC**

17 Senator Murkowski: Okay, again, the inventory, the first  
18 inventory was completed at the request of my father in the  
19 1990s. It had a timeline to be renewed and updated and  
20 prioritized. So "soon" has now turned into almost a decade.

21 It is not just this administration's fault. We need to  
22 get on it. So if for some reason it is not going to be  
23 released next month, I would certainly appreciate a very  
24 detailed explanation as to why it is not, because you can count  
25 on me to continue to make a big stink about this.

1 Senator Udall.

2 Senator Udall: Thank you, Madam Chair.

3 Secretary Jewell, an issue of serious importance for  
4 tribes in New Mexico is the repatriation of sacred objects back  
5 to the tribes.

6 First, I want to applaud your recent efforts to work with  
7 French authorities to seek cooperation in these efforts. As  
8 you know, these items are not pieces of art to be sold. They  
9 are sacred objects that are deeply important for tribal  
10 identity. What's more, it is illegal to traffic these items  
11 within the United States.

12 I think we need to be doing more to crack down on the  
13 sales of these priceless cultural objects. One idea I have  
14 heard from the Pueblo of Acoma is to establish an antiquities  
15 unit within the BIA to investigate these kinds of cases.

16 I want to work with you to ensure that BIA and other  
17 bureaus within the department have the ability to put a stop to  
18 these illegal trafficking efforts.

19 Can you elaborate on the work of the department in terms  
20 of bringing awareness to this issue and preventing tribal  
21 objects from being trafficked? And are there specialized law  
22 enforcement resources within the department able to handle  
23 these repatriation cases?

24 Secretary Jewell: Senator, this is a significant issue.  
25 When I was in Paris as part of the climate talks, I met with

1 the Minister of Justice for France, and I also met with the  
2 individual that administers the auction houses in France.

3 They typically produce a catalog with a number of these  
4 items that are exactly as you described. They are not works of  
5 art. They are critical artifacts that were removed from the  
6 tribes for whatever means many, many decades ago and have been  
7 circulating in the art market. They do not provide sufficient  
8 time for the tribes to even know they are there, let alone take  
9 the kind of action that the French authorities say that they  
10 need.

11 So I was met with a very sympathetic voice in the Minister  
12 of Justice. Unfortunately, she just quit, so we will have to  
13 start over again with the next minister.

14 I do think that there was a path forward that we learned  
15 about, about the repatriation of articles taken in Nazi Germany  
16 from families at that time. That may be a path that we can  
17 use.

18 So on the international market, I would say that the State  
19 Department is a critical ally in this effort. They have the  
20 people that work the legal systems there. I would say that to  
21 dedicate someone from BIA's law enforcement to this is  
22 something that would have to come out of another area of BIA's  
23 law enforcement, so it is a trade-off, given the law  
24 enforcement challenges we have in Indian country.

25 But I do think the BLM has some capabilities in this area.

1 I know the State Department, Interpol, the international  
2 organizations do. So it is on our agenda to raise awareness  
3 internationally to see if we can actually address this.

4 I will also say we are not without fault. Our auction  
5 houses in New York City, for example, do trade in artifacts.  
6 And they may be those that are inappropriate to trade, and then  
7 we do not find out about it until late.

8 So this is very, very important. And the New Mexico  
9 tribes are quite active in this, but so are the Alaska tribes  
10 as well. It is important. And thanks for raising visibility.

11 Senator Udall: Thank you for your efforts on that.

12 As you know, we have had extensive discussions, and I know  
13 the chairman has also been involved, on this reorganization of  
14 the Bureau of Indian Education. And I understand the  
15 department is now moving forward with the first phase of  
16 proposed reorganization of the BIE, including the establishment  
17 of new educational resource centers that your 2017 budget  
18 anticipates additional changes to the bureau.

19 This subcommittee supports your efforts to improve  
20 education for Native students, and we recognize that you are  
21 tackling some of the very tough issues as you overall the  
22 bureau. But I want to make sure that the reorganization is  
23 done right and actually leads to concrete improvements in the  
24 classroom.

25 I also want to make sure stakeholders at all levels, from

1 tribal governments to educators and parents, understand clearly  
2 what to expect from these changes. As part of the first phase  
3 of the reorganization you have proposed a number of staffing  
4 changes, including changes to the regional office in  
5 Albuquerque to create these new centers to assist BIE and  
6 tribally controlled schools.

7 What is your timeline for staffing up these centers? And  
8 what services can schools expect to receive starting in the  
9 fall? And what is your plan to ensure that all stakeholders,  
10 including BIE employees whose jobs may be affected, know what  
11 to expect during the reorganization?

12 There are other questions there that I will submit for the  
13 record, but I want to get an answer from you on those.

14 Secretary Jewell: Okay, I am happy to give you a quick  
15 update. I will also say that taking on reorganization of  
16 something as storied, and not necessarily in a good way, as the  
17 BIE is, from a business person's perspective, unbelievably  
18 difficult over a multiyear period of time and extraordinarily  
19 difficult in the time frame I have left.

20 So, the goal is to set a path forward so that we continue  
21 to make progress on Indian education reform. It is not all  
22 going to be done in 1 year.

23 We have had multiple meetings with all employees. Those  
24 were held in February, outlined the whole process. On February  
25 22, so just a week or so ago, we announced 65 vacancy

1 announcements across the BIE. Some of them are vacant. Some  
2 are new positions. People will reapply. Those positions will  
3 close on March 11, and we will begin filling the jobs in April.  
4 So, it is really a fast timeline.

5 I would say what you will see in terms of near-term  
6 improvements, we have been working now for more than a year on  
7 professional development of teachers aligned with Common Core.  
8 We have been providing training for effective school boards,  
9 financial accountability training for school leadership, and  
10 then training for certain tribes that have wanted alternative  
11 accountability standards like the Miccosukee and Navajo.

12 So, there is a lot of work going on. I personally met  
13 with leadership of the BIE to see how it is going. We have a  
14 lot of work to do, but I would say that people understand the  
15 importance of this. People are now a bit more reassured that  
16 all their jobs are not in jeopardy. And we are working toward  
17 a common end, which is better education for these students and  
18 better self-determination in education by tribal communities  
19 that want to take control of the schools.

20 So we continue to have an open door to any suggestions  
21 that you have in this regard, but we are well on our way.

22 Senator Udall: Thank you very much, and thank you for  
23 your hard work on that.

24 Since Senator Murkowski mentioned her father, just as a  
25 closing comment here, when we were talking about the Land and

1 Water Conservation Fund, and Senator Tester asked a question,  
2 as you know, my father worked in the 1960s when he was  
3 Secretary of Interior to start the Land and Water Conservation  
4 Fund. He worked with Congress. He went down and I believe met  
5 with a Congressman by the name of Wilbur Mills from Arkansas,  
6 and they came up with idea of taking offshore oil and gas,  
7 knowing that these resources are limited, taking some of it and  
8 dedicating it to permanent protection of land.

9 The original idea I think came from a national commission,  
10 a blue ribbon panel, an incredible panel headed I think by  
11 Lawrence Rockefeller and others that said, what do we need to  
12 do in terms of parks? The suggestion was from this commission  
13 -- these were people outside of politics -- you should spend \$1  
14 billion a year and everybody should know you are going to spend  
15 that and split it up between the State program, as you talked  
16 about, and the Federal program. And the reason you do that is  
17 everybody can plan. All these city councils and States and  
18 Federal Government and its agencies can all plan and look to  
19 see that money is there.

20 As Senator Tester pointed out, we have now reached the  
21 point where we have authorized it at that level. The money is  
22 over there in the fund. But somehow we do not dedicate the  
23 resources there.

24 So we are all trying to figure out how we got to this  
25 place. I know President Obama and you have encouraged us now

1 to move forward.

2 I thank very much, Senator Murkowski, for working with me  
3 on the increase that happened in Land and Water Conservation  
4 Fund. That was a good step. But we are not anywhere near  
5 where we need to be in terms of the original idea behind the  
6 Land and Water Conservation Fund.

7 But thank you very much. I know she was trying to get out  
8 of here. We are running over here a little bit.

9 Senator Murkowski: Thank you, Senator Udall.

10 Yet one more reason why this energy bill is a good energy  
11 bill that we are going to try to get moved through the Senate,  
12 because we do have the LWCF piece in there that allows for  
13 permanent reauthorization. But it does have some reforms in  
14 terms of reminding us of the significance of State-side LWCF at  
15 the same time we have Federal.

16 Secretary, I know that you have to go. I have just a  
17 couple more just really quick and hopefully your answers will  
18 be yes and no, too.

19 I mentioned the land conveyance and reductions that we  
20 have seen in the budget, 20 percent reduction from last year.  
21 I have raised the issue of the methodology for the survey.  
22 There is a peer-review that is going on. BLM has agreed to  
23 that.

24 Can you commit to me that BLM will not act unilaterally to  
25 implement their preferred method of survey, if the State of

1 Alaska formally objects, once that peer-reviewed process is  
2 complete? I just want to know that the State has been heard on  
3 this.

4 Secretary Jewell: We absolutely are working closely with  
5 the State. I hope it does not come down to a veto of what we  
6 want to do. We are working now with the National Society of  
7 Professional Surveyors at the State's request.

8 Senator Murkowski: Yes.

9 Secretary Jewell: We are providing them with all the  
10 needed information. I think it is our collective hope that  
11 they will come to a meeting of the minds, and it does not come  
12 down to the State saying this is not acceptable. I hope they  
13 can find something that both agree is acceptable.

14 Senator Murkowski: We are going through that peer review  
15 process, so I think that is important.

16 I will submit for the record several questions, one on  
17 tribal courts. We were successful in getting funding for  
18 Public Law 280 States for the first time last year in the  
19 amount of \$10 million. The President's request cuts this by \$8  
20 million. I am not sure why, but I am very concerned about  
21 that.

22 We just sent a letter to you, the Alaska delegation, on  
23 the USGS earthquake program. I mentioned that to you. But  
24 what I would like to know is that any future summits or  
25 meetings that you are conducting regarding earthquake

1 preparedness at least include Alaska, but also that the  
2 earthquake monitoring cost-benefit study that is out there,  
3 that we will see the status of what that report is. If you can  
4 let me know when we might see some of the findings.

5 The last thing, just quickly -- I am sorry -- the bottle  
6 ban on bottled water in parks, not the ban but giving parks the  
7 option to eliminate the sale of bottled water on a park-by-  
8 park-basis, we have asked for a report within the omnibus about  
9 the justification for making this determination. The report  
10 was due February 16. We have not gotten it. I would hope that  
11 you can let us know when you are expecting that report.

12 I still have some hardship. We can sell bottled sugar  
13 water pop in the parks, but we cannot sell good glacier water.  
14 In fact, this is not a prop. We are actually drinking Alaskan  
15 Glacier water here at the committee.

16 But I was contacted by the COO of Alaska Glacier Products.  
17 He says that he is worried that he is not going to be able to  
18 sell his Alaska product in the Alaska park units. This  
19 concerns me.

20 I do not know whether or not, for instance, Denali is  
21 opting not to sell bottled water.

22 But again, I understand we are trying to eliminate the  
23 waste, but you are still allowing the waste from pop in our  
24 parks as well. And not everybody every parent is able to bring  
25 or remembers to bring water bottles that we want them to do.

1           The last thing that I am going to raise with you, and  
2 everything else is going for the record, is where we are on  
3 Alaskan mapping, the Alaska Mapping Initiative, improving our  
4 topo maps for the State.

5           I was present at a celebration in Alaska last summer where  
6 we celebrated 55 percent completion of mapping the State.  
7 Where else in America would you celebrate being just a little  
8 over halfway?

9           So we have a way to go on this. I remain concerned that,  
10 once again, as we look at our priorities that our mapping, not  
11 only terrestrial mapping but in our waters, is something that  
12 we are woefully behind.

13           So I have much more that I will submit to you all, and we  
14 would hope for timely responses. But I appreciate you being  
15 here before the committee, and I apologize that the committee  
16 has gone over time.

17           Thank you for your indulgence, and we look forward to your  
18 responses. Thank you very much.

19           Secretary Jewell: Can I just say that I actually do have  
20 a response on the mapping.

21           Senator Murkowski: Yes, please. Go ahead.

22           Secretary Jewell: We were at 63 percent at the end of  
23 last year. By the end of 2017, we will be 70 percent complete.  
24 We should be fully complete by 2020.

25           I do have personal vested interest. My son actually is a

1 critical care flight nurse and does medevac flights.

2 Senator Murkowski: He knows.

3 Secretary Jewell: He knows. He does that in Alaska as  
4 well. So, we share the concern and also share the urgency of  
5 why this is so important for the State of Alaska.

6 Thank you both very much. This is a little different in  
7 terms of tenor and tone than the session that I was at  
8 yesterday. I do appreciate the constructive nature and also  
9 the flexibility with which you ran the agenda to allow me time  
10 to answer after time had expired. So thank you both very much,  
11 and we look forward to working with you.

12 Senator Murkowski: Thank you.

13

1                                    ADDITIONAL COMMITTEE QUESTIONS

2            [The following questions were not asked at the hearing,  
3 but were submitted to the Department for response subsequent to  
4 the hearing:]

5

**From:** Fannesbeck, Leif (Appropriations)  
**To:** [Hall, Tricia](#); [Denise Flanagan \(Denise.Flanagan@ios.doi.gov\)](mailto:Denise.Flanagan@ios.doi.gov)  
**Subject:** QFR's  
**Date:** Thursday, March 31, 2016 1:17:33 PM  
**Attachments:** [QFRs.docx](#)

---

I've attached the QFR's from our hearing on March 2<sup>nd</sup>. Sorry for the delay.

## Questions from Chairman Murkowski

1. Last year the Alaskan Village of Council Presidents (AVCP) was selected to participate in the Tiwahe demonstration project and has received approximately \$986,000 in base and Tiwahe funding. For those of you not familiar with the AVCP, it is a consortium of 56 Alaska Native villages in western Alaska. The villages are remote and somewhat isolated over a 59,000 square mile area with a population of approximately 25,000. All travel to and from the villages is by small plane or boat. The AVCP administers programs, fund projects, and provides social services to the villages.

The Tiwahe initiative is a 5- year pilot program that aims to help tribes develop a comprehensive approach for the delivery of services to communities through partnerships with the tribe, local communities and the state and federal government. The overall goals and objectives are, to improve screening and access to family and social services, to create alternatives to incarceration via solution focused sentencing, improving links to appropriate prevention, intervention and treatment opportunities.

- a. I understand this is a 5 year pilot program, but I am interested in hearing more about how the program is structured for each tribe and how the funding for each pilot site is determined. Would you briefly explain how the sites are selected, how the pilot is designed, and how the funding is determined and delivered?
  - b. The President's proposal for the initiative is \$21 million over FY16 enacted levels. What is the plan for this increase? Would you seek to expand the pilot to additional sites in Alaska and elsewhere?
2. ANILCA is perhaps the largest conservation contribution in the world's history and certainly the nation's. Alaska has more Conservation System Units (CSUs) than the entire nation combined, yet we continue to see more and more land taken off the table for development. Land planning in Alaska is managed in a tenuous and never-ending process that specifically ignores ANILCA. The process results in outcomes that do not favor development. In addition, few people have the time, energy, and expertise to participate in these plans. For example: Bering Sea/Western Interior RMP contained 56 maps, 1,200 pages, and 63GB of data. Furthermore, this plan and similar plans exclude multiple- use through ACECs, RNAs, and other proposed closures. What is being done to ensure the balance for conservation and economic opportunity intended by ANILCA is considered for future land management plans?

3. As you know, once covering 160 million acres, the Public Land Orders (PLOs) were put in place after 1971 to guarantee that Alaska Natives could select their ANCSA selections. The Department's own report in 2004 said there was no need for any more than 6.7 million acres to still be encumbered and that number has since been further reduced over the past dozen years with the completion of revised Bureau of Land Management plans. Moreover, Natives have now filed all their selections.
  - a. Please provide specifically what actions your agency is taking to actively lift the remaining Public Land Orders (PLOs) reserving lands throughout the State of Alaska.
  - b. I would like your commitment to lift all the remaining PLOs as soon as possible, and please provide a timeline by which you commit to abide.
4. On February 4, I sent you a letter with Chairman Cochran, Chairman Rogers, and Subcommittee Chairman Calvert regarding the Office of Surface Mining's Stream Buffer Zone Rule. The letter related to the directive in the fiscal year 2016 omnibus that required the Office of Surface Mining to provide States with information they requested related to the Stream Buffer Zone Rule, as well as to meet with States at their request.

I am extremely concerned about the manner in which this rule has been written primarily because 9 out of 10 of the States who entered the process as cooperating agencies decided to withdraw from the process because of a lack of meaningful consultation with OSM. This directive was meant to reverse course and ensure that OSM moves forward in a more cooperative manner.

Shortly after my letter was sent, the State of Alaska sent the Department a letter related to the requirement that OSM provide states with relevant reports, data and analyses. As an initial step, the State of Alaska requested that OSM provide a summary of the documents. The letter indicated that Alaska would then request a subset of those documents and eventually, request a meeting with OSM.

- a. Have you provided the State of Alaska with the summary of documents they requested? If not, when do you anticipate that such information will be provided?
  - b. In a recent budget hearing in the Senate Energy Committee, Deputy Director Connor said the documents specified in the report language would be ready for the states in a few weeks. What is your plan for meeting with states after they have had time to review the information you are required to provide them?
  - c. Additionally, can you share the timing and process you envision for moving forward with the stream buffer zone rule? Given that the states will presumably be raising a number of new issues based on the information they receive in the technical documents, will you reopen the comment period so that the public has the opportunity to comment on that information as well?
5. Within the Fish and Wildlife Service's Ecological Services budget, and specifically within

the Endangered Species Listing program, the Department has proposed shifting a sizeable portion of the budget from "critical habitat designations" to "petitions." I am concerned about this shift because I am still hearing concerns from members who opposed the Department's decision to enter into a multi-species settlement agreement in 2011.

I have heard from members that this effort, which required the Service to make listing determinations on more than 250 species was done without consultation of local governments or communities that are impacted by that settlement agreement. With the actions required in that settlement agreement coming to an end in 2016, I am concerned that the Service will see fit to enter into another similar agreement.

How can I be certain that, if we decide to shift money from critical habitat designations to petitions, the Service will not be inclined to enter into a similar, closed-door settlement agreement?

6. I have been concerned with the Department's actions related to the polar bear for a number of years. I disagree with the 2008 listing determination and vehemently disagree with the designation of more than 187,000 square miles of land "an area larger than the state of California" as "critical habitat" for polar bears. When combined with the other hostile actions undertaken by the Administration when it comes to developing our public lands, the listing and designation has the potential to devastate our State's economy.

My concern has long been that the Department based its listing decision more on the expectation that climate change would decrease polar bear habitat and stocks in the future, than on fact that stocks are currently in decline. I have seen no data to show that polar bear stocks currently are in significant decline across northern Alaska (the issue of potential Russian poaching aside) and thus, the species does not warrant protections under the Endangered Species Act.

Has the Department undertaken any recent efforts to consider new science related to polar bears in an effort to determine whether the species should be listed under the Endangered Species Act? If so, please provide me with the studies that you have considered. If not, please share with me the reason for not moving forward and whether there is a plan for moving forward.

7. The Fish and Wildlife Service has requested the authority to seek compensation from responsible parties who damage or destroy National Wildlife Refuge System or other Service resources. This legislative language has been circulating for a number of years. In 2014, a hearing was held in the Environment and Public Works Committee a bill that was introduced by Senator Cardin. My understanding is that no legislation has been introduced in the current Congress and the Environment and Public Works Committee has not taken action on the matter.
  - a. Why has the Department only requested this authority for the Fish and Wildlife Service? I understand the National Park Service has similar authority already, but the Bureau of Land Management does not. Is there a reason that the request was made only

for the Fish and Wildlife Service?

- b. I have heard concerns that providing this authority will lead to additional prosecutions of individual because the Service will be incentivized by the prospect of additional revenue. What can you do to assure me that this will not happen?
8. The FY2016 Omnibus Appropriations bill contained a substantial increase for LWCF. The total discretionary appropriation was \$450 million, an increase of \$50 million over the President's FY2016 discretionary total and \$144 million over the FY2015 enacted level of \$306 million. Congress was able to fund the President's proposed discretionary funding lists and increase the NPS state side program to \$110 million. Given the funding pressures for the Interior bill this year it will be hard to meet the FY2016 appropriated level; therefore, we need to carefully look at the projects the President has proposed in his budget submission to make sure they have been fully vetted and are ready to go.

The explanatory statement on the FY2016 Omnibus stated that many of the projects the Administration has proposed over the years lack sufficient information, and that requested projects should have identified properties, willing sellers, updated appraisals or market information, and the support of Federal, State, and local officials.

Have all of the projects submitted in the FY2017 budget met all of these conditions?

9. The explanatory statement also expressed that the agencies should include the feasibility of phasing projects as well as a description of which parcels are being considered for conservation easements or fee simple acquisition.

Discuss compliance with this guidance. What number or percent of the requested projects were identified as able to be accomplished in phases? What number or percent of the projects were identified as acquisitions for conservation easements versus fee simple acquisitions?

10. The explanatory statement also included language to increase the transparency of the project selection and prioritization processes in the annual budget requests, particularly in regard to collaborative landscape projects. Over the years, there has been concern among many in the community and here in Congress about how the Administration picks projects for the discretionary and mandatory lists. It appears that many of the projects have been geared toward the Western US and that geographic distribution of funds has not been a factor in your project selection. Typically Congress has funded the proposed lists in the order requested; however, with questions about the quality of projects and the process used to select projects Congress may need to revisit this approach.

Given these questions about quality and process: What process does the Department use to compile the project lists, including for identifying collaborative areas? What considerations does the Department take into account when selecting and prioritizing projects? What is the geographic distribution of requested funds?

11. According to the EPA, methane emissions from hydraulic fracturing at natural gas wells is down 83% since 2011 and total methane emissions from natural gas production are down 38% since 2005.
  - a. Is natural gas a key component of GHG reductions?
  - b. Does the use of natural gas help drive down GHG emissions?
  - c. Does the administration want to see U.S. natural gas production continue to help bring down GHG emissions?
  
12. Over the course of the U.S. energy boom, according to the Energy Information Administration, marketed natural gas production has increased by 35 percent, over the nine-year period from 2005 to 2013, from about 19 trillion cubic feet of gas per year to about 25 and a half trillion cubic feet of gas per year. Over this same period, EPA data show that methane emissions from hydraulically fractured natural gas wells decreased by about 80 percent, emissions from natural gas production decreased by about 38 percent and total methane emissions decreased by about 11 percent.
  - a. In view of this information, and in view of EPA's continued efforts to reduce methane emissions from industry sources, why has the BLM, under your authority, chosen to promulgate its own methane regulations?
  - b. Related to this question, can you describe the consultation that the BLM has undertaken with EPA, and with the state regulatory agencies with Clean Air Act authority in the states with operations on BLM lands?
  
13. Over the last few years the U.S. has undergone an energy renaissance which has created thousands of new well-paying jobs, made the U.S. more energy secure and less reliant on evil powers across the globe as well as make U.S. energy more affordable – just look at the cost of gasoline today – all while methane and GHG emissions have dramatically declined. During this same time BLM's permitting process continues to lag which is not only a lost opportunity for the benefits I just described, but also to the detriment of potential revenues to the Federal Treasury and the states. Additionally, the BLM has put out a number of regulations and proposals including the Hydraulic Fracturing, updates to Onshore Orders 3, 4, and 5, and the proposed venting and flaring rule. Each of these, separately and combined, could have real effects on U.S. energy production, jobs, revenues, etc. If the goal of the Climate Action plan is to decrease GHG emissions, does it make sense to propose a suite of regulations that will shut down U.S. natural gas production?
  
14. For several years, the EPA has been working on the development of new requirements for compliance with elements of the Clean Air Act for oil and gas production operations. The process of developing new regulations for emissions from new sources has involved - indeed required - highly technical discussions, and has been characterized by regular opportunities for substantive discussion between EPA and the regulated industry. Why is the BLM undertaking its own separate rulemaking process?

- a. Did the BLM work with the EPA to make sure the two packages were not in conflict with one another? If so, why are there many examples of the two rules differing or the BLM requiring something the EPA determined was not necessary or cost prohibitive?

For example: BLM's inclusion of liquids unloading requirements when EPA has determined there is not a single cost-effective method that can address this source. Additionally, there are differences between survey frequency based on number of leaks (BLM) versus percent of components (EPA).

15. What assurance do we have that the two agencies' efforts can be coordinated such that BLM's rulemaking will be informed by the EPA effort so that regulatory conflict is avoided?
16. How do these rules interact with the state's own efforts on methane? What consideration did you give the state programs? Is there a scenario where projects will need to comply with a state methane program and regime, a different BLM methane program and regime and a different EPA methane program and regime? Is that necessary and reasonable?
17. How does the cost-benefit analysis hold up when there are a lot of legacy producing wells that would cost more to comply with these proposals than the energy that is produced which would then result in production being shut-in? Would this mean that DOI loses in royalty revenue?
18. In January, a magnitude 7.1 earthquake hit Alaska. Though a handful of families lost their homes, damage was limited because the earthquake occurred away from populated areas. Alaska's history demonstrates clearly, however, that we are not always so fortunate.
  - a. In 2000, congress authorized the Advanced National Seismic System to "establish and maintain an advanced infrastructure for seismic monitoring throughout the United States that operates with high performance standards" "A decade and a half later, many of the baseline performance standards set by this program have not been achieved in Alaska. As other states with high earthquake hazard move on to advanced technologies, such as earthquake early warning, what is the Department doing to make sure Alaska has access to the instrumentation, technology, and funding needed to expand and modernize the seismic infrastructure?
  - b. Language was included in the FY16 omnibus for USGS to conduct a cost benefit study related to earthquake monitoring for Alaska. Please tell me what the status of that report is and when we may be able to expect to see some of the findings?
  - c. President Obama's 2013 arctic strategy document emphasizes cooperative efforts with the State of Alaska to respond to natural and man-made disasters. In the last two years there have been significant swarms of earthquakes in the Bering Sea, Northwest Alaska and the Arctic National Wildlife Refuge. How does the Department intend to engage with the State of Alaska to develop earthquake mitigation strategies for the Arctic region?

19. The President's proposal includes an increase of \$8.8 million for USGS activities related to the Arctic.
- Could you provide more detail on the Department's Arctic priorities, particularly as they relate to the Administration's Implementation Plan for its National Strategy for the Arctic Region?
  - Also, can you provide specific details about the type of research and activities that would be conducted if this funding were approved? For example, will these activities improve our understanding of the continental shelf offshore Alaska's north coast?
  - Will the research improve our understanding of the resource potential for new oil and gas discoveries, as well help us understand how to minimize the risks of utilizing those resources?
20. The federal government and the state are joint partners in the Alaska Mapping Initiative, with the goal of improving the topographic maps for the state. Some of the maps are over 50 years old and vital to aviation safety, land use planning, and research. The President's FY2017 budget proposes to increase funding for this program by \$1.5 million.
- If the President's proposed increase of \$1.5 million is included in the FY2017 appropriations bill, that would bring this initiative to a total program funding level of \$6.7 million. At that rate, how long would it take to complete the maps?
  - What percentage of the state now has updated maps and what areas pose the most challenges for mapping?
  - Will these maps be available in digital form and how accurate will they be compared to topographic maps in the Lower 48?
21. The United States Geological Survey operates the Alaska Volcano Observatory, a joint entity with the University of Alaska. USGS operates five such observatories in the Western US. The observatory maintains a series of seismic monitors on volcanoes in Alaska, largely on the Alaska Peninsula and the Aleutian Chain, near the air corridor for flights to America from Asia. Ash from eruptions is particularly dangerous to such flights as shown by the near crash of a jumbo jet years ago.
- The President's FY2017 budget proposes a very small increase for the Volcano Hazards Program, \$117,000 for fixed costs, even though the entire USGS budget request is an increase of 10%. I understand there has been some progress made on the repair and monitoring systems on Alaska Volcanoes and I appreciate the good work that is being done there, but I am afraid we are not doing enough. It was also brought to our attention that the good work we are doing now to repair these systems may not be in compliance with the changing Federal Communications Commission (FCC) regulations over radio frequency spectrum allocations.

- b. Are you familiar with the FCC spectrum allocation issue? Are the systems we are repairing in compliance with the FCC regulations or are we repairing a system that will need to be converted to digital in the next few years?
- c. Could you provide this committee with the current gaps in the monitoring infrastructure at the Alaska Volcano Observatory and the estimated costs to complete the monitoring system?

22. In 2014, Congress passed the BLM Permit Processing Improvement Act of 2014.

- a. How has the passage of the legislation impacted permit timelines?
- b. The reauthorization also required BLM to report to Congress by February 1 each fiscal year the allocation of funds to each office and the accomplishments of each office. Where is that report?

23. Over the last several years the Department of the Interior has proposed or finalized a number of offshore and onshore rules and regulations including the BLM hydraulic fracturing rule, updates to BLM Onshore Order 3, 4, and 5, the BLM venting and flaring proposal, the release of BLM Land Use Plan Amendments that limit areas where oil and natural gas development can take place, changes to ONRR's civil penalty regulations, additional regulations to Arctic OCS operations as well as the proposed Well Control Rule, potential changes to onshore royalties, bonus bids, etc. Interior is also expected to propose updates to offshore air regulations and there are also a number of additional items included in the Unified Agenda that have not been proposed. All of this regulatory activity is taking place at a time when investment on federal land oil and natural gas production continues to fall. Each of these items on their own may have a chilling effect on future investment and interest in federal production of oil and gas and taken together, the cumulative impacts could potentially alter not only production on federal lands but also government revenue as a result.

- a. Are you analyzing and considering the cumulative effect of each regulation on an individual basis as well as combined with the entire suite of regulations? How do you ensure that the Department adheres to its multiple-use mandate and continues to place great value on the oil and gas production on federal lands and the important revenues that come to the Treasury as a result?

24. The decision by DOI to pull the Arctic lease sales in the 2012-2017 Five Year Program as well as the denial of lease term extensions was shortsighted and without justification. Access to oil and natural gas resources in the Alaska OCS is essential to the nation's economy and energy security and predictable leasing and workable regulations are necessary to take advantage of this vast resource. The Arctic contains the world's largest remaining conventional undiscovered oil and natural gas. Given the resource potential and long timelines required to bring Arctic resources to market, decisions made today will have an impact on industry's ability to provide the U.S. oil production of the future.

- a. How does the Department view the importance of Arctic resources and our need to continue exploration and development in the Arctic, especially as other nations continue to reap the benefits of Arctic development?
  - b. Does the Department's lack of regulatory uncertainty, which only becomes greater with the proposed Arctic rule and the proposed Well Control rule, play a part in the unsuccessful project last year?
25. I am very concerned with the BOEM-BSEE proposed Arctic rule because it imposes prescriptive requirements, including the requirement for a same-season relief well, assuming that one solution universally applies to any given Arctic location. Instead, the rule should look to using performance-based rule which allow an operator to minimize risks by designing a well program specific to the landscape, ecosystem, ice conditions, water depths and weather of that particular well. The rule should focus on prevention and consider fit-for-purpose response planning alternatives to respond to potential loss of well control.
- a. What is the likely timing of the final Arctic rule? Do you believe that you have an opportunity to step back and take time to assess the Arctic rules package and examine the NPC report before putting out a final rule since you've closed the door on leasing in this current Five Year program?
  - b. How will this timing match with the BSEE well control rule, which as you know will also apply in the Arctic? Would it make more sense to hold the Arctic rule's final release until after the well control rule is final and allow for comments to inform how both set of rules will affect the Arctic before finalizing and implementing?
  - c. Has DOI taken a hard look at the NPC report and made agency adjustments or taken counsel from it?
26. The increased domestic oil and gas production we have been witnessing is occurring almost entirely on private and state lands where the federal government does not have control. This is because it can still take from 240 to as much as 300 days to get a permit to drill on BLM managed lands, and where it can take as much as 10 years to complete an environmental review. The Department has taken steps to expedite the permit process for projects on federal lands that involve renewables, or the infrastructure for renewables, but in the case of oil and gas resources the Department has increased permitting burdens.
- a. Can you explain the apparent discrepancy between how the Department treats permitting for renewable energy projects, and projects for the exploration and production of natural gas and crude oil?
27. On lands administered by the BLM there are thousands of older wells, many producing less than 15 barrels of oil per day. However, in the aggregate, this so-called "stripper production" represents several percent of America's domestic crude oil production. In the past year, BLM has introduced four rulemakings (site security and commingling, measurement of crude oil, measurement of natural gas, venting and flaring) that taken together could significantly increase costs of operation on these older leases, possibly resulting in shutting in production.

- a. Is an agency like BLM that already struggles to issue permits to drill from companies holding BLM leases within 300 days, staffed and equipped to manage the expansion of its regulatory mandate?
- b. Why is the focus of the Department and BLM on adding permit obligations for oil and gas operations when on the contrary the Department's focus is on expediting permitting for renewable energy?

28. Not long ago, the Social Security Administration engaged in an aggressive program to obtain a new custom designed computer system to deal with disability claims. After spending over \$300 million, they had a very little to show for it. They had a program racked with delays and mismanagement, but no new working custom system. Likewise, the U.S. Citizenship and Immigration Services spent more than \$1 billion trying to replace its approach to managing immigration documents with digital online forms, and as of this fall it had only a single online form, the form to replace a lost green card online.

You're probably wondering what does this have to do with the federal land management agencies. But right now, as I understand the situation, those agencies are working to refurbish the federal government's campsite booking website, Recreation.gov, which hosts virtually all online booking for not only the National Park Service but also the U.S. Fish and Wildlife Service, the Bureau of Reclamation in addition to Forest Service campgrounds, and even many of the Army Corps of Engineers facilities. Many people use this online system every year, and if things go bad it could be a very big black eye for these land management agencies that could have broader impacts to the recreation fee program in general, particularly as we approach the Park Service Centennial.

I am asking for an assurance from you that you are going to do everything possible to make sure that any improvements to the online reservation system doesn't risk ending up with missed deadlines, and rollout delays caused by mismanagement and untested products or custom created software, like I mentioned. I hope you will work to ensure that the system will be dependable, time tested, secure and cost effective for the United States.

- a. Will you examine the situation and make sure that we are not headed down a pathway like the those I mentioned?
  - b. As a way to ensure data security indeed does meet the highest standard, will you be using people who are Payment Card Industry Data Security Standard (PCI) compliant?
29. While many land management agency units are available as part of Recreation.gov, we know there are additional units that could take benefit from additional exposure. What are you doing to make sure more of your units are able to be part of the recreation.gov system and timeframes for bringing them online?
30. What, if any, human resources planning has OSMRE done in preparation for or in advance of the proposed Stream Protection Rule?

31. Which, if any, employment assignments or employee deployments have been made as a consequence of the Stream Protection Rule?
32. Does OSMRE employ any hydrogeologists?
33. What, if any, human resources planning has BLM done to satisfy mitigation measures, both those created by the Presidential Memorandum and the Department's own mitigation manual and efforts?
34. Which, if any, employment assignments or employee deployments have been made as a consequence of the new mitigation efforts? If the answer is that mitigation efforts have had no human resource planning or employment consequences, please explain why that is the case.
35. What vacancies does the Department currently have, and what are the Department's plans or intentions to fill those vacancies?
36. The BLM's draft updated planning rule, known as Planning 2.0, seeks to update the agency's planning process.
  - a. One of the frustrations frequently expressed by public lands communities regarding the planning process is that the BLM takes their comments, but does not truly consider the needs of the area, particularly when it comes to projects that potentially provide opportunities for economic development. How will the new rule improve BLM's coordination with state, county, and local governments? Will there be certainty for the manner in which BLM will consider the needs of state, county, and local governments.
37. One of the goals of Planning 2.0 is to "improve the BLM's adaptability to respond to social and environmental changes." What types of social change does the BLM need a new rule in order to adapt to? Also, what types of environmental change require the new rule?
38. I've made no secret about my concerns with this Administration's practices relating to mitigation. The President's Memorandum entitled, *Mitigating Impacts on Natural Resources from Development and Encouraging Related Private Investment*, coupled with your Secretarial Order 3330 on mitigation have only served to further my initial apprehension.

The President's Memorandum mandated that, "[w]ithin 1 year of the date of this memorandum, the Department of the Interior will develop program guidance regarding the use of mitigation projects and measures on lands administered by bureaus or offices of the Department through a land-use authorization, cooperative agreement, or other appropriate mechanism that would authorize a project proponent to conduct actions, or otherwise secure conservation benefits, for the purpose of mitigating impacts elsewhere."

- a. Is there a status update as to where the DOI and its relevant agencies are in the development of program guidance?

39. I understand mitigation can be a great tool for land managers, but what authority does the Department have to require mitigation for projects on public lands under the Department's jurisdiction? And, to that end, what authority is there to require that mitigation meet a standard of benefit for natural resource damage?
40. Along the same lines, given that much of the framework from the Presidential Memorandum reflects your own mitigation efforts stemming from your Secretarial Order 3330, please explain in detail what you hoped to achieve through your own mitigation efforts?
- a. How will those efforts would be implemented across your Department and with other Department sub-agencies and among sister agencies where mitigation efforts and/or natural resource impacts straddle multiple jurisdictions.
41. The Bureau of Land Management briefed the Senate on the Presidential Memorandum, and admitted to not having a rigorous understanding of impacts to subsistence use. Nevertheless, the Department assigned an \$8 million impact in the National Petroleum Reserve - Alaska (NPR-A). What metrics are used generally to determine dollar values associated with anticipated natural resource damage(s), and specifically, what metrics were relied upon to arrive at the \$8 million dollar cost in the NPR-A?
42. The Department's Budget Brief for 2017 notes "(r)esource management plans provide the basis for every BLM management action and are *necessitated* by changes in resource use and demands" (emphasis added)
- a. What, specifically, are the changes in resource uses and demands that necessitate potential management of:
    - o 715,000 acres of the Fortymile and Mosquito Flats Area of Critical Environmental Concern (ACECs) in the Eastern Interior Management Plan;
    - o Nearly 700,000 acres in the Sheefish Bering Sea-Western Interior Plan;
    - o Any of the over 6 million proposed acres in the Central Yukon Management Plan; and
    - o Some of the proposed ACECs would result in the closure of the public lands to mining or other activities. Please articulate how the Department would satisfy its multiple-use, sustained yield mandate in the Federal Land Policy and Management Act if any of the ACECs proposals that contemplate a form of closure are finalized.
  - b. Please tell me what efforts the Department has made to apprise Alaskans, and specifically Fortymile placer miners, of developing management plans, individual obligations and new enforcement approaches?

- c. And please elaborate on what the Department's policy is in the interim while new policies, enforcement approaches, management plans and the like are being developed. For example, is it the Department's position to continue operating under existing policies while a new policy is being drafted?
43. The Administration has been vague on the details surrounding your proposed \$10.25/barrel fee, as you call it.
- a. Has the Interior Department performed any analysis of how a \$10.25/barrel fee would impact energy production on federal lands? If not, why not?
  - b. In 2013, a report commissioned by the Department of the Interior concluded that raising royalty rates on onshore oil and gas production on public lands would discourage investment and bring less money to the treasury, and consequently was not warranted. With oil prices drastically lower than in 2013 and the literally thousands of pages of new regulations that have come out of your Department to regulate industry over the last few months, has your Department analyzed what the cumulative impact of all of these actions will be on production on federal lands and revenue to the treasury?
  - c. In light of these new regulations and fees, can you tell me that your actions are designed to increase production on public lands, or are you ready to concede that we have different policy objectives when it comes to energy development on federal lands?
44. The FY 2015 Omnibus included a requirement for a comprehensive inventory of contaminated sites conveyed through ANCSA and a detailed plan on how the Department intends to complete cleanup of each contaminated site within 180 days of enactment.
- a. When will the report be completed and made public?
  - b. Does the Department have any plans to accelerate the cleanup of contamination on Native lands, either the lands that BIA, BLM, FWS, NPS, or Bureau of Mines actually caused, and do you have any plans to coordinate a cleanup among the other federal agencies: DOD, FAA, the National Weather Service and the Forest Service since as Secretary you do have a trust responsibility to Alaska Natives?
  - c. Does the Department have any estimates or intend to develop estimates for exactly what it will cost to clean up the lands so they are usable by Natives to generate the benefits that were intended when the Native Claims Settlement Act passed 45 years ago?

## Questions from Ranking Member Udall

1. I'm very pleased that this Subcommittee was able to provide an 85 percent increase for Indian school construction and improvements in the 2016 omnibus. That amount includes funds to finish the schools on the 2004 school construction priority list. It also provides a down payment for to begin work on new schools that BIE is in the process of selecting.

Selecting five new schools for priority construction is only the beginning of the investment we need to make in tribal schools and I believe we won't get there unless we develop some kind of "Marshall Plan" for Native youth that fully funds infrastructure needs. We included language in the 2016 omnibus urging the Department to follow the lead of the Defense Department and develop a comprehensive plan to modernize and improve all BIE schools. DOD produced a plan to modernize its education facilities needs in 2009 and has been able to make significant progress towards fixing its schools as a result. There's no reason that the Administration and Congress can't work together to do the same for tribal schools.

- a. Secretary Jewell, can you share what steps the Department is taking to develop a comprehensive plan to improve all Indian schools?
  - b. Is there any reason that the Department can't move forward with preparing a comprehensive needs assessment and plan to address the needs identified by such an assessment this fiscal year?
2. I understand that the Department is now moving forward with the first phase of the proposed reorganization of the Bureau of Indian Education including the establishment of new Educational Resource Centers and that your 2017 budget anticipates additional changes to the Bureau. As part of the first phase of the reorganization, you have proposed a number of staffing changes, including changes to the regional office in Albuquerque, to create these new centers to assist BIE and tribally controlled schools.
    - a. What is your timeline for staffing up these centers, and what services can schools expect to receive starting in the fall?
    - b. I am still hearing from tribes in New Mexico that they don't feel fully informed about changes to expect from the reorganization. What is your plan to ensure that all stakeholders including BIE employees whose jobs may be affected know what to expect during the reorganization?
    - c. Your budget request provides \$8 million dollars in new funds to implement more changes to the Bureau to "increase capacity" and provide additional services to BIE-funded schools, but it doesn't provide much more detail. What specific changes are you proposing to make, and what additional capacity will BIE build with these funds? Will these funds be used to address shortfalls in facilities management, contracting and other services provided to schools, as identified by the Governmental Accountability Office?

3. Secretary Jewell, I am pleased to see your 2017 budget includes a \$350,000 increase to expand the Manhattan Project National Historical Park, for a total budget of \$691,000. I know that the Park Service is still working with the Department of Energy to develop its plan for the park.

Could you please provide an update on what we can expect to happen with the park in 2016, particularly in Los Alamos? What activities do you plan to fund with your requested increase?

4. Secretary Jewell, I am very pleased that my colleagues and I were able to provide the BLM National Conservation Lands line item with its first increase since FY 2012. As you know, we recently established two new national monuments in New Mexico—the Organ Mountains-Desert Peaks National Monument in the southern border area of the state, and the Rio Grande del Norte National Monument in the north near Taos. Tourism at these monuments creates critical economic opportunities for the people in surrounding communities—and they are also places that New Mexicans enjoy visiting ourselves. The President’s Budget once again proposes a significant increase of \$13.8 million dollars for monuments throughout the country.
  - a. Can you tell us what BLM’s plans are for utilizing the new funds we provided in FY 2016—particularly to support the monuments in New Mexico?
  - b. With the increased funding included in the 2017 Budget for national monuments, what will you be working on? What are the needs that should be addressed?
  - c. Since the Budget was delivered, the President has designated new monuments in California, and I understand there is still the potential for additional designations. Will the funding needs for those areas be covered by the increases you’ve proposed? If not, how will you fund them without impacting other states like New Mexico?
5. The Budget proposes \$1.7 million dollars to implement a Departmental Southwest Border Radio Initiative—in partnership with the Forest Service—to improve communications infrastructure amongst the various land management agencies, based on some issues the Inspector General uncovered.
  - a. Can you talk about how this funding specifically addresses the concerns raised by the Inspector General? Will this initiative improve Interior’s ability to communicate with Border Patrol and state and local law enforcement as well?
  - b. Can you tell us why BLM was chosen as the lead agency and why the Park Service and Fish and Wildlife Service do not have similar increases proposed for this project?
  - c. What are the tangible impacts we will see on the ground in New Mexico if this program is funded?

6. I am the lead cosponsor of legislation with Senator Wyden that would require the Department to collect royalties for coal mined on federal lands based on the actual market value of coal. The bill also increases transparency within the federal coal program by making it a requirement to calculate and publish the going market rate for coal and coal transportation.

I know that you have called for a comprehensive review of the coal program. What is the status of that review, and the expected timetable for completion? Will the reforms proposed in our bill be evaluated as part of your review? Please provide a comprehensive list of the issues that you expect to investigate or address as part of the review.

7. Secretary Jewell, the demand for ivory and rhino horns has skyrocketed. The Congressional Research Service reports that a rhino horn is worth more than \$50,000 per kilogram — more than even gold and platinum. The profit incentive is just staggering — so it's no surprise that terrorist networks such as al-Shabab and the Lord's Resistance Army are turning to poaching to support their operations.

The FY 2016 Omnibus included \$8 million dollars, a 12% boost, to the Fish and Wildlife Service's efforts to combat wildlife trafficking. The budget request for FY 2017 would maintain that increased effort.

What progress is the Service making on hiring the planned 45 new specialists and agents, and how quickly will they get into the field? What other steps is the Service planning to take with the new funds, both in 2016 and 2017?

8. Secretary Jewell, the Fish and Wildlife Service's efforts to reintroduce the Mexican gray wolf in New Mexico and Arizona has had a promising start. They were virtually eliminated from the wild by the 1970s, but thanks to the program, the population reached 110 wolves in 2014.

Unfortunately, the 2015 count brought some troubling news — the Mexican gray wolf population dropped to 97. I also understand that two wolves passed away during or right after being darted and tagged by the Fish and Wildlife Service. Wild populations can naturally ebb and flow, but we know that these wolves are at risk for a number of factors. It's critical that we investigate closely.

- a. Do your scientists have a theory for why the population is trending downward? Are there plans underway to help support a rebound?
- b. Why did the two wolves die during the count and capture operation? Has the Fish & Wildlife Service done a full review of their policies and procedures to prevent similar accidents?

**Questions from Senator Blunt**

1. Could you please provide a comparison of the revenues returned in the last several fiscal years from oil, gas, and coal leases, versus any revenue brought in from solar energy. Please include in the report what the revenue is generated from, such as rents. Further, please identify where there this money is accounted for in the Interior budget. It does not appear to be documented in Interior's Office of Natural Resources Revenue which lists revenues from other sources.
2. Given that your department has concluded that a PEIS for the coal leasing program is necessary, will you commit to refraining from other major modifications to the coal program while this analysis is being conducted?
3. You have indicated that a number of coal leases that have received record of decisions will be grandfathered. Are you firmly committed to allowing those lease sales to move forward as planned?

## Questions from Senator McConnell

1. The Consolidated Appropriations Act of 2016 (P.L. 114-113) included a directive to require the Office of Surface Mining Reclamation and Enforcement (OSMRE) to provide states with technical reports, data, analyses, comments received, and documents related to the environmental review and environmental impact statements for the agency's proposed stream buffer zone regulation. To date, what has OSMRE done in conjunction with the Department of Interior to comply with Congress's directive?
2. The Office of Surface Mining and Enforcement (OSMRE) claims that states have been reluctant to work with the agency despite their outreach efforts on the proposed stream buffer zone regulation. The Energy and Environment Cabinet in Kentucky sent a letter to your agency on February 8, 2016, indicating that the state agency would be interested in receiving the information directed by Congress in the Consolidated Appropriations Act of 2016 (P.L. 114-113) to see how those studies and assessment documents compare with their own findings and reviews. Where is your agency in the process of responding to this request? What steps will your agency take to ensure that the newly elected and appointed officials in the commonwealth of Kentucky are brought up to speed with the proposed rule and reviews and findings associated with it? What sort of engagement can the Kentucky Energy and Environment Cabinet expect from your agency before the stream buffer zone rule is finalized?

## □uestions from Senator Cassidy□

1. In 1996 Congress passed the National Technology Transfer and Advancement Act (NTTAA). The law prohibits the use of technical standards unique to the federal government in lieu of voluntary consensus standards as they relate to agency rule making. However, the Blowout Preventer Systems and Well Control final rule, RIN 1014-AA11 violates the NTTAA by using government unique technical standards. This violation makes it impossible to implement numerous portions of the rule while remaining compliant with existing law. In its formulation of the rule BSEE also infringes upon OMB Circular A-119. The circular requires the publishing of a NTTAA □statement□ in its Notice of Proposed Rulemaking (NPRM) detailing why government unique technical standards were necessary in lieu of consensus standards if exceptional reasons existed.
  - a. Why did BSEE not include a NTTAA statement in its original NPRM?
  - b. How does BSEE plan to implement all of rule RIN1014-AA11 if key provisions violate existing statutes?
  - c. Does the Department plan to publish a NTTAA statement and reopen the public comment period?
2. The NTTAA does allow for exceptions from the voluntary consensus standards mandate when their use □is inconsistent with applicable law or otherwise impractical□ and requires agencies to □transmits to the Office of Management and Budget an explanation of the reasons for using such standards.□ In accordance with 15 U.S.C. □272.
  - a. Please explain the Department□s process for justifying a NTTAA exemption when BSEE was actively involved in creating and approving the consensus standards at issue.
  - b. Please explain the justification that voluntary consensus standards are □impractical□ especially taking into account that government-unique standards lack a technical basis and create potential safety risks.
3. In its NPRM BSEE claims the proposed rule is not a □significant energy action□ triggering the need for a Statement of Energy Effects under the Outer Continental Shelf Lands Act (□OCSLA□) and procedural requirements under Executive Order 13211 (May 18, 2001) requiring a □Statement of Energy Effects.□ However, based on comments received from the public it is unreasonable for BSEE and the Department to continue this claim. BSEE has acknowledged that the proposed rule in total □represents one of the most substantial rulemakings in the history of the BSEE and its predecessor organizations.□ While simultaneously and inconsistently claiming that the proposed rule is not a significant energy action under E.O. 13211, BSEE has not met the mandate under OCSLA for a reasoned analysis of the rule.

Given the obvious and BSEE acknowledged impact this rule will have; will the Department renew its analysis and prepare the requisite Statement of Energy Effects and submit the Statement for public comment, as required by law?

4. BOEM has stated that offshore sources have not been demonstrated to impact onshore air quality. At the same time, BOEM is currently undergoing air modeling studies to inform its air quality rulemaking and these studies are not expected to conclude until 2017. However it appears the agency is on the cusp of proposing an entirely new regulatory program for offshore operators.
  - a. Is the agency going to move forward with a proposed rule before receiving the results of the air modeling studies that are intended to inform the rule for which it has commissioned nearly \$4M? What assurance can you provide today that the agency will issue a draft report of the studies for public review and comment prior to finalizing the report or incorporating its conclusions into any revised regulatory requirements?
  - b. What justification does the agency have for moving forward without the results of the studies when your agency, through its environmental impact assessments, has repeatedly concluded that offshore sources do not impact onshore air quality?
  - c. What reassurance can you provide that the agency will not rush, in order to meet an artificial deadline, the regulated community's ability to comment on the proposed rule and allow the agency time to engage with stakeholders as you analyze and digest those comments in order to incorporate any appropriate revisions into the final rule?
  
5. BSEE is currently working to finalize its BOP/Well Control Rule which as proposed may actually decrease safety and increase risk. Will the final rule make offshore operations less safe and increase risk like the proposal did?
  - a. Prior to the rule's proposal last year did DOI thoroughly examine all of the safety improvements made since 2010 and identify the existing gaps to determine what this rule needed to address?
  - b. DOI received significant comments and feedback on a number of safety concerns with the proposed rule. A recent Wall Street Journal article, which may have been written as a result of a DOI leak of the final rule, suggests that changes have been made to the proposal. What changes have been made to enhance safety?
  - c. A number of us in Congress have real concerns with the proposal all centered on safety and as a result the DOI needed to undertake a more robust analysis and engage in real dialogue to make sure the unintended consequences were addressed and the rule actually made offshore operations safer. As a result, the FY 2016 omnibus spending bill expressed the need for more robust analysis and that further examination needed to take place prior to the finalization of the rule. Did DOI heed

to the call of the Congress prior to finalizing and sending the rule to OMB? Why or why not?

- d. Does the final rule address and fix all of the safety concerns stakeholders and Congress had with the proposal? Does the final rule enhance safety?

**From:** Watt, Brad (Dem-Secretary) [mailto:[Brad\\_Watt@DEM-SEC.SENATE.GOV](mailto:Brad_Watt@DEM-SEC.SENATE.GOV)]  
**Sent:** Wednesday, April 13, 2016 2:06 PM  
**To:** [D-HOTLINE@LISTS.SENATE.GOV](mailto:D-HOTLINE@LISTS.SENATE.GOV)  
**Subject:** HOTLINE-S.2012: ENERGY MODERNIZATION

The Majority Leader asks unanimous consent that at a time to be determined by the Majority Leader in consultation with the Republican Leader the Senate proceed to the consideration of S.2012, Energy modernization.

The Majority Leader then asks consent that the following amendments be called up and voted on en bloc:

1. #3276 Cantwell Striking Certain Provisions
2. #3302 Klobuchar Modifying a Provision [as modified] EDW16251
3. #3055 Flake WAPA Pilot Project
4. #3050 Flake DOE Grants Information
5. #3237 Hatch Internet Auctions
6. #3308 Murkowski Denali & Gasoline
7. #3286 Heller PLREDA [as modified] FLO16390
8. #3075 Vitter Well Control Small Business
9. #3168 Portman/Shahen EPS
10. #3292 Shahen Waste Heat and CHP [as modified] ARP16073
11. #3155 Heinrich Minority-Serving Institutions
12. #3270 Manchin Carbon Sequestration Program
13. #3313 Cantwell SOS Accelerating Energy Innovation [as modified]  
FLO16388
14. #3214 Cantwell DOE Emergency Response
15. #3266 Vitter Helicopter Fuel

16. #3310 Sullivan Survey Correction Swan Lake
17. #3317 Heinrich Lab-Directed R&D Cost Allocation
18. #3265 Vitter Maritime Workforce [as modified] FLO16389
19. #3012 Kaine Rockingham County
20. #3290 Alexander/Merkley Batteries
21. #3004 Gillibrand/Cassidy Disaster Relief Efficient Appliances
22. #3233 Warner Administrative Exchange for GW Parkway [as modified]  
with hand change FLO16332
23. #3239 Thune High-Energy Physics Subcommittee
24. #3221 Udall/Portman Water Sense
25. #3203 Coons Study Cost-Share Waivers
26. #3309 Portman NPS Centennial [as modified] JAC16380
27. #3229 Flake Solar Avian Impact Study
28. #3251 Inhofe Natural Gas Vehicles
29. #2963 Murkowski RIS Fix (*currently pending*)

The Majority Leader then asks consent that there be \_\_ hours of debate, divided in the usual form, on the following amendments concurrently, that no further amendments be in order, and that following the use or yielding back of that time, the Senate vote on the following amendments in the order listed with a 60-vote threshold for adoption for each of amendment:

1. #3234 Murkowski/Cantwell Resources Title [as modified] FLO16465
2. #3202 Isakson/Bennet SAVE Act
3. #3175 Burr Corolla Wild Horses
4. #3210 Lankford Maintenance Backlog Limit on LWCF Spending
5. #3311 Boozman Clean Line Study
6. #3312 Udall Clean Energy Victory Bonds
7. #XXXX Paul Economic Freedom Zones SIL16083
8. #2954 Cassidy-Markey Maximize SPR Sale Revenue

That following the disposition of Cassidy-Markey amendment #2954, the substitute amendment #2953, as amended, be agreed to; that the Senate vote on the motion to invoke cloture, upon reconsideration, on S.2012, as amended;

that if cloture is invoked, all post-cloture time be yielded back; the bill be read a third time and the Senate vote on passage of S.2012, as amended. Finally, that budget points of order not be barred by virtue of this agreement.

PDFs of the highlighted amendments are attached to this message.

If your Senator has an objection, please contact the Democratic Cloakroom. Do not reply to this message.

AMENDMENT NO.

Calendar No.

Purpose: To modify provisions relating to the energy efficiency materials pilot program.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by Ms. KLOBUCHAR to the amendment (No. 2953) proposed by Ms. MURKOWSKI

Viz:

1 Beginning on page 37, strike line 16 and all that fol-  
2 lows through page 41, line 14 and insert the following:

3 **SEC. 1004. ENERGY EFFICIENCY MATERIALS PILOT PRO-**  
4 **GRAM.**

5 (a) DEFINITIONS.—In this section:

6 (1) APPLICANT.—The term “applicant” means  
7 a nonprofit organization that applies for a grant  
8 under this section.

9 (2) ENERGY-EFFICIENCY MATERIALS.—

10 (A) IN GENERAL.—The term “energy-effi-  
11 ciency materials” means a measure (including a

1 product, equipment, or system) that results in  
2 a reduction in use by a nonprofit organization  
3 for energy or fuel supplied from outside the  
4 nonprofit building.

5 (B) INCLUSIONS.—The term “energy-effi-  
6 ciency materials” includes an item involving—

7 (i) a roof or lighting system, or com-  
8 ponent of a roof or lighting system;

9 (ii) a window;

10 (iii) a door, including a security door;

11 or

12 (iv) a heating, ventilation, or air con-  
13 ditioning system or component of the sys-  
14 tem (including insulation and wiring and  
15 plumbing materials needed to serve a more  
16 efficient system); and

17 (v) a renewable energy generation or  
18 heating system, including a solar, photo-  
19 voltaic, wind, geothermal, or biomass (in-  
20 cluding wood pellet) system or component  
21 of the system.

22 (3) NONPROFIT BUILDING.—

23 (A) IN GENERAL.—The term “nonprofit  
24 building” means a building operated and owned  
25 by a nonprofit organization.

1 (B) INCLUSIONS.—The term “nonprofit  
2 building” includes a building described in sub-  
3 paragraph (A) that is—

- 4 (i) a hospital;  
5 (ii) a youth center;  
6 (iii) a school;  
7 (iv) a social-welfare program facility;  
8 (v) a faith-based organization; and  
9 (vi) any other nonresidential and non-  
10 commercial structure.

11 (b) ESTABLISHMENT.—Not later than 1 year after  
12 the date of enactment of this Act, the Secretary shall es-  
13 tablish a pilot program to award grants for the purpose  
14 of providing nonprofit buildings with energy-efficiency ma-  
15 terials.

16 (c) GRANTS.—

17 (1) IN GENERAL.—The Secretary may award  
18 grants under the program established under sub-  
19 section (b).

20 (2) APPLICATION.—The Secretary may award a  
21 grant under this section if an applicant submits to  
22 the Secretary an application at such time, in such  
23 form, and containing such information as the Sec-  
24 retary may prescribe.

1           (3) CRITERIA FOR GRANT.—In determining  
2 whether to award a grant under this section, the  
3 Secretary shall apply performance-based criteria,  
4 which shall give priority to applications based on—

5                   (A) the energy savings achieved;

6                   (B) the cost-effectiveness of the use of en-  
7 ergy-efficiency materials;

8                   (C) an effective plan for evaluation, meas-  
9 urement, and verification of energy savings; and

10                  (D) the financial need of the applicant.

11           (4) LIMITATION ON INDIVIDUAL GRANT  
12 AMOUNT.—Each grant awarded under this section  
13 shall not exceed \$200,000.

14           (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
15 authorized to be appropriated to carry out this section  
16 \$10,000,000 for each of fiscal years 2016 through 2020,  
17 to remain available until expended.

AMENDMENT NO.

Calendar No.

Purpose: To promote the development of renewable energy on public land.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENTS intended to be proposed by Mr. HELLER (for himself and Mr. HEINRICH) to the amendment (No. 2953) proposed by Ms. MURKOWSKI

Viz:

1       On page 244, between lines 13 and 14, insert the following:  
2

3       **Subpart B—Development of Geothermal, Solar, and**

4                       **Wind Energy on Public Land**

5       **SEC. 3011A. DEFINITIONS.**

6       In this subpart:

7               (1) COVERED LAND.—The term “covered land”  
8       means land that is—

9               (A) public land administered by the Secretary;  
10       and

1 (B) not excluded from the development of  
2 geothermal, solar, or wind energy under—

3 (i) a land use plan established under  
4 the Federal Land Policy and Management  
5 Act of 1976 (43 U.S.C. 1701 et seq.); or

6 (ii) other Federal law.

7 (2) EXCLUSION AREA.—The term “exclusion  
8 area” means covered land that is identified by the  
9 Bureau of Land Management as not suitable for de-  
10 velopment of renewable energy projects.

11 (3) PRIORITY AREA.—The term “priority area”  
12 means covered land identified by the land use plan-  
13 ning process of the Bureau of Land Management as  
14 being a preferred location for a renewable energy  
15 project.

16 (4) PUBLIC LAND.—The term “public land”  
17 has the meaning given the term “public lands” in  
18 section 103 of the Federal Land Policy and Manage-  
19 ment Act of 1976 (43 U.S.C. 1702).

20 (5) RENEWABLE ENERGY PROJECT.—The term  
21 “renewable energy project” means a project carried  
22 out on covered land that uses wind, solar, or geo-  
23 thermal energy to generate energy.

24 (6) SECRETARY.—The term “Secretary” means  
25 the Secretary of the Interior.

1           (7) VARIANCE AREA.—The term “variance  
2 area” means covered land that is—

3                   (A) not an exclusion area; and

4                   (B) not a priority area.

5 **SEC. 3011B. LAND USE PLANNING; SUPPLEMENTS TO PRO-**  
6                   **GRAMMATIC ENVIRONMENTAL IMPACT**  
7                   **STATEMENTS.**

8           (a) PRIORITY AREAS.—

9                   (1) IN GENERAL.—The Secretary, in consulta-  
10 tion with the Secretary of Energy, shall establish  
11 priority areas on covered land for geothermal, solar,  
12 and wind energy projects.

13                   (2) DEADLINE.—

14                           (A) GEOTHERMAL ENERGY.—For geo-  
15 thermal energy, the Secretary shall establish  
16 priority areas as soon as practicable, but not  
17 later than 5 years, after the date of enactment  
18 of this Act.

19                           (B) SOLAR ENERGY.—For solar energy,  
20 the solar energy zones established by the 2012  
21 western solar plan of the Bureau of Land Man-  
22 agement shall be considered to be priority areas  
23 for solar energy projects.

24                           (C) WIND ENERGY.—For wind energy, the  
25 Secretary shall establish priority areas as soon

1 as practicable, but not later than 3 years, after  
2 the date of enactment of this Act.

3 (b) VARIANCE AREAS.—To the maximum extent  
4 practicable, variance areas shall be considered for renew-  
5 able energy project development, consistent with the prin-  
6 ciples of multiple use as defined in the Federal Land Pol-  
7 icy and Management Act of 1976 (43 U.S.C. 1701 et  
8 seq.).

9 (c) REVIEW AND MODIFICATION.—Not less fre-  
10 quently than once every 10 years, the Secretary shall—

11 (1) review the adequacy of land allocations for  
12 geothermal, solar, and wind energy priority and vari-  
13 ance areas for the purpose of encouraging new re-  
14 newable energy development opportunities; and

15 (2) based on the review carried out under para-  
16 graph (1), add, modify, or eliminate priority, vari-  
17 ance, and exclusion areas.

18 (d) COMPLIANCE WITH THE NATIONAL ENVIRON-  
19 MENTAL POLICY ACT.—For purposes of this section, com-  
20 pliance with the National Environmental Policy Act of  
21 1969 (42 U.S.C. 4321 et seq.) shall be accomplished—

22 (1) for geothermal energy, by supplementing  
23 the October 2008 final programmatic environmental  
24 impact statement for geothermal leasing in the west-  
25 ern United States;

1           (2) for solar energy, by supplementing the July  
2           2012 final programmatic environmental impact  
3           statement for solar energy projects; and

4           (3) for wind energy, by supplementing the July  
5           2005 final programmatic environmental impact  
6           statement for wind energy projects.

7           (e) NO EFFECT ON PROCESSING APPLICATIONS.—A  
8           requirement to prepare a supplement to a programmatic  
9           environmental impact statement under this section shall  
10          not result in any delay in processing an application for  
11          a renewable energy project.

12          (f) COORDINATION.—In developing a supplement re-  
13          quired by this section, the Secretary shall coordinate, on  
14          an ongoing basis, with appropriate State, tribal, and local  
15          governments, transmission infrastructure owners and op-  
16          erators, developers, and other appropriate entities to en-  
17          sure that priority areas identified by the Secretary are—

18               (1) economically viable (including having access  
19               to transmission);

20               (2) likely to avoid or minimize conflict with  
21               habitat for animals and plants, recreation, and other  
22               uses of covered land; and

23               (3) consistent with section 202 of the Federal  
24               Land Policy and Management Act of 1976 (43

1 U.S.C. 1712), including subsection (c)(9) of that  
2 section.

3 (g) REMOVAL FROM CLASSIFICATION.—In carrying  
4 out subsections (a), (c), and (d), if the Secretary deter-  
5 mines an area previously suited for development should  
6 be removed from priority or variance classification, not  
7 later than 90 days after the date of the determination,  
8 the Secretary shall submit to Congress a report on the  
9 determination.

10 **SEC. 3011C. ENVIRONMENTAL REVIEW ON COVERED LAND.**

11 (a) IN GENERAL.—If the Secretary determines that  
12 a proposed renewable energy project has been sufficiently  
13 analyzed by a programmatic environmental impact state-  
14 ment conducted under section 3011B(d), the Secretary  
15 shall not require any additional review under the National  
16 Environmental Policy Act of 1969 (42 U.S.C. 4321 et  
17 seq.).

18 (b) ADDITIONAL ENVIRONMENTAL REVIEW.—If the  
19 Secretary determines that additional environmental review  
20 under the National Environmental Policy Act of 1969 (42  
21 U.S.C. 4321 et seq.) is necessary for a proposed renewable  
22 energy project, the Secretary shall rely on the analysis in  
23 the programmatic environmental impact statement con-  
24 ducted under section 3011B(d), to the maximum extent

1 practicable when analyzing the potential impacts of the  
2 project.

3 (c) RELATIONSHIP TO OTHER LAW.—Nothing in this  
4 section modifies or supersedes any requirement under ap-  
5 plicable law, including the National Environmental Policy  
6 Act of 1969 (42 U.S.C. 4321 et seq.).

7 **SEC. 3011D. PROGRAM TO IMPROVE RENEWABLE ENERGY**  
8 **PROJECT PERMIT COORDINATION.**

9 (a) ESTABLISHMENT.—The Secretary shall establish  
10 a program to improve Federal permit coordination with  
11 respect to renewable energy projects on covered land.

12 (b) MEMORANDUM OF UNDERSTANDING.—

13 (1) IN GENERAL.—Not later than 180 days  
14 after the date of enactment of this Act, the Sec-  
15 retary shall enter into a memorandum of under-  
16 standing for purposes of this section, including to  
17 specifically expedite the environmental analysis of  
18 applications for projects proposed in a variance area,  
19 with—

20 (A) the Secretary of Agriculture; and

21 (B) the Assistant Secretary of the Army  
22 for Civil Works.

23 (2) STATE PARTICIPATION.—The Secretary  
24 may request the Governor of any interested State to

1 be a signatory to the memorandum of understanding  
2 under paragraph (1).

3 (c) DESIGNATION OF QUALIFIED STAFF.—

4 (1) IN GENERAL.—Not later than 90 days after  
5 the date on which the memorandum of under-  
6 standing under subsection (b) is executed, all Fed-  
7 eral signatories, as appropriate, shall identify for  
8 each of the Bureau of Land Management Renewable  
9 Energy Coordination Offices an employee who has  
10 expertise in the regulatory issues relating to the of-  
11 fice in which the employee is employed, including, as  
12 applicable, particular expertise in—

13 (A) consultation regarding, and prepara-  
14 tion of, biological opinions under section 7 of  
15 the Endangered Species Act of 1973 (16 U.S.C.  
16 1536);

17 (B) permits under section 404 of Federal  
18 Water Pollution Control Act (33 U.S.C. 1344);

19 (C) regulatory matters under the Clean Air  
20 Act (42 U.S.C. 7401 et seq.);

21 (D) planning under section 14 of the Na-  
22 tional Forest Management Act of 1976 (16  
23 U.S.C. 472a);

24 (E) the Federal Land Policy and Manage-  
25 ment Act of 1976 (43 U.S.C. 1701 et seq.);

1 (F) the Migratory Bird Treaty Act (16  
2 U.S.C. 703 et seq.); and

3 (G) the preparation of analyses under the  
4 National Environmental Policy Act of 1969 (42  
5 U.S.C. 4321 et seq.).

6 (2) DUTIES.—Each employee assigned under  
7 paragraph (1) shall—

8 (A) be responsible for addressing all issues  
9 relating to the jurisdiction of the home office or  
10 agency of the employee; and

11 (B) participate as part of the team of per-  
12 sonnel working on proposed energy projects,  
13 planning, monitoring, inspection, enforcement,  
14 and environmental analyses.

15 (d) ADDITIONAL PERSONNEL.—The Secretary may  
16 assign additional personnel for the renewable energy co-  
17 ordination offices as are necessary to ensure the effective  
18 implementation of any programs administered by those of-  
19 fices, including inspection and enforcement relating to re-  
20 newable energy project development on covered land, in  
21 accordance with the multiple use mandate of the Federal  
22 Land Policy and Management Act of 1976 (43 U.S.C.  
23 1701 et seq.).

24 (e) RENEWABLE ENERGY COORDINATION OF-  
25 FICES.—In implementing the program established under

1 this section, the Secretary may establish additional renew-  
2 able energy coordination offices or temporarily assign the  
3 qualified staff described in subsection (c) to a State, dis-  
4 trict, or field office of the Bureau of Land Management  
5 to expedite the permitting of renewable energy projects,  
6 as the Secretary determines to be necessary.

7 (f) REPORT TO CONGRESS.—

8 (1) IN GENERAL.—Not later than February 1  
9 of the first fiscal year beginning after the date of en-  
10 actment of this Act, and each February 1 thereafter,  
11 the Secretary shall submit to the Committee on En-  
12 ergy and Natural Resources of the Senate and the  
13 Committee on Natural Resources of the House of  
14 Representatives a report describing the progress  
15 made pursuant to the program under this subpart  
16 during the preceding year.

17 (2) INCLUSIONS.—Each report under this sub-  
18 section shall include—

19 (A) projections for renewable energy pro-  
20 duction and capacity installations; and

21 (B) a description of any problems relating  
22 to leasing, permitting, siting, or production.

23 **SEC. 3011E. SAVINGS CLAUSE.**

24 Nothing in this subpart establishes—

1           (1) a priority or preference for the development  
2           of renewable energy projects on public land over  
3           other energy-related or mineral projects or other  
4           uses of public land; or

5           (2) an exception to the requirement that public  
6           land be managed consistent with the principle of  
7           multiple use (as defined in section of section 103 of  
8           the Federal Land Policy and Management Act of  
9           1976 (43 U.S.C. 1702)).

10          On page 244, line 14, strike “**Subpart B**” and in-  
11          sert “**Subpart C**”.

AMENDMENT NO.

Calendar No.

Purpose: To provide for the establishment of free market enterprise zones in order to help facilitate the creation of new jobs, entrepreneurial opportunities, enhanced and renewed educational opportunities, and increased community involvement in bankrupt or economically distressed areas.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**H. R. 4470**

To amend the Safe Drinking Water Act with respect to the requirements related to lead in drinking water, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by Mr. PAUL

Viz:

1 At the appropriate place, insert the following:

2 **DIVISION A—ECONOMIC**

3 **FREEDOM ZONES**

4 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

5 (a) SHORT TITLE.—This division may be cited as the

6 “Economic Freedom Zones Act of 2016”.

7 (b) TABLE OF CONTENTS.—The table of contents for

8 this division is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Definitions.

## 2

## TITLE I—PROHIBITION OF FEDERAL GOVERNMENT BAILOUTS

Sec. 101. Prohibition of Federal Government bailouts.

## TITLE II—DESIGNATION OF ECONOMIC FREEDOM ZONES (EFZ)

Sec. 201. Eligibility requirements for Economic Freedom Zone Status.

Sec. 202. Application and duration of designation.

## TITLE III—FEDERAL TAX INCENTIVES

Sec. 301. Tax incentives related to Economic Freedom Zones.

## TITLE IV—FEDERAL REGULATORY REDUCTIONS

Sec. 401. Suspension of certain laws and regulations.

## TITLE V—EDUCATIONAL ENHANCEMENTS

Sec. 501. Educational opportunity tax credit.

Sec. 502. School choice through portability.

Sec. 503. Special Economic Freedom Zone visas.

Sec. 504. Economic Freedom Zone educational savings accounts.

## TITLE VI—COMMUNITY ASSISTANCE AND REBUILDING

Sec. 601. Nonapplication of Davis-Bacon.

Sec. 602. Economic Freedom Zone charitable tax credit.

## TITLE VII—STATE AND COMMUNITY POLICY RECOMMENDATIONS

Sec. 701. Sense of the Senate concerning policy recommendations.

1 **SEC. 2. DEFINITIONS.**

2 In this division:

3 (1) CITY.—The term “city” means any unit of  
 4 general local government that is classified as a mu-  
 5 nicipality by the United States Census Bureau, or is  
 6 a town or township as determined jointly by the Di-  
 7 rector of the Office of Management and Budget and  
 8 the Secretary.

9 (2) COUNTY.—The term “county” means any  
 10 unit of local general government that is classified as  
 11 a county by the United States Census Bureau.

1           (3) ELIGIBLE ENTITY.—The term “eligible enti-  
2           ty” means a municipality or a zip code.

3           (4) MUNICIPALITY.—The term “municipality”  
4           has the meaning given that term in section 101(40)  
5           of title 11, United States Code.

6           (5) SECRETARY.—The term “Secretary” means  
7           the Secretary of the Treasury.

8           (6) ZIP CODE.—The term “zip code” means  
9           any area or region associated with or covered by a  
10          United States Postal zip code of not less than 5 dig-  
11          its.

12 **TITLE I—PROHIBITION OF FED-**  
13 **ERAL GOVERNMENT BAIL-**  
14 **OUTS**

15 **SEC. 101. PROHIBITION OF FEDERAL GOVERNMENT BAIL-**  
16 **OUTS.**

17           (a) DEFINITIONS.—In this section—

18           (1) the term “credit rating” has the meaning  
19           given that term in section 3(a)(60) of the Securities  
20           Exchange Act of 1934 (15 U.S.C. 78c(a)(60));

21           (2) the term “credit rating agency” has the  
22           meaning given that term in section 3(a)(61) of the  
23           Securities Exchange Act of 1934 (15 U.S.C.  
24           78c(a)(61));

1           (3) the term “Federal assistance” means the  
2 use of any advances from the Federal Reserve credit  
3 facility or discount window that is not part of a pro-  
4 gram or facility with broad-based eligibility under  
5 section 13(3)(A) of the Federal Reserve Act (12  
6 U.S.C. 343(3)(A)), Federal Deposit Insurance Cor-  
7 poration insurance, or guarantees for the purpose  
8 of—

9           (A) making a loan to, or purchasing any  
10 interest or debt obligation of, a municipality;

11           (B) purchasing the assets of a munici-  
12 pality;

13           (C) guaranteeing a loan or debt issuance  
14 of a municipality; or

15           (D) entering into an assistance arrange-  
16 ment, including a grant program, with an eligi-  
17 ble entity;

18           (4) the term “insolvent” means, with respect to  
19 an eligible entity, a financial condition such that the  
20 eligible entity—

21           (A) has any debt that has been given a  
22 credit rating lower than a “B” by a nationally  
23 recognized statistical rating organization or a  
24 credit rating agency;

1 (B) is not paying its debts as they become  
2 due, unless such debts are the subject of a bona  
3 fide dispute; or

4 (C) is unable to pay its debts as they be-  
5 come due; and

6 (5) the term “nationally recognized statistical  
7 rating organization” has the meaning given that  
8 term in section 3(a)(62) of the Securities Exchange  
9 Act of 1934 (15 U.S.C. 78c(a)(62)).

10 (b) PROHIBITION OF FEDERAL GOVERNMENT BAIL-  
11 OUTS.—

12 (1) PROHIBITION OF FEDERAL ASSISTANCE.—  
13 Notwithstanding any other provision of law, no Fed-  
14 eral assistance may be provided to an eligible entity  
15 (other than the assistance provided for in this divi-  
16 sion for an area that is designated as an Economic  
17 Free Zone).

18 (2) PROHIBITION OF FINANCIAL ASSISTANCE  
19 TO BANKRUPT OR INSOLVENT ELIGIBLE ENTITIES.—  
20 Except as provided in paragraph (1), the Federal  
21 Government may not provide financial assistance—

22 (A) to a municipality that is a debtor  
23 under chapter 9 of title 11, United States Code;  
24 or

25 (B) to a municipality that is insolvent.

1 **TITLE II—DESIGNATION OF ECO-**  
2 **NOMIC FREEDOM ZONES**  
3 **(EFZ)**

4 **SEC. 201. ELIGIBILITY REQUIREMENTS FOR ECONOMIC**  
5 **FREEDOM ZONE STATUS.**

6 (a) DESIGNATION OF MUNICIPALITIES AS ECONOMIC  
7 FREEDOM ZONES.—

8 (1) IN GENERAL.—An eligible entity that is a  
9 municipality may be designated by the Secretary as  
10 an Economic Freedom Zone if the municipality—

11 (A) meets the requirements under section  
12 109(c) of title 11, United States Code;

13 (B) is at risk of insolvency, as determined  
14 under paragraph (2);

15 (C) has been subject to receivership by the  
16 State within the last 3 years;

17 (D) has been a debtor under chapter 9 of  
18 title 11, United States Code within the last 3  
19 years; or

20 (E) has been subject to a financial advi-  
21 sory board, emergency manager, or similar enti-  
22 ty that—

23 (i) has arisen from the legislative or  
24 executive authority of the State; and

1                   (ii) exercises significant financial con-  
2                   trol over the finances of the entity within  
3                   the last 3 years.

4                   (2) AT RISK OF INSOLVENCY.—A municipality  
5                   is at risk of insolvency if—

6                   (A) an independent actuarial firm that has  
7                   been engaged by the municipality and that does  
8                   not have a conflict of interest with the munici-  
9                   pality, including any previous relationship with  
10                  the municipality, as determined by the Sec-  
11                  retary—

12                  (i) determines that the municipality is  
13                  insolvent (as defined in section 101(a)(4)  
14                  of title 11, United States Code); and

15                  (ii) submits its analysis regarding the  
16                  insolvency of the municipality to the Sec-  
17                  retary; and

18                  (B) the Secretary has reviewed and ap-  
19                  proved the determination of insolvency by the  
20                  actuarial firm.

21                  (b) DESIGNATION OF COUNTIES, CITIES, AND ZIP  
22                  CODES AS ECONOMIC FREEDOM ZONES.—

23                  (1) IN GENERAL.—An eligible entity may be  
24                  designated by the Secretary as an Economic Free-  
25                  dom Zone if the eligible entity—

1 (A) is a county or city that—

2 (i) is located in a non-metropolitan  
3 statistical area (as defined by the Director  
4 of the Office of Management and Budget);  
5 and

6 (ii) meets the requirements under  
7 paragraph (2); or

8 (B) is a zip code that meets the require-  
9 ments under paragraph (2).

10 (2) LOW ECONOMIC AND HIGH POVERTY  
11 AREA.—

12 (A) IN GENERAL.—An eligible entity shall  
13 be eligible for designation as an Economic Free-  
14 dom Zone under paragraph (1) if the eligible  
15 entity is designated by the Secretary as a low  
16 economic or high poverty area under subpara-  
17 graph (B).

18 (B) DESIGNATION AS LOW ECONOMIC AND  
19 HIGH POVERTY AREA.—The Secretary, after re-  
20 viewing supporting data as determined appro-  
21 priate, shall designate an eligible entity as a low  
22 economic or high poverty area if—

23 (i) the State or local government with  
24 jurisdiction over the eligible entity certifies  
25 that—

1 (I) the eligible entity is one of  
2 pervasive poverty, unemployment, and  
3 general distress;

4 (II) the average rate of unem-  
5 ployment within such eligible entity  
6 during the most recent 3-month pe-  
7 riod for which data is available is at  
8 least 1.5 times the national unemploy-  
9 ment rate for the period involved;

10 (III) during the most recent 3-  
11 month period, at least 30 percent of  
12 the residents of the eligible entity  
13 have incomes below the national pov-  
14 erty level; or

15 (IV) at least 70 percent of the  
16 residents of the eligible entity have in-  
17 comes below 80 percent of the median  
18 income of households within the juris-  
19 diction of the local government (as de-  
20 termined in the same manner as  
21 under section 119(b)(2) of the Hous-  
22 ing and Community Development Act  
23 of 1974); and

24 (ii) the Secretary determines that  
25 such a designation is appropriate.

1 (c) REFUSAL TO GRANT STATUS.—The Secretary  
 2 may refuse to designate an eligible entity as an Economic  
 3 Freedom Zone if the Secretary determines that any re-  
 4 quirement under this division, including any requirement  
 5 under subsection (a)(2), has not been satisfied.

6 **SEC. 202. APPLICATION AND DURATION OF DESIGNATION.**

7 (a) APPLICATION.—The Secretary shall develop pro-  
 8 cedures to enable an eligible entity to submit to the Sec-  
 9 retary an application for designation as an Economic  
 10 Freedom Zone under this title.

11 (b) DURATION.—The designation by the Secretary of  
 12 an eligible entity as a Economic Freedom Zone shall be  
 13 for a period of 10 years.

14 **TITLE III—FEDERAL TAX**  
 15 **INCENTIVES**

16 **SEC. 301. TAX INCENTIVES RELATED TO ECONOMIC FREE-**  
 17 **DOM ZONES.**

18 (a) IN GENERAL.—Chapter 1 of the Internal Rev-  
 19 enue Code of 1986 is amended by adding at the end the  
 20 following new subchapter:

21 **“Subchapter Z—Economic Freedom Zones**

“PART I—TAX INCENTIVES

“PART II—DEFINITIONS

22 **“PART I—TAX INCENTIVES**

“Sec. 1400V-1. Economic Freedom Zone individual flat tax.

“Sec. 1400V-2. Economic Freedom Zone corporate flat tax.

“Sec. 1400V-3. Zero percent capital gains rate.

“Sec. 1400V-4. Reduced payroll taxes.

“Sec. 1400V-5. Increase in expensing under section 179.

1 **“SEC. 1400V-1. ECONOMIC FREEDOM ZONE INDIVIDUAL**  
2 **FLAT TAX.**

3 “(a) IN GENERAL.—In the case of any individual  
4 whose principal residence (within the meaning of section  
5 121) is located in an Economic Freedom Zone for the tax-  
6 able year, in lieu of the tax imposed by section 1, there  
7 shall be imposed a tax equal to 5 percent of the taxable  
8 income of such taxpayer. For purposes of this title, the  
9 tax imposed by the preceding sentence shall be treated as  
10 a tax imposed by section 1.

11 “(b) JOINT RETURNS.—In the case of a joint return  
12 under section 6013, subsection (a) shall apply so long as  
13 either spouse has a principal residence (within the mean-  
14 ing of section 121) in an Economic Freedom Zone for the  
15 taxable year.

16 “(c) ALTERNATIVE MINIMUM TAX NOT TO APPLY.—  
17 The tax imposed by section 55 shall not apply to any tax-  
18 payer to whom subsection (a) applies.

19 **“SEC. 1400V-2. ECONOMIC FREEDOM ZONE CORPORATE**  
20 **FLAT TAX.**

21 “(a) IN GENERAL.—In the case of any corporation  
22 located in an Economic Freedom Zone for the taxable  
23 year, in lieu of the tax imposed by section 11, there shall  
24 be imposed a tax equal to 5 percent of the taxable income

1 of such corporation. For purposes of this title, the tax im-  
2 posed by the preceding sentence shall be treated as a tax  
3 imposed by section 11.

4 “(b) LIMITATION.—Subsection (a) shall not apply to  
5 any corporation for any taxable year if the adjusted gross  
6 income of such corporation for such taxable year exceeds  
7 \$500,000,000.

8 “(c) LOCATED.—For purposes of this section, a cor-  
9 poration shall be considered to be located in an Economic  
10 Freedom Zone if—

11 “(1) not less than 10 percent of the total gross  
12 income of such corporation is derived from the active  
13 conduct of a trade or business within an Economic  
14 Freedom Zone, or

15 “(2) at least 25 percent of the employees of  
16 such corporation are residents of an Economic Free-  
17 dom Zone.

18 “(d) ALTERNATIVE MINIMUM TAX NOT TO  
19 APPLY.—The tax imposed by section 55 shall not apply  
20 to any taxpayer to whom subsection (a) applies.

21 **“SEC. 1400V-3. ZERO PERCENT CAPITAL GAINS RATE.**

22 “(a) EXCLUSION.—Gross income shall not include  
23 qualified capital gain from the sale or exchange of—

24 “(1) any Economic Freedom Zone asset held  
25 for more than 5 years, or

1           “(2) any real property located in an Economic  
2       Freedom Zone.

3           “(b) ECONOMIC FREEDOM ZONE ASSET.—For pur-  
4       poses of this section—

5           “(1) IN GENERAL.—The term ‘Economic Free-  
6       dom Zone asset’ means—

7           “(A) any Economic Freedom Zone busi-  
8       ness stock,

9           “(B) any Economic Freedom Zone part-  
10      nership interest, and

11          “(C) any Economic Freedom Zone busi-  
12      ness property.

13          “(2) ECONOMIC FREEDOM ZONE BUSINESS  
14      STOCK.—

15          “(A) IN GENERAL.—The term ‘Economic  
16      Freedom Zone business stock’ means any stock  
17      in a domestic corporation if—

18           “(i) such stock is acquired by the tax-  
19          payer, before the date on which such cor-  
20          poration no longer qualifies as an Eco-  
21          nomic Freedom Zone business due to the  
22          lapse of 1 or more Economic Freedom  
23          Zones, at its original issue (directly or  
24          through an underwriter) solely in exchange  
25          for cash,

1 Freedom Zone business (or, in the case of a  
2 new partnership, such partnership was being  
3 organized for purposes of being an Economic  
4 Freedom Zone business), and

5 “(C) during substantially all of the tax-  
6 payer’s holding period for such interest, such  
7 partnership qualified as an Economic Freedom  
8 Zone business.

9 A rule similar to the rule of paragraph (2)(B) shall  
10 apply for purposes of this paragraph.

11 “(4) ECONOMIC FREEDOM ZONE BUSINESS  
12 PROPERTY.—

13 “(A) IN GENERAL.—The term ‘Economic  
14 Freedom Zone business property’ means tan-  
15 gible property if—

16 “(i) such property was acquired by  
17 the taxpayer by purchase (as defined in  
18 section 179(d)(2)) after the date on such  
19 taxpayer qualifies as an Economic Free-  
20 dom Zone business and before the date on  
21 which such taxpayer no longer qualifies as  
22 an Economic Freedom Zone business due  
23 to the lapse of 1 or more Economic Free-  
24 dom Zones,

1 “(ii) the original use of such property  
2 in the Economic Freedom Zone commences  
3 with the taxpayer, and

4 “(iii) during substantially all of the  
5 taxpayer’s holding period for such prop-  
6 erty, substantially all of the use of such  
7 property was in an Economic Freedom  
8 Zone business of the taxpayer.

9 “(B) SPECIAL RULE FOR BUILDINGS  
10 WHICH ARE SUBSTANTIALLY IMPROVED.—

11 “(i) IN GENERAL.—The requirements  
12 of clauses (i) and (ii) of subparagraph (A)  
13 shall be treated as met with respect to—

14 “(I) property which is substan-  
15 tially improved by the taxpayer before  
16 the date on which such taxpayer no  
17 longer qualifies as an Economic Free-  
18 dom Zone business due to the lapse of  
19 1 or more Economic Freedom Zones,  
20 and

21 “(II) any land on which such  
22 property is located.

23 “(ii) SUBSTANTIAL IMPROVEMENT.—  
24 For purposes of clause (i), property shall  
25 be treated as substantially improved by the

1 taxpayer only if, during any 24-month pe-  
2 riod beginning after the date on which the  
3 taxpayer qualifies as an Economic Free-  
4 dom Zone business additions to basis with  
5 respect to such property in the hands of  
6 the taxpayer exceed the greater of—

7 “(I) an amount equal to the ad-  
8 justed basis of such property at the  
9 beginning of such 24-month period in  
10 the hands of the taxpayer, or

11 “(II) \$5,000.

12 “(5) TREATMENT OF ECONOMIC FREEDOM  
13 ZONE TERMINATION.—Except as otherwise provided  
14 in this subsection, the termination of the designation  
15 of the Economic Freedom Zone shall be disregarded  
16 for purposes of determining whether any property is  
17 an Economic Freedom Zone asset.

18 “(6) TREATMENT OF SUBSEQUENT PUR-  
19 CHASERS, ETC.—The term ‘Economic Freedom Zone  
20 asset’ includes any property which would be an Eco-  
21 nomic Freedom Zone asset but for paragraph  
22 (2)(A)(i), (3)(A), or (4)(A)(i) or (ii) in the hands of  
23 the taxpayer if such property was an Economic  
24 Freedom Zone asset in the hands of a prior holder.

1           “(7) 5-YEAR SAFE HARBOR.—If any property  
2 ceases to be an Economic Freedom Zone asset by  
3 reason of paragraph (2)(A)(iii), (3)(C), or (4)(A)(iii)  
4 after the 5-year period beginning on the date the  
5 taxpayer acquired such property, such property shall  
6 continue to be treated as meeting the requirements  
7 of such paragraph; except that the amount of gain  
8 to which subsection (a) applies on any sale or ex-  
9 change of such property shall not exceed the amount  
10 which would be qualified capital gain had such prop-  
11 erty been sold on the date of such cessation.

12           “(c) ECONOMIC FREEDOM ZONE BUSINESS.—For  
13 purposes of this section, the term ‘Economic Freedom  
14 Zone business’ means any enterprise zone business (as de-  
15 fined in section 1397C), determined—

16           “(1) after the application of section 1400(e),

17           “(2) by substituting ‘80 percent’ for ‘50 per-  
18 cent’ in subsections (b)(2) and (c)(1) of section  
19 1397C, and

20           “(3) by treating only areas that are Economic  
21 Freedom Zones as an empowerment zone or enter-  
22 prise community.

23           “(d) OTHER DEFINITIONS AND SPECIAL RULES.—  
24 For purposes of this section—

1           “(1) QUALIFIED CAPITAL GAIN.—Except as  
2 otherwise provided in this subsection, the term  
3 ‘qualified capital gain’ means any gain recognized on  
4 the sale or exchange of—

5                   “(A) a capital asset, or

6                   “(B) property used in the trade or busi-  
7 ness (as defined in section 1231(b)).

8           “(2) CERTAIN GAIN NOT QUALIFIED.—The  
9 term ‘qualified capital gain’ shall not include any  
10 gain attributable to periods before the date on which  
11 the a business qualifies as an Economic Freedom  
12 Zone business or after the date that is 4 years after  
13 the date on which such business no longer qualifies  
14 as an Economic Freedom Zone business due to the  
15 lapse of 1 or more Economic Freedom Zones.

16           “(3) CERTAIN GAIN NOT QUALIFIED.—The  
17 term ‘qualified capital gain’ shall not include any  
18 gain which would be treated as ordinary income  
19 under section 1245 or under section 1250 if section  
20 1250 applied to all depreciation rather than the ad-  
21 ditional depreciation.

22           “(4) INTANGIBLES NOT INTEGRAL PART OF  
23 ECONOMIC FREEDOM ZONE BUSINESS.—In the case  
24 of gain described in subsection (a)(1), the term  
25 ‘qualified capital gain’ shall not include any gain

1       which is attributable to an intangible asset which is  
2       not an integral part of an Economic Freedom Zone  
3       business.

4               “(5) RELATED PARTY TRANSACTIONS.—The  
5       term ‘qualified capital gain’ shall not include any  
6       gain attributable, directly or indirectly, in whole or  
7       in part, to a transaction with a related person. For  
8       purposes of this paragraph, persons are related to  
9       each other if such persons are described in section  
10      267(b) or 707(b)(1).

11      “(e) SALES AND EXCHANGES OF INTERESTS IN  
12      PARTNERSHIPS AND S CORPORATIONS WHICH ARE ECO-  
13      NOMIC FREEDOM ZONE BUSINESSES.—In the case of the  
14      sale or exchange of an interest in a partnership, or of  
15      stock in an S corporation, which was an Economic Free-  
16      dom Zone business during substantially all of the period  
17      the taxpayer held such interest or stock, the amount of  
18      qualified capital gain shall be determined without regard  
19      to—

20               “(1) any gain which is attributable to an intan-  
21      gible asset which is not an integral part of an Eco-  
22      nomic Freedom Zone business, and

23               “(2) any gain attributable to periods before the  
24      date on which the a business qualifies as an Eco-  
25      nomic Freedom Zone business or after the date that

1 is 4 years after the date on which such business no  
2 longer qualifies as an Economic Freedom Zone busi-  
3 ness due to the lapse of 1 or more Economic Free-  
4 dom Zones.

5 **“SEC. 1400V-4. REDUCED PAYROLL TAXES.**

6 “(a) IN GENERAL.—

7 “(1) EMPLOYEES.—The rate of tax under  
8 3101(a) (including for purposes of determining the  
9 applicable percentage under sections 3201(a) and  
10 3211(a)(1)) shall be 4.2 percent for any remunera-  
11 tion received during any period in which the individ-  
12 ual’s principal residence (within the meaning of sec-  
13 tion 121) is located in an Economic Freedom Zone.

14 “(2) EMPLOYERS.—

15 “(A) IN GENERAL.—The rate of tax under  
16 section 3111(a) (including for purposes of de-  
17 termining the applicable percentage under sec-  
18 tions 3221(a)) shall be 4.2 percent with respect  
19 to remuneration paid for qualified services dur-  
20 ing any period in which the employer is located  
21 in an Economic Freedom Zone.

22 “(B) QUALIFIED SERVICES.—For purposes  
23 of this section, the term ‘qualified services’  
24 means services performed—

1                   “(i) in a trade or business of a quali-  
2                   fied employer, or

3                   “(ii) in the case of a qualified em-  
4                   ployer exempt from tax under section  
5                   501(a) of the Internal Revenue Code of  
6                   1986, in furtherance of the activities re-  
7                   lated to the purpose or function consti-  
8                   tuting the basis of the employer’s exemp-  
9                   tion under section 501 of such Code.

10                   “(C) LOCATION OF EMPLOYER.—For pur-  
11                   poses of this paragraph, the location of an em-  
12                   ployer shall be determined in the same manner  
13                   as under section 1400V–2(e).

14                   “(3) SELF-EMPLOYED INDIVIDUALS.—The rate  
15                   of tax under section 1401(a) shall be 8.40 percent  
16                   any taxable year in which such individual was lo-  
17                   cated (determined under section 1400V–2(e) as if  
18                   such individual were a corporation) in an Economic  
19                   Freedom Zone.

20                   “(b) TRANSFERS OF FUNDS.—

21                   “(1) TRANSFERS TO FEDERAL OLD-AGE AND  
22                   SURVIVORS INSURANCE TRUST FUND.—There are  
23                   hereby appropriated to the Federal Old-Age and  
24                   Survivors Trust Fund and the Federal Disability In-  
25                   surance Trust Fund established under section 201

1 of the Social Security Act (42 U.S.C. 401) amounts  
2 equal to the reduction in revenues to the Treasury  
3 by reason of the application of subsection (a).  
4 Amounts appropriated by the preceding sentence  
5 shall be transferred from the general fund at such  
6 times and in such manner as to replicate to the ex-  
7 tent possible the transfers which would have oc-  
8 curred to such Trust Fund had such amendments  
9 not been enacted.

10 “(2) TRANSFERS TO SOCIAL SECURITY EQUIVA-  
11 LENT BENEFIT ACCOUNT.—There are hereby appro-  
12 priated to the Social Security Equivalent Benefit Ac-  
13 count established under section 15A(a) of the Rail-  
14 road Retirement Act of 1974 (45 U.S.C. 231n–1(a))  
15 amounts equal to the reduction in revenues to the  
16 Treasury by reason of the application of paragraphs  
17 (1) and (2) of subsection (a). Amounts appropriated  
18 by the preceding sentence shall be transferred from  
19 the general fund at such times and in such manner  
20 as to replicate to the extent possible the transfers  
21 which would have occurred to such Account had  
22 such amendments not been enacted.

23 “(3) COORDINATION WITH OTHER FEDERAL  
24 LAWS.—For purposes of applying any provision of  
25 Federal law other than the provisions of the Internal

1 Revenue Code of 1986, the rate of tax in effect  
2 under section 3101(a) shall be determined without  
3 regard to the reduction in such rate under this sec-  
4 tion.

5 **“SEC. 1400V-5. INCREASE IN EXPENSING UNDER SECTION**  
6 **179.**

7 “(a) IN GENERAL.—In the case of an Economic  
8 Freedom Zone business, for purposes of section 179—

9 “(1) the limitation under section 179(b)(1)  
10 shall be increased by the lesser of—

11 “(A) 200 percent of the amount in effect  
12 under such section (determined without regard  
13 to this section), or

14 “(B) the cost of section 179 property  
15 which is Economic Freedom Zone business  
16 property placed in service during the taxable  
17 year, and

18 “(2) the amount taken into account under sec-  
19 tion 179(b)(2) with respect to any section 179 prop-  
20 erty which is Economic Freedom Zone business  
21 property shall be 50 percent of the cost thereof.

22 “(b) ECONOMIC FREEDOM ZONE BUSINESS PROP-  
23 erty.—For purposes of this section, the term ‘Economic  
24 Freedom Zone business property’ has the meaning given  
25 such term under section 1400V-3(b)(4), except that for

1 purposes of subparagraph (A)(ii) thereof, if property is  
2 sold and leased back by the taxpayer within 3 months  
3 after the date such property was originally placed in serv-  
4 ice, such property shall be treated as originally placed in  
5 service not earlier than the date on which such property  
6 is used under the leaseback.

7 “(c) RECAPTURE.—Rules similar to the rules under  
8 section 179(d)(10) shall apply with respect to any quali-  
9 fied zone property which ceases to be used in an empower-  
10 ment zone by an enterprise zone business.

## 11 **“PART II—DEFINITIONS**

“Sec. 1400V-6. Economic Freedom Zone.

### 12 **“SEC. 1400V-6. ECONOMIC FREEDOM ZONE.**

13 “For purposes of this subchapter, the term ‘Eco-  
14 nomic Freedom Zone’ means any area which is an Eco-  
15 nomic Freedom Zone under title II of the Economic Free-  
16 dom Zone Act.”.

17 (b) CLERICAL AMENDMENT.—The table of sub-  
18 chapters for chapter 1 of such Code is amended by insert-  
19 ing after the item relating to subchapter Y the following  
20 new item:

“SUBCHAPTER Z—ECONOMIC FREEDOM ZONES”.

21 (c) EFFECTIVE DATE.—The amendments made by  
22 this section shall apply to taxable years beginning after  
23 the date of the enactment of this Act.

1                   **TITLE IV—FEDERAL**  
2                   **REGULATORY REDUCTIONS**

3   **SEC. 401. SUSPENSION OF CERTAIN LAWS AND REGULA-**  
4                   **TIONS.**

5           (a) ENVIRONMENTAL PROTECTION AGENCY.—For  
6 each area designated as an Economic Freedom Zone  
7 under this division, the Administrator of the Environ-  
8 mental Protection Agency shall not enforce, with respect  
9 to that Economic Freedom Zone, and the Economic Free-  
10 dom Zone shall be exempt from compliance with—

11           (1) part D of the Clean Air Act (42 U.S.C.  
12           7501 et seq.) (including any regulations promul-  
13           gated under that part);

14           (2) section 402 of the Federal Water Pollution  
15           Control Act (33 U.S.C. 1342);

16           (3) sections 139, 168, 169, 326, and 327 of  
17           title 23, United States Code;

18           (4) section 304 of title 49, United States Code;

19           and

20           (5) sections 1315 through 1320 of Public Law  
21           112–141 (126 Stat. 549).

22           (b) DEPARTMENT OF THE INTERIOR.—

23           (1) WILD AND SCENIC RIVERS.—For each area  
24           designated as an Economic Freedom Zone under  
25           this division, the Secretary of the Interior shall not

1 enforce, with respect to that Economic Freedom  
2 Zone, and the Economic Freedom Zone shall be ex-  
3 empt from compliance with the Wild and Scenic Riv-  
4 ers Act (16 U.S.C. 1271 et seq.).

5 (2) NATIONAL HERITAGE AREAS.—For the pe-  
6 riod beginning on the date of enactment of this Act  
7 and ending on the date on which an area is removed  
8 from designation as an Economic Freedom Zone,  
9 any National Heritage Area located within that Eco-  
10 nomic Freedom Zone shall not be considered to be  
11 a National Heritage Area and any applicable Fed-  
12 eral law (including regulations) relating to that Na-  
13 tional Heritage Area shall not apply.

14 **TITLE V—EDUCATIONAL**  
15 **ENHANCEMENTS**

16 **SEC. 501. EDUCATIONAL OPPORTUNITY TAX CREDIT.**

17 (a) IN GENERAL.—Subpart A of part IV of sub-  
18 chapter A of chapter 1 of the Internal Revenue Code of  
19 1986 is amended by inserting after section 25D the fol-  
20 lowing new section:

21 **“SEC. 25E. CREDIT FOR QUALIFIED ELEMENTARY AND SEC-**  
22 **ONDARY EDUCATION EXPENSES.**

23 “(a) IN GENERAL.—In the case of an individual,  
24 there shall be allowed as a credit against the tax imposed  
25 by this chapter for the taxable year an amount equal to

1 the qualified elementary and secondary education expenses  
2 of an eligible student.

3 “(b) LIMITATION.—The amount taken into account  
4 under subsection (a) with respect to any student for any  
5 taxable year shall not exceed \$5,000.

6 “(c) DEFINITIONS.—For purposes of this section—

7 “(1) QUALIFIED ELEMENTARY AND SECONDARY  
8 EDUCATION EXPENSES.—The term ‘qualified ele-  
9 mentary and secondary education expenses’ has the  
10 meaning given such term under section 530(b)(3).

11 “(2) ELIGIBLE STUDENT.—The term ‘eligible  
12 student’ means any student who—

13 “(A) is enrolled in, or attends, any public,  
14 private, or religious school (as defined in section  
15 530(b)(3)(B)), and

16 “(B) whose principal residence (within the  
17 meaning of section 123) is located in an Eco-  
18 nomic Freedom Zone.

19 “(3) ECONOMIC FREEDOM ZONE.—The term  
20 ‘Economic Freedom Zone’ means any area which is  
21 an Economic Freedom Zone under title II of the  
22 Economic Freedom Zone Act.”.

23 (b) CLERICAL AMENDMENT.—The table of sections  
24 for subpart A of part IV of subchapter A of chapter 1

1 of such Code is amended by inserting after the item relat-  
2 ing to section 25D the following new item:

“Sec. 25E. Credit for qualified elementary and secondary education expenses.”.

3 (c) **EFFECTIVE DATE.**—The amendments made by  
4 this section shall apply to expenditures made in taxable  
5 years beginning after the date of the enactment of this  
6 Act.

7 **SEC. 502. SCHOOL CHOICE THROUGH PORTABILITY.**

8 (a) **IN GENERAL.**—Subpart 2 of part A of title I of  
9 the Elementary and Secondary Education Act of 1965 (20  
10 U.S.C. 6331 et seq.) is amended by adding at the end  
11 the following:

12 **“SEC. 1128. SCHOOL CHOICE THROUGH PORTABILITY.**

13 “(a) **AUTHORIZATION.**—

14 “(1) **IN GENERAL.**—Notwithstanding sections  
15 1124, 1124A, and 1125 and any other provision of  
16 law, and to the extent permitted under State law, a  
17 State educational agency may allocate grant funds  
18 under this subpart among the local educational  
19 agencies in the State based on the formula described  
20 in paragraph (2).

21 “(2) **FORMULA.**—A State educational agency  
22 may allocate grant funds under this subpart for a  
23 fiscal year among the local educational agencies in  
24 the State in proportion to the number of eligible  
25 children enrolled in public schools served by the local

1 educational agency and enrolled in State-accredited  
2 private schools within the local educational agency's  
3 geographic jurisdiction, for the most recent fiscal  
4 year for which satisfactory data are available, com-  
5 pared to the number of such children in all such  
6 local educational agencies for that fiscal year.

7 “(b) ELIGIBLE CHILD.—

8 “(1) IN GENERAL.—In this section, the term  
9 ‘eligible child’ means a child—

10 “(A) from a family with an income below  
11 the poverty level, on the basis of the most re-  
12 cent satisfactory data published by the Depart-  
13 ment of Commerce; and

14 “(B) who resides in an Economic Freedom  
15 Zone as designated under title II of the Eco-  
16 nomic Freedom Zones Act of 2016 .

17 “(2) CRITERIA OF POVERTY.—In determining  
18 the families with incomes below the poverty level for  
19 the purposes of paragraph (2), a State educational  
20 agency shall use the criteria of poverty used by the  
21 Census Bureau in compiling the most recent decen-  
22 nial census.

23 “(3) IDENTIFICATION OF ELIGIBLE CHIL-  
24 DREN.—On an annual basis, on a date to be deter-  
25 mined by the State educational agency, each local

1 educational agency that receives grant funding in ac-  
2 cordance with subsection (a) shall inform the State  
3 educational agency of the number of eligible children  
4 enrolled in public schools served by the local edu-  
5 cational agency and enrolled in State-accredited pri-  
6 vate schools within the local educational agency's ge-  
7 ographic jurisdiction.

8 “(c) DISTRIBUTION TO SCHOOLS.—Each local edu-  
9 cational agency that receives grant funding under sub-  
10 section (a) shall distribute such funds to the public schools  
11 served by the local educational agency and State-accred-  
12 ited private schools with the local educational agency's ge-  
13 ographic jurisdiction—

14 “(1) based on the number of eligible children  
15 enrolled in such schools; and

16 “(2) in the manner that would, in the absence  
17 of such Federal funds, supplement the funds made  
18 available from the non-Federal resources for the  
19 education of pupils participating in programs under  
20 this part, and not to supplant such funds.”.

21 (b) TABLE OF CONTENTS.—The table of contents in  
22 section 2 of the Elementary and Secondary Education Act  
23 of 1965 is amended by inserting after the item relating  
24 to section 1127 the following:

“Sec. 1128. School choice through portability.”.

1 **SEC. 503. SPECIAL ECONOMIC FREEDOM ZONE VISAS.**

2 (a) DEFINITIONS.—In this section:

3 (1) ABANDONED; DILAPIDATED.—The terms  
4 “abandoned” and “dilapidated” shall be defined by  
5 the States in accordance with the provisions of this  
6 division.

7 (2) FULL-TIME EMPLOYMENT.—The term “full-  
8 time employment” means employment in a position  
9 that requires at least 35 hours of service per week  
10 at any time, regardless of who fills the position.

11 (b) PURPOSE.—The purpose of this section is to fa-  
12 cilitate increased investment and enhanced human capital  
13 in Economic Freedom Zones through the issuance of spe-  
14 cial regional visas.

15 (c) AUTHORIZATION.—The Secretary of Homeland  
16 Security, in collaboration with the Secretary of Labor,  
17 may issue Special Economic Freedom Zone Visas, in a  
18 number determined by the Governor of each State, in con-  
19 sultation with local officials in regions designated by the  
20 Secretary of Treasury as Economic Freedom Zones, to au-  
21 thorize qualified aliens to enter the United States for the  
22 purpose of—

23 (1) engaging in a new commercial enterprise  
24 (including a limited partnership)—

25 (A) in which such alien has invested, or is  
26 actively in the process of investing, capital in an

1 amount not less than the amount specified in  
2 subsection (d); and

3 (B) which will benefit the region des-  
4 ignated as an Economic Freedom Zone by cre-  
5 ating full-time employment of not fewer than 5  
6 United States citizens, aliens lawfully admitted  
7 for permanent residence, or other immigrants  
8 lawfully authorized to be employed in the  
9 United States (excluding the alien and the  
10 alien's immediate family);

11 (2) engaging in the purchase and renovation of  
12 dilapidated or abandoned properties or residences  
13 (as determined by State and local officials) in which  
14 such alien has invested, or is actively in the process  
15 of investing, in the ownership of such properties or  
16 residences; or

17 (3) residing and working in an Economic Free-  
18 dom Zone.

19 (d) EFFECTIVE PERIOD.—A visa issued to an alien  
20 under this section shall expire on the later of—

21 (1) the date on which the relevant Economic  
22 Freedom Zone loses such designation; or

23 (2) the date that is 5 years after the date on  
24 which such visa was issued to such alien.

25 (e) CAPITAL AND EDUCATIONAL REQUIREMENTS.—

1           (1) NEW COMMERCIAL ENTERPRISES.—Except  
2 as otherwise provided under this section, the min-  
3 imum amount of capital required to comply with  
4 subsection (c)(1)(A) shall be \$50,000.

5           (2) RENOVATION OF DILAPIDATED OR ABAN-  
6 DONED PROPERTIES.—An alien is not in compliance  
7 with subsection (c)(2) unless the alien—

8                 (A) purchases a dilapidated or abandoned  
9 property in an Economic Freedom Zone; and

10                (B) not later than 18 months after such  
11 purchase, invests not less than \$25,000 to re-  
12 build, rehabilitate, or repurpose the property.

13           (3) VERIFICATION.—A visa issued under sub-  
14 section (c) shall not remain in effect for more than  
15 2 years unless the Secretary of Homeland Security  
16 has verified that the alien has complied with the re-  
17 quirements described in subsection (c).

18           (4) EDUCATION AND SKILL REQUIREMENTS.—  
19 An alien is not in compliance with subsection (c)(3)  
20 unless the alien possesses—

21                 (A) a bachelor's degree (or its equivalent)  
22 or an advanced degree;

23                 (B) a degree or specialty certification  
24 that—

1 (i) is required for the job the alien will  
2 be performing; and

3 (ii) is specific to an industry or job  
4 that is so complex or unique that it can be  
5 performed only by an individual with the  
6 specialty certification;

7 (C)(i) the knowledge required to perform  
8 the duties of the job the alien will be per-  
9 forming; and

10 (ii) the nature of the specific duties is so  
11 specialized and complex that such knowledge is  
12 usually associated with attainment of a bach-  
13 elor's or higher degree; or

14 (D) a skill or talent that would benefit the  
15 Economic Freedom Zone.

16 (f) ADDITIONAL PROVISIONS.—

17 (1) GEOGRAPHIC LIMITATION.—An alien who  
18 has been issued a visa under this section is not per-  
19 mitted to live or work outside of an Economic Free-  
20 dom Zone.

21 (2) RESCISSION.—A visa issued under this sec-  
22 tion shall be rescinded if the visa holder resides or  
23 works outside of an Economic Freedom Zone or oth-  
24 erwise fails to comply with the provisions of this sec-  
25 tion.

1           (3) OTHER VISAS.—An alien who has been  
2 issued a visa under this section may apply for any  
3 other visa for which the alien is eligible in order to  
4 pursue employment outside of an Economic Freedom  
5 Zone.

6           (g) ADJUSTMENT OF STATUS.—The Secretary of  
7 Homeland Security may adjust the status of an alien who  
8 has been issued a visa under this section to that of an  
9 alien lawfully admitted for permanent residence, without  
10 numerical limitation, if the alien—

11           (1) has fully complied with the requirements set  
12 forth in this section for at least 5 years;

13           (2) submits a completed application to the Sec-  
14 retary; and

15           (3) is not inadmissible to the United States  
16 based on any of the factors set forth in section  
17 212(a) of the Immigration and Nationality Act (8  
18 U.S.C. 1182(a)).

19 **SEC. 504. ECONOMIC FREEDOM ZONE EDUCATIONAL SAV-**  
20 **INGS ACCOUNTS.**

21           (a) IN GENERAL.—Part VIII of subchapter F of  
22 chapter 1 of the Internal Revenue Code of 1986 is amend-  
23 ed by adding at the end the following new section:

1 **“SEC. 530A. ECONOMIC FREEDOM ZONE EDUCATIONAL SAV-**  
2 **INGS ACCOUNTS.**

3 “(a) IN GENERAL.—Except as provided in this sec-  
4 tion, an Economic Freedom Zone educational savings ac-  
5 count shall be treated for purposes of this title in the same  
6 manner as a Coverdell education savings account.

7 “(b) DEFINITIONS.—For purposes of this section—

8 “(1) ECONOMIC FREEDOM ZONE EDUCATIONAL  
9 SAVINGS ACCOUNT.—The term ‘Economic Freedom  
10 Zone educational savings account’ means a trust cre-  
11 ated or organized in the United States exclusively  
12 for the purpose of paying the qualified education ex-  
13 penses (as defined in section 530(b)(2)) of an indi-  
14 vidual who is the designated beneficiary of the trust  
15 (and designated as an Economic Freedom Zone edu-  
16 cational saving account at the time created or orga-  
17 nized) and who is a qualified individual at the time  
18 such trust is established, but only if the written gov-  
19 erning instrument creating the trust meets the fol-  
20 lowing requirements:

21 “(A) No contribution will be accepted—

22 “(i) unless it is in cash,

23 “(ii) after the date on which such ben-  
24 eficiary attains age 25, or

25 “(iii) except in the case of rollover  
26 contributions, if such contribution would

1 result in aggregate contributions for the  
2 taxable year exceeding \$10,000.

3 “(B) No contribution shall be accepted at  
4 any time in which the designated beneficiary is  
5 not a qualified individual.

6 “(C) The trust meets the requirements of  
7 subparagraphs (B), (C), (D), and (E) of section  
8 530(b)(1).

9 The age limitations in subparagraphs (A)(ii), sub-  
10 paragraph (E) of section 530(b)(1), and paragraphs  
11 (5) and (6) of section 530(d), shall not apply to any  
12 designated beneficiary with special needs (as deter-  
13 mined under regulations prescribed by the Sec-  
14 retary).

15 “(2) QUALIFIED INDIVIDUAL.—The term ‘quali-  
16 fied individual’ means any individual whose principal  
17 residence (within the meaning of section 121) is lo-  
18 cated in an Economic Freedom Zone (as defined in  
19 section 1400V–6).

20 “(c) DEDUCTION FOR CONTRIBUTIONS.—

21 “(1) IN GENERAL.—There shall be allowed as a  
22 deduction under part VII of subchapter B of this  
23 chapter an amount equal to the aggregate amount of  
24 contributions made by the taxpayer to any Economic

1 Freedom Zone educational savings account during  
2 the taxable year.

3 “(2) LIMITATION.—The amount of the deduc-  
4 tion allowed under paragraph (1) for any taxpayer  
5 for any taxable year shall not exceed \$40,000.

6 “(3) NO DEDUCTION FOR ROLLOVER CON-  
7 TRIBUTIONS.—No deduction shall be allowed under  
8 paragraph (1) for any rollover contribution described  
9 in section 530(d)(5).

10 “(d) OTHER RULES.—

11 “(1) NO INCOME LIMIT.—In the case of an  
12 Economic Freedom Zone educational savings ac-  
13 count, subsection (c) of section 530 shall not apply.

14 “(2) CHANGE IN BENEFICIARIES.—Notwith-  
15 standing paragraph (6) of section 530(b), a change  
16 in the beneficiary of an Economic Freedom Zone  
17 education savings account shall be treated as a dis-  
18 tribution unless the new beneficiary is a qualified in-  
19 dividual.”.

20 (b) CLERICAL AMENDMENT.—The table of sections  
21 for part VIII of subchapter F of chapter 1 of such Code  
22 is amended by adding at the end the following new item:

“Sec. 530A. Economic Freedom Zone educational savings accounts.”.

1                   **TITLE VI—COMMUNITY**  
2                   **ASSISTANCE AND REBUILDING**

3   **SEC. 601. NONAPPLICATION OF DAVIS-BACON.**

4           The wage rate requirements of subchapter IV of  
5 chapter 31 of title 40, United States Code (commonly re-  
6 ferred to as the “Davis-Bacon Act”), shall not apply with  
7 respect to any area designated as an Economic Freedom  
8 Zone under this division.

9   **SEC. 602. ECONOMIC FREEDOM ZONE CHARITABLE TAX**  
10                   **CREDIT.**

11           (a) IN GENERAL.—Section 170 is amended by redес-  
12 ignating subsection (p) as subsection (q) and by inserting  
13 after subsection (o) the following new subsection:

14           “(o) ELECTION TO TREAT CONTRIBUTIONS FOR  
15 ECONOMIC FREEDOM ZONE CHARITIES AS A CREDIT.—

16                   “(1) IN GENERAL.—In the case of an indi-  
17 vidual, at the election of the taxpayer, so much of  
18 the deduction allowed under subsection (a) (deter-  
19 mined without regard to this subsection) which is at-  
20 tributable to Economic Freedom Zone charitable  
21 contributions—

22                           “(A) shall be allowed as a credit against  
23 the tax imposed by this chapter for the taxable  
24 year, and

1           “(B) shall not be allowed as a deduction  
2           for such taxable year under subsection (a).

3           Any amount allowable as a credit under this sub-  
4           section shall be treated as a credit allowed under  
5           subpart A of part IV of subchapter A for purposes  
6           of this title.

7           “(2) AMOUNT ATTRIBUTABLE TO ECONOMIC  
8           FREEDOM ZONE CHARITABLE CONTRIBUTIONS.—For  
9           purposes of paragraph (1)—

10           “(A) IN GENERAL.—In any case in which  
11           the total charitable contributions of a taxpayer  
12           for a taxable year exceed the contribution base,  
13           the amount of Economic Freedom Zone chari-  
14           table contributions taken into account under  
15           paragraph (1) shall be the amount which bears  
16           the same ratio to the total charitable contribu-  
17           tions made by the taxpayer during such taxable  
18           year as the amount of the deduction allowed  
19           under subsection (a) (determined without re-  
20           gard to this subsection and after application of  
21           subsection (b)) bears to the total charitable con-  
22           tributions made by the taxpayer for such tax-  
23           able year.

24           “(B) CARRYOVERS.—In the case of any  
25           contribution carried from a preceding taxable

1 year under subsection (d), such amount shall be  
2 treated as attributable to an Economic Free-  
3 dom Zone charitable contribution in the amount  
4 that bears the same ratio to the total amount  
5 carried from preceding taxable years under sub-  
6 section (d) as the amount of Economic Free-  
7 dom Zone charitable contributions not allowed  
8 as a deduction under subsection (a) (other than  
9 by reason of this subsection) for the preceding  
10 5 taxable year bears to total amount carried  
11 from preceding taxable years under subsection  
12 (d).

13 “(3) ECONOMIC FREEDOM ZONE CHARITABLE  
14 CONTRIBUTION.—The term ‘Economic Freedom  
15 Zone charitable contribution’ means any contribu-  
16 tion to a corporation, trust, or community chest  
17 fund, or foundation described in subsection (c)(2),  
18 but only if—

19 “(A) such entity is created or organized  
20 exclusively for—

21 “(i) religious purposes,

22 “(ii) educational purposes, or

23 “(iii) any of the following charitable  
24 purposes: providing educational scholar-  
25 ships, providing shelters for homeless indi-

1           viduals, or setting up or maintaining food  
2           banks,

3           “(B) the primary mission of such entity is  
4           serving individuals in an Economic Freedom  
5           Zone,

6           “(C) the entity maintains accountability to  
7           residents of such Economic Freedom Zone  
8           through their representation on any governing  
9           board of the entity or any advisory board to the  
10          entity, and

11          “(D) the entity is certified by the Sec-  
12          retary for purposes of this subsection.

13          Such term shall not include any contribution made  
14          to an entity described in the preceding sentence  
15          after the date in which the designation of the Eco-  
16          nomic Freedom Zone serviced by such entity lapses.

17          “(4) ECONOMIC FREEDOM ZONE.—The term  
18          ‘Economic Freedom Zone’ means any area which is  
19          an Economic Freedom Zone under title II of the  
20          Economic Freedom Zone Act.”.

21          (b) EFFECTIVE DATE.—The amendments made by  
22          this section shall apply to taxable years beginning after  
23          the date of the enactment of this Act.

1 **TITLE VII—STATE AND COMMU-**  
2 **NITY POLICY RECOMMENDA-**  
3 **TIONS**

4 **SEC. 701. SENSE OF THE SENATE CONCERNING POLICY**  
5 **RECOMMENDATIONS.**

6 It is the sense of the Senate that State and local gov-  
7 ernments should review and adopt the following policy rec-  
8 ommendations:

9 (1) PENSION REFORM.—State and local govern-  
10 ments should—

11 (A) implement reforms to address any fis-  
12 cal shortfall in public pension funding, includ-  
13 ing utilizing accrual accounting methods, such  
14 as those reforms undertaken by the private sec-  
15 tor pension funds; and

16 (B) restructure and renegotiate any public  
17 pension fund that is deemed to be insolvent or  
18 underfunded, including adopting defined con-  
19 tribution retirement systems.

20 (2) TAXES.—State and local governments  
21 should reduce jurisdictional tax rates below the na-  
22 tional average in order to help facilitate capital in-  
23 vestment and economic growth, particularly in com-  
24 bination with the provisions of this division.

1           (3) EDUCATION.—State and local governments  
2           should adopt school choice options to provide chil-  
3           dren and parents more educational choices, particu-  
4           larly in impoverished areas.

5           (4) COMMUNITIES.—State and local govern-  
6           ments should adopt right-to-work laws to allow more  
7           competitiveness and more flexibility for businesses to  
8           expand.

9           (5) REGULATIONS.—State and local govern-  
10          ments should streamline the regulatory burden on  
11          families and businesses, including streamlining the  
12          opportunities for occupational licensing.

13          (6) ABANDONED STRUCTURES.—State and local  
14          governments should consider the following options to  
15          reduce or fix areas with abandoned properties or  
16          residences:

17                 (A) In the case of foreclosures, tax notifi-  
18                 cations should be sent to both the lien holder (if  
19                 different than the homeowner) and the home-  
20                 owner.

21                 (B) Where State constitutions permit,  
22                 property tax abatement or credits should be  
23                 provided for individuals who purchase or invest  
24                 in abandoned or dilapidated properties.

1           (C) Non-profit or charity demolition enti-  
2           ties should be permitted or encouraged to help  
3           remove abandoned properties.

4           (D) Government or municipality fees and  
5           penalties should be limited, and be proportional  
6           to the outstanding tax amount and the ability  
7           to pay.

8           (E) The sale of tax liens to third parties  
9           should be reviewed, and where available, should  
10          prohibit the selling of tax liens below a certain  
11          threshold (for example the prohibition of the  
12          sale of tax liens to third parties under \$1,000).

AMENDMENT NO.

Calendar No.

Purpose: To add certain provisions relating to natural resources.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by Ms. MURKOWSKI (for herself and Ms. CANTWELL) to the amendment (No. 2953) proposed by Ms. MURKOWSKI

Viz:

1 At the end, add the following:

2 **TITLE VI—NATURAL RESOURCES**

3 **Subtitle A—Land Conveyances and**

4 **Related Matters**

5 **SEC. 6001. ARAPAHO NATIONAL FOREST BOUNDARY AD-**

6 **JUSTMENT.**

7 (a) IN GENERAL.—The boundary of the Arapaho Na-  
8 tional Forest in the State of Colorado is adjusted to incor-  
9 porate the approximately 92.95 acres of land generally de-  
10 picted as “The Wedge” on the map entitled “Arapaho Na-  
11 tional Forest Boundary Adjustment” and dated November

1 6, 2013, and described as lots three, four, eight, and nine  
2 of section 13, Township 4 North, Range 76 West, Sixth  
3 Principal Meridian, Colorado. A lot described in this sub-  
4 section may be included in the boundary adjustment only  
5 after the Secretary of Agriculture obtains written permis-  
6 sion for such action from the lot owner or owners.

7 (b) BOWEN GULCH PROTECTION AREA.—The Sec-  
8 retary of Agriculture shall include all Federal land within  
9 the boundary described in subsection (a) in the Bowen  
10 Gulch Protection Area established under section 6 of the  
11 Colorado Wilderness Act of 1993 (16 U.S.C. 539j).

12 (c) LAND AND WATER CONSERVATION FUND.—For  
13 purposes of section 200306(a)(2)(B)(i) of title 54, United  
14 States Code, the boundaries of the Arapaho National For-  
15 est, as modified under subsection (a), shall be considered  
16 to be the boundaries of the Arapaho National Forest as  
17 in existence on January 1, 1965.

18 (d) PUBLIC MOTORIZED USE.—Nothing in this sec-  
19 tion opens privately owned lands within the boundary de-  
20 scribed in subsection (a) to public motorized use.

21 (e) ACCESS TO NON-FEDERAL LANDS.—Notwith-  
22 standing the provisions of section 6(f) of the Colorado Wil-  
23 derness Act of 1993 (16 U.S.C. 539j(f)) regarding motor-  
24 ized travel, the owners of any non-Federal lands within  
25 the boundary described in subsection (a) who historically

1 have accessed their lands through lands now or hereafter  
2 owned by the United States within the boundary described  
3 in subsection (a) shall have the continued right of motor-  
4 ized access to their lands across the existing roadway.

5 **SEC. 6002. LAND CONVEYANCE, ELKHORN RANCH AND**  
6 **WHITE RIVER NATIONAL FOREST, COLO-**  
7 **RADO.**

8 (a) LAND CONVEYANCE REQUIRED.—Consistent with  
9 the purpose of the Act of March 3, 1909 (43 U.S.C. 772),  
10 all right, title, and interest of the United States (subject  
11 to subsection (b)) in and to a parcel of land consisting  
12 of approximately 148 acres as generally depicted on the  
13 map entitled “Elkhorn Ranch Land Parcel—White River  
14 National Forest” and dated March 2015 shall be conveyed  
15 by patent to the Gordman-Leverich Partnership, a Colo-  
16 rado Limited Liability Partnership (in this section re-  
17 ferred to as “GLP”).

18 (b) EXISTING RIGHTS.—The conveyance under sub-  
19 section (a)—

20 (1) is subject to the valid existing rights of the  
21 lessee of Federal oil and gas lease COC-75070 and  
22 any other valid existing rights; and

23 (2) shall reserve to the United States the right  
24 to collect rent and royalty payments on the lease re-

1       ferred to in paragraph (1) for the duration of the  
2       lease.

3       (c) **EXISTING BOUNDARIES.**—The conveyance under  
4       subsection (a) does not modify the exterior boundary of  
5       the White River National Forest or the boundaries of Sec-  
6       tions 18 and 19 of Township 7 South, Range 93 West,  
7       Sixth Principal Meridian, Colorado, as such boundaries  
8       are in effect on the date of the enactment of this Act.

9       (d) **TIME FOR CONVEYANCE; PAYMENT OF COSTS.**—  
10      The conveyance directed under subsection (a) shall be  
11      completed not later than 180 days after the date of the  
12      enactment of this Act. The conveyance shall be without  
13      consideration, except that all costs incurred by the Sec-  
14      retary of the Interior relating to any survey, platting, legal  
15      description, or other activities carried out to prepare and  
16      issue the patent shall be paid by GLP to the Secretary  
17      prior to the land conveyance.

18      **SEC. 6003. LAND EXCHANGE IN CRAGS, COLORADO.**

19      (a) **PURPOSES.**—The purposes of this section are—

20              (1) to authorize, direct, expedite, and facilitate  
21      the land exchange set forth herein; and

22              (2) to promote enhanced public outdoor rec-  
23      reational and natural resource conservation opportu-  
24      nities in the Pike National Forest near Pikes Peak,

1 Colorado, via acquisition of the non-Federal land  
2 and trail easement.

3 (b) DEFINITIONS.—In this section:

4 (1) BHI.—The term “BHI” means Broadmoor  
5 Hotel, Inc., a Colorado corporation.

6 (2) FEDERAL LAND.—The term “Federal land”  
7 means all right, title, and interest of the United  
8 States in and to approximately 83 acres of land  
9 within the Pike National Forest, El Paso County,  
10 Colorado, together with a non-exclusive perpetual ac-  
11 cess easement to BHI to and from such land on  
12 Forest Service Road 371, as generally depicted on  
13 the map entitled “Proposed Craggs Land Exchange–  
14 Federal Parcel–Emerald Valley Ranch”, dated  
15 March 2015.

16 (3) NON-FEDERAL LAND.—The term “non-Fed-  
17 eral land” means the land and trail easement to be  
18 conveyed to the Secretary by BHI in the exchange  
19 and is—

20 (A) approximately 320 acres of land within  
21 the Pike National Forest, Teller County, Colo-  
22 rado, as generally depicted on the map entitled  
23 “Proposed Craggs Land Exchange–Non-Federal  
24 Parcel–Craggs Property”, dated March 2015;  
25 and

1 (B) a permanent trail easement for the  
2 Barr Trail in El Paso County, Colorado, as  
3 generally depicted on the map entitled “Pro-  
4 posed Crags Land Exchange–Barr Trail Ease-  
5 ment to United States”, dated March 2015,  
6 and which shall be considered as a voluntary  
7 donation to the United States by BHI for all  
8 purposes of law.

9 (4) SECRETARY.—The term “Secretary” means  
10 the Secretary of Agriculture, unless otherwise speci-  
11 fied.

12 (c) LAND EXCHANGE.—

13 (1) IN GENERAL.—If BHI offers to convey to  
14 the Secretary all right, title, and interest of BHI in  
15 and to the non-Federal land, the Secretary shall ac-  
16 cept the offer and simultaneously convey to BHI the  
17 Federal land.

18 (2) LAND TITLE.—Title to the non-Federal  
19 land conveyed and donated to the Secretary under  
20 this section shall be acceptable to the Secretary and  
21 shall conform to the title approval standards of the  
22 Attorney General of the United States applicable to  
23 land acquisitions by the Federal Government.

24 (3) PERPETUAL ACCESS EASEMENT TO BHI.—  
25 The nonexclusive perpetual access easement to be

1 granted to BHI as shown on the map referred to in  
2 subsection (b)(2) shall allow—

3 (A) BHI to fully maintain, at BHI's ex-  
4 pense, and use Forest Service Road 371 from  
5 its junction with Forest Service Road 368 in  
6 accordance with historic use and maintenance  
7 patterns by BHI; and

8 (B) full and continued public and adminis-  
9 trative access and use of FSR 371 in accord-  
10 ance with the existing Forest Service travel  
11 management plan, or as such plan may be re-  
12 vised by the Secretary.

13 (4) ROUTE AND CONDITION OF ROAD.—BHI  
14 and the Secretary may mutually agree to improve,  
15 relocate, reconstruct, or otherwise alter the route  
16 and condition of all or portions of such road as the  
17 Secretary, in close consultation with BHI, may de-  
18 termine advisable.

19 (5) EXCHANGE COSTS.—BHI shall pay for all  
20 land survey, appraisal, and other costs to the Sec-  
21 retary as may be necessary to process and consum-  
22 mate the exchange directed by this section, including  
23 reimbursement to the Secretary, if the Secretary so  
24 requests, for staff time spent in such processing and  
25 consummation.

1 (d) EQUAL VALUE EXCHANGE AND APPRAISALS.—

2 (1) APPRAISALS.—The values of the lands to be  
3 exchanged under this section shall be determined by  
4 the Secretary through appraisals performed in ac-  
5 cordance with—

6 (A) the Uniform Appraisal Standards for  
7 Federal Land Acquisitions;

8 (B) the Uniform Standards of Professional  
9 Appraisal Practice;

10 (C) appraisal instructions issued by the  
11 Secretary; and

12 (D) shall be performed by an appraiser  
13 mutually agreed to by the Secretary and BHI.

14 (2) EQUAL VALUE EXCHANGE.—The values of  
15 the Federal and non-Federal land parcels exchanged  
16 shall be equal, or if they are not equal, shall be  
17 equalized as follows:

18 (A) SURPLUS OF FEDERAL LAND  
19 VALUE.—If the final appraised value of the  
20 Federal land exceeds the final appraised value  
21 of the non-Federal land parcel identified in sub-  
22 section (b)(3)(A), BHI shall make a cash  
23 equalization payment to the United States as  
24 necessary to achieve equal value, including, if  
25 necessary, an amount in excess of that author-

1           ized pursuant to section 206(b) of the Federal  
2           Land Policy and Management Act of 1976 (43  
3           U.S.C. 1716(b)).

4           (B) USE OF FUNDS.—Any cash equali-  
5           zation moneys received by the Secretary under  
6           subparagraph (A) shall be—

7                   (i) deposited in the fund established  
8                   under Public Law 90–171 (commonly  
9                   known as the “Sisk Act”; 16 U.S.C. 484a);  
10                  and

11                   (ii) made available to the Secretary  
12                   for the acquisition of land or interests in  
13                   land in Region 2 of the Forest Service.

14           (C) SURPLUS OF NON-FEDERAL LAND  
15           VALUE.—If the final appraised value of the  
16           non-Federal land parcel identified in subsection  
17           (b)(3)(A) exceeds the final appraised value of  
18           the Federal land, the United States shall not  
19           make a cash equalization payment to BHI, and  
20           surplus value of the non-Federal land shall be  
21           considered a donation by BHI to the United  
22           States for all purposes of law.

23           (3) APPRAISAL EXCLUSIONS.—

24                   (A) SPECIAL USE PERMIT.—The appraised  
25           value of the Federal land parcel shall not reflect

1 any increase or diminution in value due to the  
2 special use permit existing on the date of the  
3 enactment of this Act to BHI on the parcel and  
4 improvements thereunder.

5 (B) BARR TRAIL EASEMENT.—The Barr  
6 Trail easement donation identified in subsection  
7 (b)(3)(B) shall not be appraised for purposes of  
8 this section.

9 (e) MISCELLANEOUS PROVISIONS.—

10 (1) WITHDRAWAL PROVISIONS.—

11 (A) WITHDRAWAL.—Lands acquired by  
12 the Secretary under this section shall, without  
13 further action by the Secretary, be permanently  
14 withdrawn from all forms of appropriation and  
15 disposal under the public land laws (including  
16 the mining and mineral leasing laws) and the  
17 Geothermal Steam Act of 1930 (30 U.S.C.  
18 1001 et seq.).

19 (B) WITHDRAWAL REVOCATION.—Any  
20 public land order that withdraws the Federal  
21 land from appropriation or disposal under a  
22 public land law shall be revoked to the extent  
23 necessary to permit disposal of the Federal land  
24 parcel to BHI.

1 (C) WITHDRAWAL OF FEDERAL LAND.—

2 All Federal land authorized to be exchanged  
3 under this section, if not already withdrawn or  
4 segregated from appropriation or disposal under  
5 the public lands laws upon enactment of this  
6 Act, is hereby so withdrawn, subject to valid ex-  
7 isting rights, until the date of conveyance of the  
8 Federal land to BHI.

9 (2) POSTEXCHANGE LAND MANAGEMENT.—

10 Land acquired by the Secretary under this section  
11 shall become part of the Pike-San Isabel National  
12 Forest and be managed in accordance with the laws,  
13 rules, and regulations applicable to the National  
14 Forest System.

15 (3) EXCHANGE TIMETABLE.—It is the intent of  
16 Congress that the land exchange directed by this  
17 section be consummated no later than 1 year after  
18 the date of the enactment of this Act.

19 (4) MAPS, ESTIMATES, AND DESCRIPTIONS.—

20 (A) MINOR ERRORS.—The Secretary and  
21 BHI may by mutual agreement make minor  
22 boundary adjustments to the Federal and non-  
23 Federal lands involved in the exchange, and  
24 may correct any minor errors in any map, acre-

1           age estimate, or description of any land to be  
2           exchanged.

3           (B) CONFLICT.—If there is a conflict be-  
4           tween a map, an acreage estimate, or a descrip-  
5           tion of land under this section, the map shall  
6           control unless the Secretary and BHI mutually  
7           agree otherwise.

8           (C) AVAILABILITY.—Upon enactment of  
9           this Act, the Secretary shall file and make  
10          available for public inspection in the head-  
11          quarters of the Pike-San Isabel National Forest  
12          a copy of all maps referred to in this section.

13 **SEC. 6004. CERRO DEL YUTA AND RÍO SAN ANTONIO WIL-**  
14 **DERNESS AREAS.**

15          (a) DEFINITIONS.—In this section:

16           (1) MAP.—The term “map” means the map en-  
17           titled “Río Grande del Norte National Monument  
18           Proposed Wilderness Areas” and dated July 28,  
19           2015.

20           (2) SECRETARY.—The term “Secretary” means  
21           the Secretary of the Interior.

22           (3) WILDERNESS AREA.—The term “wilderness  
23           area” means a wilderness area designated by sub-  
24           section (b)(1).

1 (b) DESIGNATION OF CERRO DEL YUTA AND RÍO  
2 SAN ANTONIO WILDERNESS AREAS.—

3 (1) IN GENERAL.—In accordance with the Wil-  
4 derness Act (16 U.S.C. 1131 et seq.), the following  
5 areas in the Río Grande del Norte National Monu-  
6 ment are designated as wilderness and as compo-  
7 nents of the National Wilderness Preservation Sys-  
8 tem:

9 (A) CERRO DEL YUTA WILDERNESS.—Cer-  
10 tain land administered by the Bureau of Land  
11 Management in Taos County, New Mexico,  
12 comprising approximately 13,420 acres as gen-  
13 erally depicted on the map, which shall be  
14 known as the “Cerro del Yuta Wilderness”.

15 (B) RÍO SAN ANTONIO WILDERNESS.—Cer-  
16 tain land administered by the Bureau of Land  
17 Management in Río Arriba County, New Mex-  
18 ico, comprising approximately 8,120 acres, as  
19 generally depicted on the map, which shall be  
20 known as the “Río San Antonio Wilderness”.

21 (2) MANAGEMENT OF WILDERNESS AREAS.—  
22 Subject to valid existing rights, the wilderness areas  
23 shall be administered in accordance with the Wilder-  
24 ness Act (16 U.S.C. 1131 et seq.) and this section,

1       except that with respect to the wilderness areas des-  
2       ignated by this subsection—

3               (A) any reference to the effective date of  
4               the Wilderness Act shall be considered to be a  
5               reference to the date of enactment of this Act;  
6               and

7               (B) any reference in the Wilderness Act to  
8               the Secretary of Agriculture shall be considered  
9               to be a reference to the Secretary.

10       (3) INCORPORATION OF ACQUIRED LAND AND  
11       INTERESTS IN LAND.—Any land or interest in land  
12       within the boundary of the wilderness areas that is  
13       acquired by the United States shall—

14               (A) become part of the wilderness area in  
15               which the land is located; and

16               (B) be managed in accordance with—

17                       (i) the Wilderness Act (16 U.S.C.  
18                       1131 et seq.);

19                       (ii) this section; and

20                       (iii) any other applicable laws.

21       (4) GRAZING.—Grazing of livestock in the wil-  
22       derness areas, where established before the date of  
23       enactment of this Act, shall be administered in ac-  
24       cordance with—

1 (A) section 4(d)(4) of the Wilderness Act  
2 (16 U.S.C. 1133(d)(4)); and

3 (B) the guidelines set forth in appendix A  
4 of the Report of the Committee on Interior and  
5 Insular Affairs to accompany H.R. 2570 of the  
6 101st Congress (H. Rept. 101-405).

7 (5) BUFFER ZONES.—

8 (A) IN GENERAL.—Nothing in this section  
9 creates a protective perimeter or buffer zone  
10 around the wilderness areas.

11 (B) ACTIVITIES OUTSIDE WILDERNESS  
12 AREAS.—The fact that an activity or use on  
13 land outside a wilderness area can be seen or  
14 heard within the wilderness area shall not pre-  
15 clude the activity or use outside the boundary  
16 of the wilderness area.

17 (6) RELEASE OF WILDERNESS STUDY AREAS.—

18 Congress finds that, for purposes of section 603(c)  
19 of the Federal Land Policy and Management Act of  
20 1976 (43 U.S.C. 1782(c)), the public land within the  
21 San Antonio Wilderness Study Area not designated  
22 as wilderness by this subsection—

23 (A) has been adequately studied for wilder-  
24 ness designation;

1 (B) is no longer subject to section 603(c)  
2 of the Federal Land Policy and Management  
3 Act of 1976 (43 U.S.C. 1782(c)); and

4 (C) shall be managed in accordance with  
5 this section.

6 (7) MAPS AND LEGAL DESCRIPTIONS.—

7 (A) IN GENERAL.—As soon as practicable  
8 after the date of enactment of this Act, the Sec-  
9 retary shall file the map and legal descriptions  
10 of the wilderness areas with—

11 (i) the Committee on Energy and  
12 Natural Resources of the Senate; and

13 (ii) the Committee on Natural Re-  
14 sources of the House of Representatives.

15 (B) FORCE OF LAW.—The map and legal  
16 descriptions filed under subparagraph (A) shall  
17 have the same force and effect as if included in  
18 this section, except that the Secretary may cor-  
19 rect errors in the legal description and map.

20 (C) PUBLIC AVAILABILITY.—The map and  
21 legal descriptions filed under subparagraph (A)  
22 shall be on file and available for public inspec-  
23 tion in the appropriate offices of the Bureau of  
24 Land Management.

1           (8) NATIONAL LANDSCAPE CONSERVATION SYS-  
2           TEM.—The wilderness areas shall be administered as  
3           components of the National Landscape Conservation  
4           System.

5           (9) FISH AND WILDLIFE.—Nothing in this sec-  
6           tion affects the jurisdiction of the State of New  
7           Mexico with respect to fish and wildlife located on  
8           public land in the State.

9           (10) WITHDRAWALS.—Subject to valid existing  
10          rights, any Federal land within the wilderness areas  
11          designated by paragraph (1), including any land or  
12          interest in land that is acquired by the United  
13          States after the date of enactment of this Act, is  
14          withdrawn from—

15                 (A) entry, appropriation, or disposal under  
16                 the public land laws;

17                 (B) location, entry, and patent under the  
18                 mining laws; and

19                 (C) operation of the mineral leasing, min-  
20                 eral materials, and geothermal leasing laws.

21          (11) TREATY RIGHTS.—Nothing in this section  
22          enlarges, diminishes, or otherwise modifies any trea-  
23          ty rights.

1 **SEC. 6005. CLARIFICATION RELATING TO A CERTAIN LAND**  
2 **DESCRIPTION UNDER THE NORTHERN ARI-**  
3 **ZONA LAND EXCHANGE AND VERDE RIVER**  
4 **BASIN PARTNERSHIP ACT OF 2005.**

5 Section 104(a)(5) of the Northern Arizona Land Ex-  
6 change and Verde River Basin Partnership Act of 2005  
7 (Public Law 109–110; 119 Stat. 2356) is amended by in-  
8 serting before the period at the end “, which, notwith-  
9 standing section 102(a)(4)(B), includes the N<sup>1</sup>/<sub>2</sub>, NE<sup>1</sup>/<sub>4</sub>,  
10 SW<sup>1</sup>/<sub>4</sub>, SW<sup>1</sup>/<sub>4</sub>, the N<sup>1</sup>/<sub>2</sub>, N<sup>1</sup>/<sub>2</sub>, SE<sup>1</sup>/<sub>4</sub>, SW<sup>1</sup>/<sub>4</sub>, and the N<sup>1</sup>/<sub>2</sub>,  
11 N<sup>1</sup>/<sub>2</sub>, SW<sup>1</sup>/<sub>4</sub>, SE<sup>1</sup>/<sub>4</sub>, sec. 34, T. 22 N., R. 2 E., Gila and  
12 Salt River Meridian, Coconino County, comprising ap-  
13 proximately 25 acres”.

14 **SEC. 6006. COOPER SPUR LAND EXCHANGE CLARIFICATION**  
15 **AMENDMENTS.**

16 Section 1206(a) of the Omnibus Public Land Man-  
17 agement Act of 2009 (Public Law 111–11; 123 Stat.  
18 1018) is amended—

19 (1) in paragraph (1)—

20 (A) in subparagraph (C), by striking “120  
21 acres” and inserting “107 acres”; and

22 (B) in subparagraph (E)(ii), by inserting  
23 “improvements,” after “buildings,”; and

24 (2) in paragraph (2)—

25 (A) in subparagraph (D)—

1 (i) in clause (i), by striking “As soon  
2 as practicable after the date of enactment  
3 of this Act, the Secretary and Mt. Hood  
4 Meadows shall select” and inserting “Not  
5 later than 120 days after the date of the  
6 enactment of the Energy Policy Mod-  
7 ernization Act of 2016, the Secretary and  
8 Mt. Hood Meadows shall jointly select”;

9 (ii) in clause (ii), in the matter pre-  
10 ceding subclause (I), by striking “An ap-  
11 praisal under clause (i) shall” and insert-  
12 ing “Except as provided under clause (iii),  
13 an appraisal under clause (i) shall assign a  
14 separate value to each tax lot to allow for  
15 the equalization of values and”; and

16 (iii) by adding at the end the fol-  
17 lowing:

18 “(iii) FINAL APPRAISED VALUE.—

19 “(I) IN GENERAL.—Subject to  
20 subclause (II), after the final ap-  
21 praised value of the Federal land and  
22 the non-Federal land are determined  
23 and approved by the Secretary, the  
24 Secretary shall not be required to re-  
25 appraise or update the final appraised

1 value for a period of up to 3 years,  
2 beginning on the date of the approval  
3 by the Secretary of the final appraised  
4 value.

5 “(II) EXCEPTION.—Subclause (I)  
6 shall not apply if the condition of ei-  
7 ther the Federal land or the non-Fed-  
8 eral land referred to in subclause (I)  
9 is significantly and substantially al-  
10 tered by fire, windstorm, or other  
11 events.

12 “(iv) PUBLIC REVIEW.—Before com-  
13 pleting the land exchange under this Act,  
14 the Secretary shall make available for pub-  
15 lic review the complete appraisals of the  
16 land to be exchanged.”; and

17 (B) by striking subparagraph (G) and in-  
18 serting the following:

19 “(G) REQUIRED CONVEYANCE CONDI-  
20 TIONS.—Prior to the exchange of the Federal  
21 and non-Federal land—

22 “(i) the Secretary and Mt. Hood  
23 Meadows may mutually agree for the Sec-  
24 retary to reserve a conservation easement  
25 to protect the identified wetland in accord-

1                   ance with applicable law, subject to the re-  
2                   quirements that—

3                   “**(I)** the conservation easement  
4                   shall be consistent with the terms of  
5                   the September 30, 2015, mediation  
6                   between the Secretary and Mt. Hood  
7                   Meadows; and

8                   “**(II)** in order to take effect, the  
9                   conservation easement shall be final-  
10                  ized not later than 120 days after the  
11                  date of enactment of the Energy Pol-  
12                  icy Modernization Act of 2016; and

13                  “**(ii)** the Secretary shall reserve a 24-  
14                  foot-wide nonexclusive trail easement at  
15                  the existing trail locations on the Federal  
16                  land that retains for the United States ex-  
17                  isting rights to construct, reconstruct,  
18                  maintain, and permit nonmotorized use by  
19                  the public of existing trails subject to the  
20                  right of the owner of the Federal land—

21                  “**(I)** to cross the trails with  
22                  roads, utilities, and infrastructure fa-  
23                  cilities; and

1                   “(II) to improve or relocate the  
2                   trails to accommodate development of  
3                   the Federal land.

4                   “(H) EQUALIZATION OF VALUES.—

5                   “(i) IN GENERAL.—Notwithstanding  
6                   subparagraph (A), in addition to or in lieu  
7                   of monetary compensation, a lesser area of  
8                   Federal land or non-Federal land may be  
9                   conveyed if necessary to equalize appraised  
10                  values of the exchange properties, without  
11                  limitation, consistent with the require-  
12                  ments of this Act and subject to the ap-  
13                  proval of the Secretary and Mt. Hood  
14                  Meadows.

15                  “(ii) TREATMENT OF CERTAIN COM-  
16                  PENSATION OR CONVEYANCES AS DONA-  
17                  TION.—If, after payment of compensation  
18                  or adjustment of land area subject to ex-  
19                  change under this Act, the amount by  
20                  which the appraised value of the land and  
21                  other property conveyed by Mt. Hood  
22                  Meadows under subparagraph (A) exceeds  
23                  the appraised value of the land conveyed  
24                  by the Secretary under subparagraph (A)

1                   shall be considered a donation by Mt.  
2                   Hood Meadows to the United States.”.

3 **SEC. 6007. EXPEDITED ACCESS TO CERTAIN FEDERAL**  
4 **LAND.**

5 (a) DEFINITIONS.—In this section:

6                   (1) ELIGIBLE.—The term “eligible”, with re-  
7                   spect to an organization or individual, means that  
8                   the organization or individual, respectively, is—

9                   (A) acting in a not-for-profit capacity; and

10                   (B) composed entirely of members who, at  
11                   the time of the good Samaritan search-and-re-  
12                   covery mission, have attained the age of major-  
13                   ity under the law of the State where the mis-  
14                   sion takes place.

15                   (2) GOOD SAMARITAN SEARCH-AND-RECOVERY  
16                   MISSION.—The term “good Samaritan search-and-  
17                   recovery mission” means a search conducted by an  
18                   eligible organization or individual for 1 or more  
19                   missing individuals believed to be deceased at the  
20                   time that the search is initiated.

21                   (3) SECRETARY.—The term “Secretary” means  
22                   the Secretary of the Interior or the Secretary of Ag-  
23                   riculture, as applicable.

24 (b) PROCESS.—

1           (1) IN GENERAL.—Each Secretary shall develop  
2           and implement a process to expedite access to Fed-  
3           eral land under the administrative jurisdiction of the  
4           Secretary for eligible organizations and individuals  
5           to request access to Federal land to conduct good  
6           Samaritan search-and-recovery missions.

7           (2) INCLUSIONS.—The process developed and  
8           implemented under this subsection shall include pro-  
9           visions to clarify that—

10                   (A) an eligible organization or individual  
11                   granted access under this section—

12                           (i) shall be acting for private pur-  
13                           poses; and

14                           (ii) shall not be considered to be a  
15                           Federal volunteer;

16                   (B) an eligible organization or individual  
17                   conducting a good Samaritan search-and-recov-  
18                   ery mission under this section shall not be con-  
19                   sidered to be a volunteer under section  
20                   102301(e) of title 54, United States Code;

21                   (C) chapter 171 of title 28, United States  
22                   Code (commonly known as the “Federal Tort  
23                   Claims Act”), shall not apply to an eligible or-  
24                   ganization or individual carrying out a privately

1 requested good Samaritan search-and-recovery  
2 mission under this section; and

3 (D) chapter 81 of title 5, United States  
4 Code (commonly known as the “Federal Em-  
5 ployees Compensation Act”), shall not apply to  
6 an eligible organization or individual conducting  
7 a good Samaritan search-and-recovery mission  
8 under this section, and the conduct of the good  
9 Samaritan search-and-recovery mission shall  
10 not constitute civilian employment.

11 (c) RELEASE OF FEDERAL GOVERNMENT FROM LI-  
12 ABILITY.—The Secretary shall not require an eligible or-  
13 ganization or individual to have liability insurance as a  
14 condition of accessing Federal land under this section, if  
15 the eligible organization or individual—

16 (1) acknowledges and consents, in writing, to  
17 the provisions described in subparagraphs (A)  
18 through (D) of subsection (b)(2); and

19 (2) signs a waiver releasing the Federal Gov-  
20 ernment from all liability relating to the access  
21 granted under this section and agrees to indemnify  
22 and hold harmless the United States from any  
23 claims or lawsuits arising from any conduct by the  
24 eligible organization or individual on Federal land.

25 (d) APPROVAL AND DENIAL OF REQUESTS.—

1           (1) IN GENERAL.—The Secretary shall notify  
2           an eligible organization or individual of the approval  
3           or denial of a request by the eligible organization or  
4           individual to carry out a good Samaritan search-  
5           and-recovery mission under this section by not later  
6           than 48 hours after the request is made.

7           (2) DENIALS.—If the Secretary denies a re-  
8           quest from an eligible organization or individual to  
9           carry out a good Samaritan search-and-recovery mis-  
10          sion under this section, the Secretary shall notify the  
11          eligible organization or individual of—

12                   (A) the reason for the denial of the re-  
13                   quest; and

14                   (B) any actions that the eligible organiza-  
15                   tion or individual can take to meet the require-  
16                   ments for the request to be approved.

17          (e) PARTNERSHIPS.—Each Secretary shall develop  
18          search-and-recovery-focused partnerships with search-and-  
19          recovery organizations—

20                   (1) to coordinate good Samaritan search-and-  
21                   recovery missions on Federal land under the admin-  
22                   istrative jurisdiction of the Secretary; and

23                   (2) to expedite and accelerate good Samaritan  
24                   search-and-recovery mission efforts for missing indi-

1 individuals on Federal land under the administrative ju-  
2 risdiction of the Secretary.

3 (f) REPORT.—Not later than 180 days after the date  
4 of enactment of this Act, the Secretaries shall submit to  
5 Congress a joint report describing—

6 (1) plans to develop partnerships described in  
7 subsection (e)(1); and

8 (2) efforts carried out to expedite and accel-  
9 erate good Samaritan search-and-recovery mission  
10 efforts for missing individuals on Federal land under  
11 the administrative jurisdiction of each Secretary  
12 pursuant to subsection (e)(2).

13 **SEC. 6008. BLACK HILLS NATIONAL CEMETERY BOUNDARY**  
14 **MODIFICATION.**

15 (a) DEFINITIONS.—In this section:

16 (1) CEMETERY.—The term “Cemetery” means  
17 the Black Hills National Cemetery in Sturgis, South  
18 Dakota.

19 (2) FEDERAL LAND.—The term “Federal land”  
20 means the approximately 200 acres of Bureau of  
21 Land Management land adjacent to the Cemetery,  
22 generally depicted as “Proposed National Cemetery  
23 Expansion” on the map entitled “Proposed Expan-  
24 sion of Black Hills National Cemetery-South Da-  
25 kota” and dated September 28, 2015.

1           (3) SECRETARY.—The term “Secretary” means  
2           the Secretary of the Interior.

3           (b) TRANSFER AND WITHDRAWAL OF BUREAU OF  
4           LAND MANAGEMENT LAND FOR CEMETERY USE.—

5           (1) TRANSFER OF ADMINISTRATIVE JURISDIC-  
6           TION.—

7           (A) IN GENERAL.—Subject to valid exist-  
8           ing rights, administrative jurisdiction over the  
9           Federal land is transferred from the Secretary  
10          to the Secretary of Veterans Affairs for use as  
11          a national cemetery in accordance with chapter  
12          24 of title 38, United States Code.

13          (B) LEGAL DESCRIPTIONS.—

14           (i) IN GENERAL.—As soon as prac-  
15           ticable after the date of enactment of this  
16           Act, the Secretary shall publish in the Fed-  
17           eral Register a notice containing a legal  
18           description of the Federal land.

19           (ii) EFFECT.—A legal description  
20           published under clause (i) shall have the  
21           same force and effect as if included in this  
22           section, except that the Secretary may cor-  
23           rect any clerical and typographical errors  
24           in the legal description.

1 (iii) AVAILABILITY.—Copies of the  
2 legal description published under clause (i)  
3 shall be available for public inspection in  
4 the appropriate offices of—

5 (I) the Bureau of Land Manage-  
6 ment; and

7 (II) the National Cemetery Ad-  
8 ministration.

9 (iv) COSTS.—The Secretary of Vet-  
10 erans Affairs shall reimburse the Secretary  
11 for the costs incurred by the Secretary in  
12 carrying out this subparagraph, including  
13 the costs of any surveys and other reason-  
14 able costs.

15 (2) WITHDRAWAL.—Subject to valid existing  
16 rights, for any period during which the Federal land  
17 is under the administrative jurisdiction of the Sec-  
18 retary of Veterans Affairs, the Federal land—

19 (A) is withdrawn from all forms of appro-  
20 priation under the public land laws, including  
21 the mining laws, the mineral leasing laws, and  
22 the geothermal leasing laws; and

23 (B) shall be treated as property as defined  
24 under section 102(9) of title 40, United States  
25 Code.

1           (3) BOUNDARY MODIFICATION.—The boundary  
2 of the Cemetery is modified to include the Federal  
3 land.

4           (4) MODIFICATION OF PUBLIC LAND ORDER.—  
5 Public Land Order 2112, dated June 6, 1960 (25  
6 Fed. Reg. 5243), is modified to exclude the Federal  
7 land.

8           (c) SUBSEQUENT TRANSFER OF ADMINISTRATIVE  
9 JURISDICTION.—

10           (1) NOTICE.—On a determination by the Sec-  
11 retary of Veterans Affairs that all or a portion of  
12 the Federal land is not being used for purposes of  
13 the Cemetery, the Secretary of Veterans Affairs  
14 shall notify the Secretary of the determination.

15           (2) TRANSFER OF ADMINISTRATIVE JURISDIC-  
16 TION.—Subject to paragraphs (3) and (4), the Sec-  
17 retary of Veterans Affairs shall transfer to the Sec-  
18 retary administrative jurisdiction over the Federal  
19 land subject to a notice under paragraph (1).

20           (3) DECONTAMINATION.—The Secretary of Vet-  
21 erans Affairs shall be responsible for the costs of  
22 any decontamination of the Federal land subject to  
23 a notice under paragraph (1) that the Secretary de-  
24 termines to be necessary for the Federal land to be  
25 restored to public land status.

1 (4) RESTORATION TO PUBLIC LAND STATUS.—

2 The Federal land subject to a notice under para-  
3 graph (1) shall only be restored to public land status  
4 on—

5 (A) acceptance by the Secretary of the  
6 Federal land subject to the notice; and

7 (B) a determination by the Secretary that  
8 the Federal land subject to the notice is suit-  
9 able for—

10 (i) restoration to public land status;

11 and

12 (ii) the operation of 1 or more of the  
13 public land laws with respect to the Fed-  
14 eral land.

15 (5) ORDER.—If the Secretary accepts the Fed-  
16 eral land under paragraph (4)(A) and makes a de-  
17 termination of suitability under paragraph (4)(B),  
18 the Secretary may—

19 (A) open the accepted Federal land to op-  
20 eration of 1 or more of the public land laws;  
21 and

22 (B) issue an order to carry out the opening  
23 authorized under subparagraph (A).

1 **Subtitle B—National Park Manage-**  
2 **ment, Studies, and Related Mat-**  
3 **ters**

4 **SEC. 6101. REFUND OF FUNDS USED BY STATES TO OPER-**  
5 **ATE NATIONAL PARKS DURING SHUTDOWN.**

6 (a) IN GENERAL.—The Director of the National  
7 Park Service shall refund to each State all funds of the  
8 State that were used to reopen and temporarily operate  
9 a unit of the National Park System during the period in  
10 October 2013 in which there was a lapse in appropriations  
11 for the unit.

12 (b) FUNDING.—Funds of the National Park Service  
13 that are appropriated after the date of enactment of this  
14 Act shall be used to carry out this section.

15 **SEC. 6102. LOWER FARMINGTON AND SALMON BROOK REC-**  
16 **REATIONAL RIVERS.**

17 (a) DESIGNATION.—Section 3(a) of the Wild and  
18 Scenic Rivers Act (16 U.S.C. 1274(a)) is amended by add-  
19 ing at the end the following new paragraph:

20 “(213) LOWER FARMINGTON RIVER AND SALM-  
21 ON BROOK, CONNECTICUT.—Segments of the main  
22 stem and its tributary, Salmon Brook, totaling ap-  
23 proximately 62 miles, to be administered by the Sec-  
24 retary of the Interior as follows:

1           “(A) The approximately 27.2-mile segment  
2 of the Farmington River beginning 0.2 miles  
3 below the tailrace of the Lower Collinsville Dam  
4 and extending to the site of the Spoonville Dam  
5 in Bloomfield and East Granby as a rec-  
6 reational river.

7           “(B) The approximately 8.1-mile segment  
8 of the Farmington River extending from 0.5  
9 miles below the Rainbow Dam to the confluence  
10 with the Connecticut River in Windsor as a rec-  
11 reational river.

12           “(C) The approximately 2.4-mile segment  
13 of the main stem of Salmon Brook extending  
14 from the confluence of the East and West  
15 Branches to the confluence with the Farm-  
16 ington River as a recreational river.

17           “(D) The approximately 12.6-mile segment  
18 of the West Branch of Salmon Brook extending  
19 from its headwaters in Hartland, Connecticut  
20 to its confluence with the East Branch of Salm-  
21 on Brook as a recreational river.

22           “(E) The approximately 11.4-mile segment  
23 of the East Branch of Salmon Brook extending  
24 from the Massachusetts-Connecticut State line

1 to the confluence with the West Branch of  
2 Salmon Brook as a recreational river.”.

3 (b) MANAGEMENT.—

4 (1) IN GENERAL.—The river segments des-  
5 ignated by subsection (a) shall be managed in ac-  
6 cordance with the management plan and such  
7 amendments to the management plan as the Sec-  
8 retary determines are consistent with this section.  
9 The management plan shall be deemed to satisfy the  
10 requirements for a comprehensive management plan  
11 pursuant to section 3(d) of the Wild and Scenic Riv-  
12 ers Act (16 U.S.C. 1274(d)).

13 (2) COMMITTEE.—The Secretary shall coordi-  
14 nate the management responsibilities of the Sec-  
15 retary under this section with the Lower Farm-  
16 ington River and Salmon Brook Wild and Scenic  
17 Committee, as specified in the management plan.

18 (3) COOPERATIVE AGREEMENTS.—

19 (A) IN GENERAL.—In order to provide for  
20 the long-term protection, preservation, and en-  
21 hancement of the river segment designated by  
22 subsection (a), the Secretary is authorized to  
23 enter into cooperative agreements pursuant to  
24 sections 10(e) and 11(b)(1) of the Wild and  
25 Scenic Rivers Act with—

- 1 (i) the State of Connecticut;
- 2 (ii) the towns of Avon, Bloomfield,
- 3 Burlington, East Granby, Farmington,
- 4 Granby, Hartland, Simsbury, and Windsor
- 5 in Connecticut; and
- 6 (iii) appropriate local planning and
- 7 environmental organizations.

8 (B) CONSISTENCY.—All cooperative agree-

9 ments provided for under this section shall be

10 consistent with the management plan and may

11 include provisions for financial or other assist-

12 ance from the United States.

13 (4) LAND MANAGEMENT.—

14 (A) ZONING ORDINANCES.—For the pur-

15 poses of the segments designated in subsection

16 (a), the zoning ordinances adopted by the towns

17 in Avon, Bloomfield, Burlington, East Granby,

18 Farmington, Granby, Hartland, Simsbury, and

19 Windsor in Connecticut, including provisions for

20 conservation of floodplains, wetlands and water-

21 courses associated with the segments, shall be

22 deemed to satisfy the standards and require-

23 ments of section 6(c) of the Wild and Scenic

24 Rivers Act (16 U.S.C. 1277(c)).

1           (B) ACQUISITION OF LAND.—The provi-  
2           sions of section 6(c) of the Wild and Scenic  
3           Rivers Act (16 U.S.C. 1277(c)) that prohibit  
4           Federal acquisition of lands by condemnation  
5           shall apply to the segments designated in sub-  
6           section (a). The authority of the Secretary to  
7           acquire lands for the purposes of the segments  
8           designated in subsection (a) shall be limited to  
9           acquisition by donation or acquisition with the  
10          consent of the owner of the lands, and shall be  
11          subject to the additional criteria set forth in the  
12          management plan.

13          (5) RAINBOW DAM.—The designation made by  
14          subsection (a) shall not be construed to—

15                (A) prohibit, pre-empt, or abridge the po-  
16                tential future licensing of the Rainbow Dam  
17                and Reservoir (including any and all aspects of  
18                its facilities, operations and transmission lines)  
19                by the Federal Energy Regulatory Commission  
20                as a federally licensed hydroelectric generation  
21                project under the Federal Power Act, provided  
22                that the Commission may, in the discretion of  
23                the Commission and consistent with this sec-  
24                tion, establish such reasonable terms and condi-  
25                tions in a hydropower license for Rainbow Dam

1 as are necessary to reduce impacts identified by  
2 the Secretary as invading or unreasonably di-  
3 minishing the scenic, recreational, and fish and  
4 wildlife values of the segments designated by  
5 subsection (a); or

6 (B) affect the operation of, or impose any  
7 flow or release requirements on, the unlicensed  
8 hydroelectric facility at Rainbow Dam and Res-  
9 ervoir.

10 (6) RELATION TO NATIONAL PARK SYSTEM.—

11 Notwithstanding section 10(c) of the Wild and See-  
12 nic Rivers Act (16 U.S.C. 1281(c)), the Lower  
13 Farmington River shall not be administered as part  
14 of the National Park System or be subject to regula-  
15 tions which govern the National Park System.

16 (c) FARMINGTON RIVER, CONNECTICUT, DESIGNA-  
17 TION REVISION.—Section 3(a)(156) of the Wild and See-  
18 nic Rivers Act (16 U.S.C. 1274(a)) is amended in the first  
19 sentence—

20 (1) by striking “14-mile” and inserting “15.1-  
21 mile”; and

22 (2) by striking “to the downstream end of the  
23 New Hartford-Canton, Connecticut town line” and  
24 inserting “to the confluence with the Nepaug River”.

25 (d) DEFINITIONS.—For the purposes of this section:

1           (1) MANAGEMENT PLAN.—The term “manage-  
2           ment plan” means the management plan prepared  
3           by the Salmon Brook Wild and Scenic Study Com-  
4           mittee entitled the “Lower Farmington River and  
5           Salmon Brook Management Plan” and dated June  
6           2011.

7           (2) SECRETARY.—The term “Secretary” means  
8           the Secretary of the Interior.

9   **SEC. 6103. SPECIAL RESOURCE STUDY OF PRESIDENT**  
10                                   **STREET STATION.**

11           (a) DEFINITIONS.—In this section:

12                   (1) SECRETARY.—The term “Secretary” means  
13                   the Secretary of the Interior.

14                   (2) STUDY AREA.—The term “study area”  
15                   means the President Street Station, a railroad ter-  
16                   minal in Baltimore, Maryland, the history of which  
17                   is tied to the growth of the railroad industry in the  
18                   19th century, the Civil War, the Underground Rail-  
19                   road, and the immigrant influx of the early 20th  
20                   century.

21           (b) SPECIAL RESOURCE STUDY.—

22                   (1) STUDY.—The Secretary shall conduct a spe-  
23                   cial resource study of the study area.

24                   (2) CONTENTS.—In conducting the study under  
25                   paragraph (1), the Secretary shall—

1 (A) evaluate the national significance of  
2 the study area;

3 (B) determine the suitability and feasibility  
4 of designating the study area as a unit of the  
5 National Park System;

6 (C) consider other alternatives for preser-  
7 vation, protection, and interpretation of the  
8 study area by the Federal Government, State or  
9 local government entities, or private and non-  
10 profit organizations;

11 (D) consult with interested Federal agen-  
12 cies, State or local governmental entities, pri-  
13 vate and nonprofit organizations, or any other  
14 interested individuals; and

15 (E) identify cost estimates for any Federal  
16 acquisition, development, interpretation, oper-  
17 ation, and maintenance associated with the al-  
18 ternatives.

19 (3) APPLICABLE LAW.—The study required  
20 under paragraph (1) shall be conducted in accord-  
21 ance with section 100507 of title 54, United States  
22 Code.

23 (4) REPORT.—Not later than 3 years after the  
24 date on which funds are first made available for the  
25 study under paragraph (1), the Secretary shall sub-

1 mit to the Committee on Natural Resources of the  
2 House of Representatives and the Committee on En-  
3 ergy and Natural Resources of the Senate a report  
4 that describes—

5 (A) the results of the study; and

6 (B) any conclusions and recommendations  
7 of the Secretary.

8 **SEC. 6104. SPECIAL RESOURCE STUDY OF THURGOOD MAR-**  
9 **SHALL'S ELEMENTARY SCHOOL.**

10 (a) DEFINITIONS.—In this section:

11 (1) SECRETARY.—The term “Secretary” means  
12 the Secretary of the Interior.

13 (2) STUDY AREA.—The term “study area”  
14 means—

15 (A) P.S. 103, the public school located in  
16 West Baltimore, Maryland, which Thurgood  
17 Marshall attended as a youth; and

18 (B) any other resources in the neighbor-  
19 hood surrounding P.S. 103 that relate to the  
20 early life of Thurgood Marshall.

21 (b) SPECIAL RESOURCE STUDY.—

22 (1) STUDY.—The Secretary shall conduct a spe-  
23 cial resource study of the study area.

24 (2) CONTENTS.—In conducting the study under  
25 paragraph (1), the Secretary shall—

1 (A) evaluate the national significance of  
2 the study area;

3 (B) determine the suitability and feasibility  
4 of designating the study area as a unit of the  
5 National Park System;

6 (C) consider other alternatives for preser-  
7 vation, protection, and interpretation of the  
8 study area by the Federal Government, State or  
9 local government entities, or private and non-  
10 profit organizations;

11 (D) consult with interested Federal agen-  
12 cies, State or local governmental entities, pri-  
13 vate and nonprofit organizations, or any other  
14 interested individuals; and

15 (E) identify cost estimates for any Federal  
16 acquisition, development, interpretation, oper-  
17 ation, and maintenance associated with the al-  
18 ternatives.

19 (3) APPLICABLE LAW.—The study required  
20 under paragraph (1) shall be conducted in accord-  
21 ance with section 100507 of title 54, United States  
22 Code.

23 (4) REPORT.—Not later than 3 years after the  
24 date on which funds are first made available to carry  
25 out the study under paragraph (1), the Secretary

1 shall submit to the Committee on Natural Resources  
2 of the House of Representatives and the Committee  
3 on Energy and Natural Resources of the Senate a  
4 report that describes—

5 (A) the results of the study; and

6 (B) any conclusions and recommendations  
7 of the Secretary.

8 **SEC. 6105. SPECIAL RESOURCE STUDY OF JAMES K. POLK**  
9 **PRESIDENTIAL HOME.**

10 (a) IN GENERAL.—The Secretary of the Interior (re-  
11 ferred to in this section as the “Secretary”) shall conduct  
12 a special resource study of the site of the James K. Polk  
13 Home in Columbia, Tennessee, and adjacent property (re-  
14 ferred to in this section as the “site”).

15 (b) CRITERIA.—The Secretary shall conduct the  
16 study under subsection (a) in accordance with section  
17 100507 of title 54, United States Code.

18 (c) CONTENTS.—In conducting the study under sub-  
19 section (a), the Secretary shall—

20 (1) evaluate the national significance of the  
21 site;

22 (2) determine the suitability and feasibility of  
23 designating the site as a unit of the National Park  
24 System;

1           (3) include cost estimates for any necessary ac-  
2           quisition, development, operation, and maintenance  
3           of the site;

4           (4) consult with interested Federal, State, or  
5           local governmental entities, private and nonprofit or-  
6           ganizations, or other interested individuals; and

7           (5) identify alternatives for the management,  
8           administration, and protection of the site.

9           (d) REPORT.—Not later than 3 years after the date  
10          on which funds are made available to carry out the study  
11          under subsection (a), the Secretary shall submit to the  
12          Committee on Natural Resources of the House of Rep-  
13          resentatives and the Committee on Energy and Natural  
14          Resources of the Senate a report that describes—

15                 (1) the findings and conclusions of the study;

16          and

17                 (2) any recommendations of the Secretary.

18          **SEC. 6106. NORTH COUNTRY NATIONAL SCENIC TRAIL**

19                         **ROUTE ADJUSTMENT.**

20          (a) ROUTE ADJUSTMENT.—Section 5(a)(8) of the  
21          National Trails System Act (16 U.S.C. 1244(a)(8)) is  
22          amended in the first sentence—

23                 (1) by striking “thirty two hundred miles, ex-  
24          tending from eastern New York State” and inserting

1 “4,600 miles, extending from the Appalachian Trail  
2 in Vermont”; and

3 (2) by striking “Proposed North Country Trail”  
4 and all that follows through “June 1975.” and in-  
5 serting “‘North Country National Scenic Trail, Au-  
6 thorized Route’ dated February 2014, and numbered  
7 649/116870.”.

8 (b) NO CONDEMNATION.—Section 5(a)(8) of the Na-  
9 tional Trails System Act (16 U.S.C. 1244(a)(8)) is  
10 amended by adding at the end the following: “No land  
11 or interest in land outside of the exterior boundary of any  
12 Federally administered area may be acquired by the Fed-  
13 eral Government for the trail by condemnation.”.

14 **SEC. 6107. DESIGNATION OF JAY S. HAMMOND WILDERNESS**  
15 **AREA.**

16 (a) DESIGNATION.—The approximately 2,600,000  
17 acres of National Wilderness Preservation System land lo-  
18 cated within the Lake Clark National Park and Preserve  
19 designated by section 201(e)(7)(a) of the Alaska National  
20 Interest Lands Conservation Act (16 U.S.C.  
21 410hh(e)(7)(a)) shall be known and designated as the  
22 “Jay S. Hammond Wilderness Area”.

23 (b) REFERENCES.—Any reference in a law, map, reg-  
24 ulation, document, paper, or other record of the United  
25 States to the wilderness area referred to in subsection (a)

1 shall be deemed to be a reference to the “Jay S. Ham-  
2 mond Wilderness Area”.

3 **SEC. 6108. ADVISORY COUNCIL ON HISTORIC PRESERVA-**  
4 **TION.**

5 Section 304101(a) of title 54, United States Code,  
6 is amended—

7 (1) by redesignating paragraphs (8), (9), (10),  
8 and (11) as paragraphs (9), (10), (11), and (12), re-  
9 spectively; and

10 (2) by inserting after paragraph (7) the fol-  
11 lowing:

12 “(8) The General Chairman of the National As-  
13 sociation of Tribal Historic Preservation Officers.”.

14 **SEC. 6109. ESTABLISHMENT OF A VISITOR SERVICES FACIL-**  
15 **ITY ON THE ARLINGTON RIDGE TRACT.**

16 (a) DEFINITION OF ARLINGTON RIDGE TRACT.—In  
17 this section, the term “Arlington Ridge tract” means the  
18 parcel of Federal land located in Arlington County, Vir-  
19 ginia, known as the “Nevius Tract” and transferred to  
20 the Department of the Interior in 1953, that is bounded  
21 generally by—

22 (1) Arlington Boulevard (United States Route  
23 50) to the north;

24 (2) Jefferson Davis Highway (Virginia Route  
25 110) to the east;

1 (3) Marshall Drive to the south; and

2 (4) North Meade Street to the west.

3 (b) ESTABLISHMENT OF VISITOR SERVICES FACIL-  
4 ITY.—Notwithstanding section 2863(g) of the Military  
5 Construction Authorization Act for Fiscal Year 2002  
6 (Public Law 107–107; 115 Stat. 1332), the Secretary of  
7 the Interior may construct a structure for visitor services  
8 to include a public restroom facility on the Arlington  
9 Ridge tract in the area of the United States Marine Corps  
10 War Memorial.

11 **Subtitle C—Sportsmen’s Access**  
12 **and Land Management Issues**

13 **PART I—NATIONAL POLICY**

14 **SEC. 6201. CONGRESSIONAL DECLARATION OF NATIONAL**  
15 **POLICY.**

16 (a) IN GENERAL.—Congress declares that it is the  
17 policy of the United States that Federal departments and  
18 agencies, in accordance with the missions of the depart-  
19 ments and agencies, Executive Orders 12962 and 13443  
20 (60 Fed. Reg. 30769 (June 7, 1995); 72 Fed. Reg. 46537  
21 (August 16, 2007)), and applicable law, shall—

22 (1) facilitate the expansion and enhancement of  
23 hunting, fishing, and recreational shooting opportu-  
24 nities on Federal land, in consultation with the  
25 Wildlife and Hunting Heritage Conservation Coun-

1 cil, the Sport Fishing and Boating Partnership  
 2 Council, State and tribal fish and wildlife agencies,  
 3 and the public;

4 (2) conserve and enhance aquatic systems and  
 5 the management of game species and the habitat of  
 6 those species on Federal land, including through  
 7 hunting and fishing, in a manner that respects—

8 (A) State management authority over wild-  
 9 life resources; and

10 (B) private property rights; and

11 (3) consider hunting, fishing, and recreational  
 12 shooting opportunities as part of all Federal plans  
 13 for land, resource, and travel management.

14 (b) EXCLUSION.—In this subtitle, the term “fishing”  
 15 does not include commercial fishing in which fish are har-  
 16 vested, either in whole or in part, that are intended to  
 17 enter commerce through sale.

18 **PART II—SPORTSMEN’S ACCESS TO FEDERAL**

19 **LAND**

20 **SEC. 6211. DEFINITIONS.**

21 In this part:

22 (1) FEDERAL LAND.—The term “Federal land”  
 23 means—

24 (A) any land in the National Forest Sys-  
 25 tem (as defined in section 11(a) of the Forest

1 and Rangeland Renewable Resources Planning  
2 Act of 1974 (16 U.S.C. 1609(a)) that is ad-  
3 ministered by the Secretary of Agriculture, act-  
4 ing through the Chief of the Forest Service;  
5 and

6 (B) public lands (as defined in section 103  
7 of the Federal Land Policy and Management  
8 Act of 1976 (43 U.S.C. 1702)), the surface of  
9 which is administered by the Secretary of the  
10 Interior, acting through the Director of the Bu-  
11 reau of Land Management.

12 (2) SECRETARY CONCERNED.—The term “Sec-  
13 retary concerned” means—

14 (A) the Secretary of Agriculture, with re-  
15 spect to land described in paragraph (1)(A);  
16 and

17 (B) the Secretary of the Interior, with re-  
18 spect to land described in paragraph (1)(B).

19 **SEC. 6212. FEDERAL LAND OPEN TO HUNTING, FISHING,**  
20 **AND RECREATIONAL SHOOTING.**

21 (a) IN GENERAL.—Subject to subsection (b), Federal  
22 land shall be open to hunting, fishing, and recreational  
23 shooting, in accordance with applicable law, unless the  
24 Secretary concerned closes an area in accordance with sec-  
25 tion 6213.

1 (b) EFFECT OF PART.—Nothing in this part opens  
2 to hunting, fishing, or recreational shooting any land that  
3 is not open to those activities as of the date of enactment  
4 of this Act.

5 **SEC. 6213. CLOSURE OF FEDERAL LAND TO HUNTING, FISH-**  
6 **ING, AND RECREATIONAL SHOOTING.**

7 (a) AUTHORIZATION.—

8 (1) IN GENERAL.—Subject to paragraph (2)  
9 and in accordance with section 302(b) of the Federal  
10 Land Policy and Management Act of 1976 (43  
11 U.S.C. 1732(b)), the Secretary concerned may des-  
12 ignate any area on Federal land in which, and estab-  
13 lish any period during which, for reasons of public  
14 safety, administration, or compliance with applicable  
15 laws, no hunting, fishing, or recreational shooting  
16 shall be permitted.

17 (2) REQUIREMENT.—In making a designation  
18 under paragraph (1), the Secretary concerned shall  
19 designate the smallest area for the least amount of  
20 time that is required for public safety, administra-  
21 tion, or compliance with applicable laws.

22 (b) CLOSURE PROCEDURES.—

23 (1) IN GENERAL.—Except in an emergency, be-  
24 fore permanently or temporarily closing any Federal

1 land to hunting, fishing, or recreational shooting,  
2 the Secretary concerned shall—

3 (A) consult with State fish and wildlife  
4 agencies; and

5 (B) provide public notice and opportunity  
6 for comment under paragraph (2).

7 (2) PUBLIC NOTICE AND COMMENT.—

8 (A) IN GENERAL.—Public notice and com-  
9 ment shall include—

10 (i) a notice of intent—

11 (I) published in advance of the  
12 public comment period for the clo-  
13 sure—

14 (aa) in the Federal Register;

15 (bb) on the website of the  
16 applicable Federal agency;

17 (cc) on the website of the  
18 Federal land unit, if available;

19 and

20 (dd) in at least 1 local news-  
21 paper;

22 (II) made available in advance of  
23 the public comment period to local of-  
24 fices, chapters, and affiliate organiza-  
25 tions in the vicinity of the closure that

1 are signatories to the memorandum of  
2 understanding entitled “Federal  
3 Lands Hunting, Fishing, and Shoot-  
4 ing Sports Roundtable Memorandum  
5 of Understanding”; and

6 (III) that describes—

7 (aa) the proposed closure;

8 and

9 (bb) the justification for the  
10 proposed closure, including an  
11 explanation of the reasons and  
12 necessity for the decision to close  
13 the area to hunting, fishing, or  
14 recreational shooting; and

15 (ii) an opportunity for public comment  
16 for a period of—

17 (I) not less than 60 days for a  
18 permanent closure; or

19 (II) not less than 30 days for a  
20 temporary closure.

21 (B) FINAL DECISION.—In a final decision  
22 to permanently or temporarily close an area to  
23 hunting, fishing, or recreation shooting, the  
24 Secretary concerned shall—

1 (i) respond in a reasoned manner to  
2 the comments received;

3 (ii) explain how the Secretary con-  
4 cerned resolved any significant issues  
5 raised by the comments; and

6 (iii) show how the resolution led to  
7 the closure.

8 (c) TEMPORARY CLOSURES.—

9 (1) IN GENERAL.—A temporary closure under  
10 this section may not exceed a period of 180 days.

11 (2) RENEWAL.—Except in an emergency, a  
12 temporary closure for the same area of land closed  
13 to the same activities—

14 (A) may not be renewed more than 3 times  
15 after the first temporary closure; and

16 (B) must be subject to a separate notice  
17 and comment procedure in accordance with sub-  
18 section (b)(2).

19 (3) EFFECT OF TEMPORARY CLOSURE.—Any  
20 Federal land that is temporarily closed to hunting,  
21 fishing, or recreational shooting under this section  
22 shall not become permanently closed to that activity  
23 without a separate public notice and opportunity to  
24 comment in accordance with subsection (b)(2).

1 (d) REPORTING.—On an annual basis, the Secre-  
2 taries concerned shall—

3 (1) publish on a public website a list of all  
4 areas of Federal land temporarily or permanently  
5 subject to a closure under this section; and

6 (2) submit to the Committee on Energy and  
7 Natural Resources and the Committee on Agri-  
8 culture, Nutrition, and Forestry of the Senate and  
9 the Committee on Natural Resources and the Com-  
10 mittee on Agriculture of the House of Representa-  
11 tives a report that identifies—

12 (A) a list of each area of Federal land tem-  
13 porarily or permanently subject to a closure;

14 (B) the acreage of each closure; and

15 (C) a survey of—

16 (i) the aggregate areas and acreage  
17 closed under this section in each State;  
18 and

19 (ii) the percentage of Federal land in  
20 each State closed under this section with  
21 respect to hunting, fishing, and rec-  
22 reational shooting.

23 (e) APPLICATION.—This section shall not apply if the  
24 closure is—

25 (1) less than 14 days in duration; and

1 (2) covered by a special use permit.

2 **SEC. 6214. SHOOTING RANGES.**

3 (a) IN GENERAL.—Except as provided in subsection  
4 (b), the Secretary concerned may, in accordance with this  
5 section and other applicable law, lease or permit the use  
6 of Federal land for a shooting range.

7 (b) EXCEPTION.—The Secretary concerned shall not  
8 lease or permit the use of Federal land for a shooting  
9 range, within—

10 (1) a component of the National Landscape  
11 Conservation System;

12 (2) a component of the National Wilderness  
13 Preservation System;

14 (3) any area that is—

15 (A) designated as a wilderness study area;

16 (B) administratively classified as—

17 (i) wilderness-eligible; or

18 (ii) wilderness-suitable; or

19 (C) a primitive or semiprimitive area;

20 (4) a national monument, national volcanic  
21 monument, or national scenic area; or

22 (5) a component of the National Wild and Sce-  
23 nic Rivers System (including areas designated for  
24 study for potential addition to the National Wild  
25 and Scenic Rivers System).

1 **SEC. 6215. FEDERAL ACTION TRANSPARENCY.**

2 (a) MODIFICATION OF EQUAL ACCESS TO JUSTICE  
3 PROVISIONS.—

4 (1) AGENCY PROCEEDINGS.—Section 504 of  
5 title 5, United States Code, is amended—

6 (A) in subsection (c)(1), by striking “,  
7 United States Code”;

8 (B) by redesignating subsection (f) as sub-  
9 section (i); and

10 (C) by striking subsection (e) and inserting  
11 the following:

12 “(e)(1) Not later than March 31 of the first fiscal  
13 year beginning after the date of enactment of the Energy  
14 Policy Modernization Act of 2016, and every fiscal year  
15 thereafter, the Chairman of the Administrative Conference  
16 of the United States, after consultation with the Chief  
17 Counsel for Advocacy of the Small Business Administra-  
18 tion, shall submit to Congress and make publicly available  
19 online a report on the amount of fees and other expenses  
20 awarded during the preceding fiscal year under this sec-  
21 tion.

22 “(2) Each report under paragraph (1) shall describe  
23 the number, nature, and amount of the awards, the claims  
24 involved in the controversy, and any other relevant infor-  
25 mation that may aid Congress in evaluating the scope and  
26 impact of such awards.

1           “(3)(A) Each report under paragraph (1) shall ac-  
2 count for all payments of fees and other expenses awarded  
3 under this section that are made pursuant to a settlement  
4 agreement, regardless of whether the settlement agree-  
5 ment is sealed or otherwise subject to a nondisclosure pro-  
6 vision.

7           “(B) The disclosure of fees and other expenses re-  
8 quired under subparagraph (A) shall not affect any other  
9 information that is subject to a nondisclosure provision in  
10 a settlement agreement.

11           “(f) As soon as practicable, and in any event not later  
12 than the date on which the first report under subsection  
13 (e)(1) is required to be submitted, the Chairman of the  
14 Administrative Conference of the United States shall cre-  
15 ate and maintain online a searchable database containing,  
16 with respect to each award of fees and other expenses  
17 under this section made on or after the date of enactment  
18 of the Energy Policy Modernization Act of 2016, the fol-  
19 lowing information:

20           “(1) The case name and number of the adver-  
21 sary adjudication, if available, hyperlinked to the  
22 case, if available.

23           “(2) The name of the agency involved in the  
24 adversary adjudication.

1           “(3) A description of the claims in the adver-  
2 sary adjudication.

3           “(4) The name of each party to whom the  
4 award was made as such party is identified in the  
5 order or other court document making the award.

6           “(5) The amount of the award.

7           “(6) The basis for the finding that the position  
8 of the agency concerned was not substantially justi-  
9 fied.

10          “(g) The online searchable database described in sub-  
11 section (f) may not reveal any information the disclosure  
12 of which is prohibited by law or a court order.

13          “(h) The head of each agency shall provide to the  
14 Chairman of the Administrative Conference of the United  
15 States in a timely manner all information requested by  
16 the Chairman to comply with the requirements of sub-  
17 sections (e), (f), and (g).”.

18           (2) COURT CASES.—Section 2412(d) of title 28,  
19 United States Code, is amended by adding at the  
20 end the following:

21          “(5)(A) Not later than March 31 of the first fiscal  
22 year beginning after the date of enactment of the Energy  
23 Policy Modernization Act of 2016, and every fiscal year  
24 thereafter, the Chairman of the Administrative Conference  
25 of the United States shall submit to Congress and make

1 publicly available online a report on the amount of fees  
2 and other expenses awarded during the preceding fiscal  
3 year pursuant to this subsection.

4 “(B) Each report under subparagraph (A) shall de-  
5 scribe the number, nature, and amount of the awards, the  
6 claims involved in the controversy, and any other relevant  
7 information that may aid Congress in evaluating the scope  
8 and impact of such awards.

9 “(C)(i) Each report under subparagraph (A) shall ac-  
10 count for all payments of fees and other expenses awarded  
11 under this subsection that are made pursuant to a settle-  
12 ment agreement, regardless of whether the settlement  
13 agreement is sealed or otherwise subject to a nondisclosure  
14 provision.

15 “(ii) The disclosure of fees and other expenses re-  
16 quired under clause (i) shall not affect any other informa-  
17 tion that is subject to a nondisclosure provision in a settle-  
18 ment agreement.

19 “(D) The Chairman of the Administrative Conference  
20 of the United States shall include and clearly identify in  
21 each annual report under subparagraph (A), for each case  
22 in which an award of fees and other expenses is included  
23 in the report—

24 “(i) any amounts paid under section 1304 of  
25 title 31 for a judgment in the case;

1           “(ii) the amount of the award of fees and other  
2           expenses; and

3           “(iii) the statute under which the plaintiff filed  
4           suit.

5           “(6) As soon as practicable, and in any event not  
6           later than the date on which the first report under para-  
7           graph (5)(A) is required to be submitted, the Chairman  
8           of the Administrative Conference of the United States  
9           shall create and maintain online a searchable database  
10          containing, with respect to each award of fees and other  
11          expenses under this subsection made on or after the date  
12          of enactment of the Energy Policy Modernization Act of  
13          2016, the following information:

14           “(A) The case name and number, hyperlinked  
15          to the case, if available.

16           “(B) The name of the agency involved in the  
17          case.

18           “(C) The name of each party to whom the  
19          award was made as such party is identified in the  
20          order or other court document making the award.

21           “(D) A description of the claims in the case.

22           “(E) The amount of the award.

23           “(F) The basis for the finding that the position  
24          of the agency concerned was not substantially justi-  
25          fied.

1       “(7) The online searchable database described in  
2 paragraph (6) may not reveal any information the disclo-  
3 sure of which is prohibited by law or a court order.

4       “(8) The head of each agency (including the Attorney  
5 General of the United States) shall provide to the Chair-  
6 man of the Administrative Conference of the United  
7 States in a timely manner all information requested by  
8 the Chairman to comply with the requirements of para-  
9 graphs (5), (6), and (7).”.

10           (3) TECHNICAL AND CONFORMING AMEND-  
11 MENTS.—Section 2412 of title 28, United States  
12 Code, is amended—

13           (A) in subsection (d)(3), by striking  
14 “United States Code,”; and

15           (B) in subsection (e)—

16           (i) by striking “of section 2412 of  
17 title 28, United States Code,” and insert-  
18 ing “of this section”; and

19           (ii) by striking “of such title” and in-  
20 serting “of this title”.

21           (b) JUDGMENT FUND TRANSPARENCY.—Section  
22 1304 of title 31, United States Code, is amended by add-  
23 ing at the end the following:

24           “(d) Beginning not later than the date that is 60  
25 days after the date of enactment of the Energy Policy

1 Modernization Act of 2016, and unless the disclosure of  
2 such information is otherwise prohibited by law or a court  
3 order, the Secretary of the Treasury shall make available  
4 to the public on a website, as soon as practicable, but not  
5 later than 30 days after the date on which a payment  
6 under this section is tendered, the following information  
7 with regard to that payment:

8           “(1) The name of the specific agency or entity  
9           whose actions gave rise to the claim or judgment.

10           “(2) The name of the plaintiff or claimant.

11           “(3) The name of counsel for the plaintiff or  
12           claimant.

13           “(4) The amount paid representing principal li-  
14           ability, and any amounts paid representing any an-  
15           cillary liability, including attorney fees, costs, and  
16           interest.

17           “(5) A brief description of the facts that gave  
18           rise to the claim.

19           “(6) The name of the agency that submitted  
20           the claim.”.

21           **PART III—FILMING ON FEDERAL LAND**

22           **MANAGEMENT AGENCY LAND**

23           **SEC. 6221. COMMERCIAL FILMING.**

24           (a) IN GENERAL.—Section 1 of Public Law 106–206  
25 (16 U.S.C. 4601–6d) is amended—

1           (1) by redesignating subsections (a) through (f)  
2           as subsections (b) through (g), respectively;

3           (2) by inserting before subsection (b) (as so re-  
4           designated) the following:

5           “(a) DEFINITION OF SECRETARY.—The term ‘Sec-  
6           retary’ means the Secretary of the Interior or the Sec-  
7           retary of Agriculture, as applicable, with respect to land  
8           under the respective jurisdiction of the Secretary.”;

9           (3) in subsection (b) (as so redesignated)—

10           (A) in paragraph (1)—

11           (i) in the first sentence, by striking  
12           “of the Interior or the Secretary of Agri-  
13           culture (hereafter individually referred to  
14           as the ‘Secretary’ with respect to land (ex-  
15           cept land in a System unit as defined in  
16           section 100102 of title 54, United States  
17           Code) under their respective jurisdic-  
18           tions)”;

19           (ii) in subparagraph (B), by inserting  
20           “, except in the case of film crews of 3 or  
21           fewer individuals” before the period at the  
22           end; and

23           (B) by adding at the end the following:

24           “(3) FEE SCHEDULE.—Not later than 180 days  
25           after the date of enactment of the Energy Policy

1 Modernization Act of 2016, to enhance consistency  
2 in the management of Federal land, the Secretaries  
3 shall publish a single joint land use fee schedule for  
4 commercial filming and still photography.”;

5 (4) in subsection (c) (as so redesignated), in the  
6 second sentence, by striking “subsection (a)” and in-  
7 serting “subsection (b)”;

8 (5) in subsection (d) (as so redesignated), in  
9 the heading, by inserting “Commercial” before  
10 “Still”;

11 (6) in paragraph (1) of subsection (f) (as so re-  
12 designated), by inserting “in accordance with the  
13 Federal Lands Recreation Enhancement Act (16  
14 U.S.C. 6801 et seq.),” after “without further appro-  
15 priation,”;

16 (7) in subsection (g) (as so redesignated)—

17 (A) by striking “The Secretary shall” and  
18 inserting the following:

19 “(1) IN GENERAL.—The Secretary shall”; and

20 (B) by adding at the end the following:

21 “(2) CONSIDERATIONS.—The Secretary shall  
22 not consider subject matter or content as a criterion  
23 for issuing or denying a permit under this Act.”;  
24 and

25 (8) by adding at the end the following:

1           “(h) EXEMPTION FROM COMMERCIAL FILMING OR  
2 STILL PHOTOGRAPHY PERMITS AND FEES.—The Sec-  
3 retary shall not require persons holding commercial use  
4 authorizations or special recreation permits to obtain an  
5 additional permit or pay a fee for commercial filming or  
6 still photography under this Act if the filming or photog-  
7 raphy conducted is—

8           “(1) incidental to the permitted activity that is  
9 the subject of the commercial use authorization or  
10 special recreation permit; and

11           “(2) the holder of the commercial use author-  
12 ization or special recreation permit is an individual  
13 or small business concern (within the meaning of  
14 section 3 of the Small Business Act (15 U.S.C.  
15 632)).

16           “(i) EXCEPTION FROM CERTAIN FEES.—Commercial  
17 filming or commercial still photography shall be exempt  
18 from fees under this Act, but not from recovery of costs  
19 under subsection (c), if the activity—

20           “(1) is conducted by an entity that is a small  
21 business concern (within the meaning of section 3 of  
22 the Small Business Act (15 U.S.C. 632));

23           “(2) is conducted by a crew of not more than  
24 3 individuals; and

25           “(3) uses only a camera and tripod.

1 “(j) APPLICABILITY TO NEWS GATHERING ACTIVI-  
2 TIES.—

3 “(1) IN GENERAL.—News gathering shall not  
4 be considered a commercial activity.

5 “(2) INCLUDED ACTIVITIES.—In this sub-  
6 section, the term ‘news gathering’ includes, at a  
7 minimum, the gathering, recording, and filming of  
8 news and information related to news in any me-  
9 dium.”.

10 (b) CONFORMING AMENDMENTS.—Chapter 1009 of  
11 title 54, United States Code, is amended—

12 (1) by striking section 100905; and

13 (2) in the table of sections for chapter 1009 of  
14 title 54, United States Code, by striking the item re-  
15 lating to section 100905.

16 **PART IV—BOWS, WILDLIFE MANAGEMENT, AND**  
17 **ACCESS OPPORTUNITIES FOR RECREATION,**  
18 **HUNTING, AND FISHING**

19 **SEC. 6231. BOWS IN PARKS.**

20 (a) IN GENERAL.—Chapter 1049 of title 54, United  
21 States Code (as amended by section 5001(a)), is amended  
22 by adding at the end the following:

23 **“§ 104909. Bows in parks**

24 “(a) DEFINITION OF NOT READY FOR IMMEDIATE  
25 USE.—The term ‘not ready for immediate use’ means—

1           “(1) a bow or crossbow, the arrows of which are  
2           secured or stowed in a quiver or other arrow trans-  
3           port case; and

4           “(2) with respect to a crossbow, uncocked.

5           “(b) VEHICULAR TRANSPORTATION AUTHORIZED.—

6           The Director shall not promulgate or enforce any regula-  
7           tion that prohibits an individual from transporting bows  
8           and crossbows that are not ready for immediate use across  
9           any System unit in the vehicle of the individual if—

10           “(1) the individual is not otherwise prohibited  
11           by law from possessing the bows and crossbows;

12           “(2) the bows or crossbows that are not ready  
13           for immediate use remain inside the vehicle of the  
14           individual throughout the period during which the  
15           bows or crossbows are transported across System  
16           land; and

17           “(3) the possession of the bows and crossbows  
18           is in compliance with the law of the State in which  
19           the System unit is located.”.

20           (b) CLERICAL AMENDMENT.—The table of sections  
21           for chapter 1049 of title 54, United States Code (as  
22           amended by section 5001(b)), is amended by inserting  
23           after the item relating to section 104908 the following:

          “104909. Bows in parks.”.

1 **SEC. 6232. WILDLIFE MANAGEMENT IN PARKS.**

2 (a) IN GENERAL.—Chapter 1049 of title 54, United  
3 States Code (as amended by section 6231(a)), is amended  
4 by adding at the end the following:

5 **“SEC. 104910. WILDLIFE MANAGEMENT IN PARKS.**

6 “(a) USE OF QUALIFIED VOLUNTEERS.—If the Sec-  
7 retary determines it is necessary to reduce the size of a  
8 wildlife population on System land in accordance with ap-  
9 plicable law (including regulations), the Secretary may use  
10 qualified volunteers to assist in carrying out wildlife man-  
11 agement on System land.

12 “(b) REQUIREMENTS FOR QUALIFIED VOLUN-  
13 TEERS.—Qualified volunteers providing assistance under  
14 subsection (a) shall be subject to—

15 “(1) any training requirements or qualifications  
16 established by the Secretary; and

17 “(2) any other terms and conditions that the  
18 Secretary may require.”.

19 (b) CLERICAL AMENDMENT.—The table of sections  
20 for chapter 1049 of title 54 (as amended by section  
21 6231(b)), United States Code, is amended by inserting  
22 after the item relating to section 104909 the following:

“104910. Wildlife management in parks.”.

1 **SEC. 6233. IDENTIFYING OPPORTUNITIES FOR RECRE-**  
2 **ATION, HUNTING, AND FISHING ON FEDERAL**  
3 **LAND.**

4 (a) DEFINITIONS.—In this section:

5 (1) SECRETARY.—The term “Secretary”  
6 means—

7 (A) the Secretary of the Interior, with re-  
8 spect to land administered by—

9 (i) the Director of the National Park  
10 Service;

11 (ii) the Director of the United States  
12 Fish and Wildlife Service; and

13 (iii) the Director of the Bureau of  
14 Land Management; and

15 (B) the Secretary of Agriculture, with re-  
16 spect to land administered by the Chief of the  
17 Forest Service.

18 (2) STATE OR REGIONAL OFFICE.—The term  
19 “State or regional office” means—

20 (A) a State office of the Bureau of Land  
21 Management; or

22 (B) a regional office of—

23 (i) the National Park Service;

24 (ii) the United States Fish and Wild-  
25 life Service; or

26 (iii) the Forest Service.

1           (3) TRAVEL MANAGEMENT PLAN.—The term  
2           “travel management plan” means a plan for the  
3           management of travel—

4                   (A) with respect to land under the jurisdic-  
5                   tion of the National Park Service, on park  
6                   roads and designated routes under section 4.10  
7                   of title 36, Code of Federal Regulations (or suc-  
8                   cessor regulations);

9                   (B) with respect to land under the jurisdic-  
10                   tion of the United States Fish and Wildlife  
11                   Service, on the land under a comprehensive con-  
12                   servation plan prepared under section 4(e) of  
13                   the National Wildlife Refuge System Adminis-  
14                   tration Act of 1966 (16 U.S.C. 668dd(e));

15                   (C) with respect to land under the jurisdic-  
16                   tion of the Forest Service, on National Forest  
17                   System land under part 212 of title 36, Code  
18                   of Federal Regulations (or successor regula-  
19                   tions); and

20                   (D) with respect to land under the jurisdic-  
21                   tion of the Bureau of Land Management, under  
22                   a resource management plan developed under  
23                   the Federal Land Policy and Management Act  
24                   of 1976 (43 U.S.C. 1701 et seq.).

25           (b) PRIORITY LISTS REQUIRED.—

1           (1) IN GENERAL.—Not later than 180 days  
2 after the date of enactment of this Act, annually  
3 during the 10-year period beginning on the date on  
4 which the first priority list is completed, and every  
5 5 years after the end of the 10-year period, the Sec-  
6 retary shall prepare a priority list, to be made pub-  
7 licly available on the website of the applicable Fed-  
8 eral agency referred to in subsection (a)(1), which  
9 shall identify the location and acreage of land within  
10 the jurisdiction of each State or regional office on  
11 which the public is allowed, under Federal or State  
12 law, to hunt, fish, or use the land for other rec-  
13 reational purposes but—

14                   (A) to which there is no public access or  
15 egress; or

16                   (B) to which public access or egress to the  
17 legal boundaries of the land is significantly re-  
18 stricted (as determined by the Secretary).

19           (2) MINIMUM SIZE.—Any land identified under  
20 paragraph (1) shall consist of contiguous acreage of  
21 at least 640 acres.

22           (3) CONSIDERATIONS.—In preparing the pri-  
23 ority list required under paragraph (1), the Sec-  
24 retary shall consider with respect to the land—

1 (A) whether access is absent or merely re-  
2 stricted, including the extent of the restriction;

3 (B) the likelihood of resolving the absence  
4 of or restriction to public access;

5 (C) the potential for recreational use;

6 (D) any information received from the  
7 public or other stakeholders during the nomina-  
8 tion process described in paragraph (5); and

9 (E) any other factor as determined by the  
10 Secretary.

11 (4) ADJACENT LAND STATUS.—For each parcel  
12 of land on the priority list, the Secretary shall in-  
13 clude in the priority list whether resolving the issue  
14 of public access or egress to the land would require  
15 acquisition of an easement, right-of-way, or fee title  
16 from—

17 (A) another Federal agency;

18 (B) a State, local, or tribal government; or

19 (C) a private landowner.

20 (5) NOMINATION PROCESS.—In preparing a pri-  
21 ority list under this section, the Secretary shall pro-  
22 vide an opportunity for members of the public to  
23 nominate parcels for inclusion on the priority list.

24 (c) ACCESS OPTIONS.—With respect to land included  
25 on a priority list described in subsection (b), the Secretary

1 shall develop and submit to the Committees on Appropria-  
2 tions and Energy and Natural Resources of the Senate  
3 and the Committees on Appropriations and Natural Re-  
4 sources of the House of Representatives a report on op-  
5 tions for providing access that—

6           (1) identifies how public access and egress  
7           could reasonably be provided to the legal boundaries  
8           of the land in a manner that minimizes the impact  
9           on wildlife habitat and water quality;

10           (2) specifies the steps recommended to secure  
11           the access and egress, including acquiring an ease-  
12           ment, right-of-way, or fee title from a willing owner  
13           of any land that abuts the land or the need to co-  
14           ordinate with State land management agencies or  
15           other Federal, State, or tribal governments to allow  
16           for such access and egress; and

17           (3) is consistent with the travel management  
18           plan in effect on the land.

19           (d) PROTECTION OF PERSONALLY IDENTIFYING IN-  
20 FORMATION.—In making the priority list and report pre-  
21 pared under subsections (b) and (c) available, the Sec-  
22 retary shall ensure that no personally identifying informa-  
23 tion is included, such as names or addresses of individuals  
24 or entities.

1 (e) WILLING OWNERS.—For purposes of providing  
2 any permits to, or entering into agreements with, a State,  
3 local, or tribal government or private landowner with re-  
4 spect to the use of land under the jurisdiction of the gov-  
5 ernment or landowner, the Secretary shall not take into  
6 account whether the State, local, or tribal government or  
7 private landowner has granted or denied public access or  
8 egress to the land.

9 (f) MEANS OF PUBLIC ACCESS AND EGRESS IN-  
10 CLUDED.—In considering public access and egress under  
11 subsections (b) and (c), the Secretary shall consider public  
12 access and egress to the legal boundaries of the land de-  
13 scribed in those subsections, including access and egress—

14 (1) by motorized or non-motorized vehicles; and

15 (2) on foot or horseback.

16 (g) EFFECT.—

17 (1) IN GENERAL.—This section shall have no  
18 effect on whether a particular recreational use shall  
19 be allowed on the land included in a priority list  
20 under this section.

21 (2) EFFECT OF ALLOWABLE USES ON AGENCY  
22 CONSIDERATION.—In preparing the priority list  
23 under subsection (b), the Secretary shall only con-  
24 sider recreational uses that are allowed on the land  
25 at the time that the priority list is prepared.

1           **PART V—FEDERAL LAND TRANSACTION**

2                           **FACILITATION ACT**

3   **SEC. 6241. FEDERAL LAND TRANSACTION FACILITATION**

4                           **ACT.**

5           (a) IN GENERAL.—The Federal Land Transaction  
6 Facilitation Act is amended—

7                   (1) in section 203(2) (43 U.S.C. 2302(2)), by  
8 striking “on the date of enactment of this Act was”  
9 and inserting “is”;

10                  (2) in section 205 (43 U.S.C. 2304)—

11                       (A) in subsection (a), by striking “(as in  
12 effect on the date of enactment of this Act)”;

13                       and

14                       (B) by striking subsection (d);

15                  (3) in section 206 (43 U.S.C. 2305), by striking  
16 subsection (f); and

17                  (4) in section 207(b) (43 U.S.C. 2306(b))—

18                       (A) in paragraph (1)—

19                           (i) by striking “96–568” and insert-  
20 ing “96–586”; and

21                           (ii) by striking “; or” and inserting a  
22 semicolon;

23                       (B) in paragraph (2)—

24                           (i) by inserting “Public Law 105–  
25 263;” before “112 Stat.”; and

1 (ii) by striking the period at the end  
2 and inserting a semicolon; and

3 (C) by adding at the end the following:

4 “(3) the White Pine County Conservation,  
5 Recreation, and Development Act of 2006 (Public  
6 Law 109–432; 120 Stat. 3028);

7 “(4) the Lincoln County Conservation, Recre-  
8 ation, and Development Act of 2004 (Public Law  
9 108–424; 118 Stat. 2403);

10 “(5) subtitle F of title I of the Omnibus Public  
11 Land Management Act of 2009 (16 U.S.C. 1132  
12 note; Public Law 111–11);

13 “(6) subtitle O of title I of the Omnibus Public  
14 Land Management Act of 2009 (16 U.S.C. 460www  
15 note, 1132 note; Public Law 111–11);

16 “(7) section 2601 of the Omnibus Public Land  
17 Management Act of 2009 (Public Law 111–11; 123  
18 Stat. 1108); or

19 “(8) section 2606 of the Omnibus Public Land  
20 Management Act of 2009 (Public Law 111–11; 123  
21 Stat. 1121).”.

22 (b) FUNDS TO TREASURY.—Of the amounts depos-  
23 ited in the Federal Land Disposal Account, there shall be  
24 transferred to the general fund of the Treasury  
25 \$1,000,000 for each of fiscal years 2016 through 2025.

1 **PART VI—FISH AND WILDLIFE CONSERVATION**

2 **SEC. 6251. AMENDMENTS TO PITTMAN-ROBERTSON WILD-**  
 3 **LIFE RESTORATION ACT.**

4 (a) PURPOSE.—The purpose of this section is to fa-  
 5 cilitate the construction and expansion of public target  
 6 ranges, including ranges on Federal land managed by the  
 7 Forest Service and the Bureau of Land Management.

8 (b) DEFINITION OF PUBLIC TARGET RANGE.—In  
 9 this section, the term “public target range” means a spe-  
 10 cific location that—

11 (1) is identified by a governmental agency for  
 12 recreational shooting;

13 (2) is open to the public;

14 (3) may be supervised; and

15 (4) may accommodate archery or rifle, pistol, or  
 16 shotgun shooting.

17 (c) AMENDMENTS TO PITTMAN-ROBERTSON WILD-  
 18 LIFE RESTORATION ACT.—

19 (1) DEFINITIONS.—Section 2 of the Pittman-  
 20 Robertson Wildlife Restoration Act (16 U.S.C.  
 21 669a) is amended—

22 (A) by redesignating paragraphs (2)  
 23 through (8) as paragraphs (3) through (9), re-  
 24 spectively; and

25 (B) by inserting after paragraph (1) the  
 26 following:

1           “(2) the term ‘public target range’ means a  
2 specific location that—

3           “(A) is identified by a governmental agen-  
4 cy for recreational shooting;

5           “(B) is open to the public;

6           “(C) may be supervised; and

7           “(D) may accommodate archery or rifle,  
8 pistol, or shotgun shooting;”.

9           (2) EXPENDITURES FOR MANAGEMENT OF  
10 WILDLIFE AREAS AND RESOURCES.—Section 8(b) of  
11 the Pittman-Robertson Wildlife Restoration Act (16  
12 U.S.C. 669g(b)) is amended—

13           (A) by striking “(b) Each State” and in-  
14 serting the following:

15           “(b) EXPENDITURES FOR MANAGEMENT OF WILD-  
16 LIFE AREAS AND RESOURCES.—

17           “(1) IN GENERAL.—Except as provided in para-  
18 graph (2), each State”;

19           (B) in paragraph (1) (as so designated), by  
20 striking “construction, operation,” and insert-  
21 ing “operation”;

22           (C) in the second sentence, by striking  
23 “The non-Federal share” and inserting the fol-  
24 lowing:

1           “(3) NON-FEDERAL SHARE.—The non-Federal  
2 share”;

3           (D) in the third sentence, by striking “The  
4 Secretary” and inserting the following:

5           “(4) REGULATIONS.—The Secretary”; and

6           (E) by inserting after paragraph (1) (as  
7 designated by subparagraph (A)) the following:

8           “(2) EXCEPTION.—Notwithstanding the limita-  
9 tion described in paragraph (1), a State may pay up  
10 to 90 percent of the cost of acquiring land for, ex-  
11 panding, or constructing a public target range.”.

12           (3) FIREARM AND BOW HUNTER EDUCATION  
13 AND SAFETY PROGRAM GRANTS.—Section 10 of the  
14 Pittman-Robertson Wildlife Restoration Act (16  
15 U.S.C. 669h-1) is amended—

16           (A) in subsection (a), by adding at the end  
17 the following:

18           “(3) ALLOCATION OF ADDITIONAL AMOUNTS.—  
19 Of the amount apportioned to a State for any fiscal  
20 year under section 4(b), the State may elect to allo-  
21 cate not more than 10 percent, to be combined with  
22 the amount apportioned to the State under para-  
23 graph (1) for that fiscal year, for acquiring land for,  
24 expanding, or constructing a public target range.”;

1 (B) by striking subsection (b) and insert-  
2 ing the following:

3 “(b) COST SHARING.—

4 “(1) IN GENERAL.—Except as provided in para-  
5 graph (2), the Federal share of the cost of any activ-  
6 ity carried out using a grant under this section shall  
7 not exceed 75 percent of the total cost of the activ-  
8 ity.

9 “(2) PUBLIC TARGET RANGE CONSTRUCTION OR  
10 EXPANSION.—The Federal share of the cost of ac-  
11 quiring land for, expanding, or constructing a public  
12 target range in a State on Federal or non-Federal  
13 land pursuant to this section or section 8(b) shall  
14 not exceed 90 percent of the cost of the activity.”;  
15 and

16 (C) in subsection (c)(1)—

17 (i) by striking “Amounts made” and  
18 inserting the following:

19 “(A) IN GENERAL.—Except as provided in  
20 subparagraph (B), amounts made”; and

21 (ii) by adding at the end the fol-  
22 lowing:

23 “(B) EXCEPTION.—Amounts provided for  
24 acquiring land for, constructing, or expanding a  
25 public target range shall remain available for

1 expenditure and obligation during the 5-fiscal-  
2 year period beginning on October 1 of the first  
3 fiscal year for which the amounts are made  
4 available.”.

5 (d) SENSE OF CONGRESS REGARDING COOPERA-  
6 TION.—It is the sense of Congress that, consistent with  
7 applicable laws (including regulations), the Chief of the  
8 Forest Service and the Director of the Bureau of Land  
9 Management should cooperate with State and local au-  
10 thorities and other entities to carry out waste removal and  
11 other activities on any Federal land used as a public target  
12 range to encourage continued use of that land for target  
13 practice or marksmanship training.

14 **SEC. 6252. NORTH AMERICAN WETLANDS CONSERVATION**  
15 **ACT.**

16 (a) CONSERVATION INCENTIVES LANDOWNER EDU-  
17 CATION PROGRAM.—Any acquisition of land (including  
18 any interest in land) under the North American Wetlands  
19 Conservation Act (16 U.S.C. 4401 et seq.) shall be subject  
20 to the notification requirements under section  
21 **[50 (d)]**.

22 (b) AUTHORIZATION OF APPROPRIATIONS.—Section  
23 7(c) of the North American Wetlands Conservation Act  
24 (16 U.S.C. 4406(c)) is amended—

25 (1) in paragraph (4), by striking “and”;

1           (2) in paragraph (5), by striking the period at  
2           the end and inserting “; and”; and

3           (3) by adding at the end the following:

4           “(6) \$50,000,000 for each of fiscal years 2015  
5           through 2020.”.

6   **SEC. 6253. NATIONAL FISH HABITAT CONSERVATION.**

7           (a) **SHORT TITLE.**—This section may be cited as the  
8           “National Fish Habitat Conservation Through Partner-  
9           ships Act”.

10          (b) **PURPOSE.**—The purpose of this section is to en-  
11          courage partnerships among public agencies and other in-  
12          terested parties to promote fish conservation—

13               (1) to achieve measurable habitat conservation  
14               results through strategic actions of Fish Habitat  
15               Partnerships that lead to better fish habitat condi-  
16               tions and increased fishing opportunities by—

17                       (A) improving ecological conditions;

18                       (B) restoring natural processes; or

19                       (C) preventing the decline of intact and  
20               healthy systems;

21               (2) to establish a consensus set of national con-  
22               servation strategies as a framework to guide future  
23               actions and investment by Fish Habitat Partner-  
24               ships;

1           (3) to broaden the community of support for  
2 fish habitat conservation by—

3           (A) increasing fishing opportunities;

4           (B) fostering the participation of local  
5 communities, especially young people in local  
6 communities, in conservation activities; and

7           (C) raising public awareness of the role  
8 healthy fish habitat play in the quality of life  
9 and economic well-being of local communities;

10          (4) to fill gaps in the National Fish Habitat As-  
11 sessment and the associated database of the Na-  
12 tional Fish Habitat Assessment—

13           (A) to empower strategic conservation ac-  
14 tions supported by broadly available scientific  
15 information; and

16           (B) to integrate socioeconomic data in the  
17 analysis to improve the lives of humans in a  
18 manner consistent with fish habitat conserva-  
19 tion goals; and

20          (5) to communicate to the public and conserva-  
21 tion partners—

22           (A) the conservation outcomes produced  
23 collectively by Fish Habitat Partnerships; and

24           (B) new opportunities and voluntary ap-  
25 proaches for conserving fish habitat.

1 (c) DEFINITIONS.—In this section:

2 (1) APPROPRIATE CONGRESSIONAL COMMIT-  
3 TEES.—The term “appropriate congressional com-  
4 mittees” means—

5 (A) the Committee on Commerce, Science,  
6 and Transportation and the Committee on En-  
7 vironment and Public Works of the Senate; and

8 (B) the Committee on Natural Resources  
9 of the House of Representatives.

10 (2) BOARD.—The term “Board” means the Na-  
11 tional Fish Habitat Board established by subsection  
12 (d)(1)(A).

13 (3) DIRECTOR.—The term “Director” means  
14 the Director of the United States Fish and Wildlife  
15 Service.

16 (4) EPA ASSISTANT ADMINISTRATOR.—The  
17 term “EPA Assistant Administrator” means the As-  
18 sistant Administrator for Water of the Environ-  
19 mental Protection Agency.

20 (5) INDIAN TRIBE.—The term “Indian tribe”  
21 has the meaning given the term in section 4 of the  
22 Indian Self-Determination and Education Assistance  
23 Act (25 U.S.C. 450b).

24 (6) NOAA ASSISTANT ADMINISTRATOR.—The  
25 term “NOAA Assistant Administrator” means the

1 Assistant Administrator for Fisheries of the Na-  
2 tional Oceanic and Atmospheric Administration.

3 (7) PARTNERSHIP.—The term “Partnership”  
4 means a self-governed entity designated by the  
5 Board as a Fish Habitat Conservation Partnership  
6 pursuant to subsection (e)(1) .

7 (8) REAL PROPERTY INTEREST.—The term  
8 “real property interest” means an ownership interest  
9 in—

10 (A) land; or

11 (B) water (including water rights).

12 (9) SECRETARY.—The term “Secretary” means  
13 the Secretary of the Interior.

14 (10) STATE.—The term “State” means each of  
15 the several States.

16 (11) STATE AGENCY.—The term “State agen-  
17 cy” means—

18 (A) the fish and wildlife agency of a State;

19 and

20 (B) any department or division of a de-  
21 partment or agency of a State that manages in  
22 the public trust the inland or marine fishery re-  
23 sources or sustains the habitat for those fishery  
24 resources of the State pursuant to State law or  
25 the constitution of the State.

1 (d) NATIONAL FISH HABITAT BOARD.—

2 (1) ESTABLISHMENT.—

3 (A) FISH HABITAT BOARD.—There is es-  
4 tablished a board, to be known as the “National  
5 Fish Habitat Board”, whose duties are—

6 (i) to promote, oversee, and coordinate  
7 the implementation of this section;

8 (ii) to establish national goals and pri-  
9 orities for fish habitat conservation;

10 (iii) to approve Partnerships; and

11 (iv) to review and make recommenda-  
12 tions regarding fish habitat conservation  
13 projects.

14 (B) MEMBERSHIP.—The Board shall be  
15 composed of 25 members, of whom—

16 (i) 1 shall be a representative of the  
17 Department of the Interior;

18 (ii) 1 shall be a representative of the  
19 United States Geological Survey;

20 (iii) 1 shall be a representative of the  
21 Department of Commerce;

22 (iv) 1 shall be a representative of the  
23 Department of Agriculture;

24 (v) 1 shall be a representative of the  
25 Association of Fish and Wildlife Agencies;

1 (vi) 4 shall be representatives of State  
2 agencies, 1 of whom shall be nominated by  
3 a regional association of fish and wildlife  
4 agencies from each of the Northeast,  
5 Southeast, Midwest, and Western regions  
6 of the United States;

7 (vii) 1 shall be a representative of ei-  
8 ther—

9 (I) Indian tribes in the State of  
10 Alaska; or

11 (II) Indian tribes in States other  
12 than the State of Alaska;

13 (viii) 1 shall be a representative of ei-  
14 ther—

15 (I) the Regional Fishery Manage-  
16 ment Councils established under sec-  
17 tion 302 of the Magnuson-Stevens  
18 Fishery Conservation and Manage-  
19 ment Act (16 U.S.C. 1852); or

20 (II) a representative of the Ma-  
21 rine Fisheries Commissions, which is  
22 composed of—

23 (aa) the Atlantic States Ma-  
24 rine Fisheries Commission;

1 (bb) the Gulf States Marine  
2 Fisheries Commission; and

3 (cc) the Pacific States Ma-  
4 rine Fisheries Commission;

5 (ix) 1 shall be a representative of the  
6 Sportfishing and Boating Partnership  
7 Council;

8 (x) 7 shall be representatives selected  
9 from each of—

10 (I) the recreational sportfishing  
11 industry;

12 (II) the commercial fishing in-  
13 dustry;

14 (III) marine recreational anglers;

15 (IV) freshwater recreational an-  
16 glers;

17 (V) habitat conservation organi-  
18 zations; and

19 (VI) science-based fishery organi-  
20 zations;

21 (xi) 1 shall be a representative of a  
22 national private landowner organization;

23 (xii) 1 shall be a representative of an  
24 agricultural production organization;

1 (xiii) 1 shall be a representative of  
2 local government interests involved in fish  
3 habitat restoration;

4 (xiv) 2 shall be representatives from  
5 different sectors of corporate industries,  
6 which may include—

7 (I) natural resource commodity  
8 interests, such as petroleum or min-  
9 eral extraction;

10 (II) natural resource user indus-  
11 tries; and

12 (III) industries with an interest  
13 in fish and fish habitat conservation;  
14 and

15 (xv) 1 shall be a leadership private  
16 sector or landowner representative of an  
17 active partnership.

18 (C) COMPENSATION.—A member of the  
19 Board shall serve without compensation.

20 (D) TRAVEL EXPENSES.—A member of the  
21 Board may be allowed travel expenses, includ-  
22 ing per diem in lieu of subsistence, at rates au-  
23 thorized for an employee of an agency under  
24 subchapter I of chapter 57 of title 5, United  
25 States Code, while away from the home or reg-

1           ular place of business of the member in the per-  
2           formance of the duties of the Board.

3           (2) APPOINTMENT AND TERMS.—

4                 (A) IN GENERAL.—Except as otherwise  
5           provided in this subsection, a member of the  
6           Board described in any of clauses (vi) through  
7           (xiv) of paragraph (1)(B) shall serve for a term  
8           of 3 years.

9                 (B) INITIAL BOARD MEMBERSHIP.—

10                     (i) IN GENERAL.—The initial Board  
11           will consist of representatives as described  
12           in clauses (i) through (vi) of paragraph  
13           (1)(B).

14                     (ii) REMAINING MEMBERS.—Not later  
15           than 60 days after the date of enactment  
16           of this Act, the representatives of the ini-  
17           tial Board pursuant to clause (i) shall ap-  
18           point the remaining members of the Board  
19           described in clauses (viii) through (xiv) of  
20           paragraph (1)(B).

21                     (iii) TRIBAL REPRESENTATIVES.—Not  
22           later than 60 days after the enactment of  
23           this Act, the Secretary shall provide to the  
24           Board a recommendation of not fewer than  
25           3 tribal representatives, from which the

1 Board shall appoint 1 representative pur-  
2 suant to clause (vii) of paragraph (1)(B).

3 (C) TRANSITIONAL TERMS.—Of the mem-  
4 bers described in paragraph (1)(B)(x) initially  
5 appointed to the Board—

6 (i) 2 shall be appointed for a term of  
7 1 year;

8 (ii) 2 shall be appointed for a term of  
9 2 years; and

10 (iii) 3 shall be appointed for a term of  
11 3 years.

12 (D) VACANCIES.—

13 (i) IN GENERAL.—A vacancy of a  
14 member of the Board described in any of  
15 clauses (viii) through (xiv) of paragraph  
16 (1)(B) shall be filled by an appointment  
17 made by the remaining members of the  
18 Board.

19 (ii) TRIBAL REPRESENTATIVES.—Fol-  
20 lowing a vacancy of a member of the  
21 Board described in clause (vii) of para-  
22 graph (1)(B), the Secretary shall rec-  
23 ommend to the Board a list of not fewer  
24 than 3 tribal representatives, from which

1 (ii) not less frequently than twice each  
2 calendar year.

3 (B) PUBLIC ACCESS.—All meetings of the  
4 Board shall be open to the public.

5 (5) PROCEDURES.—

6 (A) IN GENERAL.—The Board shall estab-  
7 lish procedures to carry out the business of the  
8 Board, including—

9 (i) a requirement that a quorum of  
10 the members of the Board be present to  
11 transact business;

12 (ii) a requirement that no rec-  
13 ommendations may be adopted by the  
14 Board, except by the vote of  $\frac{2}{3}$  of all mem-  
15 bers;

16 (iii) procedures for establishing na-  
17 tional goals and priorities for fish habitat  
18 conservation for the purposes of this sec-  
19 tion;

20 (iv) procedures for designating Part-  
21 nerships under subsection (e); and

22 (v) procedures for reviewing, evalu-  
23 ating, and making recommendations re-  
24 garding fish habitat conservation projects.

1 (B) QUORUM.—A majority of the members  
2 of the Board shall constitute a quorum.

3 (e) FISH HABITAT PARTNERSHIPS.—

4 (1) AUTHORITY TO APPROVE.—The Board may  
5 approve and designate Fish Habitat Partnerships in  
6 accordance with this subsection.

7 (2) PURPOSES.—The purposes of a Partnership  
8 shall be—

9 (A) to work with other regional habitat  
10 conservation programs to promote cooperation  
11 and coordination to enhance fish and fish habi-  
12 tats;

13 (B) to engage local and regional commu-  
14 nities to build support for fish habitat conserva-  
15 tion;

16 (C) to involve diverse groups of public and  
17 private partners;

18 (D) to develop collaboratively a strategic  
19 vision and achievable implementation plan that  
20 is scientifically sound;

21 (E) to leverage funding from sources that  
22 support local and regional partnerships;

23 (F) to use adaptive management prin-  
24 ciples, including evaluation of project success  
25 and functionality;

1 (G) to develop appropriate local or regional  
2 habitat evaluation and assessment measures  
3 and criteria that are compatible with national  
4 habitat condition measures; and

5 (H) to implement local and regional pri-  
6 ority projects that improve conditions for fish  
7 and fish habitat.

8 (3) CRITERIA FOR APPROVAL.—An entity seek-  
9 ing to be designated as a Partnership shall—

10 (A) submit to the Board an application at  
11 such time, in such manner, and containing such  
12 information as the Board may reasonably re-  
13 quire; and

14 (B) demonstrate to the Board that the en-  
15 tity has—

16 (i) a focus on promoting the health of  
17 important fish and fish habitats;

18 (ii) an ability to coordinate the imple-  
19 mentation of priority projects that support  
20 the goals and national priorities set by the  
21 Board that are within the Partnership  
22 boundary;

23 (iii) a self-governance structure that  
24 supports the implementation of strategic  
25 priorities for fish habitat;

1 (iv) the ability to develop local and re-  
2 gional relationships with a broad range of  
3 entities to further strategic priorities for  
4 fish and fish habitat;

5 (v) a strategic plan that details re-  
6 quired investments for fish habitat con-  
7 servation that addresses the strategic fish  
8 habitat priorities of the Partnership and  
9 supports and meets the strategic priorities  
10 of the Board;

11 (vi) the ability to develop and imple-  
12 ment fish habitat conservation projects  
13 that address strategic priorities of the  
14 Partnership and the Board; and

15 (vii) the ability to develop fish habitat  
16 conservation priorities based on sound  
17 science and data, the ability to measure  
18 the effectiveness of fish habitat projects of  
19 the Partnership, and a clear plan as to  
20 how Partnership science and data compo-  
21 nents will be integrated with the overall  
22 Board science and data effort.

23 (4) APPROVAL.—The Board may approve an  
24 application for a Partnership submitted under para-

1 graph (3) if the Board determines that the appli-  
2 cant—

3 (A) identifies representatives to provide  
4 support and technical assistance to the Partner-  
5 ship from a diverse group of public and private  
6 partners, which may include State or local gov-  
7 ernments, nonprofit entities, Indian tribes, and  
8 private individuals, that are focused on con-  
9 servation of fish habitats to achieve results  
10 across jurisdictional boundaries on public and  
11 private land;

12 (B) is organized to promote the health of  
13 important fish species and important fish habi-  
14 tats, including reservoirs, natural lakes, coastal  
15 and marine environments, and estuaries;

16 (C) identifies strategic fish and fish habi-  
17 tat priorities for the Partnership area in the  
18 form of geographical focus areas or key  
19 stressors or impairments to facilitate strategic  
20 planning and decisionmaking;

21 (D) is able to address issues and priorities  
22 on a nationally significant scale;

23 (E) includes a governance structure that—

24 (i) reflects the range of all partners;

25 and

1 (ii) promotes joint strategic planning  
2 and decisionmaking by the applicant;

3 (F) demonstrates completion of, or signifi-  
4 cant progress toward the development of, a  
5 strategic plan to address the decline in fish pop-  
6 ulations, rather than simply treating symptoms,  
7 in accordance with the goals and national prior-  
8 ities established by the Board; and

9 (G) promotes collaboration in developing a  
10 strategic vision and implementation program  
11 that is scientifically sound and achievable.

12 (f) FISH HABITAT CONSERVATION PROJECTS.—

13 (1) SUBMISSION TO BOARD.—Not later than  
14 March 31 of each calendar year, each Partnership  
15 shall submit to the Board a list of priority fish habi-  
16 tat conservation projects recommended by the Part-  
17 nership for annual funding under this section.

18 (2) RECOMMENDATIONS BY BOARD.—Not later  
19 than July 1 of each calendar year, the Board shall  
20 submit to the Secretary a priority list of fish habitat  
21 conservation projects that includes the description,  
22 including estimated costs, of each project that the  
23 Board recommends that the Secretary approve and  
24 fund under this section for the following fiscal year.

1           (3) CRITERIA FOR PROJECT SELECTION.—The  
2 Board shall select each fish habitat conservation  
3 project to be recommended to the Secretary under  
4 paragraph (2) after taking into consideration, at a  
5 minimum, the following information:

6           (A) A recommendation of the Partnership  
7 that is, or will be, participating actively in im-  
8 plementing the fish habitat conservation  
9 project.

10           (B) The capabilities and experience of  
11 project proponents to implement successfully  
12 the proposed project.

13           (C) The extent to which the fish habitat  
14 conservation project —

15           (i) fulfills a local or regional priority  
16 that is directly linked to the strategic plan  
17 of the Partnership and is consistent with  
18 the purpose of this section;

19           (ii) addresses the national priorities  
20 established by the Board;

21           (iii) is supported by the findings of  
22 the Habitat Assessment of the Partnership  
23 or the Board, and aligns or is compatible  
24 with other conservation plans;

1 (iv) identifies appropriate monitoring  
2 and evaluation measures and criteria that  
3 are compatible with national measures;

4 (v) provides a well-defined budget  
5 linked to deliverables and outcomes;

6 (vi) leverages other funds to imple-  
7 ment the project;

8 (vii) addresses the causes and proc-  
9 esses behind the decline of fish or fish  
10 habitats; and

11 (viii) includes an outreach or edu-  
12 cation component that includes the local or  
13 regional community.

14 (D) The availability of sufficient non-Fed-  
15 eral funds to match Federal contributions for  
16 the fish habitat conservation project, as re-  
17 quired by paragraph (5);

18 (E) The extent to which the local or re-  
19 gional fish habitat conservation project—

20 (i) will increase fish populations in a  
21 manner that leads to recreational fishing  
22 opportunities for the public;

23 (ii) will be carried out through a coop-  
24 erative agreement among Federal, State,

1 and local governments, Indian tribes, and  
2 private entities;

3 (iii) increases public access to land or  
4 water for fish and wildlife-dependent rec-  
5 reational opportunities;

6 (iv) advances the conservation of fish  
7 and wildlife species that have been identi-  
8 fied by the States as species of greatest  
9 conservation need;

10 (v) where appropriate, advances the  
11 conservation of fish and fish habitats  
12 under the Magnuson-Stevens Fishery Con-  
13 servation and Management Act (16 U.S.C.  
14 1801 et seq.) and other relevant Federal  
15 law and State wildlife action plans; and

16 (vi) promotes strong and healthy fish  
17 habitats so that desired biological commu-  
18 nities are able to persist and adapt.

19 (F) The substantiality of the character and  
20 design of the fish habitat conservation project.

21 (4) LIMITATIONS.—

22 (A) REQUIREMENTS FOR EVALUATION.—

23 No fish habitat conservation project may be  
24 recommended by the Board under paragraph  
25 (2) or provided financial assistance under this

1 section unless the fish habitat conservation  
2 project includes an evaluation plan designed  
3 using applicable Board guidance—

4 (i) to appropriately assess the biological,  
5 ecological, or other results of the habitat  
6 protection, restoration, or enhancement  
7 activities carried out using the assistance;

8 (ii) to reflect appropriate changes to  
9 the fish habitat conservation project if the  
10 assessment substantiates that the fish  
11 habitat conservation project objectives are  
12 not being met;

13 (iii) to identify improvements to exist-  
14 ing fish populations, recreational fishing  
15 opportunities and the overall economic ben-  
16 efits for the local community of the fish  
17 habitat conservation project; and

18 (iv) to require the submission to the  
19 Board of a report describing the findings  
20 of the assessment.

21 (B) ACQUISITION AUTHORITIES.—

22 (i) IN GENERAL.—A State, local gov-  
23 ernment, or other non-Federal entity is eli-  
24 gible to receive funds for the acquisition of  
25 real property from willing sellers under

1 this section if the acquisition ensures 1  
2 of—

3 (I) public access for compatible  
4 fish and wildlife-dependent recreation;  
5 or

6 (II) a scientifically based, direct  
7 enhancement to the health of fish and  
8 fish populations, as determined by the  
9 Board.

10 (ii) STATE AGENCY APPROVAL.—

11 (I) IN GENERAL.—All real prop-  
12 erty interest acquisition projects fund-  
13 ed under this section are required to  
14 be approved by the State agency in  
15 the State in which the project is oc-  
16 ccurring.

17 (II) PROHIBITION.—The Board  
18 may not recommend, and the Sec-  
19 retary may not provide any funding  
20 for, any real property interest acqui-  
21 sition that has not been approved by  
22 the State agency.

23 (iii) ASSESSMENT OF OTHER AU-  
24 THORITIES.—The Fish Habitat Partner-  
25 ship shall conduct a project assessment,

1 submitted with the funding request and  
2 approved by the Board, to demonstrate all  
3 other Federal, State, and local authorities  
4 for the acquisition of real property have  
5 been exhausted.

6 (iv) RESTRICTIONS.—A real property  
7 interest may not be acquired pursuant to a  
8 fish habitat conservation project by a  
9 State, local government, or other non-Fed-  
10 eral entity, unless—

11 (I) the owner of the real property  
12 authorizes the State, local govern-  
13 ment, or other non-Federal entity to  
14 acquire the real property; and

15 (II) the Secretary and the Board  
16 determine that the State, local govern-  
17 ment, or other non-Federal entity  
18 would benefit from undertaking the  
19 management of the real property  
20 being acquired because that is in ac-  
21 cordance with the goals of a partner-  
22 ship.

23 (5) NON-FEDERAL CONTRIBUTIONS.—

24 (A) IN GENERAL.—Except as provided in  
25 subparagraph (B), no fish habitat conservation

1 project may be recommended by the Board  
2 under paragraph (2) or provided financial as-  
3 sistance under this section unless at least 50  
4 percent of the cost of the fish habitat conserva-  
5 tion project will be funded with non-Federal  
6 funds.

7 (B) NON-FEDERAL SHARE.—The non-Fed-  
8 eral share of the cost of a fish habitat conserva-  
9 tion project—

10 (i) may not be derived from another  
11 Federal grant program; but

12 (ii) may include in-kind contributions  
13 and cash.

14 (C) SPECIAL RULE FOR INDIAN TRIBES.—  
15 Notwithstanding subparagraph (A) or any other  
16 provision of law, any funds made available to  
17 an Indian tribe pursuant to this section may be  
18 considered to be non-Federal funds for the pur-  
19 pose of subparagraph (A).

20 (6) APPROVAL.—

21 (A) IN GENERAL.—Not later than 90 days  
22 after the date of receipt of the recommended  
23 priority list of fish habitat conservation projects  
24 under paragraph (2), subject to the limitations  
25 of paragraph (4), and based, to the maximum

1 extent practicable, on the criteria described in  
2 paragraph (3), the Secretary, after consulting  
3 with the Secretary of Commerce on marine or  
4 estuarine projects, shall approve or reject any  
5 fish habitat conservation project recommended  
6 by the Board.

7 (B) FUNDING.—If the Secretary approves  
8 a fish habitat conservation project under sub-  
9 paragraph (A), the Secretary shall use amounts  
10 made available to carry out this section to pro-  
11 vide funds to carry out the fish habitat con-  
12 servation project.

13 (C) NOTIFICATION.—If the Secretary re-  
14 jects any fish habitat conservation project rec-  
15 ommended by the Board under paragraph (2),  
16 not later than 180 days after the date of receipt  
17 of the recommendation, the Secretary shall pro-  
18 vide to the Board, the appropriate Partnership,  
19 and the appropriate congressional committees a  
20 written statement of the reasons that the Sec-  
21 retary rejected the fish habitat conservation  
22 project.

23 (g) TECHNICAL AND SCIENTIFIC ASSISTANCE.—

24 (1) IN GENERAL.—The Director, the NOAA  
25 Assistant Administrator, the EPA Assistant Admin-

1        istrator, and the Director of the United States Geo-  
2        logical Survey, in coordination with the Forest Serv-  
3        ice and other appropriate Federal departments and  
4        agencies, may provide scientific and technical assist-  
5        ance to the Partnerships, participants in fish habitat  
6        conservation projects, and the Board.

7            (2) INCLUSIONS.—Scientific and technical as-  
8        sistance provided pursuant to paragraph (1) may in-  
9        clude—

10            (A) providing technical and scientific as-  
11        sistance to States, Indian tribes, regions, local  
12        communities, and nongovernmental organiza-  
13        tions in the development and implementation of  
14        Partnerships;

15            (B) providing technical and scientific as-  
16        sistance to Partnerships for habitat assessment,  
17        strategic planning, and prioritization;

18            (C) supporting the development and imple-  
19        mentation of fish habitat conservation projects  
20        that are identified as high priorities by Partner-  
21        ships and the Board;

22            (D) supporting and providing recommenda-  
23        tions regarding the development of science-  
24        based monitoring and assessment approaches  
25        for implementation through Partnerships;

1 (E) supporting and providing recommenda-  
2 tions for a national fish habitat assessment;

3 (F) ensuring the availability of experts to  
4 assist in conducting scientifically based evalua-  
5 tion and reporting of the results of fish habitat  
6 conservation projects; and

7 (G) providing resources to secure state  
8 agency scientific and technical assistance to  
9 support Partnerships, participants in fish habi-  
10 tat conservation projects, and the Board.

11 (h) COORDINATION WITH STATES AND INDIAN  
12 TRIBES.—The Secretary shall provide a notice to, and co-  
13 operate with, the appropriate State agency or tribal agen-  
14 cy, as applicable, of each State and Indian tribe within  
15 the boundaries of which an activity is planned to be car-  
16 ried out pursuant to this section, including notification,  
17 by not later than 30 days before the date on which the  
18 activity is implemented.

19 (i) INTERAGENCY OPERATIONAL PLAN.—Not later  
20 than 1 year after the date of enactment of this Act, and  
21 every 5 years thereafter, the Director, in cooperation with  
22 the NOAA Assistant Administrator, the EPA Assistant  
23 Administrator, the Director of the United States Geologi-  
24 cal Survey, and the heads of other appropriate Federal  
25 departments and agencies (including at a minimum, those

1 agencies represented on the Board) shall develop an inter-  
2 agency operational plan that describes—

3 (1) the functional, operational, technical, sci-  
4 entific, and general staff, administrative, and mate-  
5 rial needs for the implementation of this section; and

6 (2) any interagency agreements between or  
7 among Federal departments and agencies to address  
8 those needs.

9 (j) ACCOUNTABILITY AND REPORTING.—

10 (1) REPORTING.—

11 (A) IN GENERAL.—Not later than 5 years  
12 after the date of enactment of this Act, and  
13 every 5 years thereafter, the Board shall submit  
14 to the appropriate congressional committees a  
15 report describing the progress of this section.

16 (B) CONTENTS.—Each report submitted  
17 under subparagraph (A) shall include—

18 (i) an estimate of the number of  
19 acres, stream miles, or acre-feet, or other  
20 suitable measures of fish habitat, that was  
21 maintained or improved by partnerships of  
22 Federal, State, or local governments, In-  
23 dian tribes, or other entities in the United  
24 States during the 5-year period ending on  
25 the date of submission of the report;

1 (ii) a description of the public access  
2 to fish habitats established or improved  
3 during that 5-year period;

4 (iii) a description of the improved op-  
5 portunities for public recreational fishing;  
6 and

7 (iv) an assessment of the status of  
8 fish habitat conservation projects carried  
9 out with funds provided under this section  
10 during that period, disaggregated by year,  
11 including—

12 (I) a description of the fish habi-  
13 tat conservation projects rec-  
14 ommended by the Board under sub-  
15 section (f)(2);

16 (II) a description of each fish  
17 habitat conservation project approved  
18 by the Secretary under subsection  
19 (f)(6), in order of priority for funding;

20 (III) a justification for—

21 (aa) the approval of each  
22 fish habitat conservation project;  
23 and

1 (bb) the order of priority for  
2 funding of each fish habitat con-  
3 servation project;

4 (IV) a justification for any rejec-  
5 tion of a fish habitat conservation  
6 project recommended by the Board  
7 under subsection (f)(2) that was  
8 based on a factor other than the cri-  
9 teria described in subsection (f)(3);  
10 and

11 (V) an accounting of expendi-  
12 tures by Federal, State, or local gov-  
13 ernments, Indian tribes, or other enti-  
14 ties to carry out fish habitat conserva-  
15 tion projects.

16 (2) STATUS AND TRENDS REPORT.—Not later  
17 than December 31, 2016, and every 5 years there-  
18 after, the Board shall submit to the appropriate con-  
19 gressional committees a report that includes—

20 (A) a status of all Partnerships approved  
21 under this section;

22 (B) a description of the status of fish habi-  
23 tats in the United States as identified by estab-  
24 lished Partnerships; and

1 (C) enhancements or reductions in public  
2 access as a result of—

3 (i) the activities of the Partnerships;

4 or

5 (ii) any other activities carried out  
6 pursuant to this section.

7 (3) REVISIONS.—Not later than December 31,  
8 2016, and every 5 years thereafter, the Board shall  
9 consider revising the goals of the Board, after con-  
10 sideration of each report required by paragraph (2).

11 (k) EFFECT OF SECTION.—

12 (1) WATER RIGHTS.—Nothing in this section—

13 (A) establishes any express or implied re-  
14 served water right in the United States for any  
15 purpose;

16 (B) affects any water right in existence on  
17 the date of enactment of this Act;

18 (C) preempts or affects any State water  
19 law or interstate compact governing water; or

20 (D) affects any Federal or State law in ex-  
21 istence on the date of enactment of the Act re-  
22 garding water quality or water quantity.

23 (2) AUTHORITY TO ACQUIRE WATER RIGHTS OR  
24 RIGHTS TO PROPERTY.—Under this section, only a  
25 State, local government, or other non-Federal entity

1       may acquire, under State law, water rights or rights  
2       to property.

3           (3) STATE AUTHORITY.—Nothing in this sec-  
4       tion—

5           (A) affects the authority, jurisdiction, or  
6       responsibility of a State to manage, control, or  
7       regulate fish and wildlife under the laws and  
8       regulations of the State; or

9           (B) authorizes the Secretary to control or  
10      regulate within a State the fishing or hunting  
11      of fish and wildlife.

12          (4) EFFECT ON INDIAN TRIBES.—Nothing in  
13      this section abrogates, abridges, affects, modifies,  
14      supersedes, or alters any right of an Indian tribe  
15      recognized by treaty or any other means, includ-  
16      ing—

17           (A) an agreement between the Indian tribe  
18      and the United States;

19           (B) Federal law (including regulations);

20           (C) an Executive order; or

21           (D) a judicial decree.

22          (5) ADJUDICATION OF WATER RIGHTS.—Noth-  
23      ing in this section diminishes or affects the ability  
24      of the Secretary to join an adjudication of rights to  
25      the use of water pursuant to subsection (a), (b), or

1 (c) of section 208 of the Department of Justice Ap-  
2 propriation Act, 1953 (43 U.S.C. 666).

3 (6) DEPARTMENT OF COMMERCE AUTHOR-  
4 ITY.—Nothing in this section affects the authority,  
5 jurisdiction, or responsibility of the Department of  
6 Commerce to manage, control, or regulate fish or  
7 fish habitats under the Magnuson-Stevens Fishery  
8 Conservation and Management Act (16 U.S.C. 1801  
9 et seq.).

10 (7) EFFECT ON OTHER AUTHORITIES.—

11 (A) PRIVATE PROPERTY PROTECTION.—  
12 Nothing in this section permits the use of funds  
13 made available to carry out this section to ac-  
14 quire real property or a real property interest  
15 without the written consent of each owner of  
16 the real property or real property interest.

17 (B) MITIGATION.—Nothing in this section  
18 permits the use of funds made available to  
19 carry out this section for fish and wildlife miti-  
20 gation purposes under—

21 (i) the Federal Water Pollution Con-  
22 trol Act (33 U.S.C. 1251 et seq.);

23 (ii) the Fish and Wildlife Coordina-  
24 tion Act (16 U.S.C. 661 et seq.);

1 (iii) the Water Resources Develop-  
2 ment Act of 1986 (Public Law 99-662;  
3 100 Stat. 4082); or

4 (iv) any other Federal law or court  
5 settlement.

6 (C) CLEAN WATER ACT.—Nothing in this  
7 section affects any provision of the Federal  
8 Water Pollution Control Act (33 U.S.C. 1251 et  
9 seq.), including any definition in that Act.

10 (l) NONAPPLICABILITY OF FEDERAL ADVISORY COM-  
11 MITTEE ACT.—The Federal Advisory Committee Act (5  
12 U.S.C. App.) shall not apply to—

13 (1) the Board; or

14 (2) any Partnership.

15 (m) FUNDING.—

16 (1) AUTHORIZATION OF APPROPRIATIONS.—

17 (A) FISH HABITAT CONSERVATION  
18 PROJECTS.—There is authorized to be appro-  
19 priated to the Secretary \$7,200,000 for each of  
20 fiscal years 2016 through 2021 to provide  
21 funds for fish habitat conservation projects ap-  
22 proved under subsection (f)(6), of which 5 per-  
23 cent shall be made available for each fiscal year  
24 for projects carried out by Indian tribes.

1 (B) ADMINISTRATIVE AND PLANNING EX-  
2 PENSES.—There is authorized to be appro-  
3 priated to the Secretary for each of fiscal years  
4 2016 through 2021 an amount equal to 5 per-  
5 cent of the amount appropriated for the appli-  
6 cable fiscal year pursuant to subparagraph  
7 (A)—

8 (i) for administrative and planning ex-  
9 penses; and

10 (ii) to carry out subsection (j).

11 (C) TECHNICAL AND SCIENTIFIC ASSIST-  
12 ANCE.—There is authorized to be appropriated  
13 for each of fiscal years 2016 through 2021 to  
14 carry out, and provide technical and scientific  
15 assistance under, subsection (g)—

16 (i) \$500,000 to the Secretary for use  
17 by the United States Fish and Wildlife  
18 Service;

19 (ii) \$500,000 to the NOAA Assistant  
20 Administrator for use by the National Oce-  
21 anic and Atmospheric Administration;

22 (iii) \$500,000 to the EPA Assistant  
23 Administrator for use by the Environ-  
24 mental Protection Agency; and

1 (iv) \$500,000 to the Secretary for use  
2 by the United States Geological Survey.

3 (2) AGREEMENTS AND GRANTS.—The Secretary  
4 may—

5 (A) on the recommendation of the Board,  
6 and notwithstanding sections 6304 and 6305 of  
7 title 31, United States Code, and the Federal  
8 Financial Assistance Management Improvement  
9 Act of 1999 (31 U.S.C. 6101 note; Public Law  
10 106–107), enter into a grant agreement, coop-  
11 erative agreement, or contract with a Partner-  
12 ship or other entity for a fish habitat conserva-  
13 tion project or restoration or enhancement  
14 project;

15 (B) apply for, accept, and use a grant  
16 from any individual or entity to carry out the  
17 purposes of this section; and

18 (C) make funds available to any Federal  
19 department or agency for use by that depart-  
20 ment or agency to provide grants for any fish  
21 habitat protection project, restoration project,  
22 or enhancement project that the Secretary de-  
23 termines to be consistent with this section.

24 (3) DONATIONS.—

25 (A) IN GENERAL.—The Secretary may—

1           (i) enter into an agreement with any  
2           organization described in section 501(c)(3)  
3           of the Internal Revenue Code of 1986 that  
4           is exempt from taxation under section  
5           501(a) of that Code to solicit private dona-  
6           tions to carry out the purposes of this sec-  
7           tion; and

8           (ii) accept donations of funds, prop-  
9           erty, and services to carry out the purposes  
10          of this section.

11          (B) TREATMENT.—A donation accepted  
12          under this section—

13               (i) shall be considered to be a gift or  
14               bequest to, or otherwise for the use of, the  
15               United States; and

16               (ii) may be—

17                       (I) used directly by the Sec-  
18                       retary; or

19                       (II) provided to another Federal  
20                       department or agency through an  
21                       interagency agreement.

1 **SEC. 6254. GULF STATES MARINE FISHERIES COMMISSION**  
2 **REPORT ON GULF OF MEXICO OUTER CONTI-**  
3 **NENTAL SHELF STATE BOUNDARY EXTEN-**  
4 **SION.**

5 (a) REPORT ON RESOURCE MANAGEMENT OUT-  
6 COMES.—Not later than March 1, 2017, the Gulf States  
7 Marine Fisheries Commission shall submit to the Com-  
8 mittee on Commerce, Science, and Transportation of the  
9 Senate and the Committees on Natural Resources and  
10 Transportation and Infrastructure of the House of Rep-  
11 resentatives a report on the economic, conservation and  
12 management, and law enforcement impacts of the imple-  
13 mentation of section 110 of division B of the Consolidated  
14 Appropriations Act, 2016 (Public Law 114–113).

15 (b) INFORMATION REQUIRED.—The report required  
16 under subsection (a) shall include a detailed accounting  
17 of how the implementation of section 110 of division B  
18 of the Consolidated Appropriations Act, 2016 (Public Law  
19 114–113) has affected—

20 (1) the economies of the States of Alabama,  
21 Florida, Louisiana, Mississippi, and Texas;

22 (2) the sustained participation of fishing com-  
23 munities;

24 (3) conservation and management of living re-  
25 sources under all applicable Federal laws;

26 (4) enforcement of Federal maritime laws; and

1           (5) the ability of the governments of the States  
2 described in paragraph (1) to effectively manage ac-  
3 tivities pursuant to the fishery management plan for  
4 reef fish resources of the Gulf of Mexico.

5           (c) FUNDING.—

6           (1) IN GENERAL.—Subject to the availability of  
7 appropriations, the Secretary of Commerce shall  
8 make available to the Gulf States Marine Fisheries  
9 Commission \$500,000 to carry out the report re-  
10 quired under subsection (a).

11           (2) SUBSEQUENT APPROPRIATIONS.—Amounts  
12 made available under paragraph (1) shall be avail-  
13 able only to the extent specifically provided for in  
14 advance in subsequent appropriations Acts.

15 **SEC. 6255. GAO REPORT ON GULF OF MEXICO OUTER CON-**  
16 **TINENTAL SHELF STATE BOUNDARY EXTEN-**  
17 **SION.**

18           (a) REPORT ON RESOURCE MANAGEMENT OUT-  
19 COMES.—Not later than March 1, 2017, the Comptroller  
20 General of the United States shall submit to the Com-  
21 mittee on Commerce, Science, and Transportation of the  
22 Senate and the Committee on Natural Resources and the  
23 Committee on Transportation and Infrastructure of the  
24 House of Representatives a report on the economic, con-  
25 servation and management, and law enforcement impacts

1 of section 110 of division B of the Consolidated Appropria-  
2 tions Act, 2016 (Public Law 114–113).

3 (b) INFORMATION REQUIRED.—The report required  
4 by subsection (a) shall include a detailed accounting of  
5 how section 110 of division B of the Consolidated Appro-  
6 priations Act, 2016 (Public Law 114–113) has affected—

7 (1) the economies of Alabama, Florida, Lou-  
8 isiana, Mississippi, and Texas;

9 (2) the sustained participation of fishing com-  
10 munities;

11 (3) conservation and management of living re-  
12 sources under all applicable Federal laws;

13 (4) enforcement of Federal maritime laws; and

14 (5) the ability of the governments of Alabama,  
15 Florida, Louisiana, Mississippi, and Texas to effec-  
16 tively manage activities pursuant to the fishery man-  
17 agement plan for reef fish resources of the Gulf of  
18 Mexico.

19 **PART VII—MISCELLANEOUS**

20 **SEC. 6261. RESPECT FOR TREATIES AND RIGHTS.**

21 Nothing in this subtitle or the amendments made by  
22 this subtitle—

23 (1) affects or modifies any treaty or other right  
24 of any federally recognized Indian tribe; or

1           (2) modifies any provision of Federal law relat-  
2           ing to migratory birds or to endangered or threat-  
3           ened species.

4 **SEC. 6262. NO PRIORITY.**

5           Nothing in this subtitle or the amendments made by  
6 this subtitle provides a preference to hunting, fishing, or  
7 recreational shooting over any other use of Federal land  
8 or water.

9           **Subtitle D—Water Infrastructure**  
10           **and Related Matters**

11           **PART I—FONTENELLE RESERVOIR**

12 **SEC. 6301. AUTHORITY TO MAKE ENTIRE ACTIVE CAPACITY**  
13           **OF FONTENELLE RESERVOIR AVAILABLE**  
14           **FOR USE.**

15           (a) IN GENERAL.—The Secretary of the Interior, in  
16 cooperation with the State of Wyoming, may amend the  
17 Definite Plan Report for the Seedskaadee Project author-  
18 ized under the first section of the Act of April 11, 1956  
19 (commonly known as the “Colorado River Storage Project  
20 Act”) (43 U.S.C. 620), to provide for the study, design,  
21 planning, and construction activities that will enable the  
22 use of all active storage capacity (as may be defined or  
23 limited by legal, hydrologic, structural, engineering, eco-  
24 nomic, and environmental considerations) of Fontenelle  
25 Dam and Reservoir, including the placement of sufficient

1 riprap on the upstream face of Fontenelle Dam to allow  
2 the active storage capacity of Fontenelle Reservoir to be  
3 used for those purposes for which the Seedskafee Project  
4 was authorized.

5 (b) COOPERATIVE AGREEMENTS.—

6 (1) IN GENERAL.—The Secretary of the Inte-  
7 rior may enter into any contract, grant, cooperative  
8 agreement, or other agreement that is necessary to  
9 carry out subsection (a).

10 (2) STATE OF WYOMING.—

11 (A) IN GENERAL.—The Secretary of the  
12 Interior shall enter into a cooperative agree-  
13 ment with the State of Wyoming to work in co-  
14 operation and collaboratively with the State of  
15 Wyoming for planning, design, related  
16 preconstruction activities, and construction of  
17 any modification of the Fontenelle Dam under  
18 subsection (a).

19 (B) REQUIREMENTS.—The cooperative  
20 agreement under subparagraph (A) shall, at a  
21 minimum, specify the responsibilities of the  
22 Secretary of the Interior and the State of Wyo-  
23 ming with respect to—

1 (i) completing the planning and final  
2 design of the modification of the  
3 Fontenelle Dam under subsection (a);

4 (ii) any environmental and cultural re-  
5 source compliance activities required for  
6 the modification of the Fontenelle Dam  
7 under subsection (a) including compliance  
8 with—

9 (I) the National Environmental  
10 Policy Act of 1969 (42 U.S.C. 4321  
11 et seq.);

12 (II) the Endangered Species Act  
13 of 1973 (16 U.S.C. 1531 et seq.); and

14 (III) subdivision 2 of division A  
15 of subtitle III of title 54, United  
16 States Code; and

17 (iii) the construction of the modifica-  
18 tion of the Fontenelle Dam under sub-  
19 section (a).

20 (c) FUNDING BY STATE OF WYOMING.—Pursuant to  
21 the Act of March 4, 1921 (41 Stat. 1404, chapter 161;  
22 43 U.S.C. 395), and as a condition of providing any addi-  
23 tional storage under subsection (a), the State of Wyoming  
24 shall provide to the Secretary of the Interior funds for any  
25 work carried out under subsection (a).

1 (d) OTHER CONTRACTING AUTHORITY.—

2 (1) IN GENERAL.—The Secretary of the Inte-  
3 rior may enter into contracts with the State of Wyo-  
4 ming, on such terms and conditions as the Secretary  
5 of the Interior and the State of Wyoming may agree,  
6 for division of any additional active capacity made  
7 available under subsection (a).

8 (2) TERMS AND CONDITIONS.—Unless other-  
9 wise agreed to by the Secretary of the Interior and  
10 the State of Wyoming, a contract entered into under  
11 paragraph (1) shall be subject to the terms and con-  
12 ditions of Bureau of Reclamation Contract No. 14-  
13 06-400-2474 and Bureau of Reclamation Contract  
14 No. 14-06-400-6193.

15 **SEC. 6302. SAVINGS PROVISIONS.**

16 Unless expressly provided in this part, nothing in this  
17 part modifies, conflicts with, preempts, or otherwise af-  
18 fects—

19 (1) the Act of December 31, 1928 (43 U.S.C.  
20 617 et seq.) (commonly known as the “Boulder Can-  
21 yon Project Act”);

22 (2) the Colorado River Compact of 1922, as ap-  
23 proved by the Presidential Proclamation of June 25,  
24 1929 (46 Stat. 3000);

1           (3) the Act of July 19, 1940 (43 U.S.C. 618  
2 et seq.) (commonly known as the “Boulder Canyon  
3 Project Adjustment Act”);

4           (4) the Treaty between the United States of  
5 America and Mexico relating to the utilization of  
6 waters of the Colorado and Tijuana Rivers and of  
7 the Rio Grande, and supplementary protocol signed  
8 November 14, 1944, signed at Washington February  
9 3, 1944 (59 Stat. 1219);

10           (5) the Upper Colorado River Basin Compact  
11 as consented to by the Act of April 6, 1949 (63  
12 Stat. 31);

13           (6) the Act of April 11, 1956 (commonly known  
14 as the “Colorado River Storage Project Act”) (43  
15 U.S.C. 620 et seq.);

16           (7) the Colorado River Basin Project Act (Pub-  
17 lic Law 90–537; 82 Stat. 885); or

18           (8) any State of Wyoming or other State water  
19 law.

20           **PART II—BUREAU OF RECLAMATION**

21           **TRANSPARENCY**

22           **SEC. 6311. DEFINITIONS.**

23           In this part:

24           (1) ASSET.—

1           (A) IN GENERAL.—The term “asset”  
2 means any of the following assets that are used  
3 to achieve the mission of the Bureau of Rec-  
4 lamation to manage, develop, and protect water  
5 and related resources in an environmentally and  
6 economically sound manner in the interest of  
7 the people of the United States:

8           (i) Capitalized facilities, buildings,  
9 structures, project features, power produc-  
10 tion equipment, recreation facilities, or  
11 quarters.

12           (ii) Capitalized and noncapitalized  
13 heavy equipment and other installed equip-  
14 ment.

15           (B) INCLUSIONS.—The term “asset” in-  
16 cludes assets described in subparagraph (A)  
17 that are considered to be mission critical.

18           (2) ASSET MANAGEMENT REPORT.—The term  
19 “Asset Management Report” means—

20           (A) the annual plan prepared by the Bu-  
21 reau of Reclamation known as the “Asset Man-  
22 agement Plan”; and

23           (B) any publicly available information re-  
24 lating to the plan described in subparagraph  
25 (A) that summarizes the efforts of the Bureau

1 of Reclamation to evaluate and manage infra-  
2 structure assets of the Bureau of Reclamation.

3 (3) MAJOR REPAIR AND REHABILITATION  
4 NEED.—The term “major repair and rehabilitation  
5 need” means major nonrecurring maintenance at a  
6 Reclamation facility, including maintenance related  
7 to the safety of dams, extraordinary maintenance of  
8 dams, deferred major maintenance activities, and all  
9 other significant repairs and extraordinary mainte-  
10 nance.

11 (4) RECLAMATION FACILITY.—The term “Rec-  
12 lamation facility” means each of the infrastructure  
13 assets that are owned by the Bureau of Reclamation  
14 at a Reclamation project.

15 (5) RECLAMATION PROJECT.—The term “Rec-  
16 lamation project” means a project that is owned by  
17 the Bureau of Reclamation, including all reserved  
18 works and transferred works owned by the Bureau  
19 of Reclamation.

20 (6) RESERVED WORKS.—The term “reserved  
21 works” means buildings, structures, facilities, or  
22 equipment that are owned by the Bureau of Rec-  
23 lamation for which operations and maintenance are  
24 performed by employees of the Bureau of Reclama-  
25 tion or through a contract entered into by the Bu-

1 reau of Reclamation, regardless of the source of  
2 funding for the operations and maintenance.

3 (7) SECRETARY.—The term “Secretary” means  
4 the Secretary of the Interior.

5 (8) TRANSFERRED WORKS.—The term “trans-  
6 ferred works” means a Reclamation facility at which  
7 operations and maintenance of the facility is carried  
8 out by a non-Federal entity under the provisions of  
9 a formal operations and maintenance transfer con-  
10 tract or other legal agreement with the Bureau of  
11 Reclamation.

12 **SEC. 6312. ASSET MANAGEMENT REPORT ENHANCEMENTS**  
13 **FOR RESERVED WORKS.**

14 (a) IN GENERAL.—Not later than 2 years after the  
15 date of enactment of this Act, the Secretary shall submit  
16 to Congress an Asset Management Report that—

17 (1) describes the efforts of the Bureau of Rec-  
18 lamation—

19 (A) to maintain in a reliable manner all re-  
20 served works at Reclamation facilities; and

21 (B) to standardize and streamline data re-  
22 porting and processes across regions and areas  
23 for the purpose of maintaining reserved works  
24 at Reclamation facilities; and

1           (2) expands on the information otherwise pro-  
2           vided in an Asset Management Report, in accord-  
3           ance with subsection (b).

4           (b) INFRASTRUCTURE MAINTENANCE NEEDS AS-  
5           SESSMENT.—

6           (1) IN GENERAL.—The Asset Management Re-  
7           port submitted under subsection (a) shall include—

8                   (A) a detailed assessment of major repair  
9                   and rehabilitation needs for all reserved works  
10                  at all Reclamation projects; and

11                  (B) to the extent practicable, an itemized  
12                  list of major repair and rehabilitation needs of  
13                  individual Reclamation facilities at each Rec-  
14                  lamation project.

15           (2) INCLUSIONS.—To the extent practicable,  
16           the itemized list of major repair and rehabilitation  
17           needs under paragraph (1)(B) shall include—

18                   (A) a budget level cost estimate of the ap-  
19                   propriations needed to complete each item; and

20                   (B) an assignment of a categorical rating  
21                  for each item, consistent with paragraph (3).

22           (3) RATING REQUIREMENTS.—

23                  (A) IN GENERAL.—The system for assign-  
24                  ing ratings under paragraph (2)(B) shall be—

1 (i) consistent with existing uniform  
2 categorization systems to inform the an-  
3 nual budget process and agency require-  
4 ments; and

5 (ii) subject to the guidance and in-  
6 structions issued under subparagraph (B).

7 (B) GUIDANCE.—As soon as practicable  
8 after the date of enactment of this Act, the Sec-  
9 retary shall issue guidance that describes the  
10 applicability of the rating system applicable  
11 under paragraph (2)(B) to Reclamation facili-  
12 ties.

13 (4) PUBLIC AVAILABILITY.—Except as provided  
14 in paragraph (5), the Secretary shall make publicly  
15 available, including on the Internet, the Asset Man-  
16 agement Report required under subsection (a).

17 (5) CONFIDENTIALITY.—The Secretary may ex-  
18 clude from the public version of the Asset Manage-  
19 ment Report made available under paragraph (4)  
20 any information that the Secretary identifies as sen-  
21 sitive or classified, but shall make available to the  
22 Committee on Energy and Natural Resources of the  
23 Senate and the Committee on Natural Resources of  
24 the House of Representatives a version of the report  
25 containing the sensitive or classified information.

1 (c) UPDATES.—Not later than 2 years after the date  
2 on which the Asset Management Report is submitted  
3 under subsection (a) and biennially thereafter, the Sec-  
4 retary shall update the Asset Management Report, subject  
5 to the requirements of section 6313(b)(2).

6 (d) CONSULTATION.—To the extent that such con-  
7 sultation would assist the Secretary in preparing the Asset  
8 Management Report under subsection (a) and updates to  
9 the Asset Management Report under subsection (c), the  
10 Secretary shall consult with—

11 (1) the Secretary of the Army (acting through  
12 the Chief of Engineers); and

13 (2) water and power contractors.

14 **SEC. 6313. ASSET MANAGEMENT REPORT ENHANCEMENTS**  
15 **FOR TRANSFERRED WORKS.**

16 (a) IN GENERAL.—The Secretary shall coordinate  
17 with the non-Federal entities responsible for the operation  
18 and maintenance of transferred works in developing re-  
19 porting requirements for Asset Management Reports with  
20 respect to major repair and rehabilitation needs for trans-  
21 ferred works that are similar to the reporting require-  
22 ments described in section 6312(b).

23 (b) GUIDANCE.—

24 (1) IN GENERAL.—After considering input from  
25 water and power contractors of the Bureau of Rec-

1 lamation, the Secretary shall develop and implement  
2 a rating system for transferred works that incor-  
3 porates, to the maximum extent practicable, the rat-  
4 ing system for major repair and rehabilitation needs  
5 for reserved works developed under section  
6 6312(b)(3).

7 (2) UPDATES.—The ratings system developed  
8 under paragraph (1) shall be included in the up-  
9 dated Asset Management Reports under section  
10 6312(e).

11 **SEC. 6314. OFFSET.**

12 Notwithstanding any other provision of law, in the  
13 case of the project authorized by section 1617 of the Rec-  
14 lamation Projects Authorization and Adjustment Act of  
15 1992 (43 U.S.C. 390h–12c), the maximum amount of the  
16 Federal share of the cost of the project under section  
17 1631(d)(1) of that Act (43 U.S.C. 390h–13(d)(1)) other-  
18 wise available as of the date of enactment of this Act shall  
19 be reduced by \$2,000,000.

20 **PART III—BASIN WATER MANAGEMENT**

21 **Subpart A—Yakima River Basin Water Enhancement**

22 **SEC. 6321. SHORT TITLE.**

23 This subpart may be cited as the “Yakima River  
24 Basin Water Enhancement Project Phase III Act of  
25 2016”.

1 **SEC. 6322. MODIFICATION OF TERMS, PURPOSES, AND**  
2 **DEFINITIONS.**

3 (a) MODIFICATION OF TERMS.—Title XII of Public  
4 Law 103–434 (108 Stat. 4550) is amended—

5 (1) by striking “Yakama Indian” each place it  
6 appears (except section 1204(g)) and inserting  
7 “Yakama”; and

8 (2) by striking “Superintendent” each place it  
9 appears and inserting “Manager”.

10 (b) MODIFICATION OF PURPOSES.—Section 1201 of  
11 Public Law 103–434 (108 Stat. 4550) is amended—

12 (1) by striking paragraph (1) and inserting the  
13 following:

14 “(1) to protect, mitigate, and enhance fish and  
15 wildlife and the recovery and maintenance of self-  
16 sustaining harvestable populations of fish and other  
17 aquatic life, both anadromous and resident species,  
18 throughout their historic distribution range in the  
19 Yakima Basin through—

20 “(A) improved water management and the  
21 constructions of fish passage at storage and di-  
22 version dams, as authorized under the Hoover  
23 Power Plant Act of 1984 (43 U.S.C. 619 et  
24 seq.);

25 “(B) improved instream flows and water  
26 supplies;

1           “(C) improved water quality, watershed,  
2           and ecosystem function;

3           “(D) protection, creation, and enhance-  
4           ment of wetlands; and

5           “(E) other appropriate means of habitat  
6           improvement;”;

7           (2) in paragraph (2), by inserting “, municipal,  
8           industrial, and domestic water supply and use pur-  
9           poses, especially during drought years, including re-  
10          ducing the frequency and severity of water supply  
11          shortages for pro-ratable irrigation entities” before  
12          the semicolon at the end;

13          (3) by striking paragraph (4);

14          (4) by redesignating paragraph (3) as para-  
15          graph (4);

16          (5) by inserting after paragraph (2) the fol-  
17          lowing:

18                 “(3) to authorize the Secretary to make water  
19                 available for purchase or lease for meeting munic-  
20                 ipal, industrial, and domestic water supply pur-  
21                 poses;”;

22          (6) by redesignating paragraphs (5) and (6) as  
23          paragraphs (6) and (8), respectively;

24          (7) by inserting after paragraph (4) (as so re-  
25          designated) the following:

1           “(5) to realize sufficient water savings from im-  
2           plementing the Yakima River Basin Integrated  
3           Water Resource Management Plan, so that not less  
4           than 85,000 acre feet of water savings are achieved  
5           by implementing the first phase of the Integrated  
6           Plan pursuant to section 1213(a), in addition to the  
7           165,000 acre feet of water savings targeted through  
8           the Basin Conservation Program, as authorized on  
9           October 31, 1994;”;

10           (8) in paragraph (6) (as so redesignated)—

11           (A) by inserting “an increase in” before  
12           “voluntary”; and

13           (B) by striking “and” at the end;

14           (9) by inserting after paragraph (6) (as so re-  
15           designated) the following:

16           “(7) to encourage an increase in the use of, and  
17           reduce the barriers to, water transfers, leasing, mar-  
18           kets, and other voluntary transactions among public  
19           and private entities to enhance water management  
20           in the Yakima River basin;”;

21           (10) in paragraph (8) (as redesignated by para-  
22           graph (6)), by striking the period at the end and in-  
23           serting a semicolon; and

24           (11) by adding at the end the following:

1           “(9) to improve the resilience of the ecosystems,  
2           economies, and communities in the Basin as they  
3           face drought, hydrologic changes, and other related  
4           changes and variability in natural and human sys-  
5           tems, for the benefit of both the people and the fish  
6           and wildlife of the region; and

7           “(10) to authorize and implement the Yakima  
8           River Basin Integrated Water Resource Manage-  
9           ment Plan as Phase III of the Yakima River Basin  
10          Water Enhancement Project, as a balanced and  
11          cost-effective approach to maximize benefits to the  
12          communities and environment in the Basin.”.

13          (c) MODIFICATION OF DEFINITIONS.—Section 1202  
14 of Public Law 103–434 (108 Stat. 4550) is amended—

15           (1) by redesignating paragraphs (6), (7), (8),  
16           (9), (10), (11), (12), (13), and (14) as paragraphs  
17           (8), (10), (11), (13), (14), (15), (16), (18), and  
18           (19), respectively;

19           (2) by inserting after paragraph (5) the fol-  
20          lowing:

21           “(6) DESIGNATED FEDERAL OFFICIAL.—The  
22          term ‘designated Federal official’ means the Com-  
23          missioner of Reclamation (or a designee), acting  
24          pursuant to the charter of the Conservation Advisory  
25          Group.

1           “(7) INTEGRATED PLAN.—The terms ‘Inte-  
2           grated Plan’ and ‘Yakima River Basin Integrated  
3           Water Resource Plan’ mean the plan and activities  
4           authorized by the Yakima River Basin Water En-  
5           hancement Project Phase III Act of 2016 and the  
6           amendments made by that subpart, to be carried out  
7           in cooperation with and in addition to activities of  
8           the State of Washington and Yakama Nation.”;

9           (3) by inserting after paragraph (8) (as redesign-  
10          nated by paragraph (1)) the following:

11          “(9) MUNICIPAL, INDUSTRIAL, AND DOMESTIC  
12          WATER SUPPLY AND USE.—The term ‘municipal, in-  
13          dustrial, and domestic water supply and use’ means  
14          the supply and use of water for—

15                 “(A) domestic consumption (whether urban  
16                 or rural);

17                 “(B) maintenance and protection of public  
18                 health and safety;

19                 “(C) manufacture, fabrication, processing,  
20                 assembly, or other production of a good or com-  
21                 modity;

22                 “(D) production of energy;

23                 “(E) fish hatcheries; or

1           “(F) water conservation activities relating  
2           to a use described in subparagraphs (A)  
3           through (E).”;

4           (4) by inserting after paragraph (11) (as redesi-  
5           gnated by paragraph (1)) the following:

6           “(12) PRORATABLE IRRIGATION ENTITY.—The  
7           term ‘proratable irrigation entity’ means a district,  
8           project, or State-recognized authority, board of con-  
9           trol, agency, or entity located in the Yakima River  
10          basin that—

11           “(A) manages and delivers irrigation water  
12          to farms in the basin; and

13           “(B) possesses, or the members of which  
14          possess, water rights that are proratable during  
15          periods of water shortage.”; and

16          (5) by inserting after paragraph (16) (as redesi-  
17          gnated by paragraph (1)) the following:

18          “(17) YAKIMA ENHANCEMENT PROJECT; YAK-  
19          IMA RIVER BASIN WATER ENHANCEMENT  
20          PROJECT.—The terms ‘Yakima Enhancement  
21          Project’ and ‘Yakima River Basin Water Enhance-  
22          ment Project’ mean the Yakima River basin water  
23          enhancement project authorized by Congress pursu-  
24          ant to this Act and other Acts (including Public Law  
25          96–162 (93 Stat. 1241), section 109 of Public Law

1 98–381 (16 U.S.C. 839b note; 98 Stat. 1340), Pub-  
2 lic Law 105–62 (111 Stat. 1320), and Public Law  
3 106–372 (114 Stat. 1425)) to promote water con-  
4 servation, water supply, habitat, and stream en-  
5 hancement improvements in the Yakima River  
6 basin.”.

7 **SEC. 6323. YAKIMA RIVER BASIN WATER CONSERVATION**  
8 **PROGRAM.**

9 Section 1203 of Public Law 103–434 (108 Stat.  
10 4551) is amended—

11 (1) in subsection (a)—

12 (A) in paragraph (1)—

13 (i) in the second sentence, by striking  
14 “title” and inserting “section”; and

15 (ii) in the third sentence, by striking  
16 “within 5 years of the date of enactment  
17 of this Act”; and

18 (B) in paragraph (2), by striking “irriga-  
19 tion” and inserting “the number of irrigated  
20 acres”;

21 (2) in subsection (c)—

22 (A) in paragraph (2)—

23 (i) in each of subparagraphs (A)  
24 through (D), by striking the comma at the  
25 end and inserting a semicolon;

1           (ii) in subparagraph (E), by striking  
2           the comma at the end and inserting “;  
3           and”;

4           (iii) in subparagraph (F), by striking  
5           “Department of Wildlife of the State of  
6           Washington, and” and inserting “Depart-  
7           ment of Fish and Wildlife of the State of  
8           Washington.”; and

9           (iv) by striking subparagraph (G);

10          (B) in paragraph (3)—

11           (i) in each of subparagraphs (A)  
12           through (C), by striking the comma at the  
13           end and inserting a semicolon;

14           (ii) in subparagraph (D), by striking  
15           “, and” and inserting a semicolon;

16           (iii) in subparagraph (E), by striking  
17           the period at the end and inserting “;  
18           and”; and

19           (iv) by adding at the end the fol-  
20           lowing:

21           “(F) provide recommendations to advance  
22           the purposes and programs of the Yakima En-  
23           hancement Project, including the Integrated  
24           Plan.”; and

1 (C) by striking paragraph (4) and insert-  
2 ing the following:

3 “(4) AUTHORITY OF DESIGNATED FEDERAL OF-  
4 FICIAL.—The designated Federal official may—

5 “(A) arrange and provide logistical support  
6 for meetings of the Conservation Advisory  
7 Group;

8 “(B) use a facilitator to serve as a moder-  
9 ator for meetings of the Conservation Advisory  
10 Group or provide additional logistical support;  
11 and

12 “(C) grant any request for a facilitator by  
13 any member of the Conservation Advisory  
14 Group.”;

15 (3) in subsection (d), by adding at the end the  
16 following:

17 “(4) PAYMENT OF LOCAL SHARE BY STATE OR  
18 FEDERAL GOVERNMENT.—

19 “(A) IN GENERAL.—The State or the Fed-  
20 eral Government may fund not more than the  
21 17.5 percent local share of the costs of the  
22 Basin Conservation Program in exchange for  
23 the long-term use of conserved water, subject to  
24 the requirement that the funding by the Fed-  
25 eral Government of the local share of the costs

1 shall provide a quantifiable public benefit in  
2 meeting Federal responsibilities in the Basin  
3 and the purposes of this title.

4 “(B) USE OF CONSERVED WATER.—The  
5 Yakima Project Manager may use water result-  
6 ing from conservation measures taken under  
7 this title, in addition to water that the Bureau  
8 of Reclamation may acquire from any willing  
9 seller through purchase, donation, or lease, for  
10 water management uses pursuant to this title.”;

11 (4) in subsection (e), by striking the first sen-  
12 tence and inserting the following: “To participate in  
13 the Basin Conservation Program, as described in  
14 subsection (b), an entity shall submit to the Sec-  
15 retary a proposed water conservation plan.”;

16 (5) in subsection (i)(3)—

17 (A) by striking “purchase or lease” each  
18 place it appears and inserting “purchase, lease,  
19 or management”; and

20 (B) in the third sentence, by striking  
21 “made immediately upon availability” and all  
22 that follows through “Committee” and inserting  
23 “continued as needed to provide water to be  
24 used by the Yakima Project Manager as rec-  
25 ommended by the System Operations Advisory

1 Committee and the Conservation Advisory  
2 Group”; and

3 (6) in subsection (j)(4), in the first sentence, by  
4 striking “initial acquisition” and all that follows  
5 through “flushing flows” and inserting “acquisition  
6 of water from willing sellers or lessors specifically to  
7 provide improved instream flows for anadromous  
8 and resident fish and other aquatic life, including  
9 pulse flows to facilitate outward migration of anad-  
10 romous fish”.

11 **SEC. 6324. YAKIMA BASIN WATER PROJECTS, OPERATIONS,**  
12 **AND AUTHORIZATIONS.**

13 (a) YAKAMA NATION PROJECTS.—Section 1204 of  
14 Public Law 103–434 (108 Stat. 4555) is amended—

15 (1) in subsection (a)(2), in the first sentence,  
16 by striking “not more than \$23,000,000” and in-  
17 serting “not more than \$100,000,000”; and

18 (2) in subsection (g)—

19 (A) by striking the subsection heading and  
20 inserting “REDESIGNATION OF YAKAMA INDIAN  
21 NATION TO YAKAMA NATION.—”;

22 (B) by striking paragraph (1) and insert-  
23 ing the following:

24 “(1) REDESIGNATION.—The Confederated  
25 Tribes and Bands of the Yakama Indian Nation

1 shall be known and designated as the ‘Confederated  
2 Tribes and Bands of the Yakama Nation.’”; and

3 (C) in paragraph (2), by striking “deemed  
4 to be a reference to the ‘Confederated Tribes  
5 and Bands of the Yakama Indian Nation.’” and  
6 inserting “deemed to be a reference to the  
7 ‘Confederated Tribes and Bands of the Yakama  
8 Nation’.”.

9 (b) OPERATION OF YAKIMA BASIN PROJECTS.—Sec-  
10 tion 1205 of Public Law 103–434 (108 Stat. 4557) is  
11 amended—

12 (1) in subsection (a)—

13 (A) in paragraph (4)—

14 (i) in subparagraph (A)—

15 (I) in clause (i)—

16 (aa) by inserting “addi-  
17 tional” after “secure”;

18 (bb) by striking “flushing”  
19 and inserting “pulse”; and

20 (cc) by striking “uses” and  
21 inserting “uses, in addition to the  
22 quantity of water provided under  
23 the treaty between the Yakama  
24 Nation and the United States”;

25 (II) by striking clause (ii);

1 (III) by redesignating clause (iii)

2 as clause (ii); and

3 (IV) in clause (ii) (as so redesign-

4 nated) by inserting “and water rights

5 mandated” after “goals”; and

6 (ii) in subparagraph (B)(i), in the

7 first sentence, by inserting “in proportion

8 to the funding received” after “Program”;

9 (2) in subsection (b) (as amended by section

10 6322(a)(2)), in the second sentence, by striking

11 “instream flows for use by the Yakima Project Man-

12 ager as flushing flows or as otherwise” and inserting

13 “fishery purposes, as”; and

14 (3) in subsection (e), by striking paragraph (1)

15 and inserting the following:

16 “(1) IN GENERAL.—Additional purposes of the

17 Yakima Project shall be any of the following:

18 “(A) To recover and maintain self-sus-

19 taining harvestable populations of native fish,

20 both anadromous and resident species, through-

21 out their historic distribution range in the Yak-

22 ima Basin.

23 “(B) To protect, mitigate, and enhance

24 aquatic life and wildlife.

25 “(C) Recreation.

1           “(D) Municipal, industrial, and domestic  
2           use.”.

3           (c) LAKE CLE ELUM AUTHORIZATION OF APPRO-  
4           PRIATIONS.—Section 1206(a)(1) of Public Law 103–434  
5           (108 Stat. 4560), is amended, in the matter preceding  
6           subparagraph (A), by striking “at September” and all that  
7           follows through “to—” and inserting “not more than  
8           \$12,000,000 to—”.

9           (d) ENHANCEMENT OF WATER SUPPLIES FOR YAK-  
10          IMA BASIN TRIBUTARIES.—Section 1207 of Public Law  
11          103–434 (108 Stat. 4560) is amended—

12           (1) in the heading, by striking “**SUPPLIES**”  
13          and inserting “**MANAGEMENT**”;

14           (2) in subsection (a)—

15           (A) in the matter preceding paragraph (1),  
16           by striking “supplies” and inserting “manage-  
17           ment”;

18           (B) in paragraph (1), by inserting “and  
19           water supply entities” after “owners”; and

20           (C) in paragraph (2)—

21           (i) in subparagraph (A), by inserting  
22           “that choose not to participate or opt out  
23           of tributary enhancement projects pursu-  
24           ant to this section” after “water right own-  
25           ers”; and

1 (ii) in subparagraph (B), by inserting  
2 “nonparticipating” before “tributary water  
3 users”;

4 (3) in subsection (b)—

5 (A) in paragraph (1)—

6 (i) by striking the paragraph designa-  
7 tion and all that follows through “(but not  
8 limited to)—” and inserting the following:

9 “(1) IN GENERAL.—The Secretary, following  
10 consultation with the State of Washington, tributary  
11 water right owners, and the Yakama Nation, and on  
12 agreement of appropriate water right owners, is au-  
13 thorized to conduct studies to evaluate measures to  
14 further Yakima Project purposes on tributaries to  
15 the Yakima River. Enhancement programs that use  
16 measures authorized by this subsection may be in-  
17 vestigated and implemented by the Secretary in trib-  
18 utaries to the Yakima River, including Taneum  
19 Creek, other areas, or tributary basins that currently  
20 or could potentially be provided supplemental or  
21 transfer water by entities, such as the Kittitas Rec-  
22 lamation District or the Yakima-Tieton Irrigation  
23 District, subject to the condition that activities may  
24 commence on completion of applicable and required  
25 feasibility studies, environmental reviews, and cost-

1 benefit analyses that include favorable recommenda-  
2 tions for further project development, as appro-  
3 priate. Measures to evaluate include—”;

4 (ii) by indenting subparagraphs (A)  
5 through (F) appropriately;

6 (iii) in subparagraph (A), by inserting  
7 before the semicolon at the end the fol-  
8 lowing: “, including irrigation efficiency  
9 improvements (in coordination with pro-  
10 grams of the Department of Agriculture),  
11 consolidation of diversions or administra-  
12 tion, and diversion scheduling or coordina-  
13 tion”;

14 (iv) by redesignating subparagraphs  
15 (C) through (F) as subparagraphs (E)  
16 through (H), respectively;

17 (v) by inserting after subparagraph  
18 (B) the following:

19 “(C) improvements in irrigation system  
20 management or delivery facilities within the  
21 Yakima River basin when those improvements  
22 allow for increased irrigation system conveyance  
23 and corresponding reduction in diversion from  
24 tributaries or flow enhancements to tributaries

1 through direct flow supplementation or ground-  
2 water recharge;

3 “(D) improvements of irrigation system  
4 management or delivery facilities to reduce or  
5 eliminate excessively high flows caused by the  
6 use of natural streams for conveyance or irriga-  
7 tion water or return water;”;

8 (vi) in subparagraph (E) (as redesign-  
9 nated by clause (iv)), by striking “ground  
10 water” and inserting “groundwater re-  
11 charge and”;

12 (vii) in subparagraph (G) (as redesign-  
13 nated by clause (iv)), by inserting “or  
14 transfer” after “purchase”; and

15 (viii) in subparagraph (H) (as redesign-  
16 nated by clause (iv)), by inserting “stream  
17 processes and” before “stream habitats”;

18 (B) in paragraph (2)—

19 (i) in the matter preceding subpara-  
20 graph (A), by striking “the Taneum Creek  
21 study” and inserting “studies under this  
22 subsection”;

23 (ii) in subparagraph (B)—

1 (I) by striking “and economic”  
2 and inserting “, infrastructure, eco-  
3 nomic, and land use”; and

4 (II) by striking “and” at the end;

5 (iii) in subparagraph (C), by striking  
6 the period at the end and inserting “;  
7 and”; and

8 (iv) by adding at the end the fol-  
9 lowing:

10 “(D) any related studies already underway  
11 or undertaken.”; and

12 (C) in paragraph (3), in the first sentence,  
13 by inserting “of each tributary or group of trib-  
14 utaries” after “study”;

15 (4) in subsection (c)—

16 (A) in the heading, by inserting “**AND**  
17 **NONSURFACE STORAGE**” after “**NONSTOR-**  
18 **AGE**”; and

19 (B) in the matter preceding paragraph (1),  
20 by inserting “and nonsurface storage” after  
21 “nonstorage”;

22 (5) by striking subsection (d);

23 (6) by redesignating subsection (e) as sub-  
24 section (d); and

1           (7) in paragraph (2) of subsection (d) (as so re-  
2 designated)—

3           (A) in the first sentence—

4                 (i) by inserting “and implementation”  
5 after “investigation”;

6                 (ii) by striking “other” before “Yak-  
7 ima River”; and

8                 (iii) by inserting “and other water  
9 supply entities” after “owners”; and

10           (B) by striking the second sentence.

11           (e) CHANDLER PUMPING PLANT AND POWERPLANT-  
12 OPERATIONS AT PROSSER DIVERSION DAM.—Section  
13 1208(d) of Public Law 103–434 (108 Stat. 4562; 114  
14 Stat. 1425) is amended by inserting “negatively” before  
15 “affected”.

16           (f) INTERIM COMPREHENSIVE BASIN OPERATING  
17 PLAN.—Section 1210(e) of Public Law 103–434 (108  
18 Stat. 4564) is amended by striking “\$100,000” and in-  
19 serting “\$200,000”.

20           (g) ENVIRONMENTAL COMPLIANCE.—Section 1211  
21 of Public Law 103–434 (108 Stat. 4564) is amended by  
22 striking “\$2,000,000” and inserting “\$5,000,000”.

1 **SEC. 6325. AUTHORIZATION OF PHASE III OF YAKIMA RIVER**  
2 **BASIN WATER ENHANCEMENT PROJECT.**

3 Title XII of Public Law 103–434 (108 Stat. 4550)  
4 is amended by adding at the end the following:

5 **“SEC. 1213. AUTHORIZATION OF THE INTEGRATED PLAN AS**  
6 **PHASE III OF YAKIMA RIVER BASIN WATER**  
7 **ENHANCEMENT PROJECT.**

8 “(a) INTEGRATED PLAN.—

9 “(1) IN GENERAL.—The Secretary shall imple-  
10 ment the Integrated Plan as Phase III of the Yak-  
11 ima River Basin Water Enhancement Project in ac-  
12 cordance with this section and applicable laws.

13 “(2) INITIAL DEVELOPMENT PHASE OF THE IN-  
14 TEGRATED PLAN.—

15 “(A) IN GENERAL.—The Secretary, in co-  
16 ordination with the State of Washington and  
17 Yakama Nation and subject to feasibility stud-  
18 ies, environmental reviews, and the availability  
19 of appropriations, shall implement an initial de-  
20 velopment phase of the Integrated Plan, to—

21 “(i) complete the planning, design,  
22 and construction or development of up-  
23 stream and downstream fish passage facili-  
24 ties, as previously authorized by the Hoo-  
25 ver Power Plant Act of 1984 (43 U.S.C.  
26 619 et seq.) at Cle Elum Reservoir and an-

1 other Yakima Project reservoir identified  
2 by the Secretary as consistent with the In-  
3 tegrated Plan, subject to the condition  
4 that, if the Yakima Project reservoir iden-  
5 tified by the Secretary contains a hydro-  
6 power project licensed by the Federal En-  
7 ergy Regulatory Commission, the Secretary  
8 shall cooperate with the Federal Energy  
9 Regulatory Commission in a timely manner  
10 to ensure that actions taken by the Sec-  
11 retary are consistent with the applicable  
12 hydropower project license;

13 “(ii) negotiate long-term agreements  
14 with participating proratable irrigation en-  
15 tities in the Yakima Basin and, acting  
16 through the Bureau of Reclamation, co-  
17 ordinate between Bureaus of the Depart-  
18 ment of the Interior and with the heads of  
19 other Federal agencies to negotiate agree-  
20 ments concerning leases, easements, and  
21 rights-of-way on Federal land, and other  
22 terms and conditions determined to be nec-  
23 essary to allow for the non-Federal financ-  
24 ing, construction, operation, and mainte-  
25 nance of—

1           “(I) new facilities needed to ac-  
2           cess and deliver inactive storage in  
3           Lake Kachess for the purpose of pro-  
4           viding drought relief for irrigation  
5           (known as the ‘Kachess Drought Re-  
6           lief Pumping Plant’); and

7           “(II) a conveyance system to  
8           allow transfer of water between  
9           Keechelus Reservoir to Kachess Res-  
10          ervoir for purposes of improving oper-  
11          ational flexibility for the benefit of  
12          both fish and irrigation (known as the  
13          ‘K to K Pipeline’);

14          “(iii) participate in, provide funding  
15          for, and accept non-Federal financing  
16          for—

17                 “(I) water conservation projects,  
18                 not subject to the provisions of the  
19                 Basin Conservation Program de-  
20                 scribed in section 1203, that are in-  
21                 tended to partially implement the In-  
22                 tegrated Plan by providing 85,000  
23                 acre-feet of conserved water to im-  
24                 prove tributary and mainstem stream  
25                 flow; and

1                   “(II) aquifer storage and recov-  
2                   ery projects;

3                   “(iv) study, evaluate, and conduct fea-  
4                   sibility analyses and environmental reviews  
5                   of fish passage, water supply (including  
6                   groundwater and surface water storage),  
7                   conservation, habitat restoration projects,  
8                   and other alternatives identified as con-  
9                   sistent with the purposes of this Act, for  
10                  the initial and future phases of the Inte-  
11                  grated Plan;

12                  “(v) coordinate with and assist the  
13                  State of Washington in implementing a ro-  
14                  bust water market to enhance water man-  
15                  agement in the Yakima River basin, in-  
16                  cluding—

17                         “(I) assisting in identifying ways  
18                         to encourage and increase the use of,  
19                         and reduce the barriers to, water  
20                         transfers, leasing, markets, and other  
21                         voluntary transactions among public  
22                         and private entities in the Yakima  
23                         River basin;

1                   ations, maintenance, and management  
2                   of that land and water.

3                   “(II) To combine or relocate di-  
4                   version points, remove fish barriers,  
5                   or for other activities that increase  
6                   flows or improve habitat in the Yak-  
7                   ima River and its tributaries in fur-  
8                   therance of this title.

9                   “(III) To implement, in partner-  
10                  ship with Federal and non-Federal en-  
11                  tities, projects to enhance the health  
12                  and resilience of the watershed.

13                  “(B) COMMENCEMENT DATE.—The Sec-  
14                  retary shall commence implementation of the  
15                  activities included under the initial development  
16                  phase pursuant to this paragraph—

17                  “(i) on the date of enactment of this  
18                  section; and

19                  “(ii) on completion of applicable feasi-  
20                  bility studies, environmental reviews, and  
21                  cost-benefit analyses that include favorable  
22                  recommendations for further project devel-  
23                  opment.

24                  “(3) INTERMEDIATE AND FINAL PHASES.—

1           “(A) IN GENERAL.—The Secretary, in co-  
2           ordination with the State of Washington and in  
3           consultation with the Yakama Nation, shall de-  
4           velop plans for intermediate and final develop-  
5           ment phases of the Integrated Plan to achieve  
6           the purposes of this Act, including conducting  
7           applicable feasibility studies, environmental re-  
8           views, and other relevant studies needed to de-  
9           velop the plans.

10           “(B) INTERMEDIATE PHASE.—The Sec-  
11           retary shall develop an intermediate develop-  
12           ment phase to implement the Integrated Plan  
13           that, subject to authorization and appropria-  
14           tion, would commence not later than 10 years  
15           after the date of enactment of this section.

16           “(C) FINAL PHASE.—The Secretary shall  
17           develop a final development phase to implement  
18           the Integrated Plan that, subject to authoriza-  
19           tion and appropriation, would commence not  
20           later than 20 years after the date of enactment  
21           of this section.

22           “(4) CONTINGENCIES.—The implementation by  
23           the Secretary of projects and activities identified for  
24           implementation under the Integrated Plan shall be—

1           “(A) subject to authorization and appro-  
2           priation;

3           “(B) contingent on the completion of appli-  
4           cable feasibility studies, environmental reviews,  
5           and cost-benefit analyses that include favorable  
6           recommendations for further project develop-  
7           ment;

8           “(C) implemented on public review and a  
9           determination by the Secretary that design,  
10          construction, and operation of a proposed  
11          project or activity is in the best interest of the  
12          public; and

13          “(D) in compliance with all applicable  
14          laws, including the National Environmental  
15          Policy Act of 1969 (42 U.S.C. 4321 et seq.)  
16          and the Endangered Species Act of 1973 (16  
17          U.S.C. 1531 et seq.).

18          “(5) PROGRESS REPORT.—

19                 “(A) IN GENERAL.—Not later than 5 years  
20                 after the date of enactment of this section, the  
21                 Secretary, in conjunction with the State of  
22                 Washington and in consultation with the  
23                 Yakama Nation, shall submit to the Committee  
24                 on Energy and Natural Resources of the Senate  
25                 and the Committee on Natural Resources of the

1 House of Representatives a progress report on  
2 the development and implementation of the In-  
3 tegrated Plan.

4 “(B) REQUIREMENTS.—The progress re-  
5 port under this paragraph shall—

6 “(i) provide a review and reassess-  
7 ment, if needed, of the objectives of the In-  
8 tegrated Plan, as applied to all elements of  
9 the Integrated Plan;

10 “(ii) assess, through performance  
11 metrics developed at the initiation of, and  
12 measured throughout the implementation  
13 of, the Integrated Plan, the degree to  
14 which the implementation of the initial de-  
15 velopment phase addresses the objectives  
16 and all elements of the Integrated Plan;

17 “(iii) identify the amount of Federal  
18 funding and non-Federal contributions re-  
19 ceived and expended during the period cov-  
20 ered by the report;

21 “(iv) describe the pace of project de-  
22 velopment during the period covered by the  
23 report;

24 “(v) identify additional projects and  
25 activities proposed for inclusion in any fu-

1           ture phase of the Integrated Plan to ad-  
2           dress the objectives of the Integrated Plan,  
3           as applied to all elements of the Integrated  
4           Plan; and

5           “(vi) for water supply projects—

6           “(I) provide a preliminary discus-  
7           sion of the means by which—

8           “(aa) water and costs asso-  
9           ciated with each recommended  
10          project would be allocated among  
11          authorized uses; and

12          “(bb) those allocations  
13          would be consistent with the ob-  
14          jectives of the Integrated Plan;  
15          and

16          “(II) establish a plan for solie-  
17          iting and formalizing subscriptions  
18          among individuals and entities for  
19          participation in any of the rec-  
20          ommended water supply projects that  
21          will establish the terms for participa-  
22          tion, including fiscal obligations asso-  
23          ciated with subscription.

1           “(b) FINANCING, CONSTRUCTION, OPERATION, AND  
2 MAINTENANCE OF KACHESS DROUGHT RELIEF PUMPING  
3 PLANT AND K TO K PIPELINE.—

4           “(1) AGREEMENTS.—Long-term agreements ne-  
5 gotiated between the Secretary and participating  
6 proratable irrigation entities in the Yakima Basin  
7 for the non-Federal financing, construction, oper-  
8 ation, and maintenance of the Drought Relief Pump-  
9 ing Plant and K to K Pipeline shall include provi-  
10 sions regarding—

11           “(A) responsibilities of the participating  
12 proratable irrigation entities for the planning,  
13 design, and construction of infrastructure in  
14 consultation and coordination with the Sec-  
15 retary;

16           “(B) property titles and responsibilities of  
17 the participating proratable irrigation entities  
18 for the maintenance of and liability for all in-  
19 frastructure constructed under this title;

20           “(C) operation and integration of the  
21 projects by the Secretary in the operation of the  
22 Yakima Project;

23           “(D) costs associated with the design, fi-  
24 nancing, construction, operation, maintenance,  
25 and mitigation of projects, with the costs of

1 Federal oversight and review to be nonreim-  
2 bursable to the participating proratable irriga-  
3 tion entities and the Yakima Project; and

4 “(E) responsibilities for the pumping and  
5 operational costs necessary to provide the total  
6 water supply available made inaccessible due to  
7 drought pumping during the preceding 1 or  
8 more calendar years, in the event that the  
9 Kachess Reservoir fails to refill as a result of  
10 pumping drought storage water during the pre-  
11 ceding 1 or more calendar years, which shall re-  
12 main the responsibility of the participating pro-  
13 ratable irrigation entities.

14 “(2) USE OF KACHESS RESERVOIR STORED  
15 WATER.—

16 “(A) IN GENERAL.—The additional stored  
17 water made available by the construction of fa-  
18 cilities to access and deliver inactive storage in  
19 Kachess Reservoir under subsection  
20 (a)(2)(A)(ii)(I) shall—

21 “(i) be considered to be Yakima  
22 Project water;

23 “(ii) not be part of the total water  
24 supply available, as that term is defined in  
25 various court rulings; and

1                   “(iii) be used exclusively by the Sec-  
2                   retary—

3                   “(I) to enhance the water supply  
4                   in years when the total water supply  
5                   available is not sufficient to provide  
6                   70 percent of proratable entitlements  
7                   in order to make that additional water  
8                   available up to 70 percent of prorat-  
9                   able entitlements to the Kittitas Rec-  
10                  lamation District, the Roza Irrigation  
11                  District, or other proratable irrigation  
12                  entities participating in the construc-  
13                  tion, operation, and maintenance costs  
14                  of the facilities under this title under  
15                  such terms and conditions to which  
16                  the districts may agree, subject to the  
17                  conditions that—

18                  “(aa) the Bureau of Indian  
19                  Affairs, the Wapato Irrigation  
20                  Project, and the Yakama Nation,  
21                  on an election to participate, may  
22                  also obtain water from Kachess  
23                  Reservoir inactive storage to en-  
24                  hance applicable existing irriga-  
25                  tion water supply in accordance

1 with such terms and conditions  
2 to which the Bureau of Indian  
3 Affairs and the Yakama Nation  
4 may agree; and

5 “(bb) the additional supply  
6 made available under this clause  
7 shall be available to participating  
8 individuals and entities in pro-  
9 portion to the proratable entitle-  
10 ments of the participating indi-  
11 viduals and entities, or in such  
12 other proportion as the partici-  
13 pating entities may agree; and

14 “(II) to facilitate reservoir oper-  
15 ations in the reach of the Yakima  
16 River between Keechelus Dam and  
17 Easton Dam for the propagation of  
18 anadromous fish.

19 “(B) EFFECT OF PARAGRAPH.—Nothing  
20 in this paragraph affects (as in existence on the  
21 date of enactment of this section) any contract,  
22 law (including regulations) relating to repay-  
23 ment costs, water right, or Yakama Nation  
24 treaty right.

1           “(3) COMMENCEMENT.—The Secretary shall  
2 not commence entering into agreements pursuant to  
3 subsection (a)(2)(A)(ii) or subsection (b)(1) or im-  
4 plementing any activities pursuant to the agree-  
5 ments before the date on which—

6           “(A) all applicable and required feasibility  
7 studies, environmental reviews, and cost-benefit  
8 analyses have been completed and include favor-  
9 able recommendations for further project devel-  
10 opment, including an analysis of—

11           “(i) the impacts of the agreements  
12 and activities conducted pursuant to sub-  
13 section (a)(2)(A)(ii) on adjacent commu-  
14 nities, including potential fire hazards,  
15 water access for fire districts, community  
16 and homeowner wells, future water levels  
17 based on projected usage, recreational val-  
18 ues, and property values; and

19           “(ii) specific options and measures for  
20 mitigating the impacts, as appropriate;

21           “(B) the Secretary has made the agree-  
22 ments and any applicable project designs, oper-  
23 ations plans, and other documents available for  
24 public review and comment in the Federal Reg-  
25 ister for a period of not less than 60 days; and

1           “(C) the Secretary has made a determina-  
2           tion, consistent with applicable law, that the  
3           agreements and activities to which the agree-  
4           ments relate—

5                     “(i) are in the public interest; and

6                     “(ii) could be implemented without  
7           significant adverse impacts to the environ-  
8           ment.

9           “(4) ELECTRICAL POWER ASSOCIATED WITH  
10          KACHESS DROUGHT RELIEF PUMPING PLANT.—

11                   “(A) IN GENERAL.—The Administrator of  
12           the Bonneville Power Administration, pursuant  
13           to the Pacific Northwest Electric Power Plan-  
14           ning and Conservation Act (16 U.S.C. 839 et  
15           seq.), shall provide to the Secretary project  
16           power to operate the Kachess Pumping Plant  
17           constructed under this title if inactive storage  
18           in Kachess Reservoir is needed to provide  
19           drought relief for irrigation, subject to the re-  
20           quirements of subparagraphs (B) and (C).

21                   “(B) DETERMINATION.—Power may be  
22           provided under subparagraph (A) only if—

23                     “(i) there is in effect a drought dec-  
24           laration issued by the State of Washington;

1                   “(ii) there are conditions that have led  
2                   to 70 percent or less water delivery to pro-  
3                   ratable irrigation districts, as determined  
4                   by the Secretary; and

5                   “(iii) the Secretary determines that it  
6                   is appropriate to provide power under that  
7                   subparagraph.

8                   “(C) PERIOD OF AVAILABILITY.—Power  
9                   under subparagraph (A) shall be provided until  
10                  the date on which the Secretary determines that  
11                  power should no longer be provided under that  
12                  subparagraph, but for not more than a 1-year  
13                  period or the period during which the Secretary  
14                  determines that drought mitigation measures  
15                  are necessary in the Yakima River basin.

16                  “(D) RATE.—The Administrator of the  
17                  Bonneville Power Administration shall provide  
18                  power under subparagraph (A) at the then-ap-  
19                  plicable lowest Bonneville Power Administration  
20                  rate for public body, cooperative, and Federal  
21                  agency customers firm obligations, which as of  
22                  the date of enactment of this section is the pri-  
23                  ority firm Tier 1 rate, and shall not include any  
24                  irrigation discount.

1           “(E) LOCAL PROVIDER.—During any pe-  
2           riod in which power is not being provided under  
3           subparagraph (A), the power needed to operate  
4           the Kachess Pumping Plant shall be obtained  
5           by the Secretary from a local provider.

6           “(F) COSTS.—The cost of power for such  
7           pumping, station service power, and all costs of  
8           transmitting power from the Federal Columbia  
9           River Power System to the Yakima Enhance-  
10          ment Project pumping facilities shall be borne  
11          by irrigation districts receiving the benefits of  
12          that water.

13          “(G) DUTIES OF COMMISSIONER.—The  
14          Commissioner of Reclamation shall be respon-  
15          sible for arranging transmission for deliveries of  
16          Federal power over the Bonneville system  
17          through applicable tariff and business practice  
18          processes of the Bonneville system and for ar-  
19          ranging transmission for deliveries of power ob-  
20          tained from a local provider.

21          “(c) DESIGN AND USE OF GROUNDWATER RE-  
22          CHARGE PROJECTS.—

23                 “(1) IN GENERAL.—Any water supply that re-  
24                 sults from an aquifer storage and recovery project

1 shall not be considered to be a part of the total  
2 water supply available if—

3 “(A) the water for the aquifer storage and  
4 recovery project would not be available for use,  
5 but instead for the development of the project;

6 “(B) the aquifer storage and recovery  
7 project will not otherwise impair any water sup-  
8 ply available for any individual or entity entitled  
9 to use the total water supply available; and

10 “(C) the development of the aquifer stor-  
11 age and recovery project will not impair fish or  
12 other aquatic life in any localized stream reach.

13 “(2) PROJECT TYPES.—The Secretary may pro-  
14 vide technical assistance for, and participate in, any  
15 of the following 3 types of groundwater recharge  
16 projects (including the incorporation of groundwater  
17 recharge projects into Yakima Project operations, as  
18 appropriate):

19 “(A) Aquifer recharge projects designed to  
20 redistribute Yakima Project water within a  
21 water year for the purposes of supplementing  
22 stream flow during the irrigation season, par-  
23 ticularly during storage control, subject to the  
24 condition that if such a project is designed to  
25 supplement a mainstem reach, the water supply

1 that results from the project shall be credited to  
2 instream flow targets, in lieu of using the total  
3 water supply available to meet those targets.

4 “(B) Aquifer storage and recovery projects  
5 that are designed, within a given water year or  
6 over multiple water years—

7 “(i) to supplement or mitigate for mu-  
8 nicipal uses;

9 “(ii) to supplement municipal supply  
10 in a subsurface aquifer; or

11 “(iii) to mitigate the effect of ground-  
12 water use on instream flow or senior water  
13 rights.

14 “(C) Aquifer storage and recovery projects  
15 designed to supplement existing irrigation water  
16 supply, or to store water in subsurface aquifers,  
17 for use by the Kittitas Reclamation District,  
18 the Roza Irrigation District, or any other pro-  
19 ratable irrigation entity participating in the re-  
20 payment of the construction, operation, and  
21 maintenance costs of the facilities under this  
22 section during years in which the total water  
23 supply available is insufficient to provide to  
24 those proratable irrigation entities all water to

1           which the entities are entitled, subject to the  
2           conditions that—

3                   “(i) the Bureau of Indian Affairs, the  
4                   Wapato Irrigation Project, and the  
5                   Yakama Nation, on an election to partici-  
6                   pate, may also obtain water from aquifer  
7                   storage to enhance applicable existing irri-  
8                   gation water supply in accordance with  
9                   such terms and conditions to which the  
10                  Bureau of Indian Affairs and the Yakama  
11                  Nation may agree; and

12                   “(ii) nothing in this subparagraph af-  
13                   fects (as in existence on the date of enact-  
14                   ment of this section) any contract, law (in-  
15                   cluding regulations) relating to repayment  
16                   costs, water right, or Yakama Nation trea-  
17                   ty right.

18           “(d) FEDERAL COST-SHARE.—

19                   “(1) IN GENERAL.—The Federal cost-share of a  
20                   project carried out under this section shall be deter-  
21                   mined in accordance with the applicable laws (in-  
22                   cluding regulations) and policies of the Bureau of  
23                   Reclamation.

24                   “(2) INITIAL PHASE.—The Federal cost-share  
25                   for the initial development phase of the Integrated

1 Plan shall not exceed 50 percent of the total cost of  
2 the initial development phase.

3 “(3) STATE AND OTHER CONTRIBUTIONS.—The  
4 Secretary may accept as part of the non-Federal  
5 cost-share of a project carried out under this section,  
6 and expend as if appropriated, any contribution (in-  
7 cluding in-kind services) by the State of Washington  
8 or any other individual or entity that the Secretary  
9 determines will enhance the conduct and completion  
10 of the project.

11 “(4) LIMITATION ON USE OF OTHER FEDERAL  
12 FUNDS.—Except as otherwise provided in this title,  
13 other Federal funds may not be used to provide the  
14 non-Federal cost-share of a project carried out  
15 under this section.

16 “(e) SAVINGS AND CONTINGENCIES.—Nothing in this  
17 section shall—

18 “(1) be a new or supplemental benefit for pur-  
19 poses of the Reclamation Reform Act of 1982 (43  
20 U.S.C. 390aa et seq.);

21 “(2) affect any contract in existence on the date  
22 of enactment of the Yakima River Basin Water En-  
23 hancement Project Phase III Act of 2016 that was  
24 executed pursuant to the reclamation laws;

1           “(3) affect any contract or agreement between  
2           the Bureau of Indian Affairs and the Bureau of  
3           Reclamation;

4           “(4) affect, waive, abrogate, diminish, define, or  
5           interpret the treaty between the Yakama Nation and  
6           the United States; or

7           “(5) constrain the continued authority of the  
8           Secretary to provide fish passage in the Yakima  
9           Basin in accordance with the Hoover Power Plant  
10          Act of 1984 (43 U.S.C 619 et seq.).

11 **“SEC. 1214. OPERATIONAL CONTROL OF WATER SUPPLIES.**

12          “The Secretary shall retain authority and discretion  
13 over the management of project supplies to optimize oper-  
14 ational use and flexibility to ensure compliance with all  
15 applicable Federal and State laws, treaty rights of the  
16 Yakama Nation, and legal obligations, including those  
17 contained in this Act. That authority and discretion in-  
18 cludes the ability of the United States to store, deliver,  
19 conserve, and reuse water supplies deriving from projects  
20 authorized under this title.”.

21          **Subpart B—Klamath Project Water and Power**

22 **SEC. 6329. KLAMATH PROJECT.**

23          (a) ADDRESSING WATER MANAGEMENT AND POWER  
24 COSTS FOR IRRIGATION.—The Klamath Basin Water

1 Supply Enhancement Act of 2000 (Public Law 106–498;  
2 114 Stat. 2221) is amended—

3 (1) by redesignating sections 4 through 6 as  
4 sections 5 through 7, respectively; and

5 (2) by inserting after section 3 the following:

6 **“SEC. 4. POWER AND WATER MANAGEMENT.**

7 “(a) DEFINITIONS.—In this section:

8 “(1) COVERED POWER USE.—The term ‘covered  
9 power use’ means a use of power to develop or man-  
10 age water for irrigation, wildlife purposes, or drain-  
11 age on land that is—

12 “(A) associated with the Klamath Project,  
13 including land within a unit of the National  
14 Wildlife Refuge System that receives water due  
15 to the operation of Klamath Project facilities;  
16 or

17 “(B) irrigated by the class of users covered  
18 by the agreement dated April 30, 1956, be-  
19 tween the California Oregon Power Company  
20 and Klamath Basin Water Users Protective As-  
21 sociation and within the Off Project Area (as  
22 defined in the Upper Basin Comprehensive  
23 Agreement entered into on April 18, 2014),  
24 only if each applicable owner and holder of a  
25 possessory interest of the land is a party to that

1 agreement (or a successor agreement that the  
2 Secretary determines provides a comparable  
3 benefit to the United States).

4 “(2) KLAMATH PROJECT.—

5 “(A) IN GENERAL.—The term ‘Klamath  
6 Project’ means the Bureau of Reclamation  
7 project in the States of California and Oregon.

8 “(B) INCLUSIONS.—The term ‘Klamath  
9 Project’ includes any dams, canals, and other  
10 works and interests for water diversion, storage,  
11 delivery, and drainage, flood control, and simi-  
12 lar functions that are part of the project de-  
13 scribed in subparagraph (A).

14 “(3) POWER COST BENCHMARK.—The term  
15 ‘power cost benchmark’ means the average net deliv-  
16 ered cost of power for irrigation and drainage at  
17 Reclamation projects in the area surrounding the  
18 Klamath Project that are similarly situated to the  
19 Klamath Project, including Reclamation projects  
20 that—

21 “(A) are located in the Pacific Northwest;

22 and

23 “(B) receive project-use power.

24 “(b) WATER, ENVIRONMENTAL, AND POWER ACTIVI-  
25 TIES.—

1           “(1) IN GENERAL.—Pursuant to the reclama-  
2           tion laws and subject to appropriations and required  
3           environmental reviews, the Secretary may carry out  
4           activities, including entering into an agreement or  
5           contract or otherwise making financial assistance  
6           available—

7                   “(A) to plan, implement, and administer  
8                   programs to align water supplies and demand  
9                   for irrigation water users associated with the  
10                  Klamath Project, with a primary emphasis on  
11                  programs developed or endorsed by local enti-  
12                  ties comprised of representatives of those water  
13                  users;

14                  “(B) to plan and implement activities and  
15                  projects that—

16                          “(i) avoid or mitigate environmental  
17                          effects of irrigation activities; or

18                          “(ii) restore habitats in the Klamath  
19                          Basin watershed, including restoring tribal  
20                          fishery resources held in trust; and

21                  “(C) to limit the net delivered cost of  
22                  power for covered power uses.

23           “(2) EFFECT.—Nothing in subparagraph (A)  
24           or (B) of paragraph (1) authorizes the Secretary—

1           “(A) to develop or construct new facilities  
2           for the Klamath Project without appropriate  
3           approval from Congress under section 9 of the  
4           Reclamation Projects Act of 1939 (43 U.S.C.  
5           485h); or

6           “(B) to carry out activities that have not  
7           otherwise been authorized.

8           “(c) REDUCING POWER COSTS.—

9           “(1) IN GENERAL.—Not later than 180 days  
10          after the date of enactment of the Energy Policy  
11          Modernization Act of 2016, the Secretary, in con-  
12          sultation with interested irrigation interests that are  
13          eligible for covered power use and representative or-  
14          ganizations of those interests, shall submit to the  
15          Committee on Energy and Natural Resources of the  
16          Senate and the Committee on Natural Resources of  
17          the House of Representatives a report that—

18                 “(A) identifies the power cost benchmark;  
19                 and

20                 “(B) recommends actions that, in the judg-  
21                 ment of the Secretary, are necessary and appro-  
22                 priate to ensure that the net delivered power  
23                 cost for covered power use is equal to or less  
24                 than the power cost benchmark, including a de-  
25                 scription of—

1           “(i) actions to immediately reduce  
2 power costs and to have the net delivered  
3 power cost for covered power use be equal  
4 to or less than the power cost benchmark  
5 in the near term, while longer-term actions  
6 are being implemented;

7           “(ii) actions that prioritize water and  
8 power conservation and efficiency measures  
9 and, to the extent actions involving the de-  
10 velopment or acquisition of power genera-  
11 tion are included, renewable energy tech-  
12 nologies (including hydropower);

13           “(iii) the potential costs and timeline  
14 for the actions recommended under this  
15 subparagraph;

16           “(iv) provisions for modifying the ac-  
17 tions and timeline to adapt to new infor-  
18 mation or circumstances; and

19           “(v) a description of public input re-  
20 garding the proposed actions, including  
21 input from water users that have covered  
22 power use and the degree to which those  
23 water users concur with the recommenda-  
24 tions.

1           “(2) IMPLEMENTATION.—Not later than 180  
2 days after the date of submission of the report  
3 under paragraph (1), the Secretary shall implement  
4 those recommendations described in the report that  
5 the Secretary determines will ensure that the net de-  
6 livered power cost for covered power use is equal to  
7 or less than the power cost benchmark, subject to  
8 availability of appropriations, on the fastest prac-  
9 ticable timeline.

10           “(3) ANNUAL REPORTS.—The Secretary shall  
11 submit to each Committee described in paragraph  
12 (1) annual reports describing progress achieved in  
13 meeting the requirements of this subsection.

14           “(d) TREATMENT OF POWER PURCHASES.—

15           “(1) IN GENERAL.—Any purchase of power by  
16 the Secretary under this section shall be considered  
17 to be an authorized sale for purposes of section  
18 5(b)(3) of the Pacific Northwest Electric Power  
19 Planning and Conservation Act (16 U.S.C.  
20 839c(b)(3)).

21           “(2) EFFECT.—Nothing in this section author-  
22 izes the Bonneville Power Administration to make a  
23 sale of power from the Federal Columbia River  
24 Power System at rates, terms, or conditions better

1 than those afforded preference customers of the  
2 Bonneville Power Administration.

3 “(e) GOALS.—The goals of activities under sub-  
4 sections (b) and (c) shall include, as applicable—

5 “(1) the short-term and long-term reduction  
6 and resolution of conflicts relating to water in the  
7 Klamath Basin watershed; and

8 “(2) compatibility and utility for protecting nat-  
9 ural resources throughout the Klamath Basin water-  
10 shed, including the protection, preservation, and res-  
11 toration of Klamath River tribal fishery resources,  
12 particularly through collaboratively developed agree-  
13 ments.

14 “(f) PUMPING PLANT D.—The Secretary may enter  
15 into 1 or more agreements with the Tulelake Irrigation  
16 District to reimburse the Tulelake Irrigation District for  
17 not more than 69 percent of the cost incurred by the  
18 Tulelake Irrigation District for the operation and mainte-  
19 nance of Pumping Plant D, on the condition that the cost  
20 benefits the United States.”.

21 (b) CONVEYANCE OF NON-PROJECT WATER; RE-  
22 PLACEMENT OF C CANAL.—

23 (1) DEFINITION OF KLAMATH PROJECT.—In  
24 this subsection:

1           (A) IN GENERAL.—The term “Klamath  
2 Project” means the Bureau of Reclamation  
3 project in the States of California and Oregon.

4           (B) INCLUSIONS.—The term “Klamath  
5 Project” includes any dams, canals, and other  
6 works and interests for water diversion, storage,  
7 delivery, and drainage, flood control, and simi-  
8 lar functions that are part of the project de-  
9 scribed in subparagraph (A).

10       (2) CONVEYANCE OF NON-PROJECT WATER.—

11           (A) IN GENERAL.—An entity operating  
12 under a contract entered into with the United  
13 States for the operation and maintenance of  
14 Klamath Project works or facilities, and an en-  
15 tity operating any work or facility not owned by  
16 the United States that receives Klamath Project  
17 water, may use any of the Klamath Project  
18 works or facilities to convey non-Klamath  
19 Project water for any authorized purpose of the  
20 Klamath Project, subject to subparagraphs (B)  
21 and (C).

22           (B) PERMITS; MEASUREMENT.—An addi-  
23 tion, conveyance, and use of water pursuant to  
24 subparagraph (A) shall be subject to the re-  
25 quirements that—

1 (i) the applicable entity shall secure  
2 all permits required under State or local  
3 laws; and

4 (ii) all water delivered into, or taken  
5 out of, a Klamath Project facility pursuant  
6 to that subparagraph shall be measured.

7 (C) EFFECT.—A use of non-Klamath  
8 Project water under this paragraph shall not—

9 (i) adversely affect the delivery of  
10 water to any water user or land served by  
11 the Klamath Project; or

12 (ii) result in any additional cost to the  
13 United States.

14 (3) REPLACEMENT OF C CANAL FLUME.—The  
15 replacement of the C Canal flume within the Klam-  
16 ath Project shall be considered to be, and shall re-  
17 ceive the treatment authorized for, emergency ex-  
18 traordinary operation and maintenance work in ac-  
19 cordance with Federal reclamation law (the Act of  
20 June 17, 1902 (32 Stat. 388, chapter 1093), and  
21 Acts supplemental to and amendatory of that Act  
22 (43 U.S.C. 371 et seq.)).

23 (c) ADMINISTRATION.—

1 (1) COMPLIANCE.—In implementing this sec-  
2 tion and the amendments made by this section, the  
3 Secretary of the Interior shall comply with—

4 (A) the National Environmental Policy Act  
5 of 1969 (42 U.S.C. 4321 et seq.);

6 (B) the Endangered Species Act of 1973  
7 (16 U.S.C. 1531 et seq.); and

8 (C) all other applicable laws.

9 (2) EFFECT.—Nothing in this section—

10 (A) modifies the authorities or obligations  
11 of the United States with respect to the tribal  
12 trust and treaty obligations of the United  
13 States; or

14 (B) creates or determines water rights or  
15 affects water rights or water right claims in ex-  
16 istence on the date of enactment of this Act.

17 **PART IV—RESERVOIR OPERATION**

18 **IMPROVEMENT**

19 **SEC. 6331. RESERVOIR OPERATION IMPROVEMENT.**

20 (a) DEFINITIONS.—In this section:

21 (1) RESERVED WORKS.—The term “reserved  
22 works” means any Bureau of Reclamation project  
23 facility at which the Secretary of the Interior carries  
24 out the operation and maintenance of the project fa-  
25 cility.

1           (2) SECRETARY.—The term “Secretary” means  
2           the Secretary of the Army.

3           (3) TRANSFERRED WORKS.—The term “trans-  
4           ferred works” means a Bureau of Reclamation  
5           project facility, the operation and maintenance of  
6           which is carried out by a non-Federal entity, under  
7           the provisions of a formal operation and mainte-  
8           nance transfer contract.

9           (4) TRANSFERRED WORKS OPERATING ENTI-  
10          TY.—The term “transferred works operating entity”  
11          means the organization that is contractually respon-  
12          sible for operation and maintenance of transferred  
13          works.

14          (b) REPORT.—Not later than 360 days after the date  
15          of enactment of this Act, the Secretary shall submit to  
16          the Committees on Appropriations of the Senate and the  
17          House of Representatives, the Committee on Environment  
18          and Public Works of the Senate, and the Committee on  
19          Transportation and Infrastructure of the House of Rep-  
20          resentatives a report including, for any State in which a  
21          county designated by the Secretary of Agriculture as a  
22          drought disaster area during water year 2015 is located,  
23          a list of projects, including Corps of Engineers projects,  
24          and those non-Federal projects and transferred works that  
25          are operated for flood control in accordance with rules pre-

1 scribed by the Secretary pursuant to section 7 of the Act  
2 of December 22, 1944 (commonly known as the “Flood  
3 Control Act of 1944”) (58 Stat. 890, chapter 665), includ-  
4 ing, as applicable—

5 (1) the year the original water control manual  
6 was approved;

7 (2) the year for any subsequent revisions to the  
8 water control plan and manual of the project;

9 (3) a list of projects for which—

10 (A) operational deviations for drought con-  
11 tingency have been requested;

12 (B) the status of the request; and

13 (C) a description of how water conserva-  
14 tion and water quality improvements were ad-  
15 dressed; and

16 (4) a list of projects for which permanent or  
17 seasonal changes to storage allocations have been re-  
18 quested, and the status of the request.

19 (c) PROJECT IDENTIFICATION.—Not later than 60  
20 days after the date of completion of the report under sub-  
21 section (b), the Secretary shall identify any projects de-  
22 scribed in the report—

23 (1) for which the modification of the water op-  
24 erations manuals, including flood control rule curve,  
25 would be likely to enhance existing authorized

1 project purposes, including for water supply benefits  
2 and flood control operations;

3 (2) for which the water control manual and  
4 hydrometeorological information establishing the  
5 flood control rule curves of the project have not been  
6 substantially revised during the 15-year period end-  
7 ing on the date of review by the Secretary; and

8 (3) for which the non-Federal sponsor or spon-  
9 sors of a Corps of Engineers project, the owner of  
10 a non-Federal project, or the non-Federal trans-  
11 ferred works operating entity, as applicable, has sub-  
12 mitted to the Secretary a written request to revise  
13 water operations manuals, including flood control  
14 rule curves, based on the use of improved weather  
15 forecasting or run-off forecasting methods, new wa-  
16 tershed data, changes to project operations, or struc-  
17 tural improvements.

18 (d) PILOT PROJECTS.—

19 (1) IN GENERAL.—Not later than 1 year after  
20 the date of identification of projects under sub-  
21 section (c), if any, the Secretary shall carry out not  
22 fewer than 15 pilot projects, which shall include not  
23 less than 6 non-Federal projects, to implement revi-  
24 sions of water operations manuals, including flood

1 control rule curves, based on the best available  
2 science, which may include—

- 3 (A) forecast-informed operations;
- 4 (B) new watershed data; and
- 5 (C) if applicable, in the case of non-Fed-  
6 eral projects, structural improvements.

7 (2) CONSULTATION.—In implementing a pilot  
8 project under this subsection, the Secretary shall  
9 consult with all affected interests, including—

- 10 (A) non-Federal entities responsible for op-  
11 erations and maintenance costs of a Federal fa-  
12 cility;
- 13 (B) individuals and entities with storage  
14 entitlements; and
- 15 (C) local agencies with flood control re-  
16 sponsibilities downstream of a facility.

17 (e) COORDINATION WITH NON-FEDERAL PROJECT  
18 ENTITIES.—If a project identified under subsection (c)  
19 is—

20 (1) a non-Federal project, the Secretary, prior  
21 to carrying out an activity under this section,  
22 shall—

- 23 (A) consult with the non-Federal project  
24 owner; and

1 (B) enter into a cooperative agreement,  
2 memorandum of understanding, or other agree-  
3 ment with the non-Federal project owner de-  
4 scribing the scope and goals of the activity and  
5 the coordination among the parties; and

6 (2) a Federal project, the Secretary, prior to  
7 carrying out an activity under this section, shall—

8 (A) consult with each Federal and non-  
9 Federal entity (including a municipal water dis-  
10 trict, irrigation district, joint powers authority,  
11 transferred works operating entity, or other  
12 local governmental entity) that currently—

13 (i) manages (in whole or in part) a  
14 Federal dam or reservoir; or

15 (ii) is responsible for operations and  
16 maintenance costs; and

17 (B) enter into a cooperative agreement,  
18 memorandum of understanding, or other agree-  
19 ment with each such entity describing the scope  
20 and goals of the activity and the coordination  
21 among the parties.

22 (f) CONSIDERATION.—In designing and imple-  
23 menting a forecast-informed reservoir operations plan  
24 under subsection (d) or (g), the Secretary may consult  
25 with the appropriate agencies within the Department of

1 the Interior and the Department of Commerce with exper-  
2 tise in atmospheric, meteorological, and hydrologic science  
3 to consider—

4 (1) the relationship between ocean and atmos-  
5 pheric conditions, including—

6 (A) the El Niño and La Niña cycles; and

7 (B) the potential for above-normal, normal,  
8 and below-normal rainfall for the coming water  
9 year, including consideration of atmospheric  
10 river forecasts;

11 (2) the precipitation and runoff index specific  
12 to the basin and watershed of the relevant dam or  
13 reservoir, including incorporating knowledge of  
14 hydrological and meteorological conditions that influ-  
15 ence the timing and quantity of runoff;

16 (3) improved hydrologic forecasting for precipi-  
17 tation, snowpack, and soil moisture conditions;

18 (4) an adjustment of operational flood control  
19 rule curves to optimize water supply storage and re-  
20 liability, hydropower production, environmental bene-  
21 fits for flows and temperature, and other authorized  
22 project benefits, without a reduction in flood safety;  
23 and

24 (5) proactive management in response to  
25 changes in forecasts.

1 (g) FUNDING.—The Secretary may accept and ex-  
2 pend amounts from non-Federal entities and other Fed-  
3 eral agencies to fund all or a portion of the cost of car-  
4 rying out a review or revision of operational documents,  
5 including water control plans, water control manuals,  
6 water control diagrams, release schedules, rule curves,  
7 operational agreements with non-Federal entities, and any  
8 associated environmental documentation for—

9 (1) a Corps of Engineers project;

10 (2) a non-Federal project regulated for flood  
11 control by the Secretary; or

12 (3) a Bureau of Reclamation transferred works  
13 regulated for flood control by the Secretary.

14 (h) EFFECT.—

15 (1) MANUAL REVISIONS.—A revision of a man-  
16 ual shall not interfere with the authorized purposes  
17 of a Federal project or the existing purposes of a  
18 non-Federal project regulated for flood control by  
19 the Secretary.

20 (2) EFFECT OF SECTION.—

21 (A) Nothing in this section authorizes the  
22 Secretary to carry out, at a Federal dam or res-  
23 ervoir, any project or activity for a purpose not  
24 otherwise authorized as of the date of enact-  
25 ment of this Act.

1           (B) Nothing in this section affects or  
2           modifies any obligation of the Secretary under  
3           State law.

4           (C) Nothing in this section affects or modi-  
5           fies any obligation to comply with any applica-  
6           ble Federal law.

7           (3) BUREAU OF RECLAMATION RESERVED  
8           WORKS EXCLUDED.—This section—

9           (A) shall not apply to any dam or reservoir  
10           operated by the Bureau of Reclamation as a re-  
11           served work, unless all non-Federal project  
12           sponsors of a reserved work jointly provide to  
13           the Secretary a written request for application  
14           of this section to the project; and

15           (B) shall apply only to Bureau of Reclama-  
16           tion transferred works at the written request of  
17           the transferred works operating entity.

18           (4) PRIOR STUDIES.—The Secretary shall—

19           (A) to the maximum extent practicable, co-  
20           ordinate the efforts of the Secretary in carrying  
21           out subsections (b), (c), and (d) with the efforts  
22           of the Secretary in completing—

23           (i) the report required under section  
24           1046(a)(2)(A) of the Water Resources Re-  
25           form and Development Act of 2014 (33

1 U.S.C. 2319 note; Public Law 113–121);

2 and

3 (ii) the updated report required under

4 subsection (a)(2)(B) of that section; and

5 (B) if the reports are available before the

6 date on which the Secretary carries out the ac-

7 tions described in subsections (b), (c), and (d),

8 consider the findings of the reports described in

9 clauses (i) and (ii) of subparagraph (A).

10 (i) MODIFICATIONS TO MANUALS AND CURVES.—Not

11 later than 180 days after the date of completion of a modi-

12 fication to an operations manual or flood control rule

13 curve, the Secretary shall submit to the Committee on En-

14 vironment and Public Works of the Senate and the Com-

15 mittee on Transportation and Infrastructure of the House

16 of Representatives a report regarding the components of

17 the forecast-based reservoir operations plan incorporated

18 into the change.

19 **PART V—HYDROELECTRIC PROJECTS**

20 **SEC. 6341. TERROR LAKE HYDROELECTRIC PROJECT**

21 **UPPER HIDDEN BASIN DIVERSION AUTHOR-**

22 **IZATION.**

23 (a) DEFINITIONS.—In this section:

24 (1) TERROR LAKE HYDROELECTRIC

25 PROJECT.—The term “Terror Lake Hydroelectric

1 Project” means the project identified in section 1325  
2 of the Alaska National Interest Lands Conservation  
3 Act (16 U.S.C. 3212), and which is Federal Energy  
4 Regulatory Commission project number 2743.

5 (2) UPPER HIDDEN BASIN DIVERSION EXPAN-  
6 SION.—The term “Upper Hidden Basin Diversion  
7 Expansion” means the expansion of the Terror Lake  
8 Hydroelectric Project as generally described in Ex-  
9 hibit E to the Upper Hidden Basin Grant Applica-  
10 tion dated July 2, 2014 and submitted to the Alaska  
11 Energy Authority Renewable Energy Fund Round  
12 VIII by Kodiak Electric Association, Inc.

13 (b) AUTHORIZATION.—The licensee for the Terror  
14 Lake Hydroelectric Project may occupy not more than 20  
15 acres of Federal land to construct, operate, and maintain  
16 the Upper Hidden Basin Diversion Expansion without fur-  
17 ther authorization of the Secretary of the Interior or  
18 under the Alaska National Interest Lands Conservation  
19 Act (16 U.S.C. 3101 et seq.).

20 (c) SAVINGS CLAUSE.—The Upper Hidden Basin Di-  
21 version Expansion shall be subject to appropriate terms  
22 and conditions included in an amendment to a license  
23 issued by the Federal Energy Regulatory Commission pur-  
24 suant to the Federal Power Act (16 U.S.C. 791a et seq.),  
25 including section 4(e) of that Act (16 U.S.C. 797(e)), fol-

1 lowing an environmental review by the Commission under  
2 the National Environmental Policy Act of 1969 (42 U.S.C.  
3 4321 et seq.).

4 **SEC. 6342. STAY AND REINSTATEMENT OF FERC LICENSE**  
5 **NO. 11393 FOR THE MAHONEY LAKE HYDRO-**  
6 **ELECTRIC PROJECT.**

7 (a) DEFINITIONS.—In this section:

8 (1) COMMISSION.—The term “Commission”  
9 means the Federal Energy Regulatory Commission.

10 (2) LICENSE.—The term “license” means the  
11 license for Commission project number 11393.

12 (3) LICENSEE.—The term “licensee” means the  
13 holder of the license.

14 (b) STAY OF LICENSE.—On the request of the li-  
15 censee, the Commission shall issue an order continuing the  
16 stay of the license.

17 (c) LIFTING OF STAY.—On the request of the li-  
18 censee, but not later than 10 years after the date of enact-  
19 ment of this Act, the Commission shall—

20 (1) issue an order lifting the stay of the license  
21 under subsection (b); and

22 (2) make the effective date of the license the  
23 date on which the stay is lifted under paragraph (1).

24 (d) EXTENSION OF LICENSE.—On the request of the  
25 licensee and notwithstanding the time period specified in

1 section 13 of the Federal Power Act (16 U.S.C. 806) for  
2 commencement of construction of the project subject to  
3 the license, the Commission shall, after reasonable notice  
4 and in accordance with the good faith, due diligence, and  
5 public interest requirements of that section, extend the  
6 time period during which the licensee is required to com-  
7 mence the construction of the project for not more than  
8 3 consecutive 2-year periods, notwithstanding any other  
9 provision of law.

10 (e) EFFECT.—Nothing in this section prioritizes, or  
11 creates any advantage or disadvantage to, Commission  
12 project number 11393 under Federal law, including the  
13 Federal Power Act (16 U.S.C. 791a et seq.) or the Public  
14 Utility Regulatory Policies Act of 1978 (16 U.S.C. 2601  
15 et seq.), as compared to—

16 (1) any electric generating facility in existence  
17 on the date of enactment of this Act; or

18 (2) any electric generating facility that may be  
19 examined, proposed, or developed during the period  
20 of any stay or extension of the license under this  
21 section.

22 **SEC. 6343. EXTENSION OF DEADLINE FOR HYDROELECTRIC**  
23 **PROJECT.**

24 (a) IN GENERAL.—Notwithstanding the time period  
25 specified in section 13 of the Federal Power Act (16

1 U.S.C. 806) that would otherwise apply to the Federal En-  
2 ergy Regulatory Commission (referred to in this section  
3 as the “Commission”) project numbered 12642, the Com-  
4 mission may, at the request of the licensee for the project,  
5 and after reasonable notice, in accordance with the good  
6 faith, due diligence, and public interest requirements of  
7 that section and the procedures of the Commission under  
8 that section, extend the time period during which the li-  
9 censee is required to commence the construction of the  
10 project for up to 3 consecutive 2-year periods from the  
11 date of the expiration of the extension originally issued  
12 by the Commission.

13 (b) REINSTATEMENT OF EXPIRED LICENSE.—If the  
14 period required for commencement of construction of the  
15 project described in subsection (a) has expired prior to the  
16 date of enactment of this Act—

17 (1) the Commission shall reinstate the license  
18 effective as of the date of the expiration of the li-  
19 cense; and

20 (2) the first extension authorized under sub-  
21 section (a) shall take effect on that expiration date.

22 **SEC. 6344. EXTENSION OF DEADLINE FOR CERTAIN OTHER**  
23 **HYDROELECTRIC PROJECTS.**

24 (a) IN GENERAL.—Notwithstanding the time period  
25 specified in section 13 of the Federal Power Act (16

1 U.S.C. 806) that would otherwise apply to the Federal En-  
2 ergy Regulatory Commission (referred to in this section  
3 as the “Commission”) projects numbered 12737 and  
4 12740, the Commission may, at the request of the licensee  
5 for the applicable project, and after reasonable notice, in  
6 accordance with the good faith, due diligence, and public  
7 interest requirements of that section and the procedures  
8 of the Commission under that section, extend the time pe-  
9 riod during which the licensee is required to commence  
10 the construction of the applicable project for up to 3 con-  
11 secutive 2-year periods from the date of the expiration of  
12 the extension originally issued by the Commission.

13 (b) REINSTATEMENT OF EXPIRED LICENSE.—If the  
14 period required for commencement of construction of a  
15 project described in subsection (a) has expired prior to the  
16 date of enactment of this Act—

17 (1) the Commission may reinstate the license  
18 for the applicable project effective as of the date of  
19 the expiration of the license; and

20 (2) the first extension authorized under sub-  
21 section (a) shall take effect on that expiration.

22 **SEC. 6345. EQUUS BEDS DIVISION EXTENSION.**

23 Section 10(h) of Public Law 86–787 (74 Stat. 1026;  
24 120 Stat. 1474) is amended by striking “10 years” and  
25 inserting “20 years”.

1 **SEC. 6346. EXTENSION OF TIME FOR A FEDERAL ENERGY**  
2 **REGULATORY COMMISSION PROJECT IN-**  
3 **VOLVING CANNONSVILLE DAM.**

4 (a) IN GENERAL.—Notwithstanding the time period  
5 specified in section 13 of the Federal Power Act (16  
6 U.S.C. 806) that would otherwise apply to the Federal En-  
7 ergy Regulatory Commission project numbered 13287, the  
8 Federal Energy Regulatory Commission (referred to in  
9 this section as the “Commission”) may, at the request of  
10 the licensee for the project, and after reasonable notice,  
11 in accordance with the good faith, due diligence, and pub-  
12 lic interest requirements of that section and the proce-  
13 dures of the Commission under that section, extend the  
14 time period during which the licensee is required to com-  
15 mence construction of the project for up to 4 consecutive  
16 2-year periods after the required date of the commence-  
17 ment of construction described in Article 301 of the li-  
18 cense.

19 (b) REINSTATEMENT OF EXPIRED LICENSE.—

20 (1) IN GENERAL.—If the required date of the  
21 commencement of construction described in sub-  
22 section (a) has expired prior to the date of enact-  
23 ment of this Act, the Commission may reinstate the  
24 license effective as of that date of expiration.

25 (2) EXTENSION.—If the Commission reinstates  
26 the license under paragraph (1), the first extension

1 authorized under subsection (a) shall take effect on  
2 the date of that expiration.

3 **PART VI—PUMPED STORAGE HYDROPOWER**

4 **COMPENSATION**

5 **SEC. 6351. PUMPED STORAGE HYDROPOWER COMPENSA-**  
6 **TION.**

7 Not later than 180 days after the date of enactment  
8 of this Act, the Federal Energy Regulatory Commission  
9 shall initiate a proceeding to identify and determine the  
10 market, procurement, and cost recovery mechanisms that  
11 would—

12 (1) encourage development of pumped storage  
13 hydropower assets; and

14 (2) properly compensate those assets for the  
15 full range of services provided to the power grid, in-  
16 cluding—

17 (A) balancing electricity supply and de-  
18 mand;

19 (B) ensuring grid reliability; and

20 (C) cost-effectively integrating intermittent  
21 power sources into the grid.

AMENDMENT NO.

Calendar No.

Purpose: To provide for activities relating to the centennial of the National Park System.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by Mr. PORTMAN (for himself, Ms. CANTWELL, and Ms. MURKOWSKI) to the amendment (No. 2953) proposed by Ms. MURKOWSKI

Viz:

1 At the end of subtitle E of title IV, add the following:

2 **SEC. 44 . NATIONAL PARK CENTENNIAL.**

3 (a) NATIONAL PARK CENTENNIAL CHALLENGE

4 FUND.—

5 (1) IN GENERAL.—Chapter 1049 of title 54,

6 United States Code (as amended by section

7 5001(a)), is amended by adding at the end the fol-

8 lowing:

9 **“§ 104909. National Park Centennial Challenge Fund**

10 “(a) PURPOSE.—The purpose of this section is to es-

11 tablish a fund in the Treasury—

1           “(1) to finance signature projects and programs  
2 to enhance the National Park System as the centen-  
3 nial of the National Park System approaches in  
4 2016; and

5           “(2) to prepare the System for another century  
6 of conservation, preservation, and enjoyment.

7           “(b) DEFINITIONS.—In this section:

8           “(1) CHALLENGE FUND.—The term ‘Challenge  
9 Fund’ means the National Park Centennial Chal-  
10 lenge Fund established by subsection (c)(1).

11           “(2) QUALIFIED DONATION.—The term ‘quali-  
12 fied donation’ means a cash donation or the pledge  
13 of a cash donation guaranteed by an irrevocable let-  
14 ter of credit to the Service that the Secretary cer-  
15 tifies is to be used for a signature project or pro-  
16 gram.

17           “(3) SIGNATURE PROJECT OR PROGRAM.—The  
18 term ‘signature project or program’ means any  
19 project or program identified by the Secretary as a  
20 project or program that would further the purposes  
21 of the System or any System unit.

22           “(c) NATIONAL PARK CENTENNIAL CHALLENGE  
23 FUND.—

24           “(1) ESTABLISHMENT.—There is established in  
25 the Treasury of the United States a fund, to be

1 known as the ‘National Park Centennial Challenge  
2 Fund’.

3 “(2) DEPOSITS.—The Challenge Fund shall  
4 consist of—

5 “(A) qualified donations that are trans-  
6 ferred from the Service donation account, in ac-  
7 cordance with subsection (e)(1); and

8 “(B) not more than \$17,500,000, to be ap-  
9 propriated from the general fund of the Treas-  
10 ury, in accordance with subsection (e)(2).

11 “(3) AVAILABILITY.—Amounts in the Challenge  
12 Fund shall—

13 “(A) be available to the Secretary for sig-  
14 nature projects and programs under this title,  
15 without further appropriation; and

16 “(B) remain available until expended.

17 “(d) SIGNATURE PROJECTS AND PROGRAMS.—

18 “(1) DEVELOPMENT OF LIST.—Not later than  
19 180 days after the date of enactment of this section,  
20 the Secretary shall develop a list of signature  
21 projects and programs eligible for funding from the  
22 Challenge Fund.

23 “(2) SUBMISSION TO CONGRESS.—The Sec-  
24 retary shall submit to the Committees on Appropria-  
25 tions and Energy and Natural Resources of the Sen-

1       ate and the Committees on Appropriations and Nat-  
2       ural Resources of the House of Representatives the  
3       list developed under paragraph (1).

4               “(3) UPDATES.—Subject to the notice require-  
5       ments under paragraph (2), the Secretary may add  
6       any signature project or program to the list devel-  
7       oped under paragraph (1).

8       “(e) DONATIONS AND MATCHING FEDERAL  
9       FUNDS.—

10              “(1) QUALIFIED DONATIONS.—The Secretary  
11       may transfer any qualified donations to the Chal-  
12       lenge Fund.

13              “(2) MATCHING AMOUNT.—There is authorized  
14       to be appropriated to the Challenge Fund for each  
15       fiscal year through fiscal year 2020 an amount equal  
16       to the amount of qualified donations received for the  
17       fiscal year.

18              “(3) SOLICITATION.—Nothing in this section  
19       expands any authority of the Secretary, the Service,  
20       or any employee of the Service to receive or solicit  
21       donations.

22              “(f) REPORT TO CONGRESS.—The Secretary shall  
23       provide with the submission of the budget of the President  
24       to Congress for each fiscal year a report on the status  
25       and funding of the signature projects and programs.”.

1 projects and programs in furtherance of the mission  
2 of the Service, as identified by the Secretary.

3 “(2) MANAGEMENT.—The National Park Foun-  
4 dation shall manage the Endowment in a manner  
5 that ensures that annual expenditures as a percent-  
6 age of the principal are consistent with Internal Rev-  
7 enue Service guidelines for endowments maintained  
8 for charitable purposes.

9 “(d) INVESTMENTS.—The National Park Foundation  
10 shall—

11 “(1) maintain the Endowment in an interest-  
12 bearing account; and

13 “(2) invest Endowment proceeds with the pur-  
14 pose of supporting and enriching the System in per-  
15 petuity.

16 “(e) REPORT.—Each year, the National Park Foun-  
17 dation shall make publicly available information on the  
18 amounts deposited into, and expended from, the Endow-  
19 ment.”.

20 (2) CLERICAL AMENDMENT.—The table of sec-  
21 tions affected for title 54, United States Code, is  
22 amended by inserting after the item relating to sec-  
23 tion 101120 the following:

“§101121. Second Century Endowment for the National Park System.”.

24 (c) NATIONAL PARK SERVICE INTELLECTUAL PROP-  
25 erty Protection.—

1           (1) IN GENERAL.—Chapter 1049 of title 54,  
2           United States Code (as amended by subsection  
3           (a)(1)), is amended by adding at the end the fol-  
4           lowing:

5   **“§ 104910. Intellectual property**

6           “(a) DEFINITIONS.—In this section:

7           “(1) SERVICE EMBLEM.—

8                   “(A) IN GENERAL.—The term ‘Service em-  
9                   blem’ means any word, phrase, insignia, logo,  
10                  logotype, trademark, service mark, symbol, de-  
11                  sign, graphic, image, color, badge, uniform, or  
12                  any combination of emblems used to identify  
13                  the Service or a component of the System.

14                  “(B) INCLUSIONS.—The term ‘Service em-  
15                  blem’ includes—

16                          “(i) the Service name;

17                          “(ii) an official System unit name;

18                          “(iii) any other name used to identify  
19                          a Service component or program; and

20                          “(iv) the Arrowhead symbol.

21           “(2) SERVICE UNIFORM.—The term ‘Service  
22           uniform’ means any combination of apparel, acces-  
23           sories, or emblems, any distinctive clothing or other  
24           items of dress, or a representation of dress—

1                   “(A) that is worn during the performance  
2                   of official duties; and

3                   “(B) that identifies the wearer as a Service  
4                   employee.

5                   “(b) PROHIBITED ACTS.—No person shall, without  
6 the written permission of the Secretary—

7                   “(1) use any Service emblem or uniform, or any  
8                   word, term, name, symbol or device or any combina-  
9                   tion of emblems to suggest any colorable likeness of  
10                  the Service emblem or Service uniform in connection  
11                  with goods or services in commerce if the use is like-  
12                  ly to cause confusion, or to deceive the public into  
13                  believing that the emblem or uniform is from or con-  
14                  nected with the Service;

15                  “(2) use any Service emblem or Service uniform  
16                  or any word, term, name, symbol, device, or any  
17                  combination of emblems or uniforms to suggest any  
18                  likeness of the Service emblem or Service uniform in  
19                  connection with goods or services in commerce in a  
20                  manner reasonably calculated to convey the impres-  
21                  sion to the public that the goods or services are ap-  
22                  proved, endorsed, or authorized by the Service;

23                  “(3) use in commerce any word, term, name,  
24                  symbol, device or any combination of words, terms,  
25                  names, symbols, or devices to suggest any likeness of

1 the Service emblem or Service uniform in a manner  
 2 that is reasonably calculated to convey the impres-  
 3 sion that the wearer of the item of apparel is acting  
 4 pursuant to the legal authority of the Service; or

5 “(4) knowingly make any false statement for  
 6 the purpose of obtaining permission to use any Serv-  
 7 ice emblem or Service uniform.”.

8 (2) CLERICAL AMENDMENT.—The table of sec-  
 9 tions affected for title 54, United States Code, is  
 10 amended by inserting after the item relating to sec-  
 11 tion 104908 (as added by subsection (a)(2)) the fol-  
 12 lowing:

“§104910. Intellectual property.”.

13 (d) NATIONAL PARK SERVICE EDUCATION AND IN-  
 14 TERPRETATION.—

15 (1) IN GENERAL.—Division A of subtitle I of  
 16 title 54, United States Code, is amended by insert-  
 17 ing after chapter 1007 the following:

18 **“CHAPTER 1008—EDUCATION AND**  
 19 **INTERPRETATION**

“CHAPTER 1008—EDUCATION AND INTERPRETATION

“Sec.

“100801. Definitions.

“100802. Interpretation and education authority.

“100803. Interpretation and education evaluation and quality improvement.

“100804. Improved utilization of partners and volunteers in interpretation and  
 education.

20 **“§ 100801. Definitions**

21 “In this chapter:

1           “(1) EDUCATION.—The term ‘education’ means  
2           enhancing public awareness, understanding, and ap-  
3           preciation of the resources of the System through  
4           learner-centered, place-based materials, programs,  
5           and activities that achieve specific learning objectives  
6           as identified in a curriculum.

7           “(2) INTERPRETATION.—The term ‘interpreta-  
8           tion’ means—

9                   “(A) providing opportunities for people to  
10                  form intellectual and emotional connections to  
11                  gain awareness, appreciation, and under-  
12                  standing of the resources of the System; and

13                   “(B) the professional career field of Serv-  
14                  ice employees, volunteers, and partners who in-  
15                  terpret the resources of the System.

16           “(3) RELATED AREA.—The term ‘related area’  
17           means—

18                   “(A) a component of the National Trails  
19                  System;

20                   “(B) a National Heritage Area; and

21                   “(C) an affiliated area administered in  
22                  connection with the System.

23   **“§ 100802. Interpretation and education authority**

24           “The Secretary shall ensure that management of Sys-  
25   tem units and related areas is enhanced by the availability

1 and utilization of a broad program of the highest quality  
2 interpretation and education.

3 **“§ 100803. Interpretation and education evaluation**  
4 **and quality improvement**

5 “The Secretary may undertake a program of regular  
6 evaluation of interpretation and education programs to en-  
7 sure that the programs—

8 “(1) adjust to the ways in which people learn  
9 and engage with the natural world and shared herit-  
10 age as embodied in the System;

11 “(2) reflect different cultural backgrounds,  
12 ages, education, gender, abilities, ethnicity, and  
13 needs;

14 “(3) demonstrate innovative approaches to  
15 management and appropriately incorporate emerging  
16 learning and communications technology; and

17 “(4) reflect current scientific and academic re-  
18 search, content, methods, and audience analysis.

19 **“§ 100804. Improved utilization of partners and vol-**  
20 **unteers in interpretation and education**

21 “The Secretary may—

22 “(1) coordinate with System unit partners and  
23 volunteers in the delivery of quality programs and  
24 services to supplement the programs and services

1 provided by the Service as part of a Long-Range In-  
 2 terpretive Plan for a System unit;

3 “(2) support interpretive partners by providing  
 4 opportunities to participate in interpretive training;  
 5 and

6 “(3) collaborate with other Federal and non-  
 7 Federal public or private agencies, organizations, or  
 8 institutions for the purposes of developing, pro-  
 9 moting, and making available educational opportuni-  
 10 ties related to resources of the System and pro-  
 11 grams.”.

12 (2) CLERICAL AMENDMENT.—The table of  
 13 chapters for division A of subtitle I of title 54,  
 14 United States Code, is amended by inserting after  
 15 the item relating to chapter 1007 the following:

“1008. Education and Interpretation .....100801”.

16 (e) PUBLIC LAND CORPS AMENDMENTS.—

17 (1) DEFINITIONS.—Section 203(10)(A) of the  
 18 Public Lands Corps Act of 1993 (16 U.S.C.  
 19 1722(10)(A)) is amended by striking “25” and in-  
 20 sserting “30”.

21 (2) PARTICIPANTS.—Section 204(b) of the Pub-  
 22 lic Lands Corps Act of 1993 (16 U.S.C. 1723(b)) is  
 23 amended in the first sentence by striking “25” and  
 24 inserting “30”.

1           (3) HIRING.—Section 207(c)(2) of the Public  
2       Lands Corps Act of 1993 (16 U.S.C., 1726(c)(2)) is  
3       amended by striking “120 days” and inserting “2  
4       years”.

5       (f) NATIONAL PARK FOUNDATION.—Subchapter II  
6       of chapter 1011 of title 54, United States Code, is amend-  
7       ed—

8           (1) in section 101112—

9                (A) by striking subsection (a) and insert-  
10           ing the following:

11       “(a) MEMBERSHIP.—The National Park Foundation  
12       shall consist of a Board having as members at least 6 pri-  
13       vate citizens of the United States appointed by the Sec-  
14       retary, with the Secretary and the Director serving as ex  
15       officio members of the Board.”; and

16            (B) by striking subsection (c) and insert-  
17           ing the following:

18       “(c) CHAIRMAN.—

19            (1) SELECTION.—The Board shall select a  
20       Chairman of the Board from among the members of  
21       the Board.

22            (2) TERM.—The Chairman of the Board shall  
23       serve for a 2-year term.”; and

24            (2) in section 101113(a)—

1                   (A) by redesignating paragraph (2) as  
2                   paragraph (3); and

3                   (B) by inserting after paragraph (1) the  
4                   following:

5                   “(2) COORDINATION WITH SERVICE.—Activities  
6                   of the National Park Foundation under paragraph  
7                   (1) shall be undertaken after consultation with the  
8                   Secretary to ensure the activities are consistent with  
9                   the programs and policies of the Service.”.

AMENDMENT NO.

Calendar No.

Purpose: To provide additional priorities for an energy workforce pilot grant program.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENTS intended to be proposed by Mr. VITTER (for himself, Mr. KAINE, and Ms. BALDWIN) to the amendment (No. 2953) proposed by Ms. MURKOWSKI

Viz:

- 1 In section 3602(d)(9), strike “or” at the end.
- 2 In section 3602(d)(10), strike the period and insert
- 3 a semicolon.
- 4 In section 3602(d), insert at the end the following:
- 5 (11) establish a community college or 2-year
- 6 technical college-based “Center of Excellence” for an
- 7 energy and maritime workforce technical training
- 8 program; or

1           (12) are located in close proximity to marine or  
2           port facilities in the Gulf of Mexico, Atlantic Ocean,  
3           Pacific Ocean, Arctic Ocean, Bering Sea, Gulf of  
4           Alaska, or Great Lakes.

AMENDMENT NO.

Calendar No.

Purpose: To express the sense of the Senate on accelerating energy innovation.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by  
to the amendment (No. 2953)  
proposed by Ms. MURKOWSKI

Viz:

1 At the end of subtitle C of title IV, add the following:

2 **SEC. 42 . SENSE OF THE SENATE ON ACCELERATING EN-**  
3 **ERGY INNOVATION.**

4 It is the sense of the Senate that—

5 (1) although important progress has been made  
6 in cost reduction and deployment of clean energy  
7 technologies, accelerating clean energy innovation  
8 will help meet critical competitiveness, energy secu-  
9 rity, and environmental goals;

10 (2) accelerating the pace of clean energy inno-  
11 vation in the United States calls for—

1 (A) supporting existing research and devel-  
2 opment programs at the Department and the  
3 world-class National Laboratories (as defined in  
4 section 2 of the Energy Policy Act of 2005 (42  
5 U.S.C. 15801));

6 (B) exploring and developing new path-  
7 ways for innovators, investors, and decision-  
8 makers to leverage the resources of the Depart-  
9 ment for addressing the challenges and com-  
10 parative strengths of geographic regions; and

11 (C) recognizing the financial constraints of  
12 the Department, regularly reviewing clean en-  
13 ergy programs to ensure that taxpayer invest-  
14 ments are maximized;

15 (3) the energy supply, demand, policies, mar-  
16 kets, and resource options of the United States vary  
17 by geographic region;

18 (4) a regional approach to innovation can  
19 bridge the gaps between local talent, institutions,  
20 and industries to identify opportunities and convert  
21 United States investment into domestic companies;  
22 and

23 (5) Congress, the Secretary, and energy indus-  
24 try participants should advance efforts that promote  
25 international, domestic, and regional cooperation on

1 the research and development of energy innovations  
2 that—

3 (A) provide clean, affordable, and reliable  
4 energy for everyone;

5 (B) promote economic growth;

6 (C) are critical for energy security; and

7 (D) are sustainable without government  
8 support.

AMENDMENT NO.

Calendar No.

Purpose: To reduce barriers to combined heat and power systems and waste heat to power systems.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.**

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by  
to the amendment (No. 2953)  
proposed by Ms. MURKOWSKI

Viz:

1 At the end of subtitle D of title II, add the following:

2 **SEC. 23 . MODEL GUIDANCE FOR COMBINED HEAT AND**  
3 **POWER SYSTEMS AND WASTE HEAT TO**  
4 **POWER SYSTEMS.**

5 (a) DEFINITIONS.—In this section:

6 (1) ADDITIONAL SERVICES.—The term “addi-  
7 tional services” means the provision of supple-  
8 mentary power, backup or standby power, mainte-  
9 nance power, or interruptible power to an electric  
10 consumer by an electric utility.

11 (2) WASTE HEAT TO POWER SYSTEM.—

1 (A) IN GENERAL.—The term “waste heat  
2 to power system” means a system that gen-  
3 erates electricity through the recovery of waste  
4 energy.

5 (B) EXCLUSION.—The term “waste heat  
6 to power system” does not include a system  
7 that generates electricity through the recovery  
8 of a heat resource from a process the primary  
9 purpose of which is the generation of electricity  
10 using a fossil fuel.

11 (3) OTHER TERMS.—

12 (A) PURPA.—The terms “electric con-  
13 sumer”, “electric utility”, “interconnection  
14 service”, “nonregulated electric utility”, and  
15 “State regulatory authority” have the meanings  
16 given those terms in the Public Utility Regu-  
17 latory Policies Act of 1978 (16 U.S.C. 2601 et  
18 seq.), within the meaning of title I of that Act  
19 (16 U.S.C. 2611 et seq.).

20 (B) EPCA.—The terms “combined heat  
21 and power system” and “waste energy” have  
22 the meanings given those terms in section 371  
23 of the Energy Policy and Conservation Act (42  
24 U.S.C. 6341).

25 (b) REVIEW.—

1           (1) IN GENERAL.—Not later than 180 days  
2 after the date of enactment of this Act, the Sec-  
3 retary, in consultation with the Federal Energy Reg-  
4 ulatory Commission and other appropriate entities,  
5 shall review existing rules and procedures relating to  
6 interconnection service and additional services  
7 throughout the United States for electric generation  
8 with nameplate capacity up to 20 megawatts to  
9 identify barriers to the deployment of combined heat  
10 and power systems and waste heat to power systems.

11           (2) INCLUSION.—The review under this sub-  
12 section shall include a review of existing rules and  
13 procedures relating to—

14                   (A) determining and assigning costs of  
15 interconnection service and additional services;  
16 and

17                   (B) ensuring adequate cost recovery by an  
18 electric utility for interconnection service and  
19 additional services.

20           (c) MODEL GUIDANCE.—

21           (1) IN GENERAL.—Not later than 18 months  
22 after the date of enactment of this Act, the Sec-  
23 retary, in consultation with the Federal Energy Reg-  
24 ulatory Commission and other appropriate entities,  
25 shall issue model guidance for interconnection serv-

1 ice and additional services for use by State regu-  
2 latory authorities and nonregulated electric utilities  
3 to reduce the barriers identified under subsection  
4 (b)(1).

5 (2) CURRENT BEST PRACTICES.—The model  
6 guidance issued under this subsection shall reflect,  
7 to the maximum extent practicable, current best  
8 practices to encourage the deployment of combined  
9 heat and power systems and waste heat to power  
10 systems while ensuring the safety and reliability of  
11 the interconnected units and the distribution and  
12 transmission networks to which the units connect,  
13 including—

14 (A) relevant current standards developed  
15 by the Institute of Electrical and Electronic En-  
16 gineers; and

17 (B) model codes and rules adopted by—

18 (i) States; or

19 (ii) associations of State regulatory  
20 agencies.

21 (3) FACTORS FOR CONSIDERATION.—In estab-  
22 lishing the model guidance under this subsection, the  
23 Secretary shall take into consideration—

24 (A) the appropriateness of using standards  
25 or procedures for interconnection service that

1 vary based on unit size, fuel type, or other rel-  
2 evant characteristics;

3 (B) the appropriateness of establishing  
4 fast-track procedures for interconnection serv-  
5 ice;

6 (C) the value of consistency with Federal  
7 interconnection rules established by the Federal  
8 Energy Regulatory Commission as of the date  
9 of enactment of this Act;

10 (D) the best practices used to model out-  
11 age assumptions and contingencies to determine  
12 fees or rates for additional services;

13 (E) the appropriate duration, magnitude,  
14 or usage of demand charge ratchets;

15 (F) potential alternative arrangements  
16 with respect to the procurement of additional  
17 services, including—

18 (i) contracts tailored to individual  
19 electric consumers for additional services;

20 (ii) procurement of additional services  
21 by an electric utility from a competitive  
22 market; and

23 (iii) waivers of fees or rates for addi-  
24 tional services for small electric consumers;  
25 and

## 6

1 (G) outcomes such as increased electric re-  
2 liability, fuel diversification, enhanced power  
3 quality, and reduced electric losses that may re-  
4 sult from increased use of combined heat and  
5 power systems and waste heat to power sys-  
6 tems.

AMENDMENT NO. \_\_\_\_\_ Calendar No. \_\_\_\_\_

Purpose: To authorize, direct, facilitate, and expedite the transfer of administrative jurisdiction of certain Federal land.

IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.

**S. 2012**

To provide for the modernization of the energy policy of the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT intended to be proposed by Mr. WARNER (for himself and Mr. KAINE) to the amendment (No. 2953) proposed by Ms. MURKOWSKI

Viz:

1 At the end, add the following:

2 **TITLE VI—MISCELLANEOUS**

3 **SEC. 6001. INTERAGENCY TRANSFER OF LAND ALONG**

4 **GEORGE WASHINGTON MEMORIAL PARKWAY.**

5 (a) DEFINITIONS.—In this section:

6 (1) MAP.—The term “Map” means the map en-

7 titled “George Washington Memorial Parkway—

8 Claude Moore Farm Proposed Boundary Adjust-

9 ment”, numbered 850\_\_130815, and dated Decem-

10 ber ~~2015~~.

*February 2016*

1           (2) RESEARCH CENTER.—The term “Research  
2 Center” means the Turner-Fairbank Highway Re-  
3 search Center of the Federal Highway Administra-  
4 tion.

5           (3) SECRETARY.—The term “Secretary” means  
6 the Secretary of the Interior.

7 (b) ADMINISTRATIVE JURISDICTION TRANSFER.—

8           (1) TRANSFER OF JURISDICTION.—

9           (A) GEORGE WASHINGTON MEMORIAL  
10 PARKWAY LAND.—Administrative jurisdiction  
11 over the approximately ~~0.139~~<sup>0.342</sup> acres of Federal  
12 land under the jurisdiction of the Secretary  
13 within the boundary of the George Washington  
14 Memorial Parkway, as generally depicted as  
15 “B” on the Map, is transferred from the Sec-  
16 retary to the Secretary of Transportation.

17           (B) RESEARCH CENTER LAND.—Adminis-  
18 tration jurisdiction over the approximately  
19 0.479 acres of Federal land within the bound-  
20 ary of the Research Center land under the ju-  
21 risdiction of the Secretary of Transportation  
22 adjacent to the boundary of the George Wash-  
23 ington Memorial Parkway, as generally depicted  
24 as “A” on the Map, is transferred from the  
25 Secretary of Transportation to the Secretary.

1           (2) USE RESTRICTION.—The Secretary shall re-  
2           strict the use of <sup>0.139</sup>~~0.342~~ acres of Federal land within  
3           the boundary of the George Washington Memorial  
4           Parkway immediately adjacent to part of the ~~north~~  
5           perimeter fence of the Research Center, generally  
6           depicted as “C” on the Map, by prohibiting the stor-  
7           age, construction, or installation of any item that  
8           may interfere with the access of the Research Center  
9           to the restricted land for security and maintenance  
10          purposes.

11          (3) REIMBURSEMENT OR CONSIDERATION.—  
12          The transfers of administrative jurisdiction under  
13          this subsection shall not be subject to reimburse-  
14          ment or consideration.

15          (4) COMPLIANCE WITH AGREEMENT.—

16                (A) AGREEMENT.—The National Park  
17                Service and the Federal Highway Administra-  
18                tion shall comply with all terms and conditions  
19                of the agreement entered into by the parties on  
20                September 11, 2002, regarding the transfer of  
21                administrative jurisdiction, management, and  
22                maintenance of the land described in the agree-  
23                ment.

24                (B) ACCESS TO RESTRICTED LAND.—

1 (i) IN GENERAL.—Subject to the  
2 terms of the agreement described in sub-  
3 paragraph (A), the Secretary shall allow  
4 the Research Center—

5 (I) to access the Federal land de-  
6 scribed in paragraph (1)(B) for pur-  
7 poses of transportation to and from  
8 the Research Center; and

9 (II) to access the Federal land  
10 described in paragraphs (1)(B) and  
11 (2) for purposes of maintenance in ac-  
12 cordance with National Park Service  
13 standards, including grass mowing,  
14 weed control, tree maintenance, fence  
15 maintenance, and maintenance of the  
16 visual appearance of the Federal land.

17 (c) MANAGEMENT OF TRANSFERRED LAND.—

18 (1) INTERIOR LAND.—The Federal land trans-  
19 ferred to the Secretary under subsection (b)(1)(B)  
20 shall be—

21 (A) included in the boundary of the George  
22 Washington Memorial Parkway; and

23 (B) administered by the Secretary as part  
24 of the George Washington Memorial Parkway,

1 subject to applicable laws (including regula-  
2 tions).

3 (2) TRANSPORTATION LAND.—The Federal  
4 land transferred to the Secretary of Transportation  
5 under subsection (b)(1)(A) shall be—

6 (A) included in the boundary of the Re-  
7 search Center land; and

8 (B) removed from the boundary of the  
9 George Washington Memorial Parkway.

10 (3) RESTRICTED-USE LAND.—The Federal land  
11 that the Secretary has designated for restricted use  
12 under subsection (b)(2) shall be maintained by the  
13 Research Center.

14 (d) MAP ON FILE.—The Map shall be available for  
15 public inspection in the appropriate offices of the National  
16 Park Service.

---

Hi Jeremy- We are having a hearing next week on the attached bill. The majority told me they shared it with you already and that DOI will testify at the hearing. Can you help me set up a call, either tomorrow or Friday, with the appropriate people to discuss the bill and answer a few questions?

Thanks,

Brandon Bragato  
Professional Staff, Subcommittee on Federal Lands  
House Committee on Natural Resources

114<sup>TH</sup> CONGRESS  
2<sup>D</sup> SESSION

# H. R.

To improve coordination and cooperation between the Forest Service, the Bureau of Land Management, local communities, and Indian tribes regarding the management and use of National Forest System lands and public lands, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

M . . . . . introduced the following bill; which was referred to the  
Committee on

---

# A BILL

To improve coordination and cooperation between the Forest Service, the Bureau of Land Management, local communities, and Indian tribes regarding the management and use of National Forest System lands and public lands, and for other purposes.

1       *Be it enacted by the Senate and House of Representa-*  
2       *tives of the United States of America in Congress assembled,*

3       **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4       (a) SHORT TITLE.—This Act may be cited as the  
5       “Local Government Land Management Consultation Act  
6       of 2016”.

1 (b) TABLE OF CONTENTS.—The table of contents for  
2 this Act is as follows:

- Sec. 1. Short title; table of contents.
- Sec. 2. Definitions.

TITLE I—IMPROVED COOPERATION AND COORDINATION WITH LOCAL COMMUNITIES

- Sec. 101. Federal land management agency participation in business meetings of governing body of greatly affected local communities.
- Sec. 102. Improved Federal land management agency coordination with governing body of affected local communities.
- Sec. 103. Expanded advisory role for resource advisory committees.
- Sec. 104. Study and local consultation requirements as condition of Federal land acquisition.
- Sec. 105. Improved cooperation regarding shared Forest Service roads.
- Sec. 106. Federal land management agency day-use recreation facilities receiving significant use by residents of local communities.
- Sec. 107. Local participation in recreation fee setting under Federal Lands Recreation Enhancement Act.

TITLE II—AGENCY MANAGEMENT IMPROVEMENTS

- Sec. 201. Improved certainty regarding duration of Federal land management agency line officer assignments.
- Sec. 202. Schedules for implementation of community wildfire protection plans.
- Sec. 203. Clarification of Secretary of the Interior authority to make minor boundary adjustments to National Park System units.

TITLE III—TRIBAL FORESTRY

- Sec. 301. Protection of tribal forest assets through use of stewardship end result contracting and other authorities.
- Sec. 302. Management of Indian forest land authorized to include related National Forest System lands and public lands.
- Sec. 303. Tribal forest management demonstration project.

TITLE IV—LAND AND WATER CONSERVATION FUND

- Sec. 401. Requirements related to allocation of Fund amounts for Federal purposes.

3 **SEC. 2. DEFINITIONS.**

4 In this Act:

- 5 (1) AFFECTED LOCAL COMMUNITY.—The term
- 6 “affected local community” means a political sub-
- 7 division of a State whose boundaries contain—
- 8 (A) Federal land; or

1 (B) in the case of section 5, non-Federal  
2 lands that are proposed to be acquired by the  
3 United States for management as Federal land.

4 (2) COMMUNITY WILDFIRE PROTECTION  
5 PLAN.—The term “community wildfire protection  
6 plan” has the meaning given that term in section  
7 101(3) of the Healthy Forests Restoration Act of  
8 2003 (16 U.S.C. 6511(3)).

9 (3) FEDERAL LAND.—The term “Federal land”  
10 means—

11 (A) land of the National Forest System (as  
12 defined in section 11(a) of the Forest and  
13 Rangeland Renewable Resources Planning Act  
14 of 1974 (16 U.S.C. 1609(a))) administered by  
15 the Secretary of Agriculture, acting through the  
16 Chief of the Forest Service; and

17 (B) public lands (as defined in section 103  
18 of the Federal Land Policy and Management  
19 Act of 1976 (43 U.S.C. 1702)), the surface of  
20 which is administered by the Secretary of the  
21 Interior, acting through the Director of the Bu-  
22 reau of Land Management.

23 (4) FEDERAL LAND MANAGEMENT AGENCY.—  
24 The term “Federal land management agency”

1 means the Forest Service or the Bureau of Land  
2 Management Agency.

3 (5) FOREST MANAGEMENT ACTIVITY.—The  
4 term “forest management activity” means a project  
5 or activity carried out by the Secretary on Federal  
6 land in concert with the resource management plan  
7 covering the Federal land.

8 (6) GREATLY AFFECTED LOCAL COMMUNITY.—  
9 The term “greatly affected local community” means  
10 a political subdivision of a State whose boundaries  
11 contain 50,000 or more acres of Federal land.

12 (7) INDIAN TRIBE.—The term “Indian tribe”  
13 has the meaning given the term in section 4 of the  
14 Indian Self-Determination and Education Assistance  
15 Act (25 U.S.C. 450b).

16 (8) POLITICAL SUBDIVISION.—The term “polit-  
17 ical subdivision” means any county, municipality,  
18 city, town, or township created pursuant to State  
19 law.

20 (9) RESOURCE ADVISORY COMMITTEE.—The  
21 term “resource advisory committee” has the mean-  
22 ing given that term in section 201(3) of the Secure  
23 Rural Schools and Community Self-Determination  
24 Act of 2000 (16 U.S.C. 7121(3)).

1           (10) RESOURCE MANAGEMENT PLAN.—The  
2 term “resource management plan” means—

3           (A) a land and resource management plan  
4 prepared for a unit of the National Forest Sys-  
5 tem under section 6 of the Forest and Range-  
6 land Renewable Resources Planning Act of  
7 1974 (16 U.S.C. 1604); or

8           (B) a land use plan prepared for a unit of  
9 the public lands under section 202 of the Fed-  
10 eral Land Policy and Management Act of 1976  
11 (43 U.S.C. 1712).

12          (11) SECRETARY.—The term “Secretary”  
13 means—

14           (A) the Secretary of Agriculture, acting  
15 through the Chief of the Forest Service, with  
16 respect to land of the National Forest System  
17 described in paragraph (3)(A); and

18           (B) the Secretary of the Interior, acting  
19 through the Director of the Bureau of Land  
20 Management, with respect to public lands de-  
21 scribed in paragraph (3)(B).

22          (12) STATE.—The term “State” means each of  
23 the several States and the Commonwealth of Puerto  
24 Rico.

1 **TITLE I—IMPROVED COOPERA-**  
2 **TION AND COORDINATION**  
3 **WITH LOCAL COMMUNITIES**

4 **SEC. 101. FEDERAL LAND MANAGEMENT AGENCY PARTICI-**  
5 **PATION IN BUSINESS MEETINGS OF GOV-**  
6 **ERNING BODY OF GREATLY AFFECTED**  
7 **LOCAL COMMUNITIES.**

8 (a) ATTENDANCE AT BUSINESS MEETINGS.—At the  
9 request of the governing body of a greatly affected local  
10 community, a Federal land management agency shall seek  
11 to enter into an agreement with the governing body of the  
12 greatly affected local community pursuant to which one  
13 or more employees of the Federal land management agen-  
14 cy will attend designated business meetings of the gov-  
15 erning body, as an agenda item of the business meeting,  
16 for the purposes of—

17 (1) reporting on ongoing and proposed Federal  
18 land management agency activities within or affect-  
19 ing the greatly affected local community; and

20 (2) responding to concerns raised by members  
21 of the governing body and members of the public at-  
22 tending the meeting.

23 (b) EXCEPTION.—Subsection (a) does not require a  
24 Federal land management agency to enter into an agree-  
25 ment under such subsection with the governing body of

1 a greatly affected local community if less than 25 percent  
2 of the Federal land within the boundaries of the greatly  
3 affected local community is under the jurisdiction of that  
4 Federal land management agency. However, the Federal  
5 land management agency may still elect to enter into such  
6 an agreement under such circumstances.

7 **SEC. 102. IMPROVED FEDERAL LAND MANAGEMENT AGEN-**  
8 **CY COORDINATION WITH GOVERNING BODY**  
9 **OF AFFECTED LOCAL COMMUNITIES.**

10 (a) COORDINATION REQUIRED.—Subject to the un-  
11 derstanding that a Federal land management agency has  
12 supremacy regarding management decisions for Federal  
13 land, as written in statute, a Federal land management  
14 agency shall coordinate with the governing body of an af-  
15 fected local community regarding any forest management  
16 activity or other major action, including travel manage-  
17 ment, of the Federal land management agency that would  
18 have a significant impact on the affected local community.

19 (c) OFFER OF COOPERATING AGENCY STATUS.—As  
20 part of the environmental review process for any forest  
21 management activity or other major action, including trav-  
22 el management with significant impact on local commu-  
23 nities, of a Federal land management agency, the Sec-  
24 retary shall offer to designate the governing body of each  
25 affected local community that may have an interest in the

1 activity or action as a “cooperating agency” under the reg-  
2 ulations contained in part 1500 of title 40, Code of Fed-  
3 eral Regulations.

4 **SEC. 103. EXPANDED ADVISORY ROLE FOR RESOURCE AD-**  
5 **VISORY COMMITTEES.**

6 (a) PRIMARY ADVISORY BODY REGARDING FOREST  
7 MANAGEMENT ACTIVITIES.—Section 205(b) of the Secure  
8 Rural Schools and Community Self-Determination Act of  
9 2000 (16 U.S.C. 7125(b)) is amended by striking para-  
10 graph (2) and inserting the following new paragraph:

11 “(2) to serve as the primary advisory body for  
12 the Secretary concerned regarding forest manage-  
13 ment activities on Federal land.”

14 (b) TEMPORARY REDUCTION IN COMPOSITION OF  
15 COMMITTEES.—Section 205(d) of the Secure Rural  
16 Schools and Community Self-Determination Act of 2000  
17 (16 U.S.C. 7125(d)) is amended—

18 (1) in paragraph (1), by striking “Each” and  
19 inserting “Except during the period specified in  
20 paragraph (6), each”; and

21 (2) by adding at the end the following new  
22 paragraph:

23 “(6) TEMPORARY REDUCTION IN MINIMUM  
24 NUMBER OF MEMBERS.—

1           “(A) TEMPORARY REDUCTION.—During  
2 the period beginning on the date of the enact-  
3 ment of this paragraph and ending on Sep-  
4 tember 30, 2020, a resource advisory committee  
5 established under this section may be comprised  
6 of nine or more members, of which—

7                   “(i) at least three shall be representa-  
8 tive of interests described in subparagraph  
9 (A) of paragraph (2);

10                   “(ii) at least three shall be representa-  
11 tive of interests described in subparagraph  
12 (B) of paragraph (2); and

13                   “(iii) at least three shall be represent-  
14 ative of interests described in subpara-  
15 graph (C) of paragraph (2).

16           “(B) ADDITIONAL REQUIREMENTS.—In  
17 appointing members of a resource advisory com-  
18 mittee from the three categories described in  
19 paragraph (2), as provided in subparagraph  
20 (A), the Secretary concerned shall ensure bal-  
21 anced and broad representation in each cat-  
22 egory. In the case of a vacancy on a resource  
23 advisory committee, the vacancy shall be filled  
24 within 90 days after the date on which the va-  
25 cancy occurred. Appointments to a new re-

1 source advisory committee shall be made within  
2 90 days after the date on which the decision to  
3 form the new resource advisory committee was  
4 made.

5 “(C) CHARTER.—A charter for a resource  
6 advisory committee with 15 members that was  
7 filed on or before the date of the enactment of  
8 this paragraph shall be considered to be filed  
9 for a resource advisory committee described in  
10 this paragraph. The charter of a resource advi-  
11 sory committee shall be reapproved before the  
12 expiration of the existing charter of the re-  
13 source advisory committee. In the case of a new  
14 resource advisory committee, the charter of the  
15 resource advisory committee shall be approved  
16 within 90 days after the date on which the deci-  
17 sion to form the new resource advisory com-  
18 mittee was made.”.

19 (c) CONFORMING CHANGE TO PROJECT APPROVAL  
20 REQUIREMENTS.—Section 205(e)(3) of the Secure Rural  
21 Schools and Community Self-Determination Act of 2000  
22 (16 U.S.C. 7125(e)(3)) is amended by adding at the end  
23 the following new sentence: “In the case of a resource ad-  
24 visory committee consisting of fewer than 15 members, as  
25 authorized by subsection (d)(6), a project may be proposed

1 to the Secretary concerned upon approval by a majority  
2 of the members of the committee, including at least one  
3 member from each of the three categories described in  
4 subsection (d)(2).”.

5 (d) EXPANDING LOCAL PARTICIPATION ON COMMIT-  
6 TEES.—Section 205(d) of the Secure Rural Schools and  
7 Community Self-Determination Act of 2000 (16 U.S.C.  
8 7125(d)) is amended—

9 (1) in paragraph (3), by inserting before the pe-  
10 riod at the end the following: “, consistent with the  
11 requirements of paragraph (4)”;

12 (2) by striking paragraph (4) and inserting the  
13 following new paragraph:

14 “(4) GEOGRAPHIC DISTRIBUTION.—The mem-  
15 bers of a resource advisory committee shall reside  
16 within the county or counties in which the committee  
17 has jurisdiction or an adjacent county.”.

18 (e) BI-ANNUAL PRESENTATIONS.—Section 205 of the  
19 Secure Rural Schools and Community Self-Determination  
20 Act of 2000 (16 U.S.C. 7125) is amended by adding at  
21 the end the following new subsection:

22 “(g) BI-ANNUAL PRESENTATIONS.—The Secretary  
23 concerned shall ensure that each resource advisory com-  
24 mittee receives a presentation, at least twice a year, by

1 local line officers of the Federal land management agency  
2 concerned for the purposes of—

3 “(1) explaining forest management priorities  
4 for Federal land within the jurisdiction of the com-  
5 mittee; and

6 “(2) soliciting the advice and recommendations  
7 of the committee.”.

8 **SEC. 104. STUDY AND LOCAL CONSULTATION REQUIRE-**  
9 **MENTS AS CONDITION OF FEDERAL LAND AC-**  
10 **QUISITION.**

11 (a) **STUDY REQUIRED.**—Prior to the acquisition of  
12 non-Federal land by the Secretary for administration as  
13 Federal land, the Secretary shall conduct a study to evalu-  
14 ate—

15 (1) the potential impacts of Federal acquisition  
16 of the non-Federal land on lost property tax reve-  
17 nues;

18 (2) other economic impacts of the land acquisi-  
19 tion on affected local communities; and

20 (3) such other such factors as are agreed to in  
21 consultation with the governing bodies of such af-  
22 fected local communities.

23 (b) **CONSULTATION WITH AFFECTED LOCAL COM-**  
24 **MUNITIES REQUIRED.**—As a condition on the acquisition

1 of non-Federal land by the Secretary for administration  
2 as Federal land, the Secretary shall—

3 (1) consult with the governing body of each af-  
4 fected local community whose boundaries contain the  
5 non-Federal land for the purpose of soliciting the  
6 input of the affected local community in the prepa-  
7 ration of the report required by subsection (a); and

8 (2) request a written response from the gov-  
9 erning body of the affected local community indi-  
10 cating the position of the governing body on the po-  
11 tential land acquisition, which shall accompany the  
12 project submittal list provided to Congress.

13 (c) DISCRETION AND DEFERENCE.—The decision re-  
14 garding whether or not to proceed with a proposed acquisi-  
15 tion of non-Federal land for administration as Federal  
16 land remains the responsibility of the Secretary, but the  
17 Secretary shall give considerable deference to the position  
18 of the governing body of each affected local community  
19 whose boundaries contain the non-Federal land when mak-  
20 ing the decision.

21 **SEC. 105. IMPROVED COOPERATION REGARDING SHARED**  
22 **FOREST SERVICE ROADS.**

23 In the case of any Forest Service road that extends  
24 from or through, or is directly connected to, a road under  
25 the jurisdiction of an affected local community, the Sec-

1 retary shall obtain the concurrence of the governing body  
2 of the affected local community regarding any manage-  
3 ment direction for the Forest Service road.

4 **SEC. 106. FEDERAL LAND MANAGEMENT AGENCY DAY-USE**  
5 **RECREATION FACILITIES RECEIVING SIG-**  
6 **NIFICANT USE BY RESIDENTS OF LOCAL**  
7 **COMMUNITIES.**

8 In the case of a day-use recreation facility on Federal  
9 land that is managed by the Secretary and receives signifi-  
10 cant use by local residents, as identified by the Secretary  
11 and the governing body of the affected local community,  
12 the Secretary may enter into a memorandum of under-  
13 standing with the governing body of the affected local  
14 community to jointly determine and assign management  
15 responsibilities for the recreation facility.

16 **SEC. 107. LOCAL PARTICIPATION IN RECREATION FEE SET-**  
17 **TING UNDER FEDERAL LANDS RECREATION**  
18 **ENHANCEMENT ACT.**

19 Section 803 of the Federal Lands Recreation En-  
20 hancement Act (16 U.S.C. 6802) is further amended by  
21 adding at the end the following new subsection:

22 “(i) SUBMISSION OF RECREATION FEE PROPOSALS  
23 TO LOCAL GOVERNMENTS.—

24 “(1) SUBMISSION TO LOCAL GOVERNMENTS  
25 AND REQUEST FOR COMMENTS.—Before establishing

1 or increasing a recreation fee, the Secretaries shall  
2 provide affected local governments with—

3 “(A) a written notice of the proposed  
4 recreation fee, including the amount of the fee  
5 or increase; and

6 “(B) a request for comments from the af-  
7 fected local government regarding the merits of  
8 the recreation fee or increase and the economic  
9 impact of the recreation fee or increase on the  
10 local community.

11 “(2) TIME FOR SUBMISSION OF COMMENTS.—  
12 The period provided for submission of local com-  
13 ments under paragraph (1)(B) to the Secretaries  
14 may run concurrently with the period for public no-  
15 tice required by section 804(b).

16 “(3) INCLUSION OF COMMENTS.—The Secre-  
17 taries shall submit to Congress all comments re-  
18 ceived from affected local governments in response  
19 to the notice provided under paragraph (1).

20 “(4) AFFECTED LOCAL GOVERNMENTS DE-  
21 FINED.—In this subsection, the term ‘affected local  
22 government’ means the governing body of a political  
23 subdivision of a State—

24 “(A) whose boundaries contain all or part  
25 of the Federal recreational lands and waters to

1 be subject to the new or increased recreation  
2 fee; or

3 “(B) that the Secretary determines may be  
4 economically impacted by the new or increased  
5 fee.”.

6 **TITLE II—AGENCY**  
7 **MANAGEMENT IMPROVEMENTS**

8 **SEC. 201. IMPROVED CERTAINTY REGARDING DURATION**  
9 **OF FEDERAL LAND MANAGEMENT AGENCY**  
10 **LINE OFFICER ASSIGNMENTS.**

11 (a) FOREST SERVICE.—Section 3 of the Act of Feb-  
12 ruary 1, 1905 (16 U.S.C. 554) is amended by adding at  
13 the end the following new sentence: “The duration of an  
14 assignment at a Forest Service duty station should be a  
15 minimum of three years, subject to such exceptions as the  
16 Secretary of Agriculture may prescribe.”.

17 (b) BUREAU OF LAND MANAGEMENT.—Section 301  
18 of the Federal Land Policy and Management Act of 1976  
19 (43 U.S.C. 1731) is amended by adding at the end the  
20 following new subsection:

21 “(e) The duration of an assignment at a District of-  
22 fice of the Bureau of Land Management should be a min-  
23 imum of three years, subject to such exceptions as the Sec-  
24 retary may prescribe.”.

1 **SEC. 202. SCHEDULES FOR IMPLEMENTATION OF COMMU-**  
2 **NITY WILDFIRE PROTECTION PLANS.**

3 Section 103(a) of the Healthy Forests Restoration  
4 Act of 2003 (16 U.S.C. 6513(a)) is amended by striking  
5 “develop an annual program of work for Federal land that  
6 gives priority to authorized hazardous fuel reduction  
7 projects that provide for the protection of at-risk commu-  
8 nities or watersheds or that implement community wildfire  
9 protection plans.” and inserting the following: “develop  
10 and revise as necessary—

11 “(1) a schedule for the implementation of com-  
12 munity wildfire protection plans; and

13 “(2) a program of work for Federal land that  
14 gives priority to authorized hazardous fuel reduction  
15 projects that provide for the protection of at-risk  
16 communities or watersheds and the implementation  
17 of community wildfire protection plans pursuant to  
18 the schedule developed under paragraph (1).”.

19 **SEC. 203. CLARIFICATION OF SECRETARY OF THE INTE-**  
20 **RIOR AUTHORITY TO MAKE MINOR BOUND-**  
21 **ARY ADJUSTMENTS TO NATIONAL PARK SYS-**  
22 **TEM UNITS.**

23 Section 100506(c)(5)(A) of title 54, United States  
24 Code, is amended by inserting before the period at the  
25 end the following: “, regardless of the method by which  
26 the acreage is proposed to be added to the System unit”.

1       **TITLE III—TRIBAL FORESTRY**

2       **SEC. 301. PROTECTION OF TRIBAL FOREST ASSETS**  
3                   **THROUGH USE OF STEWARDSHIP END RE-**  
4                   **SULT CONTRACTING AND OTHER AUTHORI-**  
5                   **TIES.**

6           (a) PROMPT CONSIDERATION OF TRIBAL RE-  
7 QUESTS.—Section 2(b) of the Tribal Forest Protection  
8 Act of 2004 (25 U.S.C. 3115a(b)) is amended—

9                   (1) in paragraph (1), by striking “Not later  
10 than 120 days after the date on which an Indian  
11 tribe submits to the Secretary” and inserting “In re-  
12 sponse to the submission by an Indian tribe of”; and

13                   (2) by adding at the end the following new  
14 paragraph:

15                   “(4) TIME PERIODS FOR CONSIDERATION.—

16                           “(A) INITIAL RESPONSE.—Not later than  
17 120 days after the date on which the Secretary  
18 receives a tribal request under paragraph (1),  
19 the Secretary shall provide an initial response  
20 to the Indian tribe regarding—

21                                   “(i) whether the request may meet the  
22 selection criteria described in subsection  
23 (c); and

24                                   “(ii) the likelihood of the Secretary  
25 entering into an agreement or contract

1 with the Indian tribe under paragraph (2)  
2 for activities described in paragraph (3).

3 “(B) NOTICE OF DENIAL.—Notice under  
4 subsection (d) of the denial of a tribal request  
5 under paragraph (1) shall be provided not later  
6 than 1 year after the date on which the Sec-  
7 retary received the request.

8 “(C) COMPLETION.—Not later than 2  
9 years after the date on which the Secretary re-  
10 ceives a tribal request under paragraph (1),  
11 other than a tribal request denied under sub-  
12 section (d), the Secretary shall—

13 “(i) complete all environmental re-  
14 views necessary in connection with the  
15 agreement or contract and proposed activi-  
16 ties under the agreement or contract; and

17 “(ii) enter into the agreement or con-  
18 tract with the Indian tribe under para-  
19 graph (2).”.

20 (b) CONFORMING AND TECHNICAL AMENDMENTS.—  
21 Section 2 of the Tribal Forest Protection Act of 2004 (25  
22 U.S.C. 3115a) is amended—

23 (1) in subsections (b)(1) and (f)(1), by striking  
24 “section 347 of the Department of the Interior and  
25 Related Agencies Appropriations Act, 1999 (16

1 U.S.C. 2104 note; Public Law 105–277) (as amend-  
2 ed by section 323 of the Department of the Interior  
3 and Related Agencies Appropriations Act, 2003 (117  
4 Stat. 275))” and inserting “section 604 of the  
5 Healthy Forests Restoration Act of 2003 (16 U.S.C.  
6 6591e)”;

7 (2) in subsection (d), by striking “subsection  
8 (b)(1), the Secretary may” and inserting “para-  
9 graphs (1) and (4)(B) of subsection (b), the Sec-  
10 retary shall”.

11 **SEC. 302. MANAGEMENT OF INDIAN FOREST LAND AUTHOR-**  
12 **IZED TO INCLUDE RELATED NATIONAL FOR-**  
13 **EST SYSTEM LANDS AND PUBLIC LANDS.**

14 Section 305 of the National Indian Forest Resources  
15 Management Act (25 U.S.C. 3104) is amended by adding  
16 at the end the following new subsection:

17 “(c) INCLUSION OF CERTAIN NATIONAL FOREST  
18 SYSTEM LAND AND PUBLIC LAND.—

19 “(1) AUTHORITY.—At the request of an Indian  
20 tribe, the Secretary concerned may treat Federal  
21 forest land as Indian forest land for purposes of  
22 planning and conducting forest land management  
23 activities under this section if the Federal forest  
24 land is located within, or mostly within, a geographic  
25 area that presents a feature or involves cir-

1       cumstances principally relevant to that Indian tribe,  
2       such as Federal forest land ceded to the United  
3       States by treaty, Federal forest land within the  
4       boundaries of a current or former reservation, or  
5       Federal forest land adjudicated to be tribal home-  
6       lands.

7               “(2) REQUIREMENTS.—As part of the agree-  
8       ment to treat Federal forest land as Indian forest  
9       land under paragraph (1), the Secretary concerned  
10      and the Indian tribe making the request shall—

11               “(A) provide for continued public access  
12      applicable to the Federal forest land prior to  
13      the agreement, except that the Secretary con-  
14      cerned may limit or prohibit such access as  
15      needed;

16               “(B) continue sharing revenue generated  
17      by the Federal forest land with State and local  
18      governments either—

19               “(i) on the terms applicable to the  
20      Federal forest land prior to the agreement,  
21      including, where applicable, 25-percent  
22      payments or 50-percent payments; or

23               “(ii) at the option of the Indian tribe,  
24      on terms agreed upon by the Indian tribe,  
25      the Secretary concerned, and State and

1 county governments participating in a rev-  
2 enue sharing agreement for the Federal  
3 forest land;

4 “(C) comply with applicable prohibitions  
5 on the export of unprocessed logs harvested  
6 from the Federal forest land;

7 “(D) recognize all right-of-way agreements  
8 in place on Federal forest land prior to com-  
9 mencement of tribal management activities; and

10 “(E) ensure that all commercial timber re-  
11 moved from the Federal forest land is sold on  
12 a competitive bid basis.

13 “(3) LIMITATION.—Treating Federal forest  
14 land as Indian forest land for purposes of planning  
15 and conducting management activities pursuant to  
16 paragraph (1) shall not be construed to designate  
17 the Federal forest land as Indian forest lands for  
18 any other purpose.

19 “(4) DEFINITIONS.—In this subsection:

20 “(A) FEDERAL FOREST LAND.—The term  
21 ‘Federal forest land’ means—

22 “(i) National Forest System lands;  
23 and

24 “(ii) public lands (as defined in sec-  
25 tion 103(e) of the Federal Land Policy and

1 Management Act of 1976 (43 U.S.C.  
2 1702(e))), including Coos Bay Wagon  
3 Road Grant lands reconveyed to the  
4 United States pursuant to the first section  
5 of the Act of February 26, 1919 (40 Stat.  
6 1179), and Oregon and California Railroad  
7 Grant lands.

8 “(B) SECRETARY CONCERNED.—The term  
9 ‘Secretary concerned’ means—

10 “(i) the Secretary of Agriculture, with  
11 respect to the Federal forest land referred  
12 to in subparagraph (A)(i); and

13 “(ii) the Secretary of the Interior,  
14 with respect to the Federal forest land re-  
15 ferred to in subparagraph (A)(ii).”.

16 **SEC. 303. TRIBAL FOREST MANAGEMENT DEMONSTRATION**  
17 **PROJECT.**

18 The Secretary may carry out demonstration projects  
19 by which an Indian tribe may contract to perform adminis-  
20 trative, management, and other functions of programs of  
21 the Tribal Forest Protection Act of 2004 (25 U.S.C.  
22 3115a et seq.) through contracts entered into under the  
23 Indian Self-Determination and Education Assistance Act  
24 (25 U.S.C. 450 et seq.).

1           **TITLE IV—LAND AND WATER**  
2                           **CONSERVATION FUND**

3   **SEC. 401. REQUIREMENTS RELATED TO ALLOCATION OF**  
4                           **FUND AMOUNTS FOR FEDERAL PURPOSES.**

5           Section 200306(b) of title 54, United States Code,  
6 is amended—

7                   (1) by striking “Appropriations from the Fund”  
8 and inserting the following:

9                   “(1) AUTHORIZATION OF ACQUISITION RE-  
10                   QUIRED.—Appropriations from the Fund”; and

11                   (2) by adding at the end the following new  
12 paragraphs:

13                   “(2) ABUTMENT OF OTHER FEDERAL LAND RE-  
14                   QUIRED.—A parcel of non-Federal land, water, or an  
15 interest in land or water acquired with appropria-  
16 tions from the Fund pursuant to this section shall  
17 abut Federal land or water on not less than 75 per-  
18 cent of the parcel’s border and, except as provided  
19 in subparagraph (a)(2)(B)(ii), shall not be subject to  
20 size restrictions.

21                   “(3) GEOGRAPHIC LIMITATION.—Not more  
22 than 15 percent of the acreage acquired with funds  
23 appropriations from the Fund pursuant to this sec-  
24 tion for any fiscal year shall be located west of the  
25 100th meridian.

1 “(4) IMPROVED PUBLIC ACCESS.—

2 “(A) IN GENERAL.—Not less than 33 per-  
3 cent of amounts appropriated from the Fund  
4 pursuant to this section shall be used to secure  
5 or enhance public access on existing Federal  
6 lands for hunting, recreational fishing, or rec-  
7 reational shooting where public access for those  
8 activities is impracticable.

9 “(B) DEFINITIONS.—For this subpara-  
10 graph:

11 “(i) HUNTING.—The term ‘hunting’  
12 means use of a firearm, bow, or other au-  
13 thorized means in the lawful—

14 “(I) pursuit, shooting, capture,  
15 collection, trapping, or killing of wild-  
16 life;

17 “(II) attempt to pursue, shoot,  
18 capture, collect, trap, or kill wildlife.

19 “(ii) RECREATIONAL FISHING.—The  
20 term ‘recreational fishing’ means the law-  
21 ful—

22 “(I) pursuit, capture, collection,  
23 or killing of fish; or

24 “(II) attempt to pursue, capture,  
25 collect, or kill fish.

1                   “(iii) RECREATIONAL SHOOTING.—  
2                   The term ‘recreational shooting’ means  
3                   any form of sport, training, competition, or  
4                   pastime, whether formal or informal, that  
5                   involves the discharge of a rifle, handgun,  
6                   or shotgun, or the use of a bow.”.

Hi guys—Flake's office is circulating the attached. Does DOI have any concerns/feedback on this? Can BIA and Reclamation take a look if they haven't already? Thank you!

**From:** Podolak, Chuck (Flake)  
**Sent:** Wednesday, April 20, 2016 7:58 PM  
**To:** Stansbury, Melanie (Energy) <Melanie\_Stansbury@energy.senate.gov>  
**Subject:** Flake Indian Irrigation Project Improvement Amendment

Melanie,

Senator Flake introduced the attached amendment to the E-W Approps bill today. It is meant to carry out GAO recommendations on ways to improve management of BIA irrigation projects. The recommendation in particular that is focused on is their recommendation that management (not ownership) of some projects might be better carried out by USBR. This would aim to identify which projects those are.

SCIA has reported out Senator Barrasso's IRRIGATE Act (S.438) which also includes a study on improving management. We have run this language by Barrasso's office and they were good with it. We are waiting to hear from Tester's office.

The approps committee suggested running this by ENR to check for any issues with USBR doing this. Do you see any issues with moving to get this incorporated into E-W approps?

Thanks

Chuck

# INDIAN IRRIGATION PROJECTS

Numerous Issues  
Need to Be Addressed  
to Improve Project  
Management and  
Financial  
Sustainability

G A O  
Accountability · Integrity · Reliability

# Highlights

Highlights of [GAO-06-314](#), a report to the Chairman, Subcommittee on Interior and Related Agencies, Committee on Appropriations, U.S. Senate

## Why GAO Did This Study

The Department of the Interior's Bureau of Indian Affairs (BIA) manages 16 irrigation projects on Indian reservations in the western United States. These projects, which were generally constructed in the late 1800s and early 1900s, include water storage facilities and delivery structures for agricultural purposes. Serious concerns have arisen about their maintenance and management.

GAO was asked to examine (1) BIA's estimated deferred maintenance cost for its 16 irrigation projects, (2) what shortcomings, if any, exist in BIA's current management of its irrigation projects, and (3) any issues that need to be addressed to determine the long-term direction of BIA's irrigation program.

## What GAO Recommends

GAO recommends that BIA (1) provide the necessary level of technical support to project managers, (2) require project managers to meet at least twice annually with water users, and (3) conduct studies to determine the financial sustainability of the projects.

Although we requested comments from the Department of the Interior on our findings and recommendations, none were provided in time to be included as part of this report.

# INDIAN IRRIGATION PROJECTS

## Numerous Issues Need to Be Addressed to Improve Project Management and Financial Sustainability

### What GAO Found

BIA estimated the cost for deferred maintenance at its 16 irrigation projects at about \$850 million for 2005, although the agency is in the midst of refining this estimate. BIA acknowledges that this estimate is a work in progress, in part, because some projects incorrectly counted new construction items as deferred maintenance. To further refine its estimate, BIA plans to hire engineering and irrigation experts to conduct thorough condition assessments of all 16 irrigation projects to correctly identify deferred maintenance needs and costs.

BIA's management of some of its irrigation projects has serious shortcomings that undermine effective decisionmaking about project operations and maintenance. First, under BIA's organizational structure, officials with the authority to oversee irrigation project managers generally lack the technical expertise needed to do so effectively, while the staff that have the expertise lack the necessary authority. Second, despite federal regulations that require BIA to consult with project stakeholders in setting project priorities, BIA has not consistently provided project stakeholders with the necessary information or opportunities to participate in project decisionmaking.

The long-term direction of BIA's irrigation program depends on the resolution of several larger issues. Of most importance, BIA does not know to what extent its irrigation projects are capable of financially sustaining themselves, which hinders its ability to address long-standing concerns regarding inadequate funding. Information on financial sustainability, along with accurate deferred maintenance information, are two critical pieces of information that are needed to have a debate on the long-term direction of BIA's irrigation program. Once this information is available, the Congress and interested parties will be able to address how the deferred maintenance will be funded and whether entities other than BIA could more appropriately manage some or all of the projects.

United States Government Accountability Office  
Washington, D.C. 20548

February 24, 2006

The Honorable Conrad Burns  
Chairman  
Subcommittee on Interior and Related Agencies  
Committee on Appropriations  
United States Senate

The scarcity of water in the western part of the United States makes irrigation critical to the continued success of agricultural activities. There are over 100 irrigation works on Indian reservations primarily across the western United States. The Department of the Interior's Bureau of Indian Affairs (BIA), which is responsible for providing social and economic services to Indians, as well as managing land and natural resources held in trust by the United States for Indians, currently refers to these irrigation works as either "irrigation projects" or "irrigation systems." There are 16 irrigation projects where water users are charged for the operation and maintenance of the irrigation works by BIA. The remaining systems, on which BIA does not charge an annual operation and maintenance fee, are operated and maintained through a collaborative effort which generally involves other BIA programs, tribes, and water users.

The 16 irrigation projects, which were generally initiated in the late 1800s and early 1900s by the Department of the Interior, include water storage facilities and delivery structures for agricultural purposes. The projects were constructed as part of the federal government's Indian assimilation policy to foster agricultural opportunities and provide economic benefits to Indian communities. Over time, non-Indians began buying or leasing the land served by the projects for agricultural purposes, and project stakeholders evolved from Indian water users and the tribes within the reservations to include non-Indian water users as well. Many of the water users today are non-Indian.

A number of prior reports on BIA's irrigation projects have documented that the annual operations and maintenance fees have historically been set too low to cover the full cost of running the projects.<sup>1</sup> In addition, problems

---

<sup>1</sup>U.S. Department of the Interior, Office of the Inspector General, *Indian Irrigation Projects, Bureau of Indian Affairs*, 96-I-641, (Washington D.C.: March 1996); U.S. Department of the Interior, Office of the Inspector General, *Operations and Maintenance Assessments of Indian Irrigation Projects, Bureau of Indian Affairs*, W-IA-BIA-12-86, (Washington D.C.: Feb. 1988).

---

have been reported with collecting the fees that have been assessed. Because of insufficient funding, project maintenance has been consistently postponed, resulting in an extensive and costly list of deferred maintenance items. The kinds of such deferred maintenance range from repairing or replacing dilapidated irrigation structures to clearing weeds from irrigation ditches. In addition to the deferred maintenance, water users have expressed concern that BIA has been unresponsive in addressing the projects' ongoing operations and maintenance needs.

The 16 irrigation projects are located in 4 of BIA's 12 regions—Rocky Mountain, Northwest, Southwest, and Western. Management of these projects is decentralized, with local or regional BIA offices responsible for project management. Fourteen projects are overseen by local BIA agency superintendents, and the 2 largest projects are overseen directly by regional directors. The agency superintendents that oversee projects report to their respective regional director. BIA's irrigation and engineering experts, who provide technical assistance to the projects, are located in each region as well as in the BIA central Irrigation, Power, and Safety of Dams offices (central irrigation offices) located in Washington, D.C., and other BIA locations in the western United States. The regional irrigation staff and central irrigation office staff do not have line authority over the projects.

Federal regulations specify that in making judgments about the work and actions necessary for the proper operation, maintenance and administration of the projects, the official in charge "... consults with water users and their representatives, and with tribal council representatives, and seeks advice on matters of program priorities and operational policies."<sup>2</sup> Furthermore, the regulations state that "close cooperation between the Indian tribal councils, the project waters users and the Officer-In-Charge [of the project] is necessary and will be to the advantage of the entire project."<sup>3</sup> BIA's irrigation manual and handbook also contain language directing project staff to involve project stakeholders in the management of the projects.

In response to ongoing concerns about maintenance and management of the irrigation projects, in December 2003 Senator Conrad Burns and

<sup>3</sup>25 C.F.R. § 171.1(d).

---

Congressman Dennis Rehberg, both of Montana, sponsored a town hall meeting with local water users and BIA officials to discuss problems at BIA's irrigation projects. In this context, we were asked to examine (1) BIA's estimated deferred maintenance cost for its 16 irrigation projects; (2) what shortcomings, if any, exist in BIA's current management of its irrigation projects; and (3) any issues that need to be addressed to determine the long-term direction of BIA's irrigation program.

To address the objectives of this report, we collected documentation on BIA's 16 irrigation projects from officials in BIA's central irrigation office, and we visited and collected information from each of BIA's four regional offices that oversee the 16 irrigation projects. We also visited 9 of the 16 projects, where we collected project-specific information from BIA officials and project stakeholders. We also met with and collected documentation from the Department of the Interior's Bureau of Reclamation, the primary agency responsible for irrigation management, for comparative purposes. Specifically, to examine estimated deferred maintenance costs, we reviewed BIA's lists of deferred maintenance items and cost estimates, and the methodology BIA used to develop these lists and estimates. We concluded that these data were sufficiently reliable for the purposes of this report based on a review of relevant controls, reliability tests, and interviews with agency officials about the collection and management of the data. We did not develop our own estimate of deferred maintenance. To determine what, if any, management shortcomings exist, we reviewed relevant federal regulations and agency guidance, and analyzed BIA-wide and project-specific management protocols and systems for the 9 projects we visited. Finally, to determine any issues needing to be addressed to determine the long-term direction of the projects, we reviewed prior studies on BIA's irrigation program and we discussed the long-term direction of the program with BIA irrigation officials and project stakeholders. A more detailed description of our objectives, scope and methodology can be found in appendix I. We performed our work between March 2005 and February 2006 in accordance with generally accepted government auditing standards.

---

## Results in Brief

BIA has estimated the cost for deferred maintenance at its 16 irrigation projects at about \$850 million for 2005, although the agency is in the midst of refining this estimate. BIA defines deferred maintenance as upkeep, such as removing weeds from irrigation ditches or repairing irrigation structures, that is postponed until some future time. As part of its ongoing strategy to develop a cost figure for the projects' total deferred

---

maintenance, BIA had initially estimated this cost at approximately \$1.2 billion in fiscal year 2004. This estimate was based, in part, on preliminary condition assessments of structures and equipment at each of the 16 irrigation projects using a scale of good, fair, poor, critical, and abandoned. The assessment of the structures consisted of visual inspections generally conducted by nonengineers. BIA acknowledged that the 2004 estimate would need revision largely for three reasons: the individuals who conducted the assessments did not have irrigation or engineering expertise, not all projects used the same methodology to develop their deferred maintenance estimates, and some projects incorrectly counted new construction items as deferred maintenance. To improve its estimate in 2005, BIA implemented a facilities management system designed to help projects track and continuously update deferred maintenance information. BIA technical experts from the central irrigation office conducted training for BIA irrigation projects on how to use this system, as well as how to correctly define deferred maintenance. Projects used this system to revise their list of deferred maintenance items and associated cost estimates in fiscal year 2005, resulting in a lower total deferred maintenance estimate of about \$850 million. However, some projects continued to classify items as deferred maintenance when they were actually new construction, and some provided BIA with incomplete information. To further refine the cost estimate, BIA plans to hire experts in engineering and irrigation to conduct thorough condition assessments of all 16 irrigation projects every 5 years to identify deferred maintenance needs and costs. The first such assessment was completed in July 2005, with all 16 assessments expected to be completed by 2010.

BIA's management of some of its irrigation projects has serious shortcomings that undermine effective decisionmaking about project operations and maintenance. First, under BIA's organizational structure, in many cases, officials with the authority to oversee project managers' decisionmaking lack the technical expertise needed to do so effectively, while the staff who do have the expertise lack the necessary authority. The BIA regional directors, agency superintendents and deputy superintendents that oversee the projects do not generally have engineering or irrigation expertise and they rely heavily on the project managers to run the projects. However, this process breaks down when the project managers themselves do not have the expertise required for the position—that is, in cases in which BIA has had difficulty filling project manager vacancies and has, as a result, hired less qualified people. For example, at the Crow project in 2002, a project manager with insufficient expertise decided to repair a minor leak in a key water delivery structure

---

by dismantling it and replacing it with a different type of structure. The new structure was subsequently deemed inadequate by BIA's irrigation experts, and the required reconstruction delayed water delivery by about a month. Furthermore, the BIA staff with such expertise—regional irrigation engineers and central irrigation office staff—have no authority over the 16 projects. A second serious management shortcoming involves the extent to which some projects involve stakeholders in decisionmaking. Despite federal regulations that require BIA to consult with project stakeholders in setting project priorities, BIA has not consistently provided the information or opportunities necessary for stakeholders—both Indian and non-Indian water users—to participate in decisionmaking about project operations and maintenance. For example, the Wapato Irrigation Project shares little information on its spending with stakeholders, and the Pine River Irrigation Project does not meet with its non-tribal stakeholders, limiting stakeholders' ability to have an impact on project decisions and BIA's ability to benefit from this input.

The long-term direction of BIA's irrigation program depends on the resolution of several larger issues. Of most importance, BIA does not know to what extent its irrigation projects are capable of financially sustaining themselves, which hinders its ability to address long-standing concerns regarding inadequate funding. The projects were constructed without consideration for whether they could generate adequate income to be self-supporting, yet since the 1960s many have been considered generally self-supporting through fees paid by water users. The future of BIA's irrigation program also depends on the resolution of how the deferred maintenance will be funded. BIA currently has no plan for how it will obtain funding to fix the deferred maintenance items. Regardless of the precise cost estimate for total deferred maintenance, funding deferred maintenance costs in the hundreds of millions of dollars will be a significant challenge in times of tight budgets and competing priorities. In the interim, the Congress has appropriated approximately \$7.5 million for some of BIA's irrigation projects for fiscal year 2006. Finally, it might be more appropriate for other entities, including other federal agencies, tribes, and water users, to manage some or all of the projects. Given that BIA must balance irrigation management with its many other missions in support of Indian communities, such as providing education and law enforcement, it may be beneficial to consider whether others for whom irrigation is more of a priority or an area of expertise could better manage some of the projects. Successful management of the projects by other groups, however, would depend on the characteristics of each project and its stakeholders. For example, turning over projects to tribes may be better suited to projects

---

where most of the water users are Indian, whereas turning over projects to water users would be better suited to projects where water users share similar interests and have a desire to organize into an irrigation district or association.

To improve the ongoing day-to-day management of the projects in the short-term, we are recommending that the Secretary of the Interior direct the Assistant Secretary for Indian Affairs to provide the necessary level of technical support for project managers who have less than the desired level of engineering qualifications and to adequately involve project stakeholders in the management of the projects. To address the long-term financial sustainability of the projects, we are recommending that the Secretary direct the Assistant Secretary for Indian Affairs to conduct studies to determine the extent to which projects are capable of sustaining themselves. Information on financial sustainability, along with accurate deferred maintenance information, are two critical pieces of information that are needed to have a debate on the long-term direction of BIA's irrigation program. Once this information is available, the Congress and interested parties will be able to address how the deferred maintenance will be funded and whether entities other than BIA could more appropriately manage some or all of the projects. Since how to fund the deferred maintenance and who should manage the projects are future policy issues for the Congress to decide in collaboration with all interested parties, we are not making any specific recommendations to address them. Although we requested comments from the Department of the Interior on our findings and recommendations, none were provided in time to be included as part of this report.

---

## Background

BIA's irrigation program was initiated in the late 1800s, as part of the federal government's Indian assimilation policy, and it was originally designed to provide economic development opportunities for Indians through agriculture. The Act of July 4, 1884, provided the Secretary of the Interior \$50,000 for the general development of irrigation on Indian lands.<sup>4</sup> Over the years, the Congress continued to pass additional legislation authorizing and funding irrigation facilities on Indian lands.

---

<sup>4</sup>Act of July 4, 1884, 23 Stat. 76, 94 (1884).

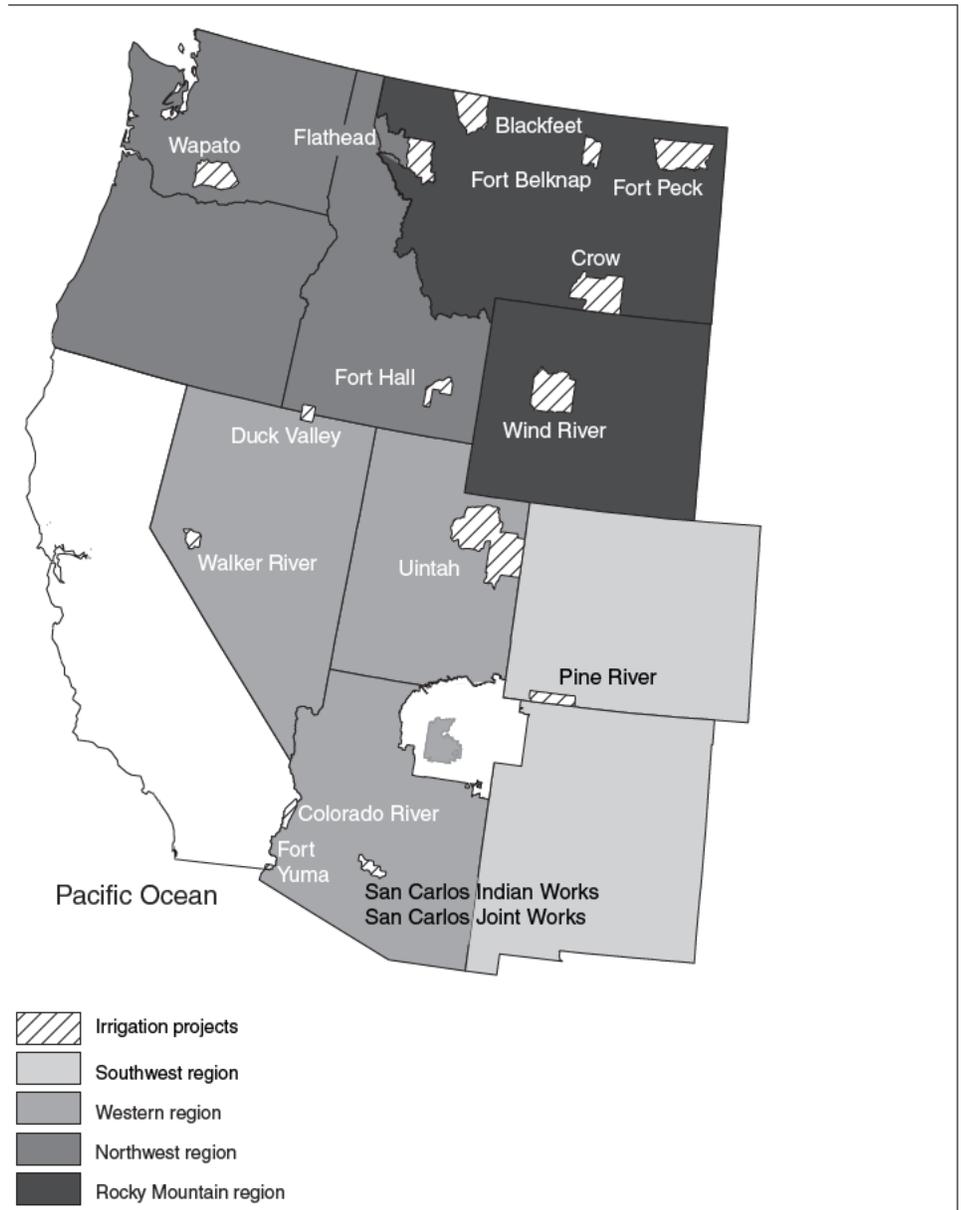

---

BIA's irrigation program includes over 100 "irrigation systems" and "irrigation projects" that irrigate approximately 1 million acres primarily across the West. BIA's irrigation systems are non revenue-generating facilities that are primarily used for subsistence gardening and they are operated and maintained through a collaborative effort which generally involves other BIA programs, tribes, and water users. In contrast, BIA's 16 irrigation projects charge their water users an annual operations and maintenance fee to fund the cost of operating and maintaining the project.<sup>5</sup> Most of BIA's irrigation projects are considered self-supporting through these operations and maintenance fees. The 16 irrigation projects are located on Indian reservations across the agency's Rocky Mountain, Northwest, Southwest, and Western regions (see fig. 1).

---

<sup>5</sup>See 70 *Fed. Reg.* 57889 (Oct. 4, 2005) for the 2005 operations and maintenance fees for the projects as well as the proposed fees for 2006.

<sup>a</sup>No specific authorization date.

<sup>b</sup>The Fort Yuma Irrigation Project is operated and maintained by the Bureau of Reclamation. The operations and maintenance fees collected by BIA for the project are turned over to the Bureau of Reclamation.

The irrigation facilities constructed by BIA included a range of structures for storing and delivering water for agricultural purposes. Figure 2 highlights an example of the key structural features found on BIA's irrigation projects.

Figure 2: Example of an Irrigation Project Operated by BIA

Source: Bureau of Reclamation, GAO.

The beneficiaries of BIA's projects have evolved over time and at present are quite diverse. Over the years, non-Indians have bought or leased a significant portion of the land served by BIA's irrigation program. As a result, current water users on BIA's projects include the tribes, individual

Indian landowners, non-Indian landowners, and non-Indian lessees of Indian lands. The extent of non-Indian landownership and leasing ranges significantly across BIA's irrigation projects (see table 2). For example, 100 percent of the land served by the Colorado River Irrigation Project is Indian owned, while only about 10 percent of the land served by the Flathead Irrigation Project is Indian owned.

**Table 2: Land Ownership for BIA's 16 Irrigation Projects**

<b>Irrigation project</b>	<b>Total assessed acreage</b>	<b>Percentage of Indian owned land</b>	<b>Percentage of non-Indian owned land</b>
Colorado River	79,350	100	0
Duck Valley	12,923	100	0
Fort Yuma <sup>a</sup>	7,524	100	0
San Carlos Indian Works	50,000 <sup>b</sup>	99	1
Fort Belknap	9,900	92	8
Walker River	2,100	90	10
Pine River	11,855	85	15

<sup>a</sup>The Fort Yuma Irrigation Project is operated and maintained by the Bureau of Reclamation. The operations and maintenance fees collected by BIA for the project are turned over to the Bureau of Reclamation.

<sup>b</sup>The acreage for the San Carlos Indian Works is also included in the acreage for the San Carlos Joint Works. In calculating the total acreage, the acreage for the San Carlos Indian Works is only counted once.

Federal regulations and internal BIA guidance require that BIA collaborate with water users, both Indian and non-Indian, in managing the irrigation

---

projects. For example, federal regulations state that close cooperation between BIA and water users is necessary and that the BIA official in charge of each project is responsible for consulting with all water users in setting program priorities.<sup>6</sup> In addition, BIA's manual requires that BIA "provide opportunities for water user participation in matters relating to irrigation project operations" and that BIA's officer-in-charge "meet regularly with water users to discuss proposed [operation and maintenance] assessment rates ... [and] general operations and maintenance." Although BIA guidance does not define "regularly," BIA's Irrigation Handbook explicitly recommends that project staff meet at least twice annually to discuss work performed over the course of the year and allow for water user feedback and suggestions for the coming year. Furthermore, BIA's Irrigation Handbook states that, at a minimum, BIA should discuss annual project budgets and work plans with water users.

Since their inception, BIA's 16 irrigation projects have been plagued by maintenance concerns. Construction of the projects was never fully completed, resulting in structural deficiencies that have continually hindered project operations and efficiency. In addition, water users and BIA have reported that operations and maintenance fees provide insufficient funding for project operations. Due to insufficient funding, project maintenance has been consistently postponed, resulting in an extensive and costly list of deferred maintenance items. Such deferred maintenance ranges from repairing or replacing dilapidated irrigation structures to clearing weeds from irrigation ditches.

In addition, concerns regarding BIA's management of the projects have been raised for years, particularly in regard to its financial management practices. For example, problems concerning BIA's billing practices for its operations and maintenance fees have been raised by many, prompting independent review on more than one occasion. We and the Department of the Interior's Inspector General have both identified serious problems with the land use records BIA has used to develop its annual operations and maintenance bills.<sup>7</sup> In response, BIA instituted a new financial management system called the National Irrigation Information Management System,

---

<sup>6</sup>25 C.F.R. § 171.1 (c), (d).

<sup>7</sup>GAO, *Indian Programs: BIA's Management of the Wapato Irrigation Project*, [GAO/RCED-97-124](#) (Washington D.C.: May 28, 1997); U.S. Department of the Interior, Office of the Inspector General, *Indian Irrigation Projects, Bureau of Indian Affairs*, 96-I-641, (Washington D.C.: March 1996).

---

which has begun to address some of the billing errors. However, concerns still exist regarding the accuracy of the data in the billing system. The accuracy of some of the information in the irrigation billing system is dependant on the irrigation program receiving accurate and timely information from other BIA programs, such as land ownership and leasing information from BIA's Real Estate Services program.

In 2001, the Yakama tribe and individual tribal members filed appeals challenging the Wapato Irrigation Project's operation and maintenance fees for the pre-2000 and year 2000 bills. Furthermore, the Wapato Irrigation Project agreed to not send any bills to the tribe or its members since 2001. Although a settlement is under discussion, in the interim the Wapato Irrigation Project has not been able to collect about \$2 million, annually, of its expected revenue.

---

## **BIA Estimates the Cost of Deferred Maintenance at about \$850 Million, but the Estimate Is Being Refined**

According to BIA's latest estimate, it will cost about \$850 million to complete the deferred maintenance on all of its 16 irrigation projects; but this estimate is still being refined. BIA initially estimated its deferred maintenance costs at over \$1 billion in fiscal year 2004, but acknowledged that this estimate was preliminary and would need to be revised largely because it incorrectly included new construction items and was developed by non-engineers. BIA revised this estimate downward in fiscal year 2005 based on the implementation of a new facilities management system. However, BIA plans to further refine this estimate since some projects continued to incorrectly count new construction items as deferred maintenance.

---

## **In 2004, BIA Initially Estimated Completing the Deferred Maintenance Would Cost Over \$1 Billion**

As part of its ongoing effort to identify the needs and costs of deferred maintenance on its 16 irrigation projects, BIA estimated in fiscal year 2004 that it would cost approximately \$1.2 billion to complete all deferred maintenance. This initial estimate was based, in part, on preliminary condition assessments of irrigation structures and equipment for each of BIA's 16 irrigation projects. These preliminary condition assessments generally consisted of visual inspections to classify each project's structure and equipment using a scale of good, fair, poor, critical and abandoned based on the apparent level of disrepair. BIA staff then estimated how much it would cost to repair each item based on its condition classification.

---

BIA generally defines deferred maintenance as upkeep that is postponed until some future time.<sup>8</sup> Deferred maintenance varies from project to project and ranges from cleaning weeds and trees which divert water from irrigation ditches, to repairing leaky or crumbling check gates designed to regulate water flow, to resloping eroded canal banks to optimize water flow. Figure 3 shows examples of deferred maintenance on some of the irrigation projects we visited (clockwise from the upper left, figure 3 shows (1) a defunct check gate and overgrown irrigation ditch at the Fort Belknap Irrigation Project, (2) a cattle-crossing eroding a canal bank and impairing water flow at the Wind River Irrigation Project, (3) a crumbling irrigation structure at the Crow Irrigation Project, and (4) a check gate leaking water at the Colorado River Irrigation Project). For detailed information on key maintenance issues for each of the nine projects we visited, see appendix II.

---

<sup>8</sup>BIA defines deferred maintenance as “maintenance that was not performed when it should have been or when it was scheduled and which, therefore, was put off or delayed for a future period (adapted from [Federal Accounting Standards Advisory Board Bulletin] No. 6). This includes facility deficiencies where there is non-compliance to codes (e.g., life safety, [Americans with Disabilities Act, Occupational Safety and Health Administration], environmental, etc.) and other regulatory or Executive Order compliance requirements.”

**Figure 3: Examples of Deferred Maintenance on BIA's Irrigation Projects (c. 2005)**

Source: GAO.

BIA officials acknowledged that their fiscal year 2004 deferred maintenance estimate was only a starting point and that it needed to be revised for three key reasons: (1) the individuals who conducted the assessments were not knowledgeable about irrigation projects or infrastructure; (2) not all projects used the same methodology to develop their deferred maintenance cost estimates; and (3) some projects incorrectly counted new construction items as deferred maintenance.

- *BIA's preliminary condition assessments were conducted by computer specialists, rather than by people with the expertise in irrigation or engineering needed to accurately assess project infrastructure. BIA contracted with geographic information system experts primarily to catalogue the structures on each project. These geographic information system experts also observed the condition of the structures they catalogued and classified the condition of each structure, based on the level of apparent disrepair, as part of the overall effort to inventory and map key structures on each project. Consequently, some items identified as being in "poor" condition may in fact be structurally sound but simply*

---

appear cosmetically dilapidated, whereas other structures classified as being in “good” condition may in fact be structurally dilapidated but appear cosmetically sound. For example, according to BIA staff at the Colorado River Irrigation Project, the recent repainting of certain check gates disguised severe rust and structural deterioration of key metal parts.

- *BIA staff used inconsistent methodologies to develop the cost estimates for deferred maintenance.* According to BIA staff, the deferred maintenance cost estimates were developed by different people, sometimes using different or unknown methodologies for assigning cost values to deferred maintenance items. For example, some projects developed their own cost estimates and sent them to BIA’s central office for inclusion in its overall figures, while BIA regional staff developed cost estimates for other projects based, in part, on information from BIA’s preliminary condition assessments.
- *Some projects incorrectly included new construction items as deferred maintenance.* According to BIA, work that would expand a project or its facilities should not be categorized as deferred maintenance. Therefore, expanding an existing water delivery system or constructing a new building is not deferred maintenance. However, some projects incorrectly counted new construction items as deferred maintenance. For example, the Fort Hall Irrigation Project included increasing the capacity of its main canal for about \$15.3 million, the Duck Valley Irrigation Project included building new canals for about \$1.3 million, and the Flathead Irrigation Project included building a new warehouse for about \$147,000.

---

### In 2005, BIA Revised the Estimate Downward to about \$850 Million, but It Is Still a Work in Progress

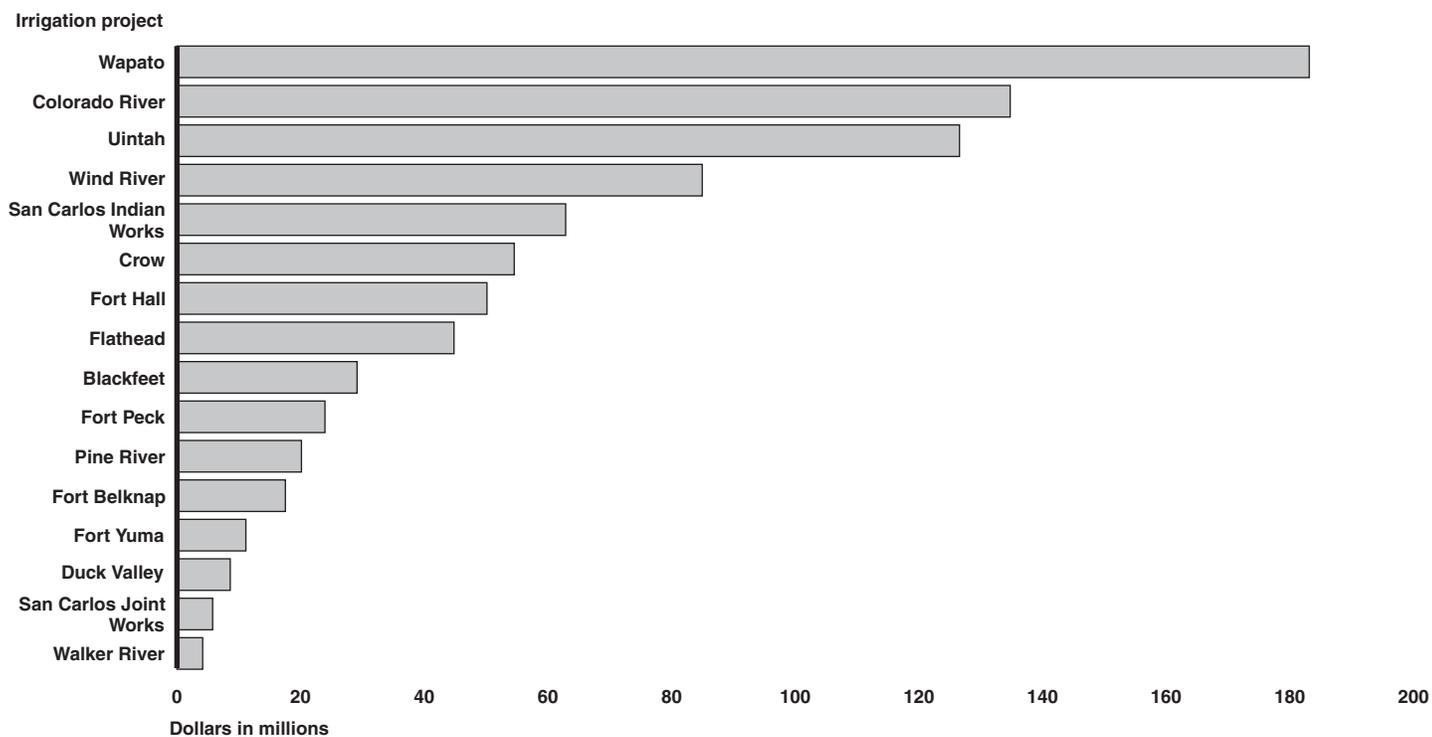

To improve the accuracy of its deferred maintenance estimate in 2005 and to help staff develop, track, and continuously update deferred maintenance lists and cost estimates, BIA implemented MAXIMO—a facilities management system linked to the geographic information system mapping inventory developed from its preliminary condition assessments.<sup>9</sup> Using data from MAXIMO, BIA revised its total deferred maintenance estimate for the irrigation projects downward to about \$850 million for fiscal year 2005. Figure 4 shows the current deferred maintenance cost estimate for

---

<sup>9</sup>BIA implemented MAXIMO agencywide, not just for its irrigation projects, to help identify and track deferred maintenance.

each of the 16 projects. In the summer of 2005, BIA technical experts from the central irrigation office conducted training for BIA irrigation projects on how to use MAXIMO to enter information on maintenance needs, and how to correctly define deferred maintenance. Projects used this system to revise their list of deferred maintenance items and associated cost estimates in fiscal year 2005. While MAXIMO is still being tailored to the needs of the irrigation program, its implementation generally standardized the process for identifying and calculating deferred maintenance among projects.

**Figure 4: Fiscal Year 2005 Cost Estimate of Deferred Maintenance by Irrigation Project**

Source: GAO analysis of BIA data.

Despite the implementation of MAXIMO, BIA's fiscal year 2005 estimate of deferred maintenance is still inaccurate for the following reasons:

- *Some projects continued to incorrectly count certain items as deferred maintenance.* Despite training, some projects continued to incorrectly

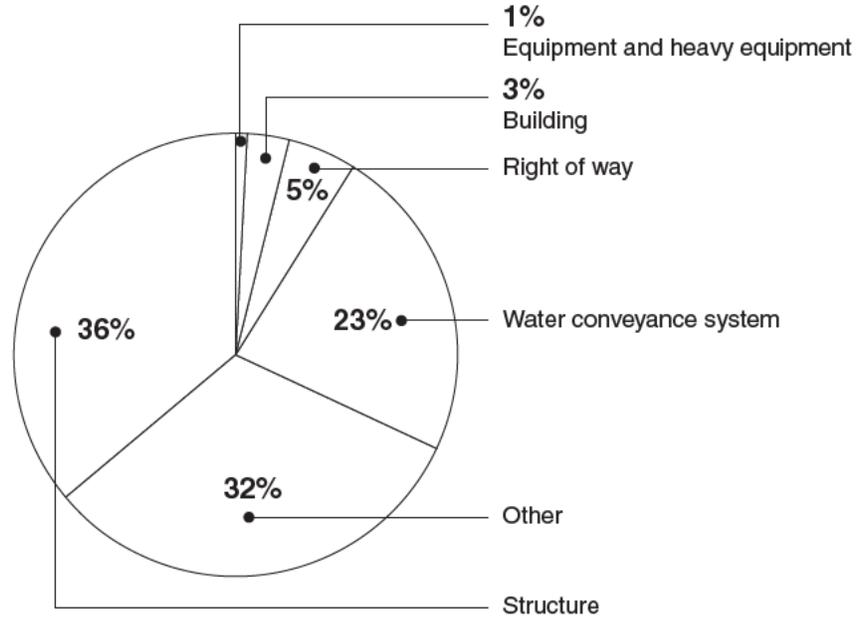

---

count certain items, such as new construction items and vehicles, as deferred maintenance. For example, the Fort Hall Irrigation Project included the installation of permanent diversion structures for about \$2.1 million, the Wapato Irrigation Project included constructing reservoirs for about \$640,000, and the San Carlos Indian Works Irrigation Project included building a new office for about \$286,000. In addition, some projects included the cost of repairing vehicles or buying new ones in their deferred maintenance estimates, despite BIA's new guidance that such items are not deferred maintenance. According to BIA officials, while projects can consider the weed clearing postponed due to broken vehicles as deferred maintenance, the delayed repair of the vehicle itself is not deferred maintenance. For example, the Wind River Irrigation Project included an excavator vehicle for about \$500,000 and the Crow Irrigation Project included dump trucks for about \$430,000.

- *Some projects provided BIA with incomplete information.* According to BIA officials, some projects did not do thorough assessments of their deferred maintenance needs, and some may not be including legitimate deferred maintenance items, such as re-sloping canal banks that have eroded by crossing cattle or overgrown vegetation. Moreover, both the Walker River and the Uintah Irrigation Projects failed to provide information detailing their deferred maintenance costs, and several projects lumped items together as “other” with little or no explanatory information other than “miscellaneous”—accounting for almost one-third of BIA's total deferred maintenance cost estimate for its irrigation projects (see fig. 5).
- *BIA made errors when compiling the total deferred maintenance cost estimates.* For example, BIA inadvertently double-counted the estimate provided by the Colorado River Irrigation Project when compiling the overall cost estimate, according to BIA officials. Additionally, BIA officials erroneously estimated costs for all structures, such as flumes and check gates, based on the full replacement values even when items were in good or fair condition and needed only repairs. These structures account for over one-third of BIA's total deferred maintenance estimate (see fig. 5).

While the inclusion of incorrect items and calculation errors likely overestimate BIA's total deferred maintenance costs, the incomplete information provided by some projects may underestimate total costs.

**Figure 5: Fiscal Year 2005 Cost Estimate of Deferred Maintenance by Type**

Source: GAO analysis of BIA data.

To further refine its cost estimate and to develop more comprehensive deferred maintenance lists, BIA plans to hire experts in engineering and irrigation to periodically conduct thorough condition assessments of all 16 irrigation projects to identify deferred maintenance needs and costs. According to BIA officials, these thorough condition assessments are expected to more accurately reflect each project's actual deferred maintenance, in part because experts in engineering and irrigation who can differentiate between structural and cosmetic problems will conduct them. These assessments will also help BIA prioritize the allocation of potential funds to complete deferred maintenance items because they will assign a prioritization rating to each deferred maintenance item based on the estimated repair or replacement cost as well as the overall importance to the project. The first such assessment was completed for the Flathead

---

Irrigation Project in July 2005,<sup>10</sup> and BIA plans to reassess the condition of each project at least once every 5 years, with the first round of such condition assessments completed by the end of 2010.

---

## Shortcomings in BIA's Management of Some Irrigation Projects Undermine Effective Decisionmaking

BIA's management of some of its irrigation projects has serious shortcomings that undermine effective decisionmaking about project operations and maintenance. Under BIA's organizational structure, in many cases, officials with the authority to oversee project managers' decisionmaking lack the technical expertise needed to do so effectively, while the staff who do have the expertise lack the necessary authority. In addition, despite federal regulations that require BIA to consult with project stakeholders in setting project priorities, BIA has not consistently provided the information or opportunities necessary for stakeholders—both Indian and non-Indian water users—to participate in decisionmaking about project operations and maintenance. (See appendix II for detailed information on key management concerns at each of the nine projects we visited.)

---

## In Many Cases, BIA Officials with Oversight Authority Lack Expertise, While Those with Expertise Lack Authority

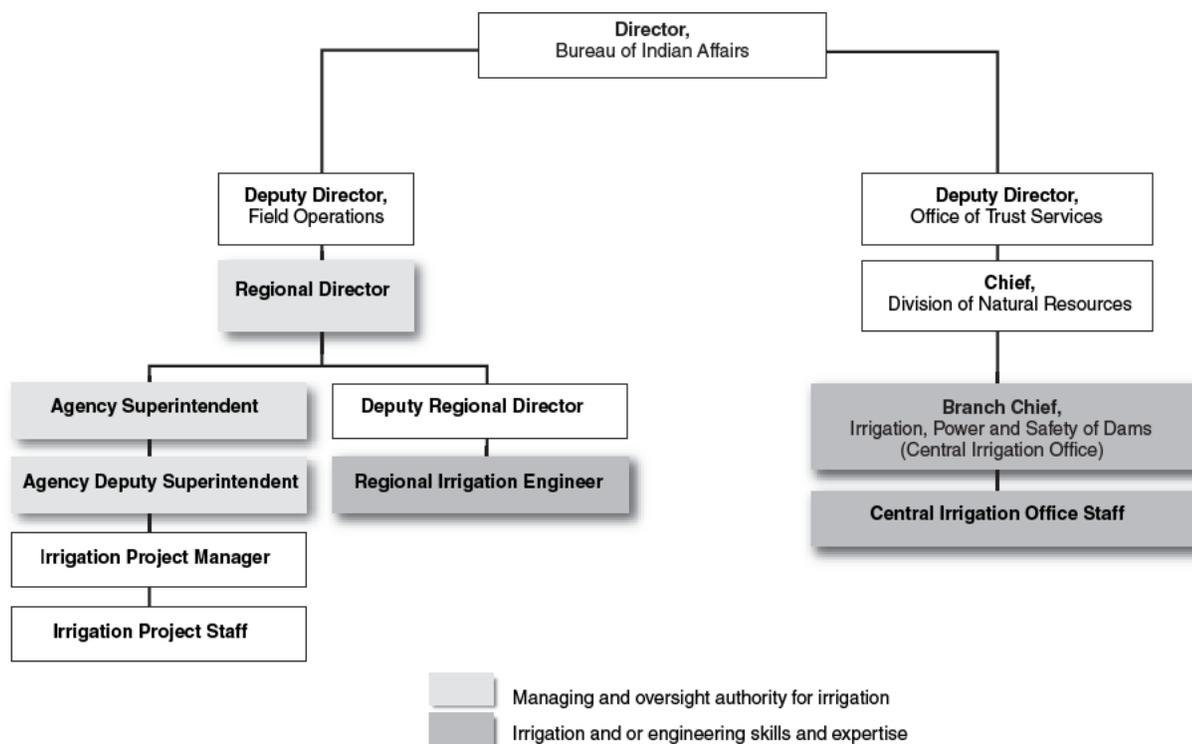

Under BIA's organizational structure, in many cases, officials with the authority to oversee project managers' decisionmaking lack the expertise needed to do so effectively, while the staff who do have the expertise lack the necessary authority to oversee project managers' decisionmaking. BIA regional directors, agency superintendents, and agency deputy superintendents who oversee the projects do not generally have engineering or irrigation expertise, and they rely heavily on the project managers to run the projects. (See fig. 6 for an organizational chart showing the lines of authority for providing oversight of a typical BIA irrigation project.) Of the nine projects we visited, only two had managers at the regional or agency levels who are experts in irrigation or engineering. At the same time, BIA staff with the irrigation and engineering expertise—regional irrigation engineers and central irrigation office staff—have no authority over the 16 projects under BIA's current organizational structure. Consequently, key technical decisions about project operations and maintenance, such as when or how to repair critical water delivery

---

<sup>10</sup>This condition assessment, entitled *Final Report: Engineering Evaluation of Existing Conditions, Flathead Agency Irrigation Division (FAID)* was prepared by HKM Engineering for the Confederated Salish and Kootenai Tribes. BIA did not fund this condition assessment.

infrastructure, do not necessarily get the technical oversight or scrutiny needed.

**Figure 6: Misalignment of Expertise and Authority for a Typical BIA Irrigation Project**

Source: GAO.

This organizational structure and reliance on the project managers breaks down when the person managing the project lacks the expertise required for the position—that is, in cases in which BIA has had difficulty filling project manager vacancies and has, as a result, hired less qualified people or has the agency deputy superintendent temporarily serving in the project manager position. Of the nine projects we visited, four lacked project managers for all or part of the 2005 irrigation season and five project managers were experts in engineering or irrigation.

The GAO *Internal Control Management and Evaluation Tool* recommends that federal agencies analyze the knowledge and skills needed to perform jobs appropriately and provides guidance on organizational structure and

---

identification of potential risks to the agency in that structure.<sup>11</sup> Specifically, it recommends that adequate mechanisms exist to address risks—such as the risks associated with staff vacancies or hiring less qualified staff.

When the project manager is under-qualified and unchecked by managers who heavily rely on his or her decisionmaking, the potential for adverse impacts on the operations and maintenance of an irrigation project increases. For example, at the Crow Irrigation Project in 2002, a project manager with insufficient expertise decided to repair a minor leak in a key water delivery structure by dismantling it and replacing it with a different type of structure. The new structure was subsequently deemed inadequate by BIA's irrigation experts, and the required reconstruction delayed water delivery by about a month. In addition, at the Blackfeet Irrigation Project in 2000, the accidental flooding and subsequent erosion of a farmer's land was inadequately addressed by project and agency management who decided to use a short-term solution over the objections of the regional irrigation engineer, who lacked the authority to override the project manager and agency superintendent's technical decision, despite their lack of expertise. At the time of this report, the regional irrigation engineer continues to negotiate the implementation of a long-term and technically sound solution.

Furthermore, BIA lacks protocols to ensure that project managers consult with, or get input from, BIA's technical experts before implementing technically complex decisions about project operations and maintenance, further exacerbating problems and undermining management accountability. For example, in the 2002 incident at the Crow Irrigation Project discussed above, the project manager was not required to consult with, notify, or get approval from either the regional irrigation engineer or central irrigation office staff, despite his lack of expertise and the complexity of the flume replacement project he undertook. According to BIA officials, if the project manager had consulted an engineer, his plan to replace the flume with two small culverts would have been rejected before work began because it was technically insufficient and would not have been completed before the start of the approaching irrigation season.

---

---

## BIA Has Not Consistently Provided Information and Opportunities for Stakeholders to Participate in Setting Project Priorities

A second serious management shortcoming is the extent to which some projects involve water users in decisionmaking. Federal regulations, as well as BIA guidance, call for involving project stakeholders—that is, tribal representatives as well as both Indian and non-Indian water users—in the operations and maintenance of each project. Specifically, federal regulations state that BIA is responsible for consulting with all water users in setting program priorities; BIA's manual requires that BIA provide regular opportunities for project water users to participate in project operations; and BIA's Irrigation Handbook recommends that BIA meet at least twice a year with project water users to discuss project budgets and desired work.

Despite such requirements and recommendations, BIA has not consistently provided the opportunities or information necessary for water users to participate in such decisionmaking about project operations and maintenance. The frequency of meetings between BIA and its project water users varied considerably on the nine projects we visited, from rarely (generally zero meetings per year), to periodically (generally more than one meeting per year), to regularly (generally more than three meetings per year), as shown in figure 9. For example, both the Blackfeet and Colorado River Irrigation Projects hold regular meetings with both tribal and individual water users, with meetings held quarterly at the Blackfeet Irrigation Project and monthly at the Colorado River Irrigation Project. In contrast, BIA officials on the Pine River Irrigation Project do not meet with any non-tribal water users, and BIA officials at the Fort Belknap Irrigation Project have held few water users meetings in recent years. There was no meeting with water users at the Fort Belknap Irrigation Project to kick-off the 2005 irrigation season because the project manager position was vacant, worsening an already adversarial relationship between water users and BIA, according to water users and a local government official. Also, BIA officials on the Crow Irrigation Project have no regularly scheduled meetings with either the tribe or individual water users and, in fact, failed to send a single representative to the meeting it called in 2005 for water users to voice their concerns about project management and operations.

**Figure 7: Opportunities for Water Users to Meet with BIA Varies by Project**

Source: GAO.

<sup>a</sup>Individual water users include Indians and/or non-Indians, depending on the project.

In addition to a lack of regular meetings with all project water users, BIA has not consistently shared the type of information about project operations and finances that water users need to meaningfully participate in project decisionmaking. Although BIA officials at the Colorado River Irrigation Project share information on their budgets with water users and work collaboratively with water users to develop annual work priorities in accordance with BIA’s *Irrigation Handbook*, not all projects we visited provide or solicit this type of information. For example, BIA staff at the Wapato Irrigation Project does not solicit water users’ input on project priorities or share information on the project’s budget, according to water users we spoke with, and BIA officials at the Crow Irrigation Project do not share this type of critical information. However, some of the projects we visited have recently begun to share information on project spending and involve project water users in developing project priorities, despite not doing so historically. For example, the project management at the Blackfeet Irrigation Project began sharing budget information with its water users during the 2005 season, and the new project management at the Fort Belknap Irrigation Project stated that they plan on involving project water users in setting project priorities in the 2006 season.

---

Moreover, although some project managers and their staff are approachable and responsive on an individual basis, according to water users on some projects we visited, others stated that project management on some of BIA's irrigation projects were generally inaccessible and non-responsive. For example, BIA officials acknowledged that a former project manager at the Blackfeet Irrigation Project told water users to sue BIA to get information on project decisionmaking. In addition, some expressed concerns that BIA is less responsive to non-Indians because BIA's mission does not specifically include non-Indians. Consequently, some non-Indian water users have opted to go directly to their congressional representatives to raise their concerns. For example, non-Indian water users at the Wapato Irrigation Project have sought congressional intervention on several occasions to help compel BIA staff to disclose information about project finances, such as information related to proposed operations and maintenance fee debts and data on project land not being billed for operations and maintenance. In addition, Senator Conrad Burns and Congressman Dennis Rehberg of Montana co-sponsored a town hall meeting in 2003 to provide local water users an opportunity to voice project concerns to BIA officials. Requests by non-Indian water users for project management and regional staff to address the lack of water delivery at the Crow Irrigation Project during the month of August 2005 went largely unanswered by BIA, resulting in congressional intervention. Such lack of access and communication about project operations limits the ability of water users to have an impact on project decisions as well as the ability of BIA to benefit from this input.

---

## Long-Term Direction of BIA's Irrigation Program Depends on Resolution of a Number of Larger Issues

The long-term direction of BIA's irrigation program depends on the resolution of several larger issues. Of most importance, BIA does not know the extent to which its irrigation projects are capable of financially sustaining themselves, which hinders its ability to address long-standing concerns regarding inadequate funding. The future of BIA's irrigation program also depends on the resolution of how the deferred maintenance will be funded. BIA currently has no plans for how it will obtain funding to fix the deferred maintenance items, and obtaining this funding presents a significant challenge in times of tight budgets and competing priorities. Finally, it might be more appropriate for other entities, including other federal agencies, tribes, and water users, to manage some or all of the projects.

---

---

## The Extent to Which Projects Are Capable of Sustaining Themselves Is Unknown

BIA does not know the extent to which Indian irrigation projects are capable of sustaining themselves. Reclamation law and associated policy require the Department of the Interior's Bureau of Reclamation to test the financial feasibility of proposed projects comparing estimated reimbursable project costs with anticipated revenues. The Bureau of Reclamation then uses these reimbursable cost estimates to negotiate repayment contracts with water users, where appropriate. In contrast, Indian irrigation projects were authorized to support Indian populations residing on reservations without regard to whether the projects could be financially self-sustaining. As a result, neither the Congress nor project stakeholders have any assurance that these projects can sustain themselves. For example, a comprehensive 1930 study of BIA's irrigation program concluded that the Blackfeet and Fort Peck Irrigation Projects should be abandoned. Specifically, the report noted, "[a]fter a very careful study of all the available data relating to these projects, including a field examination, we are firmly convinced that any further attempts to rehabilitate and to operate and maintain these projects ... can result only in increasing the loss that must be accepted and sustained by the Government. *Adequate preliminary investigations and studies to which every proposed project should be subjected, in our opinion, would have condemned ... these ... projects as unfeasible.*"<sup>12</sup> [Emphasis added.]

Despite this lack of information on the overall financial situation for each of the projects, in the early 1960s BIA classified more than half of its 16 projects as fully self-supporting, on the basis of annual operations and maintenance fees they collected from water users. These self-supporting projects do not receive any ongoing appropriated funds. These projects are subject to full cost recovery despite the absence of financial information to demonstrate that the water users could sustain this financial burden. The Blackfeet and Fort Peck Irrigation Projects were two of the projects classified as fully self-supporting. While the specific financial situations for the Blackfeet and Fort Peck Irrigation Projects have likely changed since the 1920s, BIA does not know if these projects, or any of the other Indian irrigation projects, are financially self-supporting.

The heavy reliance on water users to sustain these projects has created ongoing tension between the water users and BIA. Some water users have

---

<sup>12</sup>*Survey of Conditions of the Indians in the United States: Hearings Before a Subcommittee of the Senate Committee on Indian Affairs, 71st Cong., 2d Sess. at 2219-20 (1930).*

---

complained to BIA that they cannot afford the operations and maintenance fees and they pressure BIA to keep the fees as low as possible. The Bureau of Reclamation recently conducted a study of the Pine River Irrigation Project and concluded that some of the water users could not conduct a profitable farming operation with the 2005 operations and maintenance fee of \$8.50 per acre. BIA has not responded to the Bureau of Reclamation study, and in October 2005 BIA proposed doubling the rate to \$17.00 per acre for the 2006 irrigation season even though water users claim that they cannot afford to pay a higher fee.<sup>13</sup> The operations and maintenance fee has been set at \$8.50 at the Pine River Irrigation Project since 1992 and, according to BIA officials, the collections do not provide adequate funds to properly operate and maintain the project. As a result, BIA estimates that the deferred maintenance at the project has grown to over \$20 million. Without definitive information on the financial situation of each project, BIA cannot determine what portion of project operations and maintenance costs can be reasonably borne by the water users and to what extent alternative sources of financing, such as congressional appropriations, should be pursued.

---

## There Is No Plan for How to Fund the Deferred Maintenance

Despite the estimated \$850 million in deferred maintenance and the degree to which it impedes ongoing operations and maintenance at BIA's irrigation projects, BIA currently has no plan for funding the list of deferred maintenance items. Funding deferred maintenance costs in the hundreds of millions of dollars will be a significant challenge in times of tight budgets and competing priorities. Nonetheless, officials stated that the agency has made little effort to identify options for funding the deferred maintenance. BIA acknowledges that income from ongoing operations and maintenance fees would likely be inadequate to cover the deferred maintenance, yet the agency has done little to identify alternative means of funding. According to officials, BIA has not asked the Congress for supplemental funding to cover the deferred maintenance. For example, water users report that the \$7.5 million appropriated for BIA's irrigation projects for fiscal year 2006 resulted from lobbying by concerned water users, not from BIA's efforts.<sup>14</sup> To date, BIA has primarily focused on developing and refining an accurate estimate of the cost to fix the deferred maintenance items. While

---

<sup>13</sup>70 *Fed. Reg.* 57889, 57893 (Oct. 4, 2005).

<sup>14</sup>These funds were specifically appropriated for five irrigation projects—Crow, Fort Peck, Fort Belknap, Blackfeet and Wind River—and one irrigation system.

---

developing an estimate of the projected cost is important, BIA officials believe that the agency also needs to develop a plan for ultimately funding the deferred maintenance.

Developing a plan for funding the deferred maintenance is complicated by competing priorities and a crisis-oriented management style that complicates preventative maintenance, according to BIA officials. The current state of disrepair of most of the irrigation projects results in frequent emergency situations concerning project operations and maintenance. As a result, BIA irrigation staff spends a significant amount of its time addressing emergency maintenance situations, to the detriment of other maintenance needs that are essential to sustaining the projects over the long term. As a result of this “crisis-style” management, BIA has limited time to devote to non-emergency issues such as the list of deferred maintenance items. Furthermore, this “crisis-style” management prevents BIA from devoting adequate time to preventative maintenance. For example, irrigation staff at Wind River Irrigation Project stated that making “band-aid” emergency repairs on a regular basis prevents them from addressing long-standing deferred maintenance needs, as well as from conducting strategic improvements that would help sustain the project over the long term.

---

**It Might Be More  
Appropriate for Other  
Entities to Manage Some or  
All of the Projects**

It may be beneficial to consider whether other groups for whom irrigation is a priority or an area of expertise could better manage some of the irrigation projects, including other federal agencies, Indian tribes, and water users. BIA must balance its irrigation management responsibilities with its many other missions in support of Indian communities. As the federal agency charged with supporting Indian communities in the United States, BIA’s responsibility is to administer and manage land and natural resources held in trust for Indians by the U.S. government. Administration and management of these trust lands and resources involves a wide variety of responsibilities, including law enforcement, social services, economic development, education and natural resource management. Given the multitude of responsibilities that BIA must balance, there are inherent limits on the resources and knowledge that BIA is able to devote to any one program. As a result of these limitations and competing demands, officials report that irrigation management is not a priority for BIA. The fact that many water users on the irrigation projects are now non-Indian may further encourage BIA to prioritize and devote more resources to other programs before irrigation management.

---

Successful management of the irrigation projects by other groups would depend on the unique characteristics of each project and its water users. Potential groups who may be able to assume management for some irrigation projects or portions of some irrigation projects include the following:

- *The Bureau of Reclamation.* As the federal agency charged with managing water in the western United States, the Bureau of Reclamation has extensive technical experience in managing irrigation projects and has served in a technical or advisory capacity to BIA's irrigation staff. Furthermore, efforts have been made in the past to turn over some BIA irrigation projects to the Bureau of Reclamation and the Fort Yuma Irrigation Project is currently operated by the Bureau of Reclamation. In addition, the Bureau of Reclamation utilizes management practices for its irrigation projects that maximize information sharing and collaboration with water users. For example, in contrast to BIA, the Bureau of Reclamation delegates responsibility for much of the day-to-day operations and maintenance on its irrigation projects to irrigation districts, which are organized groups of water users.
- *Indian Tribes.* Officials report that some of the tribes have staff with extensive knowledge of irrigation and water management, as well as technical training. Some tribes stated that they have a vested interest in seeing their respective projects succeed, and they would like to assume direct responsibility for their reservation's irrigation project, assuming the deferred maintenance items are fixed before the turnover occurs. Turning over some of the BIA projects to Indian tribes would be an option where tribes have the management and technical capability to assume responsibility for an irrigation project.
- *Water Users.* Water users have extensive familiarity with the day-to-day management of the projects and in some cases already handle many day-to-day operations and maintenance activities. For example, the Crowheart Water Users Association, a group of water users at the Wind River Irrigation Project, have successfully assumed responsibility for most of the maintenance needs on their portion of the project. In exchange for their efforts, BIA refunds to the Crowheart Water Users Association 50 percent of their annual operation and maintenance fees. Through this arrangement, the Crowheart Water Users Association believes it has been able to more effectively address maintenance needs and increase project efficiency. Turning over some of the BIA projects to

---

water users would be an option where water users share similar interests and have positive working relationships, as well as the desire to organize an irrigation district or association.

Any successful alternative management option would have to consider the sometimes disparate interests and priorities among water users. In some cases, a combination of the various alternative management options may be beneficial and feasible. This type of arrangement is currently being considered for the Flathead Irrigation Project, where BIA is currently in the process of turning over the operation and management of the project to a collaborative management group that may include the tribe, individual Indian water users, and non-Indian water users. However, regardless of the alternative management option, water users and tribal officials repeatedly stated that they would not be willing or able to take over project operations and maintenance unless the deferred maintenance had already been addressed or adequate funding was available to address the deferred maintenance needs.

---

## Conclusions

Since BIA historically has not had adequate funds to operate and maintain the projects, the projects are in a serious state of disrepair. BIA is in the process of implementing its plan to develop an accurate list and estimate of the deferred maintenance needs for each project. However, some of the projects also have day-to-day management shortcomings regarding technical support and stakeholder involvement that need to be addressed. BIA's decentralized organizational structure combined with the difficulty in attracting and retaining highly qualified project managers at remote Indian reservations led to some poor decisionmaking at some of the projects. It is critically important that project managers, especially those with less than desirable qualifications, have the necessary level of technical support to prevent poor decisions from being made in the future.

A lack of adequate stakeholder involvement at some projects has also seriously undermined project accountability. Unlike most other BIA programs, the operations and maintenance of the irrigation projects are funded almost entirely by the project beneficiaries—the water users, many of whom are non-Indian. Consequently, BIA is accountable to these water users and these water users expect to have an active voice in project operations and maintenance. Some projects have not fulfilled their obligations to regularly meet with project stakeholders, creating an adversarial environment in which BIA and project water users do not trust each other. This failure to involve stakeholders in the management of their

---

own projects means that BIA does not benefit from water user expertise and has resulted in widespread feelings that BIA is non-responsive and evasive, alienating many water users who feel disenfranchised. Moreover, this failure has limited the ability of stakeholders to hold BIA accountable for its decisions and actions.

In addition to some shortcomings with BIA's ongoing day-to-day management of some of the projects, we also found that information on the financial sustainability of the projects is needed to help address the long-term direction of BIA's irrigation program. BIA's 16 irrigation projects were generally built in the late 1800s and early 1900s to further the federal government's Indian policy of assimilation. The government made the decision to build these projects to support and encourage Indians to become farmers. This decision was generally not based on a thorough analysis designed to ensure that only cost effective projects were built. As a result, the financial sustainability of some of the projects has always been questionable, ultimately creating tension between BIA and its water users. BIA is under constant pressure to raise annual operations and maintenance fees to collect adequate funds to maintain the projects, while many water users contend that they do not have the ability to pay higher fees. Without a clear understanding of the financial sustainability of the projects, BIA does not know whether it is practical to raise operation and maintenance fees, or whether alternative sources of financing should be pursued. Information on financial sustainability, along with accurate deferred maintenance information, are both critical pieces of information needed to have a debate on the long-term direction of BIA's irrigation program. Once this information is available, the Congress and interested parties will be able to address how the deferred maintenance will be funded and whether entities other than BIA could more appropriately manage some or all of the projects.

---

## Recommendations for Executive Action

We recommend that the Secretary of the Interior take the following three actions.

To improve the ongoing management of the projects in the short-term, we recommend that the Secretary direct the Assistant Secretary for Indian Affairs to

- provide the necessary level of technical support for project managers who have less than the desired level of engineering qualifications by putting these projects under the direct supervision of regional or central

---

irrigation office staff or by implementing more stringent protocols for engineer review and approval of actions taken at the projects; and

- require, at a minimum, that irrigation project management meet twice annually with all project stakeholders—once at the end of a season and once before the next season—to provide information on project operations, including budget plans and actual annual expenditures, and to obtain feedback and input.

To obtain information on the long-term financial sustainability of each of the projects, we recommend that the Secretary direct the Assistant Secretary for Indian Affairs to conduct studies to determine both how much it would cost to financially sustain each project, and the extent to which water users on each project have the ability to pay these costs. This information will be useful to congressional decisionmakers and other interested parties in debating the long-term direction of BIA's irrigation program.

---

## Agency Comments and Our Evaluation

We provided the Department of the Interior with a draft of this report for review and comment. However, no comments were provided in time to be included as part of this report.

As agreed with your office, unless you publicly announce the contents of this report earlier, we plan no further distribution until 30 days from the report date. At that time, we will send copies of this report to the Secretary of the Interior, the Assistant Secretary for Indian Affairs, as well as to appropriate Congressional Committees, and other interested Members of Congress. We also will make copies available to others upon request. In addition, the report will be available at no charge on the GAO Web site at <http://www.gao.gov>. Contact points for our Offices of Congressional Relations and Public Affairs may be found on the last page of this report.

---

If you or your staff have questions about this report, please contact me at (202) 512-3841 or [nazzaror@gao.gov](mailto:nazzaror@gao.gov). Key contributions to this report are listed in appendix III.

# Objectives, Scope, and Methodology

---

We were asked to address several issues concerning the Department of the Interior's Bureau of Indian Affairs' (BIA) management of its 16 irrigation projects. Specifically, we were asked to examine (1) BIA's estimated deferred maintenance cost for its 16 irrigation projects; (2) what shortcomings, if any, exist in BIA's current management of its irrigation projects; and (3) any issues that need to be addressed to determine the long-term direction of BIA's irrigation program.

For all three objectives, we collected documentation on BIA's 16 irrigation projects from officials in each of BIA's central Irrigation, Power, and Safety of Dams offices (central irrigation offices) located in Washington, D.C., and other locations in the western United States. We also visited and collected information from each of BIA's four regional offices that oversee the 16 irrigation projects, including the Rocky Mountain, Northwest, Western, and Southwest regions. In addition, we visited 9 of the 16 projects located across all 4 regions. Specifically, we visited: (1) the Blackfeet Irrigation Project, (2) the Colorado River Irrigation Project, (3) the Crow Irrigation Project, (4) the Fort Belknap Irrigation Project, (5) the Pine River Irrigation Project, (6) the San Carlos Indian Works Irrigation Project, (7) the San Carlos Joint Works Irrigation Project, (8) the Wapato Irrigation Project, and (9) the Wind River Irrigation Project. We selected these projects based on a combination of factors aimed at maximizing our total coverage (over 50 percent of the projects), visiting at least one project in each of the regions where irrigation projects are located, visiting the project with the highest deferred maintenance cost estimate in each region using BIA's fiscal year 2004 data, and visiting what BIA considered to be the three best projects and the five worst projects. During the site visits, we collected project-specific information from BIA officials and project stakeholders including tribes and water users. We also met with and collected documentation from the Department of the Interior's Bureau of Reclamation, the federal agency charged with managing water in the western United States, for comparative purposes.

To examine BIA's estimated deferred maintenance cost for its 16 irrigation projects, we toured each of the 9 projects we visited to see examples of deferred maintenance and their impact, and we reviewed BIA's lists of deferred maintenance items and associated cost estimates for both fiscal years 2004 and 2005. We also reviewed the methodology BIA used to develop these lists and estimates and interviewed BIA staff involved in developing these lists and estimates to identify major deficiencies. Although we analyzed the cost estimates provided by BIA, we did not develop our own estimate of deferred maintenance. To assess the reliability

of data we received from BIA on deferred maintenance, we interviewed officials most knowledgeable about the collection and management of these data. We reviewed the relevant controls and found them adequate. We also conducted tests of the reliability of the computerized data. On the basis of these interviews, tests, and reviews, we concluded that BIA's estimates of deferred maintenance were sufficiently reliable for the purposes of this report.

To examine what shortcomings, if any, exist in BIA's current management of its irrigation projects, we reviewed relevant federal regulations and agency guidance, and analyzed BIA-wide and project-specific management protocols and systems for the nine projects we visited. We also reviewed general guidance on internal control standards, including risk assessment, monitoring, and information and communication. We interviewed BIA officials from the central irrigation office in Washington, D.C., Colorado, Oregon, Arizona and Montana. We also interviewed BIA regional officials as well as agency and project officials associated with each of the 9 projects we visited for information on key shortcomings in BIA's management of its irrigation projects. Finally, we interviewed a variety of project stakeholders—including tribal representatives, individual Indian water users, and non-Indian water users—at each of the 9 projects we visited for information on key shortcomings in BIA's management.

Finally, to examine any issues that need to be addressed to determine the long-term direction of BIA's irrigation program, we reviewed previous studies highlighting key issues impacting the future of BIA's irrigation program. This included reviewing previous studies conducted by GAO, the Department of the Interior's Office of Inspector General, and the Bureau of Reclamation, as well as other studies conducted at the request of the Congress. We also reviewed relevant federal regulations and agency guidance, as well as historical information relevant to BIA's management of the irrigation program, including budget information and agency memos. Finally, we interviewed BIA officials from the central irrigation office, regional offices, and the 9 projects we visited for information on the key challenges impacting the long-term direction of the program. We also interviewed project stakeholders—including tribal representatives and water users—at the 9 projects we visited for information on the key issues impacting the future direction of BIA's irrigation program.

We performed our work between March 2005 and February 2006 in accordance with generally accepted government auditing standards.

# Profiles of the Nine Irrigation Projects GAO Visited

This appendix contains brief profiles of the nine irrigation projects we visited. Each project profile begins with a short overview of basic facts about the project, followed by a set of bullet points describing the key operations and maintenance concerns and the key management concerns expressed to us by BIA officials, tribal officials, or water users during our site visits.

## Blackfeet Irrigation Project

The Blackfeet Irrigation Project was authorized for construction in 1907, but construction was never completed. It consists of 38,300 acres being assessed operations and maintenance fees (and 113,100 acres authorized for irrigation). The project is located in Browning, Montana on the Blackfeet Indian Reservation of Montana, home of the Blackfeet Tribe. About 60 percent of the project's land is owned by either the tribe or individual tribal members, and about 40 percent is owned by non-Indians. BIA currently estimates the project's total deferred maintenance costs to be \$29,130,222. See figure 8 below for pictures of the Blackfeet Irrigation Project.

**Figure 8: Pictures of the Blackfeet Irrigation Project (July 2005)**

Source: GAO.  
Deteriorating Canal Lining

Leaking Check Gate

## Key Operations and Maintenance Concerns Expressed During Our Site Visit

- Fees are insufficient to cover the costs of project operations and maintenance.

- 
- Weeds and overgrown vegetation are problematic and impair water flow.
  - Deferring maintenance has led to bigger and more costly maintenance problems.
  - Deferring maintenance decreases water efficiency and access to water.
  - The project as built cannot meet the increased demand for water.

---

### Key Management Concerns Expressed During Our Site Visit

- Communication between BIA and the water users could be improved, such as enhancing transparency, increasing involvement, and meeting separately with the tribe.
- Lack of training and expertise undermines BIA's management of the project.
- Inadequate oversight within BIA exacerbates problems associated with lack of training and expertise.
- Project staff should report to managers with expertise in irrigation and/or engineering.
- BIA protocols are too vague, such as when project staff should consult with regional or central irrigation office engineers.
- BIA needs to be able to measure water in order to better manage water deliveries and identify critical problems.
- Irrigation is a low priority for BIA.

---

### Colorado River Irrigation Project

The Colorado River Irrigation Project was the first BIA irrigation project built, authorized for construction in 1867, but construction was never completed. It is now considered the best of BIA's 16 revenue-generating irrigation projects due, in part, to its innovative leadership and customer service attitude. The project has adopted a user fee system that measures and assesses water users based on their actual usage as well as charging water users additional fees for using more water than their individual allotment. The project is located in Parker, Arizona on the Colorado River

---

Indian Reservation, home of the Colorado River Indian Tribes. The project, which has a 10-month-long irrigation season, consists of 79,350 assessed acres (and 107,588 acres authorized for irrigation), and is composed entirely of Indian land—land owned by the tribe or its members. BIA currently estimates the project’s total deferred maintenance costs to be \$134,758,664. See figure 9 for pictures of the Colorado River Irrigation Project.

---

**Figure 9: Pictures of the Colorado River Irrigation Project (June 2005)**

Source: GAO.  
Concrete-lined Irrigation Canal

Leaking Check Gate

---

### Key Operations and Maintenance Concerns Expressed During Our Site Visit

- Development leases may no longer be allowed, potentially resulting in irrigable land going un-irrigated and costing the tribe and project potential revenues.
- Replacement of deteriorating irrigation structures needed.
- Canal needs new lining due to years of deterioration and, in some cases, poor construction.
- Clearing moss and pondweed is needed lest the flow of water be impaired.
- New irrigation structures needed to regulate water flow where ditches converge.

---

---

## Key Management Concerns Expressed During Our Site Visit

- Understaffing and high turnover of project system operators adversely impact water deliveries in that there are too few system operators to deliver water in a timely manner.
- BIA procurement and contracting is time-consuming and costly.
- Annual project budget may understate actual funding because it does not include possible additional fees.
- Operations and maintenance fees can only be used to address operations and maintenance on the existing project, rather than expand the project.

---

## Crow Irrigation Project

The Crow Irrigation Project was authorized for construction in 1890, but construction was never completed. It is one of the oldest of BIA's 16 revenue-generating irrigation projects with 38,900 acres being assessed operations and maintenance fees (and 46,460 acres authorized for irrigation). The project is located in Crow Agency, Montana on the Crow Reservation, home of the Crow Tribe of Montana. About 56 percent of the project land is owned by either the tribe or individual tribal members, and about 44 percent is owned by individual non-Indians. BIA currently estimates the project's total deferred maintenance costs to be \$54,550,496. See figure 10 for pictures of the Crow Irrigation Project.

---

**Figure 10: Pictures of the Crow Irrigation Project (March 2005)**

Abandoned Car in Deteriorated Canal

Crumbling Irrigation Structure

---

---

Key Operations and  
Maintenance Concerns  
Expressed During Our Site  
Visit

- Fees are insufficient to cover the project's operations as well as maintenance costs.
- Weeds, overgrown vegetation, tree roots and garbage impair water flow in the canals and ditches.
- Crumbling or dilapidated irrigation structures impair water delivery.
- The repair of Rotten Grass Flume needs further work.
- Canal erosion causes sink holes and impairs water flow.
- Deferred maintenance of certain structures leads to safety concerns, such as when BIA staff must go into the canal to raise or lower broken check gates.

---

Key Management Concerns  
Expressed During Our Site  
Visit

- The project's recently reassigned project manager was under-qualified, resulting in some decisions that hurt the project and undermine water delivery, such as the Rotten Grass Flume incident.
- BIA has inadequate oversight of the project manager and his decisions.
- BIA relies on "crisis-style" management rather than a long-term plan to manager project.
- Allegations that a former project manager inappropriately used fees and was not accountable for financial decisions.<sup>1</sup>
- Communication breakdown between BIA and its water users.
- The project may be better managed if BIA turned over the project's management to water users or tribe.
- Irrigation is a low priority for BIA.

---

<sup>1</sup>GAO referred these allegations to the Department of the Interior's Office of the Inspector General in August 2005.

## Fort Belknap Irrigation Project

The Fort Belknap Irrigation Project was authorized for construction in 1895, but construction was never completed. It is one of the smallest of BIA's 16 revenue-generating irrigation projects with 9,900 acres being assessed operations and maintenance fees (and 13,320 acres authorized for irrigation). The project is located in Harlem, Montana on the Fort Belknap Reservation, home of the Fort Belknap Indian Community of the Fort Belknap Reservation of Montana. About 92 percent of the land is owned by either the tribe or individual tribal members, and about 8 percent is owned by individual non-Indians. BIA currently estimates the project's total deferred maintenance costs to be \$17,535,494. See figure 11 for pictures of the Fort Belknap Irrigation Project.

Figure 11: Pictures of the Fort Belknap Irrigation Project (July 2005)

Source: GAO.

Graffiti on Irrigation Structure

Overgrown Vegetation Around Dilapidated Irrigation Check Structure

## Key Operations and Maintenance Concerns Expressed During Our Site Visit

- Fees and appropriations are insufficient to cover the project maintenance needs.
- Weeds and overgrowth of vegetation impair water flow.
- Canal erosion caused by cattle-crossings impairs water flow.
- Deteriorated and leaking irrigation structures impair water delivery.
- Additional equipment is needed to conduct maintenance on project.

- 
- Deferred maintenance exacerbates problems of poor farming land and low crop values.

---

### Key Management Concerns Expressed During Our Site Visit

- Poor communication and tense relations between BIA and water users.
- Staff turnover and difficulty finding qualified staff are problematic.
- Some project staff lack adequate expertise and training to manage project.
- Lack of transparency and water management plan limits BIA accountability.
- Some water users want BIA to begin water delivery earlier in season.

---

### Pine River Irrigation Project

The Pine River Irrigation Project is the only one of BIA's 16 revenue-generating irrigation projects located in the Southwest region, with 11,855 acres being assessed operations and maintenance fees. Construction on the project was never completed. The project is located in Ignacio, Colorado on the Southern Ute Reservation, home to the Southern Ute Indian Tribe of the Southern Ute Reservation, Colorado. About 85 percent of the land is owned by either the tribe or individual tribal members, and about 15 percent is owned by individual non-Indians. BIA currently estimates the project's total deferred maintenance costs to be \$20,133,950. See figure 12 for pictures of the Pine River Irrigation Project.

Figure 12: Pictures of the Pine River Irrigation Project (August 2005)

Source: GAO.

Irrigation Ditch in Need of Reshaping

Overgrown Vegetation in Irrigation Ditch

### Key Operations and Maintenance Concerns Expressed During Our Site Visit

- Collections from operations and maintenance fees do not provide adequate funds to properly operate and maintain the project.
- The project's operations and maintenance fees have not been raised since 1992. BIA has proposed doubling the fees from \$8.50 per acre to \$17.00 per acre for the 2006 irrigation season.
- The project's cash reserves were depleted in 2004.
- The project has a number of old water delivery contracts, referred to as "carriage contracts," from the 1930s that are at low fixed rates. Under some of the contracts the water users only pay \$1.00 per acre to the project.

### Key Management Concerns Expressed During Our Site Visit

- The practice of subsidizing the project through other BIA programs, such as Natural Resources, Roads Construction, Roads Maintenance and Realty, was scheduled to end at the end of fiscal year 2005. Alternative sources of funds must be found for the project manager and clerk positions.
- "Crisis-style" management only, no preventive maintenance.

- Project staff does not formally meet with or provide information to individual water users.
- A Bureau of Reclamation study in 1999 found that some of the water users could not afford to pay fees of \$8.50 to the project and operate a profitable farming operation. BIA has not responded to the study.
- The former project manager stated that the BIA irrigation projects should be turned over to the Bureau of Reclamation.

## San Carlos Indian Works Irrigation Project (Pima)

The San Carlos Indian Works Irrigation Project was authorized for construction in 1924, but construction was never completed. It is one of the newest of BIA's 16 revenue-generating irrigation projects with 50,000 acres being assessed operations and maintenance fees (and 50,546 acres authorized for irrigation). The project, also referred to as Pima, is located in Sacaton, Arizona on the Gila River Indian Reservation, home of the Gila River Indian Community. It is served both by its own infrastructure and by that of the San Carlos Joint Works Irrigation Project. The project land is generally owned by the tribe or tribal members, with about 99 percent of the land owned by either the tribe or individual tribal members, and about 1 percent owned by individual non-Indians. BIA currently estimates Pima's total deferred maintenance costs to be \$62,865,503. See figure 13 for pictures of the San Carlos Indian Works Irrigation Project.

Concrete-lined Irrigation Canal

Canal with Vegetation Growth

---

---

Key Operations and  
Maintenance Concerns  
Expressed During Our Site  
Visit

- Inefficiency in water delivery results in fewer water users being able to receive water, leading to idle acreage in some cases.
- Clearing tumbleweeds and other vegetation that can clog culverts are a recurring problem and represents a large part of the project's spending on operations and maintenance.
- Erosion is a continuing problem, in part, because the canal is used for both water deliveries as well as drainage.
- BIA staff has a "wish list" of items that would bring the project into top condition, extending beyond the basic deferred maintenance.
- Project infrastructure may not have the capacity to deliver water to all potential water users.

---

Key Management Concerns  
Expressed During Our Site  
Visit

- 2007 turnover to water users is still underway.
- Insufficient reserve funds means that project staff may not have enough money to conduct needed maintenance towards the end of the year.
- Vacancies are a constant problem at the project, leaving too few staff to conduct project maintenance.
- BIA is too slow to respond to water users' requests for repairs.

---

San Carlos Joint Works  
Irrigation Project  
(Coolidge)

The San Carlos Joint Works Irrigation Project was authorized for construction in 1924, but construction was never completed. It provides water to non-Indian irrigators as well as the San Carlos Indian Works Irrigation Project. It consists of 100,000 acres being assessed operations and maintenance fees (and 100,546 acres authorized for irrigation), with 50 percent of the land owned by non-Indian irrigators and 50 percent owned by Indian irrigators (in the form of the San Carlos Indian Works Irrigation Project). The project is located in Coolidge, Arizona. BIA currently estimates Coolidge's total deferred maintenance costs to be \$5,775,427. See figure 14 for pictures of the San Carlos Joint Works Irrigation Project.

Figure 14: Pictures of the San Carlos Joint Works Irrigation Project (June 2005)

Deteriorating China Wash Flume

Source: GAO.

Concrete that Fell from Flume

Weeds in Irrigation Canal

### Key Operations and Maintenance Concerns Expressed During Our Site Visit

- Lack of certainty in BIA's ability to deliver requested water to all water users has led some to purchase additional water from outside of the project.
- Silt removal from irrigation canals and ditches is a recurring problem, leading BIA to purposefully over-excavate the main canal each year in an attempt to catch excess silt that can clog culverts and prevent water delivery impairments.
- Repair of China Wash Flume is an expensive undertaking, but the flume's failure could jeopardize water deliveries for much of the project.
- Removal of weeds to prevent clogged culverts is a recurring problem for the project.

### Key Management Concerns Expressed During Our Site Visit

- 2007 turnover to water users is under way but not finalized.
- Lawsuit against BIA's increase in operations and maintenance fees resulted in some water delivery delays while the lawsuit is pending.
- Contracting delays within BIA have resulted in postponed project maintenance.

- Turnover of BIA staff and lack of water user inclusion in project decisionmaking impedes effective communication.
- BIA lacks accountability to water users in terms of how it spends operations and maintenance fees.

## Wapato Irrigation Project

The Wapato Irrigation Project is one of the oldest and largest of BIA's 16 revenue-generating irrigation projects with 96,443 acres being assessed operations and maintenance fees (and 145,000 acres authorized for irrigation). It was authorized for construction in 1904, but construction was never completed. The project is located in Yakima, Washington on the Yakama Reservation, home of the Confederated Tribes and Bands of the Yakama Nation. About 60 percent of the project land is owned by either the tribe or individual tribal members, and about 40 percent is owned by individual non-Indians. BIA currently estimates the project's total deferred maintenance costs to be \$183,128,886. See figure 15 for pictures of the Wapato Irrigation Project.

Figure 15: Pictures of the Wapato Irrigation Project (April 2005)

Source: GAO.

Weed Clearing Machine

Irrigation Canal with Crumbling Concrete Lining

---

---

Key Operations and  
Maintenance Concerns  
Expressed During Our Site  
Visit

- Deterioration of project prevents some water users from receiving water.
- Lack of regular project maintenance has led many water users to make repairs on their own in order to irrigate crops.
- Water users claim that project staff performs inadequate or faulty repairs, resulting in wasted operations and maintenance payments or the need for water users to fix the sloppy repairs.
- Fees are insufficient because (a) rates have been set too low, and (b) the tribe's appeal of BIA's operations and maintenance bills since 2001 has decreased income by at least \$2 million annually because the agency will not collect on these bills or issue subsequent bills until the matters raised in the appeal are resolved.
- Fees are insufficient to cover both maintenance and administrative costs, such as salaries and benefits, leading to suggestions that BIA cover such costs.

---

Key Management Concerns  
Expressed During Our Site  
Visit

- Understaffing due to inadequate funds and difficulty in finding qualified staff has resulted in too few staff to operate and maintain project.
- BIA relies on "crisis-style" management to manage project, resulting in a lack of planning and preventive maintenance.
- Water users lack voice in project decisionmaking, resulting in concerns about limited accountability of project staff to its water users.
- Alleged errors with operations and maintenance billing—such as BIA billing dead landowners and BIA overbilling living landowners—led the tribe and its members to appeal BIA's billing of operations and maintenance fees. Resolution of these appeals is still pending within the agency. BIA will not collect on these bills or issue subsequent bills until the matters raised in the appeal are resolved.

---

Wind River Irrigation  
Project

The Wind River Irrigation Project was authorized for construction in 1905, but construction was never completed. It is one of BIA's 16 revenue-generating irrigation projects with 38,300 acres being assessed operations

and maintenance fees (and 51,000 acres authorized for irrigation). The project is located in Fort Washakie, Wyoming on the Wind River Reservation, home of the Arapaho Tribe of the Wind River Reservation and the Shoshone Tribe of the Wind River Reservation. About 67 percent of the project land is owned by either the tribe or individual tribal members, and about 33 percent is owned by individual non-Indians. BIA currently estimates the project's total deferred maintenance costs to be \$84,956,546. See figure 16 for pictures of the Wind River Irrigation Project.

**Figure 16: Pictures of the Wind River Irrigation Project (July 2005)**

Source: GAO.

Beaver Holes and Overgrown Vegetation in Canal

Cattle-Crossing Eroding Irrigation Canal

### Key Operations and Maintenance Concerns Expressed During Our Site Visit

- Weeds and tree roots impair water flow and lead to seepage.
- Cattle-crossings erode canal banks and impair water flow.
- Deteriorating irrigation infrastructure impairs water delivery.
- Additional water storage and improved efficiency needed to meet demand for water.
- Deferring maintenance undermines long-term sustainability of project.
- BIA financial management may limit ability of project staff to conduct needed maintenance in short maintenance season.

---

---

**Key Management Concerns  
Expressed During Our Site  
Visit**

- BIA relies on “crisis-style” management and “band-aid” solutions rather than a long-term plan to manage project.
- Poor communication between BIA and water users.
- Water users are not involved enough in project decisionmaking.
- Supervision of project staff is insufficient and BIA is not accountable to water users.
- Turnover of BIA staff is problematic.
- Some water users want to manage all or part of the project.

# GAO Contact and Staff Acknowledgments

---

---

## GAO Contact

Robin M. Nazzaro, (202) 512-3841, [nazzaror@gao.gov](mailto:nazzaror@gao.gov)

---

## Staff Acknowledgments

In addition to those individuals named above, Jeffery D. Malcolm, Assistant Director, Tama R. Weinberg, Rebecca A. Sandulli, and David A. Noguera made key contributions to this report. Also contributing to the report were Richard P. Johnson, Nancy L. Crothers, Stanley J. Kostyla, Kim M. Raheb, and Jena Y. Sinkfield.

---

## GAO's Mission

The Government Accountability Office, the audit, evaluation and investigative arm of Congress, exists to support Congress in meeting its constitutional responsibilities and to help improve the performance and accountability of the federal government for the American people. GAO examines the use of public funds; evaluates federal programs and policies; and provides analyses, recommendations, and other assistance to help Congress make informed oversight, policy, and funding decisions. GAO's commitment to good government is reflected in its core values of accountability, integrity, and reliability.

---

## Obtaining Copies of GAO Reports and Testimony

The fastest and easiest way to obtain copies of GAO documents at no cost is through GAO's Web site ([www.gao.gov](http://www.gao.gov)). Each weekday, GAO posts newly released reports, testimony, and correspondence on its Web site. To have GAO e-mail you a list of newly posted products every afternoon, go to [www.gao.gov](http://www.gao.gov) and select "Subscribe to Updates."

---

## Order by Mail or Phone

The first copy of each printed report is free. Additional copies are \$2 each. A check or money order should be made out to the Superintendent of Documents. GAO also accepts VISA and Mastercard. Orders for 100 or more copies mailed to a single address are discounted 25 percent. Orders should be sent to:

U.S. Government Accountability Office  
441 G Street NW, Room LM  
Washington, D.C. 20548

**Congress of the United States**  
**Washington, DC 20515**

April 22, 2016

President Barack Obama  
The White House  
1600 Pennsylvania Avenue NW  
Washington, D.C. 20500

Dear Mr. President:

We the undersigned Members of Congress write to thank you and the Department of the Interior (DOI) for removing the Atlantic Ocean lease sale from the 2017-2022 Outer Continental Shelf (OCS) Oil and Gas Leasing Proposed Program.

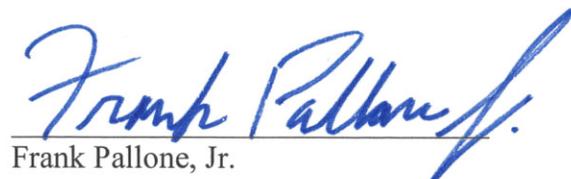

On behalf of our constituents and all those opposed to offshore drilling in the Atlantic Ocean, we thank you for recognizing that offshore drilling along the East Coast is an unnecessary risk to our coastal economies and incompatible with important existing coastal activities, and we hope that the DOI will take the necessary steps to prevent any offshore drilling in these regions in the future. Nearly 1.4 million jobs and over \$95 billion in gross domestic product are generated by healthy ocean ecosystems from tourism, fisheries, and coastal recreation. Additionally, Atlantic drilling could potentially impede ongoing military and space exploration activities along the coast. Your Administration listened to more than 110 East Coast municipalities, as well as to the concerns of more than 850 federal, state, and local elected officials and 1,100 business interests that have publically opposed offshore development.

Our nation has seen the devastation that comes from offshore drilling. From the BP Deepwater Horizon disaster, to the chronic leaks happening on a daily basis from wells and infrastructure in the Gulf of Mexico, to failed infrastructure like that which caused the Santa Barbara disaster, oil spills do not respect state boundaries and pose grave risks to coastal communities and marine life.

We appreciate the Administration's willingness to listen to our constituents and protect the healthy oceans that are our economic drivers and crucial to our coastal ways of life.

Sincerely,

  
Donald S. Beyer Jr.

  
Frank Pallone, Jr.

## Hearing Memorandum

April 26, 2016

To: All Subcommittee on Oversight and Investigations Members

From: Majority Committee Staff  
Subcommittee on Oversight & Investigations, x5-7107

Hearing: Oversight hearing titled “*The Consequences of Federal Land Management along the U.S. Border to Rural Communities and National Security*”

---

The Subcommittee on Oversight and Investigations will hold an oversight hearing on “*The Consequences of Federal Land Management along the U.S. Border to Rural Communities and National Security*” on **April 28, 2016** at **2:30 p.m.** in **Room 1334 Longworth House Office Building**. The hearing will focus on the challenges to maintaining rural communities and securing the border under federal land management regimes.

### Policy Overview

- Rural counties face significant challenges to fund public responsibilities due to policies that impede financial autonomy and are hostile to historic local industries that built communities.<sup>1</sup>
- The United States Border Patrol faces significant impediments to securing the border due to enforcement of land management regulations resulting in areas hospitable to smuggling operations and environmental degradation.
- Borderland communities are left vulnerable to illegal cross border activity,<sup>2</sup> as vast expanses are left unpatrolled because Border Patrol has moved security infrastructure further from the border.
- Despite a 2006 Memorandum of Understanding between the Department of Homeland Security, the Department of Agriculture and the Department of the Interior, which is designed to facilitate cooperation and communication between the agencies, permits are needed to effectively patrol the border and can take years to be issued by land managers<sup>3</sup> if they are granted at all.

## **Background**

### *Border Security on Federal Land*

The United States Border Patrol is charged with securing the border with Canada and Mexico containing hundreds of miles and millions of acres of federal land. Over 40% of the Southern border is managed by the Department of the Interior and the Forest Service.<sup>4</sup>

Congress mandated that the Border Patrol achieve “operational control” of the international borders of the United States. Operational control is defined in statute as “the prevention of all unlawful entries into the United States, including entries by terrorists, other unlawful aliens, instruments of terrorism, narcotics, and other contraband.”<sup>5</sup> While Congress has authorized large increases in manpower and equipment for the Border Patrol, it has left regulatory obstacles in their path which make operational control less attainable.

---

<sup>4</sup> [Southwest Border: More Timely Border Patrol Access and Training Could Improve Security Operations and Natural Resource Protection on Federal Lands](#). U.S. Government Accountability Office. October 2010. Page 1.

<sup>5</sup> Public Law 109-367 Section 2(b)

There are many obstacles to achieving operational control on federal lands, including the remote and rugged nature of the property. Federal lands are targeted by criminals for drug smuggling, human trafficking, illegal immigration, potential terrorist movement, and other violent crimes such as murders, rapes, robberies, and kidnappings.<sup>6</sup>

Another impediment to securing the border continues to be the lack of access granted to agents on federal land. A turf war between the Border Patrol and federal land managers within the Department of the Interior and the Department of Agriculture places national security at risk. Currently, land management bureaus have the power to thwart border security activities under authorities created by environmental laws such as the Wilderness Act and the Endangered Species Act. These laws effectively block the Border Patrol from taking the actions needed to protect federal lands and control the border, as drug smugglers and human traffickers are left to enter the country undeterred.

On federal land, the Border Patrol must obtain permission place monitoring equipment, to move equipment, to place temporary camps nearer to the border, and even to maintain roads.<sup>7</sup> Land managers can take months to grant these authorizations to Border Patrol. At times, permission is not given leaving heavily trafficked areas unprotected.<sup>8</sup>

A 2006 Memorandum of Understanding (MOU) agreed to by the Department of Homeland Security, the Department of the Interior, and the Department Agriculture sought to facilitate communication, coordination and access to federal lands.<sup>9</sup> Despite good intentions, the MOU lacks any mechanism to enforce accountability and distinct interpretations of the language within the MOU have continued to delay security access to federal land. Land managers are able to make financial demands in exchange for access shifting federal funds between agencies outside the appropriations process.<sup>10</sup>

Sources: United States Geological Survey and GAO.

Nearly unfettered access onto our federal borderlands by illegal border crossers has damaged natural and cultural sites.<sup>11</sup> Tons of litter and other biological pollutants are left behind as illegal traffic tramples federal property.<sup>12</sup> Cartels and smugglers are not known for their adherence to environmental law, but the Border Patrol is bound by the restrictions mandated to them by federal land managers.

The Government Accountability Office (GAO) confirmed that illegal border crossers are responsible for significant fires on federal lands near the border.<sup>13</sup> These fires devastate the environment and destroy livelihoods. The wildfires in Arizona during the summer of 2011 saw hundreds of thousands of acres scorched, leaving private homes and ranches in ruins. Taxpayers are left to pick up the tab for tens of millions in fire suppression costs and yet the smugglers continue to cross federal lands unabated.<sup>14</sup>

Thousands of migrants continue to die in attempts to cross the border with a strong concentration on federal land. The map shows reported migrant deaths in the Tucson Sector from 2015. Significant efforts are made by the Border Patrol and country governments to return the deceased to their families.<sup>23</sup>

### *Challenges to Federal Land Communities*

Rural communities particularly in the West have survived by providing the country with food and other resources by working federal lands. However, these communities face increased pressures from the government and outside entities that make it increasingly unsustainable to provide basic necessities.

Many communities built economies around timber harvesting on federal lands. As regulations restricted the industry communities were left with significant revenue shortfalls and depressed economies. Although some relief has been provided the lack of surety does make up for the damage caused by draconian regulation.

Ranchers have also faced increasing pressures due to regulations and reduction of grazing permits.<sup>24</sup> As these challenges mount, rural communities are unable to support services, such as schools.<sup>25</sup> Ultimately, families are forced elsewhere and once vibrant towns are depleted.

## AMENDMENT TO H.R. 4909 OFFERED BY MR. BISHOP OF UTAH

At the end of division B of the bill, add the following  
new title:

1 **TITLE XXX—UTAH TEST AND**  
2 **TRAINING RANGE ENCROACH-**  
3 **MENT PREVENTION AND TEM-**  
4 **PORARY CLOSURE AUTHORI-**  
5 **TIES**

Sec. 3001. Findings and definitions.

### Subtitle A—Utah Test and Training Range

- Sec. 3011. Management of BLM land.
- Sec. 3012. Temporary closures.
- Sec. 3013. Community resource group.
- Sec. 3014. Liability.
- Sec. 3015. Effects of title.

### Subtitle B—Land Exchange

- Sec. 3021. Findings and purpose.
- Sec. 3022. Definitions.
- Sec. 3023. Exchange of Federal land and non-Federal land.
- Sec. 3024. Status and management of non-Federal land after exchange.
- Sec. 3025. Hazardous materials.

### Subtitle C—Highway Rights-of-way

- Sec. 3031. Recognition and transfer of certain highway rights-of-way.

6 **SEC. 3001. FINDINGS AND DEFINITIONS.**

7 (a) FINDINGS.—Congress finds that—

- 8 (1) the testing and development of military  
9 weapons systems and the training of military forces

1 are critical to ensuring the national security of the  
2 United States;

3 (2) the Utah Test and Training Range is a  
4 unique and irreplaceable national asset at the core  
5 of the test and training mission of the Department  
6 of Defense;

7 (3) continued access to the special use airspace  
8 and land that comprise the Utah Test and Training  
9 Range, under the terms and conditions described in  
10 this title is a national security priority;

11 (4) multiple use of, sustained yield activities on,  
12 and access to the BLM land are vital to the cus-  
13 toms, culture, economy, ranching, grazing, and  
14 transportation interests of the counties in which the  
15 BLM land is situated; and

16 (5) the limited use by the military of the BLM  
17 land and airspace above the BLM land is vital to  
18 improving and maintaining the readiness of the  
19 Armed Forces.

20 (b) DEFINITIONS.—In this title:

21 (1) BLM LAND.—The term “BLM land”  
22 means the Bureau of Land Management land in the  
23 State comprising approximately 625,643 acres, as  
24 generally depicted on the map entitled “Utah Test

1 and Training Range Enhancement/West Desert  
2 Land Exchange” and dated February 12, 2016.

3 (2) SECRETARY.—The term “Secretary” means  
4 the Secretary of the Interior.

5 (3) STATE.—The term “State” means the State  
6 of Utah.

7 (4) UTAH TEST AND TRAINING RANGE.—

8 (A) IN GENERAL.—The term “Utah Test  
9 and Training Range” means the portions of the  
10 military land and airspace operating area of the  
11 Utah Test and Training Area that are located  
12 in the State.

13 (B) INCLUSION.—The term “Utah Test  
14 and Training Range” includes the Dugway  
15 Proving Ground.

## 16 **Subtitle A—Utah Test and Training** 17 **Range**

### 18 **SEC. 3011. MANAGEMENT OF BLM LAND.**

19 (a) MEMORANDUM OF AGREEMENT.—

20 (1) DRAFT.—

21 (A) IN GENERAL.—Not later than 90 days  
22 after the date of enactment of this Act, the Sec-  
23 retary and the Secretary of the Air Force shall  
24 complete a draft of the memorandum of agree-  
25 ment required under paragraph (2).

1           (B) PUBLIC COMMENT PERIOD.—During  
2           the 30-day period beginning on the date on  
3           which the draft memorandum of agreement is  
4           completed under subparagraph (A), there shall  
5           be an opportunity for public comment on the  
6           draft memorandum of agreement, including an  
7           opportunity for the Utah Test and Training  
8           Range Community Resource Group established  
9           under section 3013(a) to provide comments on  
10          the draft memorandum of agreement.

11          (2) REQUIREMENT; DEADLINE.—

12           (A) IN GENERAL.—Not later than 180  
13          days after the date of enactment of this Act,  
14          the Secretary and the Secretary of the Air  
15          Force shall enter into a memorandum of agree-  
16          ment that provides for the continued manage-  
17          ment of the BLM land by the Secretary, in a  
18          manner that provides for the limited use of the  
19          BLM land by the Secretary of the Air Force,  
20          consistent with this title.

21           (B) SIGNATURES REQUIRED.—The terms  
22          of the memorandum of agreement, including a  
23          temporary closure of the BLM land under the  
24          memorandum of agreement, may not be carried  
25          out until the date on which all parties to the

1 memorandum of agreement have signed the  
2 memorandum of agreement.

3 (3) MANAGEMENT BY SECRETARY.—The memo-  
4 randum of agreement under paragraph (2) shall pro-  
5 vide that the Secretary (acting through the Director  
6 of the Bureau of Land Management) shall continue  
7 to manage the BLM land—

8 (A) as land described in section  
9 6901(1)(B) of title 31, United States Code;

10 (B) for multiple use and sustained yield  
11 goals and activities as required under sections  
12 102(a)(7) and 202(c)(1) of the Federal Land  
13 Policy and Management Act of 1976 (43 U.S.C.  
14 1701(a)(7), 1712(c)(1)) and defined in section  
15 103 of that Act (43 U.S.C. 1702), including all  
16 principal or major uses on Federal land recog-  
17 nized pursuant to the definition of the term in  
18 section 103 of that Act (43 U.S.C. 1702);

19 (C) in accordance with section 202 of the  
20 Federal Land Policy and Management Act of  
21 1976 (43 U.S.C. 1712); and

22 (D) subject to use by the Secretary of the  
23 Air Force provided under section 3012 for—

24 (i) the preservation of the Utah Test  
25 and Training Range against current and

1 future encroachments that the Secretary of  
2 the Air Force finds to be incompatible with  
3 current and future test and training re-  
4 quirements;

5 (ii) the testing of—

6 (I) advanced weapon systems, in-  
7 cluding current weapons systems, 5th  
8 generation weapon systems, and fu-  
9 ture weapon systems; and

10 (II) the standoff distance for  
11 weapons;

12 (iii) the testing and evaluation of  
13 hypersonic weapons;

14 (iv) increased public safety for civil-  
15 ians accessing the BLM land; and

16 (v) other purposes relating to meeting  
17 national security needs.

18 (b) MAP.—The Secretary may correct any minor er-  
19 rors in the map.

20 (c) LAND USE PLANS.—Any land use plan in exist-  
21 ence on the date of enactment of this Act that applies to  
22 the BLM land shall continue to apply to the BLM land.

23 (d) MAINTAIN CURRENT USES.—

24 (1) IN GENERAL.—Notwithstanding subsection

25 (a)(3)(D), the memorandum of agreement entered

1 into under subsection (a) and the land use plans de-  
2 scribed in subsection (c) shall not diminish any  
3 major or principle use that is recognized pursuant to  
4 section 103(l) of the Federal Land Policy and Man-  
5 agement Act of 1976 (43 U.S.C. 1702(l)), except to  
6 the extent authorized in subsection (a).

7 (2) ACTIONS BY SECRETARY OF THE AIR  
8 FORCE.—The Secretary of the Air Force shall—

9 (A) if corrective action is necessary due to  
10 an action of the Air Force, as determined by  
11 the Secretary of the Air Force, render the BLM  
12 land safe for public use; and

13 (B) appropriately communicate the safety  
14 of the land to the Secretary once the BLM land  
15 is rendered safe for public use.

16 (e) GRAZING.—

17 (1) NEW GRAZING LEASES AND PERMITS.—

18 (A) IN GENERAL.—The Secretary shall  
19 issue and administer any new grazing lease or  
20 permit on the BLM land, in accordance with  
21 applicable law (including regulations) and other  
22 authorities applicable to livestock grazing on  
23 Bureau of Land Management land.

24 (B) NON-FEDERAL LAND LEVELS.—The  
25 Secretary (acting through the Director of the

1 Bureau of Land Management) shall continue to  
2 issue and administer livestock grazing leases  
3 and permits on the non-Federal land described  
4 in section 3022(3), subject to the requirements  
5 described in subparagraphs (A) through (C) of  
6 paragraph (2).

7 (2) EXISTING GRAZING LEASES AND PER-  
8 MITS.—Any livestock grazing lease or permit appli-  
9 cable to the BLM land that is in existence on the  
10 date of enactment of this Act shall continue in ef-  
11 fect—

12 (A) at the number of permitted animal  
13 unit months authorized under current applica-  
14 ble land use plans;

15 (B) if range conditions permit, at levels  
16 greater than the level of active use; and

17 (C) subject to such reasonable increases  
18 and decreases of active use of animal unit  
19 months and other reasonable regulations, poli-  
20 cies, and practices as the Secretary may con-  
21 sider appropriate based on rangeland condi-  
22 tions.

23 (f) MEMORANDUM OF UNDERSTANDING ON EMER-  
24 GENCY ACCESS AND RESPONSE.—Nothing in this section  
25 precludes the continuation of the memorandum of under-

1 standing that is between the Department of the Interior  
2 and the Department of the Air Force with respect to emer-  
3 gency access and response, as in existence as of the date  
4 of enactment of this Act.

5 (g) WITHDRAWAL.—Subject to valid existing rights,  
6 the BLM land is withdrawn from all forms of appropria-  
7 tion under the public land laws, including the mining laws,  
8 the mineral leasing laws, and the geothermal leasing laws.

9 (h) LIMITATION ON FUTURE RIGHTS-OF-WAY OR  
10 USE PERMITS.—The Secretary may not issue any new use  
11 permits or rights-of-way on the BLM land for any pur-  
12 poses that the Secretary of the Air Force determines to  
13 be incompatible with current or projected military require-  
14 ments, with consideration given to the rangeland improve-  
15 ments under section 3015(h).

16 (i) GRAZING AND RANCHING.—Efforts described in  
17 this title to facilitate grazing and ranching on the BLM  
18 land and the non-Federal land described in section  
19 3022(3) shall be considered to be compatible with mission  
20 requirements of the Utah Test and Training Range.

21 **SEC. 3012. TEMPORARY CLOSURES.**

22 (a) IN GENERAL.—If the Secretary of the Air Force  
23 determines that military operations (including operations  
24 relating to the fulfillment of the mission of the Utah Test  
25 and Training Range), public safety, or national security

1 require the temporary closure to public use of any road,  
2 trail, or other portion of the BLM land, the Secretary of  
3 the Air Force may take such action as the Secretary of  
4 the Air Force determines necessary to carry out the tem-  
5 porary closure.

6 (b) LIMITATIONS.—Any temporary closure under  
7 subsection (a)—

8 (1) shall be limited to the minimum areas and  
9 periods during which the Secretary of the Air Force  
10 determines are required to carry out a closure under  
11 this section;

12 (2) shall not occur on a State or Federal holi-  
13 day, unless notice is provided in accordance with  
14 subsection (c)(1)(B);

15 (3) shall not occur on a Friday, Saturday, or  
16 Sunday, unless notice is provided in accordance with  
17 subsection (c)(1)(B); and

18 (4)(A) if practicable, shall be for not longer  
19 than a 3-hour period per day;

20 (B) shall only be for longer than a 3-hour pe-  
21 riod per day—

22 (i) for mission essential reasons; and

23 (ii) as infrequently as practicable and in no

24 case for more than 10 days per year; and

1 (C) shall in no case be for longer than a 6-hour  
2 period per day.

3 (c) NOTICE.—

4 (1) IN GENERAL.—Except as provided in para-  
5 graph (2), the Secretary of the Air Force shall—

6 (A) keep appropriate warning notices post-  
7 ed before and during any temporary closure;  
8 and

9 (B) provide notice to the Secretary, public,  
10 and relevant stakeholders concerning the tem-  
11 porary closure—

12 (i) at least 30 days before the date on  
13 which the temporary closure goes into ef-  
14 fect;

15 (ii) in the case of a closure during the  
16 period beginning on March 1 and ending  
17 on May 31, at least 60 days before the  
18 date on which the closure goes into effect;  
19 or

20 (iii) in the case of a closure described  
21 in paragraph (3) or (4) of subsection (b),  
22 at least 90 days before the date on which  
23 the closure goes into effect.

24 (2) SPECIAL NOTIFICATION PROCEDURES.—In  
25 each case for which a mission-unique security re-

1        requirement does not allow for the notifications de-  
2        scribed in paragraph (1)(B), the Secretary of the Air  
3        Force shall work with the Secretary to achieve a mu-  
4        tually agreeable timeline for notification.

5        (d) MAXIMUM ANNUAL CLOSURES.—The total cumu-  
6        lative hours of temporary closures authorized under this  
7        section with respect to the BLM land shall not exceed 100  
8        hours annually.

9        (e) PROHIBITION ON CERTAIN TEMPORARY CLO-  
10       SURES.—The northernmost area identified as “Newfound-  
11       land’s” on the map shall not be subject to any temporary  
12       closure between August 21 and February 28, in accord-  
13       ance with the lawful hunting methods and seasons of the  
14       State of Utah.

15       (f) EMERGENCY GROUND RESPONSE.—A temporary  
16       closure of a portion of the BLM land shall not affect the  
17       conduct of emergency response activities on the BLM land  
18       during the temporary closure.

19       (g) LAW ENFORCEMENT AND SECURITY.—The Sec-  
20       retary and the Secretary of the Air Force may enter into  
21       cooperative agreements with State and local law enforce-  
22       ment officials with respect to lawful procedures and proto-  
23       cols to be used in promoting public safety and operation  
24       security on or near the BLM land during noticed test and  
25       training periods.

1 (h) LIVESTOCK.—Livestock shall be allowed to re-  
2 main on the BLM land during a temporary closure of the  
3 BLM land under this section.

4 **SEC. 3013. COMMUNITY RESOURCE GROUP.**

5 (a) ESTABLISHMENT.—Not later than 60 days after  
6 the date of enactment of this Act, there shall be estab-  
7 lished the Utah Test and Training Range Community Re-  
8 source Group (referred to in this section as the “Commu-  
9 nity Group”) to provide regular and continuing input to  
10 the Secretary and the Secretary of the Air Force on mat-  
11 ters involving public access to, use of, and overall manage-  
12 ment of the BLM land.

13 (b) MEMBERSHIP.—

14 (1) IN GENERAL.—The Secretary (acting  
15 through the State Bureau of Land Management Of-  
16 fice) shall appoint members to the Community  
17 Group, including—

18 (A) operational and land management per-  
19 sonnel of the Air Force;

20 (B) 1 Indian representative, to be nomi-  
21 nated by a majority vote conducted among the  
22 Indian tribes in the vicinity of the BLM land;

23 (C) not more than 2 county commissioners  
24 from each of Box Elder, Tooele, and Juab  
25 Counties, Utah;

1 (D) 2 representatives of off-road and high-  
2 way use, hunting, and other recreational  
3 groups;

4 (E) 2 representatives of livestock grazers  
5 on any public land located within the BLM  
6 land;

7 (F) 1 representative of the Utah Depart-  
8 ment of Agriculture and Food; and

9 (G) not more than 3 representatives of  
10 State or Federal offices or agencies, or private  
11 groups, if the Secretary determines that such  
12 representatives would further the goals and ob-  
13 jectives of the Community Group.

14 (2) CHAIRPERSON.—The members described in  
15 paragraph (1) shall elect from among the members  
16 of the Community Group—

17 (A) 1 member to serve as Chairperson of  
18 the Community Group; and

19 (B) 1 member to serve as Vice-Chairperson  
20 of the Community Group.

21 (c) CONDITIONS AND TERMS OF APPOINTMENT.—

22 (1) IN GENERAL.—Each member of the Com-  
23 munity Group shall serve voluntarily and without re-  
24 muneration.

25 (2) TERM OF APPOINTMENT.—

1 (A) IN GENERAL.—Each member of the  
2 Community Group shall be appointed for a  
3 term of 4 years.

4 (B) ORIGINAL MEMBERS.—Notwith-  
5 standing subparagraph (A), the Chairperson  
6 shall select  $\frac{1}{2}$  of the original members of the  
7 Community Group to serve for a term of 4  
8 years and the  $\frac{1}{2}$  to serve for a term of 2 years  
9 to ensure the replacement of members shall be  
10 staggered from year to year.

11 (C) REAPPOINTMENT AND REPLACE-  
12 MENT.—The Secretary may reappoint or re-  
13 place a member of the Community Group ap-  
14 pointed under subsection (b)(1), if—

15 (i) the term of the member has ex-  
16 pired;

17 (ii) the member has retired; or

18 (iii) the position held by the member  
19 described in subparagraphs (A) through  
20 (G) of paragraph (1) has changed to the  
21 extent that the ability of the member to  
22 represent the group or entity that the  
23 member represents has been significantly  
24 affected.

25 (d) MEETINGS.—

1           (1) IN GENERAL.—The Community Group shall  
2 meet not less than once per year, and at such other  
3 frequencies as determined by five or more of the  
4 members of the Community Group.

5           (2) RESPONSIBILITIES OF COMMUNITY  
6 GROUP.—The Community Group shall be responsible  
7 for determining appropriate schedules for, details of,  
8 and actions for meetings of the Community Group.

9           (3) NOTICE.—The Chairperson shall provide  
10 notice to each member of the Community Group not  
11 less than 10 business days before the date of a  
12 scheduled meeting.

13           (4) EXEMPT FROM FEDERAL ADVISORY COM-  
14 MITTEE ACT.—The Federal Advisory Committee Act  
15 (5 U.S.C. App.) shall not apply to meetings of the  
16 Community Group.

17           (e) COORDINATION WITH RECOMMENDATIONS OF  
18 COMMUNITY GROUP.—The Secretary and the Secretary of  
19 the Air Force, consistent with existing laws (including reg-  
20 ulations), shall take under consideration recommendations  
21 from the Community Group.

22           (f) TERMINATION OF AUTHORITY.—The Community  
23 Group shall terminate on the date that is seven years after  
24 the date of enactment of this Act, unless the Secretary

1 and the Community Group mutually elect to terminate the  
2 Community Group before that date.

3 (g) RENEWAL.—The Community Group may elect, by  
4 simple majority, to renew the term of the Community  
5 Group for an additional seven years, with the option to  
6 renew the term every seven years thereafter. Each renewal  
7 must occur upon or within 90 days before termination of  
8 the Community Group.

9 **SEC. 3014. LIABILITY.**

10 The United States (including all departments, agen-  
11 cies, officers, and employees of the United States) shall  
12 be held harmless and shall not be liable for any injury  
13 or damage to any individual or property suffered in the  
14 course of any mining, mineral, or geothermal activity, or  
15 any other authorized nondefense-related activity, con-  
16 ducted on the BLM land.

17 **SEC. 3015. EFFECTS OF TITLE.**

18 (a) EFFECT ON WEAPON IMPACT AREA.—Nothing in  
19 this subtitle expands the boundaries of the weapon impact  
20 area of the Utah Test and Training Range.

21 (b) EFFECT ON SPECIAL USE AIRSPACE AND TRAIN-  
22 ING ROUTES.—Nothing in this subtitle precludes—

23 (1) the designation of new units of special use  
24 airspace; or

1           (2) the expansion of existing units of special  
2 use airspace.

3           (c) EFFECT ON EXISTING RIGHTS AND AGREE-  
4 MENTS.—

5           (1) KNOLLS SPECIAL RECREATION MANAGE-  
6 MENT AREA; BLM COMMUNITY PITS CENTRAL  
7 GRAYBACK AND SOUTH GRAYBACK.—Except as pro-  
8 vided in section 3012, nothing in this subtitle limits  
9 or alters any existing right or right of access to—

10                   (A) the Knolls Special Recreation Manage-  
11 ment Area; or

12                   (B)(i) the Bureau of Land Management  
13 Community Pits Central Grayback and South  
14 Grayback; and

15                   (ii) any other county or community pit lo-  
16 cated within close proximity to the BLM land.

17           (2) NATIONAL HISTORIC TRAILS AND OTHER  
18 HISTORICAL LANDMARKS.—Except as provided in  
19 section 3012, nothing in this subtitle limits or alters  
20 any existing right or right of access to a component  
21 of the National Trails System or other Federal or  
22 State historic landmarks within the BLM land, in-  
23 cluding the California National Historic Trail, the  
24 Pony Express National Historic Trail, or the GAPA  
25 Launch Site and Blockhouse.

1           (3) CLOSURE OF INTERSTATE 80.—Nothing in  
2 this subtitle authorizes any additional authority or  
3 right to the Secretary or the Secretary of the Air  
4 Force to temporarily close Interstate 80.

5           (4) EFFECT ON LIMITATION ON AMENDMENTS  
6 TO CERTAIN INDIVIDUAL RESOURCE MANAGEMENT  
7 PLANS.—Nothing in this subtitle affects the limita-  
8 tion established under section 2815(d) of the Na-  
9 tional Defense Authorization Act for Fiscal Year  
10 2000 (Public Law 106-65; 113 Stat. 852).

11           (5) EFFECT ON MEMORANDUM OF UNDER-  
12 STANDING.—Nothing in this subtitle affects the  
13 memorandum of understanding entered into by the  
14 Air Force, the Bureau of Land Management, the  
15 Utah Department of Natural Resources, and the  
16 Utah Division of Wildlife Resources relating to the  
17 reestablishment of bighorn sheep in the Newfound-  
18 land Mountains and signed by the parties to the  
19 memorandum of understanding during the period  
20 beginning on January 24, 2000, and ending on Feb-  
21 ruary 4, 2000.

22           (6) EFFECT ON EXISTING MILITARY SPECIAL  
23 USE AIRSPACE AGREEMENT.—Nothing in this sub-  
24 title limits or alters the Military Operating Areas of  
25 Airspace Use Agreement between the Federal Avia-

1           tion Administration and the Air Force in effect on  
2           the date of enactment of this Act.

3           (d) EFFECT ON WATER RIGHTS.—

4                 (1) NO RESERVATION CREATED.—Nothing in  
5           this subtitle—

6                     (A) establishes any reservation in favor of  
7           the United States with respect to any water or  
8           water right on the BLM land; or

9                     (B) authorizes any appropriation of water  
10           on the BLM land, except in accordance with  
11           applicable State law.

12                 (2) PREVIOUSLY ACQUIRED AND RESERVED  
13           WATER RIGHTS.—Nothing in this subtitle affects—

14                     (A) any water right acquired or reserved  
15           by the United States before the date of enact-  
16           ment of this Act; or

17                     (B) the authority of the Secretary or the  
18           Secretary of the Air Force, as applicable, to ex-  
19           ercise any water right described in subpara-  
20           graph (A).

21                 (3) NO EFFECT ON MCCARRAN AMENDMENT.—  
22           Nothing in this subtitle diminishes, enhances, or  
23           otherwise affects in any way the rights, duties, and  
24           obligations of the United States, the State of Utah,  
25           the counties in which the BLM land is situated, and

1 the residents and stakeholders in those counties  
2 under section 208 of the Act of July 10, 1952 (com-  
3 monly known as the “McCarran Amendment”) (43  
4 U.S.C. 666).

5 (e) EFFECT ON FEDERALLY RECOGNIZED INDIAN  
6 TRIBES.—

7 (1) IN GENERAL.—Nothing in this subtitle al-  
8 ters any right reserved by treaty or Federal law for  
9 a federally recognized Indian tribe for tribal use.

10 (2) CONSULTATION.—The Secretary of the Air  
11 Force shall consult with any federally recognized In-  
12 dian tribe in the vicinity of the BLM land before  
13 taking any action that will affect any tribal right or  
14 cultural resource protected by treaty or Federal law.

15 (f) EFFECT ON PAYMENTS IN LIEU OF TAXES.—

16 (1) ELIGIBILITY OF BLM LAND AND NON-FED-  
17 ERAL LAND.—The BLM land and the non-Federal  
18 land described in section 3022(3) shall remain eligi-  
19 ble as entitlement land under section 6901 of title  
20 31, United States Code.

21 (2) NO PREJUDICE TO COUNTY PAYMENT IN  
22 LIEU OF TAXES RIGHTS.—Nothing in this subtitle  
23 diminishes, enhances, or otherwise affects any other  
24 right or entitlement of the counties in which the  
25 BLM land is situated to payments in lieu of taxes

1 based on the BLM land, under section 6901 of title  
2 31, United States Code.

3 (g) WILDLIFE GUZZLERS.—

4 (1) IN GENERAL.—The Bureau of Land Man-  
5 agement and the Utah Division of Wildlife Re-  
6 sources shall continue the management of wildlife  
7 guzzlers in existence as of the date of enactment of  
8 this Act on the BLM land.

9 (2) NEW GUZZLERS.—Nothing in this subtitle  
10 prevents the Bureau of Land Management and the  
11 Utah Division of Wildlife Resources from entering  
12 into agreements for new wildlife guzzlers.

13 (3) ACQUIRED GUZZLERS.—The Secretary shall  
14 continue to manage existing wildlife guzzlers or wild-  
15 life improvements on the non-Federal land conveyed  
16 to the Secretary under section 3023(a) that were in  
17 existence on the day before the date of the convey-  
18 ance.

19 (h) RANGELAND IMPROVEMENTS.—The Secretary  
20 shall continue to manage, in a manner that promotes and  
21 facilitates grazing—

22 (1) rangeland improvements on the BLM land  
23 that are in existence on the date of enactment of  
24 this Act; and

1           (2) rangeland improvements on the non-Federal  
2 land conveyed to the Secretary under section  
3 3023(a) that were in existence on the day before the  
4 date of the conveyance.

5           (i) NEW RANGELAND IMPROVEMENTS.—Nothing in  
6 this subtitle prevents the Bureau of Land Management,  
7 the Utah Department of Agriculture or other State entity,  
8 or a Federal land permittee from entering into agreements  
9 for new rangeland improvements that promote and facili-  
10 tate grazing.

11           (j) SCHOOL AND INSTITUTIONAL TRUST LANDS AD-  
12 MINISTRATION.—The Bureau of Land Management shall  
13 maintain rangeland grazing improvements in existence as  
14 of the date of enactment of this Act on acquired land of  
15 the School and Institutional Trust Lands Administration.

## 16           **Subtitle B—Land Exchange**

### 17           **SEC. 3021. FINDINGS AND PURPOSE.**

18           (a) FINDINGS.—Congress finds that—

19               (1) the State owns approximately 68,057 acres  
20 of land and approximately 10,280 acres of mineral  
21 interests located within the Utah Test and Training  
22 Range in Box Elder, Tooele, and Juab Counties,  
23 Utah;

24               (2) the State owns approximately 2,353 acres  
25 of land and approximately 3,560 acres of mineral in-

1       terests located wholly or partially within the Cedar  
2       Mountains Wilderness in Tooele County, Utah;

3               (3) the parcels of State land described in para-  
4       graphs (1) and (2)—

5               (A) were granted by Congress to the State  
6       pursuant to the Act of July 16, 1894 (28 Stat.  
7       107, chapter 138), to be held in trust for the  
8       benefit of the public school system and other  
9       public institutions of the State; and

10              (B) are largely scattered in checkerboard  
11       fashion among Federal land;

12              (4) continued State ownership and development  
13       of State trust land within the Utah Test and Train-  
14       ing Range and the Cedar Mountains Wilderness is  
15       incompatible with—

16              (A) the critical national defense uses of the  
17       Utah Test and Training Range; and

18              (B) the Federal management of the Cedar  
19       Mountains Wilderness; and

20              (5) it is in the public interest of the United  
21       States to acquire in a timely manner all State trust  
22       land within the Utah Test and Training Range and  
23       the Cedar Mountains Wilderness, in exchange for  
24       the conveyance of the Federal land to the State, in

1 accordance with the terms and conditions described  
2 in this subtitle.

3 (b) PURPOSE.—It is the purpose of this subtitle to  
4 direct, facilitate, and expedite the exchange of certain  
5 Federal land and non-Federal land between the United  
6 States and the State.

7 **SEC. 3022. DEFINITIONS.**

8 In this subtitle:

9 (1) EXCHANGE MAP.—The term “Exchange  
10 Map” means the map prepared by the Bureau of  
11 Land Management entitled “Utah Test and Train-  
12 ing Range Enhancement/West Desert Land Ex-  
13 change” and dated February 12, 2016.

14 (2) FEDERAL LAND.—The term “Federal land”  
15 means the Bureau of Land Management land lo-  
16 cated in Box Elder, Millard, Juab, Tooele, and Bea-  
17 ver Counties, Utah, that is identified on the Ex-  
18 change Map as “BLM Lands Proposed for Transfer  
19 to State Trust Lands”.

20 (3) NON-FEDERAL LAND.—The term “non-Fed-  
21 eral land” means the land owned by the State in  
22 Box Elder, Tooele, and Juab Counties, Utah, that is  
23 identified on the Exchange Map as—

24 (A) “State Trust Land Proposed for  
25 Transfer to BLM”; and

1 (B) "State Trust Minerals Proposed for  
2 Transfer to BLM".

3 (4) STATE.—The term "State" means the State  
4 of Utah, acting through the School and Institutional  
5 Trust Lands Administration.

6 **SEC. 3023. EXCHANGE OF FEDERAL LAND AND NON-FED-**  
7 **ERAL LAND.**

8 (a) IN GENERAL.—If the State offers to convey to  
9 the United States title to the non-Federal land, the Sec-  
10 retary shall—

11 (1) accept the offer; and

12 (2) on receipt of all right, title, and interest in  
13 and to the non-Federal land, convey to the State (or  
14 a designee) all right, title, and interest of the United  
15 States in and to the Federal land.

16 (b) VALID EXISTING RIGHTS.—The exchange author-  
17 ized under subsection (a) shall be subject to valid existing  
18 rights.

19 (c) TITLE APPROVAL.—Title to the Federal land and  
20 non-Federal land to be exchanged under this section shall  
21 be in a format acceptable to the Secretary and the State.

22 (d) APPRAISALS.—

23 (1) IN GENERAL.—The value of the Federal  
24 land and the non-Federal land to be exchanged  
25 under this section shall be determined by appraisals

1 conducted by one or more independent appraisers re-  
2 tained by the State, with the consent of the Sec-  
3 retary.

4 (2) APPLICABLE LAW.—The appraisals under  
5 paragraph (1) shall be conducted in accordance with  
6 nationally recognized appraisal standards, including,  
7 as appropriate, the Uniform Appraisal Standards for  
8 Federal Land Acquisitions.

9 (3) MINERAL LAND.—

10 (A) MINERAL REPORTS.—The appraisals  
11 under paragraph (1) shall take into account  
12 mineral and technical reports provided by the  
13 Secretary and the State in the evaluation of  
14 mineral deposits in the Federal land and non-  
15 Federal land.

16 (B) MINING CLAIMS.—An appraisal of any  
17 parcel of Federal land that is encumbered by a  
18 mining or millsite claim located under sections  
19 2318 through 2352 of the Revised Statutes  
20 (commonly known as the “Mining Law of  
21 1872”) (30 U.S.C. 21 et seq.) shall take into  
22 account the encumbrance created by the claim  
23 for purposes of determining the value of the  
24 parcel of the Federal land.

1           (C) VALIDITY EXAMINATION.—Nothing in  
2           this subtitle requires the United States to con-  
3           duct a mineral examination for any mining  
4           claim on the Federal land.

5           (4) APPROVAL.—The appraisals conducted  
6           under paragraph (1) shall be submitted to the Sec-  
7           retary and the State for approval.

8           (5) DISPUTE RESOLUTION.—If, by the date  
9           that is 90 days after the date of submission of an  
10          appraisal for review and approval under this sub-  
11          section, the Secretary or the State do not agree to  
12          accept the findings of the appraisals with respect to  
13          one or more parcels of Federal land or non-Federal  
14          land, the dispute shall be resolved in accordance  
15          with section 206(d)(2) of the Federal Land Policy  
16          and Management Act of 1976 (43 U.S.C.  
17          1716(d)(2)).

18          (6) DURATION.—The appraisals conducted  
19          under paragraph (1) shall remain valid until the  
20          date of the completion of the exchange authorized  
21          under this subtitle.

22          (7) REIMBURSEMENT OF STATE COSTS.—The  
23          Secretary shall reimburse the State in an amount  
24          equal to 50 percent of the costs incurred by the

1 State in retaining independent appraisers under  
2 paragraph (1).

3 (e) CONVEYANCE OF TITLE.—The land exchange au-  
4 thorized under this subtitle shall be completed by the later  
5 of—

6 (1) the date that is 1 year after the date of  
7 final approval by the Secretary and the State of the  
8 appraisals conducted under subsection (d); and

9 (2) the date that is 1 year after the date of  
10 completion of the dispute resolution process author-  
11 ized under subsection (d)(5).

12 (f) PUBLIC INSPECTION AND NOTICE.—

13 (1) PUBLIC INSPECTION.—At least 30 days be-  
14 fore the date of conveyance of the Federal land and  
15 non-Federal land, all final appraisals and appraisal  
16 reviews for land to be exchanged under this section  
17 shall be available for public review at the office of  
18 the State Director of the Bureau of Land Manage-  
19 ment in the State of Utah.

20 (2) NOTICE.—The Secretary or the State, as  
21 applicable, shall publish in a newspaper of general  
22 circulation in Salt Lake County, Utah, a notice that  
23 the appraisals conducted under subsection (d) are  
24 available for public inspection.

25 (g) EQUAL VALUE EXCHANGE.—

1 (1) IN GENERAL.—The value of the Federal  
2 land and non-Federal land to be exchanged under  
3 this section—

4 (A) shall be equal; or

5 (B) shall be made equal in accordance with  
6 paragraph (2).

7 (2) EQUALIZATION.—

8 (A) SURPLUS OF FEDERAL LAND.—

9 (i) IN GENERAL.—If the value of the  
10 Federal land exceeds the value of the non-  
11 Federal land, the value of the Federal land  
12 and non-Federal land shall be equalized by  
13 the State conveying to the United States—

14 (I) State trust land parcel 1, as  
15 described in the assessment entitled  
16 “Bureau of Land Management Envi-  
17 ronmental Assessment UT-100-06-  
18 EA”, numbered UTU-82090, and  
19 dated March 2008; or

20 (II) State trust land located  
21 within any of the wilderness areas or  
22 national conservation areas in Wash-  
23 ington County, Utah, established  
24 under subtitle O of title I of the Om-  
25 nibus Public Land Management Act

1 of 2009 (Public Law 111-11; 123  
2 Stat. 1075) that has an appraised  
3 value equal to the difference be-  
4 tween—

5 (aa) the value of the Federal  
6 land; and

7 (bb) the value of the non-  
8 Federal land.

9 (ii) ORDER OF CONVEYANCES.—Any  
10 non-Federal land required to be conveyed  
11 to the United States under clause (i) shall  
12 be conveyed until the value of the Federal  
13 land and non-Federal land is equalized, in  
14 the following order:

15 (I) The State trust land parcel  
16 described in clause (i)(I).

17 (II) State trust land parcels lo-  
18 cated in the Red Cliffs National Con-  
19 servation Area.

20 (III) State trust land parcels lo-  
21 cated in the Docs Pass Wilderness.

22 (IV) State trust land parcels lo-  
23 cated in the Beaver Dam Wash Na-  
24 tional Conservation Area.

1 (B) SURPLUS OF NON-FEDERAL LAND.—If  
2 the value of the non-Federal land exceeds the  
3 value of the Federal land, the value of the Fed-  
4 eral land and the non-Federal land shall be  
5 equalized by the Secretary making a cash  
6 equalization payment to the State, in accord-  
7 ance with section 206(b) of the Federal Land  
8 Policy Management (43 U.S.C. 1716(b)).

9 (h) WITHDRAWAL OF FEDERAL LAND FROM MIN-  
10 ERAL ENTRY PRIOR TO EXCHANGE.—Subject to valid ex-  
11 isting rights, the Federal land to be conveyed to the State  
12 under this section is withdrawn from mineral location,  
13 entry, and patent under the mining laws pending convey-  
14 ance of the Federal land to the State.

15 **SEC. 3024. STATUS AND MANAGEMENT OF NON-FEDERAL**  
16 **LAND AFTER EXCHANGE.**

17 (a) NON-FEDERAL LAND WITHIN UTAH TEST AND  
18 TRAINING RANGE.—On conveyance to the United States  
19 under this subtitle, the non-Federal land located within  
20 the Utah Test and Training Range shall be managed in  
21 accordance with the memorandum of agreement entered  
22 into under section 3011(a).

23 (b) NON-FEDERAL LAND WITHIN CEDAR MOUN-  
24 TAINS WILDERNESS.—On conveyance to the United  
25 States under this subtitle; the non-Federal land located

1 within the Cedar Mountains Wilderness shall, in accord-  
2 ance with section 206(c) of the Federal Land Policy Act  
3 of 1976 (43 U.S.C. 1716(c)), be added to, and adminis-  
4 tered as part of, the Cedar Mountains Wilderness.

5 **SEC. 3025. HAZARDOUS MATERIALS.**

6 (a) COSTS.—Except as provided in subsection (b), the  
7 costs of remedial actions relating to hazardous materials  
8 on land acquired under this subtitle shall be paid by those  
9 entities responsible for the costs under applicable law.

10 (b) REMEDIATION OF PRIOR TESTING AND TRAINING  
11 ACTIVITY.—The Department of Defense shall bear all  
12 costs of evaluation, management, and remediation caused  
13 by the previous testing of military weapons systems and  
14 the training of military forces on non-Federal land to be  
15 conveyed to the United States under this subtitle.

16 **Subtitle C—Highway Rights-of-way**

17 **SEC. 3031. RECOGNITION AND TRANSFER OF CERTAIN**

18 **HIGHWAY RIGHTS-OF-WAY.**

19 (a) DEFINITIONS.—In this section:

20 (1) HIGHWAY RIGHT-OF-WAY.—The term  
21 “highway right-of-way” means a right-of-way across  
22 Federal land for all county roads in the Counties of  
23 Box Elder, Tooele, and Juab, in the State of Utah,  
24 according to official transportation map and center-

1 line descriptions of each county in existence as of  
2 March 1, 2015.

3 (2) MAP.—The term “official transportation  
4 map and centerline description” means—

5 (A) the map entitled “Official Transpor-  
6 tation Map of Box Elder County, Utah” and  
7 dated March 1, 2015, and accompanying cen-  
8 terline description of each road on file with the  
9 Clerk of Box Elder County as of March 1,  
10 2015;

11 (B) the map entitled “Official Transpor-  
12 tation Map of Tooele County” and dated March  
13 1, 2015, and accompanying centerline descrip-  
14 tion of each road on file with the Clerk of  
15 Tooele County as of March 1, 2015; and

16 (C) the map entitled “Official Transpor-  
17 tation Map of Juab County” and dated March  
18 1, 2015, and accompanying centerline descrip-  
19 tion of each road on file with the Clerk of Juab  
20 County as of March 1, 2015.

21 (3) SECRETARY.—The term “Secretary”  
22 means—

23 (A) the Secretary of Agriculture, with re-  
24 spect to land administered by the Chief of the  
25 Forest Service; or

1 (B) the Secretary of the Interior, with re-  
2 spect to land administered by the Director of  
3 the Bureau of Land Management.

4 (b) RECOGNITION OF EXISTENCE AND VALIDITY OF  
5 RIGHTS-OF-WAY.—Congress recognizes the existence and  
6 validity of each of the highway rights-of-way identified on  
7 the official transportation maps and centerline descrip-  
8 tions.

9 (c) CONVEYANCE OF AN EASEMENT ACROSS FED-  
10 ERAL LAND.—

11 (1) BOX ELDER COUNTY, UTAH.—The Sec-  
12 retary shall convey, without consideration, to Box  
13 Elder County, Utah, and the State of Utah as joint  
14 tenants with undivided interests, easements for mo-  
15 torized travel rights-of-way across Federal land for  
16 all highways shown and described in the official  
17 transportation map and centerline description of the  
18 county described in subsection (a)(2)(A).

19 (2) JUAB COUNTY, UTAH.—The Secretary shall  
20 convey, without consideration, to Juab County,  
21 Utah, and the State of Utah as joint tenants with  
22 undivided interests, easements for motorized travel  
23 rights-of-way across Federal land for all highways  
24 shown and described in the official transportation

1 map and centerline description of the county de-  
2 scribed in subsection (a)(2)(B).

3 (3) TOOELE COUNTY, UTAH.—The Secretary  
4 shall convey, without consideration, to Tooele Coun-  
5 ty, Utah, and the State of Utah as joint tenants  
6 with undivided interests, easements for motorized  
7 travel rights-of-way across Federal land for all high-  
8 ways shown and described in the official transpor-  
9 tation map and centerline description of the county  
10 described in subsection (a)(2)(C).

11 (d) DESCRIPTION OF FEDERAL LAND SUBJECT TO  
12 EASEMENT.—

13 (1) IN GENERAL.—All easements under sub-  
14 section (c) shall include—

15 (A) the current disturbed width of each  
16 subject highway as shown and described in the  
17 official transportation maps and centerline de-  
18 scriptions; and

19 (B) any additional acreage on either side  
20 of the disturbed width that the respective coun-  
21 ty transportation department determines is nec-  
22 essary for the efficient maintenance, repair,  
23 signage, administration, and use of the Federal  
24 land subject to the easement.

25 (2) DESCRIPTION.—

1 (A) IN GENERAL.—The exact acreage and  
2 legal description of the Federal land subject to  
3 the easements conveyed under subsection (c)  
4 shall be—

5 (i) as described in the centerline de-  
6 scriptions;

7 (ii) as referenced in the official trans-  
8 portation maps; and

9 (iii) as described and referenced ac-  
10 cording to the disturbed width of each  
11 highway as of the date of conveyance for  
12 travel purposes, plus any reasonable addi-  
13 tional width as may be necessary for sur-  
14 face maintenance, repairs, and turnaround  
15 purposes.

16 (B) SURVEY NOT REQUIRED.—Notwith-  
17 standing any other provision of law, the convey-  
18 ance of easements under subsection (c) shall be  
19 effective without a survey of the exact acreage  
20 and local description of the Federal land subject  
21 to the easements.

22 (e) RETENTION OF MAPS AND CENTERLINE DE-  
23 SCRIPTIONS.—The maps and centerline descriptions re-  
24 ferred to in clauses (i) and (ii) of subsection (d)(2)(A)  
25 shall be on file in the appropriate office of the Secretary.

1           (f) EXCLUSION OF CERTAIN CLASS D ROADS FROM  
2 ROAD EASEMENT CONVEYANCES.—Notwithstanding the  
3 highway rights-of-way identified on the official transpor-  
4 tation maps and centerline descriptions, this section does  
5 not apply to any class D road located within the bound-  
6 aries of—

7           (1) Cedar Mountain Wilderness Area des-  
8 igned by section 384(a) of the National Defense  
9 Authorization Act for Fiscal Year 2006 (Public Law  
10 109–163; 119 Stat. 3217; 16 U.S.C. 1132 note); or

11           (2) any wilderness study area within Box Elder  
12 County, Tooele County, or Juab County, Utah, des-  
13 igned in law or by administrative action.

---

Oh gosh, yes of course! We still haven't received testimony from CBP. Chilton, Elbrock, and Pinkerton are the majority witnesses. Ours is Walden.

Lindsay

**Subject:** Testimony

Lindsay,

The testimony of the other witnesses still isn't up on the Committee's website. Has your side gotten copies of it yet? Anything you can share is appreciated.

Thanks!  
Felipe

"The consequences of federal land management along the U.S. Border to rural communities and national security"

House Natural Resources Oversight and Investigations Subcommittee  
April 28, 2016

Written testimony submitted by Susan E. Chilton  
PO Box 423, Arivaca, Arizona 85601

My name is Susan Chilton. I am a retired Arizona Game and Fish Commissioner. I chaired the Commission from 2004-2005 and am currently chairing the state board that reviews applications for the Commissioner's position and sends finalists' names to the governor for appointment. I have been an educator for more than five decades and an active amateur student of Arizona wildlife, southern Arizona wildlife habitats, and range botany.

My husband and I live near the historic borderland cattle ranching community of Arivaca, Arizona approximately 55 miles southwest of Tucson, Arizona. Our ranch is adjacent to the town of Arivaca and continues south to the international boundary with Mexico. Our fence at the southern edge of our family ranch is the international boundary. There is no wall, only a four-strand barbed wire fence--easily cut or crawled through in seconds. For a total of 25 miles east and west, that same little wire fence is all that separates us and our neighbors from armed Sinaloa drug cartel operatives who pass easily through that open door.

We and our ranch neighbors live in a no-man's land essentially ceded to Cartel control. Our town's main road is the de facto international boundary even though it is about 20 miles north of the actual border. Why?

The two Border Patrol stations responsible for different parts of our ranch are headquartered in Nogales and Tucson; the officers spend hours of their working day on Interstate 19 getting from their headquarters to the Border Patrol checkpoints, including the closest one on Arivaca Road about 20 miles northeast of our home. They spend some time driving east and west on Arivaca Road and a lot of time at the checkpoint. They are implementing the strategy known as **Defense in Depth**. That means that all of the hundreds of square miles of borderlands north of the unsecured international boundary between Nogales and Sasabe and south of Arivaca Road where we and our neighbors live are basically entrance routes controlled by Sinaloa Cartel-paid scouts.

Cartel scouts are supplied with military-grade equipment and a salary. They move from one site to another according to Cartel strategy using mountains on our ranch and on those of our neighbors. Border Patrol removes them at times--with difficulty--but the scouts or their replacements quickly return to a new mountain-top assignment. The scouts guide the movement of people and drugs right through this no-man's land.

Drug packing groups are directed across the unsecured boundary and along hundreds of trails through ranch pastures from Mexico north to GPS'd sites. At those ever-changing sites, the "merchandise" being imported to the lucrative American addiction market will be picked up by

Cartel-connected operatives from Tucson or Phoenix. The imported drugs will undersell competing drugs made or grown in the United States because raw material costs in Mexico for ingredients for meth or other illegal drugs and taxes, security, licensing, and accountancy and reporting costs for marijuana will cause the "domestic product" to be more expensive than the illegally imported version.

After depositing their loads, the packers become "south-bonders" headed back to Mexico. Some of these south-bonders commit assaults, home invasions and burglaries to acquire items they can carry back. We have been burglarized twice with major losses of irreplaceable items.

*Why is it difficult for the Border Patrol to actually be at the border and close this well-known entry route?*

1) Border Patrol has faced NEPA obstacles to upgrading the barely passable ranch roads leading south from Arivaca to the actual border. Recent declaration of critical habitat for the jaguar--a tropical cat--along this drug importation corridor by the USFWS created further barriers to road improvement and to installation of other facilities needed by the Border Patrol.

Critical habitat for the jaguar is, in our opinion, a transparent ruse: the very few wandering jaguars reported anywhere in Arizona since the 1940's have been lone males exiled from their northernmost outpost 150 miles south of the border and thousands of miles from their core habitat. Not one female has been documented as present in 65 years.

*How does this critical habitat ruse affect border control?* In December, we took Commander Beeson of the Tucson Sector Border Patrol to our border corrals in what the Border Patrol knows is an active entry zone and then drove over the ranch roads to our neighbor's border ranch just about 5 air miles west of us--another very active entry zone; it took three hours to get from our corrals to theirs following the only road because there is no road paralleling the border along this drug importation route. Meanwhile, approval for road improvements the Border Patrol deems essential, would certainly trigger lawsuits supposedly on behalf of wildlife like the jaguar. The "wildlife" that would actually be delighted by their efforts is a criminal outfit headquartered in Sinaloa, Mexico.

2) Border Patrol has no forward operating bases in this Cartel route so the time delay for reporting to the actual border on our ranch or that of our neighbors from either Nogales or Tucson is between two and three hours. We have taken numerous high ranking Border Patrol officers to our property at the border, shown them our private land with water, good sites for portable facilities and corrals for their horse patrol and offered them the use of this land for a one dollar (\$1.00) lease per year so they can have a forward operating base at a known incursion point ....my husband has offered to lend them the dollar if they can't afford it.....Years have passed and there is no action of which we are aware on this offer.

3) In addition to the mobility limits of the lack of functional roads, Border Patrol officers do not have reliable communications when in this no-man's land so they can not call for assistance when needed. Last week, after first taking two journalists to two lengthy unfenced rural sections of the boundary, we then took them to the west end of the wall in Nogales to see the difference.

They needed to personally see where the city wall ends and where the unsecured 25 miles begins. An event occurred along the Nogales wall road right in front of us; we stopped our truck and watched as three Border Patrol vehicles, called in by the patrolling officer who spotted the suspicious incursion, came flying down the road in less than five minutes, stopped the vehicle and got the occupants out. That was possible because they have a wall in Nogales, excellent communications capability there, and full time patrolling along on the very functional road next to the wall.....right up to the point where it abruptly ends and the little 25-mile four-strand wire fence begins.

4) Electronic devices and drone surveillance alone are totally inadequate because, as the just-retired Patrol Agent in Charge of the Tucson BP Station told us, "Even when I can see what is happening, I can't get there."

*What are some specific consequences to us of the failure of federal agencies to prioritize and implement effective border control?*

### **Human impacts**

1) Residents who live and work in this no-man's land are exposed to encounters with heavily armed, meth-intoxicated drug packers; in addition to the burglaries we have suffered, we have rancher friends who were held hostage and robbed and forced to drive the invader to the border just last year and neighbors whose 15-year old daughter was the target of home invading south-bounders in March of this year.

Other neighbors, some of whose ranches had been in their family for more than a hundred years, gave up in the face of constant harassment by drug packing criminals and damage and thefts by south bounders and sold out to the U.S. Fish and Wildlife Service's borderland refuge. The current failed "defense in depth" strategy--which essentially puts the Border Patrol 20 or more miles north of the boundary and the Cartel at the line of scrimmage--effectively converted the formerly productive ranches into a tax-payer financed enlargement of the safe-passage zone for drugs.

2) Recreationists are confronted with road signs put up by the Forest Service warning them that they may encounter illegal activities and smuggling throughout the portions of this unsecured drug route within the Coronado National Forest; Arizona Game and Fish publishes explicit warnings alerting hunters of dangers they may encounter while hunting near the border; many people are reticent to hunt, fish, bird-watch, or family camp on formerly popular Coronado National Forest sites in the open drug corridors.

3) Would-be workers from Mexico or other nations are forced to pay the Cartel guides. Many of these poor people, especially women, suffer horrendous abuses, including deaths numbering over 2000 bodies found in the Tucson Sector of the border since 1996, rape, murder, and mutilation. Additionally, some groups, after paying thousands of dollars to the Cartel to be "guided" may be used as decoys to distract authorities and facilitate higher value drug packing. Just a few months ago, one individual--reportedly with a drug packing group--was incinerated nine miles north of the border and just west of our ranch; the official--and highly improbable--story circulated about this death is that he was "trying to charge his cellphone by throwing a wire

over a high power line." This is another example of a known recent death directly connected to the failure to secure the border. The official story raises the question of whether it is also possibly an example of agency policy to attribute deaths to accident, suicide or the stupidity of the victim rather than to failure to secure the border.

4) Border Patrol officers working these areas face war-like risks. Rip crews setting out to hijack Cartel contraband engage in fire fights with drug packers or Border Patrol agents pursuing them. One such situation to which the Border Patrol responded resulted in the murder of Officer Brian Terry. The canyon in which he was killed is a well-known Cartel route in this no-man's land. It is just east of our pastures and on a neighboring ranch.

### **Environmental impacts**

1) Wildfires--some growing to 100s of millions of dollars in damage to homes, ranchlands and businesses in border communities--are deliberately ignited by drug packers if they are pursued by Border Patrol; fire personnel reporting to a near-by fire which had begun spreading onto our home pasture told us they "couldn't stay there fighting the fire at night because the area was too dangerous." My husband kept fighting it.....Hotshot firefighters on some borderland fires have armed guards as part of their contingent.

2) Trash--an appalling amount has been dropped on the Coronado National Forest, the Buenos Aires Refuge, the Pajarito Wilderness, State School Trust lands and private ranch lands all in this open corridor and all crossed by trails from Mexico used by the Cartel groups. A conservative total of trash dumped on this drug route to the U.S. is estimated at 12,750 tons between 1992 and 2015 using the Border Patrol's own figure of 8.5 pounds per entrant and multiplying only by the number of individuals reported as apprehended. This figure can easily be tripled since most experts and independent reports indicate that few south-bounders are apprehended and reliable figures are not available for the pre-2008 period when larger numbers of work-seekers used this route.

3) Cut water lines--we maintain many water lines and drinkers for both livestock and wildlife. These are essential since natural water is almost non-existent during the dry months of the year. We put escape ramps on the waters so wildlife does not drown and drinking fountains on many so people can drink--we don't want anyone to die of thirst here. However, drug packers often cut the water lines which results in the loss of thousands of gallons of water and the dry-up of drinkers essential to both wildlife and livestock. This is an on-going maintenance cost and the lack of water if a tank is emptied can be fatal for cattle, wildlife or people.

4) Cut fences mean cattle from Mexico can walk into the U.S. and ours can wind up in Mexico or wander into pastures that are not the ones scheduled for that rotation. The grazing rotation is carefully designed in collaboration with the Forest Service and based on university range research to ensure the best re-growth and production of forage, quality riparian conditions, and habitat for our wildlife. The drug packers cause much loss of time and labor getting cattle back into the proper pasture and repairing the cut fences; additionally and importantly, they undermine the scientific research and monitoring that informs our grazing management and that of our neighbor ranchers.

## **National Impacts**

1) Citizens across this Nation will continue to bear the increasing cost of cheap, wide-spread drug addiction resulting from the failure to control our borders, of drug-damaged babies born to meth-using mothers and of the growing impact of heroin and other drugs on the health and well-being of our communities; the human and civic damage is every bit as terrible as a bombing attack--it's just not as explosive, concentrated and easily visually conveyed with photography.

2) National Security--it is only a matter of time until would-be terrorists realize what the Cartel has already realized: this un-walled, minimally patrolled section of the border is welcoming them.

*What do we know?* We know the international boundary with Mexico is not secure and that drug packers are coming right through our property because we and others maintain hidden trail cameras that record reality; we--and the journalists to whom we show these photographic records of heavily laden drug packers and of south-bounders tossing incendiary devices to create a fiery barrier as they are pursued--cannot be told that the "border is secure" nor can we feel safe when we or our loved ones are working in pastures near the border.

*What do we need?* First, technology is NOT sufficient. We need:

- 1) A good wall with full-time patrolling to replace the current open, unsecured 25-mile gap between Nogales and Sasabe
- 2) Forward Operating Bases manned like fire stations 24/7
- 3) Functional roads to the border and along the new wall--a wall is of little use if the Border Patrol is no where around and can't get to the incursion--.
- 4) Prompt waiving or constructive dealing with issues of "wildlife connectivity and endangered species" that are currently abused to supersede national security;
- 5) Better communications and quick response capability for the Border Patrol
- 6) A feasible worker permit program which adequately vets temporary laborers and provides them with documents, appropriate worker protections, the right to come and go, and a legal, safe alternative to trying to get to a job by paying the Cartel and suffering horrible treatment at the hands of the criminal operation.

These six essential requirements, supplemented by technology, would close this 25-mile open door before more human tragedies and national security threats bring us to our senses. We thank you for understanding that the smokescreen of cost obscures the much greater cost of deciding NOT to secure the border.

Testimony of

**Tricia Elbrock  
Animas, New Mexico**

On behalf of the

**New Mexico Cattle Growers' Association**

Before the

U.S. House of Representatives Committee on Resources  
Subcommittee on Oversight & Investigations

April 28, 2016

Regarding

**The Consequences of Federal Land Management  
Along the U.S. Border to Rural Communities and National Security**

---

Thank you Mr. Chairman and members of the Committee, for the opportunity to speak to you today. My name is Tricia Elbrock and I am here on behalf of my family, my neighbors, members of the New Mexico Cattle Growers' Association (NMCGA) and every American that is threatened by the lack of security along our international border with Mexico.

My husband Edward, my son William (Bunch) Swift and I own and operate Elbrock Water Service, Elbrock Drilling which includes a hardware store and Elbrock Ranch where we raise Beefmaster cattle and show lambs for youngsters in our region. Like most all ranches in southern New Mexico, our ranch contains federal land. In our case it is Bureau of Land Management (BLM) lands.

Our water and drilling companies based in Animas, New Mexico, serves southeast Arizona and southern New Mexico from Tucson to El Paso. The business was started in 1978 and we presently employ 20 individuals. Animas is nestled in what is called the Bootheel because of the way the area fits into New Mexico.

You may have heard recently about the kidnapping of one of our employees in December 2015 and yes, it was a kidnapping regardless of rumors to the contrary. Our man was working on one of the ranches we service that runs along the Mexican border.

Our truck that he was driving was commandeered and he was forced to drive that truck, after the cartel delivered their drugs, to Willcox, Arizona where he was dumped out. The event occurred over two days and involved an all-out man hunt before he was freed. His life and the lives of his family were threatened if he called the police.

The story sounds simple enough with an apparent happy ending. Not so. Our man was roughed up physically and is emotionally and mentally fragile. All of our tools and materials were thrown out in the pasture, much of them destroyed, and we still don't have our truck back or an insurance payment to replace it.

Clearly the border is NOT secure. Our families and employees are at risk all day every day. There is a huge emotional toll on everyone because we live in constant fear for our lives, our employees, our communities and our livestock.

The flow of illegal drugs and those running them is endless. U.S. Border Patrol statistics say the traffic across the border is down. That simply isn't the case.

It is true that we are not seeing as many of the people of Mexico crossing the border looking for work as we have in the past. What we are seeing is drug runners and illegals from all over the world coming in droves across a border that has no deterrent at all.

There are thousands of back-packs and boxes coming across daily. The assumption is that they are filled with drugs. The reality is that they could be carrying anything from explosives to nuclear weapons.

It is more costly to do any kind of business in our region. The financial burden we have endured since the kidnapping is alarming. We had to regroup and figure out how to try and keep our employees safe. There was lost revenue for two months of not being able to send employees to areas near the border. It is now our policy to send two employees at a time, doubling our cost of doing business.

The value of the lost tools and materials was approximately \$13,000. Insurance paid us half of that value. The insurance company has refused to total the truck and we are still fighting on what they will pay us on both the truck and the equipment.

Our insurance was up for renewal in March. We could find no other company that would even provide us with a quote. Living and working near the border, we are labeled as HIGH RISK. Nearly all of us in the area suffer break-ins almost routinely with vehicles stolen many times. Livestock have been taken out of pens right near the house and butchered in the pasture.

Many in our area have stopped reporting break-ins and theft to their insurance for fear of not being able to buy insurance at all. If we cannot buy insurance we will probably have to go out of business. In today's world of lawyers, with no insurance and an injury of some kind, we would lose the business anyway. Our small towns are shrinking as it is with our young people leaving us to find work. Without insurance there will be no ranches and businesses to support our towns. Soon there will be no towns.

This brings in an entirely different subject. The inability of our government to protect us brings down the value of our land. If we were to be forced out, we would have to take pennies on the dollar of the lands real worth.

There is no insurance to cover the fences or water facilities and lines that are routinely destroyed in the border region. These damages occur even to the border fence, where there is one.

Workers' compensation insurance is a whole other subject. New Mexico's workers' comp system had no idea how to handle a kidnapping claim. How long will it take for our employee to recover from this trauma? Where does he go for treatment when you live 100 miles or more from medical care?

Workers' comp is mandatory in New Mexico. It is not cheap at this point in time. If insurance companies won't cover us, we are thrown into a "pool" where rates are doubled or tripled.

Our lands, private, federal and state, are strewn with litter, trash, human waste and perhaps even drug drops that were not picked up. One neighbor had 20 head of cattle die last year from reasons that still haven't been determined. They were not shot. They hadn't been attacked by predators. There were no unusual plants that could have caused death of so many in one spot. They seemed to just fall over dead. The prime theory is that they consumed illegal drugs.

Our region from Arizona to Texas has a wide variety of federally owned lands ranging from BLM and USFS Forest Service to wildlife refuges and monuments. Many of these federal designations don't allow for appropriate surveillance. Mountains near us have been burned to the ground due to fires started by illegals. Federal land use regulations need an overhaul to address the specific and special needs of the borderlands. Law enforcement agencies and the Border Patrol need access to every inch of federal lands to be able to protect our families and communities.

We saw a 26% increase in our federal land grazing fees this year and last. Our state land grazing fees went up by 21% last year and 25% this year. These formula-driven fees do not take into account the additional costs of doing business where we are not provided the same protections that the rest of our nation's citizens enjoy.

We all have had our differences with the Border Patrol from time to time, but our problems cannot be blamed on the folks on the ground trying to maintain the border. The agents are operating with at least one hand tied behind their backs. Instead of securing the border at the border, they are directed to patrol from 20 to 60 miles north of the border. Those of us south of their arbitrary lines are literally left in no man's land. The border patrol needs access to the border, which is often denied on federal lands.

Our county governments are going broke due to the impacts of illegal traffic within their jurisdiction. Residents of my county are struggling to keep an eight-mile stretch of road that provides access to the border for the Border Patrol. There are no county funds for maintenance and there seem to be no federal funds available to address this critical area. Neighbors who will suffer additional traffic, bringing who know what on to their land, are pitted against those who will have less traffic and hazards.

On March 10, 2016 more than 600 people gathered in my small town of Animas, New Mexico to plead with elected officials from Congress all the way down to county commissions and sheriffs to demand federal help to make us safe. I invited them and I invite each of you to come and spend a few days with us to see first-hand what we deal with every day ranging from murder, kidnapping and property destruction. Come see what we put up with in our backyards. Would you allow this kind of activity on your property? What other area of our nation is sacrificed in this way?

We are in a war with drug lords and an invasion from countries from around the world, friend and foe. It is time to address this war and invasion with our troops.

It is time to focus border security on the border, not on New Mexico's Highway 9 or Interstate 10. We need more Border Patrol agents horseback in the hills and mountains. We appreciate the efforts of our elected officials since the March meeting, but it is going to take a grander approach to solve these issues.

This is the United States of America. We are American citizens. We shouldn't be forced to live this way. The Bootheel is no less America and the people are no less American than anywhere else. Is it fair for our community to be providing food for the nation while being left to fend for ourselves from smugglers and invaders?

Thank you for your time and attention. I will stand for questions.

April 28, 2016

“The Consequences of Federal Land Management along the U.S. Border to Rural Communities and National Security.”

Please allow me to begin with thanking you for inviting me here today to offer my testimony regarding the Consequences of Federal Land Management along the U.S. Border to Rural Communities and National Security.

My name is LeAlan L Pinkerton. I am currently serving in my second term as Boundary County Commissioner, District 1, Board of Commissioners, Boundary County, Idaho. I have served in this capacity since January, 2013.

Prior to being elected into office, I was employed by United States Immigration and Naturalization Service and the Department of Homeland Security, U.S. Border Patrol for over 23 years. The final 8 years of my career was concluded in Spokane, Washington, where I retired from the position of Assistant Chief Patrol Agent of the Spokane Sector in May, 2010.

Today, I intend to give you an overview describing the consequences created in the management of our national forests, accepting that much of the management decisions are significantly impacted or directed by rulings from the bench, the Endangered Species Act (ESA), biological opinions, and the volumes of National Environmental Policy Act requirements.

First, National Security issues.

In Boundary County, Idaho the U.S. Border Patrol shoulders the daunting task of patrolling the rugged and remote land masses of the Selkirk, the Purcell, and the Cabinet Mountain ranges as well as all areas in between. The overwhelming majority of the area is largely mountainous and timbered with occasional valleys and farming districts. Unquestionably, access is vital to achieve any measure of success in securing the border. This access affords the Border Patrol the ability to secure these remote areas, the maintenance of a secure border and expansion into adjoining areas needing control.

The Border Patrol has a number of tools available to support patrol activities, such as the use of ATV's, horses, snow mobiles, sensors, etc. However, none of these tools provide the advantage, timeliness, communication ability, or officer safety, as a vehicle. Unabated, the established existing road and trail system can support the operational requirements for the patrol function. Conversely, access restrictions placed by the resource managers: U.S. Forest Service (USFS) and the U.S. Fish and Wildlife Service (USFWS); creates a debilitating effect on such activities. Largely, vast border areas are infrequently monitored or go without patrol all together.

Resource managers have instituted these restrictions primarily as a result of ESA standards and biological opinions governing motorized traffic into the recovery zone of the Grizzly bear. Managers assert allowable “administrative trips” and “open road density standards.” Accordingly, in one Grizzly Bear recovery management area (Bog

Creek), the maximum allowable annual “administrative trips” are capped at 57 motorized trips per year. These trips are combined for the use of all agencies and jurisdictions, with no law enforcement exemption. The USFS and USFWS categorize the Border Patrol’s access as an “administrative trip,” albeit the Border Patrols mission is not “administrative” in nature. Never-the-less, each patrol into the recovery zone is subject to the limits of the “administrative trip” cap (57) being shared among all agencies.

The USFS and USFWS managers have affected a number of measures to inhibit the Border Patrol’s ability to access the border areas. They have placed gates on roads not previously gated. They have not provided keys in a timely fashion. They have changed locks on gated roads currently in use without providing keys in advance. They have removed culverts, decommissioned roads, dug tank traps and placed large boulders in roadways, etc. The USFS seldom gives any notification or fore-warning that such measures were scheduled or taking place.

All these agencies have been tasked with cooperating among one another as formalized through the memorandum of understanding titled “Cooperative National Security and Counter-Terrorism Efforts on Federal Lands along the United States Border”, written and agreed upon in March of 2006 and signed by the Secretary of Interior, Secretary of Agriculture, and Secretary of Homeland Security. However, it is also my belief that this region’s USFS and USFWS have deliberately ignored the spirit of this directive.

Simply put, the USFS and USFWS have placed the recovery of the Grizzly Bear, Caribou, Linx and other wildlife species as a priority above our Nation’s security.

As an example, in 2006 while I was still employed as an Assistant Chief Patrol Agent of the Border Patrol in the Spokane Sector, I pushed for access along the border on the forest road in the Selkirk Mountains known as “Bog Creek”. This road intersects a number of roads in the border area providing approximately 25 miles of border coverage. It has been in existence for decades but was gated and closed to public traffic in the mid 1980’s. Subsequently, as a result of the lack of maintenance, a culvert clogged up and a portion of the road caved away. The Border Patrol had routinely used this road for patrol purposes since its construction. But, since the area is within the Grizzly Bear Recovery area, the USFS and USFWS do not want to allow traffic on this road. Nor do they want to fund the repairs or maintenance needed to bring it back into serviceable condition for vehicular use. As a result the Border Patrol cannot use vehicles to patrol this entire length of border. In response to any incursion within this border area, the Border Patrol must traverse around the mountain range to the south then back to the north over distances that require a minimum of 3.5 hours of travel time. Throughout this particular area, no degree of security can be achieved without the use of Bog Creek Road. No level of deterrence to potential cross border illegal activity can be established, nor can any measure of control be obtainable.

Although, this type of conflict is largely repetitive with regards to operations of the Border Patrol within the Spokane Sector and Boundary County, Idaho, it is not isolated to this agency or locality. It is an ongoing affair, or tactic, being used by the Federal land and wildlife management agencies in countless locations and jurisdictions along our northern border. These same conflicts apply to our Local Sheriff’s Department,

Emergency Medical Services, Wild fire Response, Search and Rescue units, just to name a few.

I exclaim, as an elected official and a citizen, that the security of our nations' borders and our citizens is paramount. Border Security should not continue to be compromised merely to support the proliferation of any species of wildlife or natural resource.

#### Rural Community Issues:

Boundary County consists of a total land area of approximately 810,572 acres comprised of 495,219 acres (61%) Federal land; 107,267 (13.2%) acres State land; and 208,056 acres (25.6%) privately owned land. Roughly 90% of the federal property within Boundary County is bound by numerous restrictions and road closures imposed upon it because of the Endangered Species Act (ESA), recommended wilderness/road-less rule, the lack funding for road maintenance, and the lack funding for timber harvest administration, etc. Approximately 50,000 acres of federal land remains available with limited access for conventional forest management to supply our natural resource driven economy.

Boundary County's economic vitality is dependent upon the timber industry as it has been for the last 100 years. There is no shortage of timber resources as our forests continue to produce trees, and wildlife habitat is abundant. However, much of this timber is aging to the point of over maturing. Please understand that even though the timber in our forest is renewable it still has a maximum life span. Much like a farmer's crop, there comes the day that it is time for harvest. Delay will only promote loss and quality defects in the resource. The longer the delay, the more dramatic the damage will be. Vast areas of our forest suffer the effects of the lack of management through conscientious harvest.

My County at one time had, at minimum, 7 saw mills of varying sizes that provided employees with a family wage job. We are now down to 2 mills, one large and one medium. The volume of timber provided to these has steadily decreased as the years have gone by.

The forest district prior to 1990 averaged a harvest volume of 38.8 mmbf per year. Then, 1991 through 2001, harvest volumes reduced to 19.8 mmbf per year and nearly all the planned projects were appealed by non-governmental special interest groups. During the time frame of 2001 to 2010 the district averaged 14.4 mmbf and most of the projects were appealed and several were litigated. This is merely a snapshot of how much influence the courts have in forest management. Due to litigation, the courts have essentially been placed into the position of making critical management determinations regarding our national forests. Special interest groups currently hold the health of our forest for ransom.

In the current 5 year plan, within Boundary County the USFS has increased the harvest targets, from the levels of the recent past, to approximately 20 million board feet(mmbf) per year. Largely due to efforts of the State of Idaho, timber industry advocates, the Kootenai tribe of Idaho, and local collaborative partners such as the Kootenai Valley Resource Initiative. The Community Forest Landscape Restoration Act

designation (CFLRA) funding is also a significant attributing factor. This volume of harvest also represents less than 25% of the harvested timber supplying our local mills. However, the forest growth volumes continue to increase by several times beyond the targeted harvest amount.

Areas of blown down timber consisting of millions of board feet of timber are being left to waste. Ageing timber is becoming more and more susceptible to disease, insect infestation and weather damage. All of these contribute to the overwhelming threat and likelihood of catastrophic wild fire. The overwhelming majority of the National Forest in Boundary County is identified by the Idaho Department of Lands, fire hazards assessment as being at a high risk of wildfire. See attached maps. Simply put, instead of benefiting from timber harvest, the USFS spends countless millions for wild fire suppression while the habitat is suffering from the effects.

Most of the roads that I drove in years past have been closed or gated. My community does not hold any animosity towards the listing of any wildlife species, but, they do take offense to the restrictions that come with it. These restrictions have been created by agency rules, litigation through the courts, the threats of litigation or from antiquated science – science that is tagged as the “best science available.”

The Counties of the State of Idaho have continually tried to correct and protect access to our Federal Lands, but ultimately any change in the Federal Land management must come from Congress. The agency’s that have responsibility to manage land and animals are simply applying what has been handed to them by the rules and processes that are currently in place. Court actions have also added to the inability to manage our lands.

I could have bored you with statistics, but they cannot explain the whole story. Now is the time to really look at positive changes to the Acts that guide how the federal lands and wildlife are managed. I urge you to take the bull by the horns and make the necessary changes, for the sake of the citizens of my county, my state, and our country.

In conclusion, I thank you for listening and for your consideration of these matters. It has been my distinct honor to be here and to speak before you today.

**I. Introduction**

Chair Gohmert, Ranking Member Dingell, members of the Committee, I am Nan Stockholm Walden, Vice President and Counsel for Farmers Investment Co., (FICO), Farmers Water Co. (FWC) and The Green Valley Pecan Company in Sahuarita, Arizona. I appreciate the opportunity to address the Committee on public lands issues in the vicinity of the US/Mexico border.

FICO is a major agricultural enterprise founded by my husband's father R. Keith Walden almost 75 years ago. Today, my husband, Dick Walden, who is the President and CEO of the company, and the third generation of Waldens, including daughter Deborah and son Rich, are active in the company.

We employ 260 permanent workers, many of whom also are second and third generation FICO employees, whom we consider family, as well. During harvest season, we hire an additional 50 to 60 workers, making us one of the larger employers in Pima County.

FICO is the largest integrated grower and processor of pecans in the world. We are also the largest producer of organic pecans. Research has shown that pecans are rich in antioxidants, can lower harmful LDL cholesterol, and contain 19 essential vitamins and minerals, as well as being an excellent source of protein. FICO sells pecans to food manufacturers including makers of cereals, health bars, ice creams, candies and bakery goods, to retail chains that package our nuts under their label, and directly to customers—both here and abroad. We also buy pecans from other growers in the U.S. and Mexico.

FICO owns approximately 11,000 acres in Southern Arizona, of which about 7,500 acres are irrigated and under cultivation for pecan nuts, a tree native to North America.

The FICO headquarters is located just over 40 miles north of the border, and our home ranch is just less than 30 miles. Our property in Amado is a horse and cattle operation that includes 160 acres of private land and a 6,000-acre state grazing lease. We are well aware of the importance of public lands to agriculture and ranching.

Consequently, we have the first-hand experience with border security challenges, and we know the difficult job the Border Patrol is tasked to undertake. The Border Patrol has responded to calls on both our farm and our ranch. I might add that our Border Patrol Tucson Sector Ranch Liaison, Jake Stukenberg, does an excellent job helping us cooperate with Border Patrol.

Like many Arizonans, we have a special relationship with our public lands. Both our business and ranch are located near the Coronado National Forest, a major recreation venue for residents of Tucson, Green Valley, and the surrounding area. I have ridden horses, and hiked on the Coronado and have visited many of the other public lands in southern Arizona under the management of the National Park Service, the U.S. Fish and Wildlife Service and the Bureau of Land Management.

I also serve on the Board of Directors of the National Immigration Forum, a non-partisan organization that works with diverse constituencies especially business, faith and law enforcement leaders advocating for immigrants and responsible immigration policy. This policy must reflect immigrants' contributions to our nation's history, culture and growth, and their continuing contributions to our country's economy, especially in the agriculture and ranching sectors in rural communities.

The views I am offering today are informed by this context.

## **II. Economic Contribution of Public Lands**

Any examination of border security issues related to public lands must consider their economic value to rural communities. In southern Arizona, our public lands are significant regional economic contributors. For example, according to the Arizona Office of Tourism, tourism spending generates \$3.6 billion in economic activity annually and employs over 30,000 individuals in southern Arizona.<sup>1</sup> In 2012, a local tourism agency found that our natural environment is the **number one** reason visitors come to our community.<sup>2</sup>

Public land uses related to wildlife activity are also significant in our region. In 2011, watchable wildlife recreation activities, such as birding, generated over \$702 million in economic activity and supports in excess of 3,300 jobs in

<http://webcms.pima.gov/common/pages/UserFile.aspx?fileId=78818>

the four county border region.<sup>3</sup> According to the most recent data available from the Arizona Game and Fish Department, hunting and fish add over \$324 million in economic activity and almost 2,300 jobs in this same 4 county border region.<sup>4</sup>

Moreover, southern Arizona has a legacy of ranchers working collaboratively with other stakeholders to address common challenges. These examples include collaborative efforts such as the Malpai Borderlands Group and the Altar Valley Conservation Alliance. Both of these groups work with land management agencies and the Border Patrol to maintain working landscapes, including improving grazing lands, while also protecting wildlife, managing fire to benefit the landscape, dealing with drought and erosion control and other challenges.

While public safety is of paramount concern, we must also consider the economic consequences of our actions.

### **III. Impact of Permanent Border Checkpoints on rural communities and public lands**

FICO has longstanding concerns about the effectiveness of permanent Border Patrol checkpoints and their impacts on the surrounding community including nearby public lands. We met often with former Rep. Jim Kolbe, and I served on Rep. Gabrielle Giffords' Citizens' Advisory Committee on Checkpoints.

Those of us that live in areas surrounding the checkpoint have, for years, been exposed to the degradation of our public safety because of them -- high-speed car chases through our neighborhoods, gunshot victims and the like. I have experienced a high-speed chase by Border Patrol through my front driveway in Sahuarita, AZ that I am sure would have killed an employee or me had I not been in my home office at the time. The result was that a couple and two young terrified kids were apprehended, but there were no weapons or drugs found in their car.

My neighbor at the Agua Linda Ranch was pushed down on the ground by Border Patrol agents around 10 pm one night when he was near his ranch

<sup>4</sup>Silberman, J., PhD. (n.d.). *Economic Importance of Hunting and Fishing* (Arizona Game and Fish Department/Arizona State University). [https://www.azgfd.com/PortallImages/files/wildlife/FISHING\\_HUNTING%20Report Report.pdf](https://www.azgfd.com/PortallImages/files/wildlife/FISHING_HUNTING%20Report Report.pdf)

house, changing the irrigation set on his vegetables, dressed in his pajamas, despite the fact that he identified himself as the owner of the property.

Our neighbors and ourselves have had many similar experiences of livestock buzzed by helicopters flying too low over pastures, gates left open, fences cut and crossers asked to dump all their belongings on our property, which were left there, not confiscated. We have had numerous examples of Border Patrol agents being unfamiliar or lost on our ranch property, which is within a quarter mile of the major North/South Interstate, I-19.

A senior member of our team who happens to be Mexican-American was stopped by the Border Patrol 40 miles north of the border on her way from her home to work. She was driving a late model SUV with two young daughters in the back in car seats. When she asked why she was stopped, the Border Patrol Officer replied, "You fit the profile."

"What profile is that?" she asked.

"Driving a late model SUV and obeying the traffic laws and speed limit," was the reply.

Sharing these stories with you does not at all mean we do not appreciate the efforts of the Border Patrol. Rather, proper training is crucial to Border Patrol agents working successfully with rural communities. We have noted that because Border Patrol has significantly increased staffing levels in recent years, there is a lot of transferring agents from one sector to another, high rates of turnover, and lack of uniform training.

The Border Patrol strategy, "Defense in Depth," calls for retreating 30 or so miles from the border with fixed checkpoints. This strategy has us living in a no man's land and underestimates the intelligence of the enemy we are fighting—the drug and human smugglers. The assumption that these criminals will not circumvent fixed checkpoints and traverse through our neighborhoods, our ranches, our communities and our public lands is not based in reality.

There have been several in-depth examinations of the effectiveness and impacts of the Border Patrols checkpoint strategy.

GAO, August 2009<sup>5</sup> - This GAO report confirmed that the Border Patrol was proceeding without adequate information on the effectiveness of fixed checkpoints and their adverse impacts on the

---

<sup>5</sup> United States, Government Accountability Office (GAO). (2009). *Checkpoints Contribute to Border Patrol's Mission, but More Consistent Data Collection and Performance Measurement Could Improve Effectiveness* (GAO-09-824). Washington, District of Columbia.

public safety and quality of life of southern Arizona. GAO found that there were “information gaps and reporting issues” because of insufficient data, the agency was unable to compare the cost effectiveness of checkpoints to other strategies, and the Border Patrol had misrepresented its checkpoint performance. It also found that of all the apprehensions of illegal immigrants in the vicinity of the I-19 checkpoint in a certain fiscal year, “94% occurred in the areas surrounding the checkpoint, while only 6% took place at the checkpoint itself.” In other words, these statistics make it clear that the checkpoint was driving criminal activities into the areas surrounding the checkpoint.

Udall Center for Studies in Public Policy, the University of Arizona, December 2012<sup>6</sup> - After undertaking a detailed statistical analysis this study found that the I-19 checkpoint is having a significant impact on the property values of the community surrounding this facility. This means that rural communities in the vicinity of the checkpoint, like Tubac, Arizona, are bearing a disproportionate economic burden for this border security tactic.

Tubac is in a rural area 20 miles from the border. It has become a major draw for tourists and businesses due to its historical, cultural, artistic and recreational facilities. Yet we know of many visitors and potential residents who have cancelled vacations or real estate purchases due to concerns about the permanent checkpoint and appearance of extreme militarism in the area.

GAO, December 2012<sup>7</sup> - This report found, among other things, that because of data limitations the Border Patrol is unable to compare the effectiveness how resources are deployed among sectors. Each sector collects and reports the data differently thus precluding comparison. Policymakers and Border Patrol leadership are unable to effectively assess the effectiveness of tactics such as the checkpoint.

FICO believes that fixed permanent checkpoints threaten public safety in addition to resulting in significant economic consequences. It is clear in our view that they drive illegal activities away from the checkpoint into surrounding areas including federal public lands. Any policy review of border

security issues related to public lands must consider the impacts of these checkpoints.

#### **IV. Legislation regarding border security and public lands**

I would now like to turn to legislative efforts to address border security issues related to public lands. We are blessed in Arizona with magnificent national forests, national monuments, national wildlife refuges and historic sites at or near the U.S.-Mexico border. As noted earlier, these public lands are vitally important to our quality of life, recreation, and the local economy.

The very significant increase in Border Patrol agents assigned to the Southwest has led to many Border Patrol agents now working and even living on these public lands.

My understanding is that the relationship between the Border Patrol and the public land management agencies has evolved into a very constructive and well-coordinated relationship. The public land agencies have law enforcement staff with a deep knowledge of the landscape routinely work with Border Patrol agents. Land managers acknowledge the need for Border Patrol presence to patrol these lands and have developed both national and local procedures and processes that respect the Border Patrol's needs. Border Patrol agents may always use motorized vehicles in the interests of assuring public safety and national security.

The General Accountability Office (GAO) has undertaken studies that have examined the intersection of border security and environmental law. Not surprisingly and especially in the earlier years of increased Border Patrol presence, these reports documented some delays in border security infrastructure projects as the result of working with land management agencies. However, despite such incidents, "most patrol agents-in-charge told us that border security status of their jurisdictions had not been affected by land management laws. Instead, factors other than access delays or restrictions, such as the remoteness and ruggedness of the terrain or dense vegetation, have had the greatest effect on their abilities to achieve or maintain operational control."<sup>8</sup> For example, GAO testimony presented in 2011, relying on two 2010 GAO reports, noted that patrol agents-in-charge at 22 of the 26 stations on the Southwest border with federal lands in their areas reported that no portions of these stations' jurisdictions have had their border security status . . . downgraded as a result of land management laws."<sup>9</sup>

---

<sup>8</sup> "Southwest Border: Border Patrol Operations on Federal Lands", Statement of Anu K. Mittal, Director, Natural Resources and Environment, U.S. Government Accountability Office, April 15, 2011, p. 16.

<sup>9</sup> *Id.* P. 17.

GAO also noted examples of federal interagency coordination, which they found strengthened border security. Some examples of this include the placement of the forward operating bases on Organ Pipe Cactus National Monument and Cabeza Prieta National Wildlife Refuge and improvements to Forest Service roads to facilitate border security operations on the Coronado National Forest.<sup>10</sup>

I realize that there is a perception by some that the Border Patrol is “locked out” of public lands. People who spend time on public lands in southern Arizona find this assertion rather amazing, as there is considerable evidence of the Border Patrol’s presence, including regular patrols and law enforcement actions. It is a fact that CBP already has access on all federal lands<sup>11</sup>. Several thousand Border Patrol agents currently patrol public lands, the Tohono O’odham Nation, and the Barry Goldwater range in southern Arizona. There are Forward Operating Bases where agents live and work on Organ Pipe Cactus National Monument (95% wilderness) and Cabeza Prieta National Wildlife Refuge (93% wilderness). Here are some of the statements Border Patrol agents have made in relationship to this issue:

“But claiming agents would have to stop at wilderness designated areas or go around them is completely wrong,” said Border Patrol spokesman Ramiro Cordero. “Border Patrol is already permitted to monitor and enforce within wilderness areas,” Cordero confirmed Tuesday.

“We’re still allowed to patrol anywhere ... if there’s any danger or pursuit; we’re not going to stop. There’s no truth that we cannot go in (to wilderness areas). The federal authority gives us the authority to go anywhere,” Cordero said.<sup>12</sup>

Or more recently, the then Deputy Chief of the Border Patrol (now Acting Chief) had this to say in response to questions posed in the Senate Homeland Security and Government Affairs Committee:

---

<sup>10</sup> “Border Security: Additional Actions Needed to Better Ensure a Coordinated Federal Response to Illegal Activity on Federal Lands”, November 18, 2010. Memorandum from Stephen R. Viña & Todd Tatelman, Legislative Attorneys, Am. Law Division, Cong. Research Serv., on Section 102 of HR 418, Waiver of Laws Necessary for Improvement of Barriers at Borders, (Feb. 9, 2005).

<sup>11</sup> This includes wilderness areas. “Per the 2006 MOU [Memorandum of Understanding], Border Patrol agents have the authority at any time to conduct motorized off-road pursuit in the event of exigency/emergency involving human life, health, safety of persons within the area, or posing a threat to national security.” Statement for the Record, U.S. Customs and Border Protection, before the House Committee on Natural Resources, Subcommittee on National Parks, Forests, and Public Lands, ‘National Security and Federal Lands Protection Act’, Department of Homeland Security, July 8, 2011.

<sup>12</sup> “Wilderness impact on border security debated”, Las Cruces Sun News, May 11, 2010.

Senator Tester: Does the Border Patrol have access all along the border – on public and private lands?

Deputy Chief Vitiello: We're on the border everywhere – both private and public lands.

Senator Tester: What about Glacier National Park?

Deputy Chief Vitiello: Same answer, no particular problems.

Senator Tester: I don't want to put words in your mouth, but I do want to ask – do you need anything special to work in these areas? Any special tools?<sup>13</sup>

Deputy Chief Vitiello: No, no additional tools.

I also want to remind the Subcommittee that the Department of Homeland Security currently enjoys what the Congressional Research Service has characterized as the “broadest waiver of law in American history.”<sup>14</sup> That authority is still in effect and is still being used in Arizona. That provision has no sunset provision.

However, despite the Border Patrol's statements and their lack of advocacy for additional authority to waive laws, there are two bills pending in the House that would unilaterally waive laws. H.R. 1412, the misnamed Arizona Borderlands Protection and Preservation Act (which, among other things, applies to a portion of southeast California and all of Nevada), eliminates the rule of law for all actions of Customs and Border Protection on public lands. The bill's stated purpose is to “give” access to U.S. Customs and Border Protection (CBP) on federal lands “*notwithstanding any other provision of law.*” In other words, these law enforcement agencies will be given unprecedented police powers to stop “all” illegal entries. The bill exempts state and private lands, which would still enjoy implementation of the full panoply of laws while public lands would be relegated to a secondary position in which Americans living hundreds of miles from the border would not have the same federal protection of their civil rights and quality of life that exist elsewhere in the country.

---

<sup>13</sup> Senate Homeland Security and Government Affairs Committee, Hearing on Border Fencing, Infrastructure and Force Multipliers, May 13, 2015; at <http://www.hsgac.senate.gov/hearings/securing-the-border-fencing-infrastructure-and-technology-force-multipliers>, 1:25:55 – 1:28:30

<sup>14</sup> Memorandum from Stephen R. Vitiello to Todd Tatelman, Legislative Attorneys, Am. Law Division, Cong. Research Serv., on Section 102 of HR 418, Waiver of Laws Necessary for Improvement of Barriers at Borders, (Feb. 9, 2005).

H.R. 399, also pending in the House, similarly waives laws – in this case, specifically, the Administrative Procedures Act, the National Environmental Policy Act, the Wilderness Act, the Endangered Species Act, the National Park Service Organic Act, the National Historic Preservation Act, the Antiquities Act, the Arizona Desert Wilderness Act, the National Wildlife Refuge System Administration Act and several other laws – on public lands within 100 miles of the U.S. borders with Mexico and Canada. Again, this proposal is ill advised, unwarranted and not sought by the very agency it purports to assist. Rather, it appears to be a very specific assault on public lands and environmental laws.

While waiver of laws to protect our nation’s citizens, public lands, wildlife, and historic and cultural treasures could, in my view, seldom if ever be justified, it is especially inappropriate at this point when the number of apprehensions of unlawful border crossers has declined to the lowest level in forty years.<sup>15</sup> The fiscal year 2015 Customs and Border Protection Border Report found southwest border apprehensions had declined 30 percent in the last year and almost 80 percent below its peak in fiscal year 2000.<sup>16</sup> A March 2016 GAO study also found that the overall effectiveness rate of the Border Patrol increased in eight of the nine sectors on the southwest border - including a 20 percentage overall effectiveness rate increase in the Tucson sector – between fiscal years 2006 and 2011.<sup>17</sup>

DHS continues to deport individuals at significant levels following several record-breaking years. In fiscal year 2015, ICE announced it had deported 235,435 individuals. As of September 2015, the Obama administration had deported more than 2.1 million individuals.<sup>18</sup> This pace far surpasses the 1.57 million individuals deported during the eight years President George W. Bush was in office.<sup>19</sup>

<sup>19</sup> O’Toole, Molly. “Analysis: Obama Deportations Raise Immigration Policy Questions.” Reuters. Thomson Reuters, 20 Sept. 2011. <http://www.reuters.com/article/2011/09/20/us-obama-immigration-idUSTRE78J05720110920>

In this body, HR 4303, the Border Security and Accountability Act of 2015, appears to be a more comprehensive approach. Among other things, this legislation requires the Secretary of Homeland Security to develop and implement a comprehensive border security strategy and plan to implement this strategy, invest in our ports of entries, consult with border communities as well as local and state law enforcement agencies from southern border localities, and work with Mexico. It would also restore the full rule of law to our borderlands. This more comprehensive approach is worthy of consideration.

**V. Comprehensive Immigration Reform**

As longtime business owners who live and work within 30 to 40 miles of the border, I cannot emphasize enough the inexorable link between border security and comprehensive immigration reform.

We understand the gravity of the border situation—the drug-associated violence, human smuggling, and environmental impacts—as well as the impacts of some enforcement activities on our commerce and property values.

We also know the effects of poorly crafted or implemented federal or state policies that create a climate of fear and discrimination among the civilian population—business and commerce decline and families suffer.

That makes your job all the more challenging and important—and we thank you for hearing from the people like us who live this situation daily, and for those of you who have visited the border and talked to residents and those who work and travel on both sides of the line.

In 2008, I testified before the House Subcommittee on Homeland Security, regarding the importance of comprehensive immigration reform. Much of what we told you in 2008 remains a problem today.

We must remember and appreciate the contributions of our legal immigrants and those in our area who are of Mexican-American descent, without whom agriculture and ranching could not flourish in the US. The health care industry, restaurant and hospitality industry, construction, mining and many other sectors depend on continued renewal of both entry level and skilled labor from other countries.

Mexico is our third-largest trading partner, behind Canada and China. The US and Mexican economies are interdependent. As Mexico strengthens its institutions and economy, the benefits flow into our country, and there is less pressure for illegal migration.

In our experience, the paths for both permanent and temporary legal workers in the US are long, crooked and in some cases dead-ends. Since 1986 we have not uniformly enforced immigration laws, nor have we adequately dealt with ways to efficiently permit temporary workers, and provide a timely path to citizenship for those who merit it. Agricultural and other visa programs are impractical and unworkable.

Polls show that most Americans favor comprehensive immigration reform, including a path to citizenship and that these levels of support have remained constant for more than a decade.<sup>20</sup>

National security experts under both Republican and Democratic Administrations<sup>21</sup>, assert that the most effective border security strategy is comprehensive immigration reform. We must fix the immigration system by providing legal avenues for workers to enter the United States when needed and allow families to reunify. The 1986 Immigration Reform and Control Act, which resolved the status of most undocumented immigrants at the time, did not adequately address the demand for legal immigrant labor. Because there continues to be a demand for immigrant labor, individuals from other countries who seek a better life are drawn to our nation that is full of opportunity.

By providing more avenues for these individuals to come to the U.S. through legal means, law enforcement and border officials will be able to spend fewer resources toward immigrants migrating for economic reasons and more resources toward genuine criminal and terrorist threats that could harm our communities. Smart enforcement and border security, coupled with comprehensive immigration reforms, can improve security at the border.

---

<sup>21</sup> Molnar, P. (2013, April 8). Panetta Lecture Series: Border security experts say immigration reform is vital. Retrieved April 26, 2016, from <http://www.santacruzsentinel.com/article/zz/20130408/NEWS/130408557>

## **VI. Conclusion**

We appreciate the professional efforts of the Border Patrol and we certainly believe in securing our nation's borders, preferably at the border or in the immediate vicinity.

We also value our nation's public lands and understand the significant contribution they make to our local and national economy as well as to quality of life. Protection of our public lands is part of protecting our national security; the two are certainly not in conflict.

We urge Congress to stop trying to achieve the infeasible—100% apprehension of all border crossers—and to cease blaming public land managers and environmental laws for border security problems.

Rather, Congress should enact comprehensive immigration reform that addresses our society's need for lawful immigrants, and, at the same time protects and enhances the public lands our growing population needs for recreational, economic and spiritual needs.

**Protect America's Arctic: Stop Arctic Ocean oil and gas leasing**

Dear Colleague:

Please join me in sending a letter, attached below, to Interior Secretary Jewell urging her to exclude the Beaufort and Chukchi Seas from the upcoming 2017-2022 Outer Continental Shelf (OCS) oil and gas lease sale. This letter is supported by Alaska Wilderness League, Sierra Club, The Wilderness Society, Earthjustice, League of Conservation Voters, Natural Resources Defense Council, Greenpeace, National Audubon Society, and Friends of the Earth.

While I applaud the President's recent decision to remove Atlantic Ocean offshore drilling from the OCS lease sale, we must continue to remove new offshore oil and gas leasing from the table in order to safeguard our coasts and coastal communities from oil spills and to lessen the already significant impacts of greenhouse gas-associated climate change. These leases would guarantee millions of tons of carbon pollution and perpetuate America's addiction to fossil fuels.

The Arctic Ocean is iconic and ecologically critical, but it is also treacherous, hazardous, and remote. The pending Arctic Ocean lease sale represents a devastating disaster in the making: the Bureau of Ocean Energy Management (BOEM)'s own risk assessment study concludes that there is a 75% chance of a significant oil spill occurring in the Chukchi Sea if offshore drilling operations resume. The Chukchi and Beaufort Sea lease areas are hundreds of miles from the nearest Coast Guard staging areas. If you thought the weeks-long Deepwater Horizon well capping operation was slow, imagine a similar operation in an area eight times further from the nearest deepwater port.

Arctic Ocean drilling represents an ecological and economic risk that we simply must not take.

Please contact Noah Oppenheim at [noah.oppenheim@mail.house.gov](mailto:noah.oppenheim@mail.house.gov) or 5-5161 if you would like to cosign this letter or if you have any questions.

Sincerely,

Jared Huffman

-----

April XX, 2016

The Honorable Sally Jewell

Secretary

U.S. Department of the Interior  
1849 C Street, NW  
Washington DC 20240

Dear Secretary Jewell:

On behalf of the undersigned Members of Congress, we write to comment on your administration's proposed 2017-2022 Outer Continental Shelf (OCS) Oil and Gas Leasing Program. The OCS plan constitutes one of the most important remaining opportunities for this administration to align our nation's long-term energy supply

decisions with our commitments to a clean energy economy, thus reinforcing our commitment to the international accord reached last year in Paris to cut climate changing emissions, as well as last month's agreement with Canada to jointly pursue emissions reductions and protection of the Arctic and its peoples.

To that end, we appreciate the administration's foresight in excluding the Atlantic from development in the recently released proposed 2017-2022 Five-Year Leasing Program. We urge you to build on this by removing the Arctic Ocean sales from the Proposed Program. Further, we urge the administration to once again set the pace in the fight against global climate change by ensuring these vital and unique waters are permanently taken off the table from any future oil and gas development.

As this administration laid out in the US-Canada Joint Agreement, our nation should be focusing on achieving strong conservation goals for the Arctic and making decisions to develop oil and gas resources only when the highest safety and environmental standards are met, including national and global climate and environmental goals. To meet these goals, the Arctic Ocean should be permanently protected from oil drilling, not used to drill for more fossil fuels that we will not need—and must not burn—if we are serious about powering our future with clean energy. Continued inclusion of the Arctic in the 5-year plan would take our nation backwards in its commitment to address climate change and facilitate the transition to clean energy.

Scientific consensus tells us that the vast majority of known fossil fuel reserves must be left undeveloped if we are to avoid the worst effects of climate change, and the development of Arctic Ocean oil and gas has specifically been identified as incompatible with the President's commitment to keep the planet's average temperature rise under 2° Celsius. Moreover, oil from Arctic Ocean drilling—if viable at all—would not be available for decades and, once online, would risk locking the American People into a contract guaranteeing carbon pollution for decades. In contrast, ending oil and gas development in the Arctic would send a powerful international signal that the United States is committed to investing its resources in a climate safe, clean-energy future.

Arctic Ocean drilling would not only make climate change worse, it would also put our marine ecosystems and ocean-reliant communities at risk of a major oil spill. The Arctic region is home to vibrant coastal communities, iconic wildlife, and some of the last wild places relatively untouched by industrial development. Healthy marine ecosystems are vitally important to communities, culture, and all other aspects of life along the Arctic coast. According to Bureau of Ocean Energy Management's own study, the development of new leases in the Chukchi Sea would come with a 75 percent chance of at least one significant oil spill. Arctic Ocean lease sales for 2017-2022 represent a tacit endorsement of unacceptable levels of irreversible habitat destruction.

Last year, your agency made several important and forward-looking decisions about the Arctic region. The cancellation of Chukchi Sea Lease Sale 237 and Beaufort Sea Lease Sale 242 and the rejection of Suspension of Operation requests from Shell and Statoil were important steps forward. Additionally, President Obama's withdrawal of specific areas of America's Arctic Ocean from oil and gas leasing is a significant first step toward long term protections for the most sensitive and important marine waters and coasts in America's Arctic.

Excluding the Beaufort and Chukchi Seas from future leasing will help protect these areas and would build on this Administration's leadership in combating climate change. Again, we appreciate recent decisions in the Arctic Ocean and urge that you seize this moment to remove these areas from the 2017-2022 program and instead grant them the permanent protection they so richly deserve. Please take bold action to ensure the fate of the Arctic Ocean is not left to an uncertain future, but instead secured now for the sake of this and future generations.

Sincerely,

...

**Subject:** Osage/CFR clarification

Hello,

I wanted to let you know that the Director of Bureau of Indian Affairs will soon publish a rule to ensure that the Code of Federal Regulations (CFR) reflects the current, operative version of the rules that are in place to address oil and gas leases on the Osage reservation.

This will not result in any change in the on-the-ground conditions on the Osage reservation, and is necessary only because the CFR is currently showing an incorrect version of the regs (the version that published in May 2015 but which never took effect due to litigation).

Long story short: the regulations that are in place now are the same regulations that existed previous to the May 2015 publication, but we need to make sure the CFR is updated to reflect that. Hence, this "clean up" publication in the Code.

Please let me know if you have any questions about this formality.

Thank you,  
Jeremy Bratt

## **House Dems want Arctic drilling yanked from leasing plan**

[Emily Yehle](#), E&E reporter

Published: Tuesday, May 3, 2016

More than 60 Democrats -- and one Republican -- are asking the Obama administration to remove the Arctic Ocean from its five-year oil and gas leasing plan.

The lawmakers sent a letter yesterday to Interior Secretary Sally Jewell, asserting that drilling in the Arctic "would take our nation backwards in its commitment to address climate change and facilitate the transition to clean energy."

The administration already has taken Atlantic Ocean drilling off the table, announcing in March that it would reverse course and not open up the East Coast to offshore exploration ([Greenwire](#), March 15).

But the updated draft of its 2017-22 leasing program still includes 13 potential oil and gas lease sales in the Gulf of Mexico and the Arctic.

In their letter, the lawmakers argue that drilling in the Arctic is incompatible with the nation's commitment to keep the global temperature from rising above 2 degrees Celsius under the Paris accord.

"[O]il from Arctic Ocean drilling -- if viable at all -- would not be available for decades and, once online, would risk locking the American people into a contract guaranteeing carbon pollution for decades," the lawmakers write. "In contrast, ending oil and gas development in the Arctic would send a powerful international signal that the United States is committed to investing its resources in a climate safe, clean-energy future."

Illinois Rep. Robert Dold is the lone Republican who signed the letter, according to a press release from Rep. Jared Huffman (D-Calif.). In addition to Huffman, Democrats from California, Florida, Oregon, Maryland, New York and a handful of other states signed the letter, as did Washington, D.C., Del. Eleanor Holmes Norton.

The Interior Department plans to finalize the leasing program before President Obama leaves office. Energized by their success in preventing drilling in the Atlantic, environmentalists have focused on a "keep it in the ground" campaign, with a particular focus on the Arctic ([Greenwire](#), April 27).

As currently drafted, the leasing plan includes potential sites in the Beaufort and Chukchi seas, as well as in Alaska's Cook Inlet. Jewell has asked for public input on whether the Arctic waters "are appropriate for future leasing and how we can protect environmental, cultural and subsistence resources" ([EnergyWire](#), April 6).

The other Democrats who signed yesterday's letter: Reps. Alma Adams of North Carolina; Grace Napolitano, Barbara Lee, Doris Matsui, Zoe Lofgren, Scott Peters, Lois Capps, Maxine Waters, Ted Lieu, Jackie Speier, Tony Cárdenas, Pete Aguilar, Michael Honda, Mark DeSaulnier, Alan Lowenthal, John Garamendi, Mark Takano and Lucille Roybal-Allard of California; Earl Blumenauer and Suzanne Bonamici of Oregon; Donald Norcross, Bonnie Watson Coleman, Frank Pallone and Bill Pascrell of New Jersey; Chris Van Hollen, John Delaney and Donna Edwards of Maryland; Donald Beyer, Gerald Connolly and Bobby Scott of Virginia; Ann McLane Kuster of New Hampshire; Matthew Cartwright and Chaka Fattah of Pennsylvania; Derek Kilmer of Washington; James Langevin of Rhode Island; Patrick Murphy, Alan Grayson, Corrine Brown, Kathy Castor, Frederica Wilson and Ted Deutch of Florida; Mike Quigley, Janice Schakowsky and Luis Gutiérrez of Illinois; Carolyn Maloney, Yvette Diane Clarke, Steve Israel, Paul Tonko, José Serrano and Nydia Velázquez of New York; Beto O'Rourke of Texas; Niki Tsongas and Bill Keating of Massachusetts; Jared Polis of Colorado; Peter Welch of Vermont; Betty McCollum and Keith Ellison of Minnesota; Chellie Pingree of Maine; John Yarmuth of Kentucky; Raúl Grijalva and Ruben Gallego of Arizona; Mark Pocan of Wisconsin; and Steve Cohen of Tennessee.

Graham, attached are some documents - the Complaint and the transmittal letter to the City, and a press release from DOJ. If you could keep this internal to your office until 1 EST, that would be helpful. I understand DOJ took the lead in notifying the city and the Pueblo today as well.

Thanks,

Jeremy

**United States Department of the Interior**  
**BUREAU OF INDIAN AFFAIRS**  
**SOUTHWEST REGIONAL OFFICE**  
1001 Indian School Road, N.W.  
Albuquerque, New Mexico 87104

IN REPLY REFER TO:  
420 – Real Estate Services

NOV 13 2013

**NOTICE TO SHOW CAUSE**

The Honorable Alice A. Lucero  
Mayor, City of Espanola  
405 North Paseo de Oate  
Espanola, New Mexico 87532

**Subject: Trespass along State Road 106 due to Expired Easement NPA-84-SC-50**  
**Trespass along Four Miles of Highways, Roads and Streets due to Expired**  
**Easement NPA-84-SC-20**

Dear Mayor Lucero:

We write concerning two instances of trespass by the City of Espanola (“City”) brought to our attention by the Pueblo of Santa Clara (“Pueblo”). Upon review of the various legal documents provided by the Pueblo and BIA records, we have determined the City to be in trespass on Pueblo land. This Notice provides the City information concerning these instances of trespass and notifies the City that it must show cause why the City should not be immediately assessed trespass damages and why the City should not be evicted from the subject Pueblo lands.

**BACKGROUND**

**Trespass 1**

The City was granted a right of way (“ROW”) across Pueblo land on July 30, 1984. (Exhibit A). The purpose of that ROW, identified as NPA-84-SC-50 (“ROW SC-50”), was “for connection to existing Sewerline and for no other purpose.” *Id.* ROW SC-50 ran “along State Road 106 (McCurdy Road) a distance of 848.70 feet between two existing manholes and 25’ to 30’ in width.” *Id.* The grant conveyance instrument included an attached map indicating the location of the ROW.

The term of ROW SC-50 was for ten (10) years, with the option of a ten (10) year renewal. *Id.* There is no evidence in the record showing that the City submitted an application to renew ROW SC-50 prior to its expiration or that such renewal was granted by the BIA. Thus, the ROW expired by its own terms on July 30, 1994.

## Trespass 2

On May 14, 1984, the City was granted another right-of-way across Pueblo Land. (Exhibit B) That ROW, identified as NPA-84-SC-20 ("ROW SC-20"),<sup>1</sup> was entered into "for the operation and maintenance of sewer and water lines in place, and for no other purpose." *Id.* The term of ROW SC-20 was retroactively dated with a beginning date of April 1, 1982 and a duration period of twenty (20) years. The conveyance document also contained an option for renewal for an additional twenty (20) years. The original term of ROW SC-20 expired on March 31, 2002. *Id.* There is no evidence in the record that the City submitted an application to renew ROW SC-20 prior to its expiration or that such renewal was granted by the BIA. Thus, the ROW expired by its own terms in 2002.

## CONCLUSION

According to our records, the City is in violation of federal requirements governing the use of Indian trust lands. Specifically:

ROW SC-50 expired by its own terms and was not renewed; thus, the City has been in trespass since July 30, 1994;

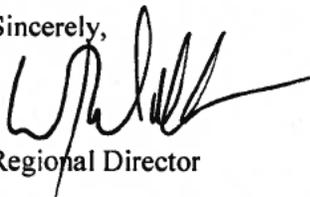

ROW SC-20 expired by its own terms and was not renewed; thus, the City has been in trespass since April 1, 2002.

You are hereby informed that the City has thirty (30) days from receipt of this letter to show cause why the City should not be immediately assessed trespass damages and why the City should not be evicted from the subject Pueblo lands. Should the City fail to resolve these trespasses within that 30-day period, by reaching an agreement with the Pueblo, subject to federal approval, that settles the trespass damage claims and establishes lawful presence on the Pueblo's lands, we will assess trespass damages payable in accordance with the terms of the assessment notice. The City's failure to make such payment may lead to legal action in federal court for eviction of the City from Pueblo lands.

We encourage the City to enter into negotiations with the Pueblo to resolve the current trespasses as quickly as possible and establish legal bases for the City's continued use of Pueblo land.

If you have any further questions, please contact Mike Anspach, Realty Specialist, Division of Real Estate Services, at (505) 563-3335.

Sincerely,

Regional Director

## Enclosures

cc: The Honorable J. Bruce Tafoya, Governor, Pueblo of Santa Clara (w/ enclosures)  
Dancy Simplicio, Realty Director, Pueblo of Santa Clara (w/ enclosures)

<sup>1</sup> The City and the Pueblo had, in 1982, entered into Lease NPA-82-SC-28. That Lease covered the exact property and was for the exact same purpose as ROW SC-20. The terms of the 1982 Lease were referenced and incorporated into ROW SC-20.

**CITY OF ESPANOLA'S RESPONSE TO ORDER TO SHOW CAUSE RE  
ALLEGED TRESPASS**

The City of Española (the "City"), by and through its attorneys Coppler Law Firm, P.C. (Frank R. Coppler and John Appel) hereby responds to the Notice to Show Cause issued on November 13, 2013 in this matter by the U.S. Bureau of Indian Affairs, Southwest Regional Office ("BIA") as follows:

**I. BACKGROUND**

The City was incorporated in 1925. Its boundaries include reservation land of the Santa Clara Pueblo ("Santa Clara") as well as that of Ohkay Owingeh and San Ildefonso Pueblos. The Santa Clara Pueblo land extends over much of the southern and central portion of the City. See Map attached as Exhibit A. The map was prepared by the City and show the road in which water and sewer lines are located. The black lines are state highways which include City water and sewer lines. The purple lines are either City streets in which there are City water and sewer lines or streets on Tribal land which contain water and sewer lines. Payment for the alleged trespass

by the City over Santa Clara land as well as for renewal of the "leases" for underground utilities which Santa Clara relies on (NPA-84-SC-20 and NPA-84-SC-50-"the Easements") has been the subject of negotiations between the City and Santa Clara since 2009. See Notes and correspondence attached as Exhibit B. The City offered \$300,000 for trespass damages and Santa Clara had demanded \$530,691. In addition, Santa Clara has demanded \$3,298,059.00 for renewal of NPA-84-SC-20 and NPA-84-SC-50 for the underground easements for water and sewer lines. Santa Clara has been inflexible in its demands over this time period and the negotiations have gone nowhere.

Furthermore, Santa Clara has unreasonably withheld permission to allow the new water lines in State Highway 84/285, generally from Dandy Burger to the top of the hill to be used. This line was put in with permission from the New Mexico Department of Transportation ("DOT"). The fact that the waterline cannot be used results in the continued use by the owner of a domestic well in violation of City Ordinances which are based on public health considerations. See Exhibit C attached. In addition, in 2002, when the City attempted to fix a leaky waterline serving Johnny's Standard Motors which is located on Santa Clara land adjacent to Highway 84/285, Tribal police arrived and ordered City employees, Marvin Martinez and Sammy Abeyta to stop work on threat of being arrested.

The City's Water & Sewer services are run separately from the general City budget subject to enterprise accounting as required by New Mexico State law (§ 6-6-11, NMSA 1978) and the Governmental Accounting Standards Board ("GASB"), which is the source of generally accepted accounting principles used by State and local governments. Section 6-6-11 provides that it is unlawful for municipalities to become indebted for expenses in any current year which

cannot be paid by the end of that year. (The Bateman Act). As a result of the strict accounting standards applicable to municipal enterprises, the City Water & Sewer services must pass all additional costs of providing water and sewer services to the customers it serves in the area affected by the enhanced costs. Thus, any settlement with Santa Clara would result in additional water and sewer fees to those residents and businesses in the areas within Santa Clara tribal boundaries for which the extra expense arises. As a result, the City has enacted the attached ordinance providing that extra expense related to service on Santa Clara land will be passed on to those customers. See Exhibit D hereto.

The remedy suggested by the BIA if the City does not pay the amount demanded by Santa Clara in the Notice to Show Cause is removal of the City water pipes and sewer lines from the roadways. Destruction of a large part of the City water and sewer system which also serves Santa Clara, including its casino and large hotel would do at least as much harm to residents and businesses of Santa Clara as to the residents and businesses of the City. Do we really want to go back in time when there was not a single regulated domestic water system for the area serving all citizens? Water, both surface and ground water, does not respect political boundaries. A central sewer system with its functions of separating the nitrates and returning the clean water to the natural system is essential to protecting the water supply and public health. If, however, BIA prevails in its position that Santa Clara's demands for money must be met, then the City as an alternative to acceding to the BIA demand to remove the facilities will pass the cost on to residents and businesses in the Santa Clara area.

One final point is that the City's water and sewer service is a municipal utility, not subject to regulation by the Public Regulation Commission of the State of New Mexico

according to State law. Gas, electric and phone utilities are granted franchises by the City for use of City streets negotiated between the City and the particular utility. The fee must be reasonably related to the cost to the City of the administration of those utility lines. Santa Clara does not administer the water and sewer lines in the City and State streets and highways. The administration of those utility lines is handled for the most part by the DOT. Thus there is no reasonable necessity for the Pueblo to charge outrageously inflated fees for use of the underground easements because the Pueblo incurs no expense whatever in maintaining the easements.

**II. MOST OF THE HIGHWAYS IN WHICH THERE ARE WATER AND SEWER LINE EASEMENTS ARE STATE HIGHWAYS AND CITY STREETS WHERE THERE IS NO PROOF THERE WAS EVER A RESERVATION OF UNDERGROUND RIGHTS BY THE TRIBE.**

The highway right of ways in which City water and sewer lines are placed are owned by the State of New Mexico DOT, the City or in one case by the Tribe itself. See Exhibit A. The City and the DOT are both arms of the State of New Mexico. For most of these highways, roads and streets, there is no evidence of any reservation of underground rights having been made by either the Tribe or the Secretary of the Interior when the original highway easements were granted. This conclusion is based on the Response of the Bureau of Indian Affairs under the Freedom of Information Act ("FOIA") request dated August 17, 2010 on behalf of the City. See Exhibit E.

It has been the law since 1901 that a grant of easement through trust lands for highways includes the right to place underground utilities within the roadway. When the federal government grants permission to State or local authorities to open a public highway over

reservation land or lands allotted in severalty to Indians, State law applies to use of the public highway right of way easement. New Mexico law provides that the DOT is authorized to permit the placement of underground pipelines, transmission lines and ditches under, alongside or over public highway right of ways and that such construction does not constitute an additional burden on the right of way. Thus, the right to place sewer and water lines under public highways is incident to the rights granted when one acquires the right of way and does not require additional permission from the federal government or from the Tribes and is not a trespass. The FOIA information provided by the BIA shows that it is probable that the majority if not all of the State and City road rights of way were granted prior to 1971 when tribal permission for grants of trust land by the government was first required by law.

The federal government has the power to allow State and local governments to establish public highways across Indian reservation land or through certain allotted lands pursuant to 25 U.S.C.A. § 311. This statute was passed as part of the Act of March 3, 1901 and has remained unchanged since then. Section 311 provides:

The Secretary of the Interior is authorized to grant permission, upon compliance with such requirements as he may deem necessary, to the proper State or local authorities for the opening and establishment of public highways, in accordance with the laws of the State or Territory in which the lands are situated, through any Indian reservation or through any lands which have been allotted in severalty to any individual Indian under any laws or treaties but which have not been conveyed to the allottee with full power of alienation.

It is unclear, in this case how the "streets, highways, roads and alleys" referred to in the 1982 Lease NPA-84-SC-20 and NPA-84-SC-20 for McCurdy Road originally became public highways. It is also unclear when and how the purple road (Hamm Parkway) owned by the City

near the river was granted to the City. Apparently the two purple roads on the east side of the map are owned by Santa Clara. It must be assumed that the federal government gave the necessary permission to the DOT and the City for opening these rights of way through the Santa Clara Reservation at some time in the past prior to 1950 because the records provided by the BIA do not show that any of these streets originated during the period covered by the records BIA has provided. These records show various widenings and realignments of the State Roads, but no new roads.

Section 311 means that when a public highway is established, the law applicable to the highway right of way is State law, not Indian law and not Federal law. In the past, a number of United States Supreme Court and other federal court decisions have explained Section 311 in light of factual situations not unlike the dispute between the City of Española and the Pueblo of Santa Clara.

In *United States v. Oklahoma Gas & Electric Company*, 318 U.S. 206, 63 S.Ct. 534 (1943), the Supreme Court held that it was not illegal for the Oklahoma Gas & Electric Company to maintain electric transmission lines along a public highway through Indian lands pursuant to Section 311. The United States sued the electric company on behalf of a band of Kickapoo Indians seeking a declaratory judgment that the company illegally occupied Indian land with its pole line. The land in question was allotted to She-pah-tho-quah, a Mexican Kickapoo Indian and her heirs. The State of Oklahoma received permission to open the highway and paid compensation to the heirs. The highway was opened and in 1936, the Oklahoma State Highway Commission granted the Company a license to place a rural electric line along the highway. The Supreme Court held that under the laws of Oklahoma the use of the highway by

the Company was a proper and lawful highway use, imposing no additional burden for which a grantor of the highway easement (i.e. the Indians) would be entitled to compensation. The Supreme Court stated: **"It is well settled that a conveyance by the United States of land which it owns ....for the purpose of exercising its guardianship over Indians, is to be construed ....according to the law of the State where the land lies."** This decision clarifies that the words in Section 311 "in accordance with the law of the State or Territory" embrace not only the State laws relating to the "opening and establishment" of the highway, but also to the State laws governing the incidental uses which might be made of the highway.

It is probable that most of the State road rights of way through Santa Clara land were established prior to 1971. The most prominent part of the State Road system through the City is Riverside Drive-State Road 84/285, which is an ancient road probably established during colonial days. Likewise, State Road 106-McCurdy road has been in existence for many years. The records provided by the BIA in response to the records request do not go back further than 1950. The records show various realignments and widening of the roads and highways rather than the opening of a new highway. It must be presumed, then that the State Road rights of way were granted pursuant to Section 311 for which it is clear that State laws govern the incidental uses which may be made of the highway. Furthermore, Section 311 does not require the permission of the tribe in addition to the permission of the Secretary of the Interior in order to grant a highway right of way through trust lands.

The argument could have been made that Section 311 did not apply to Pueblos, because these statutes applied to "Indian reservations" and the lands held by the Pueblo Indians in their unique form of ownership in fee simple communal title were not technically "Indian

reservations." However, in *United States v. Sandoval*, 231 U.S. 28, 34 S. Ct. 1 (1913), the Supreme Court held the United States' guardianship and regulatory laws also extended to the Pueblo lands. Continuing doubts over the fact that Pueblos held their lands in fee simple communal title, led Congress to attempt to remedy the situation with specific legislation. In this context, the Act of May 10, 1926, was passed and then amended by the Act of April 21, 1928. Thus, certainly at least since 1928, (the City was incorporated in 1925), and more probably since 1901, Pueblos have been subject to Section 311.

In 1948, the Congress passed the Act of February 5, 1948, codified as 25 USC § 322-328. Section 25 USC § 323 provides:

The Secretary of the Interior be, and he is hereby, empowered to grant rights-of-way for all purposes, subject to such conditions as he may prescribe, over and across any lands now or hereafter held in trust by the United States for individual Indians or Indian tribes, communities, bands, or nations, or any lands now or hereafter owned, subject to restrictions against alienation, by individual Indians or Indian tribes, communities, bands, or nations, including the lands belonging to the Pueblo Indians in New Mexico, and any other lands heretofore or hereafter acquired, or set aside for the use and benefit of the Indians.

Section 323 is a general statement that the Secretary of Interior may grant rights of way over Indian lands. Section 311 quoted above is specific to highways. Section 323 also does not require consent of the tribes. As to the question whether a right of way grantee such as the City and the New Mexico DOT can allow easements underneath roadways for utility use, the 1948 Act is silent and the decisions based on Section 311 still applied after 1948.

Then in 1971 Code of Federal Regulations 25 CFR 161 (now recodified as 25 CFR 169 et seq.) was added. Section 25 CFR § 169.3 Consent Of Landowners To Grants Of Right-Of-Way provides:

(a) No right-of-way shall be granted over and across any tribal land, nor shall any permission to survey be issued with respect to any such lands, without the prior written consent of the tribe...

Again, this is a general regulation for rights of way which does not mention the special case of easements for utility within rights of way for public highways.

However, in *United States v. Mountain States Telephone and Telegraph Company*, 434 F. Supp. 625 (D. Mont. 1977), the United States District Court addressed the question whether a telephone company could maintain telephone lines buried in a public highway running through reservation lands without the consent of either the Secretary of the Interior or the Tribes. The Court held that Montana state law governed all incidental uses of the right of way once the Secretary of the Interior gave permission to the State of Montana to open the public highway across the Flathead Indian Reservation,. The Court also held that maintenance of the phone line did not do any damage to the tribes.

A more recent Supreme Court case made it clear that a state highway right of way, once granted by the Secretary of the Interior, **becomes state land held in fee by the state**. In that case an auto accident occurred on a state highway maintained under a federal grant through an Indian reservation. The Court held that tribal courts have no jurisdiction over non-tribal members involved. In *Strate v. A.I. Contractors*, 520 U.S. 438, 117 S.Ct. 1404 (1997) the Court considered whether tribal courts had jurisdiction over the claim by one of the drivers against the other when the accident happened on a portion of state highway which ran through the Fort Berthold Indian Reservation. Neither driver was a member of the Tribes or an Indian. The Supreme Court held that absent a statute or treaty authorizing the Tribes to govern the conduct of

non-members driving on the State highway, tribal courts may not exercise jurisdiction in such cases. **The Court reasoned that easements across Indian land are the equivalent of non-Indian fee land.**

Relying on *Strate*, some even more recent cases have extended the power of states to regulate easements on Indian lands in situations where tribes have attempted to impose ad valorem taxes on power lines along highways. In *Big Horn County Electric Cooperative, Inc. v. Adams*, 219 F.3d. 944 (9<sup>th</sup> Cir. 2000) the Ninth Circuit Court of Appeals held that the Cooperative's **rights of way were equivalent of non-Indian fee land** for the purpose of determining the tribe's regulatory jurisdiction and the tribe lacked regulatory authority to impose an ad valorem tax against the Cooperative. Thus the trend in Federal Courts is to continue to limit Tribal jurisdiction over easements held by non-Indians, be they public entities or private individuals or companies.

Having established that under Federal law, it is State law that applies to the use of easements for public highways over Indian lands, the next question is what specifically New Mexico law provides with respect to the use of highway easements for utilities.

The authority for use of state highway easements is granted to the New Mexico DOT by NMSA 1978, §67-3-12 C which provides:

In addition to the powers now conferred upon it by law, the state transportation commission:

.....

C. shall prescribe by rule the conditions under which pipelines, telephone, telegraph and electric transmission lines and ditches may be placed along, across, over or under public highways in this

state and shall forcibly remove or cause to be removed pipelines, telephone, telegraph or electric transmission lines or ditches that may be placed along, across, over or under such public highways in violation of such rules and regulations;

Under Title 17, Chapter 4, Part 2 of the New Mexico Administrative Code, the DOT has in fact set forth rules for water, sewer electric and other utility lines within the rights of way of highways roads or streets under their jurisdiction. This utility accommodation policy applies to all publicly, privately, cooperatively, municipally or governmentally owned facilities used for the transmission or distribution of electric power, communication facilities, water, gas, oil, chemicals, sewage, steam, drainage, irrigation or similar items. See 17.4.2.10. NMAC as follows.

**GENERAL POLICY** It is the general policy of the Department to accord utilities certain legal rights pertaining to the occupation of public right-of-way as outlined below:

A. It is in the public interest for utilities to be accommodated within the public right-of-way of highways and, under limited conditions, within access controlled freeways, including interstates under the jurisdiction of the New Mexico State Highway and Transportation Department when such use does not adversely affect the highway features, aesthetic quality, public use, or safety of the traveling public, NMSA 1978, Section 67-8-15.

B. Public utilities have the power of eminent domain, which gives them a quasi-public status. In addition, a public utility operating in New Mexico has a legal right to install its facilities within highway right-of-way, subject to the regulations of this Department. Public utility facilities are not right-of-way encroachments, nor may they be treated as such. Therefore, the administrative intent of the Railroads and Utilities Section is to provide reasonable, efficient and economic solutions to conflicts between the requirements of highway design, construction operations and safety and the location of public utility facilities. Railroads and Utilities Section Agents, Technicians and other assigned personnel should engage in constant liaison with utilities and railroads, to ensure that the communication and interrelations with them are an on-going function of their work performance.

C. The location or the relocation of public utility facilities within existing New Mexico public highway right-of-way, or right-of-way to be acquired

for highway construction purposes, shall be governed by all applicable State laws, rules and regulations, Federal Codes and the Department policy set forth herein.  
[3/10/71, 11/15/96; Recompiled 12/31/01]

In addition, in accordance with Federal law, in 1971 the New Mexico Highway and Transportation Department added the following:

**17.4.2.11 H. Other required permits:** In areas where highways pass through land controlled by the U.S. Forest Service, Bureau of Land Management, U.S. Military Bases, Indian Lands and other designated Federally controlled lands, and certain New Mexico state lands under the jurisdiction of the New Mexico State Land Office, and/or other state agencies, the utility owner must also obtain a permit, written permission, or other documented authorization from these agencies for utility installations. This written authorization is required in addition to the Department's Utility Accommodation Permit, and shall accompany the Department's permit request for new installations, or as determined by the Department.

[3/10/71, 11/15/96; Recompiled 12/31/01]

Prior to 1971, the DOT was not required by State or Federal law to get permission from Tribes for utilities under public highway rights of way.

New Mexico Courts have held that construction of pipelines underneath highways is a permissible use of a public highway easement and does not constitute an additional burden on the servient estate. In *Amerada Hess Corporation v. Adee*, 106 N.M. 422 (Ct.App. 1987) *certiorari denied* Oct. 21, 1987, the Court found that the State Highway Commission was acting within its authority under NMSA 1978, §67-3-12 C when it allowed Amerada Hess to place a pipeline for the conveyance of carbon dioxide under the public highway easement on defendants' land. The landowners objected to the pipeline and sought an injunction and compensatory and punitive damages. In denying the landowners' claim, the Court quoted from *Hall v. Lea County Electric Cooperative*, 78 N.M. 792 (1968) in which the New Mexico Supreme Court held:

We are of the opinion that the better reasoning supports the general rule that the construction and maintenance of an electric power or transmission line, within the boundaries of a public highway, are consistent with the permissible uses to be made of a public highway easement and do not constitute an additional burden or servitude.

Therefore, New Mexico law is clear that the use of public highway right of ways for underground pipes and transmission lines is an incident of the grant of the easement and does not constitute an additional burden on the servient estate. Furthermore, it is questionable whether the purported lease and grant of easement (NPA-84-SC-20 and NPA-84-SC-50-“the Easements”) of 1984 were effective to lease any easement to the City for underground utilities because under Federal law, highways granted to state entities include the underground easements as well as above ground. Furthermore, no permission of the Tribes prior to placement of utilities in roadways was required by either federal or state regulations until 1971. The City has no information to date to show that the roads and highways in question were opened in or after 1971. In fact the NPA-84-SC-28 lease agreement indicates the utilities were already in place at the time the agreement was signed.

It is apparent that the utility easements in question most probably predate the time in which permission of the Tribes was first required when the Secretary of the Interior gives permission for the grant of a public highway right of way. Prior to 1971, the grant of a right of way did not require Tribal permission and constituted a fee simple interest in the property which included the right to place utilities under the roadway. It is highly questionable whether Santa Clara even owns the rights of way it seeks to lease to the City or be paid for trespass upon/

### **III. THE APPRAISAL RELIED ON BY SANTA CLARA IN ITS DEMAND IS SERIOUSLY FLAWED**

#### **1. The City has never been provided with a complete copy of the appraisal.**

The City has never been provided with a complete copy of the appraisal that Santa Clara relies on in making its demand for compensation ("the Appraisal"). The City has only seen the last few pages of it. What has been provided appears to show that the land is being valued as if it were sold to a buyer, was above ground and used as business property and was not subject to an exclusive surface transportation easement. In fact, the area under the streets cannot and will not ever be used for anything other than the placement of utilities. Thus, the underground areas have no sale value at all. The City must be given the entire Appraisal because it is curious about this "market" for these rights. You cannot build a business in the roadway!

Further, the demand is not for the sale value, but rather for the lease of the areas in question for a period of time. This fact, makes the valuation which seems to be computed as if the areas were to be permanently alienated from Santa Clara even more outrageous.

#### **2. The Appraisal valuation appears to rely on a computation based on "before and after" value, when actually water and sewer lines are an enhancement to value**

The Appraisal valuation appears to rely on a computation based on "before and after" value, when actually water and sewer lines are an enhancement to value. This type of valuation is applicable in condemnation cases where there is a partial taking of the property.

New Mexico Jury Instruction 13-704 provides:

**Partial taking, fair market value.**

In this case, only a part of the defendant's property was taken. The money damages to be paid the owner for the property actually taken is the difference between the fair market value of the entire property immediately before the taking and the fair market value of the remaining property immediately after the taking.

This method of valuation is incorrect in this situation for two reasons. First, of course, there is no permanent taking involved, as in the case of a condemnation. In addition, the presence of the water and sewer lines in roadways crossing Santa Clara land are a benefit to the Pueblo, allowing the City to provide services to their members' homes and businesses and thus an enhancement to the Pueblo. *Hall v. Lea County Electric Cooperative*, 78 N.M. 792 (1968). Put succinctly, potential residential or business uses in an urban area cannot be accomplished without basic water and services. Without those services, the Pueblo would have to run its own water and sewer system, a significant burden because there are among other Santa Clara owned enterprises on the reservation, a casino and large hotel.

**3. Easement NPA-84-SC-20 relies on Lease NPA-82-SC-28 which is imprecise in its description of what "Highways, Roads, Streets and Alleys" it refers to.**

Easement NPA-84-SC-20 relies on Lease NPA-82-SC-28 which is imprecise in its description of what "4 miles of Highways, Roads, Streets and Alleys" it refers to. The lease refers to a map which has not been included with the Notice to Show Cause, nor in the records provided by the BIA in response to a request for public records dated See Exhibit C. Without the map it is impossible for the City to verify the exact dimensions of the area in question. The lease itself refers to "Four miles of Highways,

Roads, Streets and Alleys" ... containing 4.0 acres." Four miles of State Road 84/285 alone constitutes considerably more than 4 acres. Without knowing precisely which roads are being referred to it is impossible at this time to evaluate the appraisal and, even more important, to determine when the streets and highways were initially established and originally under what terms and circumstances with respect to Santa Clara, what law was in force at the time the roads, highways and streets, whether there ever was an easement granted to the City by Santa Clara and other questions of law and fact which may have significant bearing on the legal standing of the areas in question. The Lease itself acknowledges that the water and sewer lines were already in place as of 1984 when it was signed

In response to the City's public records request, the BIA only provided records going back as far as 1950. The City was incorporated in 1925. There is much history of these streets, highways and roads which is still to be learned, which when fully developed, may well reveal that the purported Lease NPA-82-SC-28 actually leases easements that the BIA on behalf of Santa Clara had already given away or sold to the City or the New Mexico Highway and Transportation Department when the parties entered into it.

**4. The Appraisal is also flawed because clearly there is no way of knowing the exact width or length of the area actually taken under the highway for water and sewer lines.**

The Appraisal is also flawed because there is no way of knowing the width or length of the areas actually taken under the highway for water and sewer lines. The portion of the Appraisal the City has been given does not indicate how the appraiser could have determined the actual length and width of the areas in which the water and sewer lines are

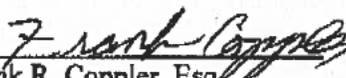

located. Thus the appraisal appears to be based on estimates which most probably overstate the size of the area in question. Again, without being given access to the entire appraisal, its use as the basis of Santa Clara's demand for \$530,691 in trespass damages and \$3,298,059.00 for a 20 year lease is questionable. It is clear that the City would be in dereliction of its legal duties to all its residents to negotiate a settlement with Santa Clara using the Appraisal as a guide to value.

#### IV-CONCLUSION

Santa Clara assumes that it owns the area under the City Streets and the State Highways. The law is clear that until 1971, a grant of a highway easement to a state or city with the permission of the Department of the Interior grants the right of way in fee simple to the state including all rights to place underground utilities. After 1971, it is arguable that separate permission of the Tribe may be required to include rights to have underground easements included with the right of way. The law on this point is not entirely clear. Nevertheless, FOIA records show that only twice, from 1950 to 2008 has Santa Clara attempted to exempt the underground easements from its grant of highway rights of way. Whether there is any obligation of the City to pay trespass damages to Santa Clara is therefore very much in question. Furthermore, since the City water and sewer lines are a benefit to the Santa Clara community and business enterprises as well to the City, the negotiating position of the Pueblo is clearly vastly overstated. The City is willing to work with Santa Clara, but cannot pay the unreasonable amounts demanded. If required to do so, however, the costs must be passed on to the Santa Clara users of the water and sewer services pursuant to New Mexico law and City ordinance.

RE: City of Espanola, New Mexico- Trespasses on Pueblo of Santa Clara Land

Dear Mr. Coppler:

I am sending this letter to you, as I understand that you represent the City of Espanola ("City") in connection with a matter which has been brought to our attention by the United States Department of the Interior, Office of the Solicitor, Southwest Region. This matter is succinctly described in the November 13, 2013 Notice to Show Cause, issued to the City by the United States Department of the Interior, Bureau of Indian Affairs, Southwest Regional Office ("Region").

Our information is that substantial portions of roadways within the City are located on Pueblo of Santa Clara ("Pueblo") land. We also understand that substantial portions of the City's utility lines lie within roadways which have been and remain Pueblo property. It appears beyond dispute that the City's placement of utility lines (primarily water and sewer lines) within these roadways comprises trespass, absent valid and current easements. We are informed that the Pueblo previously consented to limited term rights-of-way for the City pursuant to 25 U.S.C. § 323 and implementing regulations found at 25 C.F.R. Part 169. These rights-of-way, granted by the Bureau of Indian Affairs with the Pueblo's consent, run through land held by the Pueblo in fee, but subject to Federal supervision and restrictions against alienation. These rights-of-way generally

provided for the use of Pueblo land to accommodate City owned and operated water and sewer lines.

We understand that at least two of these rights-of-way, respectively designated NPA-84-SC-50 (“ROW SC-50”) and NPA-84-SC-20 (“ROW SC-20”), have expired by their own terms. The City did not submit renewal applications for the rights-of-way, nor has it applied for new rights-of-way. Nevertheless, the City has continued to use Pueblo land to provide water and sewer services to its customers, without compensation to the Pueblo. Because the City has been occupying and using Pueblo property absent legal authorization, and continues to do so, the City has been and continues to be in trespass.

Following an investigation, the Region issued a Notice to Show Cause (“Notice”) to the City concerning the trespasses. That Notice provided the City information related to the trespasses caused by the expiration of ROW SC-20 and ROW SC-50 and provided the City “30 days to show cause why the City should not be immediately assessed trespass damage and why the City should not be evicted from the subject Pueblo lands.” The City received the Notice on November 19, 2013 and responded to the Region on December 19, 2013. In that December, 2013 letter, the City requested an additional 30 (thirty) days, or until January 21, 2014 to respond to the Notice. The Region granted the extension. The extension was conditioned upon a requirement that “the City shall no later than Jan. 10, 2014 provide documentation to the Region that it has scheduled an initial meeting with Pueblo officials to discuss the matters at issue.” The City delayed further and without contacting the Pueblo, finally submitting its Response to the Notice to Show Cause (“Response”) on January 21, 2014.

The Secretary of the Interior is:

empowered to grant rights-of-way for all purposes, subject to such conditions as he may prescribe, over and across any lands now or hereafter held in trust by the United States for individual Indians or Indian tribes, communities, bands, or nations, or any lands now or hereafter owned, subject to restrictions against alienation, by individual Indians or Indian tribes, communities, bands, or nations, including the lands belonging to the Pueblo Indians in New Mexico, and any other lands heretofore or hereafter acquired or set aside for the use and benefit of the Indians.

25 U.S.C. § 323 (emphasis added). The regulations implementing that statute are found at 25 C.F.R. Part 169. These regulations “prescribe the procedures, terms and conditions under which rights-of-way over and across tribal land, individually owned land and Government owned land may be granted.” 25 C.F.R. § 169.2(a).

Importantly, these same regulations govern how rights-of-way are extended:

[o]n or before the expiration date of any right-of-way heretofore or hereafter granted for a limited term of years, an application may be submitted for a renewal of the grant. If the renewal involves no change in the location or status of the original right-of-way grant, the applicant may file with his application a certificate under oath setting out this fact, and the Secretary, with the consent required by §169.3, may thereupon extend the grant for a like term of years, upon the payment of consideration set forth in §169.12. If any change in the size, type, or location of the right-of-way is involved, the application for renewal shall be treated and handled as in the case of an original application for a right-of-way.

25 C.F.R. § 169.19.

Here, the City, contrary to Federal regulations, failed to submit an application to renew the easements.<sup>1</sup> Thus, ROW SC-20 expired by its own terms and the City has been in trespass since at least April 1, 2002. Similarly, ROW SC-50 expired by its own terms and the City has been in trespass since at least July 30, 1994.

Federal common law provides a basis for bringing trespass and other claims by or on behalf of a Pueblo. *County of Oneida v. Oneida Indian Nations*, 470 U.S. 226, 234-236 (1985) (Federal common law recognizes a variety of causes of action to protect Indian lands from trespass, including the right to sue to enforce original aboriginal title, the right to undertake an ejectment action, and the right to account for rents and profits against trespassers); *U.S. v. Pend Oreille PUD No. 1*, 28 F.3d 1544, 1550 n. 8 (9<sup>th</sup> Cir. 1994); *U.S. v. Torlaw Realty, Inc.*, 483 F.Supp.2d 967 (C.D. Cal. 2007), *affirmed*, 348 Fed. Appx. 213 (9<sup>th</sup> Cir. 2009). Under common law, trespass is defined as “the intentional use of the property of another without authorization and without privilege.” *U.S. v. Imperial Irrigation District*, 799 F. Supp. 1052, 1059 (S.D. Cal. 1992), *citing*, W. Page Keeton *et al.*, *Prosser and Keeton on the Law of Torts* § 13 at 70 (5<sup>th</sup> ed. 1984). As set out in *Imperial Irrigation*, absent the requisite legal permission, “[a]ny physical entry upon the surface of the land is a trespass ....” *Id.* Further, the “intent required is simply to be on the land.” *Id.* As we have noted above, the City has occupied and continues to occupy Pueblo property absent the requisite permission and authority. Therefore the City is in trespass.

It is our view that the City’s January 21, 2014 Response to the Notice to Show Cause fails to provide evidence or argument to establish a legal basis for the City’s presence on Pueblo property or otherwise establish that it is not in trespass. To the contrary, the City in its Response admits to the trespass, stating “[p]ayment for the alleged trespass by the City over Santa Clara land as well as for renewal for the ‘leases’<sup>2</sup> for underground utilities which Santa Clara relies on (NPA-

---

<sup>1</sup> Because the rights-of-way expired and were not renewed, the Pueblo would need to consent to grant to the City new rights-of-way under the provisions of 25 C.F.R. Part 169.

<sup>2</sup> It would appear the City is trying to argue that the legal instruments under scrutiny were leases

84-SC-20 and NPA-84-SC-50 - 'the Easements') has been the subject of negotiations between the City and Santa Clara since 2009." The City further provided other evidence that comprise clear admissions of the trespasses. See February 10, 2010 letter from the City's then attorney, Paula Maynes, to Richard Hughes, the Pueblo's Counsel. ("We have been open and transparent in our approach to the need to evaluate the damages due to the City's trespass and request the same courtesy from the Pueblo.") (emphasis added). See also January 29, 2010 letter from P. Maynes to R. Hughes. ("I am writing at the request of the City manager Veronica Albin and the Mayor Joseph Maestas to ask when we can schedule the next meeting to discuss the City's offer to pay trespass damages for use of Santa Clara's right-of-way for City utilities.") (emphasis added). The record demonstrates that the Pueblo, until 2010, actively sought both to meet with the City and to resolve the trespasses; however, the City has failed and refused to do so.

Based on the information we have at this point, it appears evident that the City is liable to compensate the Pueblo for substantial damages attributable to the subject trespasses of Pueblo property. We request that you respond to this letter in writing as soon as possible, but in any event not later than thirty (30) days from the date this letter is sent. It is our desire that this matter be resolved short of litigation. That said, it is our intention to take any appropriate legal action to remedy this situation should it otherwise not be settled. As well, the Pueblo may itself take appropriate legal action against the City with respect to trespasses other than those which are the specific subjects of this letter. While this letter focuses the City's attention on trespasses related to the two expired rights-of-way identified above, this in no way relieves or absolves the City of the necessity of bringing into legal conformity any other unauthorized use of Pueblo land by securing a valid easement or lease. The United States, as well as the Pueblo, specifically reserve any and all claims, actions and remedies against the City and any others who may be responsible for any and all unauthorized trespasses and use of Pueblo property whether or not identified herein, and for damages that have resulted therefrom.

---

and not rights-of-way. A review of the instruments make clear that they are in fact rights-of-way, subject to the regulations found at 25 C.F.R. Part 169 and the explicit language of the instruments. The right-of-way instruments do not contain language that could be interpreted to allow automatic term renewal. Further, even under a theory that these documents were leases, an automatic renewal would not have occurred because language to that effect would have to be explicitly included therein.

Sincerely,

## **HEARING ANNOUNCEMENT**

### **COMMITTEE ON ENERGY AND NATURAL RESOURCES**

This notice is to advise you of a hearing before the Committee on Energy and Natural Resources. The hearing will be held on **Thursday, May 19, 2016 at 2:30 p.m. in Room 366 Dirksen Senate Office Building** in Washington, DC.

The purpose of the hearing is to examine the Bureau of Ocean Energy Management's 2017-2022 OCS Oil and Gas Leasing Program.

The hearing will be webcast live on the committee's website, and an archived video will be available shortly after the hearing is complete. Witness testimony will be available on the website at the start of the hearing.

For further information, please contact Kip Knudson and Tristan Abbey with Chairman Murkowski's office or Scott McKee and Stephanie Teich-McGoldrick with Ranking Member Cantwell's office at (202) 224-4971.

Sincerely,

Darla Ripchensky, PMP

## A Big Victory For America's Workers And Their Hard Earned Pensions

*Addressing thousands of Teamsters at a rally in Washington, I said the outrageous cuts Central States Pension had proposed to their hard earned retirement could not be allowed to happen. On Friday, the Treasury Department agreed.*

Dear Ms. Rom,

I commend Special Master Ken Feinberg for doing the right thing in rejecting unfair and unjust reductions to the hard earned pension benefits 400,000 Teamsters have faithfully paid to Central States Pension fund throughout their working lives. **Now the federal government and Central States Pension will need to go back to the drawing board and find a way to ensure the integrity of the fund without sticking workers with the bill for incompetence, mismanagement and immoral financial manipulations.** However, the cold hard fact is that Central States Pension is just the tip of the iceberg. There are more than 1,400 similar pension plans operating in the United States with \$432 billion in combined assets, and 532 of those plans are in serious or critical condition.

Ten million people are counting on them for their retirement. **If we fail to address this crisis, nobody's pensions will be safe.** To be clear, **the Central States Pension Fund is in trouble because 13,000 companies used bankruptcy and financial shenanigans to walk away from their legally contracted contributions to the fund.** Had those companies fulfilled their obligations, the fund would still be in good shape. We are told the Central States Pension Fund is solvent for the next ten years – **time we have to use the Pension Benefit Guarantee Corporation, legislation and other means to fix what needs fixing without these outrageous cuts.**

Make no mistake – there are powerful forces trying to do away with people's pensions, and we will continue to fight them on every front. **I'm leading the way on legislation to overturn provisions in the law that allowed this travesty on Teamster pensions to happen in the first place,** and to ensure that retirees receive every dollar of the pensions they have paid into and earned. We will keep you posted as events proceed. Meanwhile, I want to hear your thoughts. Feel free to contact any of our offices listed below or [send me an email](#).

Sincerely,

---

## Reassurances From Interior Secretary Jewell On Iron Range Mining

U.S. Interior Secretary Sally Jewell has personally reassured me that the Administration has no plans to use executive authority under the Antiquities Act, the Federal Land Policy & Management Act, or any other means to unilaterally withdraw mining leases from the Rainy River basin or the Boundary Waters watershed. **I met with the Secretary to convey alarm that spread across Minnesota's Iron Range after her speech to the National Geographic Society suggesting that the Administration might reexamine land use policies in the Boundary Waters region.** The Antiquities Act of 1906 gives the President the authority to create national monuments from public lands. While mining is already outlawed within the Boundary Waters, the President could conceivably use the Antiquities Act to ban mining over a large portion of the Iron Range.

With respect to mining leases in the Rainy River Basin and the Boundary Waters watershed, my meeting with Secretary Jewell reconfirmed similar assurances we have received during meetings with top White House, U.S. Forest Service and Bureau of Land Management officials. I have also been assured that if the Administration's plans change, we will be told immediately and given the opportunity to strongly weigh in. **Secretary Jewell also confirmed her support for the Bureau of Land Management's decision to move forward with the environmental review process on several Twin Metals project leases located near the Boundary Waters watershed.** The timing and scope of the environmental review have yet to be determined.

As I made clear to Secretary Jewell and all the top Administration officials I've met with over the past few weeks, America's iron ore mining and steel industries are the foundation of our national economic and military security. **Mining enjoys widespread support throughout Northeastern Minnesota,** and allowing mining to move forward is critical as the Range begins its long economic recovery from illegal foreign steel imports that have put nearly 2,000 miners out of work over the past year.

---

## No-fly For Foreign Terrorists!

*New legislation will help spot and correct weaknesses in the Terrorist Watch List to prevent dangerous people from flying to the United States.*

Foreign terrorists must not be permitted to fly to the United States to kill Americans, and with my strong support the House has passed bipartisan legislation to help ensure that improvements to the **"Terrorist Watch List"** are working to protect our Nation. Specifically, the **"No Fly for Foreign Fighters Act"** requires a thorough and independent review of the FBI's operation of the Terrorist Screening Database to ensure that we are utilizing the most sophisticated and effective technologies at our disposal. The study will pinpoint any weaknesses in the system so they can be immediately corrected.

---

## Protecting Minnesota Medicaid Families From Unintended Consequences

As we made clear to the Administration last week, changes in federal Medicaid requirements must not force young Minnesota families affected by catastrophic health conditions to choose between losing their Medicaid coverage, losing their hard-earned savings, or obtaining an unwanted divorce. **I have joined other members of the Minnesota delegation in introducing the Protecting Families with Disabilities Act of 2016 to put a stop to these unintended consequences in the new federal rules.** We are also urging the Administration to fix the problem so legislative action won't be necessary.

In our letter to Health & Human Services Secretary Sylvia Burwell, Senators Klobuchar and Franken, Governor Dayton and I and other members of the Minnesota delegation pointed out that Minnesota allows certain special needs families who are younger, working or may have children at home to use Medicaid to help pay for local health care services without drawing down assets they need to save for college or pay bills. **If Minnesota is forced to comply with new federal regulations governing Medicaid assets, life would become even more difficult for hundreds of families who are already struggling every day with disabling medical conditions.** We are determined not to allow this to happen.

---

## Split Rock Lighthouse Shines On With A Big Boost

*Next time you visit Lake Superior's beautiful North Shore, be sure to stop at Split Rock Lighthouse State Park and tour this Minnesota historical treasure.*

Split Rock Lighthouse, that iconic Minnesota landmark on the North Shore of Lake Superior that kept ships safe for decades and now draws thousands of visitors every year, has **received a \$68,000 federal preservation grant to help ensure its integrity for generations to come.** Senators Amy Klobuchar, Al Franken and I were delighted to announce the funding from the National Park Service and the Maritime Administration.

The lighthouse was first built in 1910 by the U.S. Lighthouse Service after 29 ships were lost on Lake Superior during the infamous

Mataafa Storm of 1905. Retired in 1969 by the U.S. Coast Guard, it has been restored to replicate how it looked in the 1920's, including the original tower, lens, fog signal building, oil house and three keepers' houses. It's now part of Split Rock Lighthouse State Park, operated by the Minnesota Historical Society.

---

## Thanks Teachers!

*When it comes to thanking our teachers for their hard work and dedication, the vote is always unanimous.*

As a former teacher and Head Start director, I know that nothing means more to an educator than to get a heartfelt "thank you" from the children, families and communities who benefit so much from their dedication and hard work. Last week marked national Teacher Appreciation Week, **so hats off to each and every one of the 51,372 Minnesota teachers who dedicate their lives to ensuring that all our kids have the opportunities and the resources they need to live up to their full potential.** And hats off to all of the parents and volunteers who lend so much time and energy in support of our teachers and schools. You are changing lives and building our great Nation – one precious and talented child at a time.

---

## Our Week in Duluth

*We attended the League of Women Voters' community workshop on money in politics, where we discussed the damaging effects of the hundreds of millions of dollars in dark money unleashed into campaigns and elections after the Citizens United decision, how it impedes the ability of Members of Congress to spend time governing, and what we're doing to get Washington back to work.*

*Our Field Representative Mark Privratsky and Constituent Services staffer Kandi Garrison attended the 3rd Annual Twin Ports Vet Fair at the University of Wisconsin-Superior. Veterans from the Twin Ports could attend the fair to find access to services, support organizations and to take advantage of their benefits as a Veteran. Our staff spoke to veterans about issues with the VA and connected with Veterans support organizations to better partner on our work with individual Veterans.*

## Our Week in North Branch

*Field Representative Rick Olseen manned our Congressional office booth at the Chisago County Senior Expo at the Senior Center, where he talked to people about Veterans issues, social security, Medicare and other important issues affecting Minnesota's seniors.*

## Our Week in Chisago Lakes

*Rick Olseen also joined the America's Best Communities group from the Chisago Lakes area celebrate their acceptance into the competition finals, where they will work on their project for the next eleven months. The Nationwide competition winner gets three million dollars for community projects.*

---

## Coming Up in Washington

This week:

- The House is scheduled to consider a series of more than a dozen bills to address the opioid abuse problem. I am a proud cosponsor of the Comprehensive Addiction and Recovery Act, which will help prevent addiction and treat those suffering.

---

## Finally...

### Let's Go Fishing!

*Here's my first walleye from last year's Minnesota fishing opener. Wasn't it a beauty!*

This week marks the Governor's Fishing Opener on Big Sandy Lake in McGregor and I can't wait to get there to help kick-off of Minnesota's summer tourism season. The fishing opener has always been an official Nolan family holiday. In fact, my dad insisted that every day you spend fishing adds a day to your life. So be sure to get out there and wet a line as soon as you can, and let's all plan to live really long lives thanks to fishing!

FYI, attached is our current draft of title I of the UTTR amendment to the NDAA bill. As redrafted, this directs BLM and Air Force to enter into an MOA to allow the Air Force to temporarily close 700,000 acres of adjacent BLM lands in accordance with the legislative sideboards.

I believe we are in agreement with Sen. Hatch's office on this language. Turning to title II, the BLM-SITLA land exchange language next. And title III, R.S. 2477 ROWs, remains off the table in the Senate language, although I understand Rep. Bishop has included it in the House NDAA bill.

**Subject:** Edits to UTTR draft

Hi Heather,

Thanks for the quick turnaround on the UTTR draft. I inadvertently omitted two subsections which should have been included in the draft. The inserts are marked on the attached draft.

Can you please incorporate the edits?

Thanks,

David

14 Ordered to lie on the table and to be printed

15 AMENDMENT INTENDED TO BE PROPOSED BY \_\_\_\_\_

16 Viz:

17 At the appropriate place, insert the following:

18 TITLE \_\_\_\_ □ AUTHORIZATION FOR TEMPORARY  
19 CLOSURE OF CERTAIN PUBLIC LAND ADJACENT TO  
20 THE UTAH TEST AND TRAINING RANGE.

21 SEC. \_\_ 1. SHORT TITLE.

22 This title may be cited as the □Utah Test and Training Range Encroachment Prevention and  
23 Temporary Closure Act□

24 SEC. \_\_ 2. DEFINITIONS.

25 In this title:

26 (1) BLM LAND. □ The term □BLM land□ means certain public land administered by the  
27 Bureau of Land Management land in the State comprising approximately 703,621 acres, as  
28 generally depicted on the map entitled □Utah Test and Training Range Enhancement/West  
29 Desert Land Exchange□ and dated May 7, 2016.

30 (2) SECRETARY. □ The term □Secretary□ means the Secretary of the Interior.

31 (3) STATE. □ The term □State□ means the State of Utah.

32 (4) UTAH TEST AND TRAINING RANGE. □ The term □Utah Test and Training Range□ means  
33 the portions of the military land and airspace operating area of the Utah Test and Training

1 Area that are located in the State, including the Dugway Proving Ground.

2 **SEC. \_\_3. MEMORANDUM OF AGREEMENT.**

3 (a) Memorandum of Agreement.□

4 (1) IN GENERAL.□ Not later than 1 year after the date of enactment of this Act, the  
5 Secretary and the Secretary of the Air Force shall enter into a memorandum of agreement to  
6 authorize the Secretary of the Air Force, in consultation with the Secretary, to impose  
7 limited closures of the BLM land for military operations and national security and public  
8 safety purposes, as provided in this title.

9 (2) DRAFT.□

10 (A) IN GENERAL.□ Not later than 180 days after the date of enactment of this Act,  
11 the Secretary and the Secretary of the Air Force shall complete a draft of the  
12 memorandum of agreement required under paragraph (1).

13 (B) PUBLIC COMMENT PERIOD.□ During the 30-day period beginning on the date on  
14 which the draft memorandum of agreement is completed under subparagraph (A), there  
15 shall be an opportunity for public comment on the draft memorandum of agreement,  
16 including an opportunity for the Utah Test and Training Range Community Resource  
17 Advisory Group established under section \_\_6(a) to provide comments on the draft  
18 memorandum of agreement.

19 (3) MANAGEMENT BY SECRETARY.□ The memorandum of agreement entered into under  
20 paragraph (1) shall provide that the Secretary shall continue to manage the BLM land in  
21 accordance with the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et  
22 seq.) and applicable land use plans, while allowing for the temporary closure of the BLM  
23 land in accordance with this title.

24 (4) PERMITS AND RIGHTS-OF-WAY.□

25 (A) IN GENERAL.□ The Secretary shall consult with the Secretary of the Air Force  
26 regarding Utah Test and Training Range mission requirements before issuing new use  
27 permits or rights-of-way on the BLM land.

28 (B) FRAMEWORK.□ The Secretary and the Secretary of the Air Force shall establish  
29 within the memorandum of agreement entered into under paragraph (1) a framework  
30 agreed to by the Secretary and the Secretary of the Air Force for resolving any  
31 disagreement on the issuance of permits or rights-of-way on the BLM land.

32 (5) TERMINATION.□

33 (A) IN GENERAL.□ The memorandum of agreement entered into under paragraph (1)  
34 shall be for a term to be determined by the Secretary and the Secretary of the Air  
35 Force, not to exceed 25 years.

36 (B) EARLY TERMINATION.□ The memorandum of agreement may be terminated  
37 before the date determined under subparagraph (A) if the Secretary of the Air Force  
38 determines that the temporary closure of the BLM land is no longer necessary to fulfill  
39 Utah Test and Training Range mission requirements.

40 (b) Map.□ The Secretary may correct any minor errors in the map described in section

1 \_\_\_\_2(1).

2 (c) Land Safety.□ If corrective action is necessary on the BLM land due to an action of the Air  
3 Force, the Secretary of the Air Force shall□

4 (1) render the BLM land safe for public use; and

5 (2) appropriately communicate the safety of the land to the Secretary on the date on  
6 which the BLM land is rendered safe for public use under paragraph (1).

7 (d) Consultation.□ The Secretary shall consult with any federally recognized Indian tribe in  
8 the vicinity of the BLM land before entering into any agreement under this title.

9 (e) Grazing.□

10 (1) EFFECT.□ Nothing in this title impacts the management of grazing on the BLM land.

11 (2) CONTINUATION OF GRAZING MANAGEMENT.□ The Secretary shall continue grazing  
12 management on the BLM land pursuant to the Federal Land Policy and Management Act of  
13 1976 (43 U.S.C. 1701 et seq.) and applicable resource management plans.

14 (f) Memorandum of Understanding on Emergency Access and Response.□ Nothing in this  
15 section precludes the continuation of the memorandum of understanding between the  
16 Department of the Interior and the Department of the Air Force with respect to emergency access  
17 and response, as in existence on the date of enactment of this Act.

18 (g) Withdrawal.□ Subject to valid existing rights, the BLM land is withdrawn from all forms  
19 of appropriation under the public land laws, including the mining laws, the mineral leasing laws,  
20 and the geothermal leasing laws.

## 21 SEC. \_\_4. TEMPORARY CLOSURES.

22 (a) In General.□ If the Secretary of the Air Force determines that military operations  
23 (including operations relating to the fulfillment of the mission of the Utah Test and Training  
24 Range), public safety, or national security require the temporary closure to public use of any  
25 road, trail, or other portion of the BLM land, the Secretary of the Air Force may take such action  
26 as the Secretary of the Air Force, in consultation with the Secretary, determines necessary to  
27 carry out the temporary closure.

28 (b) Limitations.□ Any temporary closure under subsection (a)□

29 (1) shall be limited to the minimum areas and periods during which the Secretary of the  
30 Air Force determines are required to carry out a closure under this section;

31 (2) shall not occur on a State or Federal holiday, unless notice is provided in accordance  
32 with subsection (c)(1)(B);

33 (3) shall not occur on a Friday, Saturday, or Sunday, unless notice is provided in  
34 accordance with subsection (c)(1)(B); and

35 (4)(A) if practicable, shall be for not longer than a 3-hour period per day;

36 (B) shall only be for longer than a 3-hour period per day□

37 (i) for mission essential reasons; and

38 (ii) as infrequently as practicable and in no case for more than 10 days per year;

and

(C) shall in no case be for longer than a 6-hour period per day.

(c) Notice.□

(1) IN GENERAL.□ Except as provided in paragraph (2), the Secretary of the Air Force shall□

(A) keep appropriate warning notices posted before and during any temporary closure; and

(B) provide notice to the Secretary, public, and relevant stakeholders concerning the temporary closure□

(i) at least 30 days before the date on which the temporary closure goes into effect;

(ii) in the case of a closure during the period beginning on March 1 and ending on May 31, at least 60 days before the date on which the closure goes into effect; or

(iii) in the case of a closure described in paragraph (3) or (4) of subsection (b), at least 90 days before the date on which the closure goes into effect.

(2) SPECIAL NOTIFICATION PROCEDURES.□ In each case for which a mission-unique security requirement does not allow for the notifications described in paragraph (1)(B), the Secretary of the Air Force shall work with the Secretary to achieve a mutually agreeable timeline for notification.

(d) Maximum Annual Closures.□ The total cumulative hours of temporary closures authorized under this section with respect to the BLM land shall not exceed 100 hours annually.

(e) Prohibition on Certain Temporary Closures.□ The northernmost area identified as □Newfoundland□□ on the map described in section \_\_\_2(1) shall not be subject to any temporary closure between August 21 and February 28, in accordance with the lawful hunting seasons of the State of Utah.

(f) Emergency Ground Response.□ A temporary closure of a portion of the BLM land shall not affect the conduct of emergency response activities on the BLM land during the temporary closure.

(g) Livestock.□ Livestock authorized by a Federal grazing permit shall be allowed to remain on the BLM land during a temporary closure of the BLM land under this section.

(h) Law Enforcement and Security.□ The Secretary and the Secretary of the Air Force may enter into cooperative agreements with State and local law enforcement officials with respect to lawful procedures and protocols to be used in promoting public safety and operation security on or near the BLM land during noticed test and training periods.

## SEC. \_\_\_ 5. LIABILITY.

The United States (including all departments, agencies, officers, and employees of the United States) shall be held harmless and shall not be liable for any injury or damage to any individual or property suffered in the course of any mining, mineral, or geothermal activity, or any other

1 authorized nondefense-related activity, conducted on the BLM land.

2 **SEC. \_\_\_ 6. COMMUNITY RESOURCE ADVISORY GROUP.**

3 (a) Establishment. □ Not later than 90 days after the date of enactment of this Act, there shall  
4 be established the Utah Test and Training Range Community Resource Advisory Group (referred  
5 to in this section as the □Community Group□) to provide regular and continuing input to the  
6 Secretary and the Secretary of the Air Force on matters involving public access to, use of, and  
7 overall management of the BLM land.

8 (b) Membership. □

9 (1) IN GENERAL. □ The Secretary shall appoint members to the Community Group,  
10 including □

11 (A) 1 representative of Indian tribes in the vicinity of the BLM land, to be  
12 nominated by a majority vote conducted among the Indian tribes in the vicinity of the  
13 BLM land;

14 (B) not more than 1 county commissioner from each of Box Elder, Tooele, and Juab  
15 Counties, Utah;

16 (C) 2 representatives of off-road and highway use, hunting, or other recreational  
17 users of the BLM land;

18 (D) 2 representatives of livestock permittees on public land located within the BLM  
19 land;

20 (E) 1 representative of the Utah Department of Agriculture and Food; and

21 (F) not more than 3 representatives of State or Federal offices or agencies, or private  
22 groups or individuals, if the Secretary determines that such representatives would  
23 further the goals and objectives of the Community Group.

24 (2) CHAIRPERSON. □ The members described in paragraph (1) shall elect from among the  
25 members of the Community Group □

26 (A) 1 member to serve as Chairperson of the Community Group; and

27 (B) 1 member to serve as Vice-Chairperson of the Community Group.

28 (3) AIR FORCE PERSONNEL. □ The Secretary of the Air Force shall appoint appropriate  
29 operational and land management personnel of the Air Force to serve as a liaison to the  
30 Community Group.

31 (c) Conditions and Terms of Appointment. □

32 (1) IN GENERAL. □ Each member of the Community Group shall serve voluntarily and  
33 without compensation.

34 (2) TERM OF APPOINTMENT. □

35 (A) IN GENERAL. □ Each member of the Community Group shall be appointed for a  
36 term of 4 years.

37 (B) ORIGINAL MEMBERS. □ Notwithstanding subparagraph (A), the Secretary shall  
38 select \1/2\ of the original members of the Community Group to serve for a term of 4

1 years and the \1/2\ to serve for a term of 2 years to ensure the replacement of members  
2 shall be staggered from year to year.

3 (C) REAPPOINTMENT AND REPLACEMENT.□ The Secretary may reappoint or replace a  
4 member of the Community Group appointed under subsection (b)(1), if□

5 (i) the term of the member has expired;

6 (ii) the member has retired; or

7 (iii) the position held by the member described in subparagraph (A) through (F)  
8 of paragraph (1) has changed to the extent that the ability of the member to  
9 represent the group or entity that the member represents has been significantly  
10 affected.

11 (d) Meetings.□

12 (1) IN GENERAL.□ The Community Group shall meet not less than once per year, and at  
13 such other frequencies as determined by 5 or more of the members of the Community  
14 Group.

15 (2) RESPONSIBILITIES OF COMMUNITY GROUP.□ The Community Group shall be  
16 responsible for determining appropriate schedules for, details of, and actions for meetings of  
17 the Community Group.

18 (3) NOTICE.□ The Chairperson shall provide notice to each member of the Community  
19 Group not less than 10 business days before the date of a scheduled meeting.

20 (4) EXEMPT FROM FEDERAL ADVISORY COMMITTEE ACT.□ The Federal Advisory  
21 Committee Act (5 U.S.C. App.) shall not apply to meetings of the Community Group.

22 (e) Recommendations of Community Group.□ The Secretary and Secretary of the Air Force,  
23 consistent with existing laws (including regulations), shall take under consideration  
24 recommendations from the Community Group.

25 (f) Termination of Authority.□ The Community Group shall terminate on the date that is 10  
26 years after the date of enactment of this Act.

## 27 SEC. 7. SAVINGS CLAUSES.

28 (a) Effect on Weapon Impact Area.□ Nothing in this title expands the boundaries of the  
29 weapon impact area of the Utah Test and Training Range.

30 (b) Effect on Special Use Airspace and Training Routes.□ Nothing in this title precludes□

31 (1) the designation of new units of special use airspace; or

32 (2) the expansion of existing units of special use airspace.

33 (c) Effect on Existing Military Special Use Airspace Agreement.□ Nothing in this title limits  
34 or alters the Military Operating Areas of Airspace Use Agreement between the Federal Aviation  
35 Administration and the Air Force in effect on the date of enactment of this Act.

36 (d) Effect on Existing Rights and Agreements.□

37 (1) KNOLLS SPECIAL RECREATION MANAGEMENT AREA; BLM COMMUNITY PITS.□ Except as  
38 otherwise provided in section 4, nothing in this title limits or alters any existing right or

- 1 right of access to□
- 2 (A) the Knolls Special Recreation Management Area; or
- 3 (B)(i) the Bureau of Land Management Community Pits Central Grayback and
- 4 South Grayback; and
- 5 (ii) any other county or community pit located within close proximity to the
- 6 BLM land.
- 7 (e) Interstate 80.□ Nothing in this title authorizes any additional authority or right to the
- 8 Secretary or the Secretary of the Air Force to temporarily close Interstate 80.
- 9 (f) Effect on Limitation on Amendments to Certain Individual Resource Management Plans.□
- 10 Nothing in this title affects the limitation established under section 2815(d) of the National
- 11 Defense Authorization Act for Fiscal Year 2000 (Public Law 106□65; 113 Stat. 852).
- 12 (g) Effect on Previous Memorandum of Understanding.□ Nothing in this title affects the
- 13 memorandum of understanding entered into by the Air Force, the Bureau of Land Management,
- 14 the Utah Department of Natural Resources, and the Utah Division of Wildlife Resources relating
- 15 to the reestablishment of bighorn sheep in the Newfoundland Mountains and signed by the
- 16 parties to the memorandum of understanding during the period beginning on January 24, 2000,
- 17 and ending on February 4, 2000.
- 18 (h) Effect on Federally Recognized Indian Tribes.□ Nothing in this title alters any right
- 19 reserved by treaty or Federal law for a Federally recognized Indian tribe for tribal use.
- 20 (i) Payments in Lieu of Taxes.□ Nothing in this title diminishes, enhances, or otherwise
- 21 affects any other right or entitlement of the counties in which the BLM land is situated to
- 22 payments in lieu of taxes based on the BLM land, under section 6901 of title 31, United States
- 23 Code.
- 24 (j) Wildlife Improvements.□ The Secretary and the Utah Division of Wildlife Resources shall
- 25 continue the management of wildlife improvements, including guzzlers, in existence as of the
- 26 date of enactment of this Act on the BLM land.

---

The plan is to incorporate title I (temporary UTTR-related closures of BLM land) and title II (SITLA-BLM land exchange) into a single amendment that they are going to try and include in NDAA. We were able to address most of the concerns raised in the BLM testimony.

Still waiting for text to come back from leg. counsel on the title II draft, but I am attaching the document we sent over.

David

1 Purpose: To authorize the temporary closure of certain public land adjacent to the Utah Test and  
2 Training Range.

15 AMENDMENT INTENDED TO BE PROPOSED BY \_\_\_\_\_

16 Viz:

17 At the appropriate place, insert the following:

18 TITLE \_\_\_\_ □ AUTHORIZATION FOR TEMPORARY  
19 CLOSURE OF CERTAIN PUBLIC LAND ADJACENT TO  
20 THE UTAH TEST AND TRAINING RANGE.

21 SEC. \_\_ 1. SHORT TITLE.

22 This title may be cited as the □Utah Test and Training Range Encroachment Prevention and  
23 Temporary Closure Act□

24 SEC. \_\_ 2. DEFINITIONS.

25 In this title:

26 (1) BLM LAND. □ The term □BLM land□ means certain public land administered by the  
27 Bureau of Land Management land in the State comprising approximately 703,621 acres, as  
28 generally depicted on the map entitled □Utah Test and Training Range Enhancement/West  
29 Desert Land Exchange□ and dated May 7, 2016.

30 (2) SECRETARY. □ The term □Secretary□ means the Secretary of the Interior.

31 (3) STATE. □ The term □State□ means the State of Utah.

32 (4) UTAH TEST AND TRAINING RANGE. □ The term □Utah Test and Training Range□ means  
33 the portions of the military land and airspace operating area of the Utah Test and Training

1 Area that are located in the State, including the Dugway Proving Ground.

2 **SEC. \_\_3. MEMORANDUM OF AGREEMENT.**

3 (a) Memorandum of Agreement.□

4 (1) IN GENERAL.□ Not later than 1 year after the date of enactment of this Act, the  
5 Secretary and the Secretary of the Air Force shall enter into a memorandum of agreement to  
6 authorize the Secretary of the Air Force, in consultation with the Secretary, to impose  
7 limited closures of the BLM land for military operations and national security and public  
8 safety purposes, as provided in this title.

9 (2) DRAFT.□

10 (A) IN GENERAL.□ Not later than 180 days after the date of enactment of this Act,  
11 the Secretary and the Secretary of the Air Force shall complete a draft of the  
12 memorandum of agreement required under paragraph (1).

13 (B) PUBLIC COMMENT PERIOD.□ During the 30-day period beginning on the date on  
14 which the draft memorandum of agreement is completed under subparagraph (A), there  
15 shall be an opportunity for public comment on the draft memorandum of agreement,  
16 including an opportunity for the Utah Test and Training Range Community Resource  
17 Advisory Group established under section \_\_6(a) to provide comments on the draft  
18 memorandum of agreement.

19 (3) MANAGEMENT BY SECRETARY.□ The memorandum of agreement entered into under  
20 paragraph (1) shall provide that the Secretary shall continue to manage the BLM land in  
21 accordance with the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et  
22 seq.) and applicable land use plans, while allowing for the temporary closure of the BLM  
23 land in accordance with this title.

24 (4) PERMITS AND RIGHTS-OF-WAY.□

25 (A) IN GENERAL.□ The Secretary shall consult with the Secretary of the Air Force  
26 regarding Utah Test and Training Range mission requirements before issuing new use  
27 permits or rights-of-way on the BLM land.

28 (B) FRAMEWORK.□ The Secretary and the Secretary of the Air Force shall establish  
29 within the memorandum of agreement entered into under paragraph (1) a framework  
30 agreed to by the Secretary and the Secretary of the Air Force for resolving any  
31 disagreement on the issuance of permits or rights-of-way on the BLM land.

32 (5) TERMINATION.□

33 (A) IN GENERAL.□ The memorandum of agreement entered into under paragraph (1)  
34 shall be for a term to be determined by the Secretary and the Secretary of the Air  
35 Force, not to exceed 25 years.

36 (B) EARLY TERMINATION.□ The memorandum of agreement may be terminated  
37 before the date determined under subparagraph (A) if the Secretary of the Air Force  
38 determines that the temporary closure of the BLM land is no longer necessary to fulfill  
39 Utah Test and Training Range mission requirements.

40 (b) Map.□ The Secretary may correct any minor errors in the map described in section

1 \_\_\_\_2(1).

2 (c) Land Safety.□ If corrective action is necessary on the BLM land due to an action of the Air  
3 Force, the Secretary of the Air Force shall□

4 (1) render the BLM land safe for public use; and

5 (2) appropriately communicate the safety of the land to the Secretary on the date on  
6 which the BLM land is rendered safe for public use under paragraph (1).

7 (d) Consultation.□ The Secretary shall consult with any federally recognized Indian tribe in  
8 the vicinity of the BLM land before entering into any agreement under this title.

9 (e) Grazing.□

10 (1) EFFECT.□ Nothing in this title impacts the management of grazing on the BLM land.

11 (2) CONTINUATION OF GRAZING MANAGEMENT.□ The Secretary shall continue grazing  
12 management on the BLM land pursuant to the Federal Land Policy and Management Act of  
13 1976 (43 U.S.C. 1701 et seq.) and applicable resource management plans.

14 (f) Memorandum of Understanding on Emergency Access and Response.□ Nothing in this  
15 section precludes the continuation of the memorandum of understanding between the  
16 Department of the Interior and the Department of the Air Force with respect to emergency access  
17 and response, as in existence on the date of enactment of this Act.

18 (g) Withdrawal.□ Subject to valid existing rights, the BLM land is withdrawn from all forms  
19 of appropriation under the public land laws, including the mining laws, the mineral leasing laws,  
20 and the geothermal leasing laws.

## 21 SEC. \_\_4. TEMPORARY CLOSURES.

22 (a) In General.□ If the Secretary of the Air Force determines that military operations  
23 (including operations relating to the fulfillment of the mission of the Utah Test and Training  
24 Range), public safety, or national security require the temporary closure to public use of any  
25 road, trail, or other portion of the BLM land, the Secretary of the Air Force may take such action  
26 as the Secretary of the Air Force, in consultation with the Secretary, determines necessary to  
27 carry out the temporary closure.

28 (b) Limitations.□ Any temporary closure under subsection (a)□

29 (1) shall be limited to the minimum areas and periods during which the Secretary of the  
30 Air Force determines are required to carry out a closure under this section;

31 (2) shall not occur on a State or Federal holiday, unless notice is provided in accordance  
32 with subsection (c)(1)(B);

33 (3) shall not occur on a Friday, Saturday, or Sunday, unless notice is provided in  
34 accordance with subsection (c)(1)(B); and

35 (4)(A) if practicable, shall be for not longer than a 3-hour period per day;

36 (B) shall only be for longer than a 3-hour period per day□

37 (i) for mission essential reasons; and

38 (ii) as infrequently as practicable and in no case for more than 10 days per year;

- 1                   and
- 2                   (C) shall in no case be for longer than a 6-hour period per day.
- 3 (c) Notice.□
- 4                   (1) IN GENERAL.□ Except as provided in paragraph (2), the Secretary of the Air Force
- 5 shall□
- 6                   (A) keep appropriate warning notices posted before and during any temporary
- 7 closure; and
- 8                   (B) provide notice to the Secretary, public, and relevant stakeholders concerning the
- 9 temporary closure□
- 10                   (i) at least 30 days before the date on which the temporary closure goes into
- 11 effect;
- 12                   (ii) in the case of a closure during the period beginning on March 1 and ending
- 13 on May 31, at least 60 days before the date on which the closure goes into effect;
- 14 or
- 15                   (iii) in the case of a closure described in paragraph (3) or (4) of subsection (b),
- 16 at least 90 days before the date on which the closure goes into effect.
- 17                   (2) SPECIAL NOTIFICATION PROCEDURES.□ In each case for which a mission-unique
- 18 security requirement does not allow for the notifications described in paragraph (1)(B), the
- 19 Secretary of the Air Force shall work with the Secretary to achieve a mutually agreeable
- 20 timeline for notification.
- 21 (d) Maximum Annual Closures.□ The total cumulative hours of temporary closures authorized
- 22 under this section with respect to the BLM land shall not exceed 100 hours annually.
- 23 (e) Prohibition on Certain Temporary Closures.□ The northernmost area identified as
- 24 □Newfoundland□□on the map described in section \_\_\_\_2(1) shall not be subject to any
- 25 temporary closure between August 21 and February 28, in accordance with the lawful hunting
- 26 seasons of the State of Utah.
- 27 (f) Emergency Ground Response.□ A temporary closure of a portion of the BLM land shall
- 28 not affect the conduct of emergency response activities on the BLM land during the temporary
- 29 closure.
- 30 (g) Livestock.□ Livestock authorized by a Federal grazing permit shall be allowed to remain
- 31 on the BLM land during a temporary closure of the BLM land under this section.
- 32 (h) Law Enforcement and Security.□ The Secretary and the Secretary of the Air Force may
- 33 enter into cooperative agreements with State and local law enforcement officials with respect to
- 34 lawful procedures and protocols to be used in promoting public safety and operation security on
- 35 or near the BLM land during noticed test and training periods.

36 **SEC. \_\_ 5. LIABILITY.**

37 The United States (including all departments, agencies, officers, and employees of the United

38 States) shall be held harmless and shall not be liable for any injury or damage to any individual

39 or property suffered in the course of any mining, mineral, or geothermal activity, or any other

1 authorized nondefense-related activity, conducted on the BLM land.

2 **SEC. \_\_\_ 6. COMMUNITY RESOURCE ADVISORY GROUP.**

3 (a) Establishment. □ Not later than 90 days after the date of enactment of this Act, there shall  
4 be established the Utah Test and Training Range Community Resource Advisory Group (referred  
5 to in this section as the □Community Group□) to provide regular and continuing input to the  
6 Secretary and the Secretary of the Air Force on matters involving public access to, use of, and  
7 overall management of the BLM land.

8 (b) Membership. □

9 (1) IN GENERAL. □ The Secretary shall appoint members to the Community Group,  
10 including □

11 (A) 1 representative of Indian tribes in the vicinity of the BLM land, to be  
12 nominated by a majority vote conducted among the Indian tribes in the vicinity of the  
13 BLM land;

14 (B) not more than 1 county commissioner from each of Box Elder, Tooele, and Juab  
15 Counties, Utah;

16 (C) 2 representatives of off-road and highway use, hunting, or other recreational  
17 users of the BLM land;

18 (D) 2 representatives of livestock permittees on public land located within the BLM  
19 land;

20 (E) 1 representative of the Utah Department of Agriculture and Food; and

21 (F) not more than 3 representatives of State or Federal offices or agencies, or private  
22 groups or individuals, if the Secretary determines that such representatives would  
23 further the goals and objectives of the Community Group.

24 (2) CHAIRPERSON. □ The members described in paragraph (1) shall elect from among the  
25 members of the Community Group □

26 (A) 1 member to serve as Chairperson of the Community Group; and

27 (B) 1 member to serve as Vice-Chairperson of the Community Group.

28 (3) AIR FORCE PERSONNEL. □ The Secretary of the Air Force shall appoint appropriate  
29 operational and land management personnel of the Air Force to serve as a liaison to the  
30 Community Group.

31 (c) Conditions and Terms of Appointment. □

32 (1) IN GENERAL. □ Each member of the Community Group shall serve voluntarily and  
33 without compensation.

34 (2) TERM OF APPOINTMENT. □

35 (A) IN GENERAL. □ Each member of the Community Group shall be appointed for a  
36 term of 4 years.

37 (B) ORIGINAL MEMBERS. □ Notwithstanding subparagraph (A), the Secretary shall  
38 select \1/2\ of the original members of the Community Group to serve for a term of 4

1 years and the \1/2\ to serve for a term of 2 years to ensure the replacement of members  
2 shall be staggered from year to year.

3 (C) REAPPOINTMENT AND REPLACEMENT.□ The Secretary may reappoint or replace a  
4 member of the Community Group appointed under subsection (b)(1), if□

5 (i) the term of the member has expired;

6 (ii) the member has retired; or

7 (iii) the position held by the member described in subparagraph (A) through (F)  
8 of paragraph (1) has changed to the extent that the ability of the member to  
9 represent the group or entity that the member represents has been significantly  
10 affected.

11 (d) Meetings.□

12 (1) IN GENERAL.□ The Community Group shall meet not less than once per year, and at  
13 such other frequencies as determined by 5 or more of the members of the Community  
14 Group.

15 (2) RESPONSIBILITIES OF COMMUNITY GROUP.□ The Community Group shall be  
16 responsible for determining appropriate schedules for, details of, and actions for meetings of  
17 the Community Group.

18 (3) NOTICE.□ The Chairperson shall provide notice to each member of the Community  
19 Group not less than 10 business days before the date of a scheduled meeting.

20 (4) EXEMPT FROM FEDERAL ADVISORY COMMITTEE ACT.□ The Federal Advisory  
21 Committee Act (5 U.S.C. App.) shall not apply to meetings of the Community Group.

22 (e) Recommendations of Community Group.□ The Secretary and Secretary of the Air Force,  
23 consistent with existing laws (including regulations), shall take under consideration  
24 recommendations from the Community Group.

25 (f) Termination of Authority.□ The Community Group shall terminate on the date that is 10  
26 years after the date of enactment of this Act.

## 27 SEC. \_\_7. SAVINGS CLAUSES.

28 (a) Effect on Weapon Impact Area.□ Nothing in this title expands the boundaries of the  
29 weapon impact area of the Utah Test and Training Range.

30 (b) Effect on Special Use Airspace and Training Routes.□ Nothing in this title precludes□

31 (1) the designation of new units of special use airspace; or

32 (2) the expansion of existing units of special use airspace.

33 (c) Effect on Existing Military Special Use Airspace Agreement.□ Nothing in this title limits  
34 or alters the Military Operating Areas of Airspace Use Agreement between the Federal Aviation  
35 Administration and the Air Force in effect on the date of enactment of this Act.

36 (d) Effect on Existing Rights and Agreements.□

37 (1) KNOLLS SPECIAL RECREATION MANAGEMENT AREA; BLM COMMUNITY PITS.□ Except as  
38 otherwise provided in section \_\_4, nothing in this title limits or alters any existing right or

- 1 right of access to□
- 2 (A) the Knolls Special Recreation Management Area; or
- 3 (B)(i) the Bureau of Land Management Community Pits Central Grayback and
- 4 South Grayback; and
- 5 (ii) any other county or community pit located within close proximity to the
- 6 BLM land.
- 7 (e) Interstate 80.□ Nothing in this title authorizes any additional authority or right to the
- 8 Secretary or the Secretary of the Air Force to temporarily close Interstate 80.
- 9 (f) Effect on Limitation on Amendments to Certain Individual Resource Management Plans.□
- 10 Nothing in this title affects the limitation established under section 2815(d) of the National
- 11 Defense Authorization Act for Fiscal Year 2000 (Public Law 106□65; 113 Stat. 852).
- 12 (g) Effect on Previous Memorandum of Understanding.□ Nothing in this title affects the
- 13 memorandum of understanding entered into by the Air Force, the Bureau of Land Management,
- 14 the Utah Department of Natural Resources, and the Utah Division of Wildlife Resources relating
- 15 to the reestablishment of bighorn sheep in the Newfoundland Mountains and signed by the
- 16 parties to the memorandum of understanding during the period beginning on January 24, 2000,
- 17 and ending on February 4, 2000.
- 18 (h) Effect on Federally Recognized Indian Tribes.□ Nothing in this title alters any right
- 19 reserved by treaty or Federal law for a Federally recognized Indian tribe for tribal use.
- 20 (i) Payments in Lieu of Taxes.□ Nothing in this title diminishes, enhances, or otherwise
- 21 affects any other right or entitlement of the counties in which the BLM land is situated to
- 22 payments in lieu of taxes based on the BLM land, under section 6901 of title 31, United States
- 23 Code.
- 24 (j) Wildlife Improvements.□ The Secretary and the Utah Division of Wildlife Resources shall
- 25 continue the management of wildlife improvements, including guzzlers, in existence as of the
- 26 date of enactment of this Act on the BLM land.

2815(d) of Public Law 106-65 (113 Stat. 852).

(3) The Secretary shall not be required to undertake any additional land use planning under section 202 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712) prior to the conveyance of the Federal land under this title.

~~(c)~~ Valid Existing Rights. □ The exchange authorized under subsection (a) shall be subject to valid existing rights.

~~(d)~~ Title Approval. □ Title to the Federal land and non-Federal land to be exchanged under this section shall be in a format acceptable to the Secretary and the State.

(d) Appraisals. □

(1) IN GENERAL. □ The value of the Federal land and the non-Federal land to be exchanged under this section shall be determined by appraisals conducted by 1 or more independent ~~and qualified appraisers~~ appraisers. ~~The Secretary and the State may agree to use an independent and qualified appraiser~~ retained by the State, with the consent of the Secretary.

(2) APPLICABLE LAW. □ The appraisals under paragraph (1) shall be conducted in accordance with nationally recognized appraisal standards, including, as appropriate, ~~the Uniform Appraisal Standards for Federal Land Acquisitions~~ and the Uniform Standards of Professional Appraisal Practice.

(3) Minerals. □

(A) Mineral Reports. □ The appraisals under paragraph (1) may take into account mineral and technical reports provided by the Secretary and the State in the evaluation of minerals in the Federal land and non-Federal land.

(B) Mining Claims. □ Federal land that is encumbered by a mining or millsite claim located under the Mining Law of 1872 (30 U.S.C. 21 et seq.) shall be appraised in accordance with standard appraisal practices, including as appropriate the Uniform ~~Appraisal~~ Standards for Federal Land Acquisition.

(C) Validity Examination. □ Nothing in this title requires the Secretary to conduct a mineral examination for any mining claim on the Federal land.

~~(3) MINERAL LAND. □~~

~~(A) MINERAL REPORTS. □ The appraisals under paragraph (1) shall take into account mineral and technical reports provided by the Secretary and the State in the evaluation of mineral deposits in the Federal land and non-Federal land.~~

~~(B) MINING CLAIMS. □ An appraisal of any parcel of Federal land that is encumbered by a mining or millsite claim located under sections 2318 through 2352 of the Revised Statutes (commonly known as the "Mining Law of 1872") (30 U.S.C. 21 et seq.) shall take into account the encumbrance created by the claim for purposes of determining the value of the parcel of the Federal land.~~

~~(C) VALIDITY EXAMINATION. □ Nothing in this title requires the United States to conduct a mineral examination for any mining claim on the Federal land.~~

(4) APPROVAL. □ ~~The An~~ appraisals conducted under paragraph (1) shall be

SEC. 2045. HAZARDOUS MATERIALS.

(a) Costs. □ Except as provided in subsection (b), the costs of remedial actions relating to hazardous materials on land acquired under this title shall be paid by those entities responsible for the costs under applicable law.

(b) Remediation of Prior Testing and Training Activity. □ The Secretary of the Air Force shall bear all costs of evaluation, management, and remediation caused by the previous testing of military weapons systems and the training of military forces on non-Federal land to be conveyed to the United States under this title.

---

Final version of language we worked out with Hatch is back from leg. counsel. First title is identical to what you've seen before. Second title is our best efforts to address concerns raised in your testimony (and our concerns too) and is the cleaned up version of what I sent you earlier tonight. This is being cleared for inclusion in NDAA.

Begin forwarded message:

**Subject:** Re: Edits to UTTR draft (flo16565)

Heather,

In the second title, subsection \_\_03(b) ended up being duplicative of subsection (a). We can delete (b).

Everything else looks good. Thanks.

1 Purpose: To authorize the temporary closure of certain public land adjacent to the Utah Test and  
2 Training Range and to provide for the exchange of certain Federal land and non-Federal land in  
3 the State of Utah.

4  
5  
6 S. 2814

7  
8 To authorize appropriations for fiscal year 2017 for military  
9 activities of the Department of Defense and for military  
10 construction, to prescribe military personnel strengths for such  
11 fiscal year, and for other purposes.

12  
13 Referred to the Committee on \_\_\_\_\_ and ordered to be  
14 printed

15 Ordered to lie on the table and to be printed

16 AMENDMENT INTENDED TO BE PROPOSED BY \_\_\_\_\_

17 Viz:

18 At the appropriate place, insert the following:

19 TITLE \_\_\_\_ □ AUTHORIZATION FOR TEMPORARY  
20 CLOSURE OF CERTAIN PUBLIC LAND ADJACENT TO  
21 THE UTAH TEST AND TRAINING RANGE.

22 SEC. \_\_ 01. SHORT TITLE.

23 This title may be cited as the □Utah Test and Training Range Encroachment Prevention and  
24 Temporary Closure Act□

25 SEC. \_\_ 02. DEFINITIONS.

26 In this title:

27 (1) BLM LAND. □ The term □BLM land□ means certain public land administered by the  
28 Bureau of Land Management land in the State comprising approximately 703,621 acres, as  
29 generally depicted on the map entitled □Utah Test and Training Range Enhancement/West  
30 Desert Land Exchange□ and dated May 7, 2016.

31 (2) SECRETARY. □ The term □Secretary□ means the Secretary of the Interior.

32 (3) STATE. □ The term □State□ means the State of Utah.

1 (4) UTAH TEST AND TRAINING RANGE. □ The term "Utah Test and Training Range" means  
2 the portions of the military land and airspace operating area of the Utah Test and Training  
3 Area that are located in the State, including the Dugway Proving Ground.

4 **SEC. \_\_03. MEMORANDUM OF AGREEMENT.**

5 (a) Memorandum of Agreement. □

6 (1) IN GENERAL. □ Not later than 1 year after the date of enactment of this Act, the  
7 Secretary and the Secretary of the Air Force shall enter into a memorandum of agreement to  
8 authorize the Secretary of the Air Force, in consultation with the Secretary, to impose  
9 limited closures of the BLM land for military operations and national security and public  
10 safety purposes, as provided in this title.

11 (2) DRAFT. □

12 (A) IN GENERAL. □ Not later than 180 days after the date of enactment of this Act,  
13 the Secretary and the Secretary of the Air Force shall complete a draft of the  
14 memorandum of agreement required under paragraph (1).

15 (B) PUBLIC COMMENT PERIOD. □ During the 30-day period beginning on the date on  
16 which the draft memorandum of agreement is completed under subparagraph (A), there  
17 shall be an opportunity for public comment on the draft memorandum of agreement,  
18 including an opportunity for the Utah Test and Training Range Community Resource  
19 Advisory Group established under section \_\_06(a) to provide comments on the draft  
20 memorandum of agreement.

21 (3) MANAGEMENT BY SECRETARY. □ The memorandum of agreement entered into under  
22 paragraph (1) shall provide that the Secretary shall continue to manage the BLM land in  
23 accordance with the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et  
24 seq.) and applicable land use plans, while allowing for the temporary closure of the BLM  
25 land in accordance with this title.

26 (4) PERMITS AND RIGHTS-OF-WAY. □

27 (A) IN GENERAL. □ The Secretary shall consult with the Secretary of the Air Force  
28 regarding Utah Test and Training Range mission requirements before issuing new use  
29 permits or rights-of-way on the BLM land.

30 (B) FRAMEWORK. □ The Secretary and the Secretary of the Air Force shall establish  
31 within the memorandum of agreement entered into under paragraph (1) a framework  
32 agreed to by the Secretary and the Secretary of the Air Force for resolving any  
33 disagreement on the issuance of permits or rights-of-way on the BLM land.

34 (5) TERMINATION. □

35 (A) IN GENERAL. □ The memorandum of agreement entered into under paragraph (1)  
36 shall be for a term to be determined by the Secretary and the Secretary of the Air  
37 Force, not to exceed 25 years.

38 (B) EARLY TERMINATION. □ The memorandum of agreement may be terminated  
39 before the date determined under subparagraph (A) if the Secretary of the Air Force  
40 determines that the temporary closure of the BLM land is no longer necessary to fulfill

1 Utah Test and Training Range mission requirements.

2 (b) Map.□ The Secretary may correct any minor errors in the map described in section  
3 02(1).

4 (c) Land Safety.□ If corrective action is necessary on the BLM land due to an action of the Air  
5 Force, the Secretary of the Air Force shall□

6 (1) render the BLM land safe for public use; and

7 (2) appropriately communicate the safety of the land to the Secretary on the date on  
8 which the BLM land is rendered safe for public use under paragraph (1).

9 (d) Consultation.□ The Secretary shall consult with any federally recognized Indian tribe in  
10 the vicinity of the BLM land before entering into any agreement under this title.

11 (e) Grazing.□

12 (1) EFFECT.□ Nothing in this title impacts the management of grazing on the BLM land.

13 (2) CONTINUATION OF GRAZING MANAGEMENT.□ The Secretary shall continue grazing  
14 management on the BLM land pursuant to the Federal Land Policy and Management Act of  
15 1976 (43 U.S.C. 1701 et seq.) and applicable resource management plans.

16 (f) Memorandum of Understanding on Emergency Access and Response.□ Nothing in this  
17 section precludes the continuation of the memorandum of understanding between the  
18 Department of the Interior and the Department of the Air Force with respect to emergency access  
19 and response, as in existence on the date of enactment of this Act.

20 (g) Withdrawal.□ Subject to valid existing rights, the BLM land is withdrawn from all forms  
21 of appropriation under the public land laws, including the mining laws, the mineral leasing laws,  
22 and the geothermal leasing laws.

## 23 SEC. 04. TEMPORARY CLOSURES.

24 (a) In General.□ If the Secretary of the Air Force determines that military operations  
25 (including operations relating to the fulfillment of the mission of the Utah Test and Training  
26 Range), public safety, or national security require the temporary closure to public use of any  
27 road, trail, or other portion of the BLM land, the Secretary of the Air Force may take such action  
28 as the Secretary of the Air Force, in consultation with the Secretary, determines necessary to  
29 carry out the temporary closure.

30 (b) Limitations.□ Any temporary closure under subsection (a)□

31 (1) shall be limited to the minimum areas and periods during which the Secretary of the  
32 Air Force determines are required to carry out a closure under this section;

33 (2) shall not occur on a State or Federal holiday, unless notice is provided in accordance  
34 with subsection (c)(1)(B);

35 (3) shall not occur on a Friday, Saturday, or Sunday, unless notice is provided in  
36 accordance with subsection (c)(1)(B); and

37 (4)(A) if practicable, shall be for not longer than a 3-hour period per day;

38 (B) shall only be for longer than a 3-hour period per day□

- 1 (i) for mission essential reasons; and
- 2 (ii) as infrequently as practicable and in no case for more than 10 days per year;
- 3 and
- 4 (C) shall in no case be for longer than a 6-hour period per day.

5 (c) Notice.□

6 (1) IN GENERAL.□ Except as provided in paragraph (2), the Secretary of the Air Force  
7 shall□

8 (A) keep appropriate warning notices posted before and during any temporary  
9 closure; and

10 (B) provide notice to the Secretary, public, and relevant stakeholders concerning the  
11 temporary closure□

12 (i) at least 30 days before the date on which the temporary closure goes into  
13 effect;

14 (ii) in the case of a closure during the period beginning on March 1 and ending  
15 on May 31, at least 60 days before the date on which the closure goes into effect;  
16 or

17 (iii) in the case of a closure described in paragraph (3) or (4) of subsection (b),  
18 at least 90 days before the date on which the closure goes into effect.

19 (2) SPECIAL NOTIFICATION PROCEDURES.□ In each case for which a mission-unique  
20 security requirement does not allow for the notifications described in paragraph (1)(B), the  
21 Secretary of the Air Force shall work with the Secretary to achieve a mutually agreeable  
22 timeline for notification.

23 (d) Maximum Annual Closures.□ The total cumulative hours of temporary closures authorized  
24 under this section with respect to the BLM land shall not exceed 100 hours annually.

25 (e) Prohibition on Certain Temporary Closures.□ The northernmost area identified as  
26 □Newfoundland□□ on the map described in section \_\_\_02(1) shall not be subject to any  
27 temporary closure between August 21 and February 28, in accordance with the lawful hunting  
28 seasons of the State of Utah.

29 (f) Emergency Ground Response.□ A temporary closure of a portion of the BLM land shall  
30 not affect the conduct of emergency response activities on the BLM land during the temporary  
31 closure.

32 (g) Livestock.□ Livestock authorized by a Federal grazing permit shall be allowed to remain  
33 on the BLM land during a temporary closure of the BLM land under this section.

34 (h) Law Enforcement and Security.□ The Secretary and the Secretary of the Air Force may  
35 enter into cooperative agreements with State and local law enforcement officials with respect to  
36 lawful procedures and protocols to be used in promoting public safety and operation security on  
37 or near the BLM land during noticed test and training periods.

38 **SEC. \_\_05. LIABILITY.**

39 The United States (including all departments, agencies, officers, and employees of the United

1 States) shall be held harmless and shall not be liable for any injury or damage to any individual  
2 or property suffered in the course of any mining, mineral, or geothermal activity, or any other  
3 authorized nondefense-related activity, conducted on the BLM land.

4 **SEC. \_\_\_06. COMMUNITY RESOURCE ADVISORY**  
5 **GROUP.**

6 (a) Establishment. □ Not later than 90 days after the date of enactment of this Act, there shall  
7 be established the Utah Test and Training Range Community Resource Advisory Group (referred  
8 to in this section as the □Community Group□) to provide regular and continuing input to the  
9 Secretary and the Secretary of the Air Force on matters involving public access to, use of, and  
10 overall management of the BLM land.

11 (b) Membership. □

12 (1) IN GENERAL. □ The Secretary shall appoint members to the Community Group,  
13 including □

14 (A) 1 representative of Indian tribes in the vicinity of the BLM land, to be  
15 nominated by a majority vote conducted among the Indian tribes in the vicinity of the  
16 BLM land;

17 (B) not more than 1 county commissioner from each of Box Elder, Tooele, and Juab  
18 Counties, Utah;

19 (C) 2 representatives of off-road and highway use, hunting, or other recreational  
20 users of the BLM land;

21 (D) 2 representatives of livestock permittees on public land located within the BLM  
22 land;

23 (E) 1 representative of the Utah Department of Agriculture and Food; and

24 (F) not more than 3 representatives of State or Federal offices or agencies, or private  
25 groups or individuals, if the Secretary determines that such representatives would  
26 further the goals and objectives of the Community Group.

27 (2) CHAIRPERSON. □ The members described in paragraph (1) shall elect from among the  
28 members of the Community Group □

29 (A) 1 member to serve as Chairperson of the Community Group; and

30 (B) 1 member to serve as Vice-Chairperson of the Community Group.

31 (3) AIR FORCE PERSONNEL. □ The Secretary of the Air Force shall appoint appropriate  
32 operational and land management personnel of the Air Force to serve as a liaison to the  
33 Community Group.

34 (c) Conditions and Terms of Appointment. □

35 (1) IN GENERAL. □ Each member of the Community Group shall serve voluntarily and  
36 without compensation.

37 (2) TERM OF APPOINTMENT. □

38 (A) IN GENERAL. □ Each member of the Community Group shall be appointed for a

1 term of 4 years.

2 (B) ORIGINAL MEMBERS.□ Notwithstanding subparagraph (A), the Secretary shall  
3 select \1/2\ of the original members of the Community Group to serve for a term of 4  
4 years and the \1/2\ to serve for a term of 2 years to ensure the replacement of members  
5 shall be staggered from year to year.

6 (C) REAPPOINTMENT AND REPLACEMENT.□ The Secretary may reappoint or replace a  
7 member of the Community Group appointed under subsection (b)(1), if□

8 (i) the term of the member has expired;

9 (ii) the member has retired; or

10 (iii) the position held by the member described in subparagraph (A) through (F)  
11 of paragraph (1) has changed to the extent that the ability of the member to  
12 represent the group or entity that the member represents has been significantly  
13 affected.

14 (d) Meetings.□

15 (1) IN GENERAL.□ The Community Group shall meet not less than once per year, and at  
16 such other frequencies as determined by 5 or more of the members of the Community  
17 Group.

18 (2) RESPONSIBILITIES OF COMMUNITY GROUP.□ The Community Group shall be  
19 responsible for determining appropriate schedules for, details of, and actions for meetings of  
20 the Community Group.

21 (3) NOTICE.□ The Chairperson shall provide notice to each member of the Community  
22 Group not less than 10 business days before the date of a scheduled meeting.

23 (4) EXEMPT FROM FEDERAL ADVISORY COMMITTEE ACT.□ The Federal Advisory  
24 Committee Act (5 U.S.C. App.) shall not apply to meetings of the Community Group.

25 (e) Recommendations of Community Group.□ The Secretary and Secretary of the Air Force,  
26 consistent with existing laws (including regulations), shall take under consideration  
27 recommendations from the Community Group.

28 (f) Termination of Authority.□ The Community Group shall terminate on the date that is 10  
29 years after the date of enactment of this Act.

30 **SEC. \_\_07. SAVINGS CLAUSES.**

31 (a) Effect on Weapon Impact Area.□ Nothing in this title expands the boundaries of the  
32 weapon impact area of the Utah Test and Training Range.

33 (b) Effect on Special Use Airspace and Training Routes.□ Nothing in this title precludes□

34 (1) the designation of new units of special use airspace; or

35 (2) the expansion of existing units of special use airspace.

36 (c) Effect on Existing Military Special Use Airspace Agreement.□ Nothing in this title limits  
37 or alters the Military Operating Areas of Airspace Use Agreement between the Federal Aviation  
38 Administration and the Air Force in effect on the date of enactment of this Act.

1 (d) Effect on Existing Rights and Agreements.□

2 (1) KNOLLS SPECIAL RECREATION MANAGEMENT AREA; BLM COMMUNITY PITS.□ Except as  
3 otherwise provided in section \_\_\_04, nothing in this title limits or alters any existing right or  
4 right of access to□

5 (A) the Knolls Special Recreation Management Area; or

6 (B)(i) the Bureau of Land Management Community Pits Central Grayback and  
7 South Grayback; and

8 (ii) any other county or community pit located within close proximity to the  
9 BLM land.

10 (e) Interstate 80.□ Nothing in this title authorizes any additional authority or right to the  
11 Secretary or the Secretary of the Air Force to temporarily close Interstate 80.

12 (f) Effect on Limitation on Amendments to Certain Individual Resource Management Plans.□  
13 Nothing in this title affects the limitation established under section 2815(d) of the National  
14 Defense Authorization Act for Fiscal Year 2000 (Public Law 106□65; 113 Stat. 852).

15 (g) Effect on Previous Memorandum of Understanding.□ Nothing in this title affects the  
16 memorandum of understanding entered into by the Air Force, the Bureau of Land Management,  
17 the Utah Department of Natural Resources, and the Utah Division of Wildlife Resources relating  
18 to the reestablishment of bighorn sheep in the Newfoundland Mountains and signed by the  
19 parties to the memorandum of understanding during the period beginning on January 24, 2000,  
20 and ending on February 4, 2000.

21 (h) Effect on Federally Recognized Indian Tribes.□ Nothing in this title alters any right  
22 reserved by treaty or Federal law for a Federally recognized Indian tribe for tribal use.

23 (i) Payments in Lieu of Taxes.□ Nothing in this title diminishes, enhances, or otherwise  
24 affects any other right or entitlement of the counties in which the BLM land is situated to  
25 payments in lieu of taxes based on the BLM land, under section 6901 of title 31, United States  
26 Code.

27 (j) Wildlife Improvements.□ The Secretary and the Utah Division of Wildlife Resources shall  
28 continue the management of wildlife improvements, including guzzlers, in existence as of the  
29 date of enactment of this Act on the BLM land.

30 **TITLE \_\_\_ □ BUREAU OF LAND MANAGEMENT LAND**  
31 **EXCHANGE WITH STATE OF UTAH**

32 **SEC. \_\_01. DEFINITIONS.**

33 In this title:

34 (1) EXCHANGE MAP.□ The term □Exchange Map□means the map prepared by the Bureau  
35 of Land Management entitled □Utah Test and Training Range Enhancement/West Desert  
36 Land Exchange□and dated May 7, 2016.

37 (2) FEDERAL LAND.□ The term □Federal land□means the Bureau of Land Management  
38 land located in Box Elder, Millard, Juab, Tooele, and Beaver Counties, Utah, that is

1 identified on the Exchange Map as □BLM Lands Proposed for Transfer to State Trust  
2 Lands□

3 (3) NON-FEDERAL LAND.□ The term □non-Federal land□means the land owned by the  
4 State in Box Elder, Tooele, and Juab Counties, Utah, that is identified on the Exchange Map  
5 as□

6 (A) □State Trust Land Proposed for Transfer to BLM□ and

7 (B) □State Trust Minerals Proposed for Transfer to BLM□

8 (4) SECRETARY.□ The term □Secretary□means the Secretary of the Interior.

9 (5) STATE.□ The term □State□means the State of Utah, acting through the School and  
10 Institutional Trust Lands Administration.

## 11 SEC. \_\_02. EXCHANGE OF FEDERAL LAND AND NON- 12 FEDERAL LAND.

13 (a) In General.□ If the State offers to convey to the United States title to the non-Federal land,  
14 the Secretary shall□

15 (1) accept the offer; and

16 (2) on receipt of all right, title, and interest in and to the non-Federal land, convey to the  
17 State (or a designee) all right, title, and interest of the United States in and to the Federal  
18 land.

19 (b) Applicable Law.□

20 (1) IN GENERAL.□ The land exchange shall be subject to section 206 of the Federal Land  
21 Policy and Management Act of 1976 (43 U.S.C. 1716) and other applicable law.

22 (2) EFFECT OF STUDY.□ The Secretary shall carry out the land exchange under this title  
23 notwithstanding section 2815(d) of the National Defense Authorization Act for Fiscal Year  
24 2000 (Public Law 106□65; 113 Stat. 852).

25 (3) LAND USE PLANNING.□ The Secretary shall not be required to undertake any  
26 additional land use planning under section 202 of the Federal Land Policy and Management  
27 Act of 1976 (43 U.S.C. 1712) before the conveyance of the Federal land under this title.

28 (c) Valid Existing Rights.□ The exchange authorized under subsection (a) shall be subject to  
29 valid existing rights.

30 (d) Title Approval.□ Title to the Federal land and non-Federal land to be exchanged under this  
31 title shall be in a format acceptable to the Secretary and the State.

32 (e) Appraisals.□

33 (1) IN GENERAL.□ The value of the Federal land and the non-Federal land to be  
34 exchanged under this title shall be determined by appraisals conducted by 1 or more  
35 independent and qualified appraisers.

36 (2) STATE APPRAISER.□ The Secretary and the State may agree to use an independent and  
37 qualified appraiser retained by the State, with the consent of the Secretary.

1 (3) APPLICABLE LAW.□ The appraisals under paragraph (1) shall be conducted in  
2 accordance with nationally recognized appraisal standards, including, as appropriate, the  
3 Uniform Appraisal Standards for Federal Land Acquisitions and the Uniform Standards of  
4 Professional Appraisal Practice.

5 (4) MINERALS.□

6 (A) MINERAL REPORTS.□ The appraisals under paragraph (1) may take into account  
7 mineral and technical reports provided by the Secretary and the State in the evaluation  
8 of minerals in the Federal land and non-Federal land.

9 (B) MINING CLAIMS.□ Federal land that is encumbered by a mining or millsite claim  
10 located under sections 2318 through 2352 of the Revised Statutes (commonly known  
11 as the □Mining Law of 1872□) (30 U.S.C. 21 et seq.) shall be appraised in accordance  
12 with standard appraisal practices, including, as appropriate, the Uniform Appraisal  
13 Standards for Federal Land Acquisition.

14 (C) VALIDITY EXAMINATION.□ Nothing in this title requires the Secretary to conduct  
15 a mineral examination for any mining claim on the Federal land.

16 (5) APPROVAL.□ An appraisal conducted under paragraph (1) shall be submitted to the  
17 Secretary and the State for approval.

18 (6) DURATION.□ An appraisal conducted under paragraph (1) shall remain valid for 3  
19 years after the date on which the appraisal is approved by the Secretary and the State.

20 (7) COST OF APPRAISAL.□

21 (A) IN GENERAL.□ The cost of an appraisal conducted under paragraph (1) shall be  
22 paid equally by the Secretary and the State.

23 (B) REIMBURSEMENT BY SECRETARY.□ If the State retains an appraiser in  
24 accordance with paragraph (2), the Secretary shall reimburse the State in an amount  
25 equal to 50 percent of the costs incurred by the State.

26 (f) Conveyance of Title.□ It is the intent of Congress that the land exchange authorized under  
27 this title shall be completed not later than 1 year after the date of final approval by the Secretary  
28 and the State of the appraisals conducted under subsection (e).

29 (g) Public Inspection and Notice.□

30 (1) PUBLIC INSPECTION.□ At least 30 days before the date of conveyance of the Federal  
31 land and non-Federal land, all final appraisals and appraisal reviews for the Federal land  
32 and non-Federal land to be exchanged under this title shall be available for public review at  
33 the office of the State Director of the Bureau of Land Management in the State.

34 (2) NOTICE.□ The Secretary or the State, as applicable, shall publish in a newspaper of  
35 general circulation in Salt Lake County, Utah, a notice that the appraisals conducted under  
36 subsection (e) are available for public inspection.

37 (h) Consultation With Indian Tribes.□ The Secretary shall consult with any federally  
38 recognized Indian tribe in the vicinity of the Federal land and non-Federal land to be exchanged  
39 under this title before the completion of the land exchange.

40 (i) Equal Value Exchange.□

1 (1) IN GENERAL. □ The value of the Federal land and non-Federal land to be exchanged  
2 under this title □

3 (A) shall be equal; or

4 (B) shall be made equal in accordance with paragraph (2).

5 (2) EQUALIZATION. □

6 (A) SURPLUS OF FEDERAL LAND. □

7 (i) IN GENERAL. □ If the value of the Federal land exceeds the value of the non-  
8 Federal land, the value of the Federal land and non-Federal land shall be  
9 equalized by the State conveying to the Secretary, as necessary to equalize the  
10 value of the Federal land and non-Federal land □

11 (I) State trust land parcel 1, as described in the assessment entitled  
12 □Bureau of Land Management Environmental Assessment UT-100-06-EA □  
13 numbered UTU-82090, and dated March 2008; or

14 (II) State trust land located within any of the wilderness areas or national  
15 conservation areas in Washington County, Utah, established under subtitle O  
16 of title I of the Omnibus Public Land Management Act of 2009 (Public Law  
17 111 □ 1; 123 Stat. 1075).

18 (ii) ORDER OF CONVEYANCES. □ Any non-Federal land required to be conveyed  
19 to the Secretary under clause (i) shall be conveyed until the value of the Federal  
20 land and non-Federal land is equalized.

21 (B) SURPLUS OF NON-FEDERAL LAND. □ If the value of the non-Federal land exceeds  
22 the value of the Federal land, the value of the Federal land and the non-Federal land  
23 shall be equalized □

24 (i) by the Secretary making a cash equalization payment to the State, in  
25 accordance with section 206(b) of the Federal Land Policy and Management Act  
26 of 1976 (43 U.S.C. 1716(b)); or

27 (ii) by removing non-Federal land from the exchange.

28 (j) Grazing Permits. □

29 (1) IN GENERAL. □ If the Federal land or non-Federal land exchanged under this title is  
30 subject to a lease, permit, or contract for the grazing of domestic livestock in effect on the  
31 date of acquisition, the Secretary and the State shall allow the grazing to continue for the  
32 remainder of the term of the lease, permit, or contract, subject to the related terms and  
33 conditions of user agreements, including permitted stocking rates, grazing fee levels, access  
34 rights, and ownership and use of range improvements.

35 (2) RENEWAL. □ To the extent allowed by Federal or State law, on expiration of any  
36 grazing lease, permit, or contract described in paragraph (1), the holder of the lease, permit,  
37 or contract shall be entitled to a preference right to renew the lease, permit, or contract.

38 (3) CANCELLATION. □

39 (A) IN GENERAL. □ Nothing in this title prevents the Secretary or the State from  
40 canceling or modifying a grazing permit, lease, or contract if the Federal land or non-

1 Federal land subject to the permit, lease, or contract is sold, conveyed, transferred, or  
2 leased for non-grazing purposes by the Secretary or the State.

3 (B) LIMITATION.□ Except to the extent reasonably necessary to accommodate  
4 surface operations in support of mineral development, the Secretary or the State shall  
5 not cancel or modify a grazing permit, lease, or contract because the land subject to the  
6 permit, lease, or contract has been leased for mineral development.

7 (4) BASE PROPERTIES.□ If non-Federal land conveyed by the State under this title is used  
8 by a grazing permittee or lessee to meet the base property requirements for a Federal  
9 grazing permit or lease, the land shall continue to qualify as a base property for□

10 (A) the remaining term of the lease or permit; and

11 (B) the term of any renewal or extension of the lease or permit.

12 (k) Withdrawal of Federal Land From Mineral Entry Prior to Exchange.□ Subject to valid  
13 existing rights, the Federal land to be conveyed to the State under this title is withdrawn from  
14 mineral location, entry, and patent under the mining laws pending conveyance of the Federal  
15 land to the State.

16 **SEC. \_\_03. STATUS AND MANAGEMENT OF NON-**  
17 **FEDERAL LAND ACQUIRED BY THE UNITED STATES.**

18 (a) In General.□ On conveyance to the United States under this title, the non-Federal land  
19 shall be managed by the Secretary in accordance with the Federal Land Policy and Management  
20 Act of 1976 (43 U.S.C. 1701 et seq.) and applicable land use plans.

21 (b) Non-federal Land Within Cedar Mountains Wilderness.□ On conveyance to the Secretary  
22 under this title, the non-Federal land located within the Cedar Mountains Wilderness shall, in  
23 accordance with section 206(c) of the Federal Land Policy Act of 1976 (43 U.S.C. 1716(c)), be  
24 added to, and administered as part of, the Cedar Mountains Wilderness.

25 (c) Non-federal Land Within Wilderness Areas or National Conservation Areas.□ On  
26 conveyance to the Secretary under this title, non-Federal land located in a national wilderness  
27 area or national conservation area shall be managed in accordance with the applicable provisions  
28 of subtitle O of title I of the Omnibus Public Land Management Act of 2009 (Public Law 111□  
29 11).

30 **SEC. \_\_04. HAZARDOUS MATERIALS.**

31 (a) Costs.□ Except as provided in subsection (b), the costs of remedial actions relating to  
32 hazardous materials on land acquired under this title shall be paid by those entities responsible  
33 for the costs under applicable law.

34 (b) Remediation of Prior Testing and Training Activity.□ The Secretary of the Air Force shall  
35 bear all costs of evaluation, management, and remediation caused by the previous testing of  
36 military weapons systems and the training of military forces on non-Federal land to be conveyed  
37 to the United States under this title.

1 Purpose: To authorize the temporary closure of certain public land adjacent to the Utah Test and  
2 Training Range and to provide for the exchange of certain Federal land and non-Federal  
3 land in the State of Utah.

21 AMENDMENT INTENDED TO BE PROPOSED BY \_\_\_\_\_

22 Viz:

23 At the appropriate place, insert the following:

24 TITLE \_\_\_\_ AUTHORIZATION FOR TEMPORARY  
25 CLOSURE OF CERTAIN PUBLIC LAND ADJACENT TO  
26 THE UTAH TEST AND TRAINING RANGE.

27 SEC. 101. SHORT TITLE.

28 This title may be cited as the Utah Test and Training Range Encroachment Prevention and  
29 Temporary Closure Act

1 SEC. 2 00 DEFINITIONS.

2 In this title:

3 (1) BLM LAND. □ The term "BLM land" means certain public land administered by the  
4 Bureau of Land Management land in the State comprising approximately 703,621 acres, as  
5 generally depicted on the map entitled "Utah Test and Training Range Enhancement/West  
6 Desert Land Exchange" and dated May 7, 2016.

7 (2) SECRETARY. □ The term "Secretary" means the Secretary of the Interior.

8 (3) STATE. □ The term "State" means the State of Utah.

9 (4) UTAH TEST AND TRAINING RANGE. □ The term "Utah Test and Training Range" means  
10 the portions of the military land and airspace operating area of the Utah Test and Training  
11 Area that are located in the State, including the Dugway Proving Ground.

12 SEC. 3 03. MEMORANDUM OF AGREEMENT.

13 (a) Memorandum of Agreement. □

14 (1) IN GENERAL. □ Not later than 1 year after the date of enactment of this Act, the  
15 Secretary and the Secretary of the Air Force shall enter into a memorandum of agreement to  
16 authorize the Secretary of the Air Force, in consultation with the Secretary, to impose  
17 limited closures of the BLM land for military operations and national security and public  
18 safety purposes, as provided in this title.

19 (2) DRAFT. □

20 (A) IN GENERAL. □ Not later than 180 days after the date of enactment of this Act,  
21 the Secretary and the Secretary of the Air Force shall complete a draft of the  
22 memorandum of agreement required under paragraph (1).

23 (B) PUBLIC COMMENT PERIOD. □ During the 30-day period beginning on the date on  
24 which the draft memorandum of agreement is completed under subparagraph (A), there  
25 shall be an opportunity for public comment on the draft memorandum of agreement,  
26 including an opportunity for the Utah Test and Training Range Community Resource  
27 Advisory Group established under section 6(a) 06(a) to provide comments on  
28 the draft memorandum of agreement.

29 (3) MANAGEMENT BY SECRETARY. □ The memorandum of agreement entered into under  
30 paragraph (1) shall provide that the Secretary shall continue to manage the BLM land in  
31 accordance with the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et  
32 seq.) and applicable land use plans, while allowing for the temporary closure of the BLM  
33 land in accordance with this title.

34 (4) PERMITS AND RIGHTS-OF-WAY. □

35 (A) IN GENERAL. □ The Secretary shall consult with the Secretary of the Air Force  
36 regarding Utah Test and Training Range mission requirements before issuing new use  
37 permits or rights-of-way on the BLM land.

38 (B) FRAMEWORK. □ The Secretary and the Secretary of the Air Force shall establish  
39 within the memorandum of agreement entered into under paragraph (1) a framework

1           agreed to by the Secretary and the Secretary of the Air Force for resolving any  
2           disagreement on the issuance of permits or rights-of-way on the BLM land.

3           (5) TERMINATION. □

4           (A) IN GENERAL. □ The memorandum of agreement entered into under paragraph (1)  
5           shall be for a term to be determined by the Secretary and the Secretary of the Air  
6           Force, not to exceed 25 years.

7           (B) EARLY TERMINATION. □ The memorandum of agreement may be terminated  
8           before the date determined under subparagraph (A) if the Secretary of the Air Force  
9           determines that the temporary closure of the BLM land is no longer necessary to fulfill  
10          Utah Test and Training Range mission requirements.

11          (b) Map. □ The Secretary may correct any minor errors in the map described in section  
12          ~~2(1)~~ □□□□0 □(1).

13          (c) Land Safety. □ If corrective action is necessary on the BLM land due to an action of the Air  
14          Force, the Secretary of the Air Force shall □

15               (1) render the BLM land safe for public use; and

16               (2) appropriately communicate the safety of the land to the Secretary on the date on  
17               which the BLM land is rendered safe for public use under paragraph (1).

18          (d) Consultation. □ The Secretary shall consult with any federally recognized Indian tribe in  
19          the vicinity of the BLM land before entering into any agreement under this title.

20          (e) Grazing. □

21               (1) EFFECT. □ Nothing in this title impacts the management of grazing on the BLM land.

22               (2) CONTINUATION OF GRAZING MANAGEMENT. □ The Secretary shall continue grazing  
23               management on the BLM land pursuant to the Federal Land Policy and Management Act of  
24               1976 (43 U.S.C. 1701 et seq.) and applicable resource management plans.

25          (f) Memorandum of Understanding on Emergency Access and Response. □ Nothing in this  
26          section precludes the continuation of the memorandum of understanding between the  
27          Department of the Interior and the Department of the Air Force with respect to emergency access  
28          and response, as in existence on the date of enactment of this Act.

29          (g) Withdrawal. □ Subject to valid existing rights, the BLM land is withdrawn from all forms  
30          of appropriation under the public land laws, including the mining laws, the mineral leasing laws,  
31          and the geothermal leasing laws.

32          SEC. ~~4~~ □□04. TEMPORARY CLOSURES.

33               (a) In General. □ If the Secretary of the Air Force determines that military operations  
34               (including operations relating to the fulfillment of the mission of the Utah Test and Training  
35               Range), public safety, or national security require the temporary closure to public use of any  
36               road, trail, or other portion of the BLM land, the Secretary of the Air Force may take such action  
37               as the Secretary of the Air Force, in consultation with the Secretary, determines necessary to  
38               carry out the temporary closure.

39               (b) Limitations. □ Any temporary closure under subsection (a) □

1 (1) shall be limited to the minimum areas and periods during which the Secretary of the  
2 Air Force determines are required to carry out a closure under this section;

3 (2) shall not occur on a State or Federal holiday, unless notice is provided in accordance  
4 with subsection (c)(1)(B);

5 (3) shall not occur on a Friday, Saturday, or Sunday, unless notice is provided in  
6 accordance with subsection (c)(1)(B); and

7 (4)(A) if practicable, shall be for not longer than a 3-hour period per day;

8 (B) shall only be for longer than a 3-hour period per day□

9 (i) for mission essential reasons; and

10 (ii) as infrequently as practicable and in no case for more than 10 days per year;  
11 and

12 (C) shall in no case be for longer than a 6-hour period per day.

13 (c) Notice.□

14 (1) IN GENERAL.□ Except as provided in paragraph (2), the Secretary of the Air Force  
15 shall□

16 (A) keep appropriate warning notices posted before and during any temporary  
17 closure; and

18 (B) provide notice to the Secretary, public, and relevant stakeholders concerning the  
19 temporary closure□

20 (i) at least 30 days before the date on which the temporary closure goes into  
21 effect;

22 (ii) in the case of a closure during the period beginning on March 1 and ending  
23 on May 31, at least 60 days before the date on which the closure goes into effect;  
24 or

25 (iii) in the case of a closure described in paragraph (3) or (4) of subsection (b),  
26 at least 90 days before the date on which the closure goes into effect.

27 (2) SPECIAL NOTIFICATION PROCEDURES.□ In each case for which a mission-unique  
28 security requirement does not allow for the notifications described in paragraph (1)(B), the  
29 Secretary of the Air Force shall work with the Secretary to achieve a mutually agreeable  
30 timeline for notification.

31 (d) Maximum Annual Closures.□ The total cumulative hours of temporary closures authorized  
32 under this section with respect to the BLM land shall not exceed 100 hours annually.

33 (e) Prohibition on Certain Temporary Closures.□ The northernmost area identified as  
34 □Newfoundland□s□ on the map described in section 2(1)□□□□0□(1) shall not be subject to  
35 any temporary closure between August 21 and February 28, in accordance with the lawful  
36 hunting seasons of the State of Utah.

37 (f) Emergency Ground Response.□ A temporary closure of a portion of the BLM land shall  
38 not affect the conduct of emergency response activities on the BLM land during the temporary  
39 closure.

1 (g) Livestock. □ Livestock authorized by a Federal grazing permit shall be allowed to remain  
2 on the BLM land during a temporary closure of the BLM land under this section.

3 (h) Law Enforcement and Security. □ The Secretary and the Secretary of the Air Force may  
4 enter into cooperative agreements with State and local law enforcement officials with respect to  
5 lawful procedures and protocols to be used in promoting public safety and operation security on  
6 or near the BLM land during noticed test and training periods.

7 **SEC. 5 05. LIABILITY.**

8 The United States (including all departments, agencies, officers, and employees of the United  
9 States) shall be held harmless and shall not be liable for any injury or damage to any individual  
10 or property suffered in the course of any mining, mineral, or geothermal activity, or any other  
11 authorized nondefense-related activity, conducted on the BLM land.

12 **SEC. 6 06. COMMUNITY RESOURCE ADVISORY**  
13 **GROUP.**

14 (a) Establishment. □ Not later than 90 days after the date of enactment of this Act, there shall  
15 be established the Utah Test and Training Range Community Resource Advisory Group (referred  
16 to in this section as the □Community Group□) to provide regular and continuing input to the  
17 Secretary and the Secretary of the Air Force on matters involving public access to, use of, and  
18 overall management of the BLM land.

19 (b) Membership. □

20 (1) IN GENERAL. □ The Secretary shall appoint members to the Community Group,  
21 including □

22 (A) 1 representative of Indian tribes in the vicinity of the BLM land, to be  
23 nominated by a majority vote conducted among the Indian tribes in the vicinity of the  
24 BLM land;

25 (B) not more than 1 county commissioner from each of Box Elder, Tooele, and Juab  
26 Counties, Utah;

27 (C) 2 representatives of off-road and highway use, hunting, or other recreational  
28 users of the BLM land;

29 (D) 2 representatives of livestock permittees on public land located within the BLM  
30 land;

31 (E) 1 representative of the Utah Department of Agriculture and Food; and

32 (F) not more than 3 representatives of State or Federal offices or agencies, or private  
33 groups or individuals, if the Secretary determines that such representatives would  
34 further the goals and objectives of the Community Group.

35 (2) CHAIRPERSON. □ The members described in paragraph (1) shall elect from among the  
36 members of the Community Group □

37 (A) 1 member to serve as Chairperson of the Community Group; and

38 (B) 1 member to serve as Vice-Chairperson of the Community Group.

1 (3) AIR FORCE PERSONNEL. □ The Secretary of the Air Force shall appoint appropriate  
2 operational and land management personnel of the Air Force to serve as a liaison to the  
3 Community Group.

4 (c) Conditions and Terms of Appointment. □

5 (1) IN GENERAL. □ Each member of the Community Group shall serve voluntarily and  
6 without compensation.

7 (2) TERM OF APPOINTMENT. □

8 (A) IN GENERAL. □ Each member of the Community Group shall be appointed for a  
9 term of 4 years.

10 (B) ORIGINAL MEMBERS. □ Notwithstanding subparagraph (A), the Secretary shall  
11 select  $\frac{1}{2}$  of the original members of the Community Group to serve for a term of 4  
12 years and the  $\frac{1}{2}$  to serve for a term of 2 years to ensure the replacement of members  
13 shall be staggered from year to year.

14 (C) REAPPOINTMENT AND REPLACEMENT. □ The Secretary may reappoint or replace a  
15 member of the Community Group appointed under subsection (b)(1), if □

16 (i) the term of the member has expired;

17 (ii) the member has retired; or

18 (iii) the position held by the member described in subparagraph (A) through (F)  
19 of paragraph (1) has changed to the extent that the ability of the member to  
20 represent the group or entity that the member represents has been significantly  
21 affected.

22 (d) Meetings. □

23 (1) IN GENERAL. □ The Community Group shall meet not less than once per year, and at  
24 such other frequencies as determined by 5 or more of the members of the Community  
25 Group.

26 (2) RESPONSIBILITIES OF COMMUNITY GROUP. □ The Community Group shall be  
27 responsible for determining appropriate schedules for, details of, and actions for meetings of  
28 the Community Group.

29 (3) NOTICE. □ The Chairperson shall provide notice to each member of the Community  
30 Group not less than 10 business days before the date of a scheduled meeting.

31 (4) EXEMPT FROM FEDERAL ADVISORY COMMITTEE ACT. □ The Federal Advisory  
32 Committee Act (5 U.S.C. App.) shall not apply to meetings of the Community Group.

33 (e) Recommendations of Community Group. □ The Secretary and Secretary of the Air Force,  
34 consistent with existing laws (including regulations), shall take under consideration  
35 recommendations from the Community Group.

36 (f) Termination of Authority. □ The Community Group shall terminate on the date that is 10  
37 years after the date of enactment of this Act.

38 SEC. 7 □ □ 0 □ SAVINGS CLAUSES.

- 1 (a) Effect on Weapon Impact Area. □ Nothing in this title expands the boundaries of the  
2 weapon impact area of the Utah Test and Training Range.
- 3 (b) Effect on Special Use Airspace and Training Routes. □ Nothing in this title precludes □  
4 (1) the designation of new units of special use airspace; or  
5 (2) the expansion of existing units of special use airspace.
- 6 (c) Effect on Existing Military Special Use Airspace Agreement. □ Nothing in this title limits  
7 or alters the Military Operating Areas of Airspace Use Agreement between the Federal Aviation  
8 Administration and the Air Force in effect on the date of enactment of this Act.
- 9 (d) Effect on Existing Rights and Agreements. □  
10 (1) KNOLLS SPECIAL RECREATION MANAGEMENT AREA; BLM COMMUNITY PITS. □ Except as  
11 otherwise provided in section 4□□□04, nothing in this title limits or alters any existing  
12 right or right of access to □  
13 (A) the Knolls Special Recreation Management Area; or  
14 (B)(i) the Bureau of Land Management Community Pits Central Grayback and  
15 South Grayback; and  
16 (ii) any other county or community pit located within close proximity to the  
17 BLM land.
- 18 (e) Interstate 80. □ Nothing in this title authorizes any additional authority or right to the  
19 Secretary or the Secretary of the Air Force to temporarily close Interstate 80.
- 20 (f) Effect on Limitation on Amendments to Certain Individual Resource Management  
21 Plans. □ Nothing in this title affects the limitation established under section 2815(d) of the  
22 National Defense Authorization Act for Fiscal Year 2000 (Public Law 106□65; 113 Stat. 852).
- 23 (g) Effect on Previous Memorandum of Understanding. □ Nothing in this title affects the  
24 memorandum of understanding entered into by the Air Force, the Bureau of Land Management,  
25 the Utah Department of Natural Resources, and the Utah Division of Wildlife Resources relating  
26 to the reestablishment of bighorn sheep in the Newfoundland Mountains and signed by the  
27 parties to the memorandum of understanding during the period beginning on January 24, 2000,  
28 and ending on February 4, 2000.
- 29 (h) Effect on Federally Recognized Indian Tribes. □ Nothing in this title alters any right  
30 reserved by treaty or Federal law for a Federally recognized Indian tribe for tribal use.
- 31 (i) Payments in Lieu of Taxes. □ Nothing in this title diminishes, enhances, or otherwise  
32 affects any other right or entitlement of the counties in which the BLM land is situated to  
33 payments in lieu of taxes based on the BLM land, under section 6901 of title 31, United States  
34 Code.
- 35 (j) Wildlife Improvements. □ The Secretary and the Utah Division of Wildlife Resources shall  
36 continue the management of wildlife improvements, including guzzlers, in existence as of the  
37 date of enactment of this Act on the BLM land.

38 **TITLE □□□□ BUREAU OF LAND MANAGEMENT LAND**  
39 **EXCHANGE WITH STATE OF UTAH**

1 **SEC. 01. DEFINITIONS.**

2 In this title

3 (1) EXCHANGE MAP. The term Exchange Map means the map prepared by the  
4 Bureau of Land Management entitled Utah Test and Training Range  
5 Enhancement West Desert Land Exchange and dated March 16, 2016.

6 (2) FEDERAL LAND. The term Federal land means the Bureau of Land  
7 Management land located in Boone, Elder, Millard, Juab, Tooele, and Beaver Counties,  
8 Utah that is identified on the Exchange Map as BLM Lands Proposed for Transfer  
9 to State Trust Lands.

10 (3) NON-FEDERAL LAND. The term non-Federal land means the land owned by  
11 the State in Boone, Elder, Tooele, and Juab Counties, Utah that is identified on the  
12 Exchange Map as

13 (A) State Trust Land Proposed for Transfer to BLM, and

14 (B) State Trust Minerals Proposed for Transfer to BLM.

15 (4) SECRETARY. The term Secretary means the Secretary of the Interior.

16 (5) STATE. The term State means the State of Utah acting through the School  
17 and Institutional Trust Lands Administration.

18 **SEC. 02. EXCHANGE OF FEDERAL LAND AND**  
19 **NON-FEDERAL LAND.**

20 (a) In General. If the State offers to convey to the United States title to the non-Federal  
21 land, the Secretary shall

22 (1) accept the offer, and

23 (2) on receipt of all right, title, and interest in and to the non-Federal land conveyed to  
24 the State (or a designee) all right, title, and interest of the United States in and to the  
25 Federal land.

26 (b) Applicable Law.

27 (1) IN GENERAL. The land exchange shall be subject to section 206 of the Federal  
28 Land Policy and Management Act of 1976 (43 U.S.C. 1606) and other applicable law.

29 (2) EFFECT OF STUDY. The Secretary shall carry out the land exchange under this  
30 title notwithstanding section 15(d) of the National Defense Authorization Act for  
31 Fiscal Year 2000 (Public Law 106-65, 113 Stat. 505).

32 (3) LAND USE PLANNING. The Secretary shall not be required to undertake an  
33 additional land use planning under section 200 of the Federal Land Policy and  
34 Management Act of 1976 (43 U.S.C. 1600) before the conveyance of the Federal land  
35 under this title.

36 (c) Valid Existing Rights. The exchange authorized under subsection (a) shall be  
37 subject to valid existing rights.

1 (d) Title Approval. □ Title to the Federal land and non-Federal land to be e□changed  
2 under this title shall be in a format acceptable to the Secretar□and the State.

3 (e) Appraisals. □

4 (1) IN GENERAL. □ The value of the Federal land and the non-Federal land to be  
5 e□changed under this title shall be determined b□appraisals conducted b□1 or more  
6 independent and □ualified appraisers.

7 (□) STATE APPRAISER. □ The Secretar□and the State ma□agree to use an  
8 independent and □ualified appraiser retained b□the State□□ith the consent of the  
9 Secretar□

10 (3) APPLICABLE LAW. □ The appraisals under paragraph (1) shall be conducted in  
11 accordance □ith nationall□recogni□ed appraisal standards□including□as appropriate□  
12 the Uniform Appraisal Standards for Federal Land Ac□uisitions and the Uniform  
13 Standards of Professional Appraisal Practice.

14 (4) MINERALS. □

15 (A) MINERAL REPORTS. □ The appraisals under paragraph (1) ma□ta□e into  
16 account mineral and technical reports provided b□the Secretar□and the State in  
17 the evaluation of minerals in the Federal land and non-Federal land.

18 (B) MINING CLAIMS. □ Federal land that is encumbered b□a mining or millsite  
19 claim located under sections □31□through □35□of the Revised Statutes  
20 (commonl□□no□n as the □Mining La□ of 1□□□□) (30 U.S.C. □1 et se□) shall be  
21 appraised in accordance □ith standard appraisal practices□including□as  
22 appropriate□the Uniform Appraisal Standards for Federal Land Ac□uisition.

23 (C) VALIDITY EXAMINATION. □ Nothing in this title re□quires the Secretar□to  
24 conduct a mineral e□amination for an□mining claim on the Federal land.

25 (5) APPROVAL. □ An appraisal conducted under paragraph (1) shall be submitted to  
26 the Secretar□and the State for approval.

27 (6) DURATION. □ An appraisal conducted under paragraph (1) shall remain valid for  
28 3 □ears after the date on □hich the appraisal is approved b□the Secretar□and the  
29 State.

30 (□) COST OF APPRAISAL. □

31 (A) IN GENERAL. □ The cost of an appraisal conducted under paragraph (1)  
32 shall be paid e□uall□b□the Secretar□and the State.

33 (B) REIMBURSEMENT BY SECRETARY. □ If the State retains an appraiser in  
34 accordance □ith paragraph (□)□the Secretar□shall reimburse the State in an  
35 amount e□ual to 50 percent of the costs incurred b□the State.

36 (f) Conve□ance of Title. □ It is the intent of Congress that the land e□change authori□ed  
37 under this title shall be completed not later than 1 □ear after the date of final approval b□  
38 the Secretar□and the State of the appraisals conducted under subsection (e).

39 (g) Public Inspection and Notice. □

40 (1) PUBLIC INSPECTION. □ At least 30 da□s before the date of conve□ance of the

1 Federal land and non-Federal land all final appraisals and appraisal reviews for the  
2 Federal land and non-Federal land to be exchanged under this title shall be available  
3 for public review at the office of the State Director of the Bureau of Land  
4 Management in the State.

5 ( ) NOTICE. The Secretary or the State as applicable shall publish in a newspaper  
6 of general circulation in Salt Lake County Utah a notice that the appraisals  
7 conducted under subsection (e) are available for public inspection.

8 (h) Consultation With Indian Tribes. The Secretary shall consult with an federal  
9 recognized Indian tribe in the vicinity of the Federal land and non-Federal land to be  
10 exchanged under this title before the completion of the land exchange.

11 (i) Equal Value Exchange.

12 (1) IN GENERAL. The value of the Federal land and non-Federal land to be  
13 exchanged under this title

14 (A) shall be equal or

15 (B) shall be made equal in accordance with paragraph ( ).

16 ( ) EQUALIZATION.

17 (A) SURPLUS OF FEDERAL LAND.

18 (i) IN GENERAL. If the value of the Federal land exceeds the value of the  
19 non-Federal land the value of the Federal land and non-Federal land shall  
20 be equalized by the State conveying to the Secretary as necessary to equalize  
21 the value of the Federal land and non-Federal land

22 (I) State trust land parcel 1 as described in the assessment entitled  
23 Bureau of Land Management Environmental Assessment  
24 UT-100-06-EA numbered UTU-000 and dated March 00 or

25 (II) State trust land located within an of the wilderness areas or  
26 national conservation areas in Washington County Utah established  
27 under subtitle O of title I of the Omnibus Public Land Management Act  
28 of 00 (Public Law 111-11 3 Stat. 105).

29 (ii) ORDER OF CONVEYANCES. An non-Federal land required to be  
30 conveyed to the Secretary under clause (i) shall be conveyed until the value of  
31 the Federal land and non-Federal land is equalized.

32 (B) SURPLUS OF NON-FEDERAL LAND. If the value of the non-Federal land  
33 exceeds the value of the Federal land the value of the Federal land and the  
34 non-Federal land shall be equalized

35 (i) by the Secretary making a cash equalization payment to the State in  
36 accordance with section 06(b) of the Federal Land Policy and Management  
37 Act of 1966 (43 U.S.C. 16(b)) or

38 (ii) by removing non-Federal land from the exchange.

39 ( ) Granting Permits.

(1) IN GENERAL. If the Federal land or non-Federal land exchanged under this title is subject to a lease, permit, or contract for the grazing of domestic livestock in effect on the date of acquisition, the Secretary and the State shall allow the grazing to continue for the remainder of the term of the lease, permit, or contract, subject to the related terms and conditions of user agreements, including permitted stocking rates, grazing fee levels, access rights, and ownership and use of range improvements.

(2) RENEWAL. To the extent allowed by Federal or State law, on expiration of an grazing lease, permit, or contract described in paragraph (1), the holder of the lease, permit, or contract shall be entitled to a preference right to renew the lease, permit, or contract.

(3) CANCELLATION.

(A) IN GENERAL. Nothing in this title prevents the Secretary or the State from canceling or modifying a grazing permit, lease, or contract if the Federal land or non-Federal land subject to the permit, lease, or contract is sold, conveyed, transferred, or leased for non-grazing purposes by the Secretary or the State.

(B) LIMITATION. Except to the extent reasonable and necessary to accommodate surface operations in support of mineral development, the Secretary or the State shall not cancel or modify a grazing permit, lease, or contract because the land subject to the permit, lease, or contract has been leased for mineral development.

(4) BASE PROPERTIES. If non-Federal land conveyed by the State under this title is used by a grazing permittee or lessee to meet the base property requirements for a Federal grazing permit or lease, the land shall continue to qualify as a base property for

(A) the remaining term of the lease or permit, and

(B) the term of an renewal or extension of the lease or permit.

(5) Withdrawal of Federal Land From Mineral Entry Prior to Exchange. Subject to valid existing rights, the Federal land to be conveyed to the State under this title is withdrawn from mineral location, entry, and patent under the mining laws pending conveyance of the Federal land to the State.

SEC. 03. STATUS AND MANAGEMENT OF NON-FEDERAL LAND ACQUIRED BY THE UNITED STATES.

(a) In General. On conveyance to the United States under this title, the non-Federal land shall be managed by the Secretary in accordance with the Federal Land Policy and Management Act of 1966 (43 U.S.C. 1601 et seq.) and applicable land use plans.

(b) Non-federal Land Within Cedar Mountains Wilderness. On conveyance to the Secretary under this title, the non-Federal land located within the Cedar Mountains Wilderness shall in accordance with section 306(c) of the Federal Land Policy Act of 1966 (43 U.S.C. 1616(c)) be added to and administered as part of the Cedar Mountains Wilderness.

1 (c) Non-federal Land Within Wilderness Areas or National Conservation Areas. On  
2 conveyance to the Secretary under this title non-Federal land located in a national  
3 wilderness area or national conservation area shall be managed in accordance with the  
4 applicable provisions of subtitle O of title I of the Omnibus Public Land Management Act  
5 of 2001 (Public Law 111-11).

6 **SEC. 104. HAZARDOUS MATERIALS.**

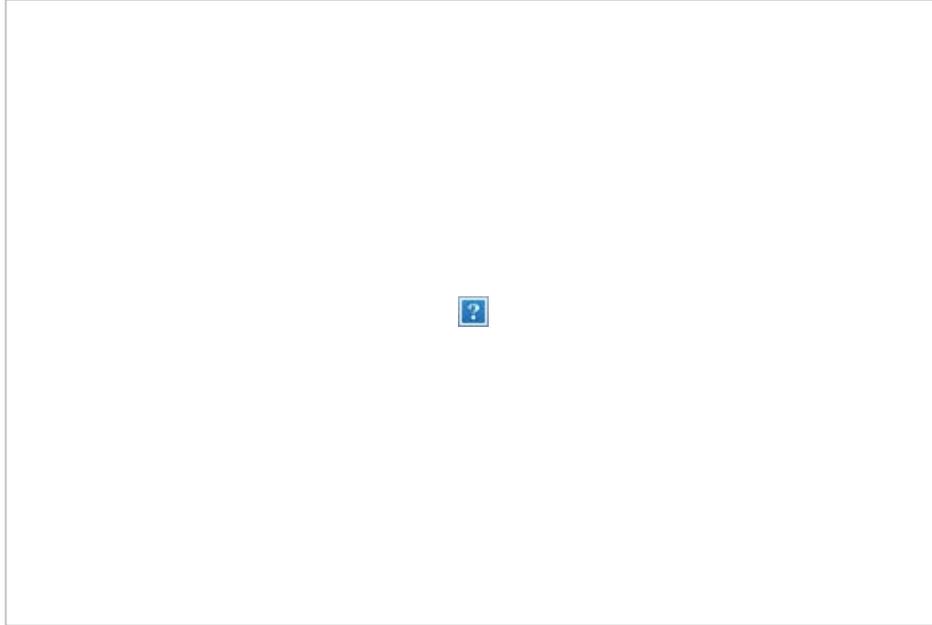

7 (a) Costs. Except as provided in subsection (b) the costs of remedial actions relating to  
8 hazardous materials on land acquired under this title shall be paid by those entities  
9 responsible for the costs under applicable law.

10 (b) Remediation of Prior Testing and Training Activities. The Secretary of the Air Force  
11 shall bear all costs of evaluation, management, and remediation caused by the previous  
12 testing of military weapons systems and the training of military forces on non-Federal land  
13 to be conveyed to the United States under this title.

*(Ute Mountain, Photo Credit: Jim O'Donnell)*

May 11, 2016

Dear Friend,

I am proud that the Senate recently passed its first comprehensive bipartisan energy and public lands package in years. Not only does the package include common-sense provisions to grow New Mexico's technology and energy sectors, but it also includes a bill Senator Tom Udall and I introduced to establish two new wilderness areas in our state, the Cerro del Yuta Wilderness and Rio San Antonio Wilderness.

For many years now, a broad coalition of northern New Mexicans has worked to conserve these areas within the Río Grande del Norte National Monument northwest of Taos, New Mexico. I have no doubt that future generations will be grateful for their years of work and support. These roadless areas provide important security habitat for elk, mule deer, black bears, golden eagles, and American pronghorn. Designating these two new wilderness areas will complete a national example of community-driven, landscape-scale conservation that will preserve the culture, natural resources, and economy of this stunning part of New Mexico.

This package also includes permanent reauthorization of the Land and Water Conservation Fund. LWCF is one of America's most successful conservation programs. It has preserved our outdoor heritage, protected clean air and precious supplies of drinking water, and supported jobs across the country. Permanent reauthorization of LWCF is a major victory for conservation, and I will continue to fight to fully fund LWCF, so we can make strong investments in our public lands.

These are the places that make New Mexico so enchanting and make our nation so special.

And together, we will ensure that all of our children and grandchildren can continue to come back to these special outdoor places year after year, generation after generation.

Sincerely,

MARTIN HEINRICH  
United States Senator

P.S. Below is an editorial by *The Taos News* supporting my bill to establish two new wilderness areas within the Río Grande del Norte National Monument. I hope you'll take a moment to read it.

## **[Editorial: Thanks to feds working to preserve wilderness areas](#)**

May 6, 2016

An amendment added recently to a federal energy bill would create two wilderness areas within the Rio Grande del Norte National Monument.

Thank you, Sens. Tom Udall and Martin Heinrich, for looking out for Northern New Mexico.

The Energy Policy Modernization Act still needs to be reconciled with a House version before it can go to the president's desk. But the amendment aims to preserve 21,420 acres as the Cerro del Yuta (Ute Mountain) and Rio San Antonio wilderness areas.

As Heinrich, who stopped by *The Taos News* this week, noted, Ute Mountain and the Rio Grande Gorge are two iconic sights within the monument.

Like Heinrich, we see the draw for tourists wanting to experience a high desert wilderness -- and for locals who enjoy the great outdoors.

The areas are also a source of water and a refuge for wildlife.

The plan for the wilderness areas has had a great deal of buy-in from locals, just as they supported the creation of the Rio Grande del Norte National Monument in 2013. Many recognize the impact the monument would have on our quality of life via recreation and traditional land uses.

We only wish New Mexico Land Commissioner Aubrey Dunn felt the same way.

In a story published last week in our sister paper, *The New Mexican*, Dunn opposed the amendment's passage because he says it would mean a loss of nearly 1,300 acres of state trust lands.

He noted money generated through mineral leases and timber sales on state trust lands go toward funding public schools, hospitals and beneficiaries. Dunn released this statement: "With low oil prices already impacting revenues from State Trust Lands, the designation of these new wilderness areas will only add insult to injury and further reduce revenues in support of New Mexico's school children."

But that argument is a ruse. These wildernesses won't lock people out of state land, nor will they affect any income generated by his office.

Instead of spouting rhetoric and bellyaching, Dunn should be working with the federal government to swap out islands of state land that are now inside the national monument. If Dunn were truly concerned about revenue, he'd find a way to consolidate these parcels, making them more valuable for grazing leases and other uses.

Wilderness is not always the answer. There are parts of Taos County where wilderness protections are not appropriate. And we caution wilderness advocates from pushing too hard in places where wilderness lacks support.

But in these two areas of northern Taos County, wilderness makes sense. We hope they make it into the final bill so these landscapes can be preserved in perpetuity.

Now that would be priceless.

Hi Shari –

Thanks much!

Can you tell me the basis of the composition of the course catalog? For example, it's curious to me that there are so many personnel and generic classes such as pertaining to retirement or writing skills, but sparse substance courses such as Indian trust law, oil and gas leasing, etc. specifically related to the work of DOI.

Perhaps that is not the purpose of the DOIU, but then again, you have the ANILCA training noted, so clearly there is some specific substance training.

Thanks much,  
Heidi

Hi Heidi,

Thank you for contacting DOI University. You can view our current list of courses on our [online catalog](#). Let me know if you are able to see the list of courses online.

The courses that are scheduled are set. The only reason the schedule would change is if we have to cancel a class due to low enrollment.

Please let me know if I can provide any additional information.

Sincerely,  
Shari Hanscomb

Thanks for the explanation! Do you have contacts in the bureaus that I can reach out to? I've been looking for training on Indian trust law for starters. If you know of anything in that vein or someone who handles a course, I would appreciate the information.

Thanks, Shari!!

Best, Heidi

Hi Heidi,

DOI University is the corporate university for DOI. We handle common-to-all soft-skills training like leadership, supervision, retirement, etc. There are some exceptions, but the bureaus handle most mission-critical training. If you have a specific need, we'd love to talk to you about it to see if we can help provide training for you. Please let me know if you have a training need in mind.

Thanks,  
Shari

Hi Jason – When you have a minute, can we go over a line or two in the chart so that I can better understand how to put the numbers in context and read the chart?

Thank you,  
Nona

**Subject:** 2nd Quarter Budget Execution Report

Good morning!

Attached is the Department's budget execution report for FY 2016 through the end of the 2nd quarter (March 31st).

We will deliver a hard copy of the report as well.

Thanks!

Subject: FY 2016 Second Quarter Budget Execution Data

Attached is the Department's budget execution report for fiscal year 2016 through the end of the 2nd quarter. The discretionary accounts are detailed at the committee support level for the Department's funding through the Interior, Environment and Related Agencies Appropriations Bill. The mandatory accounts are detailed at the account level. The report, as required by Public Law 112-74 (125 STAT. 1045, Section 424), shows the status of balances of appropriations including all committed, uncommitted, and unobligated funds in each program and activity through March 31, 2016.

If you have any questions regarding the Department's budget execution data, please contact me or Ryan Brown in the Office of Budget at 202-208-3078. We would be happy to meet with you to review the data in this report.

**Explanatory Notes:**

- Carryover BA (at start of fiscal year):** Amount carried over at the start of the year from prior years for no-year and multi-year accounts. Direct BA only; does not include reimbursable funding.
- New BA:** Total new budget authority for each activity/subactivity/program, net of the across-the-board rescissions included in the annual appropriations bill. Does not include reimbursable funding.
- Other BA:** Other budget authority changes, including transfers, reprogrammings, recoveries or rescissions that occur after the enactment of the annual appropriation bill. Does not include reimbursable funding.
- Committed:** Official commitments recorded in the accounting system through the end of the prior month. Commitments are typically recorded for planned grants and contracts. Commitments are not recorded for anticipated employee salary and other labor costs. With limited exceptions, the legacy FFS financial system does not record commitments for any purpose.
- Expenditures:** Expenditures recorded through the current fiscal year against obligations of direct budget authority, including prior year obligations.
- Cumulative Unexpended Balances:** Total Budget (all years) less Total Expenditures to date (all years) for the activity; Calculated as Total Unobligated Balance + Undelivered Orders.
- Total Currently Available:** Total Budget less Commitments to date. Because the DOI does not commit for a full year of its salary expenses, quarterly reports will not include estimated future obligations for payroll/benefits/travel for the remainder of the year. At Year End, Commitments that were not obligated are removed from the Accounting System per Treasury requirements.

Account Level Report for All Mandatory Accounts  
 Data Through March 31, 2016  
 (in whole dollars)

**Explanatory Notes:**

**Carryover BA (at start of fiscal year):** Amount carried over at the start of the year from prior years for no-year and multi-year accounts. Direct BA only; does not include reimbursable funding.

**New BA:** Total new budget authority for each activity/subactivity/program, net of the across-the-board rescissions included in the annual appropriations bill. Does not include reimbursable funding.

**Other BA:** Other budget authority changes, including transfers, reprogrammings, recoveries or rescissions that occur after the enactment of the annual appropriation bill. Does not include reimbursable funding.

**Committed:** Official commitments recorded in the accounting system through the end of the prior month. Commitments are typically recorded for planned grants and contracts. Commitments are not recorded for anticipated employee salary and other labor costs. With limited exceptions, the legacy FFS financial system does not record commitments for any purpose.

**Expenditures:** Expenditures recorded through the current fiscal year against obligations of direct budget authority, including prior year obligations.

**Cumulative Unexpended Balances:** Total Budget (all years) less Total Expenditures to date (all years) for the activity; Calculated as Total Unobligated Balance + Undelivered Orders.

**Total Currently Available:** Total Budget less Commitments to date. Because the DOI does not commit for a full year of its salary expenses, quarterly reports will not include estimated future obligations for payroll/benefits/travel for the remainder of the year. At Year End, Commitments that were not obligated are removed from the Accounting System per Treasury requirements.

**STATEMENT OF  
LESLIE WELDON  
DEPUTY CHIEF □ NATIONAL FOREST SYSTEM  
U.S. FOREST SERVICE  
U.S. DEPARTMENT OF AGRICULTURE  
BEFORE THE  
SENATE  
COMMITTEE ON ENERGY AND NATURAL RESOURCES  
SUBCOMMITTEE ON WATER AND POWER  
CONCERNING  
S. □0 □ WESTERN WATER SUPPLY AND PLANNING ENHANCEMENT ACT  
AND  
S. □5 □4 □ BOLTS DITCH ACCESS AND USE ACT**

**MAY 1 □ □ 016**

Mr. Chairman and members of the Subcommittee, thank you for the opportunity to present the views of the U.S. Department of Agriculture (USDA) regarding S. 2902, Western Water Supply and Planning Enhancement Act and S. 2524, Bolts Ditch Access and Use Act. I am Leslie Weldon, Deputy Chief for the National Forest System (NFS), USDA Forest Service.

**S. □0 □ Title II □ Protecting Existing Water Rights**

Water on National Forest System (NFS) lands is important for many reasons, including fish and wildlife habitat, public recreation, and providing a clean and plentiful supply of water for downstream beneficial uses. Today, water from national forests and grasslands contributes to the economic and ecological vitality of rural and urban communities across the nation, and those lands supply more than 60 million Americans with clean drinking water.<sup>1</sup>

The purposes of the NFS were established by Congress in 1897 and were primarily focused on the protection of water and watersheds and securing a continuous supply of timber. National

---

<sup>1</sup> <http://www.fs.fed.us/publications/policy-analysis/water.pdf>.

forests in the arid West typically occupy the very top of critical watersheds, where water is stored in winter snow packs and underground and slowly released through the spring and into the summer. National forests in the East also occupy critical watersheds, preserving water quality for downstream users and moderating floods to protect downstream landowners. Communities, farmers and ranchers, Native American Tribes, and the general public depend on delivery of clean water from the national forests and grasslands. Careful consideration of activities that can have an adverse impact on waters and watersheds on NFS lands is critical to downstream water users and other inhabitants that can be impacted if these watersheds are not protected.

USDA has not had time to fully analyze the effect of this bill. USDA recognizes the fundamental role of States to adjudicate water rights under state law. However, based on an initial review, the bill appears to restrict USDA's ability to protect water resources. USDA maintains its opposition to provisions in any bill that would prohibit the Secretary of Agriculture from regulating uses of NFS lands, or denying authorizations for uses of NFS lands, because these prohibitions have potential to adversely affect water resources on those lands. It is USDA's position that the existing statutory framework protects privately-held water rights in balance with the ability of the Forest Service to protect water resources. An example of the Forest Service work with stakeholders within this framework is the recent publication of final directives for ski areas operating on NFS lands under term special use permits.

For the last 30 years, the Forest Service has required ownership by the United States, either solely or in narrow circumstances jointly with the permit holder, of water rights developed on NFS lands to support operation of ski areas in prior appropriation doctrine states. This policy was motivated by the concern that if water rights used to support ski area operations are severed from a ski area— for example, are sold for other purposes— the Forest Service would lose the ability to offer the area to the public for skiing.

On June 23, 2014, the Forest Service published a notice of a proposed directive in the *Federal Register* to add riparian and prior appropriation doctrine water clauses for ski area permits to the Forest Service's Directive System. The final clauses, published in the *Federal Register* on

December 30, 2015, were the result of extensive public input, including input from the ski industry and a wide range of other water rights holders.

The final directive contains two ski area water clauses, one for eastern States that follow the riparian doctrine for water rights and one for western States that follow the prior appropriation doctrine for water rights. Under a riparian doctrine system, water rights are appurtenant to the land, whereas under a prior appropriation doctrine system, water rights may be severed from the land. Most ski areas on NFS lands are in western states that adhere to the prior appropriation doctrine.

The final directive does not require that ski area water rights be acquired in the name of the United States. Instead, the final directive focuses on assuring sufficiency of water to operate ski areas on NFS lands. This modified approach for ski area permits was determined to be appropriate given the characteristics of ski area water rights and ski areas. Unlike water rights diverted and used on NFS lands by holders of other types of authorizations, ski area water rights may involve long-term capital expenditures. In western States like Colorado and New Mexico, holders of ski area permits may have to purchase senior water rights at considerable expense to meet current requirements for snowmaking to maintain viability. Holders of ski area permits need to show the value of these water rights as business assets, particularly during refinancing or sale of a ski area. The value of these water rights is commensurate with the significant investment in privately owned improvements at ski areas. These investments were recognized by Congress in enactment of the National Forest Ski Area Permit Act, which authorizes permit terms of up to 40 years. 16 U.S.C. 497b(b)(1).

In addition to these financial issues, the land ownership patterns at ski areas—particularly the larger ones—often involve a mix of NFS and private lands inside and outside the ski area permit boundary, which makes it difficult to implement a policy of sole Federal ownership for ski area water rights. Much of the development at ski areas is on private land at the base of the mountains. As a result, water diverted and used on NFS lands in the ski area permit boundary is sometimes used on private land, either inside or outside the permit boundary.

With respect to sufficiency of water for ski area operations, the final directive includes a definition for the phrase, "sufficient quantity of water to operate the ski area," and clarifies when and how the holder must demonstrate sufficiency of water to operate the permitted ski area and new ski area water facilities; addresses availability of Federally owned ski area water rights during the permit term; and addresses availability of holder-owned ski area water rights during the permit term and upon permit revocation or termination.

At this time, ski industry representatives have indicated support for the final directive, and members of Congress have indicated appreciation for the agency's efforts to work collaboratively on this solution. It is USDA's position that additional legislation is not necessary to ensure protection of privately-owned water rights.

USDA has not had adequate time to analyze the effects of the bill on Forest Service groundwater policies. However, since the Forest Service published its proposed groundwater directive for notice and comment on May 6, 2014, the Agency has heard from several States and other parties who are concerned about the intent of and language in the proposal. By the end of the comment period, the Agency had received 260 comments from elected officials, States, Tribes, organizations, and individuals from across the country. The House Natural Resources Committee, as well as several States, asked the Agency not to proceed with the proposed draft and to consult with them before moving forward. The Forest Service has heard these concerns and stopped work on the proposed groundwater directive, and the Agency will not move forward with our original proposal. Rather, we have committed to engaging with States, Tribes, and citizens to fully understand concerns and work collaboratively to address them before any future actions or proposals would result. Should the Forest Service choose to move forward with a new proposed directive in the future, it would only be after engaging with States and making sure that the Agency thoroughly understands their concerns in order to address them. The Forest Service continues to consider improvements to direction to Agency staff on groundwater to maintain its stewardship responsibilities in a consistent, credible, and transparent manner.

**S. 000 Title I Subtitle B Protecting Critical Water Supply Watersheds**

USDA has not had adequate time to analyze the effects of this subtitle but upon initial review opposes NEPA provisions that are beyond the scope of Farm Bill and HFRA authorities. As a general matter, the Forest Service welcomes legislation that incentivizes collaboration and expands the toolset we can use to complete critical work on our nation's forests, without overriding environmental laws.

While we support efforts to provide tools to support improved forest management, capacity constraints due to the present approach to budgeting for wildfire continue to hinder further efforts to improve the health and resiliency of the nation's forests. In fiscal year 1995, the Forest Service spent 16 percent of its budget on firefighting. Today the agency spends more than half of its budget in fire management activities and has seen a corresponding decline in non-fire staffing of 39 percent since 1998. Notwithstanding these challenges, through collaboration, the Forest Service has consistently increased both the number of acres treated annually to improve watershed resilience and timber production—increasing timber harvest by 18 percent since 2008.

The frequency and intensity of wildfire, the rising cost of assets needed to deploy against the spread of wildfire, and the way that fire suppression is paid for constrain the agency's capacity to realize additional gains through efficiencies and partnerships alone. The most important action Congress can make now in advancing the pace and scale of forest restoration is to fix the fire funding problem.

The health of the national forests and the communities we serve are our shared priority. The Forest Service is accelerating restoration and management of the national forests through innovative approaches and increased collaboration, though it is clear that more work needs to be done, and we welcome practical legislation that provides for expedient and responsible efficiencies in the execution of that work.

USDA defers to Department of Interior on provisions that most directly affect their agencies.

**S. 54 Bolts Ditch Access and Use Act**

S. 2524 seeks to resolve issues associated with the use and maintenance of Bolts Ditch near the Town of Minturn, Colorado. The headgate and approximately 450 lineal feet of the ditch are located within the Holy Cross Wilderness on the White River National Forest. The United States opposed two water rights application cases associated with this ditch in 2006 and 2007.

Subsequently, the United States and the applicants reached a stipulated agreement and settlement in both cases; where it was agreed that the point of diversion would be removed from the Holy Cross Wilderness unless (1) the point of diversion in the Holy Cross Wilderness is specifically authorized by the President, (2) the Holy Cross Wilderness boundary is altered to exclude the point of diversion from the Wilderness area, or (3) the point of diversion is confirmed by Congress to be specifically included as a part of the authorization of the Homestake Reservoir Project within the Holy Cross Wilderness Area.

S. 2524 would direct the Secretary of Agriculture to issue a special use permit to the Town of Minturn authorizing non-motorized access to use and perform routine maintenance on the Bolts Ditch headgate and 450 lineal feet of Bolts Ditch in accordance with US Forest Service wilderness regulation. This bill does not authorize new construction or reconstruction.

S. 2524 has the support of Eagle County, the Colorado River District, and local and national wilderness advocacy organizations.

The Department does not oppose S. 2524.

This concludes my remarks. I would be happy to answer any questions. Thank you for the opportunity to testify.

**Laura Ziemer**  
*Senior Counsel and Water Policy Advisor*

Testimony of Laura Ziemer  
Senior Counsel and Water Policy Advisor  
Trout Unlimited

Before the Subcommittee on Water and Power – Committee on Energy and Natural Resources  
United States Senate

Legislative Hearing on Several Bills, Including S. 2533, the California Long-Term Provisions for Water Supply and Short-Term Provisions for Emergency Drought Relief Act; and S. 2902, the Western Water Supply and Planning Enhancement Act of 2016

May 17, 2016

Good afternoon Members of the Subcommittee.

Thank you for the invitation to testify today on behalf of Trout Unlimited (TU) and its 150,000 members nationwide. I have had the privilege to work for many years with TU's volunteers to restore local streams and engage young people in TU's efforts to conserve, protect and restore our Nation's watersheds. I live and work in Montana, and have experienced first-hand the devastation of prolonged drought in an already-arid land.

Westerners experience water scarcity at a number of different levels. Extended drought creates problems for individual rancher and farm operations struggling to find enough river flows to irrigate crops, and for the fish that find that their habitats have heated up, shrunk, or just plain dried up. Swings and cycles in regional weather patterns create basin-level scarcity that affects not only irrigation districts but also municipalities worried about meeting water demands.

#### **I. Collaborative, Watershed Solutions: The Path Forward**

The seriousness and scale of these problems is why I've dedicated the last 18 years of my professional life to finding collaborative solutions to water scarcity in the West. I've pioneered collaborative approaches to creating new water supplies with Montana ranchers, created working architecture for drought response plans that operate at the basin scale, and assembled diverse coalitions of interests to come together around innovative changes to water management across multiple, large river basins. Although these approaches vary in scale and focus, the one thing they have in common is building the trust to apply creativity to difficult, long-standing problems born of too many demands and too little water in arid lands.

My message is simple: on the ground throughout the West partners are coming together to find innovative solutions to water scarcity challenges at a variety of scales, and as Congress considers legislation, we hope you consider finding ways to replicate and reward locally driven, collaborative, watershed-scale solutions. Here are four of their stories:

#### **A. Yakima River, Washington**

The West is desperately seeking ways to balance its need to find more water for agriculture and people, with its other great need to conserve valuable and imperiled fisheries, and growing recreation demands. A diverse group of stakeholders in the Yakima Basin in central Washington have found a path forward.

The Yakima Plan is a balanced package of actions that will restore hundreds of thousands of salmon and steelhead to the basin, improve water quality and quantity, and support a healthy agricultural and recreational economy. The plan was agreed upon by a diverse coalition of conservation groups, irrigators, farmers, sportsmen and women, local, state, and federal governments and the Confederated Tribes and Bands of the Yakama Nation. Similarly, these partners recognize that the resources needed to cover the costs of the plan must come from a variety of sources. Significantly, the State of Washington has provided \$161 million to date towards implementation.

Some portions of the Yakima Plan need new Federal authorization. Thanks to the bipartisan efforts of Senator Cantwell, Senator Murkowski, and many Members of this Subcommittee, the Yakima bill, S. 1694, recently passed the full Senate as part of the broader energy bill. In addition, Representative Reichert and Representative Newhouse introduced H.R. 4686, a companion measure in the House. The Yakima Plan has had this success in large part because it is built as a mosaic of approaches to drought resilience: water infrastructure improvements, new water storage, groundwater recharge, instream flow restoration, fish passage, headwater habitat restoration and protection, and flexibility in water management across the basin, from reservoir operations to temporary water right transfers. Collaborators in the Yakima Plan achieve results for their own interests that they would not standing alone.

The effort to create an intact watershed process that led to the Yakima Plan already spurred additional creative solutions to acute challenges in the basin. For example, during last summer's drought, partnerships built through the plan resulted in rapid action to provide flows in streams that would have otherwise run dry, securing important habitat for salmon and steelhead. Important not only to those who live and work in the Yakima basin, the Yakima Plan also provides a transferable model for water scarcity issues across the West; working collaboratively at a watershed level to craft and implement long-term solutions.

### **B. Sun River, Montana**

In Montana's upper Missouri River basin on the Sun River, TU, the Fort Shaw Irrigation District, and members of the Sun River Watershed Group worked to create multi-sector benefits. They are an example of a public-private partnership at its best. The Bureau of Reclamation's WaterSMART program provided significant irrigation infrastructure funding in 2012 and 2013, matched by state and local dollars, contributions from the Irrigation District, and private contributions from the Coca-Cola Company. The Natural Resources Conservation Service (NRCS) contributed to the success of the project with new on-ranch center pivots that required less water to be delivered, to match the more efficient delivery of water through the irrigation district. The Coca-Cola Company's contributions were essential to securing the flow restoration benefits to the chronically-dewatered Sun River from the irrigation infrastructure upgrades within Fort Shaw Irrigation District. Two-thousand feet of lined canal, 2,310 feet of PVC pipe, and a new bypass canal created the opportunity to keep more water in the Sun River's wild trout fishery. The Sun River's wild trout have responded by more than doubling their population over the last three years.

### **C. Upper Colorado River's System Conservation Pilot Program (SCPP)**

Over the past eight years in Wyoming, TU has developed partnerships with ranchers and local and state resource agencies to not only improve trout streams, but also benefit agricultural operations and rural communities. We have found that by fixing aging irrigation infrastructure and improving water delivery for agricultural operations we can also improve trout streams that flow across private ranch lands. The quiet success of trust and friendships forged through restoration partnerships is increasing Wyoming's drought resilience, one stream at a time. The investment in private ranch land habitat is vital to reconnecting fragmented migratory corridors and allowing trout to fulfill their migratory patterns that build healthier, more resilient populations. This work is successful because it is pragmatic, voluntary, and non-regulatory. It's designed to benefit both people and fish.

In 2015, the Bureau of Reclamation and four municipal water providers in the Colorado River Basin announced the System Conservation Pilot Program (SCPP) to begin developing tools for responding to long-term drought conditions. The purposes of the SCPP for the Upper Basin included testing voluntary, demand-management measures that could ultimately be used to help maintain water in Lake Powell above the minimum levels needed to meet compliance with Colorado River compacts and to maintain hydropower generation at the reservoir.

In the Upper Basin, TU has worked closely with producers, state agencies and the Upper Colorado River Commission to successfully implement the SCPP. In the first round of the program, TU worked with producers to develop six applications, most focused on split-season leasing. All six proposals were fully funded and the total volume of water conserved was 2,008.14 acre feet.

In the second round, TU worked with Wyoming ranchers to offer more than 10,000 acre-feet of water conservation during the 2016 irrigation season, and developed additional applications in partnership with landowners in Colorado and Utah. In all, 15 SCPP applications that TU helped facilitate were approved in round two.

Trout Unlimited supports the SCPP because it is a voluntary, market-based tool that landowners can use to offset economic and environmental impacts of ongoing water shortages in the Colorado River. Water leased under this program remains tied to the land and keeps operations whole, which has great benefits for both agriculture and coldwater fisheries. For the first time in Wyoming, landowners participated and benefitted from a program that attached a value to the non-diversion of a water right during low flow conditions, and tributaries in the Upper Green realized improved streamflows for coldwater fish. Tributaries that historically suffered from dewatering or low flows maintained conditions suitable for trout throughout the entire summer.

#### **D. Klamath River, Oregon and California**

Trout Unlimited's work and partnership in California's and Oregon's Klamath River Basin provides another prime example of ground-up, collaborative and creative solutions to water management in the West. And for purposes of today's hearing, where we are asking ourselves "what more can Congress do to promote drought resiliency in the West?" the story of the Klamath not only provides a critical example of success; but also a valuable precautionary tale.

Residents and policy-makers struggled for decades to reconcile the water needs of agriculture, tribes, communities, and fish and wildlife in the basin. Years of negotiations produced three hard-won, bipartisan agreements between farmers and ranchers, tribes, a major utility company, the federal government and the States of California and Oregon to better share and manage water in the Klamath Basin. The three landmark agreements would provide water security for all these parties, and collectively provide a comprehensive water solution for the third-most productive fishery for salmon and steelhead on the West Coast.

Congressional action was required to move forward and, although this Committee approved the bill, the legislation did not pass before one of the agreements expired. As a result, the whole package almost fell apart. We feared that everyone would go back to their corners and restart the water wars. But so far, the parties have remained remarkably united and determined to find a common path forward. We have a long way to go, but people are beginning to take steps to move forward again.

A great, recent step came in the form of an accord to amend the Klamath Hydroelectric Settlement Agreement to allow the states of California and Oregon to work with PacifiCorp to remove four dams on the Klamath River using non-federal funds through normal hydropower licensing process, eliminating the

need for Congress to resolve that issue. The parties also recommitted themselves to improving water supply and power reliability for irrigation. Then Senators Wyden and Merkley co-sponsored a successful amendment to the Energy Bill in April 2016, and the Senate voted to help with Klamath irrigation infrastructure and water supplies for wildlife refuges.

### **E. Lessons Learned**

What TU has learned in over a decade and a half of deeply engaging in watershed efforts is that even the most entrenched, complex water-scarcity conflicts can find solutions when local interests come together to think creatively and collaboratively. None of these success stories came about easily or quickly. It is slow, patient, and difficult work. It requires cultivating the support of state and federal agencies. It requires finding a way to balance the length of the three legs on the drought-resilience stool: improving reliability of irrigation water; securing water for municipalities; and, improving watershed health. Congress can help by supporting basin-wide collaborative groups and working with local stakeholders where new authorizations may be needed; but ultimately the solutions lie elsewhere, with leadership from within a basin from the people working and living there to uncover their mutual benefits that outweigh their points of conflict in order to balance the three legs of the stool. .

It is through this lens of our deeply-held experience with watershed-scale solutions that TU offers the following comments on S. 2533 and S. 2902. We highlight positive concepts and identifying areas of concern for your consideration as the Subcommittee continues its work on this important and complex topic of building drought resiliency in the West.

## **II. Positive Concepts in S. 2533, S. 2902 and Senator Cantwell's White Paper**

### **A. Senator Cantwell's White Paper: *A National Policy Framework to Address Drought and Water Security in the United States* (March 22, 2016)**

TU's experience in developing an intact watershed process to grapple with water scarcity issues across a range of scales is reflected in the architecture of Senator Cantwell's Drought and Water Security White Paper. In it are the key federal elements to support successful efforts to create durable conservation and water security outcomes: support for collaborative, watershed-scale solutions; bringing financing to these solutions based on streamlined federal funding and public-private partnerships; using and advancing the best science, technology, and tools applied to water management; and recognizing that these watershed-scale, locally-driven solutions require the development of a portfolio of projects addressing watershed and flow restoration, reliability of irrigation water supply, and security of municipal water supply. As these concepts are expressed through legislation, TU looks forward to supporting them with our track-record of how they provide a path forward in even difficult and controversial water-scarcity conflicts.

### **B. S. 2533, the California Long-Term Provisions for Water Supply and Short-Term Provisions for Emergency Drought Relief Act ("S. 2533")**

TU supports WaterSMART as an important part of bringing federal funding to watershed-based solutions to water scarcity, as illustrated by TU's work in the Sun River basin in Montana. TU appreciates Senator Feinstein's leadership in highlighting how WaterSMART can provide key incentives to creating benefits across the three legs of the drought-resilience stool through projects that provide multiple benefits. Section 101 of S. 2533 adds new authority for WaterSMART projects that are water-management improvement projects. Section 101 directs a strong prioritization for funding projects that use integrated water management on a watershed scale (including water re-use or water recycling as an example), while simultaneously creating benefits to fisheries and fresh-water ecosystems and benefits to agricultural and urban water users. This prioritization of WaterSMART water-management projects that create multiple,

simultaneous benefits across the ecological, agricultural, and municipal sectors is an important part of the path forward in solving water scarcity problems.

As the Committee considers new authorities, we encourage you to make sure that they complement existing federal programs thereby ensuring streamlined funding so that each dollar can be stretched as far as possible.

TU also supports section 124 that authorizes the EPA to continue to carry out the voluntary program known as the “WaterSense Program” to identify and promote water-efficient products for consumers, similar to the popular Energy Star program.

Section 508, which requires the Secretary of the Interior to establish and maintain an open water data system, is an important component of successful watershed-based planning efforts. Accessible and accurate information about water use and river and stream flows is essential to improving water management at the basin-scale. Finally, we appreciate Senator Feinstein’s efforts to promote habitat restoration and water recycling embedded as reoccurring themes throughout S. 2533.

### **C. S. 2902, the Western Water Supply and Planning Enhancement Act of 2016 (“S. 2902”).**

TU supports the concepts behind section 101 titled “Reservoir Operation Improvement.” It is our understanding that similar language recently passed the Senate as part of S. 2012, the “Energy Policy Modernization Act of 2016” (the Energy bill). Moreover, a comparable provision was included in the Water Resources Development Act of 2016, a bill that was recently reported by the Senate Committee on Environment and Public Works. Section 101 focuses on the fact that many water control manuals, which include the operations rules for reservoirs, are out of date and provides authority for both the Bureau of Reclamation and the Army Corps of Engineers to carry out pilot projects to implement revisions of water operations manuals based on the best available science. We support efforts to direct the agencies to begin the process of updating and revising water operations manuals.

We also support Title I, Subtitle C, titled, “the Reclamation Transparency Act.” A similar provision was included in S. 2012, the Energy bill, that recently passed the Senate. This subtitle requires the Bureau of Reclamation to assess the maintenance needs of its facilities, develop a ranking system to prioritize the rehabilitation needs of facilities that it operates, and work with nonfederal partners that have taken over the operation of other facilities to develop similar systems for those facilities that need rehabilitation.

Much of Reclamation’s infrastructure was constructed more than 50 years ago and maintaining aging infrastructure remains an ongoing challenge for the agency. We appreciate the direction provided in this subtitle to provide more detailed information to Congress and the public on Reclamation’s ongoing activities in this area.

## **III. Areas of Concern in S. 2902 and S. 2533**

### **A. Title II of S. 2902**

Trout Unlimited opposes Title II of S. 2902, the “Water Rights Protection Act,” which contains similar language included in S. 982. Simply put, the language of this title will jeopardize the ability of federal resource agencies to condition federal permits and apply for state water rights needed to protect valuable fisheries.

A key part of drought resiliency is protecting headwater flows on federal lands. For years, TU has worked with the Forest Service and other stakeholders to protect instream flows on National Forests. Federal land managers have an important role to play in protecting streams—under the authority of the Property Clause of the Constitution, Section 505 of the Federal Land Policy and Management Act,

provisions of the Federal Power Act, and other authorities—and they also have a responsibility to work with their stakeholders and the states to do it right. Provisions of this title would harm the ability of federal land managers to use these authorities to protect the nation’s headwaters on federal lands.

In June 2015, Reclamation testified that S. 982 “threatens the Federal Government’s longstanding authority to manage federal lands and associated water resources, uphold proprietary rights for the benefit of Indian tribes, and ensure the proper management of public lands and resources.” Moreover, Reclamation stated that “[t]he legislation is overly broad, drafted in ambiguous terms, and likely to have numerous unintended consequences that would have adverse effects on existing law, tribal water rights, and voluntary agreements.”

#### **B. Subtitle D and Subtitle E of Title I - S. 2902**

TU does not support Subtitle D and Subtitle E of Title I because they do not work toward broad-based, collaborative solutions to water scarcity. As described in our experience in the Yakima and Klamath basins, new storage is best planned and carried out in a multi-stakeholder, basin-wide process that considers a variety of alternatives.

Rather than encouraging cooperative stakeholder processes or providing funding to catalyze cooperative solutions, Subtitle D deems the Bureau of Reclamation to be the lead agency for all environmental reviews and permits notwithstanding existing roles of agencies such as the Fish and Wildlife Service in carrying out laws including the Fish and Wildlife Coordination Act. This subtitle also requires specified deadlines to be met for consulting with cooperating agencies, completing environmental reviews, and determining project schedules. Reclamation has testified to the fact that there have been no examples of any Reclamation or USDA-sited surface water storage projects that have been denied construction because of delays associated with project reviews or shortcomings in communication among Reclamation, USDA, or any other state or federal partners.

Subtitle E requires that Reclamation complete project studies in three years at a cost of not more than \$3 million, and imposes financial penalties for agencies that fail to meet specified deadlines. As mentioned above, Reclamation has testified that there are no examples of any Reclamation surface water storage projects that have been denied construction because of delays associated with project review or permitting. Moreover, in October 2015, Deputy Secretary of the Interior Michael Connor testified that “[c]onstraining or circumventing project environmental reviews and permits impedes the opportunity to consider alternatives with potential impacts on communities and the environment which may be less adverse.”

#### **C. Section 112 of S. 2533.**

Section 112 grants West-wide authority to construct those storage projects whose feasibility studies are completed within the next five years, or by 2021. While section 112 is primarily aimed at new California storage, TU opposes the broad language of section 112 for three reasons. First, TU firmly believes that new storage should be evaluated and carried out in a multi-stakeholder, basin-wide process that considers a variety of alternatives. The broad authority in section 112 could undermine such collaborative processes. Second, TU strongly opposes raising Shasta Dam because it would inundate even more of the McCloud, Sacramento, and Pit Rivers. TU members value these rivers immensely and oppose any additional harm to them. Section 112 would make it easier to raise Shasta Dam. Finally, although the scope of section 112 is currently limited to those storage projects that pass through feasibility studies within the next five years, this time limitation could be extended to expand authorization for new storage to the detriment of collaborative, watershed-driven solutions.

**D. Title III, S. 2533.**

Title III of S. 2533 includes a number of provisions instructing the Secretary to provide the “maximum quantity of water supplies” practicable to Central Valley Project agricultural, municipal, and industrial contractors, water service or repayment contractors. In October 2015, Deputy Secretary of the Interior Michael Connor testified that, “It is already Reclamation’s practice, working closely with other federal and state agencies, as well as stakeholders, to provide maximum contract quantities when hydrology and operational constraints allow.” He went on to state that “there are significant potential legal uncertainties associated with a ‘maximum quantity of water supplies practicable’ standard written into law which could readily generate litigation for the state and federal governments.”

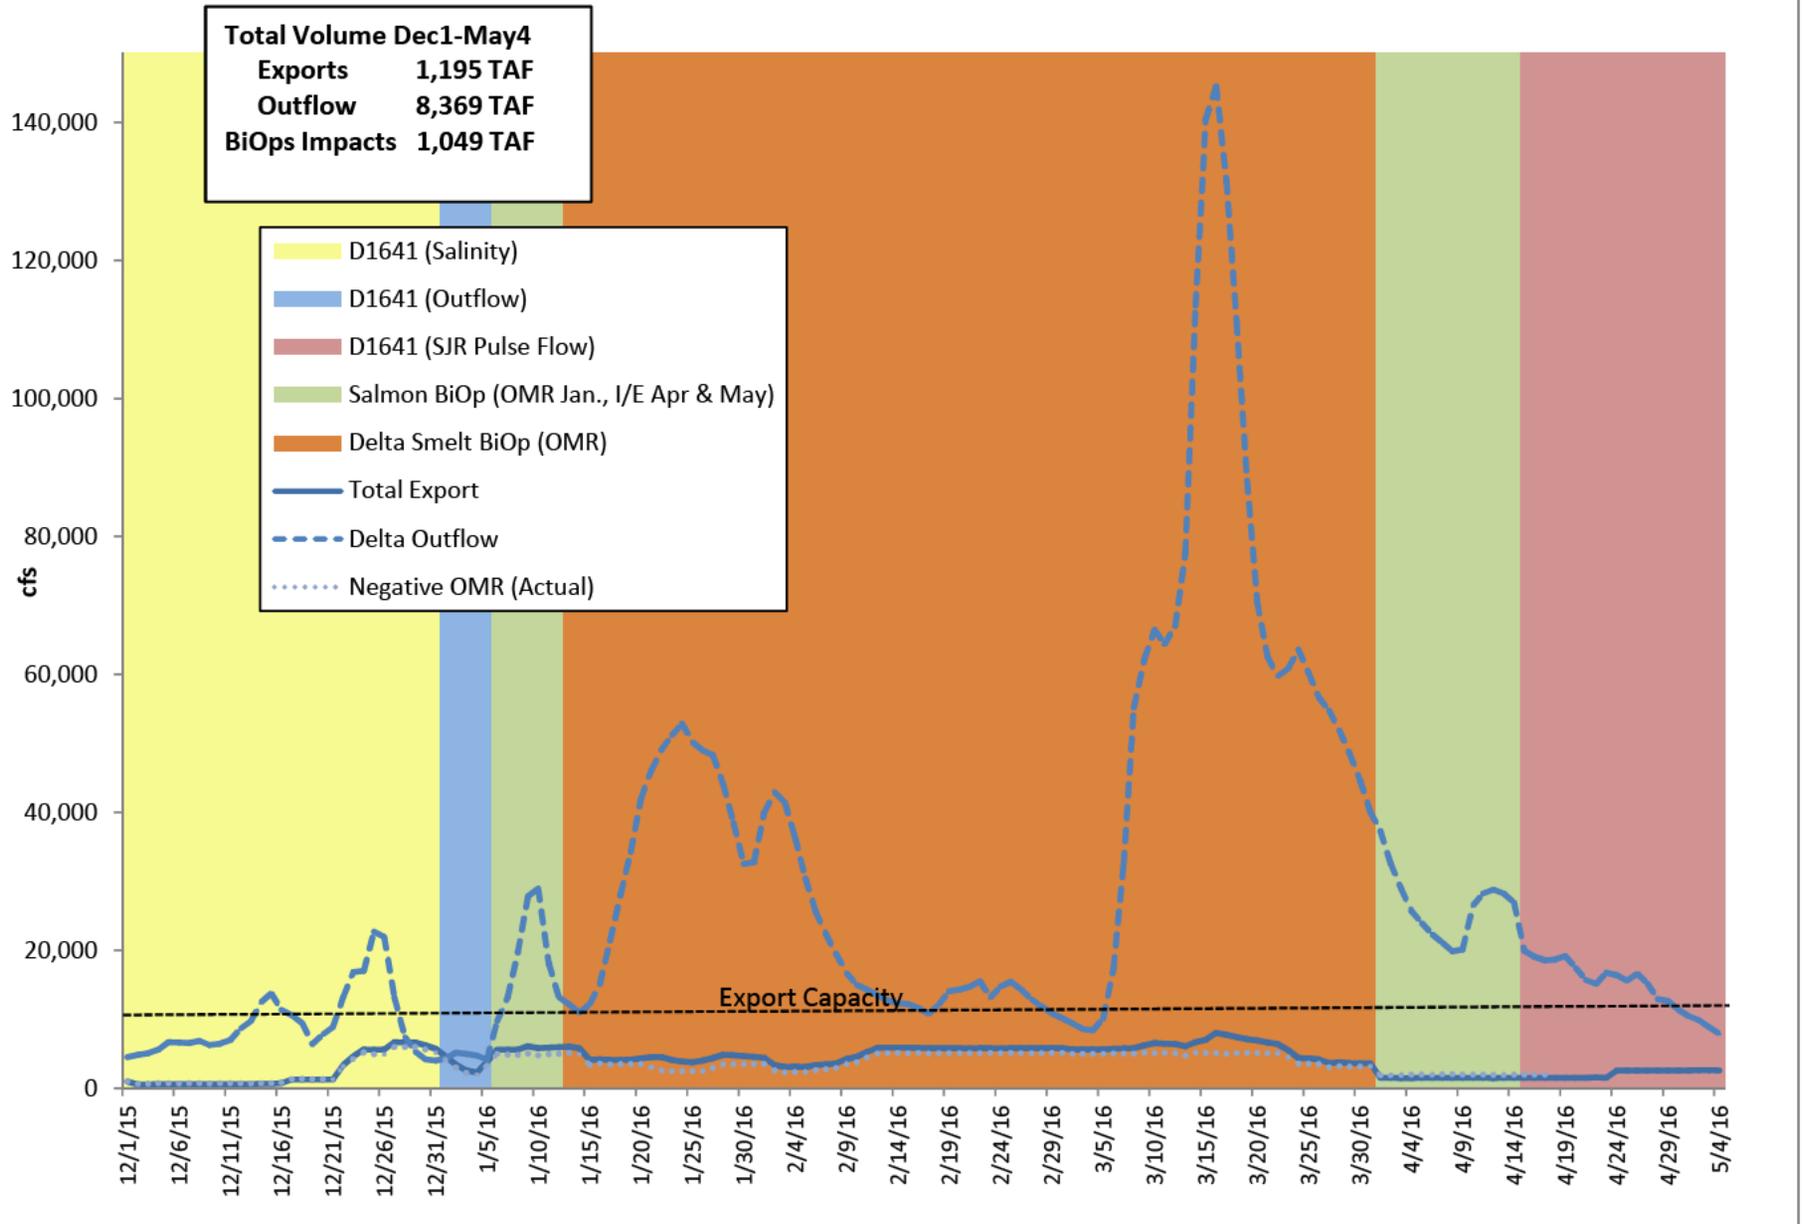

TU is concerned that this title could interfere with Reclamation’s ability to manage the Central Valley Project to meet the needs of other water users and communities that depend on fisheries. Legislatively designating some sets of water users as higher priorities than others seems likely to perpetuate, rather than move past, water wars and to fuel more litigation and conflict. While the debate centers on California, many sport and commercial fishing businesses along the length of the Pacific coast are concerned that actions taken in the Central Valley may adversely impact fisheries in their States. While TU appreciates Senator Feinstein’s attempt to develop legislative answers to hotly-contested issues, we believe solutions for California’s Central Valley will have to come from the people who live and work in the region, working with creativity and collaboration to find solutions at points of conflict.

**IV. Conclusion**

Trout Unlimited is deeply invested in working with partners, regulators, and policymakers to identify and implement constructive and collaborative solutions to mitigate the impacts of drought on fisheries, economies, and communities throughout the West. As such, we recommend that Congress should encourage cooperative stakeholder processes and provide adequate funding for cost-effective programs that catalyze cooperative solutions, such as key Farm Bill conservation programs, and the Bureau of Reclamation’s competitive grant and basin study programs.

TU appreciates the attention given by this Subcommittee to this critical topic and I thank you for the opportunity to testify today. I am pleased to answer any questions you have at this time.

## 2016 Export Constraints

**Testimony of Thomas Buschatzke  
Director  
Arizona Department of Water Resources**

**COMMITTEE ON ENERGY AND NATURAL RESOURCES  
SUBCOMMITTEE ON WATER AND POWER  
United States Senate  
May 17, 2016**

**Chairman Lee, Ranking Member Hirono and Members of the Subcommittee:**

**Introduction**

My name is Tom Buschatzke and I am the Director of the Arizona Department of Water Resources. Thank you for providing me an opportunity to present testimony on behalf of the State of Arizona regarding S. 2902, the Western Water Supply and Planning Enhancement Act. The on-going drought in the western United States demonstrates the need for Congressional action that will allow states to: (1) better plan and manage their existing water resources in a manner that creates greater certainty for water users; (2) leverage existing infrastructure to generate more water supplies; (3) manage watersheds to increase their yield; and (4) protect those watersheds from being degraded by catastrophic fire. If enacted S. 2902 will provide new tools to help achieve those four goals.

**Background**

The State of Arizona and its water users have a long history of developing water supplies and the necessary infrastructure to deploy those supplies to maximize their benefit to the citizens and businesses in our State. Sound management of those supplies has been a primary focus for our State; the arid nature of Arizona is a constant reminder of the value of every drop of water available to us. Arizona is fortunate to have a diverse portfolio of water supplies. Our State currently uses about seven million Acre-feet of water per year statewide which comes from the following sources: the Colorado River-40 percent; Groundwater-40 percent; in state rivers-17 percent; and reclaimed water reuse- 3 percent.

Arizona has a long history of collaboration and innovation in managing our water supplies. We have participated in interstate and international agreements to protect our Colorado River water supplies, extending from the Colorado River Compact of 1922 to recent agreements with Mexico through Minute 319. Arizona has created institutions over many decades that provide certainty for our water users. Some of those success stories include the Salt River Project, the Gila Project, the Wellton-Mohawk Irrigation and Drainage District, the Yuma County Water Users' Association, the Yuma Mesa Irrigation District, the North Gila Valley Irrigation and Drainage District, the Yuma Auxiliary Project-Unit B, the Central Arizona Project, the 1980 Groundwater Management Act, the Underground Storage and Recovery Act and the Arizona Water Banking Authority. Arizona and its water users have taken proactive measures and made hard choices over many decades to ensure a high quality of life for our

citizens and a vibrant economy and will continue to do so in the face of the on-going drought in the West.

Despite the actions and choices made by Arizona, uncertainty remains and the vulnerability of our water supplies to drought is a matter of constant attention among water providers, water users and water managers around the state. Flexibility to manage water supplies and adaptation to drought conditions are part of Arizona's history and will continue to be a key management strategy now and in the future.

In keeping with the long-standing practice of Arizonans stepping up to work together to address challenges to water sustainability, the provisions of S. 2902 that I discuss in my testimony reflect a consensus list of Arizona's federal water priorities. They are the result of comprehensive in-state discussions among a broad group of water users. That process proceeded from a meeting on April 1, 2015 between Governor Ducey, Senator McCain and Senator Flake to discuss the direction that the State would take with its federal delegation on water issues.

### **Challenges Imposed by the On-Going Drought**

Arizona continues to experience drought and 100 percent of the State falls within "Abnormally Dry" to "Severe Drought" conditions. The Salt and Verde River watersheds are in the sixth consecutive year of drought, which has reduced the surface water supplies utilized in the Phoenix metropolitan area by municipal water providers and agriculture. That has resulted in an increase in groundwater pumping to backfill the reduction in those surface water supplies. The Salt and Verde River watersheds are also at increased risk to wildfires, as is the Gila River watershed, the other main source of Arizona's in-state river supplies. Allocations of surface water from the Gila River have also been reduced as a result of the drought. To address drought conditions and the impact on our water supplies and water users, the Governor's Drought Interagency Coordinating Group has recommended that a Drought Declaration be adopted by Governor Ducey. That Declaration will allow aid to flow to farmers and ranchers from the United States Department of Agriculture for loss of production and it also raises public awareness regarding drought conditions affecting the State.

The West-wide drought presents some unique challenges for all Colorado River users and the State of Arizona. The Colorado River watershed is in the 16<sup>th</sup> year of below average runoff due to drought. Arizona stands to lose 320,000 Acre-feet of its 2.8 Million Acre-feet Colorado River allocation when a Tier 1 shortage is triggered by Secretarial order pursuant to the 2007 Colorado River Interim Guidelines for Lower Basin Shortages and The Coordinated Operations for Lake Powell and Lake Mead. Under the Interim Guidelines a projection of the elevation of Lake Mead is made in mid-August for the first day of the next calendar year. If that projection were to show Lake Mead falling below elevation 1,075 feet, a Tier 1 Shortage is then put into place starting on January 1 of that year. Today, Lake Mead is at

elevation 1,075.19<sup>1</sup> feet. The probability of a shortage declaration in the Lower Basin of the Colorado River has been steadily increasing during the past few years. The probability of a shortage in calendar year 2017 is 10 percent and that increases to 56 percent<sup>2</sup> for 2017. It is important to note that a Tier 1 shortage triggers reductions for Arizona, Nevada and the Republic of Mexico but not for California. Arizona shoulders the burden of the shortage among the three states and Mexico, about 84 percent of the total.

Deeper shortages will occur if Lake Mead’s elevation continues to decline. Between elevation 1,050 feet and 1,025 feet a Tier 2 shortage results in Arizona suffering a reduction of 400,000 Acre-feet and at elevation 1,025 feet Arizona loses 480,000 Acre-feet, a Tier 3 shortage. The probabilities of Tier 2 and 3 occurring have also been increasing as the drought continues. If Lake Mead’s elevation continues to drop and falls below elevation 1,025 feet, the volume of shortage to Arizona is unknown at this time. This uncertainty creates a difficult task for Arizona: how to plan for a shortage that is unquantified but will undoubtedly be greater than 480,000 Acre-feet. As Lake Mead approaches elevation 1,000 feet, the near-term limit for diversions by Las Vegas, or continues to decline to dead pool at elevation 895 feet, draconian shortages are likely to occur. Reductions in water supply are not the only impacts associated with declining levels at Lake Mead. As Lake Mead elevations decline, the hydropower generating capacity is reduced at Hoover Dam. Hydropower generation at Hoover Dam serves electrical customers in California, Arizona, and Nevada with enough energy to serve 1.3 million people each year. Hoover Dam currently generates about 3,700,000 megawatt hours of electricity each year. The following table illustrates the magnitude of reduction at Hoover Dam:

Lake Mead Elevation	Hoover Dam Capacity <sup>3</sup>	Percentage Reduction
1,212 (Jan. 2000 – start of drought)	~ 2,074 MW	
1,076 (July 2015 elevation)	~ 1,551 MW	25%
1,050	~ 1,371 MW	33%
1,000	~ 1,046 MW	50%

<sup>3</sup> USBR information August 2013. USBR reports that projected generation capacity is uncertain below elevation 1050 due to unknown impacts of vibration and cavitation on performance at low reservoir elevations.

If a shortage were declared, Hoover Dam could lose as much as 21% of hydropower production from 2015 production levels – a loss equivalent to the electricity needs of 280,000 people. The following table illustrates those reductions:

Lake Mead Elevation	Hoover Dam Generation	Percent Reduction
Current (2015)	3,700,000 MWH	-
1,075 (1 <sup>st</sup> Level Shortage)	3,445,000 MWH	6%
1,050 (2 <sup>nd</sup> Level Shortage)	3,193,000 MWH	13%
1,025 (3 <sup>rd</sup> Level Shortage)	2,915,000 MWH	21%

<sup>1</sup> Based on USBR Lower Colorado River Region's daily reservoir conditions for May 12, 2016.

<sup>2</sup> Based on USBR Lower Colorado River Region's Colorado River April 2016 24 Month Study and resulting projections of Lake Mead elevations.

<sup>3</sup> USBR information August 2013. USBR reports that projected generation capacity is uncertain below elevation 1050 due to unknown impacts of vibration and cavitation on performance at low reservoir elevations.

Impacts on power generation will also occur as Lake Powell's elevations decline. Glen Canyon Dam hydropower production is eliminated if Lake Powell falls below elevation 3,490 feet, and United States Bureau of Reclamation has indicated that impacts to power production could occur at elevation 3,525 feet.

## **DISCUSSION OF S. 2902**

### **SECTION 101**

This Section directs re-evaluation of flood control operations at US Army Corps of Engineers or US Bureau of Reclamation dams to enhance water storage. In Arizona, an opportunity exists at Modified Roosevelt Dam, a facility owned by the Bureau of Reclamation and operated by a local entity, the Salt River Project. The dam was originally completed in 1911. Modifications to the dam were completed in 1996 and 556,000 acre-feet of dedicated flood control space was added along with new water conservation space and safety of dams space (1,223,000 Acre-feet). A Water Control Manual governs the operation of the flood control space behind the dam. Flood control operations are exceedingly safe and conservative. The safety of dams storage space above the flood control space provides protection for the Probable Maximum Flood. There is an opportunity to use the flood control space, moreover, for "temporary storage" when the conservation storage space fills and water remains in the flood control space at the end of the runoff season, typically in April. The water conserved as temporary storage can then be put to beneficial use prior to the next storm season in late fall or early winter. Preliminary modelling by the Salt River Project estimates that an average of about 70,000 Acre-feet per year might be generated under this concept. The model also projects that the yield is highly variable, ranging between zero and 300,000 acre-feet in a year. In fact, water would have been available in 2005, 2008 and 2010 if temporary storage in flood control space has been an option.

The median yield of the Salt River Project system between 1981-2010 is 680,000 Acre-feet and adding an average of 70,000 Acre-feet per year, a 10 percent increase, would be a significant addition to the water supplies delivered by the Salt River Project.

In 2008 Salt River Project representatives and local municipal water providers who receive water from the Salt River Project reached out to the Army Corps of Engineers to discuss this concept. Many hurdles were identified and the effort was set aside for future consideration. Section 101 provides clarity and potentially streamlines the process to creating temporary storage at Modified Roosevelt Dam and the State of Arizona supports the concept.

### **SECTION 103**

This Section requires the National Academy of Sciences conduct a study on the efficiency of controlling tamarisk to increase water supplies and improve riparian habitats and for the Bureau of Reclamation to create a feasible plan that builds upon the 2012 Colorado River Basin Supply and Demand Study to implement tamarisk control. The Colorado River Basin Water Supply and Demand Study contained the following statement: "Estimates of water savings by removal of tamarisk and replacement by other species range from zero and up to 1.5 are-feet (af) per acre (Nagler et al., 2009). A reasonable estimate

for planning purposes is 0.54 af per acre (Tamarisk Coalition, 2009).” The Basin Study also made clear that additional information is necessary to understand the water savings potential of removing non-native vegetation such as tamarisk from the Colorado River watershed in a cost-effective and environmentally responsible manner.

In the Lower Basin more than 600,000 Acre-feet of water is lost annually due to evaporation, transmission losses and consumption by non-native vegetation.

Cost effective methods to control tamarisk that create additional flow in the Colorado River system can help to alleviate those losses, reduce impacts of the drought, and can add resiliency to the system. That outcome is consistent with the goals of the State of Arizona and I support these provisions.

#### **SECTION 104**

This Section amends Title II of the Energy and Water Development and Related Agencies Appropriations Act, 2015 (division D of Public Law 113-235) by replacing section 206 (43 U. S.C. 620 note; 128 Stat. 2312). It effectively provides authority for the Secretary of the Interior to fund or participate in projects to conserve water for the benefit of the Colorado River system. It also authorizes an appropriation of \$10 million each fiscal year 2017 through 2027.

The provisions of this Section build upon the collaborative efforts of the Colorado River Basin States and the Department of the Interior to proactively manage the Colorado River system to improve its health. A major advancement occurred with the approval of the 2007 Colorado River Interim Guidelines for Lower Basin Shortages and The Coordinated Operations for Lake Powell and Lake Mead. That agreement created flexibility for water users in Arizona, Nevada and California to create “Intentionally Created Surplus” by conserving water in one year, storing it in Lake Mead and recovering it for use in a future year. Carefully crafted conditions were attached to this program. One result of this new flexibility was that critical Lake Mead elevations could be protected through the conservation of this water in the Lake. The Basin States continued to seek ways to protect reservoir levels and the health of the Colorado River system.

In July 2014 a pilot system conservation program was created by the Bureau of Reclamation, the Central Arizona Water Conservation District (aka the Central Arizona Project), the Metropolitan Water District of Southern California, the Southern Nevada Water Authority and Denver Water. This program is funded by those partners. In the Lower Basin the program looked to conserve water to benefit Lake Mead and in the Upper Basin to benefit Lake Powell. Unlike Intentionally Created Surplus, this conserved water was dedicated to the system and is not available for future recovery. It was another step forward in management of the River.

That program was followed in December 2014 by the Memorandum of Understanding (MOU) among the United States of America, through the Department of the Interior, Bureau of Reclamation, the

Central Arizona Water Conservation District, the Metropolitan Water District of Southern California, the Southern Nevada Water Authority, the Arizona Department of Water Resources, the Colorado River Board of California, and the Colorado River Commission of Nevada for Pilot Drought Response Actions. That MOU was a best efforts agreement that collectively targets a volume of 740,000 Acre-feet to be stored in Lake Mead to protect critical elevations in the Lake. Both Intentionally Created Surplus and system conservation water are accounted to the target.

The creation of system conservation water is a critical component of efforts to protect Lake Mead elevations because Arizona, Nevada and California and their water users all benefit from this system water. In 2014 and 2015 Arizona created about 120,000 Acre-feet of system conservation water. By the end of 2016 we project that approximately an additional 45,000 Acre-feet will be created. The total system conservation water that Arizona expects to be created in 2014-2016 is 165,000 Acre-feet. This is a significant contribution to Lake Mead that benefits Nevada and California as well as Arizona. Additionally, system water can have benefits to the Upper Basin by reducing the probability that low lake levels in Lake Mead will lead to increased Lake Powell balancing releases. Intentionally Created Surplus is also a valuable tool in protecting Lake Mead but that water is intended to be released from the Lake unlike system water.

Absolute certainty that this system water will stay in Lake Mead is a necessity for Arizona to continue its efforts to create these protection volumes. Arizona has the ability to use water solely for the benefit of Arizona. Its robust water banking program can store all of this water in aquifers within Arizona for future use in the State. Recovery of that stored water is a key strategy for minimizing the impacts to Arizona when a shortage is declared by the Secretary of the Interior in the Lower Basin and Arizona and Nevada have their Colorado River allocations reduced. The decision to store conserved water in Lake Mead rather than in aquifers in Arizona relies on some assurances that the conserved water ultimately will go to its intended purpose.

While Arizona appreciates that the Secretary of the Interior has chosen not to release any of the system water created to date, the State of Arizona supports the provisions in Sec. 104 inserting language at Sec. 206 (a) (2), Division D, PL 113-235 to achieve the outcome of absolute certainty that system water will remain as system water to the benefit of the Basin States.

Section 104 of S. 2902 provides incentive for all water users in the Lower Basin to continue to incrementally add to system conservation measures with the knowledge that the conserved water will provide the benefit that was intended.

#### **Sections 111-114**

These Sections apply a streamlined permitting process to forest and wildland restoration activities in critical water supply watersheds. The conditions of the national forest system lands, and certain other wildland areas, in the State are presently near a crisis stage, a circumstance that demands the utmost sense of urgency and meaningful and measurable action. The health of our watersheds is one of the biggest environmental challenges for Arizona in the 21st Century. Drought conditions in the West only magnify the challenges. The largest contiguous ponderosa pine forest in North America, an area encompassing approximately four million acres, extends from the Grand Canyon National Park to the Gila National Forest of western New Mexico. This stand, and the other forested and wildland areas in Arizona, supply water to Arizona communities and provide recreational opportunities for our citizens.

The status of vast portions of these forests is distressingly poor due to several factors. The implementation of certain forest management methods, spanning decades, and including well-intentioned yet restrictive administrative and regulatory constraints, have been counterproductive. Among other things, the practices have resulted in over-stocked and even-aged stands of trees. These dense thickets of low value younger trees, combined with ineffective or injurious fire management schemes, have yielded the conditions for catastrophic landscape scale wildfires, endangering people, flora, fauna, and watersheds.

Unhealthy forests and resulting catastrophic wildfires affect the short and long term management, sustainability, and quality of Arizona's water supply. In Arizona and throughout the west, reservoir storage is a critical component of water supply and drought management. Catastrophic wildfires, unlike the low intensity fires seen in healthy forests, cause burn areas that devastate the landscape and produce increased loads of sediment, ash and debris causing reservoirs to fill up faster and reduce the life and storage capacity of reservoirs. In addition, the loss of trees and groundcover can also affect the timing and behavior of runoff, impacting the predictability and management of water supplies. Heavily forested and steep walled watersheds have characteristics that amplify the impact of sedimentation due to wildfire.

In addition, the water quality impact of catastrophic fire and post-fire flooding has both short and long-term impacts, reaching throughout the watershed, and extending far beyond the immediate impact area of the fire and the surrounding communities. The ash and sediment picked up by runoff after a major fire severely impact the taste and purity of drinking water supplies causing an increase in turbidity, and nutrient and organics loads that must be removed during treatment. Runoff events following fires have also resulted in significant changes in the levels of nitrates, sulfates, and chlorides in runoff. Over the longer term, the increased volume of sediment deposited behind reservoirs due to changes in runoff patterns and soil destabilization can impact the taste and odor as dissolved organics increase in the water. In many cases treatment facilities in Arizona have been upgraded by adding carbon filtration to handle the increased levels of organics and sediment at a cost of hundreds of millions of dollars.

In-pre-settlement conditions estimates show that there were less than 50 trees per acre and today those estimates have risen to over 1000 trees per acre. In the Salt and Verde River watersheds the number of acres impacted by fire has steadily increased from 85,000 acres in the 1980s, to 227,000

acres in the 1990s and to almost 2 million acres in the 2000s. According to the Arizona State Forestry and others, approximately 1.8 million acres of timber have burned since 2002.

These data are indicative of the enormity of the need to take immediate action to reduce the risk of fire in our forests and wildlands. Expediting the permit processes that are needed to restore these areas to a healthy condition is critical. I am encouraged by the expansion, enabled by Sections 111-114 of this bill, of categorical exclusion authority along with the “action/no action” evaluation for certain activities. The incorporation of the categorical exclusion provision in the 2014 Farm Bill, though somewhat limited, was a positive earlier step. S. 2902 would significantly increase the scope of this authorization and could result in accelerated forest restoration activities which would assist in the protection of critical watersheds.

In summary, the State of Arizona supports Sections 101, 103, and 111-114 of S. 2902. Collectively those provisions further the efforts of the State to manage their existing water resources in a manner that creates greater certainty for water users, leverages existing infrastructure in our State to generate more water supplies, creates healthy watersheds to increase their water supply yield and protects watersheds from being degraded by catastrophic fire.

**Statement of Bill Long  
President of the Board of Directors  
Southeastern Colorado Water Conservancy District**

**Submitted to the  
Subcommittee on Water and Power  
Committee on Energy and Natural Resources  
U.S. Senate**

**Regarding S. 2616 114<sup>th</sup> Congress --  
A Bill Concerning the Arkansas Valley Conduit  
Fryingpan-Arkansas Project Colorado**

May 17, 2016

Introduction

This statement is submitted by the Southeastern Colorado Water Conservancy District (District). The District is the repayment entity for the Bureau of Reclamation's Fryingpan-Arkansas Project (Fry-Ark Project) in Colorado. The Fry-Ark Project is a multi-purpose water supply project (for irrigation, municipal and industrial (M/I), power, and fish and wildlife purposes) consisting of several features. The Arkansas Valley Conduit (AVC) is an authorized, but yet to be constructed, M/I feature of the project which will deliver treated domestic water to rural communities east of Pueblo, Colorado, whose current sources do not meet federal safe drinking water standards.

Summary of the District's Testimony

The District strongly supports S. 2616. We urge your favorable consideration of the bill and respectfully request that you pass it out of subcommittee expeditiously.

Need for the Arkansas Valley Conduit - Violation of Federal Drinking Water Standards

The AVC was included in the original 1962 authorizing legislation for the Fry-Ark Project. It is a regional surface water supply project which will deliver treated drinking water to nearly 40 small water providers serving farming and ranching communities in the lower Arkansas River Valley from east of Pueblo, Colorado, to the Colorado/Kansas state line. It will replace existing groundwater sources, the quality of which is inadequate.

Lower Arkansas River communities currently use groundwater to supply some or all of their drinking water. More and more towns have found that their groundwater contains naturally occurring cancer-causing radioactive contaminants, such as radium and uranium. Fourteen towns have water supplies containing radioactive elements in concentrations that exceed primary drinking water standards as mandated by the federal Safe Drinking Water Act.

The Colorado Department of Health and Environment (CDPHE) has notified these 14 water providers (via enforcement actions) that they must treat water supplies to remove these contaminants or find a better quality water source. Seven additional water providers have elevated levels of naturally occurring radioactive elements, but do not currently violate CDPHE standards.

In addition, water providers in the lower Arkansas are generally having difficulty meeting non-mandatory secondary drinking water standards for salts and sulfate. The median salts concentration over the past 40 years has been about 3,400 mg/L in lower Arkansas River Basin groundwater, which is nearly 7 times greater than the secondary drinking water standard.

Finally, some AVC water providers also are not meeting the secondary drinking water standard for iron. Meeting this standard requires the addition of iron removal filters to the treatment process. However, this may create a catch-22 situation, as one water provider was notified by CDPHE in 2014 that it has "Industrial Wastewater Unpermitted Discharges" and that a Colorado Discharge Permit may be required for its discharge of backwash water from iron removal filters.

Radionuclides, salts, and sulfate are not removed by conventional water treatment methods. It would be prohibitively expensive for each individual community to undertake the special upgrades in treatment systems which would be required. On the other hand, simply replacing contaminated groundwater supplies with local surface water from the Arkansas River is problematic because the river downstream of Pueblo also contains high levels of selenium, sulfates, uranium, and salts. The AVC is the regional solution to these problems.

#### Status of On-Going Work on the AVC

Reclamation prepared appraisal level plans and completed an EIS which evaluated several alternatives. A record of decision (ROD) was issued in February, 2014. It concluded that individual community systems diverting from the Arkansas River would not secure a reliable long-term water supply for water providers to help meet projected future demands. Thus, a regional system was selected to take advantage of existing water treatment facilities at the City of Pueblo and of economies of scale. The selected regional system will be less costly than any of the alternatives in the draft EIS.

Following the issuance of the ROD, Reclamation initiated the process of preparing feasibility-level engineering designs and cost estimates. A feasibility level engineering report is to be completed by the end of this fiscal year.

#### Section 9115, P.L. 111-11

As originally enacted in 1962, section 1(c) of the Project's authorizing legislation provided that the District would have to repay to Reclamation 100 percent of the cost, with interest, of any single purpose M-I feature of the Fry-Ark Project. Monies for such repayment would have had to come from the District's revenue sources.

Section 9115 of P.L. 111-11, which was enacted in 2009, amended the authorizing legislation to provide that the District would be obligated to pay only 35 percent of the AVC's cost, with interest. Furthermore, P.L. 111-11 provides that monies for repayment could come from two revenue sources:

- 1) Charges paid to Reclamation for the use of excess capacity in Project facilities to store or convey non-project water, which charges are levied pursuant to contracts between Reclamation and the District or other local, non-federal Colorado water users, and
- 2) District revenue sources (i.e., charges for water or other participant charges).

Revenues from the first of these sources, typically referred to by Reclamation as "miscellaneous revenues," are to be credited by Reclamation in its financial records to repay the 35 percent of the AVC's costs, with interest, for which the District is responsible. If these revenues prove to be insufficient to repay the 35 percent within 50 years, as required by section 1(c) of the authorizing legislation, as amended, then the District would have to make up the difference from its own revenue sources. These payments, if needed, would be made pursuant to a repayment contract between Reclamation and the District.

While P.L. 111-11 caps the District's repayment obligation at 35 percent of the AVC's cost, it has always been anticipated that miscellaneous revenues will continue to be collected by Reclamation even after the 35 percent is reached. Such revenues would be available under P.L. 111-11 for Reclamation to credit against the remaining construction costs of the AVC not assigned to the District. Therefore, P.L. 111-11 implicitly anticipates that the entire cost of the AVC will in fact be repaid using miscellaneous revenues arising from payments made by local water users, even though the District's repayment obligation is capped at 35 percent.

#### Financing the Construction of the AVC

The original authorizing legislation for the Project, and the amendments made by P.L. 111-11, anticipated that the entire cost of single purpose M-I facilities, including the AVC, would be paid for with monies appropriated by Congress (i.e., the cost of planning and constructing the AVC would be federally financed, with those costs repaid, with interest, to Reclamation). However, in the recently completed negotiation of a contract between Reclamation and the District for the use of excess capacity in Pueblo Reservoir, it was agreed that under current law miscellaneous revenues are available without having to be appropriated by Congress and would be used by Reclamation to help finance the construction of the AVC as it was occurring.

While at this time there is no statutory requirement for non-federal financing of construction, the District is mindful of the budgetary constraints which Congress faces. Accordingly, the District has been in discussions with Reclamation and the Department of the Interior regarding the possibility of the District providing about \$100 million in non-federal financing toward the construction costs of the AVC. The District anticipates obtaining non-federal financing by borrowing money from the Colorado Water Conservation Board, which is a state agency.

The Board has already approved a \$60 million loan to the District. What now needs to be addressed is the means for repaying such a loan, together with applicable interest charges.

## What S. 2616 Does

S. 2616 does five things. Specifically, it:

1. Clarifies and confirms that Reclamation can, and is directed to, use miscellaneous revenues to pay for costs incurred during construction without those revenues having to be appropriated by Congress. This confirms the agreement reached in the recent negotiation of the contract between the District and Reclamation referred to above.
2. Authorizes and directs Reclamation to pay to the District, without appropriation, the miscellaneous revenues which it collects to the extent needed by the District to repay the money which the District will borrow to provide non-federal financing for a portion of the cost of constructing the AVC. This revision is needed since P.L. 111-11 assumed that the cost of the AVC would be financed entirely by federal appropriations with no funds contributed by the District during construction. Thus, P.L. 111-11 does not make miscellaneous revenues available to the District to repay a loan from the Colorado Water Conservation Board.
3. Provides that miscellaneous revenues will still be used to repay, with interest, 35 percent of the federal appropriations for the project.
4. Directs Reclamation to enter into one or more agreements with the District that specify the distribution of miscellaneous revenues, in amount and timing, as among the three foregoing uses of those revenues.
5. Confirms that all miscellaneous revenues will be credited against the costs of the Ruedi Dam and Reservoir, the Fountain Valley Pipeline, and the South Outlet Works at Pueblo Dam and Reservoir, plus interest, until those costs are fully repaid. This ensures that the current effect of P.L. 111-11 on the repayment of these three features of the Fry-Ark Project is still realized, with miscellaneous revenues not available for the AVC until repayment of the cost of those projects is completed.

The amendments which would be made by S. 2616 will substantially reduce the Congressional appropriations needed for the construction of the AVC. The budgetary effects are as follows:

1. As compared to P.L. 111-11, the "on budget" federal outlays for construction will be reduced by: (a) the amount of miscellaneous revenues used during construction, and (b) the amount contributed to Reclamation by the District during construction from the loan the District obtains from the state.
2. The District will remain obligated to repay 35 percent of the federal appropriations for the AVC, with repayment to come from District sources if miscellaneous revenues are insufficient for that purpose.

3. As allowed by P.L. 111-11, miscellaneous revenues will continue to be available to repay the entire cost of the AVC, although those costs will now be partly financed by the District (via the money it will borrow) and partly by congressional appropriations.
4. There will be no change in the timing or amount of miscellaneous revenues used to repay the cost of Ruedi Dam and Reservoir, the Fountain Valley Pipeline, and the South Outlet Works at Pueblo Dam and Reservoir as compared to the current situation.

In summary, S. 2616 will achieve the goal of significantly reducing federal outlays while providing a reliable, safe drinking water supply to the rural communities in the Lower Arkansas River Valley. The alternative contaminated supplies which pose a significant threat to public health and prohibitive costs for individual system improvements is unacceptable.

Testimony of Dr. Timothy Quinn  
Executive Director  
Association of California Water Agencies  
Before the  
U.S. Senate Committee on Energy and Natural Resources  
Subcommittee on Water and Power  
May 17, 2016

Chairman Lee and Ranking Member Hirono:

On behalf of the Association of California Water Agencies (ACWA), thank you for the opportunity to testify today. ACWA appreciates your leadership, along with the leadership of members of the subcommittee, to address the challenges confronting California and much of the Western United States during the ongoing historic drought. My testimony focuses on S. 2533.

My name is Timothy Quinn. I serve as the Executive Director of the Association of California Water Agencies. ACWA's highly diverse membership includes approximately 430 public agencies that supply over 90 percent of the water delivered in California for industrial, residential, and agricultural uses. Prior to coming to ACWA in July 2007, I was a Deputy General Manager at the Metropolitan Water District of Southern California for 21 years. For the record, this is my fourth drought as a professional water manager in California.

**Drought: A West Wide Problem:** While America has recently been captivated by headlines about the "California Drought," it is important to recognize such dryness also stretches throughout much of the West. Three other Great Basin states—Nevada, Oregon and Utah, have experienced extreme or exceptional drought. Along the Colorado River basin, Lake Mead has seen a record low water level. It is the first time since it was filled in 1936 that its surface has dropped under 1,080 feet. Drought has also painfully impacted the Southern Great Plains and parts of Texas, New Mexico and Oklahoma.

What are the conditions in California today? The good news is that El Nino rains, although less than some hoped for, have restored key Northern California reservoirs to historic averages. However, Southern California has largely missed out, and water storage south of the Delta remains low. Announced deliveries for some Central Valley Project contractors are as high as 100 percent for agencies in Northern California, but as low as 5 percent for major portions of our agricultural economy in the San Joaquin Valley. State Water Project (SWP) allocations of 60 percent are expected for SWP contractors in the Bay Area, San Joaquin Valley, and Southern California. Despite some improvement this year in hydrologic conditions, California continues

to suffer from drought conditions made worse by a broken water delivery system. This is why ACWA supports the drought relief provided by S. 2533.

**Coequal Goals and the Challenge of Dealing with the Federal Government:** If drought relief is one reason to support S. 2533, another no less compelling reason is the potential to redefine the relationship between the federal government and California as partners in water management. In California, the core tenet of state water policy is that we will manage this vital resource for the “coequal” goals of improving both water supply reliability and our environment. This policy was established in historic 2009 legislation, which codified a fundamental change in how we manage water in California. In the past quarter century, California water agencies and water users have invested tens of billions of dollars in conservation and local water supply resources to reduce demands for imported water. We have developed mechanisms to allow a voluntary water market to function. We have developed, and continue to develop, local storage projects to shift water deliveries from dry years when conflict between environmental and water supply uses are greatest to wetter periods when those conflicts are significantly reduced. In short, in California, state and local water managers have reinvented how we manage water to try and accommodate the needs of both our economy and environment.

The accomplishment of the coequal goals in California requires a partnership with the federal agencies that wield considerable power over water management in our state. Frankly, that partnership has not sufficiently developed. Federal regulatory agencies are approaching water management problems the same way today that they did decades ago. Despite recent attempts by the state to broaden water and ecological management tools in a manner that could achieve both environmental and water supply goals, the federal agencies cling to a single species-single tool approach that has a devastating impact on water supplies for our urban and agricultural economy. From ACWA’s perspective, S. 2533 provides a much needed statement from the Congress that both water supply and environmental protection matter.

**Support for S. 2533:** For both of these reasons – drought relief and moving federal policy in a more balanced direction – ACWA strongly supports S. 2533. On March 7, 2016, the ACWA Federal Affairs Committee voted unanimously to support S. 2533, “The California Long-Term Provisions for Water Supply and Short-Term Provisions for Emergency Drought Relief Act”. ACWA encourages you to quickly pass this legislation to enable a Senate –House conference committee to meet and negotiate a bipartisan bill which can be signed by the President. ACWA is urging our delegation to work together to include provisions from S. 2533, H.R. 2898 and other drought legislation to achieve this important result.

ACWA is pleased to recognize Senator Feinstein for her outstanding leadership and dedicated hard work to produce S. 2533. Her legislation provides short-term remedies for the ongoing drought as well as long-term direction to prepare western states for future droughts. Most important, Senator Feinstein’s bill contains provisions that can help California and other

western states move federal agencies to embrace the coequal goals of providing both reliable water supplies and needed ecosystem protections.

**Summary of S. 2533:** S.2533 contains short-term provisions to provide immediate drought relief through use of real-time monitoring, temporary operational measures, and water transfers. The bill does so within the boundaries of existing law and biological opinions – it essentially directs the federal agencies to place more weight on water supply reliability when they apply their considerable discretion in implementing powerful federal laws on the ground. S. 2533 also contains long-term provisions such as assistance for rural and disadvantaged communities, storage projects, desalination, water recycling, including needed changes to the Title XVI Recycling program, Reclamation Infrastructure Financing Improvement Act (RIFIA), WaterSMART authorization, WaterSense authorization, and fish protections (predators, invasive species, refuges). Additional provisions include language to protect water rights and more than \$700 million in authorizations for key projects funded by project deauthorizations.

While ACWA believes most of the provisions within S. 2533 can help Congress move federal agencies to embrace the coequal goals, the following deserve special mention.

An important feature of S. 2533 is its emphasis on better monitoring on a real-time basis to understand the abundance and location of important fish species such as salmon and smelt in the Delta. There have been missed opportunities to safely capture water supplies within the confines of the existing biological opinions that could be regained if the agencies had better information – and a desire to protect water supply when they can while applying their discretion. Good monitoring and good measurement, using sound science, will lead to better management. A number of opportunities to safely capture water were lost earlier this year. With even better monitoring and information, the agencies could make better decisions about storing water.

The bill's section on "Temporary Operational Provisions" contains measures that will help federal agencies increase water supplies. These include: use of improved data to operate the pumps at higher levels when no fish are present; allow agencies to keep the additional water they are able to pump during winter storms; require agencies to explain reductions in pumping under the Delta-Smelt Biological Opinion; require agencies to maximize water supplies consistent with applicable laws and biological opinions; open the Delta Cross-Channel Gates more often to help Delta farmers and South of Delta communities; extend the time period for water transfers by five months; allow a 1:1 transfer ratio so more water transfers can be accomplished.

S. 2533 also contains a section on "Reservoir Operation Improvement." This provision seeks to utilize better science and weather forecasting, such as for atmospheric rivers, to update reservoir operations.

In general, ACWA supports funding and incentives for improved water conservation, water reuse and both seawater and brackish water desalination. S. 2533 contains provisions to address these needs as well as needed improvements to Reclamation's Title XVI program.

**Implementation of the Endangered Species Act:** Implementation of the Endangered Species Act in California illustrates how federal fish agencies are not utilizing the discretion provided for in the ESA as a priority policy direction. The ESA did not cause the drought, but the manner in which the ESA has been implemented by the federal government has made the impacts of the drought much worse. Too often, ESA regulators impose rules and regulations on water users that have enormous costs but negligible benefits for the environment. Especially during droughts, environmental regulators must learn to be as efficient with the water that they use for their purposes as are urban and agricultural water managers. We believe that provisions of S. 2533 move federal policy in this direction.

**UNPRECEDENTED STATE AND LOCAL AGENCY RESPONSE:** ACWA recognizes that addressing West-Wide drought conditions is a major imperative for state and federal governments. To help provide perspective on that endeavor, the following focuses on ongoing activities in California.

**Conservation and Water District Response:** On April 1, 2015 Governor Brown released an unprecedented Drought Executive Order. This action ordered California's urban water suppliers by February 2016 to reduce use of potable water by 25% on average compared to 2013. Between June 2015 and March 2016, 1.3 million acre-feet of water has been conserved. On May 9, 2016, the Governor issued a revised order that provided more discretion to local water managers. The Brown Administration has also made it clear that conservation and water use efficiency must become a way of life in California.

**Education:** State and local agency drought outreach efforts are playing important roles in securing public cooperation in managing California's drought. "Save Our Water", administered by ACWA in partnership with California's Department of Water Resources, is the official statewide consumer water conservation education program.

**State Funding:** On November 4, 2014, California voters passed Proposition 1, a \$7.545 billion Water Bond, with 67 percent of the voters supporting the measure. Components of the Water Bond that will provide short- and long- term funding for drought management include \$810 million for water conservation, stormwater capture and reuse and other programs that increase local and regional water supplies; \$2.7 billion to allocate dollars on a competitive basis to partially fund water storage projects such as the CALFED surface storage projects, local and regional surface storage; groundwater storage and reservoir reoperation; \$725 million for water recycling and salt-removal projects; \$900 million for groundwater sustainability – with most of this funding targeted for groundwater cleanup programs; and \$1.89 billion for habitat and watershed programs. Because of the drought, the Brown Administration is seeking to accelerate distribution of these funds wherever practical to generate new supplies that could reduce impacts if this drought persists for a few more years.

In 2014, 2015, California passed into law Emergency Drought Relief legislation. The 2014 package contained \$687.4 million and the 2015 one \$1.1 billion. Among many other items, each year's package includes funding for safe drinking water and water recycling projects, and funding to support emergency food aid to 29 counties impacted by the drought.

**Storage:** The California Water Commission is charged with allocating \$2.7 billion from the recent Water Bond through a competitive public process to help fund water storage projects. These projects, which will be matched with other local and regional funds, will be critical to improving the operation of the state's water system and achieving the coequal goals of water supply reliability and enhanced ecosystem health. They also will be essential to meeting groundwater sustainability goals and enabling other regional and local water supply strategies. While storage projects funded by Proposition 1 will not help during this drought, they demonstrate California's commitment to better manage droughts in the future.

Several surface water projects that could provide broad benefits in the areas of water supply, water quality and ecosystem restoration have been studied extensively. These projects, known as the "CALFED projects" because they were identified in the CALFED Record of Decision in 2000, would contribute significant operational flexibility toward achieving the coequal goals. In addition to these CALFED projects, ACWA members around the state are preparing to compete for some of the storage funds in Proposition 1 with projects that would increase storage capacity, both above and below ground, in a manner that can improve the operations of California's statewide water system.

**Governor Brown's California Water Action Plan:** This plan embraces an "every tool in the toolbox" approach which ACWA strongly supports. With conservation happening at record rates, the plan also recognizes the need to modernize California's water systems. It includes above and below ground storage and supports planning at local, regional and state levels to innovate and provide safe reliable water supplies in ways that also protect the environment.

**Additional Legislation: Headwaters/Forest Management:** Because nearly all of the state's water supplies originate in California's headwaters, more effectively managing these areas is integral to optimizing the water supplies that nature provides. Adapting to climate change and improving watershed resiliency to reduce the likelihood of catastrophic wildfires and increase water yield and quality will require substantial investments. In addition to drought legislation, Congress should pass legislation to address these needs.

**MOVING FORWARD:** ACWA appreciates this opportunity to testify in support of S. 2533 and encourage its swift passage. The bill can complement needed congressional efforts to move federal agencies towards making balanced decisions to provide reliable water supplies while still protecting the environment.

In battling drought, the importance of enhancing State-Federal partnerships cannot be overemphasized. A key building block for better partnerships includes passage of west wide federal drought legislation that complements states' abilities to move forward with their

comprehensive plans, promote regional self-sufficiency through use of Integrated Water Management Plans and provide incentives and investments for water related projects at local, regional and state levels.

Thank you for the opportunity to submit these comments.

**Subject:** Land Exchanges and PLI  
**Date:** Tuesday, May 17, 2016 5:39:06 PM

---

Tommy and Nikki,

It was great spending time together last week. I had a successful meeting with Pew and they are submitting final edits to me by COB.

In the meantime, I would like to get the ball rolling on land exchanges. Below I've pasted updated land exchange language for your review and comment.

Also, I believe I mentioned this last week, but we would like to initiate a process in which SITLA and senior DOI officials can hammer out land exchange details. This is a complex, yet critical piece of our initiative. We believe that the sooner the experts within SITLA and DOI can work together, the sooner we can resolve this piece of the puzzle.

Please let me know how best to proceed. I plan to forward this email to Stephenne with CEQ.

Best,  
Fred

## **Title I – School Trust Land Consolidations**

(a) FINDINGS.—Congress finds that the land exchange authorized and directed by this Act furthers public objectives referenced in section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) including –

- (A) Promoting better management of federal conservation areas by removing inheld state trust land sections;
- (B) Securing Federal ownership and protection of land with significant wildlife, recreational, scenic, cultural and other public values;
- (C) Assisting the State of Utah and local governments in economic development and community expansion through the consolidation of state trust lands in manageable blocks near several Utah communities; and
- (D) Advancing public education through increased opportunity for economic development of Utah school trust lands, in furtherance of the land grants made under the Utah Enabling Act, Act of July 16, 1894 (28 Stat. 107, chapter 138).

(b) PURPOSE – It is the purpose of this title to authorize, direct, facilitate, and expedite the exchange of land between the State of Utah and the United States.

### **SEC. 102. DEFINITIONS.**

In this Act:

(1) MAPS.—The term “Maps” means the following maps prepared by the Bureau of Land Management:

- (a) Land Conveyances - Carbon County dated [date]
- (b) Land Conveyances – Duchesne County dated [date]
- (c) Land Conveyances - Emery County dated [date]
- (d) Land Conveyances – Grand County dated [date]
- (e) Land Conveyances – San Juan County dated [date]
- (f) Land Conveyances – Uintah County dated [date]

(2) NON-FEDERAL LAND.—The term “non-Federal land” means the lands identified on the Maps as “State Trust Land Proposed for Transfer to United States”, “State Trust Lands – Surface Only Proposed for Transfer to United States” and “State Trust Lands -- Minerals Only Proposed for Transfer to United States” located in Carbon, Duchesne, Emery, Grand, San Juan and Uintah counties, Utah, as generally depicted on the Maps.

(3) SECRETARY.—The term “Secretary” means the Secretary of the Interior.

(4) STATE.—The term “State” means the State of Utah, acting as trustee under the Utah State School and Institutional Trust Lands Management Act (Utah Code Ann. 53C–1–101 et seq) through the Utah School and Institutional Trust Lands Administration.

### **SEC. 103. EXCHANGE OF LAND; RESERVATION OF INTERESTS.**

(a) In General.--If the State offers to convey to the United States title to the non-Federal land, the Secretary shall, subject to the provisions of this title--

- (1) accept the offer; and
- (2) on receipt of the right, title, and interest of the State in and to the non-Federal land, convey to the State all right, title, and interest of the United States in and to the Federal land.

(b) Valid Existing Rights.--The exchange authorized under subsection (a) shall be subject to valid existing rights.

(c) Costs – Costs of the land exchange shall be allocated in accordance with section 206(f)(2)(B) of FLPMA (43 U.S.C. 1716(f)(2)(B)).

(d) Title Approval.--Title to the Federal land and non-Federal land to be exchanged under this section shall be in a format acceptable to the Secretary and the State.

(e) Reservation of Interest in Potash.--

- (1) In general.--With respect to Federal land that contains potash resources, the Secretary shall reserve an interest in all potash resources.
- (2) Extent of interest.--The interest reserved by the United States under paragraph 1 shall consist of--
  - (A) 50 percent of any bonus bid or other payment received by the State as consideration for securing any lease or authorization to develop potash resources;
  - (B) 50 percent of the amount that would have been received by the Federal Government under the royalty rate applicable on July 1, 2015 if the potash resources had been retained in Federal ownership; and
  - (C) 50 percent of any other payment received by the State pursuant to any lease or authorization to develop the potash resources.
- (3) Upon receipt of any funds from potash leasing and development on lands in which the Secretary has reserved an interest, the State shall pay the Secretary amounts attributable to the reserved interest of the United States in accordance with paragraph (4).

(4) Payment.—

(A) Any amounts due under paragraph (3) shall be paid by the State to the United States not less than quarterly.

(B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2).

(5) No obligation to lease.--The State shall not be obligated to lease or otherwise develop potash resources in which the United States retains an interest under this subsection.

(f) Reservation of Wellbore Interest in Oil and Gas

(1) In general.—The Secretary shall reserve a wellbore interest in each oil and gas well on Federal land that has been determined by the Secretary to be capable of production in paying quantities as of the date of conveyance.

(2) Extent of interest.—The wellbore interest reserved to the United States under paragraph (1) shall consist of all royalties attributable to any zones or horizons that are being produced from an oil and gas well located on Federal land as of the date of conveyance.

(3) Upon receipt of any funds attributable to the reserve wellbore interest of the United States, the State shall pay the Secretary all such amounts in accordance with paragraph (4).

(4) Payment.—

(A) Any amounts due under paragraph (2) shall be paid by the State to the United States not less than quarterly.

(B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2)

(5) Termination of Reserved Interest.—The reserved wellbore interests of the United States in oil and gas shall automatically terminate on the date that is ten years after the enactment of this Act.

(6) Sharing of Revenue. The United States shall share all revenue received with respect to its reserved wellbore mineral interest in oil and gas with the State of Utah in accordance with 30 U.S.C. 191(a).

(g) Appurtenant Water Rights.--Any conveyance of a parcel of Federal land or non-Federal land under this Act shall include the conveyance of water rights appurtenant to the parcel conveyed.

## **SEC. 104. APPRAISALS**

(a) Equal Value Exchange.—

(1) In general.--The value of the Federal land and non-Federal land to be exchanged under this Act—

(A) shall be equal; or

(B) shall be made equal in accordance with section 5.

(b) Appraisals.--The value of the Federal land and the non-Federal land shall be determined by appraisals conducted by 1 or more independent appraisers retained by the State, with the consent of the Secretary.

(c) Applicable law.--The appraisals conducted under paragraph (1) ---

(A) shall be conducted in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716); and

(b) shall utilize nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisitions.

(d) Approval.--The appraisals conducted under paragraph (1) shall be submitted to the

Secretary and the State for approval.

(e) Adjustment.--

(1) In general.--If value is attributed to any parcel of Federal land because of the presence of minerals subject to leasing under the Mineral Leasing Act (30 U.S.C. 181 et seq.), the value of the parcel (as otherwise established under this subsection) shall be reduced by the estimated value of the payments that would have been made to the State of Utah from bonuses, rentals, and royalties that the United States would have received if such minerals were leased pursuant to the Mineral Leasing Act (30 U.S.C. 181 et seq.).

(2) Limitation.--An adjustment under subparagraph (A) shall not be considered as a property right of the State.

(f) Valuation of Lands with Reserved Minerals.--Federal land in which the Secretary reserves an interest under subsections 103(3)3(e) and 103(3)(f) shall be appraised—

(1) without regard to the presence of potash; and

(2) taking into account the reserved wellbore interest of the United States, if any.

(g) Duration.—The appraisals conducted under paragraph (1) shall remain valid until the date of the completion of the exchange authorized under this title.

(h) Availability of appraisals.—

(1) In general.--All final appraisals, appraisal reviews, and determinations of value for land to be exchanged under this section shall be available for public review at the Utah State Office of the Bureau of Land Management at least 30 days before the conveyance of the applicable parcels.

(2) Publication.--The Secretary or the State, as applicable, shall publish in a newspaper of general circulation in Salt Lake County, Utah, a notice that the appraisals are available for public inspection.

(i) Dispute resolution.—

(1) If, by the date that is 90 days after the date of submission of an appraisal for review and approval under this subsection, the Secretary or State do not agree to accept the findings of the appraisals with respect to any parcel of Federal land or non-Federal land, the dispute shall be resolved in accordance with section 206(d)(2) of FLPMA (43 U.S.C. 1716(d)(2)).

(2) If agreement has not been reached with respect to the exchange of an individual parcel of Federal land or non-Federal land, the Secretary and the State may agree to set aside the individual parcel to allow the exchange of the other parcels of Federal land and non-Federal land to proceed.

(j) Conveyance of Parcels in Phases.—

(1) In General.—Notwithstanding that appraisals for all of the parcels of Federal land and non-Federal land may not have been approved, parcels of the Federal land and non-Federal land may be exchanged in phases as may be mutually determined by the Secretary and the State.

(2) Ledger. -- The Secretary and the State may agree to utilize a ledger account to make equal the value of lands conveyed by each party in one or more phases, provided that the overall exchange shall be made equal as provided in section 105.

(3) Authority.— It is the intent of Congress that the Secretary may exercise broad discretionary authority in the processing of the land exchange to expedite the final conveyance of the Federal and non-Federal land.

## **SEC. 105. – EQUALIZATION OF VALUES.**

(a) Surplus of federal land.—

If the value of the Federal land exceeds the value of the non-Federal land, the value of the Federal land and non-Federal land shall be equalized by –

- (1) the State conveying to the United States State trust land located within any of the wilderness areas or national conservation areas in Washington County, Utah, established under subtitle O of title I of the Omnibus Public Land Management Act of 2009 (Public Law 111–11; 123 Stat. 1075) that has an appraised value equal to the difference between the value of the Federal land; and the value of the non-Federal land;
- (2) the reduction in acreage of the Federal land as the State and the Secretary may agree;
- (3) the State making a cash payment to the United States; or
- (4) any combination of the methods described in paragraphs (1)-(3) as the State and the Secretary may mutually agree.

(b) Surplus of non-federal land.—If the value of the non-Federal land exceeds the value of the Federal land, the value of the Federal land and the non-Federal land shall be equalized by –

- (1) the reduction in acreage of the non-Federal land as the State and the Secretary may mutually agree.

## **SEC. 106. WITHDRAWAL OF FEDERAL LANDS PRIOR TO EXCHANGE**

Subject to valid existing rights, during the period beginning on the date of enactment of this Act and ending on the earlier of the date that the Federal land is removed from the exchange or the date on which the Federal land is conveyed, the Federal land is withdrawn from mineral location, entry or patent under the mining laws, from leasing and entry under the mineral leasing laws, and from mineral material disposal.

## **SEC. 107. NEPA AND FLPMA COMPLIANCE.**

(1) Public Interest. -- The land exchange authorized and directed by this title is in the public interest.

(2) Scoping and Analysis. -- Notwithstanding any other law, in preparing an environmental assessment or environmental impact statement required under section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) with respect to the land exchange contemplated by this Act:

- (A) the Secretary is not required to identify any actions other than the proposed action and the no action alternative; and
- (B) the Secretary is not required to analyze the environmental effects of alternative conveyances or actions other than the offer submitted by the State under subsection 103(a).

(3) Presumption of Plan Adequacy.—Conveyances of Federal land to the State in accordance with this Act are presumed to comply with any land use plan enacted under section 202 of FLPMA (43 U.S.C. 1712).

## **SEC. 108. STATUS AND MANAGEMENT OF LAND AFTER EXCHANGE.**

(a) ADMINISTRATION OF NON-FEDERAL LAND.—

- (1) IN GENERAL.—Subject to paragraph (2) and in accordance with section 206(c) of FLPMA (43 U.S.C. 1716(c)), the non-Federal land acquired by the United States under this Act shall become part of, and be managed as part of, the Federal administrative

unit or area in which the land is located.

(b) GRAZING PERMITS.—

(1) IN GENERAL.—If land acquired under this Act is subject to a lease, permit, or contract for the grazing of domestic livestock in effect on the date of acquisition, the entity acquiring the land shall allow the grazing to continue for the remainder of the term of the lease, permit, or contract, subject to the related terms and conditions of user agreements, including permitted stocking rates, grazing fee levels, access rights, and ownership and use of range improvements.

(2) RENEWAL.—To the extent allowed by Federal or State law, on expiration of any grazing lease, permit, or contract described in paragraph (1), the holder of the lease, permit, or contract shall be entitled to a preference right to renew the lease, permit, or contract.

(3) BASE PROPERTIES.—If land conveyed by the State under this Act is used by a grazing permittee or lessee to meet the base property requirements for a Federal grazing permit or lease, the land shall continue to qualify as a base property for the remaining term of the lease or permit and the term of any renewal or extension of the lease or permit.

(c) HAZARDOUS MATERIALS.—

(1) IN GENERAL.—The Secretary and the State shall make available for review and inspection any record relating to hazardous materials on the land to be exchanged under this Act.

(2) COSTS.—The costs of remedial actions relating to hazardous materials on land acquired under this Act shall be paid by those entities responsible for the costs under applicable law.

**SEC. 109. – BOOK CLIFFS CONSERVATION AREA.** – The non-Federal mineral estate acquired by the United States in the area depicted on the Grand County map as the Book Cliffs Conservation Area is withdrawn from the operation of the mineral entry, leasing and mineral material disposal laws until otherwise determined by Congress.

**Subject:** Re: Thursday's Senate hearing on Next Step in Offshore Oil and Gas Leasing Planning Process for 2017-2022

Good afternoon Dan,

The Senator is more than welcome to raise any of the below questions or topics and we appreciate the opportunity to respond:

1. Can you tell me about the analysis and public process for the DPP and PP?
2. Regarding the Atlantic removal decision, what did you mean by market conditions as one of the factors in that decision?
3. Regarding the Five Year Plan, how is BOEM thinking about analyzing green house gases?

Please do not hesitate to contact me if you have any additional comments or questions.

v/r  
Mitch

More to say about Sage Grouse and sue-and-settle in this one... if you have time to take a look at this, let me know if you see anything obvious that needs rebutting in those two sections. But not essential, since there's plenty of oil & gas stuff to go after her about. Thanks.

**Kathleen Sgamma  
Vice President of Government & Public Affairs  
Western Energy Alliance**

**Testimony Before the House Committee on Natural Resources,  
Subcommittee on Energy and Mineral Resources**

**Hearing Entitled  
*Examining Deficiencies in Transparency at the Department of the Interior*  
May 19, 2016**

Transparency in our democracy is something everyone pays lip service to, but the standard is often not achieved. From obfuscation about targeting conservative groups in Lois Lerner's IRS to the Environmental Protection Agency's (EPA) refusal to provide the data behind the health claims for the new ozone standard, the Administration that was going to be "the most transparent in history" has actually proven to be just the opposite.

When it comes to the Department of the Interior (DOI), transparency issues may not be as high profile, but they will have profound impacts on land use policy well into the future. Transparency issues range from manipulating data in order to provide political cover and deflect criticism of policies, to ignoring data and science in order to arrive at preferred policies. I've provided some example transparency issues as they relate to the onshore oil and natural gas program in my testimony.

Western Energy Alliance represents over 300 companies engaged in all aspects of environmentally responsible exploration and production of oil and natural gas in the West. Alliance members are independents, the majority of which are small businesses with an average of fifteen employees. New policies and rules put in place in a less than transparent manner are affecting or will affect current and future operations of our members.

## **Sage Grouse**

### Data Quality Act (DQA) Challenge

Regulatory actions surrounding the Greater Sage-Grouse (GrSG) are failing from several transparency issues. Western Energy Alliance, along with 20 counties in Colorado, Montana, Nevada and Utah, and several industry and agriculture groups filed four Data Quality Act (DQA) challenges regarding data the U.S. Fish & Wildlife Service (FWS), the Bureau of Land Management (BLM) and the U.S. Geological Survey were using to make decisions regarding an Endangered Species Act (ESA) listing for GrSG and 68 land use plans across eleven states in the West.<sup>1</sup> First we had to file several FOIA requests and engage in three FOIA lawsuits and a DQA challenge before DOI released basic information that should have already been in the public domain.

---

<sup>1</sup> [Greater Sage-Grouse Data Quality Act Challenge](#), March 18, 2015.

Our full DQA challenges were very comprehensive, pointing out problems with the peer review process, failure to meet basic scientific standards and the selective use of studies to support a narrative that exaggerates impacts from human activities while simply disregarding natural threats such as predation. We documented 92 relevant studies that the agencies were ignoring in order to move forward with a pre-determined narrative and arrive at policies more about controlling public lands than effective sage grouse conservation. Interior simply dismissed our comprehensive DQA challenges of hundreds of pages of detailed information with a four-page letter.

This transparency issue could be solved by strengthening the Data Quality Act so that the reviewing entity is independent of the agency that is the target of the DQA. The independence of the Inspector General in each agency provides a model.

### FLPMA 202

FLPMA Section 202(e)(2) requires that the Interior Secretary report to Congress any management decision or action that totally eliminates one or more of the principal or major uses of public lands for two or more years on 100,000 acres or more. Following the Secretary's report, Congress may act within 90 days. If Congress does not act, it is deemed to have approved the Secretary's closure.

The Interior Secretary has not yet reported to Congress even though the GrSG land use plans close tens of millions of acres of public lands to several principle uses and will cause widespread economic harm to western states. This could be an attempt to delay Congressional action while the DOI proceeds with implementing the plans. Congress should act to halt the closures by first demanding the requisite report. The acreage reported closed to activities in the land use plans is as follows:

Land Use Category	Total Acres Closed
Oil & Gas	30,292,000
Geothermal	25,517,000
Locatable Minerals	10,270,411
Non Energy Leasables	57,578,000
Rights of Way	17,789,000
Salable Mineral Materials	58,023,000
Solar Energy	70,273,000
Trails & Travel closed	12,048,000
Wind Energy	44,690,000

We urge the Natural Resources Committee to move forward with a concurrent resolution to use FLPMA 202 to stop the withdrawals. In addition, the FLPMA 202 tool should be used by Congress every time the department issues a land use plan or other action that withdraws lands from multiple-use activities.

### **BLM Oil & Natural Gas Data**

BLM does not have standard methods of tracking basic data about oil and natural gas leasing, development and production on federal lands, which leads to transparency issues about onshore development. States and field offices track information differently, but for political reasons, the

Washington Office reports much of the data in a standardized format in order to provide political cover for its failure to meet statutory mandates from Congress.

### Leasing

BLM does not track lease nominations and deferrals in a standard way, and the lack of transparency has created a situation in which BLM fails in its Mineral Leasing Act (MLA) obligation to proceed with quarterly lease sales in every oil and gas state when there is interest. Potential lessees do not know when their nominated acreage will come up for sale, or why their nominations are deferred, and are surprised to learn after BLM's self-imposed deadlines have passed that their acreage is not being considered. BLM is not tracking or processing the backlog, and often holds anemic lease sales while millions of acres remain nominated but deferred.

Lease sales, which the MLA requires be held quarterly in each oil and gas state, have been cancelled due to "lack of interest" or because processing of parcels is taking too long. The Associated Press estimates that there is a backlog across the West of 8.1 million acres deferred just because of sage grouse.<sup>2</sup> BLM's own expressions of interest data indicate tens of millions more.<sup>3</sup> Also, there's no visibility on comprehensive historic trends in this backlog, as BLM publishes the data by calendar year but other leasing data by fiscal year, and sales data are not aggregated and presented in spreadsheet format over multiple years. BLM should transparently track data in a consistent manner across all states, including by parcel and in the aggregate, numbers of parcels and acres:

- Nominated
- Deferred, including reasons for deferral
- Included in initial leasing environmental assessments
- Noticed on initial sales list
- Protested
- Offered for sale
- Sold competitively
- Sold noncompetitively
- Issued
- Suspended, including the reasons.

These data, which could be made available from the state offices using standard templates, should be tracked on spreadsheets and available at the field office, state and national level.

### Permits

Every year, BLM releases data on the number of Applications for Permits to Drill (APD) that includes the actual numbers, as is appropriate, as well as the supposed average processing time. However, no data are provided to support the processing times. FOIA requests have revealed that the aggregated number provided is not based on meaningful data, as each field office tracks data very differently.<sup>4</sup> We hope that

---

<sup>2</sup> ["Grouse's fate shapes energy development in the West,"](#) Matthew Brown and Mead Gruver, *The Associated Press*, December 4, 2014.

<sup>3</sup> [Industry Interest Acres by Calendar Year](#), BLM.

<sup>4</sup> [Western Lands and Energy Newsletter](#), Norton Rose Fulbright, June 26, 2013.

the new Automated Fluid Management Support System (AFMSS2) will enable tracking of APD data consistently, although there are some concerns as we see it being rolled out to the field offices.

Taking BLM at its word regarding 220 days to complete APDs, which likely is an underestimation, the average is still much slower than states, which all take well under 60 days on average. Because it takes so much longer to obtain a BLM permit, operators have no certainty and must submit many APDs well in advance of when they will be needed. Of course, some APDs take under the average 220 days, but it is not at all uncommon for APDs to take a year or more. Lack of transparency in the timing results in other distortions in the system.

After having submitted many APDs in advance in order to ensure they can stay ahead of their drill rigs, operators' circumstances may change. For example, a nearby well may indicate an area is not as prospective as originally thought, and further planned wells may not be drilled until economic conditions change, if at all. With the fall in commodity prices, many wells that were first submitted when oil was near \$100 a barrel are no longer economic at \$40. Operators will hold onto the permits that have been approved for the full four years, since they have paid \$9,500 per APD, in the hopes that economic circumstances will change. Were the system more efficient and transparent, operators would not have to submit APDs so far in advance and there would not be a stockpiling of permits. We are hopeful that the new AFMSS 2 will be helpful in increasing processing efficiency and timeliness, and lead to more transparent data reporting.

#### Right-of-Way (ROW) Processing

Data about ROW processing is even less transparent than APDs. In response to Senator John Barrasso, BLM Director Neil Kornze provided a list of pending requests for oil and natural gas pipeline ROWs across federal land in January 2016. The list showed that as of August 2015 the BLM had 867 pending ROWs, nearly half of which had been pending for more than two years. This did not include pending sundry notices that are used to grant ROWs under certain conditions. This subcommittee released data along with the April 27<sup>th</sup> hearing on BLM's venting and flaring rule which seems to indicate processing occurs within the same year as submittal, so that is probably an area where more information is needed.<sup>5</sup> The timeframes in the data received by the subcommittee are not entirely transparent, and suffer from some of the same problems as APD processing.

The average BLM processing times by state were not the standard 60 days, but they were not as bad as APD processing times, ranging from a low in Nevada of 91 days to 184 days in New Mexico. However, as with APDs, BLM stops the clock under certain scenarios. The clock is stopped at the request of the project proponent, which is fair. But it also stops if there are delays associated with other federal processing requirements. Also, like APDs, the average times can mask frequent delays that extend into years.

Our members are constantly frustrated that they cannot get ROWs processed in a timely manner to allow them to capture associated gas from oil wells, rather than having to flare. The issue is especially acute in North Dakota, where flaring rates are higher than elsewhere because gas capture infrastructure continues to lag oil production, often because of problems obtaining ROWs. The issue isn't just slow

---

<sup>5</sup> [Letter from Christopher P. Salotti](#), Legislative Counsel, Office of Congressional and Legislative Affairs, DOI to House Natural Resources Subcommittee on Energy and Mineral Resources Chairman Doug Lamborn, February 26, 2016.

BLM processing, although that is often the case. The Bureau of Indian Affairs appears to be a major obstacle as well. Example slowdowns have included the U.S. Forest Service's denial of easements in a bighorn sheep area, which would have reduced 3% of North Dakota's overall flaring. Another example is a pipeline for which BLM took over three years to approve the ROW, but it is now pending approval by the Army Corps of Engineers. That pipeline could reduce North Dakota's flaring rate by another 3%. Rather than just proceeding with a costly and time consuming new rule which puts all the onus on operators to reduce flaring, DOI should ensure both BIA and BLM fulfill their obligations to approve ROWs expeditiously, and also work with outside agencies to expedite ROWs.

### **Regulatory Economic Analyses**

DOI, mainly through BLM, but also BIA and FWS, is proceeding with an overwhelming number of new regulations that cumulatively extend far beyond reasonable regulatory oversight and into mechanisms for slowing oil and natural gas production on federal lands. Yet the agencies are failing to transparently reveal the cumulative economic impacts of these rules. The situation is particularly acute with the three onshore orders that BLM is currently updating (leaving aside the venting and flaring rule, which is technically another onshore order, but by itself well over the \$100 million economic impact threshold.) Combined, the three onshore orders regarding measurement are highly interrelated, with an economic impact over \$100 million. A single, comprehensive analysis should be done to fully assess the overall impacts of these significant regulatory proposals. BLM is also failing its obligations under the National Environmental Policy Act (NEPA) to transparently analyze connected actions together, which these rules clearly are.

Likewise, BLM fails to conduct comprehensive socioeconomic impacts in NEPA documents ranging from Resource Management Plans (RMP), RMP amendments for sage grouse, Master Leasing Plans, planning policy changes, and new rules, never comprehensively looking at how oil and natural gas restrictions will impact local communities, states, and the national economy. A third-party, independent from the direction of BLM, and other agencies for that matter, should perform economic analyses for all new rules and land use plans to ensure the public has a comprehensive understanding of the full socio-economic impacts of regulatory actions.

### **FWS Sue and Settle**

One of the most egregious cases of DOI's lack of transparency has been two closed-door mega settlements between FWS and two radical environmental groups and serial litigants, WildEarth Guardians (WEG) and the Center for Biological Diversity (CBD). FWS agreed to review a combined 878 species for potential ESA listing within a very aggressive six-year timeframe.<sup>6</sup> DOI's justification for entering into the closed-door settlement agreements that excluded elected officials, states, localities, other stakeholders and the public was to limit future listing petitions and litigation. But DOI essentially handed over policymaking to two non-representative groups and committed its resources to their priorities. Ceding that much power to one special interest in an opaque manner has placed a burden on the federal government, states, productive industries, and private landowners that is alarming.

---

<sup>6</sup> [\*Stipulated Settlement Agreement in the U.S. District Court for the District of Columbia, WildEarth Guardians v. Salazar\*](#), MDL Docket No. 2165, May 10, 2011. [\*Stipulated Settlement Agreement in the U.S. District Court for the District of Columbia, Center for Biological Diversity v. Salazar\*](#), MDL Docket No. 2165, July 12, 2011

We conducted a legal analysis to determine if DOI indeed met its goal.<sup>7</sup> Having allowed CBD and WEG to set the FWS listing agenda for six years, did DOI at least achieve its goal of reducing ESA lawsuits and new petitions? In that sense, the settlements were resounding failures. We discovered that as of June 2015:

- 53 petitions had been filed with FWS requesting listing or uplisting (from threatened to endangered) on 129 species. WEG and CBD are responsible for 38 (72%) of the petitions covering 113 (88%) of the species.
- With complete disregard for the spirit of the agreements, CBD delivered a large 53-species petition to FWS less than a year after the settlements were approved, prompting FWS Assistant Director for Endangered Species Gary Frazer to state, “We’re disappointed that they filed another large, multi-species petition.”
- 71 different plaintiffs have filed 43 lawsuits challenging FWS decisions on 107 different species. It’s not surprising that more plaintiffs are resorting to legal action, since the settlements shut out policymakers and other stakeholders that are now left with few other options. Yet WEG and CBD remain the most prolific litigants, with 23 lawsuits (53%) involving 45 species (42%).
- 50 of the 107 species that are subjects of new lawsuits were already addressed in the settlement agreements, with CBD and WEG responsible for the lawsuits on 34 (68%) of those species. These radical environmental groups will not be satisfied unless all of their petitions result in endangered listings, whether or not such determinations are warranted.

The information was very difficult to obtain because FWS does not consistently and transparently track data to enable the public to understand the species petitions that are active, the stage they are at in the ESA process, the lawsuits associated with them, the cost of addressing the lawsuits, and the amount being reimbursed to special interest groups under the Equal Access to Justice Act (EAJA). These data should be readily available from FWS.

Western Energy Alliance supports legislation to limit the ability of groups to sue and settle behind closed doors without the involvement of elected state, local and federal official, and to limit reimbursement under EAJA.

These are just some examples of transparency issues at DOI. I appreciate the opportunity to testify, and am happy to discuss these and other examples during questioning.

Hi Felipe and Meagan,

Thanks again for taking the time to discuss the coal leasing program a few weeks back.

I was hoping you might be able to provide some analysis of legislation introduced in the Senate yesterday: <http://www.daines.senate.gov/download/coal-leasing>. Parts of it are very similar to an amendment Sen. Daines filed during consideration of the Energy Policy Modernization Act (Amendment #3185). Did DOI or BLM do an effects statement or any other analysis of that you could share? I'm also interested in the effects of the grandfathering clause of the current bill (Sec. 6).

Thanks,

Janelle

## **Daines, Zinke Introduce Legislation to Give States & Tribes Say in Energy Development**

**U.S. CONGRESS** — U.S. Senator Steve Daines and U.S. Representative Ryan Zinke today introduced bicameral legislation to protect Montana coal jobs from the Obama administration's recent moratorium on new federal coal leases and ensure that states and tribes have a significant voice in any changes to federal coal, oil, gas royalties or leasing policy.

The Certainty for States and Tribes Act, S.2938 and H.R. 5259, provides critical flexibility needed to keep Montana mines open, protect thousands of good-paying jobs and provide needed support for government and community services.

**“The Obama administration has completely ignored the will and well-being of**

**Montanans and coal-producing states and tribes,” Daines stated. “My bill gives certainty to states and tribes and is critical to protecting thousands of good-paying union and tribal jobs.”**

**“The Obama Administration has unilaterally stripped Montana’s and the Crow’s voices from the conversation about how we can mine and use our own coal resources,” Zinke stated. “It’s a shame I even had to introduce this bill and that Congress has to codify the ability for the American people to weigh in on our own livelihoods.”**

The Certainty for States and Tribes Act is co-sponsored by U.S. Senators John Barrasso (R-WY) and Mike Enzi (R-WY) and U.S. Representatives Cynthia Lummis (WY-AL), David McKinley (WV-01), Scott Tipton (CO-03), Paul Gosar (AZ-04), Kevin Cramer (ND-AL), Bruce Westerman (AR-04) and Bill Johnson (OH-06).

**U.S. Senator John Barrasso (WY):** “The Obama administration’s plan to raise royalty rates on federal coal, oil, and gas is yet another effort to appease reckless and extreme environmentalists. By reestablishing the Royalty Policy Committee, our bill gives voice to communities that are impacted most by the secretary of the Interior’s decisions. It will also prevent the secretary from continuing to wreak economic havoc within Rocky Mountain states and Indian tribes.”

**U.S. Senator Mike Enzi (WY):** “As I told the BLM at today's public meeting in Casper, the people of Wyoming already know the value of coal mined on federal land. This bill would reinstitute the Royalty Policy Committee so that states and tribes most impacted by federal coal leasing -- the real experts on this program -- have a meaningful say. The bill also ensures that the programmatic environmental impact statement of the program can't drag on for years on end without a time limit or accountability.”

**U.S. Representative Cynthia Lummis (WY-At large):** “Any review of the federal coal program must involve meaningful consultation with states, tribes, and industry. I am proud to join with Representative Ryan Zinke and Senator Steve Daines of Montana and Wyoming Senators Mike Enzi and John Barrasso to introduce the Certainty for States and Tribes Act. This legislation would reconstitute the Royalty Policy Committee, require the committee's input on any proposed changes to royalty policy rates, and place a 3 year deadline on the completion of the federal coal program review. The bill would also take steps to ensure coal leasing can continue during the course of the review, instead of letting Secretary Jewell's moratorium on coal lease sales to continue indefinitely.”

**Congressman and Coal Caucus President, David B. McKinley, P.E.:** “I want to commend both Congressman Zinke and Senator Daines for introducing the Certainty for States and Tribes Act. This bill will go a long way in combating this Administration’s anti-fossil fuel agenda and ensuring future access to our most affordable and reliable energy sources.”

Daines’ and Zinke’s legislation is supported by Montanans and key stakeholders:

**Ashley Dennehy, Colstrip United Co-Founder:** “The Certainty for States and Tribes Act is a great piece of legislation because it puts the power back into the hands of the experts. It allows states, Indian tribes, and other stakeholders to have a say in the policies that impact them directly. As a Montanan it makes me proud to know that Senator Daines and Representative Zinke are working for a better relationship with the Department of the Interior. I hope that this will save coal towns like mine, and give us the opportunity to prosper and keep Montana an

energy exporter for many years to come. By putting the people who are directly impacted in the position of advising our federal leaders you are putting a real-world experience on the policies.”

**Musselshell County Commissioners:** “The State of Montana and the Musselshell county’s fiscal health and stability are directly tied to the coal industry. Musselshell County is very dependent on the health and vitality of the coal industry. The legislation Senator Daines and Congressman Zinke are proposing will ensure the voices of our communities, state and industry are being heard and good policy is being made. The Musselshell County commission fully supports the *Certainty for States and Tribes Act* which will provide the stability needed for the Signal Peak Energy Mine to continue to operate in Musselshell County as well as provide the necessary mitigation our community, state and coal industry need for certainty about future decisions concerning coal leases.”

**Alan Olson, Executive Director Montana Petroleum Association:** “The proposed legislation would once again allow all affected parties a seat at the table in regards to Federal mineral leasing decisions. We have many small independent oil and gas producers in Montana that will find benefit in an open and inclusive process.”

**Hal Quinn, President and CEO, National Mining Association:** “The legislation being introduced by Senator Steve Daines (R-Mont.) and Congressman Ryan Zinke (R-Mont.) brings fairness, stakeholder input, and transparency to the Department of the Interior’s (DOI) activities related to the Mineral Leasing Act. It’s introduction also coincides with the first of six DOI’s public scoping meetings designed to ‘fix’ a program that isn’t broken. NMA supports the introduction and passage of the *Certainty for States and Tribes Act*.”

**Bud Clinch, Montana Coal Council:** “The Montana Coal Council and its member companies applaud Senator Daines and Representative Zinke for introducing "The Certainty Act". Nothing is more important to any business than "certainty", clarity of the process and the regulatory requirements. Absent the sideboards provided in this legislation it's likely the government process will drag on indefinitely, further stifling production, employment and much needed revenue generation that could benefit workers, communities, and state coffers.”

**Darrin Old Coyote, Crow Tribal Chairman:** “Coal is vital to the Crow people, and we appreciate Senator Daines’ and Representative Ryan Zinke's inclusion of coal-producing Tribes on the Royalty Policy Committee that the Certainty Act would re-charter.”

**Colin Marshall, Cloud Peak Energy President and CEO:** “Cloud Peak Energy believes that it is critical for transparency in the setting of royalty and leasing policies for minerals on federal lands that the Royalty Policy Committee, which the Secretary of Interior effectively dismissed before commencing changes to such policies, be reestablished and strongly supports the goal of this legislation to do so.”

**Doug Martens, Rosebud County Commissioner:** “The coal mine in Rosebud County is currently applying for a mining expansion permit for three sections of Federal Coal. There is a good chance this coal lease moratorium will result in the loss of these applications. The mine will have no choice but to mine around the Federal land and once that happens, that federal coal will never be mined. That means those royalty taxes to the county, state and federal government are simply lost. The Certainty Act will give communities more input and certainty on federal leasing policy to ensure communities get the return on investment they should.”

## **The Certainty for States and Tribes Act:**

- Would reestablish the Royalty Policy Committee, including Governors of States, their appointees and Indian Tribes who produce federal minerals, to advise and inform the Secretary in the formation of policies and regulations; ensure greater transparency in creating royalty and leasing policy for mineral production from federal and tribal lands;
- place a firm, reasonable timeline on the programmatic review of the federal coal leasing program to occur;
- allow for existing lease applications (LBAs) and modifications (LBMs) who are under National Environment Policy Act (NEPA) review by the Department to move forward,
- and ensure the federal coal lease program lease sales are conducted in a timely and consistent manner following completion of respective NEPA reviews.

**The Senate text of the Certainty Act is available [here](#) and House text [here](#).**

Montanans' voices are [currently excluded](#) from the proposed review of the moratorium on coal leasing. According to [an announcement](#) from the Department of Interior (DOI), public meetings are currently planned to be held in May and June in Casper, Wyo.; Grand Junction, Colo.; Knoxville, Tenn.; Pittsburgh, Pa.; Salt Lake City, Utah; and Seattle, Wash.

Daines has [repeatedly called](#) on Jewell to have meaningful consultation with states and tribes, like the Crow tribe. Jewell recently visited Montana and [failed to visit](#) with the coal communities that will be impacted by her actions. He recently [blasted her decision](#) to exclude Montanans during the proposed review of their moratorium on coal leasing.

Hey guys,

We are still working with various groups on language, but I wanted to get this into your hands sooner rather than later to build on the progress of our recent meeting and ensure the Department has ample time to review prior to any hearings that may be held in the future.

Also, per my emails from yesterday, we would like to begin the process for sharing mapping data and working on land exchange details. Please advise on next steps on these requests.

This draft is not for public consumption. Please keep internal and do not share.

All the best,  
Fred

[DISCUSSION DRAFT]

114th CONGRESS

2nd Session

**H. R.**

--	--	--	--	--	--

To provide greater conservation, recreation, and economic development and to provide greater local management of federal land use in Utah, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

Mr. Bishop introduced the following bill; which was referred to the Committee on \_\_\_\_\_

**A BILL**

To provide greater conservation, recreation, and economic development and to provide greater local management of federal land use in Utah, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

**SECTION 1. Short Title**

The Act may be cited as the Utah Public Lands Initiative Act.

May 18, 2016 -

**SEC. 2. Table of Contents**

*Division A – Conservation*

- Title I  Wilderness
- Title II  National Conservation Areas
- Title III  Watershed Management Areas
- Title IV  Special Management Areas
- Title V  Arches National Park Expansion
- Title VI  Jurassic National Monument
- Title VII  Wild and Scenic Rivers
- Title VIII  Ashley Karst National Geologic and Recreation Area

*Division B – Opportunity*

- Title I  School Trust Land Consolidations
- Title II  Goblin Valley State Park
- Title III  Price Canyon State Forest
- Title IV  Deer Lodge Land Exchange
- Title V  Scofield Land Transfers
- Title VI  Land Conveyances
- Title VII  Land Disposals
- Title VIII  Canyon Country Recreation Zones
- Title IX  Red Rock Country Off-Highway Vehicle Trail
- Title X  Long-Term Native American Economic Development Certainty
- Title XI  Long-Term Energy Development Certainty
- Title XII  Long-Term Travel Management Certainty
- Title XIII  Long-Term Grazing Certainty

*Division C – Local Planning*

- Title I  Local Participation and Planning

**SEC. 3. Definitions.**

In this Act:

FEDERAL LAND.  Unless otherwise provided the term  federal land  means the lands or interests inland under the jurisdiction of the Department of the Interior or the Department of Agriculture.

# Division A Conservation

## Title I Wilderness

### SEC. 101. WILDERNESS DESIGNATIONS

In furtherance of the purposes of the Wilderness Act, and subject to valid existing rights, the following areas of the State are designated as wilderness and as components of the National Wilderness Preservation System pursuant to the Wilderness Act (16 U.S.C. 1131 et seq.).

- (A) CANDLAND MOUNTAIN.  Certain federal land in Emery County, Utah managed by the United States Forest Service comprising approximately 12,330 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Candland Mountain Wilderness
- (B) DESOLATION CANYON. --- Certain federal land in Duchesne, Uintah, Carbon, Emery, and Grand Counties managed by the Bureau of Land Management comprising approximately 473,272 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Desolation Canyon Wilderness.
- (C) HIGH UINTA. --- Certain federal land in Duchesne, Summit, and Uintah Counties, Utah managed by the United States Forest Service comprising approximately 26,701 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  High Uinta Wilderness.
- (D) MANCOS MESA.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management and the National Park Service comprising approximately 95,605 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Mancos Mesa Wilderness.
- (E) CHEESEBOX CANYON.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 14,441 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Cheesebox Canyon Wilderness.
- (F) BUTLER WASH.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 27,813 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Butler Wash Wilderness.
- (G) DARK CANYON.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 72,990 acres, as

May 18, 2016 -

generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Dark Canyon Wilderness.

(H) BEHIND THE ROCKS. Certain federal land in San Juan and Grand Counties in Utah managed by the Bureau of Land Management comprising approximately 13,025 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Behind the Rocks Wilderness.

(I) BRIDGER JACK MESA. Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 6,333 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Bridger Jack Mesa Wilderness.

(J) CEDAR MESA. Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 223,566 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Cedar Mesa Wilderness.

(K) MIKES CANYON. Certain federal land in San Juan County, Utah managed by the Bureau of Land Management and the National Park Service comprising approximately 30,549 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Mikes Canyon Wilderness.

(L) MULE CANYON. Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 5,859 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Mule Canyon Wilderness.

(M) MARSH PEAK. Certain federal land in Uintah County, Utah managed by the United States Forest Service comprising approximately 15,032 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Marsh Peak Wilderness.

(N) CLIFF PEAK. Certain federal land in Uintah County, Utah managed by the United States Forest Service comprising approximately 9,154 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Cliff Peak Wilderness.

(O) BULL CANYON. Certain federal land in Uintah County, Utah managed by the Bureau of Land Management comprising approximately 599 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the Bull Canyon Wilderness.

(P) WHITE CANYON. Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 18,886 acres, as

May 18, 2016 -

generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □White Canyon Wilderness.□

(Q) MEXICAN MOUNTAIN.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 85,150 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Mexican Mountain Wilderness.□

(R) SIDS MOUNTAIN.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 82,406 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Sids Mountain Wilderness.□

(S) MUDDY CREEK.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 72,400 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Muddy Creek Wilderness.□

(T) SAN RAFAEL REEF.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 65,146 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □San Rafael Reef Wilderness.□

(U) CRACK CANYON WILDERNESS.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 27,191 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Crack Canyon Wilderness.□

(V) DEVILS CANYON.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 8,652 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Devils Canyon Wilderness.□

(W) NELSON MOUNTAIN.□ Certain federal land in Emery County, Utah managed by the United States Forest Service comprising approximately 12,856 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Nelson Mountain Wilderness.□

(X) WILLIAM GRANSTAFF CANYON.□ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 8,983 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □William Granstaff Canyon Wilderness.□

(Y) MILL CREEK CANYON.□ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 12,358

acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mill Creek Canyon Wilderness.☐

(Z) LABYRINTH CANYON.☐ Certain federal land in Grand and Emery Counties in the state of Utah managed by the Bureau of Land Management comprising approximately 52,969 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Labyrinth Canyon Wilderness.☐

(AA) CANYONLANDS.☐ Certain federal land in San Juan and Grand Counties in the State of Utah managed by the National Park Service comprising approximately 257,607 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Canyonlands Wilderness.☐

(BB) ARCHES.☐ Certain federal land in Grand County, Utah managed by the National Park Service comprising approximately 76,259 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Arches Wilderness.☐

(CC) FISHER TOWERS.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 1,190 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Fisher Towers Wilderness.☐

(DD) MARY JANE CANYON.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 13,574 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mary Jane Canyon Wilderness.☐

(EE) GRANITE CREEK .☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 25,104 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Granite Creek Wilderness.☐

(FF) BOOK CLIFFS.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 175,491 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Book Cliffs Wilderness.☐

(GG) WESTWATER.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 32,955 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Westwater Wilderness.☐

(HH) BEAVER CREEK.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 48,514 acres, as

May 18, 2016 -

generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Beaver Creek Wilderness.☐

(II) MOUNT PEALE.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 4,302 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mount Peale Wilderness.☐

(JJ) HAMMOND CANYON.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 7,594 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Hammond Canyon Wilderness.☐

(KK) ARCH CANYON.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 4,376 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Arch Canyon Wilderness.☐

(LL) RANGE CREEK.☐ Certain federal land in Carbon County, Utah managed by the Bureau of Land Management comprising approximately 4,062 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Range Creek Wilderness.☐

(MM) DINOSAUR.☐ Certain federal land in Uintah County, Utah managed by the National Park Service comprising approximately 52,349 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Dinosaur Wilderness.☐

(NN) CEDAR MOUNTAIN. - Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 17,355 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cedar Mountain Wilderness.☐

(OO) INDIAN CREEK. - Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 6,562 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Indian Creek Wilderness.☐

(PP) STEER GULCH. - Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately \_\_\_\_\_ acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Steer Gulch Wilderness.☐

**SEC. 10 ☐ MAPS AND LEGAL DESCRIPTIONS.**

(a) IN GENERAL. □ Not later than two years from the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture as appropriate shall file a map and legal description of the wilderness areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior and the Secretary of Agriculture as appropriate may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management, the National Park Service, and the United States Forest Service.

### **SEC. 103. WILDERNESS ADMINISTRATION.**

(a) IN GENERAL. □ Subject to valid existing rights, each wilderness area established under section 101 shall be administered by the Secretary of the Interior or the Secretary of Agriculture as appropriate in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.), except that □

(1) any reference in that Act to the effective date shall be considered to be a reference to the date of enactment of this Act.

(2) with respect to wilderness areas that are administered by the Secretary of the Interior, any reference in the Wilderness Act to the Secretary of Agriculture shall be considered to be a reference to the Secretary of the Interior.

(b) FIRE, INSECTS, AND DISEASE. □ In accordance with section 4(d)(1) of the Wilderness Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate may take such measures in the Wilderness as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a State or local agency).

(c) WILDFIRE MANAGEMENT OPERATIONS. - Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment).

(d) LIVESTOCK. □

(a) The grazing of livestock in the Wilderness, if established before the date of enactment of this Act, shall be allowed to continue, subject to such reasonable regulations, policies, and practices as the Secretary considers to be necessary in accordance with □

(1) section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)); and

(2) the guidelines set forth in Appendix A of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101-405).

(b) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas, locations, or use.

(e) **OUTFITTING AND GUIDE ACTIVITIES** . □ In accordance with section 4(d)(6) of the Wilderness Act (16 U.S.C. 1133(d)(5)), commercial services (including authorized outfitting and guide activities) within the wilderness areas are authorized to the extent necessary for realizing the recreational purposes of the areas.

(f) **FISH AND WILDLIFE**

(1) **MANAGEMENT ACTIVITIES**. □ In furtherance of the purposes and principles of the Wilderness Act (16 U.S.C. 1131 et seq.), the Secretary may conduct any management activities in the Wilderness that are necessary to maintain or restore fish and wildlife populations and the habitats to support the populations, if the activities are carried out □

(A) consistent with relevant wilderness management plans; and

(B) in accordance with □

(i) the Wilderness Act (16 U.S.C. 1131 et seq.); and

(ii) the guidelines set forth in Appendix B of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101 □ 405), including the occasional and temporary use of Off-highway vehicle vehicles if the use, as determined by the Secretary, would promote healthy, viable, and more naturally distributed wildlife populations that would enhance wilderness values with the minimal impact necessary to reasonably accomplish those tasks.

(2) **EXISTING ACTIVITIES**. □ Consistent with section 4(d)(1) of the Wilderness Act (16 U.S.C. 1133(d)(1)) and in accordance with the guidelines set forth in appendix B of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101 □ 405), the State may continue to use aircraft, including helicopters, to survey, capture, transplant, monitor, and provide water for wildlife populations in the Wilderness.

(g) **ACCESS** . □ In accordance with section 5(a) of the Wilderness Act (16 U.S.C. 1134(a)), the Secretary of the Interior or the Secretary of Agriculture as appropriate shall provide the owner of State or private property within the boundary of a wilderness area adequate access to the property.

(h) **WILDLIFE WATER DEVELOPMENT PROJECTS** . □ The Secretary shall authorize structures and facilities, including existing structures and facilities, for wildlife water development projects, including guzzlers, in the wilderness areas designated by this title if □

(1) the structures and facilities will enhance wilderness values by promoting healthy, viable, and more naturally distributed wildlife populations; and

(2) the visual impacts of the structures and facilities on the wilderness can be minimized.

(i) **HUNTING, FISHING, AND TRAPPING**. □ (A) **IN GENERAL** . □ The Secretary may designate areas in which, and establish periods during which, for reasons

May 18, 2016 -

of public safety, administration, or compliance with applicable laws, no hunting, fishing, or trapping will be permitted in the Wilderness.

(B) CONSULTATION . □ Except in emergencies, the Secretary shall consult with the appropriate State agency and notify the public before taking any action under subparagraph (A).

(j) WITHDRAWALS- Subject to valid existing rights, all public land within the areas established under this title, including any land or interest in land that is acquired by the United States within the wilderness area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(k) TRAIL AND FENCE MAINTENANCE. □The Secretary of the Interior and Secretary of Agriculture shall work to ensure that existing trails and fence lines located in the lands identified in this title are adequately cleared and maintained.

#### **SEC. 104. WATER RIGHTS.**

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

- (1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the wilderness areas designated by section 101;
- (2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.
- (3) establishes a precedent with regard to any future wilderness designations.

(b) EXISTING WATER INFRASTRUCTURE. □

- (1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in wilderness areas designated by section 101 subject to such reasonable regulations deemed necessary by the Secretary of Interior and Secretary of Agriculture.

#### **SEC. 105. MILITARY OVERFLIGHTS.**

Nothing in this title restricts or precludes □

- (1) low-level overflights of military aircraft over wilderness areas designated by section 101, including military overflights that can be seen or heard within wilderness areas;
- (2) flight testing and evaluation; or
- (3) the designation or creation of new units of special use airspace, or the establishment of military flight training routes, over wilderness areas.

#### **SEC. 106. ADJACENT MANAGEMENT.**

May 18, 2016 -

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a wilderness area designated by section 101.

(b) ACTIVITIES OUTSIDE WILDERNESS AREA. □ The fact that an activity or use on land outside a wilderness area can be seen, heard or smelled within the wilderness area shall not preclude the activity or use outside the boundary of the wilderness area.

## **SEC. 10 □ NATIVE AMERICAN TREATY RIGHTS.**

Nothing in this title diminishes the treaty rights of any Indian tribe.

## **SEC. 10 □ ACQUISITION OF LAND AND INTERESTS IN LAND.**

(a) ACQUISITION. □

(1) IN GENERAL. □ The Secretary of the Interior or the Secretary of Agriculture as appropriate may acquire land or interest in land within the boundaries of the wilderness areas designated by section 101 only by donation, exchange, transfer from another federal agency, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall complete exchanges for State land located within the boundaries of the wilderness areas designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(b) INCORPORATION IN WILDERNESS AREA. □ Any land or interest in land located inside the boundary of a wilderness area that is acquired by the United States after the date of enactment of this Act shall be added to, and administered as part of the wilderness area.

## **SEC. 10 □ WILDERNESS REVIEW.**

(a) PUBLIC LAND. □

(1) FINDING. □ Congress finds that, for purposes of section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782), the public land administered by the Bureau of Land Management in the following wilderness study areas, as depicted on the map entitled Utah PLI Wilderness map and dated \_\_\_\_\_, have been adequately studied for wilderness designation:

A. 43,323-acre area known as Winter Ridge Wilderness Study Area;

B. 7,051-acre area known as Jack Canyon Wilderness Study Area;

C. 6,557-acre area known as Squaw and Papoose Wilderness Study Area;

D. 20,404-acre area known as Desolation Canyon Wilderness Study Area included within the Desolation Canyon National Conservation Area as designated by this Act and as depicted on the map;

E. 2,517-acre area known as Daniels Canyon Wilderness Study Areas; and

F. 945-acre known as Cross Canyon Wilderness Study Area.

(2) RELEASE .  Any land managed by the Bureau of Land Management within the areas described in paragraph (1) that is not designated as wilderness by this title

(A) shall not be subject to section 603(c) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782(c));

(B) shall be managed in accordance with land management plans adopted under section 202 of that Act (43 U.S.C. 1712); and

(C) shall no longer be subject to Secretarial Order No. 3310 issued by the Secretary of the Interior on December 22, 2010.

(D) shall be managed pursuant to this Act if released lands otherwise lie within a designated area pursuant to this Act.

## SEC. 110. AIRSHEDS.

(a) It is the intent of Congress that wilderness areas designated under section 101 shall not be designated as Class I airsheds under the Clean Air Act (42 USC 7401-7661) unless Class I status is agreed to by the State of Utah under existing authorities or the areas designated under section 101 are already managed as Class I airsheds.

## Title II National Conservation Areas

### SEC. 01. NATIONAL CONSERVATION AREAS.

(a) ESTABLISHMENT.  Subject to valid existing rights, the following areas in the State are hereby established as National Conservation Areas:

- (1) BEACH DRAW.  Certain federal land, comprising approximately 659 acres administered by the Bureau of Land Management in Uintah County, Utah as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the  Beach Draw National Conservation Area.
- (2) DIAMOND MOUNTAIN.  Certain federal land, comprising approximately 30,391 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the  Diamond Mountain National Conservation Area.
- (3) DOCS VALLEY.  Certain federal land, comprising approximately 8,544 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the  Docs Valley National Conservation Area.

May 18, 2016 -

(4) STONE BRIDGE DRAW. □ Certain federal land, comprising approximately 2,415 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Stone Bridge Draw National Conservation Area. □

(5) STUNTZ DRAW. □ Certain federal land, comprising approximately 2,284 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Stuntz Draw National Conservation Area. □

(6) SAN RAFAEL SWELL. □ Certain federal land, comprising approximately 329,933 acres administered by the Bureau of Land Management in Emery County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □San Rafael Swell National Conservation Area. □

(7) LABYRINTH CANYON. □ Certain federal land, comprising approximately 35,049 acres administered by the Bureau of Land Management in Emery County and Grand County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Labyrinth Canyon National Conservation Area. □

(8) MUDDY CREEK. □ Certain federal land, comprising approximately 55,208 acres administered by the Bureau of Land Management in Emery County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Muddy Creek National Conservation Area. □

(9) COLORADO RIVER. □ Certain federal land, comprising approximately 116,156 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Colorado River National Conservation Area. □

(10) INDIAN CREEK. - Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Indian Creek National Conservation Area. □

(11) BEARS EARS. - Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management and U.S. Forest Service in San Juan County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Bears Ears National Conservation Area. □

**SEC. 0 □ MAP AND LEGAL DESCRIPTION. □**

May 18, 2016 -

(a) IN GENERAL. □ Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the National Conservation Areas established by sections 201, 205 and 206 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management and the United States Forest Service.

### **SEC. □03. ADMINISTRATION OF NATIONAL CONSERVATION AREAS**

(a) PURPOSES. - In accordance with this title, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other applicable laws, the Secretary of the Interior shall manage the National Conservation Areas established by section 201 in a manner that:

- 1) Protects, conserves, and enhances the unique and nationally important historic, cultural, scientific, scenic, recreational, archaeological, natural, and educational resources of the Conservation Area;
- 2) Maintains and enhances cooperative and innovative management practices between resource managers, private landowners, and the public in the Conservation Area; and
- 3) Recognizes and maintains to the extent practicable historic uses of the Conservation Area.

(b) MANAGEMENT PLANS.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each conservation area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the conservation area that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act.

### **SEC. □04. GENERAL PROVISIONS.**

(a) WITHDRAWALS-

- (1) Subject to valid existing rights, all federal land within the National Conservation Areas established under sections 201, 205, and 206 , including any

land or interest in land that is acquired by the United States within the conservation area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(2) EXCEPTION. □ Notwithstanding the withdrawal in paragraph (1), for the Desolation Canyon National Conservation Area, White River National Conservation Area, and the Book Cliffs Sportsmens National Conservation Area, the Secretary of the Interior may lease oil and gas resources in accordance with the Mineral Leasing Act (30 U.S.C. 181 et seq.) subject to the following conditions:

(A) the area may be accessed only by directional drilling from a lease held on the date of enactment of this Act on land that is adjacent to, and outside of, the conservation area.

(B) the lease shall prohibit surface occupancy and surface disturbance for any mineral activities within the national conservation areas.

(b) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, in national conservation areas established under sections 201, 205, and 206 the Secretary of the Interior may take such measures in the NCA as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a state or local agency).

(c) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) in national conservation areas established under sections 201, 205, and 206 . subject to reasonable regulations as prescribed by the Secretary

(d) LIVESTOCK . □

(1) IN GENERAL . □ Within the national conservation areas established under sections 201, 205, and 206, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such

maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue.

#### (4) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas or use.

(e) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this title precludes the Secretary of the Interior from renewing easements or rights-of-way in national conservation areas established under sections 201, 205, and 206 in existence on the date of enactment of this Act, in accordance with this Act and existing law.

(f) ADJACENT MANAGEMENT.

(a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around a Conservation area designated by sections 201, 205 and 206 .

(b) ACTIVITIES OUTSIDE CONSERVATION AREA.  The fact that an activity or use on land outside a conservation area established under sections 201, 205, and 206 can be seen, heard, or smelled within the conservation area shall not preclude the activity or use outside the boundary of the Conservation area.

(g) OUTFITTING AND GUIDE ACTIVITIES .  Commercial services (including authorized outfitting and guide activities) within the national conservation areas established under sections 201, 205, and 206 are authorized.

(h) FISH AND WILDLIFE .  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping and use of helicopters to maintain healthy wildlife populations, within the national conservation areas established under sections 201, 205, and 206.

(i) ACCESS .  The Secretary of the Interior shall provide the owner of State or private property within the boundary of a conservation area established under sections 201, 205, and 206 access to the property.

(j) WILDLIFE WATER DEVELOPMENT PROJECTS .  Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the national conservation areas established under sections 201, 205, and 206 are authorized.

(k) HUNTING AND FISHING. □ Within the national conservation areas established under sections 201, 205, and 206, hunting and fishing in areas where hunting and fishing has been allowed on lands and waters owned or managed by the Department of the Interior or Department of Agriculture before the date of enactment of this Act, shall continue.

(l) □ WATER RIGHTS

(a) STATUTORY CONSTRUCTION. □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the National Conservation Areas designated by this title;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.

(3) establishes a precedent with regard to any future NCA designations.

(b) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in NCAs designated by this title subject to such reasonable regulations deemed necessary by the Secretary of Interior and Secretary of Agriculture.

(m) WILDERNESS REVIEW. □

(a) Congress finds that the national conservation areas described in sections 201, 205, and 206 have been adequately studied for wilderness character and wilderness designation pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and are no longer subject to the requirement of subsection (c) of such section pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.

(b) The Secretary of the Interior may not promulgate or issue any system-wide regulation, directive, instruction memorandum or order that would direct management of the federal lands designated as national conservation areas in sections 201, 205, and 206 in a manner contrary to this title.

(n) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of the Interior from conducting vegetation management projects within the national conservation areas established under sections 201, 205, and 206 in a manner consistent with the purposes of the NCA.

(o) OFF-HIGHWAY VEHICLE VEHICLES.

(1) IN GENERAL- Except in cases in which Off-highway vehicle vehicles are needed for administrative purposes, including project construction and maintenance, or to respond to an emergency, the use of Off-highway vehicle vehicles shall be permitted only on designated routes within the national conservation areas.

(2) DESIGNATED ROUTES

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized on January 1, 2016;
- (ii) minimizes conflict with sensitive habitat or cultural or historical resources; and
- (iii) does not interfere with private property or water rights.

(B) CLOSURE OR REROUTING-

(i) IN GENERAL- A designated route may be temporarily closed or rerouted, for a period not to exceed two years, if the Secretary of the Interior, in consultation with the State, and relevant local government within the State determines that--

- (I) the designated route is damaging cultural resources or historical resources;
- (II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.
- (III) modification of the designated route would not significantly affect access within the conservation area.
- (IV) all other options, other than a temporary closure or rerouting, have been exhausted.
- (V) an alternative route has been provided, which can include routes previously closed.

(ii) If temporary closure and rerouting options as outlined in section (i) above have been exhausted, and the designated route continues to damage sensitive habitat or cultural or historical resources, the minimum track of the designated route necessary to protect said resources may be permanently closed.

(C) NOTICE- The Secretary of the Interior shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily or permanently closed through--

- (i) use of appropriate signage within the Conservation Area;
- (ii) use of the internet and web resources.

(3) PERMANENT ROAD CONSTRUCTION-

(1) After the date of enactment of this Act, except as necessary for administrative purposes or to respond to an emergency, the Secretary of the Interior shall not construct any permanent road within the conservation area designated under section 201, 205, or 206

(p) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(q) SCIENTIFIC INVESTIGATIONS. □ The Secretary of Interior and Secretary of Agriculture shall provide for opportunities, including through partnerships with colleges, universities, schools, scientific institutions, non-profit organizations, researchers, and scientists to conduct research and provide educational and interpretive services within the National Conservation Areas established under 201, 205, and 206. Research findings from the national conservation areas may be used to develop land use solutions that meet human needs while maintaining ecological and economic viability in the region.

(r) RESEARCH AND INTERPRETIVE FACILITIES. □

(1) IN GENERAL. □ The Secretary of Interior and Secretary of Agriculture may establish facilities for □

(A) the conduct of scientific research; and

(B) the interpretation of the historical, cultural, scientific, archeological, natural and educational resources of the national conservation areas.

(2) GRANTS; COOPERATIVE AGREEMENTS. □ In carrying out subsection (s), the Secretary of the Interior and Secretary of Agriculture may make grants to, or enter into cooperative agreements with the State of Utah, local governmental entities, other institutions and organizations, and private entities to conduct research, develop scientific analyses, and carry out any other initiative relating to the restoration or conservation of the Conservation Areas.

(s) PARTNERSHIPS. □ In recognition of the value of collaboration to foster innovation and enhance research and development efforts, the Secretary of the Interior and the Secretary of Agriculture shall encourage partnerships, including public-private partnerships, between and among Federal, State and local agencies, academic institutions, non-profit organizations and private entities.

(t) RECREATION. □ The Secretary shall continue to authorize, maintain, and enhance the recreational use of the national conservation areas, including hunting, fishing, camping, hiking, backpacking, cross-country skiing, hang gliding, paragliding, rock climbing, canyoneering, sightseeing, nature study, horseback riding, mountain biking, rafting, Off-highway vehicle recreation on authorized routes, and other recreational activities, so long as such recreational use is consistent with the purposes of the conservation area, this section, and applicable management plans.

(u) ACQUISITION. □

(1) IN GENERAL. □ The Secretary of the Interior or the Secretary of Agriculture as appropriate may acquire land or interest in land within the boundaries of the national conservation areas designated by section by this title only by donation, exchange, transfer from another federal agency, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall complete exchanges for State land located within the boundaries of the national conservation areas designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(b) INCORPORATION IN NATIONAL CONSERVATION AREA. □ Any land or interest in land located inside the boundary of a national conservation area that is acquired by the United States after the date of enactment of this Act shall be added to, and administered as part of the national conservation area.

**SEC. 05. BOO CLIFFS SPORTSMENS NATIONAL CONSERVATION AREA**

(a) ESTABLISHMENT. Subject to valid existing rights, certain federal land, comprising approximately 42,352 acres administered by the Bureau of Land Management in Uintah County in the State of Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, is established as Book Cliffs Sportsmens National Conservation Area.

(b) PURPOSES. The purpose of the Book Cliffs Sportsmen's National Conservation Area (referred to in this section as the "NCA") is to protect hunting and fishing opportunities and habitat, manage and restore fish and wildlife habitat, and facilitate hunting and fishing opportunities in a natural environmental.

(c) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the NCA.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Advisory Council. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Council into the management plan the Secretary of the Interior shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(3) REQUIREMENTS- The management plan shall be written in accordance with subsection (b)

(4) Uses- The Secretary of the Interior shall allow only such uses of the NCA that would further the purposes of the NCA.

(d) BOOK CLIFFS SPORTSMEN'S NATIONAL CONSERVATION AREA ADVISORY COUNCIL.

(1) ESTABLISHMENT. Within 180 days after the date of enactment of this Act, the Secretary of the Interior shall establish the Book Cliffs Sportsmens National Conservation Area Advisory Council (referred to as the Advisory Council) to:

(A) advise the Secretary of the Interior with respect to development and implementation of the NCA management plan to the greatest extent allowable by law.

(B) encourage and promote local participation in the decision making processes affecting the NCA.

(2) MEMBERSHIP. The Advisory Council shall consist of 11 members.

(3) MEMBERS. The Secretary of the Interior shall appoint one member from each of the from the following groups:

(i) State Division of Wildlife Resources Director or designee.

(ii) Game bird hunting organizations.

- (iii) Wildlife conservation organizations.
- (iv) Big game hunting organizations.
- (v) a cold water fishing organization.
- (vi) the tourism, outfitter, or guiding industry.
- (vii) the hunting or shooting equipment retail industry.
- (viii) Ute Tribe representative.
- (ix) The agriculture industry.
- (x) the ranching industry designee from Uintah County.
- (xi) Uintah County Commission Chairman or its designee.

(4) ELIGIBILITY. □ The Secretary of the Interior shall determine that all individuals appointed to the Advisory Council, and the organization or industry each individual represents, support sustainable-use hunting, wildlife conservation, and recreational shooting.

(1) TERMS. □

(A) IN GENERAL. □ Except for the initial appointees, members of the Advisory Council shall be appointed for a term of 4 years. Members shall not be appointed for more than 3 consecutive or nonconsecutive terms.

(2) TERMS OF INITIAL APPOINTEES. □ The Secretary of the Interior shall appoint the initial members of the Advisory Council as follows:

- (i) 5 members shall be appointed for a term of 4 years;
- (ii) 4 members shall be appointed for a term of 3 years; and
- (iii) 2 members shall be appointed for a term of 2 years.

(5) PRESERVATION OF PUBLIC ADVISORY STATUS. □ No individual may be appointed as a member of the Advisory Council while serving as an officer or employee of the Federal Government.

(6) VACANCY AND REMOVAL. □

(A) IN GENERAL. □ Any vacancy on the Advisory Committee shall be filled in the manner in which the original appointment was made.

(B) REMOVAL. □ Advisory Committee members shall serve at the discretion of the Secretary of the Interior and may be removed at any time for good cause.

(7) CONTINUATION OF SERVICE. □ Each member may continue to serve after the expiration of the term of office to which such member was appointed until a successor has been appointed.

(8) CHAIR. □ The Chair of the Advisory Council shall be appointed to a 3-year term by the Secretary of the Interior from among the members of the Advisory Council. An individual appointed to the Advisory Council under (4)(2)(iii) shall be eligible to serve as Chair, but may serve for two years. An individual may not be appointed as Chair for more than 2 consecutive or nonconsecutive terms.

(9) PAY AND EXPENSES. □ Members of the Advisory Council shall serve without pay, but each member of the Advisory Council may be reimbursed for travel and lodging incurred through attending meetings of the Advisory Council (including approved workgroup or subgroup meetings) in the same amounts and under the same conditions as Federal employees in accordance with section 5703 of title 5, United States Code.

(10) MEETINGS. □

May 18, 2016 -

- (A) IN GENERAL. □ The Advisory Council shall meet at the call of the Secretary of the Interior, the chair, or a majority of the members, but not less frequently than twice annually.
- (B) OPEN MEETINGS. □ Each meeting of the Advisory Council shall be open to the public.
- (C) PRIOR NOTICE OF MEETINGS. □ Timely notice of each meeting of the Advisory Committee shall be published in the Federal Register and be submitted to publications of general circulation.
- (D) SUBGROUPS. □ The Advisory Council may establish such workgroups or subgroups as it deems necessary for the purpose of compiling information or conducting research. However, such workgroups or subgroups may not conduct business without the direction of the Advisory Council.
- (11) QUORUM. □ Seven members of the Advisory Council shall constitute a quorum.
- (12) EXPENSES. □ The expenses of the Advisory Council that the Secretary of the Interior determine to be reasonable and appropriate shall be paid by the Secretary of the Interior.
- (13) ADMINISTRATIVE SUPPORT AND TECHNICAL SERVICES. □ The Secretary of the Interior shall provide to the Advisory Council the administrative support and technical services.
- (14) ANNUAL REPORT. □
  - (1) REQUIRED. □ Not later than September 30 of each year, the Advisory Council shall submit a report to the Secretary of the Interior, the Committee on Natural Resources of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate. If circumstances arise in which the Advisory Council cannot meet the September 30 deadline in any year, the Secretary of the Interior shall advise the Chair of each such Committee of the reasons for such delay and the date on which the submission of the report is anticipated.
  - (2) CONTENTS. □ The report required by paragraph (1) shall describe □
    - (A) the activities of the Advisory Committee during the preceding year;
    - (B) the reports and recommendations made by the Advisory Council to the Secretary of the Interior during the preceding year; and
    - (C) an accounting of actions taken by the Secretary of the Interior as a result of the recommendations.
- (15) VEGETATION MANAGEMENT: Within the NCA, the Secretary of the Interior may authorize vegetation management including through mechanical means to the extent necessary to control fire, insects, or disease to promote and improve wildlife habitat and diversity as consistent with the purposes of the NCA.

**SEC. 06. - BEARS EARS NATIONAL CONSERVATION AREA ADDITIONAL PROVISIONS**

(a) FINDINGS. □

Congress finds the following:

May 18, 2016 -

- (1) The lands within Bears Ears National Conservation Area have been utilized by Native Americans for thousands of years.
- (2) The unique, intact archaeological record found throughout the Bear Ears National Conservation Area is sacred to numerous Native American tribes and Pueblos and is of great significance to American history.
- (3) Native American Tribes and Pueblos maintain deep connections and commitments to the lands within the Bears Ears National Conservation Area and continue to rely on and utilize these lands for practicing ceremonies, spiritual rejuvenation, gathering herbs, firewood and cedar poles, hunting for game, and caretaking of sacred places.
- (4) Many local residents, many with early pioneer heritage, have similarly strong attachments to the land and associated lifestyles, both vocational and avocational. Many visitors develop similar attachments and appreciation for these landscapes.

(b) ADDITIONAL PURPOSES

ADDITIONAL PURPOSES. - In accordance with this title, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), and other applicable laws, the Secretary of the Interior shall manage the Bears Ears National Conservation Areas established by section 201 in a manner that:

- (A) Provides for traditional access by indigenous persons for culturally significant subsistence, including but not limited to traditional gathering and hunting, and cultural and religious uses within the National Conservation Area;
- (B) Develops policies, consistent with the Native American Graves Repatriation and Protection Act, to minimize disturbance of human remains from permitted uses of the National Conservation Area;
- (C) Integrates Native American Traditional Ecological Knowledge (TEK)(36 *CFR* 219.19) to improve social, economic, and ecological sustainability in accordance with US Forest Service 2012 Planning Rule regulations, (FSH 1909.12, Zero code □ Ch10);

(c) COOPERATING AGENCIES

COOPERATING AGENCIES. □The Secretaries shall designate and involve as cooperating agencies interested Tribes and Pueblos that trace their culture and heritage to the lands within the Bear Ears National Conservation Area in accordance with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*).

(d) TRIBAL EMPLOYMENT

In employing individuals to perform any construction, maintenance, interpretation, or other service in the Bear Ears National Conservation Area, the Secretaries shall, insofar as practicable, give priority consideration to members of Native American tribes that meet publically posted job qualifications and criteria consistent with standard federal hiring practices.

May 18, 2016 -

(e) **NATIVE AMERICAN LIAISON**

The Secretary of the Interior shall appoint a staff member to serve as a liaison to the Native American tribes that enter into cooperating agency status pursuant to subsection (c). The liaison shall work to ensure the voice and perspective of the cooperating tribal entity is represented in the implementation management of the NCA. This Native American liaison shall serve on the San Juan County Advisory Council, created under Division C of this Act, in the position slotted for a federal land management agency.

**SEC. 000 INDIAN CREE NATIONAL CONSERVATION AREA  
ADDITIONAL PROVISIONS**

(a) **ADDITIONAL PURPOSE:**

1. Create an experimental range that allows for flexibility in grazing management to promote rangeland health and/or to respond to research needs.
2. Promotes scientific research and conducts research projects on the interactive affects of land use and the environment; and

DRAW STUNTZ DRAW BEACH DRAW MCCOO RIDGE AND DIAMOND  
MOUNTAIN NATIONAL CONSERVATION AREAS**

(a) Nothing in this title shall effect existing or future sage grouse conservation projects, including the management of vegetation through mechanical means within the Doc Valley, Stone Bridge Draw, Stuntz Draw, Beach Draw, and Diamond Mountain National Conservation Areas established under section 201.

**Title III Watershed Management Areas**

**SEC. 301. WATERSHED MANAGEMENT AREAS**

- (a) **ESTABLISHMENT.** The following watershed management areas are hereby established in the State of Utah, subject to valid existing rights:
- (1) **ASHLEY SPRING.** The Ashley Spring Watershed Management Area consisting of approximately 10,951 acres of the Ashley National Forest in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (2) **DRY FORK.** The Dry Fork Watershed Management Area consisting of approximately 9,641 acres of the Ashley National Forest in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (3) **CASTLE VALLEY.** The Castle Valley Watershed Management Area consisting of approximately 34,248 acres of the Manti-LaSal National Forest in Grand County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.

- (4) WIDDOP MOUNTAIN. □ The □Widdop Mountain Watershed Management Area□ consisting of approximately 8,025 acres of the Ashley National Forest in Summit County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
- (5) EAST FORK SMITHS FORK. □ The □East Fork Smiths Fork Watershed Management Area□ consisting of approximately 3,178 acres of the Ashley National Forest in Summit County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.

(b) MAP AND LEGAL DESCRIPTION. □

- (1) IN GENERAL. □Two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Watershed Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry of the Senate.
- (2) EFFECT. □The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.
- (3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 30 □ ADMINISTRATION OF WATERSHED MANAGEMENT AREAS.**

(a) PURPOSES. □ The purposes of the watershed management areas are □

- (1) to ensure the protection of the quality of water from the watershed management areas;
- (2) to allow visitors to enjoy the scenic, natural, cultural, recreational, and wildlife values of the watershed management areas;
- (3) to provide for the management, development, and use of drinking water within the watershed areas;
- (4) to allow for the reintroduction of beavers in appropriate watershed management areas;
- (5) to allow for reintroduction of flora (land and aquatic), bird, fish and animal fauna in special management areas and watershed management areas;
- (6) to provide for the restoration of watershed and re-establish ecosystem health in areas damaged by threatened by insects, or disease; and
- (7) to provide for the restoration of ecosystems damaged or threatened by overpopulation of overpopulation of any plant, aquatic or animal species.

(B) MANAGEMENT. □

- (1) IN GENERAL. □ The Secretary shall manage the watershed areas □
  - (A) in a manner consistent with the purposes described in subsection (a);
  - (B) in accordance with □

May 18, 2016 -

- (i) the laws (including regulations) generally applicable to the National Forest System;
- (ii) this section; and
- (iii) any other applicable law (including regulations).

(c) MANAGEMENT PLAN .□

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of Agriculture shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of the Interior shall allow only such uses of the watershed management area that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act.

**SEC. 303 GENERAL PROVISIONS.**

(a) MOTORIZED VEHICLES. □

(1) IN GENERAL- Except in cases in which motorized vehicles are needed for administrative purposes or to respond to an emergency, the use of motorized vehicles shall be permitted only on designated routes within the Watershed Management Areas.

(b) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(c) ROAD CONSTRUCTION- The Secretary shall be permitted to construct roads for administrative or emergency purposes, or if a temporary road is needed to facilitate fuel reduction for water protection purposes.

(d) OVERSNOW VEHICLES .□ Where permitted prior to the date of enactment of this Act the Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Watershed Management Areas when there is at least six inches of snow coverage.

(e) FIRE, INSECTS, AND DISEASE .□ In accordance with this title, the Secretary of Agriculture may□

(A) in consultation with state, local, and water districts who own or control water

May 18, 2016 -

resources within Watershed Management Areas, the Secretary of Agriculture may carry out measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Watershed Management Areas to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(f) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or affects the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(g) POST-FIRE REHABILITATION. □ The Secretary may conduct post-fire rehabilitation in the watershed areas, consistent with this title and in accordance with applicable law.

(h) VEGETATION MANAGEMENT. □ The Secretary of Agriculture shall conduct vegetation management projects within the Watershed Management Areas if projects protect or improve water quality or maintain or restore the characteristics of ecosystem composition and structure.

(i) TIMBER HARVESTING. □ Within the Watershed Management Areas, timber harvesting may be utilized if the primary purpose is to restore or improve forest health and watershed function or to further the purposes described in this title.

(j) LIVESTOCK GRAZING . □

(1) IN GENERAL . □ Within the watershed management areas established under sections 301, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue.

Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

#### (5) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(k) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this Act precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this Act and existing law.

#### (l) ADJACENT MANAGEMENT.

(a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around a Watershed Management area designated by section 301.

(m) ACTIVITIES OUTSIDE WATERSHED MANAGEMENT AREA.  The fact that an activity or use on land outside a Watershed Management area can be seen, heard, or smelled within the Watershed Management area shall not preclude the activity or use outside the boundary of the Watershed Management area.

(n) OUTFITTING AND GUIDE ACTIVITIES.  Commercial services (including authorized outfitting and guide activities) within the Watershed Management Areas are authorized.

(o) FISH AND WILDLIFE.  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Watershed Management Area.

(p) ACCESS.  The Secretary of Agriculture shall provide the owner of State or private property within the boundary of a Watershed Management Area reasonable access to the owner's property.

May 18, 2016 -

(q) WILDLIFE WATER DEVELOPMENT PROJECTS .□ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the Watershed Management Areas are authorized.

(r) HUNTING AND FISHING. □

Within the Watershed Management Areas in where hunting and fishing on lands and waters owned of managed by the Department of Agriculture was allowed before the date of enactment of this Act, shall continue.

(s) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION .□ Nothing in this title□

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Watershed Management Areas designated by this title;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.

(3) establishes a precedent with regard to any future Watershed Management Area designations.

(b) EXISTING WATER INFRASTRUCTURE.□

(1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in Watershed Management Areas designated by section 101 subject to such reasonable regulations deemed necessary by the Secretary of Interior and Secretary of Agriculture.

(t) WITHDRAWAL .□

(1) IN GENERAL .□ Subject to valid rights in existence on the date of enactment of this title, the Federal land within the Watershed Management Areas designated by section 301 are withdrawn from□

(a) all forms of entry, appropriation, and disposal under the federal land laws;

(b) location, entry, and patent under the mining laws; and

(c) operation of the mineral leasing, mineral materials, and geothermal leasing laws

(u) ASHLEY SPRING AND DRY FORK.-- The management plans for the Ashley Spring and Dry Fork management areas shall include provisions for the development of containment ponds, water pipes, and other improvements to deliver water to the Ashley Valley should the flow of Ashley Spring become diminished or impaired.

## **Title IV □Special Management Areas**

### **SEC. 401. HIGH UINTAS SPECIAL MANAGEMENT AREA.**

ESTABLISHMENT. □ Subject to valid existing rights, the approximately 20,683 acres of the Ashley National Forest in Uintah and Duchesne County, Utah as generally depicted on the map entitled □Utah PLI High Uintas Special Management Area Map□and dated \_\_\_\_\_.

- (a) PURPOSES □ The purposes of the High Uintas Special Management Area (referred to in this title as the Area) is to maintain the presently existing wilderness character of the area and to all for the continued use of winter Off-highway vehicle vehicles.

**SEC. 40 □ HIGH UINTAS SPECIAL MANAGEMENT AREA MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the High Uintas Special Management Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 403. ADMINISTRATION OF THE HIGH UINTAS SPECIAL MANAGEMENT AREA.**

- (a) ADMINISTRATION . □

(1) IN GENERAL . □ The Secretary of Agriculture shall administer the High Uintas Special Management Area in accordance with □

(a) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);

(b) this title; and

(c) other applicable laws.

- (b) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of the Interior shall allow only such uses of the special management area that would further the purposes outlined in subsection 401(a) of this Title and in consultation and coordination with the Public Lands Initiative

May 18, 2016 -

Resource Advisory Councils established under Division C of this Act. Other uses of the special management areas shall:

- (A) maintain the presently existing wilderness character of the special management area.
- (B) allow for non motorized recreational opportunities to occur within the Area including skiing, biking, hiking, fishing, hunting, horseback riding, snowshoeing, and camping;
- (C) allow for the continued use and access of Off-highway vehicle winter vehicles including snowmobiles
- (D) prohibit mineral development;
- (E) prohibit new permanent road construction; and
- (F) prohibit commercial timber harvesting.

#### **SEC. 404. HIGH UINTAS SPECIAL MANAGEMENT AREA GENERAL PROVISIONS.**

(a) **WITHDRAWALS-**

(1) Subject to valid existing rights, all federal land within the High Uintas Special Management Area established under sections 401, including any land or interest in land that is acquired by the United States within the conservation area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(b) **FIRE, INSECTS, AND DISEASE** . □ In accordance with this title, the Secretary of the Agriculture may take such measures in the High Uintas Special Management Area as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a state or local agency).

(c) **WILDLAND FIRE OPERATIONS** . □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or affects the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(d) **LIVESTOCK** . □

(1) **IN GENERAL** . □ Within the High Uintas Special Management Area the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(4) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas or use.

(e) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around the High Uintas Special Management Area.

(b) ACTIVITIES OUTSIDE THE AREA. □ The fact that an activity or use on land outside the High Uintas Special Management Area can be seen, heard, or smelled within the Area shall not preclude the activity or use outside the boundary of the Area.

(f) OUTFITTING AND GUIDE ACTIVITIES. □ Commercial services (including authorized outfitting and guide activities) within the High Uintas Special Management Area are authorized.

May 18, 2016 -

(g) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping and use of helicopters to maintain healthy wildlife populations, within the High Uintas Special Management Area

(h) ACCESS . □ The Secretary of the Interior shall provide the owner of State or private property within the boundary of the High Uintas Special Management Area.

(i) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the High Uintas Special Management Area are authorized.

(j) HUNTING AND FISHING. □ Within the Area, hunting and fishing, in areas where hunting and fishing has been allowed on lands and waters owned of managed by the Department of Agriculture before the date of enactment of this Act, shall continue.

(k). □ WATER RIGHTS

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the High Uintas Special Management Area;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act;

(3) establishes a precedent with regard to any future national conservation areas designations.

(b) UTAH WATER LAW. □ The Secretary of the Interior shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the High Uintas Special Management Area.

(c) EFFECTS ON STATE WATER RIGHTS. □ The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects □

(1) any water rights granted by the State;

(2) the authority of the State in adjudicating water rights;

(3) definitions established by the State with respect to the term □beneficial use□ or □priority of rights□

(4) terms and conditions for groundwater withdrawal;

(5) the use of groundwater resources that are in accordance with State law;  
or

(6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this Act shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in

the future to prevent the degradation of the water supply in the High Uintas Special Management Area.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □The term □water resource facilities□means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

**(l) PERMANENT ROAD CONSTRUCTION-**

(1) After the date of enactment of this Act, except as necessary for administrative purposes or to respond to an emergency, the Secretary of Agriculture shall not construct any permanent road within the High Uintas Special Management Area

(m) TEMPORARY ROAD CONSTRUCTION -- Except as necessary to meet the minimum requirements for the administration of the High Uintas Special Management Area, and to protect public health and safety, the establishment of temporary roads is prohibited.

(n) USE OF MOTORIZED OR MECHANIZED VEHICLES -- Except as necessary to meet the minimum requirements for the administration of the High Uintas Special Management Area and to protect public health and safety the use of Off-highway vehicle or mechanized vehicles is prohibited.

(o) COMMERCIAL TIMBER HARVESTING □Commercial timber harvesting within the High Uintas Special Management Area is prohibited.

(p) OVERSNOW VEHICLES . □ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the High Uintas Special Management Area when there is at least six inches of snow coverage.

**SEC. 405. LITTLE WEST FORK □ BLACKS SPECIAL MANAGEMENT AREA.**

(A) ESTABLISHMENT. □ Subject to valid existing rights, the approximately 8,231.25 acres of the Wasatch Cache National Forest in Summit County, Utah as generally depicted on the map entitled □Utah PLI Little West Fork Blacks Special Management Area Map□and dated \_\_\_\_\_.

(B) MAP AND LEGAL DESCRIPTION. □

(1) IN GENERAL. □Two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Little West Fork Blacks Special Management Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(2) EFFECT. □The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 406. ADMINISTRATION OF LITTLE WEST FORK BLACKS SPECIAL MANAGEMENT AREA.**

(a) PURPOSE . □ Little West Fork Blacks Special Management Area is to manage, maintain, and restore watershed and ecosystem function and aquatic habitat within the Area.

(b) ADMINISTRATION . □

(A) IN GENERAL . □ The Secretary of Agriculture shall administer the Little West Fork Blacks Special Management Area

- (i) in a manner that promotes, protects, and manages the resources of the Little West Fork Blacks Special Management Area described in subsection (a); and
- (ii) in accordance with □

- (I) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);
- (II) this Act; and
- (III) other applicable laws.

(c) MANAGEMENT PLAN . □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of the Interior shall allow only such uses of the special management area that would further the purposes outlined in subsection 406(a) of this Title and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act. Other uses of the special management areas shall:

(A) include skiing, biking, hiking, fishing, hunting, horseback riding, snowmobiling, motorcycle riding, off-highway vehicle use, snowshoeing, and camping.

(B) allow for reintroduction of flora (land and aquatic), bird, fish and animal fauna in special management areas;

(C) restore watershed and re-establish ecosystem health in areas damaged by threatened by insects, or disease;

(D) restore balance of ecosystem damaged or threatened by overpopulation of overpopulation of any plant, aquatic or animal species.

(E) Allow fuel reduction and forest health treatment to restore watershed and ecosystem function, reduce hazardous fuels, and to protect property in the wildland urban interface.

**SEC. 40 LITTLE WEST FORK BLACKS SPECIAL MANAGEMENT AREA GENERAL PROVISIONS.**

**(a) OFF-HIGHWAY VEHICLE VEHICLES.**

(1) IN GENERAL- Except in cases in which Off-highway vehicle vehicles and non-mechanized vehicles are needed for administrative purposes or to respond to an emergency, the use of Off-highway vehicle vehicles shall be permitted only on designated routes within the Little West Fork Blacks Special Management Areas.

**(2) MANAGEMENT-**

(A) IN GENERAL- The Secretary of Agriculture shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized on January 1, 2016;

(ii) minimizes conflict with sensitive habitat or cultural or historical resources; and

(iii) does not interfere with private property or water rights.

**(B) CLOSURE OR REROUTING.**

(i) IN GENERAL- A designated route may be closed or rerouted, if the Secretary of Agriculture, in consultation with the State, or relevant local government within the State, subject to subparagraph (C), determines that--

(I) the designated route is damaging cultural resources or historical resources;

(II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.

May 18, 2016 -

- (III) modification of the designated route would not significantly affect access within the conservation area.
- (IV) (IV) all other options, other than a temporary closure or rerouting, have been exhausted.
- (V) an alternative route has been provided, which can include routes previously closed.

(C) NOTICE- The Secretary of Agriculture shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily closed through--

- (i) use of appropriate signage within the Special Management Areas.;
- (ii) use of the internet and web resources.

(b) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(c) PERMANENT ROAD CONSTRUCTION- Except as necessary for administrative purposes or to respond to an emergency, the Secretary of Agriculture shall not construct any permanent road within the Special Management Areas after the date of enactment of this Act.

(d) TEMPORARY ROAD CONSTRUCTION.  Temporary road construction shall be permitted to fulfill the purposes of the area, including for fuel reduction and forest health management treatments, including prescribed burns.

(e) OVERSNOW VEHICLES .  The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Special Management Areas when there is at least six inches of snow coverage.

(f) FIRE, INSECTS, AND DISEASE .  In accordance with this title, the Secretary of Agriculture may

- (A) carry out measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Special Management Areas; and
- (B) coordinate those measures with the appropriate State or local agency.

(h) WILDLAND FIRE OPERATIONS.  Consistent with the purposes of this Title, nothing in this title precludes the Secretary of Agriculture from authorizing a Federal, State, or local agency from conducting pre-suppression and suppression. wildfire management operations (including operations using aircraft or mechanized equipment

(i) LIVESTOCK GRAZING .

- (1) IN GENERAL .  Within the Special Management Areas, the grazing of livestock in which grazing is established before the date of enactment of this Act

May 18, 2016 -

shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue.

### (3) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(j) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this Act precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this Act and existing law.

(k) ADJACENT MANAGEMENT.

(a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around the Little West Fork Blacks Special Management Area designated by this section.

(b) ACTIVITIES OUTSIDE SPECIAL MANAGEMENT AREA.  The fact that an activity or use on land outside the Little West Fork Blacks Special Management Area can be seen, heard, or smelled within the Little West Fork Blacks Special Management Area

May 18, 2016 -

shall not preclude the activity or use outside the boundary of Little West Fork Blacks Special Management Area

(l) **OUTFITTING AND GUIDE ACTIVITIES** . □ As permitted as of January 1, 2016 Commercial services (including authorized outfitting and guide activities) within the Little West Fork Blacks Special Management Area are authorized

(m) **FISH AND WILDLIFE** . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Little West Fork Blacks Special Management Area.

(n) **ACCESS** . □ Consistent with the purposes of the Title, and as authorized as of the date of enactment of this Title, The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the Little West Fork Blacks Special Management Area access to the owner's property.

(o) **HUNTING AND FISHING**. □ Within the Little West Fork Blacks Special Management Area where hunting and fishing on lands and waters owned or managed by the Department of the Interior or Department of Agriculture was allowed before the date of enactment of this Act, shall continue.

(p) **WATER RIGHTS**. □

(a) **STATUTORY CONSTRUCTION** . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Special Management Areas designated by section 301;

(2) affects any water rights in the State of Utah;

(3) establishes a precedent with regard to any future Special Management Areas designations.

(b) **UTAH WATER LAW**. □ The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the Special Management Areas.

(c) **EFFECTS ON STATE WATER RIGHTS**. □ The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects □

(1) any water rights granted by the State;

(2) the authority of the State in adjudicating water rights;

(3) definitions established by the State with respect to the term "beneficial use" or

□priority of rights□

(4) terms and conditions for groundwater withdrawal;

(5) the use of groundwater resources that are in accordance with State law; or

(6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE.□

(1) Nothing in this title shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the Little West Fork Blacks Special Management Area designated by this section.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □The term □water resource facilities□ means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(q) VEGETATION MANAGEMENT.□ Consistent with the purposes of the Little West Fork Blacks Special Management Area, nothing in this title prevents the Secretary of Agriculture from conducting vegetation management projects within the Little West Fork Blacks Special Management Area.

(r) COMMERCIAL TIMBER HARVEST.□ Consistent with the purposes of the Little West Fork Blacks Special Management Area within the Little West Fork Blacks Special Management Area, commercial timber harvest is not prohibited if the primary purpose is to restore or improve forest health and watershed function or to further the purposes described in this title

(s) WITHDRAWAL .□

(1) IN GENERAL .□ Subject to valid rights in existence on the date of enactment of this title ,the Federal land within the Little West Fork Blacks Special Management Area designated by this section are withdrawn from□

(a) all forms of entry, appropriation, and disposal under the federal land laws;

(b) location, entry, and patent under the mining laws; and

(c) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(t) ACCESS.□ Nothing in this section prohibits the Secretary from authorizing reasonable access to private land inside or adjacent to the Little West Fork Blacks Special

May 18, 2016 -

Management Area including the construction of permanent roads within the Little West Fork Blacks Special Management Area

**SEC. 40 □ □DESOLATION CANYON □NINE MILE CANYON □AND WHITE RIVER SPECIAL MANAGEMENT AREAS**

(a) ESTABLISHMENT. □ Subject to valid existing rights, the following areas in the State are hereby established as Special Management Areas:

(1) WHITE RIVER. □ Certain federal land, comprising approximately 16,785 acres administered by the Bureau of Land Management in Uintah County, Utah as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the □White River Special Management Area. □

(2) NINE MILE CANYON. □ Certain federal land, comprising approximately 41,301 acres administered by the Bureau of Land Management in Carbon County and Duchesne County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the □Nine Mile Canyon Special Management Area. □

(3) DESOLATION CANYON. □ Certain federal land, comprising approximately 8,770 acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the □Desolation Canyon Special Management Area. □

(b) PURPOSES □ The purposes of the Desolation Canyon, Nine Mile Canyon, and White River Special Management Areas established under 407(a) in a manner that:

- 1) Protects, conserves, and enhances the unique and nationally important historic, cultural, scientific, scenic, recreational, archaeological, natural, and educational resources of the Conservation Area;
- 2) Maintains and enhances cooperative and innovative management practices between resource managers, private landowners, and the public in the Conservation Area; and
- 3) Recognizes and maintains to the extent practicable historic uses of the Conservation Area.

**SEC. 40 □ □DESOLATION CANYON □NINE MILE CANYON □AND WHITE RIVER SPECIAL MANAGEMENT AREA MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Desolation Canyon, Nine Mile Canyon, and White River Special Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

May 18, 2016 -

(2) EFFECT. □The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 40 □ ADMINISTRATION OF THE DESOLATION CANYON □ NINE MILE CANYON □ AND WHITE RIVER SPECIAL MANAGEMENT AREAS.**

(a) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

**SEC. 410. DESOLATION CANYON □ NINE MILE CANYON □ AND WHITE RIVER SPECIAL MANAGEMENT AREA GENERAL PROVISIONS**

(a) The general provisions of Title II section 204 shall apply to the Special Management Areas.

(b) EXCEPTION. □ Notwithstanding the withdrawal of 204(a) for the Desolation Canyon Special Management Area, White River Special Management Area, and the Nine Mile Canyon Special Management Area, the Secretary of the Interior may lease oil and gas resources in accordance with the Mineral Leasing Act (30 U.S.C. 181 et seq.) subject to the following conditions:

(A) the area may be accessed only by directional drilling from a lease held on the date of enactment of this Act on land that is adjacent to, and outside of, the conservation area.

(B) the lease shall prohibit surface occupancy and surface disturbance for any mineral activities within the national conservation areas.

(c) NINE MILE CANYON ADDITIONAL PROVISIONS. □

1. Energy development, including access needs for energy development, within the Nine Mile Canyon Special Management Area shall be allowed under the terms of the West Tavaputs Plateau Project Final Environmental Impact Statement and Record of Decision of July 2, 2010.

2. The management plan required under Sec. 409 of this Title for the Nine Mile Canyon Special Management Area shall be developed jointly between Carbon and Duchesne County Advisory Councils.

May 18, 2016 -

3. Upon enactment of this Title, the current ACEC designation shall be permanently removed from Nine Mile Canyon.

## **Title V - ARCHES NATIONAL PARK EXPANSION**

### **SEC. 501. ARCHES NATIONAL PARK EXPANSION**

(A) Section 1 of Public Law 92-155 is amended

(1) by inserting the following after paragraph (2)

(3) Effective on the date of enactment of the Utah Public Lands Initiative Act, the boundary of the park shall include the area consisting of approximately 19,255 acres and depicted as Arches Expansion on the map entitled "Utah PLI Park and Monument Map" and dated \_\_\_\_\_.

(2) by redesignating paragraph (3) as paragraph (4); and

(3) in paragraph (4), as so designated by paragraph (2) of this provision, by striking "(1) and (2)" and inserting instead "(1), (2) and (3)"

### **SEC. 502. EXISTING TRAILS**

(a) The public shall have continued access Off-highway vehicle access to the Klondike Bluffs, Dry Mesa, Winter Camp Ridge (to the overlook of Salt Wash), The Highlands (pipeline to the overlook of Salt Wash), and The Eagle's Nest trails, subject to reasonable regulations as prescribed by the Secretary.

(b) The National Park Service shall enter into a cooperative agreement with Ride with Respect that provides for continued public access of the trails outlined in this section, maintains the conservation qualities of the Park, and provides a framework for maintenance cost sharing.

(c) Where practicable, mountain biking shall be permitted and promoted within the trails outlined in subsection (a).

### **SEC. 503. TRANSPORTATION PLANNING**

(a) The National Park Service shall work to create a northern entrance, which is being facilitated by the expansion outlined in 501(a), that enhances the visitor experience and alleviates traffic congestion at the current Park entrance.

## **Title VI - JURASSIC NATIONAL MONUMENT**

### **SEC. 601. JURASSIC NATIONAL MONUMENT**

(a) PURPOSES. - To conserve, protect, interpret, and enhance for the benefit of present and future generations the unique and nationally important paleontological, scientific, educational, and recreational resources, there is established in Emery County, Utah,

May 18, 2016 -

subject to valid existing rights, the Jurassic National Monument (referred to in this title as the "Monument").

(b) BOUNDARIES . The Monument shall consist of approximately 867 acres of federal land in Emery County, Utah as generally depicted on the map entitled "Utah PLI Park and Monument Map" and dated \_\_\_\_\_

(c) MAP ; LEGAL DESCRIPTION .

(1) IN GENERAL. Two years after the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the Special Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. The map and legal description prepared under paragraph (b) shall have the same force and effect as if included in this title, except that the Secretary of the Interior may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

(d) ACQUISITION OF LAND .

(1) IN GENERAL. The Secretary of the Interior may acquire land or interests in land within the boundaries of the Monument only by donation, exchange, or purchase from a willing seller.

(2) LAND EXCHANGE. At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall complete exchanges for State land located within the boundaries of the Monument designated by this title.

(3) NO CONDEMNATION. Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(e) WITHDRAWALS . Subject to valid existing rights, any land within the Monument or any land or interest in land that is acquired by the United States for inclusion in the Monument after the date of enactment of this section is withdrawn from

(i) entry, appropriation, or disposal under the federal land laws;

(ii) location, entry, and patent under the mining laws; and

(iii) operation of the mineral leasing laws, geothermal leasing laws, and minerals materials laws.

(f) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the national monument.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the national monument that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Resource Advisory

May 18, 2016 -

Councils established under Division C of this Act. Other uses of the national monument may:

- (A) address transportation issues to and from the Monument; and
- (B) codify the current Special Recreation Management Area boundary.

(g) ADMINISTRATION . □ The Secretary of the Interior shall administer the Monument in accordance with---

- (1) the Management Plan; and
- (2) any other applicable laws.

(h) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a Monument designated by this Act.

(b) ACTIVITIES OUTSIDE MONUMENT. □ The fact that an activity or use on land outside the Monument can be seen, heard, or smelled within the Monument shall not preclude the activity or use outside the boundary of the Monument.

## **TITLE VII - WILD AND SCENIC RIVERS**

### **SEC. 01 - WILD AND SCENIC RIVERS**

(a) Section 3(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1274(a)) is amended by adding at the end the following:

□(213) COLORADO RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 14.4 mile segment from Westwater Canyon from River Mile 125 to River Mile 112 as a wild river.
- (B) The approximately 8 mile segment from River Mile 112 to Cisco Wash as a scenic river.
- (C) The approximately 33.1 mile segment from the Confluence of the Colorado River with the Dolores River to River Mile 49 near Potash as a recreational river.
- (D) The approximately 5.7 mile segment from River Mile 44.5 to River mile 38.5 as a scenic river.
- (E) The approximately 3.7 mile segment from River Mile 37.5 to River Mile 34 at the Canyonlands National Park boundary as a scenic river.
- (F) The approximately 5.5 mile river segment from River Mile 44 to River Mile 38.5 as a scenic river.
- (G) The approximately 6.5 river segment of the Colorado River from River Mile 37.5 to the boundary of Canyonlands National Park at River Mile 31 as a scenic river.

□(214) DOLORES RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

May 18, 2016 -

- (A) The approximately 5.9 mile segment from the Colorado State line to Fisher Creek as a recreational river.
- (B) The approximately 6.3 mile segment from Fisher Creek to Bridge Canyon as a scenic river
- (C) The approximately 9.9 mile segment from Bridge Canyon to the Colorado River as a recreational river.

□(215) GREEN RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 50 mile river segment from River Mile 97 at the confluence with the San Rafael River to Canyonlands National Park Boundary as a scenic river.
- (B) The approximately 44.5 miles from Nine Mile Creek to Chandler Canyon as a wild river
- (C) The approximately 8 miles from Chandler Creek to Florence Creek as a scenic river.
- (D) The approximately 19 miles from Florence Creek to the Nefertiti Boat Ramp as a wild river.
- (E) The approximately 62 miles from the northern border of the Desolation Canyon Wilderness, designated under this Act, in Uintah County, Utah to the Carbon County line as a recreation river.

□(216) DARK CANYON, UTAH. The approximately 18.7 miles of the Dark Canyon River from the forest boundary to the Lake Powell below Young's Canyon to be administered by the Secretary of the Interior as a wild river.

(b) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a wild and scenic river designated by this title.

(b) ACTIVITIES OUTSIDE WILD AND SCENIC RIVER. □ The fact that an activity or use on land outside a wild and scenic river designated under this section can be seen, heard, or smelled within the wild and scenic river shall not preclude the activity or use outside the boundary of the wild and scenic river.

(c) The Secretary of the Interior may acquire land or interest in land within the boundaries of the wild and scenic river areas designated by this title only by donation, exchange, or purchase from a willing seller. □

(d) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(e) OUTFITTING AND GUIDE ACTIVITIES. □ Commercial services (including authorized outfitting and guide activities) within the wild and scenic rivers are authorized.

(f) MAPS AND LEGAL DESCRIPTION

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of the Interior shall file a map, entitled Utah PLI Wild and Scenic Rivers, and legal description of the rivers with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

May 18, 2016 -

(2) EFFECT. □The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of the Interior may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

## **TITLE VIII □ASHLEY □ARST NATIONAL GEOLOGIC AND RECREATION AREA**

### **SEC. □01. ASHLEY □ARST NATIONAL GEOLOGIC AND RECREATION AREA.**

(a) ESTABLISHMENT. □ Subject to valid existing rights, the approximately 110,839 acres generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, are hereby established as the □Ashley Karst National Geologic and Recreation Area □

(b) PURPOSES □ The purposes of the Ashley Karst National Geologic and Recreation Area (referred to in this title as the Area) are to provide recreational opportunities, protection and management of water resources, utilize commercial forest products, and withdraw minerals from development.

### **SEC. □0 □MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. □Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

### **SEC. □03. ADMINISTRATION.**

(a) ADMINISTRATION . □

May 18, 2016 -

(1) IN GENERAL . □ The Secretary of Agriculture shall administer the Area in accordance with □

(a) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);

(b) this title; and

(c) other applicable laws.

(2) MANAGEMENT PLAN . □

(a) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the Area.

(b) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of Agriculture shall allow only such uses of the Area that would further the purposes outlined in subsection 801(b) of this section and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act. Other uses of the Area shall:

(A) provide for recreational opportunities to occur within the Area including skiing, biking, hiking, fishing, hunting, horseback riding, snowmobiling, designated trails for motorcycle riding and off-highway vehicle use, snowshoeing, camping, and other recreational activities consistent with this title;

(C) provide for appropriate forest management, utilizing commercial harvesting for hazardous fuels reduction, wildland fire control, control of insects and disease, and watershed health;

(D) prohibit mineral development; and

(E) promote the long-term protection and management of the water resources and underground karst system; and

(F) comply with Sections 801 and 804 .

## **SEC. □04 GENERAL PROVISIONS.**

(a) OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

May 18, 2016 -

(1) IN GENERAL- The use of Off-highway vehicle and mechanized vehicles shall be permitted within the Area.

(2) MANAGEMENT-

(A) IN GENERAL- The Secretary of Agriculture shall designate existing routes in a manner that--

(i) utilizes Forest Service roads existing as of January 1, 2016 and also new roads authorized by this Act;

(ii) minimizes conflict with sensitive habitat or cultural or historical resources;

(iii) does not interfere with private property or water rights.

(B) CLOSURE OR REROUTING-

(i) IN GENERAL- A designated route may be temporarily closed or rerouted, for a period not to exceed two years, if the Secretary of Agriculture, in consultation with the State, or relevant local government within the State determines that--

(I) the designated route is damaging cultural resources or historical resources;

(II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.

(III) modification of the designated route would not significantly affect access within the conservation area.

(IV) all other options, other than a temporary closure or rerouting, have been exhausted.

(V) an alternative route has been provided.

(C) NOTICE- The Secretary of Agriculture shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily closed through--

(i) use of appropriate signage within the Area; and

(ii) use of the internet and web resources.

(3) PRIORITY ROUTES □ Marsh Peak South Road and South Fork Road, as depicted on the Utah PLI Special Management Area Map, shall be open for Off-highway vehicle use. Administrative Access shall be allowed for the Forest Service, State and local governments, and water companies to access Whiterocks Lake for general and emergency maintenance purposes.

(b) TRAIL CONSTRUCTION. □

(1) FEASIBILITY STUDY. □ Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall study the feasibility and public interest of constructing new routes as needed to further mechanized and hiking recreational opportunities.

(2) CONSTRUCTION. □

(A) CONSTRUCTION AUTHORIZED. □ If the Secretary of Agriculture determines that the construction of a route is feasible the Secretary of Agriculture may provide for the construction of the route.

(B) USE OF VOLUNTEER SERVICES AND CONTRIBUTIONS. □ A route may be constructed under this subsection through the acceptance of volunteer services and contributions from non-federal sources.

(c) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land located within the Area.

(d) OVERSNOW VEHICLES . □ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Area when there is at least six inches of snow coverage.

(e) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of Agriculture may □

(1) carry out any measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Area; and

(2) coordinate those measures with the appropriate State or local agency.

(f) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations

May 18, 2016 -

(including operations using aircraft or mechanized equipment) or interfere with the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to prevent or control the spread of wildfires or the use of mechanized equipment for wildfire pre-suppression and suppression.

(g) LIVESTOCK GRAZING..□

(1) IN GENERAL .□ Within the Area, Within the Area, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(3) UTAH DEPARTMENT OF AGRICULTURE - In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(h) EXISTING EASEMENTS AND RIGHTS-OF-WAY. □Nothing in this title precludes the Secretary of Agriculture from renewing easements or rights-of-way

in existence on the date of enactment of this Act, in accordance with this Act and existing law.

(i) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around the Area designated by section 801.

(b) ACTIVITIES OUTSIDE AREA. □ The fact that an activity or use on land outside the Area can be seen, heard, or smelled within the Area shall not preclude the activity or use outside the boundary of the Area.

(j) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the Area are authorized.

(k) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Area.

(l) ACCESS . □ The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the Area access to the property.

(m) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the Area are authorized

(n) HUNTING AND FISHING. □

Within the Area in where hunting and fishing on lands and waters owned of managed by the Department of Agriculture was allowed before the date of enactment of this Act, shall continue.

(o) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Area designated by section 801;

(2) affects any water rights in the State;

(3) establishes a precedent with regard to any future designations.

(4) shall restrict or prohibit the upstream diversion of water rights held under Utah State law nor shall any claim of resource damages

arise due to the rightful diversion or depletion of streams or rivers affecting the Area.

(b) UTAH WATER LAW. □The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the Area.

(c) EFFECTS ON STATE WATER RIGHTS. □The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects □

- (1) any water rights granted by the State;
- (2) the authority of the State in adjudicating water rights;
- (3) definitions established by the State with respect to the term □beneficial use□or □priority of rights□
- (4) terms and conditions for groundwater withdrawal;
- (5) the use of groundwater resources that are in accordance with State law; or
- (6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this title shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the Area designated by section 801.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □The term □water resource facilities□means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(p) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of Agriculture from conducting vegetation management projects within the Area.

May 18, 2016 -

(q) WITHDRAWAL .□

(A) IN GENERAL .□ Subject to valid rights in existence on the date of enactment of this Act the federal land within the Area is withdrawn from□

(i) all forms of entry, appropriation, and disposal under the federal land laws;

(ii) location, entry, and patent under the mining laws; and

(iii) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(r) FEES .□ Except for improved campgrounds, within the Area the United States Forest Service is prohibited from the collecting or requiring fees for access or use.

## Title I □ School Trust Land Consolidations

(a) FINDINGS. □ Congress finds that the land exchange authorized and directed by this Act furthers public objectives referenced in section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) including □

(A) Promoting better management of federal conservation areas by removing inheld state trust land sections;

(B) Securing Federal ownership and protection of land with significant wildlife, recreational, scenic, cultural and other public values;

(C) Assisting the State of Utah and local governments in economic development and community expansion through the consolidation of state trust lands in manageable blocks near several Utah communities; and

(D) Advancing public education through increased opportunity for economic development of Utah school trust lands, in furtherance of the land grants made under the Utah Enabling Act, Act of July 16, 1894 (28 Stat. 107, chapter 138).

(b) PURPOSE □ It is the purpose of this title to authorize, direct, facilitate, and expedite the exchange of land between the State of Utah and the United States.

### SEC. 10 □ DEFINITIONS.

In this Act:

(1) MAPS. □ The term □ Maps □ means the following maps prepared by the Bureau of Land Management:

(a) Land Conveyances - Carbon County dated [date]

(b) Land Conveyances □ Duchesne County dated [date]

(c) Land Conveyances - Emery County dated [date]

(d) Land Conveyances □ Grand County dated [date]

(e) Land Conveyances □ San Juan County dated [date]

(f) Land Conveyances □ Uintah County dated [date]

(2) NON-FEDERAL LAND. □ The term □ non-Federal land □ means the lands identified on the Maps as □ State Trust Land Proposed for Transfer to United States □ □ State Trust Lands □ Surface Only Proposed for Transfer to United States □ and □ State Trust Lands -- Minerals Only Proposed for Transfer to United States □ located in Carbon, Duchesne, Emery, Grand, San Juan and Uintah counties, Utah, as generally depicted on the Maps.

(3) SECRETARY. □ The term □ Secretary □ means the Secretary of the Interior.

(4) STATE. □ The term □ State □ means the State of Utah, acting as trustee under the Utah State School and Institutional Trust Lands Management Act (Utah Code Ann. 53C □ 101 et seq) through the Utah School and Institutional Trust Lands Administration.

### SEC. 103. EXCHANGE OF LAND □ RESERVATION OF INTERESTS.

May 18, 2016 -

- (a) In General.--If the State offers to convey to the United States title to the non-Federal land, the Secretary shall, subject to the provisions of this title--
- (1) accept the offer; and
  - (2) on receipt of the right, title, and interest of the State in and to the non-Federal land, convey to the State all right, title, and interest of the United States in and to the Federal land.
- (b) Valid Existing Rights.--The exchange authorized under subsection (a) shall be subject to valid existing rights.
- (c) Costs  Costs of the land exchange shall be allocated in accordance with section 206(f)(2)(B) of FLPMA (43 U.S.C. 1716(f)(2)(B)).
- (d) Title Approval.--Title to the Federal land and non-Federal land to be exchanged under this section shall be in a format acceptable to the Secretary and the State.
- (e) Reservation of Interest in Potash.--
- (1) In general.--With respect to Federal land that contains potash resources, the Secretary shall reserve an interest in all potash resources.
  - (2) Extent of interest.--The interest reserved by the United States under paragraph 1 shall consist of--
    - (A) 50 percent of any bonus bid or other payment received by the State as consideration for securing any lease or authorization to develop potash resources;
    - (B) 50 percent of the amount that would have been received by the Federal Government under the royalty rate applicable on July 1, 2015 if the potash resources had been retained in Federal ownership; and
    - (C) 50 percent of any other payment received by the State pursuant to any lease or authorization to develop the potash resources.
  - (3) Upon receipt of any funds from potash leasing and development on lands in which the Secretary has reserved an interest, the State shall pay the Secretary amounts attributable to the reserved interest of the United States in accordance with paragraph (4).
  - (4) Payment. 
    - (A) Any amounts due under paragraph (3) shall be paid by the State to the United States not less than quarterly.
    - (B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2).
  - (5) No obligation to lease.--The State shall not be obligated to lease or otherwise develop potash resources in which the United States retains an interest under this subsection.
- (f) Reservation of Wellbore Interest in Oil and Gas
- (1) In general.  The Secretary shall reserve a wellbore interest in each oil and gas well on Federal land that has been determined by the Secretary to be capable of production in paying quantities as of the date of conveyance.
  - (2) Extent of interest.  The wellbore interest reserved to the United States under paragraph (1) shall consist of all royalties attributable to any zones or horizons that are being produced from an oil and gas well located on Federal land as of the date of conveyance.

(3) Upon receipt of any funds attributable to the reserve wellbore interest of the United States, the State shall pay the Secretary all such amounts in accordance with paragraph (4).

(4) Payment. □

(A) Any amounts due under paragraph (2) shall be paid by the State to the United States not less than quarterly.

(B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2)

(5) Termination of Reserved Interest. □ The reserved wellbore interests of the United States in oil and gas shall automatically terminate on the date that is ten years after the enactment of this Act.

(6) Sharing of Revenue. The United States shall share all revenue received with respect to its reserved wellbore mineral interest in oil and gas with the State of Utah in accordance with 30 U.S.C. 191(a).

(g) Appurtenant Water Rights.--Any conveyance of a parcel of Federal land or non-Federal land under this Act shall include the conveyance of water rights appurtenant to the parcel conveyed.

## **SEC. 104. APPRAISALS**

(a) Equal Value Exchange. □

(1) In general.--The value of the Federal land and non-Federal land to be exchanged under this Act □

(A) shall be equal; or

(B) shall be made equal in accordance with section 5.

(b) Appraisals.--The value of the Federal land and the non-Federal land shall be determined by appraisals conducted by 1 or more independent appraisers retained by the State, with the consent of the Secretary.

(c) Applicable law.--The appraisals conducted under paragraph (1) ---

(A) shall be conducted in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716); and

(b) shall utilize nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisitions.

(d) Approval.--The appraisals conducted under paragraph (1) shall be submitted to the Secretary and the State for approval.

(e) Adjustment.--

(1) In general.--If value is attributed to any parcel of Federal land because of the presence of minerals subject to leasing under the Mineral Leasing Act (30 U.S.C. 181 et seq.), the value of the parcel (as otherwise established under this subsection) shall be reduced by the estimated value of the payments that would have been made to the State of Utah from bonuses, rentals, and royalties that the United States would have received if such minerals were leased pursuant to the Mineral Leasing Act (30 U.S.C. 181 et seq.).

(2) Limitation.--An adjustment under subparagraph (A) shall not be considered as a property right of the State.

May 18, 2016 -

(f) Valuation of Lands with Reserved Minerals.--Federal land in which the Secretary reserves an interest under subsections 103(3)3(e) and 103(3)(f) shall be appraised

(1) without regard to the presence of potash; and

(2) taking into account the reserved wellbore interest of the United States, if any.

(g) Duration.  The appraisals conducted under paragraph (1) shall remain valid until the date of the completion of the exchange authorized under this title.

(h) Availability of appraisals.

(1) In general.--All final appraisals, appraisal reviews, and determinations of value for land to be exchanged under this section shall be available for public review at the Utah State Office of the Bureau of Land Management at least 30 days before the conveyance of the applicable parcels.

(2) Publication.--The Secretary or the State, as applicable, shall publish in a newspaper of general circulation in Salt Lake County, Utah, a notice that the appraisals are available for public inspection.

(i) Dispute resolution.

(1) If, by the date that is 90 days after the date of submission of an appraisal for review and approval under this subsection, the Secretary or State do not agree to accept the findings of the appraisals with respect to any parcel of Federal land or non-Federal land, the dispute shall be resolved in accordance with section 206(d)(2) of FLPMA (43 U.S.C. 1716(d)(2)).

(2) If agreement has not been reached with respect to the exchange of an individual parcel of Federal land or non-Federal land, the Secretary and the State may agree to set aside the individual parcel to allow the exchange of the other parcels of Federal land and non-Federal land to proceed.

(j) Conveyance of Parcels in Phases.

(1) In General.  Notwithstanding that appraisals for all of the parcels of Federal land and non-Federal land may not have been approved, parcels of the Federal land and non-Federal land may be exchanged in phases as may be mutually determined by the Secretary and the State.

(2) Ledger. -- The Secretary and the State may agree to utilize a ledger account to make equal the value of lands conveyed by each party in one or more phases, provided that the overall exchange shall be made equal as provided in section 105.

(3) Authority.  It is the intent of Congress that the Secretary may exercise broad discretionary authority in the processing of the land exchange to expedite the final conveyance of the Federal and non-Federal land.

## **SEC. 105. EQUALIZATION OF VALUES.**

(a) Surplus of federal land.

If the value of the Federal land exceeds the value of the non-Federal land, the value of the Federal land and non-Federal land shall be equalized by

(1) the State conveying to the United States State trust land located within any of the wilderness areas or national conservation areas in Washington County, Utah, established under subtitle O of title I of the Omnibus Public Land Management Act of 2009 (Public Law 111  1; 123 Stat. 1075) that has an appraised value

May 18, 2016 -

- equal to the difference between the value of the Federal land; and the value of the non-Federal land;
  - (2) the reduction in acreage of the Federal land as the State and the Secretary may agree;
  - (3) the State making a cash payment to the United States; or
  - (4) any combination of the methods described in paragraphs (1)-(3) as the State and the Secretary may mutually agree.
- (b) Surplus of non-federal land.  If the value of the non-Federal land exceeds the value of the Federal land, the value of the Federal land and the non-Federal land shall be equalized by
- (1) the reduction in acreage of the non-Federal land as the State and the Secretary may mutually agree.

## **SEC. 106. WITHDRAWAL OF FEDERAL LANDS PRIOR TO EXCHANGE**

Subject to valid existing rights, during the period beginning on the date of enactment of this Act and ending on the earlier of the date that the Federal land is removed from the exchange or the date on which the Federal land is conveyed, the Federal land is withdrawn from mineral location, entry or patent under the mining laws, from leasing and entry under the mineral leasing laws, and from mineral material disposal.

## **SEC. 10 NEPA AND FLPMA COMPLIANCE.**

- (1) Public Interest. -- The land exchange authorized and directed by this title is in the public interest.
- (2) Scoping and Analysis. -- Notwithstanding any other law, in preparing an environmental assessment or environmental impact statement required under section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) with respect to the land exchange contemplated by this Act:
  - (A) the Secretary is not required to identify any actions other than the proposed action and the no action alternative; and
  - (B) the Secretary is not required to analyze the environmental effects of alternative conveyances or actions other than the offer submitted by the State under subsection 103(a).
- (3) Presumption of Plan Adequacy.  Conveyances of Federal land to the State in accordance with this Act are presumed to comply with any land use plan enacted under section 202 of FLPMA (43 U.S.C. 1712).

## **SEC. 10 STATUS AND MANAGEMENT OF LAND AFTER EXCHANGE.**

- (a) ADMINISTRATION OF NON-FEDERAL LAND. 
  - (1) IN GENERAL.  Subject to paragraph (2) and in accordance with section 206(c) of FLPMA (43 U.S.C. 1716(c)), the non-Federal land acquired by the United States under this Act shall become part of, and be managed as part of, the Federal administrative unit or area in which the land is located.
- (b) GRAZING PERMITS.

(1) IN GENERAL. □ If land acquired under this Act is subject to a lease, permit, or contract for the grazing of domestic livestock in effect on the date of acquisition, the entity acquiring the land shall allow the grazing to continue for the remainder of the term of the lease, permit, or contract, subject to the related terms and conditions of user agreements, including permitted stocking rates, grazing fee levels, access rights, and ownership and use of range improvements.

(2) RENEWAL. □ To the extent allowed by Federal or State law, on expiration of any grazing lease, permit, or contract described in paragraph (1), the holder of the lease, permit, or contract shall be entitled to a preference right to renew the lease, permit, or contract.

(3) BASE PROPERTIES. □ If land conveyed by the State under this Act is used by a grazing permittee or lessee to meet the base property requirements for a Federal grazing permit or lease, the land shall continue to qualify as a base property for the remaining term of the lease or permit and the term of any renewal or extension of the lease or permit.

(c) HAZARDOUS MATERIALS. □

(1) IN GENERAL. □ The Secretary and the State shall make available for review and inspection any record relating to hazardous materials on the land to be exchanged under this Act.

(2) COSTS. □ The costs of remedial actions relating to hazardous materials on land acquired under this Act shall be paid by those entities responsible for the costs under applicable law.

**SEC. 10 □ □LANDS WITHIN HISTORIC UNCOMPAHGRE RESERVATION.**

In the event that a court of competent jurisdiction issues a final judgment against the United States determining that the public lands within the boundaries of the historic Uncompahgre Reservation currently managed by the Bureau of Land Management are or should be tribal trust lands of the Ute Indian Tribe of the Uintah and Ouray Reservation, then ---

(a) within one year of the final judgment, the State of Utah shall relinquish all lands acquired by the State under this Act that are located within the historic Uncompahgre Reservation to the United States for the benefit of the Tribe; and

(b) upon such relinquishment, the State of Utah may select unappropriated public lands of equal value elsewhere in Utah in the manner provided by section 6 of the Utah Enabling Act, Act of July 16, 1894, ch. 138, 28 Stat. 107.

**SEC. 110. □BOO □ CLIFFS CONSERVATION AREA.** □The non-Federal mineral estate acquired by the United States in the area depicted on the Grand County map as the Book Cliffs Conservation Area is withdrawn from the operation of the mineral entry, leasing and mineral material disposal laws until otherwise determined by Congress.

**Title II □Goblin Valle □State Par □**

**SEC. 01. LAND CONVEYANCE**

(a) LAND CONVEYANCE. At the request of the State of Utah, the Secretary of the Interior shall convey, without consideration, the approximately 9,994 acres of Bureau of Land Management land identified as Utah PLI Goblin Valley State Park Map, on the map entitled Utah PLI Goblin Valley State Park Expansion Map and dated \_\_\_\_\_, to the Utah State Parks and Recreation Division of the Department of Natural Resources.

**SEC. 02. COOPERATIVE MANAGEMENT OF GOBLIN VALLEY.**

(a) IN GENERAL. At the request of the State, in accordance with this section, the Secretary of the Interior shall enter into a cooperative agreement with the State for the management of the federal land described in subsection (b).

(b) DESCRIPTION OF LAND. The area subject to the cooperative agreement is federal land managed by the Bureau of Land Management in Emery County, Utah comprising approximately 156,540 acres, identified as Goblin Valley Cooperative Management Area on the map entitled Utah PLI Goblin Valley State Park Map and dated \_\_\_\_\_.

(c) PURPOSES. - The purposes of the Goblin Valley Cooperative Management Area is to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking.

(d) TERMS. The cooperative agreement shall

(1) clarify the roles, responsibilities, and limitations, of the Secretary of the Interior and the State with regard to recreation management within the federal land;

(2) extend only to recreational activities, including Off-highway vehicle and non-Off-highway vehicle, within the federal land, and shall not affect other land management within the federal land, or recreational activities outside the federal land;

(3) require that recreational activities within the federal land shall continue to be managed in accordance with

(A) the San Rafael Swell National Conservation Area and Crack Canyon Wilderness Area established by this Act; and

(B) applicable federal laws.

(4) require new route and trail construction for motorized and non-motorized use to further recreational opportunities and/or minimize resource conflict, when and where appropriate;

(4) address the establishment, distribution, and uses of, any revenues generated by recreational activities (including entrance fees) on federal lands within the Goblin Valley Cooperative Management Area; and

(5) specify that the State agency administering the federal land shall be the Utah State Parks and Recreation Division of the Department of Natural Resources.

**Title III Price Can on State Forest**

**SEC. 301. DEFINITIONS.**

In this title:

- (1) MAPS. □ The term "Map" means the map titled Utah PLI Price Canyon State Forest Map.
- (2) FEDERAL LAND. □ The term "federal land" means the 13,321-acres owned by the Bureau of Land Management and identified as "BLM Lands Proposed for Transfer to State Sovereign Land" located in Carbon County, Utah, as generally depicted on the map entitled "Utah PLI Price Canyon State Forest Map" and date \_\_\_\_\_
- (3) NON-FEDERAL LAND. □ The term "non-federal land" means the 14,939-acres identified on the Map as "State Sovereign Land Proposed for Transfer to BLM" located in Grand, and San Juan Counties, Utah, as generally depicted on the
- (4) SECRETARY. □ The term "Secretary" means the Secretary of the Interior.
- (5) STATE. □ The term "State" means the State of Utah's Division of Forestry, Fire, and State Lands.

**SEC. 30 EXCHANGE OF LAND.**

- (a) In General.-- It is the purpose of this title to consolidate intermingled State sovereign lands in an area of Carbon County, Utah to create the State of Utah's first State Forest.
- (b) If the State offers to convey to the United States title to the non-federal land, the Secretary of the Interior shall--
  - (1) accept the offer; and
  - (2) on receipt of the right, title, and interest of the State in and to the non-federal land, convey to the State all right, title, and interest of the United States in and to the federal land.
- (c) VALID EXISTING RIGHTS.--The exchange authorized under subsection (a) shall be subject to valid existing rights.
- (d) TITLE APPROVAL.--Title to the federal land and non-federal land to be exchanged under this section shall be in a format acceptable to the Secretary of the Interior and the State.

**SEC. 303. LIVESTOCK GRAZING.**

- (a) LIVESTOCK GRAZING--- Within the lands acquired by the state under this title in which grazing is established before the date of enactment of this Act, the grazing of livestock shall continue at levels existing as of January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

**Title IV □ Deer Lodge Land Exchange**

**SEC. 401 Definitions**

In this title:

- (a) ASSOCIATION. □ The term "Association" means the Deer Lodge Homeowners Association.

May 18, 2016 -

(b) FEDERAL LAND. □ The term "federal land" means the approximately 156 acres of National Forest System land in Daggett County, Utah, identified as "Deer Lodge Cabin Site" on the map entitled "Utah PLI Deer Lodge Land Exchange Map" and dated \_\_\_\_\_.

(c) NON-FEDERAL LAND. □ The term "non-federal land" means the parcel of approximately 77 acres of private land located in Uintah County, Utah and identified as "Land to Be Acquired by USFS" on the map entitled "Utah PLI Deer Lodge Land Exchange Map" and dated \_\_\_\_\_.

(d) SECRETARY. □ The term "Secretary" means the Secretary of Agriculture.

#### **SEC. 40 LAND EXCHANGE.**

(a) CONVEYANCE OF LAND. □ No less than two years after enactment of this title, if the Association offers to convey to the United States all right, title, and interest of the Association in and to the non-federal land, the Secretary of Agriculture shall convey to the Association, without consideration, all right, title, and interest of the United States in and to the federal land, subject to valid existing rights.

(b) COMPLIANCE WITH EXISTING LAW. □ Except as otherwise provided in this title, the Secretary of Agriculture shall carry out the land exchange under this title in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716).

#### **SEC. 403 CONDITIONS OF EXCHANGE.**

(a) TITLE. □ As a condition of the land exchange under this title, title to the non-federal land to be acquired by the Secretary of Agriculture under this title shall be acceptable to the Secretary of Agriculture.

(b) TERMS AND CONDITIONS. □ As a condition of the land exchange under this title, the Association shall agree to retain as undeveloped open space the approximately 40 acres of meadow area identified as "Open Space" as generally depicted on the map entitled "Utah PLI Deerlodge Land Exchange" and dated \_\_\_\_\_.

## **Title V Scofield Land Transfers**

#### **SEC. 501. DEFINITIONS.**

In this title:

##### **(1) CARBON COUNTY.**

The term "Carbon County" means Carbon County, Utah, within which the Scofield Reservoir property is located.

May 18, 2016 -

(2) CLAIMANT. □ The term "claimant" means any person or entity (or a successor in interest to a person or entity) that, according to the records in the office of the Recorder for Carbon, Utah, as of the date of enactment of this Act, claims title to, or an interest in, the federal land.

(3) FEDERAL LAND. □

(A) IN GENERAL. □ The term "federal land" means the land acquired by Price River Water Conservation District and transferred to the United States for use in the construction and operation of Scofield Dam and Reservoir located between the normal water surface elevation and the property boundary elevation in the Scofield Reservoir basin.

(B) EXCLUSIONS. □ The term "federal land" does not include any mineral or subsurface rights to the land described in subparagraph (A); or the 205 acres of land adjoining the Scofield Reservoir, as adjudicated in the case styled *United States v. Dunn* (557F.3d 1165 (10th Cir. 2009)).

(4) LIFE ESTATE. □ The term "life estate" means if the claimant is a person, an interest of the claimant in the federal land that will revert to the United States on the date of the death of the claimant; and (B) if the claimant is an entity, an interest in the federal land of a person designated by the claimant that will revert to the United States on the date of the death of the designated person.

(5) SECRETARY. □ The term "Secretary" means the Secretary of the Interior.

## **SEC. 50. CONVEYANCE OF SCOFIELD PROJECT LAND.**

(a) The Secretary of the Interior shall convey all right and title to the federal land, or a life estate in the federal land, without consideration, to any valid claimant that submits a request to the Secretary of the Interior not later than 18 months after the enactment of this Act. If the Secretary of the Interior does not act upon the request within 18 months from the date of enactment of this act, the federal land shall be transferred to the claimant.

(b) CONVEYANCE REQUIREMENTS- A conveyance under this title shall be subject to □

(A) provisions under which the claimant shall agree to indemnify and hold harmless the United States for all claims by the claimant or others arising from--

- (i) the design, construction, operation, maintenance, or replacement of Scofield Dam and Reservoir;
- (ii) the survey of claims, description of claims, delineation of boundaries, conveyance documents, conveyance process, and recording of deeds associated with the conveyance; and
- (iii) any damages associated with any structure or chattel of the claimant that may be displaced in a flood event;

May 18, 2016 -

(B) the United States retaining a flood easement as well as an access easement for purposes of monitoring and enforcing the requirements of subparagraph (c) with respect to the entire portion of federal land conveyed; and

(C) deed restrictions requiring that--

(i) to prevent any structure on the portion of the federal land conveyed from being displaced during a flood event, the claimant shall--

(I) secure or tie down all existing structures; and

(II) if replacing or rebuilding such a structure, limit the replacement or rebuilding to the number and type of structures in existence on the date of enactment of this Act; and

(ii) all activities carried out by the claimant under clause (i) with respect to a structure to be carried out in accordance with applicable standards for structures that may be submerged, flooded, or inundated, as contained in--

(I) the International Building Code (as adopted by Utah Administrative Code R156-56); or

(II) any other building code or engineering standard that is--

(aa) similar to the International Building Code;

(bb) widely used; and

(cc) nationally recognized.

(c) If the claimant is a willing seller, the Secretary of the Interior may offer the claimant fair market value for the land in lieu of a conveyance of all right and title to the federal land.

## **Title VI** **Land Conve** **ances**

### **SEC. 601. Land Conve** **ances.**

(a) IN GENERAL.  Notwithstanding the land use planning requirements of sections 202 and 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712, 1713), upon the request of the specified local entity in the county in which the conveyance will occur, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall convey the following federal land to that entity, without consideration:

(1) CANYONLANDS FIELDS AIRPORT - The approximately 561 acres of land depicted as  Canyonlands Fields Airport,  on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_, to Grand County, Utah for use as an airport

(2) MOAB TAILINGS PROJECT  Upon completion of the Moab Uranium Mill Tailings Remedial Action (UMTRA) Project, the approximately 474 acres of land depicted as  UMTRA Conveyance,  on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_,  shall be conveyed, without consideration, to Grand County, Utah.

(3) HUNTINGTON AIRPORT EXPANSION.  The approximately 1,398 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_ as

May 18, 2016 -

□Huntington Airport, □to Emery County, Utah, for expansion of the Huntington Municipal Airport.

(4) EMERY COUNTY RECREATION AREA. □ The approximately 479 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Emery County Recreation Area, □to Emery County, Utah for public recreational purposes.

(5) EMERY COUNTY SHERIFF SUBSTATION. □ The approximately 643 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Emery County Sheriff's Substation, □to Emery County, Utah for a substation for the Emery County Sheriff's Office.

(6) BLANDING OUTDOOR RECREATION AREA. ---The approximately 5,197 acres of land depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Blanding Outdoor Recreation Area, □to Blanding City, Utah for use as an outdoor recreation area.

(7) CAL BLACK AIRPORT. □ The approximately 1,916 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Cal Black Airport, □to San Juan County, Utah for a municipal airport.

(8) BLUFF AIRPORT. □ The approximately 1,406 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Bluff Airport, □to San Juan County, Utah, for a municipal airport.

(9) MONTICELLO WATER STORAGE AND TREATMENT PLANT. □ The approximately 164 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Monticello Water Storage and Treatment Plant, □to Monticello City, Utah, for a water storage and treatment plant.

(10) BLANDING SHOOTING RANGE. □ The approximately 21 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Blanding Shooting Range, □to San Juan County, Utah, for a public shooting range.

(11) FANTASY CANYON. □ The approximately 160 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Fantasy Canyon □to the State of Utah, for public recreation.

(12) PARK CITY CONVEYENCE I □The approximately 2.5 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance I, □to Park City, Utah, for public recreation and open space.

(13) PARK CITY CONVEYENCE II □The approximately 1 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance II, □to Park City, Utah, for public recreation and open space.

(14) LISBON VALLEY -- The approximately 398 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Lisbon Valley, □to Utah State University, Utah, for education and research.

May 18, 2016 -

(15) WELLINGTON -- The approximately 645 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Wellington,□to Utah State University, for education and research.

(16) RANGE CREEK RESEARCH STATION EXPANSION-- The approximately 1,663 acres depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Range Creek Research Station Expansion,□to the University of Utah, for education and research.

(17) ASHLEY SPRING ZONE. □ The approximately 1,102 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Ashley Spring,□to Uintah County, Utah, for use as open space and for watershed protection and drinking water development.

(18) SEEP RIDGE UTILITY CORRIDOR. □The approximately \_\_\_ acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Seep Ridge Utility Corridor,□to the State of Utah, for use as rights-of-way for public utilities.

(19) BLUFF RIVER RECREATION AREA. - The approximately 177 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Bluff River Recreation Area,□to San Juan County, for use as recreation and municipal facilities.

(20) EMERY INFORMATION CENTER. □The approximately 80 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Emery County Information Center,□to Emery County, Utah for an information and visitor center to promote public lands.

(b) MAP AND LEGAL DESCRIPTIONS. □

(1) IN GENERAL. □Not later than two years after the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall file a map and legal description of the Land Conveyances with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior or the Secretary of Agriculture as appropriate may make any minor modifications of any clerical or typographical errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management and the United States Forest Service.

(c) REVERSION. □ If any parcel conveyed under subsection (a) ceases to be used for the purpose for which it was conveyed or any other public purpose, the land shall revert to the United States, if the Secretary of the Interior or the Secretary of Agriculture as appropriate determines that the reversion is in the best interest of the United States.

## **Title VII □ Land Disposals**

### **SEC. □01. LAND DISPOSALS.**

- (a) Disposal. -- Subject to valid existing rights, the Secretary of the Interior shall dispose of federal lands identified as □Lands for Disposal□ on the map entitled □Utah PLI Land Disposal Map□ and dated \_\_\_\_\_ within two years.

## **Title VIII □ CANYON COUNTRY RECREATION ZONES**

### **SEC □01. ESTABLISHMENT**

(a) ESTABLISHMENT. □ Subject to valid existing rights, and to enhance existing and future recreational opportunities and use the following areas in Grand County, Uintah County, and San Juan County, Utah are hereby established as Recreation Zones:

- (1) KLONDIKE RECREATION ZONE. □ Certain federal land, comprising approximately 24,968 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Klondike Recreation Zone. □
- (2) MONITOR AND MERRIMAC RECREATION ZONE. □ Certain federal land, comprising approximately 17,370 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Monitor and Merrimac Recreation Zone. □
- (3) GOLDBAR RECREATION ZONE. □ Certain federal land, comprising approximately 23,050 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Goldbar Recreation Zone. □
- (4) BIG FLAT RECREATION ZONE. □ Certain federal land, comprising approximately 25,311 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Big Flat Recreation Zone. □
- (5) MINERAL CANYON RECREATION ZONE. □ Certain federal land, comprising approximately 19,809 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Mineral Canyon Recreation Zone. □
- (6) DEE PASS AND UTAH RIMS RECREATION ZONE. □ Certain federal land, comprising approximately 210,116 acres administered by the Bureau of Land

May 18, 2016 -

Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Dee Pass and Utah Rims Recreation Zone.

- (7) YELLOW CIRCLE. Certain federal land, comprising approximately 7,040 acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Yellow Circle Recreation Zone.
- (8) CAMEO CLIFFS. Certain federal land, comprising approximately 48,025 acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Cameo Cliffs Recreation Zone.
- (9) JENSEN HILLS. Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Jensen Hills Recreation Zone.
- (10) RED MOUNTAIN. Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Red Mountain Recreation Zone.
- (11) DEVILS HOLE. Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Devils Hole Recreation Zone.
- (12) BOURDETTE DRAW. Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Bourdette Draw Recreation Zone.
- (13) RED WASH. Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Red Wash Recreation Zone.

**SEC. 00 MAP AND LEGAL DESCRIPTION.**

(a) IN GENERAL.  Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the recreation zones established by sections 801 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. The map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the

May 18, 2016 -

Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

### **SEC. 03. GENERAL PROVISIONS.**

(a) FIRE, INSECTS, AND DISEASE. □ In accordance with this title, the Secretary of the Interior may □

(1) carry out any measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the recreation zones; and

(2) coordinate those measures with the appropriate State or local agency.

(b) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or interferes with the authority of the Secretary of the Interior to authorize mechanical thinning of trees or underbrush to prevent or control the spread of wildfires or the use of mechanized equipment for wildfire pre-suppression and suppression.

(c) LIVESTOCK GRAZING. □

(1) IN GENERAL. □ Within the recreation planning areas, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(3) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given priority consideration by the Secretary of the Interior to establish historic grazing, locations, or use.

(d) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this title precludes the Secretary of the Interior from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this title and existing law.

(f) ADJACENT MANAGEMENT.

(1) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around any recreation zone designated by this title.

(2) ACTIVITIES OUTSIDE THE RECREATION ZONES.  The fact that an activity or use on land outside a recreation zone can be seen, heard, or smelled within the recreation zone shall not preclude the activity or use outside the boundary of the recreation zone.

(e) OUTFITTING AND GUIDE ACTIVITIES.  Commercial services (including authorized outfitting and guide activities) within the recreation zones are authorized.

(f) FISH AND WILDLIFE.  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the recreation zones.

(g) ACCESS.  The Secretary of the Interior shall provide the owner of State or private property within the boundary of a recreation zones access to the property.

(h) WILDLIFE WATER DEVELOPMENT PROJECTS.  Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the recreation zones are authorized

(i) HUNTING, FISHING, AND RECREATIONAL AND TARGET SHOOTING.  Within the recreation zones in where hunting, fishing, and recreational and target shooting on lands and waters owned of managed by the Department of the Interior was allowed before the date of enactment of this Act, shall continue.

(j) WATER RIGHTS.

(a) STATUTORY CONSTRUCTION.  Nothing in this title

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the recreation zones designated by this title;

(2) affects any water rights in the State of Utah;

(3) establishes a precedent with regard to any future recreation zone.

(b) UTAH WATER LAW.  The Secretary of the Interior shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the recreation zones.

(c) EXISTING WATER INFRASTRUCTURE.  Nothing in this Act shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in

the future to prevent the degradation of the water supply in recreation zones designated by this title.

(d) DEFINITION. □ The term "water resource facilities" means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(k) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of the Interior from conducting vegetation management projects within the recreation zones.

(l) WILDERNESS REVIEW. □

(a) Congress finds and directs that the recreation zones described in section 801 have been adequately studied for wilderness character and wilderness designation pursuant to sections 201 and 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and are no longer subject to the requirement of subsection (c) of such section pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.

(b) The Secretary of the Interior may not promulgate or issue any system-wide regulation, directive, instruction memorandum or order that would direct management of the federal lands identified in section 801 in a manner contrary to subsection (m).

(m) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each recreation zone.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the recreation zones that would further the purposes and uses outlined within each Zone and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act.

#### **SEC. 04. GOLDBAR RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Goldbar Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, and hiking, provide for the construction of new non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims, and to manage and protect indigenous plants.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Goldbar Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws.

(2) USES . □ Uses and management of the Zone shall:

May 18, 2016 -

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Goldbar Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and camping
- (C) prohibit future mineral and energy leasing or claims.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) protects and manages indigenous plants.
- (F) comply with Section 803.

**(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □**

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016..
- (ii) allows for adjustment to the travel management plan within the regular amendment process.
- (iii) allows for the construction of new non-Off-highway vehicle trails.

**SEC. 05. MONITOR AND MERRIMAC RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Monitor and Merrimac Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, provide for the construction of new Off-highway vehicle and non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims,

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Monitor and Merrimac Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and
- (c) other applicable laws.

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Monitor and Merrimac Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) prohibit future mineral and energy leasing.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

**(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □**

May 18, 2016 -

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated Off-highway vehicle routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) allows for adjustment to the travel management plan within the regular amendment process.
- (iii) allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

## **SEC. 06 KLONDIKE RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Klondike Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, provide for the construction of new non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims,

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Klondike Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Klondike Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) prohibit future mineral and energy leasing.
- (D) provide for new route and trail construction for non-Off-highway vehicle use to further recreational opportunities.
- (E) provide managerial flexibility to route Off-highway vehicle trails in a way that minimizes conflict with non-Off-highway vehicle trails.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016, including off-highway vehicle use of Sovereign Trail System.
- (ii) allows for adjustment to the travel management plan within the regular amendment process.
- (iii) allows for the construction of new non-Off-highway vehicle trails.

**SEC. 00 BIG FLAT RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Big Flat Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, to promote mineral development, and provide for new Off-highway vehicle route construction.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Big Flat Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws.

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Big Flat Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) provide for future mineral leasing with No Surface Occupancy stipulations
- (D) prevent the retirement of mineral leases.
- (E) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (F) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. 00 MINERAL CANYON RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Mineral Canyon Recreation Zone are to promote non-Off-highway vehicle outdoor recreation, such mountain biking, rock climbing, and hiking, to prevent future energy or mineral leases or claims, and provide for new non-Off-highway vehicle route construction, maintain boating access, maintain airstrip access, and maintain access and use of country borrow areas.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Mineral Canyon Recreation Zone:

- (i) in accordance with---

- (ii) this title;
- (iii) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (iv) other applicable laws.

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities;
- (B) provide for non Off-highway vehicle recreational opportunities to occur within the Mineral Canyon Recreation Zone including, biking, and hiking,
- (C) prevent future energy or mineral leasing or claims
- (D) provide for new route and trail construction for non-Off-highway vehicle use to further recreational opportunities.
- (E) maintain access for boating
- (F) maintain access for aircraft to the existing airstrip
- (G) maintain access and use to the county borrow areas.
- (H) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) allows for the construction of new non-Off-highway vehicle trails.

**SEC. □ □ DEE PASS AND UTAH RIMS RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Dee Pass and Utah Rims Recreation Zones are to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Dee Pass and Utah Rims Recreation Zones in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Dee Pass and Utah Rims Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

May 18, 2016 -

- (C) Provide future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

**(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □**

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(4) WHITE WASH CROSS COUNTRY TRAVEL AREA. □ The approximately \_\_\_\_\_ acres identified as the □White Wash Cross Country Travel Area□ on the map entitled □Utah PLI Recreation Zones Map□ and dated \_\_\_\_\_ is open to cross country Off-highway vehicle travel.

**SEC. □10. YELLOW CIRCLE MINE AND CAMEO CLIFFS ADDITIONAL PROVISIONS**

(a) PURPOSES. ---The purposes of the Yellow Circle Mine and Cameo Cliffs Recreation Zones are to promote off-highway vehicle use and to provide for the construction of new Off-highway vehicle and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION. ---

(1) IN GENERAL. --- The Secretary of the Interior shall administer the Yellow Circle Mine and Cameo Cliffs Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Yellow Circle Mine and Cameo Cliffs including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Provide future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated Off-highway vehicle routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. □11. □JENSEN HILLS RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Jensen Hills Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Jensen Hills Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .
- (F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.

(iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(iV) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □□ DOCS BEACH RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Docs Beach Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Docs Beach Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws;

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) Allows future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) comply with Section 803 .

(F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

(ii) Allows for adjustment to the travel management plan within the regular amendment process.

(iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(iV) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □13. RED MOUNTAIN RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Red Mountain Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle

May 18, 2016 -

trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Red Mountain Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Red Mountain Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. □14. DEVILS HOLE RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Devils Hole Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Devils Hole Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities

May 18, 2016 -

(B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) Allows future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) comply with Section 803 .

(F) Allows cross country Off-highway vehicle travel

**(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □**

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

(ii) Allows for adjustment to the travel management plan within the regular amendment process.

(iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □15. BOURDETTE DRAW RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Bourdette Draw Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Bourdette Draw Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws;

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) comply with Section 803 .

May 18, 2016 -

(F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

(ii) Allows for adjustment to the travel management plan within the regular amendment process.

(iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □16. RED WASH RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Red Wash Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Red Wash Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws;

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Red Wash Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) comply with Section 803 .

(F) Allow cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
- (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. 101 HOLE-IN-THE-ROCK TRAIL.**

(a) This Act adds to the National Historic Trail System the corridor known as The Hole-in-the-Rock Trail to be managed as a historic trail and to remain in the ownership of current land management agencies.

(b) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the historic trail.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the national historic trail that would further the purposes and uses outlined within this subsection and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act.

(c) Purposes and Uses

A. The purposes of the National Hole in the Rock Trail is to promote cultural, recreational motorized and non-motorized, and historic values.

B. The Hole in the Rock Foundation and shall be a cooperating agency regarding trail management.

**SEC. 102 RECAPTURE CANYON**

(a) San Juan County, Utah's application for a Title V Right-of-Way, originally submitted on March 30, 2006 and later amended on November 13, 2012, is approved.

(b) The purposes of the Title V Right-of-Way, as stated by the County's application, is to perform routine maintenance to existing trails and routes in an effort to encourage travel in the canyon to remain on a single established route through the canyon that minimizes impacts to the surrounding environment.

(c) The BLM decision to temporarily close Recapture Canyon to off-highway vehicle on September 12, 2007 is dissolved, as the right-of-way approved in subsection (a) will create a mechanism for proper management and maintenance of the area.

**SEC. 1 BIG BURRITO NON-MOTORIZED TRAIL**

(a) The 9.3 mile proposed non-motorized trail within the Sand Flats Recreation Area, approved by the BLM Moab Field Office on December 18, 2016 and commonly known as the Big Burrito non-motorized trail, is hereby authorized to move forward and shall be constructed within 6 months of enactment of this Act.

**TITLE IX -- RED ROCK COUNTRY OFF-HIGHWAY VEHICLE TRAIL.**

**SEC. 01 DEFINITIONS.** In this title:

- (1) COUNTY. The term "County" means Grand and San Juan Counties, Utah.
- (2) SECRETARY. The term "Secretary" means the Secretary of the Interior.
- (3) TRAIL. The term "Trail" means the Red Rock Country Off-Highway Vehicle Trail established under subsection (b).
- (4) FEDERAL LAND. The term "federal land" means land owned by the Bureau of Land Management.

**SEC. 02 DESIGNATION.**

(1) IN GENERAL. the Secretary of the Interior shall designate a trail system in Grand and San Juan Counties, Utah

- (A) for use by Off-highway vehicle off-highway vehicles; and
- (B) to be known as the "Red Rock Country Off-Highway Vehicle Trail"

(2) REQUIREMENTS. In designating the trail, the Secretary of the Interior shall prioritize a long distance route for off-highway vehicles that

(A) as generally depicted on the map entitled Utah PLI Recreation Plans Map and date \_\_\_\_\_;

(B) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Grand Junction, Colorado through the Utah Rims Recreation Area;

(C) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Green River, Utah through the Dee Pass Recreation Area;

(D) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Monticello, Utah through the Cameo Cliffs Recreation Zone;

(E) utilizes existing routes, where feasible, which may include the Kokopelli's Trail and the Orange Trail and Trail 1, consistent with this paragraph;

(F) minimizes the use of graded roads;

(G) creates a recreational experience that provides

- (i) opportunities for scenic vistas;
- (ii) challenging terrain for off-highway vehicle travel;
- (iii) connections to other existing trail systems or trails;

- (iv) minimal conflicts between Off-highway vehicle and non-Off-highway vehicle user; and
- (v) Off-highway vehicle singletrack and doubletrack options where feasible.

(3) MAP. □ A map that depicts the trail shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

**SEC. 03 MANAGEMENT-**

(A) IN GENERAL- The Secretary of the Interior shall manage future designated routes in a manner that--

- (i) is consistent with Section 902 ;
- (ii) does not interfere with private property or water rights.

(B) CLOSURE OR RELOCATING-

(i) IN GENERAL- A designated route may be temporarily closed or detoured, for a period not to exceed two years, if the Secretary of the Interior, in consultation with the State, or relevant local government within the State determines that--

- (I) the designated route is damaging cultural resources or historical resources;
- (II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.
- (III) modification of the designated route would not significantly affect access within the given area.
- (IV) all other options, other than a temporary closure or rerouting, have been exhausted.
- (V) a new alternative route, which can include routes previously closed, has been provided to effectively relocate the trail.

(C) NOTICE- The Secretary of the Interior shall provide information to the public regarding any designated routes that are open, have been relocated, or are temporarily closed through--

- (i) use of appropriate signage within the trail;
- (ii) use of the internet and web resources.

(3) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(d) TRAIL CONSTRUCTION. □

(1) FEASIBILITY STUDY. □ Not later than 180 days after the date of enactment of this Act, the Secretary of the Interior shall study the feasibility and public interest in constructing new routes as part of a the Red Rock County Off-Highway Vehicle Trail System to further Off-highway vehicle recreational opportunities.

(2) CONSTRUCTION. □

(A) CONSTRUCTION AUTHORIZED. □ If the Secretary of the Interior determines that the construction of a route is feasible, construction is authorized.

(B) USE OF VOLUNTEER SERVICES AND CONTRIBUTIONS. □ A route may be constructed under this subsection through the acceptance of volunteer services and contributions from non-federal sources to eliminate the need for federal expenditures to construct the route.

(3) COMPLIANCE. □ In carrying out this subsection, the Secretary of the Interior shall comply with □

(A) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(B) this title; and

(C) other applicable law.

## **Title X □ Long-Term Native American Economic Development Certain □**

### **SEC. 1001. Native American Economic Development in San Juan Count □ Utah**

(a) McCracken Mesa Mineral Transfer. The federal minerals located within the Aneth Extension of the Navajo Nation shall be transferred to the Utah Navajo Trust Fund.

(b) The Act of March 1, 1933, H.R. 11735, Public No. 403, is hereby amended to state the following:

Should oil or gas be produced in paying quantities within the lands hereby added to the Navajo Reservation, 37.5 62.5 per centum of the net royalties accruing therefrom derived from tribal leases shall be paid to the State of Utah: Provided, that the 37.5 62.5 per centum of said royalties shall be expended by the State of Utah in the tuition of Indian children in white schools and/or in the building or maintenance of roads across the lands described in section 1 hereof, or for the benefit of the Indian residing therein.

### **SEC. 100 □ Ute Indian Tribe Economic Development Area**

(a) Hill Creek Mineral Transfer. The federal minerals located within the Hill Creek Extension of the Ute Tribe shall be transferred to the Ute Tribe.

## **Title XI □ Long-Term Energy □ Development Certain □**

### **SEC. 1101. □ ENERGY PLANNING AREAS.**

May 18, 2016 -

(a) ESTABLISHMENT.  Subject to valid existing rights, and to enhance energy development in lands not designated for conversation purposes, the following areas in Uintah, Carbon, Duchesne, and San Juan Counties are hereby established as Energy Zones:

- (1) UINTAH COUNTY ENERGY ZONE.  Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the  Uintah County Energy Zone.
- (2) DUCHESNE COUNTY ENERGY ZONE.  Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Duchesne County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the  Duchesne County Energy Zone.
- (3) CARBON COUNTY ENERGY ZONE.  Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the  Carbon County Energy Zone.
- (4) SAN JUAN COUNTY ENERGY ZONE.  Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the  San Juan County Energy Zone.
- (5) GRAND COUNTY ENERGY ZONE.  Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the  Grand County Energy Zone.

#### **SEC. 110 MAP AND LEGAL DESCRIPTION.**

(a) IN GENERAL.  Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the energy zones established by sections 1101 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT.  The map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY.  A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

#### **SEC. 1103. GENERAL PROVISIONS**

(a) PURPOSES.  The purposes of the Energy Zone are to

(1) designate Federal lands within the areas identified in section 1101 for the primary purpose of energy and mineral development.

(2) promote the use of best practices for the timely evaluation, exploration, leasing, development, production, and transportation of energy (including

May 18, 2016 -

renewable energy) and mineral resources and the inspection and enforcement of such activities; and

(3) ensure that the development of energy and mineral resources is carried out in a manner pursuant to the multiple use provisions within sections 102 and 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1702) and other provisions of law; and

(4) Provide for multiple-uses of the lands within the energy zone, including outdoor recreation and livestock grazing, to the greatest extent practicable.

**(b) MANAGEMENT PLAN.** □

(1) **PLAN REQUIRED-** Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the energy zones.

(2) **RECOMMENDATIONS AND CONSULTATION-** The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) **USES-** The Secretary of the Interior shall allow only such uses of the energy zones that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Resource Advisory Councils established under Division C of this Act.

(c) **INTERIM MANAGEMENT.** □ During the period of time preceding the final adoption of the Plan, the Secretary, acting through the relevant Record of Decision and Approved Resource Management Plan and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and pursuant to this Act.

(e) **MANAGEMENT.** □ The Secretary shall manage the Energy Zone in accordance with □

(1) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.);

(2) the Energy Policy and Conservation Act (P.L. 94-163, 42 U.S.C. 6201); the Energy Policy Act of 2005 (P.L. 109-58, 42 U.S.C. 15801);

(3) this Act; and

(3) any other applicable law.

**(d) LEASING OUTSIDE OF THE ENERGY PLANNING AREAS**

Nothing in this title precludes leasing or resource development of BLM managed lands not described in subsection 1101 from occurring under regular order pursuant to the Mineral Leasing Act or other federal energy development laws.

**(e) MASTER LEASING PLANS**

(a) A Master Leasing Plan shall only be implemented within Uintah, Duchesne, Carbon, Grand, or San Juan Counties if the Public Lands Advisory Council established under Division C of this Act find the relevant Master Leasing Plan to be compatible and viable with the provisions of this Act.

**(f) Completion of Administrative Land Exchange Process**

1. The land exchange application, referred to as UTU-78673 pending before the Moab Field Office, shall be considered in the public interest and completed.

## **Title XII □ Long-Term Travel Management Certain □**

### **SEC. 1 □ 01. RIGHTS-OF-WAY FOR CERTAIN ROADS.**

(a) IN GENERAL. □ Subject to valid existing rights and consistent with this section, the Secretary of the Interior shall grant a right-of-way to the state for public travel and access upon the following roads:

(1) all roads claimed as Class B identified as rights-of-way in judicial actions in the federal court system as of January 1, 2016, in Uintah, Summit, Duchesne, Carbon, Emery, Grand, and San Juan counties.

(b) APPLICABLE LAW. □ A right-of-way granted under subsection (a) shall be granted in perpetuity, except in the case of abandonment, and shall not require the payment of rental.

(c) ADMINISTRATION

(i) Each right-of-way granted by the Secretary under the provisions of this Title shall be perpetual, and shall consist of the full geographic extent authorized by Utah state law in effect as of January 1, 2016.

(ii) The appropriate holder of each right-of-way granted pursuant to this Title may be abandoned pursuant to state law.

(d) FUTURE CLAIMS. □ Nothing in this section precludes the state or county from applying for future or existing rights-of-way on existing or new roads.

### **SEC. 1 □ 0 □ GRAND COUNTY COUNCIL RECOMMENDATIONS FOR CERTAIN ROADS.**

The recommendations of the Grand County Council, as depicted on the map titled □ Grand County PLI Final Map 4-17-2015 □ for Hey Joe Canyon, Tenmile Canyon, and Mineral Canyon roads shall be implemented by the Secretary of the Interior, with the seasonal closures beginning the Tuesday following Memorial Day through Labor Day.

## **Title XIII □ Long-Term Grazing Certain □**

### **Sec. 1301 □ Current Permitted Use**

Unless otherwise specified by this Act, on federal lands managed by the Secretary of Agriculture or the Secretary of the Interior in Summit, Duchesne, Uintah, Grand, Emery,

May 18, 2016 -

Carbon, and San Juan Counties the grazing of domestic livestock shall continue at current permitted levels.

**Sec 130 ☐-- Bighorn Sheep**

On federal lands managed by the Secretary of Agriculture or the Secretary of the Interior in Summit, Duchesne, Uintah, Grand, Emery, Carbon, and San Juan Counties, the viability or existence of bighorn sheep shall not be used to remove or alter the use of domestic sheep or cattle where such use was permitted as of January 1, 2016. If conflicts between bighorn sheep and domestic livestock can be resolved, and if current permittees consent to the terms of any resolution, the Utah Department of Wildlife Resources may conduct whatever means necessary to resolve such conflicts.

## **DIVISION C □ LOCAL PARTICIPATION**

### **Title I □ LOCAL PARTICIPATION AND PLANNING**

#### **SEC. □01. □ Creation of Management Plans**

(a) ESTABLISHMENT. In order to facilitate the creation of the management plans for the National Conservation Areas, Special Management Areas, Watershed Management Areas, National Monument, Geologic Area, Recreation Zones, and Energy Planning Areas designated by this Act, there is created in each of the following counties, Summit, Duchesne, Uintah, Grand, Carbon, San Juan, and Emery Counties a Public Lands Initiative Planning Advisory Council.

(b) PURPOSES. □ The Purpose of the County Public Lands Initiative Advisory Councils are to facilitate an open and transparent process for the creation of the management plans for the areas designated under this Act that require a management plan.

(c) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall develop management plans for the long-term management of each of the areas designated by this Act that require a management plan.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior and the Secretary of Agriculture shall prepare the management plans in consultation and coordination with the County Public Lands Initiative Advisory Councils. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Council into the management plans, the Secretary of the Interior and Secretary of Agriculture shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(3) REQUIREMENTS- Each management plan shall--

(A) Describe the appropriate uses and management of the designated area, as described by the purposes, uses, and additional provisions outlined in each relevant Title; and

(B) Include interpretive and educational materials regarding the recreational, cultural, economic, and biological resources of the region within which the designated area is located.

(C) Conform management plans for designated areas that cross County boundaries.

#### **SEC. □00 □ - The Public Lands Initiative Planning Advisor □ Council**

(a) County Public Lands Initiative Planning Advisory Council. □

(1) ESTABLISHMENT. □ Within 180 days after the date of enactment of this Act, the Secretary of the Interior shall establish in each of the Counties,

a Public Lands Initiative Advisory Council. (referred to as the Advisory Council) to:

(A) advise the Secretary of the Interior and the Secretary of Interior and Secretary of Agriculture with respect to development and implementation of the management plans created under this Act to the greatest extent allowable by law.

(B) encourage and promote local participation in the decision making processes affecting the areas designated by this Act.

(2) MEMBERSHIP. □ The Advisory Council shall consist of 11 members.

(3) MEMBERS. □ The Secretary of the Interior shall appoint a member from each of the following groups:

(i) Two designees from the local county governing commission or council;

(ii) One representative of Native American interests;

(iii) One representative of the Utah Department of Natural Resources;

(iv) One local representative of a federal land management agency;

(v) One representative of the conservation community;

(vi) One representative of the off-highway vehicle community;

(vii) One representative of the agriculture community;

(viii) One representative of the energy development community;

(ix) One representative of the sportsmen community; and

(x) One representative of the outdoor recreation community.

(4) ELIGIBILITY. □ The Secretary of the Interior shall determine that all individuals appointed to the Advisory Council, and the organization or industry each individual represents, support the mission of the group they are slotted to represent.

(1) TERMS. □

(A) IN GENERAL. □ Except for the initial appointees, members of the Advisory Council shall be appointed for a term of 4 years. Members shall not be appointed for more than 3 consecutive or nonconsecutive terms.

(2) TERMS OF INITIAL APPOINTEES. □ The Secretary of the Interior shall appoint the initial members of the Advisory Council as follows:

(i) 5 members shall be appointed for a term of 4 years;

(ii) 4 members shall be appointed for a term of 3 years; and

(iii) 2 members shall be appointed for a term of 2 years.

(5) PRESERVATION OF PUBLIC ADVISORY STATUS. □ No individual may be appointed as a member of the Advisory Council while serving as an officer or employee of the Federal Government.

(6) VACANCY AND REMOVAL. □

(A) IN GENERAL. □ Any vacancy on the Advisory Committee shall be filled in the manner in which the original appointment was made.

(B) REMOVAL. □ Advisory Committee members shall serve at the discretion of the Secretary of the Interior and may be removed at any time for good cause.

May 18, 2016 -

(7) CONTINUATION OF SERVICE. □ Each member may continue to serve after the expiration of the term of office to which such member was appointed until a successor has been appointed.

(8) CHAIR. □ The Chair of the Advisory Council shall be appointed to a 3-year term by the Secretary of the Interior from among the members of the Advisory Council. An individual appointed to the Advisory Council under (4)(2)(iii) shall be eligible to serve as Chair, but may serve for two years. An individual may not be appointed as Chair for more than 2 consecutive or nonconsecutive terms.

(9) PAY AND EXPENSES. □ Members of the Advisory Council shall serve without pay, but each member of the Advisory Council may be reimbursed for travel and lodging incurred through attending meetings of the Advisory Council (including approved workgroup or subgroup meetings) in the same amounts and under the same conditions as Federal employees in accordance with section 5703 of title 5, United States Code.

(10) MEETINGS. □

(A) IN GENERAL. □ The Advisory Council shall meet at the call of the Secretary of the Interior, the chair, or a majority of the members, but not less frequently than twice annually.

(B) OPEN MEETINGS. □ Each meeting of the Advisory Council shall be open to the public.

(C) PRIOR NOTICE OF MEETINGS. □ Timely notice of each meeting of the Advisory Committee shall be published in the Federal Register and be submitted to publications of general circulation.

(D) SUBGROUPS. □ The Advisory Council may establish such workgroups or subgroups as it deems necessary for the purpose of compiling information or conducting research. However, such workgroups or subgroups may not conduct business without the direction of the Advisory Council.

(11) QUORUM. □ Nine members of the Advisory Council shall constitute a quorum.

(12) EXPENSES. □ The expenses of the Advisory Council that the Secretary of the Interior determine to be reasonable and appropriate shall be paid by the Secretary of the Interior.

(13) ADMINISTRATIVE SUPPORT AND TECHNICAL SERVICES. □ The Secretary of the Interior shall provide to the Advisory Council the administrative support and technical services.

(14) ANNUAL REPORT. □

(1) REQUIRED. □ Not later than September 30 of each year, the Advisory Council shall submit a report to the Secretary of the Interior, the Committee on Natural Resources of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate. If circumstances arise in which the Advisory Council cannot meet the September 30 deadline in any year, the Secretary of the Interior shall advise the Chair of each such Committee of the reasons for such delay and the date on which the submission of the report is anticipated.

(2) CONTENTS. □ The report required by paragraph (1) shall describe □

(A) the activities of the Advisory Committee during the preceding year;

(B) the reports and recommendations made by the Advisory Council

May 18, 2016 -

to the Secretary of the Interior during the preceding year; and  
(C) an accounting of actions taken by the Secretary of the Interior as  
a result of the recommendations.

**SEC. 003. PLANNING COMPLETION**

- (a) Upon completion of the management planning process, the Advisory Council shall advise the Secretary of Interior and the Secretary of Agriculture with regards to the implementation of the management plans and provide oversight to ensure proper implementation for the areas designated by this Act.
- (b) Each advisory council shall meet at least twice per year following completion of the management planning process.
- (c) This division will expire at whichever comes first, 7 years from enactment of this Act or 3 years after the management planning process concludes.

## Title I Wilderness

### SEC. 101. WILDERNESS DESIGNATIONS

In furtherance of the purposes of the Wilderness Act, and subject to valid existing rights, the following areas of the State are designated as wilderness and as components of the National Wilderness Preservation System pursuant to the Wilderness Act (16 U.S.C. 1131 et seq.).

- (A) CANDLAND MOUNTAIN.  Certain federal land in Emery County, Utah managed by the United States Forest Service comprising approximately 12,330 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Candland Mountain Wilderness
- (B) DESOLATION CANYON. --- Certain federal land in Duchesne, Uintah, Carbon, Emery, and Grand Counties managed by the Bureau of Land Management comprising approximately 473,272 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Desolation Canyon Wilderness.
- (C) HIGH UINTA. --- Certain federal land in Duchesne, Summit, and Uintah Counties, Utah managed by the United States Forest Service comprising approximately 26,701 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  High Uinta Wilderness.
- (D) MANCOS MESA.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management and the National Park Service comprising approximately 95,605 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Mancos Mesa Wilderness.
- (E) CHEESEBOX CANYON.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 14,441 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Cheesebox Canyon Wilderness.
- (F) BUTLER WASH.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 27,813 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the  Butler Wash Wilderness.
- (G) DARK CANYON.  Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 72,990 acres, as

generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Dark Canyon Wilderness.☐

- (H) BEHIND THE ROCKS.☐ Certain federal land in San Juan and Grand Counties in Utah managed by the Bureau of Land Management comprising approximately 13,025 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Behind the Rocks Wilderness.☐
- (I) BRIDGER JACK MESA.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 6,333 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Bridger Jack Mesa Wilderness.☐
- (J) CEDAR MESA.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 223,566 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cedar Mesa Wilderness.☐
- (K) MIKES CANYON.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management and the National Park Service comprising approximately 30,549 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mikes Canyon Wilderness.☐
- (L) MULE CANYON.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 5,859 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mule Canyon Wilderness.☐
- (M) MARSH PEAK.☐ Certain federal land in Uintah County, Utah managed by the United States Forest Service comprising approximately 15,032 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Marsh Peak Wilderness.☐
- (N) CLIFF PEAK.☐ Certain federal land in Uintah County, Utah managed by the United States Forest Service comprising approximately 9,154 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cliff Peak Wilderness.☐
- (O) BULL CANYON.☐ Certain federal land in Uintah County, Utah managed by the Bureau of Land Management comprising approximately 599 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Bull Canyon Wilderness.☐
- (P) WHITE CANYON.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 18,886 acres, as

generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □White Canyon Wilderness.□

(Q) MEXICAN MOUNTAIN.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 85,150 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Mexican Mountain Wilderness.□

(R) SIDS MOUNTAIN.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 82,406 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Sids Mountain Wilderness.□

(S) MUDDY CREEK.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 72,400 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Muddy Creek Wilderness.□

(T) SAN RAFAEL REEF.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 65,146 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □San Rafael Reef Wilderness.□

(U) CRACK CANYON WILDERNESS.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 27,191 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Crack Canyon Wilderness.□

(V) DEVILS CANYON.□ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 8,652 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Devils Canyon Wilderness.□

(W) NELSON MOUNTAIN.□ Certain federal land in Emery County, Utah managed by the United States Forest Service comprising approximately 12,856 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Nelson Mountain Wilderness.□

(X) WILLIAM GRANSTAFF CANYON.□ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 8,983 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □William Granstaff Canyon Wilderness.□

(Y) MILL CREEK CANYON.□ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 12,358

acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mill Creek Canyon Wilderness.☐

(Z) LABYRINTH CANYON.☐ Certain federal land in Grand and Emery Counties in the state of Utah managed by the Bureau of Land Management comprising approximately 52,969 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Labyrinth Canyon Wilderness.☐

(AA) CANYONLANDS.☐ Certain federal land in San Juan and Grand Counties in the State of Utah managed by the National Park Service comprising approximately 257,607 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Canyonlands Wilderness.☐

(BB) ARCHES.☐ Certain federal land in Grand County, Utah managed by the National Park Service comprising approximately 76,259 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Arches Wilderness.☐

(CC) FISHER TOWERS.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 1,190 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Fisher Towers Wilderness.☐

(DD) MARY JANE CANYON.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 13,574 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mary Jane Canyon Wilderness.☐

(EE) GRANITE CREEK .☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 25,104 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Granite Creek Wilderness.☐

(FF) BOOK CLIFFS.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 175,491 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Book Cliffs Wilderness.☐

(GG) WESTWATER.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 32,955 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Westwater Wilderness.☐

(HH) BEAVER CREEK.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 48,514 acres, as

generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Beaver Creek Wilderness.☐

(II) MOUNT PEALE.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 4,302 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mount Peale Wilderness.☐

(JJ) HAMMOND CANYON.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 7,594 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Hammond Canyon Wilderness.☐

(KK) ARCH CANYON.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 4,376 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Arch Canyon Wilderness.☐

(LL) RANGE CREEK.☐ Certain federal land in Carbon County, Utah managed by the Bureau of Land Management comprising approximately 4,062 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Range Creek Wilderness.☐

(MM) DINOSAUR.☐ Certain federal land in Uintah County, Utah managed by the National Park Service comprising approximately 52,349 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Dinosaur Wilderness.☐

(NN) CEDAR MOUNTAIN. - Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 17,355 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cedar Mountain Wilderness.☐

(OO) INDIAN CREEK. - Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 6,562 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Indian Creek Wilderness.☐

(PP) STEER GULCH. - Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately \_\_\_\_\_ acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Steer Gulch Wilderness.☐

**SEC. 10☐MAPS AND LEGAL DESCRIPTIONS.**

(a) IN GENERAL. □ Not later than two years from the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture as appropriate shall file a map and legal description of the wilderness areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior and the Secretary of Agriculture as appropriate may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management, the National Park Service, and the United States Forest Service.

### **SEC. 103. WILDERNESS ADMINISTRATION.**

(a) IN GENERAL. □ Subject to valid existing rights, each wilderness area established under section 101 shall be administered by the Secretary of the Interior or the Secretary of Agriculture as appropriate in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.), except that □

(1) any reference in that Act to the effective date shall be considered to be a reference to the date of enactment of this Act.

(2) with respect to wilderness areas that are administered by the Secretary of the Interior, any reference in the Wilderness Act to the Secretary of Agriculture shall be considered to be a reference to the Secretary of the Interior.

(b) FIRE, INSECTS, AND DISEASE. □ In accordance with section 4(d)(1) of the Wilderness Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate may take such measures in the Wilderness as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a State or local agency).

(c) WILDFIRE MANAGEMENT OPERATIONS. - Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment).

(d) LIVESTOCK. □

(a) The grazing of livestock in the Wilderness, if established before the date of enactment of this Act, shall be allowed to continue, subject to such reasonable regulations, policies, and practices as the Secretary considers to be necessary in accordance with □

(1) section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)); and

(2) the guidelines set forth in Appendix A of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101□405).

(b) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas, locations, or use.

(e) **OUTFITTING AND GUIDE ACTIVITIES** . □ In accordance with section 4(d)(6) of the Wilderness Act (16 U.S.C. 1133(d)(5)), commercial services (including authorized outfitting and guide activities) within the wilderness areas are authorized to the extent necessary for realizing the recreational purposes of the areas.

(f) **FISH AND WILDLIFE**

(1) **MANAGEMENT ACTIVITIES**. □ In furtherance of the purposes and principles of the Wilderness Act (16 U.S.C. 1131 et seq.), the Secretary may conduct any management activities in the Wilderness that are necessary to maintain or restore fish and wildlife populations and the habitats to support the populations, if the activities are carried out □

(A) consistent with relevant wilderness management plans; and

(B) in accordance with □

(i) the Wilderness Act (16 U.S.C. 1131 et seq.); and

(ii) the guidelines set forth in Appendix B of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101 □405), including the occasional and temporary use of Off-highway vehicle vehicles if the use, as determined by the Secretary, would promote healthy, viable, and more naturally distributed wildlife populations that would enhance wilderness values with the minimal impact necessary to reasonably accomplish those tasks.

(2) **EXISTING ACTIVITIES**. □ Consistent with section 4(d)(1) of the Wilderness Act (16 U.S.C. 1133(d)(1)) and in accordance with the guidelines set forth in appendix B of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101 □405), the State may continue to use aircraft, including helicopters, to survey, capture, transplant, monitor, and provide water for wildlife populations in the Wilderness.

(g) **ACCESS** . □ In accordance with section 5(a) of the Wilderness Act (16 U.S.C. 1134(a)), the Secretary of the Interior or the Secretary of Agriculture as appropriate shall provide the owner of State or private property within the boundary of a wilderness area adequate access to the property.

(h) **WILDLIFE WATER DEVELOPMENT PROJECTS** . □ The Secretary shall authorize structures and facilities, including existing structures and facilities, for wildlife water development projects, including guzzlers, in the wilderness areas designated by this title if □

(1) the structures and facilities will enhance wilderness values by promoting healthy, viable, and more naturally distributed wildlife populations; and

(2) the visual impacts of the structures and facilities on the wilderness can be minimized.

(i) **FISH AND WILDLIFE** . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on public land in the

State, including the regulation of hunting, fishing, and trapping within the wilderness areas.

(B) CONSULTATION . □ Except in emergencies, the Secretary shall consult with the appropriate State agency and notify the public before taking any action under subparagraph (A).

(j) WITHDRAWALS- Subject to valid existing rights, all public land within the areas established under this title, including any land or interest in land that is acquired by the United States within the wilderness area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(k) TRAIL AND FENCE MAINTENANCE. □The Secretary of the Interior and Secretary of Agriculture shall work to ensure that existing trails and fence lines located in the lands identified in this title are adequately cleared and maintained.

#### **SEC. 104. WATER RIGHTS.**

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

- (1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the wilderness areas designated by section 101;
- (2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.
- (3) establishes a precedent with regard to any future wilderness designations.

(b) EXISTING WATER INFRASTRUCTURE. □

- (1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in wilderness areas designated by section 101 subject to such reasonable regulations deemed necessary by the Secretary of Interior and Secretary of Agriculture.

#### **SEC. 105. MILITARY OVERFLIGHTS.**

Nothing in this title restricts or precludes □

- (1) low-level overflights of military aircraft over wilderness areas designated by section 101, including military overflights that can be seen or heard within wilderness areas;
- (2) flight testing and evaluation; or
- (3) the designation or creation of new units of special use airspace, or the establishment of military flight training routes, over wilderness areas.

#### **SEC. 106. ADJACENT MANAGEMENT.**

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a wilderness area designated by section 101.

(b) ACTIVITIES OUTSIDE WILDERNESS AREA. □ The fact that an activity or use on land outside a wilderness area can be seen, heard or smelled within the wilderness area shall not preclude the activity or use outside the boundary of the wilderness area.

**SEC. 10 □ NATIVE AMERICAN TREATY RIGHTS.**

Nothing in this title diminishes the treaty rights of any Indian tribe.

**SEC. 10 □ ACQUISITION OF LAND AND INTERESTS IN LAND.**

(a) ACQUISITION. □

(1) IN GENERAL. □ The Secretary of the Interior or the Secretary of Agriculture as appropriate may acquire land or interest in land within the boundaries of the wilderness areas designated by section 101 only by donation, exchange, transfer from another federal agency, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall complete exchanges for State land located within the boundaries of the wilderness areas designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(b) INCORPORATION IN WILDERNESS AREA. □ Any land or interest in land located inside the boundary of a wilderness area that is acquired by the United States after the date of enactment of this Act shall be added to, and administered as part of the wilderness area.

**SEC. 10 □ WILDERNESS REVIEW.**

(a) PUBLIC LAND. □

(1) FINDING. □ Congress finds that, for purposes of section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782), the public land administered by the Bureau of Land Management in the following wilderness study areas, as depicted on the map entitled Utah PLI Wilderness map and dated \_\_\_\_\_, have been adequately studied for wilderness designation:

- A. 43,323-acre area known as Winter Ridge Wilderness Study Area;
- B. 7,051-acre area known as Jack Canyon Wilderness Study Area;
- C. 6,557-acre area known as Squaw and Papoose Wilderness Study Area;
- D. 20,404-acre area known as Desolation Canyon Wilderness Study Area included within the Desolation Canyon National Conservation Area as designated by this Act and as depicted on the map;

E. 2,517-acre area known as Daniels Canyon Wilderness Study Areas; and

F. 945-acre known as Cross Canyon Wilderness Study Area.

(2) RELEASE .  Any land managed by the Bureau of Land Management within the areas described in paragraph (1) that is not designated as wilderness by this title

(A) shall not be subject to section 603(c) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782(c));

(B) shall be managed in accordance with land management plans adopted under section 202 of that Act (43 U.S.C. 1712); and

(C) shall no longer be subject to Secretarial Order No. 3310 issued by the Secretary of the Interior on December 22, 2010.

(D) shall be managed pursuant to this Act if released lands otherwise lie within a designated area pursuant to this Act.

## **SEC. 110. AIRSHEDS.**

(a) It is the intent of Congress that wilderness areas designated under section 101 shall not be designated as Class I airsheds under the Clean Air Act (42 USC 7401-7661) unless Class I status is agreed to by the State of Utah under existing authorities or the areas designated under section 101 are already managed as Class I airsheds.

## **Title II National Conservation Areas**

### **SEC. 01. NATIONAL CONSERVATION AREAS.**

(a) ESTABLISHMENT.  Subject to valid existing rights, the following areas in the State are hereby established as National Conservation Areas:

- (1) BEACH DRAW.  Certain federal land, comprising approximately 659 acres administered by the Bureau of Land Management in Uintah County, Utah as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the Beach Draw National Conservation Area.
- (2) DIAMOND MOUNTAIN.  Certain federal land, comprising approximately 30,391 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the Diamond Mountain National Conservation Area.
- (3) DOCS VALLEY.  Certain federal land, comprising approximately 8,544 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the Docs Valley National Conservation Area.

(4) STONE BRIDGE DRAW. □ Certain federal land, comprising approximately 2,415 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Stone Bridge Draw National Conservation Area. □

(5) STUNTZ DRAW. □ Certain federal land, comprising approximately 2,284 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Stuntz Draw National Conservation Area. □

(6) SAN RAFAEL SWELL. □ Certain federal land, comprising approximately 329,933 acres administered by the Bureau of Land Management in Emery County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □San Rafael Swell National Conservation Area. □

(7) LABYRINTH CANYON. □ Certain federal land, comprising approximately 35,049 acres administered by the Bureau of Land Management in Emery County and Grand County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Labyrinth Canyon National Conservation Area. □

(8) MUDDY CREEK. □ Certain federal land, comprising approximately 55,208 acres administered by the Bureau of Land Management in Emery County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Muddy Creek National Conservation Area. □

(9) COLORADO RIVER. □ Certain federal land, comprising approximately 116,156 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Colorado River National Conservation Area. □

(10) INDIAN CREEK. - Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Indian Creek National Conservation Area. □

(11) BEARS EARS. - Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management and U.S. Forest Service in San Juan County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Bears Ears National Conservation Area. □

**SEC. 0 □ MAP AND LEGAL DESCRIPTION. □**

(a) IN GENERAL. □ Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the National Conservation Areas established by sections 201, 205 and 206 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management and the United States Forest Service.

### **SEC. □03. ADMINISTRATION OF NATIONAL CONSERVATION AREAS**

(a) PURPOSES. - In accordance with this title, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other applicable laws, the Secretary of the Interior shall manage the National Conservation Areas established by section 201 in a manner that:

- 1) Protects, conserves, and enhances the unique and nationally important historic, cultural, scientific, scenic, recreational, archaeological, natural, and educational resources of the Conservation Area;
- 2) Maintains and enhances cooperative and innovative management practices between resource managers, private landowners, and the public in the Conservation Area; and
- 3) Recognizes and maintains to the extent practicable historic uses of the Conservation Area.

(b) MANAGEMENT PLANS.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each conservation area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the conservation area that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Stakeholder Advisory Councils established under Division C of this Act.

### **SEC. □04. GENERAL PROVISIONS.**

(a) WITHDRAWALS-

- (1) Subject to valid existing rights, all federal land within the National Conservation Areas established under sections 201, 205, and 206 , including any

land or interest in land that is acquired by the United States within the conservation area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(b) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, in national conservation areas established under sections 201, 205, and 206 the Secretary of the Interior may take such measures in the NCA as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a state or local agency).

(c) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) in national conservation areas established under sections 201, 205, and 206 . subject to reasonable regulations as prescribed by the Secretary

(d) LIVESTOCK . □

(1) IN GENERAL . □ Within the national conservation areas established under sections 201, 205, and 206, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water improvements for the purpose of supporting livestock shall be maintained unless the Secretary of the Interior, in

consultation with the Advisory Council, determines that the water sources are damaging cultural resources or historical resources.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue.

(4) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas or use.

(e) EXISTING EASEMENTS AND RIGHTS-OF-WAY. □ Nothing in this title precludes the Secretary of the Interior from renewing easements or rights-of-way in national conservation areas established under sections 201, 205, and 206 in existence on the date of enactment of this Act, in accordance with this Act and existing law.

(f) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a Conservation area designated by sections 201, 205 and 206 .

(b) ACTIVITIES OUTSIDE CONSERVATION AREA. □ The fact that an activity or use on land outside a conservation area established under sections 201, 205, and 206 can be seen, heard, or smelled within the conservation area shall not preclude the activity or use outside the boundary of the Conservation area.

(g) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the national conservation areas established under sections 201, 205, and 206 are authorized.

(h) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping and use of helicopters to maintain healthy wildlife populations, within the national conservation areas established under sections 201, 205, and 206.

(i) ACCESS . □ The Secretary of the Interior shall provide the owner of State or private property within the boundary of a conservation area established under sections 201, 205, and 206 access to the property.

(j) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the national conservation areas established under sections 201, 205, and 206 are authorized.

(k) HUNTING AND FISHING. □ Within the national conservation areas established under sections 201, 205, and 206, hunting and fishing in areas where hunting and fishing has been allowed on lands and waters owned or managed by the Department or the Interior or Department of Agriculture before the date of enactment of this Act, shall continue.

(l). □ WATER RIGHTS

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

- (1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the National Conservation Areas designated by this title;
  - (2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.
  - (3) establishes a precedent with regard to any future NCA designations.
- (b) EXISTING WATER INFRASTRUCTURE. □
- (1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in NCAs designated by this title subject to such reasonable regulations deemed necessary by the Secretary of Interior and Secretary of Agriculture.
- (m) WILDERNESS REVIEW. □
- (a) Congress finds that the national conservation areas described in sections 201, 205, and 206 have been adequately studied for wilderness character and wilderness designation pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and are no longer subject to the requirement of subsection (c) of such section pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.
  - (b) The Secretary of the Interior may not promulgate or issue any system-wide regulation, directive, instruction memorandum or order that would direct management of the federal lands designated as national conservation areas in sections 201, 205, and 206 in a manner contrary to this title.
- (n) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of the Interior from conducting vegetation management projects within the national conservation areas established under sections 201, 205, and 206 in a manner consistent with the purposes of the NCA.
- (o) OFF-HIGHWAY VEHICLE VEHICLES.
- (1) IN GENERAL- Except in cases in which Off-highway vehicle vehicles are needed for administrative purposes, including project construction and maintenance, or to respond to an emergency, the use of Off-highway vehicle vehicles shall be permitted only on designated routes within the national conservation areas.
  - (2) DESIGNATED ROUTES
    - (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
      - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized on January 1, 2016;
      - (ii) minimizes conflict with sensitive habitat or cultural or historical resources; and
      - (iii) does not interfere with private property or water rights.
    - (B) CLOSURE OR REROUTING-

(i) IN GENERAL- A designated route may be temporarily closed or rerouted, for a period not to exceed two years, if the Secretary of the Interior, in consultation with the State, and relevant local government within the State determines that--

(I) the designated route is damaging cultural resources or historical resources;

(II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.

(III) modification of the designated route would not significantly affect access within the conservation area.

(IV) all other options, other than a temporary closure or rerouting, have been exhausted.

(V) an alternative route has been provided, which can include routes previously closed.

(ii) If temporary closure and rerouting options as outlined in section (i) above have been exhausted, and the designated route continues to damage sensitive habitat or cultural or historical resources, the minimum track of the designated route necessary to protect said resources may be permanently closed.

(C) NOTICE- The Secretary of the Interior shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily or permanently closed through--

(i) use of appropriate signage within the Conservation Area;

(ii) use of the internet and web resources.

(3) PERMANENT ROAD CONSTRUCTION-

(1) After the date of enactment of this Act, except as necessary for administrative purposes or to respond to an emergency, the Secretary of the Interior shall not construct any permanent road within the conservation area designated under section 201, 205, or 206

(p) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(q) SCIENTIFIC INVESTIGATIONS. □ The Secretary of Interior and Secretary of Agriculture shall provide for opportunities, including through partnerships with colleges, universities, schools, scientific institutions, non-profit organizations, researchers, and scientists to conduct research and provide educational and interpretive services of the historical, cultural, scientific, archeological, and natural resources within the National Conservation Areas established under 201, 205, and 206. Research findings from the national conservation areas may be used to develop land use solutions that meet human needs while maintaining ecological and economic viability in the region.

(r) RESEARCH AND INTERPRETIVE FACILITIES. □

(1) IN GENERAL. □ The Secretary of Interior and Secretary of Agriculture may establish facilities for □

(A) the conduct of scientific research; and

(B) the interpretation of the historical, cultural, scientific, archeological, natural and educational resources of the national conservation areas.

(2) GRANTS; COOPERATIVE AGREEMENTS. □ In carrying out subsection (s), the Secretary of the Interior and Secretary of Agriculture may make grants to, or enter into cooperative agreements with the State of Utah, local governmental entities, other institutions and organizations, and private entities to conduct research, develop scientific analyses, and carry out any other initiative relating to the restoration or conservation of the Conservation Areas.

(s) PARTNERSHIPS. □ In recognition of the value of collaboration to foster innovation and enhance research and development efforts, the Secretary of the Interior and the Secretary of Agriculture shall encourage partnerships, including public-private partnerships, between and among Federal, State and local agencies, academic institutions, non-profit organizations and private entities.

(t) RECREATION. □ The Secretary shall continue to authorize, maintain, and enhance the recreational use of the national conservation areas, including hunting, fishing, camping, hiking, backpacking, cross-country skiing, hang gliding, paragliding, rock climbing, canyoneering, sightseeing, nature study, horseback riding, mountain biking, rafting, Off-highway vehicle recreation on authorized routes, and other recreational activities, so long as such recreational use is consistent with the purposes of the conservation area, this section, and applicable management plans.

(u) ACQUISITION. □

(1) IN GENERAL. □ The Secretary of the Interior or the Secretary of Agriculture as appropriate may acquire land or interest in land within the boundaries of the national conservation areas designated by section by this title only by donation, exchange, transfer from another federal agency, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall complete exchanges for State land located within the boundaries of the national conservation areas designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(b) INCORPORATION IN NATIONAL CONSERVATION AREA. □ Any land or interest in land located inside the boundary of a national conservation area that is acquired by the United States after the date of enactment of this Act shall be added to, and administered as part of the national conservation area.

## **SEC. 05. BOO CLIFFS SPORTSMENS NATIONAL CONSERVATION AREA**

(a) ESTABLISHMENT. □ Subject to valid existing rights, certain federal land, comprising approximately 42,352 acres administered by the Bureau of Land Management in Uintah County in the State of Utah, as generally depicted on the map entitled Utah PLI

National Conservation Area Map and dated \_\_\_\_\_, is established as Book Cliffs Sportsmens National Conservation Area.

(b) PURPOSES. The purpose of the Book Cliffs Sportsmen's National Conservation Area (referred to in this section as the "NCA") is to protect hunting and fishing opportunities and habitat, manage and restore fish and wildlife habitat, and facilitate hunting and fishing opportunities in a natural environmental.

(c) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the NCA.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Advisory Council. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Council into the management plan the Secretary of the Interior shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(3) REQUIREMENTS- The management plan shall be written in accordance with subsection (b)

(4) Uses- The Secretary of the Interior shall allow only such uses of the NCA that would further the purposes of the NCA.

(d) BOOK CLIFFS SPORTSMEN'S NATIONAL CONSERVATION AREA ADVISORY COUNCIL.

(1) ESTABLISHMENT. Within 180 days after the date of enactment of this Act, the Secretary of the Interior shall establish the Book Cliffs Sportsmens National Conservation Area Advisory Council (referred to as the Advisory Council) to:

(A) advise the Secretary of the Interior with respect to development and implementation of the NCA management plan to the greatest extent allowable by law.

(B) encourage and promote local participation in the decision making processes affecting the NCA.

(2) MEMBERSHIP. The Advisory Council shall consist of 11 members.

(3) MEMBERS. The Secretary of the Interior shall appoint one member from each of the from the following groups:

(i) State Division of Wildlife Resources Director or designee.

(ii) Game bird hunting organizations.

(iii) Wildlife conservation organizations.

(iv) Big game hunting organizations.

(v) a cold water fishing organization.

(vi) the tourism, outfitter, or guiding industry.

(vii) the hunting or shooting equipment retail industry.

(viii) Ute Tribe representative.

- (ix) The agriculture industry.
- (x) the ranching industry designee from Uintah County.
- (xi) Uintah County Commission Chairman or its designee.

(4) ELIGIBILITY. □ The Secretary of the Interior shall determine that all individuals appointed to the Advisory Council, and the organization or industry each individual represents, support sustainable-use hunting, wildlife conservation, and recreational shooting.

(1) TERMS. □

(A) IN GENERAL. □ Except for the initial appointees, members of the Advisory Council shall be appointed for a term of 4 years. Members shall not be appointed for more than 3 consecutive or nonconsecutive terms.

(2) TERMS OF INITIAL APPOINTEES. □ The Secretary of the Interior shall appoint the initial members of the Advisory Council as follows:

- (i) 5 members shall be appointed for a term of 4 years;
- (ii) 4 members shall be appointed for a term of 3 years; and
- (iii) 2 members shall be appointed for a term of 2 years.

(5) PRESERVATION OF PUBLIC ADVISORY STATUS. □ No individual may be appointed as a member of the Advisory Council while serving as an officer or employee of the Federal Government.

(6) VACANCY AND REMOVAL. □

(A) IN GENERAL. □ Any vacancy on the Advisory Committee shall be filled in the manner in which the original appointment was made.

(B) REMOVAL. □ Advisory Committee members shall serve at the discretion of the Secretary of the Interior and may be removed at any time for good cause.

(7) CONTINUATION OF SERVICE. □ Each member may continue to serve after the expiration of the term of office to which such member was appointed until a successor has been appointed.

(8) CHAIR. □ The Chair of the Advisory Council shall be appointed to a 3-year term by the Secretary of the Interior from among the members of the Advisory Council. An individual appointed to the Advisory Council under (4)(2)(iii) shall be eligible to serve as Chair, but may serve for two years. An individual may not be appointed as Chair for more than 2 consecutive or nonconsecutive terms.

(9) PAY AND EXPENSES. □ Members of the Advisory Council shall serve without pay, but each member of the Advisory Council may be reimbursed for travel and lodging incurred through attending meetings of the Advisory Council (including approved workgroup or subgroup meetings) in the same amounts and under the same conditions as Federal employees in accordance with section 5703 of title 5, United States Code.

(10) MEETINGS. □

(A) IN GENERAL. □ The Advisory Council shall meet at the call of the Secretary of the Interior, the chair, or a majority of the members, but not less frequently than twice annually.

(B) OPEN MEETINGS. □ Each meeting of the Advisory Council shall be open to the public.

(C) PRIOR NOTICE OF MEETINGS. □ Timely notice of each meeting of the

Advisory Committee shall be published in the Federal Register and be submitted to publications of general circulation.

(D) SUBGROUPS. □ The Advisory Council may establish such workgroups or subgroups as it deems necessary for the purpose of compiling information or conducting research. However, such workgroups or subgroups may not conduct business without the direction of the Advisory Council.

(11) QUORUM. □ Seven members of the Advisory Council shall constitute a quorum.

(12) EXPENSES. □ The expenses of the Advisory Council that the Secretary of the Interior determine to be reasonable and appropriate shall be paid by the Secretary of the Interior.

(13) ADMINISTRATIVE SUPPORT AND TECHNICAL SERVICES. □ The Secretary of the Interior shall provide to the Advisory Council the administrative support and technical services.

(14) ANNUAL REPORT. □

(1) REQUIRED. □ Not later than September 30 of each year, the Advisory Council shall submit a report to the Secretary of the Interior, the Committee on Natural Resources of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate. If circumstances arise in which the Advisory Council cannot meet the September 30 deadline in any year, the Secretary of the Interior shall advise the Chair of each such Committee of the reasons for such delay and the date on which the submission of the report is anticipated.

(2) CONTENTS. □ The report required by paragraph (1) shall describe □  
(A) the activities of the Advisory Committee during the preceding year;  
(B) the reports and recommendations made by the Advisory Council to the Secretary of the Interior during the preceding year; and  
(C) an accounting of actions taken by the Secretary of the Interior as a result of the recommendations.

(15) VEGETATION MANAGEMENT: Within the NCA, the Secretary of the Interior may authorize vegetation management including through mechanical means to the extent necessary to control fire, insects, or disease to promote and improve wildlife habitat and diversity as consistent with the purposes of the NCA.

(16) EXCEPTION: Notwithstanding the withdrawal in paragraph 202(a), for the Book Cliffs Sportsmens National Conservation Area, the Secretary of the Interior may lease oil and gas resources in accordance with the Mineral Leasing Act (30 U.S.C. 181 et seq.) subject to the following conditions:

(A) the area may be accessed only by directional drilling from a lease held on the date of enactment of this Act on land that is adjacent to, and outside of, the conservation area.

(B) the lease shall prohibit surface occupancy and surface disturbance for any mineral activities within the Sportsmen Conservation Area.

## **SEC. 06. - BEARS EARS NATIONAL CONSERVATION AREA ADDITIONAL PROVISIONS**

(a) FINDINGS. □

Congress finds the following:

- (1) The lands within Bears Ears National Conservation Area have been utilized by Native Americans for thousands of years.
- (2) The unique, intact archaeological record found throughout the Bearꞌs Ears National Conservation Area is sacred to numerous Native American tribes and Pueblos and is of great significance to American history.
- (3) Native American Tribes and Pueblos maintain deep connections and commitments to the lands within the Bears Ears National Conservation Area and continue to rely on and utilize these lands for practicing ceremonies, spiritual rejuvenation, gathering herbs, firewood and cedar poles, hunting for game, and caretaking of sacred places.
- (4) Many local residents, many with early pioneer heritage, have similarly strong attachments to the land and associated lifestyles, both vocational and avocational. Many visitors develop similar attachments and appreciation for these landscapes.

(b) ADDITIONAL PURPOSES

ADDITIONAL PURPOSES. - In accordance with this title, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other applicable laws, the Secretary of the Interior shall manage the Bears Ears National Conservation Areas established by section 201 in a manner that:

- (A) Provides for traditional access by indigenous persons for culturally significant subsistence, including but not limited to traditional gathering and hunting, and cultural and religious uses within the National Conservation Area;
- (B) Develops policies, consistent with the Native American Graves Repatriation and Protection Act, the National Historic Preservation Act, and the Utah State Antiquities Act to protect and preserve and minimize disturbance to Native American archaeological sites, including human remains, from permitted uses of the National Conservation Area;
- (C) Integrates Native American Traditional Ecological Knowledge (TEK)(36 *CFR* 219.19) to improve social, economic, and ecological sustainability in accordance with US Forest Service 2012 Planning Rule regulations, (FSH 1909.12, Zero code □ Ch10);

(c) COOPERATING AGENCIES

COOPERATING AGENCIES. □ The Secretaries shall designate and involve as cooperating agencies interested Tribes and Pueblos that trace their culture and heritage to the lands within the Bearꞌs Ears National Conservation Area in accordance with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*).

(d) TRIBAL EMPLOYMENT

In employing individuals to perform any administrative, interpretation, construction, maintenance, interpretation, or other service in the Bears Ears National Conservation Area, the Secretaries shall, insofar as practicable, give priority consideration to members of Native American tribes that meet publically posted job qualifications and criteria consistent with standard federal hiring practices.

(e) NATIVE AMERICAN LIAISON

The Secretary of the Interior shall appoint a staff member to serve as a liaison to the Native American tribes that enter into cooperating agency status pursuant to subsection (c). The liaison shall work to ensure the voice and perspectives of the cooperating tribal entities are represented in the implementation management of the NCA.

(f) NATIVE AMERICAN COLLABORATION COMMISSION

In preparing the management plan for the Bears Ears NCA, the Secretary of the Interior shall create a Commission comprising of one representative from each Tribe or Pueblo that enters into cooperating agency status pursuant to subsection (c). The Secretary shall actively seek advice and carefully consider counsel of the Commission. The Secretary shall give full consideration to the recommendations of the Commission.

(A) Stakeholder Advisory Council Representative

The Commission shall select either a representative from the Commission or the Native American Liaison to be the Native American interest representative on the Advisory Council, pursuant to Sec. 2002 subsection (a).

(B) MEDIATION

If necessary, mediation regarding significant disagreements between the Commission and the Advisory Council shall be undertaken by the Secretary.

(g) Bears Ears Stakeholder Advisory Council

(1) ADDITIONAL MEMBERS. In addition to the membership listed in SEC. 2002 (a)(3), the San Juan Advisory Council will also include the following members:

- a. One representative with historical expertise in the Hole-in-the-Rock Trail;
- b. One representative with paleontological expertise;
- c. The representative with archaeological and/or historic expertise in SEC. 2002 (a)(3)(iii)(b) shall be an archaeologist.

**SEC. 2002 INDIAN CREEP NATIONAL CONSERVATION AREA  
ADDITIONAL PROVISIONS**

(a) ADDITIONAL PURPOSE:

1. Create an experimental range that allows for flexibility in grazing management to promote rangeland health and/or to respond to research needs.
2. Promotes scientific research and conducts research projects on the interactive affects of land use and the environment; and

**SEC. 00- ADDITIONAL PROVISIONS FOR DOCS VALLEY-STONE BRIDGE DRAW-STUNTZ DRAW-BEACH DRAW-MCCOO RIDGE-AND DIAMOND MOUNTAIN NATIONAL CONSERVATION AREAS**

(a) Nothing in this title shall effect existing or future sage grouse conservation projects, including the management of vegetation through mechanical means within the Doc Valley, Stone Bridge Draw, Stuntz Draw, Beach Draw, and Diamond Mountain National Conservation Areas established under section 201.

**Title III - Watershed Management Areas**

**SEC. 301. WATERSHED MANAGEMENT AREAS**

- (a) ESTABLISHMENT. - The following watershed management areas are hereby established in the State of Utah, subject to valid existing rights:
  - (1) ASHLEY SPRING. - The Ashley Spring Watershed Management Area consisting of approximately 10,951 acres of the Ashley National Forest in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (2) DRY FORK. - The Dry Fork Watershed Management Area consisting of approximately 9,641 acres of the Ashley National Forest in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (3) CASTLE VALLEY. - The Castle Valley Watershed Management Area consisting of approximately 34,248 acres of the Manti-LaSal National Forest in Grand County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (4) WIDDOP MOUNTAIN. - The Widdop Mountain Watershed Management Area consisting of approximately 8,025 acres of the Ashley National Forest in Summit County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (5) EAST FORK SMITHS FORK. - The East Fork Smiths Fork Watershed Management Area consisting of approximately 3,178 acres of the Ashley National Forest in Summit County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.

(b) MAP AND LEGAL DESCRIPTION. -

(1) IN GENERAL. - Two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Watershed Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

## **SEC. 30 □ ADMINISTRATION OF WATERSHED MANAGEMENT AREAS.**

(a) PURPOSES. □ The purposes of the watershed management areas are □

(1) to ensure the protection of the quality of water from the watershed management areas;

(2) to allow visitors to enjoy the scenic, natural, cultural, recreational, and wildlife values of the watershed management areas;

(3) to provide for the management, development, and use of drinking water within the watershed areas;

(4) to allow for the reintroduction of beavers in appropriate watershed management areas;

(5) to allow for reintroduction of flora (land and aquatic), bird, fish and animal fauna in special management areas and watershed management areas;

(6) to provide for the restoration of watershed and re-establish ecosystem health in areas damaged by threatened by insects, or disease; and

(7) to provide for the restoration of ecosystems damaged or threatened by overpopulation of overpopulation of any plant, aquatic or animal species.

(B) MANAGEMENT. □

(1) IN GENERAL. □ The Secretary shall manage the watershed areas □

(A) in a manner consistent with the purposes described in subsection (a);

(B) in accordance with □

(i) the laws (including regulations) generally applicable to the National Forest System;

(ii) this section; and

(iii) any other applicable law (including regulations).

(c) MANAGEMENT PLAN . □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of Agriculture shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of the Interior shall allow only such uses of the watershed management area that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of

this Act.

**SEC. 303 GENERAL PROVISIONS.**

(a) **MOTORIZED VEHICLES.** □

(1) **IN GENERAL-** Except in cases in which motorized vehicles are needed for administrative purposes or to respond to an emergency, the use of motorized vehicles shall be permitted only on designated routes within the Watershed Management Areas.

(b) **NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND-** Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(c) **ROAD CONSTRUCTION-** The Secretary shall be permitted to construct roads for administrative or emergency purposes, or if a temporary road is needed to facilitate fuel reduction for water protection purposes.

(d) **OVERSNOW VEHICLES .** □ Where permitted prior to the date of enactment of this Act the Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Watershed Management Areas when there is at least six inches of snow coverage.

(e) **FIRE, INSECTS, AND DISEASE .** □ In accordance with this title, the Secretary of Agriculture may □

(A) in consultation with state, local, and water districts who own or control water resources within Watershed Management Areas, the Secretary of Agriculture may carry out measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Watershed Management Areas to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(f) **WILDLAND FIRE OPERATIONS.** □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or affects the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(g) **POST-FIRE REHABILITATION.** □ The Secretary may conduct post-fire rehabilitation in the watershed areas, consistent with this title and in accordance with applicable law.

(h) VEGETATION MANAGEMENT. □ The Secretary of Agriculture shall conduct vegetation management projects within the Watershed Management Areas if projects protect or improve water quality or maintain or restore the characteristics of ecosystem composition and structure.

(i) TIMBER HARVESTING. □ Within the Watershed Management Areas, timber harvesting may be utilized if the primary purpose is to restore or improve forest health and watershed function or to further the purposes described in this title.

(j) LIVESTOCK GRAZING . □

(1) IN GENERAL . □ Within the watershed management areas established under sections 301, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(5) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be

given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(k) EXISTING EASEMENTS AND RIGHTS-OF-WAY. □ Nothing in this Act precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this Act and existing law.

(l) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a Watershed Management area designated by section 301.

(m) ACTIVITIES OUTSIDE WATERSHED MANAGEMENT AREA. □ The fact that an activity or use on land outside a Watershed Management area can be seen, heard, or smelled within the Watershed Management area shall not preclude the activity or use outside the boundary of the Watershed Management area.

(n) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the Watershed Management Areas are authorized.

(o) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Watershed Management Area.

(p) ACCESS . □ The Secretary of Agriculture shall provide the owner of State or private property within the boundary of a Watershed Management Area reasonable access to the owner's property.

(q) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the Watershed Management Areas are authorized.

(r) HUNTING AND FISHING. □

Within the Watershed Management Areas in where hunting and fishing on lands and waters owned of managed by the Department of Agriculture was allowed before the date of enactment of this Act, shall continue.

(s) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Watershed Management Areas designated by this title;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.

(3) establishes a precedent with regard to any future Watershed Management Area designations.

(b) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in Watershed Management Areas designated by section 101 subject to such reasonable regulations deemed necessary by the Secretary of Interior and Secretary of Agriculture.

(t) WITHDRAWAL . □

(1) IN GENERAL . □ Subject to valid rights in existence on the date of enactment of this title, the Federal land within the Watershed Management Areas designated by section 301 are withdrawn from □

- (a) all forms of entry, appropriation, and disposal under the federal land laws;
- (b) location, entry, and patent under the mining laws; and
- (c) operation of the mineral leasing, mineral materials, and geothermal leasing laws

(u) ASHLEY SPRING AND DRY FORK.-- The management plans for the Ashley Spring and Dry Fork management areas shall include provisions for the development of containment ponds, water pipes, and other improvements to deliver water to the Ashley Valley should the flow of Ashley Spring become diminished or impaired.

## **Title IV □ Special Management Areas**

### **SEC. 401. HIGH UINTAS SPECIAL MANAGEMENT AREA.**

ESTABLISHMENT. □ Subject to valid existing rights, the approximately 20,683 acres of the Ashley National Forest in Uintah and Duchesne County, Utah as generally depicted on the map entitled □Utah PLI High Uintas Special Management Area Map□and dated \_\_\_\_.

(a) PURPOSES □ The purposes of the High Uintas Special Management Area (referred to in this title as the Area) is to maintain the presently existing wilderness character of the area and to all for the continued use of winter Off-highway vehicle vehicles.

### **SEC. 40 □ HIGH UINTAS SPECIAL MANAGEMENT AREA MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the High Uintas Special Management Area with the Committee on Natural Resources of

the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

#### **SEC. 403. ADMINISTRATION OF THE HIGH UINTAS SPECIAL MANAGEMENT AREA.**

(a) ADMINISTRATION . □

(1) IN GENERAL . □ The Secretary of Agriculture shall administer the High Uintas Special Management Area in accordance with □

(a) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);

(b) this title; and

(c) other applicable laws.

(b) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of the Interior shall allow only such uses of the special management area that would further the purposes outlined in subsection 401(a) of this Title and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the special management areas shall:

(A) maintain the presently existing wilderness character of the special management area.

(B) allow for non motorized recreational opportunities to occur within the Area including skiing, biking, hiking, fishing, hunting, horseback riding, snowshoeing, and camping;

(C) allow for the continued use and access of Off-highway vehicle winter vehicles including snowmobiles

(D) prohibit mineral development;

(E) prohibit new permanent road construction; and

(F) prohibit commercial timber harvesting.

#### **SEC. 404. HIGH UINTAS SPECIAL MANAGEMENT AREA GENERAL PROVISIONS.**

(a) WITHDRAWALS-

(1) Subject to valid existing rights, all federal land within the High Uintas Special Management Area established under sections 401, including any land or interest in land that is acquired by the United States within the conservation area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(b) FIRE, INSECTS, AND DISEASE .□ In accordance with this title, the Secretary of the Agriculture may take such measures in the High Uintas Special Management Area as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a state or local agency).

(c) WILDLAND FIRE OPERATIONS. □Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or affects the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(d) LIVESTOCK .□

(1) IN GENERAL .□ Within the High Uintas Special Management Area the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

#### (4) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas or use.

#### (e) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around the High Uintas Special Management Area.

(b) ACTIVITIES OUTSIDE THE AREA. □ The fact that an activity or use on land outside the High Uintas Special Management Area can be seen, heard, or smelled within the Area shall not preclude the activity or use outside the boundary of the Area.

(f) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the High Uintas Special Management Area are authorized.

(g) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping and use of helicopters to maintain healthy wildlife populations, within the High Uintas Special Management Area

(h) ACCESS . □ The Secretary of the Interior shall provide the owner of State or private property within the boundary of the High Uintas Special Management Area.

(i) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the High Uintas Special Management Area are authorized.

(j) HUNTING AND FISHING. □ Within the Area, hunting and fishing, in areas where hunting and fishing has been allowed on lands and waters owned or managed by the Department of Agriculture before the date of enactment of this Act, shall continue.

(k).  WATER RIGHTS

(a) STATUTORY CONSTRUCTION.  Nothing in this title

- (1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the High Uintas Special Management Area;
- (2) affects any water rights in the State of Utah existing on the date of enactment of this Act;
- (3) establishes a precedent with regard to any future national conservation areas designations.

(b) UTAH WATER LAW.  The Secretary of the Interior shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the High Uintas Special Management Area.

(c) EFFECTS ON STATE WATER RIGHTS.  The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects

- (1) any water rights granted by the State;
  - (2) the authority of the State in adjudicating water rights;
  - (3) definitions established by the State with respect to the term  beneficial use  or  priority of rights
  - (4) terms and conditions for groundwater withdrawal;
  - (5) the use of groundwater resources that are in accordance with State law;
- or
- (6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE.

(1) Nothing in this Act shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the High Uintas Special Management Area.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION.  The term  water resource facilities  means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(l) PERMANENT ROAD CONSTRUCTION-

(1) After the date of enactment of this Act, except as necessary for administrative purposes or to respond to an emergency, the Secretary of Agriculture shall not construct any permanent road within the High Uintas Special Management Area

(m) TEMPORARY ROAD CONSTRUCTION -- Except as necessary to meet the minimum requirements for the administration of the High Uintas Special Management Area, and to protect public health and safety, the establishment of temporary roads is prohibited.

(n) USE OF MOTORIZED OR MECHANIZED VEHICLES -- Except as necessary to meet the minimum requirements for the administration of the High Uintas Special Management Area and to protect public health and safety the use of Off-highway vehicle or mechanized vehicles is prohibited.

(o) COMMERCIAL TIMBER HARVESTING □ Commercial timber harvesting within the High Uintas Special Management Area is prohibited.

(p) OVERSNOW VEHICLES . □ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the High Uintas Special Management Area when there is at least six inches of snow coverage.

#### **SEC. 405. LITTLE WEST FORK □ BLAC □ S SPECIAL MANAGEMENT AREA.**

(A) ESTABLISHMENT. □ Subject to valid existing rights, the approximately 8,231.25 acres of the Wasatch Cache National Forest in Summit County, Utah as generally depicted on the map entitled □ Utah PLI Little West Fork Blacks Special Management Area Map □ and dated \_\_\_\_\_.

(B) MAP AND LEGAL DESCRIPTION. □

(1) IN GENERAL. □ Two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Little West Fork Blacks Special Management Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

#### **SEC. 406. ADMINISTRATION OF LITTLE WEST FORK □ BLAC □ S SPECIAL MANAGEMENT AREA.**

(a) PURPOSE . □ Little West Fork Blacks Special Management Area is to manage, maintain, and restore watershed and ecosystem function and aquatic habitat within the Area.

(b) ADMINISTRATION . □

(A) IN GENERAL . □ The Secretary of Agriculture shall administer the Little West Fork Blacks Special Management Area

(i) in a manner that promotes, protects, and manages the resources of the Little West Fork Blacks Special Management Area described in subsection (a); and

(ii) in accordance with □

(I) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);

(II) this Act; and

(III) other applicable laws.

(c) MANAGEMENT PLAN . □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of the Interior shall allow only such uses of the special management area that would further the purposes outlined in subsection 406(a) of this Title and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the special management areas shall:

(A) include skiing, biking, hiking, fishing, hunting, horseback riding, snowmobiling, motorcycle riding, off-highway vehicle use, snowshoeing, and camping.

(B) allow for reintroduction of flora (land and aquatic), bird, fish and animal fauna in special management areas;

(C) restore watershed and re-establish ecosystem health in areas damaged by threatened by insects, or disease;

(D) restore balance of ecosystem damaged or threatened by overpopulation of overpopulation of any plant, aquatic or animal species.

(E) Allow fuel reduction and forest health treatment to restore watershed and ecosystem function, reduce hazardous fuels, and to protect property in the wildland urban interface.

**SEC. 40 LITTLE WEST FORK BLACKS SPECIAL MANAGEMENT AREA  
GENERAL PROVISIONS.**

**(a) OFF-HIGHWAY VEHICLE VEHICLES.**

(1) IN GENERAL- Except in cases in which Off-highway vehicle vehicles and non-mechanized vehicles are needed for administrative purposes or to respond to an emergency, the use of Off-highway vehicle vehicles shall be permitted only on designated routes within the Little West Fork Blacks Special Management Areas.

**(2) MANAGEMENT-**

**(A) IN GENERAL-** The Secretary of Agriculture shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized on January 1, 2016;

(ii) minimizes conflict with sensitive habitat or cultural or historical resources;  
and

(iii) does not interfere with private property or water rights.

**(B) CLOSURE OR REROUTING.**

(i) IN GENERAL- A designated route may be closed or rerouted, if the Secretary of Agriculture, in consultation with the State, or relevant local government within the State, subject to subparagraph (C), determines that--

(I) the designated route is damaging cultural resources or historical resources;

(II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.

(III) modification of the designated route would not significantly affect access within the conservation area.

(IV) (IV) all other options, other than a temporary closure or rerouting, have been exhausted.

(V) an alternative route has been provided, which can include routes previously closed.

(C) NOTICE- The Secretary of Agriculture shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily closed through--

(i) use of appropriate signage within the Special Management Areas.;

(ii) use of the internet and web resources.

(b) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(c) PERMANENT ROAD CONSTRUCTION- Except as necessary for administrative purposes or to respond to an emergency, the Secretary of Agriculture shall not construct any permanent road within the Special Management Areas after the date of enactment of this Act.

(d) TEMPORARY ROAD CONSTRUCTION. □ Temporary road construction shall be permitted to fulfill the purposes of the area, including for fuel reduction and forest health management treatments, including prescribed burns.

(e) OVERSNOW VEHICLES .□ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Special Management Areas when there is at least six inches of snow coverage.

(f) FIRE, INSECTS, AND DISEASE .□ In accordance with this title, the Secretary of Agriculture may□

(A) carry out measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Special Management Areas; and

(B) coordinate those measures with the appropriate State or local agency.

(h) WILDLAND FIRE OPERATIONS. □ Consistent with the purposes of this Title, nothing in this title precludes the Secretary of Agriculture from authorizing a Federal, State, or local agency from conducting pre-suppression and suppression. wildfire management operations (including operations using aircraft or mechanized equipment

(i) LIVESTOCK GRAZING .□

(1) IN GENERAL .□ Within the Special Management Areas, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue.

### (3) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(j) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this Act precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this Act and existing law.

(k) ADJACENT MANAGEMENT.

(a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around the Little West Fork Blacks Special Management Area designated by this section.

(b) ACTIVITIES OUTSIDE SPECIAL MANAGEMENT AREA.  The fact that an activity or use on land outside the Little West Fork Blacks Special Management Area can be seen, heard, or smelled within the Little West Fork Blacks Special Management Area shall not preclude the activity or use outside the boundary of Little West Fork Blacks Special Management Area

(l) OUTFITTING AND GUIDE ACTIVITIES .  As permitted as of January 1, 2016 Commercial services (including authorized outfitting and guide activities) within the Little West Fork Blacks Special Management Area are authorized

(m) FISH AND WILDLIFE .  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and

within the Little West Fork Blacks Special Management Area.

(n) ACCESS . □ Consistent with the purposes of the Title, and as authorized as of the date of enactment of this Title, The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the Little West Fork Blacks Special Management Area access to the owner's property.

(o) HUNTING AND FISHING. □ Within the Little West Fork Blacks Special Management Area where hunting and fishing on lands and waters owned or managed by the Department of the Interior or Department of Agriculture was allowed before the date of enactment of this Act, shall continue.

(p) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Special Management Areas designated by section 301;

(2) affects any water rights in the State of Utah;

(3) establishes a precedent with regard to any future Special Management Areas designations.

(b) UTAH WATER LAW. □ The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the Special Management Areas.

(c) EFFECTS ON STATE WATER RIGHTS. □ The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects □

(1) any water rights granted by the State;

(2) the authority of the State in adjudicating water rights;

(3) definitions established by the State with respect to the term "beneficial use" or "priority of rights" □

(4) terms and conditions for groundwater withdrawal;

(5) the use of groundwater resources that are in accordance with State law; or

(6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this title shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the Little West Fork Blacks Special Management Area

designated by this section.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □ The term □water resource facilities□ means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(q) VEGETATION MANAGEMENT. □ Consistent with the purposes of the Little West Fork Blacks Special Management Area, nothing in this title prevents the Secretary of Agriculture from conducting vegetation management projects within the Little West Fork Blacks Special Management Area.

(r) COMMERCIAL TIMBER HARVEST. □ Consistent with the purposes of the Little West Fork Blacks Special Management Area within the Little West Fork Blacks Special Management Area, commercial timber harvest is not prohibited if the primary purpose is to restore or improve forest health and watershed function or to further the purposes described in this title

(s) WITHDRAWAL . □

(1) IN GENERAL . □ Subject to valid rights in existence on the date of enactment of this title ,the Federal land within the Little West Fork Blacks Special Management Area designated by this section are withdrawn from □

- (a) all forms of entry, appropriation, and disposal under the federal land laws;
- (b) location, entry, and patent under the mining laws; and
- (c) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(t) ACCESS. □ Nothing in this section prohibits the Secretary from authorizing reasonable access to private land inside or adjacent to the Little West Fork Blacks Special Management Area including the construction of permanent roads within the Little West Fork Blacks Special Management Area

#### **SEC. 40 □ □DESOLATION CANYON □NINE MILE CANYON □AND WHITE RIVER SPECIAL MANAGEMENT AREAS**

(a) ESTABLISHMENT. □ Subject to valid existing rights, the following areas in the State are hereby established as Special Management Areas:

(1) WHITE RIVER. □ Certain federal land, comprising approximately 16,785 acres administered by the Bureau of Land Management in Uintah County, Utah as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the □White River Special Management Area. □

(2) NINE MILE CANYON. □ Certain federal land, comprising approximately 41,301 acres administered by the Bureau of Land Management in Carbon County and Duchesne County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the □Nine Mile Canyon Special Management Area. □

(3) DESOLATION CANYON. □ Certain federal land, comprising approximately 8,770 acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the □Desolation Canyon Special Management Area. □

(b) PURPOSES □ The purposes of the Desolation Canyon, Nine Mile Canyon, and White River Special Management Areas established under 407(a) in a manner that:

- 1) Protects, conserves, and enhances the unique and nationally important historic, cultural, scientific, scenic, recreational, archaeological, natural, and educational resources of the Conservation Area;
- 2) Maintains and enhances cooperative and innovative management practices between resource managers, private landowners, and the public in the Conservation Area; and
- 3) Recognizes and maintains to the extent practicable historic uses of the Conservation Area.

**SEC. 40 □ □DESOLATION CANYON □NINE MILE CANYON □AND WHITE RIVER SPECIAL MANAGEMENT AREA MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Desolation Canyon, Nine Mile Canyon, and White River Special Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 40 □ □ADMINISTRATION OF THE DESOLATION CANYON □NINE MILE CANYON □AND WHITE RIVER SPECIAL MANAGEMENT AREAS.**

(a) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

#### **SEC. 410. DESOLATION CANYON □ NINE MILE CANYON □ AND WHITE RIVER SPECIAL MANAGEMENT AREA GENERAL PROVISIONS**

(a) The general provisions of Title II section 204 shall apply to the Special Management Areas.

(b) EXCEPTION. □ Notwithstanding the withdrawal of 204(a) for the Desolation Canyon Special Management Area, White River Special Management Area, and the Nine Mile Canyon Special Management Area, the Secretary of the Interior may lease oil and gas resources in accordance with the Mineral Leasing Act (30 U.S.C. 181 et seq.) subject to the following conditions:

(A) the area may be accessed only by directional drilling from a lease held on the date of enactment of this Act on land that is adjacent to, and outside of, the conservation area.

(B) the lease shall prohibit surface occupancy and surface disturbance for any mineral activities within the national conservation areas.

(c) NINE MILE CANYON ADDITIONAL PROVISIONS. □

1. Energy development, including access needs for energy development, within the Nine Mile Canyon Special Management Area shall be allowed under the terms of the West Tavaputs Plateau Project Final Environmental Impact Statement and Record of Decision of July 2, 2010.

2. The management plan required under Sec. 409 of this Title for the Nine Mile Canyon Special Management Area shall be developed jointly between Carbon and Duchesne County Advisory Councils.

3. Upon enactment of this Title, the current ACEC designation shall be permanently removed from Nine Mile Canyon.

## **Title V - ARCHES NATIONAL PAR □ EXPANSION**

#### **SEC. 501. ARCHES NATIONAL PAR □ EXPANSION**

(A) Section 1 of Public Law 92-155 is amended □

(1) by inserting the following after paragraph (2) □

□(3) Effective on the date of enactment of the Utah Public Lands Initiative Act, the boundary of the park shall include the area consisting of approximately 19,255 acres and depicted as Arches Expansion on the map entitled □Utah PLI Park and Monument Map□ and dated \_\_\_\_\_.

(2) by redesignating paragraph (3) as paragraph (4); and

(3) in paragraph (4), as so designated by paragraph (2) of this provision, by striking □(1) and (2)□and inserting instead □(1), (2) and (3)□

#### **SEC. 50 □ EXISTING TRAILS**

(a) The public shall have continued access Off-highway vehicle access to the Klondike Bluffs, Dry Mesa, Winter Camp Ridge (to the overlook of Salt Wash), The Highlands (pipeline to the overlook of Salt Wash), and The Eagle's Nest trails, subject to reasonable regulations as prescribed by the Secretary.

(b) The National Park Service shall enter into a cooperative agreement with Ride with Respect that provides for continued public access of the trails outlined in this section, maintains the conservation qualities of the Park, and provides a framework for maintenance cost sharing.

(c) Where practicable, mountain biking shall be permitted and promoted within the trails outlined in subsection (a).

#### **SEC. 503 □ TRANSPORTATION PLANNING**

(a) The National Park Service shall work to create a northern entrance, which is being facilitated by the expansion outlined in 501(a), that enhances the visitor experience and alleviates traffic congestion at the current Park entrance.

## **Title VI - □ JURASSIC NATIONAL MONUMENT**

#### **SEC. 601. □ JURASSIC NATIONAL MONUMENT**

(a) PURPOSES. - To conserve, protect, interpret, and enhance for the benefit of present and future generations the unique and nationally important paleontological, scientific, educational, and recreational resources, there is established in Emery County, Utah, subject to valid existing rights, the Jurassic National Monument (referred to in this title as the □Monument□).

(b) BOUNDARIES . □ The Monument shall consist of approximately 867 acres of federal land in Emery County, Utah as generally depicted on the map entitled □Utah PLI Park and Monument Map□and dated \_\_\_\_\_

(c) MAP ; LEGAL DESCRIPTION . □

(1) IN GENERAL. □Two years after the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the Special Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

- (2) EFFECT. □The map and legal description prepared under paragraph (b) shall have the same force and effect as if included in this title, except that the Secretary of the Interior may correct minor errors in the map or legal description.
- (3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.
- (d) ACQUISITION OF LAND .□
- (1) IN GENERAL. □The Secretary of the Interior may acquire land or interests in land within the boundaries of the Monument only by donation, exchange, or purchase from a willing seller.
- (2) LAND EXCHANGE. □At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall complete exchanges for State land located within the boundaries of the Monument designated by this title.
- (3) NO CONDEMNATION. □Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.
- (e) WITHDRAWALS .□ Subject to valid existing rights, any land within the Monument or any land or interest in land that is acquired by the United States for inclusion in the Monument after the date of enactment of this section is withdrawn from□
- (i) entry, appropriation, or disposal under the federal land laws;
- (ii) location, entry, and patent under the mining laws; and
- (iii) operation of the mineral leasing laws, geothermal leasing laws, and minerals materials laws.
- (f) MANAGEMENT PLAN. □
- (1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the national monument.
- (2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.
- (c) USES- The Secretary of the Interior shall allow only such uses of the national monument that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the national monument may:
- (A) address transportation issues to and from the Monument; and
- (B) codify the current Special Recreation Management Area boundary.
- (g) ADMINISTRATION .□ The Secretary of the Interior shall administer the Monument in accordance with---
- (1) the Management Plan; and
- (2) any other applicable laws.
- (h) ADJACENT MANAGEMENT.□

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a Monument designated by this Act.

(b) ACTIVITIES OUTSIDE MONUMENT. □ The fact that an activity or use on land outside the Monument can be seen, heard, or smelled within the Monument shall not preclude the activity or use outside the boundary of the Monument.

## **TITLE VII - WILD AND SCENIC RIVERS**

### **SEC. 01 - WILD AND SCENIC RIVERS**

(a) Section 3(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1274(a)) is amended by adding at the end the following:

□(213) COLORADO RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 14.4 mile segment from Westwater Canyon from River Mile 125 to River Mile 112 as a wild river.
- (B) The approximately 8 mile segment from River Mile 112 to Cisco Wash as a scenic river.
- (C) The approximately 33.1 mile segment from the Confluence of the Colorado River with the Dolores River to River Mile 49 near Potash as a recreational river.
- (D) The approximately 5.7 mile segment from River Mile 44.5 to River mile 38.5 as a scenic river.
- (E) The approximately 3.7 mile segment from River Mile 37.5 to River Mile 34 at the Canyonlands National Park boundary as a scenic river.
- (F) The approximately 5.5 mile river segment from River Mile 44 to River Mile 38.5 as a scenic river.
- (G) The approximately 6.5 river segment of the Colorado River from River Mile 37.5 to the boundary of Canyonlands National Park at River Mile 31 as a scenic river.

□(214) DOLORES RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 5.9 mile segment from the Colorado State line to Fisher Creek as a recreational river.
- (B) The approximately 6.3 mile segment from Fisher Creek to Bridge Canyon as a scenic river
- (C) The approximately 9.9 mile segment from Bridge Canyon to the Colorado River as a recreational river.

□(215) GREEN RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 50 mile river segment from River Mile 97 at the confluence with the San Rafael River to Canyonlands National Park Boundary as a scenic river.
- (B) The approximately 44.5 miles from Nine Mile Creek to Chandler Canyon as a wild river
- (C) The approximately 8 miles from Chandler Creek to Florence Creek as a scenic river.
- (D) The approximately 19 miles from Florence Creek to the Nefertiti Boat Ramp as a wild river.
- (E) The approximately 62 miles from the northern border of the Desolation Canyon Wilderness, designated under this Act, in Uintah County, Utah to the Carbon County line as a recreation river.

□(216) DARK CANYON, UTAH. The approximately 18.7 miles of the Dark Canyon River from the forest boundary to the Lake Powell below Young's Canyon to be administered by the Secretary of the Interior as a wild river.

(b) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a wild and scenic river designated by this title.

(b) ACTIVITIES OUTSIDE WILD AND SCENIC RIVER. □ The fact that an activity or use on land outside a wild and scenic river designated under this section can be seen, heard, or smelled within the wild and scenic river shall not preclude the activity or use outside the boundary of the wild and scenic river.

(c) The Secretary of the Interior may acquire land or interest in land within the boundaries of the wild and scenic river areas designated by this title only by donation, exchange, or purchase from a willing seller. □

(d) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(e) OUTFITTING AND GUIDE ACTIVITIES. □ Commercial services (including authorized outfitting and guide activities) within the wild and scenic rivers are authorized.

(f) MAPS AND LEGAL DESCRIPTION

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of the Interior shall file a map, entitled Utah PLI Wild and Scenic Rivers, and legal description of the rivers with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of the Interior may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

## **TITLE VIII □ ASHLEY □ ARST NATIONAL GEOLOGIC AND RECREATION AREA**

### **SEC. □01. ASHLEY □ ARST NATIONAL GEOLOGIC AND RECREATION AREA.**

(a) ESTABLISHMENT. □ Subject to valid existing rights, the approximately 110,839 acres generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, are hereby established as the □ Ashley Karst National Geologic and Recreation Area □

(b) PURPOSES □ The purposes of the Ashley Karst National Geologic and Recreation Area (referred to in this title as the Area) are to provide recreational opportunities, protection and management of water resources, utilize commercial forest products, and withdraw minerals from development.

### **SEC. □0 □ MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

### **SEC. □03. ADMINISTRATION.**

(a) ADMINISTRATION . □

(1) IN GENERAL . □ The Secretary of Agriculture shall administer the Area in accordance with □

(a) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);

(b) this title; and

(c) other applicable laws.

(2) MANAGEMENT PLAN .□

(a) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the Area.

(b) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of Agriculture shall allow only such uses of the Area that would further the purposes outlined in subsection 801(b) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the Area shall:

(A) provide for recreational opportunities to occur within the Area including skiing, biking, hiking, fishing, hunting, horseback riding, snowmobiling, designated trails for motorcycle riding and off-highway vehicle use, snowshoeing, camping, and other recreational activities consistent with this title;

(C) provide for appropriate forest management, utilizing commercial harvesting for hazardous fuels reduction, wildland fire control, control of insects and disease, and watershed health;

(D) prohibit mineral development; and

(E) promote the long-term protection and management of the water resources and underground karst system; and

(F) comply with Sections 801 and 804 .

**SEC. □04 GENERAL PROVISIONS.**

(a) OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(1) IN GENERAL- The use of Off-highway vehicle and mechanized vehicles shall be permitted within the Area.

(2) MANAGEMENT-

(A) IN GENERAL- The Secretary of Agriculture shall designate existing routes in a manner that--

(i) utilizes Forest Service roads existing as of January 1, 2016 and also new roads authorized by this Act;

(ii) minimizes conflict with sensitive habitat or cultural or historical resources;

(iii) does not interfere with private property or water rights.

(B) CLOSURE OR REROUTING-

(i) IN GENERAL- A designated route may be temporarily closed or rerouted, for a period not to exceed two years, if the Secretary of Agriculture, in consultation with the State, or relevant local government within the State determines that--

(I) the designated route is damaging cultural resources or historical resources;

(II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.

(III) modification of the designated route would not significantly affect access within the conservation area.

(IV) all other options, other than a temporary closure or rerouting, have been exhausted.

(V) an alternative route has been provided.

(C) NOTICE- The Secretary of Agriculture shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily closed through--

(i) use of appropriate signage within the Area; and

(ii) use of the internet and web resources.

(3) PRIORITY ROUTES  Marsh Peak South Road and South Fork Road, as depicted on the Utah PLI Special Management Area Map, shall be open for Off-highway vehicle use. Administrative Access shall be allowed for the Forest Service, State and local governments, and water companies to access Whiterocks Lake for general and emergency maintenance purposes.

(b) TRAIL CONSTRUCTION.

(1) FEASIBILITY STUDY. □ Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall study the feasibility and public interest of constructing new routes as needed to further mechanized and hiking recreational opportunities.

(2) CONSTRUCTION. □

(A) CONSTRUCTION AUTHORIZED. □ If the Secretary of Agriculture determines that the construction of a route is feasible the Secretary of Agriculture may provide for the construction of the route.

(B) USE OF VOLUNTEER SERVICES AND CONTRIBUTIONS. □ A route may be constructed under this subsection through the acceptance of volunteer services and contributions from non-federal sources.

(c) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land located within the Area.

(d) OVERSNOW VEHICLES . □ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Area when there is at least six inches of snow coverage.

(e) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of Agriculture may □

(1) carry out any measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Area; and

(2) coordinate those measures with the appropriate State or local agency.

(f) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or interfere with the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to prevent or control the spread of wildfires or the use of mechanized equipment for wildfire pre-suppression and suppression.

(g) LIVESTOCK GRAZING.. □

(1) IN GENERAL . □ Within the Area, Within the Area, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in

accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(3) UTAH DEPARTMENT OF AGRICULTURE - In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(h) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this title precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence on the date of enactment of this Act, in accordance with this Act and existing law.

(i) ADJACENT MANAGEMENT.

(a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around the Area designated by section 801.

(b) ACTIVITIES OUTSIDE AREA. □ The fact that an activity or use on land outside the Area can be seen, heard, or smelled within the Area shall not preclude the activity or use outside the boundary of the Area.

(j) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the Area are authorized.

(k) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Area.

(l) ACCESS . □ The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the Area access to the property.

(m) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the Area are authorized

(n) HUNTING AND FISHING. □  
Within the Area in where hunting and fishing on lands and waters owned or managed by the Department of Agriculture was allowed before the date of enactment of this Act, shall continue.

(o) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Area designated by section 801;

(2) affects any water rights in the State;

(3) establishes a precedent with regard to any future designations.

(4) shall restrict or prohibit the upstream diversion of water rights held under Utah State law nor shall any claim of resource damages arise due to the rightful diversion or depletion of streams or rivers affecting the Area.

(b) UTAH WATER LAW. □ The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the Area.

(c) EFFECTS ON STATE WATER RIGHTS. □The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects □

- (1) any water rights granted by the State;
- (2) the authority of the State in adjudicating water rights;
- (3) definitions established by the State with respect to the term □beneficial use□or □priority of rights□;
- (4) terms and conditions for groundwater withdrawal;
- (5) the use of groundwater resources that are in accordance with State law; or
- (6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE.□

(1) Nothing in this title shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the Area designated by section 801.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □The term □water resource facilities□means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(p) VEGETATION MANAGEMENT.□ Nothing in this title prevents the Secretary of Agriculture from conducting vegetation management projects within the Area.

(q) WITHDRAWAL .□

(A) IN GENERAL .□ Subject to valid rights in existence on the date of enactment of this Act the federal land within the Area is withdrawn from□

- (i) all forms of entry, appropriation, and disposal under the federal land laws;

(ii) location, entry, and patent under the mining laws; and

(iii) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(r) FEES .□ Except for improved campgrounds, within the Area the United States Forest Service is prohibited from the collecting or requiring fees for access or use.

# Division B Opportunit

## Title I School Trust Land Consolidations

(a) FINDINGS.  Congress finds that the land exchange authorized and directed by this Act furthers public objectives referenced in section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) including

(A) Promoting better management of federal conservation areas by removing inheld state trust land sections;

(B) Securing Federal ownership and protection of land with significant wildlife, recreational, scenic, cultural and other public values;

(C) Assisting the State of Utah and local governments in economic development and community expansion through the consolidation of state trust lands in manageable blocks near several Utah communities; and

(D) Advancing public education through increased opportunity for economic development of Utah school trust lands, in furtherance of the land grants made under the Utah Enabling Act, Act of July 16, 1894 (28 Stat. 107, chapter 138).

(b) PURPOSE  It is the purpose of this title to authorize, direct, facilitate, and expedite the exchange of land between the State of Utah and the United States.

### SEC. 10 DEFINITIONS.

In this Act:

(1) MAPS.  The term Maps means the following maps prepared by the Bureau of Land Management:

(a) Land Conveyances - Carbon County dated [date]

(b) Land Conveyances  Duchesne County dated [date]

(c) Land Conveyances - Emery County dated [date]

(d) Land Conveyances  Grand County dated [date]

(e) Land Conveyances  San Juan County dated [date]

(f) Land Conveyances  Uintah County dated [date]

(2) NON-FEDERAL LAND.  The term non-Federal land means the lands identified on the Maps as State Trust Land Proposed for Transfer to United States State Trust Lands Surface Only Proposed for Transfer to United States and State Trust Lands -- Minerals Only Proposed for Transfer to United States located in Carbon, Duchesne, Emery, Grand, San Juan and Uintah counties, Utah, as generally depicted on the Maps.

(3) SECRETARY.  The term Secretary means the Secretary of the Interior.

(4) STATE.  The term State means the State of Utah, acting as trustee under the Utah State School and Institutional Trust Lands Management Act (Utah Code Ann. 53C   101 et seq) through the Utah School and Institutional Trust Lands Administration.

### SEC. 103. EXCHANGE OF LAND RESERVATION OF INTERESTS.

- (a) In General.--If the State offers to convey to the United States title to the non-Federal land, the Secretary shall, subject to the provisions of this title--
- (1) accept the offer; and
  - (2) on receipt of the right, title, and interest of the State in and to the non-Federal land, convey to the State all right, title, and interest of the United States in and to the Federal land.
- (b) Valid Existing Rights.--The exchange authorized under subsection (a) shall be subject to valid existing rights.
- (c) Costs  Costs of the land exchange shall be allocated in accordance with section 206(f)(2)(B) of FLPMA (43 U.S.C. 1716(f)(2)(B)).
- (d) Title Approval.--Title to the Federal land and non-Federal land to be exchanged under this section shall be in a format acceptable to the Secretary and the State.
- (e) Reservation of Interest in Potash.--
- (1) In general.--With respect to Federal land that contains potash resources, the Secretary shall reserve an interest in all potash resources.
  - (2) Extent of interest.--The interest reserved by the United States under paragraph 1 shall consist of--
    - (A) 50 percent of any bonus bid or other payment received by the State as consideration for securing any lease or authorization to develop potash resources;
    - (B) 50 percent of the amount that would have been received by the Federal Government under the royalty rate applicable on July 1, 2015 if the potash resources had been retained in Federal ownership; and
    - (C) 50 percent of any other payment received by the State pursuant to any lease or authorization to develop the potash resources.
  - (3) Upon receipt of any funds from potash leasing and development on lands in which the Secretary has reserved an interest, the State shall pay the Secretary amounts attributable to the reserved interest of the United States in accordance with paragraph (4).
  - (4) Payment. 
    - (A) Any amounts due under paragraph (3) shall be paid by the State to the United States not less than quarterly.
    - (B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2).
  - (5) No obligation to lease.--The State shall not be obligated to lease or otherwise develop potash resources in which the United States retains an interest under this subsection.
- (f) Reservation of Wellbore Interest in Oil and Gas
- (1) In general.  The Secretary shall reserve a wellbore interest in each oil and gas well on Federal land that has been determined by the Secretary to be capable of production in paying quantities as of the date of conveyance.
  - (2) Extent of interest.  The wellbore interest reserved to the United States under paragraph (1) shall consist of all royalties attributable to any zones or horizons that are being produced from an oil and gas well located on Federal land as of the date of conveyance.

(3) Upon receipt of any funds attributable to the reserve wellbore interest of the United States, the State shall pay the Secretary all such amounts in accordance with paragraph (4).

(4) Payment. □

(A) Any amounts due under paragraph (2) shall be paid by the State to the United States not less than quarterly.

(B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2)

(5) Termination of Reserved Interest. □ The reserved wellbore interests of the United States in oil and gas shall automatically terminate on the date that is ten years after the enactment of this Act.

(6) Sharing of Revenue. The United States shall share all revenue received with respect to its reserved wellbore mineral interest in oil and gas with the State of Utah in accordance with 30 U.S.C. 191(a).

(g) Appurtenant Water Rights.--Any conveyance of a parcel of Federal land or non-Federal land under this Act shall include the conveyance of water rights appurtenant to the parcel conveyed.

#### **SEC. 104. APPRAISALS**

(a) Equal Value Exchange. □

(1) In general.--The value of the Federal land and non-Federal land to be exchanged under this Act □

(A) shall be equal; or

(B) shall be made equal in accordance with section 5.

(b) Appraisals.--The value of the Federal land and the non-Federal land shall be determined by appraisals conducted by 1 or more independent appraisers retained by the State, with the consent of the Secretary.

(c) Applicable law.--The appraisals conducted under paragraph (1) ---

(A) shall be conducted in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716); and

(b) shall utilize nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisitions.

(d) Approval.--The appraisals conducted under paragraph (1) shall be submitted to the Secretary and the State for approval.

(e) Adjustment.--

(1) In general.--If value is attributed to any parcel of Federal land because of the presence of minerals subject to leasing under the Mineral Leasing Act (30 U.S.C. 181 et seq.), the value of the parcel (as otherwise established under this subsection) shall be reduced by the estimated value of the payments that would have been made to the State of Utah from bonuses, rentals, and royalties that the United States would have received if such minerals were leased pursuant to the Mineral Leasing Act (30 U.S.C. 181 et seq.).

(2) Limitation.--An adjustment under subparagraph (A) shall not be considered as a property right of the State.

- (f) Valuation of Lands with Reserved Minerals.--Federal land in which the Secretary reserves an interest under subsections 103(3)3(e) and 103(3)(f) shall be appraised
- (1) without regard to the presence of potash; and
  - (2) taking into account the reserved wellbore interest of the United States, if any.
- (g) Duration. The appraisals conducted under paragraph (1) shall remain valid until the date of the completion of the exchange authorized under this title.
- (h) Availability of appraisals.
- (1) In general.--All final appraisals, appraisal reviews, and determinations of value for land to be exchanged under this section shall be available for public review at the Utah State Office of the Bureau of Land Management at least 30 days before the conveyance of the applicable parcels.
  - (2) Publication.--The Secretary or the State, as applicable, shall publish in a newspaper of general circulation in Salt Lake County, Utah, a notice that the appraisals are available for public inspection.
- (i) Dispute resolution.
- (1) If, by the date that is 90 days after the date of submission of an appraisal for review and approval under this subsection, the Secretary or State do not agree to accept the findings of the appraisals with respect to any parcel of Federal land or non-Federal land, the dispute shall be resolved in accordance with section 206(d)(2) of FLPMA (43 U.S.C. 1716(d)(2)).
  - (2) If agreement has not been reached with respect to the exchange of an individual parcel of Federal land or non-Federal land, the Secretary and the State may agree to set aside the individual parcel to allow the exchange of the other parcels of Federal land and non-Federal land to proceed.
- (j) Conveyance of Parcels in Phases.
- (1) In General. Notwithstanding that appraisals for all of the parcels of Federal land and non-Federal land may not have been approved, parcels of the Federal land and non-Federal land may be exchanged in phases as may be mutually determined by the Secretary and the State.
  - (2) Ledger. -- The Secretary and the State may agree to utilize a ledger account to make equal the value of lands conveyed by each party in one or more phases, provided that the overall exchange shall be made equal as provided in section 105.
  - (3) Authority. It is the intent of Congress that the Secretary may exercise broad discretionary authority in the processing of the land exchange to expedite the final conveyance of the Federal and non-Federal land.

## **SEC. 105. EQUALIZATION OF VALUES.**

### **(a) Surplus of federal land.**

If the value of the Federal land exceeds the value of the non-Federal land, the value of the Federal land and non-Federal land shall be equalized by

- (1) the State conveying to the United States State trust land located within any of the wilderness areas or national conservation areas in Washington County, Utah, established under subtitle O of title I of the Omnibus Public Land Management Act of 2009 (Public Law 111-111; 123 Stat. 1075) that has an appraised value

equal to the difference between the value of the Federal land; and the value of the non-Federal land;

(2) the reduction in acreage of the Federal land as the State and the Secretary may agree;

(3) the State making a cash payment to the United States; or

(4) any combination of the methods described in paragraphs (1)-(3) as the State and the Secretary may mutually agree.

(b) Surplus of non-federal land. □ If the value of the non-Federal land exceeds the value of the Federal land, the value of the Federal land and the non-Federal land shall be equalized by □

(1) the reduction in acreage of the non-Federal land as the State and the Secretary may mutually agree.

## **SEC. 106. WITHDRAWAL OF FEDERAL LANDS PRIOR TO EXCHANGE**

Subject to valid existing rights, during the period beginning on the date of enactment of this Act and ending on the earlier of the date that the Federal land is removed from the exchange or the date on which the Federal land is conveyed, the Federal land is withdrawn from mineral location, entry or patent under the mining laws, from leasing and entry under the mineral leasing laws, and from mineral material disposal.

## **SEC. 10 □ NEPA AND FLPMA COMPLIANCE.**

(1) Public Interest. -- The land exchange authorized and directed by this title is in the public interest.

(2) Scoping and Analysis. -- Notwithstanding any other law, in preparing an environmental assessment or environmental impact statement required under section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) with respect to the land exchange contemplated by this Act:

(A) the Secretary is not required to identify any actions other than the proposed action and the no action alternative; and

(B) the Secretary is not required to analyze the environmental effects of alternative conveyances or actions other than the offer submitted by the State under subsection 103(a).

(3) Presumption of Plan Adequacy. □ Conveyances of Federal land to the State in accordance with this Act are presumed to comply with any land use plan enacted under section 202 of FLPMA (43 U.S.C. 1712).

## **SEC. 10 □ STATUS AND MANAGEMENT OF LAND AFTER EXCHANGE.**

(a) ADMINISTRATION OF NON-FEDERAL LAND. □

(1) IN GENERAL. □ Subject to paragraph (2) and in accordance with section 206(c) of FLPMA (43 U.S.C. 1716(c)), the non-Federal land acquired by the United States under this Act shall become part of, and be managed as part of, the Federal administrative unit or area in which the land is located.

(b) GRAZING PERMITS. □

(1) IN GENERAL. □ If land acquired under this Act is subject to a lease, permit, or contract for the grazing of domestic livestock in effect on the date of acquisition, the entity acquiring the land shall allow the grazing to continue for the remainder of the term of the lease, permit, or contract, subject to the related terms and conditions of user agreements, including permitted stocking rates, grazing fee levels, access rights, and ownership and use of range improvements.

(2) RENEWAL. □ To the extent allowed by Federal or State law, on expiration of any grazing lease, permit, or contract described in paragraph (1), the holder of the lease, permit, or contract shall be entitled to a preference right to renew the lease, permit, or contract.

(3) BASE PROPERTIES. □ If land conveyed by the State under this Act is used by a grazing permittee or lessee to meet the base property requirements for a Federal grazing permit or lease, the land shall continue to qualify as a base property for the remaining term of the lease or permit and the term of any renewal or extension of the lease or permit.

(c) HAZARDOUS MATERIALS. □

(1) IN GENERAL. □ The Secretary and the State shall make available for review and inspection any record relating to hazardous materials on the land to be exchanged under this Act.

(2) COSTS. □ The costs of remedial actions relating to hazardous materials on land acquired under this Act shall be paid by those entities responsible for the costs under applicable law.

**SEC. 10 □ □LANDS WITHIN HISTORIC UNCOMPAHGRE RESERVATION.**

In the event that a court of competent jurisdiction issues a final judgment against the United States determining that the public lands within the boundaries of the historic Uncompahgre Reservation currently managed by the Bureau of Land Management are or should be tribal trust lands of the Ute Indian Tribe of the Uintah and Ouray Reservation, then ---

(a) within one year of the final judgment, the State of Utah shall relinquish all lands acquired by the State under this Act that are located within the historic Uncompahgre Reservation to the United States for the benefit of the Tribe; and

(b) upon such relinquishment, the State of Utah may select unappropriated public lands of equal value elsewhere in Utah in the manner provided by section 6 of the Utah Enabling Act, Act of July 16, 1894, ch. 138, 28 Stat. 107.

**SEC. 110. □BOO □ CLIFFS CONSERVATION AREA. □**The non-Federal mineral estate acquired by the United States in the area depicted on the Grand County map as the Book Cliffs Conservation Area is withdrawn from the operation of the mineral entry, leasing and mineral material disposal laws until otherwise determined by Congress.

**Title II □Goblin Valle □State Par □**

**SEC. 01. LAND CONVEYANCE**

(a) LAND CONVEYANCE. At the request of the State of Utah, the Secretary of the Interior shall convey, without consideration, the approximately 9,994 acres of Bureau of Land Management land identified as Utah PLI Goblin Valley State Park Map, on the map entitled Utah PLI Goblin Valley State Park Expansion Map and dated \_\_\_\_\_, to the Utah State Parks and Recreation Division of the Department of Natural Resources.

**SEC. 02. COOPERATIVE MANAGEMENT OF GOBLIN VALLEY.**

(a) IN GENERAL. At the request of the State, in accordance with this section, the Secretary of the Interior shall enter into a cooperative agreement with the State for the management of the federal land described in subsection (b).

(b) DESCRIPTION OF LAND. The area subject to the cooperative agreement is federal land managed by the Bureau of Land Management in Emery County, Utah comprising approximately 156,540 acres, identified as Goblin Valley Cooperative Management Area on the map entitled Utah PLI Goblin Valley State Park Map and dated \_\_\_\_\_.

(c) PURPOSES. - The purposes of the Goblin Valley Cooperative Management Area is to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking.

(d) TERMS. The cooperative agreement shall

(1) clarify the roles, responsibilities, and limitations, of the Secretary of the Interior and the State with regard to recreation management within the federal land;

(2) extend only to recreational activities, including Off-highway vehicle and non-Off-highway vehicle, within the federal land, and shall not affect other land management within the federal land, or recreational activities outside the federal land;

(3) require that recreational activities within the federal land shall continue to be managed in accordance with

(A) the San Rafael Swell National Conservation Area and Crack Canyon Wilderness Area established by this Act; and

(B) applicable federal laws.

(4) require new route and trail construction for motorized and non-motorized use to further recreational opportunities and/or minimize resource conflict, when and where appropriate;

(4) address the establishment, distribution, and uses of, any revenues generated by recreational activities (including entrance fees) on federal lands within the Goblin Valley Cooperative Management Area; and

(5) specify that the State agency administering the federal land shall be the Utah State Parks and Recreation Division of the Department of Natural Resources.

**Title III Price Can on State Forest**

**SEC. 301. DEFINITIONS.**

In this title:

- (1) MAPS. □ The term "Map" means the map titled Utah PLI Price Canyon State Forest Map.
- (2) FEDERAL LAND. □ The term "federal land" means the 13,321-acres owned by the Bureau of Land Management and identified as "BLM Lands Proposed for Transfer to State Sovereign Land" located in Carbon County, Utah, as generally depicted on the map entitled "Utah PLI Price Canyon State Forest Map" and date \_\_\_\_\_
- (3) NON-FEDERAL LAND. □ The term "non-federal land" means the 14,939-acres identified on the Map as "State Sovereign Land Proposed for Transfer to BLM" located in Grand, and San Juan Counties, Utah, as generally depicted on the
- (4) SECRETARY. □ The term "Secretary" means the Secretary of the Interior.
- (5) STATE. □ The term "State" means the State of Utah's Division of Forestry, Fire, and State Lands.

**SEC. 30 EXCHANGE OF LAND.**

- (a) In General.-- It is the purpose of this title to consolidate intermingled State sovereign lands in an area of Carbon County, Utah to create the State of Utah's first State Forest.
- (b) If the State offers to convey to the United States title to the non-federal land, the Secretary of the Interior shall--
  - (1) accept the offer; and
  - (2) on receipt of the right, title, and interest of the State in and to the non-federal land, convey to the State all right, title, and interest of the United States in and to the federal land.
- (c) VALID EXISTING RIGHTS.--The exchange authorized under subsection (a) shall be subject to valid existing rights.
- (d) TITLE APPROVAL.--Title to the federal land and non-federal land to be exchanged under this section shall be in a format acceptable to the Secretary of the Interior and the State.

**SEC. 303. LIVESTOCK GRAZING.**

- (a) LIVESTOCK GRAZING--- Within the lands acquired by the state under this title in which grazing is established before the date of enactment of this Act, the grazing of livestock shall continue at levels existing as of January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

**Title IV □ Deer Lodge Land Exchange**

**SEC. 401 Definitions**

In this title:

- (a) ASSOCIATION. □ The term "Association" means the Deer Lodge Homeowners Association.

(b) FEDERAL LAND. □ The term "federal land" means the approximately 156 acres of National Forest System land in Daggett County, Utah, identified as "Deer Lodge Cabin Site" on the map entitled "Utah PLI Deer Lodge Land Exchange Map" and dated \_\_\_\_\_.

(c) NON-FEDERAL LAND. □ The term "non-federal land" means the parcel of approximately 77 acres of private land located in Uintah County, Utah and identified as "Land to Be Acquired by USFS" on the map entitled "Utah PLI Deer Lodge Land Exchange Map" and dated \_\_\_\_\_.

(d) SECRETARY. □ The term "Secretary" means the Secretary of Agriculture.

#### **SEC. 40 LAND EXCHANGE.**

(a) CONVEYANCE OF LAND. □ No less than two years after enactment of this title, if the Association offers to convey to the United States all right, title, and interest of the Association in and to the non-federal land, the Secretary of Agriculture shall convey to the Association, without consideration, all right, title, and interest of the United States in and to the federal land, subject to valid existing rights.

(b) COMPLIANCE WITH EXISTING LAW. □ Except as otherwise provided in this title, the Secretary of Agriculture shall carry out the land exchange under this title in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716).

#### **SEC. 403 CONDITIONS OF EXCHANGE.**

(a) TITLE. □ As a condition of the land exchange under this title, title to the non-federal land to be acquired by the Secretary of Agriculture under this title shall be acceptable to the Secretary of Agriculture.

(b) TERMS AND CONDITIONS. □ As a condition of the land exchange under this title, the Association shall agree to retain as undeveloped open space the approximately 40 acres of meadow area identified as "Open Space" as generally depicted on the map entitled "Utah PLI Deerlodge Land Exchange" and dated \_\_\_\_\_. □

## **Title V □ Scofield Land Transfers**

#### **SEC. 501. DEFINITIONS.**

In this title:

##### **(1) CARBON COUNTY. □**

The term "Carbon County" means Carbon County, Utah, within which the Scofield Reservoir property is located.

(2) CLAIMANT. □ The term "claimant" means any person or entity (or a successor in interest to a person or entity) that, according to the records in the office of the Recorder for Carbon, Utah, as of the date of enactment of this Act, claims title to, or an interest in, the federal land.

(3) FEDERAL LAND. □

(A) IN GENERAL. □ The term "federal land" means the land acquired by Price River Water Conservation District and transferred to the United States for use in the construction and operation of Scofield Dam and Reservoir located between the normal water surface elevation and the property boundary elevation in the Scofield Reservoir basin.

(B) EXCLUSIONS. □ The term "federal land" does not include any mineral or subsurface rights to the land described in subparagraph (A); or the 205 acres of land adjoining the Scofield Reservoir, as adjudicated in the case styled *United States v. Dunn* (557F.3d 1165 (10th Cir. 2009)).

(4) LIFE ESTATE. □ The term "life estate" means if the claimant is a person, an interest of the claimant in the federal land that will revert to the United States on the date of the death of the claimant; and (B) if the claimant is an entity, an interest in the federal land of a person designated by the claimant that will revert to the United States on the date of the death of the designated person.

(5) SECRETARY. □ The term "Secretary" means the Secretary of the Interior.

**SEC. 50 □ CONVEYANCE OF SCOFIELD PROJECT LAND.**

(a) The Secretary of the Interior shall convey all right and title to the federal land, or a life estate in the federal land, without consideration, to any valid claimant that submits a request to the Secretary of the Interior not later than 18 months after the enactment of this Act. If the Secretary of the Interior does not act upon the request within 18 months from the date of enactment of this act, the federal land shall be transferred to the claimant.

(b) CONVEYANCE REQUIREMENTS- A conveyance under this title shall be subject to □

(A) provisions under which the claimant shall agree to indemnify and hold harmless the United States for all claims by the claimant or others arising from--

- (i) the design, construction, operation, maintenance, or replacement of Scofield Dam and Reservoir;
- (ii) the survey of claims, description of claims, delineation of boundaries, conveyance documents, conveyance process, and recording of deeds associated with the conveyance; and
- (iii) any damages associated with any structure or chattel of the claimant that may be displaced in a flood event;

(B) the United States retaining a flood easement as well as an access easement for purposes of monitoring and enforcing the requirements of subparagraph (c) with respect to the entire portion of federal land conveyed; and

(C) deed restrictions requiring that--

(i) to prevent any structure on the portion of the federal land conveyed from being displaced during a flood event, the claimant shall--

(I) secure or tie down all existing structures; and

(II) if replacing or rebuilding such a structure, limit the replacement or rebuilding to the number and type of structures in existence on the date of enactment of this Act; and

(ii) all activities carried out by the claimant under clause (i) with respect to a structure to be carried out in accordance with applicable standards for structures that may be submerged, flooded, or inundated, as contained in--

(I) the International Building Code (as adopted by Utah Administrative Code R156-56); or

(II) any other building code or engineering standard that is--

(aa) similar to the International Building Code;

(bb) widely used; and

(cc) nationally recognized.

(c) If the claimant is a willing seller, the Secretary of the Interior may offer the claimant fair market value for the land in lieu of a conveyance of all right and title to the federal land.

## **Title VI □ Land Conve□ances**

### **SEC. 601. Land Conve□ances.**

(a) IN GENERAL. □ Notwithstanding the land use planning requirements of sections 202 and 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712, 1713), upon the request of the specified local entity in the county in which the conveyance will occur, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall convey the following federal land to that entity, without consideration:

(1) CANYONLANDS FIELDS AIRPORT - The approximately 561 acres of land depicted as □Canyonlands Fields Airport, □on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_, to Grand County, Utah for use as an airport

(2) MOAB TAILINGS PROJECT □ Upon completion of the Moab Uranium Mill Tailings Remedial Action (UMTRA) Project, the approximately 474 acres of land depicted as □UMTRA Conveyance, □on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_, □shall be conveyed, without consideration, to Grand County, Utah.

(3) HUNTINGTON AIRPORT EXPANSION. □ The approximately 1,398 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_ as

□Huntington Airport, □to Emery County, Utah, for expansion of the Huntington Municipal Airport.

(4) EMERY COUNTY RECREATION AREA. □ The approximately 479 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Emery County Recreation Area, □to Emery County, Utah for public recreational purposes.

(5) EMERY COUNTY SHERIFF SUBSTATION. □ The approximately 643 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Emery County Sheriff's Substation, □to Emery County, Utah for a substation for the Emery County Sheriff's Office.

(6) BLANDING OUTDOOR RECREATION AREA. ---The approximately 5,197 acres of land depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Blanding Outdoor Recreation Area, □to Blanding City, Utah for use as an outdoor recreation area.

(7) CAL BLACK AIRPORT. □ The approximately 1,916 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Cal Black Airport, □to San Juan County, Utah for a municipal airport.

(8) BLUFF AIRPORT. □ The approximately 1,406 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Bluff Airport, □to San Juan County, Utah, for a municipal airport.

(9) MONTICELLO WATER STORAGE AND TREATMENT PLANT. □ The approximately 164 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Monticello Water Storage and Treatment Plant, □to Monticello City, Utah, for a water storage and treatment plant.

(10) BLANDING SHOOTING RANGE. □ The approximately 21 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Blanding Shooting Range, □to San Juan County, Utah, for a public shooting range.

(11) PARK CITY CONVEYENCE I □The approximately 2.5 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance I, □to Park City, Utah, for public recreation and open space.

(12) PARK CITY CONVEYENCE II □The approximately 1 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance II, □to Park City, Utah, for public recreation and open space.

(13) LISBON VALLEY -- The approximately 398 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Lisbon Valley, □to Utah State University, Utah, for education and research.

(14) WELLINGTON -- The approximately 645 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Wellington, □to Utah State University, for education and research.

(15) RANGE CREEK RESEARCH STATION EXPANSION-- The approximately 1,663 acres depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Range Creek Research Station Expansion, □to the University of Utah, for education and research.

(16) ASHLEY SPRING ZONE. □ The approximately 1,102 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Ashley Spring, □to Uintah County, Utah, for use as open space and for watershed protection and drinking water development.

(17) SEEP RIDGE UTILITY CORRIDOR. □The approximately \_\_\_ acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Seep Ridge Utility Corridor, □to the State of Utah, for use as rights-of-way for public utilities.

(18) BLUFF RIVER RECREATION AREA. - The approximately 177 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Bluff River Recreation Area, □to San Juan County, for use as recreation and municipal facilities.

(19) EMERY INFORMATION CENTER. □The approximately 80 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Emery County Information Center, □to Emery County, Utah for an information and visitor center to promote public lands.

(20) PARK CITY CONVEYENCE III □The approximately \_\_\_ acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance III, □to Park City, Utah, for public recreation and open space.

(21) SUMMIT COUNTY CONVEYENCE □The approximately \_\_\_ acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Summit Conveyance, □to Summit County, Utah, for public recreation and open space.

(b) MAP AND LEGAL DESCRIPTIONS. □

(1) IN GENERAL. □Not later than two years after the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall file a map and legal description of the Land Conveyances with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior or the Secretary of Agriculture as appropriate may make any minor modifications of any clerical or typographical errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management and the United States Forest Service.

(c) REVERSION. □ If any parcel conveyed under subsection (a) ceases to be used for the purpose for which it was conveyed or any other public purpose, the land shall revert to the United States, if the Secretary of the Interior or the Secretary of Agriculture as appropriate determines that the reversion is in the best interest of the United States.

## **Title VII □ Land Disposals**

### **SEC. □01. LAND DISPOSALS.**

- (a) Disposal. -- Subject to valid existing rights, the Secretary of the Interior shall dispose of federal lands identified as □Lands for Disposal□ on the map entitled □Utah PLI Land Disposal Map□ and dated \_\_\_\_\_ within two years.

## **Title VIII □ CANYON COUNTRY RECREATION ZONES**

### **SEC □01. ESTABLISHMENT**

(a) ESTABLISHMENT. □ Subject to valid existing rights, and to enhance existing and future recreational opportunities and use the following areas in Grand County, Uintah County, and San Juan County, Utah are hereby established as Recreation Zones:

- (1) KLONDIKE RECREATION ZONE. □ Certain federal land, comprising approximately 24,968 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Klondike Recreation Zone. □
- (2) MONITOR AND MERRIMAC RECREATION ZONE. □ Certain federal land, comprising approximately 17,370 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Monitor and Merrimac Recreation Zone. □
- (3) GOLDBAR RECREATION ZONE. □ Certain federal land, comprising approximately 23,050 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Goldbar Recreation Zone. □
- (4) BIG FLAT RECREATION ZONE. □ Certain federal land, comprising approximately 25,311 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the □Big Flat Recreation Zone. □
- (5) MINERAL CANYON RECREATION ZONE. □ Certain federal land, comprising approximately 19,809 acres administered by the Bureau of Land Management in

Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Mineral Canyon Recreation Zone.☐

- (6) DEE PASS AND UTAH RIMS RECREATION ZONE.☐ Certain federal land, comprising approximately 210,116 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Dee Pass and Utah Rims Recreation Zone.☐
- (7) YELLOW CIRCLE.☐ Certain federal land, comprising approximately 7,040 acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Yellow Circle Recreation Zone.☐
- (8) CAMEO CLIFFS.☐ Certain federal land, comprising approximately 48,025 acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Cameo Cliffs Recreation Zone.☐
- (9) JENSEN HILLS.☐ Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Jensen Hills Recreation Zone.☐
- (10) RED MOUNTAIN.☐ Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Red Mountain Recreation Zone.☐
- (11) DEVILS HOLE.☐ Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Devils Hole Recreation Zone.☐
- (12) BOURDETTE DRAW.☐ Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Bourdette Draw Recreation Zone.☐
- (13) RED WASH.☐ Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the ☐Red Wash Recreation Zone.☐

**SEC. 10. MAP AND LEGAL DESCRIPTION.**

(a) IN GENERAL. ☐Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the

recreation zones established by sections 801 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ The map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

### **SEC. 03. GENERAL PROVISIONS.**

(a) FIRE, INSECTS, AND DISEASE. □ In accordance with this title, the Secretary of the Interior may □

(1) carry out any measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the recreation zones; and

(2) coordinate those measures with the appropriate State or local agency.

(b) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or interferes with the authority of the Secretary of the Interior to authorize mechanical thinning of trees or underbrush to prevent or control the spread of wildfires or the use of mechanized equipment for wildfire pre-suppression and suppression.

(c) LIVESTOCK GRAZING. □

(1) IN GENERAL. □ Within the recreation planning areas, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated to the greatest extent practicable.

C) the maintenance of pre-established facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue. Such maintenance includes the use of Off-highway vehicle or mechanized tools and equipment.

D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible.

F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

### (3) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given priority consideration by the Secretary of the Interior to establish historic grazing, locations, or use.

(d) EXISTING EASEMENTS AND RIGHTS-OF-WAY. □ Nothing in this title precludes the Secretary of the Interior from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this title and existing law.

(f) ADJACENT MANAGEMENT. □

(1) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around any recreation zone designated by this title.

(2) ACTIVITIES OUTSIDE THE RECREATION ZONES. □ The fact that an activity or use on land outside a recreation zone can be seen, heard, or smelled within the recreation zone shall not preclude the activity or use outside the boundary of the recreation zone.

(e) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the recreation zones are authorized.

(f) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the recreation zones.

(g) ACCESS . □ The Secretary of the Interior shall provide the owner of State or private property within the boundary of a recreation zones access to the property.

(h) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the recreation zones are authorized

(i) HUNTING, FISHING, AND RECREATIONAL AND TARGET SHOOTING. □

Within the recreation zones in where hunting, fishing, and recreational and target shooting on lands and waters owned of managed by the Department of the Interior was allowed before the date of enactment of this Act, shall continue.

(j) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the recreation zones designated by this title;

(2) affects any water rights in the State of Utah;

(3) establishes a precedent with regard to any future recreation zone.

(b) UTAH WATER LAW. □ The Secretary of the Interior shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the recreation zones.

(c) EXISTING WATER INFRASTRUCTURE. □ Nothing in this Act shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in recreation zones designated by this title.

(d) DEFINITION. □ The term "water resource facilities" means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(k) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of the Interior from conducting vegetation management projects within the recreation zones.

(l) WILDERNESS REVIEW. □

(a) Congress finds and directs that the recreation zones described in section 801 have been adequately studied for wilderness character and wilderness designation pursuant to sections 201 and 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and are no longer subject to the requirement of subsection (c) of such section pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.

(b) The Secretary of the Interior may not promulgate or issue any system-wide regulation, directive, instruction memorandum or order that would direct management of the federal lands identified in section 801 in a manner contrary to subsection (m).

(m) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each recreation zone.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the recreation zones that would further the purposes and uses outlined within each Zone and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

#### **SEC. 04. GOLDBAR RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Goldbar Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, and hiking, provide for the construction of new non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims, and to manage and protect indigenous plants.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Goldbar Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws.

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Goldbar Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and camping

(C) prohibit future mineral and energy leasing or claims.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) protects and manages indigenous plants.

(F) comply with Section 803.

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016..

(ii) allows for adjustment to the travel management plan within the regular amendment process.

(iii) allows for the construction of new non-Off-highway vehicle trails.

## **SEC. □05. MONITOR AND MERRIMAC RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Monitor and Merrimac Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, provide for the construction of new Off-highway vehicle and non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims,

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Monitor and Merrimac Recreation Zone in accordance with----

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and

(c) other applicable laws.

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Monitor and Merrimac Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) prohibit future mineral and energy leasing.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated Off-highway vehicle routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

(ii) allows for adjustment to the travel management plan within the regular amendment process.

(iii) allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. 06 □ LONDI □ E RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Klondike Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, provide for the construction of new non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims,

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Klondike Recreation Zone in accordance with----

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Klondike Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) prohibit future mineral and energy leasing.

(D) provide for new route and trail construction for non-Off-highway vehicle use to further recreational opportunities.

(E) provide managerial flexibility to route Off-highway vehicle trails in a way that minimizes conflict with non-Off-highway vehicle trails.

(E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016, including off-highway vehicle use of Sovereign Trail System.

(ii) allows for adjustment to the travel management plan within the regular amendment process.

(iii) allows for the construction of new non-Off-highway vehicle trails.

**SEC. 101 BIG FLAT RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Big Flat Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, to promote mineral development, and provide for new Off-highway vehicle route construction.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Big Flat Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws.

(2) USES . □ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Big Flat Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) provide for future mineral leasing with No Surface Occupancy stipulations

(D) prevent the retirement of mineral leases.

(E) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(F) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

(ii) Allows for adjustment to the travel management plan within the regular amendment process.

(iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. 102 MINERAL CANYON RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Mineral Canyon Recreation Zone are to promote non-Off-highway vehicle outdoor recreation, such mountain biking, rock climbing, and hiking, to prevent future energy or mineral leases or claims, and provide for new non-Off-highway vehicle route construction, maintain boating access, maintain airstrip access, and maintain access and use of country borrow areas.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Mineral Canyon Recreation Zone:

- (i) in accordance with---
- (ii) this title;
- (iii) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (iv) other applicable laws.

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities;
- (B) provide for non Off-highway vehicle recreational opportunities to occur within the Mineral Canyon Recreation Zone including, biking, and hiking,
- (C) prevent future energy or mineral leasing or claims
- (D) provide for new route and trail construction for non-Off-highway vehicle use to further recreational opportunities.
- (E) maintain access for boating
- (F) maintain access for aircraft to the existing airstrip
- (G) maintain access and use to the county borrow areas.
- (H) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) allows for adjustment to the travel management plan within the regular amendment process.
- (iii) allows for the construction of new non-Off-highway vehicle trails.

## **SEC. 10□ DEE PASS AND UTAH RIMS RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Dee Pass and Utah Rims Recreation Zones are to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Dee Pass and Utah Rims Recreation Zones in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities

- (B) provide for recreational opportunities to occur within the Dee Pass and Utah Rims Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Provide future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

**(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □**

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

- (4) WHITE WASH CROSS COUNTRY TRAVEL AREA. □ The approximately \_\_\_\_\_ acres identified as the □White Wash Cross Country Travel Area□ on the map entitled □Utah PLI Recreation Zones Map□and dated \_\_\_\_\_ is open to cross country Off-highway vehicle travel.

**SEC. □10. YELLOW CIRCLE MINE AND CAMEO CLIFFS ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Yellow Circle Mine and Cameo Cliffs Recreation Zones are to promote off-highway vehicle use and to provide for the construction of new Off-highway vehicle and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Yellow Circle Mine and Cameo Cliffs Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Yellow Circle Mine and Cameo Cliffs including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Provide future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.

- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated Off-highway vehicle routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. □11. □JENSEN HILLS RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Jensen Hills Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Jensen Hills Recreation Zone in accordance with----

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
