  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
  - (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □15. BOURDETTE DRAW RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Bourdette Draw Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Bourdette Draw Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

- (E) comply with Section 803 .
- (F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
  - (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □16. RED WASH RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Red Wash Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

- (1) IN GENERAL.--- The Secretary of the Interior shall administer the Red Wash Recreation Zone in accordance with----
  - (a) this title
  - (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
  - (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Red Wash Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .
- (F) Allow cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
- (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □□□HOLE-IN-THE-ROC□ TRAIL.**

(a) This Act adds to the National Historic Trail System the corridor known as □The Hole-in-the-Rock Trail□to be managed as a historic trail and to remain in the ownership of current land management agencies.

(b) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the historic trail.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the national historic trail that would further the purposes and uses outlined within this subsection and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

(c) Purposes and Uses

A. The purposes of the National Hole in the Rock Trail is to promote cultural, recreational □ motorized and non-motorized, and historic values.

B. The Hole in the Rock Foundation and shall be a cooperating agency regarding trail management.

**SEC. □□□RECAPTURE CANYON**

(a) San Juan County, Utah□ application for a Title V Right-of-Way, originally submitted on March 30, 2006 and later amended on November 13, 2012, is approved.

(b) The purposes of the Title V Right-of-Way, as stated by the County□ application, is to perform routine maintenance to existing trails and routes in an effort to encourage travel in the canyon to remain on a single established route through the canyon that minimizes impacts to the surrounding environment.

(c) The BLM decision to temporarily close Recapture Canyon to off-highway vehicle on September 12, 2007 is dissolved, as the right-of-way approved in subsection (a) will create a mechanism for proper management and maintenance of the area.

**SEC. 11 BIG BURRITO NON-MOTORIZED TRAIL**

(a) The 9.3 mile proposed non-motorized trail within the Sand Flats Recreation Area, approved by the BLM Moab Field Office on December 18, 2016 and commonly known as the Big Burrito non-motorized trail, is hereby authorized to move forward and shall be constructed within 6 months of enactment of this Act.

**TITLE IX -- RED ROCK COUNTRY OFF-HIGHWAY VEHICLE TRAIL.**

**SEC. 01 DEFINITIONS.** In this title:

- (1) COUNTY. The term "County" means Grand and San Juan Counties, Utah.
- (2) SECRETARY. The term "Secretary" means the Secretary of the Interior.
- (3) TRAIL. The term "Trail" means the Red Rock Country Off-Highway Vehicle Trail established under subsection (b).
- (4) FEDERAL LAND. The term "federal land" means land owned by the Bureau of Land Management.

**SEC. 00 DESIGNATION.**

- (1) IN GENERAL. the Secretary of the Interior shall designate a trail system in Grand and San Juan Counties, Utah
  - (A) for use by Off-highway vehicle off-highway vehicles; and
  - (B) to be known as the "Red Rock Country Off-Highway Vehicle Trail"
- (2) REQUIREMENTS. In designating the trail, the Secretary of the Interior shall prioritize a long distance route for off-highway vehicles that
  - (A) as generally depicted on the map entitled Utah PLI Recreation Plans Map and date \_\_\_\_;
  - (B) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Grand Junction, Colorado through the Utah Rims Recreation Area;
  - (C) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Green River, Utah through the Dee Pass Recreation Area;
  - (D) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Monticello, Utah through the Cameo Cliffs Recreation Zone;
  - (E) utilizes existing routes, where feasible, which may include the Kokopelli's Trail and the Orange Trail and Trail 1, consistent with this paragraph;
  - (F) minimizes the use of graded roads;
  - (G) creates a recreational experience that provides
    - (i) opportunities for scenic vistas;
    - (ii) challenging terrain for off-highway vehicle travel;
    - (iii) connections to other existing trail systems or trails;

- (iv) minimal conflicts between Off-highway vehicle and non-Off-highway vehicle user; and
- (v) Off-highway vehicle singletrack and doubletrack options where feasible.

(3) MAP. □ A map that depicts the trail shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

**SEC. □03 MANAGEMENT-**

(A) IN GENERAL- The Secretary of the Interior shall manage future designated routes in a manner that--

- (i) is consistent with Section 902 ;
- (ii) does not interfere with private property or water rights.

(B) CLOSURE OR RELOCATING-

(i) IN GENERAL- A designated route may be temporarily closed or detoured, for a period not to exceed two years, if the Secretary of the Interior, in consultation with the State, or relevant local government within the State determines that--

- (I) the designated route is damaging cultural resources or historical resources;
- (II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.
- (III) modification of the designated route would not significantly affect access within the given area.
- (IV) all other options, other than a temporary closure or rerouting, have been exhausted.
- (V) a new alternative route, which can include routes previously closed, has been provided to effectively relocate the trail.

(C) NOTICE- The Secretary of the Interior shall provide information to the public regarding any designated routes that are open, have been relocated, or are temporarily closed through--

- (i) use of appropriate signage within the trail;
- (ii) use of the internet and web resources.

(3) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(d) TRAIL CONSTRUCTION. □

(1) FEASIBILITY STUDY. □ Not later than 180 days after the date of enactment of this Act, the Secretary of the Interior shall study the feasibility and public interest in constructing new routes as part of a the Red Rock County Off-Highway Vehicle Trail System to further Off-highway vehicle recreational opportunities.

(2) CONSTRUCTION. □

(A) CONSTRUCTION AUTHORIZED. □ If the Secretary of the Interior determines that the construction of a route is feasible, construction is authorized.

(B) USE OF VOLUNTEER SERVICES AND CONTRIBUTIONS. □ A route may be constructed under this subsection through the acceptance of volunteer services and contributions from non-federal sources to eliminate the need for federal expenditures to construct the route.

(3) COMPLIANCE. □ In carrying out this subsection, the Secretary of the Interior shall comply with □

(A) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(B) this title; and

(C) other applicable law.

## **Title X □ Long-Term Native American Economic Development Certain □**

### **SEC. 1001. Native American Economic Development in San Juan Count □ Utah**

(a) McCracken Mesa Mineral Transfer. The federal minerals located within the Aneth Extension of the Navajo Nation shall be transferred to the Utah Navajo Trust Fund.

(b) The Act of March 1, 1933, H.R. 11735, Public No. 403, is hereby amended to state the following:

Should oil or gas be produced in paying quantities within the lands hereby added to the Navajo Reservation, 37.5 62.5 per centum of the net royalties accruing therefrom derived from tribal leases shall be paid to the State of Utah: Provided, that the 37.5 62.5 per centum of said royalties shall be expended by the State of Utah in the tuition of Indian children in white schools and/or in the building or maintenance of roads across the lands described in section 1 hereof, or for the benefit of the Indian residing therein.

### **SEC. 100 □ Ute Indian Tribe Economic Development Area**

(a) Hill Creek Mineral Transfer. The federal minerals located within the Hill Creek Extension of the Ute Tribe shall be transferred to the Ute Tribe.

## **Title XI □ Long-Term Energy □ Development Certain □**

### **SEC. 1101. □ ENERGY PLANNING AREAS.**

(a) ESTABLISHMENT. □ Subject to valid existing rights, and to enhance energy development in lands not designated for conversation purposes, the following areas in Uintah, Carbon, Duchesne, and San Juan Counties are hereby established as Energy Zones:

- (1) UINTAH COUNTY ENERGY ZONE. □ Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the □ Uintah County Energy Zone. □
- (2) DUCHESNE COUNTY ENERGY ZONE. □ Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Duchesne County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the □ Duchesne County Energy Zone. □
- (3) CARBON COUNTY ENERGY ZONE. □ Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the □ Carbon County Energy Zone. □
- (4) SAN JUAN COUNTY ENERGY ZONE. □ Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the □ San Juan County Energy Zone. □

#### **SEC. 110 □ MAP AND LEGAL DESCRIPTION.**

- (a) IN GENERAL. □ Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the energy zones established by sections 1101 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.
- (b) FORCE AND EFFECT. □ The map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.
- (c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

#### **SEC. 1103. GENERAL PROVISIONS**

- (a) PURPOSES. □ The purposes of the Energy Zone are to □
  - (1) designate Federal lands within the areas identified in section 1101 for the primary purpose of energy and mineral development.
  - (2) promote the use of best practices for the timely evaluation, exploration, leasing, development, production, and transportation of energy (including renewable energy) and mineral resources and the inspection and enforcement of such activities; and
  - (3) ensure that the development of energy and mineral resources is carried out in a manner pursuant to the multiple use provisions within sections 102 and 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1702)

and other provisions of law; and

(4) Provide for multiple-uses of the lands within the energy zone, including outdoor recreation and livestock grazing, to the greatest extent practicable.

(b) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each energy zone.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Energy Zone Advisory Councils established under subsection (f) of this Title.

(c) USES- The Secretary of the Interior shall allow only such uses of the energy zones that would further the purposes outlined in section 1103 of this Title and in consultation and coordination with the Energy Zone Advisory Councils established under subsection (f) of this Title.

(c) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plans in consultation and coordination with the Energy Zone Advisory Councils established in subsection (e) of this Title. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Councils into the management plans, the Secretary of the Interior and Secretary of Agriculture shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(d) INCORPORATION OF PLANS. □

(1) In developing the management plan required under subsection (b), in accordance with existing law and to the extent consistent with this section, the Secretary □

(A) may incorporate any provision of existing land and resource management plans; and

(B) shall be consistent to the maximum extent possible with State and local plans pursuant to Section 202 of the Federal Land Policy and Management Act of 1976, (43 U.S.C. 1712).

(2) INTERIM MANAGEMENT. □ During the period of time preceding the final adoption of the Plan, the Secretary, acting through the relevant Record of Decision and Approved Resource Management Plan and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and pursuant to this Act.

(e) MANAGEMENT. □ The Secretary shall manage the Energy Zone in accordance with □

(1) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.);

- (2) the Energy Policy and Conservation Act (P.L. 94-163, 42 U.S.C. 6201); the Energy Policy Act of 2005 (P.L. 109-58, 42 U.S.C. 15801);
- (3) this Act; and
- (3) any other applicable law.

(f) ENERGY ZONE ADVISORY COUNCILS.

(1) ESTABLISHMENT. □ Not less than 180 days after the date of enactment of this Act, the Secretary shall establish an advisory council within each of counties when an energy zone is located, to be known as the  
□ Uintah/Duchesne/Carbon/San Juan Energy Zone Advisory Council □

(2) DUTIES. □ To the greatest extent allowable by law, the Advisory Council shall advise the Secretary with respect to the preparation and implementation of the management plan.

(A) To the greatest extent allowable by law, the Secretary shall incorporate recommendations of a majority of the Advisory Council in decision making processes and the management of the Energy Zone.

(3) REPRESENTATION. □

(A) IN GENERAL. □ The Secretary shall ensure that the membership of the Advisory Council broadly represents diverse local interests of citizens that reside within the specific county.

(B) STRUCTURE. □ The Advisory Council shall consist of no less than 7 members and the Secretary shall appoint a Chairperson to serve as the Chair for a term not to exceed 2 years.

(i) Excepting elected officials of state or local government, no individual may serve a term longer than 4 years.

(C) INCLUSION. □ The advisory council shall include:

- (i) at least one County Commissioner or their designee;
- (ii) at least one member of the Utah State Legislature who represents the County;
- (iii) notwithstanding the residency requirements of (f)(3)(A) a representative of the Governor of Utah;
- (iv) experts in energy and mineral development within the energy zone
- (v) conservation and recreation interests.

(4) RESPONSIBILITIES. □

The Advisory Council shall:

- (A) Review and make recommendations to the Secretary for planning, implementation of management plans, amendments to plans, policy considerations, regulations, and other issues related to the management and operation of the Energy Zone.
- (B) Encourage and promote local participation in the decision-making processes affecting the Energy Zone.

#### **SEC. 1104. LEASING OUTSIDE OF THE ENERGY PLANNING AREAS**

Nothing in this title precludes leasing or resource development of BLM managed lands not described in subsection 1101 from occurring under regular order pursuant to the Mineral Leasing Act or other federal energy development laws.

#### **SEC. 1105. MASTER LEASING PLANS**

(a) A Master Leasing Plan shall only be implemented within Uintah, Duchesne, Carbon, Grand, or San Juan Counties if the Public Lands Advisory Council established under Division C of this Act find the relevant Master Leasing Plan to be compatible and viable with the provisions of this Act.

#### **SEC. 1106. Completion of Administrative Land Exchange Process**

1. The land exchange application, referred to as UTU-78673 pending before the Moab Field Office, shall be considered in the public interest and completed.

## **Title XII Long-Term Travel Management Certain**

#### **SEC. 101. RIGHTS-OF-WAY FOR CERTAIN ROADS.**

(a) IN GENERAL. Subject to valid existing rights and consistent with this section, the Secretary of the Interior shall grant a right-of-way to the state for public travel and access upon the following roads:

(1) all roads claimed as Class B identified as rights-of-way in judicial actions in the federal court system as of January 1, 2016, in Uintah, Summit, Duchesne, Carbon, Emery, Grand, and San Juan counties.

(b) APPLICABLE LAW. A right-of-way granted under subsection (a) shall be granted in perpetuity, except in the case of abandonment, and shall not require the payment of rental.

(c) ADMINISTRATION

(i) Each right-of-way granted by the Secretary under the provisions of this Title shall be perpetual, and shall consist of the full geographic extent authorized by Utah state law in effect as of January 1, 2016.

(ii) The appropriate holder of each right-of-way granted pursuant to this Title may be abandoned pursuant to state law.

(d) FUTURE CLAIMS. Nothing in this section precludes the state or county from applying for future or existing rights-of-way on existing or new roads.

**SEC. 10 GRAND COUNTY COUNCIL RECOMMENDATIONS FOR CERTAIN ROADS.**

The recommendations of the Grand County Council, as depicted on the map titled "Grand County PLI Final Map 4-17-2015" for Hey Joe Canyon, Tenmile Canyon, and Mineral Canyon roads shall be implemented by the Secretary of the Interior, with the seasonal closures beginning the Tuesday following Memorial Day through Labor Day.

## **Title XIII Long-Term Grazing Certain**

**Sec. 1301 Current Permitted Use**

Unless otherwise specified by this Act, on federal lands managed by the Secretary of Agriculture or the Secretary of the Interior in Summit, Duchesne, Uintah, Grand, Emery, Carbon, and San Juan Counties the grazing of domestic livestock shall continue at current permitted levels.

**Sec 1302-- Bighorn Sheep**

On federal lands managed by the Secretary of Agriculture or the Secretary of the Interior in Summit, Duchesne, Uintah, Grand, Emery, Carbon, and San Juan Counties, the viability or existence of bighorn sheep shall not be used to remove or alter the use of domestic sheep or cattle where such use was permitted as of January 1, 2016. If conflicts between bighorn sheep and domestic livestock can be resolved, and if current permittees consent to the terms of any resolution, the Utah Department of Wildlife Resources may conduct whatever means necessary to resolve such conflicts.

## **DIVISION C LOCAL PARTICIPATION**

### **Title I LOCAL PARTICIPATION AND PLANNING**

#### **SEC. 001. Creation of Management Plans for Conservation Management Recreation Areas**

(a) ESTABLISHMENT. In order to facilitate the creation of the management plans for the National Conservation Areas, Special Management Areas, Watershed Management Areas, National Monument, Geologic Area, and Recreation Zones designated by this Act, there is created in each of the following counties, Summit, Duchesne, Uintah, Grand, Carbon, San Juan, and Emery, a Public Lands Initiative Stakeholder Advisory Council.

(b) PURPOSES. The Purpose of the County Public Lands Initiative Stakeholder Advisory Councils are to facilitate an open and transparent process for the creation of the management plans for the areas designated under this Act that require a management plan.

(c) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall develop management plans for the long-term management of each of the areas designated by this Act that require a management plan.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior and the Secretary of Agriculture shall prepare the management plans in consultation and coordination with the County Public Lands Initiative Stakeholder Advisory Councils. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Council into the management plans, the Secretary of the Interior and Secretary of Agriculture shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(3) REQUIREMENTS- Each management plan shall--

(A) Describe the appropriate uses and management of the designated area, as described by the purposes, uses, and additional provisions outlined in each relevant Title; and

(B) Include interpretive and educational materials regarding the recreational, cultural, economic, and biological resources of the region within which the designated area is located.

(C) Conform management plans for designated areas that cross County boundaries.

#### **SEC. 00 - The Public Lands Initiative Stakeholder Advisory Council**

(a) County Public Lands Initiative Stakeholder Advisory Council.

(1) ESTABLISHMENT. Within 180 days after the date of enactment of this

Act, the Secretary of the Interior shall establish in each of the Counties, a Public Lands Initiative Stakeholder Advisory Council. (referred to as the Advisory Council) to:

(A) advise the Secretary of the Interior and the Secretary of Interior and Secretary of Agriculture with respect to development and implementation of the management plans created under this Act to the greatest extent allowable by law.

(B) encourage and promote stakeholder participation in the decision making processes affecting the areas designated by this Act.

(2) MEMBERSHIP. The Advisory Council shall consist of 15 members.

(3) MEMBERS. The Secretary of the Interior shall appoint a member from each of the following groups:

(i) Category I: Elected officials, Agencies, and Native American Tribes

- d. One federal agency representative;
- e. One designee from local county governing commission or council in the County in which the designation resides;
- f. One Native American interest;
- g. One representative from the Utah Department of Natural Resources;
- h. One representative from the public-at-large or another elected official not representing the same governing body in a.

(ii) Category II: Grazing, OHV, Recreation and other forms of commercial interest

- a. One representative of the grazing community;
- b. One representative of the off-highway vehicle community;
- c. One representative of the sportsmen (hunting) community;
- d. One representative from quiet recreation community;
- e. One representative of the guides and outfitters community.

(iii) Category III: Environmental organizations,

- archaeological/historical interests and scientific expertise
- a. One representative from the conservation community;
- b. One representative with archaeological and/or historic expertise;
- c. One representative with biology expertise

(4) ELIGIBILITY. The Secretary of the Interior shall determine that all individuals appointed to the Advisory Council, and the organization or industry each individual represents, support the mission of the group they are slotted to represent.

(1) TERMS.

(A) IN GENERAL. Except for the initial appointees, members of the Advisory Council shall be appointed for a

term of 4 years. Members shall not be appointed for more than 3 consecutive or nonconsecutive terms.

(2) TERMS OF INITIAL APPOINTEES. □ The Secretary of the Interior shall appoint the initial members of the Advisory Council as follows:

- (i) 7 members shall be appointed for a term of 4 years;
- (ii) 5 members shall be appointed for a term of 3 years; and
- (iii) 3 members shall be appointed for a term of 2 years.

(5) PRESERVATION OF PUBLIC ADVISORY STATUS. □ No individual may be appointed as a member of the Advisory Council while serving as an officer or employee of the Federal Government, unless he or she is serving in the designated spot representing the agency.

(6) VACANCY AND REMOVAL. □

(A) IN GENERAL. □ Any vacancy on the Advisory Committee shall be filled in the manner in which the original appointment was made.

(B) REMOVAL. □ Advisory Committee members shall serve at the discretion of the Secretary of the Interior and may be removed at any time for good cause.

(7) CONTINUATION OF SERVICE. □ Each member may continue to serve after the expiration of the term of office to which such member was appointed until a successor has been appointed.

(8) CHAIR. □ The Chair of the Advisory Council shall be appointed to a 3-year term by the Secretary of the Interior from among the members of the Advisory Council. An individual appointed to the Advisory Council under (4)(2)(iii) shall be eligible to serve as Chair, but may serve for two years. An individual may not be appointed as Chair for more than 2 consecutive or nonconsecutive terms.

(9) PAY AND EXPENSES. □ Members of the Advisory Council shall serve without pay, but each member of the Advisory Council may be reimbursed for travel and lodging incurred through attending meetings of the Advisory Council (including approved workgroup or subgroup meetings) in the same amounts and under the same conditions as Federal employees in accordance with section 5703 of title 5, United States Code.

(10) MEETINGS. □

(A) IN GENERAL. □ The Advisory Council shall meet at the call of the Secretary of the Interior, the chair, or a majority of the members, but not less frequently than twice annually.

(B) OPEN MEETINGS. □ Each meeting of the Advisory Council shall be open to the public.

(C) PRIOR NOTICE OF MEETINGS. □ Timely notice of each meeting of the Advisory Committee shall be published in the Federal Register and be submitted to publications of general circulation.

(D) SUBGROUPS. □ The Advisory Council may establish such workgroups or subgroups as it deems necessary for the purpose of compiling information or conducting research. However, such workgroups or subgroups may not conduct business without the direction of the Advisory Council.

(11) QUORUM. □ Nine members of the Advisory Council shall constitute a quorum.

(12) EXPENSES. □ The expenses of the Advisory Council that the Secretary of the Interior determine to be reasonable and appropriate shall be paid by the Secretary of the

Interior.

(13) ADMINISTRATIVE SUPPORT AND TECHNICAL SERVICES. □ The Secretary of the Interior shall provide to the Advisory Council the administrative support and technical services.

(14) ANNUAL REPORT. □

(1) REQUIRED. □ Not later than September 30 of each year, the Advisory Council shall submit a report to the Secretary of the Interior, the Committee on Natural Resources of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate. If circumstances arise in which the Advisory Council cannot meet the September 30 deadline in any year, the Secretary of the Interior shall advise the Chair of each such Committee of the reasons for such delay and the date on which the submission of the report is anticipated.

(2) CONTENTS. □ The report required by paragraph (1) shall describe □

- (A) the activities of the Advisory Council during the preceding year;
- (B) the reports and recommendations made by the Advisory Council to the Secretary of the Interior during the preceding year; and
- (C) an accounting of actions taken by the Secretary of the Interior as a result of the recommendations.

#### **SEC. 003. PLANNING COMPLETION**

(a) Upon completion of the management planning process, the Advisory Council shall advise the Secretary of Interior and the Secretary of Agriculture with regards to the implementation of the management plans and provide oversight to ensure proper implementation for the areas designated by this Act.

(b) Each advisory council shall meet at least twice per year following completion of the management planning process.

(c) This division will expire at whichever comes first, 7 years from enactment of this Act or 3 years after the management planning process concludes.

Thanks, Fred. Do you have a document that redlines this version off the original draft that was released?

On Mon, May 23, 2016 at 10:14 AM, Ferguson, Fred <[Fred.Ferguson@mail.house.gov](mailto:Fred.Ferguson@mail.house.gov)> wrote:

Per our conversation from last week, here is the updated version. For every version moving forward, I am going to redline changes to make it easy to track changes/edits.

Changes in this version were courtesy of Friends of Cedar Mesa (their contribution can be seen in the Bears Ears section and Division C and the Energy Zone section). We will not give them public credit for the language. So please do not share that fact widely.

# **Utah Public Lands Initiative Act – Draft**

## *Version 2.0 - Summary of Changes*

### **Division A – Conservation**

#### **Title I – Wilderness**

1. Wilderness boundary adjustments to be made to accommodate certain rock climbing areas.
2. Wilderness boundary adjustments to be made to accommodate certain mountain biking trails.
3. Addition of Steer Gulch Wilderness in San Juan County.
4. Fire, insect, and disease language amended to adhere to Wilderness Act guidelines.
5. Livestock grazing language amended; language now aligns with the Arizona Desert Wilderness Act; amended language includes addition of Utah Department of Agriculture language, which is the first major change to wilderness grazing language since 1990.
6. Trail and fence maintenance language amended to be consistent with Wilderness Act guidelines.
7. Water Rights language amended to be consistent with Wilderness Act guidelines and other Utah wilderness.
8. Language added to allow land acquisition within wilderness, but only from willing sellers.
9. Language added to ensure state primacy regarding airshed status is maintained.
10. Language added to ensure that existing airshed status at Arches and Canyonlands National Parks will remain in effect.

#### **Title II – National Conservation Areas**

1. Creation of the Indian Creek National Conservation Area.
2. Management Planning process revamped by addition of the county-by-county Public Lands Initiative Stakeholder Advisory Councils (see newly created Division C); local community will play larger role in development of management plans.
3. Language amended to provide greater flexibility to wildland fire managers within the NCAs, while maintaining conservation goals.
4. Livestock grazing management language added to give livestock producers greater certainty for continued grazing within the Conservation Areas, while maintaining conservation goals.
5. Language added to ensure state primacy regarding airshed status is maintained.

6. Language was amended to ensure vegetation management is prioritized and allowed, while maintaining conservation goals.
7. Language was added that requires route closures to be considered only as a last and final resort.
8. New language was added to promote higher education partnerships to achieve educational and scientific goals.
9. New language was added to foster and promote greater local influence of the NCAs.
10. For the first time for an NCA in Utah, Outdoor Recreation – human-powered and motorized – is enumerated as a management provision for the NCA.
11. Language added to allow land acquisition within NCAs, but only from willing sellers.
12. New language authorizes grazing flexibility and research within the Indian Creek NCA.

*Book Cliffs Sportsmen Conservation Area*

1. Language was amended so that the purposes clearly state need to protect and promote hunting and fishing within the SCA.
2. Language was amended to ensure vegetation management is prioritized and allowed, while maintaining conservation goals.

*Bears Ears National Conservation Area*

*\*New Section\**

1. Congressional Findings added to the bill outlining the importance of the Bears Ears region to the local community – including those of Native American and non-Native American descent.
2. Additional purposes added to the Bears Ears NCA that specify FLMPA compliance, guarantees traditional access for religious and cultural uses, adherence to the Native American Graves Repatriation and Protection Act, and integration of Native American Traditional Ecological Knowledge into NCA management.
3. New language enables Native American tribes to enter into Cooperating Agency Status with the Secretary of the Interior and Secretary of Agriculture to promote co-management of the NCA.
4. New language requires the Secretary of the Interior and Secretary of Agriculture to give priority consideration to Native American job applicants that are qualified for NCA management employment based on posted job qualifications and criteria consistent with standard federal hiring practices.
5. New language requires the Secretary of the Interior to appoint a liaison to the Native American tribes that enter into cooperating agency status.

**Title III – Watershed Management Areas**

*\*New Section\**

1. New designations of Watershed Management Areas at Ashley Spring, Dry Fork, Castle Valley, Widdop Mountain, and East Fork Smiths Fork.

2. Purposes of the Watershed Management Areas are to protect water quality and watersheds and to promote recreation where appropriate.
3. Motorized vehicles only permitted for administrative uses or to respond to emergencies on existing designated routes.
4. Mineral development is prohibited within the watershed management areas.
5. Snowmobiling is authorized only in periods of adequate snowfall.

#### **Title IV – Special Management Areas**

1. Management language was amended for the Special Management Areas on U.S. Forest System lands at the High Uintas and Little West Fork Blacks to promote watershed management and water quality while allowing continued recreation and agricultural uses that are otherwise limited in Watershed Management Areas.
2. Language added that recognizes the compromise agreement between environmental groups and the energy industry, known as the West Tavaputs Plateau Project Final Environmental Impact Statement and Record of Decision of July 2, 2010, when energy planning is considered within the Nine Mile Canyon SMA.
3. Desolation Canyon and White River SMA's will be managed as NCAs, expect that subsurface minerals will be accessible from sites located outside of the SMA boundary.

#### **Title V – Arches National Park Expansion**

1. Based on newly acquired GIS data, the Arches Expansion includes many existing off-highway recreation trails. The language will require the trails to remain open, provided local off-highway vehicle groups work with the Park Service to maintain the Park's conservation qualities, enter into maintenance cost-sharing agreements, and mountain biking is allowed where practicable.
2. Language was added regarding a northern park entrance, which can be facilitated by the northwest portion of the Park Expansion in order to enhance the visitor experience and to alleviate traffic congestion (see: Kolob Canyon entrance to Zions National Park).

#### **Title VI – Jurassic National Monument**

1. Management Planning process revamped by addition of the county-by-county Public Lands Initiative Planning Advisory Councils (see newly created Division C); local community will play larger role in development of management plan.

#### **Title VII – Wild and Scenic Rivers**

1. Language added to allow land acquisition within the WSRs, but only from willing sellers.

**Title VIII – Ashley Karst National Geologic and Recreation Area**

1. Languages changes to the the Geologic and Recreation Area will promote watershed management and water quality while allowing continued recreation, agricultural uses, and timber management that are otherwise limited in Special Management Areas or Watershed Management Areas.
2. Energy development will be prohibited within the Geologic Area.

## **Division B – Opportunity**

### **Title I – School Trust Land Consolidations**

1. Title was rewritten to ensure the land exchanges go through a complete review process and that the energy rich lands are transferred to SITLA in a timely manner while also ensuring federal taxpayers are made whole.

### **Title II – Goblin Valley**

1. Language was added to further clarify the purposes and terms of the cooperative management area and cooperative management agreement.

### **Title III – Price Canyon State Forest**

---

### **Title IV – Deer Lodge Land Exchange**

---

### **Title V – Scofield Land Transfers**

1. Amended language clarified the process by which land conveyances will occur.

### **Title VI – Land Conveyance**

1. San Flats Recreation Area removed based on financial burden county ownership may incur.
2. Dugout Ranch removed.
3. Transportation no longer purpose of the Seep Ridge Utility Corridor, as this is intended to be a conveyance used for public utilities.
4. Hole-in-the-Rock trail conveyance removed; new status outlined in Title VIII.

### **Title VII – Land Disposals**

---

### **Title VIII – Canyon Country Recreation Zones**

1. New recreation zones were added at Jensen Hills, Red Mountain, Devils Hole, Bourdette Draw, and Red Wash in Uintah County.
2. Management Planning process revamped by addition of the county-by-county Public Lands Initiative Planning Advisory Councils (see newly created

Division C); local community will play larger role in development of management plans.

3. Klondike Recreation Zone uses further clarified to provide managerial flexibility to reduce conflict between off-highway vehicle and mechanized trail use.
4. Dee Pass Recreation Zone further clarified to minimize conflict between off-highway vehicle recreation and energy development.
5. Yellow Circle Mine and Cameo Cliffs Recreation Zones further clarified to minimize conflict between off-highway vehicle recreation and energy development.
6. The Hole-in-the-Rock Trail is designated as a National Historic Trail and the Hole in the Rock Trail Foundation is enumerated as a cooperating management agency.
7. Language was added to address San Juan County's application to manage Recapture Canyon in a way that balances outdoor recreation and cultural resources.
8. Language was added to advance the Big Burrito Non-Motorized Trail pursuant to the recommendation made by local land managers.

#### **Title IX – Red Rock County Off-Highway Vehicle Trail**

1. Language added to direct managers to minimize conflicts between off-highway vehicle users and non-off-highway vehicle users.

#### **Title X – Long-term Native American Economic Development Certainty**

1. Language was added to direct 62.5% of oil and gas royalties from the Aneth Extension to the Utah Navajo Trust Fund (formerly 37.5%).
2. Language was added to transfer federally owned minerals located underneath the Hill Creek Extension of the Ute Tribe Reservation to the Ute Tribe.

#### **Title XI – Long-term Energy Development**

1. Section was rewritten to provide for limited, site-specific energy zones within Uintah, Duchesne, Carbon, and San Juan counties for the purposes of prioritizing renewable and non-renewable energy development. Prioritizing does not mean that site reviews and environmental analysis are ignored, as these steps are still required to move energy projects forward. Zone boundaries still be discussed.
2. Language dissolving Master Leasing Plans was removed; new language was added that requires any final MLP to be compatible with the provisions of PLI.

#### **Title XII – Long-term Travel Management Certainty**

1. Reference to Class D roads are removed, as consensus does not exist on how best to resolve Class D road disputes.

**Title XIII – Long-Term Grazing Certainty**

***\*New Section\****

1. Language added to ensure to ensure long-term grazing certainty for livestock producers.
2. Language added to better manage bighorn and domestic sheep.

**Division C – Local Participation**  
**\*New Section\***

**Title I – Local Participation and Planning**

1. Seven Public Lands Initiative Advisory Councils, representing Summit, Duchesne, Uintah, Grand, Carbon, San Juan, and Emery counties, are created to support the management planning process and to provide oversight of plan implementation.
2. 15 members will serve on the Councils, each with a local connection to the specific county and each representing differing land management perspectives and institutions.
3. Federal land management agencies must appear before Congress if the Council recommendations are not included in order to explain their rationale for disregarding the input of the Councils.
4. Congress must reauthorize the Councils after 7 years to guarantee Congressional oversight and to keep the local councils at the forefront of local and Congressional land management agendas.

**Subject:** Quick response requested for problematic riders  
**Date:** Thursday, May 26, 2016 2:30:40 PM  
**Attachments:** [bills-11fy2017-interior-subcommitteedraftDOIridders.pdf](#)

---

Good Afternoon,

Despite the Energy and Water bill not passing today, we are continuing to move ahead and prepare for Full Committee when Congress returns. I would like to ask you for specific information on why the attached riders are problematic for DOI. I need to have your response back by June 6, 2016 and would request you please not do full blown effect or impact statements rather provide a paragraph on the negative consequences of these provisions and talking points that will help us defend our amendments to strike.

The riders are:

Sections 114;115;118-125 and Sections 420;428;432;433;436; 437 (Worker Protection Standards-Pesticides-I know this is mainly EPA/Agricultural workers but if this has any impact on applications of pesticides by refuge personnel for invasive plants, etc. that you care to comment on, please do);440; and 441.

Please let me know if you have any questions as I will be available the remainder of this week and all of next week.

Thanks very much for your assistance.

Best,  
Jocelyn

1 ing cooperation with State, local, and tribal governments  
2 or any political subdivision thereof, Indian Affairs may  
3 record obligations against accounts receivable from any  
4 such entities, except that total obligations at the end of  
5 the fiscal year shall not exceed total budgetary resources  
6 available at the end of the fiscal year.

7 SAGE-GROUSE

8 SEC. 114. None of the funds made available by this  
9 or any other Act may be used by the Secretary of the Inte-  
10 rior to review the status of or determine whether greater  
11 sage-grouse (*Centrocercus urophasianus*), or the Columbia  
12 basin distinct population segment of greater sage-grouse,  
13 is an endangered species or a threatened species pursuant  
14 to section 4 of the Endangered Species Act (16 U.S.C.  
15 1533), or to issue a regulation thereto.

16 WATER CONVEYANCES

17 SEC. 115. None of the funds made available by this  
18 or any other Act may be used by the Secretary of the Inte-  
19 rior to review, require approval of, or withhold approval  
20 for use of a right-of-way granted pursuant to the General  
21 Railroad Right-of-Way Act of 1875 (43 U.S.C. 934–939)  
22 if authorization of the use would have been considered  
23 under Department policy to be within the scope of a rail-  
24 road’s authority as of the day before the effective date of  
25 the Department’s Solicitor’s Opinion M–37025, issued on  
26 November 4, 2011.

1           who shall appoint two voting members to stag-  
2           gered terms”;

3           (7) in subsection (f)(3), by striking “are” and  
4           all that follows through “practicable,” and inserting  
5           “shall, to the extent practicable, be drawn from var-  
6           ious disciplines related to the purposes of the Fund,  
7           and”;

8           (8) in subsection (m)—

9           (A) in the heading, by inserting “AND  
10          PROPERTY” after “FUNDS”; and

11          (B) by inserting “and property” after the  
12          first “funds” the first place it appears.

13          BLUE RIDGE NATIONAL HERITAGE AREA AND ERIE

14          CANALWAY NATIONAL HERITAGE CORRIDOR

15          SEC. 117. (a) Section 140(i)(1) of Title I of P.L.  
16 108–108, as amended (54 U.S.C. 320101 note), is further  
17 amended by striking “\$10,000,000” and inserting  
18 “\$12,000,000”; and

19          (b) Section 810(a)(1) of Title VIII of Division B of  
20 Appendix D of P.L. 106–554, as amended (54 U.S.C.  
21 320101 note), is further amended by striking  
22 “\$10,000,000” and inserting “\$12,000,000”.

23          FISH HATCHERY PROGRAMS

24          SEC. 118. (a) IN GENERAL.—Not later than two  
25 years after the date of the enactment of this Act, the Sec-  
26 retary of the Interior, in consultation with the Director

1 of the California Department of Fish and Wildlife, shall  
2 develop and implement the expanded use of conservation  
3 fish hatchery programs to enhance, supplement, and re-  
4 build delta smelt (*Hypomesus transpacificus*) and other  
5 species listed as endangered species or threatened species  
6 under the Endangered Species Act of 1973 (16 U.S.C.  
7 1531 et seq.), under the biological opinion issued under  
8 that Act by the United States Fish and Wildlife Service,  
9 dated December 15, 2008, on the effects of the coordi-  
10 nated operations of the Central Valley Project and the  
11 State Water Project in California.

12 (b) PROGRAM DESIGN.—The conservation fish hatch-  
13 ery programs established under subsection (a) and their  
14 associated hatchery and genetic management plans shall  
15 be designed—

16 (1) to benefit, enhance, support, and otherwise  
17 recover naturally spawning fish species to the point  
18 where the measures under the Endangered Species  
19 Act of 1973 are no longer necessary for such spe-  
20 cies;

21 (2) to address the recommendations of the Cali-  
22 fornia Hatchery Scientific Review Group; and

23 (3) to minimize adverse effects to operations of  
24 the Central Valley Project and State Water Project  
25 (as those terms are used in the Central Valley

1 Project Improvement Act of 2002 (title XXXIV of  
2 Public Law 102–575)).

3 (c) MISCELLANEOUS REQUIREMENTS.—In imple-  
4 menting this section, the Secretary—

5 (1) shall give priority to existing and prospec-  
6 tive hatchery programs and facilities within the Sac-  
7 ramento-San Joaquin Delta and the riverine tribu-  
8 taries thereto; and

9 (2) may enter into cooperative agreements for  
10 the operation of conservation hatchery programs  
11 with the State of California, tribes, and other non-  
12 Governmental entities for the benefit, enhancement,  
13 and support of naturally spawning fish species.

14 REISSUANCE OF FINAL RULES

15 SEC. 119. Before the end of the 60-day period begin-  
16 ning on the date of the enactment of this Act, the Sec-  
17 retary of the Interior shall reissue the final rule published  
18 on December 28, 2011 (76 Fed. Reg. 81666 et seq.) and  
19 the final rule published on September 10, 2012 (77 Fed.  
20 Reg. 55530 et seq.), without regard to any other provision  
21 of statute or regulation that applies to issuance of such  
22 rules. Such reissuances (including this section) shall not  
23 be subject to judicial review.

1 OIL AND GAS ROYALTIES

2 SEC. 122. None of the funds made available by this  
3 Act may be used to finalize, implement, or enforce the Bu-  
4 reau of Land Management's proposed rule regarding  
5 Waste Prevention, Production Subject to Royalties, and  
6 Resource Conservation published February 8, 2016.

7 PROHIBITION ON USE OF FUNDS FOR CERTAIN HISTORIC  
8 DESIGNATION

9 SEC. 123. (a) IN GENERAL.—None of the funds  
10 made available in this Act may be used to take any action  
11 to designate a Federal property for inclusion on, or to add  
12 a Federal property to, the National Register of Historic  
13 Places, or to operate or maintain a property on that reg-  
14 istry, if the managing agency of that Federal property ob-  
15 jects to such designation or inclusion, including actions re-  
16 lated to—

- 17 (1) cooperative agreements;  
18 (2) general administration;  
19 (3) maintenance of records and agreements; and  
20 (4) any other functions necessary to designate, add,  
21 operate, or maintain such Federal property.

22 (b) EXCEPTION.—The prohibition in subsection (a)  
23 shall not apply to actions related to a managing agency  
24 request for expedited removal of Federal property from  
25 the National Register of Historic Places for reasons of na-  
26 tional security.

## 1 DRILLING MARGINS

2 SEC. 124. None of the funds made available in this  
3 Act or any other Act for any fiscal year may be used to  
4 develop, adopt, implement, administer, or enforce any  
5 change to the regulations and guidance in effect on April  
6 1, 2015, pertaining to drilling margins or static downhole  
7 mud weight (30 CFR 250.414(c)) including the provisions  
8 of the rules dated April 17, 2015, and April 29, 2016.

## 9 TRIBAL RECOGNITION

10 SEC. 125. None of the funds made available by this  
11 or any other Act may be used by the Secretary of the Inte-  
12 rior to implement, administer, or enforce the final rule en-  
13 titled “Federal Acknowledgment of American Indian  
14 Tribes” published by the Department of the Interior in  
15 the Federal Register on July 1, 2015 (80 Fed. Reg. 37862  
16 et seq.).

## 17 TITLE II

## 18 ENVIRONMENTAL PROTECTION AGENCY

## 19 SCIENCE AND TECHNOLOGY

20 For science and technology, including research and  
21 development activities, which shall include research and  
22 development activities under the Comprehensive Environ-  
23 mental Response, Compensation, and Liability Act of  
24 1980; necessary expenses for personnel and related costs  
25 and travel expenses; procurement of laboratory equipment

1 Act (33 U.S.C. 1251, et seq.), including the provisions of  
2 the rules dated November 13, 1986, and August 25, 1993,  
3 relating to said jurisdiction, and the guidance documents  
4 dated January 15, 2003, and December 2, 2008, relating  
5 to said jurisdiction.

6 HUNTING, FISHING, AND RECREATIONAL SHOOTING ON  
7 FEDERAL LAND

8 SEC. 428. (a) LIMITATION ON USE OF FUNDS.—  
9 None of the funds made available by this or any other  
10 Act for any fiscal year may be used to prohibit the use  
11 of or access to Federal land (as such term is defined in  
12 section 3 of the Healthy Forests Restoration Act of 2003  
13 (16 U.S.C. 6502)) for hunting, fishing, or recreational  
14 shooting if such use or access—

15 (1) was not prohibited on such Federal land as  
16 of January 1, 2013; and

17 (2) was conducted in compliance with the re-  
18 source management plan (as defined in section 101  
19 of such Act (16 U.S.C. 6511)) applicable to such  
20 Federal land as of January 1, 2013.

21 (b) TEMPORARY CLOSURES ALLOWED.—Notwith-  
22 standing subsection (a), the Secretary of the Interior or  
23 the Secretary of Agriculture may temporarily close, for a  
24 period not to exceed 30 days, Federal land managed by  
25 the Secretary to hunting, fishing, or recreational shooting

1 if the Secretary determines that the temporary closure is  
2 necessary to accommodate a special event or for public  
3 safety reasons. The Secretary may extend a temporary clo-  
4 sure for one additional 90-day period only if the Secretary  
5 determines the extension is necessary because of extraor-  
6 dinary weather conditions or for public safety reasons.

7 (c) AUTHORITY OF STATES.—Nothing in this section  
8 shall be construed as affecting the authority, jurisdiction,  
9 or responsibility of the several States to manage, control,  
10 or regulate fish and resident wildlife under State law or  
11 regulations.

12 LEAD TEST KIT

13 SEC. 429. None of the funds made available by this  
14 Act may be used to enforce regulations under sections  
15 745.84 and 745.86 of title 40, Code of Federal Regula-  
16 tions, or any subsequent amendments to such regulations,  
17 until the Administrator of the Environmental Protection  
18 Agency—

19 (1) publicizes Environmental Protection Agency  
20 recognition of a commercially available lead test kit  
21 that meets both criteria under section 745.88(c) of  
22 title 40, Code of Federal Regulations; or

23 (2) solicits public comment on alternatives to  
24 subpart E of part 745 of title 40, Code of Federal

1           (2) any regulation or guidance under section  
2           111(b) of the Clean Air Act (42 U.S.C. 7411(b)) es-  
3           tablishing any standard of performance for emis-  
4           sions of any greenhouse gas from any modified or  
5           reconstructed source that is a fossil fuel-fired elec-  
6           tric utility generating unit; or

7           (3) any regulation or guidance under section  
8           111(d) of the Clean Air Act (42 U.S.C. 7411(d))  
9           that applies to the emission of any greenhouse gas  
10          by an existing source that is a fossil fuel-fired elec-  
11          tric utility generating unit.

#### 12          AVAILABILITY OF VACANT GRAZING ALLOTMENTS

13          SEC. 432. The Secretary of the Interior, with respect  
14          to public lands administered by the Bureau of Land Man-  
15          agement, and the Secretary of Agriculture, with respect  
16          to the National Forest System lands, shall make vacant  
17          grazing allotments available to a holder of a grazing per-  
18          mit or lease issued by either Secretary if the lands covered  
19          by the permit or lease or other grazing lands used by the  
20          holder of the permit or lease are unusable because of  
21          drought or wildfire, as determined by the Secretary con-  
22          cerned. The terms and conditions contained in a permit  
23          or lease made available pursuant to this section shall be  
24          the same as the terms and conditions of the most recent  
25          permit or lease that was applicable to the vacant grazing

1 allotment made available. Section 102 of the National En-  
2 vironmental Policy Act of 1969 (42 U.S.C. 4332) shall  
3 not apply with respect to any Federal agency action under  
4 this section.

5 PROTECTION OF WATER RIGHTS

6 SEC. 433. None of the funds made available in this  
7 or any other Act may be used to condition the issuance,  
8 renewal, amendment, or extension of any permit, approval,  
9 license, lease, allotment, easement, right-of-way, or other  
10 land use or occupancy agreement on the transfer of any  
11 water right, including sole and joint ownership, directly  
12 to the United States, or any impairment of title, in whole  
13 or in part, granted or otherwise recognized under State  
14 law, by Federal or State adjudication, decree, or other  
15 judgment, or pursuant to any interstate water compact.  
16 Additionally, none of the funds made available in this or  
17 any other Act may be used to require any water user to  
18 apply for or acquire a water right in the name of the  
19 United States under State law as a condition of the  
20 issuance, renewal, amendment, or extension of any permit,  
21 approval, license, lease, allotment, easement, right-of-way,  
22 or other land use or occupancy agreement.

23 LIMITATION ON STATUS CHANGES

24 SEC. 434. None of the funds made available by this  
25 Act shall be used to propose, finalize, implement, or en-

1 by electronic means, including on the official public Inter-  
2 net Web site of the Environmental Protection Agency.

3 (d) This section shall be applied in a manner con-  
4 sistent with United States obligations under international  
5 agreements.

6 (e) The Administrator may retain up to 0.25 percent  
7 of the funds appropriated in this Act for the Clean and  
8 Drinking Water State Revolving Funds for carrying out  
9 the provisions described in subsection (a)(1) for manage-  
10 ment and oversight of the requirements of this section.

11 (f) For purposes of determining compliance with 33  
12 U.S.C. 1388 with respect to water pollution control revolv-  
13 ing funds, and 33 U.S.C. 3914 with respect to Water In-  
14 frastructure Finance and Innovation Act assistance, the  
15 term “produced in the United States” includes iron and  
16 steel products, regardless of their country of origin, that  
17 are substantially transformed through manufacturing or  
18 processing in the United States into new and different  
19 products with a name, character, or use that is distinct  
20 from the original products.

21 SOCIAL COST OF CARBON

22 SEC. 436. None of the funds made available by this  
23 or any other Act shall be used for the social cost of carbon  
24 (SCC) to be incorporated into any rulemaking or guidance  
25 document until a new Interagency Working Group (IWG)

1 sector under Sections 111(b) or (d) of the Clean Air  
2 Act (42 U.S.C. 7411(b), 7411(d));

3 (2) any rule changing the term “adjacent” for  
4 purposes of defining “stationary source” and “major  
5 source” as applied to the oil and gas sector under  
6 the Clean Air Act; and

7 (3) proposed Draft Control Techniques Guide-  
8 lines for the Oil and Natural Gas Industry released  
9 September 18, 2015 (80 Fed. Reg. 56577 ).

#### 10 ROYALTY RATES

11 SEC. 440. None of the funds made available by this  
12 Act may be used to implement any changes to royalty  
13 rates or product valuation regulations under Federal coal,  
14 oil, and gas leasing programs.

#### 15 PROGRAM REVIEW

16 SEC. 441. (a) TERMINATION.—Secretarial Order  
17 3338, issued by the Secretary of the Interior on January  
18 15, 2016, shall have no force or effect on and after the  
19 earlier of—

20 (1) September 30, 2017; or

21 (2) the date of publication of notice under sub-  
22 section (b).

23 (b) PUBLICATION OF NOTICE.—The Secretary of the  
24 Interior shall promptly publish notice of the completion  
25 of the Programmatic Environmental Impact Statement di-  
26 rected to be prepared under that order.

# Cantwell Outlines Priorities to Jewell on Reforming the Federal Coal Leasing Program

*14 Senators Sign Onto Letter to the Secretary*

[Download a PDF of the letter here.](#)

Washington, D.C. – Today, led by Ranking Member of the Senate Energy and Natural Resources Committee **U.S. Senator Maria Cantwell (D-Wash.)**, **14 senators outlined three priorities for Interior Secretary Sally Jewell regarding upcoming reforms to the federal coal leasing program.** The Interior Department is undertaking a review of the program and updating the programmatic environmental impact statement (PEIS) under which federal coal is leased.

In the letter, the senators commend Secretary Jewell for her efforts to modernize the federal coal program, while ensuring that the pause on new leasing will not disrupt the power sector today. They note that stewardship cannot take place on autopilot, and provide three imperatives that should guide the reform process:

- (1) **Get the science right.**
- (2) **Reconsider the government’s market role.**
- (3) **Reconsider how to balance multiple uses over time.**

First, the senators believe that the United States cannot continue to lease coal without taking into account the fact that it is the most significant source of power sector greenhouse gas emissions. The Bureau of Land Management (BLM) must ground the new PEIS in the new reality.

Second, the fact that 90 percent of federal lease sales since 1990 had single

bidders suggests that Western coal markets are structurally non-competitive. Too often the government has been a passive auctioneer, rather than a steward. Given the diverse sources of electricity generation available today and the high costs of climate change, the current policy is unwise and outdated.

Lastly, the effects of mining a ton of public coal today may rebound on public lands for centuries, damaging opportunities for recreation, water supply, wildfire resilience and even other extractive uses like grazing and timber. A huge disparity exists between the high, long-term costs of burning the public's coal and the low, short-term return from selling it. The BLM must address this disparity.

The senators also committed to fixing other aspects of the federal coal programs, including deficient financial assurance rules, such as self-bonding; accelerated mine reclamation; miners' pension and health care funds; and assistance for coal country to diversify, transition and rebuild.

The senators on the letter include: Maria Cantwell (D-Wash.), Barbara Boxer (D-Calif.), Dianne Feinstein (D-Calif.), Al Franken (D-Minn.), Martin Heinrich (D-N.M.), Mazie Hirono (D-Hawaii), Ed Markey (D-Mass.), Jeff Merkeley (D-Ore.), Patty Murray (D-Wash.), Brian Schatz (D-Hawaii), Tom Udall (D-N.M.) and Elizabeth Warren (D-Mass.).

Dear NEWSWAVE Subscribers:

Yesterday, the President proclaimed June as [National Oceans Month](#), June 8<sup>th</sup> is World Oceans Day, and Capitol Hill Ocean Week will be here in Washington, D.C. June 7-9!

We are celebrating with our new Spring 2016 issue of NEWSWAVE (attached). This issue is also available on-line along with our second Summer Photo Issue (Summer 2016): <https://www.doi.gov/pmb/ocean/newswave>. Together, these two publications give you diverse and very visual examples of Interior's stewardship role for our ocean, coasts and Great Lakes. We encourage you to dive in and explore!

Please also visit our Facebook page where we post images, news, highlights, and links from across the Nation. It is a great way to keep up with Interior's ocean, coastal, and Great Lakes activities on a daily basis. Visit and 'like' us today! <https://www.facebook.com/USInterioroceanscoastsgreatlakes>

We hope you enjoy these issues and will share them widely.

Sincerely,

Ann and Liza

## Interior's Offshore Energy Portfolio An Update

By Randy Bowman (DOI)

The Department of the Interior's (DOI) Bureau of Ocean Energy Management (BOEM) is engaged in multiple efforts to develop renewable and conventional energy resources on the Outer Continental Shelf (OCS).

### Renewables

The BOEM received unsolicited lease requests for wind energy projects on OCS areas off Oahu, HI, from two applicants. The requests came four years after the BOEM and State of Hawaii established the Hawaii Intergovernmental Renewable

## Northeast and Mid-Atlantic Regions Making Progress on Ocean Plans

By Robert LaBelle (BOEM)

Robert LaBelle serves as the Federal Co-Lead of the Mid-Atlantic RPB

The Northeast and the Mid-Atlantic Regional Planning Bodies (RPBs) are making major strides toward producing the Nation's first two regional ocean plans this year in support of key National Ocean Policy objectives. These plans focus on bringing Federal, State and tribal partners together with stakeholders to enhance communication, improve coordination and enable agencies to better meet

*See Ocean Planning page 3*

## Celebrate the 100th Birthday in Ocean and Coastal Parks!

In 1872 when Congress conserved the marvels of Yellowstone in the first National Park, the Nation could not have imagined the spectacular seascapes lying under the oceans. Future parks along the coast had yet to be envisioned and created. Today, the wonders of 88 ocean and coastal parks are ready for you to experience—above and below the waves. Our national parks, national seashores, lakeshores, monuments and historic sites celebrate a panorama of nature, history and cultural resources on the coast. More than 88 million visitors explore these parks every year.

*Ocean Planning continued from page 1*

their existing responsibilities. The Northeast and Mid-Atlantic RPBs will deliver their final ocean plans to the National Ocean Council in August and September 2016, respectively. This is in line with the President's Executive Order 13547 in 2010 on implementing the National Ocean Policy.

## Northeast

The Northeast Ocean Plan and data portal will enable more consistent regional characterizations of living natural resources, habitats and ocean human-use trends that may be applied in regulatory/environmental reviews and other management applications. It will also support early identification of potential conflicts (and compatibilities) and affected resources; employ best practices for regulatory/management processes through interagency coordination; improve stakeholder engagement; and increase use and sharing of scientific data. By signing on to the Ocean Plan, Federal agencies will agree to use and maintain ocean plan data and information and continue best practices in agency and stakeholder coordination. *See related story, page 4.*

In March, the Northeast RPB released its draft Ocean Plan for an internal review across RPB agencies. The BOEM worked closely with the Senior Ocean Policy Team leads and DOI leadership to conduct this expedited draft Ocean Plan review throughout the DOI and its bureaus. In keeping with the strict timeline, we submitted consolidated DOI comments to the RPB on April 1; the draft Ocean Plan was revised in April and released in May for a 45-day public comment period. Soon after the draft Ocean Plan is released for public comment, the RPB will hold its next meeting followed by public meetings in the northeast states. Based on comments received, the Ocean Plan will be revised in July and submitted to the

National Ocean Council in August for approval by November, after which the Ocean Plan will be in effect. Learn more: <http://neoceanplanning.org/about/northeast-rpb/>

## Mid-Atlantic

The Mid-Atlantic Ocean Action Plan will follow about a month behind the Northeast Ocean Plan timeline. The Mid-Atlantic RPB held its fifth in-person meeting in Baltimore, MD, from March 21–24, during which the RPB members agreed on initial content for the draft Ocean Action Plan. In addition to public comment opportunities during the RPB meeting, stakeholders participated in a workshop-style public engagement session to provide direct input on topics under consideration by the RPB. About 90 people participated in the meeting, including RPB members and stakeholders. Beth Kerttula, the National Ocean Council Director, provided opening remarks and served as a resource during the three-day meeting. After the meeting,

the RPB continues to refine the draft Ocean Action Plan for internal review this spring. The draft will then be further refined and released for a 45-day public comment period starting in late June. This public review will begin in early July with a public webinar conducted by the RPB, followed by public listening sessions in the Mid-Atlantic States hosted by the Mid-Atlantic Regional Council on the Ocean (MARCO). After considering public comments, the draft Ocean Action Plan will be refined again during August for final review by RPB entities. In mid-September, the RPB will hold its sixth in-person meeting and deliver the final Ocean Action Plan to the National Ocean Council, with concurrence anticipated in November. In 2017 and beyond, the agencies will work on implementation of the Ocean Action Plan. Details are available at: <http://www.boem.gov/Mid-Atlantic-Regional-Planning-Body/>

Mid-Atlantic RPB members considered and reached general agreement on initial content for the draft Ocean Action Plan during their March 2016 meeting. From left to right, Joe Atangan, Dept. of Defense; Sarah Cooksey, Delaware; John Kennedy, Dept. of Transportation; Michael Jones, U.S. Navy; Elizabeth Semple, New Jersey; Deerin Babb-Brott, facilitation team; Kevin Chu, NOAA; Meghan Massaua, facilitation team; Ingrid Irigoyen, facilitation team; Simon Gore, Dept. of Energy; Karen Chytalo, New York; Gwynne Schultz (State co-lead), Maryland; Laura Cantral, facilitation team; Bob LaBelle (Federal co-lead), BOEM; Kelsey Leonard (tribal co-lead), Shinnecock Indian Nation; Mike Luisi, Fishery Management Council; Chris Scraba, U.S. Coast Guard; Greg Capobianco, New York; Sherilyn Lau, EPA; Catherine McCall, Maryland; and John Clark, Delaware. ## Sharing Data: The Foundation of Marine Planning

By Mary Boatman (BOEM)

In support of the marine planning efforts in the Mid-Atlantic and Northeast, regional data portals have been developed by State and Federal partners. During the past five years, existing data about the marine and coastal environments have been gathered and synthesized into map products. New data about human uses of marine resources and offshore areas, such as commercial fishing, recreational boating and shipping vessel traffic

patterns, are being collected and incorporated into geospatial map products. These products are critical to regional planning efforts and are freely accessible now through these data portals. For the first time, synthesized distribution and abundance data for whales, birds and fish along the entire Atlantic Coast are now available.

Check out the data portals to learn more:

Northeast Ocean Data Portal: <http://www.northeastoceandata.org/>

## Voices for the Ocean

By Ann Tihansky

The National Ocean Council's (NOC) Governance Coordinating Committee (GCC) is an advisory group consisting of 18 officials from State, tribal and local governments that serves as an independent body to advise and coordinate with the NOC on interjurisdictional collaboration and cooperation on the National Ocean Policy and related matters. The GCC represents broad, diverse interests, regions and people for a "Sea Change."

The GCC recognizes the need for a coordinated national campaign for ocean health to address ocean conditions using all media tools available. The members unanimously agreed to develop plain language, nonpartisan transition papers around the theme "Sea Change" that address the care of the ocean while providing recommendations on the most important ocean issues affecting communities, including climate adaptation and ocean acidification, temperature and hypoxia.

Through a set of thematic policy papers, the GCC has expressed prioritized concerns for what they see as the most important interjurisdictional ocean issues for the Nation:

**Changing seas**—Ocean acidification, ocean temperature, harmful algal blooms, contaminants, sea-level rise, adaptation and inundation.

**Data and planning**—Marine and ocean science, connecting science to policy, ocean data portals and monitoring programs.

**Resource management**—Ocean planning, offshore sediment resource management, offshore energy, adaptive management and marine protected areas (MPAs).

**Communications**—Work together with States, tribes and indigenous people to continue work beyond the accomplishments of the National Ocean Policy Implementation Plan.

As one of the major Federal agencies implementing the National Ocean Policy, the DOI plays various roles in supporting and addressing the issues highlighted by the GCC. Throughout

this issue of NEWSWAVE, there are just a few examples ranging from foundational science about sea-level rise to offshore energy resource management to planning for and protecting coastal and marine habitat health.

Read the GCC's "Voices for the Ocean": [https://www.whitehouse.gov/sites/default/files/microsites/ostp/gcc\\_-\\_voices\\_for\\_the\\_ocean\\_-\\_20160210\\_final.pdf](https://www.whitehouse.gov/sites/default/files/microsites/ostp/gcc_-_voices_for_the_ocean_-_20160210_final.pdf)

## DOI—Multiple Missions for Stewardship of our Ocean, Coasts and Great Lakes

By Cheryl Fossani (DOI)

The DOI is entrusted to conserve and protect America's resources for today and future generations to come. Recognizing the vital connection between the health of our natural resources and human health and the economy, the DOI is one of the Nation's principal stewards of our ocean, coastal and Great Lakes resources.

Made up of nine bureaus, the DOI as a whole has a wide range of ocean and coastal responsibilities ranging from robust scientific programs, to stewardship of vast land, coastal and ocean areas, to ensuring safe and sustainable management of our Nation's mineral and energy resources. Working collaboratively across our bureaus, we are able to consistently manage our delicate ocean resources, connecting on-the-ground implementation and resource management to effective policies—something that one organization alone would have a hard time accomplishing.

- The DOI provides public access to our Nation's seashores, refuges,

and parks and monuments in coastal and marine environments, including wetlands, watersheds, refuges, monuments, parks, coastlines and open ocean areas in all 50 states and U.S. territories in the Atlantic, Pacific and Arctic Oceans, the Gulf of Mexico, the Great Lakes and the Caribbean Sea.

- DOI experts provide data, tools and information to inform and support multiple levels of leaders and decision makers so they can manage upland watersheds, coastal and estuarine ecosystems, continental shelf and deep ocean environments and the natural and cultural resources that exist in them.
- The DOI uses science-based and adaptive management to increase our understanding of natural resources and inform their responsible use, conservation and management so that they are able to adapt to changing conditions.

In addition to working within and among its bureaus, the DOI collaborates across the Federal family and with States, tribes, local governments and a wide array of partners to manage resources at landscape and ecosystem scales, ensuring our ocean, coasts and Great Lakes are healthy and resilient, safe and productive and

understood and treasured. The DOI supports programs that work across political boundaries and through community engagement to promote health, reduce risk and support sustainable resources.

Through many different partnerships, our cumulative impact in managing, conserving and protecting ocean areas, coral reefs, barrier islands, bays, deltas and wetlands is much bigger than the impact that any organization can have alone. Working together we can protect and conserve coastal and marine resources and the diverse communities, economies and wildlife that depend on them.

### DOI Resources

The DOI studies, manages, protects and provides access to these significant resources:

- More than 35,000 miles of national coastline.
- More than 34 million acres in 88 marine and coastal national parks managed by the NPS.
- More than 180 marine and coastal Refuges managed by the USFWS.
- More than 1.7 billion underwater acres of OCS managed by the BOEM and BSEE.
- More than 1,100 miles of the California Coastal National Monument managed by the Bureau of Land Management (BLM), as well as additional coastal lands in Florida, Alabama, Oregon, Washington and Alaska.
- More than 473,000,000 square miles in the Pacific Remote Islands, Marianas Trench, Papahānaumokuākea and Rose Atoll Marine National Monuments and associated Refuges.

## Introducing the New ESIP Smartphone App ICUC

By Susan Russell-Robinson (USGS) and Jonathan Parker (NPS)

Have you ever been out and about in a new location and wondered what groups might be monitoring the environment near you?

The Gulf of Maine Council on the Marine Environment's EcoSystem Indicator Partnership (ESIP) is excited to release a new ICUC ("I See You See") smartphone app. The new app helps you "see" ongoing monitoring activities while also allowing you to use your mobile device to collect information of use to the environmental scientists in charge of managing the Gulf of Maine and watershed. The app uses your location to inform you about monitoring programs in your vicinity. In addition, you can use your phone to upload images into photo

libraries or to introduce others to locations you feel are important. Once you have logged into the app, it will pull up a map of your location with layers available to look at monitoring sites or interact with photo collection sites.

You can also use your phone to contribute to a gallery that will become a photo library over time. Special blue brackets have been placed in locations so that you and other photographers can collect consistent visual imagery for selected monitoring sites. Currently there are two sites in Massachusetts, two in New Hampshire, four in Maine, two in New Brunswick, and two in Nova Scotia. Each time you revisit the site and snap a picture, the photo library grows! If you have another site you want others to discover, you can take a picture there and share what is important about the site to you.

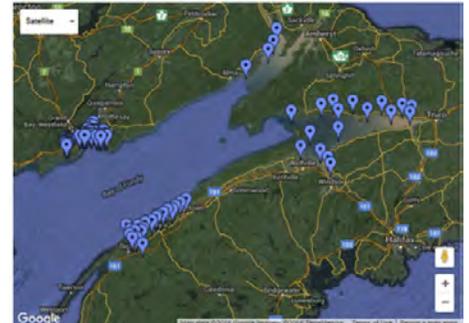

This release is the result of several years of hard work by the ESIP team.

Read more: <http://www.gulfofmaine.org/2/esip-monthly-journals/>

You can download the app from iTunes or the Google Play store. Simply search ESIP and ICUC, download and begin!

## Introducing SeaScribe App

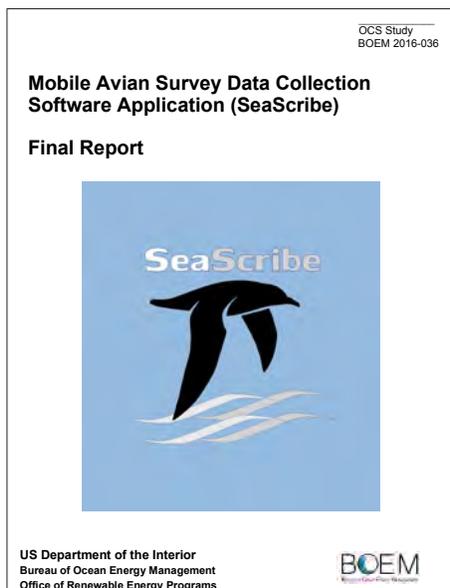

### A New Tool for Offshore Surveys of Marine Birds and Other Wildlife

By Mary Boatman (BOEM)

Offshore surveys for wildlife, including seabirds, marine mammals and sea turtles, are necessary to establishing baseline and project-specific information for offshore development. The BOEM recently funded the development of SeaScribe, a new at-sea survey data collection app, designed to be the standard application for marine wildlife survey data collection. Developed by the Biodiversity Research Institute and Tilson Government Services, the application is a tool specifically designed for offshore wildlife surveyors (using either boats or planes) to improve data collection, standardization and work flow, reduce data entry errors and decrease time from raw data output to finalized datasets for analysis. SeaScribe operates on Android and iOS platforms, such as tablets and smartphones, and is available freely to the public.

SeaScribe features include:

- capturing environmental conditions and behavioral information alongside each georeferenced wildlife observation, using internal or external global positioning system,
- efficient data entry screens with core data fields and the ability to create and use customized data fields,
- capturing digital photographs and audio clips from onboard cameras and microphones, tagged to specific observations and locations,
- export of data in JSON or CSV file formats, including tagged images or audio clips, via email or Dropbox, and

A new app from the BOEM supports offshore surveys for wildlife at sea such as seabirds, marine mammals and sea turtles. Image credit: BOEM

Cory's Shearwater. Photo credit: John Slovin, Northeast Seabirds

- a reporting tool that summarizes survey data by transect or survey for screen view or exporting.

### Download the App

## Investing in Ecosystem Services

### Establishing Metrics, Evaluating Changes, Guiding the Future

By Rick Bennett (USFWS)

The DOI invested \$787 million for Hurricane Sandy recovery to clean up and repair damaged national parks and Refuges; restore and strengthen coastal marshes, wetlands and beaches; and connect and open waterways to increase fish passage, eliminate water control structures and improve flood resilience while bolstering local efforts to protect communities from future storms.

Investments in ecosystem services can have multiple payoffs. These include providing jobs that can make long-lasting impacts to support healthy natural resources and make communities more resilient to predicted future storms—a goal outlined in President Obama's Climate Action Plan: <https://www.whitehouse.gov/sites/default/files/image/president27sclimateaction-plan.pdf>

Improving the resilience of the northeastern coastline of the United States is a massive and complex task. Developing accurate and sensitive performance metrics for detecting and assessing change in resilience is equally complex. Similarly, determining the relationships between changes in resilience of ecological systems and changes in community resilience is a complicated and underexamined area of research; however, it is integral to ensuring projects are strengthening desired societal outcomes.

Stressors such as sea-level rise, storm surge, other climate-driven stressors of coastal systems and accelerating development pressures in the coastal region are affecting much, if not all, of the northeastern coast. Some current

*See Investing in Ecosystems page 10*

*Offshore Energy Update continued from page 1*

Energy Task Force to initiate coordination and planning on offshore renewable energy issues between Federal, State and local agencies and Native Hawaiians Organizations (the State Office of Hawaiian Affairs and the DOI Office of Native Hawaiian Relations). The BOEM will continue its work with the Task Force and further engage the public as it moves forward with its offshore wind leasing process. In January, the BOEM also received an unsolicited request for a wind lease on the OCS off California. The next steps here will be to determine competitive interest and request public comments on the proposed area.

On March 16, the BOEM announced the formal designation of the New York Wind Energy Area, which totals about 81,130 acres, for potential commercial wind energy development in Federal waters about 11 miles south of Long Island, NY.

“New York has tremendous offshore wind potential, and today's milestone marks another important step in the President's strategy to tap clean, renewable energy from the Nation's vast wind and solar resources,” Secretary Jewell said. “We will continue to work with the State and local stakeholders through a collaborative effort as we determine what places have the highest potential and lowest conflict to harness the enormous wind energy potential off the Atlantic seaboard.”

This was the latest in a series of steps by the BOEM to develop OCS renewable energy through a collaborative intergovernmental process. To date, the BOEM has issued 11 commercial wind energy leases off the Atlantic Coast, including those offshore Massachusetts, Rhode Island, New Jersey, Delaware, Maryland and Virginia.

Read more: <http://www.boem.gov/Renewable-Energy-State-Activities/> and <https://www.doi.gov/pressreleases/secretary-jewell-announces-milestone-commercial-wind-energy-development-offshore-new>

## Conventional

On March 15, the BOEM announced a proposal for the next five-year OCS Oil and Gas Leasing Program for 2017–2022. The proposal continues a balanced approach to leasing; protects sensitive resources and asks for public comment on additional protections. The proposed Program evaluated 13 potential lease sales in six planning areas—10 potential sales in the Gulf of Mexico and three potential sales off the coast of Alaska. The proposal did not include lease sales in the Mid- and South Atlantic Program Area due to current market dynamics, strong local opposition and conflicts with competing commercial and military ocean uses.

Release of the proposed Program is one of several steps in a multiyear process to develop a final offshore leasing program for 2017–2022. Before the program is finalized, the BOEM will consider another round of public comment on the proposal and accompanying Draft Programmatic Environmental Impact Statement (EIS). The current proposal was informed by more than one million comments, 23 public meetings and extensive outreach with members of the public, nonprofit organizations, industry, elected officials and other interested parties across the country.

Read more: <http://www.boem.gov/Five-Year-Program-2017-2022/>

On March 23, the BOEM offered about 45 million acres for oil and gas exploration and development in the Gulf of Mexico under the current OCS program, which previously offered

more than 60 million acres for development and garnered \$3 billion in high bids.

“These Gulf of Mexico lease sales reflect this Administration's commitment to facilitate the orderly development of offshore energy resources while protecting the human, marine and coastal environments, and ensuring a fair return to American taxpayers,” said BOEM Director, Abigail Ross Hopper.

Read more: <http://www.boem.gov/press03232016/>

The BOEM currently manages about 5,000 active OCS leases covering more than 26 million acres—the vast majority in the Gulf of Mexico. In 2015, OCS oil and gas leases accounted for about 16 percent of domestic oil production and five percent of domestic natural gas production. This production generates billions of dollars in revenue for State and local governments and the U.S. taxpayer, while supporting hundreds of thousands of jobs.

BOEM and DOI staff contributed to this article: Tracey Moriarty (BOEM), John Romero (BOEM), Marjorie Weisskohl (BOEM), John Filostrat (BOEM), Caryl Fagot (BOEM) and Jessica Kershaw (DOI)

In order to promote responsible development of these offshore energy resources, Interior's Bureau of Safety and Environmental Enforcement (BSEE) announced final well control regulations to reduce the risk of an offshore oil or gas blowout on April 15.

Read more: <http://www.bsee.gov/BSEE-Newsroom/Press-Releases/2016/Interior-Department-Releases-Final-Well-Control-Regulations-to-Ensure-Safe-and-Responsible-Offshore-Oil-and-Gas-Development/>

*NPS Centennial continued from page 1*

The National Park Service (NPS) invites you to Find Your Park and join the celebration of these special places during the 2016 NPS Centennial.

Come discover coral reefs and kelp forests teeming with vibrant marine life. Visit tidewater glaciers that form the majestic seascape that has been there for generations of native Alaskan culture. Explore quiet bays framed by remote barrier islands that provide a haven for shorebirds and schools of fish. Lighthouses, shipwrecks and memorials tell of centuries of maritime commerce by seafarers and sacrifice by servicemen and women during our Nation's wars.

Find your ocean and coastal park:

<http://www.nature.nps.gov/water/oceancoastal/>

<http://findyourpark.com/> or <https://www.nps.gov/>

The beach is great place to make and share discoveries. There are many activities for the whole family to enjoy at your coastal national parks. Photo credits: Ann Tihansky

## Visit a National Park

Here are a few ways you can take advantage of your national parks. Come visit!

### Find Your Park:

<http://findyourpark.com/>

This website introduces special places at national parks to help park visitors, supporters and advocates discover and connect with their ocean heritage.

### Every Kid in a Park:

<http://www.everykidinapark.gov>

This program provides free admission to parks for 4th graders and their classes or youth groups, along with transportation grants and educational curricula to support schools and teachers.

### BioBlitz:

<https://www.nps.gov/subjects/biodiversity/national-parks-bioblitz.htm>

BioBlitzes are events in parks where teams of volunteer scientists, students and teachers search for and identify as many species of plants, animals and micro-organisms as they can find and help discover and document those new to science. The idea is to help gather information about the many different types and numbers of species that are using these environments but also to raise awareness and engage the public in this learning process.

BioBlitzes are one of the ways the NPS is celebrating with their partners in the U.S. Fish and Wildlife Service (USFWS) National Wildlife Refuges (Refuges), National Oceanic and Atmospheric Administration (NOAA) National Marine Sanctuaries and National Estuarine Research Reserves and State and local coastal and marine parks.

See the social media feeds: <http://tgb.io/BioBlitz2016/288150>

## Surf Your Park!

From sea to shining sea, the NPS manages 88 ocean, coastal and Great Lakes parks across 22 states and four territories. Altogether, these parks conserve more than 11,000 miles of coast and 2.5 million acres of ocean and Great Lakes waters.

*Investing in Ecosystems continued from page 7*

coastal infrastructure and resource uses are already unsustainable, so trade-offs will need to be considered, and resilience requirements for critical functions that sustain coastal ecological systems, communities and commerce will need to be defined.

Determining thresholds of resilience to cumulative stressors beyond which ecological system change or infrastructure damage occurs would help managers make informed decisions on the management of ecological systems and communities. In some locations, managed retreat of infrastructure may be required, both as an economic reality and to protect unique coastal ecological systems that depend on the dynamic nature of the coastal zone.

The DOI supports the development of new science to better understand impacts of storms and sea-level rise on coastal ecosystems to help managers respond and adapt to changing environmental conditions.

The DOI is taking a leadership role in evaluating how recovery and restoration projects are enhancing the ecological resilience in the area impacted by Hurricane Sandy in 2012 through the

DOI News: Hurricane Sandy Project Metrics Report: <https://www.doi.gov/hurricanesandy/news/hurricane-sandy-project-metrics-report>

Metrics are needed to determine project success at multiple levels to inform future responses and evaluate economic investments of tax dollars toward improved resilience. Knowledge gained within the DOI project footprints could have substantial transfer value to natural system applications throughout the region.

The DOI has initiated a resilience assessment process that will establish criteria for measuring success and quantifying changes in resilience resulting from project actions at multiple scales. The metrics report was developed for DOI by a metrics expert group (MEG) of physical and ecological scientists and socioeconomic experts who recommended performance metrics for measuring changes in resilience resulting from the DOI-sponsored projects. The metrics report identifies natural and artificial coastal features most affected by Hurricane Sandy along the Northeast coast—such as marshes, beaches, and estuaries—and a recommended suite of metrics that would indicate changes

in the resilience of those features. The list of performance metrics is extensive, given the diversity of coastal features and objectives, so a subset of recommended core metrics is also provided.

The DOI is also working on an effort to measure DOI Hurricane Sandy Project and Program Outcomes with the latest development of the Socioeconomic Metrics Report. This report builds on the MEG ecological metrics and incorporates metrics to address socioeconomic benefits resulting from the DOI-sponsored projects. Combined, the metrics identified by the MEG and this report will be used to evaluate the impacts of the DOI projects, individually and across larger scales.

By using the results from the ecological metrics and socioeconomic metrics reports, the DOI will be able to demonstrate how projects performed to meet community and ecological resilience goals. The ability to evaluate the effectiveness of these investments gives communities and natural resource managers tools to inform best practices, guide future enhancements, address knowledge gaps and sustain improvements in coastal resilience. The ability

Dredges working to create channels to restore tidal flow in the back bay marsh areas of the Prime Hook Refuge. Photo credit: USFWS

to measure and evaluate additional ecosystem services or benefits that can be realized through implementing the use of natural and green infrastructure approaches will further advance informed and sustainable decisions for achieving coastal resilience at local, State and National levels.

The DOI's efforts to identify ecological and socioeconomic performance metrics is of great interest across Federal, State and local governments and nongovernmental organizations. The foundational work done by the DOI has served as a foundation to build upon. For example, the Natural Infrastructure Metrics group—a working group under the guise of the Systems Approach to Geomorphic Engineering (SAGE) group—consists of a broader cross section of Federal, State, and nongovernmental organizations that are working to develop standardized metrics to measure ecosystem services and benefits realized by implementing projects. The DOI serves as a co-chair for this effort that is ultimately developing a better understanding of how these projects provide benefits on the landscape.

### Beach Restoration for People, Shorebirds and Horseshoe Crabs in Delaware Bay

The beaches along Delaware Bay are some of the most critically important stopover sites for migratory shorebirds, many of which are undergoing alarming declines. Shorebird arrival in Delaware Bay coincides with the world's largest spawning population of horseshoe crabs (*Limulus polyphemus*). For example, the red knot (*Calidris canutus*) feeds on eggs laid by nesting horseshoe crabs and depends on this food source to gain enough weight to complete the second half of the spring migration to their breeding grounds in the Arctic tundra.

Hurricane Sandy caused substantial degradation of beaches in Delaware Bay. In response, projects were mobilized quickly to completely restore five beaches in time for the spring migration of shorebirds and spawning of horseshoe crabs. About 800 tons of debris were removed while 45,500 tons of sand were placed to restore 1.5 miles of beach with an 80-foot-wide berm. This effort involved substantial partner involvement, including the American Littoral Society, Conserve Wildlife Foundation and quick permitting assistance through the New Jersey Department of Environmental Protection and U.S. Army Corps of Engineers (USACE).

Ultimately, restoring these beaches will not only benefit horseshoe crabs and migratory shorebirds, but also the people who live, work and recreate here. Benefits to people include greater protection from storm surges, improved beach areas for public recreation and the economic benefits of beach and wildlife-related ecotourism, valued at \$522 million in Cape May County, NJ, alone.

## Marsh Restoration at Prime Hook National Wildlife Refuge Provides Benefits to Ecosystems and Communities

At Prime Hook Refuge in Delaware, one of the largest coastal marsh restorations on the Atlantic Coast is underway. Hurricane Sandy magnified breaches in the dunes reducing the elevation and resulting in the rapid inundation of saltwater, which killed fresh water vegetation and increased habitat loss by converting back barrier areas that were once marsh into open water. The Refuge project is designed to restore beaches and marshes by closing shoreline breaches and constructing a marsh platform behind the beach barrier with tidal channels to restore more natural hydrologic circulation for saltmarsh species (e.g., *Spartina* spp.). Restored tidal flow will provide for sediment transport, enhance the rate of marsh development and result in a more resilient and sustainable ecosystem to the impacts of future storms and sea-level rise.

Nearly \$40 million in Hurricane Sandy resilience and recovery funding is being used to rebuild about one mile of existing dunes and barrier beach and close breaches created by the storm. This project will also restore about 4,000 acres of back-barrier tidal marsh by re-establishing natural tidal flow. More than 20 miles of primary, secondary and tertiary channels will be established, and water control structures will be removed to provide an open connection for tidal flow with the Delaware Bay.

Restored marshes within the Refuge will provide benefits to several adjacent and nearby communities such as Milton and Milford, DE, and create additional habitat for birds such as red knots (*Calidris canutus*), American oystercatchers (*Haematopus palliatus*), and piping plovers (*Charadrius melodus*). The restored marsh will also improve the communities' ability to withstand future storms and sea-level rise, improve wildlife habitat and improve beach access for the public.

## Ecosystem Restoration Projects Boost the Economy at Multiple Levels

By Heidi Koontz and Catherine Puckett (USGS), Erica Wales (DOI)

According to a study published in April, ecosystem restoration can provide a two- to three-fold return in economic activity that ripples through local, regional, and national economies. Economists from the U.S. Geological Survey (USGS), DOI, and BLM evaluated 21 DOI restoration projects to quantify methods for economic impact analyses focusing on jobs and business activity generated through money spent on ecosystem restoration activities. Two of the case studies from coastal areas are highlighted below.

See all 21 case studies:

<https://www.fort.usgs.gov/economic-impacts-restoration>

### Ni-les'tun Tidal Marsh Restoration in Oregon

Bandon Marsh Refuge, OR, was established in 1983 as a stopover estuary habitat for migrating shorebirds and waterfowl. The Refuge now has 889 acres in two units: Bandon Marsh and Ni-les'tun, both historically tidal wetlands. Ni-les'tun (named by the Coquille Tribe and pronounced NYE-les-ton, which means “People by the small fish dam”) was diked and drained in the 1800s for agricultural purposes. In the largest tidal marsh restoration in Oregon to date, the USFWS and more than two dozen public and private partners collaborated for more than a decade to restore 418 acres of tidal marshland. During the restoration, the project unearthed living sites, tools and shells dating back more than 4,000 years, providing evidence that powerful earthquakes and sands washed in by tsunamis had dramatically and repeatedly altered the landscape. The project also found

Biologists surveying fish as part of the Ni-les'tun restoration along Oregon's coast. Photo credit: Bill Bridgeland, USFWS

clues that humans occupied the area before and after those powerful earthquakes and tsunamis altered the landscape.

### Economic Impacts of Restoration

The total restoration cost was \$1.64 million (in 2011 dollars), 63% of which was spent locally. Of these costs, an average of \$98,000 annually went directly to local labor income (salaries, wages and benefits) to employee construction workers in Coos County, OR, during the implementation phase. In total, the project provided more than \$1,130,000 in labor income during the life of the project and had a local economic output of \$2,377,000 (in 2014 dollars).

### Piping Plover Nesting Habitat Management Program

In 1996, the North Cape Oil Spill adversely impacted piping plover (*Charadrius melodus*) nesting habitat, resulting in fewer chicks produced during the following nesting season. The FWS, Rhode Island, and NOAA provided funds to The Nature Conservancy (TNC) to implement management actions aimed at reducing threats to piping plovers and increasing the number of chicks produced in Rhode Island.

The FWS provided \$130,000 (in 2011 dollars) during 2007–2011 to TNC of Rhode Island to implement a nesting habitat management program for the Federally threatened piping plover,

a shorebird that nests along sandy beaches on the Atlantic Coast. The source of the funds was the Natural Resource Damage Assessment and Restoration settlement for the North Cape Oil Spill. TNC staff conducted more than 70 public education programs, monitored nesting beaches and removed several predators known to consume adults and chicks. During the 5-year project, piping plovers produced more chicks (108) than in the previous five years (80).

With an average of \$32,000 per year to the program for three full-time seasonal positions in Little Compton, RI, each summer between 2007 and 2011, the project supported more than \$41,000 per year in labor income in the local community. This case study illustrates that even modest restoration projects can provide benefits to the environment and local economy.

### Economic Values

**Economic impacts** are reported as job-years, a measure of the total number of annualized full- and part-time jobs accumulated during the duration of the restoration project.

**Labor income** is a measure of the wages and salaries earned through the jobs supported by project expenditures.

**Value added** is a measure of the contribution to Gross Domestic Product (GDP).

**Economic output** is a measure of the total value of the production of goods and services supported by project expenditures.

## Special Feature—The Power of Partnerships

### "Ships Of Opportunity Benefit Many Missions"

By Erica Wales (DOI)

Deepwater corals. Shipwrecks. The Arctic. Submarine-landslides. Deep-sea canyons. The Law of the Sea. What do all of these have in common? Partnerships.

The DOI mission extends from science to cultural heritage, making the DOI a department of true explorers. Ocean exploration can be wildly expensive, costing up to \$50,000 per day for ship time, and requires a lot of equipment, maintenance and time; however, if we do not explore the nooks and crannies of deep ocean canyons—or study how our world interacts in a physical, biological and chemical sense—and do not push ourselves to explore the vast unknowns in the depths of the ocean, we are left with too many unanswered questions that will help us understand our world and how we are affecting it.

How does river runoff affect Arctic waters and what are the implications? *See related story, page 20.*

Who has sovereign rights over this part of the continental shelf and can use the resources found within it?

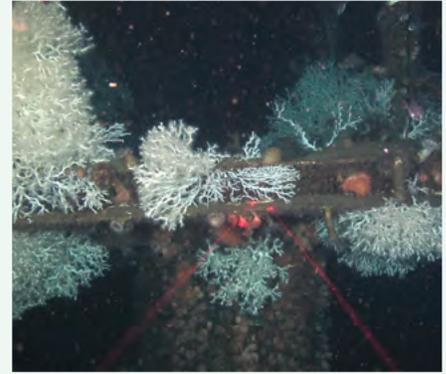

Could landslides in a submarine canyon pose a hazard to people on the coast?

Partnerships can help answer these questions. By sharing resources, talent, equipment and facilities among agencies, organizations and even countries, we can learn more about the 70% of Earth that lies beyond our shores. Here are a few examples of partnerships that are taking us forward to better understand how to wisely protect and use our valuable ocean resources.

### Exploring the Deep Sea

Because deep-sea habitats are mostly unknown and pose many questions, the expense, remoteness and exploratory nature of learning more about deep-sea environments seems to create partnerships. The Atlantic Canyons: Pathways to the Abyss (<http://www.boem.gov/Atlantic-Canyons-Pathways-to-the-Abyss/>), is a multiyear collaboration between 54 researchers. Beginning in 2011, this partnership explored two offshore canyons in the Mid-Atlantic. The research team identified more than 125 fish species; documented historical shipwrecks; made discoveries of species unknown to occupy the canyons; recorded data on ocean currents, temperatures, salinity and ocean chemistry; mapped the canyons; and estimated the ages of deep-sea corals.

In 2012, the *Lophelia II* research cruise was the first study dedicated to understanding deep-sea coral communities on actively producing oil and gas platforms. During the research cruise in the Gulf of Mexico, scientists used a remotely operated vehicle (ROV) to visit four platforms and one subsea installation to survey for coral coverage, take coral samples for genetic research, take water samples for environmental data and produce photos and videos. The researchers also made a record-breaking discovery, finding that *Lophelia* (a type of coral) grows at a depth of 799 meters (the previous known depth was 630 meters). Both expeditions were truly interdisciplinary and collaborative, with teams that included oceanographers, ecologists, geneticists, geophysicists, biological technicians, microbiologists, web designers, communication/

Lophelia colonies, flytrap anemones and squat lobsters on a test piling of a subsea well installation. Photo credit: *Lophelia II* 2012 Expedition, NOAA–OER/BOEM

Lophelia on the side of a subsea installation. Photo credit: *Lophelia II* 2012 Expedition, NOAA–OER/BOEM

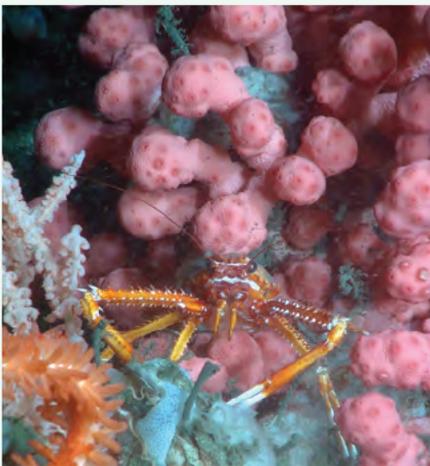

In 2014, ROV Deep Discoverer came upon a series of caves inhabited by octopuses, which the team dubbed the "Octopus Grottoes." The octopods inhabiting every nook and cranny certainly made this series of caves interesting for geologists, biologists, and non-scientists alike. Behind the scenes, this find also led to a string of emails and chat room discussions of various hypotheses for the formation of the caves. Photo credit: NOAA Okeanos Explorer Program, Our Deepwater Backyard: Exploring Atlantic Canyons and Seamounts

outreach specialists and data managers, and included Federal agency partners, academia/research institutions and the private sector. For their commitment and effort in partnering, both teams were awarded the National Oceanographic Partnership Program (NOPP) Excellence in Partnering Award (Atlantic Canyons in 2015 and *Lophelia II* in 2012).

"We can achieve more working together than alone," said Dr. Rodney Cluck, co-chair of the NOPP Committee speaking on the value added from partnerships. "Studies such as the Atlantic Canyons project take a collaborative team to bring together the various scientific perspectives that build a successful partnership. NOPP projects are generally efforts that are too big for any one agency to handle alone and

An octopus, sea star and bivalves call the deep, steep canyon walls home. Photo credit: Deepwater Canyons 2013: Pathways to the Abyss, NOAA-OER/BOEM/USGS

provide cutting edge research to inform decisions."

The deep seas of the U.S. East Coast are some of the least understood offshore regions of the U.S. Atlantic exclusive economic zone, making it a high research priority. To help fill the gaps in our understanding, the NOAA, USGS, and BOEM, along with nonfederal partners, are embarking on a 5-year campaign to investigate deep-sea environments off the U.S. East Coast. Multiple expeditions are planning to (1) provide guidance on the wise use of living marine and energy resources, (2) define the connectivity of vulnerable ecological communities and (3) improve tsunami prediction and hazards capabilities relevant for assessing coastal risk. Data and information gathered through this campaign will provide a foundation of publicly accessible data and information products that will be used to help guide science and management priorities off of the mid and southeastern United States.

Learn more about *Lophelia II*:  
<http://oceanexplorer.noaa.gov/explorations/12lophelia/welcome.html>

## Science for the Arctic

From the deep sea to the top of the seas, the Marine Arctic Ecosystem Study (MARES) seeks to understand complex physical, biological, chemical and social interactions and how those interactions of the Mackenzie River plume affect the Beaufort Sea. This five-year study (2014–2019) was started by the BOEM and NOPP and involves partners ranging from the Federal level to private companies, as well as academia, tribal organizations and nonprofits. The partnership allows for the use of a variety of monitoring and sampling equipment, including ships, drones, satellites, ice and snow sensors, acoustic sensors and models. Three marine mammal species will also be tagged in order to understand how environmental conditions may affect their presence. The research will help inform research into environmental protection, climate change, food security and biodiversity, as well as ensuring the protection of areas known for high biological productivity and subsistence use.

## The Law of the Sea

Key partnerships also play a role in defining the limits of U.S. sovereign rights. The Law of the Sea allows for States to have sovereign rights for exploring the continental shelf and using natural resources within 200 nautical miles from baseline—and also allows for a shelf to be extended up to 350 nautical miles in some situations. Not only is there a wealth of biological diversity and

Capt. Steven Wachowski (U.S. Air Force) launching the unmanned aerial vehicle from the Louis. Photo credit: Debbie Hutchinson

The autonomous underwater vehicle (jointly developed by Defense Research and Development Canada and International Submarine Engineering, Ltd) being deployed from the Louis as the Healy is seen in the background. Photo credit: Debbie Hutchinson

unexplored habitats on the shelves, but there is also the potential for offshore resources, such as oil, gas and minerals. In order to determine the limits to this extended continental shelf, bathymetric data needs to be collected and analyzed.

Enter the U.S. Extended Continental Shelf (ECS) Task Force, made up of 14 government agencies and headed by the Department of State (DOS), USGS and NOAA. Whereas DOS is in charge of the diplomatic and legal aspects, the USGS and NOAA are in charge of collecting and analyzing bathymetric data. Missions to the Arctic, Atlantic, Bering Sea, Gulf of Alaska, Gulf of Mexico and Pacific have been ongoing since 2003 and are sometimes an international affair. From 2007–2011, the U.S. Coast Guard Cutter Healy and the Canadian Coast Guard Ship Louis S. St-Laurent paired up to collect bathymetric and seismic data in the Arctic Ocean, adding about 15,000 kilometers (km) of seismic data and thousands of kilometers of bathymetric data. In 2011, for the first time, an autonomous underwater vehicle (AUV) was deployed in the ice and recorded bathymetric data, and an unmanned aerial vehicle (UAV) was used to survey ice conditions and look for marine mammals.

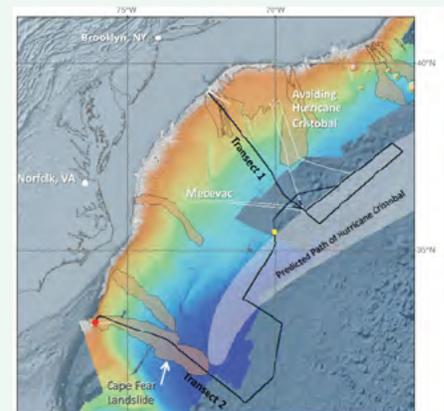

“The ECS project mapping the seafloor of the Arctic with Canada was a win-win situation. It saved time to have two ice breakers working together rather than much slower data acquisition with only one icebreaker; it meant data could be collected in areas where one icebreaker might not go because of the risk of getting stuck in ice; it saved money because sharing data meant neither country had to re-survey an area; it minimized the impact on the native peoples by collecting data only once; and it strengthened the

science because it enabled a whole view of the basin, rather than just having data from the Canadian side or the American side,” said Debbie Hutchinson, USGS scientist.

In total, the ECS project has conducted 31 cruises in 10 regions, logged more than 2.5 years of sea time and mapped more than 2.5 million square kilometers of the ocean floor. The U.S. ECS could add up to 1 million square kilometers (that is twice the size of California or half the size of the Louisiana Purchase) under U.S. control.

## Understanding Hazards

While some partnerships involve a common goal, other partnerships involve the same equipment but for very different goals. In August/September 2014, the ECS Task Force partnered with scientists studying submarine landslides (<http://soundwaves.usgs.gov/2014/12/>). Since both projects required the use of seismic equipment and were focused on mapping the Atlantic margin, the two teams paired up to share ship time and equipment. The ECS project was focused on surveying tracks parallel to the margin in order to delineate the extended continental

Map of the surveyed Atlantic margin for submarine hazards. Transect 1 and 2 were part of the submarine landslide study. The black survey lines parallel to the margin were for use by the ECS Task Force. Image credit: USGS

shelf. The submarine landslide team was focused on surveying tracks perpendicular to the margin in order to assess the potential for tsunamis on the U.S. East Coast. This was the first time a landslide on the Atlantic margin was mapped and imaged from the origin on the continental slope, where the rupture occurs, to where it runs out on the continental rise or abyssal plain. This information helps in understanding why submarine landslides happen and in evaluating the risk of tsunamis. The partnership obtained more than 2,700 km of seismic data and more than 4,000 km of bathymetric and backscatter data. By combining efforts, the two teams were able to accomplish both goals at the same time and helped us better understand the subsurface of the Atlantic margin.

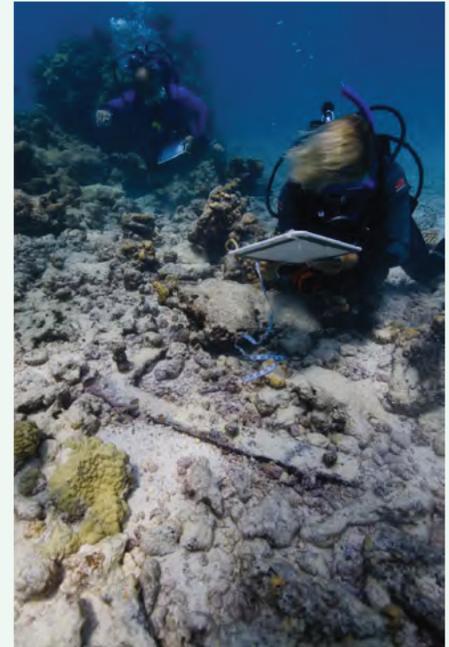

### Underwater Cultural Heritage

In 2012, the NOAA, NPS, Flinders University and Open Boat Films explored maritime heritage in the Pacific. During the course of 21 days, a six-person maritime archeology team partnered with other teams to explore Papahānaumokuākea Marine National Monument. Made up of marine archeologists, a biologist and a science filmmaker, the marine archeology team surveyed shipwrecks, documented new artifacts and sunken aircraft and used remote sensing equipment to discover more than 35 other potential maritime heritage sites (to be explored in the future). The shipwrecks included the Two Brothers, a Nantucket whaleship sunk at French Frigate Shoals in 1823. While on the shipwreck site, the team documented new artifacts and continued collecting documentary film footage, which will help in confirming the ship's identity. The team also

documented a sunken WWII aircraft while at Midway Atoll, which helps to further tell the story of the war in the Pacific theater. The interdisciplinary team helped unlock our maritime history and answer questions about our past.

Partnerships play a key role in ocean exploration. Interdisciplinary teams help researchers think outside of their own expertise and encourages a holistic approach to research. Sharing ship time and equipment helps avoid duplication, reduces impact on the environment, and allows for one expedition to accomplish many goals. Cooperation between the Federal government, academic and research institutions, private companies and even local and international partners encourages dialogue among different levels and ensures openness and transparency. Without partnerships that help us understand the world around us, knowing where to site energy production to ensure maximum production while conserving biological and historical resources or helping predict natural disasters

becomes much more challenging. Encouraging these partnerships ensures we can answer the many questions about the world around us and ensures we are ready to handle future challenges that arise.

## Ocean & Coastal Management Cites USGS: Most Credible Science Research

By Erica Wales (DOI)

In a recent report, the USGS took first place for science research credibility among ocean resource managers and interest group leaders. The study authors asked several hundred people to rank the research reputations of 12 government agencies and organization types on “marine resource management and environmental policy issues.”

In recent years there have been calls among decision makers, interest groups, citizens and scientists alike for the use of the “best available science” when making environmental policy and managing natural resources. The article, published in the March issue of *Ocean & Coastal Management*, shares the analysis of 570 surveys

returned by scientists, managers and interest group leaders to examine the attitudes and orientations of marine scientists, resource managers and interest group representatives concerning factors that may affect scientific credibility. The study found that the top three indicators of credible scientists were “quality of the methodology used in their scientific research,” “scientific data and information they generate in their research,” and “experience and knowledge of the management of marine resources.”

The USGS has a long history of high-quality research methods and data sharing, combined with experienced and knowledgeable ocean research staff.

## Up to 70 Percent of the Northeast U.S. Coast May Adapt to Rising Seas

### New Model Shows that Drowning is Not the Only Response for Low-Lying Coasts

By Erika Lentz and Heather Dewar (USGS)

Much of the coast from Maine to Virginia is more likely to change than to simply drown in response to rising seas during the next 70 years or so, according to a new study led by the USGS. The study is based on a new computer model that captures the potential of the Northeast U.S. Coast to change, driven by geological and biological forces, in ways that will reshape coastal landscapes.

In the paper published in *Nature Climate Change*, the researchers reported that 70 percent of the Northeast U.S. Atlantic Coast is made up of ecosystems that have the capacity to change during the next several decades in response to rising seas. For example, barrier islands may migrate inland, build dunes, change shape or be split by new inlets as tides, winds, waves and currents sculpt their sands. Marshes trap sediment and break down decaying plants into new soil, which may elevate them sufficiently in some areas to keep pace with sea-level rise.

Although most sea-level rise models that cover large areas show low-lying coastal land converting to open water in coming decades, many of these inundation models overpredict the land likely to submerge. The USGS model, developed in collaboration

with Columbia University, produces a more nuanced picture of sea-level rise as a mosaic of dry land, wetlands and open seas, rather than as a uniform response across the landscape.

The USGS model is the first to factor in natural forces and make detailed predictions from the 2020s through the 2080s over a large coastal area, some 38,000 square kilometers (about 9.4 million acres). It is an advance over most regional models, which project drowning as the only outcome as the oceans rise. These are often referred to as “bathtub models” and assume the coast is progressively submerged as sea levels rise.

The new model includes the potential for dynamic coastal change and shows where in response to future sea levels coastal lands fall on a continuum between dry land and open water.

“Geologists have always known that the coast has some potential for give and take,” said lead author Erika Lentz, a research geologist at the USGS Coastal and Marine Science Center in Woods Hole, MA. “But the standard bathtub models of sea level rise don’t reflect that. This approach couples what we do know about these systems with what we still need to learn—how different ecosystems may respond to different sea-level rise scenarios—to estimate the odds that an area will persist or change instead of simply drown. Our model results suggest that even natural changes may pose problems,” Lentz said. “For example, the likelihood that barrier islands will change could impact the infrastructure and economies of coastal communities, and the barrier islands or marshes may not protect coastal communities in the same way they do today.”

In fact, the outcome is uncertain for the Northeast U.S. Coast’s low-lying developed coastlines, where seawalls, buildings and other immovable structures thwart some natural processes. The model found the region’s developed coastal lands lying 1 meter (about 3 1/2 feet) or less above sea level will likely face a tipping point by the 2030s, when humans’ decisions about how and whether or not to protect each area will determine if it survives or drowns.

## BOEM Proposes Rule to Aid Coastal Restoration Projects

By Marjorie Weisskohl (BOEM) and Randy Bowman (DOI)

On March 21, the DOI BOEM proposed regulations providing additional clarity for an important but not widely known program that governs the use of nonenergy OCS resources such as sand, gravel and shell. Under the Outer Continental Shelf Lands Act, the DOI, through the BOEM, proposed a rule that codifies new and existing procedures for using OCS sand, gravel and shell resources for shore protection, beach restoration or coastal wetlands restoration projects undertaken by Federal, State and local governments. It also addresses the use of OCS resources for construction projects authorized or funded by the Federal government. The rule does not apply to competitive leasing of minerals, such as sand for private or commercial use or commodity minerals such as gold. Comments were due within 60 days after publication of the proposed regulations in the Federal Register on March 22. The regulations would replace BOEM guidelines that now govern the process.

The BOEM’s Marine Minerals Program manages sand and gravel activities, which are critical for the long-term success and cost-effectiveness of many beach nourishment and coastal habitat restoration projects along the Gulf of Mexico and Atlantic Coasts. To date, the BOEM has provided OCS sand resources for projects in New Jersey, Maryland, Virginia, North Carolina, South Carolina, Florida and Louisiana, conveying more than 112 million cubic yards of material that has restored more than 269 miles of coastline. This program has extensive partnerships with state geological surveys and environmental agencies,

Beach renourishment activities at Wallops Island, VA, part of the barrier islands that stretch along the eastern seaboard of the United States. Photo credit: Patrick Bloodgood, USACE

the USACE, National Aeronautics and Space Administration (NASA), Department of Defense, NOAA’s National Marine Fisheries Service and DOI Bureaus including the NPS, USFWS and USGS.

For more information on the proposed rule, see: <http://www.boem.gov/press03212016/>

Information about the BOEM’s Marine Minerals Program is available at: <http://www.boem.gov/Marine-Minerals-Program/>

### Restoration of the Duval County Shoreline

On April 13, the BOEM, city of Jacksonville, FL, and U.S. Army Corps of Engineers signed an agreement under the existing guidelines authorizing Jacksonville and the Corps to dredge nearly 1.4 million cubic yards of sand from Federal waters to restore a 10-mile stretch of coast between the St. Johns River entrance and the Duval County/St. Johns County boundary along the Atlantic Ocean. Dredging will likely begin this summer.

For more information, visit: <http://www.boem.gov/press04132016/>

# The Arctic Distributed Biological Observatory Network

## Linking Physics and Biology in the Changing Arctic

By Dee Williams (BOEM)

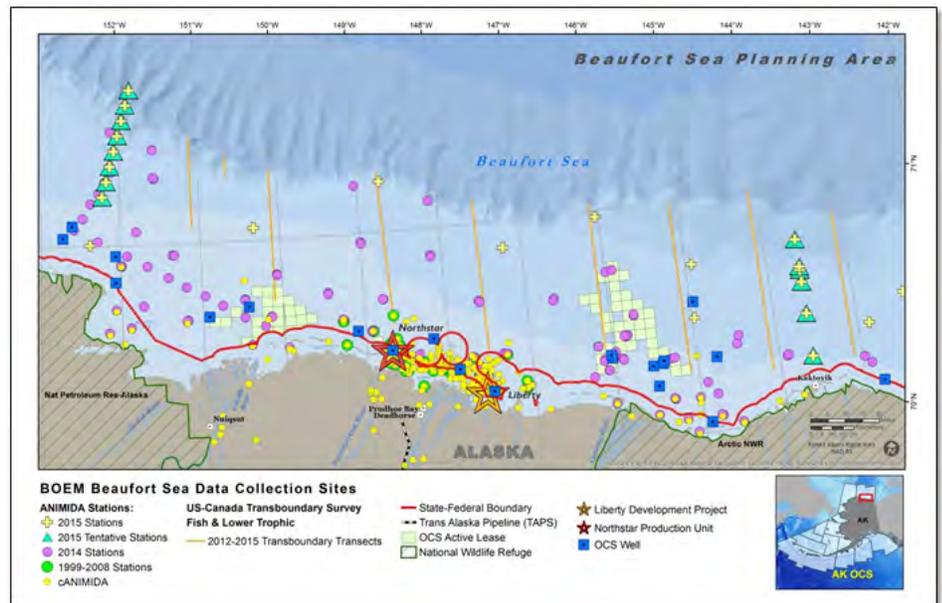

In May 2009, the dramatic seasonal retreats and thinning of sea ice, record-setting seawater temperatures and multiple observations of biological changes in the Pacific Arctic sector precipitated an international workshop to evaluate ecosystem response to climate forcing. A team of international scientists conceived the Distributed Biological Observatory (DBO) network to monitor and better understand the dramatic changes observed in the biological and physical dynamics of the Arctic marine ecosystem (especially in sea ice and benthic habitat). The DBO was originally envisioned as a network of arrays strategically positioned to detect change along latitudinal gradients extending from the northern Bering Sea to the Chukchi Sea Barrow Arc in locations known for high biodiversity, high biological productivity and high rates of change.

The PAG coordinated the pilot phase (2010–2014) of sampling the DBO network, which has helped leverage funding to support annual sampling of DBO lines through an international network of ship operations involving Chinese, Japanese, Korean, Russian and U.S. collaborator programs. In addition, the Interagency Arctic Research Policy Committee (IARPC) DBO collaboration team actively promotes analysis of collected data as a means to improve conservation, protection and management of Arctic coastal and ocean resources.

Many U.S. agencies, including the BOEM, have endorsed the DBO concept and have provided past and ongoing financial support. The

Locations of the Distributed Biological Observatories as of March 2016. Image credit: NOAA

Locations and types of BOEM sea data collection sites. Image credit: Carla Langley, BOEM

BOEM’s Environmental Studies Program has partnered with the NOAA on several ecosystem studies that sample DBO lines, including:

the Chukchi Acoustic, Oceanographic, and Zooplankton study, Arctic Whale Ecology study (ARCWEST), Hanna Shoal Ecosystem

study, COMIDA Chemistry and Benthos study, Aerial Surveys of Arctic Marine Mammals (ASAMM) and the Arctic Marine Biodiversity Observation Network (AMBON). The projects are outlined in the Alaska Annual Studies Plan for fiscal year 2016: <http://www.boem.gov/2016-Alaska-Studies-Plan/>

In addition to the strong BOEM-NOAA partnership, many other U.S. interagency and academic partners, as well as international research teams, support this coordinated ecosystem monitoring effort. Information and data are shared among partners: <http://dbo.eol.ucar.edu/> and <http://neptune.gsfc.nasa.gov/csb/index.php?section=270>

The DBO concept has gained such momentum that the program recently added three new detection arrays in the Beaufort Sea. Two arrays in the U.S. Beaufort Sea were strategically chosen, based in part on previous sampling through BOEM's long-term monitoring program, Arctic Nearshore Impact Monitoring in the Development Area (ANIMIDA).

BOEM's Environmental Studies Program has also recently fostered transboundary fishery and lower trophic data collection in the Canadian Beaufort.

## News about Safety and Environmental Enforcement Technology

By Tiffany Gray (BSEE)

### Advances in Arctic Tracking Technology

The BSEE is testing Geo-Referencing Identification Satellite (GRIDSAT) tag technology at the U.S. Navy's Ice Camp Sargo, a temporary station on top of a floating ice sheet in the Arctic as part of Ice Exercise (ICEX) 2016. The extreme conditions in the Arctic, especially the presence of sea ice, create unique challenges to the identification, tracking and response to an oil spill, should one occur. If a spill were to occur in the Arctic, GRIDSAT tags could be used to track oil trapped under or encapsulated in Arctic sea ice for up to nine months. Oil Spill Preparedness Engineers and Specialists from BSEE are part of a diverse and multinational team with more than 200 participants from more than 35 organizations coming together to support more than 25 test objectives at ICEX 2016.

### Exercises for Oil Spill Preparedness

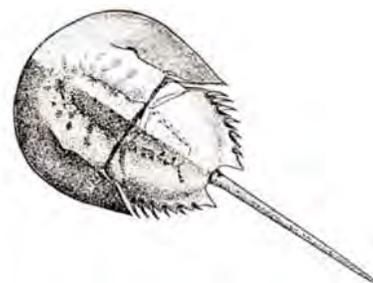

In addition to ongoing skimmer testing and evaluations of absorptive material at the Ohmsett facility, the BSEE recently helped oversee and execute a series of test in situ burns in the newly opened burn tank at the Joint Maritime Test Detachment in Mobile, AL, to evaluate burns and train teams to respond to open water oil spills. An in situ burn is the intentional, controlled burning of oil, a strategy that was used extensively during the response to the Deepwater Horizon tragedy. All these tests are aimed at improving the ability of the government and industries to respond quickly and effectively to an oil spill.

The BSEE is in the process of testing a GRIDSAT tag project at the U.S. Navy's Ice Camp Sargo, a temporary station on top of a floating ice sheet in the Arctic, as part of ICEX 2016. In the event of an oil spill in the Arctic, a GRIDSAT radio/global positioning system marking device can be left on an ice floe to track the movement of the floe and entrapped oil for up to nine months. Photo credit: Tyler Thompson, Mass Communication Specialist 2nd Class, U.S. Navy

The BSEE recently contributed to the renovation and refurbishment of the Joint Maritime Test Detachment in Mobile, AL. After sitting dormant for 17 years, the newly reopened facility provides a place where equipment manufacturers, regulators and researchers can perform in situ burns to test containment boom, ignition devices and methods and monitoring equipment. First responders will also train at the facility on how to safely conduct in situ burns. Photo credit: U.S. Coast Guard

## Happy 113th Birthday, National Wildlife Refuge System!

President Theodore Roosevelt created the first Refuge on March 14, 1903, at Pelican Island, FL, to protect brown pelicans (*Pelecanus occidentalis*) and other birds from extinction through plume hunting. After 113 years, the Refuge System now includes more than 560 Refuges and 38 wetland management districts covering more than 150 million acres plus more than 418 million acres of marine national monuments.

This is Paul Kroegel, an immigrant who arrived in Sebastian, FL, in 1881 to begin a homestead on the west bank of the Indian River Lagoon. Kroegel didn't know it yet, but he would soon become the first person interested in protecting the birds on Pelican Island. Kroegel enjoyed looking out at the island and watching all of the birds but knew they would not last long if their slaughter was allowed to continue.

Without State or Federal laws to protect the birds, Kroegel decided to take matters into his own hands. He began

Paul Kroegel, warden of Pelican Island.

to sail out to Pelican Island with gun in hand to stand guard over the birds, protecting them from hunters.

Based on Kroegel's efforts, the American Ornithologist's Union and Florida Audubon Society led a successful campaign in 1901 to pass legislation in Florida to protect nongame birds.

The Florida Audubon Society then hired Kroegel and three others to be wardens of the Island to protect the birds from market hunters.

---

*Sea-Level Response continued from page 19*

“A 2012 USGS study identified the densely populated region from Cape Hatteras to Boston, MA, as a hot spot where seas are rising faster than the global average, so land managers urgently need to understand how their coastal landscape may change,” said John Haines, coordinator of the USGS Coastal and Marine Geology Program.

“The model allows us to identify vulnerable areas, and that information can be very valuable to land managers as they consider whether to protect, relocate or let go of certain

assets,” said Haines. “Even when the results are uncertain, it’s useful to know there’s a 50 percent chance that an important habitat or infrastructure project may be lost in a few decades.”

“By building in our understanding of the sea level rise response of the coastal landscape, we’re providing a more realistic picture of coastal change in the Northeastern U.S. over the next several decades,” Lentz said.

The researchers’ next step will be to group the basketball-court-sized parcels into larger areas, such as major coastal cities, Refuges and national

seashores, and assess the vulnerability of these areas to future change and drowning. This information may assist decision makers as they develop management priorities to address longer-term coastal challenges.

## A Refuge Story

### The Texas Refuge and Whooping Cranes

By Matthew Butler and Wade Harrell (USFWS)

The whooping crane (*Grus americana*) population has increased in recent years. All whooping cranes alive today, both wild and captive, are descendants of the last 15 cranes that wintered at the Aransas Refuge in 1941. The only wild crane flock that exists nests at Wood Buffalo National Park in northern Canada and migrates 2,500 miles to winter on the Texas coast at and near the Aransas Refuge.

"We have a growing population and excellent habitat conditions this year on the wintering grounds," said national whooping crane recovery coordinator, Wade Harrell.

The USFWS recently completed aerial surveys centered on the Aransas Refuge to estimate the whooping crane population for winter 2015–16.

Preliminary analyses indicate 329 whooping cranes (38 juveniles, 122 adult pairs) inhabited the primary survey area. Recruitment of juveniles into the winter flock was 13 chicks per

100 adults, which is comparable to long-term average recruitment.

A continued upward trend in whooping crane abundance during the last five years was observed, which is consistent with the long-term trend of about 4% growth per year. The 78-year trend in whooping crane abundance shows an increase with occasional, periodic declines happening every 10 years. "We hope this upward trend continues," said USFWS biometrician, Matthew Butler, "it is exciting to watch a species recover from the brink of extinction. Aransas NWR, as well as other protected coastal areas, provide important habitat that is a critical part of our recovery strategy."

## Tribal LiDAR Training for Hurricane Sandy Impacted Tribes

### USGS Shares Coastal Mapping Expertise

By Glenn Holcomb and Monique Fordham (USGS)

USGS research uses the latest available technologies and software to collect data and information about our Nation's natural resources and environment. Not only does the USGS provide scientific results and interpretations of these data to the public, it also has a responsibility to share the knowledge and methods used in collecting, processing and interpreting this information. This duty extends to Federally recognized Indian Tribes, to whom the USGS and other Federal bureaus and agencies have a trust responsibility.

On March 9–10, 2016, the USGS held a tribal training workshop at the USGS Woods Hole Coastal and Marine Science Center in Massachusetts. The training was designed and coordinated by USGS Northeast Region Tribal Liaison, Glenn Holcomb, to assist Tribes, particularly those impacted by Hurricane Sandy, in the use of light and detection ranging (LiDAR) data. Through support provided by the USGS Office of Tribal Relations, LiDAR experts John Young, Jeff Danielson and Dean Gesch presented the material.

In August 2013, as a part of the overall Hurricane Sandy response, a multidisciplinary team from the USGS visited four Native American Tribes to assess impacts from Hurricane Sandy and gather information about research needs related to hazards and future storms and climate change. The team met with the Wampanoag Tribe of Gay Head (Aquinnah) (Martha's Vineyard, MA), the Mashpee Wampanoag Tribe (Mashpee, MA), the Narragansett Indian Tribe (Charlestown, RI), and the Shinnecock Indian Nation (Southampton, NY). Each site visit included assessment and discussion of USGS capabilities, USGS efforts related to Hurricane Sandy recovery and

mitigation and general natural resource science needs of the Tribes.

Based on the Tribes research needs, up-to-date LiDAR data were identified as an invaluable tool for assessing forest damage, and assessing baseline conditions to understand vulnerability to storm surge, flooding and potential coastal change from future large storm events. A substantial number of LiDAR datasets were collected during flights that covered several areas throughout the impacted states during 2013 and 2014, which included tribal lands. The USGS Office of Tribal Relations, led by USGS National Tribal Liaison, Monique Fordham, wanted to ensure that each of the impacted Tribes were not only provided their LiDAR datasets but also received the training on how to use them in managing their respective tribal natural resources. The Office of Tribal Relations provided funding to pull together a team of USGS LiDAR experts to develop the training curriculum, process the LiDAR data and provide it to the Tribes during the training.

The training was crafted specifically to give an in-depth look at what LiDAR is, how it is collected, point clouds, LiDAR sensor priorities, common data products and LiDAR applications. Exercises helped tribal participants identify where to find and download LiDAR data; how to use LiDAR data viewers and processes for importing, viewing and manipulating LiDAR data in ArcGIS, and demonstrated how to use software for elevation analysis. The instructors demonstrated topobathy (combined topography and bathymetry) LiDAR models; research on classifying wetland extent, looking beyond bare earth at vegetation, and change detection were also provided. Each of the four Tribes directly impacted by Hurricane Sandy were given their individual LiDAR datasets to work from during the class. The USGS staff provided hands-on assistance to the training participants.

For additional information about this training, contact Glenn Holcomb ([gholcomb@usgs.gov](mailto:gholcomb@usgs.gov)).

### What is LiDAR?

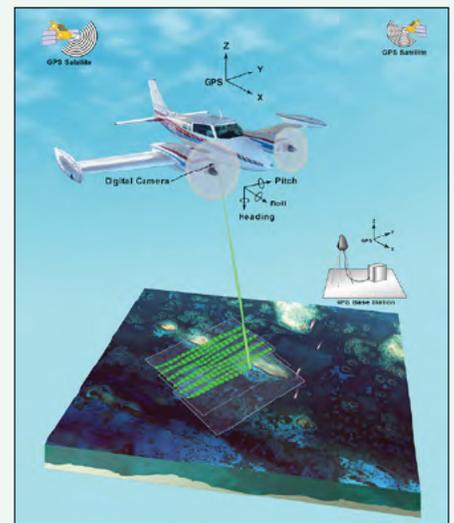

LiDAR is an active remote-sensing technique that is similar to radar but uses laser light pulses instead. LiDAR mapping is an accepted method to generate precise and directly georeferenced spatial information about the characteristics of the Earth. Recent technological advancements in LiDAR mapping systems allow scientists and mapping professionals to examine natural and built environments across a wide range of scales with greater accuracy, precision and flexibility. LiDAR has become an established method for collecting very dense and accurate elevation data across landscapes, shallow-water areas and project sites. LiDAR is typically “flown” or collected from planes where it can rapidly collect points over large areas. LiDAR is also collected from ground-based stationary and mobile platforms. These collection techniques are popular within the surveying and engineering communities because they are capable of producing extremely high accuracies and point densities, thus permitting the development of precise, realistic, three-dimensional representations of railroads, roadways, bridges, buildings, breakwaters and other shoreline structures.

LiDAR elevation data have several advantages over other types of data

because they are high resolution and can detect land surface in forested areas.

Some uses for LiDAR data include:

- Hydrology (flood forecasting, watersheds, coastal change, sea-level rise)
- Topographic analysis (elevation, slope aspect, landform)
- Forestry (canopy heights and density, structure, useful for timber harvesting)
- Geology (fault lines, outcrops, sinkholes)
- Archaeology (site mapping, discovery)
- Solar potential mapping

Airborne LiDAR is collected from a plane using a scanning pattern of light pulses. Image credit: Betsy Boynton, USGS

## USCRTF Watershed Indicators—Evaluating Success of Watershed Partnerships

By Cheryl Fossani (DOI)

In 2009, the U.S. Coral Reef Task Force (USCRTF) developed a Watershed Partnership Initiative (WPI) to focus the capabilities and capacities of the USCRTF agencies and the U.S. coral reef jurisdictions to reduce land-based sources of pollution (LBSP) entering into coastal coral reef areas. The USCRTF is currently implementing this partnership approach to watershed management in three watersheds: Guánica Bay/Rio Loco in southwest Puerto Rico (established 2009), Ka'anapali in west Maui, Hawai'i (established 2010) and Faga'alu in American Samoa (established 2012).

This initiative is intended to enhance coordination, partnerships and contributions of agency resources and expertise to implement geographically specific and integrated activities to reduce LBSP entering into coral reef ecosystems. The WPI also aims to promote consistent and strengthened approaches and enforcement of laws and authorities intended to address LBSP on near-shore coral reefs.

In 2013, a subcommittee of the USCRTF Watershed Working Group began to develop an approach to help watershed managers assess success within the three USCRTF WPI sites with recommended metrics and indicators. To date, the subcommittee has developed two products, which were adopted during the 35th Meeting of the USCRTF in February 2016.

The first is a *Programmatic Checklist* designed for watershed coordinators to assess the status of the institutional and stakeholder support for watershed partnership sites. It also provides guidance to help determine whether or

Overlooking the Faga'alu watershed in American Samoa. Photo credit: Alex Messina

not agency resources and support are adequate for the successful implementation of a “ridge-to-reef” watershed management plan.

The second document is designed to assist coastal managers, coral reef managers and watershed coordinators faced with modest budgets and limited technical expertise determine the efficacy and evaluate the success of management efforts to reduce LBSP. The *Priority Ecosystem Indicators* includes a suite of ecological measurements and indicators that are key to successful watershed-specific monitoring plans.

Although these products were drafted for use by the USCRTF WPI, they are intended to be applicable to any watershed to improve ecosystem health by reducing threats that affect downstream coral reefs.

For more information and a copy of these management tools, please visit: <http://www.coralreef.gov/meeting35/welcome.html>

Illustration credit: Cole Goco

### Highlighting Science and Monitoring to Inform Management in the Faga'alu Watershed

Land-based sources of pollution are considered a substantial threat to coral reef ecosystems; however, there has been limited research that connects watershed management actions to downstream impacts in coral reef areas.

In the Faga'alu watershed, American Samoa members of the USCRTF have been working with academia and local partners to gather baseline information, develop survey methods and identify key findings to improve the management of the watershed and protect the coral reefs in Faga'alu Bay. A recent NOAA report describes a ridge-to-reef baseline assessment of the Faga'alu watershed. It also outlines recommendations to continue monitoring the watershed to evaluate the effectiveness of management actions taken to reduce land-based sources of pollution to the coral reefs in Faga'alu Bay. The data collected during the baseline assessment and recommended monitoring efforts align with the information presented in the Priority Ecosystem Indicators document recently adopted by the USCRTF.

Additionally, in the Faga'alu watershed, the USGS collected visual data of the reefs to develop a digital data series. This data series can be used to help support science and inform the management of the Faga'alu watershed.

For more information on the baseline assessment, please visit: <http://www.coris.noaa.gov/activities/fagaaluWatershed/>

Access the digital data series: <https://www.sciencebase.gov/catalog/item/5684747ce4b0a04ef49335c6> and <https://www.sciencebase.gov/catalog/item/56422b6fe4b0831b7d62e7da>

## Corals in the Capital! News from the U.S. Coral Reef Task Force

By Cheryl Fossani (DOI)

Amidst an icy February, the USCRTF held its 35th bi-annual meeting in Washington, D.C. This meeting brought together experts in science and in policy to discuss diverse issues threatening coral reef health. The USCRTF co-chairs, Lori Faeth, DOI's Deputy Assistant Secretary for Policy and International Affairs, and Eileen Sobeck, Assistant Administrator for NOAA National Marine Fisheries Service, provided remarks along with Governor Moliga, the Governor from American Samoa and the newest member of the USCRTF family, and Governor Torres, the Governor from the Commonwealth of the Northern Mariana Islands (CNMI).

This three-day meeting was jam packed with numerous working group meetings, presentations and public events. During the public business meeting, several of the USCRTF's interagency working groups provided updates on ongoing projects. The Injury, Response and Mitigation working group provided an update on the much anticipated *Handbook on Coral Reef Impacts: Avoidance, Minimization, Compensatory Mitigation, and Restoration*. Although not regulatory in nature, the handbook will provide guidance for State, jurisdiction, and regional coastal managers handling a coral reef injury event and/or events needing coral reef mitigation. The handbook includes commonly used mitigation and restoration options and practices with case studies and lessons learned. This handbook is currently in review and is scheduled for release during the fall of 2016.

The Watershed Partnership Initiative working group presented two recently developed watershed management tools to the members of the USCRTF. The *Programmatic Checklist* and the

A time series set of images documenting coral bleaching occurring in the coral reefs of American Samoa. Photo credits: Caitlyn Seaview and the NOAA Coral Reef Watch Program

*Priority Ecosystem Indicators* are tools for watershed coordinators to assess the success of management techniques implemented to reduce land-based sources of pollution impacting coral reef ecosystems downstream. See *related story, page 25*.

These tools adopted by the USCRTF and are available at: <http://www.coral-reef.gov/meeting35/welcome.html>

Throughout all the discussions and presentations that occurred during the week of the USCRTF meeting, one theme that carried through was the importance of climate change and the future of coral reefs. Dr. Mark Eakin (NOAA) gave a presentation to the USCRTF about the global scale bleaching event that happened during 2015 and is forecasted to continue during 2016. He explained that although bleaching isn't necessarily a death sentence for coral reefs, bleaching events that occur consecutively don't give corals a chance to recover.

After Mark's presentation, Richard Driscoll, from the DOS talked more broadly about the outcomes of the 2015 United Nations Climate Change Conference—referred to as COP 21—conversations and the worldwide efforts to address and adapt to climate change. Although both of these presentations highlighted the dire reality of the connection between climate change and the challenges of sustaining healthy coral reef ecosystems, their optimistic message of “all hope is not lost” was strong. These conversations help elevate awareness and encourage local action while the global community works to address reducing carbon emissions.

The USCRTF is currently planning its next bi-annual meeting to be held in September 2016 in Guam and the Commonwealth of the Northern Mariana Islands that will focus on key issues coral reefs face in the Pacific Island region.

## Honoring Eloy Inos

The USCRTF honored the passing of the Honorable Governor Eloy Inos of the CNMI recognizing his leadership in conservation and management of our Nation's coral reef ecosystems. Governor Inos was a strong advocate of effective coral reef management in the islands. As a fisherman, he brought first-hand commitment and understanding of how healthy ecosystems sustain islands and their people. He placed a priority on coral reefs in CNMI, particularly in the face of climate change. Governor Inos was a champion for more coordinated and joint Federal-local government efforts and for doing what was best for the coral reef resources of CNMI. He was a significant supporter and partner to the All Islands Committee. His leadership and voice in coral reef conservation for the islands are two of his many legacies.

## Hang Ten! at Your Favorite National Park

By Cheryl Fossani (DOI) and Ann Tihansky (USGS), National Park Foundation

### Pursuits: Surfing Your National Parks

<http://www.nationalparks.org/explore-parks/travel-ideas/pursuits-surfing-your-national-parks>

## The Surfing Bison

Visit the above Web site for an overview of surfing spots created by the National Park Foundation or go directly to the website of the park of your choice.

Ocean and coastal parks attract more than 88 million visits each year with a wide range of possibilities for recreation like hiking, camping, fishing, swimming and SURFING!

All of these spots are epic public lands. So grab your board and check it out. Surf's Up!

**Assateague Island National Seashore, MD and VA:** <https://www.nps.gov/asis/index.htm>

Just south of Ocean City, MD, the pristine beaches at Assateague Island National Seashore is a great place to catch some waves along the mid-Atlantic coast.

**Canaveral National Seashore, FL:** <https://www.nps.gov/cana/index.htm>

Canaveral National Seashore, along the Atlantic coast of central Florida, is famous for its surf. The protected beaches at Canaveral offer warm water and great waves.

**Cape Cod National Seashore, MA:** <https://www.nps.gov/caco/index.htm>

Cape Cod National Seashore consists of 40 miles of shoreline that, with relatively shallow surf, makes it great for beginner dudes and dudettes.

**Channel Islands National Seashore, CA:** <https://www.nps.gov/chis/index.htm>

Depending on the swell direction, surfing can be great at several locations on Santa Cruz, Santa Rosa and San Miguel Islands in the remote Channel Islands National Seashore. These surf spots are best accessed by boat and recommended for the hard-core surf set.

**Gulf Islands National Seashore, FL:** <https://www.nps.gov/guis/index.htm>

The northern Gulf of Mexico is known for white sandy beaches, aquamarine waters, an old fort and a place to fish—and when the tide, waves and sandbar conditions are just right...there is a great surf spot at the Gulf Islands National Seashore near Fort Pickens known as Pickens point, which is possibly the birthplace of surfing on Florida's west coast.

**Padre Island National Seashore, TX:** <https://www.nps.gov/pais/index.htm>

The Gulf of Mexico's warm waters welcome surfers of all levels to south Texas. Predominant southeast winds create consistently good surf, making the Padre Island National Seashore a great spot for beginners to learn how to catch a wave.

**Point Reyes National Seashore, CA:** <https://www.nps.gov/pore/index.htm>

Point Reyes National Seashore, just north of San Francisco, CA, has 80-miles of protected shoreline. Although this National Seashore beckons ocean lovers, the surf can be big and gnarly. It is a favorite destination for very advanced surfers.

Greetings,  
The USGS issued the press release below on Assessing Carbon Potential of Alaska Lands. Please let us know if you have any questions. Thanks! Denise

## USGS Assesses Carbon Potential of Alaska Lands

*Fate of region's large carbon reserves could affect greenhouse gas concentration*

In comparison to the lower 48 states, Alaskan forests, wetlands and permafrost contain larger stores of carbon, according to the first-of-its-kind [assessment](#) recently completed by the U.S. Geological Survey, the U.S. Forest Service and the University of Alaska at Fairbanks.

“This benchmark assessment establishes significant baseline information to better understand carbon dynamics in Alaskan ecosystems,” said Interior’s Deputy Secretary Mike Connor. “It provides the latest example of how Interior is applying science to our nation’s most complex resource management challenges. Nowhere is this more critical than in Alaska with its vast and diverse geography and its heightened vulnerability to climate change.”

Alaska lands make up approximately 18 percent of the nation in total area, but they contain approximately 53 percent of the carbon stock.

“Carbon stored in high latitude ecosystems is considered more vulnerable than carbon sequestered in ecosystems in the temperate zone,” said Virginia Burkett, USGS Associate Director for Climate and Land Use Change, “because average temperatures are projected to increase faster in the boreal and arctic regions during the remainder of the century.”

“This new assessment specifically reveals how soil carbon losses in Alaska are amplified by wildfires, which have increased in size and frequency with the warming Arctic climate,” Burkett noted.

Biological carbon storage – also known as carbon sequestration – is the process by which carbon dioxide (CO<sub>2</sub>) is removed from the atmosphere and stored as carbon in vegetation, soils and sediment. The USGS inventory estimates the ability of different ecosystems to store carbon.

“The cold temperatures of Alaska have led over time to the storage of vast quantities of soil and biomass carbon,” said A. David McGuire, USGS scientist and professor of land ecology at the University of Alaska Fairbanks. “A major concern for this region is how interactions among warming temperatures, permafrost thaw, more frequent wildfires, and changes in stream flow will affect carbon storage and greenhouse gas exchange.”

Presently, Alaska’s varied ecosystems act as a moderate carbon sink overall, absorbing about 3.7 million metric tons per year from the atmosphere. Even with increased permafrost thawing and more frequent and intense wildfires, future climate models show the ability of Alaska’s ecosystems to store carbon is projected to increase during the remainder of the century. This increased ability to sequester carbon is expected to occur due to increased vegetation growth prompted by longer growing seasons and other more favorable conditions. The increased vegetation growth more than counteracts increased carbon emissions from wildfires, a finding that may appear somewhat surprising.

The assessment indicates climate change will affect different ecosystems in Alaska in different ways, weakening the boreal forest as well as boreal and arctic wetlands’ ability to sequester carbon while strengthening sequestration in Alaska’s southeast forest region. Most of the total Alaska carbon stock — over 91 percent (estimated to range between 37 and 76.9 billion metric tons) — resides in soils and permafrost. From one-third to two-thirds of the state is underlain by near-surface permafrost.

Although wildfire activity varies widely from year to year, an overall upward trend in the incidence and size of wildfires is projected to increase during the remainder of the century with the boreal region of the state to be most severely affected, diminishing its capacity as a carbon sink.

A [separate study](#) conducted as part of the assessment shows that the permafrost extent could shrink by up to 25 percent by 2100, which could potentially lead to consequences such as altering landscapes, hydrology, biomes, and fire resiliency.

The assessment estimated methane emissions for wetlands in the boreal and arctic regions, indicating that the state’s wetlands are a significant source for greenhouse gas forcing potential in both the near and long-term future.

On the other hand, southeast Alaska is a productive forest region that serves as a carbon sink. The assessment estimates that the productivity of this region would increase under a scenario of climate change and forest management by 8 to 27 percent.

The assessment further projected that a substantial proportion of the spruce forests of the boreal region could be gradually replaced by birch and aspen forests. This would mean shifting habitats for wildlife and migratory birds.

The Alaska investigation constitutes the latest chapter of a nationwide study that Congress

mandated for the Department of the Interior in 2007 under the [Energy Independence and Security Act](#). Regional biologic carbon sequestration assessments for the 48 contiguous states have been [published previously](#). Historically, national inventory assessments about carbon stock and greenhouse gas levels have not included Alaska because of its sheer size, relative lack of transportation infrastructure, and low density of field data. This extensive assessment of Alaska's land carbon stocks is the first such study for the state and fills an important knowledge gap about carbon and greenhouse gas emissions.

“We continue to refine our knowledge of land carbon dynamics,” Burkett observed. “It is absolutely vital that we pursue a field-based understanding of the carbon cycle of the Earth in various settings so we can better understand both the natural and the human-influenced mechanisms of climate change. This assessment was based on the best available data from field surveys, remote sensing, authoritative maps, and model simulations.”

The Alaska assessment results help identify additional scientific investigations that will contribute to refining the outlook for climate change in Alaska in relation to land management actions. Two examples of needed further scientific inquiry are (1) the feedback mechanisms of a changing climate that interact with carbon pools found in the boreal and arctic regions and (2) an assessment of the consequences of climate change to wildlife, to migratory birds, and to Alaska natives who depend on the timeless continuity of ecosystems.

The USGS publication, [Baseline and Projected Future Carbon Storage and Greenhouse-Gas Fluxes in Ecosystems of Alaska](#), is now available online. McGuire and USGS colleague Zhilang Zhu were co-lead authors of the report. The lead authors have prepared an [auxiliary set of slides](#) that highlight key findings and statistics of the assessment.

**Attachments:** [Wildfire Budgeting Response and Forest Management Act of 2016 Discussion DRAFT.pdf](#)

---

Hello Felipe –

The Sage grouse hearing would be in the PLFM subcommittee and focused on oversight of the final land use plans of the BLM and the USFS on sage grouse and the development of the implementation guides and field manuals and implementation teams that are being deployed. It would be one of the days that is not used for the BLM Planning 2.0 hearing which is the first priority. Those dates are June 16, June 21 or June 28. All afternoon starts. The Committee would really like to have Sarah Greenberger represent the DOI/Administration as a witness at this hearing given the lead role she has had with respect to Sage grouse.

Wildfire hearing – we do not yet have a date but are looking at the following June 16, 21, 23. This hearing would be legislative on the recently released bipartisan discussion draft entitled Wildfire Budgeting, Response, and Forest Management Act of 2016. I am attaching it for your convenience.

Thanks, Lucy

Hi Lucy,

I understand from Patrick at BLM that SENR is considering holding a hearing in June related to our sage grouse conservation efforts, and that you may be interested in requesting a senior Departmental witness. If I could get some more information about the purpose of the hearing and the time frame you might be looking at, I'm happy to start conversations here about how we might be able to accommodate your interest. Please feel free to give me a call at my direct, 208-3337, at your convenience.

Thanks,  
Felipe

# United States Senate

WASHINGTON, DC 20510

June 2, 2016

The Honorable Sally Jewell  
Secretary  
U.S. Department of the Interior  
1849 C Street, NW  
Washington DC 20240

Dear Secretary Jewell:

We are writing to comment on your agency's proposed 2017-2022 Outer Continental Shelf Oil and Gas Leasing Program. We appreciate the recent decision signaling that the Atlantic Ocean will be off limits to oil and gas leases. However, we are concerned that the plan continues to include new leases to facilitate further investment in offshore fossil fuel development, especially in vulnerable areas such as the Chukchi and Beaufort Seas in the Arctic Ocean.

The Paris agreement demonstrated an unprecedented commitment of 190 countries coming together to address climate change and lower global greenhouse gas emissions. The scientific consensus tells us that the vast majority of known fossil fuel reserves must be left in the ground if we are to avoid the worst effects of climate change. Taking new fossil fuel leases off the table will send another powerful international signal that the United States is indeed dedicated to investing in the transition to a low carbon economy.

Moreover, oil from Arctic drilling is quickly showing itself to be neither necessary nor practical to meet our short- to mid-term energy needs. According to the International Energy Agency (IEA), the technologies needed to develop Arctic oil and gas resources remain costly and challenging to develop. In our view, pursuing this type of expensive and environmentally damaging fuel source does not reflect the intent of the March 10, 2016, agreement between the U.S. and Canada to lead the way to a low-carbon global economy over the coming decades, including through science-based efforts to protect the Arctic and its peoples.

The five-year Outer Continental Shelf Oil and Gas Leasing Program is an important indication of the United States' effort to address global climate change. We urge you to follow the President's climate commitments and remove new fossil fuel leases from the 2017-2022 Program. Because offering new outer continental shelf oil and gas leases will lock in decades of additional greenhouse gas emissions and inherently contradicts our climate goals, we also urge the administration to consider using statutory authority to permanently protect our citizen owned waters from future leasing.

We look forward to working with you to protect our global climate, native communities, natural resource based economies, sensitive ecosystems, and public health.

Sincerely,

**Subject:** RE: Request for Pacific Islander data - Set of Data - 1

Hi Kehau –

Per our conversation, I am sending you 3 sets of data relating to the race groups of Micronesian, Marshalllee and Palauan. These are people who live in Hawaii.

There are 2 types of files – PDF and EXCEL. The PDF files are easier to see (all titles, etc., are displayed). The EXCEL files must be formatted but can be used for tables in reports.

\*\*\*\*\*

The first set is data are from the 2006-2010 American Community Survey Selected Population Dataset.

There are 6 files (3 PDF and 3 EXCEL). Data was collected over the 5 year period of 2006 to 2010 and figures shown are the average over that period of time. There are 3 profiles – social, economic and housing. The population groups shown are – Micronesian race alone, Micronesian race alone or in combination with some other race (multi-racial), Marshallee race alone, Marshallee race alone or in combination with some other race (multi-racial), and Palauan race alone or in combination with some other race (multi-racial). Please note that there is no data for Palauan race alone.

\*\*\*\*\*

The second set of data are the 2010 Census race data. The link to these files on our website is below.

[http://census.hawaii.gov/Census\\_2010/SF2/](http://census.hawaii.gov/Census_2010/SF2/)

Selected age, sex, household relationship and housing data are available for these groups. These are very solid numbers because they are from the decennial census which includes everyone who answered the census questionnaire.

\*\*\*\*\*

The third set of data comes from one of the most recent datasets, the 2013 American Community Survey 3-year dataset. It only had data for the Micronesian race alone and the Micronesian race alone or in combination with some other race (multi-racial) race categories. For the Micronesian alone data, see page 33-40 of the PDF file; for the Micronesian alone or in combination, see Page 43-50 of the PDF file. The files contain data for many races. One file is for the “race alone” data and the other file is for the “race alone or in combination with some other race” data. There are a total of 4 files for this dataset. For Hawaii, we usually use the “race alone or in combination with some other race” data since about 1 in 4 residents are multi-racial.

\*\*\*\*\*

I will check on the place of birth data and send you another email.

DP03 | SELECTED ECONOMIC CHARACTERISTICS

2006-2010 American Community Survey Selected Population Tables

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC) 2010. The 2010 Census occupation codes were updated in accordance with the 2010 revision of the SOC. To allow for the creation of 2006-2010 and 2008-2010 tables, occupation data in the multiyear files (2006-2010 and 2008-2010) were recoded to 2010 Census occupation codes. We recommend using caution when comparing data coded using 2010 Census occupation codes with data coded using previous Census occupation codes. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/ioindex/>.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

D03: LABOR ECONOMICS

2006-2010 American Community Survey

Short documentation code lists, subject definitions, data accuracy, and statistical tests can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the population estimates program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arises from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Where there are changes in the edit between

2009 and 2010 regard to the fundamental  
social security (SSI) and social security  
the changes in the edit looseened  
restrictions on disability requirements for  
receipt of SSI result in a increase in  
the total number of SSI recipients in the  
American Community Survey. The  
changes also loosened restrictions on  
possible reported monthly amounts in  
social security income result in higher  
social security average amounts. These  
results more closely match administrative  
counts compiled by the Social Security  
Administration.

Orders include members of the Armed  
Forces and civilians who were at or last  
seen.

Industry codes are 4-digit codes and are  
based on the North American Industry  
Classification System 2007. The industry  
categories adhere to the guidelines issued  
in Clarification Memorandum No. 2,  
"NAICS Alternate Arrangement Structure for  
Base B.S.S. Statistical Agencies," issued  
by the Office of Management and Budget.

Occupation codes are 4-digit codes and  
are based on the Standard Occupational  
Classification (SOC) 2010. The 2010  
Census occupation codes were updated in  
accordance with the 2010 revision of the  
SOC. To allow for the creation of 2006  
2010 and 2008-2010 tables, occupation  
data in the multi-year files (2006-2010 and  
2008-2010) were recoded to 2010 Census  
occupation codes. We recommend  
caution when comparing data coded  
2010 Census occupation codes with data  
codes. For more information on the  
Census occupation code changes, please  
visit our website at  
<http://www.census.gov/hhes/www/index>

File the 2006-2010 American Community

Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micro-metropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of symbols:

1. A confidence interval for the margin of error column indicates that either too sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. A confidence interval for the estimate column indicates that either too sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of a one-sided distribution.

3. A confidence interval for a median estimate means the median falls in the lowest interval of a one-sided distribution.

4. A confidence interval for a median estimate means the median falls in the upper interval of a one-sided distribution.

5. A confidence interval for the margin of error column indicates that the median falls in the lowest interval or upper interval of a one-sided distribution. A statistical test is not appropriate.

6. A confidence interval for the margin of error column indicates that the estimate is controlled. A statistical test for sampled data for this geographic area cannot be displayed because the number of sample cases is too small.

8. A ( ) means that the estimate is not applicable or not available.

SELECTED HOUSING CHARACTERISTICS

2006-2010 American Community Survey Selected Population Tables

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2009 and 2010 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census

2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

D04: LCOD HOIN

2006-2010 American Community Survey

Support documentation code lists, subject definitions, data accuracy, and statistical tests can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the population estimates program provides inter-censal estimates of the population for the nation, states, and counties.

Data are based o a samēle a d are

subject to sampling variability. The degree of uncertainty for an estimate arises from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The media cross rent excludes cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where MOCA is completed, that is, MOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where MOCA is completed, that is, MOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where RRA is completed, that is, cross rent and household income are valid values.

The 2009 and 2010 combined data for Puerto Rico will not be shown. Research indicates that the restrictions on combined facilities that were introduced in 2008 in the stateside America's Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micro-metropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of symbols:

1. A confidence interval for the margin of error column indicates that either too sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. A confidence interval for the estimate column indicates that either too sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of a one-sided distribution.

3. A confidence interval for a median estimate means the median falls in the lowest interval of a one-sided distribution.

4. A confidence interval for a median estimate means the median falls in the upper interval of a one-sided distribution.

5. A confidence interval for the margin of error column indicates that the median falls in the lowest interval or upper interval of a one-sided distribution. A statistical test is not appropriate.

6. A confidence interval for the margin of error

7. A **N** confidence interval for the estimate and margin of error column indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. A **( )** means that the estimate is not available or not available.

DP02 | SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2006-2010 American Community Survey Selected Population Tables

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the Population Estimates Program provides intercensal estimates of the population for the nation, states, and counties.

Subject	Hawaii				
	Micronesia alone (520-529, 531-541)				Micronesia alone or in any combination (520-529, 531-541) & (100-299) or (300, A01-Z99) or (400-999)
	Estimate	Estimate Margin of Error	Percent	Percent Margin of Error	
<b>HOUSEHOLDS BY TYPE</b>					
Total households	4,304	+/-462	4,304	(X)	5,126
Family households (families)	3,755	+/-401	87.2%	+/-4.4	4,337
With own children under 18 years	2,801	+/-342	65.1%	+/-6.1	3,179
Married-couple family	2,420	+/-317	56.2%	+/-5.6	2,869
With own children under 18 years	1,933	+/-300	44.9%	+/-6.0	2,242
Male householder, no wife present, family	378	+/-148	8.8%	+/-3.4	383
With own children under 18 years	202	+/-112	4.7%	+/-2.6	202
Female householder, no husband present, family	957	+/-234	22.2%	+/-4.8	1,085
With own children under 18 years	666	+/-182	15.5%	+/-4.0	735
Nonfamily households	549	+/-211	12.8%	+/-4.4	789
Householder living alone	209	+/-139	4.9%	+/-3.1	387
65 years and over	0	+/-123	0.0%	+/-0.8	0
Households with one or more people under 18 years	3,384	+/-359	78.6%	+/-5.0	3,851
Households with one or more people 65 years and over	406	+/-159	9.4%	+/-3.7	422
Average household size	4.85	+/-0.30	(X)	(X)	4.69
Average family size	4.96	+/-0.31	(X)	(X)	4.91

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2006-2010 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2006-2010 American Community Survey

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

D002: LACSD SOCIAL

2006-2010 American Community Survey

Support documentation code lists, subject definitions, data accuracy and statistical tests can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing estimates, for 2010, the 2010 Census provides the official counts of the population and housing units for the nation, states, counties, cities and towns. For 2006 to 2009, the population estimates program provides intercensal estimates of the population for the nation, states, and counties.

Explanation of symbols:

1. A confidence interval for the margin of error column indicates that either too sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. A confidence interval for the estimate column indicates that either too sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of a one-sided distribution.

3. A confidence interval for a median estimate means the median falls in the lowest interval of a one-sided distribution.

4. A confidence interval for a median estimate means the median falls in the upper interval of a one-sided distribution.

5. A confidence interval for the margin of error column indicates that the median falls in the lowest interval or upper interval of a one-sided distribution. A statistical test is not appropriate.

6. A confidence interval for the margin of error column indicates that the estimate is controlled. A statistical test for sample variability is not appropriate.

7. A confidence interval for the estimate and margin of error column indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. A ( ) means that the estimate is

S0201 | SELECTED POPULATION PROFILE IN THE UNITED STATES

2011-2013 American Community Survey 3-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Hawaii				
	White alone		Black or African American alone		Asian alone (400-499)
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
<b>TOTAL NUMBER OF RACES REPORTED</b>					
Total population	350,193	+/-2,364	27,446	+/-1,166	527,572
One race	100.0%	+/-0.1	100.0%	+/-0.2	100.0%
Two races	(X)	(X)	(X)	(X)	(X)
Three races	(X)	(X)	(X)	(X)	(X)

	Native Hawaiian alone (500-503)		Micronesian alone (520-529, 531-541)	
	Estimate	Margin of Error	Estimate	Margin of Error
With a computer	(X)	(X)	(X)	(X)
With a broadband Internet subscription	(X)	(X)	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-.' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+.' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.

2011-2013 American Community Survey  
 Year Estimates

2011-2013 American Community Survey  
 Year Estimates

Subject definitions, data accuracy, and statistical tests can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing estimates, it is the Census Bureau's population estimates program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are

subject to sampling variability. The degree of uncertainty for an estimate arises from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Certain data are not available for certain geographic areas due to problems with data collection. See Errata Note 92 for details.

Methodological changes to data collection in 2013 may have affected late-year data for 2013. Users should be aware of these changes when comparing data collected from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

There were changes in the edit between

2009 and 2010 rewording of supplemental  
disability income (SDI) and social security  
the changes in the edit loosened  
restrictions on disability rewordings for  
receipt of SDI results and a decrease in  
the total number of SDI recipients in the  
American Community Survey. The  
changes also loosened restrictions on  
possible reported monthly amounts in  
social security income results and higher  
social security aggregate amounts. These  
results more closely match administrative  
counts compiled by the Social Security  
Administration.

Occupation codes are 4-digit codes and  
are based on the standard Occupational  
Classification 2010.

Industry codes are 4-digit codes and are  
based on the North American Industry  
Classification System (NAICS). The  
Census industry codes for 2013 and later  
years are based on the 2012 revision of the  
NAICS. To allow for the creation of 2009-  
2013 and 2011-2013 tables, industry data  
in the multi-year files (2009-2013 and 2011-  
2013) were recoded to 2013 Census  
industry codes. We recommend users  
caution when comparing data coded in  
2013 Census industry codes with data  
coded in Census industry codes prior to  
2013. For more information on the Census  
industry code changes, please visit our  
website at  
<http://www.census.gov/eo/leto/methodol>  
Telephone service data are not available  
for certain geographic areas due to  
problems with data collection. See Errata  
Note 93 for details.

File the 2011-2013 American Community

Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micro-metropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of symbols:

1. A confidence interval for the margin of error column indicates that either too sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. A confidence interval for the estimate column indicates that either too sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of a one-sided distribution.

3. A confidence interval for a median estimate means the median falls in the lowest interval of a one-sided distribution.

4. A confidence interval for a median estimate means the median falls in the upper interval of a one-sided distribution.

5. A confidence interval for the margin of error column indicates that the median falls in the lowest interval or upper interval of a one-sided distribution. A statistical test is not appropriate.

6. A confidence interval for the margin of error column indicates that the estimate is controlled. A statistical test for sample variability is not appropriate.

7. A confidence interval for the estimate and

S0201

SELECTED POPULATION PROFILE IN THE UNITED STATES

2011-2013 American Community Survey 3-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Hawaii				
	White alone or in combination with one or more other races		Black or African American alone or in combination with one or more other races		American Indian and Alaska Native alone or in combination with one or more other races (300, A01-Z99) & (100-299) or (300, A01-Z99) or (400-999)
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate
<b>TOTAL NUMBER OF RACES REPORTED</b>					
Total population	592,805	+/-6,431	46,309	+/-2,043	31,052
One race	59.1%	+/-0.7	59.3%	+/-3.2	9.5%
Two races	21.6%	+/-0.6	23.1%	+/-2.3	42.2%
Three races	17.4%	+/-0.6	11.0%	+/-2.0	27.3%
Four or more races	1.9%	+/-0.3	6.7%	+/-1.5	21.0%
<b>SEX AND AGE</b>

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Fertility data are not available for certain geographic areas due to problems with data collection. See Errata Note #92 for details.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Occupation codes are 4-digit codes and are based on Standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multiyear files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend using caution when comparing data coded using 2013 Census industry codes with data coded using Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/people/io/methodology/>.

Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note #93 for details.

While the 2011-2013 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

#### Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

2011: LEADER OBLIGATION  
 OIL IN THE NIND A

2011-2013 American Community Survey 3  
 Year Estimates

Report documentation code lists, subject definitions, data accuracy, and statistical tests can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's population estimates program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Hispanic		Black or African American

Data are based on a sample and are

subject to sampling variability. The degree of uncertainty for an estimate arises from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Certain data are not available for certain geographic areas due to problems with data collection. See Errata Note 92 for details.

Methodological changes to data collection in 2013 may have affected late-year data for 2013. Users should be aware of these changes when comparing data collected from 2013.

The Census Bureau introduced a new set of disability questions in the 2008 ACS questionnaire. Accordingly, comparisons of disability data from 2008 or later with data from prior years are not recommended. For more information on these questions and their evaluation in the 2006 ACS Content Test, see the Evaluation Report Covering Disability.

There were changes in the edit between

2009 and 2010 rewording of Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI results in a decrease in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security Income results in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Occupation codes are 4-digit codes and are based on the standard Occupational Classification 2010.

Industry codes are 4-digit codes and are based on the North American Industry Classification System (NAICS). The Census industry codes for 2013 and later years are based on the 2012 revision of the NAICS. To allow for the creation of 2009-2013 and 2011-2013 tables, industry data in the multi-year files (2009-2013 and 2011-2013) were recoded to 2013 Census industry codes. We recommend users compare data coded in 2013 Census industry codes with data coded in Census industry codes prior to 2013. For more information on the Census industry code changes, please visit our website at <http://www.census.gov/eo/leto/methodology>. Telephone service data are not available for certain geographic areas due to problems with data collection. See Errata Note 93 for details.

File the 2011-2013 American Community

Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micro-metropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2011-2013 3-Year American Community Survey

Explanation of symbols:

1. A confidence interval for the margin of error column indicates that either too sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.

2. A confidence interval for the estimate column indicates that either too sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of a one-sided distribution.

3. A confidence interval for a median estimate means the median falls in the lowest interval of a one-sided distribution.

4. A confidence interval for a median estimate means the median falls in the upper interval of a one-sided distribution.

5. A confidence interval for the margin of error column indicates that the median falls in the lowest interval or upper interval of a one-sided distribution. A statistical test is not appropriate.

6. A confidence interval for the margin of error column indicates that the estimate is controlled. A statistical test for sample variability is not appropriate.

7. A confidence interval for the estimate and

America Indian and Alaska Native alone or in combination with one or more other races (300, A0199) (100299) or (300, A0199) or (400999)		Asian alone or in combination with one or more other races (400499) (100299) or (300, A0199) or (400999)		Chinese alone or in combination (410419) (100299) or (300, A0199) or (400999)		Chinese (except Hawaiian) alone or in combination (410419) (100299) or (300, A0199) or (400999)

 Subject: RE: DPCC Amendment Tracker for FY2017 National Defense Authorization Act (S. 2943)

Energy/Environment 2017 NDAA Amendments			
Senator	Amdt #	Description	Status
Moran	4066	Establishes an exemption from the National Labor Relations Act for tribally owned and operated businesses located on Indian lands.	
Paul	4072	Exempts Fort, Knox, KY from the Mineral Leasing Act for acquired lands for oil and gas development so long as the gas is used to support Ft. Knox and is not sold elsewhere.	
Murkowski	4086	Allows for the Air Force to lease real property at Joint Base Elmendorf-Richardson to the City of Anchorage or to the local Lions Club for recreation purposes	
Gardner	4131	Amends the Rocky Mountain Arsenal National Wildlife Refuge Act of 1992 to allow for disposal of property for residential or industrial purposes if risk assessment determines property is protective of the proposed use.	
Moran	4144	Allows the Secretary of the Army to accept in-kind environmental remediation activities valued at up to \$14.5 million for land conveyed under 2005 MilCon Authorization.	
Bennet	4151	Amends the Mineral Leasing Act to ensure that certain "excess" monies collected under the act are distributed to the States.	
Boozman	4156	To approve the location of a memorial to commemorate those who served on active duty in support of Operation Desert Storm or Shield in Wash. DC in a location identified by the Sec. of Interior.	
Schumer	4178	To provide for the inclusion of 74 members of the crew of the U.S.S. Frank E. Evans who perished on the Vietnam Memorial Wall.	
Flake	4181	Restricts the creation of National Monuments in "military operations areas" unless the proclamation includes language to ensure no new limits would be placed on various military operations.	
Flake	4182	Requires the Sec. of Def. to create a searchable database on the installation of renewable energy projects undertaken since 2010.	
Flake	4187	Amends the Sikes Act to add a requirement for DOD to conduct rehabilitation of natural resources on military installations in accordance with State laws and regulations.	
Flake	4188	Directs GAO to prepare a report that identifies each program or activity under budget function 050 (Defense) during FY 2016 that did not have "a direct impact on, or directly support, the national defense of the United States."	
Flake	4191	Directs the Depts. Of State, Commerce and Interior to prepare a report on wildlife trafficking, establishes a presidential taskforce on wildlife trafficking, and directs that various actions be taken by those departments to prevent wildlife trafficking.	
Rubio	4193	Restricts DOD from spending any funds authorized by NDAA to purchase energy from alternative sources unless equivalent in cost and capability to conventional energy.	
Barrasso	4221	Requires DOD to reimburse States for reasonable costs of fire suppression for fires caused by military training or other military actions on training installations owned by the State. Does not affect existing MOU's or military owned installations.	
Barrasso	4223	Authorizes National Guard units to support firefighting operations at the request of NIFC or other federal agency.	
Hirono	4228	Approves the agreement and appendices signed between the U.S. and the Republic of Palau dated September 3, 2010 with a several modifications.	
Lankford	4239	Ensures that all DOD grants are "in support of national security."	
Schatz	4278	Provides that utility energy service contracts have a contract period not to exceed 25 years.	
Hirono	4281	Authorizes the use of the Energy Savings Investment Fund for energy management.	
Murray	4291	Directs the Sec. of the Army to transfer the human remains of the "Kennewick Man" to the Washington State Department of Archaeology and Historic Preservation for repatriation to claimant tribes.	
Wyden	4294	Establishes a repository for operational energy-related R&D efforts at DOD and directs that it be made internet accessible.	
Peters	4311	Authorizes research to improve military vehicle fuel economy or reduce fuel consumption of military ground vehicles.	
Peters	4312	Establishes a DOD alternatives fueled vehicle infrastructure fund, whose monies may be invested in US govt interest bearing obligations any part of the fund not needed to meet current expenses.	
Hirono	4317	Sense of the Congress supporting the commitment of the U.S. to the Republic of Palau	
Schumer	4318	Requires Air Force to produce report on the contamination of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonates (PFOS) contamination at certain military bases in NY.	
Schatz	4321	Requires GAO report on U.S. interests in the Freely Associated States of the Republic of Palau, the Marshall Islands, and the Federated States of Micronesia.	
Udall	4330	Designates a portion of the Organ Mountains NM and seven other areas in New Mexico totaling approximately 241,067 acres as wilderness. Also designates one 'potential wilderness area' and includes a WSA release in Dona Ana County.	
Udall	4342	Transfers the lands of the former Fort Wingate Depot to be held in trust for the Zuni Tribe and the Navajo Nation by the Secretary of the Interior.	
Kaine	4347	Adjusts the boundary of the Petersburg National Battlefield in Virginia, authorizes Interior to acquire certain parcels, and swaps administrative jurisdiction of two parcels between the Army and Interior.

---

Nikki and B.J.,

We wanted to reach out to update you on our efforts to expand the California Coastal National Monument to include additional BLM-managed sites in Humboldt, Santa Cruz, and San Luis Obispo Counties.

We have been actively building our list of supporters and steadily increasing our communication amongst the local national monument campaign advocates to have a unified outreach campaign to promote CCNM Expansion across the multiple sites included in our legislation. I have attached our latest support list that was notably and recently updated to include the Trinidad Rancheria Tribal Council, Trinidad Chamber of Commerce, and the Trinidad City Council. These organizations support the broader CCNM expansion effort and specifically the inclusion of the Trinidad Head as part of the CCNM. The updated list also includes newer additions with local ties to the other sites in the bill as well.

In addition, the sponsors of the CCNM legislation were recently asked to make a few small changes to the legislation to accurately reflect the role of Indian Tribes in local land management practices, as well as the role of neighboring non-Federal property owners that help provide public access to the Federal lands included in the bill. Should our bill have move forward in the legislative process (so far, the bill has only had a hearing in each chamber), we intend to use the attached "Amendment in the Nature of a Substitute" that includes these small changes for future legislative action. We would kindly ask you and the Administration to use the attached document for the same purpose.

Please let us know if we can answer any questions.

Best Regards,

Kyle

1 (1) to protect, conserve, and enhance for the benefit and enjoyment of present and future  
2 generations the nationally significant historical, natural, cultural, scientific, educational, and  
3 scenic values of the Federal land along and adjacent to the shoreline of the State of  
4 California, and for the purposes for which the Monument was designated; and

5 (2) further to support the land management partnerships of the Bureau of Land  
6 Management with the State of California, **Indian tribes**, local governments, communities,  
7 and stakeholders, and to enhance the relationships those entities have with the Bureau of  
8 Land Management and Federal land, as appropriate.

Formatted: Highlight

### 9 SEC. 3. DEFINITIONS.

10 In this Act:

11 (1) FEDERAL LAND. □ The term □Federal land□ means □

12 (A) the Federal land comprising a **13-acre portion of Trinidad Head** in Humboldt  
13 County, California, that is identified as □Trinidad Head□ on the map;

Formatted: Highlight

14 (B) the Federal land comprising 440 acres in Humboldt County, California, that is  
15 identified as □Lost Coast Headlands□ on the map;

16 (C) the Federal land comprising approximately 5,780 acres in Santa Cruz County,  
17 California, that is identified as □Cotoni-Coast Dairies Public Land□ on the map;

18 (D) the Federal land comprising approximately 20 acres in San Luis Obispo County,  
19 California, that is identified as □Piedras Blancas Light Station Outstanding Natural  
20 Area□ on the map; and

21 (E) the Federal land comprising approximately 8 acres in Humboldt County,  
22 California, that is identified as □Lighthouse Ranch□ on the map.

23 (2) MAP. □ The term □map□ means the Bureau of Land Management map entitled  
24 □California Coastal National Monument Addition□ and dated July 24, 2015.

25 (3) MONUMENT. □ The term □Monument□ means the California Coastal National  
26 Monument established by Presidential Proclamation 7264.

27 (4) PRESIDENTIAL PROCLAMATION 7264. □ The term □Presidential Proclamation 7264□  
28 means Presidential Proclamation Number 7264, dated January 11, 2000 (65 Fed. Reg.  
29 2821), creating the Monument.

30 (5) PRESIDENTIAL PROCLAMATION 9089. □ The term □Presidential Proclamation 9089□  
31 means Presidential Proclamation Number 9089, dated March 11, 2014 (79 Fed. Reg.  
32 14603), expanding the Monument.

33 (6) SECRETARY. □ The term □Secretary□ means the Secretary of the Interior.

### 34 SEC. 4. EXPANSION OF CALIFORNIA COASTAL 35 NATIONAL MONUMENT.

36 (a) In General. □ The boundary of the Monument is expanded to include the Federal land.

37 (b) Map and Legal Description. □

- 1 (1) IN GENERAL. □ As soon as practicable after the date of enactment of this Act, the
- 2 Secretary shall develop a map and boundary description of the Federal land added to the
- 3 Monument by this Act.
- 4 (2) FORCE AND EFFECT. □ The map and boundary description developed under paragraph
- 5 (1) shall have the same force and effect as if included in this Act, except that the Secretary
- 6 may correct any minor errors in the map and boundary descriptions.
- 7 (3) AVAILABILITY OF MAP AND BOUNDARY DESCRIPTION. □ The map and boundary
- 8 description developed under paragraph (1) shall be on file and available for public
- 9 inspection in appropriate offices of the Bureau of Land Management.

10 **SEC. 5. ADMINISTRATION.**

11 (a) In General. □ Subject to valid existing rights and deed restrictions in place as of the date of

12 enactment of this Act, the Secretary shall manage the Federal land added to the Monument by

13 this Act □

- 14 (1) as part of the Monument; and
- 15 (2) in accordance with Presidential Proclamations 7264 and 9089.

16 (b) Management Plan. □

- 17 (1) IN GENERAL. □ As soon as practicable after the date of enactment of this Act, the
- 18 Secretary shall finalize an amendment, or multiple amendments as applicable for the
- 19 individual Federal land areas, to the Monument management plan for the long-term
- 20 protection and management of the Federal land added to the Monument by this Act.
- 21 (2) REQUIREMENTS. □ The plan amendment under paragraph (1) shall □
  - 22 (A) be developed in consultation with, at a minimum □
    - 23 (i) affected State, tribal, and local governments;
    - 24 (ii) the public; and
    - 25 (iii) interested Federal agencies;
  - 26 (B) describe the appropriate uses and management of the Federal land, consistent
  - 27 with this Act;
  - 28 (C) contain individual plans and considerations specific to each individual Federal
  - 29 land area;
  - 30 (D) take into consideration existing uses of the Federal land;
  - 31 (E) include components regarding stewardship, visitor services, facilities
  - 32 management and maintenance, public access, traffic, public safety, emergency
  - 33 services, and law enforcement;
  - 34 (F) include a component regarding potential education and interpretation activities,
  - 35 with recognition of the specific character and history of each Federal land area; and
  - 36 (G) include a component regarding Native American cultural resources
  - 37 management, with emphasis on the preservation **and traditional and customary use of**
  - 38 resources within the individual Federal land areas.

Formatted: Highlight

1 (3) INTERIM MANAGEMENT. □ During the period beginning on the date of enactment of  
2 this Act and ending on the date of completion of the management plan, the Secretary shall  
3 manage the Federal land in accordance with the purposes described in section 2(b).

4 (c) Motorized and Mechanized Transport. □ Except as needed for emergency or authorized  
5 administrative purposes, in the Monument □

- 6 (1) motorized vehicle use shall be permitted only on designated roads; and
- 7 (2) mechanized vehicle use shall be permitted only on roads and trails designated for the  
8 use of those vehicles.

9 (d) Incorporation of Land and Interests. □

10 (1) AUTHORITY. □ Except as provided in paragraph (3), the Secretary may acquire non-  
11 Federal land or interests in land within or adjacent to the Federal land added to the  
12 Monument by this Act only through exchange, donation, or purchase from a willing seller.

13 (2) MANAGEMENT. □ Any land or interests in land within or adjacent to the Federal land  
14 added to the Monument by this Act acquired by the United States after the date of  
15 enactment of this Act shall be □

- 16 (A) added to and administered as part of the Monument; and
- 17 (B) with respect to inclusion in the management plan, taken into consideration  
18 through an appropriate amendment to that plan.

19 (3) EXCEPTION. □ An addition to the Cotoni-Coast Dairies unit of Federal land referred to  
20 in section 3(1)(C) shall be limited to the acreage contained within the boundary of the  
21 Monument, as established by this Act.

22 (e) Existing Cooperative Management Agreements. □ Any cooperative management  
23 agreement in existence on the date of enactment of this Act between the Federal land areas and  
24 other land management entities shall not be affected due to the enactment of this Act.

25 (f) Cooperative Agreements With **Indian Tribes**, Local Governments, and Entities. □

Formatted: Highlight

26 (1) IN GENERAL. □ To better implement the management plan and to continue the  
27 successful partnerships with **Indian tribes**, local communities, and land administered by the  
28 State of California and other partners, the Secretary may enter into cooperative agreements  
29 with the appropriate Federal, **tribal**, State, and local agencies and organizations pursuant to  
30 section 307(b) of the Federal Land Policy and Management Act of 1976 (43 U.S.C.  
31 1737(b)).

Formatted: Highlight

Formatted: Highlight

32 (2) AGREEMENTS WITH INDIAN TRIBES. □ In addition to the cooperative agreements  
33 authorized under paragraph (1), the Secretary may enter into agreements with Indian tribes  
34 pursuant to title IV of the Indian Self-Determination and Education Assistance Act (25  
35 U.S.C. 458aa et seq.), regarding the management, protection, and development of the  
36 Federal land.

Formatted: Highlight

37 (g) Withdrawals. □ Subject to valid existing rights, all Federal land within the Monument and  
38 all land and interests in land acquired for the Monument by the United States after the date of the  
39 enactment of this Act are withdrawn from □

40 (1) all forms of entry, appropriation, or disposal under the public land laws;

- 1 (2) location, entry, and patent under the mining laws; and
- 2 (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.
- 3 (h) Native American Uses and Interests. □
  - 4 (1) IN GENERAL. □ The Secretary shall, to the maximum extent permitted by law and in
  - 5 consultation with affected Indian tribes, ensure the protection of Indian sacred sites and
  - 6 traditional cultural properties in the Monument and provide access by members of Indian
  - 7 tribes for traditional cultural and customary uses, consistent with □
    - 8 (A) Public Law 95□341 (commonly known as the □American Indian Religious
    - 9 Freedom Act□) (42 U.S.C. 1996);
    - 10 (B) **division A of subtitle III of title 54, United States Code; and**
    - 11 (C) Executive Order 13007 (42 U.S.C. 1996 note; relating to Indian sacred sites).
  - 12 (2) RELATIONSHIP TO OTHER RIGHTS. □ Notwithstanding paragraph (1), nothing in this Act
  - 13 enlarges, diminishes, or modifies the rights of any Indian tribe or Indian religious
  - 14 community.
- 15 (i) Buffer Zones. □
  - 16 (1) IN GENERAL. □ The expansion of the Monument by this Act is not intended to lead to
  - 17 the establishment of protective perimeters or buffer zones around the Federal land included
  - 18 in the Monument by this Act.
  - 19 (2) ACTIVITIES OUTSIDE MONUMENT. □ The fact that activities outside the Monument can
  - 20 be seen or heard within the Federal land added to the Monument by this Act shall not, of
  - 21 itself, preclude those activities or uses up to the boundary of the Monument.
- 22 (j) Grazing. □ Nothing in this Act affects the grazing of livestock within the Federal land
- 23 described in section 3(1)(C).
- 24 (k) National Landscape Conservation System. □ The Secretary shall manage the Monument as
- 25 part of the National Landscape Conservation System.

Formatted: Highlight

26 **SEC. 6. ADVISORY COUNCILS.**

- 27 (a) Establishment. □ Not less than 180 days after the date of enactment of this Act, the
- 28 Secretary shall establish an advisory council for each unit of Federal land described in
- 29 subparagraphs (A) through (E) of section 3(1) within the Monument.
- 30 (b) Duties. □ The advisory councils shall advise the Secretary with respect to the preparation
- 31 and implementation of the management plan under section 5(b) (or amendments to an existing
- 32 applicable management plan) for each relevant unit of Federal land.
- 33 (c) Applicable Law. □ The advisory councils shall be subject to □
  - 34 (1) the Federal Advisory Committee Act (5 U.S.C. App.);
  - 35 (2) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
  - 36 (3) all other applicable laws (including regulations).
- 37 (d) Members. □ Each advisory council shall include **not less than 7 members**, to be appointed

Formatted: Highlight

- 1 by the Secretary, of whom, to the maximum extent practicable□  
2 (1) 1 member shall be appointed after taking into consideration the recommendations of  
3 the local county board of supervisors of the applicable unit of Federal land; and  
4 (2) 6 or more members shall□  
5 (A) reside within a reasonable proximity to the applicable unit of Federal land; and  
6 (B) demonstrate experience that reflects□  
7 (i) the purposes for which the Monument was established; and  
8 (ii) the interest of the stakeholders that are affected by the planning and  
9 management of the unit of Federal land, which may include stakeholders  
10 representing private land-ownership, non-Federal properties adjacent to or near  
11 the Federal land that provide public access and maintenance access to the Federal  
12 land, Native American interests, environmental, recreational, economic, or other  
13 non-Federal land interests.  
14 (e) Representation.□ The Secretary shall ensure that the memberships of the advisory councils  
15 are fairly balanced with respect to the points of view represented, and the functions to be  
16 performed, by each advisory council.  
17 (f) Quorum.□  
18 (1) IN GENERAL.□ A majority of the members of an advisory council shall constitute a  
19 quorum.  
20 (2) UNAPPOINTED MEMBERS.□ The operation of an advisory committee shall not be  
21 affected if□  
22 (A) a member has not yet been appointed to the advisory committee; but  
23 (B) a quorum has been attained.  
24 (g) Chairperson and Procedures.□ Each advisory council shall□  
25 (1) elect a chairperson from among the members of the advisory council; and  
26 (2) establish such rules and procedures as the advisory council determines to be necessary  
27 or appropriate.  
28 (h) Service Without Compensation.□ The members of each advisory council shall serve  
29 without pay.  
30 (i) Termination.□ The advisory councils shall terminate□  
31 (1) on the date that is 2 years after the date on which the management plan (or  
32 amendment to an existing management plan) is officially adopted by the Secretary; or  
33 (2) on such later date as the Secretary considers to be appropriate.  
34 (j) Existing Advisory Bodies.□ The Secretary may elect not to establish an advisory council  
35 for a unit of Federal land if a regularly scheduled, organized public forum or entity exists□  
36 (1) of which the Bureau of Land Management is an active or leading participant; and  
37 (2) that fulfills the duties described in subsection (b).

---

John,

FYI, Wayne and I just got a briefing from Craig Ackerman, Supervisor at Crater Lake, and advised him to do a review of the attached EA with the new tribal council. He had talked with the previous Council when the EA was in scoping.

Amy

**From:** Ackerman, Craig [mailto:[craig\\_ackerman@nps.gov](mailto:craig_ackerman@nps.gov)]

**To:** Amrhein, Amy (Merkley)  
**Subject:** Crater Lake Environmental Assessment and FONSI for Alternative Water Supply

Hi Amy,

I've attached copies of the Environmental Assessment and FONSI for our project to develop a deep well drinking water supply as an alternative to the surface water right we have that is subject to call by senior holders and the Tribes. Still working with the state on on a few issues Any questions let me know.

Is Senator Merkley planning to attend the Britt Festival performance here in July? I am trying to make it to Senator Wyden's town hall in GP Saturday. Perhaps I'll see you there.

*Craig W. Ackerman*

## Background

Crater Lake National Park (CLNA) is seeking an additional source of potable water to ensure an adequate long-term supply for the park's developed areas. The CLNA public water system serves three separate service areas located on the south side of Crater Lake in Matama Village, Park Headquarters at Moss Valley, and the Inn Village. The water system is served by a single point of diversion from a sole surface water source at ~~Affe Criss Affe Criss~~, which feeds Affe Cree. Affe Cree is a headwater tributary of the Hood River, which flows into Upper Clamath Lake via Affe Criss Lake and is a major tributary of the Clamath River.

The National Park Service (NPS) proposes to utilize an existing exploratory well as a potential ground water source for potable water that can either supplement the ~~Affe Criss Affe Criss~~ surface water source or provide a sole source of supply to the park water system should ~~Affe Criss Affe Criss~~ not be available. This action is needed to ensure a safe, reliable water supply for domestic and commercial uses at these facilities. The purpose of this action is to supplement the ~~Affe Criss Affe Criss~~ source in CLNA to ensure sufficient water for human consumption, sanitation, life safety, and fire protection, including historic structure protection.

A new water source developed must minimize the effects on the natural and cultural resources of the park and be safely accessible throughout the year.

## Background

The primary source of Affe Cree water is snowmelt. During the recent drought, the snowpack has been measured at less than 50% of average. Precipitation was measured at less than 65% of average over three years of drought beginning in 2011 and continuing through 2014.

Since 2008, the NPS has been actively pursuing water conservation measures and alternatives to ensure that there is adequate water to protect park resources, protect human life and safety, and limit adverse effects to park visitors, employees, partners, and local businesses from a reduced water supply. Water meters were installed in 2011 on the four tanks that store treated water for all park uses in the three developed areas. Installation of water conservation combination fixtures and water meters was completed in public use facilities throughout the park and in 42 park houses in 2014. Co-accessioned facilities encourage water conservation, such as placetable placards with information about the drought and serve water to guests on request.

To prevent a possible shutdown of the existing park water system or a park closure as concerns arose over an extended drought and a possible reduction in the water supply, the NPS began to search for alternate sources of potable water in 2013. To minimize adverse effects on park resources, a potential source had to provide adequate quantity and quality of water; be within reasonable distance of park headquarters and Matama Village where most of the water distribution infrastructure is located; outside the potential bufferless boundary established in 1974; and reasonably accessible for maintenance especially under winter conditions. Based on these criteria, four sites were evaluated. After considering geologic characteristics of areas most

In order to provide good water while meeting the other criteria, the NPS drilled an exploratory well in the early October 2013 at the Pacific Crest National Scenic Trail (PCT) trailhead on the south side of Highway 62.

The well was drilled on the plateau about 0.6 mile west of ~~Apple Creek~~ Apple Creek to basalt (bedrock) and cinders along Highway 62 at PCT trailhead in October 2013 (Figure 1). The presence of several perennial streams on the plateau suggests that the sources of these streams are flows along fractured bedrock. The well was drilled to a depth of 505 feet. The primary water bearing zones were cinders between 400 and 423 feet and 495 and 504 feet, with a static water level of 322 feet below ground surface. A 24-hour pumping test produced water at an average rate of 82 gallons per minute (gpm) with a drawdown of 17.35 feet. Water quality from the well is excellent. The water meets all primary drinking water standards and is suitable for use with a public drinking water system without further treatment.

Figure 1. PCT Test Well - October 2015

#### 4.2.2.2 Alternative 1

This environmental assessment analyzes two alternatives, a no action alternative and an action alternative. Under the action alternative, the exploratory well would be converted to a production well by adding a pump and the necessary infrastructure that would connect the well to the existing water distribution system at the Mammoth Falls (Figure 2). Several other alternatives for providing potable water that were considered but not carried through for full analysis are also discussed.

#### 4.2.2.2.1 ~~Apple Creek~~ Apple Creek and Dormitory

A no action alternative is defined as either no project or a continuation of existing conditions and management. The existing conditions and management of the CCLA water supply includes the ~~Apple Creek~~ Apple Creek surface water source and existing storage and distribution system.

Under the no action alternative (Alternative 1), the primary source of potable water to serve CCLA would continue to be surface water from ~~Apple Creek~~ Apple Creek. No new infrastructure (access roads; power; water treatment, storage, and distribution facilities) would be constructed. Existing storage would remain at 535,000 gallons. The seasonal 7 day maximum average flow pumped from ~~Apple Creek~~ Apple Creek is expected to remain at 55,400 gallons per day (gpd). The NPS would continue to encourage water conservation by camp visitors, staff, and concession employees. In addition to water meters that were installed in 2011 in the Mammoth area, the Rim Dorm, Café and Gift Shop, and Lodge, the NPS would continue to see if it is possible to install additional meters to determine use in other facilities and visitor use areas more accurately.

Under Alternative 2, the proposed well would become the sole source of potable water for the Annie Springs area (see Figure 2).

Under Alternative 2, the proposed well would become the sole source of potable water for the Annie Springs area. The Annie Springs area source cannot be used because of extreme low flows or a water rights call. No infrastructure would be constructed to connect the well to the existing distribution system (see Figure 2).

Under Alternative 2, the proposed well would become the sole source of potable water for the Annie Springs area. The Annie Springs area source cannot be used because of extreme low flows or a water rights call. No infrastructure would be constructed to connect the well to the existing distribution system (see Figure 2).

The proposed well would fill the Mazama tanks (200,000 gallons total storage) rather than operate the Mazama booster station to bring Annie Springs area water to the Mazama tanks. The Mazama tanks would supply both the Annie Springs Booster Station and the Mazama Service Area. To minimize the disturbance and maximize use of existing infrastructure that provides water to headwaters in the Moso Valley area and the rim, the distribution system would be modified so that the valve sequences (direction of water flow) can be operated from either the Annie Springs area treatment or from the well. Storage capacity would remain at 585,000 gallons.

To implement this proposal, the following infrastructure would be required.

No infrastructure that requires ground disturbance includes:

- A well house at the well, approximately 10 feet x 12.5 feet (125 square feet (sf)).

- A 3,175-foot-long trench for a new waterline from the well along the existing and obliterated highway alignments to connect to the existing Matama mainfill line.
- A 3,770-foot-long common utility trench for combined water and fiber optic communication lines adjacent to the waterline trench. A fiber optic communication line will control well pump based on tank level inputs to Matama Booster station and read system parameters (pressure, flow) remotely from Matama or Aroe Creek/Aroe Creek booster stations.
- 13 well boxes to collect lengths of water service lines, each approximately 3ft wide x 4ft long x 3ft deep (12 sf each).
- A 6ft x 6ft concrete transformer pad and vault.
- A 4ft x 6ft concrete pad for portable generator.
- 17 well boxes to collect lengths of fiber optic communication lines, each approximately 3ft wide x 4ft long x 3ft deep (12 sf each).
- A new valve vault, approximately 5ft wide x 8ft long x 6ft deep (45 sf).
- The expansion of the WC trailhead parking lot approximately 3,300 sf to accommodate the area lost to well house and to improve vehicle circulation and provide additional amenities.
- Replacement of existing 6-inch gate valve (1.5 sf) on the service line to from Aroe Creek to the booster stations under Aroe Creek bridge, with (2) new 6-inch gate valves and (1) spring check valve (4 sf) prevent backflow to the service district well service operations. The existing valves and fittings are partially embedded (50%) within the stream bed behind the river improvement. Replacement valves will likely be submerged to protect from freezing, but visible to allow for operations, service and inspections.

Other infrastructure that could be installed without additional road disturbance includes:

- One 10 horse power 4-inch submersible pump capable of pumping 50 gpm installed in the WC well.
- Utility modifications inside the existing concrete vault (vault #2) near the Aroe Creek Bridge to connect the section side of Aroe Creek/Aroe Creek Booster station to the 6-inch water distribution line from Matama water tanks to bypass the Aroe Creek source service line to the booster station.
- Utility, communication and controls modifications inside Matama booster station to shut off Aroe Creek source when the well and Matama tanks are used as the service water source.
- Transformer and water service modifications to the existing electrical service on the north-east road side near Aroe Creek Bridge to extend underground primary power service to the new well site.

The water distribution system requires two parallel trenches to connect the well to the existing water distribution system. The water line is laid in one trench and a second common utility trench for water and communication lines used to manage the water flow. A minimum 3-foot separation is required between the two trenches. The width of the disturbance for excavation is

estimated to be about 12 feet to accommodate the heavy equipment (excavator) needed. The trenches would be excavated in previously disturbed areas adjacent to the existing and former high-pavement. Under the proposed action, the trenches would run north from the well under the high-pavement, turn east along the existing high-pavement, turn north following the curve of the obliterated old high-pavement, and turn east above the site of the old Matama camerooned to connect to the existing 4-inch cast iron Matama water main line (Figure 2).

The trench under the high-pavement would require removal and replacement of asphalt at the high-pavement crossing. Soils disturbed by construction would be treated to reduce erosion and to inhibit dispersal and establishment of invasive plants.

Power supply to the facilities under the proposed action requires a specific power and Light (L) meter of the area. Annual power consumption for use of the well is estimated to be 32,225 kWh.

Additional parking and space for turning a stock trailer would be added at the well trailhead to replace the area that would be used for a well house. Additionally, borders would be placed around the well house to protect well infrastructure that will further reduce the available parking. The well parking area is estimated to require about 3,300 square feet (sf), which would be added on the south and west side of the existing parking area (Figure 3). The excavated area would require minor grading and the removal of approximately 17 trees all under 18 inches in diameter, with the average diameter being 11 inches. Currently the parking area has a gravel surface, though the lot will eventually be paved with asphalt to provide the ability to store parking spots and reduce the long-term maintenance costs. In the long term, trailhead amenities will also be added to include picnic tables, hitching posts, shade and a vault toilet. These additional amenities will be added as funding becomes available.

alternative. Due to the topography of the road along the eastern portion of the road alignment, this alternative would require more extensive engineering in the road corridor to protect the highway. This alternative would have adverse effects on Ape Creek and riparian wetlands from excavation to connect the water and utilities to the existing Ape Creek distribution system.

Figure 4. Alternative alignments considered of water, power and communication lines from the PCT Well to Existing Munson Valley Water Distribution Line utilizing existing highway corridor.

- Location for a well was considered in the Castle Creek drainage along Highway 62 about 6,500 feet (1.23 m) west of the Pacific Crest Road at about 6,050 feet elevation. Castle Creek is in the Pacific Basin. This alternative would require a minimum of 1.5 acres (ac) of additional road and vegetation disturbance for water supply and distribution infrastructure to connect to the existing infrastructure. Power use would increase because of the increased distance to move the water. The potential site is on a curve of the highway. Reach for the distribution and power communication lines to connect to existing infrastructure would require less road disturbance in a disturbed area that is managed as wilderness. Construction at this location would diminish the attributes that support the closure of this area in the wilderness proposal for the Park.
- Furthermore, under this alternative, a retention pond or reservoir would be constructed above the Ape Creek source to provide snowmelt runoff. In the case of a water call, water would be released into Ape Creek at the same rate that water is consumed. To match the volume released into the creek with the volume consumed, the reservoir would require a minimum capacity of 28 acre feet (af) to account for average annual consumption. For peak consumption over a 90-day event season, the reservoir would require a capacity of 41 af. To ensure that sufficient water is available for structural fire protection, essential for historic structures, additional storage capacity would be needed.

- **Water Conservation or Conservation** **Water Conservation** Under this alternative, temporary closures of some facilities could be implemented during peak visitation season (July and August) to reduce overall water use in the park. The NPS could consider limiting visitor use to some facilities to reduce water consumption. This alternative could have significant adverse economic and social impacts to local communities that could extend throughout the region and the State of Oregon.

**Geographic Description**

**Setting:** Crater Lake National Park is located in the High Cascade mountains in Clatsop County in south-central Oregon. The primary year-round road access is Highway 62 from the west and south. The North Entrance near Highway 138 is closed in winter. Highway 138 runs between Roseburg, on Interstate 5 to the northwest, and Highway 97 to the east. The nearest population centers are Prineville, Medford, and Ashland located on Interstate 5 to the southwest, and Clatsop Falls to the southeast of Highway 97. The nearest commercial airport with regular scheduled flights is in Medford. Portland International 250 miles to the north is the largest airport in the region.

**Climate and Precipitation:** The dominant climatic feature at Crater Lake is winter snow that persists at higher elevations throughout much of the year. The average annual snowfall is about 500 inches. Maximum snow depth at Summit Village has been measured at 18 feet. Average annual precipitation (rain and snow) is 69 inches. Snow can fall at any month of the year. Snow at the Summit generally persists through July. During the drought that began in 2011, the snowpack has been measured at 65% of average. In the winter of 2013-14, snowfall was measured at 50% of average.

Prevailing winds are westerly after storms from the Pacific Ocean that provide the bulk of precipitation come from the west.

In January, the average daily high temperature is 34 °F and the average daily low is 18 °F. In July and August, the average daily high temperature is 69 °F and the average daily low is 41 °F.

Global climate change is expected to alter park climate by increasing the amount of precipitation that falls as rain and decreasing the amount of snow. This change could affect the seasonal distribution of groundwater recharge from precipitation and snow melt. Groundwater systems tend to respond much more slowly to short-term variability in climate conditions than do surface water systems (Gardner 1999). Discharge at Auke Creek is likely to be more sensitive to these changes than the McClellan Well. The McClellan Well will remain a viable source of water as long as groundwater levels remain above the elevation of the Summit.

Crater Lake National Park is designated as a class I airshed pursuant to Part C of the Clean Air Act, as amended (42 USC 7401 et seq.). Class I designations are given to areas where air quality is cleaner than the national ambient air quality standards. Class I areas have the most

stringent regulations for the protection of air quality, permit the lowest increments of air quality degradation.

Air quality in the Park is very good to excellent. Primary sources of pollution in the Park are smoke from wildfires, prescribed fires, campfires, and vehicle emissions. Pollution varies seasonally. The primary air quality related values for the Park are the values of the lake and surrounding area from the rim, and other visibility-related values. The high elevation location of the rim generally ensures good visibility. Lamath Falls south of the Park is a nonattainment area for PM<sub>2.5</sub> (particulate matter less than 2.5 microns) due primarily to diversions that trap woodsmoke in the local valley. Nonattainment means that a geographic area has not consistently met the clear air levels set by the Environmental Protection Agency (EPA) in the National Air Quality Standards. The part of Lamath County which the Park is located is excluded from the nonattainment area designated by the EPA. The air quality in Lamath Falls is improved under a nonattainment plan adopted in 2012 by the Oregon Department of Environmental Quality. All other regulated air pollutants in the area surrounding the Park are within federal standards.

Geology, Topography, and Soils: Crater Lake National Park is the remains of Mount Mazama, one of the volcanic peaks of the Cascade Range, which extends from Mount Lassen in northern California to southern British Columbia. Mount Mazama erupted violently about 7,700 years ago. Near vents encircled the peak brought hot flows of pumice, ash, and gas down the steep flanks. The peak subsided under its own weight, leaving a deep caldera. Centuries of melted snow and rain filled the caldera to create the deepest lake in the U.S. The maximum depth is measured at 1,943 feet, with an average depth of 1,500 feet.

The topography of the Park is dominated by volcanic peaks and cones that rise steeply above the surrounding plateau. The highest elevation in the Park is 8,829-foot Mt. Scott east of the rim. The highest elevation on the rim is Barfield Peak (8,054 ft) reached by a trail from the rim Village and Lodge. The volcanic soils of Mt. Mazama are easily eroded, forming canyons, scores, bluffs, and buttes.

Soils include pumice, ash, and cinders. Basalt rocks are harder material that does not weather as easily as other volcanic material ejected in the eruption.

#### Water Resources

Water quality at Crater Lake is excellent. The lake is considered to be the cleanest large body of water in the world, renowned for its spectacular blue color and clarity. Pools and streams that emerge from the slopes of Mount Mazama have excellent water quality. The water from ~~Ashcroft~~ ~~Crater Lake~~ ~~Crater Lake~~ meets EPA drinking water standards without need for additional treatment. However, NPS treats water collected from ~~Ashcroft~~ ~~Crater Lake~~ ~~Crater Lake~~ to ensure that safe drinking water is delivered to the public water distribution system. The water from the C-1 test well also meets EPA primary drinking water standards and is suitable for use in a public drinking water system without further treatment.

The potable water supply is treated through chlorinators at the three booster stations at [Aloe Springs](#), Mammoth, and Mosquito Valley. It complies with Nevada Code to treat water to meet the public Health Service standards.

Snowmelt and rainfall are the primary sources of water for Crater Lake itself and the streams and streams that emerge from Mt. Mammoth. [Aloe Springs](#) at 6000 feet elevation produces year-round flow. Water quantity is measured at the gauge located 0.1 mile downstream from the spring (USGS HUC 18010203, 5,982.65 NV-D29). For the 30-year period of record (water years 1978-2004, 2011-2013), the average discharge is 2.83 cubic feet per second (cfs) for an annual discharge of 2,050 acre-feet/year, adjusted for diversion from the spring. (See Appendix 1 for conversion factors between water quantities and volumes.) Maximum discharge of 18 cfs was recorded on July 6, 1984. A minimum discharge of 0.23 cfs was measured on several days in March and April 2002. In 2013, after several years of low precipitation, the maximum discharge was measured at 6.0 cfs in May, with a minimum discharge of 0.72 cfs on March 30. The highest flows generally occur from mid-June through early July from snowmelt. Minimum flows occur from mid-October through April as snowmelt declines. Several small tributaries contribute to the flow of Aloe Creek below the spring.

The Crater Lake public water system is served by a single point of diversion prior to a sole surface water source at [Aloe Springs](#) supplies the Nevada water for drinking, sanitation, structural fire protection for both historic and non-historic structures, and life safety protection.

The 2011-2013 average annual daily water demand was 21,000 cgd based on meters located at Mammoth area, Inn Dorm, Inn Cafeteria and lift house, and Lodge. In the period from July 2011-2013, seasonal average daily water demand in peak season was 51,000 cgd. Maximum daily use during summer high visitation season is estimated to be 72,000 cgd (about 50 mgd).

The 2013 seasonal average demand from [Aloe Springs](#) source of supply was 53,800 cgd. Volume used from the source was 20% greater than flow measured at the point of use meters. At times, the stored water in the tanks exceeds the demand, and little or no water is demanded from the source. The peak daily volume demanded from the [Aloe Springs](#) source was 148,200 cgd (0.229 cfs) on July 20, 2013. This peak daily volume represents a consolidation of demand to replenish the three storage tank sites after 2-3 days of little or no demand.

Aloe Creek is a headwater tributary of the Good River, which flows into Upper Lamath Lake via Alice Lake and is a major tributary of the Lamath River. There is high demand for water in the Lamath River Basin for residential, agricultural, commercial, and industrial uses. Water is also used to sustain fish and wildlife and for recreation. Oregon follows the prior appropriation doctrine of surface water use to determine water rights. Hence there is not enough water to satisfy all the water rights, water users with senior priorities will receive water, while water users with relatively junior rights will not.

Water rights for the use of surface water for the Lamath River Basin were adjudicated in March 7, 2013 through a Final Order of Determination issued by the Oregon Department of Water Resources. Adjudication is the process of determining the priority date of claims to the use of water. The stakeholders in the adjudication include the Lamath Tribes, private landowners, and the federal government, among others. The adjudication and settlement among the water users has resulted in concerns over the ability of the State to use the [AmeersAme Creek](#) surface water source due to long term reliability and sustainability of Lamath Basin water supplies.

Like most of the region, the Lamath basin is experiencing a drought that began in 2011 and became severe in 2013. A continued drought could require that water uses from surface sources be curtailed for those holding water rights. Curtailed existing water uses is termed a [call on the water rights holder](#).

The NPS holds federal reserved water rights for Ame Creek and its tributaries within the boundary of Crater Lake National Park dating from 1902 and 1932 for preservation and protection of all natural and historic objects, timber and wildlife, and conservation of scenery.

Of the original 730 claims to water from the Lamath Basin, the NPS holds what is considered a senior, but not the most senior, right. The Lamath Tribes hold the most senior claims dating from time immemorial for certain reaches of the major tributaries to Upper Lamath Lake. The good river is one of those tributaries. The Tribes also hold other senior claims for lands within the boundaries of the former Lamath Indian Reservation that carry a 1864 priority date based on the 1864 Lamath Treaty. Most of the Lamath Tribes rights are nonconsumptive and provide for instream retention. Therefore, those rights are not available for lease or transfer for consumptive use.

**Vegetation:** The dominant vegetation at [AmeersAme Creek](#) is lodgepole pine (*Pinus contorta* var. *latifolia*) with some red fir (*Abies magnifica* x *procera*) and montane hemlock (*Tsuga mertensiana*), and scattered western white pine (*Pinus monticola*). The vegetation on the plateau west of [AmeersAme Creek](#) is similar with lodgepole pine more abundant. The flat areas tend to be lodgepole pine dominated, with a greater mixture of species near the riparian areas. As one proceeds up slope, vegetation transitions to montane hemlock. Understorey species include gemmat manzanita (*Arctostaphylos nevadensis*) and long-stoloned sedge (*Carex inops* ssp. *inops*), with higher diversity of herbaceous species around the stream and the headwaters of Ame Creek.

The vegetation in Upper Mosso Valley near H is a mixed montane hemlock-red fir forest, lodgepole pine and occasional subalpine fir (*Abies lasiocarpa* var. *lasiocarpa*). Lush meadows and a network of streams support diverse herbaceous vegetation including arrowleaf groundsel (*Senecio triangularis* var. *triangularis*) and tree false hellebore (*Veratrum viride*) and shrubs such as willow (*Salix* spp.) and montane ash (*Sorbus scopulina* var. *scopulina*). Dry meadows are dominated by grasses including needlegrass (*Achnatherum occidentale*) and squirreltail

(*Elymus elymoides*) and herbaceous species such as lupine (*Lupinus andersonii*), phlox (*Phlox diffusa*), and Cascade aster (*Eucephalus ledophyllus*).

Invasive plant introductions are a documented threat to the diversity of native vegetation in the park. The species most likely to be introduced into the project area include cheat grass (*Bromus tectorum*), smooth brome (*Bromus inermis*), bulbous bluegrass (*Poa bulbosa*), bull thistle (*Cirsium vulgare*), St. John's wort (*Hypericum perforatum*) which is also known as lamath weed, sheep sorrel (*Rumex acetosella*), yellow rocket (*Barbarea vulgaris*), and woolly mullein (*Verbascum thapsus*).

The forest around the CCC well and the existing and obliterated alignment of Highway 62 is dominated by lodgepole pine. The obliterated alignment exhibits sparse regrowth of lodgepole on the roadcut itself with red fir and montane hemlock on the former road shoulders.

The NPS active management vegetation to reduce fire hazard and to improve forest health. Almost a century of fire suppression has created substantial fuel loads and altered functions in some ecological communities that developed in response to wildfires. Park fire crews are creating and maintaining a shaded fuel break approximately 60 feet on either side of Highway 62 between the CCC trailhead and the curve where the old highway has been obliterated. The fuel break reduces the hazard from wildfire for highway users, including park visitors and staff; increases protection for park facilities, employees, and visitors from wildfires in the project area; and provides access for firefighters and highway users who may need to use the highway for egress in the event of a wildfire. Vegetation being removed within the fuel break is primarily small diameter lodgepole pine, and lower limbs (ladder fuels).

Fish and Wildlife: The streams in the project area are generally fishless due to the location above steep falls that are natural fish barriers. A single falls is a fish barrier. Eastern brook trout have been introduced in many park streams, including Annie Creek and its tributary Mossy Creek. Brook trout are now present in stream of Annie Falls and Mossy Creek around Highway 62. Bull trout, a threatened species, is discussed below under threatened and endangered species. The riparian areas along Annie Creek, including the project area, are inhabited by Cascade frogs (*Rana cascadae*), Pacific treefrogs (*Pseudacris regilla*), and western toads (*Anaxyrus boreas*). Long-toed salamanders (*Ambystoma macrodactylum*) are possibly present although no surveys have been done specifically target this species. Birds (resident and migrant) and mammals in the project area include species that commonly occur in similar forest types and elevations throughout the park.

Cascade frogs breed in ponds and move out of the ponds to occur in riparian areas. There are no ponds within the project area that are suitable breeding habitat for this species. Cascade frogs inhabit riparian areas along Annie Creek in the project area. This species does not currently have a protected status but is considered sensitive because of population declines in other western riparian areas, such as Lassen Volcanic in northern California, and because of several concerns about documented declines of amphibian populations worldwide.

Sensitive, threatened, and endangered species: The bull trout (*Salvelinus confluentus*) is a federally listed threatened species that historically occurred in Ahoie Creeks downstream of the project area. Ahoie Falls is a natural barrier that prevented fish from being in the creek in the project area. Because of the historical distribution of bull trout, Ahoie Creeks as far downstream as the falls is designated critical habitat for bull trout. Bull trout (formerly called Doll-Varde trout) have not been documented in Ahoie Creeks for many decades and are assumed to have been extirpated.

Other sensitive species that occur in habitats in the area similar to those in the project area and therefore could potentially be affected include northern spotted owls (*Strix occidentalis caurina*, federally listed as threatened), the gray wolf (*Canis lupus*, federally listed as endangered), and the Pacific fisher (*Pekania [Martes] pennanti*, proposed for listing as federally threatened).

The NPS has monitored northern spotted owls at Crater Lake National Park since the early 1990s. The majority of the suitable habitat within the project area is considered foraging or dispersal habitat. The project area has been surveyed for northern spotted owl following the NPS spotted owl monitoring protocol since 2010 and no spotted owls have been observed. The closest known location of a spotted owl as of 2014 was in the Bear Bluff Owl Site 2.1 miles east of the project area. The last confirmed record was a radio-tagged owl that was observed in 1996.

In 2014, a gray wolf family group (2 adults, 3 pups) was documented denning outside the boundary of the Park. Telemetry data of the male wolf has demonstrated that he has periodically entered the Park. It is currently believed that the primary limiting factor for wolves in this region is availability of deer and elk as a food source. The limited amount of disturbance associated with this project will not have an effect on the deer and elk populations in the Park.

The northern Oregon Cascades population of Pacific fishers are descendants of fishers that were introduced from British Columbia and Minnesota in 1961, and from 1977 to 1981 (Abrams and Lewis 2003, Dreier et al. 2003). The Pacific fisher is regarded as a habitat specialist in the western United States (Bischoff and Powell 1994). Fishers on the west coast occur primarily in mid to lower elevation conifer and mixed conifer-hardwood forests characterized by dense canopies and abundant large trees and snags with cavities, and dog holes (Lofroth et al. 2010). Information on the current distribution of this population on the western boundary of Crater Lake National Park is from data collected during a 6-year telemetry effort (Abrams and Male 2006). More recently, a fisher was documented as part of a study conducted in the summer of 2014. As part of this study, four baited remote cameras were approximately one mile of the project area and left out for three weeks, no fisher were documented. In 2013, an incidental observation of a fisher was reported by Crater Lake National Park's Fire Management Officer that was in the project area.

The Park contains suitable habitat forolverines and Canada lynx (federally listed as threatened) but there are no confirmed observations of these species. The rarity of these species and the ongoing disturbance from human occupation of the project area make it

believe that either species occurs in the project area. The Service published a proposal to list theolver as threatened in August 2014 (89 Fed. Reg. Vol. 79, No. 156, August 13, 2014, 47522-47545).

The Service has recently received petitions to list one bird and one mammal that could occur in the project area.

In April 2013, the Service posted a 90-day finding on a petition to list two populations of Blackbacked Woodpeckers (*Picoides arcticus*), including the Oregon Cascades population. The Service is currently gathering information on this species prior to issuing a 12-month finding on the petition. Blackbacked Woodpeckers have been documented throughout Crater Lake National Park and were observed in 2013 approximately 0.3 miles from the project area (Teche 2014, Teche et al 2011). The blackbacked woodpecker is a cavity-nesting bird that nests in late spring, with nest excavation generally occurring from May to July at Crater Lake National Park. This species is most often associated with burned areas and beetle infested areas, but does use undisturbed forest as well.

In January 2012, the Service posted the 90-day finding on a petition to list the Sierra Nevada red fox (*Vulpes vulpes necator*). At the time of the petition, the distribution of Sierra Nevada red fox was believed to be restricted to two small populations: one in the vicinity of Lassen Peak and the other in the vicinity of Monitor Pass, both in California. More recent surveys have documented this subspecies in several locations in Oregon including Crater Lake National Park where genetic analysis has confirmed the presence of native red fox that we believe are the subspecies Sierra Nevada red fox. In October 2015, the Service announced the determination on the listing of the Sierra Nevada red fox as threatened or endangered species. As part of the determination, the population of Sierra Nevada red fox was subdivided into two distinct population segments, one occurring in southern California (Sierra Nevada population) and a second located in northern California and Oregon (northern Cascades population). It was the determination of the Service that the northern distinct population segment, which includes the population in Crater Lake National Park, did not warrant protection under the Endangered Species Act at this time. Listing of the southern population was determined to be warranted but precluded by higher priority actions and therefore was listed as a Candidate species (80 Fed. Reg. 2015).

Through various methods, the Park has documented Sierra Nevada red fox throughout much of the southern and southeastern portions of the Park. A total of 109 incidental observations, 2 remote camera photographs, and 4 genetic records of this species have been documented as of 2015. The closest observations were at the Mammoth camera trap approximately 0.3 miles from the project area. An additional observation was noted at Odessa Lake, 1.7 miles northeast of the project area. One dead individual was collected in association with a motor vehicle accident on Monitor Valley Road approximately 1.3 miles northeast of the project area. Very little is known about this species in the Park but it is believed to inhabit meadows, dense mature coniferous forest, and talus slopes, and forage on small rodents and lagomorphs such as voles and rabbits.

**Cultural Resources:** Twelve archaeological surveys have been completed within a one-mile radius of A-1 since 1985, primarily in anticipation of projects involving road disturbance. Within this area, a large unexcavated plow site of 86.5 acres became the focus of the most recent survey conducted in 2014. This plow site is larger than the project area because the mile around A-1 corridor contains the highest concentration of prehistoric sites, historic period sites, and isolated finds so far found in Crater Lake National Park. The survey conducted in 2014 (the area of potential effects A-1 for this project) contains several historic period sites and numerous isolated finds. None of these are eligible for listing in the National Register of Historic Places, but the proposed trench for the waterline lies in close proximity to the Fort Yamath Ho-Ho-Loe over a road, a recorded historic period site previously determined eligible for listing in the National Register of Historic Places.

The A-1 lies adjacent to the Fort Yamath Ho-Ho-Loe over a road built in 1865 and used by visitors as the main approach route to Crater Lake for the following 40 years. Much of the road remains evident within Crater Lake National Park and was the subject of an intensive recorded project completed in 2010. Approximately half mile of the road is adjacent to the A-1 and can be protected from impacts associated with proposed project activities. The other historic period roads within or proximate to the A-1 include a half-mile section of Highway 62 constructed in 1926 and abandoned in 1968, and a one-mile route through a former campground. The abandoned road section descends from the present location of Highway 62 toward A-1. Material was pushed down onto the old roadbed in an attempt to hide the scar created by the cut slope. The former campground was initially constructed in 1931, but the road was drastically reconfigured in 1961. Tables, fireplaces, restrooms and other amenities were removed by 1971, so that this site lacks the integrity needed to make it eligible for the National Register of Historic Places.

Portions of the area located between the A-1 entrance station and the bridge over A-1 Creek, but east and south of the Mosso Valley Road served as the site of Park Headquarters between 1903 and 1924. This location also contained visitor facilities erected by the first Park concessionaire in 1907. Called Camp A-1, it was the first Park headquarters were later superseded by several road realignments, and the construction of ranger stations and support facilities by the National Park Service, as well as a Civilian Conservation Corps development called Camp A-1 that operated between 1934 and 1942. The CCC camp eventually gave way to construction of Malama Campground started in 1957, a facility that expanded over the next decade and eventually removed the need for A-1 Campground, located across the Mosso Valley Road in the A-1.

**Visitor Use and Experience:** Visitation to the Park began to increase substantially after World War 2. Since 1947, annual visitation to Crater Lake NP has averaged about 450,000 visitors. In 2014, the Park reported 585,000 recreational visits. The highest number of recorded visits was 615,000 in 2015. The lowest number of visits was 356,500 in 1975, with less than 400,000 visits recorded in 1993 (381,747) and 2006 (388,972). Visitation has increased dramatically in the

Over the past several years due to a combination of factors (including but not limited to increased length of season due to low snow pack and promotion of travel partners.

Visitation is strongly correlated with how much snow is on the ground when the summer visitation season begins and the date when the Rim Drive is closed by a major winter snowfall. The Rim Drive is open to vehicles as soon as snow can be plowed, generally by July 1. Most visitation occurs between July and September, when snow has been plowed from the Rim Drive and trails are clear of snow. July and August are the months with the most visitation with the highest visitation.

The Aerie Creek water treatment station is the primary water source for the park. Visitors cross the Aerie Creek bridge to reach the primary visitor facilities and destinations in the park. The Aerie Creek public water collection and initial distribution infrastructure is located underneath the bridge.

Clear road, the view of the lake from the rim is the primary visitor attraction. In the summer, the Lodge is a major destination for regional, national, and international visitors. In winter, snow around the lake on Rim Drive is a popular activity.

The Pacific Crest National Scenic Trail (PCT) traverses the west side of the park from south to north for 33 miles. The PCT is a major trail that stretches 2,663 miles through the western U.S. from its borders at Mexico and Canada. The PCT through the park (excluding the Rim Trail alternate route) is one of two park trails designated for stock use. The explorer road water well is located in the PCT parking lot located on Highway 62 west of ~~Aerie Creek~~ Aerie Creek.

Park Operations: The existing water source for Crater Lake NP at ~~Aerie Creek~~ Aerie Creek provides water to service areas located at Matama Village, Headquarters/Mosso Valley, and the Rim Village (Table 1).

A groundwater filtration plant at ~~Aerie Creek~~ Aerie Creek collects water to fill Matama tanks and for a booster (pump) station that serves the Mosso Valley and Rim service areas. The Matama tanks store water for operation of the campground, Aerie Creek restaurant, cabins, Visitor Center, and concession employee housing. The ~~Aerie Creek~~ Aerie Creek Booster Station fills the Mosso Valley water tank to supply the HQ Service Area. The headquarters service area supplies water for the visitor center, park headquarters, administrative areas, and employee housing. A booster station at Mosso Valley pumps water from the Mosso Valley tank to fill the parking reservoir to supply the Rim facilities, including the lodge, cafe, gift shop, and visitor center. Each service area has structural fire protection capabilities.

A total of 535,000 gallons is stored for the three service areas. At Matama, 100,000 gallons store water, with 80,000 gallons reserved for fire suppression and the rest available for drinking water, sanitation, and facility operations. The 150,000 gallon tank at Mosso Valley Headquarters serves facilities and stores water to be pumped into the Rim service area.

The 185,000-gallon Crater Lake Reservoir at the rim serves the visitor center, cafe, Lodge, and concession employee housing.

Operations at Headquarters/Moss Valley include administrative, maintenance, visitor protection and law enforcement, and resource management operations at the H area; visitor information, orientation, and interpretive services at the Steel Visitor Center; N employee housing; and the Science and Learning Center.

In the Matama developed area, the campground is located several hundred feet above A Cree. The A Cree Cafe and gift shop, cabins, and camper store are adjacent to the campground but are not as close to the campground as the A Cree. Concession operations are focused on visitor services that occur within developed areas, rather than operations that affect natural and cultural resources. The seasonal laborers for the H Administrative area are south of the employee housing area. The Matama seasonal laborers are southeast of the Matama concession housing area on the south side of Highway 62. Seasonal treatment and disposal represent a major maintenance operation.

Table 1: Comparison of Development Options

Option A	Option B	Option C
200,000 gallons reservoir	150,000 gallons reservoir	185,000 gallons reservoir
Concession Dorms 83 beds	Seasonal housing 11 units (historic structures)	Lodge 80 rooms
Concession 10 RV sites	Seasonal housing 16 duplexes	Lodge restaurant
Campground 216 sites	Steel Circle housing, employee support facilities	Cafeteria
Campground 15 RV sites	Maintenance Building	Visitor Center
Cabins 10 duplex	Administrative Offices	Concession Dorm 98 beds
Restaurant	Visitor Center	
Camper store, showers/restrooms/concession laundry		

**Location/Context:** Crater Lake is Oregon's only national park. The park is a winter-attraction recommended scenic wonder. The N estimates that the park brings in \$132 million annually to local and regional businesses. Seventy-five percent of visitors polled in a 2001 visitor survey said their primary reason for visiting the area was to visit the park.

This section discusses the effects of the alternatives for providing an additional water supply to Crater Lake National Park on natural and cultural resources, park visitors, and park operations. The discussion focuses on the project area, including areas affected by operation and maintenance of the water supply and distribution system. The effects are discussed in relation to other past, present, and reasonably foreseeable actions.

## Definition of Impact

Impacts are a calculated according to the type of impact (beneficial or adverse), the timing and duration of impact (short-term, long-term, one-time, occasional, and repeated) and the severity or intensity of impact (no effect, negligible, minor, moderate, or major).

**Context**—the context of an impact includes consideration of the impacts within the project area, the area as a whole, and local and regional conditions.

**Timing and Duration**—the timing of an impact is also part of its context. For example, removing brush and trees in October does not affect nesting birds but brush in the same area in June could affect a different birds that might be nesting in the vegetation.

The duration of an impact considers whether an effect could have an immediate, the length of time over which an impact occurs, and how long it would be noticeable. Duration is defined as short-term or long-term, although the duration of an effect is related to the resource affected. In general, long-term effects would be those that are repeated over at least several years or that would not be immediately noticeable. Short-term effects would generally be on the order of a year or less, because a year includes one complete growing season for short-lived plants and animals. In the context of resources such as soils or plant communities, for long-lived plants such as trees, or for geological processes such as flooding, long-term refers to effects on the order of decades to centuries.

**Type**—the type of impact describes whether an action could be beneficial or harm a resource. A beneficial effect improves the condition of a resource, protects it from damage or loss, or favors the persistence of a resource. A harmful or adverse effect is one that worsens the condition of a resource, damages or degrades a resource, leads to the loss of the resource, alters it irretrievably to an undesirable state, or changes its essential character so that the resource no longer possesses its inherent or its defining characteristic. Adverse effects are unfavorable to the conservation and preservation of a resource in its original condition.

**Intensity**—intensity, degree, or severity of an impact refers to how much of an effect an action has on a resource and is described as negligible, minor, moderate, or major. Major effects on certain resources may be considered significant. Determining intensity relies on understanding the range of natural variation of a resource. If an action has no effect on a resource, or if the effect is barely noticeable or measurable, the effect is considered negligible. Negligible effects are those that are not noticeable, undetectable, or result in no change to a resource, or that affect so few individuals that the effect cannot be distinguished from the natural variability for a resource.

Significant effects are always noticeable and result in a permanent change to a resource over a large area or to the entire resource.

Levels of change between detectable and significant are described as minor or moderate. Minor changes to a resource are detectable but there is no long-term or permanent alteration of the resource and the changes are within the range of natural variability. Minor effects are generally not noticeable but result in only a slight change to a resource or occur in a small area, and do not change resource function.

Moderate effects are always noticeable, and result in some change to the resource or its function, and occur in several areas. If an action changes the resource completely or a change is irreversible, the effect is considered significant or major. Actions are more likely to result in a gradient of change rather than a distinct level of change, so that some effects may be added minor to moderate to indicate that portions of a resource in different locations might be affected slightly differently by the same action. For natural resources that are distributed discontinuously across a landscape or where individual elements of a resource are not exactly equivalent to other individuals or pieces of the same resource, a range of effects from a single action is likely.

The intensity of an impact also includes consideration of how widespread or local the area of impact would be, the amount of a resource that might be affected, or the number of times an effect would occur. If an action affects all of a resource within the bars, that impact would be considered major or significant.

Intensity of effects on plants or wildlife is based on the number of individuals affected in relation to the total population in the project area, the bar, the reach, and the range of the species. If only a few individuals of a common plant or animal are affected, the impact would be considered detectable. If an action affects more than a few individuals but the effects are within the natural level of variability for a population or a resource, the effect is considered minor. If an action affects many or all individuals and causes changes to populations that are greater than the natural level of variability, the effect is considered moderate.

#### **Historic Cultural Resources**

Cultural resources are defined as archeological resources, prehistoric or historic structures, cultural landscapes, and traditional cultural properties. These resources are called "Historic Properties" when they are either listed or are determined eligible for listing on the National Register of Historic Places under 106 of the National Historic Preservation Act (36 CFR 800, Protection of Historic Properties). Criteria for determining eligibility of listed such resources on the National Register include the following:

- A. that are associated with events that have made a significant contribution to the broad patterns of our history; or
- B. that are associated with the lives of persons significant in our past; or
- C. that embody the distinctive characteristics of a time, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. that have yielded or may be likely to yield, information important in prehistory or history.

potential impacts from this project to cultural resources either listed or eligible to be listed in the National Register of Historic Places were identified and evaluated in accordance with the Advisory Commission on Historic Preservation's regulations implementing 106 of the National Historic Preservation Act (36 CFR 800, *Protection of Historic Properties*) by (1) determining the APO; (2) identifying resources present in the APO that are National Register-listed or eligible; (3) applying the criteria of adverse effect to affected resources; and (4) considering ways to avoid, minimize, or mitigate adverse effects.

Under the Advisory Commission's regulations, a determination of no historic properties affected, adverse effect, or no adverse effect must be made for historic properties. A determination of no historic properties affected means that either there are no historic properties present or there are historic properties present but the project will have no effect on them (36 CFR 800.4(d)(1)). An adverse effect occurs whenever a project compromises, directly or indirectly, one of the seven aspects of integrity (location, design, setting, materials, workmanship, feeling, or association) which make a historic property eligible for listing on the National Register of Historic Places. Adverse effects also include reasonably foreseeable effects caused by the alternatives that would occur later in time, be farther removed in distance or be cumulative (36 CFR 800.5(a)(1)). A determination of no adverse effect means there is an effect, but the effect would not meet the criteria of an adverse effect, i.e., diminish the characteristics of the cultural resource that qualify it for inclusion in the National Register (36 CFR 800.5(b)).

The criteria for characterizing the severity or intensity of impacts to National Register-listed or eligible archeological resources, prehistoric or historic structures, cultural landscapes, and traditional cultural properties are the 106 determinations of effect: no historic properties affected, adverse effect, or no adverse effect. The NHP makes a recommended finding of effect and sends it to State Historic Preservation Office request concurrence. Often these findings will involve protection measures to avoid adverse effects. A 106 determination of effect discussion is included in the environmental consequences section for analysis of impacts to National Register-listed or eligible cultural resources.

Impacts are summarized in the following table:

**Air Quality:** There would be no net effects to air quality under the proposed alternative.

Under the proposed action, there would be temporary and localized adverse effects during construction from dust and emissions generated by construction equipment. Excess dust could be mitigated by water spraying as needed. Vehicle emissions would be limited through use of vehicles licensed to meet state air quality standards. There would be no detectable long-term adverse effects from operation and maintenance of a new water line, or from the existing supply and distribution system.

Cumulative effects on air quality and air quality-related values in the area would result from vehicle traffic, campfires, and smoke from wildfires and prescribed fires in the area and

surrounding area. Smoke from wildfires has the potential for significant adverse effects on air quality and visibility, depending on the size, location, and duration of the fires.

The overall adverse effects on air quality and air quality related values from construction, operation, and maintenance of a water supply and distribution system in the Carpool would be negligible.

Soils: Under the proposed alternative, there would be no net effects to soils from construction.

Under the proposed action, soils would be affected for construction of a well house at the QC trailhead, for installation of new water line and adjacent power and communication lines and adjacent trenches, for installation of utility boxes for power lines along the new water line, and to enlarge the Carpool area to accommodate a horse trailer at the QC trailhead to replace the area affected by the well house.

The 4-inch water line would be buried a minimum of 48 inches deep, requiring a total estimated depth of 54 inches for the trench. The trench is estimated to be a minimum of 18 inches wide. The common utility trench for power and communication lines would be a minimum of 18 inches wide. To accommodate the minimum 3-ft separation required between the two 18-inch wide trenches, the minimum width of disturbance would be 6 feet. Access for heavy equipment needed to excavate the two trenches would require a minimum width of twelve feet.

Under the proposed action, the total length of the trenches in which the water and utilities would be buried would be about 3,940 lf.

The total area of disturbance for trenching for water lines would be approximately 1.1 ac, all of which is currently or previously disturbed for road construction.

The trench would follow the obliterated highway to connect to the existing water line to the Mammoth. The curve of the obliterated highway as constructed as a road cut as the old alignment descends a slope. The road cut was filled with debris and rocks washed onto the road bed and attempt to hide the scar of the road cut. Several large rocks on the surface are estimated to be similar in size to 1-ton rock slope protection (RSP) material. The length of this section of trenching is about 1,800 feet. Removal of debris or large rocks buried in the debris could result in a disturbed area more than twelve feet in width.

~~Under both alternatives, the trench under the highway would require removal and replacement of asphalt at the highway crosswalk. The area of asphalt to be excavated and replaced is estimated to be about 30 ft by 6 ft (150 sf).~~

Soils affected for construction of the well house are already disturbed by the existing QC traveled trailhead Carpool area. Enlarging the Carpool area to allow a horse trailer to make over would affect an additional 3,300 sf adjacent to the existing Carpool area to replace Carpool area lost to the new fenced well house and provide needed trailhead amenities. Soils affected by

trenches for the deep water, power, and communication lines are in the previously disturbed highway corridor. About 1,970 lf of the trenches would occur within the corridor of the existing highway that is routinely maintained, including shoulders, brush, and resurfacing.

Soils affected by trenches would be stockpiled next to the trench and used to backfill the trench. Impacts to soils from construction of a well house at the CC trailhead and trenches along the correct and obliterated highway alignment for deep lines would be localized, long-term, and adverse to the extent that soil disturbance is considered an adverse effect in comparison to undisturbed soil. Additional disturbance to 1.1 acres of soils in a previously disturbed highway corridor is a negligible adverse effect.

Construction equipment would be inspected daily to check for leaks. Potential effects on soils from leaks of petroleum and equipment fluids would be avoided through containment devices. All equipment would be stored, serviced, and fueled on tarps or other containment devices. Any incidental drips would be collected in containers and tarps underneath the equipment and transported out of the park for disposal in an acceptable location. A spill prevention plan would be in place.

Cumulative effects to soils at Crater Lake National Park result from trail maintenance, occasional grading of surfaced roads or routine maintenance of road shoulders adjacent to surfaced roads, periodic excavation for repair or maintenance of facilities such as culverts or utilities, construction of fire lines in the event of wildfires, and from pile burning to reduce hazardous fuels.

The overall effect on soils from deep construction, and continued operation and maintenance of a water supply and distribution system in the park would be negligible.

Topography: None of the alternatives, including construction, would require more than minor alterations to the natural topography. For trenches for a deep water line under the proposed action, the line would be installed along the existing Highway 62 corridor and along the road cut for the obliterated highway. Effects to topography would be long-term and localized within the existing or former highway corridor. The greatest alteration to topography would occur along the road cut of the obliterated highway where rocks and soil have been placed down slope onto the original roadbed and where minor grading is necessary in the excavated parking area. These effects are considered adverse to the extent that existing topography would be slightly altered. However, the topography where the water line and parking area would be installed is previously altered for construction of the highway and other administrative purposes.

Cumulative effects to topography in Crater Lake National Park result primarily from trail and road maintenance; these effects are negligible. There are no reasonably foreseeable proposals for construction in the park that would affect topography.

The effects to topography under the proposed action from deep construction, and operation and maintenance of a water supply and distribution system would be negligible.

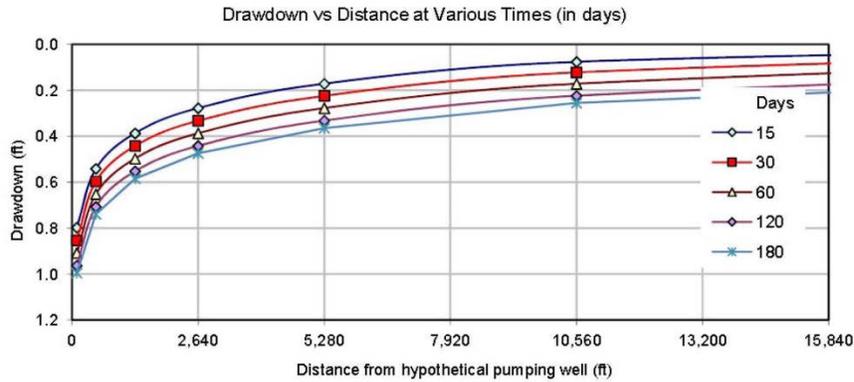

Water Quality research to install the water, power, and communication lines under the proposed action would have very localized effects from runoff of newly disturbed soils for several years until herbaceous plants and grasses re-root in the disturbed soil. If soil disturbance has the potential for runoff into temporary water courses, much could be added to reduce runoff until soils stabilize in one to two years. There are no permanent streams in the project area that would be affected by runoff from newly disturbed soils. Potential effects of water quality from leach of petroleum and equipment fluids would be avoided as described above for soils. Impacts to water quality from construction under the proposed action would be negligible.

Water Quality Under the construction alternative, withdrawals from ~~Apple Creek~~ Apple Creek would continue as in the past. The seasonal 7 day maximum average flow summed from Apple Creek is expected to remain at 55,400 cfd, unless withdrawals are curtailed as a result of an extended drought or other reduction in water supply.

Under the proposed action, withdrawal from the CC well is planned to meet the design demand of 50 cfm under intermittent withdrawal periods which will adequately provide for a 7 Day Average Maximum demand of 55,300 cfd.

Withdrawals from the CC well will lower water levels in the area around the well and may eventually result in a reduction in groundwater discharge to surface streams. Drawdown due to pumping was estimated using a analytical model based on the geologic data and site specific information (i.e., well logs, aquifer tests, water quality samples, geologic maps, etc.). The results of the model indicate that the cone of depression formed by the well after pumping an average daily demand (50,000 cfd) for 180 days could extend over 1 mile from the well site (Figure 5).

Due to the complexity of local geology and position of the well on the Pacific Crest, the magnitude, timing, and location of streamflow deletions cannot be predicted with certainty. Deletions could occur in streams in the Boone Basin, the Lamath Basin, or both. Streamflow deletions will be attenuated by the distance between the well and points of groundwater discharge. The instantaneous deletion to all impacted streams will not exceed the maximum rate from the well and the impacts of the proposed withdrawals from the CC well on Apple Creek will be less than the impacts of diverted water directly from Apple Creek.

Pumping rate (2013 average summer demand) = 50,000 gpd

Figure 5. Potential Drawdown

Vegetation: Under the no action alternative, there would be no construction-related impacts to vegetation.

Under the proposed action, all construction equipment would be required to be cleaned to remove invasive plants or seeds prior to being used in the park.

The vegetation that would be affected by trenching along the road shoulder in the existing hickory corridor and the obliterated hickory alignment is primarily growth of lodgepole pines, hemlocks, and red fir less than 10 feet in height. The vegetation affected by installing the water line from the obliterated hickory alignment to the tower access road includes sparse understory of shrubs such asemat manzanita, herbaceous species, and grasses. Under the proposed action, approximately 1.1 acre of vegetation would be affected by construction of the water line and associated common utility trench from the CC trailhead along the Hickory 62 alignment to the obliterated hickory alignment to connect with the existing water line at the Mamama tower access road.

Approximately 17 lodgepole pines less than 18 inches in diameter and a sparse understory of shrubs would be removed at the CC trailhead to replace lost parking spaces and to allow for maintenance of stock trailers. The vegetation to be removed consists of common species that are widespread in similar habitats in the park. Lodgepole pine along the hickory corridor and in developed areas like the campground are relatively difficult to remove fire hazard and for hazard tree removal in the campground.

After the water line is installed, understory vegetation would recover; small trees would be removed to maintain the functionality of the water line. The effect of native vegetation from construction under the action alternatives is long term from tree removal; short term for understory species; localized in 1.1 acres; adverse; and reversible.

The effect of native vegetation from the potential for introduction of invasive plants that could be carried in construction equipment and soils disturbed by construction is adverse, long term, and minor. All construction equipment is required to be cleaned to remove invasive plants or seeds prior to be used in the park. Repeated construction equipment used in the park to be free of invasive plant seeds, active revegetation of disturbed soils, and monitoring of disturbed soils and control of any invasive plants discovered would reduce the adverse effect of invasive plant introduction to negligible.

Complative effects of vegetation in the park are related to removal of hazard trees in developed areas, fuel reduction projects to reduce fire hazards, wildfires, periodic brush and vegetation maintenance along roads and trails, and the potential for introduction of invasive plant species. The complative effects are long term and adverse, and vary from negligible for routine maintenance of roads and trails; minor to moderate from fuel reduction projects and invasive plant introduction; and major or significant from large or catastrophic wildfires.

The overall effects of vegetation in the park from construction associated with the action alternatives is negligible, assuming that disturbed soils are revegetated and invasive plants are controlled.

**Wildlife:** The proposed action would affect approximately 1.1 ac of wildlife habitat. The habitat along the highway road shoulders is very poor quality because it is subject to noise and disturbance from vehicle traffic on the highway and the vegetation is sparse. The trees to be removed along the obliterated road cut are larger and grow more dense than the trees along Highway 62, and constitute slightly better habitat for nest and migratory birds. The Migratory Bird Conservation Act (MBCA) protects migratory birds and songbirds. Several species protected under the MBCA nest and around the project area. Seasonal restrictions on noise and habitat disturbance to protect nest birds is required under the action alternative. The NMA avoids impacts to birds protected under the MBCA by avoiding removal of vegetation suitable for nest during the primary nesting season for most migratory birds (May 1 to June 31).

Individuals of small sedentary animals that are unable to move away from the construction would be killed or displaced. Larger wildlife would move out of the construction area during heavy equipment operations.

The effect of wildlife under the action alternative would be short term localized disturbance from noise during construction and minor; and long term and significant for those individuals of small sedentary species that are killed or permanently displaced. The overall long term adverse effect on wildlife would be negligible because the construction would occur in a short period of time adjacent to a heavily used highway corridor that is subject to ongoing noise and disturbance from vehicle traffic.

Complative effects of wildlife in the park are associated with ongoing noise and disturbance along roads and administrative and visitor use areas. Some species of wildlife such as oldfield mice, road squirrels and deer in high visitor use areas are fed by visitors or obtain

human food from discarded picnic tables or improperly disposed garbage. These effects are long-term, adverse, and measurable.

The overall effect on wildlife under the action alternatives is short-term disturbance during construction, and short-term loss of poor quality habitat from vegetation removal and soil disturbance along the road corridor. These effects, together with the cumulative effects from other ongoing and reasonably foreseeable actions, are measurable.

Sensitive, Threatened, and Endangered Species: There are no sensitive plants in the project area, and therefore, there would be no effects to sensitive plants from construction under the proposed action.

The proposed action does not have the potential to affect bull trout, or the designated critical habitat.

No suitable habitat for northern spotted owls (nesting, foraging) or Pacific fishers (denning, foraging) would be removed under the proposed action. Noise and disturbance from construction of a water line would occur at the existing CC trailhead and along the hiker area corridor. The trailhead, hiker area corridor, and the abandoned road cut are affected by vehicle noise and hazard fuel reduction projects. Noise and disturbance from construction would be short-term and localized. There would be measurable short-term effects from construction noise and removal of roadside vegetation and small conifers along the abandoned hiker area, and measurable long-term effects on northern spotted owls and Pacific fishers from short-term noise and disturbance related to operation and maintenance of a new water distribution system.

Grasslands are the primary food source for pronghorns. The limited amount of disturbance associated with this project will not have an effect on the deer and elk populations in the area. Therefore, this project will not affect pronghorns.

Based on the availability of abundant habitat throughout the area, this project is not likely to have adverse effects on black-backed woodpeckers.

While the project area is likely to be the home range of several individuals of the Sierra Nevada red fox, the small scope of disturbance associated with this project is unlikely to have a negative effect on this species.

Cultural Resources: Under the no action alternative, there would be no effects on historic resources from construction. Under the no action alternative, if water use in the area is curtailed because of a call on the Antelope Valley water right, the amount of water available for fire protection (both structural and wildfire) would become unpredictable. This would be a potentially significant adverse effect from decreased structural fire protection for historic structures.

The proposed action has the potential to affect the Port of Lamath ~~Ho-He-Lo-Lo~~ over a road which is adjacent to the area where trenching for the waterline is proposed. The proposed road would be protected from disturbance by construction activities with on-site monitoring during proposed disturbance activities. The NPS archaeological survey has determined that the proposed action would not adversely affect the proposed road or alter the features that make it eligible for listing in the National Register of Historic Places. In a letter dated March 30, 2015 (PHO Case No. 15-0268) the Oregon PHO agreed with the NPS determination that no impacts to a significant cultural resource would occur as a result of the proposed action, provided that avoidance recommendations detailed in the NPS report (PHO Co. 27194) are followed.

The proposed action would provide an additional source of water that would be available for fire protection for historic structures from both structural fire and wildfire. This would be a long-term benefit to cultural resources.

Visitor Use and Experience: Under the no action alternative, there would be no effects on visitor use from construction at the CCC trailhead or along the highway. Under the no action alternative, if water use in the park is curtailed because of a call on the ~~Apple-PrussA-Lo-Lo~~ ~~Pruss~~ water right, the amount of water available for structural fire protection would become unpredictable. This would be a potentially significant adverse effect on visitor use and enjoyment of the park, and on homeland and safety from decreased fire protection. In the event of a call on water rights, the no action alternative would have a potentially significant adverse effect from park closures or moderate adverse effect from restricted water use.

Under the proposed action, there would be short-term localized effects on visitors at the CCC trailhead and along the highway during construction. There would be short-term effects from loss of parking or closure of the CCC trailhead during construction. The effects would be greater if construction occurs during the primary visitor season. Construction will be weather-dependent, with persistent deep snow affecting the construction schedule.

The CCC parking area would be expanded sufficiently to accommodate a loss of parking capacity and temporary space for stock trailers. Parking will be better defined and needed trailhead amenities will be added. The result will be long-term beneficial impacts to travelers accessing the CCC from this trailhead.

Under the proposed action, water would be available for structural fire protection. This would be a long-term moderate benefit to visitors from improved life safety related to structural fires in visitor facilities.

Park Operations: Under the no action alternative, there would be no change in the cost of maintenance and operation of the water system.

Under the proposed action, there would be an increase in cost from operation and maintenance of additional water system components. Other costs would increase to move water from the deep well to deliver it to the existing Mamama line or to the ~~Apple-PrussA-Lo-Lo~~ ~~Pruss~~ booster

status. If a fee value is required, there would be a slight increase in cost associated with safety requirements for access to an additional confined space.

**Local Economics:** The proposed alternative has the potential for a significant adverse effect on local and regional economic activities if visitor facilities are closed due to lack of potable water. Restricted water use could result in a moderate adverse effect to visitors shorted the restrooms, car wash, campgrounds, or the local area during the high visitor use season. Under the proposed action, there would be no effect on the local and regional economic activities as potable water would be withdrawn from the well, and visitor facilities would remain open, should surface water withdrawals be curtailed.

#### **Endangered Species Act**

Endangered Species Act Section 7 Consultation Section 7 of the Endangered Species Act of 1973, as amended (16 U.S.C. 1536 (c)), requires that federal agencies consult with the U.S. Fish and Wildlife Service to determine if the proposed action has the potential to affect species listed or proposed for listing under the Endangered Species Act or designated critical habitat. Since 2010, the BLM has surveyed for northern spotted owls (NFO) and around the project area following the methodologies described in the 2012 revised version of the U.S. Fish and Wildlife Service 2011 Protocol for Surveying Proposed Management Activities that may Impact Northern Spotted Owls (U.S. Fish and Wildlife Service 2011). To date, no NFOs have been documented in the project area and the nearest known location of NFO activity is approximately 5 miles to the southeast. In addition, the vegetation that is slated for removal is not classified as NFO habitat for nesting or foraging. Based on these factors, we conclude that this project will have a No Effect on NFOs. While no NFO have been documented to date, because NFO habitat occurs within the vicinity of the project area the site will be sampled following U.S. Fish and Wildlife Service procedures prior to beginning the project to ensure NFOs have not started to occur within the project area.

Cultural Resource Consultation Federal land management agencies are required to consider the effects of their proposed actions on properties listed in, or eligible for inclusion in, the National Register of Historic Places (i.e., historic properties), and allow the Advisory Commission on Historic Preservation a reasonable opportunity to comment as per the National Historic Preservation Act, as amended and its implementing regulations at 36 CFR 800. Agencies are required to consult with federal, state, local, and tribal governments or organizations, identify historic properties, assess adverse effects to historic properties, and evaluate, minimize, or mitigate adverse effects to historic properties while engaged in a federal or federally assisted undertaking (36 CFR part 800). The NPS submitted a survey report and site records to the Oregon state historic preservation officer (SHPO) on February 19, 2015. In a letter dated March 30, 2015 (SHPO Case No. 15-0268) the Oregon SHPO agreed with the NPS determination that no impacts to any significant cultural resources would occur as a result of the proposed action, provided that avoidance recommendations detailed in the NPS report (SHPO Co. 27194) are followed.

Tribal Consultation On October 13, 2015 NPS staff met with the Lamath Tribes Tribal Council to present the project alternatives and evaluate the Government to Government consultation. Tribal concerns included potential impacts to prehistoric archeological sites (some are known to be present in the project area) and potential impacts to surface water flows from ground water withdrawals. The Lamath Tribes hold the most senior claims dating from time immemorial for certain reaches of the major tributaries to Upper Lamath Lake and want to ensure that ground water withdrawals would not impact this claim. The Oregon Water Resources Department (OWRD) oversees ground water permitting in the state and administers the Lamath River Basin Adjudication, though ground water rights have not been adjudicated. The NPS indicated it will keep the Tribes apprised of the permitting process with the Oregon OWRD.

## Appendix 1

### Water Measurement Units

Water measurements are generally described as one of three terms. Generally, they refer to a rate to be diverted, the terms used are cubic feet per second (cfs) or gallons per minute (gpm). They discuss volumes of water, such as amount applied to land, reservoir storage capacity, or earthen construction, the term used is acre foot (af).

#### Flow Rate

One (1) cubic foot per second (cfs) is a rate of water flow that will supply one cubic foot of water per second and is equivalent to flow rates of:

- 7.48 gallons per second
- 448.8 gallons per minute
- 646,272 gallons per day (gpd)
- 1.98 acre feet per day (af/day)

#### Volume

One (1) acre foot is the volume of water that will cover one acre to a depth of one foot and is equal to:

- 1 af = 43,560 cubic feet (cf)
- 1 af = 325,851 gallons (gal)

Crater Lake National Park

**Final** **Management Plan**

**Management Plan**  
**Final**

**May 2016**

**Executive Summary**

Crater Lake National Park (CLNA) is seeking an additional source of potable water to ensure an adequate long-term supply for the park's developed areas. The existing water system is served by a single point of diversion from a sole surface water source at Annie Springs, which feeds Annie Creek. The National Park Service (NPS) proposes to retire an existing exploration well as a new ground water source for potable water that can either supplement the Annie Springs surface water source or provide a sole source of supply to the park water system should Annie Springs not be available. This action is needed to ensure a safe, reliable water supply for domestic and commercial uses at these facilities. The purpose of this action is to supplement the Annie Springs source in CLNA to ensure sufficient water for human consumption, sanitation, life safety, and fire protection, including historic structure protection.

**Background**

The environmental assessment (EA) analyzed two alternatives, including the *No-Action Alternative* (existing water system conditions and maintenance; no new infrastructure) and the *Production Well with Pipeline along Original Highway Alignment Alternative*, which is the selected alternative. The *Production Well with Pipeline along Original Highway Alignment Alternative* is the NPS selected action because it best meets the purpose and need for the project as well as the project objectives to:

- Obtain an alternate source of potable water to prevent a possible shutdown of the existing park water system or a park closure from an extended drought and a possible reduction in the water supply;
- Provide adequate quantity and quality of water;
- Be within reasonable distance of park headquarters and Matama Village where most of the water distribution infrastructure is located; outside the potential boundary established in 1974; and reasonably accessible for maintenance especially under winter conditions.

**EA Findings**

The *Production Well with Pipeline along Original Highway Alignment Alternative* is the NPS selected action as detailed in the Environmental Assessment released in March 2016. No substantive comments were received during public review that required the EA to be modified.

Under the selected action, an exploration well located at the Pacific Crest Trail (PCT) trailhead along Highway 62 will become the sole source of potable water if the Annie Springs source cannot be used because of extreme low flows, water rights call, system maintenance or other

reasons. New infrastructure will be constructed to connect the well to the existing distribution system near Aroe Creeks.

The new production well will fill the Mamama tanks (200,000 gallons total storage) rather than operate the Mamama booster station to bring Aroe Creek water to the Mamama tanks.

The Mamama tanks will supply both the Aroe Creeks Booster Station and the Mamama Service Area. To minimize the disturbance and maximize use of existing infrastructure that provides water to headquarters/Moson Valley area and the town, the existing system will be modified so that the valve sequences (direction of water flow) can be operated from either the Aroe Creeks equipment or from the well. Storage capacity will remain at 585,000 gallons.

To implement this proposal, both new infrastructure and modifications to existing infrastructure will be required. New infrastructure that requires road disturbance includes:

- A well house at the new well, along with concrete pads for a transformer and a portable backhoe generator.
- A trench for a new waterline from the well along the existing and obliterated highway alignments to connect to the existing Mamama tank fill line.
- A common utility trench containing all boxes for conduit, control panel and fiber optic communication lines adjacent to the waterline trench. A fiber optic communication line to control well pump based on tank level reports to Mamama Booster Station and read system parameters (pressure, flow) remotely from Mamama or Aroe Creeks booster stations.
- A new valve vault.
- The expansion of the new trailhead parking area approximately 3,300 sf to accommodate the area lost to well house and to improve vehicle circulation and provide additional amenities.
- Replacement of existing 6-inch gate valve (1.5 sf) on the supply line to from Aroe Creeks to the booster station under Aroe Creek bridge, with (2) new 6-inch gate valves and (1) small check valve (4 sf) prevent splash water backward into the stream during well operations. The existing valves and fittings are partially embedded (50%) within the stream bed behind the river improvement. Replacement valves will be set to be submerged to protect from freezing, but visible to allow for operations, service and inspections.

New infrastructure that will be installed without additional road disturbance includes:

- One 10 horse power 4-inch submersible pump capable of pumping 50 gpm installed in the new well.
- Control modifications inside the existing concrete vault (vault #2) near the Aroe Creek Bridge to connect the section side of Aroe Creeks Booster Station to the 6-inch water distribution line from Mamama water tanks to bypass the Aroe Creeks source supply line to the booster station.
- Control, communications and controls modifications inside Mamama booster station to shut off Aroe Creeks source when the well and Mamama tanks are used as the supply water source.
- Transformer and power supply modifications to the existing on the northern road side near Aroe Creek Bridge to extend underground primary power supply to the new well site.

The water distribution system requires two parallel trenches to connect the well to the existing water distribution system. The water line is laid in one trench and a second common utility trench for power and communication lines used to manage the water flow. A minimum 3-foot separation is required between the two trenches. The width of the disturbance for excavation is estimated to be about 12 feet to accommodate the heavy equipment (excavator) needed. The trenches will be excavated in previously disturbed areas adjacent to the existing and former high-pipeline. Under the proposed action, the trenches will run north from the well under the high-pipeline, turn east along the existing high-pipeline, turn north following the curve of the obliterated old high-pipeline, and turn east above the site of the old Mama Camero road to connect to the existing 4-inch cast iron Mama Camero Line.

The trench under the high-pipeline will require removal and replacement of asphalt at the high-pipeline crossing. Mitigation measures will be in place to reduce erosion and inhibit dispersal and establishment of invasive plants in soils disturbed by construction.

Power supply to the facilities under the proposed action requires a Pacific Power and Light (P&L) right-of-way and a local power consumption for use of the well is estimated to be 32,225 kWh.

Additional parking and space for turning a stock trailer will be added at the CC trailhead to replace the area that will be used for a well house. Additionally, borders will be placed around the well house to protect well infrastructure that will further reduce the available parking. The well parking area is estimated to require about 3,300 square feet (sf), which will be added on the south and west side of the existing parking area. The expanded area will require minor grading and the removal of approximately 17 trees all under 18 inches in diameter, with the average diameter being 11 inches. Currently the parking area has a gravel surface, though the lot will eventually be paved with asphalt to provide the ability to store parking spots and reduce the long-term maintenance costs. In the long term, trailhead amenities will also be added to include picnic tables, hitchhike posts, signage and a vault toilet. These additional amenities will be added as funding becomes available.

The NOD is currently a state permit to withdraw water from the proposed well concurrent with the environmental compliance process. The NOD submitted a water use permit application to the State of Oregon Water Resource Department (WRD) requesting a permit for 0.34 CFS of water for year-round domestic use and 1.0 CFS for fire protection. In a letter from the WRD on October 23, 2015, the WRD was informed that this application was not allowable because Domestic Water Use is defined as the use of water for human consumption, household purposes, domestic animal consumption that is ancillary to residential use of the property or related accessory uses. The letter went on to state that requesting a permit for commercial use may be allowable because pursuant to OAR 690-300-0010(6), commercial water use is defined as the use of water related to the production, sale or delivery of goods, services or commodities by a public or private entity. These uses include, but are not limited to, construction, operation and maintenance of commercial facilities, including fire protection. The WRD resubmitted the application to reclassify the proposed use from residential to commercial and is awaiting a determination. The permitting process will be completed prior to placing the well into service.

## **Minimum Mitigation**

The following mitigation measures will be implemented during the project. The NOD employee assigned to ensure mitigation measures are implemented and effective are noted in brackets.

**1.2.1.2**

- Seasonal restrictions on noise and habitat disturbance to protect nestling birds is required under the actio alternative. The NPO avoids impacts to birds protected under the Migratory Bird Treaty Act by avoiding removal of vegetation suitable for nestling during the primary nesting season for most migratory birds (May 1 to July 31). **Archaeologist**

**1.2.1.3**

- Because northern scotted owls (NPO) habitat occurs within the vicinity of the project area, the site will be sampled following fish and wildlife service guidance prior to beginning the project to ensure NPOs have not started to occupy the project area. **Archaeologist**
- No raptor dens are known to occur in the project area. Should there be evidence of raptors occupying the project area before construction, the fish and wildlife service will be consulted before a project or commences. **Archaeologist**

**1.2.1.4**

- Archaeological sites and sensitive cultural features will be excluded from the project construction boundary along the service road to the water tanks. **Archaeologist**
- Cultural resource monitors will be utilized during the construction phase. **Archaeologist**
- Should cultural resources be discovered during project activities, the project must halt and a professional archeologist must be contacted for identification and evaluation of artifacts. **Archaeologist**

**1.2.1.5**

- The CC parking lot will be expanded and improved to accommodate a loss of parking and triangular space resulting from well infrastructure. **Project CO**

**1.2.1.6**

Two alternatives were evaluated in the EA including the no action alternative and one action alternative. Five additional alternatives were considered but dismissed from further analysis as they did not meet project needs or objectives. Under the No Action Alternative (existing water system conditions and maintenance; no new infrastructure) the primary source of potable water to serve CCLA would continue to be surface water from Apple Creek. No new infrastructure (access roads; power; water treatment, storage, and distribution facilities) would be constructed. Existing storage would remain at 535,000 gallons. The NPO would continue to encourage water conservation by car visitors, staff, and concession employees.

In addition to the alternatives analyzed in the EA, five additional alternatives were considered but dismissed from further review, as they would not meet the purpose, need or objectives of the proposed project. These alternatives consisted of developing a production well at the same location proposed under the selected action, with the well following the modern high quality alignment; a well in the Castle Creek drainage; increasing water storage beyond a pond or

reservoir; has notable water to the park, and; closes park facilities or implements visitor use limits.

The *Production Well with Pipeline along Original Highway Alignment Alternative* is the selected Alternative as described in the previous section.

The proposed project is a water supply project for the city of [redacted]

CDC regulations at 40 CFR section 1508.27 define criteria for determining whether the selected Action will have a significant effect on the human environment. The NCE reviewed each of these criteria give the environmental impacts described in the EA and determined there will be no significant impacts for any of the criteria. The criteria most relevant to this determination are addressed more fully below.

***Impacts that may be both beneficial and adverse. A significant effect may exist even if the Federal agency believes that on balance the effect will be beneficial.***

Implementation of the selected Action will result in some adverse impacts and some beneficial impacts; however, it will not result in any significant adverse impacts.

The proposed project is a water supply project for the city of [redacted]

Under the proposed action, there will be temporary and localized adverse effects during construction. These include dust and emissions generated by construction equipment, impacts to soils and to orchards, and the potential to injure, displace or kill small sedentary animals that are unable to move away from the construction zone. There may also be short-term impacts to the visitor experience from delays resulting from one-way traffic or temporary road closures on Highway 62 during construction.

Longer term adverse impacts from construction under the action alternative include removal of approximately 17 lodgepole pines less than 18 inches in diameter and a sparse understory of shrubs, possible effects on northern spotted owls and Pacific fishers from short-term noise and disturbance related to operation and maintenance of a new water distribution system and an increase in cost from operation and maintenance of additional water system components.

The proposed project is a water supply project for the city of [redacted]

Under the proposed action there will be long-term beneficial impacts. These include an additional source of water will be available for fire protection, include historic structures, from both structural fire and wildfire; the expansion of the CCC parking area that will improve parking, stock trailer access and provide improved visitor amenities; and avoid potential impacts on the local and regional economy resulting from visitor facilities closures, should surface water withdrawals be curtailed.

***Degree of effect on public health or safety***

As noted above, the action alternative will provide an additional source of water for fire protection. An additional benefit not addressed in the EA is having an alternative source of potable water should a source become unavailable due to a maintenance issue, contamination, or some other associated factor.

**Unique characteristics of the geographic area such as proximity to historic or cultural resources, park lands, prime farmlands, wetlands, wild and scenic rivers, or ecologically critical areas**

Archaeological survey for the proposed waterline project was undertaken to meet regulator requirements to identify cultural resources and evaluate potential impacts to these resources within the context of proposed project activities. A literature review, records search, and field survey and documentation of cultural resources identified the types of cultural resources expected to occur. Three sites were documented within the project Area of Potential Effect. None of the sites are eligible for inclusion in the National Register of Historic Places based on location or integrity. An evaluation of potential adverse effects led to several management recommendations and project-specific NHPA compliance statements. Strategies to minimize or prevent possible potential adverse effects to these sites from project activities were developed and will be implemented as noted in the mitigation section.

**Degree to which the action may adversely affect districts, sites, highways, structures, or objects listed in the National Register of Historic Places, or may cause loss or destruction of significant scientific, cultural, or historical resources**

The proposed action has the potential to affect the Fort Lamath stone tower and road which is adjacent to the area where trenching for the waterline is proposed. This road was built in 1865 and is a recorded historic period site previously determined eligible for listing in the National Register of Historic Places. The road will be protected from disturbance by construction fencing with on-site monitors during proposed disturbance activities. The NHPA archaeological survey has determined that the proposed action will not adversely affect the road or alter the features that make it eligible for listing in the National Register of Historic Places.

**Whether the action is related to other actions with individually insignificant, but cumulatively significant, impacts**

Cumulative effects were analyzed in the EA and no significant cumulative impacts were identified.

**The degree to which the action may adversely affect an endangered or threatened species or its habitat that has been determined to be critical under the Endangered Species Act of 1973.**

The proposed action does not have the potential to affect bull trout, or the designated critical habitat. No suitable habitat for northern scotted oaks (nesting, foraging) or Pacific fishers (denning, foraging) will be removed under the proposed action. Scavengers are the primary food source for prairie wolves. The limited amount of disturbance associated with this project will not have an effect on the deer and elk populations in the area. Therefore, this project will not affect prairie wolves. Based on the availability of abundant habitat throughout the area, this project is not likely to have adverse effects on black-backed woodpeckers. While the project area is likely within the home range of several individuals of the Sierra Nevada red fox, the small scope of disturbance associated with this project is unlikely to have a negative effect on this species.

\*\*\*\*\*d\*\*\*\*\*

The EA was made available for public review and comment during a 30-day period ending April 4, 2016. A press release was distributed to several media outlets and electronically to the area

public information email list (contacted over 200 individuals and organizations). The press release was also posted to the BLM website. The press release was highlighted on some media websites including National Parks Traveler, and was featured locally in the Chiloquin News. All media provided by the NPS contacted a link to comment page of the NPS platform, Environment, and Public Comment (EPC) website. A hard copy was made available at BLM headquarters and the press release indicated hard copies could be requested if desired.

Crater Lake National Park staff notified the Lamath Tribes and the Co-Creech Band of the Modoc Tribe of Idaho as required by 36 CFR 800. Hard copies were sent to both tribes along with a letter requesting comment and whether tribe raised concerns about the action. The NPS submitted a survey report and site records related to this project to the Oregon state historic preservation officer (SHPO) on February 19, 2015. In a letter dated March 30, 2015 (SHPO Case No. 150268) the Oregon SHPO agreed with the NPS determination that no impacts to archaeological cultural resources would occur as a result of the proposed action, provided that avoidance recommendations detailed in the NPS report (SHPO Co. 27194) are followed.

The comment was received via EPC and expressed support for the proposed action.

\_\_\_\_\_

As described above, the selected Alternative does not constitute an action meeting the criteria that normally require preparation of an environmental impact statement (EIS). The selected Alternative will not have a significant effect on the human environment in accordance with section 102(2)(c) of NEPA. This finding is supported by the environmental analysis completed and documented in the Environmental Assessment prepared for this project and through the consideration of stakeholder input received during scoping and public review. The NPS also established and is capable of implementing the mitigation described in this document to avoid, reduce or eliminate impacts to BLM resources resulting from implementing the selected Alternative.

Based on the foregoing, the NPS has determined that an EIS is not required for this project and this will not be prepared.

M 2016

National Park Service *Management Policies, 2006* require analysis of potential effects to determine whether or not actions will impair Park resources. The fundamental purpose of the National Park System, established by the Organic Act and reaffirmed by the Federal Authorities Act, as amended, bears with a mandate to conserve Park resources and values. National Park Service managers must always seek ways to avoid, or to minimize to the greatest degree practicable, adverse impacts on Park resources and values.

However, the laws do give the National Park Service the management discretion to allow impacts to Park resources and values when necessary and appropriate to fulfill the purposes of a Park, as long as the impact does not constitute impairment of the affected resources and values. Although Congress has given the National Park Service the management discretion to allow certain impacts with Park, that discretion is limited by the statutory requirement that the National Park Service must leave Park resources and values unimpaired, unless a particular law directly and specifically provides otherwise. The prohibited impairment is an impact that, in the professional judgment of the responsible National Park Service manager, would harm the integrity of Park resources or values, including the opportunities that otherwise would be present for the enjoyment of those resources or values. An impact to a Park resource or value may, but does not necessarily, constitute an impairment. An impact would be more likely to constitute an impairment to the extent that it affects a resource or value whose conservation is:

- necessary to fulfill specific purposes identified in the establishing legislation or proclamation of the Park;
- key to the natural or cultural integrity of the Park; or
- identified as a goal in the Park's general management plan or other relevant National Park Service documents.

An impact would be less likely to constitute an impairment if it is an unavoidable result of an action necessary to preserve or restore the integrity of Park resources or values and it cannot be further mitigated.

The Park resources and values that are subject to the impairment standard include:

- the Park's scenery, natural and historic objects, and wildlife, and the processes and conditions that sustain them, including, to the extent present in the Park: the ecological, biological, and chemical processes that created the Park and continue to act upon it; scenic features; natural visibility, both daytime and at night; natural landscapes; natural soundscape and smells; water and air resources; soils; geologic resources; paleontological resources; archeological resources; cultural landscapes; ethnographic resources; historic and prehistoric sites, structures, and objects; museum collections; and native plants and animals;
- appropriate opportunities to experience enjoyment of the above resources, to the extent that can be done without impairing them;
- the Park's role in contributing to the national identity, the high public value and integrity, and the superlative environmental quality of the National Park System, and the benefit and inspiration provided to the American people by the National Park System; and

- additional attributes encompassed by the specific values and purposes for which the Car is established.

Impact may result from National Car Service activities in maintaining the Car, visitor activities, or activities undertaken by concessioners, contractors, and others operating in the Car. The NPS threshold or consideration of whether there could be impact is based on whether an activity will have significant effects.

Impact findings are not necessary for visitor use and experience, socioeconomic, public health and safety, environmental justice, land use, and Car operations, because impact findings relates back to Car resources and values, and these impact areas are not generally considered Car resources or values according to the Organic Act, and cannot be managed in the same way that an activity can manage Car resources and values. After dismissing the above topics, topics remaining to be evaluated for impact include Air Quality; Soils and Geomorphology; Water Quality and Quantity; Vegetation; Fish and Wildlife; Sensitive, Threatened and Endangered Species and Cultural Resources.

Qualitative resources and values for Crater Lake National Car are discussed in the 2005 Federal Management Plan and 2015 Roadmap Document, these inform the consideration of the specific purposes of the Car in the NPS Act. All but one of the impact topics (Car operations) carried forward in this EA are necessary to fulfill specific purposes identified in the establishing legislation of the Car; are key to the natural or cultural integrity of the Car; and/or are identified in the Car's Federal Management Plan or other relevant NPS planning document.

□ □ □ □ □ □ □ □

Crater Lake National Car is designated as a Class I airshed pursuant to Part C of the Clean Air Act, as amended (42 USC 7401 et seq.). Class I designations are given to areas where air quality is cleaner than the national ambient air quality standards. Class I areas have the most stringent regulations for the protection of air quality, permit the lowest increments of air quality degradation. Primary sources of pollution in the Car are smoke from wildfires, prescribed fires, campfires, and vehicle emissions. Pollution varies seasonally. The primary air quality related values for the Car are the views of the lake and surrounding area from the rim, and other visibility related values. The high elevation location of the rim generally ensures good visibility. Lamath Falls south of the Car is a nonattainment area for PM2.5 (particulate matter less than 2.5 microns) due primarily to diversions that trap woodsmoke in the local valley. Nonattainment means that a geographic area has not consistently met the clear air levels set by the US Environmental Protection Agency (EPA) in the National Ambient Air Quality Standards. The part of Lamath Falls in which the Car is located is excluded from the nonattainment area designated by the EPA. The air quality in Lamath Falls is improved under an attainment plan adopted in 2012 by the Oregon Department of Environmental Quality. All other regulated air pollutants in the area surrounding the Car are within federal standards.

Under the proposed activity, there could be temporary and localized adverse effects during construction from dust and emissions generated by construction equipment. Excess dust could be mitigated by water spraying as needed. Vehicle emissions could be limited through use of vehicles licensed to meet state air quality standards. There could be no detectable long-term adverse effects from operation and maintenance of a new water line, or from the existing supply and distribution system. Therefore, the selected activity will not lead to an impact of air quality.

## Soils and Resources

Crater Lake National Park is the remains of Mount Mazama, one of the volcanic peaks of the Cascade Range, which extends from Mount Lassen in northern California to southern British Columbia. Mount Mazama erupted violently about 7,700 years ago. New vents encircled the peak brought hot flows of pumice, ash, and gas down the steep flanks. The peak subsided under its own weight, leaving a deep caldera. Centuries of melted snow and rain filled the caldera to create the deepest lake in the U.S.

The topography of the park is dominated by volcanic peaks and cones that rise steeply above the surrounding plateau. The highest elevation in the park is 8,829-foot Mt. Scott east of the rim. The highest elevation on the rim is Starfield Peak (8,054 ft) reached by a trail from the rim Village and Lodge. The volcanic soils of Mt. Mazama are easily eroded, forming canyons, scarres, bluffs, and buttes. Soils include pumice, ash, and cinders. Basalt outcrops are harder material that does not weather as easily as other volcanic material ejected in the eruption.

Under the selected action, soils would be affected for construction of a well house at the CC trailhead, for installation of new water line and adjacent power and communication lines in adjacent trenches, for installation of utility boxes for power lines along the new water line, and to enlarge the parking area to accommodate a horse trailer at the CC trailhead to replace the area affected by the well house.

The 4-inch water line would be buried a minimum of 48 inches deep, requiring a total estimated depth of 54 inches for the trench. The trench is estimated to be a minimum of 18 inches wide. The common utility trench for power and communication lines would be a minimum of 18 inches wide. To accommodate the minimum 3-ft separation required between the two 18-inch wide trenches, the minimum width of disturbance would be 6 feet. Access for heavy equipment needed to excavate the two trenches would require a minimum width of twelve feet. Under the selected action, the total length of the trenches in which the water and utility lines would be buried would be about 3,940 lf. The total area of disturbance for trenching for water lines would be approximately 1.1 ac, all of which is currently or previously disturbed for road construction.

The trench would follow the obliterated highway to connect to the existing water line to the Mazama tanks. The curve of the obliterated highway as constructed as a road cut as the old alignment descends a slope. The road cut was filled with debris and rocks washed onto the road bed in an attempt to hide the scar of the road cut. Several large rocks on the surface are estimated to be similar in size to 1-ton rock slope protection (RSP) material. The length of this section of trenching is about 1,800 feet. Removal of debris or large rocks buried in the debris could result in a disturbed area more than twelve feet in width. The trench under the highway would require removal and replacement of asphalt at the highway crossing. The area of asphalt to be excavated and replaced is estimated to be about 30 ft by 6 ft (150 sf).

Soils affected for construction of the well house are already disturbed by the existing CC traveled trailhead parking area. Enlarging the parking area to allow a horse trailer to make over would affect an additional 3,300 sf adjacent to the existing parking area to replace parking area lost to the new fenced well house and provide needed trailhead amenities. Soils affected by trenching for the new water, power, and communication lines are in the previously disturbed highway corridor. About 1,970 lf of the trenching would occur within the corridor of the existing highway that is routinely maintained, including snowblowing, brushing, and resurfacing.

Soils affected by trenching would be stockpiled next to the trench and used to backfill the trench.

Impacts to soils from construction of a well head at the C trailhead and trench along the correct and obliterated hahoa alignment for the lines would be localized, long term, and adverse to the extent that soil disturbance is considered an adverse effect in comparison to undisturbed soil. Additional disturbance to 1.1 acres of soils in a previously disturbed hahoa corridor is a conceivable adverse effect.

Construction equipment would be inspected daily to check for leaks. Potential effects on soils from leaks of petroleum and equipment fluids would be avoided through containment devices. All equipment would be stored, serviced, and fueled on tarps or other containment devices. Any incidental drips would be collected in containers and tarps underneath the equipment and transported out of the area for disposal in an acceptable location. A spill prevention plan would be in place.

None of the alternatives would require more than minor alterations to the natural topography. Effects to topography would be long term and localized with the existing or former hahoa corridor. The greatest alteration to topography would occur along the road cut of the obliterated hahoa where rocks and soil have been placed downslope onto the original roadbed and where minor grading is necessary in the excavated area. These effects are considered adverse to the extent that existing topography would be slightly altered. However, the topography where the water line and area would be installed was previously altered for construction of the hahoa and other administrative purposes.

The overall effect on soils and topography from the construction, and continued operation and maintenance of a water supply and distribution system in the area would be negligible and will not result in the impairment of these resources.

#### 4.1.2.2 Crater Lake Hydrology

Snowmelt and rainfall are the primary sources of water for Crater Lake itself and the streams and streams that emerge from Mt. Mazama. A gage is located at 6000 feet elevation on road near road flow. Water gage is measured at the gage located 0.1 mile downstream from the stream (USGS HUC 18010203, 5,982.65 NV D29). For the 30 year period of record (water years 1978-2004, 2011-2013), the average discharge is 2.83 cubic feet per second (cfs) for an annual discharge of 2,050 acre-feet/year, adjusted for diversions from the stream. (See Appendix 1 for conversion factors between water quantities and volumes.) Maximum discharge of 18 cfs was recorded on July 6, 1984. A minimum discharge of 0.23 cfs was measured on several days in March and April 2002. In 2013, after several years of low precipitation, the maximum discharge was measured at 6.0 cfs in May, with a minimum discharge of 0.72 cfs on March 30. The highest flows generally occur from mid-June through early July from snowmelt. Minimum flows occur from mid-October through April as snowmelt declines. Several small tributaries contribute to the flow of Ape Cree below the stream.

The Crater Lake public water system is served by a single point of diversion prior to a sole surface water source at Ape Creek supply. Ape Cree is a headwater tributary of the Hood River, which flows into Lower Clamath Lake via Ape Cree Lake and is a major tributary of the Clamath River. There is high demand for water in the Clamath River Basin for residential, agricultural, commercial, and industrial uses. Water is also used to sustain fish and wildlife and for recreation.

The NPS holds federal reserved water rights for Aroon Creeks and its tributaries within the boundary of Crater Lake National Park dating from 1902 and 1932 for preservation and protection of all natural and historic objects, timber and wildlife, and conservation of scenery.

Of the original 730 claims to water from the Klamath Basin, the NPS holds what is considered a senior, but not the most senior, right. The Klamath Tribes hold the most senior claims dating from time immemorial for certain reaches of the major tributaries to Upper Klamath Lake. The Hood River is one of those tributaries. The Tribes also hold other senior claims for lands within the boundaries of the former Klamath Indian Reservation that carry a 1864 priority date based on the 1864 Klamath Treaties. Most of the Klamath Tribes rights are nonconsumptive and provide for stream retention. Therefore, those rights are not available for lease or transfer for consumptive use.

Reaches to install the water, power, and communication lines under the selected action could have very localized effects from runoff of eroded disturbed soils for several years until herbaceous plants and grasses re-root in the disturbed soil. If soil disturbance has the potential for runoff into temporary water courses, much could be added to reduce runoff until soils stabilize in one to two years. There are no permanent streams in the project area that could be affected by runoff from eroded disturbed soils. Potential effects on water quality from leach of petroleum and effluent fluids could be avoided as described above for soils. Impacts to water quality from construction under the selected action could be negligible and will not lead to a impairment of these resources.

Under the selected action, withdrawal from the CCR well is planned to meet the design demand of 50 cpm under intermittent withdrawal periods which will adequately provide for a 7 Day Average Maximum demand of 55,300 cpm.

Withdrawals from the CCR well will lower water levels in the area around the well and may eventually result in a reduction in ground water discharge to surface streams. Drawdown due to pumping as estimated using a analytical model based on the geohydrology and site specific information (i.e., well logs, aquifer test, water quality sampling, geologic maps, etc.). The results of the model indicate that the cone of depression formed by the well after pumping at an average daily demand (50,000 cpm) for 180 days could extend over 1 mile from the well site.

Due to the complexity of local geology and position of the well on the Pacific Crest, the magnitude, timing, and location of streamflow depletions cannot be predicted with certainty. Depletions could occur in streams in the Hood Basin, the Klamath Basin, or both. Streamflow depletions will be attenuated by the distance between the well and points of ground water discharge. The instantaneous depletion to all impacted streams will not exceed the pumping rate from the well and the impacts of the selected withdrawals from the CCR well on Aroon Creeks will be less than the impacts of diverted water directly from Aroon Creek. Therefore, the selected action will not lead to a impairment of water quality.

#### Vegetation

The dominant vegetation at Aroon Creek is lodgepole pine (*Pinus contorta* var. *latifolia*) with some red fir (*Abies magnifica* x *procera*) and mountain hemlock (*Tsuga mertensiana*), and scattered western white pine (*Pinus monticola*). The vegetation on the plateau west of Aroon Creek is similar with lodgepole pine more abundant. The flat areas tend to be lodgepole pine dominated, with a greater mixture of species near the riparian areas. As one proceeds south, vegetation transitions to mountain hemlock. Understorey species include gemmat maple and

(*Arctostaphylos nevadensis*) and long-stoloned sedge (*Carex inops* ssp. *inops*), with higher diversity of herbaceous species around the spring and the headwaters of Annie Creek. Invasive plants introduced are a documented threat to the diversity of native vegetation in the area.

Under the selected action, all construction equipment would be required to be cleaned to remove invasive plants or seeds prior to be used in the area. The vegetation that would be affected by trenching along the road shoulder in the existing riparian corridor and the obliterated riparian alluvium is primarily composed of lodgepole pines, hemlocks, and red fir less than 10 feet in height. The vegetation affected by installing the water line from the obliterated riparian down the slope to the tail access road includes sparse understory of shrubs such as gemmat manzanita, herbaceous species, and grasses. Under the selected action, approximately 1.1 acre of vegetation would be affected by construction of the water line and associated common utility trench from the CC trailhead along the Highway 62 alluvium to the obliterated riparian alluvium to connect with the existing water line at the Manama tail access road.

Approximately 17 lodgepole pines less than 18 inches in diameter and a sparse understory of shrubs would be removed at the CC trailhead to replace lost riparian spaces and to allow for maintenance of stock trailers. The vegetation to be removed consists of common species that are undesired in similar habitats in the area. Lodgepole pine along the riparian corridor and in developed areas like the campground are recommended to reduce fire hazard and for hazard tree removal in the campground.

After the water line is installed, understory vegetation would regenerate; small trees would be removed to maintain the functionality of the water line. The effect of native vegetation from construction under the action alternatives is long-term from tree removal; short-term for understory species; localized in 1.1 acres; adverse; and reversible.

The effect of native vegetation from the potential for introduction of invasive plants that could be carried in or construction equipment and in soils disturbed by construction is adverse, long-term, and minor. All construction equipment is required to be cleaned to remove invasive plants or seeds prior to be used in the area. Recommended construction equipment used in the area to be free of invasive plant seeds, active revegetation of disturbed soils, and monitoring of disturbed soils and control of any invasive plants discovered would reduce the adverse effect of invasive plant introduction to reversible.

The overall effects of vegetation in the area from construction associated with the action alternatives is reversible, assuming that disturbed soils are revegetated and invasive plants are controlled. Therefore, the selected action will not lead to a permanent of vegetation.

#### **Wildlife**

The streams in the project area are naturally fishless due to the location above steep falls that are natural fish barriers. Annie Falls is a fish barrier. Western brook trout have been introduced in major area streams, including Annie Creek and its tributary Mosso Creek. Brook trout are the resident stream of Annie Falls and in Mosso Creek around H. Bill trout, a threatened species, is discussed below under threatened and endangered species. The riparian areas along Annie Creek, including the project area, are inhabited by Cascade frogs (*Rana cascadae*), Pacific treefrogs (*Pseudacris regilla*), and western toads (*Axobas boreas*). Long-toed salamanders (*Ambystoma macrodactylum*) are possible resident although toads have been documented specifically target this species. Birds (resident and migrant) and mammals in the

Project area include species that commonly occur in similar forest types and elevations throughout the Car.

Cascade frogs breed in ponds and move out of the ponds to occur in riparian areas. There are no ponds within the project area that are suitable breeding habitat for this species. Cascade frogs inhabit riparian areas along Apple Creek in the project area. This species does not currently have a protected status but is considered sensitive because of population declines in other western riparian areas, such as Lassen Volcanic in northern California, and because of general concerns about documented declines of amphibian populations worldwide.

The selected action would affect approximately 1.1 ac of wildlife habitat. The habitat along the highway road shoulders is very poor quality because it is subject to noise and disturbance from vehicle traffic on the highway and the vegetation is sparse. The trees to be removed along the obliterated road cut are larger and grow more dense than the trees along Highway 62, and constitute slightly better habitat for nest-migrator birds. The Migrator Bird Creation Act (MBA) protects migrator birds and songbirds. Several species protected under the MBA nest and around the project area. Seasonal restrictions on noise and habitat disturbance to protect nest birds is required under the action alternative. The N avoids impacts to birds protected under the MBA by avoiding removal of vegetation suitable for nest during the primary nest season for most migrator birds (March 1-June 31).

Individuals of small sedentary animals that are unable to move away from the construction could be killed or displaced. Larger wildlife could move out of the construction area during heavy equipment operations.

The effect on wildlife under the action alternative would be short-term localized disturbance from noise during construction and minor, and long-term and significant for those individuals of small sedentary species that are killed or permanently displaced. The overall long-term adverse effect on wildlife would be negligible because the construction would occur in a short period of time adjacent to a heavily used highway corridor that is subject to ongoing noise and disturbance from vehicle traffic. In conclusion, there will be no resultant impairment of fish or wildlife as a result of implementing the selected action.

#### Impacts on riparian and riparian-dependent resources

There are no sensitive plants in the project area, and therefore, there would be no effects to sensitive plants from construction under the selected action.

The bull trout (salvelinus confluentus) is a federally listed threatened species that historically occurred in Apple Creek downstream of the project area. Apple Falls is a natural barrier that prevented fish from being in the creek in the project area. Other sensitive species that occur in habitats in the Car similar to those in the project area and therefore could potentially be affected include northern spotted owl (atrix occidentalis calif., federally listed as threatened), the gray wolf (Canis lupus, federally listed as endangered), and the Pacific fisher (Pekania martensae), proposed for listing as federally threatened. The project area has been surveyed for northern spotted owl following the 2002 spotted owl monitoring protocol since 2010 and no spotted owls have been observed. The closest known location of a spotted owl as of 2014 was in the Bear Bluff riparian site 2.1 miles east of the project area. The last confirmed record was a confirmed pair that was observed in 1996. No suitable habitat for northern spotted owls (nesting, foraging) or Pacific fishers (denning, foraging) could be removed under the selected action. Noise and disturbance from construction of a water line

could occur at the existing CC trailhead and along the highway corridor. The trailhead, highway corridor, and the abandoned road cut are affected by vehicle noise and hard fuel reduction projects. Noise and disturbance from construction could be short-term and localized. There could be reversible short-term effects from construction noise and removal of roadsides vegetation and small conifers along the abandoned highway, and reversible long-term effects on northern spotted owls and Pacific fishers from short-term noise and disturbance related to operation and maintenance of a new water distribution system.

In 2014, a pronghorn family group (2 adults, 3 fawns) was documented dewintered outside the boundary of the park. Telemetry data of the male pronghorn has demonstrated that he has periodically entered the park. It is currently believed that the primary limiting factor for pronghorns in this region is availability of deer and elk as a food source. Pronghorns are the primary food source for pronghorns. The limited amount of disturbance associated with this project will not have an effect on the deer and elk populations in the park. Therefore, this project will not affect pronghorns.

The park contains suitable habitat forolverines and Canada lynx (federally listed as threatened) but there are no confirmed observations of these species. The rarity of these species and the ongoing disturbance from human occupation of the project area make it unlikely that either species occurs in the project area.

In April 2013, the BLM posted a 90-day field study permit to list two populations of Black-backed Woodpeckers (codes arctics), including the Oregon Cascades population. Black-backed Woodpeckers have been documented throughout Crater Lake National Park including a pair observed in 2013 approximately 0.3 miles from the project area (Peterson 2014, Peterson et al 2011). The black-backed woodpecker is a cavity-nesting bird that nests in late successional, with nest excavation generally occurring from May to July at Crater Lake National Park. This species is most often associated with burned areas and beetle infested areas, but does use undisturbed forest as well. Based on the availability of abundant habitat throughout the park, this project is not likely to have adverse effects on black-backed woodpeckers.

In January 2012, the BLM posted the 90-day field study permit to list the Sierra Nevada red fox (*Vulpes vulpes* taxator). In October 2015, the BLM approved the determination of the listing of the Sierra Nevada red fox as threatened or endangered species. As part of the determination, the population of Sierra Nevada red fox was subdivided into two distinct population segments, one occurring in southern California (Sierra Nevada population) and a second located in northern California and Oregon (northern Cascades population). It was the determination of the BLM that the northern distinct population segment, which includes the population in Crater Lake National Park, did not warrant protection under the Endangered Species Act at this time. Listing of the southern population was determined to be warranted but precluded by higher priority actions and therefore was listed as a Candidate species (BLM 2015). Through various methods, the park has documented Sierra Nevada red fox throughout much of the southern and southeastern portions of the park. The closest observations were at the Matama campground approximately 0.3 miles from the project area. Very little is known about this species in the park but it is believed to inhabit meadows, dense mature coniferous forest, and talus slopes, and forage on small rodents and lagomorphs such as voles and rabbits. While the project area is likely within the home range of several individuals of the Sierra Nevada red fox, the small scope of disturbance associated with this project is unlikely to have a negative effect on this species.

It is considered all the potential effects to sensitive species, the limited potential for the selected activity to have more than a short-term negligible impact will result in no impairment to any sensitive, threatened or endangered species.

#### Archaeological Resources

Eleven archaeological surveys have been completed within a one-mile radius of A-000 since 1985, primarily in anticipation of projects involving road disturbance. Within this area, a large unsurveyed polygon of 86.5 acres became the focus of the most recent survey conducted in 2014. This polygon is larger than the project area because the mile around A-000 contains the highest concentration of historic sites, historic period sites, and isolated finds so far found in Crater Lake National Park. The survey polygon of 2014 (the area of potential effects for this project) contains several historic period sites and numerous isolated finds. None of these are eligible for listing in the National Register of Historic Places, but the trench for the waterline lies in close proximity to the Port Lamath o-000e over a road, a recorded historic period site previously determined eligible for listing in the National Register of Historic Places.

The A-000 lies adjacent to the Port Lamath o-000e over a road built in 1865 and used by visitors as the main approach route to Crater Lake for the following 40 years. Much of the road remains evident within Crater Lake National Park and was the subject of an intensive recorded project completed in 2010. Approximately half mile of the road is adjacent to the A-000 and can be protected from impacts associated with project activities. The other historic period roads within or proximate to the A-000 include a half mile section of Highway 62 constructed in 1926 and abandoned in 1968, and a o-000e route through a former campground. The abandoned road section descends from the present location of Highway 62 toward A-000. Material was pushed down onto the old roadbed in an attempt to hide the scar created by the cut slope. The former campground was initially constructed in 1931, but the drastically reconfigured in 1961. Tables, fireplaces, restrooms and other amenities were removed by 1971, so that this site lacks the integrity needed to make it eligible for the National Register of Historic Places.

Portions of the area located between the A-000 entrance station and the bridge over A-000e Creek, but east and south of the Mosso Valley Road served as the site of Park Headquarters between 1903 and 1924. This location also contained visitor facilities erected by the first Park concessionaire in 1907. Called Camp A-000, it was the first Park headquarters were later superseded by several road realignments, and the construction of ranger stations and support facilities by the National Park Service, as well as a Civilian Conservation Corps development called Camp A-000 that operated between 1934 and 1942. The CCC camp eventually gave way to construction of Malama Campground started in 1957, a facility that expanded over the next decade and eventually removed the need for A-000 Campground, located across the Mosso Valley Road in the A-000.

The selected activity has the potential to affect the Port Lamath o-000e over a road which is adjacent to the area where trenching for the waterline is proposed. The road could be protected from disturbance by construction fencing with onsite monitoring of road disturbance activities. The NPS archaeological survey has determined that the selected activity would not adversely affect the road or alter the features that make it eligible for listing in the National Register of Historic Places. In a letter dated March 30, 2015 (PHO Case No. 15-0268) the Oregon PHO agreed with the NPS determination that no impacts to any significant cultural resources would occur as a result of the selected activity, provided that

avoidance recommendations detailed in the NRC report (HRO Co. 27194) are followed. Further, there will be no impairment of critical resources from the selected action.

In conclusion, as provided by this analysis, food science and scholarship, advice from subject matter experts and others who have relevant knowledge and experience, and the results of public involvement activities, it is the committee's professional judgment that there will be no impairment of rare resources and values from implementation of the selected action.

# Cantwell, Murray Introduce Bill to Name Olympic National Park Wilderness in Honor of Former Washington Governor and Senator Dan Evans

*Bill would honor the legacy of former Washington Sen. Dan Evans and his work to protect wilderness areas within the state*

[Read the bill text of S. 3028 here.](#)

Washington, D.C. – Today, U.S. Senators Maria Cantwell (D-Wash.) and Patty Murray (D-Wash.) introduced S. 3028, a bill to rename the Olympic Wilderness within Olympic National Park as the “Daniel J. Evans Wilderness,” in honor of former Washington Governor and Senator Dan Evans.

Dan Evans served the state of Washington for more than 50 years, including service as a state legislator, governor and United States Senator. During his time in the U.S. Senate, Evans was the lead sponsor of the Washington Park Wilderness Act of 1988 which designated over 1.5 million acres of wilderness areas in Olympic, North Cascades and Mount Rainier National Parks.

This 1988 law designated 877,000 acres within Olympic National Park as “the Olympic Wilderness.” **The bill proposed by Sens. Cantwell and Murray would rename the Olympic Wilderness as “the Daniel J. Evans Wilderness,” without affecting either the name of Olympic National Park or the management of the designated wilderness.**

Sen. Evans was also a cosponsor of the Washington Wilderness Act of 1984, which designated more than one million acres of national forest land as wilderness within the state.

**“Sen. Dan Evans was instrumental in the passage of more than 2.5 million acres of wilderness designations in our state. Naming the Olympic National Park wilderness in his honor is an appropriate recognition of his many years of work to protect and preserve Washington’s national parks and forests,”** said Sen. Cantwell, ranking member of the Energy and Natural Resources Committee.

**“Throughout his decades in public service, former U.S. Sen. Dan Evans was a champion of Washington state’s special places,”** said Sen. Murray. **“He played a pivotal role in the passage of the 1984 and 1988 Washington Wilderness Acts, and knew these wild places personally as an avid outdoorsman. I cannot think of a better way to honor his legacy than to rename the incredible Olympic National Park Wilderness the Daniel J. Evans Wilderness.”**

Members of the Washington delegation in the U.S. House of Representatives introduced companion legislation in their chamber, H.R. 5397. Each member of the delegation sponsored the bill, including U.S. Reps. Suzan DelBene (D-Wash.), Dennis Heck (D-Wash.), Jaime Herrera Beutler (R-Wash.), Derek Kilmer (D-Wash.), Rick Larsen (D-Wash.), Jim McDermott (D-Wash.), Cathy McMorris Rodgers (R-Wash.), Dan Newhouse (R-Wash.), Dave Reichert (R-Wash.) and Adam Smith (D-Wash.).

Sen. Cantwell hopes to hold a hearing on the Senate bill in the Energy and Natural Resources Committee this month. Stay tuned for more details on the hearing schedule at [www.energy.senate.gov](http://www.energy.senate.gov).

# Cantwell, Murray Introduce Bill to Name Olympic National Park Wilderness in Honor of Former Washington Governor and Senator Dan Evans

*Bill would honor the legacy of former Washington Sen. Dan Evans and his work to protect wilderness areas within the state*

[Read the bill text of S. 3028 here.](#)

Washington, D.C. – Today, U.S. Senators Maria Cantwell (D-Wash.) and Patty Murray (D-Wash.) introduced S. 3028, a bill to rename the Olympic Wilderness within Olympic National Park as the “Daniel J. Evans Wilderness,” in honor of former Washington Governor and Senator Dan Evans.

Dan Evans served the state of Washington for more than 50 years, including service as a state legislator, governor and United States Senator. During his time in the U.S. Senate, Evans was the lead sponsor of the Washington Park Wilderness Act of 1988 which designated over 1.5 million acres of wilderness areas in Olympic, North Cascades and Mount Rainier National Parks.

This 1988 law designated 877,000 acres within Olympic National Park as “the Olympic Wilderness.” **The bill proposed by Sens. Cantwell and Murray would rename the Olympic Wilderness as “the Daniel J. Evans Wilderness,” without affecting either the name of Olympic National Park or the management of the designated wilderness.**

Sen. Evans was also a cosponsor of the Washington Wilderness Act of 1984, which designated more than one million acres of national forest land as wilderness within the state.

**“Sen. Dan Evans was instrumental in the passage of more than 2.5 million acres of wilderness designations in our state. Naming the Olympic National Park wilderness in his honor is an appropriate recognition of his many years of work to protect and preserve Washington’s national parks and forests,”** said Sen. Cantwell, ranking member of the Energy and Natural Resources Committee.

**“Throughout his decades in public service, former U.S. Sen. Dan Evans was a champion of Washington state’s special places,”** said Sen. Murray. **“He played a pivotal role in the passage of the 1984 and 1988 Washington Wilderness Acts, and knew these wild places personally as an avid outdoorsman. I cannot think of a better way to honor his legacy than to rename the incredible Olympic National Park Wilderness the Daniel J. Evans Wilderness.”**

Members of the Washington delegation in the U.S. House of Representatives introduced companion legislation in their chamber, H.R. 5397. Each member of the delegation sponsored the bill, including U.S. Reps. Suzan DelBene (D-Wash.), Dennis Heck (D-Wash.), Jaime Herrera Beutler (R-Wash.), Derek Kilmer (D-Wash.), Rick Larsen (D-Wash.), Jim McDermott (D-Wash.), Cathy McMorris Rodgers (R-Wash.), Dan Newhouse (R-Wash.), Dave Reichert (R-Wash.) and Adam Smith (D-Wash.).

Sen. Cantwell hopes to hold a hearing on the Senate bill in the Energy and Natural Resources Committee this month. Stay tuned for more details on the hearing schedule at [www.energy.senate.gov](http://www.energy.senate.gov).

[Read the bill text of S. 3028 here.](#)

Washington, D.C. – Today, U.S. Senators Maria Cantwell (D-Wash.) and Patty Murray (D-Wash.) introduced S. 3028, a bill to rename the Olympic Wilderness within Olympic National Park as the “Daniel J. Evans Wilderness,” in honor of former Washington Governor and Senator Dan Evans.

Dan Evans served the state of Washington for more than 50 years, including service as a state legislator, governor and United States Senator. During his time in the U.S. Senate, Evans was the lead sponsor of the Washington Park Wilderness Act of 1988 which designated over 1.5 million acres of wilderness areas in Olympic, North Cascades and Mount Rainier National Parks.

This 1988 law designated 877,000 acres within Olympic National Park as “the Olympic Wilderness.” **The bill proposed by Sens. Cantwell and Murray would rename the Olympic Wilderness as “the Daniel J. Evans Wilderness,” without affecting either the name of Olympic National Park or the management of the designated wilderness.**

Sen. Evans was also a cosponsor of the Washington Wilderness Act of 1984, which designated more than one million acres of national forest land as wilderness within the state.

**“Sen. Dan Evans was instrumental in the passage of more than 2.5 million acres of wilderness designations in our state. Naming the Olympic National Park wilderness in his honor is an appropriate recognition of his many years of work to protect and preserve Washington’s national parks and forests,”** said Sen. Cantwell, ranking member of the Energy and Natural Resources Committee.

**“Throughout his decades in public service, former U.S. Sen. Dan Evans was a champion of Washington state’s special places,”** said Sen. Murray. **“He played a pivotal role in the passage of the 1984 and 1988 Washington Wilderness Acts, and knew these wild places personally as an avid outdoorsman. I cannot think of a better way to honor his legacy than to rename the incredible Olympic National Park Wilderness the Daniel J. Evans Wilderness.”**

Members of the Washington delegation in the U.S. House of Representatives introduced companion legislation in their chamber, H.R. 5397. Each member of the delegation sponsored the bill, including U.S. Reps. Suzan DelBene (D-Wash.), Dennis Heck (D-Wash.), Jaime Herrera Beutler (R-Wash.), Derek Kilmer (D-Wash.), Rick Larsen (D-Wash.), Jim McDermott (D-Wash.), Cathy McMorris Rodgers (R-Wash.), Dan Newhouse (R-Wash.), Dave Reichert (R-Wash.) and Adam Smith (D-Wash.).

Sen. Cantwell hopes to hold a hearing on the Senate bill in the Energy and Natural Resources Committee this month. Stay tuned for more details on the hearing schedule at [www.energy.senate.gov](http://www.energy.senate.gov).

# Cantwell, Murray Introduce Bill to Name Olympic National Park Wilderness in Honor of Former Washington Governor and Senator Dan Evans

*Bill would honor the legacy of former Washington Sen. Dan Evans and his work to protect wilderness areas within the state*

[Read the bill text of S. 3028 here.](#)

Washington, D.C. – Today, U.S. Senators Maria Cantwell (D-Wash.) and Patty Murray (D-Wash.) introduced S. 3028, a bill to rename the Olympic Wilderness within Olympic National Park as the “Daniel J. Evans Wilderness,” in honor of former Washington Governor and Senator Dan Evans.

Dan Evans served the state of Washington for more than 50 years, including service as a state legislator, governor and United States Senator. During his time in the U.S. Senate, Evans was the lead sponsor of the Washington Park Wilderness Act of 1988 which designated over 1.5 million acres of wilderness areas in Olympic, North Cascades and Mount Rainier National Parks.

This 1988 law designated 877,000 acres within Olympic National Park as “the Olympic Wilderness.” **The bill proposed by Sens. Cantwell and Murray would rename the Olympic Wilderness as “the Daniel J. Evans Wilderness,” without affecting either the name of Olympic National Park or the management of the designated wilderness.**

Sen. Evans was also a cosponsor of the Washington Wilderness Act of 1984, which designated more than one million acres of national forest land as wilderness within the state.

**“Sen. Dan Evans was instrumental in the passage of more than 2.5 million acres of wilderness designations in our state. Naming the Olympic National Park wilderness in his honor is an appropriate recognition of his many years of work to protect and preserve Washington’s national parks and forests,”** said Sen. Cantwell, ranking member of the Energy and Natural Resources Committee.

**“Throughout his decades in public service, former U.S. Sen. Dan Evans was a champion of Washington state’s special places,”** said Sen. Murray. **“He played a pivotal role in the passage of the 1984 and 1988 Washington Wilderness Acts, and knew these wild places personally as an avid outdoorsman. I cannot think of a better way to honor his legacy than to rename the incredible Olympic National Park Wilderness the Daniel J. Evans Wilderness.”**

Members of the Washington delegation in the U.S. House of Representatives introduced companion legislation in their chamber, H.R. 5397. Each member of the delegation sponsored the bill, including U.S. Reps. Suzan DelBene (D-Wash.), Dennis Heck (D-Wash.), Jaime Herrera Beutler (R-Wash.), Derek Kilmer (D-Wash.), Rick Larsen (D-Wash.), Jim McDermott (D-Wash.), Cathy McMorris Rodgers (R-Wash.), Dan Newhouse (R-Wash.), Dave Reichert (R-Wash.) and Adam Smith (D-Wash.).

Sen. Cantwell hopes to hold a hearing on the Senate bill in the Energy and Natural Resources Committee this month. Stay tuned for more details on the hearing schedule at [www.energy.senate.gov](http://www.energy.senate.gov).

---

Good Afternoon,

Thank you for the first set of talking points. We look forward to receiving the rest later today.

Having reviewed what you sent, I have a few comments and additional language in red font I am hoping you can review and address and return to us by COB tomorrow. Please let me know if that presents a problem.

I am available if you have any questions.

Thanks,

Jocelyn

**Subject:** Talking Points on Legislative Riders

Rita and Jocelyn,

As requested, attached are talking points on the House riders requested. We are sending them to you as they are ready. We are waiting for additional information on the rest and will send them as soon as they are completed. The list below shows you the status of what you are getting now (in bold) and what you can expect to receive later today.

Thank you.

Sec. 114 Sage Grouse (FWS)

Sec. 115 Water Conveyances (BLM)

Sec. 118 Fish Hatchery Programs (FWS)

**Sec. 119 Reissuance of Final Rules (FWS)**

Sec. 120 Stream Buffer (OSMRE)

Sec. 121 Bottled Water (NPS)

**Sec. 122 Oil and Gas Royalties (BLM)**

**Sec. 123 Designation (NPS)**

Sec. 124 Drilling Margins (BSEE)

Sec. 125 Tribal Recognition (BIA)

Sec. 420 Funding Prohibition (regulate lead content) EPA

**Sec. 428 Hunting, Fishing, and Recreational Shooting on Federal Land (BLM)**

**Sec. 432 Availability of Vacant Grazing Allotments (BLM)**

**Sec. 433 Protection of Water Rights (BLM)**

**Sec. 436 Social Cost of Carbon**

Sec. 437 (Worker Protection Standards-Pesticides- *FWS doesn't have any comments*)

Sec. 440 Royalty Rates (ONRR)

**Sec. 441 Program Review (BLM)**

**Sec. 11 Reissuance of Final Rules (FWS)**

*Before the end of the 60-day period beginning on the date of the enactment of this Act, the Secretary of the Interior shall reissue the final rule published on December 28, 2011 (76 Fed. Reg. 81666 et seq.) and the final rule published on September 10, 2012 (77 Fed. 20 Reg. 55530 et seq.), without regard to any other provision of statute or regulation that applies to issuance of such rules. Such reissuances (including this section) shall not be subject to judicial review.*

**Talking Points Bullets**

- The Department strongly opposes Section 119 in the House mark.
- This language would direct the Service to reinstate the final rules to delist gray wolves in Wyoming and in the western Great Lakes states, both of which were vacated by the courts, and then shield those actions from any further judicial review.
- The Service continues to believe the science-based decision to delist was correct, **but** opposes legislatively adding or removing species from the list of threatened and endangered species protected under the **ESA** as it **circumvents the established process**.

**Commented [HJD1]:** Isn't your point that while the science you have supports delisting, you oppose delisting legislatively and circumventing the established process. While this works for gray wolves, this is setting a precedent which we don't want in place for future species.

### Sec. 1 Oil and Gas Royalties (BLM)

*None of the funds made available by this Act may be used to finalize, implement, or enforce the Bureau of Land Management's proposed rule regarding Waste Prevention, Production Subject to Royalties, and Resource Conservation published February 8, 2016*

#### Key Points

- The Department strongly opposes Section 122 in the House mark.
- The proposed language would prevent the BLM from meeting its statutory obligations under the Mineral Leasing Act to ensure operators "use all reasonable precautions to prevent waste of oil or gas". The BLM would be prevented from modernizing the existing, more than 30-year-old oil and gas production rules to bring them in line with technological advancement in the industry.
- States, Tribes and federal taxpayers would lose royalty revenues when natural gas is wasted. [a 2010 Government Accountability Office \(GAO\) report estimates](#) \$23 million annually in royalty revenue **could be lost** for the Federal government and the States that share.
- Under this provision, the BLM would also be prevented from updating existing regulations consistent with the statutory authority in the Mineral leasing Act which specifies a royalty rate at or above 12.5 percent.
- The BLM would have no discretion to raise the royalty rate as conditions change. This inconsistency has been highlighted in findings and recommendations in audits from the GAO and the Department's Office of the Inspector General.

**Commented [HJD2]:** What is the background on this report? Is this estimate for all royalties or only natural gas since that is what you discuss being wasted?

### **Sec. 123 Designation (NPS)**

*(a) IN GENERAL.—None of the funds made available in this Act may be used to take any action to designate a Federal property for inclusion on, or to add a Federal property to, the National Register of Historic Places, or to operate or maintain a property on that registry, if the managing agency of that Federal property objects to such designation or inclusion, including actions related to—*

- (1) cooperative agreements;*
- (2) general administration;*
- (3) maintenance of records and agreements; and*
- (4) any other functions necessary to designate, add, operate, or maintain such Federal property.*

*(b) EXCEPTION.—The prohibition in subsection (a) shall not apply to actions related to a managing agency request for expedited removal of Federal property from the National Register of Historic Places for reasons of national security.*

### **Talking Points/Bullets**

- The Department opposes section 123 in the House mark.
- This provision would prohibit the NPS from managing the National Register of Historic Places in all cases where the managing agency of a Federal property objected for any reason to its designation or inclusion.
- Listing a property on the National Register of Historic Places, or designating it as a National Historic Landmark, does not limit a Federal agency's decision-making authority.
- Decisions on how to manage the property, informed by the evaluation of its significance and integrity, remain the responsibility of the agency with jurisdiction over that property.
- The NPS is not aware of any specific instance where such a designation has adversely affected national security.
- Enactment of this section could lead to a fundamental weakening of highly successful and widely admired programs Congress intended to help recognize and protect our shared heritage.

**Sec. 4 ☐ Hunting ☐ Fishing ☐ and Recreational Shooting on Federal Land (BLM)**

*(a) LIMITATION ON USE OF FUNDS.—None of the funds made available by this or any other Act for any fiscal year may be used to prohibit the use of or access to Federal land (as such term is defined in section 3 of the Healthy Forests Restoration Act of 2003 (16 U.S.C. 6502)) for hunting, fishing, or recreational shooting if such use or access—*  
*(1) was not prohibited on such Federal land as of January 1, 2013; and*  
*(2) was conducted in compliance with the resource management plan (as defined in section 101 of such Act (16 U.S.C. 6511)) applicable to such Federal land as of January 1, 2013.*

*(b) TEMPORARY CLOSURES ALLOWED.—Notwithstanding subsection (a), the Secretary of the Interior or the Secretary of Agriculture may temporarily close, for a period not to exceed 30 days, Federal land managed by the Secretary to hunting, fishing, or recreational shooting if the Secretary determines that the temporary closure is necessary to accommodate a special event or for public safety reasons. The Secretary may extend a temporary closure for one additional 90-day period only if the Secretary determines the extension is necessary because of extraordinary weather conditions or for public safety reasons.*

*(c) AUTHORITY OF STATES.—Nothing in this section shall be construed as affecting the authority, jurisdiction, or responsibility of the several States to manage, control, or regulate fish and resident wildlife under State law or regulations.*

**Tal ☐ ing Points ☐ Bullets**

- The Department opposes Section 428 in the House mark.
- This language limits the authority of the BLM's field managers at the local level and is inconsistent with guiding legislation for the Fish and Wildlife Service.
- The provision removes the opportunity for BLM field managers to use the collaborative planning processes required by National Environmental Policy Act (NEPA).
  - Limiting an extension of a temporary closure for ☐one additional 90-day period only☐limits the discretionary authority of BLM field managers, and does not afford the agency or the public sufficient time or flexibility to develop effective long-term solutions.
- This language prohibits the BLM from establishing any permanent closures to hunting or shooting through its public land use planning process.
  - Rapid population increases in the West have led to greater conflicts among users of the public lands and between recreationists and adjacent landowners. The public land use planning process is BLM's best tool to address long-term resource conflicts, resource protection needs, and public safety issues associated with recreational target shooting.

- In some areas, concerns regarding public safety, wildland fire risk, and resource protection may well extend longer than the 30-day period provided for in the language, and the inability to establish longer-term or permanent closure may put lives, property, or resources at risk.
- The proposed language also severely limits BLM's ability to protect natural and cultural resources and human health and safety.
- The House proposed language is in conflict with the National Wildlife Refuge System Improvement Act of 1997 **provides Americans opportunities to participate in compatible wildlife-dependent recreation, including fishing and hunting, on System land to better appreciate the value of and need for fish and wildlife conservation. Conservation is the overarching principle establishing the Refuge System.**
- Limiting authority to update and change regulations for refuge hunting and fishing programs opened after January 1, 2013, would prohibit refuge managers from updating hunting and fishing regulations in response to unpredictable factors that may affect wildlife populations, refuge resources, or public safety.
  - Permanent closures to hunting on NWRS lands are extremely rare, with the last occurring on September 11, 2012, at Hakalau Forest National Wildlife Refuge (HI), where the presence of an endangered species on the refuge caused hunting to no longer be a compatible activity.
  - If a refuge no longer has adequate staff to safely manage hunting, fishing, and other wildlife-dependent recreational uses, the refuge manager may need to close the program or promulgate regulations to ensure public safety.
- The language related to temporary closures in the draft Bill **sets a time limitation which Congress did not include in Section 8 (k) of the Improvement Act which did not constrain the Secretary's ability to temporarily suspend, allow or initiate any activity to protect health and safety of the public or any fish and wildlife population. In order to meet the compatibility standards and procedures outlined in Section 6 of the Improvement Act, refuge managers may have to issue a temporary closure for longer than 90 days.**
- **Section 5 (3)(K) of the Improvement Act clearly states it is the policy of the United States to provide increased opportunities for families to experience compatible wildlife-dependent recreation, particularly opportunities for parents and their children to safely engage in traditional outdoor activities, such as fishing and hunting; This language is unnecessary because this objective is already codified.**

**Commented [HJD3]:** Is there a reason the objectives of the Improvement Act are not highlighted to counter the need for this language? Please see language added directly from the Act.

### **Sec. 43 Availability of Vacant Grazing Allotments (BLM)**

*The Secretary of the Interior, with respect to public lands administered by the Bureau of Land Management, and the Secretary of Agriculture, with respect to the National Forest System lands, shall make vacant grazing allotments available to a holder of a grazing permit or lease issued by either Secretary if the lands covered by the permit or lease or other grazing lands used by the holder of the permit or lease are unusable because of drought or wildfire, as determined by the Secretary concerned. The terms and conditions contained in a permit or lease made available pursuant to this section shall be the same as the terms and conditions of the most recent permit or lease that was applicable to the vacant grazing allotment made available. Section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) shall not apply with respect to any Federal agency action under this section.*

### **Talking Points/Bullets**

- The Department opposes Section 432 in the House mark.
- This provision would mandate that BLM make vacant grazing allotments available to the holders of grazing permits and leases.
- Currently, BLM has the authority to make vacant grazing allotments available for permittees on a discretionary basis where the permittee is adversely impacted by wildland fire, drought or a conflict with bighorn sheep.
- The provision exempts the issuance of permits for vacant grazing allotments from National Environmental Policy Act (NEPA) analysis when NEPA review is an essential part of BLM's decision making. A failure to perform NEPA analysis could result in unintended conflicts in the use of the vacant allotment.
- BLM does not support a requirement to return livestock use to a vacated allotment under terms and conditions that are the same or more favorable to the permittee without a NEPA review because of the risk of significant impact to resources in the vacant allotment(s).
- Consultations required under 43 CFR 4130.2(b) with the State having lands or responsible for managing resources within the area when renewing, modifying, or issuing a grazing permit, would become meaningless. Consultation could not provide substantive results because the language requires that the vacant allotment be made available, without any exception, on terms and conditions that are the same or more favorable as the most recently issued permit or lease.
- The Department supports retaining current authority to make vacant allotments available for permittees on a discretionary basis so that:

- the BLM authorized officer retains the option to exercise his/her discretion to conduct a NEPA analysis to determine if there are potential resource concerns/issues prior to making these allotments available for use;
- land health standards and resource objectives are not compromised;
- making these vacant allotments available for grazing use is consistent with existing land use plans; and,
- consultation with State wildlife agencies is conducted in good faith and with mutually understood outcomes.

### Sec. 433 Protection of Water Rights (BLM)

*None of the funds made available in this or any other Act may be used to condition the issuance, renewal, amendment, or extension of any permit, approval, license, lease, allotment, easement, right-of-way, or other land use or occupancy agreement on the transfer of any water right, including sole and joint ownership, directly to the United States, or any impairment of title, in whole or in part, granted or otherwise recognized under State law, by Federal or State adjudication, decree, or other judgment, or pursuant to any interstate water compact. Additionally, none of the funds made available in this or any other Act may be used to require any water user to apply for or acquire a water right in the name of the United States under State law as a condition of the issuance, renewal, amendment, or extension of any permit, approval, license, lease, allotment, easement, right-of-way, or other land use or occupancy agreement.*

### Talking Points Bullets

- The Department opposes Section 433 in the House mark.
- This provision prohibits the use of funds for conditioning of any permit, approval, license, lease, allotment, easement, right-of-way, or other land use or occupancy agreement on the transfer or relinquishment of any water right granted under State law.
- **No BLM program or policy requires a permittee, lessee, or proponent to relinquish water rights to the Federal government as a condition of a permit or lease.**
- This provision, however, could significantly impact the BLM's ability to manage water related resources vital to many multiple uses on public lands.
- Mitigation of impacts from the spectrum of land uses that occur on the public lands is critical to maintaining the health of land and water systems in a multiple use environment.
- In many cases, the BLM uses its authority under the Federal Land Policy and Management Act to consider terms and conditions, including various types of mitigation activities, as part of providing authorization to use the public land.
- Water rights may be an appropriate aspect of a mitigation package. This provision would prohibit the BLM from considering water rights as part of the mitigation package. Further, at the completion of a project or other authorization where water rights were a necessary part of the authorized project, the BLM may want to use the water rights for land management purposes instead of letting them expire.
- It may be a reasonable condition of the approval for BLM to negotiate for the transfer of those rights to the BLM when the authorization expires.
- Additionally, the restrictions imposed by this provision would hamper the BLM's cooperative work with permittees, licensees, and lessees.

Commented [HJD4]: Then how do you currently manage?

Commented [HJD5]: Please elaborate with specifics on how what you mean by significant impact—what tools would not be available, could the resource be lost or wasted...?

- For example, the BLM frequently works with grazing permittees through cooperative range improvement agreements to plan, finance, and develop water resources, and the BLM commonly applies for new livestock water rights to the extent allowed by the laws of the State in which the land is located.
- Although the BLM does not require relinquishment or transfer of water rights as a condition of authorizations, the BLM is concerned that Section 433 could have the consequence of limiting the BLM's ability to apply existing authorities necessary for the management of federal resources.

**Commented [HJD6]:** Does BLM apply behalf of the Federal Government for this new water right or this application made by BLM on behalf of the permittee?

**Sec. 436 Social Cost of Carbon (PPA/USGS)**

*None of the funds made available by this or any other Act shall be used for the social cost of carbon (SCC) to be incorporated into any rulemaking or guidance document until a new Interagency Working Group (IWG) revises the estimates using the discount rates and the domestic-only limitation on benefits estimates in accordance with Executive Order 12866 and OMB Circular A-4 as of January 1, 2015: Provided, That such IWG shall provide to the public all documents, models, and assumptions used in developing the SCC and solicit public comment prior to finalizing any revised estimates.*

**Talking Points/Bullets**

- The Administration opposes Section 436 in the House mark.
- If the Department were to include the SCC in any rulemaking or guidance documents, this rider would limit the Department's ability to quantify the social cost of carbon emissions *or savings* from onshore energy, offshore energy, renewable energy, and carbon storage and sequestration activities.
- The rider would hinder the Department's ability to develop carbon offset programs until a new Interagency Working Group has completed a required review and analysis.
- Overall this provision would limit the Department's ability to fully understand the social cost of fossil fuel extraction or the benefits of renewable energy and carbon storage leasing activities.
- The BLM has been sued for not incorporating the SCC into their decision making documents in multiple states. Preventing the SCC from being included in rulemaking or guidance documents could expose the Department to further litigation.
- This rider could limit the Department's ability to provide accurate valuation for compensatory mitigation agreements, possibly stalling permitting of infrastructure or development actions that require compensatory mitigation.

**Sec. 441 Program Review (BLM)**

(a) TERMINATION. Secretarial Order 3338, issued by the Secretary of the Interior on January 15, 2016, shall have no force or effect on and after the earlier of

(1) September 30, 2017; or

(2) the date of publication of notice under sub-section (b).

(b) PUBLICATION OF NOTICE. The Secretary of the Interior shall promptly publish notice of the completion of the Programmatic Environmental Impact Statement directed to be prepared under that order.

**Talking Points/Bullets**

- The Department strongly opposes Section 441 of the House mark
- This provision sets a time limitation on Secretarial Order 3338 pausing coal leasing pending completion of a comprehensive program review of the Federal Coal Management Program.
- The primary goal of the Programmatic Environmental Impact Statement (PEIS) now underway is to modernize the Federal Coal Management Program. A programmatic review of the coal program has not been undertaken in more than 30 years.
- Based on similar PEIS efforts, a full review is likely to take more than a year to complete.
- Eliminating the pause on coal leasing before the modernization is complete will risk entering into long term lease contracts that do not reflect important updates to the coal program that may be developed as a result of the PEIS.
- The BLM is in the preliminary stages of implementing the PEIS as required by Secretarial Order 3338 and is unable to predict with certainty what policy changes may, or may not, result.
- The proposed language would restrict the authority of the Secretary of the Interior to implement the Mineral Leasing Act of 1920, as amended.

**Commented [HJD7]:** The "pause" does not affect current leases therefore how many new lease applications are anticipated?

---

Good Evening,

I have reviewed the second set of talking points and have a few comments/questions for your review and response. We are hoping you can return them by COB tomorrow as well.

We look forward to receiving the two remaining talking points tomorrow.

Thanks and have a good night,

Jocelyn

Rita and Jocelyn,

Attached is another set of talking points which are marked on the list in red highlight. There are two which are pending review by senior leadership which we won't have until tomorrow. We will have those for you as soon as possible and we will work through your additional comments on set 1.

Sec. 114 Sage Grouse (FWS)

Sec. 115 Water Conveyances (BLM)

Sec. 118 Fish Hatchery Programs (FWS)

**Sec. 119 Reissuance of Final Rules (FWS)**

Sec. 120 Stream Buffer (OSMRE)

Sec. 121 Bottled Water (NPS)

**Sec. 122 Oil and Gas Royalties (BLM)**

**Sec. 123 Designation (NPS)**

Sec. 124 Drilling Margins (BSEE)

Sec. 125 Tribal Recognition (BIA)

Sec. 420 Funding Prohibition (regulate lead content) EPA *FWS doesn't have any comments*

**Sec. 428 Hunting, Fishing, and Recreational Shooting on Federal Land (BLM)**

**Sec. 432 Availability of Vacant Grazing Allotments (BLM)**

**Sec. 433 Protection of Water Rights (BLM)**

**Sec. 436 Social Cost of Carbon**

Sec. 437 (Worker Protection Standards-Pesticides- *FWS doesn't have any comments*)

Sec. 440 Royalty Rates (ONRR)

**Sec. 441 Program Review (BLM)**

**Subject:** Re: Talking Points on Legislative Riders

We'll take a look and get back to you.

On Wed, Jun 8, 2016 at 4:57 PM, Hunn, Jocelyn Detailee <[Jocelyn.Hunn@mail.house.gov](mailto:Jocelyn.Hunn@mail.house.gov)> wrote:

Good Afternoon,

Thank you for the first set of talking points. We look forward to receiving the rest later today.

Having reviewed what you sent, I have a few comments and additional language in red font I am hoping you can review and address and return to us by COB tomorrow. Please let me know if that presents a problem.

I am available if you have any questions.

Thanks,

Jocelyn

**Subject:** Talking Points on Legislative Riders

Rita and Jocelyn,

As requested, attached are talking points on the House riders requested. We are sending them to you as they are ready. We are waiting for additional information on the rest and will send them as soon as they are completed. The list below shows you the status of what you are getting now (in bold) and what you can expect to receive later today.

Thank you.

Sec. 114 Sage Grouse (FWS)

Sec. 115 Water Conveyances (BLM)

Sec. 118 Fish Hatchery Programs (FWS)  
**Sec. 119 Reissuance of Final Rules (FWS)**  
Sec. 120 Stream Buffer (OSMRE)  
Sec. 121 Bottled Water (NPS)  
**Sec. 122 Oil and Gas Royalties (BLM)**  
**Sec. 123 Designation (NPS)**  
Sec. 124 Drilling Margins (BSEE)  
Sec. 125 Tribal Recognition (BIA)  
Sec. 420 Funding Prohibition (regulate lead content) EPA  
**Sec. 428 Hunting, Fishing, and Recreational Shooting on Federal Land (BLM)**  
**Sec. 432 Availability of Vacant Grazing Allotments (BLM)**  
**Sec. 433 Protection of Water Rights (BLM)**  
**Sec. 436 Social Cost of Carbon**  
Sec. 437 (Worker Protection Standards-Pesticides- *FWS doesn't have any comments*)  
Sec. 440 Royalty Rates (ONRR)  
**Sec. 441 Program Review (BLM)**

### **Sec. 114 Sage Grouse (FWS)**

*None of the funds made available by this or any other Act may be used by the Secretary of the Interior to review the status of or determine whether greater sage-grouse (*Centrocercus urophasianus*), or the Columbia basin distinct population segment of greater sage-grouse, is an endangered species or a threatened species pursuant to section 4 of the Endangered Species Act (16 U.S.C. 1533), or to issue a regulation thereto.*

### **Talking Points/Bullets**

- The Department strongly opposes Section 114 in the House mark.
- Although the Service has no current plans to do so and does not anticipate the need to change its finding in FY 2017, this provision would legislatively override any objective, science-based determination the Service could potentially make in the future.
- This provision runs counter to the fundamental principle that science should govern determinations under the nation's environmental laws by legislating the conservation status of a species under the ESA without regard to science.
- The Service does not support any appropriation language that would cause the agency to limit its capability of implementing the ESA and potentially cause an increase in litigation regarding the Government's responsibility to implement the statutory requirements of the ESA.
- Habitat conservation occurs as a result of proactive collaboration with multiple partners across a landscape in order to avoid the need to list under the ESA. The 2015 not warranted finding for Greater sage-grouse relied upon the commitments from State and Federal agencies and private landowners to implement regulatory mechanisms and conservation efforts, which FWS determined reduced the threats to the grouse enough to not warrant listing the species.
- The provision undermines this unprecedented conservation undertaking by legislating outside of the ESA process. This ongoing collaboration is critically important to the long term viability of Greater sage-grouse, as well as to the conservation of the larger sagebrush ecosystem upon which they and over 350 other species of conservation concern depend.

### **Sec. 115 Water Conveyances (BLM)**

*None of the funds made available by this or any other Act may be used by the Secretary of the Interior to review, require approval of, or withhold approval for use of a right-of-way granted pursuant to the General Railroad Right-of-Way Act of 1875 (43 U.S.C. 934–939) if authorization of the use would have been considered under Department policy to be within the scope of a railroad’s authority as of the day before the effective date of the Department’s Solicitor’s Opinion M–37025, issued on November 4, 2011.*

### **Talking Points/Bullets**

- The Department opposes Section 115 in the House mark.
- The provision negates the Department’s Solicitor’s Opinion M–37025, issued on November 4, 2011.
- The provision would not allow the BLM the ability to review any proposed use of a right-of-way under the General Railroad Right-of-Way Act of 1875. BLM would not be able to evaluate whether the use meets the legal requirements to allow BLM authorization to determine if the purpose derives from or furthers the railroad purpose.
- The provision is exceptionally broad and allows all categories of rights-of-way, hazardous or not, to be issued without any review or consideration for the impact to public land resources or the safety of the public.
- This provision would abdicate the BLM’s responsibility for the appropriate management of Public Lands and gives that authority and responsibility to the railroads.

### **Background**

- BLM’s administrative determinations under the General Railroad Right-of-Way Act of 1875 do not prohibit activities, but a finding that an action is outside of the scope of the 1875 Act means that in evaluating a proposed action, BLM will consider resource impacts, consistent with other permitted rights of way on public lands.

**Sec. 111 Bottled Water (NPS)**

*None of the funds made available by this Act may be used by the Director of the National Park Service to implement, administer, or enforce Policy Memorandum 11-03 or to approve a request by a park superintendent to eliminate the sale in national parks of water in disposable, recyclable plastic bottles.*

**Talking Points/Bullets**

- The Department objects to Section 121 in the House mark.
- This provision would use legislation to intervene in the management of the parks.
- At each of the parks where a ban on water sold in disposable plastic bottles has been implemented, the NPS would notify the concessioners and cooperating associations that the ban is no longer in effect.
- The National Park Service in December 2011 adopted a policy that allows parks to discontinue sales of water in disposable plastic bottles. There is no ban on using disposable plastic water bottles in parks so the public can bring them in.
- The program is optional, initiated by the park superintendent, must clear a 14-point review and be approved by the Regional Director.
- Prohibiting the sale of water in disposable plastic bottles encourages recycling and education about disposable plastic water bottles and reduces the amount of plastic that enters the waste stream.
  - Unfortunately, despite recycling programs, plastic water bottles are often discarded as litter and trash. Sales elimination programs are among the best, least expensive methods to shrink the waste stream.
- Collection of data - recycling, reducing and eliminating the sale of disposable plastic water bottles in parks - is an important priority. Staff have been directed to collect information on plastic bottle use and plastic in individual park waste streams that will assist the NPS in evaluating the water bottle policy.

**Commented [HJD1]:** Do you have any documented research that supports this contention? According to .....

### Sec. 124 Drilling Margins (BSEE)

*None of the funds made available in this Act or any other Act for any fiscal year may be used to develop, adopt, implement, administer, or enforce any change to the regulations and guidance in effect on April 1, 2015, pertaining to drilling margins or static downhole mud weight (30 CFR 250.414(c)) including the provisions of the rules dated April 17, 2015, and April 29, 2016.*

#### Talking Points/Bullets

- The Department strongly opposes Section 124 in the House mark.
- This provision would result in a dramatic reversal in the safety improvements developed following the Deepwater Horizon tragedy.
- The provision would prevent the Bureau from issuing clarifying guidance to industry related to operating with safer ~~current~~ drilling practices to control fluid weight and pressure and prevent a major event. This would upset current permit approval processes.
- The final rule referenced in the provision, codifies current Bureau permit review practices and best practices on the Outer Continental Shelf. It clarifies safe drilling margins.
  - Under current regulations operators show the planned drilling margin on the Application for Permit to Drill.
  - The new regulations provide a detailed definition of what constitutes a safe drilling margin and requires that a ~~safe~~ safe drilling margin be maintained throughout drilling.
- The rule defines other requirements related to liners and other downhole equipment to help reduce the likelihood of a major well-control event and ensure the overall integrity of the well design.

Commented [HJD2]: Is it appropriate to emphasize safety here?

Commented [HJD3]: I think you mean safe, correct?

### Sec. 1 Tribal Recognition (BIA)

*None of the funds made available by this or any other Act may be used by the Secretary of the Interior to implement, administer, or enforce the final rule entitled "Federal Acknowledgment of American Indian Tribes" published by the Department of the Interior in the Federal Register on July 1, 2015 (80 Fed. Reg. 37862 16 et seq.).*

### Talking Points/Bullets

- The Department strongly opposes Section 125 in the House mark.
- This provision would prohibit implementation or enforcement of the final rule regarding Federal Acknowledgment of American Indian Tribes which became effective on July 31, 2015.
- The Department strongly supports the final rule which updates the previous rules criticized by many as "broken" and in need of reform.
- The House provision would disregard important changes made to the rule which incorporated input from the public comment period and from ~~the~~ consultation with and at the request of tribes, states, local governments, and the public.
- The provision will eliminate the consistent implementation of seven mandatory criteria and standards of proof that ensure integrity and fairness in the recognition process.
- The final rule promotes fairness, transparency, and consistent implementation through reforms and improvements which would be unavailable if the rule is not implemented.
- The final rule strengthens the requirements for executive recognition and provides strict guidelines.
- Blocking this rule from taking effect would halt the executive branch process and leave all Federal Acknowledgment decisions with Congress. The ultimate effect of this provision would be to remove the executive branch from playing a role in tribal recognition.
- Relying on Congress to review and act on all petitions for recognition is not implementable. Congress has not recognized a Tribe since 2000. There are 7 groups with documented petitions currently going through the Department's regulatory process.
- The Secretary of the Interior's authority to extend recognition to Indian Tribes has been codified in statute and repeatedly acknowledged by the courts. To uphold the principal of tribal sovereignty it is important the Federal government have a clear and objective process to determine which Tribes it recognizes. Administrative recognition provides an orderly process.

Commented [HJD4]: Is this correct?

### Background

The final rule makes the following changes to the Federal Acknowledgement process

- Provides that prior decisions finding evidence or methodology sufficient to satisfy a particular criterion is sufficient to satisfy the criterion for a present petitioner.
- Establishes a uniform evaluation period of more than a century, from 1900 to the present, to satisfy tribal identification, community and political authority.
- Increases public access to petition documents for Federal Acknowledgment; expands distribution of notices of petitions to include local governments; and provides for an administrative judge to conduct a comprehensive hearing and issue a recommended decision for proposed negative findings.

#### Sec. 440 Royalty Rates (ONRR)

*None of the funds made available by this Act may be used to implement any changes to royalty rates or product valuation regulations under Federal coal, oil, and gas leasing programs.*

#### Talking Points Bullets

- The Department strongly opposes Section 440 in the House mark.
- The provision would restrict ONRR from proceeding with the regulatory process to address public comments and develop a final rule updating the Federal Oil and Gas and Federal and Indian Coal valuation rules.
- The current oil, gas and coal valuation regulations originally put in place for natural gas and coal in the late 1980s have not kept pace with the significant market changes that have occurred in the domestic natural gas and coal markets since that time.
- The existing federal oil valuation regulations are a decade old. The updated regulations are needed to help keep pace with modern technology and practices and to help to protect the American taxpayer.
- The provision would maintain the status quo and would not allow the Department to improve product valuation regulations to:
  - (1) Provide greater simplicity, certainty, clarity, and consistency in production valuation;
  - (2) Decrease federal costs to ensure compliance;
  - (3) Decrease industry's compliance costs; and
  - (4) Provide more timely certainty that companies have paid every dollar due.
- Currently, the royalty rate for competitive oil and gas leases on public lands is 12.5 percent of the value of production. Current regulation locks that rate at the minimum allowed by law, even though many states and private landowners assess higher rates to oil and gas developed from their lands.
- The provision doesn't make sense for taxpayers. According to ... Changes to the proposed rule are estimated to increase royalty collections about \$75.6 million per year for the U.S. Treasury and it addresses ongoing recommendations from the Government Accounting Office.

Commented [HJD5]: Can you provide an attribute for this estimate?

In this Act:

FEDERAL LAND. ☐ Unless otherwise provided the term ☐federal land☐ means the lands or interests inland under the jurisdiction of the Department of the Interior or the Department of Agriculture.

# Division A □ Conservation

## Title I □ Wilderness

### SEC. 101. WILDERNESS DESIGNATIONS

In furtherance of the purposes of the Wilderness Act, and subject to valid existing rights, the following areas of the State are designated as wilderness and as components of the National Wilderness Preservation System pursuant to the Wilderness Act (16 U.S.C. 1131 et seq.).

- (A) CANDLELAND MOUNTAIN. □ Certain federal land in Emery County, Utah managed by the United States Forest Service comprising approximately 12,330 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the □Candleland Mountain Wilderness□
- (B) DESOLATION CANYON. --- Certain federal land in Duchesne, Uintah, Carbon, Emery, and Grand Counties managed by the Bureau of Land Management comprising approximately 473,272 acres, as generally depicted on the Utah PLI Wilderness Map and dated, which shall be known as the □Desolation Canyon Wilderness.□
- (C) HIGH UINTA. --- Certain federal land in Duchesne, Summit, and Uintah Counties, Utah managed by the United States Forest Service comprising approximately 26,701 acres, as generally depicted on the Utah PLI Wilderness Map and dated\_\_\_\_, which shall be known as the □High Uinta Wilderness.□
- (D) MANCOS MESA. □ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management and the National Park Service comprising approximately 95,605 acres, as generally depicted on the Utah PLI Wilderness Map and dated\_\_\_\_, which shall be known as the □Mancos Mesa Wilderness.□
- (E) CHEESEBOX CANYON. □ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 14,441 acres, as generally depicted on the Utah PLI Wilderness Map and dated\_\_\_\_, which shall be known as the □Cheesebox Canyon Wilderness.□
- (F) BUTLER WASH. □ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 27,813 acres, as generally depicted on the Utah PLI Wilderness Map and dated\_\_\_\_, which shall be known as the □Butler Wash Wilderness.□
- (G) DARK CANYON. □ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 72,990 acres, as

- generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Dark Canyon Wilderness.☐
- (H) BEHIND THE ROCKS.☐ Certain federal land in San Juan and Grand Counties in Utah managed by the Bureau of Land Management comprising approximately 13,025 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Behind the Rocks Wilderness.☐
- (I) BRIDGER JACK MESA.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 6,333 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Bridger Jack Mesa Wilderness.☐
- (J) CEDAR MESA.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 223,566 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cedar Mesa Wilderness.☐
- (K) MIKES CANYON.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management and the National Park Service comprising approximately 30,549 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mikes Canyon Wilderness.☐
- (L) MULE CANYON.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 5,859 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mule Canyon Wilderness.☐
- (M) MARSH PEAK.☐ Certain federal land in Uintah County, Utah managed by the United States Forest Service comprising approximately 15,032 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Marsh Peak Wilderness.☐
- (N) CLIFF PEAK.☐ Certain federal land in Uintah County, Utah managed by the United States Forest Service comprising approximately 9,154 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cliff Peak Wilderness.☐
- (O) BULL CANYON.☐ Certain federal land in Uintah County, Utah managed by the Bureau of Land Management comprising approximately 599 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Bull Canyon Wilderness.☐
- (P) WHITE CANYON.☐ Certain federal land in San Juan County, Utah managed by the Bureau of Land Management comprising approximately 18,886 acres, as

May 23, 2016 - DRAFT

- generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐White Canyon Wilderness.☐
- (Q) MEXICAN MOUNTAIN.☐ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 85,150 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mexican Mountain Wilderness.☐
- (R) SIDS MOUNTAIN.☐ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 82,406 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Sids Mountain Wilderness.☐
- (S) MUDDY CREEK.☐ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 72,400 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Muddy Creek Wilderness.☐
- (T) SAN RAFAEL REEF.☐ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 65,146 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐San Rafael Reef Wilderness.☐
- (U) CRACK CANYON WILDERNESS.☐ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 27,191 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Crack Canyon Wilderness.☐
- (V) DEVILS CANYON.☐ Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 8,652 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Devils Canyon Wilderness.☐
- (W) NELSON MOUNTAIN.☐ Certain federal land in Emery County, Utah managed by the United States Forest Service comprising approximately 12,856 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Nelson Mountain Wilderness.☐
- (X) WILLIAM GRANSTAFF CANYON.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 8,983 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐William Granstaff Canyon Wilderness.☐
- (Y) MILL CREEK CANYON.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 12,358

May 23, 2016 - DRAFT

- acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mill Creek Canyon Wilderness.☐
- (Z) LABYRINTH CANYON.☐ Certain federal land in Grand and Emery Counties in the state of Utah managed by the Bureau of Land Management comprising approximately 52,969 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Labyrinth Canyon Wilderness.☐
- (AA) CANYONLANDS.☐ Certain federal land in San Juan and Grand Counties in the State of Utah managed by the National Park Service comprising approximately 257,607 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Canyonlands Wilderness.☐
- (BB) ARCHES.☐ Certain federal land in Grand County, Utah managed by the National Park Service comprising approximately 76,259 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Arches Wilderness.☐
- (CC) FISHER TOWERS.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 1,190 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Fisher Towers Wilderness.☐
- (DD) MARY JANE CANYON.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 13,574 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mary Jane Canyon Wilderness.☐
- (EE) GRANITE CREEK .☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 25,104 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Granite Creek Wilderness.☐
- (FF) BOOK CLIFFS.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 175,491 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Book Cliffs Wilderness.☐
- (GG) WESTWATER.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 32,955 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Westwater Wilderness.☐
- (HH) BEAVER CREEK.☐ Certain federal land in Grand County, Utah managed by the Bureau of Land Management comprising approximately 48,514 acres, as

May 23, 2016 - DRAFT

- generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Beaver Creek Wilderness.☐
- (II) MOUNT PEALE.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 4,302 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Mount Peale Wilderness.☐
- (JJ) HAMMOND CANYON.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 7,594 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Hammond Canyon Wilderness.☐
- (KK) ARCH CANYON.☐ Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 4,376 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Arch Canyon Wilderness.☐
- (LL) RANGE CREEK.☐ Certain federal land in Carbon County, Utah managed by the Bureau of Land Management comprising approximately 4,062 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Range Creek Wilderness.☐
- (MM) DINOSAUR.☐ Certain federal land in Uintah County, Utah managed by the National Park Service comprising approximately 52,349 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Dinosaur Wilderness.☐
- (NN) CEDAR MOUNTAIN. - Certain federal land in Emery County, Utah managed by the Bureau of Land Management comprising approximately 17,355 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Cedar Mountain Wilderness.☐
- (OO) INDIAN CREEK. - Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately 6,562 acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Indian Creek Wilderness.☐
- (PP) STEER GULCH. - Certain federal land in San Juan County, Utah managed by the United States Forest Service comprising approximately \_\_\_\_\_ acres, as generally depicted on the Utah PLI Wilderness Map and dated \_\_\_\_\_, which shall be known as the ☐Steer Gulch Wilderness.☐

**SEC. 10 ☐MAPS AND LEGAL DESCRIPTIONS.**

(a) IN GENERAL. □ Not later than two years from the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture as appropriate shall file a map and legal description of the wilderness areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior and the Secretary of Agriculture as appropriate may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management, the National Park Service, and the United States Forest Service.

### **SEC. 103. WILDERNESS ADMINISTRATION.**

(a) IN GENERAL. □ Subject to valid existing rights, each wilderness area established under section 101 shall be administered by the Secretary of the Interior or the Secretary of Agriculture as appropriate in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.), except that □

(1) any reference in that Act to the effective date shall be considered to be a reference to the date of enactment of this Act.

(2) with respect to wilderness areas that are administered by the Secretary of the Interior, any reference in the Wilderness Act to the Secretary of Agriculture shall be considered to be a reference to the Secretary of the Interior.

(b) FIRE, INSECTS, AND DISEASE. □ In accordance with section 4(d)(1) of the Wilderness Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate may take such measures in the Wilderness as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a State or local agency).

(c) WILDFIRE MANAGEMENT OPERATIONS. - Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment).

(d) LIVESTOCK. □

(a) The grazing of livestock in the Wilderness, if established before the date of enactment of this Act, shall be allowed to continue, subject to such reasonable regulations, policies, and practices as the Secretary considers to be necessary in accordance with □

(1) section 4(d)(4) of the Wilderness Act (16 U.S.C. 1133(d)(4)); and

(2) the guidelines set forth in Appendix A of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101 □405).

(b) UTAH DEPARTMENT OF AGRICULTURE

May 23, 2016 - DRAFT

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas, locations, or use.

(e) **OUTFITTING AND GUIDE ACTIVITIES** .□ In accordance with section 4(d)(6) of the Wilderness Act (16 U.S.C. 1133(d)(5)), commercial services (including authorized outfitting and guide activities) within the wilderness areas are authorized to the extent necessary for realizing the recreational purposes of the areas.

~~(f) FISH AND WILDLIFE~~

~~(1) MANAGEMENT ACTIVITIES.□ In furtherance of the purposes and principles of the Wilderness Act (16 U.S.C. 1131 et seq.), the Secretary may conduct any management activities in the Wilderness that are necessary to maintain or restore fish and wildlife populations and the habitats to support the populations, if the activities are carried out□~~

~~(A) consistent with relevant wilderness management plans; and~~

~~(B) in accordance with□~~

~~(i) the Wilderness Act (16 U.S.C. 1131 et seq.); and~~

~~(ii) the guidelines set forth in Appendix B of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101□405), including the occasional and temporary use of Off highway vehicle vehicles if the use, as determined by the Secretary, would promote healthy, viable, and more naturally distributed wildlife populations that would enhance wilderness values with the minimal impact necessary to reasonably accomplish those tasks.~~

~~(2) EXISTING ACTIVITIES.□ Consistent with section 4(d)(1) of the Wilderness Act (16 U.S.C. 1133(d)(1)) and in accordance with the guidelines set forth in appendix B of the report of the Committee on Interior and Insular Affairs of the House of Representatives accompanying H.R. 2570 of the 101st Congress (House Report 101□405), the State may continue to use aircraft, including helicopters, to survey, capture, transplant, monitor, and provide water for wildlife populations in the Wilderness.~~

(f) **ACCESS** .□ In accordance with section 5(a) of the Wilderness Act (16 U.S.C. 1134(a)), the Secretary of the Interior or the Secretary of Agriculture as appropriate shall provide the owner of State or private property within the boundary of a wilderness area adequate access to the property.

(g) **WILDLIFE WATER DEVELOPMENT PROJECTS** .□ The Secretary shall authorize structures and facilities, including existing structures and facilities, for wildlife water development projects, including guzzlers, in the wilderness areas designated by this title if□

(1) the structures and facilities will enhance wilderness values by promoting healthy, viable, and more naturally distributed wildlife populations; and

(2) the visual impacts of the structures and facilities on the wilderness can be minimized.

(h) **FISH AND WILDLIFE** .□ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the

May 23, 2016 - DRAFT

State, including the regulation of hunting, fishing, and trapping within the wilderness areas.

~~(B) CONSULTATION. Except in emergencies, the Secretary shall consult with the appropriate State agency and notify the public before taking any action under subparagraph (A).~~

(i) WITHDRAWALS- Subject to valid existing rights, all public land within the areas established under this title, including any land or interest in land that is acquired by the United States within the wilderness area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(j) TRAIL AND FENCE MAINTENANCE. The Secretary of the Interior and Secretary of Agriculture shall adequately maintain trails and fence lines located in the lands identified in this title, in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.).

#### SEC. 104. WATER RIGHTS.

(a) STATUTORY CONSTRUCTION. Nothing in this title

- (1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the wilderness areas designated by section 101;
- (2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.
- (3) establishes a precedent with regard to any future wilderness designations.

(b) EXISTING WATER INFRASTRUCTURE.

- (1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities, including irrigation districts, and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in wilderness areas designated by section 101 subject to such reasonable regulations deemed necessary by the Secretary of Interior or Secretary of Agriculture.

#### SEC. 105. MILITARY OVERFLIGHTS.

Nothing in this title restricts or precludes

- (1) low-level overflights of military aircraft over wilderness areas designated by section 101, including military overflights that can be seen or heard within wilderness areas;
- (2) flight testing and evaluation; or
- (3) the designation or creation of new units of special use airspace, or the establishment of military flight training routes, over wilderness areas.

#### SEC. 106. ADJACENT MANAGEMENT.

-

May 23, 2016 - DRAFT

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a wilderness area designated by section 101.

(b) ACTIVITIES OUTSIDE WILDERNESS AREA. □ The fact that an activity or use on land outside a wilderness area can be seen, heard or smelled within the wilderness area shall not preclude the activity or use outside the boundary of the wilderness area.

**SEC. 10 □ NATIVE AMERICAN TREATY RIGHTS.**

Nothing in this title diminishes the treaty rights of any Indian tribe.

**SEC. 10 □ ACQUISITION OF LAND AND INTERESTS IN LAND.**

(a) ACQUISITION. □

(1) IN GENERAL. □ The Secretary of the Interior or the Secretary of Agriculture as appropriate may acquire land or interest in land within the boundaries of the wilderness areas designated by section 101 only by donation, exchange, transfer from another federal agency, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall complete exchanges for State land located within the boundaries of the wilderness areas designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(b) INCORPORATION IN WILDERNESS AREA. □ Any land or interest in land located inside the boundary of a wilderness area that is acquired by the United States after the date of enactment of this Act shall be added to, and administered as part of the wilderness area.

**SEC. 10 □ WILDERNESS REVIEW.**

(a) PUBLIC LAND. □

(1) FINDING. □ Congress finds that, for purposes of section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782), the public land administered by the Bureau of Land Management in the following wilderness study areas, as depicted on the map entitled Utah PLI Wilderness map and dated \_\_\_\_\_, have been adequately studied for wilderness designation:

- A. 43,323-acre area known as Winter Ridge Wilderness Study Area;
- B. 7,051-acre area known as Jack Canyon Wilderness Study Area;
- C. 6,557-acre area known as Squaw and Papoose Wilderness Study Area;
- D. 20,404-acre area known as Desolation Canyon Wilderness Study Area included within the Desolation Canyon National

May 23, 2016 - DRAFT

Conservation Area as designated by this Act and as depicted on the map;

E. 2,517-acre area known as Daniels Canyon Wilderness Study Areas; and

F. 945-acre known as Cross Canyon Wilderness Study Area.

(2) RELEASE .□ Any land managed by the Bureau of Land Management within the areas described in paragraph (1) that is not designated as wilderness by this title□

(A) shall not be subject to section 603(c) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782(c));

(B) shall be managed in accordance with land management plans adopted under section 202 of that Act (43 U.S.C. 1712); and

(C) shall no longer be subject to Secretarial Order No. 3310 issued by the Secretary of the Interior on December 22, 2010.

~~(D) shall be managed pursuant to this Act if released lands otherwise lie within a designated area pursuant to this Act.□~~

#### SEC. 110. AIRSHEDS.

(a) It is the intent of Congress that wilderness areas designated under section 101 shall not be designated as Class I airsheds under the Clean Air Act (42 USC 7401-7661) unless Class I status is agreed to by the State of Utah under existing authorities.

(b) The lands within the wilderness designated in subsection 101 (BB) and 101 (AA) shall continue to be managed as Class I airsheds.

## Title II □ National Conservation Areas

#### SEC. □01. NATIONAL CONSERVATION AREAS.

(a) ESTABLISHMENT.□ Subject to valid existing rights, the following areas in the State are hereby established as National Conservation Areas:

(1) BEACH DRAW.□ Certain federal land, comprising approximately 659 acres administered by the Bureau of Land Management in Uintah County, Utah as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Beach Draw National Conservation Area.□

(2) DIAMOND MOUNTAIN.□ Certain federal land, comprising approximately 30,391 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Diamond Mountain National Conservation Area.□

(3) DOCS VALLEY.□ Certain federal land, comprising approximately 8,544 acres administered by the Bureau of Land Management in Uintah County, Utah, as

May 23, 2016 - DRAFT

generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Docs Valley National Conservation Area.□

(4) STONE BRIDGE DRAW.□ Certain federal land, comprising approximately 2,415 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Stone Bridge Draw National Conservation Area.□

(5) STUNTZ DRAW.□ Certain federal land, comprising approximately 2,284 acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Stuntz Draw National Conservation Area.□

(6) SAN RAFAEL SWELL.□ Certain federal land, comprising approximately 329,933 acres administered by the Bureau of Land Management in Emery County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □San Rafael Swell National Conservation Area.□

(7) LABYRINTH CANYON.□ Certain federal land, comprising approximately 35,049 acres administered by the Bureau of Land Management in Emery County and Grand County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Labyrinth Canyon National Conservation Area.□

(8) MUDDY CREEK.□ Certain federal land, comprising approximately 55,208 acres administered by the Bureau of Land Management in Emery County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Muddy Creek National Conservation Area.□

(9) COLORADO RIVER.□ Certain federal land, comprising approximately 116,156 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Colorado River National Conservation Area.□

(10) INDIAN CREEK. - Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Indian Creek National Conservation Area.□

(11) BEARS EARS. - Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management and U.S. Forest Service in San Juan County, Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, to be known as the □Bears Ears National Conservation Area.□

**SEC. 00 MAP AND LEGAL DESCRIPTION.**

(a) IN GENERAL. Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the National Conservation Areas established by sections 201, 205 and 206 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management and the United States Forest Service.

**SEC. 03. ADMINISTRATION OF NATIONAL CONSERVATION AREAS**

(a) PURPOSES. - In accordance with this title, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), and other applicable laws, the Secretary of the Interior shall manage the National Conservation Areas established by section 201 in a manner that:

- 1) Protects, conserves, and enhances the unique and nationally important historic, cultural, scientific, scenic, recreational, archaeological, natural, and educational resources of the Conservation Area;
- 2) Maintains and enhances cooperative and innovative management practices between resource managers, private landowners, and the public in the Conservation Area; and
- 3) Recognizes and maintains historic uses of the Conservation Area.

(b) MANAGEMENT PLANS.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each conservation area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the conservation area that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

**SEC. 04. GENERAL PROVISIONS.**

(a) WITHDRAWALS-

May 23, 2016 - DRAFT

(1) Subject to valid existing rights, all federal land within the National Conservation Areas established under sections 201, 205, and 206, including any land or interest in land that is acquired by the United States within the conservation area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and
- (3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(b) FIRE, INSECTS, AND DISEASE. □ In accordance with this title, in national conservation areas established under sections 201, 205, and 206 the Secretary of the Interior may take such measures in the NCA as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a state or local agency).

(c) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) in national conservation areas established under sections 201, 205, and 206, subject to reasonable regulations as prescribed by the Secretary.

(d) LIVESTOCK. □

(1) IN GENERAL. □ Within the national conservation areas established under sections 201, 205, and 206, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

(B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated ~~to the greatest extent practicable~~ and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process.

(C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue to the greatest extent practicable. Such maintenance may include the use of Off-highway vehicle or mechanized tools and equipment.

(D) the construction of new grazing improvements or replacement of deteriorated livestock facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

(E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible by the permittee or an employee or agent thereof, and should not be abused by permittees.

(F) Access to historic and traditional water improvements for the purpose of supporting livestock shall be maintained unless the Secretary of the Interior, in consultation with the PLI Stakeholder Advisory Council, determines that the water sources are damaging cultural resources or historical resources.

(G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue.

(2) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas or use.

(e) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this title precludes the Secretary of the Interior from renewing easements or rights-of-way in national conservation areas established under sections 201, 205, and 206 in existence on the date of enactment of this Act, in accordance with this Act and existing law.

(f) ADJACENT MANAGEMENT.

(a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around a Conservation area designated by sections 201, 205 and 206 .

(b) ACTIVITIES OUTSIDE CONSERVATION AREA.  The fact that an activity or use on land outside a conservation area established under sections 201, 205, and 206 can be seen, heard, or smelled within the conservation area shall not preclude the activity or use outside the boundary of the Conservation area.

(g) OUTFITTING AND GUIDE ACTIVITIES .  Commercial services (including authorized outfitting and guide activities) within the national conservation areas established under sections 201, 205, and 206 are authorized.

(h) FISH AND WILDLIFE .  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping and use of helicopters to maintain healthy wildlife populations, within the national conservation areas established under sections 201, 205, and 206.

(i) ACCESS .  The Secretary of the Interior shall provide the owner of State or private property within the boundary of a conservation area established under sections 201, 205, and 206 access to the property.

(j) WILDLIFE WATER DEVELOPMENT PROJECTS .  Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the national conservation areas established under sections 201, 205, and 206 are authorized.

~~(k) HUNTING AND FISHING.  Within the national conservation areas established under sections 201, 205, and 206, hunting and fishing in areas where hunting and fishing~~

~~Internal use only. Not for distribution outside the Department of the Interior or Department of Agriculture. For internal use only.~~

(k).  WATER RIGHTS

(a) STATUTORY CONSTRUCTION.  Nothing in this title

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the National Conservation Areas designated by this title;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.

(3) establishes a precedent with regard to any future NCA designations.

(b) EXISTING WATER INFRASTRUCTURE.

(1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities, including irrigation districts, and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in NCAs designated by this title subject to such reasonable regulations deemed necessary by the Secretary of Interior and or Secretary of Agriculture.

(l) WILDERNESS REVIEW.

(a) Congress finds that the national conservation areas described in sections 201, 205, and 206 have been adequately studied for wilderness character and wilderness designation pursuant to section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and are no longer subject to the requirement of subsection (c) of such section pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.

(b) The Secretary of the Interior or Secretary of Agriculture may not promulgate or issue any system-wide regulation, directive, instruction memorandum or order that would direct management of the federal lands designated as national conservation areas in sections 201, 205, and 206 in a manner contrary to this title.

(m) VEGETATION MANAGEMENT.  Nothing in this title prevents the Secretary of the Interior from conducting vegetation management projects within the national conservation areas established under sections 201, 205, and 206 in a manner consistent with the purposes of the NCA.

(n) OFF-HIGHWAY VEHICLE VEHICLES.

(1) IN GENERAL- Except in cases in which Off-highway vehicle vehicles are needed for administrative purposes, including project construction and maintenance, or to respond to an emergency, the use of Off-highway vehicles shall be permitted only on designated routes within the national conservation areas.

(2) DESIGNATED ROUTES

(A) IN GENERAL- The Secretary of the Interior or Secretary of Agriculture shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized on January 1, 2016;

(ii) minimizes conflict with sensitive habitat or cultural or historical resources; and

(iii) does not interfere with private property or water rights.

(B) CLOSURE OR REROUTING-

(i) IN GENERAL- A designated route may be temporarily closed or rerouted, for a period not to exceed two years, if the Secretary of the Interior or Secretary of Agriculture, in consultation with the State, and relevant local government within the State determines that--

(I) the designated route is damaging cultural resources or historical resources;

(II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.

(III) modification of the designated route would not significantly affect access within the conservation area.

(IV) all other options, other than a temporary closure or rerouting, have been exhausted.

(V) an alternative route has been provided, which can include routes previously closed.

(ii) If temporary closure and rerouting options as outlined in section (i) above have been exhausted, and the designated route continues to damage sensitive habitat or cultural or historical resources, the minimum track of the designated route necessary to protect said resources may be permanently closed.

(C) NOTICE- The Secretary of the Interior or Secretary of Agriculture shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily or permanently closed through--

(i) use of appropriate signage within the Conservation Area;

(ii) use of the internet and web resources.

(D) ROAD SETBACKS

(i) Road corridors within the National Conservation Area setbacks from roads will be measured from the center line of the road.

(ii) Setbacks along federal and state highways will be at the boundary of the right-of-way (ROW) or the property boundary or a minimum of 300 feet from center line, whichever is greater.

(iii) Setbacks from other paved roads or high standard dirt or gravel road will be at the ROW boundary, property boundary or 100 feet from center line, whichever is greater.

(iv) Setbacks from low standard dirt roads and designated routes will be at the ROW boundary, property boundary or 40 feet from center line.

(v) NCA road corridors and wilderness boundary setbacks will be expanded at strategic locations to provide trailhead access, staging locations and dispersed camping for the protection of NCA and wilderness values.

(3) PERMANENT ROAD CONSTRUCTION-

(1) After the date of enactment of this Act, except as necessary for administrative purposes or to respond to an emergency, the Secretary of the Interior ~~or Secretary of Agriculture~~ shall not construct any permanent road within the conservation area designated under section 201, 205, or 206

(o) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(p) SCIENTIFIC INVESTIGATIONS. □ The Secretary of Interior and Secretary of Agriculture shall provide for opportunities, including through partnerships with colleges, universities, schools, scientific institutions, non-profit organizations, researchers, and scientists to conduct research and provide educational and interpretive services of the historical, cultural, scientific, archeological, and natural resources within the National Conservation Areas established under 201, 205, and 206. Research findings from the national conservation areas may be used to develop land use solutions that meet human needs while maintaining ecological and economic viability in the region.

(q) RESEARCH AND INTERPRETIVE FACILITIES. □

(1) IN GENERAL. □ The Secretary of Interior and Secretary of Agriculture may establish facilities for □

(A) the conduct of scientific research; and

(B) the interpretation of the historical, cultural, scientific, archeological, natural and educational resources of the national conservation areas.

(2) GRANTS; COOPERATIVE AGREEMENTS. □ In carrying out subsection (s), the Secretary of the Interior and Secretary of Agriculture may make grants to, or enter into cooperative agreements with the State of Utah, local governmental entities, other institutions and organizations, and private entities to conduct research, develop scientific analyses, and carry out any other initiative relating to the restoration or conservation of the Conservation Areas.

(r) PARTNERSHIPS. □ In recognition of the value of collaboration to foster innovation and enhance research and development efforts, the Secretary of the Interior and the Secretary of Agriculture shall encourage partnerships, including public-private partnerships, between and among Federal, State and local agencies, academic institutions, non-profit organizations and private entities.

(s) RECREATION. □ The Secretary of the Interior and Secretary of Agriculture shall continue to authorize, maintain, and enhance the recreational use of the national conservation areas, including hunting, fishing, camping, hiking, backpacking, cross-country skiing, hang gliding, paragliding, rock climbing, canyoneering, sightseeing, nature study, horseback riding, mountain biking, rafting, Off-highway vehicle recreation on authorized routes, and other recreational activities, ~~so long as such recreational use is consistent with the purposes of the conservation area, this section, and applicable management plans.~~

(t) ACQUISITION. □

(1) IN GENERAL. □ The Secretary of the Interior or the Secretary of Agriculture as appropriate may acquire land or interest in land within the boundaries of the national conservation areas designated by section by this title only by donation, exchange, transfer from another federal agency, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall complete exchanges for State land located within the boundaries of the national conservation areas designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(4) INCORPORATION IN NATIONAL CONSERVATION AREA. □ Any land or interest in land located inside the boundary of a national conservation area that is acquired by the United States after the date of enactment of this Act shall be added to, and administered as part of the national conservation area.

**SEC. 05. BOO CLIFFS SPORTSMENS NATIONAL CONSERVATION AREA**

(a) ESTABLISHMENT. □ Subject to valid existing rights, certain federal land, comprising approximately 42,352 acres administered by the Bureau of Land Management in Uintah County in the State of Utah, as generally depicted on the map entitled Utah PLI National Conservation Area Map and dated \_\_\_\_\_, is established as Book Cliffs Sportsmens National Conservation Area. □

(b) PURPOSES. □ The purpose of the Book Cliffs Sportsmen's National Conservation Area (referred to in this section as the "NCA") is to protect hunting and fishing opportunities and habitat, manage and restore fish and wildlife habitat, and facilitate hunting and fishing opportunities in a natural environment.

(c) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the NCA.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Advisory Council described in subsection (d) below. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Council into the management plan the Secretary of the Interior shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(3) REQUIREMENTS- The management plan shall be written in accordance with subsection (b)

May 23, 2016 - DRAFT

(4) USES- The Secretary of the Interior shall allow only such uses of the NCA that would further the purposes of the NCA.

(d) BOOK CLIFFS SPORTSMEN'S NATIONAL CONSERVATION AREA  
ADVISORY COUNCIL. □

(1) ESTABLISHMENT. □ Within 180 days after the date of enactment of this Act, the Secretary of the Interior shall establish the Book Cliffs Sportsmens National Conservation Area Advisory Council (referred to as the Advisory Council) to:

(A) advise the Secretary of the Interior with respect to development and implementation of the NCA management plan to the greatest extent allowable by law.

(B) encourage and promote local participation in the decision making processes affecting the NCA.

(2) MEMBERSHIP. □ The Advisory Council shall consist of 11 members.

(3) MEMBERS. □ The Secretary of the Interior shall appoint one member from each of the following groups:

(i) State Division of Wildlife Resources Director or designee.

(ii) Game bird hunting organizations.

(iii) Wildlife conservation organizations.

(iv) Big game hunting organizations.

(v) a cold water fishing organization.

(vi) the tourism, outfitter, or guiding industry.

(vii) the hunting or shooting equipment retail industry.

(viii) Ute Tribe representative.

(ix) The agriculture industry.

(x) a ranching industry designee from Uintah County.

(xi) Uintah County Commission Chairman or its designee.

~~(4) ELIGIBILITY. □ The Secretary of the Interior shall determine that all individuals appointed to the Advisory Council, and the organization or industry each individual represents, support sustainable use hunting, wildlife conservation, and recreational shooting.~~

(A) TERMS. □

(i) IN GENERAL. □ Except for the initial appointees, members of the Advisory Council shall be appointed for a term of 4 years. Members shall not be appointed for more than 3 consecutive or nonconsecutive terms.

(B) TERMS OF INITIAL APPOINTEES. □ The Secretary of the Interior shall appoint the initial members of the Advisory Council as follows:

(i) 5 members shall be appointed for a term of 4 years;

(ii) 4 members shall be appointed for a term of 3 years; and

(iii) 2 members shall be appointed for a term of 2 years.

(4) PRESERVATION OF PUBLIC ADVISORY STATUS. □ No individual may be appointed as a member of the Advisory Council while serving as an officer or

employee of the Federal Government.

(5) VACANCY AND REMOVAL. □

(A) IN GENERAL. □ Any vacancy on the Advisory Committee shall be filled in the manner in which the original appointment was made.

(B) REMOVAL. □ Advisory Committee members shall serve at the discretion of the Secretary of the Interior and may be removed at any time for good cause.

(6) CONTINUATION OF SERVICE. □ Each member may continue to serve after the expiration of the term of office to which such member was appointed until a successor has been appointed.

(7) CHAIR. □ The Chair of the Advisory Council shall be appointed to a 3-year term by the Secretary of the Interior from among the members of the Advisory Council. An individual appointed to the Advisory Council under (4)(2)(iii) shall be eligible to serve as Chair, but may serve for two years. An individual may not be appointed as Chair for more than 2 consecutive or nonconsecutive terms.

(8) PAY AND EXPENSES. □ Members of the Advisory Council shall serve without pay, but each member of the Advisory Council may be reimbursed for travel and lodging incurred through attending meetings of the Advisory Council (including approved workgroup or subgroup meetings) in the same amounts and under the same conditions as Federal employees in accordance with section 5703 of title 5, United States Code.

(9) MEETINGS. □

(A) IN GENERAL. □ The Advisory Council shall meet at the call of the Secretary of the Interior, the chair, or a majority of the members, but not less frequently than twice annually.

(B) OPEN MEETINGS. □ Each meeting of the Advisory Council shall be open to the public.

(C) PRIOR NOTICE OF MEETINGS. □ Timely notice of each meeting of the Advisory Committee shall be published in the Federal Register and be submitted to publications of general circulation.

(D) SUBGROUPS. □ The Advisory Council may establish such workgroups or subgroups as it deems necessary for the purpose of compiling information or conducting research. However, such workgroups or subgroups may not conduct business without the direction of the Advisory Council.

(10) QUORUM. □ Seven members of the Advisory Council shall constitute a quorum.

(11) EXPENSES. □ The expenses of the Advisory Council that the Secretary of the Interior determine to be reasonable and appropriate shall be paid by the Secretary of the Interior.

(12) ADMINISTRATIVE SUPPORT AND TECHNICAL SERVICES. □ The Secretary of the Interior shall provide to the Advisory Council the administrative support and technical services necessary for the Advisory Council to function.

(13) ANNUAL REPORT. □

(1) REQUIRED. □ Not later than September 30 of each year, the Advisory Council shall submit a report to the Secretary of the Interior, the

Committee on Natural Resources of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate. If circumstances arise in which the Advisory Council cannot meet the September 30 deadline in any year, the Secretary of the Interior shall advise the Chair of each such Committee of the reasons for such delay and the date on which the submission of the report is anticipated.

- (2) CONTENTS. □ The report required by paragraph (1) shall describe □
- (A) the activities of the Advisory Committee during the preceding year;
  - (B) the reports and recommendations made by the Advisory Council to the Secretary of the Interior during the preceding year; and
  - (C) an accounting of actions taken by the Secretary of the Interior as a result of the recommendations.

(14) VEGETATION MANAGEMENT: Within the NCA, the Secretary of the Interior may authorize vegetation management including through mechanical means to the extent necessary to control fire, insects, or disease to promote and improve wildlife habitat and diversity as consistent with the purposes of the NCA.

(15) EXCEPTION: Notwithstanding the withdrawal in paragraph 202(a), for the Book Cliffs Sportsmens National Conservation Area, the Secretary of the Interior may lease oil and gas resources in accordance with the Mineral Leasing Act (30 U.S.C. 181 et seq.) subject to the following conditions:

- (A) the area may be accessed only by directional drilling from a lease held on the date of enactment of this Act on land that is adjacent to, and outside of, the conservation area.
- (B) the mineral lease entered into shall include a non-waivable stipulation prohibiting surface occupancy and surface disturbance for any mineral activities within the Sportsmen Conservation Area.

## **SEC. 06. - BEARS EARS NATIONAL CONSERVATION AREA ADDITIONAL PROVISIONS**

### **(a) FINDINGS. □**

Congress finds the following:

- (1) The lands within Bears Ears National Conservation Area have been utilized by Native Americans for thousands of years.
- (2) The unique, intact archaeological record found throughout the Bear[s] Ears National Conservation Area is sacred to numerous Native American tribes and Pueblos and is of great significance to American history.
- (3) Native American Tribes and Pueblos maintain deep connections and commitments to the lands within the Bears Ears National Conservation Area and

May 23, 2016 - DRAFT

continue to rely on and utilize these lands for practicing ceremonies, spiritual rejuvenation, gathering herbs, firewood and cedar poles, hunting for game, and caretaking of sacred places.

- (4) Many local residents, many with early pioneer heritage, have similarly strong attachments to the land and associated lifestyles, both vocational and avocational. Many visitors develop similar attachments and appreciation for these landscapes.

(b) ADDITIONAL PURPOSES

ADDITIONAL PURPOSES. - In accordance with this title, the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*), and other applicable laws, the Secretary of the Interior shall manage the Bears Ears National Conservation Area established by section 201 in a manner that:

- (A) Provides for traditional access by indigenous persons for culturally significant subsistence, including but not limited to traditional gathering, wood cutting, and hunting, and cultural and religious uses within the National Conservation Area;
- (B) Develops policies, consistent with the Native American Graves Repatriation and Protection Act, the National Historic Preservation Act, and the Utah State Antiquities Act to protect and preserve and minimize disturbance to Native American archaeological sites, including human remains, from permitted uses of the National Conservation Area;
- (C) Integrates Native American Traditional Ecological Knowledge (TEK)(36 CFR 219.19) to improve social, economic, and ecological sustainability in accordance with US Forest Service 2012 Planning Rule regulations, (FSH 1909.12, Zero code □ Ch10);

(c) COOPERATING AGENCIES

COOPERATING AGENCIES. □The Secretaries shall designate and involve as cooperating agencies interested Tribes and Pueblos that trace their culture and heritage to the lands within the Bear's Ears National Conservation Area in accordance with the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*).

(d) TRIBAL EMPLOYMENT

In employing individuals to perform any administrative, interpretation, construction, maintenance, interpretation, or other service in the Bear's Ears National Conservation Area, the Secretaries shall, insofar as practicable, give priority consideration to members of Native American tribes that meet publically posted job qualifications and criteria consistent with standard federal hiring practices.

(e) NATIVE AMERICAN LIAISON

The Secretary of the Interior shall appoint a staff member to serve as a liaison to the Native American tribes that enter into cooperating agency status pursuant to subsection (c). The liaison shall work to ensure the voice and perspectives of the cooperating tribal entities are represented in the implementation management of the NCA.

May 23, 2016 - DRAFT

(f) NATIVE AMERICAN COLLABORATION COMMISSION

In preparing the management plan for the Bears Ears NCA, the Secretary of the Interior shall create a Commission comprising of one representative from each Tribe or Pueblo that enters into cooperating agency status pursuant to subsection (c). The Secretary shall actively seek advice and carefully consider counsel of the Commission. The Secretary shall give full consideration to the recommendations of the Commission.

(A) Stakeholder Advisory Council Representative

The Commission shall select either a representative from the Commission or the Native American Liaison to be the Native American interest representative on the Advisory Council, pursuant to Sec. 2002 subsection (a).

(B) MEDIATION

If necessary, mediation regarding significant disagreements between the Commission and the Advisory Council shall be undertaken by the Secretary.

(g) Bears Ears Stakeholder Advisory Council

(1) ADDITIONAL MEMBERS. In addition to the membership listed in SEC. 2002

(a)(3), the San Juan Advisory Council will also include the following members:

- a. One representative with historical expertise in the Hole-in-the-Rock Trail;
- b. One representative with paleontological expertise;
- c. The representative with archaeological and/or historic expertise in SEC. 2002 (a)(3)(iii)(b) shall be an archaeologist.

**SEC. 2002 INDIAN CREEP NATIONAL CONSERVATION AREA  
ADDITIONAL PROVISIONS**

(a) ADDITIONAL PURPOSE:

1. Create an experimental range that allows for flexibility in grazing management to promote rangeland health and/or to respond to research needs; and
2. Promotes scientific research and conducts research projects on the interactive affects of land use and the environment.

**SEC. 2002 ADDITIONAL PROVISIONS FOR DOCS VALLEY STONE BRIDGE  
DRAW STUNTZ DRAW BEACH DRAW MCCOO RIDGE AND DIAMOND  
MOUNTAIN NATIONAL CONSERVATION AREAS**

(a) Nothing in this title shall effect existing or future sage grouse conservation projects, including the management of vegetation through mechanical means within the Docs Valley, Stone Bridge Draw, Stuntz Draw, Beach Draw, and Diamond Mountain National Conservation Areas established under section 201.

**Title III Watershed Management Areas**

**SEC. 301. WATERSHED MANAGEMENT AREAS**

- (a) ESTABLISHMENT.  The following watershed management areas are hereby established in the State of Utah, subject to valid existing rights:
  - (1) ASHLEY SPRING.  The  Ashley Spring Watershed Management Area  consisting of approximately 10,951 acres of the Ashley National Forest in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (2) DRY FORK.  The  Dry Fork Watershed Management Area  consisting of approximately 9,641 acres of the Ashley National Forest in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (3) CASTLE VALLEY.  The  Castle Valley Watershed Management Area  consisting of approximately 34,248 acres of the Manti-LaSal National Forest in Grand County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (4) WIDDOP MOUNTAIN.  The  Widdop Mountain Watershed Management Area  consisting of approximately 8,025 acres of the Ashley National Forest in Summit County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.
  - (5) EAST FORK SMITHS FORK.  The  East Fork Smiths Fork Watershed Management Area  consisting of approximately 3,178 acres of the Ashley National Forest in Summit County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_.

(b) MAP AND LEGAL DESCRIPTION.

- (1) IN GENERAL.  Two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Watershed Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry of the Senate.
- (2) EFFECT.  The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.
- (3) PUBLIC AVAILABILITY.  A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 30  ADMINISTRATION OF WATERSHED MANAGEMENT AREAS.**

- (a) PURPOSES.  The purposes of the watershed management areas are 
  - (1) to ensure the protection of the quality of water from the watershed management areas;

May 23, 2016 - DRAFT

- (2) to allow visitors to enjoy the scenic, natural, cultural, recreational, and wildlife values of the watershed management areas;
- (3) to provide for the management, development, and use of drinking water within the watershed areas;
- (4) to allow for the reintroduction of beavers in appropriate watershed management areas;
- (5) to allow for reintroduction of native flora (land and aquatic), bird, fish and animal fauna in special management areas and watershed management areas;
- (6) to provide for the restoration of watershed and re-establish ecosystem health in areas damaged by threatened by insects, prior land use, or disease; and
- (7) to provide for the restoration of ecosystems damaged or threatened by overpopulation of any plant, aquatic or animal species.

(b) MANAGEMENT. □

- (1) IN GENERAL. □ The Secretary shall manage the watershed areas □
  - (A) in a manner consistent with the purposes described in subsection (a);
  - (B) in accordance with □
    - (i) the laws ~~(including regulations)~~ generally applicable to the National Forest System;
    - (ii) this section; and
    - (iii) any other applicable law, ~~(including regulations)~~.

(c) MANAGEMENT PLAN. □

- (1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of Agriculture shall develop a management plan for the long-term management of each watershed management area.
- (2) RECOMMENDATIONS AND CONSULTATION- The Secretary of Agriculture shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Council established under Division C of this Act.
- (3) USES- The Secretary of Agriculture shall allow only such uses of the watershed management area that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Council established under Division C of this Act.

**SEC. 303 GENERAL PROVISIONS.**

(a) MOTORIZED VEHICLES. □

- (1) IN GENERAL- Except in cases in which motorized vehicles are needed for administrative purposes or to respond to an emergency, the use of motorized vehicles shall be permitted only on designated routes within the Watershed Management Areas.

-

May 23, 2016 - DRAFT

(b) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(c) ROAD CONSTRUCTION- The Secretary shall be permitted to construct roads for administrative or emergency purposes, or if a temporary road is needed to facilitate fuel reduction for watershed protection purposes. The Secretary shall decommission any temporary road constructed under a project under this section not later than 3 years after the date on which the project is completed.

(d) OVERSNOW VEHICLES . □ Where permitted prior to the date of enactment of this Act the Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Watershed Management Areas when there is at least six inches of snow coverage.

(e) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of Agriculture may □

(A) in consultation with state and local government and water or irrigation districts who own or control water resources within Watershed Management Areas, the Secretary of Agriculture may carry out measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Watershed Management Areas to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(f) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or affects the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(g) POST-FIRE REHABILITATION. □ The Secretary may conduct post-fire rehabilitation in the watershed areas, consistent with this title and in accordance with applicable law.

(h) VEGETATION MANAGEMENT. □ The Secretary of Agriculture shall conduct vegetation management projects within the Watershed Management Areas if projects protect or improve water quality or maintain or restore the characteristics of ecosystem composition and structure.

(i) TIMBER HARVESTING. □ Within the Watershed Management Areas, timber harvesting may be utilized if the primary purpose is to restore or improve forest health and watershed function or to further the purposes described in this title.

(j) LIVESTOCK GRAZING . □

(1) IN GENERAL . □ Within the watershed management areas established under sections 301, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

(B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process.~~to the greatest extent practicable.~~

(C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue to the greatest extent practicable. Such maintenance may include the use of Off-highway vehicle or mechanized tools and equipment.

(D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

(E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible by the permittee or an employee or agent thereof, and should not be abused by permittees.

(F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

(G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(5) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(k) EXISTING EASEMENTS AND RIGHTS-OF-WAY. □ Nothing in this Act precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this Act and existing law.

May 23, 2016 - DRAFT

(l) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a Watershed Management area designated by section 301.

(m) ACTIVITIES OUTSIDE WATERSHED MANAGEMENT AREA. □ The fact that an activity or use on land outside a Watershed Management area can be seen, heard, or smelled within the Watershed Management area shall not preclude the activity or use outside the boundary of the Watershed Management area.

(n) OUTFITTING AND GUIDE ACTIVITIES. □ Commercial services (including authorized outfitting and guide activities) within the Watershed Management Areas are authorized.

(o) FISH AND WILDLIFE. □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Watershed Management Area.

(p) ACCESS. □ The Secretary of Agriculture shall provide the owner of State or private property within the boundary of a Watershed Management Area reasonable access to the owner's property.

(q) WILDLIFE WATER DEVELOPMENT PROJECTS. □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the Watershed Management Areas are authorized.

~~(r) HUNTING AND FISHING. □~~

~~Within the Watershed Management Areas in where hunting and fishing on lands and waters owned of managed by the Department of Agriculture was allowed before the date of enactment of this Act, shall continue.~~

(r) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION. □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Watershed Management Areas designated by this title;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act, including any water rights held by the United States.

(3) establishes a precedent with regard to any future Watershed Management Area designations.

(b) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this Act shall be construed to limit motorized access and road maintenance by local municipalities or irrigation districts and other water right holders for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in

May 23, 2016 - DRAFT

Watershed Management Areas designated by section 301 subject to such reasonable regulations deemed necessary by the Secretary of Agriculture.

(s) WITHDRAWAL . □

(1) IN GENERAL . □ Subject to valid rights in existence on the date of enactment of this title, the Federal land within the Watershed Management Areas designated by section 301 are withdrawn from □

- (a) all forms of entry, appropriation, and disposal under the federal land laws;
- (b) location, entry, and patent under the mining laws; and
- (c) operation of the mineral leasing, mineral materials, and geothermal leasing laws

(t) ASHLEY SPRING AND DRY FORK.-- The management plans for the Ashley Spring and Dry Fork management areas shall include provisions for the development of containment ponds, water pipes, and other improvements to deliver water to the Ashley Valley should the flow of Ashley Spring become diminished or impaired.

## Title IV □ Special Management Areas

### SEC. 401. HIGH Uintas SPECIAL MANAGEMENT AREA.

ESTABLISHMENT. □ Subject to valid existing rights, the approximately 20,683 acres of the Ashley National Forest in Uintah and Duchesne County, Utah as generally depicted on the map entitled □ Utah PLI High Uintas Special Management Area Map □ and dated \_\_\_\_.

- (a) PURPOSES □ The purpose of the High Uintas Special Management Area (referred to in this title as the Area) are to maintain the presently existing ~~wilderness character~~ natural values of the area and to allow for the continued use of winter ~~Off-highway vehicle~~ over snow vehicles.

### SEC. 40 □ HIGH Uintas SPECIAL MANAGEMENT AREA MAP AND LEGAL DESCRIPTION.

- (1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the High Uintas Special Management Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.
- (2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.
- (3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 403. ADMINISTRATION OF THE HIGH UINTAS SPECIAL MANAGEMENT AREA.**

(a) ADMINISTRATION . □

(1) IN GENERAL . □ The Secretary of Agriculture shall administer the High Uintas Special Management Area in accordance with □

- (a) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);
- (b) this title; and
- (c) other applicable laws.

(b) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of Agriculture shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary the Agriculture shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of Agriculture shall allow only such uses of the special management area that would further the purposes outlined in subsection 401(a) of this Title and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the special management areas shall:

- (A) maintain the presently existing, outstanding natural values ~~wilderness character~~ of the special management area.
- (B) allow for non motorized recreational opportunities to occur within the Area including skiing, biking, hiking, fishing, hunting, horseback riding, snowshoeing, and camping;
- (C) allow for the continued use and access of over snow vehicles including snowmobiles
- (D) prohibit mineral development;
- (E) prohibit new permanent road construction; and
- (F) prohibit commercial timber harvesting.

**SEC. 404. HIGH UINTAS SPECIAL MANAGEMENT AREA GENERAL PROVISIONS.**

(a) WITHDRAWALS-

(1) Subject to valid existing rights, all federal land within the High Uintas Special Management Area established under section 401, including any land or interest in land that is acquired by the United States within the conservation area after the date of enactment of this Act, is withdrawn from--

- (1) entry, appropriation or disposal under the public land laws;
- (2) location, entry, and patent under the mining laws; and

(3) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(b) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of the Agriculture may take such measures in the High Uintas Special Management Area as are necessary for the control of fire, insects, and diseases (including, as the Secretary determines to be appropriate, the coordination of the activities with a state or local agency).

(c) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or affects the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to protect or improve water quality or to maintain or restore the characteristics of ecosystem composition and structure.

(d) LIVESTOCK . □

(1) IN GENERAL . □ Within the High Uintas Special Management Area the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

(B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process.~~to the greatest extent practicable.~~

(C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue to the greatest extent practicable. Such maintenance may include the use of Off-highway vehicle or mechanized tools and equipment.

(D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

(E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible by the permittee or an employee or agent thereof, and should not be abused by permittees.

(F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

(G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(4) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of the Interior or the Secretary of Agriculture as appropriate to establish historic grazing areas or use.

(e) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around the High Uintas Special Management Area.

(b) ACTIVITIES OUTSIDE THE AREA. □ The fact that an activity or use on land outside the High Uintas Special Management Area can be seen, heard, or smelled within the Area shall not preclude the activity or use outside the boundary of the Area.

(f) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the High Uintas Special Management Area are authorized.

(g) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping and use of helicopters to maintain healthy wildlife populations, within the High Uintas Special Management Area

(h) ACCESS . □ The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the High Uintas Special Management Area.

(i) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the High Uintas Special Management Area are authorized.

~~(j) HUNTING AND FISHING. □ Within the Area, hunting and fishing, in areas where hunting and fishing has been allowed on lands and waters owned or managed by the Department of Agriculture before the date of enactment of this Act, shall continue.~~

(j). □ WATER RIGHTS

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the High Uintas Special Management Area;

(2) affects any water rights in the State of Utah existing on the date of enactment of this Act;

(3) establishes a precedent with regard to any future special management areas designations.

(b) UTAH WATER LAW. □The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the High Uintas Special Management Area.

(c) EFFECTS ON STATE WATER RIGHTS. □The Secretary of Agriculture and Secretary of Agriculture shall not take any action that adversely affects □

(1) any water rights granted by the State;

(2) the authority of the State in adjudicating water rights;

(3) definitions established by the State with respect to the term □beneficial use□or □priority of rights□

(4) terms and conditions for groundwater withdrawal;

(5) the use of groundwater resources that are in accordance with State law;

or

(6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this Act shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities, water districts or irrigation districts, for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the High Uintas Special Management Area.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □The term □water resource facilities□means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(k) PERMANENT ROAD CONSTRUCTION-

(1) After the date of enactment of this Act, except as necessary for administrative purposes or to respond to an emergency, the Secretary of Agriculture shall not construct any permanent road within the High Uintas Special Management Area

(l) TEMPORARY ROAD CONSTRUCTION -- ~~Except as necessary to meet the minimum requirements for the administration of the High Uintas Special Management Area, and to protect public health and safety, the establishment of temporary roads is prohibited. The Secretary shall decommission any temporary road constructed under a project under this section not later than 3 years after the date on which the project is completed.~~

May 23, 2016 - DRAFT

(m) USE OF MOTORIZED OR MECHANIZED VEHICLES -- Except as necessary to meet the minimum requirements for the administration of the High Uintas Special Management Area and to protect public health and safety the use of Off-highway vehicle or mechanized vehicles is prohibited.

(n) COMMERCIAL TIMBER HARVESTING  Commercial timber harvesting within the High Uintas Special Management Area is prohibited.

(o) OVERSNOW VEHICLES  The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the High Uintas Special Management Area when there is at least six inches of snow coverage.

**SEC. 405. LITTLE WEST FORK  BLACKS SPECIAL MANAGEMENT AREA.**

(A) ESTABLISHMENT.  Subject to valid existing rights, the approximately 8,231.25 acres of the Wasatch Cache National Forest in Summit County, Utah as generally depicted on the map entitled  Utah PLI Little West Fork Blacks Special Management Area Map  and dated \_\_\_\_.

(B) MAP AND LEGAL DESCRIPTION.

(1) IN GENERAL.  Two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Little West Fork Blacks Special Management Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources and the Committee on Agriculture, Nutrition, and Forestry of the Senate.

(2) EFFECT.  The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY.  A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 406. ADMINISTRATION OF LITTLE WEST FORK  BLACKS FOR  SPECIAL MANAGEMENT AREA.**

(a) PURPOSE.  Little West Fork Blacks Fork Special Management Area is to manage, maintain, and restore watershed and ecosystem function and aquatic habitat within the Area.

(b) ADMINISTRATION.

(A) IN GENERAL.  The Secretary of Agriculture shall administer the Little West Fork Blacks Special Management Area

- (i) in a manner that promotes, protects, and manages the resources of the Little West Fork Blacks Fork Special Management Area described in subsection (a); and
- (ii) in accordance with

- (I) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);
- (II) this Act; and
- (III) other applicable laws.

(c) MANAGEMENT PLAN .

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of Agriculture shall develop a management plan for the long-term management of each watershed management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of Agriculture shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(3) USES- The Secretary of Agriculture shall allow only such uses of the special management area that would further the purposes outlined in subsection 406(a) of this Title and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the special management areas shall:

(A) include skiing, biking, hiking, fishing, hunting, horseback riding, snowmobiling, motorcycle riding, off-highway vehicle use, snowshoeing, and camping.

(B) allow for reintroduction of native flora (land and aquatic), bird, fish and animal fauna in special management areas;

(C) restore watershed and re-establish ecosystem health in areas damaged by threatened by insects, or disease;

(D) restore balance of ecosystem damaged or threatened by overpopulation of overpopulation of any plant, aquatic or animal species.

(E) Allow fuel reduction and forest health treatment to restore watershed and ecosystem function, reduce hazardous fuels, and to protect property in the wildland urban interface.

**SEC. 40  LITTLE WEST FOR  BLAC  S FOR  SPECIAL MANAGEMENT AREA GENERAL PROVISIONS.**

(a) OFF-HIGHWAY VEHICLE VEHICLES.

(1) IN GENERAL- Except in cases in which Off-highway vehicle and non- mechanized vehicles are needed for administrative purposes or to respond to an emergency, the use of

May 23, 2016 - DRAFT

Off-highway vehicle vehicles shall be permitted only on designated routes within the Little West Fork Blacks Fork Special Management Areas.

(2) MANAGEMENT-

(A) IN GENERAL- The Secretary of Agriculture shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized on January 1, 2016;
- (ii) minimizes conflict with sensitive habitat or cultural or historical resources; and
- (iii) does not interfere with private property or water rights.

(B) CLOSURE OR REROUTING.

(i) IN GENERAL- A designated route may be closed or rerouted, if the Secretary of Agriculture, in consultation with the State, or relevant local government within the State, subject to subparagraph (C), determines that--

- (I) the designated route is damaging cultural resources or historical resources;
- (II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.
- (III) modification of the designated route would not significantly affect access within the conservation area.
- (IV) all other options, other than a temporary closure or rerouting, have been exhausted.
- (V) an alternative route has been provided, which can include routes previously closed.

(C) NOTICE- The Secretary of Agriculture shall provide information to the public regarding any designated routes that are open, have been rerouted, or are temporarily closed through--

- (i) use of appropriate signage within the Special Management Area.;
- (ii) use of the internet and web resources.

(b) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(c) PERMANENT ROAD CONSTRUCTION- Except as necessary for administrative purposes or to respond to an emergency, the Secretary of Agriculture shall not construct any permanent road within the Special Management Area after the date of enactment of this Act.

May 23, 2016 - DRAFT

(d) TEMPORARY ROAD CONSTRUCTION. □ Temporary road construction shall be permitted to fulfill the purposes of the area, including for fuel reduction and forest health management treatments, including prescribed burns. The Secretary shall decommission any temporary road constructed under a project under this section not later than 3 years after the date on which the project is completed.

(e) OVERSNOW VEHICLES . □ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Special Management Areas when there is at least six inches of snow coverage.

(f) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of Agriculture may □

(A) carry out measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Special Management Areas; and

(B) coordinate those measures with the appropriate State or local agency.

(h) WILDLAND FIRE OPERATIONS. □ Consistent with the purposes of this Title, nothing in this title precludes the Secretary of Agriculture from authorizing a Federal, State, or local agency from conducting pre-suppression and suppression or wildfire management operations (including operations using aircraft or mechanized equipment

(i) LIVESTOCK GRAZING . □

(1) IN GENERAL . □ Within the Special Management Area, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

(B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process.~~to the greatest extent practicable.~~

(C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue to the greatest extent practicable. Such maintenance may include the use of Off-highway vehicle or mechanized tools and equipment.

- (D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.
- (E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible by the permittee or an employee or agent thereof, and should not be abused by permittees.
- (F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.
- (G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue.

### (3) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

- (j) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this Act precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this Act and existing law.
- (k) ADJACENT MANAGEMENT. 
  - (a) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around the Little West Fork Blacks Fork Special Management Area designated by this section.
  - (b) ACTIVITIES OUTSIDE SPECIAL MANAGEMENT AREA.  The fact that an activity or use on land outside the Little West Fork Blacks Fork Special Management Area can be seen, heard, or smelled within the Little West Fork Blacks Fork Special Management Area shall not preclude the activity or use outside the boundary of Little West Fork Blacks Fork Special Management Area
- (l) OUTFITTING AND GUIDE ACTIVITIES .  As permitted as of January 1, 2016 Commercial services (including authorized outfitting and guide activities) within the Little West Fork Blacks Special Management Area are authorized
- (m) FISH AND WILDLIFE .  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and within the Little West Fork Blacks Fork Special Management Area.
- (n) ACCESS .  Consistent with the purposes of the Title, and as authorized as of the date of enactment of this Title, The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the Little West Fork Blacks Special Management Area access to the owner's property.

~~UNIVERSITY OF UTAH SYSTEM OF HIGHER EDUCATION~~

(o) WATER RIGHTS.

(a) STATUTORY CONSTRUCTION.  Nothing in this title

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Special Management Areas designated by section ~~304~~405;

(2) affects any water rights in the State of Utah;

(3) establishes a precedent with regard to any future Special Management Areas designations.

(b) UTAH WATER LAW. The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the Special Management Areas.

(c) EFFECTS ON STATE WATER RIGHTS. The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects

(1) any water rights granted by the State;

(2) the authority of the State in adjudicating water rights;

(3) definitions established by the State with respect to the term beneficial useor priority of rights

(4) terms and conditions for groundwater withdrawal;

(5) the use of groundwater resources that are in accordance with State law; or

(6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE.

(1) Nothing in this title shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities, ~~irrigation districts, or water districts~~ for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the Little West Fork Blacks ~~Fork~~ Special Management Area designated by this section.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. The term water resource facilitiesmeans irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines,

May 23, 2016 - DRAFT

wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(p) VEGETATION MANAGEMENT.  Consistent with the purposes of the Little West Fork Blacks Fork Special Management Area, nothing in this title prevents the Secretary of Agriculture from conducting vegetation management projects within the Little West Fork Blacks Fork Special Management Area.

(q) COMMERCIAL TIMBER HARVEST.  Consistent with the purposes of the Little West Fork Blacks Fork Special Management Area within the Little West Fork Blacks Fork Special Management Area, commercial timber harvest is not prohibited if the primary purpose is to restore or improve forest health-resiliency and watershed function or to further the purposes described in this title

(r) WITHDRAWAL .

(1) IN GENERAL .  Subject to valid rights in existence on the date of enactment of this title ,the Federal land within the Little West Fork Blacks Fork Special Management Area designated by this section are withdrawn from

- (a) all forms of entry, appropriation, and disposal under the federal land laws;
- (b) location, entry, and patent under the mining laws; and
- (c) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(s) ACCESS.  Nothing in this section prohibits the Secretary from authorizing reasonable access to private land inside or adjacent to the Little West Fork Blacks Fork Special Management Area including the construction of permanent roads within the Little West Fork Blacks Fork Special Management Area

#### **SEC. 40 DESOLATION CANYON NINE MILE CANYON AND WHITE RIVER SPECIAL MANAGEMENT AREAS**

(a) ESTABLISHMENT.  Subject to valid existing rights, the following areas in the State are hereby established as Special Management Areas:

(1) WHITE RIVER.  Certain federal land, comprising approximately 16,785 acres administered by the Bureau of Land Management in Uintah County, Utah as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the  White River Special Management Area.

(2) NINE MILE CANYON.  Certain federal land, comprising approximately 41,301 acres administered by the Bureau of Land Management in Carbon County and Duchesne County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the  Nine Mile Canyon Special Management Area.

May 23, 2016 - DRAFT

(3) DESOLATION CANYON.  Certain federal land, comprising approximately 8,770 acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Special Management Area Map and dated \_\_\_\_\_, to be known as the  Desolation Canyon Special Management Area.

(b) PURPOSES  The purposes of the Desolation Canyon, Nine Mile Canyon, and White River Special Management Areas established under 407(a) in a manner that:

- 1) Protects, conserves, and enhances the unique and nationally important historic, cultural, scientific, scenic, recreational, archaeological, natural, and educational resources of the ~~Conservation management areas~~;
- 2) Maintains and enhances cooperative and innovative management practices between resource managers, private landowners, and the public in the ~~Conservation~~ management areas; and
- 3) Recognizes and maintains to the extent practicable historic uses of the ~~Conservation Area~~ management areas.

**SEC. 40  ~~DESOLATION CANYON~~  ~~NINE MILE CANYON~~  ~~AND WHITE RIVER SPECIAL MANAGEMENT AREA MAP AND LEGAL DESCRIPTION.~~**

(1) IN GENERAL.  Not later than two years after the date of enactment of this Act, the Secretary of ~~Agriculture the Interior~~ shall file a map and legal description of the Desolation Canyon, Nine Mile Canyon, and White River Special Management Areas with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT.  The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of ~~Agriculture the Interior~~ may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY.  A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the ~~United States Forest Service~~ BLM.

**SEC. 40  ~~ADMINISTRATION OF THE DESOLATION CANYON~~  ~~NINE MILE CANYON~~  ~~AND WHITE RIVER SPECIAL MANAGEMENT AREAS.~~**

(a) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each ~~watershed-special~~ management area.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

May 23, 2016 - DRAFT

#### **SEC. 410. DESOLATION CANYON NINE MILE CANYON AND WHITE RIVER SPECIAL MANAGEMENT AREA GENERAL PROVISIONS**

(a) The general provisions of Title II section 204 shall apply to the Special Management Areas.

(b) EXCEPTION. □

(a) The withdrawal outlined in 204(a) shall not apply to the Desolation Canyon Special Management Area, White River Special Management Area, and the Nine Mile Canyon Special Management Area.

(b) The Secretary of the Interior may lease oil and gas resources in accordance with the Mineral Leasing Act (30 U.S.C. 181 et seq.) subject to the following conditions:

(A) the area may be accessed only by directional drilling from a lease held on the date of enactment of this Act on land that is adjacent to, and outside of, the special management area.

(B) the lease shall prohibit surface occupancy and surface disturbance for any mineral activities within the special management areas.

(c) NINE MILE CANYON ADDITIONAL PROVISIONS. □

1. Energy development, including access needs for energy development, within the Nine Mile Canyon Special Management Area shall be allowed under the terms of the West Tavaputs Plateau Project Final Environmental Impact Statement and Record of Decision of July 2, 2010.

2. The management plan required under Sec. 409 of this Title for the Nine Mile Canyon Special Management Area shall be developed jointly between Carbon and Duchesne County Advisory Council.

3. Upon enactment of this Title, the current ACEC designation shall be permanently removed from the Nine Mile Canyon area.

## **Title V - ARCHES NATIONAL PARK EXPANSION**

#### **SEC. 501. ARCHES NATIONAL PARK EXPANSION**

(A) Section 1 of Public Law 92-155 is amended □

(1) by inserting the following after paragraph (2) □

□(3) Effective on the date of enactment of the Utah Public Lands Initiative Act, the boundary of the park shall include the area consisting of approximately 19,255 acres and depicted as Arches Expansion on the map entitled □Utah PLI Park and Monument Map□ and dated \_\_\_\_\_ □

(2) by redesignating paragraph (3) as paragraph (4); and

(3) in paragraph (4), as so designated by paragraph (2) of this provision, by striking □(1) and (2)□ and inserting instead □(1), (2) and (3)□

~~SEC. 50~~ ~~EXISTING TRAILS~~

~~(a) The public shall have continued access Off highway vehicle access to the Klondike Bluffs, Dry Mesa, Winter Camp Ridge (to the overlook of Salt Wash), The Highlands (pipeline to the overlook of Salt Wash), and The Eagle's Nest trails, subject to reasonable regulations as prescribed by the Secretary.~~

~~(b) The National Park Service shall enter into a cooperative agreement with Ride with Respect that provides for continued public access of the trails outlined in this section, maintains the conservation qualities of the Park, and provides a framework for maintenance cost sharing.~~

~~(c) Where practicable, mountain biking shall be permitted and promoted within the trails outlined in subsection (a).~~

~~SEC. 503~~ ~~TRANSPORTATION PLANNING~~

~~(a) The National Park Service shall work to create a northern entrance, which is being facilitated by the expansion outlined in 501(a), that enhances the visitor experience and alleviates traffic congestion at the current Park entrance.~~

## Title VI - JURASSIC NATIONAL MONUMENT

### SEC. 601. JURASSIC NATIONAL MONUMENT

(a) PURPOSES. - To conserve, protect, interpret, and enhance for the benefit of present and future generations the unique and nationally important paleontological, scientific, educational, and recreational resources, there is established in Emery County, Utah, subject to valid existing rights, the Jurassic National Monument (referred to in this title as the Monument).

(b) BOUNDARIES. The Monument shall consist of approximately 867 acres of federal land in Emery County, Utah as generally depicted on the map entitled Utah PLI Park and Monument Map and dated \_\_\_\_\_

(c) MAP ; LEGAL DESCRIPTION .

(1) IN GENERAL. Two years after the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the ~~Special Management Areas~~ national monument with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. The map and legal description prepared under paragraph (b) shall have the same force and effect as if included in this title, except that the Secretary of the Interior may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

(d) ACQUISITION OF LAND .

(1) IN GENERAL. □ The Secretary of the Interior may acquire land or interests in land within the boundaries of the Monument only by donation, exchange, or purchase from a willing seller.

(2) LAND EXCHANGE. □ At the request of the State, not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall complete exchanges for State land located within the boundaries of the Monument designated by this title.

(3) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(e) WITHDRAWALS. □ Subject to valid existing rights, any land within the Monument or any land or interest in land that is acquired by the United States for inclusion in the Monument after the date of enactment of this section is withdrawn from □

(i) entry, appropriation, or disposal under the federal land laws;

(ii) location, entry, and patent under the mining laws; and

(iii) operation of the mineral leasing laws, geothermal leasing laws, and minerals materials laws.

(f) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the Monument.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of the Interior shall allow only such uses of the national monument that would further the purposes outlined in subsection (a) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the national monument may:

(A) address transportation issues to and from the Monument; and

(B) codify the current Special Recreation Management Area boundary.

(g) ADMINISTRATION. □ The Secretary of the Interior shall administer the Monument in accordance with---

(1) the Management Plan; and

(2) any other applicable laws.

(h) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a Monument designated by this Act.

(b) ACTIVITIES OUTSIDE MONUMENT. □ The fact that an activity or use on land outside the Monument can be seen, heard, or smelled within the Monument shall not preclude the activity or use outside the boundary of the Monument.

## TITLE VII - WILD AND SCENIC RIVERS

**SEC. 01 - WILD AND SCENIC RIVERS**

(a) Section 3(a) of the Wild and Scenic Rivers Act (16 U.S.C. 1274(a)) is amended by adding at the end the following:

□(213) COLORADO RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 14.4 mile segment from Westwater Canyon from River Mile 125 to River Mile 112 as a wild river.
- (B) The approximately 8 mile segment from River Mile 112 to Cisco Wash as a scenic river.
- (C) The approximately 33.1 mile segment from the Confluence of the Colorado River with the Dolores River to River Mile 49 near Potash as a recreational river.
- (D) The approximately 5.7 mile segment from River Mile 44.5 to River mile 38.5 as a scenic river.
- (E) The approximately 3.7 mile segment from River Mile 37.5 to River Mile 34 at the Canyonlands National Park boundary as a scenic river.
- (F) The approximately 5.5 mile river segment from River Mile 44 to River Mile 38.5 as a scenic river.
- (G) The approximately 6.5 river segment of the Colorado River from River Mile 37.5 to the boundary of Canyonlands National Park at River Mile 31 as a scenic river.

□(214) DOLORES RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 5.9 mile segment from the Colorado State line to Fisher Creek as a recreational river.
- (B) The approximately 6.3 mile segment from Fisher Creek to Bridge Canyon as a scenic river
- (C) The approximately 9.9 mile segment from Bridge Canyon to the Colorado River as a recreational river.

□(215) GREEN RIVER. The following segments in the State of Utah, to be administered by the Secretary of the Interior as follows:

- (A) The approximately 50 mile river segment from River Mile 97 at the confluence with the San Rafael River to Canyonlands National Park Boundary as a scenic river.
- (B) The approximately 44.5 miles from Nine Mile Creek to Chandler Canyon as a wild river
- (C) The approximately 8 miles from Chandler Creek to Florence Creek as a scenic river.
- (D) The approximately 19 miles from Florence Creek to the Nefertiti Boat Ramp as a wild river.

May 23, 2016 - DRAFT

- (E) The approximately 62 miles from the northern border of the Desolation Canyon Wilderness, designated under this Act, in Uintah County, Utah to the Carbon County line as a recreation river.

□(216) DARK CANYON, UTAH. The approximately 18.7 miles of the Dark Canyon River from the forest boundary to the Lake Powell below Young's Canyon to be administered by the Secretary of the Interior as a wild river.

(b) ADJACENT MANAGEMENT. □

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around a wild and scenic river designated by this title.

(b) ACTIVITIES OUTSIDE WILD AND SCENIC RIVER. □ The fact that an activity or use on land outside a wild and scenic river designated under this section can be seen, heard, or smelled within the wild and scenic river shall not preclude the activity or use outside the boundary of the wild and scenic river.

(c) The Secretary of the Interior may acquire land or interest in land within the boundaries of the wild and scenic river areas designated by this title only by donation, exchange, or purchase from a willing seller. □

(d) NO CONDEMNATION. □ Within the areas designated by this title the use of eminent domain or condemnation shall be prohibited.

(e) OUTFITTING AND GUIDE ACTIVITIES. □ Commercial services (including authorized outfitting and guide activities) within the wild and scenic rivers are authorized.

(f) MAPS AND LEGAL DESCRIPTION

(1) IN GENERAL. □ Not later than two years after the date of enactment of this Act, the Secretary of the Interior shall file a map, entitled Utah PLI Wild and Scenic Rivers, and legal description of the rivers with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. □ The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of the Interior may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the ~~United States Forest Service~~BLM.

## TITLE VIII □ ASHLEY □ ARST NATIONAL GEOLOGIC AND RECREATION AREA

### SEC. □01. ASHLEY □ ARST NATIONAL GEOLOGIC AND RECREATION AREA.

(a) ESTABLISHMENT. □ Subject to valid existing rights, the approximately 110,839 acres generally depicted on the map entitled Utah PLI Special

May 23, 2016 - DRAFT

Management Area Map and dated \_\_\_\_\_, are hereby established as the Ashley Karst National Geologic and Recreation Area

(b) PURPOSES The purposes of the Ashley Karst National Geologic and Recreation Area (referred to in this title as the Area) are to provide recreational opportunities, protection and management of water resources, utilize commercial forest products, to protect fish and wildlife habitat, and withdraw minerals from development.

**SEC. 02 MAP AND LEGAL DESCRIPTION.**

(1) IN GENERAL. Not later than two years after the date of enactment of this Act, the Secretary of Agriculture shall file a map and legal description of the Area with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) EFFECT. The map and legal description prepared under paragraph (1) shall have the same force and effect as if included in this title, except that the Secretary of Agriculture may correct minor errors in the map or legal description.

(3) PUBLIC AVAILABILITY. A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the United States Forest Service.

**SEC. 03. ADMINISTRATION.**

(a) ADMINISTRATION

(1) IN GENERAL. The Secretary of Agriculture shall administer the Area in accordance with

(a) the National Forest Management Act of 1976 (16 U.S.C. 1600 et seq.);

(b) this title; and

(c) other applicable laws.

(2) MANAGEMENT PLAN

(a) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the Area.

(b) RECOMMENDATIONS AND CONSULTATION- The Secretary of Agriculture shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.

(c) USES- The Secretary of Agriculture shall allow only such uses of the Area that would further the purposes outlined in subsection 801(b) of this section and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act. Other uses of the Area shall:

(A) provide for recreational opportunities to occur within the Area including skiing, biking, hiking, fishing, hunting, horseback riding, snowmobiling, designated trails for motorcycle riding and off-highway vehicle use, snowshoeing, camping, and other recreational activities consistent with this title;

(C) provide for ~~appropriate~~ active forest management, utilizing commercial harvesting for hazardous fuels reduction, wildland fire control, control of insects and disease, and watershed health;

(D) prohibit mineral development; and

(E) promote the long-term protection and management of the water resources and underground karst system; and

(F) comply with Sections 801 and 804 .

**SEC. 04 GENERAL PROVISIONS.**

(a) OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(1) IN GENERAL- The use of Off-highway vehicle and mechanized vehicles shall be permitted within the Area.

(2) MANAGEMENT-

(A) IN GENERAL- The Secretary of Agriculture shall designate existing routes in a manner that--

(i) utilizes Forest Service roads existing as of January 1, 2016 and also new roads authorized by this Act;

(ii) minimizes conflict with sensitive habitat or cultural or historical resources;

(iii) does not interfere with private property or water rights.

(B) CLOSURE OR REROUTING-

(1) FEASIBILITY STUDY. □ Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall study the feasibility and public interest of constructing new routes as needed to further mechanized and hiking recreational opportunities and purposes of the area.

(2) CONSTRUCTION. □

(A) CONSTRUCTION AUTHORIZED. □ If the Secretary of Agriculture determines that the construction of a route is feasible the Secretary of Agriculture may provide for the construction of the route.

(B) USE OF VOLUNTEER SERVICES AND CONTRIBUTIONS. □ A route may be constructed under this subsection through the acceptance of volunteer services and contributions from non-federal sources.

(c) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land located within the Area.

(d) OVERSNOW VEHICLES . □ The Secretary of Agriculture shall authorize the use of snowmobiles and other oversnow vehicles within the Area when there is at least six inches of snow coverage.

(e) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of Agriculture may □

(1) carry out any measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the Area; and

(2) coordinate those measures with the appropriate State or local agency.

(f) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or interfere with the authority of the Secretary of Agriculture to authorize mechanical thinning of trees or underbrush to prevent or control the spread of wildfires or the use of mechanized equipment for wildfire pre-suppression and suppression.

(g) LIVESTOCK GRAZING.. □

(1) IN GENERAL . □ Within the Area, Within the Area, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in

May 23, 2016 - DRAFT

accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

(B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process to the greatest extent practicable.

(C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall continue to the greatest extent practicable. Such maintenance may include the use of Off-highway vehicle or mechanized tools and equipment.

(D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

(E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible by the permittee or an employee or agent thereof, and should not be abused by permittees.

(F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

(G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

(3) UTAH DEPARTMENT OF AGRICULTURE - In instances in which historic grazing locations, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given consideration by the Secretary of Agriculture to establish historic access, locations, or use.

(h) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this title precludes the Secretary of Agriculture from renewing easements or rights-of-way in existence on the date of enactment of this Act, in accordance with this Act and existing law.

(i) ADJACENT MANAGEMENT.

(a) IN GENERAL. □ Nothing in this title creates a protective perimeter or buffer zone around the Area designated by section 801.

(b) ACTIVITIES OUTSIDE AREA. □ The fact that an activity or use on land outside the Area can be seen, heard, or smelled within the Area shall not preclude the activity or use outside the boundary of the Area.

(j) OUTFITTING AND GUIDE ACTIVITIES . □ Commercial services (including authorized outfitting and guide activities) within the Area are authorized.

(k) FISH AND WILDLIFE . □ Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the Area.

(l) ACCESS . □ The Secretary of Agriculture shall provide the owner of State or private property within the boundary of the Area access to the property.

(m) WILDLIFE WATER DEVELOPMENT PROJECTS . □ Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the Area are authorized

~~(n) HUNTING AND FISHING. □~~

~~Within the Area in where hunting and fishing on lands and waters owned of managed by the Department of Agriculture was allowed before the date of enactment of this Act, shall continue.~~

(n) WATER RIGHTS. □

(a) STATUTORY CONSTRUCTION . □ Nothing in this title □

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the Area designated by section 801;

(2) affects any water rights in the State;

(3) establishes a precedent with regard to any future designations.

(4) shall restrict or prohibit the upstream diversion of water rights held under Utah State law nor shall any claim of resource damages arise due to the rightful diversion or depletion of streams or rivers affecting the Area.

(b) UTAH WATER LAW. □ The Secretary of Agriculture shall follow the procedural and substantive requirements of State law to obtain and hold

any water rights not in existence on the date of the enactment of this Act with respect to the Area.

(c) EFFECTS ON STATE WATER RIGHTS. □The Secretary of the Interior and Secretary of Agriculture shall not take any action that adversely affects □

- (1) any water rights granted by the State;
- (2) the authority of the State in adjudicating water rights;
- (3) definitions established by the State with respect to the term □beneficial use□or □priority of rights□
- (4) terms and conditions for groundwater withdrawal;
- (5) the use of groundwater resources that are in accordance with State law; or
- (6) other rights or obligations of the State as established under State law.

(d) EXISTING WATER INFRASTRUCTURE. □

(1) Nothing in this title shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities or water or irrigation districts for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in the Area designated by section 801.

(2) Nothing in this Act shall be construed to encumber, transfer, impair, or limit any water right, or recognized beneficial use, including access to, development, and use of livestock water rights as defined by State law.

(e) DEFINITION. □The term □water resource facilities□means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.

(o) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of Agriculture from conducting vegetation management projects within the Area.

(p) WITHDRAWAL . □

May 23, 2016 - DRAFT

(A) IN GENERAL . □ Subject to valid rights in existence on the date of enactment of this Act the federal land within the Area is withdrawn from □

(i) all forms of entry, appropriation, and disposal under the federal land laws;

(ii) location, entry, and patent under the mining laws; and

(iii) operation of the mineral leasing, mineral materials, and geothermal leasing laws.

(q) FEES . □ Except for improved campgrounds, within the Area the United States Forest Service is prohibited from the collecting or requiring fees for access or use.

# Division B ☐ Opportunit☐

## Title I ☐ School Trust Land Consolidations

### SEC. 101. FINDINGS AND PURPOSE

(a) FINDINGS. ☐ Congress finds that the land exchange authorized and directed by this Act furthers public objectives referenced in section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) including ☐

- (A) Promoting better management of federal conservation areas by removing inheld state trust land sections;
- (B) Securing Federal ownership and protection of land with significant wildlife, recreational, scenic, cultural and other public values;
- (C) Assisting the State of Utah and local governments in economic development and community expansion through the consolidation of state trust lands in manageable blocks near several Utah communities; and
- (D) Advancing public education through increased opportunity for economic development of Utah school trust lands, in furtherance of the land grants made under the Utah Enabling Act, Act of July 16, 1894 (28 Stat. 107, chapter 138).

(b) PURPOSE ☐ It is the purpose of this title to authorize, direct, facilitate, and expedite the exchange of land between the State of Utah and the United States.

### **SEC. 10 ☐ DEFINITIONS.**

In this Act:

(1) MAPS. ☐ The term "Maps" means the following maps prepared by the Bureau of Land Management:

- (a) Land Conveyances - Carbon County dated [date]
- (b) Land Conveyances ☐ Duchesne County dated [date]
- (c) Land Conveyances - Emery County dated [date]
- (d) Land Conveyances ☐ Grand County dated [date]
- (e) Land Conveyances ☐ San Juan County dated [date]
- (f) Land Conveyances ☐ Uintah County dated [date]

(2) NON-FEDERAL LAND. ☐ The term "non-Federal land" means the lands identified on the Maps as "State Trust Land Proposed for Transfer to United States" ☐ "State Trust Lands ☐ Surface Only Proposed for Transfer to United States" and "State Trust Lands -- Minerals Only Proposed for Transfer to United States" located in Carbon, Duchesne, Emery, Grand, San Juan and Uintah counties, Utah, as generally depicted on the Maps.

(3) SECRETARY. ☐ The term "Secretary" means the Secretary of the Interior.

(4) STATE. ☐ The term "State" means the State of Utah, acting as trustee under the Utah State School and Institutional Trust Lands Management Act (Utah Code Ann. 53C ☐ ☐ 101 et seq) through the Utah School and Institutional Trust Lands Administration.

### **SEC. 103. EXCHANGE OF LAND ☐ RESERVATION OF INTERESTS.**

- (a) In General.--If the State offers to convey to the United States title to the non-Federal land, the Secretary shall, subject to the provisions of this title--
- (1) accept the offer; and
  - (2) on receipt of the right, title, and interest of the State in and to the non-Federal land, convey to the State all right, title, and interest of the United States in and to the Federal land.
- (b) Valid Existing Rights.--The exchange authorized under subsection (a) shall be subject to valid existing rights.
- (c) Costs  Costs of the land exchange shall be allocated in accordance with section 206(f)(2)(B) of FLPMA (43 U.S.C. 1716(f)(2)(B)).
- (d) Title Approval.--Title to the Federal land and non-Federal land to be exchanged under this section shall be in a format acceptable to the Secretary and the State.
- (e) Reservation of Interest in Potash.--
- (1) In general.--With respect to Federal land that contains potash resources, the Secretary shall reserve an interest in all potash resources.
  - (2) Extent of interest.--The interest reserved by the United States under paragraph 1 shall consist of--
    - (A) 50 percent of any bonus bid or other payment received by the State as consideration for securing any lease or authorization to develop potash resources;
    - (B) 50 percent of the amount that would have been received by the Federal Government under the royalty rate applicable on July 1, 2015 if the potash resources had been retained in Federal ownership; and
    - (C) 50 percent of any other payment received by the State pursuant to any lease or authorization to develop the potash resources.
  - (3) Upon receipt of any funds from potash leasing and development on lands in which the Secretary has reserved an interest, the State shall pay the Secretary amounts attributable to the reserved interest of the United States in accordance with paragraph (4).
  - (4) Payment. 
    - (A) Any amounts due under paragraph (3) shall be paid by the State to the United States not less than quarterly.
    - (B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2).
  - (5) No obligation to lease.--The State shall not be obligated to lease or otherwise develop potash resources in which the United States retains an interest under this subsection.
- (f) Reservation of Wellbore Interest in Oil and Gas
- (1) In general.  The Secretary shall reserve a wellbore interest in each oil and gas well on Federal land that has been determined by the Secretary to be capable of production in paying quantities as of the date of conveyance.
  - (2) Extent of interest.  The wellbore interest reserved to the United States under paragraph (1) shall consist of all royalties attributable to any zones or horizons that are being produced from an oil and gas well located on Federal land as of the date of conveyance.

(3) Upon receipt of any funds attributable to the reserve wellbore interest of the United States, the State shall pay the Secretary all such amounts in accordance with paragraph (4).

(4) Payment. □

(A) Any amounts due under paragraph (2) shall be paid by the State to the United States not less than quarterly.

(B) The State may deduct an administrative fee of three per cent from all payments due to the United States under paragraph (2)

(5) Termination of Reserved Interest. □ The reserved wellbore interests of the United States in oil and gas shall automatically terminate on the date that is ten years after the enactment of this Act.

(6) Sharing of Revenue. The United States shall share all revenue received with respect to its reserved wellbore mineral interest in oil and gas with the State of Utah in accordance with 30 U.S.C. 191(a).

(g) Appurtenant Water Rights.--Any conveyance of a parcel of Federal land or non-Federal land under this Act shall include the conveyance of water rights appurtenant to the parcel conveyed.

#### **SEC. 104. APPRAISALS**

(a) Equal Value Exchange. □

(1) In general.--The value of the Federal land and non-Federal land to be exchanged under this Act □

(A) shall be equal; or

(B) shall be made equal in accordance with section 5.

(b) Appraisals.--The value of the Federal land and the non-Federal land shall be determined by appraisals conducted by 1 or more independent appraisers retained by the State, with the consent of the Secretary.

(c) Applicable law.--The appraisals conducted under paragraph (1) ---

(A) shall be conducted in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716); and

(b) shall utilize nationally recognized appraisal standards, including, to the extent appropriate, the Uniform Appraisal Standards for Federal Land Acquisitions.

(d) Approval.--The appraisals conducted under paragraph (1) shall be submitted to the Secretary and the State for approval.

(e) Adjustment.--

(1) In general.--If value is attributed to any parcel of Federal land because of the presence of minerals subject to leasing under the Mineral Leasing Act (30 U.S.C. 181 et seq.), the value of the parcel (as otherwise established under this subsection) shall be reduced by the estimated value of the payments that would have been made to the State of Utah from bonuses, rentals, and royalties that the United States would have received if such minerals were leased pursuant to the Mineral Leasing Act (30 U.S.C. 181 et seq.).

(2) Limitation.--An adjustment under subparagraph (A) shall not be considered as a property right of the State.

- (f) Valuation of Lands with Reserved Minerals.--Federal land in which the Secretary reserves an interest under subsections 103(3)3(e) and 103(3)(f) shall be appraised
- (1) without regard to the presence of potash; and
  - (2) taking into account the reserved wellbore interest of the United States, if any.
- (g) Duration.  The appraisals conducted under paragraph (1) shall remain valid until the date of the completion of the exchange authorized under this title.
- (h) Availability of appraisals.
- (1) In general.--All final appraisals, appraisal reviews, and determinations of value for land to be exchanged under this section shall be available for public review at the Utah State Office of the Bureau of Land Management at least 30 days before the conveyance of the applicable parcels.
  - (2) Publication.--The Secretary or the State, as applicable, shall publish in a newspaper of general circulation in Salt Lake County, Utah, and the County where the subject lands are located, a notice that the appraisals are available for public inspection.
- (i) Dispute resolution.
- (1) If, by the date that is 90 days after the date of submission of an appraisal for review and approval under this subsection, the Secretary or State do not agree to accept the findings of the appraisals with respect to any parcel of Federal land or non-Federal land, the dispute shall be resolved in accordance with section 206(d)(2) of FLPMA (43 U.S.C. 1716(d)(2)).
  - (2) If agreement has not been reached with respect to the exchange of an individual parcel of Federal land or non-Federal land, the Secretary and the State may agree to set aside the individual parcel to allow the exchange of the other parcels of Federal land and non-Federal land to proceed.
- (j) Conveyance of Parcels in Phases.
- (1) In General.  Notwithstanding that appraisals for all of the parcels of Federal land and non-Federal land may not have been approved, parcels of the Federal land and non-Federal land may be exchanged in phases as may be mutually determined by the Secretary and the State.
  - (2) Ledger. -- The Secretary and the State may agree to utilize a ledger account to make equal the value of lands conveyed by each party in one or more phases, provided that the overall exchange shall be made equal as provided in section 105.
  - (3) Authority.  It is the intent of Congress that the Secretary may exercise broad discretionary authority in the processing of the land exchange to expedite the final conveyance of the Federal and non-Federal land.

#### **SEC. 105. EUALIZATION OF VALUES.**

(a) Surplus of federal land.

If the value of the Federal land exceeds the value of the non-Federal land, the value of the Federal land and non-Federal land shall be equalized by

- (1) the State conveying to the United States State trust land located within any of the wilderness areas or national conservation areas in Washington County, Utah, established under subtitle O of title I of the Omnibus Public Land Management Act of 2009 (Public Law 111  1; 123 Stat. 1075) that has an appraised value

May 23, 2016 - DRAFT

equal to the difference between the value of the Federal land; and the value of the non-Federal land;

(2) the reduction in acreage of the Federal land as the State and the Secretary may agree;

(3) the State making a cash payment to the United States; or

(4) any combination of the methods described in paragraphs (1)-(3) as the State and the Secretary may mutually agree.

(b) Surplus of non-federal land.  If the value of the non-Federal land exceeds the value of the Federal land, the value of the Federal land and the non-Federal land shall be equalized by

(1) the reduction in acreage of the non-Federal land as the State and the Secretary may mutually agree.

#### **SEC. 106. WITHDRAWAL OF FEDERAL LANDS PRIOR TO EXCHANGE**

Subject to valid existing rights, during the period beginning on the date of enactment of this Act and ending on the earlier of the date that the Federal land is removed from the exchange or the date on which the Federal land is conveyed, the Federal land is withdrawn from mineral location, entry or patent under the mining laws, from leasing and entry under the mineral leasing laws, and from mineral material disposal.

#### **SEC. 10 NEPA AND FLPMA COMPLIANCE.**

(1) Public Interest. -- The land exchange authorized and directed by this title is in the public interest.

(2) Scoping and Analysis. -- Notwithstanding any other law, in preparing an environmental assessment or environmental impact statement required under section 102 of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) with respect to the land exchange contemplated by this Act:

(A) the Secretary is not required to identify any actions other than the proposed action and the no action alternative; and

(B) the Secretary is not required to analyze the environmental effects of alternative conveyances or actions other than the offer submitted by the State under subsection 103(a).

(3) Presumption of Plan Adequacy.  Conveyances of Federal land to the State in accordance with this Act are presumed to comply with any land use plan enacted under section 202 of FLPMA (43 U.S.C. 1712).

#### **SEC. 10 STATUS AND MANAGEMENT OF LAND AFTER EXCHANGE.**

(a) ADMINISTRATION OF NON-FEDERAL LAND.

(1) IN GENERAL.  Subject to paragraph (2) and in accordance with section 206(c) of FLPMA (43 U.S.C. 1716(c)), the non-Federal land acquired by the United States under this Act shall become part of, and be managed as part of, the Federal administrative unit or area in which the land is located.

(b) GRAZING PERMITS.

(1) IN GENERAL. □ If land acquired under this Act is subject to a lease, permit, or contract for the grazing of domestic livestock in effect on the date of acquisition, the entity acquiring the land shall allow the grazing to continue for the remainder of the term of the lease, permit, or contract, subject to the related terms and conditions of user agreements, including permitted stocking rates, grazing fee levels, access rights, and ownership and use of range improvements.

(2) RENEWAL. □ To the extent allowed by Federal or State law, on expiration of any grazing lease, permit, or contract described in paragraph (1), the holder of the lease, permit, or contract shall be entitled to a preference right to renew the lease, permit, or contract.

(3) BASE PROPERTIES. □ If land conveyed by the State under this Act is used by a grazing permittee or lessee to meet the base property requirements for a Federal grazing permit or lease, the land shall continue to qualify as a base property for the remaining term of the lease or permit and the term of any renewal or extension of the lease or permit.

(c) HAZARDOUS MATERIALS. □

(1) IN GENERAL. □ The Secretary and the State shall make available for review and inspection any record relating to hazardous materials on the land to be exchanged under this Act.

(2) COSTS. □ The costs of remedial actions relating to hazardous materials on land acquired under this Act shall be paid by those entities responsible for the costs under applicable law.

**SEC. 10 □ LANDS WITHIN HISTORIC UNCOMPAGRE RESERVATION.**

In the event that a court of competent jurisdiction issues a final judgment against the United States determining that the public lands within the boundaries of the historic Uncompahgre Reservation currently managed by the Bureau of Land Management are or should be tribal trust lands of the Ute Indian Tribe of the Uintah and Ouray Reservation, then ---

(a) within one year of the final judgment, the State of Utah shall relinquish all lands acquired by the State under this Act that are located within the historic Uncompahgre Reservation to the United States for the benefit of the Tribe; and

(b) upon such relinquishment, the State of Utah may select unappropriated public lands of equal value elsewhere in Utah in the manner provided by section 6 of the Utah Enabling Act, Act of July 16, 1894, ch. 138, 28 Stat. 107.

**SEC. 110. □ BOO □ CLIFFS CONSERVATION AREA.** □ The non-Federal mineral estate acquired by the United States and the existing Federal mineral estate, totaling acres, depicted on the Grand County map as the Book Cliffs Conservation Area is withdrawn from the operation of the mineral entry, leasing and mineral material disposal laws ~~until otherwise determined by Congress.~~

## **Title II □ Goblin Valle □ State Par □**

### **SEC. □01. LAND CONVEYANCE**

(a) LAND CONVEYANCE. □ At the request of the State of Utah, the Secretary of the Interior shall convey, without consideration, the approximately 9,994 acres of Bureau of Land Management land identified as □ Utah PLI Goblin Valley State Park Map, □ on the map entitled Utah PLI Goblin Valley State Park Expansion Map and dated \_\_\_\_\_, to the Utah State Parks and Recreation Division of the Department of Natural Resources.

### **SEC. □0□ COOPERATIVE MANAGEMENT OF GOBLIN VALLEY.**

(a) IN GENERAL. □ At the request of the State, in accordance with this section, the Secretary of the Interior shall enter into a cooperative agreement with the State for the management of the federal land described in subsection (b).

(b) DESCRIPTION OF LAND. □ The area subject to the cooperative agreement is federal land managed by the Bureau of Land Management in Emery County, Utah comprising approximately 156,540 acres, identified as □ Goblin Valley Cooperative Management Area □ on the map entitled Utah PLI Goblin Valley State Park Map and dated \_\_\_\_\_.

(c) PURPOSES. - The purposes of the Goblin Valley Cooperative Management Area is to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking.

(d) TERMS. □ The cooperative agreement shall □

(1) clarify the roles, responsibilities, and limitations, of the Secretary of the Interior and the State with regard to recreation management within the federal land;

(2) extend only to recreational activities, including Off-highway vehicle and non-Off-highway vehicle, within the federal land, and shall not affect other land management within the federal land, or recreational activities outside the federal land;

(3) require that recreational activities within the federal land shall continue to be managed in accordance with □

(A) the San Rafael Swell National Conservation Area and Crack Canyon Wilderness Area established by this Act; and

(B) applicable federal laws.

(4) require new route and trail construction for motorized and non-motorized use to further recreational opportunities and/or minimize resource conflict, when and where appropriate;

(5) address the establishment, distribution, and uses of, any revenues generated by recreational activities (including entrance fees) on federal lands within the Goblin Valley Cooperative Management Area; and

(6) specify that the State agency administering the federal land shall be the Utah State Parks and Recreation Division of the Department of Natural Resources.

## Title III Price Canyon State Forest

### SEC. 301. DEFINITIONS.

In this title:

- (1) MAPS. The term "Map" means the map titled Utah PLI Price Canyon State Forest Map.
- (2) FEDERAL LAND. The term "federal land" means the 13,321-acres owned by the Bureau of Land Management and identified as "BLM Lands Proposed for Transfer to State Sovereign Land" located in Carbon County, Utah, as generally depicted on the map entitled "Utah PLI Price Canyon State Forest Map" and date \_\_\_\_\_
- (3) NON-FEDERAL LAND. The term "non-federal land" means the 14,939-acres identified on the Map as "State Sovereign Land Proposed for Transfer to BLM" located in Grand, and San Juan Counties, Utah, as generally depicted on the \_\_\_\_\_
- (4) SECRETARY. The term "Secretary" means the Secretary of the Interior.
- (5) STATE. The term "State" means the State of Utah's Division of Forestry, Fire, and State Lands.

### SEC. 30 EXCHANGE OF LAND.

- (a) In General.-- It is the purpose of this title to consolidate intermingled State sovereign lands in an area of Carbon County, Utah to create the State of Utah's first State Forest.
- (b) If the State offers to convey to the United States title to the non-federal land, the Secretary of the Interior shall--
  - (1) accept the offer; and
  - (2) on receipt of the right, title, and interest of the State in and to the non-federal land, convey to the State all right, title, and interest of the United States in and to the federal land.
- (c) VALID EXISTING RIGHTS.--The exchange authorized under subsection (a) shall be subject to valid existing rights.
- (d) TITLE APPROVAL.--Title to the federal land and non-federal land to be exchanged under this section shall be in a format acceptable to the Secretary of the Interior and the State.

### SEC. 303. LIVESTOCK GRAZING.

- (a) LIVESTOCK GRAZING--- Within the lands acquired by the State under this title in which grazing is established before the date of enactment of this Act, the grazing of livestock shall continue at levels existing as of January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

## Title IV Deer Lodge Land Exchange

### SEC. 401 Definitions

In this title:

May 23, 2016 - DRAFT

(a) ASSOCIATION. □ The term "Association" means the Deer Lodge Homeowners Association.

(b) FEDERAL LAND. □ The term "federal land" means the approximately 156 acres of National Forest System land in Daggett County, Utah, identified as "Deer Lodge Cabin Site" on the map entitled "Utah PLI Deer Lodge Land Exchange Map" and dated \_\_\_\_.

(c) NON-FEDERAL LAND. □ The term "non-federal land" means the parcel of approximately 77 acres of private land located in Uintah County, Utah and identified as "Land to Be Acquired by USFS" on the map entitled "Utah PLI Deer Lodge Land Exchange Map" and dated \_\_\_\_\_.

(d) SECRETARY. □ The term "Secretary" means the Secretary of Agriculture.

#### **SEC. 40 □ LAND EXCHANGE.**

(a) CONVEYANCE OF LAND. □ No less than two years after enactment of this title, if the Association offers to convey to the United States all right, title, and interest of the Association in and to the non-federal land, the Secretary of Agriculture shall convey to the Association, without consideration, all right, title, and interest of the United States in and to the federal land, subject to valid existing rights.

(b) COMPLIANCE WITH EXISTING LAW. □ Except as otherwise provided in this title, the Secretary of Agriculture shall carry out the land exchange under this title in accordance with section 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716).

#### **SEC. 403 CONDITIONS OF EXCHANGE.**

(a) TITLE. □ As a condition of the land exchange under this title, title to the non-federal land to be acquired by the Secretary of Agriculture under this title shall be acceptable to the Secretary of Agriculture.

(b) TERMS AND CONDITIONS. □ As a condition of the land exchange under this title, the Association shall agree to retain as undeveloped open space the approximately 40 acres of meadow area identified as "Open Space" as generally depicted on the map entitled "Utah PLI Deerlodge Land Exchange" and dated \_\_\_\_.

## **Title V □ Scofield Land Transfers**

#### **SEC. 501. DEFINITIONS.**

In this title:

May 23, 2016 - DRAFT

(1) CARBON COUNTY. □

The term "Carbon County" means Carbon County, Utah, within which the Scofield Reservoir property is located.

(2) CLAIMANT. □ The term "claimant" means any person or entity (or a successor in interest to a person or entity) that, according to the records in the office of the Recorder for Carbon County, Utah, as of the date of enactment of this Act, claims title to, or an interest in, the federal land.

(3) FEDERAL LAND. □

(A) IN GENERAL. □ The term "federal land" means the land acquired by Price River Water Conservation District and transferred to the United States for use in the construction and operation of Scofield Dam and Reservoir located between the normal water surface elevation and the property boundary elevation in the Scofield Reservoir basin.

(B) EXCLUSIONS. □ The term "federal land" does not include any mineral or subsurface rights to the land described in subparagraph (A); or the 205 acres of land adjoining the Scofield Reservoir, as adjudicated in the case styled United States v. Dunn (557F.3d 1165 (10th Cir. 2009)).

(4) LIFE ESTATE. □ The term "life estate" means if the claimant is a person, an interest of the claimant in the federal land that will revert to the United States on the date of the death of the claimant; and (B) if the claimant is an entity, an interest in the federal land of a person designated by the claimant that will revert to the United States on the date of the death of the designated person.

(5) SECRETARY. □ The term "Secretary" means the Secretary of the Interior.

**SEC. 50 □ CONVEYANCE OF SCOFIELD PROJECT LAND.**

(a) The Secretary of the Interior shall convey all right and title to the federal land, or a life estate in the federal land, without consideration, to any valid claimant that submits a request to the Secretary of the Interior not later than 18 months after the enactment of this Act. If the Secretary of the Interior does not act upon the request within 18 months from the date of enactment of this act, the federal land shall be transferred to the claimant.

(b) CONVEYANCE REQUIREMENTS- A conveyance under this title shall be subject to □

(A) provisions under which the claimant shall agree to indemnify and hold harmless the United States for all claims by the claimant or others arising from--  
(i) the design, construction, operation, maintenance, or replacement of Scofield Dam and Reservoir;  
(ii) the survey of claims, description of claims, delineation of boundaries, conveyance documents, conveyance process, and recording of deeds associated with the conveyance; and

May 23, 2016 - DRAFT

- (iii) any damages associated with any structure or chattel of the claimant that may be displaced in a flood event;
- (B) the United States retaining a flood easement as well as an access easement for purposes of monitoring and enforcing the requirements of subparagraph (c) with respect to the entire portion of federal land conveyed; and
- (C) deed restrictions requiring that--
  - (i) to prevent any structure on the portion of the federal land conveyed from being displaced during a flood event, the claimant shall--
    - (I) secure or tie down all existing structures; and
    - (II) if replacing or rebuilding such a structure, limit the replacement or rebuilding to the number and type of structures in existence on the date of enactment of this Act; and
  - (ii) all activities carried out by the claimant under clause (i) with respect to a structure to be carried out in accordance with applicable standards for structures that may be submerged, flooded, or inundated, as contained in--
    - (I) the International Building Code (as adopted by Utah Administrative Code R156-56); or
    - (II) any other building code or engineering standard that is--
      - (aa) similar to the International Building Code;
      - (bb) widely used; and
      - (cc) nationally recognized.

(c) If the claimant is a willing seller, the Secretary of the Interior may offer the claimant fair market value for the land in lieu of a conveyance of all right and title to the federal land.

## **Title VI □ Land Conve□ances**

### **SEC. 601. Land Conve□ances.**

(a) IN GENERAL. □ Notwithstanding the land use planning requirements of sections 202 and 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1712, 1713), upon the request of the specified local entity in the county in which the conveyance will occur, the Secretary of the Interior or the Secretary of Agriculture as appropriate shall convey the following federal land to that entity, without consideration:

(1) CANYONLANDS FIELDS AIRPORT - The approximately 561 acres of land depicted as □ Canyonlands Fields Airport, □ on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_, to Grand County, Utah for use as an airport

(2) MOAB TAILINGS PROJECT □ Upon completion of the Moab Uranium Mill Tailings Remedial Action (UMTRA) Project, the approximately 474 acres of land depicted as □ UMTRA Conveyance, □ on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_, □ shall be conveyed, without consideration, to Grand County, Utah.

May 23, 2016 - DRAFT

- (3) HUNTINGTON AIRPORT EXPANSION. □ The approximately 1,398 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Huntington Airport, □to Emery County, Utah, for expansion of the Huntington Municipal Airport.
- (4) EMERY COUNTY RECREATION AREA. □ The approximately 79 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Emery County Recreation Area, □to Emery County, Utah for public recreational purposes.
- (5) EMERY COUNTY SHERIFF SUBSTATION. □ The approximately 643 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Emery County Sheriff's Substation, □to Emery County, Utah for a substation for the Emery County Sheriff's Office.
- (6) BLANDING OUTDOOR RECREATION AREA. ---The approximately 5,197 acres of land depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Blanding Outdoor Recreation Area, □to Blanding City, Utah for use as an outdoor recreation area.
- (7) CAL BLACK AIRPORT. □ The approximately 1,916 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Cal Black Airport, □to San Juan County, Utah for a municipal airport.
- (8) BLUFF AIRPORT. □ The approximately 1,406 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Bluff Airport, □to San Juan County, Utah, for a municipal airport.
- (9) MONTICELLO WATER STORAGE AND TREATMENT PLANT. □ The approximately 164 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Monticello Water Storage and Treatment Plant, □to Monticello City, Utah, for a water storage and treatment plant.
- (10) BLANDING SHOOTING RANGE. □ The approximately 21 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_, as □Blanding Shooting Range, □to San Juan County, Utah, for a public shooting range.
- (11) PARK CITY CONVEYENCE I □The approximately 2.5 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance I, □to Park City, Utah, for public recreation and open space.
- (12) PARK CITY CONVEYENCE II □The approximately 1 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Park City Conveyance II, □to Park City, Utah, for public recreation and open space.
- (13) LISBON VALLEY -- The approximately 398 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as □Lisbon Valley, □to Utah State University, Utah, for education and research.

May 23, 2016 - DRAFT

(14) WELLINGTON -- The approximately 645 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as "Wellington," to Utah State University, for education and research.

(15) RANGE CREEK RESEARCH STATION EXPANSION-- The approximately 1,663 acres depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as "Range Creek Research Station Expansion," to the University of Utah, for education and research.

(16) ASHLEY SPRING ZONE. " The approximately 1,102 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as "Ashley Spring," to Uintah County, Utah, for use as open space and for watershed protection and drinking water development.

(17) SEEP RIDGE UTILITY CORRIDOR. "The approximately \_\_\_ acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as "Seep Ridge Utility Corridor," to the State of Utah, for use as rights-of-way for public utilities.

(18) BLUFF RIVER RECREATION AREA. - The approximately 177 acres generally depicted on the map entitled Utah PLI Land Conveyances Map and dated \_\_\_\_\_ as "Bluff River Recreation Area," to San Juan County, for use as recreation and municipal facilities.

(b) MAP AND LEGAL DESCRIPTIONS. "

(1) IN GENERAL. "Not later than two years after the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall file a map and legal description of the Land Conveyances with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(2) FORCE AND EFFECT. " Each map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior or the Secretary of Agriculture as appropriate may make any minor modifications of any clerical or typographical errors in the map or legal description.

May 23, 2016 - DRAFT

(3) PUBLIC AVAILABILITY.  A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management and the United States Forest Service.

(c) REVERSION.  If any parcel conveyed under subsection (a) ceases to be used for the purpose for which it was conveyed or any other public purpose, the land shall revert to the United States, if the Secretary of the Interior or the Secretary of Agriculture as appropriate determines that the reversion is in the best interest of the United States.

## **Title VII Land Disposals**

### **SEC. 01. LAND DISPOSALS.**

- (a) Disposal. -- Subject to valid existing rights, the Secretary of the Interior shall within two years dispose of federal lands identified as Lands for Disposal on the map entitled Utah PLI Land Disposal Map and dated \_\_\_\_\_.

## **Title VIII CANYON COUNTRY RECREATION ZONES**

### **SEC 01. ESTABLISHMENT**

(a) ESTABLISHMENT.  Subject to valid existing rights, and to enhance existing and future recreational opportunities and use the following areas in Grand County, Uintah County, and San Juan County, Utah are hereby established as Recreation Zones:

- (1) KLONDIKE RECREATION ZONE.  Certain federal land, comprising approximately 24,968 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Klondike Recreation Zone.
- (2) MONITOR AND MERRIMAC RECREATION ZONE.  Certain federal land, comprising approximately 17,370 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Monitor and Merrimac Recreation Zone.
- (3) GOLDBAR RECREATION ZONE.  Certain federal land, comprising approximately 23,050 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Goldbar Recreation Zone.
- (4) BIG FLAT RECREATION ZONE.  Certain federal land, comprising approximately 25,311 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the Big Flat Recreation Zone.

- (5) MINERAL CANYON RECREATION ZONE.  Certain federal land, comprising approximately 19,809 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Mineral Canyon Recreation Zone.
- (6) DEE PASS AND UTAH RIMS RECREATION ZONE.  Certain federal land, comprising approximately 210,116 acres administered by the Bureau of Land Management in Grand County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Dee Pass and Utah Rims Recreation Zone.
- (7) YELLOW CIRCLE.  Certain federal land, comprising approximately 7,040 acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Yellow Circle Recreation Zone.
- (8) CAMEO CLIFFS.  Certain federal land, comprising approximately 48,025 acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Cameo Cliffs Recreation Zone.
- (9) JENSEN HILLS.  Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Jensen Hills Recreation Zone.
- (10) RED MOUNTAIN.  Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Red Mountain Recreation Zone.
- (11) DEVILS HOLE.  Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Devils Hole Recreation Zone.
- (12) BOURDETTE DRAW.  Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Bourdette Draw Recreation Zone.
- (13) RED WASH.  Certain federal land, comprising approximately \_\_\_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Recreation Zones Map and dated \_\_\_\_\_ to be known as the  Red Wash Recreation Zone.

**SEC. 00 MAP AND LEGAL DESCRIPTION.**

(a) IN GENERAL. □ Not later than two years from the date the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the recreation zones established by sections 801 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. □ The map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. □ A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

### SEC. 03. GENERAL PROVISIONS.

(a) FIRE, INSECTS, AND DISEASE . □ In accordance with this title, the Secretary of the Interior may □

(1) carry out any measures to manage wildland fire and treat hazardous fuels, insects, and diseases in the recreation zones; and

(2) coordinate those measures with the appropriate State or local agency.

(b) WILDLAND FIRE OPERATIONS. □ Nothing in this title precludes a Federal, State, or local agency from conducting wildfire management operations (including operations using aircraft or mechanized equipment) or interferes with the authority of the Secretary of the Interior to authorize mechanical thinning of trees or underbrush to prevent or control the spread of wildfires or the use of mechanized equipment for wildfire pre-suppression and suppression.

(c) LIVESTOCK GRAZING. □

(1) IN GENERAL . □ Within the recreation planning areas, the grazing of livestock in which grazing is established before the date of enactment of this Act shall continue in accordance with the grazing permit that existed on January 1, 2016, subject to reasonable regulations as prescribed by the Secretary.

(2) PROTECTION OF EXISTING USES. Existing livestock grazing shall continue, to the greatest extent practicable, in accordance with the following guidelines:

(A) there shall be no curtailments of grazing in the areas designated by this title simply because an area is, or has been designated by this title, nor should designations be used as an excuse by administrators to slowly "phase out" grazing.

(B) the number and type of livestock permitted to graze in areas designated by this title shall continue at stocking levels prescribed in the grazing permit in effect at the time an area is designated and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process. ~~to the greatest extent practicable.~~

(C) the maintenance of pre-established supporting facilities existing in an area prior to its classification as designated by this title (including fences, line cabins, water wells and pipelines, stock tanks and ponds, etc.), shall

continue to the greatest extent practicable. Such maintenance may include the use of Off-highway vehicle or mechanized tools and equipment.

(D) the construction of new improvements or replacement of deteriorated facilities in areas designated by this title is permissible if in accordance with guidelines and management plans governing the area.

(E) the use of Off-highway vehicle equipment for emergency purposes such as rescuing sick animals or the placement of feed in emergency situations is permissible by the permittee or an employee or agent thereof, and should not be abused by permittees.

(F) Access to historic and traditional water sources for the purpose of supporting livestock shall be maintained.

(G) the trailing and movement of domestic livestock where permitted prior to the enactment of this Act shall continue

### (3) UTAH DEPARTMENT OF AGRICULTURE

In instances in which historic grazing areas, access, or use is disputed by the permittee, data and information provided by the Utah Department of Agriculture shall be given ~~priority~~ consideration by the Secretary of the Interior to establish historic grazing, locations, or use.

(d) EXISTING EASEMENTS AND RIGHTS-OF-WAY.  Nothing in this title precludes the Secretary of the Interior from renewing easements or rights-of-way in existence as of the date of enactment of this Act, in accordance with this title and existing law.

(f) ADJACENT MANAGEMENT.

(1) IN GENERAL.  Nothing in this title creates a protective perimeter or buffer zone around any recreation zone designated by this title.

(2) ACTIVITIES OUTSIDE THE RECREATION ZONES.  The fact that an activity or use on land outside a recreation zone can be seen, heard, or smelled within the recreation zone shall not preclude the activity or use outside the boundary of the recreation zone.

(e) OUTFITTING AND GUIDE ACTIVITIES.  Commercial services (including authorized outfitting and guide activities) within the recreation zones are authorized.

(f) FISH AND WILDLIFE.  Nothing in this title affects the jurisdiction of the State of Utah with respect to the management of fish and wildlife on federal land in the State, including the regulation of hunting, fishing, and trapping within the recreation zones.

(g) ACCESS.  The Secretary of the Interior shall provide the owner of State or private property within the boundary of a recreation zones access to the property.

(h) WILDLIFE WATER DEVELOPMENT PROJECTS.  Structures and facilities, including future and existing structures and facilities, for wildlife water development projects (including guzzlers) in the recreation zones are authorized

~~(i) HUNTING, FISHING, AND RECREATIONAL AND TARGET SHOOTING.  Within the recreation zones in where hunting, fishing, and recreational and target shooting on lands and waters owned of managed by the Department of the Interior was allowed before the date of enactment of this Act, shall continue.~~

(i) WATER RIGHTS.

(a) STATUTORY CONSTRUCTION.  Nothing in this title

(1) shall constitute either an express or implied reservation by the United States of any water rights with respect to the recreation zones designated by this title;

- (2) affects any water rights in the State of Utah;
- (3) establishes a precedent with regard to any future recreation zone.
- (b) UTAH WATER LAW. □The Secretary of the Interior shall follow the procedural and substantive requirements of State law to obtain and hold any water rights not in existence on the date of the enactment of this Act with respect to the recreation zones.
- (c) EXISTING WATER INFRASTRUCTURE. □ Nothing in this Act shall be construed to limit Off-highway vehicle access and road maintenance by local municipalities for those maintenance activities necessary to guarantee the continued viability of water resource facilities that currently exist or which may be necessary in the future to prevent the degradation of the water supply in recreation zones designated by this title.
- (d) DEFINITION. □The term □water resource facilities□ means irrigation and pumping facilities, reservoirs, water conservation works, aqueducts, canals, ditches, pipelines, wells, hydropower projects, transmission and other ancillary facilities, and other water diversion, storage, and carriage structures.
- (j) VEGETATION MANAGEMENT. □ Nothing in this title prevents the Secretary of the Interior from conducting vegetation management projects within the recreation zones.
- (k) WILDERNESS REVIEW. □
  - (a) Congress finds and directs that the recreation zones described in section 801 have been adequately studied for wilderness character and wilderness designation pursuant to sections 201 and 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782) and are no longer subject to the requirement of subsection (c) of such section pertaining to the management of wilderness study areas in a manner that does not impair the suitability of such areas for preservation as wilderness.
  - (b) The Secretary of the Interior may not promulgate or issue any system-wide regulation, directive, instruction memorandum or order that would direct management of the federal lands identified in section 801 in a manner contrary to subsection (m).

(l) MANAGEMENT PLAN. □

- (1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of each recreation zone.
- (2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Councils established under Division C of this Act.
- (c) USES- The Secretary of the Interior shall allow only such uses of the recreation zones that would further the purposes and uses outlined within each Zone and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

**SEC. □04. GOLDBAR RECREATION ZONE ADDITIONAL PROVISIONS**

- (a) PURPOSES.---The purposes of the Goldbar Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, and hiking, provide for the

May 23, 2016 - DRAFT

construction of new non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims, and to manage and protect indigenous plants.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Goldbar Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws.

(2) USES .□ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Goldbar Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and camping

(C) prohibit future mineral and energy leasing or claims.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) protects and manages indigenous plants.

(F) comply with Section 803.

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016..

(ii) allows for adjustment to the travel management plan within the regular amendment process.

(iii) allows for the construction of new non-Off-highway vehicle trails.

#### **SEC. □05. MONITOR AND MERRIMAC RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Monitor and Merrimac Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, provide for the construction of new Off-highway vehicle and non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims,

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Monitor and Merrimac Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and

(c) other applicable laws.

(2) USES .□ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

- (B) provide for recreational opportunities to occur within the Monitor and Merrimac Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) prohibit future mineral and energy leasing.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated Off-highway vehicle routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. 106 KLONDIKE RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Klondike Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, provide for the construction of new non-Off-highway vehicle trails, and to prevent future energy and mineral leases or claims,

(b) ADMINISTRATION.---

- (1) IN GENERAL.--- The Secretary of the Interior shall administer the Klondike Recreation Zone in accordance with---
  - (a) this title
  - (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
  - (c) other applicable laws
- (2) USES .□ Uses and management of the Zone shall:
  - (A) coordinate and consults with State and local government entities
  - (B) provide for recreational opportunities to occur within the Klondike Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
  - (C) prohibit future mineral and energy leasing.
  - (D) provide for new route and trail construction for non-Off-highway vehicle use to further recreational opportunities.
  - (E) provide managerial flexibility to route Off-highway vehicle trails in a way that minimizes conflict with non-Off-highway vehicle trails.
  - (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016, including off-highway vehicle use of Sovereign Trail System.
- (ii) allows for adjustment to the travel management plan within the regular amendment process.
- (iii) allows for the construction of new non-Off-highway vehicle trails.

**SEC. 101 BIG FLAT RECREATION ZONE ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Big Flat Recreation Zone are to promote outdoor recreation, such as off-highway vehicle use, mountain biking, rock climbing, and hiking, to promote mineral development, and provide for new Off-highway vehicle route construction.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Big Flat Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws.

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Big Flat Recreation Zone including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) provide for future mineral leasing with No Surface Occupancy stipulations
- (D) prevent the retirement of mineral leases.
- (E) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (F) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. 102 MINERAL CANYON RECREATION ZONE ADDITIONAL PROVISIONS.**

May 23, 2016 - DRAFT

(a) PURPOSES.---The purposes of the Mineral Canyon Recreation Zone are to promote non-Off-highway vehicle outdoor recreation, such mountain biking, rock climbing, and hiking, to prevent future energy or mineral leases or claims, and provide for new non-Off-highway vehicle route construction, maintain boating access, maintain airstrip access, and maintain access and use of country borrow areas.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Mineral Canyon Recreation Zone:

- (i) in accordance with---
- (ii) this title;
- (iii) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (iv) other applicable laws.

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities;
- (B) provide for non Off-highway vehicle recreational opportunities to occur within the Mineral Canyon Recreation Zone including, biking, and hiking,
- (C) prevent future energy or mineral leasing or claims
- (D) provide for new route and trail construction for non-Off-highway vehicle use to further recreational opportunities.
- (E) maintain access for boating
- (F) maintain access for aircraft to the existing airstrip
- (G) maintain access and use to the county borrow areas.
- (H) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) allows for adjustment to the travel management plan within the regular amendment process.
- (iii) allows for the construction of new non-Off-highway vehicle trails.

#### **SEC. □□ DEE PASS AND UTAH RIMS RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Dee Pass and Utah Rims Recreation Zones are to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to ~~promote~~allow energy and mineral leasing and development.

(b) ADMINISTRATION.---

May 23, 2016 - DRAFT

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Dee Pass and Utah Rims Recreation Zones in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES. □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Dee Pass and Utah Rims Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Provide future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(4) WHITE WASH CROSS COUNTRY TRAVEL AREA. □ The approximately \_\_\_\_\_ acres identified as the □White Wash Cross Country Travel Area□ on the map entitled □Utah PLI Recreation Zones Map□ and dated \_\_\_\_\_ is open to cross country Off-highway vehicle travel.

#### **SEC. □10. YELLOW CIRCLE MINE AND CAMEO CLIFFS ADDITIONAL PROVISIONS**

(a) PURPOSES.---The purposes of the Yellow Circle Mine and Cameo Cliffs Recreation Zones are to promote off-highway vehicle use and to provide for the construction of new Off-highway vehicle and non-Off-highway vehicle trails, and to ~~promote~~allow energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Yellow Circle Mine and Cameo Cliffs Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

May 23, 2016 - DRAFT

(c) other applicable laws

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Yellow Circle Mine and Cameo Cliffs including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Provide future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated Off-highway vehicle routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

#### **SEC. □11. □JENSEN HILLS RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Jensen Hills Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Jensen Hills Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES . □ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .
- (F) Allows cross country Off-highway vehicle travel

May 23, 2016 - DRAFT

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
- (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □ □ DOCS BEACH RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Docs Beach Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Docs Beach Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allows future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .
- (F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
- (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. 13. RED MOUNTAIN RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Red Mountain Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Red Mountain Recreation Zone in accordance with---

- (a) this title
- (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
- (c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

- (A) coordinate and consults with State and local government entities
- (B) provide for recreational opportunities to occur within the Red Mountain Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
- (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
- (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
- (E) comply with Section 803 .

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

- (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
- (ii) Allows for adjustment to the travel management plan within the regular amendment process.
- (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

**SEC. 14. DEVILS HOLE RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Devils Hole Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle

May 23, 2016 - DRAFT

trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Devils Hole Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(c) other applicable laws;

(2) USES .□ Uses and management of the Zone shall:

(A) coordinate and consults with State and local government entities

(B) provide for recreational opportunities to occur within the Jensen Hills Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing

(C) Allows future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.

(D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

(E) comply with Section 803 .

(F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

(A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--

(i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.

(ii) Allows for adjustment to the travel management plan within the regular amendment process.

(iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.

(iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

#### **SEC. □15. BOURDETTE DRAW RECREATION ZONE ADDITIONAL PROVISIONS.**

(a) PURPOSES.---The purposes of the Bourdette Draw Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.

(b) ADMINISTRATION.---

(1) IN GENERAL.--- The Secretary of the Interior shall administer the Bourdette Draw Recreation Zone in accordance with---

(a) this title

(b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

- (c) other applicable laws;
- (2) USES .□ Uses and management of the Zone shall:
  - (A) coordinate and consults with State and local government entities
  - (B) provide for recreational opportunities to occur within the ~~Jensen Hills~~Bourdette Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
  - (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
  - (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.
  - (E) comply with Section 803 .
  - (F) Allows cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES.□

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
  - (iV) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □16. RED WASH RECREATION ZONE ADDITIONAL PROVISIONS.**

- (a) PURPOSES.---The purposes of the Red Wash Recreation Zone is to promote off-highway vehicle recreation and to provide for the construction of new Off-highway vehicle trails and non-Off-highway vehicle trails, and to promote energy and mineral leasing and development.
- (b) ADMINISTRATION.---

- (1) IN GENERAL.--- The Secretary of the Interior shall administer the Red Wash Recreation Zone in accordance with---
  - (a) this title
  - (b) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and
  - (c) other applicable laws;

- (2) USES .□ Uses and management of the Zone shall:
  - (A) coordinate and consults with State and local government entities
  - (B) provide for recreational opportunities to occur within the Red Wash Recreation Zones including, biking, hiking, off-highway vehicle use, including motorcycling, ATV riding, and four-wheeling, and rock climbing
  - (C) Allow future mineral and energy leasing and development in a manner that minimizes impacts to outdoor recreation.
  - (D) provide for new route and trail construction for Off-highway vehicle and non-Off-highway vehicle use to further recreational opportunities.

May 23, 2016 - DRAFT

- (E) comply with Section 803 .
- (F) Allow cross country Off-highway vehicle travel

(3) MANAGEMENT OF OFF-HIGHWAY VEHICLE AND MECHANIZED VEHICLES. □

- (A) IN GENERAL- The Secretary of the Interior shall manage existing designated routes in a manner that--
  - (i) is consistent with Off-highway vehicle and mechanized use of the designated routes that is authorized as of January 1, 2016.
  - (ii) Allows for adjustment to the travel management plan within the regular amendment process.
  - (iii) Allows for the construction of new Off-highway vehicle and non-Off-highway vehicle trails.
  - (iv) Allows for continued cross country Off-highway vehicle travel in areas where it is authorized as of January 1, 2016

**SEC. □ □ HOLE-IN-THE-ROCK TRAIL.**

(a) This Act adds to the National Historic Trail System the corridor known as □The Hole-in-the-Rock Trail□to be managed as a historic trail and to remain in the ownership of current land management agencies.

(b) MANAGEMENT PLAN. □

- (1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a management plan for the long-term management of the historic trail.
- (2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Public Lands Initiative Planning Advisory Council established under Division C of this Act.
- (c) USES- The Secretary of the Interior shall allow only such uses of the national historic trail that would further the purposes and uses outlined within this subsection and in consultation and coordination with the Public Lands Initiative Stakeholder Advisory Councils established under Division C of this Act.

(c) Purposes and Uses

A. The purposes of the National Hole in the Rock Trail is to promote cultural, recreational □ motorized and non-motorized, and historic values.

B. The Hole in the Rock Foundation and shall be a cooperating agency regarding trail management.

C. The issuance of regulations regarding group size and fee areas shall be done in accordance with the cooperating agencies.

May 23, 2016 - DRAFT

**SEC. 11 RECAPTURE CANYON**

- (a) San Juan County, Utah's application for a Title V Right-of-Way, originally submitted on March 30, 2006 and later amended on November 13, 2012, is approved.
- (b) The purposes of the Title V Right-of-Way, as stated by the County's application, is to perform routine maintenance to existing trails and routes in an effort to encourage travel in the canyon to remain on a single established route through the canyon that minimizes impacts to the surrounding environment.
- (c) The BLM decision to temporarily close Recapture Canyon to off-highway vehicle on September 12, 2007 is dissolved, as the right-of-way approved in subsection (a) will create a mechanism for proper management and maintenance of the area.

**SEC. 12 BIG BURRITO NON-MOTORIZED TRAIL**

- (a) The 9.3 mile proposed non-motorized trail within the Sand Flats Recreation Area, approved by the BLM Moab Field Office on December 18, 2016 and commonly known as the Big Burrito non-motorized trail, is hereby authorized to move forward and shall be constructed within 6 months of enactment of this Act.

**TITLE IX -- RED ROCK COUNTRY OFF-HIGHWAY VEHICLE TRAIL.**

**SEC. 01 DEFINITIONS.** In this title:

- (1) COUNTY. The term "County" means Grand and San Juan Counties, Utah.
- (2) SECRETARY. The term "Secretary" means the Secretary of the Interior.
- (3) TRAIL. The term "Trail" means the Red Rock Country Off-Highway Vehicle Trail established under subsection (b).
- (4) FEDERAL LAND. The term "federal land" means land owned by the Bureau of Land Management.

**SEC. 02 DESIGNATION.**

- (1) IN GENERAL. the Secretary of the Interior shall designate a trail system in Grand and San Juan Counties, Utah
  - (A) for use by Off-highway vehicle off-highway vehicles; and
  - (B) to be known as the "Red Rock Country Off-Highway Vehicle Trail"
- (2) REQUIREMENTS. In designating the trail, the Secretary of the Interior shall prioritize a long distance route for off-highway vehicles that
  - (A) as generally depicted on the map entitled Utah PLI Recreation Plans Map and date \_\_\_\_;
  - (B) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Grand Junction, Colorado through the Utah Rims Recreation Area;

- (C) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Green River, Utah through the Dee Pass Recreation Area;
- (D) connects the federal land adjacent to Moab, Utah to the federal land adjacent to Monticello, Utah through the Cameo Cliffs Recreation Zone;
- (E) utilizes existing routes, where feasible, which may include the Kokopelli's Trail and the Orange Trail and Trail 1, consistent with this paragraph;
- (F) minimizes the use of graded roads;
- (G) creates a recreational experience that provides
  - (i) opportunities for scenic vistas;
  - (ii) challenging terrain for off-highway vehicle travel;
  - (iii) connections to other existing trail systems or trails;
  - (iv) minimal conflicts between Off-highway vehicle and non-Off-highway vehicle user; and
  - (v) Off-highway vehicle singletrack and doubletrack options where feasible.

(3) MAP. A map that depicts the trail shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

#### **SEC. 03 MANAGEMENT-**

- (A) IN GENERAL- The Secretary of the Interior shall manage future designated routes in a manner that--
  - (i) is consistent with Section 902 ;
  - (ii) does not interfere with private property or water rights.
- (B) CLOSURE OR RELOCATING-
  - (i) IN GENERAL- A designated route may be temporarily closed or detoured, for a period not to exceed two years, if the Secretary of the Interior, in consultation with the State, or relevant local government within the State determines that--
    - (I) the designated route is damaging cultural resources or historical resources;
    - (II) temporary closure of the designated route is necessary to repair the designated route or protect public safety.
    - (III) modification of the designated route would not significantly affect access within the given area.
    - (IV) all other options, other than a temporary closure or rerouting, have been exhausted.
    - (V) a new alternative route, which can include routes previously closed, has been provided to effectively relocate the trail.
- (C) NOTICE- The Secretary of the Interior shall provide information to the public regarding any designated routes that are open, have been relocated, or are temporarily closed through--
  - (i) use of appropriate signage within the trail;
  - (ii) use of the internet and web resources.

May 23, 2016 - DRAFT

(3) NO EFFECT ON NON-FEDERAL LAND OR INTERESTS IN NON-FEDERAL LAND- Nothing in this title affects ownership, management, or other rights relating to non-federal land or interests in non-federal land.

(d) TRAIL CONSTRUCTION. □

(1) FEASIBILITY STUDY. □ Not later than 180 days after the date of enactment of this Act, the Secretary of the Interior shall study the feasibility and public interest in constructing new routes as part of a the Red Rock County Off-Highway Vehicle Trail System to further Off-highway vehicle recreational opportunities.

(2) CONSTRUCTION. □

(A) CONSTRUCTION AUTHORIZED. □ If the Secretary of the Interior determines that the construction of a route is feasible, construction is authorized.

(B) USE OF VOLUNTEER SERVICES AND CONTRIBUTIONS. □ A route may be constructed under this subsection through the acceptance of volunteer services and contributions from non-federal sources to eliminate the need for federal expenditures to construct the route.

(3) COMPLIANCE. □ In carrying out this subsection, the Secretary of the Interior shall comply with □

(A) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.); and

(B) this title; and

(C) other applicable law.

## **Title X □ Long-Term Native American Economic Development Certain □**

### **SEC. 1001. Native American Economic Development in San Juan Count □ Utah**

(a) McCracken Mesa Mineral Transfer. The federal minerals located within the Aneth Extension of the Navajo Nation shall be transferred to the Utah Navajo Trust Fund.

(b) The Act of March 1, 1933, H.R. 11735, Public No. 403, is hereby amended to state the following:

Should oil or gas be produced in paying quantities within the lands hereby added to the Navajo Reservation, 37.5 62.5 per centum of the net royalties accruing therefrom derived from tribal leases shall be paid to the State of Utah: Provided, that the 37.5 62.5 per centum of said royalties shall be expended by the State of Utah in the tuition of Indian children in white schools and/or in the building or maintenance of roads across the lands described in section 1 hereof, or for the benefit of the Indian residing therein.

May 23, 2016 - DRAFT

**SEC. 100** Ute Indian Tribe Economic Development Area

(a) Hill Creek Mineral Transfer. The federal minerals located within the Hill Creek Extension of the Ute Tribe shall be transferred to the Ute Tribe.

**Title XI Long-Term Energy Development  
Certain**

**SEC. 1101. ENERGY PLANNING AREAS.**

(a) ESTABLISHMENT. Subject to valid existing rights, and to enhance energy development in lands not designated for conservation purposes, the following areas in Uintah, Carbon, Duchesne, and San Juan Counties are hereby established as Energy Zones:

- (1) UINTAH COUNTY ENERGY ZONE. Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Uintah County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the Uintah County Energy Zone.
- (2) DUCHESNE COUNTY ENERGY ZONE. Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Duchesne County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the Duchesne County Energy Zone.
- (3) CARBON COUNTY ENERGY ZONE. Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in Carbon County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the Carbon County Energy Zone.
- (4) SAN JUAN COUNTY ENERGY ZONE. Certain federal land, comprising approximately \_\_\_ acres administered by the Bureau of Land Management in San Juan County, Utah, as generally depicted on the map entitled Utah PLI Energy Zones Map and dated \_\_\_\_\_ to be known as the San Juan County Energy Zone.

**SEC. 110. MAP AND LEGAL DESCRIPTION.**

(a) IN GENERAL. Not later than two years from the date of enactment of this Act, the Secretary of the Interior shall file a map and legal description of the energy zones established by sections 1101 of this Act with the Committee on Natural Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(b) FORCE AND EFFECT. The map and legal description submitted under this section shall have the same force and effect as if included in this title, except that the Secretary of the Interior may make any minor modifications of any clerical or typographical errors in the map or legal description.

(c) PUBLIC AVAILABILITY. A copy of the map and legal description shall be on file and available for public inspection in the appropriate offices of the Bureau of Land Management.

**SEC. 1103. GENERAL PROVISIONS**

(a) PURPOSES. □ The purposes of the Energy Zone are to □

- (1) designate Federal lands within the areas identified in section 1101 for the primary purpose of energy and mineral development.
- (2) promote the use of best practices for the timely evaluation, exploration, leasing, development, production, and transportation of energy (including renewable energy) and mineral resources and the inspection and enforcement of such activities; and
- (3) ensure that the development of energy and mineral resources is carried out in a manner pursuant to the multiple use provisions within sections 102 and 103 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1702) and other provisions of law; and
- (4) Provide for multiple-uses of the lands within the energy zone, including outdoor recreation and livestock grazing, to the greatest extent practicable.

(b) MANAGEMENT PLAN. □

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior shall develop a plan for the long-term management of each energy zone.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plan in consultation and coordination with the Energy Zone Advisory Councils established under subsection (f) of this Title.

(c) USES- The Secretary of the Interior shall allow only such uses of the energy zones that would further the purposes outlined in section 1103(a) of this Title and in consultation and coordination with the Energy Zone Advisory Councils established under subsection (f) of this Title.

(c) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior shall prepare the management plans in consultation and coordination with the Energy Zone Advisory Councils established in subsection (f) of this Title. If the Secretary of the Interior does not incorporate the recommendations submitted by the Advisory Councils into the management plans, the Secretary of the Interior and Secretary of Agriculture shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(d) INCORPORATION OF PLANS. □

(1) In developing the management plan required under subsection (b), in accordance with existing law and to the extent consistent with this section, the Secretary □

(A) may incorporate any provision of existing land and resource management plans; and

May 23, 2016 - DRAFT

(B) shall be consistent to the maximum extent possible with State and local plans pursuant to Section 202 of the Federal Land Policy and Management Act of 1976, (43 U.S.C. 1712).

(2) INTERIM MANAGEMENT. □ During the period of time preceding the final adoption of the Plan, the Secretary, acting through the relevant Record of Decision and Approved Resource Management Plan and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and pursuant to this Act.

(e) MANAGEMENT. □ The Secretary shall manage the Energy Zone in accordance with □

- (1) the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.);
- (2) the Energy Policy and Conservation Act (P.L. 94-163, 42 U.S.C. 6201); the Energy Policy Act of 2005 (P.L. 109-58, 42 U.S.C. 15801);
- (3) this Act; and
- (4) any other applicable law.

(f) ENERGY ZONE ADVISORY COUNCILS.

(1) ESTABLISHMENT. □ Not less than 180 days after the date of enactment of this Act, the Secretary shall establish an advisory council within each of counties when an energy zone is located, to be known as the □ Uintah/Duchesne/Carbon/San Juan Energy Zone Advisory Council □

(2) DUTIES. □ To the greatest extent allowable by law, the Advisory Council shall advise the Secretary with respect to the preparation and implementation of the management plan.

(A) To the greatest extent allowable by law, the Secretary shall incorporate recommendations of a majority of the Advisory Council in the decision making processes and the management of the Energy Zone.

(3) REPRESENTATION. □

(A) IN GENERAL. □ The Secretary shall ensure that the membership of the Advisory Council broadly represents diverse local interests of citizens that reside within the specific county.

(B) STRUCTURE. □ The Advisory Council shall consist of no less than 7 members and the Secretary shall appoint a Chairperson to serve as the Chair for a term not to exceed 2 years.

(i) Excepting elected officials of state or local government, no individual may serve a term longer than 4 years.

(C) INCLUSION. □ The advisory council shall include:

- (i) at least one County Commissioner or their designee;
- (ii) at least one member of the Utah State Legislature who represents the County;
- (iii) notwithstanding the residency requirements of (f)(3)(A) a representative of the Governor of Utah;
- (iv) experts in energy and mineral development within the energy zone
- (v) conservation and recreation interests.

(4) RESPONSIBILITIES. □

The Advisory Council shall:

- (A) Review and make recommendations to the Secretary for planning, implementation of management plans, amendments to plans, policy considerations, regulations, and other issues related to the management and operation of the Energy Zone.
- (B) Encourage and promote local participation in the decision-making processes affecting the Energy Zone.

**SEC. 1104. LEASING OUTSIDE OF THE ENERGY PLANNING AREAS**

Nothing in this title precludes leasing or resource development of BLM managed lands not described in subsection 1101 from occurring under regular order pursuant to the Mineral Leasing Act or other federal energy development laws.

**SEC. 1105. MASTER LEASING PLANS**

(a) A Master Leasing Plan shall only be implemented within Uintah, Duchesne, Emery, Carbon, Grand, or San Juan Counties if the Public Lands Advisory Council established under section 1103 of this title find the relevant Master Leasing Plan to be compatible and viable with the provisions of this Act.

**SEC. 1106. Completion of Administrative Land Exchange Process**

1. The land exchange application, referred to as UTU-78673 pending before the Moab Field Office, shall be considered in the public interest and completed.

**Title XII □ Long-Term Travel Management  
Certain □**

**SEC. 1 □ 01. RIGHTS-OF-WAY FOR CERTAIN ROADS.**

(a) IN GENERAL. □ Subject to valid existing rights and consistent with this section, the Secretary of the Interior shall grant a right-of-way to the state for public travel and access upon the following roads:

- (1) all roads claimed as Class B, that are paved, and identified as rights-of-way in judicial actions in the federal court system as of January 1, 2016, in Uintah, Summit, Duchesne, Carbon, Emery, Grand, and San Juan counties.
- (b) APPLICABLE LAW.  A right-of-way granted under subsection (a) shall be granted in perpetuity, except in the case of abandonment, and shall not require the payment of rental.
- (c) ADMINISTRATION
  - (i) Each right-of-way granted by the Secretary under the provisions of this Title shall be perpetual, and shall consist of the full geographic extent authorized by Utah state law in effect as of January 1, 2016.
  - (ii) The appropriate holder of each right-of  way granted pursuant to this Title may be abandoned pursuant to state law.

~~(d) FUTURE CLAIMS.  Nothing in this section precludes the state or county from applying for future or existing rights-of-way on existing or new roads.~~

#### **SEC. 1 GRAND COUNTY COUNCIL RECOMMENDATIONS FOR CERTAIN ROADS.**

The recommendations of the Grand County Council, as depicted on the map titled  Grand County PLI Final Map 4-17-2015  for Hey Joe Canyon, Tenmile Canyon, and Mineral Canyon roads shall be implemented by the Secretary of the Interior, with the seasonal closures beginning the Tuesday following Memorial Day through Labor Day.

## **Title XIII Long-Term Gra ing Certain**

### **Sec. 1301 Current Permitted Use**

Unless otherwise specified by this Act, and pursuant to existing permits, on federal lands managed by the Secretary of Agriculture or the Secretary of the Interior in Summit, Duchesne, Uintah, Grand, Emery, Carbon, and San Juan Counties the grazing of domestic livestock shall continue and any adjustments in the numbers of livestock permitted should be made as a result of revisions in the normal grazing and land management planning and policy setting process at current permitted levels.

### **Sec 130 -- Bighorn Sheep**

On federal lands managed by the Secretary of Agriculture or the Secretary of the Interior in Summit, Duchesne, Uintah, Grand, Emery, Carbon, and San Juan Counties, the viability or existence of bighorn sheep shall not be used to remove or alter the use of domestic sheep or cattle where such use was permitted as of January 1, 2016. If conflicts between bighorn sheep and domestic livestock can be resolved, and if current permittees consent to the terms of any resolution, the Utah Department of Wildlife Resources may conduct whatever means necessary to resolve such conflicts.

## **DIVISION C LOCAL PARTICIPATION**

### **Title I LOCAL PARTICIPATION AND PLANNING**

#### **SEC. 001. Creation of Management Plans for Conservation Management Recreation Areas**

(a) ESTABLISHMENT. In order to facilitate the creation of the management plans for the National Conservation Areas, Special Management Areas, Watershed Management Areas, National Monument, Geologic Area, and Recreation Zones designated by this Act, there is created in each of the following counties, Summit, Duchesne, Uintah, Grand, Carbon, San Juan, and Emery, a Public Lands Initiative Stakeholder Advisory Council.

(b) PURPOSES. The Purpose of the County Public Lands Initiative Stakeholder Advisory Councils are to facilitate an open and transparent process for the creation of the management plans for the areas designated under this Act that require a management plan.

(c) MANAGEMENT PLAN.

(1) PLAN REQUIRED- Not later than 2 years after the date of enactment of this Act, the Secretary of the Interior and the Secretary of Agriculture shall develop management plans for the long-term management of each of the areas designated by this Act that require a management plan.

(2) RECOMMENDATIONS AND CONSULTATION- The Secretary of the Interior and the Secretary of Agriculture shall prepare the management plans in consultation and coordination with the County Public Lands Initiative Stakeholder Advisory Councils. If the Secretary of the Interior or Secretary of Agriculture does not incorporate the recommendations submitted by the Advisory Council into the management plans, the Secretary of the Interior and Secretary of Agriculture shall submit a written explanation before the effective date of the management plan to the House Committee on Natural Resources and Senate Committee on Energy and Natural Resources outlining the reasons for rejecting the recommendations of the Advisory Council.

(3) REQUIREMENTS- Each management plan shall--

(A) Describe the appropriate uses and management of the designated area, as described by the purposes, uses, and additional provisions outlined in each relevant Title; and

(B) Include interpretive and educational materials regarding the recreational, cultural, economic, and biological resources of the region within which the designated area is located.

(C) Conform management plans for designated areas that cross County boundaries.

#### **SEC. 00 - The Public Lands Initiative Stakeholder Advisory Council**

(a) County Public Lands Initiative Stakeholder Advisory Council.

(1) ESTABLISHMENT. □ Within 180 days after the date of enactment of this Act, the Secretary of the Interior shall establish in each of the Counties, a Public Lands Initiative Stakeholder Advisory Council. (referred to as the Advisory Council) to:

- (A) advise the Secretary of the Interior and Secretary of Agriculture with respect to development and implementation of the management plans created under this Act to the greatest extent allowable by law.
- (B) encourage and promote stakeholder participation in the decision making processes affecting the areas designated by this Act.

(2) MEMBERSHIP. □ The Advisory Council shall consist of 15 members.

(3) MEMBERS. □ The Secretary of the Interior shall appoint a member from each of the following groups:

- (i) Category I: Elected officials, Agencies, and Native American Tribes
  - a. One federal agency representative;
  - b. One designee from local county governing commission or council in the County in which the designation resides;
  - c. One Native American interest;
  - d. One representative from the Utah Department of Natural Resources;
  - e. One representative from the public-at-large or another elected official not representing the same governing body in a.
- (ii) Category II: Grazing, OHV, Recreation and other forms of commercial interest
  - a. One representative of the grazing community;
  - b. One representative of the off-highway vehicle community;
  - c. One representative of the sportsmen (hunting) community;
  - d. One representative from quiet recreation community;
  - e. One representative of the guides □ outfitters community.
- (iii) Category III: Environmental organizations, archaeological/historical interests and scientific expertise
  - a. One representative from the conservation community;
  - b. One representative with archaeological, cultural, and/or historic expertise;
  - c. One representative with biology expertise

(4) ELIGIBILITY. □ The Secretary of the Interior shall determine that all individuals appointed to the Advisory Council, and the organization or industry each individual represents, support the mission of the group they are slotted to represent.

(1) TERMS. □

(A) IN GENERAL. □ Except for the initial appointees, members of the Advisory Council shall be appointed for a

term of 4 years. Members shall not be appointed for more than 3 consecutive or nonconsecutive terms.

(2) TERMS OF INITIAL APPOINTEES. □ The Secretary of the Interior shall appoint the initial members of the Advisory Council as follows:

- (i) 7 members shall be appointed for a term of 4 years;
- (ii) 5 members shall be appointed for a term of 3 years; and
- (iii) 3 members shall be appointed for a term of 2 years.

(5) PRESERVATION OF PUBLIC ADVISORY STATUS. □ No individual may be appointed as a member of the Advisory Council while serving as an officer or employee of the Federal Government, unless he or she is serving in the designated position representing the agency.

(6) VACANCY AND REMOVAL. □

(A) IN GENERAL. □ Any vacancy on the Advisory Committee shall be filled in the manner in which the original appointment was made.

(B) REMOVAL. □ Advisory Committee members shall serve at the discretion of the Secretary of the Interior and may be removed at any time for good cause.

(7) CONTINUATION OF SERVICE. □ Each member may continue to serve after the expiration of the term of office to which such member was appointed until a successor has been appointed.

(8) CHAIR. □ The Chair of the Advisory Council shall be appointed to a 3-year term by the Secretary of the Interior from among the members of the Advisory Council. An individual appointed to the Advisory Council under (4)(2)(iii) shall be eligible to serve as Chair, but may serve for two years. An individual may not be appointed as Chair for more than 2 consecutive or nonconsecutive terms.

(9) PAY AND EXPENSES. □ Members of the Advisory Council shall serve without pay, but each member of the Advisory Council may be reimbursed for travel and lodging incurred through attending meetings of the Advisory Council (including approved workgroup or subgroup meetings) in the same amounts and under the same conditions as Federal employees in accordance with section 5703 of title 5, United States Code.

(10) MEETINGS. □

(A) IN GENERAL. □ The Advisory Council shall meet at the call of the Secretary of the Interior, the chair, or a majority of the members, but not less frequently than twice annually.

(B) OPEN MEETINGS. □ Each meeting of the Advisory Council shall be open to the public.

(C) PRIOR NOTICE OF MEETINGS. □ Timely notice of each meeting of the Advisory Committee shall be published in the Federal Register and be submitted to publications of general circulation.

(D) SUBGROUPS. □ The Advisory Council may establish such workgroups or subgroups as it deems necessary for the purpose of compiling information or conducting research. However, such workgroups or subgroups may not conduct business without the direction of the Advisory Council.

(11) QUORUM. □ Nine members of the Advisory Council shall constitute a quorum.

(12) EXPENSES. □ The expenses of the Advisory Council that the Secretary of the Interior determine to be reasonable and appropriate shall be paid by the Secretary of the

May 23, 2016 - DRAFT

Interior.

(13) ADMINISTRATIVE SUPPORT AND TECHNICAL SERVICES. □ The Secretary of the Interior shall provide to the Advisory Council the administrative support and technical services necessary for the council to function.

(14) ANNUAL REPORT. □

(1) REQUIRED. □ Not later than September 30 of each year, the Advisory Council shall submit a report to the Secretary of the Interior, the Committee on Natural Resources of the House of Representatives, and the Committee on Energy and Natural Resources of the Senate. If circumstances arise in which the Advisory Council cannot meet the September 30 deadline in any year, the Secretary of the Interior shall advise the Chair of each such Committee of the reasons for such delay and the date on which the submission of the report is anticipated.

(2) CONTENTS. □ The report required by paragraph (1) shall describe □

- (A) the activities of the Advisory Council during the preceding year;
- (B) the reports and recommendations made by the Advisory Council to the Secretary of the Interior during the preceding year; and
- (C) an accounting of actions taken by the Secretary of the Interior as a result of the recommendations.

#### **SEC. 003. □ PLANNING COMPLETION**

(a) Upon completion of the management planning process, the Advisory Council shall advise the Secretary of Interior and the Secretary of Agriculture with regards to the implementation of the management plans and provide oversight to ensure proper implementation for the areas designated by this Act.

(b) Each advisory council shall meet at least twice per year following completion of the management planning process.

(c) This division will expire at whichever comes first, 7 years from enactment of this Act or 3 years after the management planning process concludes.

**Subject:** Follow Up on Sec. 433 Questions

Jocelyn,

Below are the answers to the questions you had on Sec. 433 Protection of Water Rights. Let me know if you have further questions once you review.

Still owe you additional comments on bottled water and talking pts. for Sec. 118 which are both working.

**Then how do you currently manage?**

The BLM does not employ a single management strategy; management strategies are based on factors such as the beneficial use of the water, the laws of the particular State, and existing land use or activity authorizations. The BLM does have water withdrawal points and infrastructure on BLM trust lands connected to a water right that is not held by the BLM. Current water rights holders retain their right to use water as long as they are in compliance with those conditions imposed on the water right by the State.

**Please elaborate with specifics on how what you mean by significant impact—what tools would not be available, could the resource be lost or wasted...?**

In general, new water rights for beneficial uses on BLM trust lands are applied for and held by the BLM. Existing water rights can be held by the permittee or the BLM, depending on the how and when the right was acquired. For many wells on BLM lands it is not always clear who holds the rights to the water. The BLM works to identify the water right holder, and make sure the use is in compliance with State laws (or working with a permittee to take corrective actions to remain in compliance), as well as upgrade infrastructure to reduce water loss or waste between the withdrawal and use points.

**Does BLM apply behalf of the Federal Government for this new water right or this application made by BLM on behalf of the permittee?**

To better manage for multiple use and sustained yield, the BLM needs the flexibility to acquire or retain a water right, which Section 433 would hinder or eliminate in some situations. This can include the transfer of a water right from an existing holder to the BLM when a lease or use permit expires and the water right holder does not intend to use the water for beneficial uses on BLM lands. A recent and important example is getting agreements with existing water right holders to 'gift' some of their right to maintain in-stream

flows during drought or high withdrawal periods to protect aquatic life or riparian resource values.

### **Sec. 433 Protection of Water Rights (BLM)**

*None of the funds made available in this or any other Act may be used to condition the issuance, renewal, amendment, or extension of any permit, approval, license, lease, allotment, easement, right-of-way, or other land use or occupancy agreement on the transfer of any water right, including sole and joint ownership, directly to the United States, or any impairment of title, in whole or in part, granted or otherwise recognized under State law, by Federal or State adjudication, decree, or other judgment, or pursuant to any interstate water compact. Additionally, none of the funds made available in this or any other Act may be used to require any water user to apply for or acquire a water right in the name of the United States under State law as a condition of the issuance, renewal, amendment, or extension of any permit, approval, license, lease, allotment, easement, right-of-way, or other land use or occupancy agreement.*

### **Talking Points/Bullets**

- The Department opposes Section 433 in the House mark.
- This provision prohibits the use of funds for conditioning of any permit, approval, license, lease, allotment, easement, right-of-way, or other land use or occupancy agreement on the transfer or relinquishment of any water right granted under State law.
- **No BLM program or policy requires a permittee, lessee, or proponent to relinquish water rights to the Federal government as a condition of a permit or lease**<sup>[HJD1]</sup>.
- This provision, however, could significantly impact the BLM's ability to manage water related resources vital to many multiple uses on public lands<sup>[HJD2]</sup>.
- Mitigation of impacts from the spectrum of land uses that occur on the public lands is critical to maintaining the health of land and water systems in a multiple use environment.
- In many cases, the BLM uses its authority under the Federal Land Policy and Management Act to consider terms and conditions, including various types of

mitigation activities, as part of providing authorization to use the public land.

- Water rights may be an appropriate aspect of a mitigation package. This provision would prohibit the BLM from considering water rights as part of the mitigation package. Further, at the completion of a project or other authorization where water rights were a necessary part of the authorized project, the BLM may want to use the water rights for land management purposes instead of letting them expire.
  
- It may be a reasonable condition of the approval for BLM to negotiate for the transfer of those rights to the BLM when the authorization expires.
  
- Additionally, the restrictions imposed by this provision would hamper the BLM's cooperative work with permittees, licensees, and lessees.
  - For example, the BLM frequently works with grazing permittees through cooperative range improvement agreements to plan, finance, and develop water resources, and the BLM commonly applies for new livestock water rights to the extent allowed by the laws of the State in which the land is located[HJD3].
  
- Although the BLM does not require relinquishment or transfer of water rights as a condition of authorizations, the BLM is concerned that Section 433 could have the consequence of limiting the BLM's ability to apply existing authorities necessary for the management of federal resources.

---

[HJD1]Then how do you currently manage?

[HJD2]Please elaborate with specifics on how what you mean by significant impact—what tools would not be available, could the resource be lost or wasted...?

[HJD3]Does BLM apply behalf of the Federal Government for this new water right or this application made by BLM on behalf of the permittee?

Doug and Sarah –

We are getting closer to nailing down the date for the Full Committee Hearing on the Wildfire Discussion Draft Chairman Murkowski released with her colleagues Ranking Member Cantwell and Senators Risch, Wyden and Crapo.

We have narrowed it to two dates: June 21 and June 23 with a 10 am start. Please let us know who would testify from the Departments based on availability for those two dates.

Thanks, Lucy

## TITLE I MAJOR DISASTER FOR WILDFIRE ON FEDERAL LAND

### SEC. 101. WILDFIRE ON FEDERAL LAND.

Section 102(2) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5122(2)) is amended

(1) by striking (2) and all that follows through means and inserting the following:

(2) MAJOR DISASTER.

(A) MAJOR DISASTER. The term major disaster means and

(2) by adding at the end the following:

(B) MAJOR DISASTER FOR WILDFIRE ON FEDERAL LAND. The term major disaster for wildfire on Federal land means any wildfire or wildfires, which in the determination of the President under section 802 warrants assistance under section 803 to supplement the efforts and resources of the Department of the Interior or the Department of Agriculture

(i) on Federal land; or

(ii) on non-Federal land pursuant to a fire protection agreement or cooperative agreement.

### SEC. 102. DECLARATION OF A MAJOR DISASTER FOR WILDFIRE ON FEDERAL LAND.

The Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5170 et seq.) is amended by adding at the end the following:

## TITLE VIII MAJOR DISASTER FOR WILDFIRE ON FEDERAL LAND

### SEC. 801. DEFINITIONS.

As used in this title

(1) FEDERAL LAND. The term Federal land means

(A) any land under the jurisdiction of the Department of the Interior; and

(B) any land under the jurisdiction of the United States Forest Service.

(2) FEDERAL LAND MANAGEMENT AGENCIES. The term Federal land management agencies means

(A) the Bureau of Land Management;

(B) the National Park Service;

(C) the Bureau of Indian Affairs;

**Commented [BS(1):** Placeholder for meaningful fire fix language, to be approved by HSGAC cmte, OMB, USDA, FEMA, CEQ that addresses fire borrowing and USFS capacity issues

(D) the United States Fish and Wildlife Service; and

(E) the United States Forest Service.

(3) WILDFIRE SUPPRESSION OPERATIONS. The term wildfire suppression operations means the emergency and unpredictable aspects of wildland firefighting, including support, response, emergency stabilization activities, and other emergency management activities of wildland firefighting on Federal land (or on non-Federal land pursuant to a fire protection agreement or cooperative agreement) by the Federal land management agencies covered by the wildfire suppression subactivity of the Wildland Fire Management accounts or the FLAME Wildfire Suppression Reserve Fund account of the Federal land management agencies.

## SEC. 802. PROCEDURE FOR DECLARATION OF A MAJOR DISASTER FOR WILDFIRE ON FEDERAL LAND.

(a) In General. The Secretary of the Interior or the Secretary of Agriculture may submit a request to the President consistent with the requirements of this title for a declaration by the President that a major disaster for wildfire on Federal land exists.

(b) Requirements. A request for a declaration by the President that a major disaster for wildfire on Federal land exists shall

(1) be made in writing by the respective Secretary;

(2) certify that, in the current fiscal year, the amount appropriated for wildfire suppression operations of the Federal land management agencies under the jurisdiction of the respective Secretary, net of any concurrently enacted rescissions of wildfire suppression funds, increases the total unobligated balance of amounts available for wildfire suppression by an amount equal to at least 70 percent of the average total costs incurred by the Federal land management agencies per year for wildfire suppression operations, including the suppression costs in excess of appropriated amounts, over the previous ten fiscal years;

(3) certify that, in the current fiscal year, an amount equal to at least 30 percent of the average total costs incurred by the Federal land management agencies per year for wildfire suppression operations, including the suppression costs in excess of appropriated amounts, over the previous ten fiscal years, has been appropriated for the Federal land management agencies under the jurisdiction of the respective Secretary for the purpose funding

(A) projects and activities on Federal land that improve the fire regime of areas that meet the desired future conditions of the applicable land and resource management plan or land use plan; or

(B) restoration and resiliency projects and activities on Federal land that meet the desired future conditions of the applicable land and resource management plan or land use plan;

(4) certify that, in the current fiscal year

(A) the total of the amounts certified under paragraphs (2) and (3) are equal to at least 100 percent of the average total costs incurred by the Federal land management agencies per year for wildfire suppression operations, including the suppression costs

in excess of appropriated amounts, over the previous ten fiscal years; and

□(B) the amount certified under paragraph (3) is in addition to and supplements other appropriations for the Federal land management agencies for projects and activities of the type described in subparagraphs (A) and (B) of paragraph (3) that equal or exceed the total amount appropriated for such projects and activities for fiscal year 2015, subject to the condition that such 2015 threshold amount shall be adjusted annually beginning with fiscal year 2017 to reflect changes over the preceding fiscal year in the Consumer Price Index for all-urban consumers published by the Secretary of Labor;

□(5) certify that the amount available for wildfire suppression operations of the Federal land management agencies under the jurisdiction of the respective Secretary will be obligated not later than 30 days after such Secretary notifies the President that wildfire suppression funds will be exhausted to fund ongoing and anticipated wildfire suppression operations related to the wildfire on which the request for the declaration of a major disaster for wildfire on Federal land pursuant to this title is based; and

□(6) specify the amount required in the current fiscal year to fund wildfire suppression operations related to the wildfire on which the request for the declaration of a major disaster for wildfire on Federal land pursuant to this title is based.

□(c) Declaration. □ Based on the request of the respective Secretary under this title, the President may declare that a major disaster for wildfire on Federal land exists.

□(d) List of Projects Reporting Requirement. □ Not later than November 1 of each fiscal year, the Secretary of Agriculture and the Secretary of the Interior shall each submit to the Committees on Agriculture, Appropriations, and Natural Resources of the House of Representatives and the Committees on Agriculture, Nutrition, and Forestry, Appropriations, and Natural Resources of the Senate a list of projects and activities of the type described in subparagraphs (A) and (B) of subsection (b)(3) to be conducted using funds described in subsection (b)(3).

## □SEC. 803. WILDFIRE ON FEDERAL LAND ASSISTANCE.

□(a) In General. □ In a major disaster for wildfire on Federal land, the President may direct the transfer of funds, only from the account established pursuant to subsection (b), to the Secretary of the Interior or the Secretary of Agriculture to conduct wildfire suppression operations on Federal land (and non-Federal land pursuant to a fire protection agreement or cooperative agreement).

□(b) Wildfire Suppression Operations Disaster Account. □

□(1) IN GENERAL. □ There is established a specific account for the assistance available pursuant to a declaration under section 802.

□(2) USE. □ The account established by paragraph (1) may only be used to fund assistance pursuant to this title.

□(3) AUTHORIZATION OF APPROPRIATIONS. □ There are authorized to be appropriated to the account established by paragraph (1) such sums as are necessary to carry out the purposes of a declaration under section 802, but not to exceed the limitations specified in subsection (c)(2).

□(c) Limitations. □

□(1) LIMITATIONS RELATED TO REQUEST AND ACCOUNT AMOUNTS. □ The assistance available pursuant to a declaration under section 802 is limited to the transfer of the amount requested pursuant to section 802(b)(6). The assistance available for transfer shall not exceed the amount contained in the wildfire suppression operations account established pursuant to subsection (b).

□(2) MAXIMUM TRANSFER AMOUNT LIMITATION. □ If a bill or joint resolution making appropriations for a fiscal year is enacted that specifies an amount for wildfire suppression operations in the Wildland Fire Management accounts of the Department of Agriculture or the Department of the Interior, then the total amount of assistance appropriated to and transferred from the account established pursuant to subsection (b) and pursuant to a declaration under section 802 for wildfire suppression operations, to the Wildland Fire Management accounts of the Department of Agriculture and the Department of the Interior, for that fiscal year, shall not exceed \$1,647,000,000.

□(3) TRANSFER OF FUNDS. □ Funds under this section shall be transferred from the wildfire suppression operations account to the wildfire suppression subactivity of the Wildland Fire Management Accounts. The transferred funds shall remain available until expended.

□(d) Prohibition of Other Transfers. □ Except as provided in this section, no funds may be transferred to or from the account established pursuant to subsection (b) to or from any other fund or account.

□(e) Reimbursement for Wildfire Suppression Operations on Non-federal Land. □ If amounts transferred under subsection (c) are used to conduct wildfire suppression operations on non-Federal land, the respective Secretary shall □

□(1) secure reimbursement for the cost of such wildfire suppression operations conducted on the non-Federal land; and

□(2) transfer the amounts received as reimbursement to the wildfire suppression operations disaster account established pursuant to subsection (b).

□(f) Annual Accounting and Reporting Requirements. □ Not later than 90 days after the end of each fiscal year for which assistance is received pursuant to this section, the respective Secretary shall submit to the Committees on Agriculture, Appropriations, the Budget, Natural Resources, and Transportation and Infrastructure of the House of Representatives and the Committees on Agriculture, Nutrition, and Forestry, Appropriations, the Budget, Energy and Natural Resources, Homeland Security and Governmental Affairs, and Indian Affairs of the Senate, and make available to the public, a report that includes the following:

□(1) The risk-based factors that influenced management decisions regarding wildfire suppression operations of the Federal land management agencies under the jurisdiction of the Secretary concerned.

□(2) Specific discussion of a statistically significant sample of large fires, in which each fire is analyzed for cost drivers, effectiveness of risk management techniques, resulting positive or negative impacts of fire on the landscape, impact of investments in preparedness, suggested corrective actions, and such other factors as the respective Secretary considers

appropriate.

[(3) Total expenditures for wildfire suppression operations of the Federal land management agencies under the jurisdiction of the respective Secretary, broken out by fire sizes, cost, regional location, and such other factors as such Secretary considers appropriate.

[(4) Lessons learned.

[(5) Such other matters as the respective Secretary considers appropriate.

[(g) Savings Provision. Except as provided in subsections (c) and (d), nothing in this title shall limit the Secretary of the Interior, the Secretary of Agriculture, Indian tribe, or a State from receiving assistance through a declaration made by the President under this Act when the criteria for such declaration have been met.

## SEC. 103. PROHIBITION ON TRANSFERS.

No funds may be transferred to or from the Federal land management agencies wildfire suppression operations accounts referred to in section 801(3) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act to or from any account or subactivity of the Federal land management agencies, as defined in section 801(2) of such Act, that is not used to cover the cost of wildfire suppression operations.

## SEC. 104. EFFECTIVE DATE.

The amendments made by this title shall take effect on October 1, 2016.

## TITLE II FOREST MANAGEMENT

### Sec. 201. SENSE OF THE SENATE REGARDING FOREST MANAGEMENT AUTHORITIES IN THE AGRICULTURAL ACT OF 2014.

It is the Sense of the Senate that

- 1) Congress passed significant new authorizations for restoration and management activities on National Forest System lands in the Agricultural Act of 2014.
- 2) Pursuant to the Agricultural Act, the Secretary of Agriculture has designated approximately 46.7 million acres of national forest land for expedited treatment under the National Environmental Policy Act.
- 3) Pursuant to the 2014 Farm Bill, the Secretary of Agriculture has entered into 13 Good Neighbor Agreements with States, allowing State forestry officials to undertake restoration work on National Forest System lands.
- 4) The Secretary and the Chief of the Forest Service should continue to prioritize full implementation of the forest management provisions contained in Title VIII of the

Agricultural Act of 2014.

## Sec. 202. SENSE OF THE SENATE REGARDING FOREST SERVICE RESTORATION ACCOMPLISHMENTS.

It is the Sense of the Senate that ☐

- 1) Despite a smaller budget for non-wildfire suppression activities, the Forest Service has increased the pace and scale of restoration on National Forest System lands in recent years.
- 2) In 2014, the Forest Service treated more than 4.6 million acres of national forest land, producing 2.8 billion board feet of timber.

## Sec. 203. Definitions

(a) Definitions. ☐ In this title:

(1) COLLABORATIVE PROCESS. ☐ The term ☐collaborative process☐ means a process that relates to the management of National Forest System land, by which a forest management activity is proposed☐

(A) by a resource advisory committee.

(B) by a collaborative that meets the requirements under section 4003 of the Omnibus Public Land Management Act of 2009 (16 U.S.C. 7303); or

(C) by a group not covered by subparagraph (A) or (B), but that☐

(i) includes multiple individuals who provide balanced and broad representation of diverse interests, including, if relevant and interested, but not limited to☐

(I) environmental organizations;

(II) timber and forest products industry representatives;

(III) State agencies;

(IV) units of local government;

(V) tribal governments; and

(VI) outdoor recreational representatives; and

(ii) operates☐

(I) in a transparent and nonexclusive manner; and

(II) by consensus or in accordance with voting procedures to ensure a high degree of agreement among participants and across various interests.

(2) RESOURCE ADVISORY COMMITTEE. ☐ The term ☐resource advisory committee☐ has the meaning given that term in section 201 of the Secure Rural Schools and Community Self-Determination Act of 2000 (16 U.S.C. 7121).

(3) Restoration. □ The term "restoration" has the meaning of that term as defined in 36 C.F.R. 219.19.

(4) SECRETARY. □ The term "Secretary" means the Secretary of Agriculture.

## Sec. 204. Criteria and Exclusions

(a) Exclusions. □ This title does not apply to □

- (1) a component of the National Wilderness Preservation System;
- (2) any Federal land on which the removal of vegetation is prohibited;
- (3) a wilderness study area;
- (4) an inventoried roadless area; or
- (5) an area in which the activities authorized would be inconsistent with the applicable forest plan.

(b) In general □--A project carried out under this title is a project that □

- (1) maximizes the retention of old-growth and large trees, as appropriate for the forest type, to the extent that the trees promote stands that are resilient to wildfire;
- (2) considers and incorporates the best available scientific information to maintain or restore ecological integrity, including maintaining or restoring structure, function, composition, and connectivity;
- (3) is developed and implemented through a collaborative process; and
- (4) focuses on enhancing the forest conditions and characteristics necessary to facilitate resilience to uncharacteristic wildfire.

(c) Roads. □

(1) PERMANENT ROADS. □ A project carried out under this section shall not include the construction of new permanent roads.

(2) TEMPORARY ROADS. □ The Secretary shall limit any temporary road construction to □ mile and shall decommission any temporary road constructed under a project under this title not later than 3 years after the date on which the project is completed.

(d) LIMITATIONS. □ Except as provided in section 205(b), nothing in this title preempts or interferes with any obligation to comply with the provisions of any Federal law, including □

- (1) the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.);

- (2) the Federal Water Pollution Control Act (33 U.S.C. 1251 et seq.); or
- (3) any other Federal environmental law.

(e) Forest Land and Resource Management Plans.  All projects and activities carried out under this title shall be conducted in accordance with the forest plan and other relevant administrative regulations, procedures, policies and decisions applicable to the National Forest System land containing the projects and activities.

(f) Public Notice and Scoping.--The Secretary shall conduct public notice and scoping for any project or action proposed in accordance with this section.

(g) Accountability.

(1) In general.--The Secretary shall prepare an annual report on all projects carried out under this title that includes a description of all acres (or other appropriate unit) treated.

(2) Submission.--Not later than 1 year after the date of enactment of this Act, and each year thereafter, the Secretary shall submit the reports required under paragraph (1) to--

(A) the Committee on Agriculture, Nutrition, and Forestry of the Senate;

(B) the Committee on Environment and Public Works of the Senate;

(C) the Committee on Agriculture of the House of Representatives;

(D) the Committee on Natural Resources of the House of Representatives; and

(E) the Government Accountability Office."

## Sec. 205. Analysis of only Alternatives in Proposed Collaborative Forest Management Activities

(a) In General.  This section shall apply whenever the Secretary prepares an environmental assessment or an environmental impact statement pursuant to section 102(2) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)) for a forest management activity

(1) that is developed through a collaborative process; and .

(2) the primary purpose of which is

(A) the reduction of hazardous fuel loads that lie within the wildland-urban interface; and

(B) the

- (1) reduction of fuel connectivity through the installation of fuel and fire breaks;
- or
- (2) restoration of a project area. .

(b) Consideration of Alternatives. □ In an environmental assessment or environmental impact statement described in subsection (a), the Secretary may study, develop, and describe only the following alternatives:

- (1) The forest management activity described in subsection (a).
- (2) The alternative of no action.
- (3) An additional action alternative, if the additional alternative □

(A) is proposed during scoping or the collaborative process under subsection (a);  
and

(B) meets the purpose and need of the project, in accordance with regulations promulgated by the Council on Environmental Quality.

## TITLE III □ TIMBER MARKETS

### Sec. 301. Timber Innovation Act of 2016

#### SECTION 1. SHORT TITLE.

This Act may be cited as the 'Timber Innovation Act of 2016'.

#### SEC. □ FINDINGS.

Congress finds that--

- (1) wood products play a significant role in the United States economy;
- (2) the United States wood products industry employs more than 548,000 individuals in manufacturing and forestry;
- (3) private forest owners in the United States support approximately 2,400,000 jobs and \$87,000,000,000 in payroll;
- (4) support for wood buildings and growing market opportunities for the use of wood products, such as tall wood building markets, could--

(A) help ensure that forests in the United States remain healthy;  
and

(B) create income streams for private forest owners that may help the owners keep their land forested instead of selling the land for development;

(5) developing new markets for wood use in buildings may drive additional investment in hazardous fuels treatments on forest land;

(6) innovative wood product technologies and building systems--

(A) have enabled longer wood spans, taller walls, and higher buildings; and

(B) continue to expand the possibilities for wood use in construction;

(7) wood, because it is a building material that sequesters carbon, has the potential to reduce the overall carbon footprint of a project that uses wood as a building material;

(8) research helps to modernize building codes on an international basis, and that modernization is needed in the United States for tall wood buildings;

(9) building codes specify a level of safety that each building material and system shall meet and that level of safety is the same regardless of the construction materials used;

(10) in the case of wood, building codes ensure that the allowable size, configuration, and required structural and fire protection features of a construction project allow for the safety of all occupants; and

(11) mass timber buildings, due to the thick, solid wood panels of which the buildings are composed, are slow to burn and have inherent fire resistance that, under many configurations, establishes a fire performance equal to or better than other construction materials, allowing mass timber to be used appropriately for buildings that are significantly taller and larger than traditional wood buildings.

### **SEC. 3. DEFINITIONS.**

In this Act:

(1) MASS TIMBER- The term 'mass timber' means a type of building component or system that uses large panelized wood construction, including--

- (A) cross-laminated timber;
- (B) nail laminated timber;
- (C) glue laminated timber;
- (D) laminated strand lumber; and
- (E) laminated veneer lumber.

(2) SECRETARY- The term 'Secretary' means the Secretary of Agriculture.

(3) TALL WOOD BUILDING- The term 'tall wood building' means a building designed to be--

- (A) constructed with mass timber; and
- (B) more than 85 feet in height.

#### **SEC. 4. ESTABLISHMENT OF RESEARCH AND DEVELOPMENT PROGRAM FOR ADVANCING TALL WOOD BUILDING CONSTRUCTION.**

(a) In General- The Secretary shall establish a performance-driven research and development program for the purpose of advancing tall wood building construction in the United States (referred to in this section as the 'program').

(b) Activities- In carrying out the program, the Secretary, in consultation with the State and Private Forestry deputy area of the Forest Service, shall--

(1) after receipt of input and guidance from, and collaboration with, the wood products industry, conservation organizations, and institutions of higher education, conduct research at the Forest Products Laboratory that meets measurable performance goals for the achievement of the priorities described in subsection (c); and

(2) after coordination and collaboration with the wood products industry and conservation organizations, make competitive grants to institutions of higher education to conduct research that meets measurable performance goals for the achievement of the priorities described in subsection (c).

(c) Program Priorities- The research carried out under the program shall give priority to--

- (1) ways to improve the commercialization of tall wood building materials;

- (2) analyzing the safety of tall wood building materials;
- (3) calculations by the Forest Products Laboratory of the life cycle environmental footprint, from extraction of raw materials through the manufacturing process, of tall wood building construction;
- (4) identifying the building code modifications necessary to construct tall wood buildings;
- (5) analyzing methods to reduce the life cycle environmental footprint of tall wood building construction;
- (6) analyzing the potential implications of the broad adoption of tall wood building technology and architecture in the commercial and residential building market on wildlife and forest biodiversity; and
- (7) 1 or more other research areas identified by the Secretary, in consultation with the State and Private Forestry deputy area of the Forest Service, conservation organizations, institutions of higher education, and the wood products industry.

(d) Timeframe- To the maximum extent practicable, the measurable performance goals for the research carried out under the program shall be achievable within a 5-year timeframe.

(e) Funding- There are authorized to be appropriated to carry out this section such sums as are necessary.

**SEC. 5. TALL WOOD BUILDING COMPETITION.**

Subject to availability of appropriations, not less frequently than once during each fiscal year for the period of fiscal years 2017 through 2021, the Secretary shall carry out a competition for a tall wood building design in accordance with section 24 of the Stevenson-Wydler Technology Innovation Act of 1980 (15 U.S.C. 3719).

**SEC. 6. WOOD INNOVATION GRANT PROGRAM.**

(a) Definition of Eligible Entity- In this section, the term 'eligible entity' means--

- (1) an individual;
- (2) a public or private entity (including a center of excellence that consists of 1 or more partnerships between forestry, engineering, architecture, or business schools at 1 or more institutions of higher education); or

(3) a State, local, or tribal government.

(b) Grants Authorized- The Secretary, in carrying out the wood innovation grant program of the Secretary described in the notice of the Secretary entitled 'Request for Proposals: 2016 Wood Innovations Funding Opportunity' (80 Fed. Reg. 63498 (October 20, 2015)), may make a wood innovation grant to 1 or more eligible entities each year for the purpose of the acceleration of the adoption of emerging technologies in the development of innovative wood products for tall wood building construction.

(c) Matching Requirement- As a condition of receiving a grant under subsection (b), a recipient shall provide funds equal to the amount the recipient receives under the grant, to be derived from non-Federal sources.

(d) Funding- There are authorized to be appropriated to the Secretary to award grants under subsection (b) such sums as are necessary.

**SEC. □ TECHNICAL ASSISTANCE.**

(a) In General- The Secretary, in cooperation with State foresters and State extension directors (or equivalent State officials), shall carry out a program of education and technical assistance for mass timber applications (referred to in this section as the 'program').

(b) Activities- Activities under the program shall include--

(1) the provision of assistance to an individual, a public or private entity, or a local or tribal government in the development of skills and knowledge relating to the use of wood in mass timber applications and other wood technologies;

(2) the provision of assistance to an individual, a public or private entity, or a State, local, or tribal government in the identification of opportunities for the use of mass timber; and

(3) activities to increase public understanding of--

(A) the environmental, economic, and social values associated with using wood in the construction of buildings; and

(B) the relationship between the development of markets for wood products and the ability to carry out sustainable forest management.

(c) Methods- The program may include the development and distribution of educational materials and holding events designed to transfer knowledge.

(d) Expertise- The Secretary shall--

(1) maintain, within the Forest Service, sufficient professional expertise relating to the uses of wood products to conduct the program; and

(2) improve that expertise by collaborating with other Federal and non-Federal experts on the uses of wood products.

(e) Partners- The Secretary shall collaborate and partner with 1 or more non-Federal entities, including the governments of other countries, States, local governments, not-for-profit organizations, businesses, and institutions of higher education--

(1) to enhance tall wood building commercialization in the United States;

(2) to develop technical assistance relating to tall wood building commercialization; and

(3) to carry out the program.

(f) Funding- There are authorized to be appropriated to the Secretary to carry out the program such sums as are necessary.

## TITLE IV □ TRAIL MAINTENANCE AND CONSERVATION

### Sec. 401. Tennessee Wilderness Act

#### **SECTION 1. SHORT TITLE.**

This Act may be cited as the 'Tennessee Wilderness Act'.

#### **SEC. □ DEFINITIONS.**

In this Act:

(1) MAP- The term 'Map' means the map entitled 'Proposed Wilderness Areas and Additions-Cherokee National Forest' and dated January 20, 2010.

- (2) SECRETARY- The term 'Secretary' means the Secretary of Agriculture.
- (3) STATE- The term 'State' means the State of Tennessee.

### **SEC. 3. ADDITIONS TO CHEROKEE NATIONAL FOREST.**

(a) Designation of Wilderness- In accordance with the Wilderness Act (16 U.S.C. 1131 et seq.), the following parcels of Federal land in the Cherokee National Forest in the State of Tennessee are designated as wilderness and as additions to the National Wilderness Preservation System:

- (1) Certain land comprising approximately 9,038 acres, as generally depicted as the 'Upper Bald River Wilderness' on the Map and which shall be known as the 'Upper Bald River Wilderness'.
- (2) Certain land comprising approximately 348 acres, as generally depicted as the 'Big Frog Addition' on the Map and which shall be incorporated in, and shall be considered to be a part of, the Big Frog Wilderness.
- (3) Certain land comprising approximately 630 acres, as generally depicted as the 'Little Frog Mountain Addition NW' on the Map and which shall be incorporated in, and shall be considered to be a part of, the Little Frog Mountain Wilderness.
- (4) Certain land comprising approximately 336 acres, as generally depicted as the 'Little Frog Mountain Addition NE' on the Map and which shall be incorporated in, and shall be considered to be a part of, the Little Frog Mountain Wilderness.
- (5) Certain land comprising approximately 2,922 acres, as generally depicted as the 'Sampson Mountain Addition' on the Map and which shall be incorporated in, and shall be considered to be a part of, the Sampson Mountain Wilderness.
- (6) Certain land comprising approximately 4,446 acres, as generally depicted as the 'Big Laurel Branch Addition' on the Map and which shall be incorporated in, and shall be considered to be a part of, the Big Laurel Branch Wilderness.
- (7) Certain land comprising approximately 1,836 acres, as generally depicted as the 'Joyce Kilmer-Slickrock Addition' on the Map and which shall be incorporated in, and shall be considered to be a part of, the Joyce Kilmer-Slickrock Wilderness.

(b) Maps and Legal Descriptions-

- (1) IN GENERAL- As soon as practicable after the date of the enactment of this Act, the Secretary shall file maps and legal descriptions of the wilderness areas designated by subsection (a) with the appropriate committees of Congress.
- (2) PUBLIC AVAILABILITY- The maps and legal descriptions filed under paragraph (1) shall be on file and available for public inspection in the office of the Chief of the Forest Service and the office of the Supervisor of the Cherokee National Forest.

(3) FORCE OF LAW- The maps and legal descriptions filed under paragraph (1) shall have the same force and effect as if included in this Act, except that the Secretary may correct typographical errors in the maps and descriptions.

(c) Administration-

(1) IN GENERAL- Subject to valid existing rights, the Federal land designated as wilderness by subsection (a) shall be administered by the Secretary in accordance with the Wilderness Act (16 U.S.C. 1131 et seq.), except that any reference in that Act to the effective date of that Act shall be deemed to be a reference to the date of the enactment of this Act.

(2) FISH AND WILDLIFE MANAGEMENT- In accordance with section 4(d)(7) of the Wilderness Act (16 U.S.C. 1133(d)(7)), nothing in this Act affects the jurisdiction of the State with respect to fish and wildlife management (including the regulation of hunting, fishing, and trapping) in the wilderness areas designated by subsection (a).

## Sec 402. FOREST SERVICE LEGACY ROADS AND TRAILS REMEDIATION PROGRAM

(a) In General. □ The Secretary of Agriculture shall establish and maintain a Forest Service Legacy Roads and Trails Remediation Program within the National Forest System □

(1) to carry out critical maintenance and urgent repairs and improvements on National Forest System roads, trails, and bridges;

(2) to restore fish and other aquatic organism passage by removing or replacing unnatural barriers to the passage of fish and other aquatic organisms;

(3) to decommission unneeded roads and trails; and

(4) to carry out associated activities.

(b) Priority. □ In implementing the Forest Service Legacy Roads and Trails Remediation Program, the Secretary of Agriculture shall give priority to projects that protect or restore □

(1) water quality;

(2) watersheds that feed public drinking water systems; or

(3) habitat for threatened, endangered, and sensitive fish and wildlife species.

(c) National Forest System. □ Except as authorized under section 323 of title III of the Department of the Interior and Related Agencies Appropriations Act, 1999 (16 U.S.C. 1011a), all projects carried out under the Forest Service Legacy Roads and Trails Remediation Program shall be on National Forest System roads, trails, and bridges.

(d) National Program Strategy. □ Not later than 180 days after the date of enactment of this Act, the Secretary of Agriculture shall develop a national strategy for implementing the Forest Service Legacy Roads and Trails Remediation Program.

## Sec. 403. NATIONAL FOREST SYSTEM TRAILS STEWARDSHIP ACT

(b) Table of Contents. □ The table of contents for this Act is as follows:

Sec.1.Short title; table of contents.

Sec.2.Findings.

Sec.3.Definitions.

Sec.4.National forest system trails volunteer and partnership strategy.

Sec.5.Priority trail maintenance program.

Sec.6.Cooperative agreements.

Sec.7.Stewardship credits for outfitters and guides.

### SEC. 2. FINDINGS.

Congress finds as follows:

(1) The National Forest System features a world-class trail system with over 157,000 miles of trails that provide world-class opportunities for hiking, horseback riding, hunting, mountain bicycling, motorized vehicles, and other outdoor activities.

(2) According to the Government Accountability Office, the Forest Service is only able to maintain about one-quarter of National Forest System trails to the agency standard, and the agency faces a trail maintenance backlog of \$314,000,000, and an additional backlog of \$210,000,000 in annual maintenance, capital improvements, and operations.

(3) The lack of maintenance on National Forest System trails threatens access to public lands, and may cause increased environmental damage, threaten public safety, and increase future maintenance costs.

(4) Federal budget limitations require solutions to National Forest System trail maintenance issues that make more efficient use of existing resources.

(5) Volunteers, partners, and outfitters and guides play an important role in maintaining National Forest System trails, and a comprehensive strategy is needed to ensure that volunteers and partners are used as effectively as possible.

### SEC. 3. DEFINITIONS.

In this Act:

(1) ADMINISTRATIVE UNIT. □ The term "Administrative Unit" means a national forest or national grassland.

(2) OUTFITTER OR GUIDE. □ The term "outfitter or guide" means an individual, organization, or business who provides outfitting or guiding services, as defined in

section 251.51 of title 36, Code of Federal Regulations.

(3) PARTNER. □ The term "partner" means a non-Federal entity that engages in a partnership.

(4) PARTNERSHIP. □ The term "partnership" means arrangements between the Department of Agriculture or the Forest Service and a non-Federal entity that are voluntary, mutually beneficial, and entered into for the purpose of mutually agreed upon objectives.

(5) PRIORITY AREA. □ The term "priority area" means a well-defined region on National Forest System land selected by the Secretary under section 5(a).

(6) SECRETARY. □ The term "Secretary" means the Secretary of Agriculture.

(7) STRATEGY. □ The term "strategy" means the National Forest System Trails Volunteer and Partnership Strategy authorized by section 4(a).

(8) TRAIL MAINTENANCE. □ The term "trail maintenance" means any activity to maintain the usability and sustainability of trails within the National Forest System, including □

- (A) ensuring trails are passable by the users for which they are managed;
- (B) preventing environmental damage resulting from trail deterioration;
- (C) protecting public safety; and
- (D) averting future deferred maintenance costs.

(9) VOLUNTEER. □ The term "volunteer" means an individual whose services are accepted by the Secretary without compensation under the Volunteers in the National Forests Act of 1972 (16 U.S.C. 558a et seq.).

## SEC. 4. NATIONAL FOREST SYSTEM TRAILS VOLUNTEER AND PARTNERSHIP STRATEGY.

(a) In General. □ Not later than 2 years after the date of the enactment of this Act, the Secretary shall publish in the Federal Register a strategy to significantly increase the role of volunteers and partners in trail maintenance.

(b) Required Elements. □ The strategy required by subsection (a) shall □

- (1) augment and support the capabilities of Federal employees to carry out or contribute to trail maintenance;
- (2) provide meaningful opportunities for volunteers and partners to carry out trail maintenance in each region of the Forest Service;
- (3) address the barriers to increased volunteerism and partnerships in trail maintenance identified by volunteers, partners, and others;
- (4) prioritize increased volunteerism and partnerships in trail maintenance in those regions with the most severe trail maintenance needs, and where trail maintenance backlogs are jeopardizing access to National Forest lands; and

(5) aim to increase trail maintenance by volunteers and partners by 100 percent by the date that is 5 years after the date of the enactment of this Act.

(c) Additional Requirement. □ As a component of the strategy, the Secretary shall study opportunities to improve trail maintenance by addressing opportunities to use fire crews in trail maintenance activities in a manner that does not jeopardize firefighting capabilities, public safety, or resource protection. Upon a determination that trail maintenance would be advanced by use of fire crews in trail maintenance, the Secretary shall incorporate these proposals into the strategy, subject to such terms and conditions as the Secretary determines to be necessary.

(d) Volunteer Liability. □

(1) IN GENERAL. □ Section 3 of the Volunteers in the National Forests Act of 1972 (16 U.S.C. 558c) is amended by adding at the end the following new subsection:

□(e) For the purposes of subsections (b), (c), and (d), the term "volunteer" includes a person providing volunteer services to the Secretary who □

□(1) is recruited, trained, and supported by a cooperator under a mutual benefit agreement with the Secretary; and

□(2) performs such volunteer services under the supervision of the cooperator as directed by the Secretary in the mutual benefit agreement, including direction that specifies □

□(A) the volunteer services to be performed by the volunteers and the supervision to be provided by the cooperator;

□(B) the applicable project safety standards and protocols to be adhered to by the volunteers and enforced by the cooperator; and

□(C) the on-site visits to be made by the Secretary, when feasible, to verify that volunteers are performing the volunteer services and the cooperator is providing the supervision agreed upon. □

(2) ADDITIONAL REQUIREMENT. □ Not later than 2 years after the date of the enactment of this Act, the Secretary shall adopt regulations implementing this section. These regulations shall ensure that the financial risk from claims or liability associated with volunteers undertaking trail maintenance is shared by all administrative units.

(e) Consultation. □ The Secretary shall develop the strategy in consultation with volunteer and partner trail maintenance organizations, a broad array of outdoor recreation stakeholders, and other relevant stakeholders.

(f) Volunteer and Partnership Coordination. □ The Secretary shall require each administrative unit to develop a volunteer and partner coordination implementation plan for the strategy which clearly defines roles and responsibilities for the administrative unit and district staff, and includes strategies to ensure sufficient coordination, assistance, and support for volunteers and partners to improve trail maintenance.

(g) Report. □

- (1) CONTENTS. □ The Secretary shall prepare a report on □
- (A) the effectiveness of the strategy in addressing the trail maintenance backlog;
  - (B) the increase in volunteerism and partnership efforts on trail maintenance as a result of the strategy;
  - (C) the miles of National Forest System trails maintained by volunteers and partners, and the approximate value of the volunteer and partnership efforts;
  - (D) the status of the stewardship credits for outfitters and guides pilot program described in section 7 that includes the number of participating sites, total amount of the credits offered, estimated value of trail maintenance performed, and suggestions for revising the program; and
  - (E) recommendations for further increasing volunteerism and partnerships in trail maintenance.
- (2) SUBMISSION. □ Not later than 3 years after the date of enactment of this Act, the Secretary shall submit the report required by paragraph (1) to □
- (A) the Committee on Agriculture, Nutrition, and Forestry and the Committee on Energy and Natural Resources of the Senate; and
  - (B) the Committee on Agriculture and the Committee on Natural Resources of the House of Representatives.

## SEC. 5. PRIORITY TRAIL MAINTENANCE PROGRAM.

- (a) Selection. □ In accordance with subsections (b) and (c), not later than 6 months after the date of the enactment of this Act, the Secretary of Agriculture shall select no fewer than 9 and no more than 15 priority areas for increased trail maintenance accomplishments.
- (b) Criteria. □ Priority areas shall include a well-defined region on National Forest System land where the lack of trail maintenance has □
- (1) reduced access to public land;
  - (2) led to an increase, or risk of increase, in harm to natural resources;
  - (3) jeopardized public safety;
  - (4) resulted in trails being impassible by the intended managed users; or
  - (5) increased future deferred trail maintenance costs.
- (c) Requirements. □ In selecting priority areas, the Secretary shall □
- (1) consider any public input on priority areas received within 3 months of the date of enactment of this Act;
  - (2) consider the range of trail users (including motorized and non-motorized trail users); and

(3) include at least one priority area in each region of the United States Forest Service.

(d) Increased Trail Maintenance.

(1) IN GENERAL.  Within 6 months of the selection of priority areas under subsection (a), and in accordance with paragraph (2), the Secretary shall develop an approach to substantially increase trail maintenance accomplishments within each priority area.

(2) CONTENTS.  In developing the approach under paragraph (1), the Secretary shall

(A) consider any public input on trail maintenance priorities and needs within any priority area;

(B) consider the costs and benefits of increased trail maintenance within each priority area; and

(C) incorporate partners and volunteers in the trail maintenance.

(3) REQUIRED TRAIL MAINTENANCE.  Utilizing the approach developed under paragraph (1), the Secretary shall substantially increase trail maintenance within each priority area.

(e) Coordination.  The regional volunteer and partnership coordinators may be responsible for assisting partner organizations in developing and implementing volunteer and partnership projects to increase trail maintenance within priority areas.

(f) Revision.  The Secretary shall periodically review the priority areas to determine whether revisions are necessary and may revise the priority areas, including the selection of new priority areas or removal of existing priority areas, at his sole discretion.

## SEC. 6. COOPERATIVE AGREEMENTS.

(a) In General.  The Secretary may enter into a cooperative agreement with any State, tribal, local governmental, and private entity to carry out this Act.

(b) Contents.  Cooperative agreements authorized under this section may

(1) improve trail maintenance in a priority area;

(2) implement the strategy; or

(3) advance trail maintenance in a manner deemed appropriate by the Secretary.

## SEC. 7. STEWARDSHIP CREDITS FOR OUTFITTERS AND GUIDES.

(a) Pilot Program.  Within 1 year after the date of enactment of this Act, in accordance with this section, the Secretary shall establish a pilot program on not less than 20 administrative units to offset all or part of the land use fee for an outfitting and guiding permit by the cost of the work performed by the permit holder to construct, improve, or maintain National Forest System trails, trailheads, or developed sites that support public use under terms established by the Secretary.

(b) Additional Requirements. In establishing the pilot program authorized by subsection (a), the Secretary shall

(1) select administrative units where the pilot program will improve trail maintenance; and

(2) establish appropriate terms and conditions, including meeting National Quality Standards for Trails and the Trail Management Objectives identified for the trail.

## Sec. 404. NATIONAL FOREST SMALL TRACTS ACT AMENDMENTS OF 2016

### SEC.1 . ADDITIONAL AUTHORITY FOR SALE OR EXCHANGE OF SMALL PARCELS OF NATIONAL FOREST SYSTEM LAND.

(a) Increase in Maximum Value of Small Parcels.--Section 3 of Public Law 97-465 (commonly known as the "Small Tract Act of 1983") (16 U.S.C. 521e) is amended in the matter preceding paragraph (1) by striking "\$150,000" and inserting "\$500,000".

(b) Additional Conveyance Purposes.--Section 3 of Public Law 97-465 (16 U.S.C. 521e) (as amended by subsection (a)) is amended--

(1) in paragraph (2), by striking "or" and inserting a semicolon;

(2) in paragraph (3), by striking the period at the end and inserting a semicolon; and

(3) by adding at the end the following:

(4) parcels of 40 acres or less that are determined by the Secretary--

(A) to be physically isolated from other National Forest System or public lands; or

(B) to have lost National Forest character;

(5) parcels of 10 acres or less that are not eligible for conveyance under paragraph (2) but are encroached on by a permanent habitable improvement for which there is no evidence that the encroachment was intentional or negligent; or

(6) parcels used as a cemetery, a landfill, or a sewage treatment plant under a special use authorization issued by the Secretary."

(c) Disposition of Proceeds.--Section 2 of Public Law 97-465 (16 U.S.C. 521d) is amended--

(1) in the matter preceding paragraph (1), by striking

"The Secretary is authorized" and inserting the following:

(a) Conveyance Authority; Consideration.--The Secretary is authorized";

(2) in paragraph (2), in the second sentence, by striking

□□The Secretary shall insert" and inserting the following:

□□(b) Inclusion of Terms, Covenants, Conditions, and Reservations.--

□□(1) In general.--The Secretary shall insert";

(3) in subsection (b) (as so designated)--

(A) by striking "covenants" and inserting "covenants"; and

(B) in the second sentence by striking "The preceding sentence shall not" and inserting the following:

□□(2) Limitation.--Paragraph (1) shall not"; and

(4) by adding at the end the following:

□□(c) Disposition of Proceeds.--

□□(1) Deposit in sisk fund.--The net proceeds derived from any sale or exchange conducted under paragraph (4), (5), or (6) of section 3 shall be deposited in the fund established under Public Law 90-171 (commonly known as the 'Sisk Act') (16 U.S.C. 484a).

□□(2) Use.--Amounts deposited under paragraph (1) shall be available to the Secretary until expended, without further appropriation, for □

□□(A) the acquisition of land or interests in land for the National Forest System in the State from which the amounts were derived; or

□□(B) the reimbursement of the Secretary for costs incurred in preparing a sale conducted under the authority of section 3 if the sale is a competitive sale."

Hi Adrienne,

We're expecting these two amendments. Can you send me something that explains the Simpson BLM 2.0?

Thanks,

Rita

**AMENDMENT TO INTERIOR & ENVIRONMENT  
APPROPRIATIONS  
OFFERED BY MR. SIMPSON OF IDAHO**

At the end of the bill (before the short title), insert the following new section:

1           BLM PLANNING 2.0 RULEMAKING ON LAND USE

2                           PLANNING PROCEDURES

3           SEC. 4       . None of the funds made available by this  
4 Act may be used to promulgate, implement, administer,  
5 or enforce the rule published by the Bureau of Land Man-  
6 agement in the Federal Register on February 25, 2016  
7 (81 Fed. Reg. 9673 et seq.; Fed. Reg. Doc. No. 2016-  
8 03232), to amend subparts 1601 and 1610 of title 43,  
9 Code of Federal Regulations, which establish the proce-  
10 dures used to prepare, revise, or amend land use plans  
11 pursuant to the Federal Land Policy and Management Act  
12 of 1976 (43 U.S.C. 1701 et seq.), until the Secretary of  
13 the Interior provides an additional 90-day period for pub-  
14 lic comments on the proposed rule and holds at least one  
15 more public meeting on the proposed rule in each of the  
16 eleven contiguous Western States (as defined in section

1 103(o) of such Act (43 U.S.C. 1702(o)), Texas. and  
2 Oklahoma.

**AMENDMENT TO H.R.           , AS REPORTED**  
**(INTERIOR APPROPRIATIONS BILL)**  
**OFFERED BY MR. STEWART OF UTAH**

At the end of the bill (before the short title), insert the following:

1           SEC.           . None of the funds made available by this  
2 Act may be used to make a Presidential declaration by  
3 public proclamation of a national monument under chap-  
4 ter 3203 of title 54, United States Code in the counties  
5 of Coconino, Maricopa, Mohave and Yavapai in the State  
6 of Arizona, in the counties of Modoc and Siskiyou in the  
7 State of California, in the counties of Chaffee, Conejos,  
8 Dolores, Moffat, Montezuma, and Park in the State of  
9 Colorado, in the counties of Clark, Lincoln, and Nye in  
10 the State of Nevada, in the county of Otero in the State  
11 of New Mexico, in the counties of Jackson, Josephine, and  
12 Malheur in the State of Oregon, in the counties of Carbon,  
13 Duchesne, Emery, Garfield, Kane, San Juan, Uintah, and  
14 Wayne in the State of Utah, or in the county of Penobscot  
15 in the State of Maine.

**Subject:** Re: Sage Grouse

Jocelyn,

Hope you don't mind if I send these as they come in. Please let me know if you want me to consolidate.

If you don't already have the SAP from the NDAA bill it is attached and the Sage Grouse related language is copied here.

### **Impairment of Endangered Species Act (ESA) Conservation and Public Land**

**Management:** The Administration strongly objects to sections 2864 and 2865, which undermine State and Federal cooperative efforts to protect the Greater Sage Grouse and Lesser Prairie Chicken, as well as Section 2866, which removes the American Burying Beetle from the Endangered Species List. Section 2864 would effectively override longstanding principles of major Federal land management statutes, including the Federal Land Policy and Management Act and the National Forest Management Act. Congressionally-mandated removal from the Endangered Species List, delays in determining species status, and State control over Federal public lands undermine the science-based decision-making at the core of the ESA, are unnecessary for military readiness, and are ill-advised for purposes of public land management. These provisions are non-germane to the NDAA, would impair the protection afforded by the ESA, and undermine years of collaborative conservation work with private landowners, States, and other stakeholders.

On Tue, Jun 14, 2016 at 11:05 AM, Hunn, Jocelyn Detailee <[Jocelyn.Hunn@mail.house.gov](mailto:Jocelyn.Hunn@mail.house.gov)> wrote:

Good Morning,

We are hearing rumors that there may be a sage grouse amendment offered that mirrors the sage grouse provision in the NDAA. Do you have anything official from the Department of Defense-letter, etc. which clearly states that DOD does not anticipate any adverse impacts from the BLM and USFS land use plans?

Can you also document that the Secretary of Defense has never requested an exemption for any DOD actions from the requirements of the ESA?

Sorry for the short turn around, but I will need this as soon as possible.

Thank you,  
Jocelyn
