- Cruz amendment to establish a spending-neutral reserve fund to eliminate all criminal penalties for offenses established by agency regulations. (#974)
- Moran amendment to establish a deficit-neutral reserve fund relating to maintaining military personnel levels at military installations that are the least costly to the Federal Government to operate. (#975)
- Moran amendment to establish a deficit-neutral reserve fund relating to ensuring the Dietary Guidelines for Americans are based on sound nutrition science. (#976)
- Menendez amendment to establish a deficit-neutral reserve fund to strengthen democratic governance, citizen security, and economic growth in Central America. (#977)
- Menendez amendment to create a point of order against legislation that would provide funding relating to establishing a United States Embassy in Havana, Cuba until the Government of Cuba ceases providing sanctuary to terrorists and American fugitives. (#978)

- Sanders amendment to establish a deficit-neutral reserve fund relating to substantially increasing overtime protections for middle class workers. (#979)
- Sanders amendment to establish a deficit-neutral reserve fund relating to protecting the promised pension benefits of retirees in multiemployer pension plans. (#980)
- Brown amendment to establish a deficit-neutral reserve fund to waive coinsurance under Medicare for colorectal cancer screening tests regardless of whether therapeutic intervention is required during the screening. (#981)
- Casey amendment to establish a deficit-neutral reserve fund to provide flexibility to States to improve access and quality and delivery of care while protecting the guarantee of the Medicaid program. (#982)
- Sanders amendment to establish a deficit-neutral reserve fund relating to supporting programs that keep low-income older individuals healthy and able to live at home, such as those programs funded through the Older Americans Act of 1965. (#983)
- Hatch amendment to establish a deficit-neutral reserve fund relating to ensuring that patients, including military members and veterans, have access to new antibacterial drugs that treat serious or life-threatening infections through the creations by the Food and Drug Administration of a limited population approval pathway for antibacterial drugs. (#984)
- Risch amendment to establish a deficit-neutral reserve fund relating to extending the authorization of the State Trade and Export Promotion Program of the Small Business Administration. (#985)
- Reed amendment to establish a deficit-neutral reserve fund relating to reforming student loan programs, which may include risk-sharing by institutions of higher education. (#986)
- Casey amendment to establish a deficit-neutral reserve fund relating to supporting the National Guard Counterdrug Program. (#987)
- Franken amendment to establish a deficit-neutral reserve fund relating to bolstering the resilience of communities and industries in the United States against the impacts of a changing climate. (#988)
- Coons second-degree amendment to Coons amendment #337, to modify the amendment. (#989)
- Coons amendment to establish a deficit-neutral reserve fund relating to the impacts of climate change on critical infrastructure systems. (#990)
- **Warner amendment to restore program integrity funding to combat waste, fraud, and abuse. (#991)**
- Paul amendment to provide an offset for additional funds for overseas contingency operations. (#992)
- **Menendez amendment to establish a deficit-neutral reserve fund relating to strengthening the national do-not-call registry. (#993)**

- Brown amendment to establish a deficit-neutral reserve fund to end “too big to fail” bailouts for bailouts for Wall Street mega-banks (over \$500 billion in total assets). (#994)
- Hatch amendment to provide for individual, business, and international tax reform that is pro-growth, fair, simple, and permanent, that enhances competitiveness, that promotes savings and investment, that strengthens domestic job creation and wage growth and that is revenue neutral. (#995)
- Cotton amendment to establish a deficit-neutral reserve fund relating to prohibiting funding for flights over the continental United States or Europe by the Russian Federation under the Treaty on Open Skies using digital electro-optical sensors. (#996)
- Enzi amendment to make a technical correction. (#997)
- Enzi amendment to make a technical correction. (#998)
- Enzi amendment to make a technical correction. (#999)
- Enzi amendment to make a technical correction. (#1000)
- Menendez amendment to create a point of order against legislation that would provide funding relating to assistance for trade promotion for Cuba until the Government of Cuba is in compliance with International Labor Organization standards. (#1001)
- Cantwell amendment to establish a deficit-neutral reserve fund relating to the National Park Service Centennial. (#1002)
- Tester amendment to establish a deficit-neutral reserve fund relating to authorizing children who are eligible to receive health care furnished under laws administered by the Secretary of Veterans Affairs to retain such eligibility until age 26. (#1003)
- Murphy amendment to establish a deficit-neutral reserve fund relating to increasing funding for the processing of permits for additive gas transmission capacity in supply-constrained areas. (#1004)
- Murphy amendment to establish a deficit-neutral reserve fund relating to expanding United States counter-propaganda communications to combat misinformation from the Russian Federation or terrorist groups like ISIS and al Qaeda. (#1005)
- Murphy amendment to establish a deficit-neutral reserve fund relating to additional United States support for the most severe global humanitarian emergencies in Iraq, Syria, Central African Republic, and South Sudan. (#1006)
- Murphy amendment to establish a deficit-neutral reserve fund relating to improving the stability of Ukraine by increasing funding for economic and other nonmilitary support, including energy security, loan guarantees, civil society, humanitarian aid, anti-corruption efforts, and strengthening democratic institutions and governance. (#1007)
- Murphy amendment to establish a deficit-neutral reserve fund relating to encouraging Federal agencies not to waive the requirements of the Buy American Act the Berry Amendment, or the

Buy America Act. (#1008)

- Schumer amendment to establish a deficit-neutral reserve fund relating to background checks for individuals purchasing firearms on the Internet. (#1009)
- Schumer amendment to establish a deficit-neutral reserve fund relating to background checks for individuals purchasing firearms. (#1010)
- **Sullivan amendment to establish a deficit-neutral reserve fund relating to providing an exemption from certain permitting requirements for routine maintenance activities relating to transportation infrastructure. (#1011)**
- **Sullivan amendment to strike more than \$1.2 trillion in cuts to Medicaid, preserving a critical source of comprehensive, affordable health and long-term care coverage for millions of otherwise uninsured low-income adults, parents, and seniors, including millions of non-elderly low-income adults in States that expand Medicaid as part of health reform. (#1012)**
- Heinrich amendment to establish a deficit-neutral reserve fund relating to strengthening the economy by accelerating the transfer of technologies from laboratories of the Department of Energy and the Department of Defense to the marketplace. (#1013)
- Bennet amendment to establish a deficit-neutral reserve fund relating to responding to the economic and national security threats posed by human-induced climate change, as highlighted by the Secretary of Defense, the Director of National Intelligence, the Administrator of the National Aeronautics and Space Administration, and the Administrator of National Oceanic and Atmospheric Administration. (#1014)
- Bennet amendment to establish a deficit-neutral reserve fund relating to limiting the amount of time spent on testing. (#1015)
- Scott amendment to establish offshore leasing and energy production in area of the outer Continental Shelf off the coast of the States of South Carolina, Virginia, North Carolina, and Georgia, and to provide those States 37.5 percent of qualified revenues from the energy production. (#1016)
- Hatch amendment to establish a deficit-neutral reserve fund relating to H-1B visas. (#1017)
- Sasse amendment to establish a deficit-neutral reserve fund relating to enhancing the value of the adoption tax credit. (#1018)
- Barrasso amendment to ensure authorizing committees reauthorize programs annually. (#1019)
- Barrasso amendment to establish a deficit-neutral reserve fund relating to relieving small businesses of the regulatory and financial burdens created by the Patient Protection and Affordable Care Act, which are causing fewer employment opportunities for working Americans. (#1020)
- Schatz amendment to establish a deficit-neutral reserve fund relating to taking action to solve human-caused climate change, which is real, urgent, happening now, solvable, and which needs United States leadership to get all countries to do their fair share to reduce pollution. (#1021)

- Schatz amendment to establish a deficit-neutral reserve fund relating to protecting Americans from foreign pollution. (#1022)
- Schatz amendment to establish a deficit-neutral reserve fund relating to expanding access to mental health services for rural veterans, including through telemedicine. (#1023)
- **Heinrich amendment to create a point of order against legislation that would provide for the sale of Federal land to reduce the Federal deficit. (#1024)**
- Hatch amendment to establish a deficit-neutral reserve fund relating to H-1B visas. (#1025)
- Murray amendment to establish a deficit-neutral reserve fund relating to transparency health premium billing. (#1026)
- Thune amendment to establish a deficit-neutral reserve fund to preserve and protect the open Internet in a manner that provides clear and certain rules and does not jeopardize public safety, universal service, privacy, accessibility, consumer protection, competition, innovation, or investment. (#1027)
- Vitter amendment to establish a deficit-neutral reserve fund relating to providing access to necessary equipment for Medicare beneficiaries. (#1028)
- Hatch amendment to establish a deficit-neutral reserve fund to prevent American jobs from being moved overseas by reducing the corporate income tax rate. (#1029)
- Hatch amendment to establish a deficit-neutral reserve fund relating to promoting innovation, expanding access to life-saving medications, and preserving choices for Medicare beneficiaries without creating a Government-run formulary. (#1030)
- Tester amendment to establish a deficit-neutral reserve fund relating to ensuring that the Director of the Bureau of Land Management has sufficient resources to promote sustainable sage-grouse populations and the conservation of sage-grouse habitat, including by collaborating with States and incorporating State plans, as feasible, to avoid the need to list the sage-grouse under the Endangered Species Act of 1973, and preserve the way of life in and economic health of the impacted areas. (#1031)
- Schatz amendment to establish a deficit-neutral reserve fund relating to promoting innovation and accountability to make college more affordable. (#1032)
- Booker-Graham amendment to establish a deficit-neutral reserve fund relating to the prioritization of broad-based criminal justice reform. (#1033)
- Sessions amendment to establish a deficit-neutral reserve fund relating to capping welfare benefits. (#1034)
- Sessions amendment to establish a deficit-neutral reserve fund relating to welfare legislation. (#1035)
- Heller amendment to establish a deficit-neutral reserve fund relating to ensuring that the Secretary of Transportation prioritizes the construction of projects that are of national and regional significance and projects in high priority corridors on the National Highway System,

which will improve the safe, secure, and efficient movement of people and goods through the United States and facilitate economic development and create jobs in the United States. (#1036)

- Cruz amendment to propose an alternative to section 302, relating to a deficit-neutral reserve fund to strengthen America's priorities. (#1037)
- Kirk amendment to establish a deficit-neutral reserve fund to increase wages for American workers. (#1038)
- Barrasso amendment to provide to the Indian Health Service an additional \$25,000,000 for contract support costs and to provide to the Bureau of Indian Affairs an additional \$26,000,000 for contract support costs. (#1039)
- Alexander amendment to establish a deficit-neutral reserve fund to prevent Medicaid spending from crowding out other State priorities, such as funding public higher education to prevent tuition increases, and to provide States the flexibility and budgetary certainty they need to serve their Medicaid beneficiaries with high quality health care at a lower cost. (#1040)
- Reed amendment to create a point of order against legislation that would cut vital programs. (#1041)
- Franken amendment to establish a deficit-neutral reserve fund relating to closing the carried interest loophole. (#1042)
- Schumer amendment to establish a deficit-neutral reserve fund relating to expanding and making permanent the American opportunity tax credit. (#1043)
- Cardin amendment to establish a deficit-neutral reserve fund relating to imposing sanctions with respect to foreign persons responsible for gross violations of internationally recognized human rights or significant acts of corruption. (#1044)
- Franken amendment to establish a deficit-neutral reserve fund relating to public-private partnerships for job training. (#1045)
- Tester amendment to establish a deficit-neutral reserve fund relating to ensuring that the Director of the Bureau of Land Management has sufficient resources to promote sustainable sage-grouse populations and the conservation of sage-grouse habitat, including by collaborating with States and incorporating State plans, as feasible, to avoid the need to list the sage-grouse under the Endangered Species Act of 1973, and preserve the way of life in and economic health of the impacted areas. (#1046)
- Kaine amendment to provide for sequestration replacement. (#1047)
- Murphy amendment to establish a deficit-neutral reserve fund relating to insurance protections for individuals with pre-existing conditions. (#1048)
- Murphy amendment to express support of positive development in our nation's health care system. (#1049)
- Whitehouse amendment to ensure high-earners pay a fair share in taxes and to use the revenue to invest in repairing our Nation's bridges, coastal infrastructure, and damage from wildfires.

(#1050)

- Heitkamp amendment to establish a deficit-neutral reserve fund relating to maintaining reliable, affordable, and redundant baseload power, encouraging technological innovation and manufacturing, providing a diverse energy portfolio, and significantly reducing carbon emissions through research, development, and implementation of advanced clean-coal technologies. (#1051)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to the promotion of cost-saving alternatives to detention for immigrant families and children. (#1052)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to the promotion of cost-saving alternatives to detention for immigrant families and children. (#1053)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to the promotion of cost-saving alternatives to detention for immigrant families and children. (#1054)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to the promotion of cost-saving alternatives to detention for immigrant families and children. (#1055)
- Warner amendment to establish a deficit-neutral reserve fund to promote wireless innovation. (#1056)
- Nelson amendment to express the sense of the Senate regarding the continued strength of Medicare Advantage. (#1057)
- Hatch amendment to establish a deficit-neutral reserve fund relating to measures that ensure that United States manufacturers can compete fairly with foreign manufacturers. (#1058)
- Hatch amendment to establish a deficit-neutral reserve fund to strengthen the role of Congress and the ability of the Department of the Treasury to respond to fundamentally misaligned currencies. (#1059)
- Coats amendment to decrease funding for the National Labor Relations Board by \$27,400,000 per year, a 10 percent cut, to better reflect the workload of the Board. (#1060)
- Murphy amendment to establish a deficit-neutral reserve fund for additional prosecutors to prosecute firearms offenses. (#1061)
- Brown amendment to prevent accounting gimmicks from artificially increasing the cost of loan programs for first-time home-buyers, veterans, students loans, and rural utilities. (#1062)
- Schatz-Murray amendment to establish a deficit-neutral reserve fund relating to ensuring all legally married same-sex spouses have equal access to the Social Security benefits they have earned and receive equal treatment under the law pursuant to the Constitution of the United States. (#1063)
- Portman amendment to establish a deficit-neutral reserve fund relating to reauthorization of the Tropical Forest Conservation Act of 1998. (#1064)
- Kirk amendment to establish a deficit-neutral reserve fund to create savings to the Medicare

program and protect senior citizens' identity. (#1065)

- Tester amendment to establish a deficit-neutral reserve fund relating to provision of payment of dependency and indemnity compensation or death pension upon the death of a veteran to reduce needless financial hardships suffered by families of such veterans during their time of grief. (#1066)
- Warren amendment to establish a deficit-neutral reserve fund related to supporting at-sea and dockside monitoring for fisheries that have received economic disaster assistance. (#1067)
- Nelson amendment to establish a deficit-neutral reserve fund to encourage States to expand Medicaid under the Affordable Care Act, thereby reducing the uninsured population, including among women and rural Americans; increasing payments to health care providers and hospitals; and increasing economic and job growth. (#1068)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to keeping guns out of the hands of domestic abusers. (#1069)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to protection of workers and consumers from corporate malfeasance. (#1070)
- Blumenthal amendment to establish a deficit-neutral reserve fund relating to denying tax benefits to firearms dealers who endanger the public. (#1071)
- Stabenow amendment to provide additional resources to reject the Senate Republicans' proposed \$435 billion in cuts to Medicare. (#1072)
- Lee amendment to establish a deficit-neutral reserve fund relating to the investigation and recovery of missing weapons and military equipment provided to the Government of Yemen by the United States Government. (#1073)
- Hatch amendment to establish a deficit-neutral reserve fund to assess the impact on higher education access of the Department of Education's gainful employment rule, which could include requiring the Secretary of Education to determine how different types of institutions are being affected. (#1074)
- Hatch amendment to establish a deficit-neutral reserve fund relating to encouraging the recruitment, preparation, and retention of highly effective teachers. (#1075)
- Cruz amendment to establish a spending-neutral reserve fund relating to promoting freedom and economic growth on the Internet. (#1076)
- Donnelly amendment to establish a deficit-neutral reserve fund relating to mental health and suicide prevention programs for members of the Armed Forces and veterans. (#1077)
- Murray amendment to establish a deficit-neutral reserve fund to protect health care from corporate interference and ensure that employers that provide health benefits, including contraception coverage, to any of their employees or the covered dependents of such employees entitles by Federal law, including the Patient Protection and Affordable Care Act, to receive such coverage. (#1078)

- Reed amendment to establish a deficit-neutral reserve fund relating to improving government settlement transparency. (#1079)
- Cardin amendment to establish a deficit-neutral reserve fund relating to provide resources for SBA resource partners to assist small business with regulatory compliance. (#1080)

The Honorable Kevin Washburn  
Assistant Secretary - Indian Affairs  
U.S. Department of the Interior  
MS-3642-MIB  
1849 C Street, NW  
Washington, DC 20240

Dear Assistant Secretary Washburn:

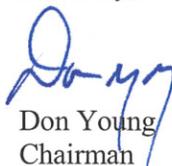

Thank you for appearing before the Subcommittee on Indian, Insular, and Alaska Native Affairs oversight hearing on Wednesday, March 18, 2015, to present testimony on *"Funding Priorities for and the United States' Responsibilities concerning Indians, Alaska Natives, and Insular Areas in the President's FY 2016 Budget Request for the Bureau of Indian Affairs, Indian Health Service, Office of Insular Affairs, and Office of the Special Trustee for American Indians."*

Your testimony regarding the spending priorities of the Bureau of Indian Affairs assisted the Committee in considering a greater array of the issues concerning the President's overall FY2016 budget proposal and I appreciate the effort you took to prepare and present your valued statement. While many questions were asked during the hearing, the Committee has additional questions, attached, for your reply.

Please forward your responses to Mr. Marc Alberts, Clerk, Subcommittee on Indian, Insular, and Alaska Native Affairs, at [Marc.Alberts@mail.house.gov](mailto:Marc.Alberts@mail.house.gov), by no later than Thursday, April 16, 2015.

Once again, thank you for your participation in making this a valuable hearing.

Sincerely,

Don Young  
Chairman  
Subcommittee on Indian, Insular,  
and Alaska Native Affairs

**1324 Longworth House Office Building**  
**March 18, 2015**  
**2:00 p.m.**

**AGENDA**

Oversight Hearing on:

*“Funding Priorities for and the United States’ Responsibilities concerning Indians, Alaska Natives, and Insular Areas in the President’s FY 2016 Budget Request for the Bureau of Indian Affairs, Indian Health Service, Office of Insular Affairs, and Office of the Special Trustee for American Indians.”*

**Questions from the Honorable Don Young, Chairman**

PANEL I: Assistant Secretary Kevin Washburn—Indian Affairs

1. Pursuant to the *Indian Employment, Training, and Related Services Demonstration Act of 1992*<sup>1</sup>, as amended, the Secretary of the Interior, in consultation with the Secretary of Labor, is required to maintain and publish a report, not less than biennially, “on the population, by gender, eligible for the services which the Secretary provides to Indian people”. This has become commonly known as the “American Indian Population and Labor Force Report.” The most recent report, the “2013 American Indian Population and Labor Force Report,” was released on January 16, 2014. This report contained data from 2010.

**Question:** What is the unemployment rate in Indian Country, or put another way, what is the unemployment rate of Indians who live in reservation communities? Has unemployment improved since 2009 and if so, by how much?

**Question:** Can Congress expect to have future Labor Force Reports on time?

2. Given the Bureau of Indian Affairs forestry involvement in all tribal trust mismanagement settlements, which now total more than \$2.5 billion, and the repeated findings of independent reviews that Bureau of Indian Affairs Forestry's per-acre funding remains at only one third of the US Forest Service—

---

<sup>1</sup> 25 U.S.C. § 3401

**Question:** Do you believe that a \$4 million increase in Bureau of Indian Affairs' "Forestry Projects" is sufficient to stave off future trust mismanagement lawsuits?

**Question:** What is the Department doing to ensure that twenty years from now, taxpayers won't be liable for another large payout due to the Department of the Interior's mismanagement of this and other trust resources?

3. The Administration recently published a hydraulic fracturing, or fracking, regulation rule<sup>2</sup>, which placed Indian Country lands under the jurisdiction of the Bureau of Land Management. The Department of the Interior has long asserted that the Act of March 3, 1909, the Indian Mineral Leasing Act of 1938, and the Indian Mineral Development Act of 1982 require Indian lands to receive the "same protections" as public lands.

Some tribes have voiced opposition to this analysis and have loudly stated that Indian lands should not be treated like public lands.

**Question:** In your opinion, does the Bureau of Indian Affairs believe that Indian lands should be treated like public lands? Please explain.

**Question:** Does the Bureau of Indian Affairs believe that Indian lands should have their own set of standards?

4. **Question:** Can you provide details about the usage and default rates of the Bureau of Indian Affairs loan guarantee program for the last six years. In particular, could you detail the size of the funds, the amount of loan guarantees provided over \$5 million, and the default rates of all loan guarantees?

**Follow-up Question:** Can you detail how many guaranteed loans and their amounts have been paid by the Bureau of Indian Affairs as the result of defaults or other circumstances since 2009?

<sup>1</sup> 25 U.S.C. §3401

**question** Do you believe that a \$4 million increase in Bureau of Indian Affairs Forestry Projects is sufficient to stave off future trust mismanagement lawsuits?

**question** What is the Department doing to ensure that twenty years from now, taxpayers won't be liable for another large payout due to the Department of the Interior's mismanagement of this and other trust resources?

3. The Administration recently published a hydraulic fracturing, or fracking, regulation rule<sup>2</sup>, which placed Indian Country lands under the jurisdiction of the Bureau of Land Management. The Department of the Interior has long asserted that the Act of March 3, 1909, the Indian Mineral Leasing Act of 1938, and the Indian Mineral Development Act of 1982 require Indian lands to receive the "same protections" as public lands.

Some tribes have voiced opposition to this analysis and have loudly stated that Indian lands should not be treated like public lands.

**question:** In your opinion, does the Bureau of Indian Affairs believe that Indian lands should be treated like public lands? Please explain.

**question:** Does the Bureau of Indian Affairs believe that Indian lands should have their own set of standards?

4. **question:** Can you provide details about the usage and default rates of the Bureau of Indian Affairs loan guarantee program for the last six years. In particular, could you detail the size of the funds, the amount of loan guarantees provided over \$5 million, and the default rates of all loan guarantees?

**Follow-up question:** Can you detail how many guaranteed loans and their amounts have been paid by the Bureau of Indian Affairs as the result of defaults or other circumstances since 2009?

Field Oversight Hearing, Crow Agency, MT  
Empowering Indian Country: Coal, Jobs, and Self-Determination  
April 8, 2015

Statement of  
**Eric Conrad Henson**

Senior Vice President  
Compass Lexecon

and

Research Affiliate  
The Harvard Project on American Indian Economic Development

---

I would like to take a moment to thank you for the opportunity to visit the land of the Apsáalooke and to speak today. My name is Eric Henson, and I am a Senior Vice President at Compass Lexecon, which is an economics consulting firm with offices located around the world.<sup>1</sup> I primarily work out of the Compass Lexecon offices in Boston, MA and Tucson, AZ. I also serve as a Research Affiliate with the Harvard Project on American Indian Economic Development,<sup>2</sup> and in that position I am engaged in an ongoing effort to understand what makes tribal economies work best.<sup>3</sup> I am a citizen of the Chickasaw Nation, and I grew up in one of the country's great oil producing regions, the Permian Basin of West Texas.<sup>4</sup>

---

<sup>1</sup> Compass Lexecon is an international economics consulting firm and is part of FTI Consulting.

<sup>2</sup> Referred to herein as "HPAIED" or "Harvard Project." The Harvard Project is based at Harvard's John F. Kennedy School of Government in Cambridge, MA. We partner with the Native Nations Institute, which is located at the University of Arizona in Tucson, AZ. The Native Nations Institute provides executive education and leadership programs, uniquely tailored to senior executives and managers within the Native communities in Canada and the United States.

<sup>3</sup> See, e.g., The Harvard Project on American Indian Economic Development, *The State of the Native Nations: Conditions Under US Policies of Self-Determination*, New York: Oxford University Press, 2008.

<sup>4</sup> I appear today not as a representative of Compass Lexecon or Harvard University. Furthermore, I have no financial interest in legislation that might impact tax rates applicable to coal production on Indian lands.

I have a Master's Degree in Public Policy from the John F. Kennedy School of Government at Harvard University, an MA in Economics from Southern Methodist University, and a BBA in Business Economics from the University of Texas at San Antonio. I attended Harvard as the Kennedy School's Christian Johnson Native American Fellow. I have been engaged in Indian affairs since graduate school; my Master's thesis at Harvard examined the importance of a uniform commercial code for economic development on the Crow Reservation.<sup>5</sup> I've had the great privilege of visiting these tribal lands on several occasions.

### **THE HARVARD PROJECT ON AMERICAN INDIAN ECONOMIC DEVELOPMENT**

Since its inception in 1987, the Harvard Project has collaborated with Native Nations to understand how and why tribal economies, social institutions, and political systems either succeed or fail. At the Harvard Project, my colleagues and I undertake research and teaching specifically tailored to meet the needs of tribal communities and tribal leadership.

One of the major questions the Harvard Project has been grappling with is: How is it that, despite widely-cited poverty and social distress, which is prevalent across numerous American Indian reservations, more and more tribes have been able to cast off the bonds of external economic dependence? We have seen more and more tribes taking part in what we have often referred to as an "Indian Renaissance," where dynamic self-sustaining economies are created by tribal actions. These economies are built upon, and supported by, vibrant political and social institutions. The success stories are wide-ranging, from the property development and management of the Tulalip Tribes in Washington State, to sustained energy-based projects at Southern Ute, to the diverse array of professional and construction services offered by Ho Chunk, Inc. in Nebraska. Many tribes have begun actively challenging century-long economic paradigms and demonstrating effective self-determination and governance. It is curious that, contemporaneously, a number of other tribes experience continued economic hardship, high unemployment, rampant social and physical health challenges, and the like. What might be the causes of the striking economic and social divergences within Indian Country?

In the first years of HPAIED, the founding researchers recognized that what was needed in Indian Country was not additional unsolicited interference from outsiders, but culturally-specific educational programs and research, developed for tribes, and undertaken hand-in-hand with tribal governments. The results of these studies are channeled back to those who must deal with the daily challenges of improving the economies and social conditions in Native communities (i.e., Indian people working in Indian Country).

---

<sup>5</sup> A copy of my curriculum vitae is attached as Appendix A.

In accordance with the above-mentioned approach, graduate students at the Kennedy School of Government and at the Native Nations Institute, working in close coordination with tribes; have completed several hundred projects and field research reports, many of which were on matters specifically requested by the tribes. These field projects have ranged from welfare reform at the Navajo Nation to bison ranching at Cheyenne River, and from judicial reform at Hualapai to ski resort management for the White Mountain Apache. As part of our organization's mission, many of these reports are available on our website for all tribes to learn from.<sup>6</sup>

Another important facet of the Harvard Project's work is our *Honoring Nations* program. *Honoring Nations* is a competitive awards program that identifies, celebrates, and shares outstanding success stories in tribal governance. We honor tribes that exemplify successful tribal governance, and to date the Harvard Project has recognized tribal governmental programs ranging from the Eastern Band of Cherokee for their Tribal Sanitation Program (in 1999) to the Effective Law Enforcement Program of the Gila River Police Department (in 2003) to the Seniors Skilled Nursing Facility at the Tohono O'odham Hospice (in 2008). Since 1999, we have honored nearly 120 tribal governmental initiatives.<sup>7</sup> HPAIED remains committed to empowering Native Nations through identifying the common characteristics of tribes that are successfully charting a course towards a socially, culturally, politically, and economically healthy future.

## RESEARCH FINDINGS

Prior to the 1980s, there was a notable lack of research pertaining to economic development in Indian Country. The small amount that was available contained at least two consistent themes: First, the overriding focus of thinking and policymaking was on what the federal government could do to create jobs, raise income, and increase household wealth. This helped contribute to the unbalanced relationship between the Bureau of Indian Affairs, other federal programs, and the tribes, which often became dependent on federal funding and expertise.

Second, the federal policies and programs that did exist within Indian Country constituted what we refer to as a "Planner's Approach" to economic and community development. The Planner's Approach was simplistic in treating economic development as a fundamental question of resources and expertise, as opposed to one of incentives and institutions. Viewing the world

---

<sup>6</sup> See the Harvard Project website at <http://www.hpaied.org/>.

<sup>7</sup> For more examples, see "Honoring Nations: Directory of Honored Programs 1998-2010," *Honoring Nations Program*, The Harvard Project on American Indian Economic Development, at pages 9 and 11, at <http://hpaied.org/sites/default/files/documents/finalhndirectory.pdf>.

through the lens of the Planner's Approach, academics, government officials, and tribal leaders interpreted the underdevelopment seen on reservations as stemming from a lack of access to financial capital, technical skills, and managerial expertise. The Planner's Approach typically provided grants and loans in a well-intended effort to stimulate economic development. However, this heavy-handed approach was driven by federal budget allocations and has had a strong adverse impact on many Native communities. This approach created a world in which grant writers were always in short supply and tribal politics revolved around which elected officials could most effectively capture (or perhaps extract), funds from the federal government. Under the Planner's Approach, what was originally intended to be a solution to underdevelopment instead seems to have perpetuated it, degrading the core tenets of economic development into a series of rent-seeking behaviors.<sup>8</sup>

A fundamental flaw of the Planner's Approach was the erroneous assumption that a nation's economic development is a mechanical process that can be achieved by way of the imposition of a predetermined blueprint. While it is advisable and even advantageous to plan ahead, it is an exercise of hubris to think that one can "plan" an economy, in the sense of expecting tribal councils, national legislatures, or federal planners to correctly select a portfolio of businesses, projects, and activities that will not only survive, but will meet the needs of tribal citizens, and will thrive over time.<sup>9</sup>

The discussion above raises one obvious question: If one cannot "plan" an economy to arrive at productive and sustainable development, what is the alternative? While there is no predetermined blueprint for success, there are some general tenets for effective, long-term economic development, and these tenets are now being demonstrated by a large number of tribes in Indian Country. We have found that these tenets of sustainable development are applicable to developing nations the world over, and are being acted upon by many successful tribes in Indian Country. A discussion of these tenets is found below, and in contrast to the Planner's Approach,

---

<sup>8</sup> "Rent seeking" is a term from economics and occurs when an organization or individual(s) seeks to obtain economic gain from others without reciprocating in the form of further wealth creation.

<sup>9</sup> Consider the natural experiment of the German economies after World War II. The parts of former Germany subjected to market forces (i.e., West Germany) became a powerhouse of development in post-war Europe. The parts of the former Germany subjected to centralized planning (i.e., East Germany) stagnated and the citizenry had to be forcefully restrained from leaving for better opportunities elsewhere. For a discussion in the context of Indian Country, see, the Statement of Joseph P. Kalt, *Establishing a Tribal Development Corporation, Before the United States Senate Committee on Indian Affairs*, September 20, 2004 (hereinafter, "2004 Kalt Testimony"), noting that "Economic development is an organic process. In an environment in which opportunities are subject to the vicissitudes of competition and continually changing marketplace conditions, economic development occurs as the sum of small, adaptive decisions of myriad individuals who by luck or preparation are in the right place at the right time to take advantage of unplanned prospects. Economic development is much more analogous to tenacious plants looking for places to pop up and take root, than to an engineered system."

we refer to tribes that are building their communities under these principles as governments engaged in a “Nation Building” process.<sup>10</sup>

**Institutions Matter:** The nature of a society’s institutions, whether social, cultural, and/or governmental, determines the incentives around productive or unproductive activity. Within the scope of our research, the Harvard Project and the Native Nations Institute have consistently found that a tribe’s economic development is anemic, or worse, unless the tribe’s institutions personify at least three characteristics. The key attributes are:

- *A Rule of Law.* A respect for tribal law and the establishment of legitimate means for dispute resolution.
- *Separation of Politics from Day-to-Day Administration and Business Affairs.* Enterprises and economic transactions are free from societal politics and power struggles.
- *Efficient Bureaucracy.* Clarity of procedures, good record-keeping, efficient administration processes, reliable computer networks, and the like.

**Culture Matters:** Given the importance of institutions within a society, the social norms and worldview of the citizens that interact with those institutions also matter.<sup>11</sup> This lesson, observed repeatedly in our research with Native Nations, is an important tenet regarding economic development. The importance of local conditions and political willpower in building and promoting effective institutions as part of economic development cannot be understated.<sup>12</sup> Our research in Indian Country indicates that, for governing institutions to provide the foundation upon which sustained economic development can take place, there first must be a *cultural match*.

One can think of cultural match as the consonance between the structure of a society’s formal institutions of governance (and its economic development initiatives) and its underlying norms of political power and authority (i.e., culture).<sup>13</sup> In order to function effectively, a society’s institutions and corresponding economic development must be consistent with underlying cultural, political, and organizational norms. Simply put, they must be seen as legitimate in the eyes of the society’s citizenry.

---

<sup>10</sup> For more information on the Nation Building approach, see: The Harvard Project on American Indian Economic Development, *The State of the Native Nations: Conditions Under US Policies of Self-Determination*, New York: Oxford University Press, 2008, starting at page 26.

<sup>12</sup> 2004 Kalt Testimony at page 13.

<sup>13</sup> 2004 Kalt Testimony at page 14.

**Sovereignty Matters:** Self-determination is a key issue within Indian Country and its importance to economic development cannot be overlooked. There are four inseparable issues connecting sovereignty and self-determination to economic and community development within Indian Country. They are:

- *Design issues.* Without self-determination, it is impractical (and perhaps impossible) to change institutions so that they more closely match those of Native Nations and their unique economic needs.
- *Ownership issues.* Absent a strong sense of ownership, it is unquestionably difficult to get a local community involved and interested in how tribal economic investments pay off.
- *Accountability issues.* Linked closely with the concept of ownership, those making the investments and program decisions need to be held accountable for how all federal (and tribal) resources are used.
- *Leadership development issues.* There are an increasing number of astute, capable, highly experienced leaders emerging within Indian Country. This is demonstrated by tribes (and tribal leadership) taking charge of issues irrespective of historical (or concurrently existing) federal support.

After years of research, it has become clear that tribes must have autonomy in order to foster institutions that are a cultural match for their societies. Successful tribal governments all exhibit effective institutions paired with a cultural match. We have come to believe that this is why policies of sovereignty and self-determination have been the only strategy that has shown any prospect of breaking the patterns of poverty and dependence that became so familiar on reservations from the late 1800s until at least the 1990s. It is only logical that it requires self-rule for a culture to put in place institutions that are a cultural match. Thus, we can restate the uniform qualities that have marked successful economic development in Indian Country as aggressive assertions of sovereignty, resulting in self-governed institutions that are characterized by a cultural match. It has repeatedly been shown that, when a tribe takes control of its own institutions and runs them in congruence with its own culture, the result is a set of economic, social, and political systems that work for its citizens.<sup>14</sup> Continued dependence on the federal government for grants and guidance removes accountability for tribal leadership and undermines the processes necessary for stable and lasting economic development. The negative results of such dependence should not be surprising.

The core tenets of Nation Building, which are required for effective economic development, are directly related to the issues that bring us here today. Over the past couple of

decades, the Crow Nation has continued to push for increased autonomy and self-sufficiency and has made great strides in its efforts to build a sustainable economy. However, “the economic condition of the Crow is very poor. Jobs number few.”<sup>15</sup> The Crow’s efforts to play an active role in the regional economy by developing the tribe’s abundant natural resources have brought jobs and revenue into the tribal economy, and have also benefited Big Horn County and the State of Montana. Similarly, proposals to maintain, and potentially expand, mining operations stand to substantially benefit the Crow Nation, the County, and the State. As noted by Chairman Old Coyote, “There are vast resources that can be developed to improve economic conditions of the Crow.”<sup>16</sup> Harvard Project researchers, with support from the economics consulting firm where I work, recently undertook a study of coal mining on the Crow Reservation. Our study explicitly addressed the implications of continued/expanded mining for the Tribe, the County, and the State.<sup>17</sup> The complete study is attached as Appendix B (see below). I next summarize our findings and discuss the implications for economic development on the Crow Reservation.

## **ECONOMIC DEVELOPMENT AND COAL MINING ON THE CROW RESERVATION**

Great progress towards sustainable economic development has been made on the Crow Reservation in recent years. However, efforts to revitalize the tribal economy began from such a low base (in terms of very low income levels, high poverty and unemployment rates, alarming health indicators, etc.) that much still needs to be done. Consider a few basic statistics, illustrated in Figures 1 and 2. As shown in Figure 1, between 2006 and 2010, the annual per-capita income of American Indians living on the Crow Reservation was \$11,987 (compared to the US average of \$27,334; median household income showed a similar divergence). Figure 2 shows that during that same time period, when the national unemployment rate was approximately 8%, Crow unemployment hovered at about 32%.<sup>18</sup> Had we also included

<sup>16</sup> Dennis Zotigh, “Darrin N. Old Coyote, Chairman: the Smithsonian National Museum of the American Indian’s Meet Native America Series,” October 31, 2013, at <http://blog.nmai.si.edu/main/2013/10/darrin-n-old-coyote-crow-nation.html>.

<sup>17</sup> Professor Joseph P. Kalt, *The Mining of Crow Nation Coal: Economic Impact on the Crow Reservation, Big Horn County, and Montana*, The Harvard Project on American Indian Economic Development, February 4, 2014 (hereinafter, “2014 Kalt Report”).

<sup>18</sup> See, e.g., 2014 Kalt Report. According to the Montana Department of Labor & Industry, official unemployment on the Crow Reservation in 2012 was 25.1% (see Crow Nation, “Crow Reservation: Demographic and Economic Information,” at page 6, October 2013, at <http://lmi.mt.gov/media/9409/rf13-crow-web.pdf>). This was still dramatically higher than the United States, which had an average unemployment rate of 8% throughout 2012 (see the US Department of Labor, Bureau of Labor Statistics, “Labor Force Statistics from the Current Population Survey,” 2012, at <http://data.bls.gov/timeseries/LNS14000000>).

community members who had already given up searching for work, this unemployment rate would have been closer to 47%.<sup>19</sup> As noted above, per-capita income levels on the Crow Reservation are less than half that on the US average, and family poverty levels reflect this same shortfall: During the five-year time period used in our recent study of coal development, the family poverty rate for the Crow Nation averaged 24% which was more than twice that of the average for the United States. Sadly, the poverty rate among Crow children during the study period was even more pronounced: Childhood poverty rates are alarming all across America, but on the Crow Reservation we saw a 39% rate (compared to the 19% rate for the United States).<sup>20</sup>

It is striking that such socio-economic conditions were (and are) present on the Crow Reservation, despite the tribe's abundance of valuable and accessible natural resources. These include "approximately 1.2 million acres of grazing land, 150,000 acres of dryland farmland, 30,000 acres of irrigated farmland," and of course a substantial reserve of coal, estimated at 17 billion short tons.<sup>21</sup> We are meeting here today to discuss coal development, and by any measure, the potential resource base of the Crow is impressive; the recoverable coal reserves in the Crow Nation account for nearly 12% of those in Montana and more than 3% of those of the US as a whole.<sup>22</sup> These potential assets offer significant, unique, and potentially life-changing opportunities for individual Crow Indians and the entire Crow community. These opportunities should arise in the form of well-paying jobs, substantial royalty revenues to the tribe, and greater access to critical healthcare and social services, to name just a few. If the Crow Nation becomes unable to access these resources, then what is already a set of complex socio-economic challenges could easily degrade further.

---

<sup>19</sup> Statement of Darrin Old Coyote, Chairman, Crow Nation, *Mining in America: Powder River Basin Coal Mining the Benefits and Challenges, Before the House Committee on Natural Resources, Subcommittee on Energy and Mineral Resources*, 113<sup>th</sup> Congress 2013 (hereinafter, "2013 Old Coyote Testimony"), at page 3.

<sup>20</sup> The US Census, American Community Survey ("ACS") 5-year data were presented because the US Census typically provides the most complete and reliable data available. The ACS was utilized to ensure the accuracy and reliability of our study of coal development on the Crow Reservation. The ACS 5-year data for the years 2006-2010 were chosen because 2010 represents the last year that the necessary demographic information is available for American Indian or Alaskan Native residents on the Crow Reservation (and Off-Reservation Trust Land). More recent data (i.e., the ACS 5-year information for 2009-2013) show the combined demographic information of both American Indian or Alaskan Native residents and all other races residing in the area. According to these more recent data, combined unemployment on the Crow Reservation (and Off-Reservation Trust Land) was 29.2%, again dramatically higher than that of the US as a whole (which was 9.7%). Family poverty rates were similarly divergent, 22.1% on the Crow Reservation and trust lands compared to 11.3% in the US as a whole. As before, the child poverty rate on the Crow Reservation and trust lands was far too high, at 39.5% on the reservation, compared to 21.6% in the United States as a whole (see the US Census Bureau, 2009-2013 5-Year American Community Survey, at [http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?\\_afpt=table](http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?_afpt=table)).

<sup>21</sup> LAO Environmental, Inc., "Crow Indian Tribe: Resource Report," at pages 20 and 71, April 15, 2002, reported by the Bureau of Land Management, at [http://www.blm.gov/style/medialib/blm/mt/field\\_offices/miles\\_city/og\\_eis/crow.Par.79832.File.dat/minerals.pdf](http://www.blm.gov/style/medialib/blm/mt/field_offices/miles_city/og_eis/crow.Par.79832.File.dat/minerals.pdf).

<sup>22</sup> Montana's recoverable coal reserves are reported as 74.6 billion short tons and the total coal reserves in the United States are reported as 256.7 billion short tons (US Energy Information Administration, "US Coal Reserves with Data for 2012," December 16, 2013, at [www.eia.gov/coal/annual/pdf/table15.pdf](http://www.eia.gov/coal/annual/pdf/table15.pdf)).

As many already know, Westmoreland Coal Company has leased and operated the Absaloka Mine since the 1970s. The mine has been a significant part of the local economy ever since. In recent years, the Absaloka Mine alone has accounted for nearly two-thirds of the Crow Nation's non-federal budget; these are revenues that allow the tribe to pay for governmental salaries, provide social services, and to supplement federal funding to vital community programs such as Family Preservation, Tribal Elders, Head Start, and the Boys & Girls Club.<sup>23</sup>

Our 2014 study of coal on Crow lands evaluated the Absaloka Mine, and also assessed the potential economic value of the proposed Big Metal Project, an ongoing development initiative between the Crow Nation and Cloud Peak Energy ("Cloud Peak"). Our research found that in 2013, the average annual compensation and benefits for unionized Absaloka Mine workers exceeded \$91,000 per person.<sup>24</sup> We found that expansion of operations at the Absaloka Mine, and/or initiation of mining at Cloud Peak's Big Metal Project, would be expected to create an impact of similar magnitude.<sup>25</sup> However, the benefits of such development do not accrue only to the specific workers with jobs in the mining industry. We must bear in mind that the economic impacts of mining operations on Crow lands extend far beyond just those to the local community. Big Horn County, the State of Montana, and the United States federal government also receive considerable economic benefits from coal produced on the Crow Reservation.

Our estimate is that the combined contribution of continued operation of the Absaloka Mine, along with the potential mining operations of the Big Metal Project, could contribute more than \$370 million dollars annually to what is referred to as Gross Regional Product ("GRP").<sup>26</sup> Annual state and federal tax revenues from the projects are estimated to be approximately \$22.9 million and \$21.9 million respectively. The government of the Crow Nation would likely benefit

---

<sup>23</sup> Although the tribal budget is modest overall, services covered by the Crow Nation include important line items such as provision of supplemental money for staffing at the BIA-funded police department (see, e.g., Special Session of the Crow Tribal Legislature, *Approval of the Annual Budget for the Operation of the Crow Tribal Government and the Expenditure of Tribal Revenue for Fiscal Year 2012*, CLB 11-04, September 29, 2011, at [http://www.crowlaws.org/tribal\\_legislation\\_2002-present](http://www.crowlaws.org/tribal_legislation_2002-present), at page 3).

<sup>24</sup> Salary and benefits data were provided for the 2014 Kalt Report by Westmoreland. The average annual salary for the unionized workforce at the Absaloka Mine was \$56,264. Overtime and benefits, such as retirement funding and healthcare provision, brought the average annual compensation for all workers at the mine to \$91,408.

<sup>25</sup> Due to its operation of the Absaloka Mine, employment opportunities with Westmoreland have been of great importance to the Crow Nation's citizens; roughly 70% of the mine's workforce is associated with the Crow Tribe (2013 Old Coyote Testimony at page 3). The mine typically employs on the order of 100 to 125 Crow Nation citizens or affiliated individuals (see, "Daines introduces bipartisan legislation to encourage investment in Indian coal," *Sidney Herald*, June 7, 2014, and Statement of Scott Russell, Secretary, Crow Nation, *Tribal Development of Energy Resources and the Creation of Energy Jobs on Indian Lands, Before the House Committee on Natural Resources, Subcommittee on Indian and Alaska Native Affairs*, 112<sup>th</sup> Congress, April 1, 2011 (hereinafter, "2011 Russell Testimony"), at page 11).

<sup>26</sup> GDP is defined by the US Bureau of Economic Analysis as "the market value of goods and services produced by labor and property in the United States..." (See the BEA at [http://bea.gov/glossary/glossary\\_g.htm](http://bea.gov/glossary/glossary_g.htm)). GRP is similar to GDP, but it measures the total output of an economy within a specific region/area, rather than the national economy.

from as much as \$107 million in royalties and taxes each year (see Figure 3) in addition to \$3.75 million in initial option payments already received for the Big Metal Project. Such benefits, whether they be to the state, county, federal government, or tribal nation, could easily be lost if coal development and/or expansion at Crow is curtailed.

Research has noted that tribes that engage in the natural resource industries (such as the Crow Nation) are often overly and unjustly burdened by the current system. The Crow have been subjected to these burdens in multiple sectors of development. Consider, for a moment, an example from the oil and gas industry. In January 2005, the Crow Tribal Council approved an oil and gas lease on tribal lands,<sup>27</sup> but development of the resource was blocked until September 2007 due to the incomprehensibly slow review and approval process in place at the BIA.<sup>28</sup> Issues with the BIA persist: For example, the Crow Nation reports that BIA's records for surface and mineral ownership are repeatedly missing or out-of-date.<sup>29</sup> Bureaucratic inefficiencies, layers of regulatory oversight, near-complete lack of access to markets, higher-than-elsewhere permitting costs, and persistent infrastructure challenges create an environment of uncertainty and contribute to lackluster economic development.<sup>30</sup> In order to level the playing field for tribes, and allow them to overcome such hurdles to self-sufficiency, federal action can and should be taken at once.

One such action would be making the Indian Coal Production Tax Credit ("ICPTC") permanent. Those present today know that the ICPTC assists mining firms in absorbing part of the production cost for coal operations on reservation land. The potential economic benefits of the tax credit include positioning of tribal coal so that it is better able to compete in both national and international marketplaces. In addition, the tax credit provides an incentive which serves to promote expansion beyond current production levels on the Crow Reservation. However, this federal tax credit has heretofore been temporary, and has thus been consistently threatened. The temporary nature of this tax credit has contributed to instability in the limited number of tribal economies that rely on coal for their well-being. The uncertainty surrounding the tax regime applicable to coal production on tribal lands increases risk, and thus contributes to potential under-investment by mining firms operating within Indian Country (and, among those *considering* operations on tribal lands). Indeed, economics teaches that uncertainty around

<sup>28</sup> 2011 Russell Testimony at page 13.

<sup>29</sup> See, e.g., *On Improving Tribal-Corporate Relation in the Mining Sector: A White Paper on Strategies for Both Sides of the Table*, HPAIED, April 2014, at <http://hpaied.org/sites/default/files/documents/miningrelations.pdf>, at page 91.

<sup>30</sup> 2014 Kalt Report at page 2.

future tax rates can prevent firms from undertaking investments which cannot be reversed once they are made, and which pay off over long time horizons.

Although the ICPTC has (temporarily) provided a more level playing field for coal mining on the Crow Reservation, the tax credit alone is not sufficient to redress the bureaucratic impediments that stymie coal production on Native lands. An additional step that is critical for the Crow Nation to fully benefit from its coal resources would be securing equal access to expanded markets, both domestic and foreign.

Projected increases in international coal consumption highlights the importance of increasing access to foreign markets for coal produced on the Crow Reservation (as can be seen in Figure 4).<sup>31</sup> According to the US Energy Information Administration, global consumption of coal is expected to increase from 147 quadrillion Btu in 2010 to 220 quadrillion Btu in 2040 (i.e., a 50% increase),<sup>32</sup> while domestic consumption is expected to remain relatively flat.<sup>33</sup> The disparity between the projected growth of global and domestic consumption emphasizes the importance of providing Native Nations access to international markets. However, the importance of access to international markets is not only derived from projected global demand growth. As with any product, providers need to mitigate the risks associated with having only a limited customer base.

The Crow Nation has recently suffered the consequences of only being able to access a limited market. In November 2011, the Sherburne County Generating Station (“Sherco”) in Becker, Minnesota, suffered a turbine malfunction which caused a fire in Unit 3. This fire shut the unit down for nearly two years.<sup>34</sup> The Absaloka Mine was specifically developed to supply coal to the Sherco plant.<sup>35</sup> The temporary shutdown of the plant resulted in a loss of

<sup>32</sup> US Energy Information Administration, “International Energy Outlook 2013,” July 25, 2013, at [http://www.eia.gov/forecasts/ieo/pdf/0484\(2013\).pdf](http://www.eia.gov/forecasts/ieo/pdf/0484(2013).pdf), at page 67.

<sup>33</sup> US Energy Information Administration, “Annual Energy Report 2014: Early Release Overview,” at [http://www.eia.gov/forecasts/aeo/er/pdf/0383er\(2014\).pdf](http://www.eia.gov/forecasts/aeo/er/pdf/0383er(2014).pdf), at page 11. Consider the emerging economies of China and India. Coal consumption between those two countries has been projected to increase from 82 quadrillion Btu in 2010 to 144 quadrillion Btu in 2040, an increase of 76%. Compare this to the United States, which consumed 21 quadrillion Btu of coal in 2010 and is expected to remain at or below that level through 2040 (see Figure 5). The data cited here can be found at the US Energy Information Administration, “International Energy Outlook 2013,” July 25, 2013, at [http://www.eia.gov/forecasts/ieo/pdf/0484\(2013\).pdf](http://www.eia.gov/forecasts/ieo/pdf/0484(2013).pdf), at pages 68-69 and 71.

<sup>35</sup> Tom Lutey, “Soft Demand for Coal Ripples through Area Mines, Plants,” *Billings Gazette*, June 24, 2012, [http://billingsgazette.com/news/state-and-regional/montana/soft-demand-for-coal-ripples-through-area-mines-plants/article\\_ce7eb1fc-56e9-5a33-aa22-509c3f621ab9.html](http://billingsgazette.com/news/state-and-regional/montana/soft-demand-for-coal-ripples-through-area-mines-plants/article_ce7eb1fc-56e9-5a33-aa22-509c3f621ab9.html).

approximately 50% of the Absaloka Mine's coal sales in 2012.<sup>36</sup> The drop-off in demand for coal produced on the Crow Reservation was followed by a curtailment of the workforce at the mine, which hurt individual tribal employees of the mine, the tribal government, and the community.<sup>37</sup> This loss clearly highlights the risk the tribe faces to its budget as a direct result of the Absaloka Mine's limited access to a wide range of potential buyers.<sup>38</sup>

The proposed Big Metal Project will exacerbate the need for access to international markets for coal produced on the Crow Reservation. In early 2013, Cloud Peak announced an agreement with SSA Marine ("SSA") that provides an option to transport up to 17.6 million tons of coal through SSA's planned Gateway Pacific Terminal at Cherry Point ("Gateway Pacific").<sup>39</sup> Completion of the Gateway Pacific facility is subject to obtaining the required permits and estimates for commencement of commercial operations appear to target a start date no earlier than 2018.<sup>40</sup> If completed, the Gateway Pacific facility would be the key export terminal to reach overseas markets for coal produced on the Crow Reservation, and basic economics tells us that a more diversified customer-base would mitigate the marketplace risks currently faced by those producing (or contemplating production of) coal on the Crow Reservation.<sup>41</sup> A level playing field for production on the Crow Reservation translates into more jobs for the citizens of the Crow Nation, with a number of benefits spilling over to Big Horn County and the State of

---

<sup>36</sup> Westmoreland Coal Company, FY 2011 Form 10K, at page 22.

<sup>37</sup> 2013 Old Coyote Testimony at page 3.

<sup>38</sup> There is also increasing pressure for the Absaloka Mine to supply a wider range of markets due to policy changes underway at Xcel Energy ("Xcel"). Xcel operates the Sherco Power Plant, and is one of the most important outlets for coal produced on the Crow Reservation. In January 2015, Xcel put forth plans to implement a reduction in coal-generated electricity at the Sherco plant (from 37% in 2015 to 29% in 2030), as part of an effort to transition to more renewable energy (see, e.g., David Shaffer, "Xcel to Double down on Renewable Energy in Minnesota," *Star Tribune*, January 2, 2015, at <http://www.startribune.com/business/287387921.html>).

<sup>39</sup> Cloud Peak Energy, "2013 Annual Corporate Report," Gillette, WY, 2014, at page 3. Cherry Point is on the northern coast of Washington State in Whatcom County, just 17 miles south of the Canadian border and approximately 108 miles north of Seattle.

<sup>40</sup> Cloud Peak Energy, Press Release, "Cloud Peak Energy Announces Option Agreement with SSA Marine for Capacity at Future Cape Size Export Terminal in Pacific Northwest," February 13, 2013, <http://investor.cloudpeakenergy.com/press-release/business-development/cloud-peak-energy-announces-option-agreement-ssa-marine-capacity>. Current information indicates that final environmental impact statements are not going to be issued until 2017 (see, Washington State Department of Ecology, "Environmental Review: Gateway Pacific Terminal at Cherry Point Proposal," at <http://www.ecy.wa.gov/geographic/gatewaypacific/>). According to Cloud Peak, upon completion of the permitting process the Gateway Pacific facility must undergo two years of construction before it can begin operations, so prior indications of a 2018 start date are likely to slip back by more than a year.

<sup>41</sup> I note that the Gateway Pacific facility has stirred controversy, much of which involves the sovereign territory rights of the Lummi Nation of Washington State. The Lummi Nation asserts that Gateway Pacific infringes upon its ancestral fishing grounds, which are guaranteed by treaty. This is a delicate issue, and deserves respectful consideration by all parties involved. As discussed above, tribal sovereignty and autonomy are vital to economic growth and building well-functioning tribal communities, and these findings of the Harvard Project hold for all tribes (Crow, Lummi, and the hundreds of others found throughout Indian Country alike).

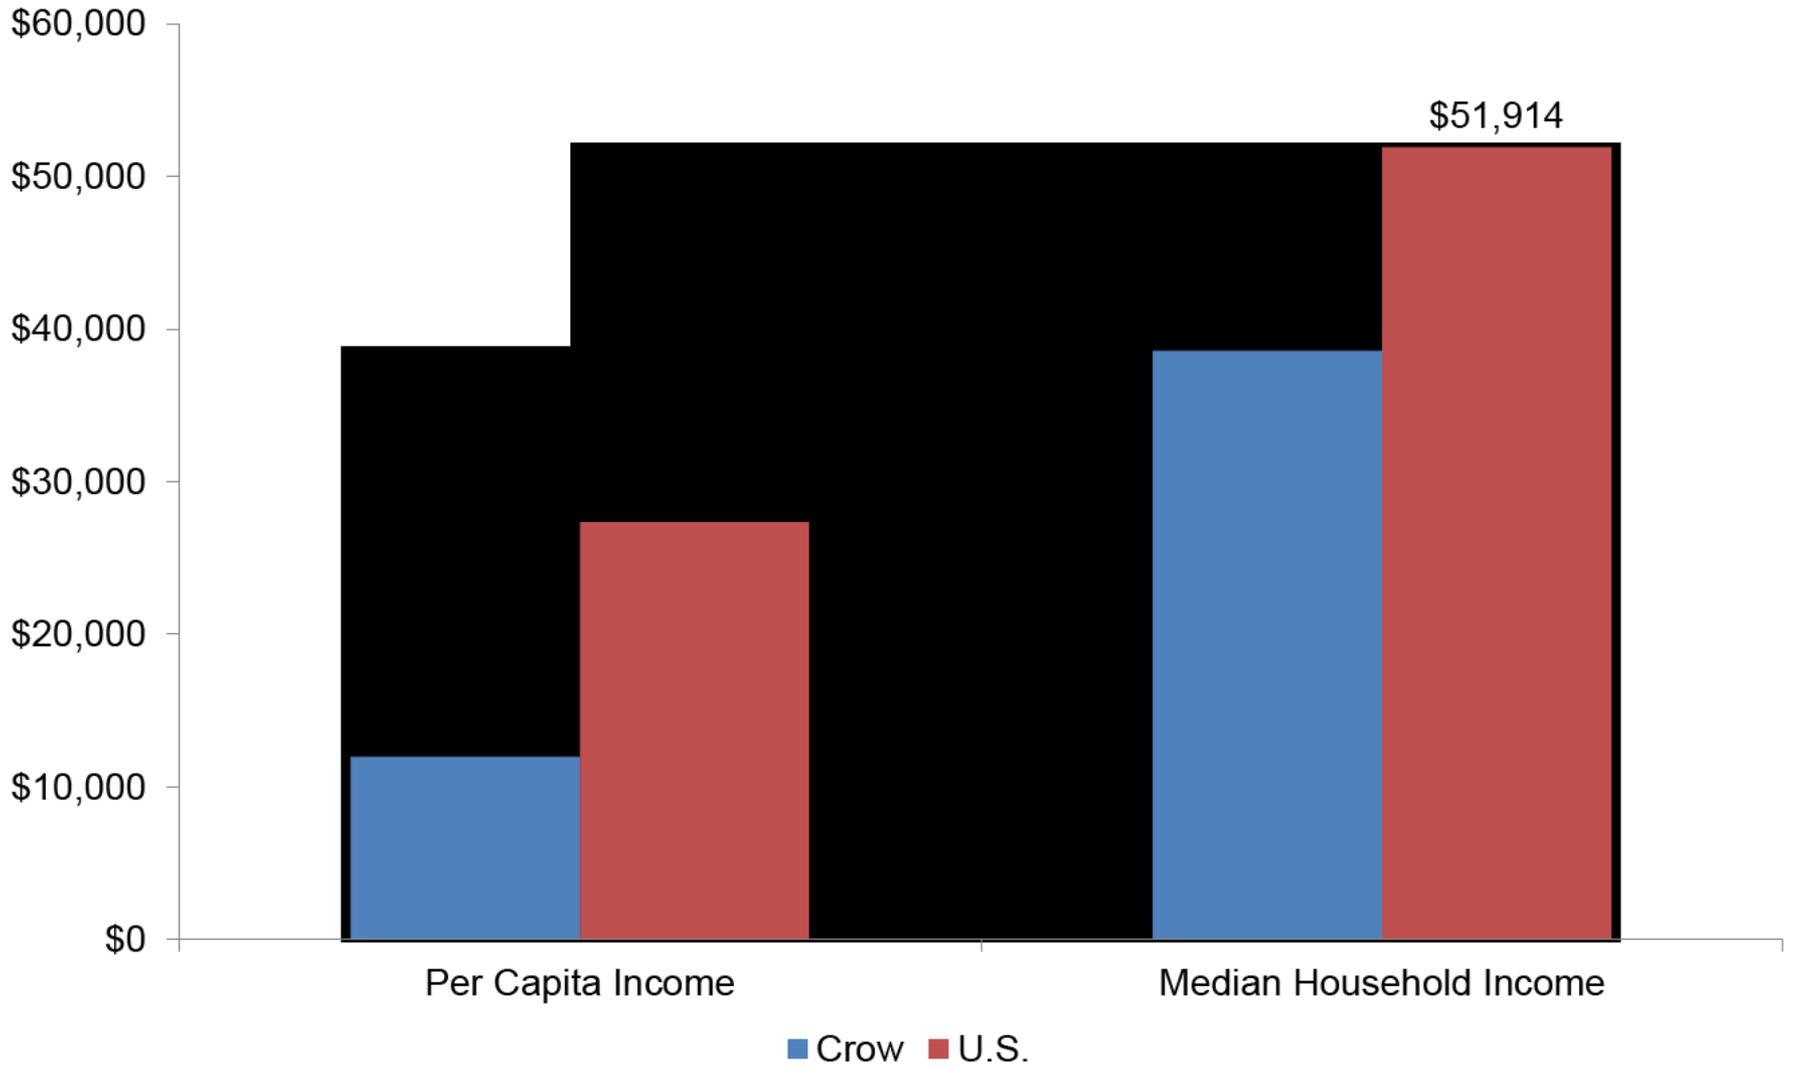

Montana (e.g., increased tax revenues).<sup>42</sup> As noted above, the combined impact of continued production at the Absaloka Mine, along with operations getting underway at the Big Metal Project, is projected to be worth as much as \$107 million in revenue to the Crow Nation's annual budget. This represents a four-fold increase in non-federal dollars currently available to the Crow government, and will markedly increase the tribe's ability to be self-sustaining and to provide for the needs of its citizenry.

---

<sup>42</sup> Analysis provided by the House Committee on Ways & Means indicates the 10-year cost of the most recent one-year ICPTC extension is expected to be \$38 million. This decrease in federal tax revenues is insignificant in the federal budget, so much so that USA Today has commented, "The budgetary cost of the Indian coal production credit is so small it doesn't show up in most Congressional Budget Office estimates." It is not surprising that a number of Montana's legislators have been working to make the ICPTC permanent (see, Gregory Korte, "In Montana, Crow Tribe sees perils to 'fiscal cliff'." See also, *USA Today*, November 19, 2012, at <http://www.usatoday.com/story/news/2012/11/18/crow-tribe-fiscal-cliff/1706695/>. Finally, see the United States House of Representatives, Committee on Ways & Means, "Section-by-Section Summary of HR 5771, The 'Tax Increase Prevention Act of 2014'," at <https://rules.house.gov/sites/republicans.rules.house.gov/files/113-2/PDF/113-HR5771-SxS.pdf>).

**PROFESSIONAL EXPERIENCE**

Compass Lexecon

Boston, MA and Tucson, AZ

*Senior Vice President*, 2013-present

*Vice President*, 2009-2013; *Managing Director*, 2006-2008; *Director*, 2005;  
*Managing Consultant*, 2004; *Senior Consultant*, 2001-2004; *Consultant*, 1998-2001

Provides economic analysis in the areas of oil and gas valuation, antitrust claims, and market structures and researches Native American economic development and governmental design.

Harvard Project on American Indian Economic Development, John F. Kennedy School of Government, Harvard University, Cambridge, MA

*Research Fellow/Research Affiliate*, 1998-present

Researches governmental design and economic development in Indian Country, at the John F. Kennedy School of Government at Harvard University (and its affiliate the Udall Center for Public Policy at the University of Arizona). Serves as a program evaluator for the Honoring Nations program.

Fidelity Investments, Boston, MA

*Industry Analyst*, 1997-1998

Assisted in the development of quantitative models to forecast outperformance of S&P 500 Industry groups. Programmed econometric software and built macros in MS Access to process performance reports.

Haver Analytics, New York, NY

*Manager, United States Economics Database*, 1995-1996

Interacted as a consultant with leading economists, governmental department heads, and private industry clients. Solved technological problems associated with the electronic transfer of data and found solutions for anomalies in the data.

Clean Environments, San Antonio, TX

*CAD Operator*, 1993

Created site maps for environmental consultants and prepared materials for client presentations.

## **EDUCATION**

John F. Kennedy School of Government, Harvard University, Cambridge, MA

MPP, 1998

Thesis: “The Importance of a Uniform Commercial Code for Economic Development on Native American Reservations”

Southern Methodist University, Dallas, TX

MA, Economics, 1995

University of Texas at San Antonio, San Antonio, TX

BBA, Business Economics, 1992

## **SELECT CONSULTING EXPERIENCE**

For an On-Reservation School District

Analysis of cash flows for a school district located on tribal lands. Project centered on evaluation of the feasibility of issuing construction bonds to replace aging school buildings. (2015)

For a Small Oil and Gas Company

Examination of allegations of underpayment in a take-private transaction for a previously publicly traded oil and gas company. Case addresses valuation of producing and prospective properties in several locations throughout the United States. (2014-present)

For a Class of Indian Tribes and Tribal Enterprises

Analysis of harms arising from the US government’s failure to provide for contract support costs when contracting or compacting with tribes for the provision of governmental services by the tribes. (2014)

For a Midsize Oil and Gas Company

Examination of the marketplace for oil and gas leases in Oklahoma. Case addresses measurement of bonus and royalty rates paid for “investigated” transactions and comparable “non-investigated” transactions. (2014-present)

For Three Telecommunications Companies and a Standard Setting Organization

Analysis of mechanisms by which specifications and standards are set in the telecommunications industry. Case addressed allegations that marketplace participants could unfairly influence the decision-making process. (2013-2014)

For an Indian Tribe

Evaluation of a coal production tax credit on Indian lands. Analysis of tax incentives for continuing/expanding production and measurement of regional impacts from economic activity associated with mining operations. (2013-2014)

For an Indian Tribe

Evaluation of inputs for use in the calculation of a gasoline tax rebate for a tribe in the Pacific Northwest. Analysis addressed determination of annual fuel usage and an assessment of the number of tribal individuals eligible for the rebate. (2013)

For an Indian Tribe

Evaluation of damages arising from the failure of the federal government to complete a major farming/irrigation project in the southwestern United States. Analysis addresses lost rents, forgone use of water rights, unfunded project completion costs, and ongoing operations and maintenance expenditures. Engagement has included sworn testimony before the tribe's Resources and Development Committee. (2013-present)

For a Small Oil and Gas Company

Evaluation of alleged underpayments of oil royalties arising from production off the coast of California. Case addressed the proper economic framework for valuation along the chain of commerce from production to refinery usage, the value of crude oil transportation services, and sound techniques for utilization of price benchmarks. (2013)

For a Large Pipeline Company

Evaluation of alleged damages stemming from the purchase and reversal of a crude-oil transporting pipeline in Oklahoma and Texas. Case addressed crude oil price differentials between major trading hubs, the value of crude oil transportation services, and sound techniques for damages estimates. (2013-2014)

For a Midsize Oil and Gas Company

Examination of the marketplace for natural gas and carbon dioxide in Texas. Case addressed marketplace infrastructure, netback pricing, prudence of development of processing assets, and the marketability of natural gas and carbon dioxide at the point of production. (2012-2013)

For an Indian Tribe

Evaluation of harms arising from denial of funds required to provide health services to community members. Case addressed damages stemming from direct harm due to lack of health care, multiplier effects in the community, and indirect harms arising from the lack of health funding undermining the ability to provide a range of other governmental services. (2012)

For a Midsize Oil and Gas Company

Examination of the marketplace for natural gas in Oklahoma. Case addressed marketplace infrastructure, netback pricing, and the marketability of natural gas at the point of production. (2011-2012)

For an Indian Tribe

Evaluation of damages stemming from construction of a major highway built over Indian land, allegedly without proper compensation. (2010-2011)

For a Non-Profit Sports Organizing Body and a Professional Sports League

Evaluation of alleged antitrust/anticompetitive behavior leading to the bankruptcy of a promoter of international exhibition matches. Project addressed a non-profit's role in administration of a sport that provides public goods, the role in development of the sport by a professional league, allegations of discriminatory behavior, and proper definition of a relevant market. (2010-2012)

For an Indian Tribe

Strategy consulting relating to economic development initiatives geared toward enterprise diversification. Project addressed financial analysis, the roles played by Board members and economic development staff, cost-benefit analysis, and prioritization of investment decisions. (2010)

For an Energy Trading Firm

Evaluation of damages allegedly arising from actions undertaken by a mercantile exchange in the Middle East, which resulted in economic loss of the trading firm's equity position in the exchange, and loss of access to trading activities on the exchange. Project addressed potential evolution of trading in the Middle East, a range of valuation methodologies, and determination of an appropriate discount rate. (2010-2011)

For an Indian Tribe

Evaluation of ability to access federal stimulus funds for infrastructure refurbishment. Project addressed the requirements for funding application, expected demand for restored rail service, cost-benefit analysis, and the impact more efficient rail service would imply for surrounding areas. (2009)

For a Large Natural Gas Producing Joint Venture

Examination of the marketplace for natural gas in an Australian state. Case addressed the natural gas supply chain, the history of the marketplace, long-term contracting, marketplace infrastructure, the economic principles of fair market value, LNG exports, and the relevant marketplace for determining fair market value. (2008-2009)

For a Large Oil and Gas Company

Examination of various marketplaces for gasoline in the northeastern United States and Puerto Rico. Cases address marketplace infrastructure, gasoline manufacturing, transportation assets, storage and terminal accessibility, imports from abroad, and supply shares brought to the marketplace by various producers and manufacturers. (2007-present)

For a Major Oilfield Services Firm

Analysis of antitrust claims stemming from provision of fluids used in deepwater drilling environments. Examination of the marketplace participants which provide such fluids, and their substitutes, as well as the history of development of the fluids in dispute. (2007-2008)

For a Major Global Chemical Manufacturer

Examination of the marketplace for industrial metals used in high-tech applications. Case included analysis of the marketplace for these products and the commercial interactions of the major players on the buyers' side and the sellers' side of long-term contracts. (2007-2009)

For a Publisher of Weekly Newspapers

Examination of the marketplace for advertising space in the San Francisco Bay area. Analysis of changing marketplace conditions, substitutes for print advertising space, and the economics of pricing to cover marginal costs. (2007-2008)

For a Large Oil and Gas Company

Examination of the marketplace for natural gas processing services in the southwestern United States. Case addressed marketplace infrastructure, netback pricing, appropriate discount rates, asset valuation, appropriate levels of processing charges, and value of similar production for leases in the surrounding area. (2007)

For a Group of Large Oil and Gas Companies

Damages assessment following harm to a major offshore pipeline caused by a ship dropping anchor onto the pipeline. Analysis addressed valuation techniques, calculation of appropriate discount rates, and utilization of expectations of future oil and gas prices. (2007-2008)

For Two Refining Companies

Examination of the competitive implications of the proposed merger of two refining companies. The analysis focused on assertions that the merger would adversely affect competition in the gasoline marketplace in the southwestern United States. (2007)

For an Indian Tribe

Analysis of tax burdens and public policy relating to sound taxation policies. (2006-2007)

For a Group of Natural Gas Producing Companies

Royalty valuation analysis focused on lease-level transactions. Principal areas of research included market structure analysis of domestic natural gas industry, effects of transaction costs on the determination of value, the economic functions of different contract structures found within the natural gas industry, and the economic role of and the determination of value provided by various market participants operating between the lease and the downstream markets. (2006-2010)

For Six Large Telecommunications Companies

Analysis of mechanisms by which specifications and standards are set in the industry. Case addressed allegations that marketplace participants could unfairly influence the decision-making process. (2006-2007)

For a Large Natural Gas Pipeline and Defendant Shippers

Analysis of class certification issues surrounding a proposed class of natural gas marketers. Case addressed transportation and storage options available during times of pipeline congestion, allegations of preferential treatment for a subset of Defendant shippers, and appropriateness of certification of the class action. (2006-2009)

For a Native Corporation

Valuation of oil and gas properties relating to a tax dispute. Analysis addressed comparable properties, valuation techniques, and calculation of appropriate discount rates. (2005-2006)

For a Large Natural Gas Marketer

International arbitration regarding a breach of contract in the marketplace for LNG. Case addressed size of LNG marketplace in the US, LNG tanker availability, natural gas prices, evaluation of damage estimates submitted by adverse party, and calculation of an appropriate discount rate. (2005-2006)

For a Large Mobile Phone Company

Analysis of terms of service agreements for mobile phone customers, evaluation of contracting, and assessment of the structure of the marketplace for mobile phone services. (2005-2008)

For a Large Oil Company

Determining market value for inputs into the oil exploration and production process. Case addressed market structure analysis, input valuation, and allegations of breach of prior settlement terms. (2005)

For an Indian Tribe

Evaluation of economic development opportunities arising from a revision to the National Park Service's management plan for the Colorado River. Analysis addressed assumptions underlying projections of use, appropriate discount rates, and likely damages arising under various management scenarios. (2005)

For a Large Oil Company

Evaluation of market value for natural gas produced from offshore State lands. Case addressed marketplace infrastructure, netback pricing, appropriate discount rates, and similar production for neighboring onshore fields. (2004)

For a Large Oil Company

Royalty valuation analysis focused on lease-level cash transactions and implementation of an enhanced oil recovery (EOR) operation. Principal areas of research included market structure analysis of domestic oil industry, effects of transaction costs on the determination of value, the economic role of and the determination of value provided by various market participants operating between the lease and the downstream markets, and the prudence of the timing of the initiation of EOR floods in Texas. (2002-2004)

For Two Large Oil and Gas Companies

Evaluation of the upstream market for natural gas in one of the prominent US producing regions. Principal areas of research included structure of the regional marketplace, analysis of the factors influencing the value of natural gas, and the economic role of and the determination of value-added by various market participants operating between the wellhead and points downstream. (2001-2003)

For Two Large Oil Companies

Determining market value for inputs into the oil exploration and production process. Case addressed pipeline tariff rates, market structure analysis, prudent development, and input valuation. (2000-2006)

For an Indian Tribe

Prepared expert witness testimony related to a damages assessment of tribal non-recognition by the federal government. Assessed tribal rights and modeled tribal finance in the absence of federal recognition. (2002-2003)

For a Consortium of Indian Tribes

Examined the economics of natural resources applicable to fishing rights and protection policies for internal use by the consortium. Conducted economic literature review and prepared frameworks for continuing consortium analysis. (2002-2003)

For a Municipal Solid Waste Disposal Company

Calculation of appropriate discount rate and determination of damages from a temporary taking that led to the bankruptcy of the company and the cancellation of the construction of the disposal facility. Principal areas of research included application of valuation techniques to a project that had gone through multiple rounds of litigation prior to our retention, determination of similarly situated companies, and industry practices regarding financial and cash flow analysis. (2002-2003)

For a Large Oil Company

Tax valuation analysis focusing on lease-level cash transactions. Principal areas of research included market structure analysis of the domestic oil industry, effects of transaction costs on the determination of value, and the economic role of and the determination of value provided by various market participants operating between the lease and the downstream markets. (2002)

For a Group of Three Large Oil and Gas Companies

Calculation of appropriate discount rates and gas price forecasts in light of a breach of contract claim. (2001-2002)

For an Indian Tribe

Lease negotiations between a tribe and a multinational corporation with cobalt and tungsten processing operations on tribal land. Prepared financial analysis regarding value of lease extension, participated in multi-party negotiations, and advised tribe and legal counsel on economics of facility viability. (2001-2002)

For a Petroleum Products Company

Evaluation of the downstream (refinery to pump) market for petroleum products in Hawaii. Investigation of alleged collusion between downstream products companies and harm to consumers from asserted artificially high products prices. (1999-2002)

For a Large Oil Company

Royalty valuation analysis focusing on lease-level cash transactions. Principal areas of research included market structure analysis of domestic oil industry, effects of transaction costs on the determination of value, and the economic role of and the determination of value provided by various market participants operating between the lease and the downstream markets. (1999-2001)

For an Oil Company and an Energy Marketer

Assessed fair market rental value of oil-bearing property temporarily taken by the federal government. (1999-2001)

For Two Large Oil Companies

Determined market value for inputs into the oil exploration and production process. Case addressed pipeline tariff rates, market structure analysis, and input valuation. (1998-2001)

For Two Large Oil Companies

In a case before the Federal Trade Commission, examined the competitive implications of the proposed merger of two major oil companies. Focused on assertions that the merger would adversely affect competition in the bidding for rights to explore on the Alaska North Slope and that the combined company would have increased control over the supply of light sweet crude oil deliverable under futures contracts and thus would have increased ability to manipulate NYMEX trading. (2000)

For a Western Pipeline Company

Market power analysis in support of an application for rerouting an oil products pipeline. (1999)

For a Group of Oil Companies

Royalty valuation analysis focused on lease-level cash transactions. Principal areas of research included market structure analysis of the domestic oil industry, effects of transaction costs on the determination of value, the economic functions of different contract structures found within the oil industry, and the economic role of and the determination of value provided by various market participants operating between the lease and the downstream markets. (1998-2000)

## **Overview and Summary**

The Crow Nation, centered in Big Horn County, Montana, presents a striking mosaic of economic contrasts. Although the region is blessed with abundant natural resources, particularly in the form of huge reserves of commercial quality and accessible coal, economic underdevelopment, family poverty, and social stress make the region one of the most distressed in the United States. Few social conditions are more oppressing than grinding poverty, and the Crow Nation has embarked on an integrated strategic effort to overcome decades of economic hardship. In its struggle to improve the well-being of its citizens, the Nation is striving for economic self-sufficiency, and it sees expanded coal development as key to achieving that goal.

This study analyzes the economic stakes at issue for continuing and expanding coal development on the Crow Reservation and in Big Horn County. I present impact results for the economies of the Crow Nation, Big Horn County, and the State of Montana. Employing the tools of regional economic modeling, I assess the direct,

<sup>1</sup> I am the Ford Foundation Professor (Emeritus) of International Political Economy at the John F. Kennedy School of Government at Harvard University. I am also Co-Director of The Harvard Project on American Indian Economic Development ([www.hpaied.org](http://www.hpaied.org)). This report has been prepared at the request of the Crow Nation. I gratefully acknowledge the research assistance of Dr. Sam Flaim, Eric Henson, Amy Medford, and Josh Stamm of Compass Lexecon for their gathering of the necessary statistical information, as well as Dr. Flaim's application of the IMPLAN regional modeling system to the pertinent U.S. Department of Commerce multi-sector input-output system. Compass Lexecon has been compensated for the research performed by these individuals. I have not been compensated for my work on this research project. The views and opinions expressed in this report are solely my own and do not necessarily reflect the views and opinions of any of the organizations with which I am affiliated or which have supported the research reported herein.

indirect, and induced impacts of the continued development and expansion of Crow coal production on employment, incomes, Crow and other regional governmental revenues and expenditures, and the gross regional products of Big Horn County and the State of Montana. The economic impacts of coal development are only part of ongoing debates regarding the development of Indian coal, but they are an important part. Sound policy cannot be made without consideration of the economic impacts, particularly when those impacts affect the welfare of American Indian citizens.

Current and planned mining of Indian coal is discouraged by an uneven “playing field.” In the case at hand, disproportionate layers of regulatory oversight, disadvantages in transportation infrastructure and logistics, lack of access to markets, coal quality, and higher-than-elsewhere permitting hurdles demonstrably disadvantage minerals extraction on Indian reservations. Recently, a federal Indian coal tax credit—the Indian Coal Production Tax Credit (“ICPTC”)—provided to private developers of Indian coal has helped to level the playing field for tribes. This policy, however, expired on December 31, 2013, and its renewal depends on informed understanding and support in Congress.

The research reported here measures the regional economic impacts of continued development and expansion of Crow coal—development and expansion that are at risk if the playing field is permitted to tilt further against Indian coal. The stakes are high, not only for the Crow Nation, but also for Big Horn County and the entire State of Montana. I find that the continued ability of the Absaloka Mine to operate and serve its customers, and the potential expanded production under a recent option-to-lease agreement between the Crow Nation and Cloud Peak Energy for the Big Metal Project (summarized in Table 1), will jointly contribute:

- Approximately \$377 million annually to the Gross Regional Product (“GRP”) of Montana,<sup>2</sup> with more than \$230 million of this value arising directly from the coal mining sector, and another \$146 million arising in the other sectors of the State’s economy that expand as the coal sector grows, the sector buys more supplies, and its workers spend their incomes.
- Approximately \$280 million annually to the GRP of Big Horn County, amounting to a 40% increase in the size of the County’s economy.
- More than 1,600 jobs statewide and 1,000 jobs in Big Horn County.

---

<sup>2</sup> The U.S. Bureau of Economic Analysis defines Gross Domestic Product (“GDP”) as “the market value of goods and services produced by labor and property in the United States...” ([http://bea.gov/glossary/glossary\\_g.htm](http://bea.gov/glossary/glossary_g.htm), accessed January 27, 2014). GRP is akin to GDP—the measure of the total output of an economy—but limits the measurement to a specific area/region rather than an entire national economy.

- Compensation for Montana workers of about \$95 million per year, over two-thirds of which—almost \$65 million—accrues to workers in Big Horn County.
- Annual tax revenues (e.g., payroll taxes) for Montana and the federal government of \$22.9 million and \$21.9 million, respectively.
- Annual royalty (as the mineral owner) and tax (as a government) revenue for the Crow Nation of more than \$107 million—a 426% increase from current revenues—thereby enabling the Tribe to move to overwhelming reliance on non-federal funding for its operations.

Note: Absaloka Mine is currently operational, while the Big Metal Project is under consideration.

## Background

The Crow Reservation extends from the northern slopes of the Big Horn and Pryor Mountains onto the plains of south central Montana. The reservation spans approximately 2.3 million acres, or 3,600 square miles.<sup>3</sup> Over 1.9 million of its acres are in Big Horn County.<sup>4</sup> There are approximately 13,000 citizens of the Crow Nation, with about 9,000 of those living on the reservation.<sup>5</sup>

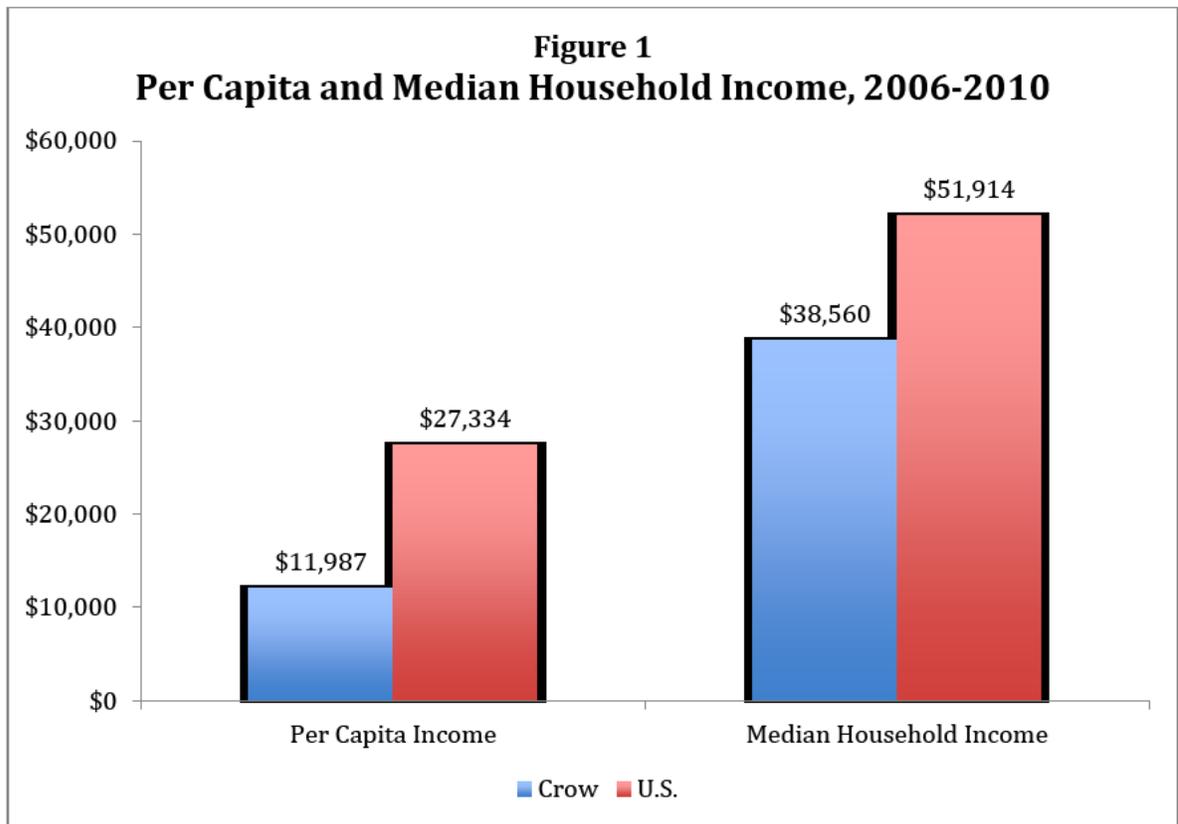

Like many other American Indians living on-reservation, the Crow Nation and its citizens struggle with poverty. As shown in Figures 1 and 2, the U.S. Census estimates that in 2006-2010 the annual per capita income of American Indians on the Crow Reservation (\$11,987) was less than half that of the U.S. as a whole (\$27,334). The median household income for Crows (\$38,560) was markedly lower than that reported for U.S. households (\$51,914), and the Crow family poverty rate (24%) was more than double that of the U.S. population as a whole (10%). The poverty rate for Crow children (39%) was also twice that of children throughout the U.S. (19%).

Official unemployment at Crow (32%) was four times that observed in the U.S. economy as a whole (8%). Recognizing that official unemployment only counts a would-be worker as unemployed if the worker is looking for work but cannot find it, actual unemployment—including workers who have given up looking for work in a setting of such economic distress—is much higher than officially reported. The Crow Nation reports that current unemployment is fully 47%.<sup>6</sup> This means that only about one in two Crow adult workers has a job.

The dire socio-economic conditions found on the Crow Reservation would be even worse without the Nation’s abundant natural resources. In a 2002 report requested by the federal Bureau of Land Management, it was estimated that the Crow Nation controlled mineral rights to 17 billion short tons of coal,<sup>7</sup> accounting for coal deposits found under both reservation and ceded lands. Nine billion of these tons are considered recoverable.<sup>8</sup> These recoverable reserves make up about 12% of the recoverable coal in Montana and 4% in the U.S.<sup>9</sup>

<sup>7</sup> LAO Environmental at page 71 ([http://www.blm.gov/pgdata/etc/medialib/blm/mt/field\\_offices/miles\\_city/og\\_eis/crow.Par.79832.File.dat/minerals.pdf](http://www.blm.gov/pgdata/etc/medialib/blm/mt/field_offices/miles_city/og_eis/crow.Par.79832.File.dat/minerals.pdf), accessed January 23, 2014).

<sup>8</sup> *Tribal Development of Energy Resources and the Creation of Energy Jobs on Indian Lands, Before the House Committee on Natural Resources, Subcommittee on Indian and Alaska Native Affairs, 112<sup>th</sup> Cong. (2011)* (statement of Scott Russell, Secretary of the Crow Nation (hereinafter “Russell Testimony, 2011”).

<sup>9</sup> Montana recoverable coal reserves are reported as 74.6 billion short tons and the U.S. total is 257.6 billion. U.S. Energy Information Administration, “U.S. Coal Reserves with Data for 2012,” December 16, 2013, at <http://www.eia.gov/coal/annual/pdf/table15.pdf>, accessed January 9, 2014. It is worth noting that coal production in Montana in 2012 was only around 36 million short tons, while production in its

Since 1974, the Absaloka Mine, owned and operated by Westmoreland Resources, Inc. (“Westmoreland”), has provided much needed royalty and tax revenues to the Crow Nation. The Absaloka Mine has the capacity to produce up to 7.5 million tons of coal annually. Running at about 70% of capacity, it generated over \$20 million in government revenues for the Tribe in 2010.<sup>10</sup> These revenues fund everything from Crow government salaries to operational expenses. They also supplement federal and community services programs such as Head Start, Boys & Girls Club, Tribal Elders, and Family Preservation.<sup>11</sup> In fact, coal royalties and taxes from the Absaloka Mine alone are projected to represent about two-thirds of the Crow Nation’s non-federal budget this year.<sup>12</sup>

The Absaloka Mine is the largest private employer on the Crow Reservation. Approximately 70% of its workforce identifies as Crow or Crow-related, and the average annual salary, including benefits and overtime, is over \$91,000.<sup>13</sup> Given a reservation unemployment rate of at least 32% (47% according to the Crow Nation), these jobs, combined with the tribal government staffing positions that are paid for with funds from coal royalties and taxes, are critically important to the Tribe and its citizenry. With that in mind, the Crow Nation has entered into an agreement with Westmoreland to extend the life of the Absaloka mining operation with a lease of approximately 145 million tons of Rosebud-McKay seam coal.<sup>14</sup> If Westmoreland can continue to find customers at remunerative prices, this expansion will sustain operations at the mine past 2020. This will provide additional years of royalty and tax collections, while maintaining and potentially bringing more jobs to the region.

---

neighboring State of Wyoming was around 401 million short tons (<http://www.eia.gov/state/rankings/?sid=MT>, accessed January 23, 2014).

<sup>10</sup> Westmoreland Coal Co., FY 12 Form 10K for the Period Ending December 31, 2012 (filed March 12, 2013), at pages 5 and 7 (<http://westmoreland.com/investors/sec-filings/>, accessed January 27, 2014), and Old Coyote Testimony, 2013. According to the 10K filing, Absaloka Mine produced approximately 5.5 million tons in 2010.

<sup>11</sup> Special Session of the Crow Tribal Legislature, *Approval of the Annual Budget for the Operation of the Crow Tribal Government and the Expenditure of Tribal Revenue for Fiscal Year 2012*, CLB 11-04 (September 29, 2011) at [http://www.crowlaws.org/tribal\\_legislation\\_2002-present](http://www.crowlaws.org/tribal_legislation_2002-present), accessed January 30, 2014.

<sup>12</sup> Fiscal Year 2014’s projected non-federal revenue budget provided by the Crow Nation.

<sup>13</sup> Data provided by Westmoreland. The average annual salary for the workforce at the Absaloka Mine is \$56,264. Overtime and benefits—such as retirement and health—bring the average annual compensation for all workers at the mine to \$91,408.

<sup>14</sup> “Westmoreland Partners with Crow Tribe for Additional Reserves,” Westmoreland Coal Co. press release, March 27, 2013, at <http://westmoreland.com/news/>, accessed January 9, 2014.

The influence this one mine has on the Tribe also demonstrates a weakness in the economies of the Crow Nation and Big Horn County. Any unforeseen circumstance that could halt production or sale of coal from the mine would decrease the royalty and tax collections available to the Crow Nation and would immediately and powerfully impact the finances of the Tribe (and, likewise, of the County). Consider a recent example of lost marketing opportunities for Crow coal: In November 2011, the Sherburne County Generating Station (“Sherco”) in Becker, Minnesota, experienced a catastrophic turbine failure and oil fire that shut down operations at the plant.<sup>15</sup> Sherco has been Absaloka Mine’s largest customer since the mine’s first shipment of coal in 1974,<sup>16</sup> and the incident meant a loss of approximately 50% of Absaloka’s coal sales in 2012.<sup>17</sup> Not only did the Crow Nation government’s budget suffer, but the community did as well, as the workforce at the mine was sharply curtailed during a prolonged period of lower sales volumes.<sup>18</sup>

Recognizing this weakness, the Crow Nation has pursued a strategy of reducing its dependence on the Absaloka Mine. This has led to a recent option-to-lease agreement between the Crow Nation and Cloud Peak Energy (“CPE”) to potentially expand operations of CPE’s off-reservation coal mines onto the reservation. This expansion is referred to as the “Big Metal Project.”<sup>19</sup> Already approved by the Bureau of Indian Affairs,<sup>20</sup> this long-term project represents an important opportunity to reduce the Crow Nation’s dependence on a single company (i.e., Westmoreland), while also bringing in much-needed revenues and increasing employment opportunities. The project also promises major positive contributions to Big Horn County and the State of Montana. Let us examine the magnitude of the stakes.

## Measuring the Economic Contributions of Crow Coal Development

Using economic modeling software and U.S. Department of Commerce data from IMPLAN—tools widely used by government agencies and the academic community for regional economic impact analysis—I am able to quantify the direct, indirect, and induced effects of Crow coal mining operations. Table 2 (found below at the end of this report) presents a single-year snapshot of the contribution of the Absaloka Mine and the projected potential contribution of the Big Metal Project to the Crow Nation, Big Horn County, and the State of Montana. Results are shown scaled to the size and composition of the regional economies as of 2013. This allows the Big Metal Project to be assessed as if it were already up and fully running, and the model is then asking: What would the fully developed project mean for the regional economy as that economy looked in 2013? Actual impacts would, of course, arise in subsequent years, depending on the timing of discontinued development of the Absaloka mine and/or expansion of Cloud Peak’s Big Metal Project.<sup>21</sup>

As described above, current coal mining operations on Crow lands are extremely important to the Tribe and its citizens. Unfortunately, the Absaloka Mine struggles financially to compete with other regional operations located off-reservation. My analysis indicates that while access to markets and coal quality do limit the marketability and profitability of Crow coal to some extent, it is bureaucratic obstacles, additional federal regulatory and trust requirements, and higher financial costs associated with mining on Indian lands that make it difficult to compete with off-reservation operations. For example, Westmoreland has found that it typically takes approximately twice as long, and costs twice as much, to re-permit operations once they cross over the reservation boundary.<sup>22</sup> Unlike nature’s designation of geographic location and mineral content, these obstacles can be addressed through federal policies. In this regard, the Indian Coal Production Tax Credit has heretofore played an important role in offsetting the additional burdens that must be overcome to undertake new production or expansion on Indian lands by companies such as Westmoreland. For the Absaloka Mine, the ICPTC has helped keep the mine open and competitive since 2006. Without the ICPTC, Westmoreland reports that it would experience negative

---

<sup>21</sup> An extrapolation of these single year benefits over the 25+ years of mining operations indicates that Crow coal revenues at stake exceed \$510 million for continued operations of the Absaloka Mine and \$2.2 billion for the proposed Big Metal Project (undiscounted).

<sup>22</sup> Douglas P. Kathol, Executive Vice President Westmoreland Coal Co., letter to the Honorable Max Baucus, July 22, 2013.

effects on earnings and cash flow and it would have to seriously consider shuttering the mine.<sup>23</sup>

Shuttering the Absaloka Mine would financially devastate the Crow Nation. As noted above, coal revenues in FY 2014 are projected to make up about two-thirds of the Tribe's non-federal budget. A loss of this magnitude (approximately \$20.4 million per year) could only throw the Tribe into deeper poverty and drastically decrease the likelihood of the Crow Nation becoming economically self-sufficient. However, the Absaloka Mine and the Big Metal Project present substantial opportunities for sustained improvement in the economy of the Tribe. These mining operations combined would provide the Crow Nation with about \$107 million each year in coal revenues, a 426% increase from current revenues. This would dramatically increase tribal self-sufficiency and allow the Crow Nation to better meet the needs of its citizens.

While critical to the economic self-sufficiency, if not the survival, of the Crow Nation, Crow coal is also extremely important to Big Horn County. In 2013, the County GRP was nearly \$471 million, and it is estimated that shuttering the current mining operations would reduce that number by more than \$89 million in a single year (representing about a 19% decline). With respect to the Big Metal Project, because coal mining is a primary industry and some of the incremental production from the proposed expansion is likely destined for export, impacts at the County level are multiplied through the indirect and induced economic impacts of mining operations, particularly transportation. They pass through almost every other sector of the economy.<sup>24</sup> The modeling here finds that the Big Metal Project would contribute fully \$191 million to Big Horn County's annual GRP—representing a contribution equal to more than 40% of the current County GRP. Together, the continued operation of the Absaloka Mine and the Big Metal Project are worth \$280 million per year in GRP, almost \$65 million per year in worker compensation, and \$3.1 million in taxes to Big Horn County. These development opportunities also create employment in the County for more than 1,000 workers.

Table 2 also reports the impacts of Crow coal on the State of Montana as a whole. The combined economic contributions of the Absaloka Mine and the proposed Big Metal Project would amount to about \$377 million to the annual GRP of Montana. Yearly compensation of workers in Montana would be almost \$95 million. The increased economic activity and payrolls, in turn, would result in increases in State of Montana

---

<sup>23</sup> Russell Testimony, 2011.

<sup>24</sup> Barkey, Patrick M., "The Economic Impact of Increased Production at the Spring Creek Mine," Bureau of Business and Economic Research, The University of Montana, October 2012, <http://www.bber.umt.edu/MBQ/default.asp>, accessed January 9, 2014.

and federal tax collections, totaling \$22.9 million and \$21.9 million, respectively. Over the life of the mining operations, additional tax collections (undiscounted) would total to approximately \$573 million for State and local government in Montana and \$548 million for the federal government. These tax collections would substantially, if not completely, offset reductions in revenues associated with continuation of the ICPTC.<sup>25</sup> Indeed, such State and federal revenues are already uncertain and might never be generated by mining operations on Crow land. If the ICPTC is not renewed and the consequence is that Indian coal goes unmined, there will be missed opportunities to collect State and/or federal tax revenues.

My research indicates that the Big Metal Project is very likely contingent on increased terminal capacity to export produced coal to markets overseas.<sup>26</sup> Federal Energy Information Administration (“EIA”) figures show that coal production in the U.S. fell by 12% from 2008-2012.<sup>27</sup> U.S. coal production is predicted to rebound after 2016, largely due to an anticipated increase in exports. The EIA projects that coal production in the U.S. will increase about 0.6% annually to 2040, influenced mostly by consumption in China. China is the leading consumer of coal in the world, and, in 2010, it used three times as much coal as the U.S., which is the 2<sup>nd</sup> largest coal-consuming nation. From 2010 to 2040, EIA projections show that world coal consumption will increase at an average rate of 1.3% annually, while consumption in the U.S. is anticipated to remain flat (see Figure 3).<sup>28</sup>

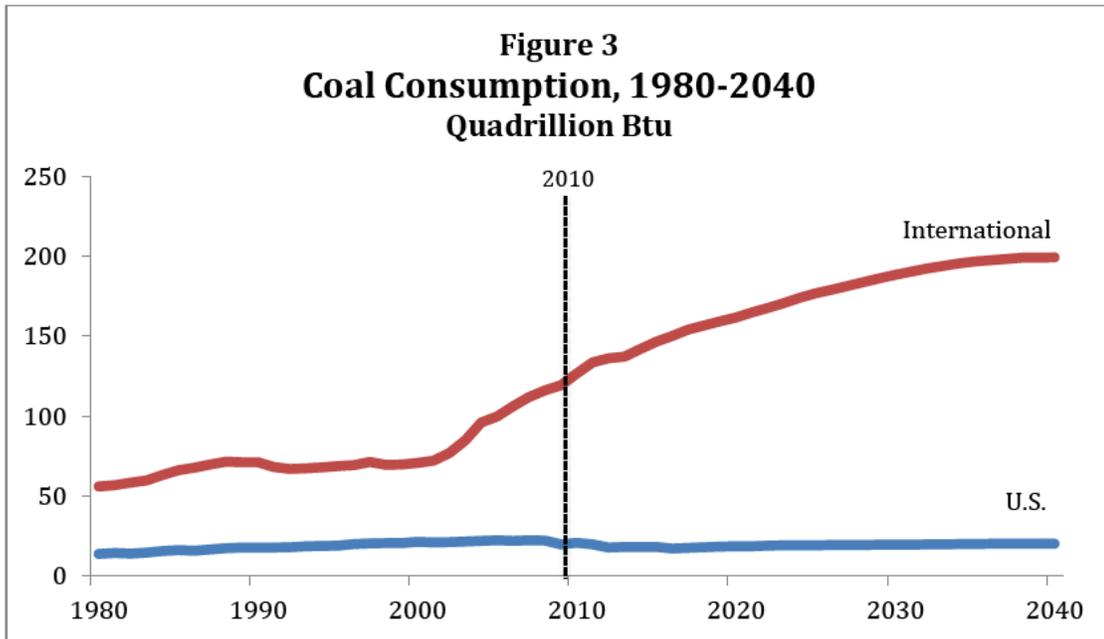

---

<sup>25</sup> Looking at the Absaloka Mine’s contributions alone, annual federal tax collections in Montana arising from continued operation of the mine amount to approximately \$7.0 million (see Table 2 below). These tax collections would substantially offset any federal budgetary cost of renewal of the ICPTC.

<sup>26</sup> According to information provided by CPE, anticipated coal production and sales from the Big Metal Project to potential domestic customers could amount to approximately 5 million tons per year. However, if export terminal capacity becomes available, production could potentially include another 10 million tons for the export market.

Other potential U.S. trading partners with projected increases in coal consumption include India, South Korea, Taiwan, Indonesia, Malaysia, Thailand, and Vietnam, according to the EIA (see the “International Energy Outlook 2013”).

Sources: U.S. EIA, "Annual Energy Outlook 2013," "Annual Energy Report 2012," and "International Energy Outlook 2013."

The foregoing absolute impacts of the Absaloka Mine and the Big Metal Project are translated into their relative importance of Crow coal to the Crow Nation, Big Horn County, and the State of Montana in the "percent change" columns presented in Table 2. Given the Crow Nation's current heavy dependence on coal royalties and taxes, shuttering the Absaloka Mine would have tremendous negative consequences for the Tribe: The Crow Nation would immediately face a 100% loss in coal revenues. This would translate into a 67% decrease in its non-federal budget. For the Big Metal Project, in the economic environment of uncertain and evolving markets for coal, continuation of the ICPTC necessarily increases the viability of expansion of operations onto Crow lands. If the Big Metal Project were able to secure an export terminal on the West Coast, coal production could bring about a 426% increase in coal revenues for the Crow Nation. While no precise count is available, the increase in employment and associated worker compensation would accrue directly to Crow citizens hired into the mining sector.

For Big Horn County, the stakes are similarly large. Continued operations at the Absaloka Mine annually contribute approximately 19% of the County's GRP, 8% of worker compensation, and 4% of tax collections. The Big Metal Project would increase the annual GRP of the County by almost 40% and would also increase jobs in Big Horn

County by 11%, worker compensation by 16%, and annual County tax revenues by 15%.

Finally, we can see the economic importance of Crow coal and the ICPTC to the State of Montana as a whole. Not surprisingly, the largest impacts are in the mining sector: The annual economic contribution of the Absaloka Mine is approximately 16% to the sector's output and employment, while the comparable figures for the Big Metal Project are 34%-35%. Combined, the two mines add approximately a percentage point to the overall Montana GRP and substantially increase the State and federal tax collections in Montana, as compared to a scenario with a shuttered Absaloka Mine. The overall potential total of taxes and royalties for the Crow Nation, Big Horn County, and the State of Montana from Crow coal produced from the Absaloka Mine and the Big Metal Project is approximately \$3.8 billion over 25 years.

## **Conclusion**

Given the long history of economic underdevelopment, family poverty, and social stress experienced on the Crow Reservation, it is imperative that the tribal government utilize what it can to improve the conditions for the Crow people. Meeting the basic needs of citizens has long been a priority for leadership throughout Indian Country. The vision from Crow leadership is best described in the words of Chairman Darrin Old Coyote: "I desire to improve the Crow people's quality of life, create a future with good-paying jobs and employment benefits within the Crow Reservation, and provide hope and prosperity for the next seven generations of Crow citizens."<sup>29</sup> As we have seen here, the Crow Nation's coal resources have a critical role to play in meeting these goals. At the same time, Big Horn County and the State of Montana have very large economic stakes in the continued and expanded development of Crow coal. Through the direct, indirect, and induced effects of continued and expanded operations, the entire region's income, employment, and government budgets will hinge critically on whether or not the Crow Nation's coal can continue to be mined and developed.

**Oversight Field Hearing on**  
**"Empowering Indian Country: Coal, Jobs, and Self-Determination"**  
**April 8, 2015**

**Testimony of Honorable Lorenzo Bates, Speaker of the 23<sup>rd</sup> Navajo Nation Council**

Good Morning. My name is Lorenzo C. Bates, Speaker of the 23<sup>rd</sup> Navajo Nation Council currently serving in my fourth term as Council Delegate representing the communities of; Nenahnezad, Newcomb, San Juan, Tiis Tsoh Sikaad, Tse'Daa'Kaan and Upper Fruitland. I stand before you today representing these communities that are directly impacted by the coal economy as well as the Navajo Nation as a whole whose future is dependent on this natural resource.

I first want to extend my gratitude, on behalf of the Navajo Nation to Chairman Barrasso, Vice-Chairman Tester, Senator Daines and the members of the Senate Committee on Indian Affairs for holding this Oversight Field Hearing on Empowering Indian Country, as well as my brothers and sisters of the Crow Nation for hosting these very important talks.

I am currently serving in my 13<sup>th</sup> year as a Navajo Nation elected official having previously served as Chairman of the Navajo Nation Budget and finance Committee. I am deeply grateful to have this opportunity to address you here today with this past experience as my guide and the hope we as a Nation have in our future, despite the many challenges that face us as we strive to empower our Nation through Self-Determination and the natural resources given to us by the Great Creator.

The Navajo Nation is a sovereign Nation located in the Four Corners region of the United States, encompassing over 27,425 Square Miles and occupying land in the States of Utah, Arizona and New Mexico. Of the 500 recognized tribes and 318 reservations, the Navajo Nation is the largest with a population topping 300,000 and is larger in land mass than 10 of the 50 states.

The Navajo Nation Government is balanced between three branches including the Executive Branch with a President and Vice President who are elected by the Navajo people, the Legislative Branch with a Navajo Nation Council, five Standing Committees a Speaker and 24 elected Council Delegates representing 110 Navajo communities who each serve on a Committee and the Judicial Branch with a Chief Justice and Supreme Court. Of the 300 thousand members of the Navajo Nation, less than half are able to make a living on the Nation with the others choosing to move to one of the larger cities for work. Our unemployment rate is over 50% and growing with our population as economic development remains stagnate. We currently graduate over 2,000 high school graduates each year while creating an average of 40 new jobs resulting in dire circumstances. Currently, our General Funds represent 1/3 of our overall budget at \$175 million with approximately 60% of that produced from our coal

economy. The remainder of our budget is comprised of external funds from the federal government. We recently collaborated with the W.P. Carey School of Business at Arizona State University to study the economic impact of one of our two coal mines on the Navajo Nation economy. What we found is that our Peabody Coal mine together with our Navajo Generating Station will boost the Navajo Nation economy by over \$13 billion dollars over the next 25 years! That is just the economic benefits to Navajo and does not include the economic leakage enjoyed by the surrounding communities off our reservation. Our 2010 Comprehensive Economic Development Strategy uncovered the fact that 64% of every dollar generated on the Navajo Nation is spent off the reservation due to the lack of retail outlets located within our Nation.

The Navajo economy is often compared to as a third world country. Speaking before the Navajo Nation Council on January 18, 1996, Senator John McCain made the following statement:

*“ . . . Each of us shares a strong commitment to promote and defend tribal sovereignty, tribal self-governance, and tribal self-sufficiency. But my friends, these things we hold dear, will wither and die unless they are watered by a strong Reservation economy that produces a decent standard of living for all our people. Unfortunately, as you well know, economic development success stories in Indian Country are still the exception and not the rule. Most Americans would be stunned to find out that the basic necessities of life they take for granted are solely lacking on the Navajo Reservation and in many other Native American communities across the Country. No other group of Americans is more economically depressed than Native Americans, and no other areas in America suffer more from inadequate infrastructure and a lack of job opportunities than do Indian Reservations and Alaska Native villages. Here at Navajo, your large land-base and membership magnify the destitution and socio-economic problems that infect much of Indian Country. In my lifetime I have been too many places around the world and have experienced many terrible living conditions. What is so shocking is that the social and economic conditions for many Navajos closely resemble those of people living in Third World countries.”*

With our high unemployment rate; our lack of income, paved roads, modern housing and amenities; lower education level; our high poverty rate; give our Navajo economy such a resemblance.

The Navajo Nation has identified four main areas of focus within our Navajo Nation Energy Policy as it relates to the energy needs of the Navajo Nation, which will guide my decisions during my time as Speake of the 23<sup>rd</sup> Navajo Nation Council; first is to protect and expand upon the current jobs and revenues realized by our current energy projects located on the Navajo Nation; nest is to expand and diversify our energy portfolio and transition our energy production into alternative and renewable sources to meet the future needs of our people; another area of focus is to ensure that the Navajo people have access to residential and commercial electricity here at home and within competitive rates; last but certainly not least is to strive to keep our balance with Mother Nature and the needs of our people. With these

guiding principles the Navajo Nation will make decisions that are responsible and meet the needs of our Navajo people.

The Navajo Nation mines approximately 8 to 10 million tons of coal each year, down from 13 to 16 million tons before the U.S. EPA regulations began to take its toll on our resources and we have billions of tons more to mine to feed our Navajo economy. Additionally, we produce approximately 3,750 Megawatts of electricity sold primarily off our Nation, effectively taking advantage of hydroelectricity from the Glen Canyon Dam to meet our Nation's needs. This industry is responsible for more than 2,000 of the highest paying jobs on the Navajo Nation and better than 60% of our General Revenues. These revenues represent our ability to act as a sovereign nation and meet our own needs without a hand out to outside jurisdictions. It is unthinkable to consider what our people would do without these critical funds. In fact, our reliance on these resources has led us to invest in the purchase of our Navajo Mine from BHP this past year to gain greater control of our resources and insure the continuation of these vital funds for our future generations. This purchase was made through our Navajo Transitional Energy Company, who, as its name suggests is mandated to transition our Nation into our energy future by investing no less than 10% of its profits into alternative and renewable energy development. The consequences of the latest rounds of EPA regulations resulted in the shutdown of three of the five power generating units at the Four Corners Power Plant and the forced investment of a billion dollars in BART retrofits on the remaining two units. This in turn reduced the coal mined at our Navajo Mine while simultaneously increasing the cost of power generation. With the economies of scale lost to circumstance, the Four Corners Power Plant and the Navajo Mine were poised to discontinue operation this year if it were not for our purchase of Navajo Mine. While we are now in a position to maintain our jobs and revenues and possibly increase them from this mine, we are being threatened by additional EPA regulations and an unstable energy future. Across the United States, coal economies are feeling the pinch, but not near to the extent as the Navajo Nation, what other economy in the United States stands to lose as much? Some may call this a war on coal, but from the Navajo Nations perspective, this is a war on the Navajo economy and our ability to act as a sovereign Nation.

It is difficult enough working to meet the needs of the Navajo Nation with our current resources; I do not dare imagine the difficulty that would come with a 50% reduction in general revenues due to our coal mines shutting down! With our current budget heavily subsidized by federal funds, this scenario only increases that dependence. Many coal critics have argued that we can simply convert our power generation to natural gas and renewable energy while maintaining our jobs and revenues. Similar arguments were made when the Mohave Generating Station in Nevada shut down in 2005 cutting our coal supply through our Black Mesa Pipeline and we have yet to see any replacement jobs or revenue ten years later. The challenges of economically producing power through gas at the high elevations common on Navajo are enough to discourage the investment. Navajo is open to solar generation although it takes 10 acres per Megawatt to produce commercial power and has yet to sufficiently meet market demand. Even if these resources were possible, we would still see major economic cuts

as our coal mines would shut down which represents over 50% of our jobs and revenues realized through coal power generation.

The challenges are daunting when we look to the future of our Navajo people, our hope lies in the understanding and collaboration of the US Government to insure that the transition of our Nation's energy resources happens in an economically responsible way, considerate of the lives that are impacted by policies written by individuals who have yet to visit our Nation. We continue to request for government to government consultation that is on equal ground, cognizant of our needs and not merely a box to be checked off on yet another government form. Our hope lies in the development of alternative clean coal technologies that would effectively bridge the gap between the utilization of our coal resources and the environmental concerns of the day. We implore the US Government to work with us to develop the financial incentives necessary for investors to bring these clean coal technologies to our reservations where the need is so great, where we have a ready workforce, abundant coal resources and the infrastructure to get gasified coal products and captured carbon into the market. The Navajo Nation wants to be a part of the solution that brings the United States closer to energy independence while meeting our needs at home. We ask that the US Government respect the decisions we make with our State, tribal and regional partners in response to meeting the ever changing environmental regulations while maintaining our regional and tribal economies. When we are able to work together in a meaningful way we can find some middle ground when it comes to our financial stability as a Nation. We want to move towards self-reliance by utilizing our resources to meet our needs while reducing our dependence on external funds from the federal government.

In conclusion, I would like to reiterate the tremendous need to work together to meet the needs of our people and not to take the easy road in implementing federal standards at the peril of local tribal economies. Take the time to truly listen and understand our needs and work with us to find creative solutions to the challenges of our day. Allow us the financial incentives necessary to achieve the realization of basic necessities such as home ownership, electricity, water, access to improved roads and an education for our children so that they may be in a position to do what we are unable to. An education that will allow them to participate in the transition of our energy resources and the financial know how to compete in the worldwide marketplace.

Testimony of Montana Attorney General Tim Fox  
Senate Committee on Indian Affairs Field oversight hearing

**“Empowering Indian Country: Coal, Jobs, and Self-Determination.”**

Crow Agency, Montana

April 8, 2015

Senator Daines, members of the committee, thank you for inviting me to speak here today. I’m Tim Fox, attorney general of the state of Montana.

I grew up in Hardin, and have a deep appreciation for the history, culture, but most important, the people of the Crow Nation. Like most other Montanans, one thing the Crow people treasure is the land they were born and raised in. And like most other Montanans, among the things they would most like to see, for themselves and their children, are opportunities for jobs that will allow them to make a reasonable living in the place they grew up, so they can stay rather than having to move elsewhere of necessity.

The Crow Nation, like the rest of our State, is rich in resources. Those resources, including coal, are currently providing opportunity for Montanans, including the Crow people, and, wisely used, will continue to do so. I am concerned, though, that we are today seeing political and regulatory developments which, though not intentionally targeting the Crow Nation and, more generally, all of Montana, will, if unchecked, destroy present and future opportunities for our people. I would like to talk briefly about a couple of those developments.

One of those developments is the U.S. Environmental Protection Agency’s June 18, 2014 existing source proposal under section 111(d) of the Clean Air Act. I joined the attorneys general of sixteen other states in comments on that proposal, but I also filed separate comments with Chairman Darrin Old Coyote of the Crow Nation, and I want to talk just a minute about those comments.

The Crow Nation’s coal resources are still largely undeveloped, but there is currently one operating mine, the Absaloka Mine, and just that one mine provides two-thirds of the Crow Nation’s annual non-federal budget, and is by far the largest private employer on the reservation.

Unfortunately, one of the very likely effects of EPA’s existing source rule would be to kill the market for the coal produced by the Absaloka Mine, which is nearly all sold to Minnesota utilities. This will in turn kill the mine, causing drastic loss of services and employment on the Crow Reservation.

EPA has a legal duty under Executive Order 13175 to ensure meaningful and timely input by tribal officials in the development of regulatory proposals that affect tribes. In the development of its existing source rule proposal, EPA went through the motions, issuing two “Dear Tribal Leader” form letters, but nobody from the agency contacted the Crow Nation directly in a government-to-government contact, saying, “excuse me, but this proposal could, as implemented

in the State of Minnesota, kill the market for the output from the Absaloka Mine, and we'd like to talk to you about that." The executive Order requires that EPA "ensure" meaningful and timely input. The agency didn't get that job done before it promulgated its proposal, and the agency needs to withdraw the proposal and do the consultation it is required to do.

The second development I wanted to talk about is the importance of keeping open the avenues of interstate commerce which coal mined in Montana needs to travel to reach markets outside our State. As a landlocked state, we are dependent on port facilities in our sister states for shipping Montana-produced bulk commodity products to international markets. There is currently an international market for coal mined in the Northern Powder River Basin, and some coal is in fact being exported from Montana mines to that market. For example 4.7 million tons of coal was shipped in 2013 from the Spring Creek Mine, through Westshore Terminals in British Columbia. But that terminal is at capacity, meaning more port capacity is needed to ensure open markets for our coal.

There are three active proposals to construct terminals which would provide capacity for shipment of coal from the Northern Powder River Basin to international markets, two in the State of Washington, and one in Oregon. The two in Washington, the Millenium Terminal Project at Longview and the Gateway Pacific Terminal at Cherry Point, are in the permit review and environmental analysis stage. The Coyote Island Terminal project in Oregon, which would provide a terminal to take coal from rail at Boardman, Oregon, for transport by barge down the Columbia to Port Westward for loadout onto ocean-going vessels, was denied a fill permit by the Oregon Department of State Lands, and an administrative appeal of that decision is pending.

My office has been involved in the scoping process for the environmental analysis of the Gateway Pacific Project and we are actively tracking the process for the Millenium Project. We have actually intervened in the appeal of the permit denial for the Coyote Island Terminal, along with the State of Wyoming. The reason we have taken these steps is to ensure, as our sister states make their decisions regarding these port proposals, that our State's constitutional right not to have the avenues of interstate commerce unduly burdened is fully protected.

I know from discussions I have had with Chairman Old Coyote, that the Crow Nation shares these concerns. As I mentioned a minute ago, one of the effects of EPA's proposed existing source rule would be to close the power plants which are the market for the Absaloka Mine, and with that possibility looming, the Asian market is the obvious alternative market for coal from that mine. But our coal can't reach those markets without suitable port facilities in our sister states.

This is a very big concern to our State and for the Crow Nation. For the year 2013, the tax revenues collected by the State of Montana on coal mined in Montana totaled \$78,134,334. I have already told you of the economic benefits the Absaloka Mine provides to the Crow Nation. As domestic markets for Montana and Crow coal are diminished by the impacts of political trends and federal regulatory initiatives, access to international markets in Asia will become critical to the economic welfare of our State and the Crow Nation.

Senator Daines, members of the committee, thank you again for giving me some time here today to speak on behalf of the people of Montana. I'm happy to answer any questions you may have.

-END-

**United States Senate Committee on Indian Affairs**  
**Oversight Field Hearing on**  
**"Empowering Indian Country: Coal, Jobs, and Self-Determination"**  
**April 8, 2015**

**Testimony of Crow Nation Chairman Darrin Old Coyote**

**I. Introduction**

Good morning. On behalf of the Crow Nation, I want to thank Chairman Barrasso, Vice-Chairman Tester, Senator Daines and the members of the Senate Committee on Indian Affairs for holding this Oversight Field Hearing on Empowering Indian Country. My name is Darrin Old Coyote and I am the Chairman of the Crow Nation. I appreciate this invitation to provide testimony from the Crow Nation's perspective on coal development, an area central to my administration and a topic that has unlimited potential to improve the ongoing substandard socioeconomic conditions of the Crow people and the surrounding communities in southeastern Montana (the northern portion of the Powder River Basin) and northern Wyoming.

I have served as an elected official of the Crow Nation for over 10 years. Over the past 2 years, with the help of our coal partners and the Crow Nation Legislative Branch, we have taken several meaningful steps toward the successful development of our coal resources and look forward to completing, in the next few years, projects that will positively transform my community. My purpose today is to provide a brief history of the Crow Nation's resources, to summarize my administration's efforts to develop Crow coal in the northern Powder River Basin, and to share the benefits and challenges of Crow coal development.

**II. Brief Overview of Crow Reservation, Land Issues and Resources**

*A. Brief History of Land and Development Challenges*

The Crow Nation is a sovereign government located in southeastern Montana. The Crow Nation has three formal treaties with the federal government, concluding with the Fort Laramie Treaty of May 7, 1868. The Crow Reservation originally encompassed most of Wyoming (including the Powder River Basin) and southeastern Montana, totaling 38.5 million acres. Through a series of treaties, agreements and unilateral federal laws over a 70 year span, Crow territory was reduced by 94% to its current 2.2 million acre area.

In addition to substantial land loss, the remaining tribal land base within the exterior boundary of the Crow Reservation was carved up by the 1920 Crow Allotment Act. In 1919, prior to the Allotment Act, there were 2,453 allotments (individual Crow ownership), consisting of 482,584 acres. By 1935, there were 5,507 Crow allotments, consisting of 2,054,055 acres (218,136 acres were alienated by 1935). The Big Horn and Pryor Mountains were not allotted and still remain reserved for the Crow Nation and its citizens.

Because of allotment and federal probate of Indian property (with many Indians dying without wills), the phenomenon of fractionated land ownership arose - where several (sometimes

hundreds of) owners might have varying interests in a single parcel. By 1928, the *Meriam Report* declared the federal allotment policy to be one of the most disastrous federal policies of all time. During discussions leading up to the *Indian Reorganization Act* of 1934, one congressman explained the fractionating effects of allotment in this fashion:

“It is in the case of the inherited allotments, however, that the administrative costs become incredible.... On allotted reservations, numerous cases exist where the shares of each individual heir from lease money may be 1 cent a month. Or one heir may own minute fractional shares in 30 or 40 different allotments. The cost of leasing, bookkeeping, and distributing the proceeds in many cases far exceeds the total income. The Indians and the Indian Service personnel are thus trapped in a meaningless system of minute partition in which all thought of the possible use of land to satisfy human needs is lost in a mathematical haze of bookkeeping.” 78 Cong.Rec. 11728 (1934), cited in *Hodel v. Irving*, 481 U.S. 704 (U.S.S.D. 1987).

The Crow land base had been decimated by fractionated ownership of various allotments. The Department of the Interior (“DOI”) estimated that over 10% of all fractionated lands within Indian country are actually within the Crow Reservation (with numerous parcels of allotted lands that have more than 10 owners and sometimes more than 100 owners).

Recently, the Crow Nation partnered with DOI and meaningfully addressed the fractionation issue through implementation of the *Cobell Settlement*. As of March 2016, the Crow Land Buy-Back Program (“LBBP”) had a willing buyer – willing purchaser success rate of 64% (Crow allottees sold their interests in various parcels of land to DOI in trust for the Crow Nation). The Crow LBBP resulted in more than \$130 million paid out to Crow landowners, with more than 240,000 equivalent acres purchased for the Crow Nation. The original intent of reducing fractionation was accomplished and, simultaneously, the Crow Nation can make more of the Crow homeland productive for both residential and energy development purposes.

However, the overall loss of the Crow land base and allotment have collectively resulted in checkerboard ownership of reservation lands, giving rise to overlapping governmental authority in Indian country (federal, state, tribal and local). Sometimes, the land issues become cost prohibitive for some project developers. As discussed later, tax incentives are critical in order to level the playing field for Indian energy projects.

#### *B. Present Land, Population, and Education*

The statistical land ownership resulting from the above described legal history (and successful fraction reduction efforts) is approximately: 32% Crow allotments; 33% Crow Nation trust and fee land; and 35% non-Indian fee land (basically 2/3 of surface land is owned by the Crow Nation and individual Crows). However, overall, the pattern of surface ownership generally is “checkerboard” with interspersed Crow Nation trust and fee lands, Crow allotments and non-Indian fee lands. At times, the checkerboard nature of the surface ownership creates challenges, summarized later, for developing the subsurface minerals (almost all of which is owned by the Crow Nation).

Today, there are more than 13,000 enrolled citizens of the Crow Nation, with approximately 9,000 of those residing within the exterior boundaries of the Reservation. Our goal is to invite more of our citizens to return home to live and resume tribal relations, but we must be able to offer homes, jobs, and a place to find their dreams. Our current unemployment rate is 47%. The Crow Nation has always emphasized higher education and we currently have more than 400 annual applications for higher education assistance. Because of federal funding limitations and internal budget constraints, however, we can only partially fund 90 students each year.

In addition to providing financial support for education, we have a separately chartered tribal college (Little Bighorn College, "LBHC") that started operations in 1981. Among the hundreds of LBHC graduates, many are employed on and around the Crow Reservation in a variety of positions including teachers' aides, computer technicians, office managers and administrative assistants. At least sixty have completed bachelor's degrees and are pursuing professions in education, social work, human services, science, nursing, technology, accounting and business. As we move forward in developing our coal resources, LBHC can help to provide our citizens with training in fields for new job opportunities.

### *C. Coal - Past and Present*

The Crow Nation has very substantial undeveloped coal resources. In fact, today, the Crow Indian Reservation contains 2 million acres in subsurface mineral rights, including an estimated 9 billion tons of coal. The Crow Nation has developed a limited amount of its resource, by leasing a portion of its coal reserves for 40 continuous years to Westmoreland Resources, Inc. ("WRI"). WRI owns and operates the Absaloka Mine ("Mine"), a 15,000-acre single pit surface coal mine complex near Hardin, Montana, on the northern border of the Crow Reservation.

The Absaloka Mine was developed to supply Powder River Basin coal to Midwestern utilities and it has produced over 180 million tons of coal since 1974. From the Mine's 5-7 million tons per year of coal production, it provides production taxes and royalties to the Crow Nation – exceeding \$20 million in 2010 when the Mine was operating at full capacity. **The revenue generated from the Mine represents as much as two-thirds of the Crow Nation's non-federal budget.**

Furthermore, WRI employs a 70% tribal workforce, with an average annual salary of over \$66,000, and a total employment expense of approximately \$18.6 million dollars. The Absaloka Mine is the largest private employer within the Crow Reservation. The importance of the Mine to the economy of the Crow Reservation cannot be overstated. Without question, it is a critical source of jobs, financial support and domestically-produced energy. WRI has been the Crow Nation's most significant private partner over the past 40 years.

A recent example demonstrates the importance of the Absaloka Mine to the Crow people. A major unplanned outage at the Mine's largest power plant customer during 2011-2013 resulted in a 50% reduction in tribal coal revenue and numerous employment layoffs. This recent outage reinforced the need for the Crow Nation to pursue multiple coal projects to diversify our revenue base.

### **III. My Administration's Vision on Energy Development: Potential Benefits**

Given our vast mineral resources, the Crow Nation can, and should, be self-sufficient. My goal is clear. My administration desires to develop our mineral resources in an economically sound, environmentally responsible manner that is consistent with Crow culture and beliefs. More than anything, I desire to improve the Crow people's quality of life, create a future with good-paying jobs and employment benefits within the Crow Reservation, and provide hope and prosperity for the next seven generations of Crow citizens.

My larger vision is to become America's energy partner and help reduce America's dependence on foreign oil. Over the next 40 years, the World Energy Council predicts that the world will need to double today's level of energy supply to meet increased demand. Primary energy sources, such as coal, oil and gas, have a finite life and therefore we must have an all-of-the-above energy development strategy to meet America's needs as well as global demand.

My administration stands ready to meet the global energy challenge, but the future both near and long term, must have coal in its equation. With President Obama's recent speech on climate change, we are mindful of the increased efforts, policy and otherwise, to restrict coal as a domestic fossil fuel source to generate electricity (with domestic coal produced electricity being reduced from approximately 50% to 40% in less than a decade). Our coal partners and our coal economist consistently remind us of the difficult environment for domestic coal production.

Despite the challenging environment, the Crow Nation has intensified its efforts to develop its coal resources to diversify its revenue streams. With respect to the Absaloka Mine, the Crow Tribal Legislature approved and I executed an agreement with WRI in March 2013 to expand its mining operations with a lease of an estimated 145 million tons of Rosebud-McKay seam coal resources located adjacent to the Mine. This new lease will provide the Crow Nation with long-term revenues and employment and sustain the operations of the Mine past 2020.

Similarly, in June 2013, the BIA approved another tribally-approved agreement with Cloud Peak Energy ("CPE") to explore, with options to lease and develop an estimated 1.4 billion tons of Crow coal in the southeastern corner of the Crow Reservation. This long-term agreement will also provide much needed revenue to the Crow Nation, increase employment opportunities for Crow and Montana citizens, and diversify Tribal revenue sources. However, the CPE project – named Big Metal ([www.bigmetalcoal.com](http://www.bigmetalcoal.com)), is largely dependent on coal exports through the Northwest.

As such, I have directed my administration to investigate and pursue coal exports, given the increased coal demand in the Pacific Rim. Since 2013, I have sent three Crow delegations to the Northwest to meet and work with other tribal nations, investigate proposed coal export projects, and then to analyze and follow-up on these recent diplomatic discussions and fact-finding trips about possible relationships involving Crow coal, transportation, and export terminal partners. During the last two trips, which I attended, I invited present and potential project partners, as well as tribal leaders from Northwest tribal nations, to visit my homeland to see first-hand Crow coal development and listen to their concerns.

The last two summers I have hosted a Crow Nation Coal Summit to answer questions about coal transportation issues (coal dust and train traffic), jobs (viewing Crow citizens at the Absaloka Mine), reclamation and the potential for future export development. We worked with our coal partners to provide mine tours of CPE's Spring Creek and WRI's Absaloka mine, to provide coal transportation information from BNSF Railway (BNSF) representatives, and to have coal export terminal questions answered by representatives from SSA Marine, the project developers of the proposed Gateway Pacific Terminal marine export facility.

We have been made aware of local concerns regarding coal export projects expressed by citizens in the Northwest. That is the reason I brought industry, tribal nations and local citizens together to inform, educate, and work with each other to address any substantive issues. I will continue to work with everyone and respect tribal treaty rights and local concerns. However, I strongly feel that non-governmental organizations cannot and should not tell me to leave Crow coal in the ground; I was elected to provide basic services and jobs to my citizens and I will steadfastly and responsibly pursue Crow coal development to achieve my vision for the Crow people.

Finally, with a substantial Crow coal resource, I would like to continue to build the first coal-to-liquids ("CTL") plant in North America with carbon capture and utilization. In fact, in 2008, the Crow Nation and our partner signed a project agreement to develop Many Stars, a planned coal-to-liquids project that sought to produce up to 50,000 barrels or more per day of ultra-clean jet and diesel fuel. Crow sought to contract with the U.S. Air Force and other local industries to supply clean diesel fuel that would meaningfully reduce carbon emissions throughout the world, reduce America's dependence on foreign oil, and provide a safe and secure domestic fuel supply to our national defense.

Unfortunately, the economic recession hit and an uncertain national energy policy made it difficult for the proposed project to proceed. We remain hopeful that the Administration can and will support clean coal, that technology advancements can create a smaller scale project, and that clean coal legislation (discussion draft entitled, "Native American Clean Coal Economic Development Act of 2015") to provide for bonding authority with incentives to industry partners will be introduced and passed in this Congress. I am pursuing an all-of-the-above energy development strategy (hydropower, wind, coal export and CTL) but I will need some help in order to effectuate my energy vision.

## **VI. Challenges and the Need to Level the Playing Field**

### *A. EPA's Clean Power Plan*

The Crow Nation and the Montana Attorney General sent joint comments to the EPA on December 1, 2014, to express grave concern about the substantial negative impact that the EPA's Proposed Rule, dated June 18, 2014, and titled, "Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Units," will have on the Crow Nation, its citizens and resources, and their collective future. In sum, both the Proposed Rule dated June 18, 2014, and the subsequent and separate proposed Clean Power Plan Rule for Indian country dated November 4, 2014, simply ignore the Crow Nation's concerns.

The lack of meaningful government-to-government consultation, as required by Executive Order 13175, in developing the aforementioned Proposed Rules is telling. Despite minimal tribal outreach (and no direct contact with elected Crow Nation officials before the rule was proposed), significant substantive policy prescriptions are likely to cause serious setbacks to the Crow Nation, potentially over multiple generations. The longstanding trust responsibility between the federal government and the Crow Nation may be violated unless an exception and/or mitigation of the rule is provided to us.

The Proposed Rule is a major problem for the Crow Nation. The EPA did not consult with the Crow Nation, did not consider the economic impacts on the Crow Nation, and did not provide a less intrusive alternative to the severe effect on the Crow Nation of this Proposed Rule. In sum, the EPA violated its trust responsibility to the Crow Nation and must provide a substantive alternative and/or mitigation of the Proposed Rule.

- i. The agency failed in its duties to consult with the Crow Nation and to consider the economic effects of the proposal on the Crow Nation.*

As mentioned above, the Crow Nation receives revenues equaling 66 percent of its annual non-federal budget from severance taxes and royalties paid for the mining of coal owned by the Crow Nation at the Mine, near Hardin, Montana. Ninety percent of the coal mined from the Mine is sold to, and burned at, electrical generating units (EGU) in Minnesota. The Proposed Rule strongly encouraged the State of Minnesota to demand retirement of the older units of the power plant to meet the carbon reduction goals set by the EPA

The Proposed Rule also sets higher renewable standards for the State of Minnesota to meet by 2030, despite Minnesota law already requiring higher levels of renewable energy to be produced by 2020. Because the Proposed Rule will unfairly penalize Minnesota and other Midwest customers that currently buy and rely on production of Crow coal for its mix of energy production, and since the Minnesota EGU have already taken action to reduce carbon emissions, the result will be a substantial loss of that market for Crow coal.

That in turn will mean drastic hits to the Crow Nation's operating revenues, which will directly cause the loss of services and employment on the Crow Reservation. Despite Executive Orders requiring federal agencies to engage in substantive consultation with Indian Tribes affected by agency proposals, and to consider the impact of proposals on economic growth and job creation, the EPA utterly failed to do so with respect to the effect of this proposal on the Crow Nation.

Executive Order 13175 requires agencies to ensure meaningful and timely input by tribal officials in the development of regulatory policies that affect tribes. In this case, that simply didn't happen. Despite representations at Section III.A.5 of the Proposed Rules that the "EPA conducted significant outreach to tribes," the actual extent of the agency's effort was minimal, at best. Other than a letter purportedly sent to the Tribe (a form letter stating, "Dear Tribal Leader"), no one in the agency contacted the Crow Nation directly – government-to-government – as is required in the aforementioned Executive Order and Presidential Memo that implements EO 13175.

The lack of meaningful consultation is perplexing in light of the fact that the Crow Nation is one of only four tribes nationwide that owns merchantable coal deposits, and is one of only three tribes (out of 566 federally recognized tribes) for whom the mining of coal burned in electrical generating units impacted by the proposal is a hugely significant piece of the Tribal economy. Because the Crow Nation only produces coal with its longstanding development partner and there is not a coal-fired power plant on the Crow Reservation, the EPA Proposed Clean Power Plan for Indian country (those tribes with EGUs within their reservation boundaries) also does not apply.

The November 4, 2014, Clean Power Plan Rule simply provides an option for a tribe to develop its own Section 111(d) plan and, if they choose not to, then the EPA would develop a federal plan necessary to achieve the EPA's suggested carbon emission reductions in Indian country. Since the Crow Nation does not have an EGU on its reservation, the Clean Power Plan Rule is inapplicable to the Crow Nation. Therefore, both sets of the EPA's Proposed Rules do not address the Crow Nation's significant interests impacted as a result of federal agency action.

Furthermore, Executive Order 13563 requires federal agencies to propose or adopt a regulation only upon a reasoned determination that its benefits justify its costs and to tailor its regulations to impose the least burden on society consistent with regulatory objectives. It requires that regulations be based on an open exchange of information and perspectives among State, local and Tribal officials. Any open exchange with Crow Tribal officials would have brought to light the impact of the proposal on the Crow Nation and would have highlighted the unfairly prejudicial impact of the proposal on the Minnesota customer of Crow coal.

### *B. Practical Challenges*

In addition to the EPA's Clean Power Plan, numerous practical problems consistently arise with each proposed Indian coal project. The lease approval and development process is burdensome, slow, and complicated. Federal regulatory requirements for appraisals, surface access approvals and environmental assessments to conduct exploration within the Reservation often create significant delays. Further, incomplete land records (in some cases BIA records for surface and mineral ownership are erroneous, missing and out of date), inadequate BIA staffing (e.g., the BIA area office in Billings, Montana, has one primary individual to work on environmental issues for eight tribal nations), and surface land fractionation (described above) create uncertainty that discourages investment and significantly impedes project development.

It is extremely difficult to compete with off-reservation development because of these problems. Many companies view these additional regulatory and practical burdens as cost prohibitive, even with the best efforts of particular BIA employees and the Crow Nation. Based on our experience in working with current and prospective coal partners, we strongly recommend a two-prong approach to leveling the playing field for energy development in Crow country: (i) eliminate regulatory obstacles (we provided written support for H.R. 1548, Native American Energy Act); and (ii) permanently extend existing tax incentives to offset the extra development burdens.

### *C. Leveling the Playing Field*

There are a few federal tax incentives that encourage investment and development in Indian country, but their utility is diminished by their short-term nature. Accelerated depreciation and the Indian employment tax credit are two examples of such incentives (the latter needs some modifications to enhance its effectiveness). These incentives, originally enacted in the 1993 Budget Reconciliation Act, have been extended year-to-year in the tax extenders package and, as such, generally are not relied upon by potential investors with large Indian energy projects because of the extended length of time (often 5-10 years for large coal projects) that development takes before the energy commodity is produced. The Crow Nation supports the permanent extension of these tax incentives, with modifications, but another more specific tax incentive is the most important for Crow coal development.

The Indian coal production tax credit ("ICPTC"), originally enacted in the 2005 Energy Policy Act, has kept the Absaloka Mine open and competitive since 2006. This credit neutralized the threat of a potential mine closure and also continued WRI's ability to provide critical employment and revenue for essential Crow governmental functions. Like the aforementioned tax incentives, it expired on December 31, 2014, and continues to be part of the overall tax extenders package.

In order to overcome all of the additional regulatory costs and land transaction issues described above, the Crow Nation seeks a permanent extension of ICPTC, with a few modifications. We would like for the ICPTC to be used against the alternative minimum tax, to extend the placed in service date to include the aforementioned projects, and to eliminate the unrelated person requirement in the original credit (to allow for a CTL project in the future). With these tax incentives made permanent, the Crow Nation would have the opportunity to compete with others on a level playing field.

## **V. Market Access for Crow Coal**

### *A. Crow Tribe Interest in Infrastructure*

The Crow Nation has carefully examined its options for providing future economic opportunity for its members and has elected to monetize its coal asset by continuing to selling it for domestic power generation and exporting it to international markets. The existing and future growth in the international energy markets for coal provides the opportunity for the Crow Nation to obtain full value for their resource and would offset their loss of revenue caused by the EPA's decisions.

In pursuit of exporting Crow coal, the Crow Nation is engaging in interstate commerce and international trade. Crow Nation has partnered with CPE, BNSF and SSA Marine to gain access to international markets and compete with other nations in supplying a secure source of energy to meet global demand to United States trading partners.

Powder River Basin coal is exported out of Canadian ports in British Columbia today. In the absence of U.S. port capacity, British Columbia ports have been expanding to receive U.S. cargoes. The Crow Nation recognizes the national importance of the Gateway Pacific Terminal as the best potential new site to ship U.S. cargoes through U.S. ports.

### *B. The Big Metal Mine Project*

The Crow Nation is partnered with CPE on the Big Metal Project. The agreement is for the exploration and the option to lease up to 1.4 billion tons of coal from the Crow Reservation's southeast corner. CPE has demonstrated their commitment to both safety and the environment, and we appreciate their leadership as one of this country's largest coal producers. In addition, CPE has been a good partner with the Crow Nation, providing college scholarships to more than 40 Crow students and supporting those in need. All of this has happened while CPE has worked with the Tribe to complete exploratory drilling, which has been ongoing since June of 2014.

In developing the Big Metal Mine project on Crow lands, the Crow Nation has a vital interest in a fact-based, timely decision on the Gateway Pacific Terminal project in Whatcom County, Washington as an export terminal for Crow coal. While not directly related to the development of the Big Metal Mine, a marine export facility is necessary infrastructure for supporting the full realization for the Crow Nation of the economic opportunity for its coal. Crow recognizes attaining full economic value for the Crow coal resource requires meeting existing and future international coal energy demand; to that end, Crow interests are aligned with Gateway Pacific Terminal's success and the connecting rail infrastructure.

### *C. Energy Poverty and the Global and Asian-Pacific Coal Demand*

Let me address a few key issues pertaining to coal and its place in the world's energy portfolio and in the amelioration of energy poverty. According to the International Energy Agency, 1.3 billion people are without access to electricity. That is 18-percent of the world's population or nearly 1 in 5 people. For many of these people, coal-fueled, low-cost, reliable electricity represents an opportunity to climb out of the misery of poverty.

Coal is an important component of the world's energy portfolio until better solutions are arrived at, especially in those countries that are in need of electrification to resolve poverty. A key goal of the Copenhagen Accord of 2010 is to provide energy to these impoverished populations. For the time being, coal is simply an essential source of fuel.

According to the International Energy Agency, global demand for coal will increase to more than 9 billion tons of coal by 2019 with much of that growth fueled by demand from Asia and India. Since the beginning of the 21st century, coal has been the fastest-growing global energy source worldwide. According to the U.S.'s Energy Information Administration, "Japan imported nearly 211 million short tons of coal in 2013, up from 204 million short tons in 2012, after more coal capacity came online." In addition, the Japanese are funding coal-fueled power plants in Japan and throughout Asia, leading to increased demand.

Bill Gates, himself a climate change activist, offered this observation on the present need for the use of fossil fuels in developing countries: "[People in poor countries] desperately need cheap sources of energy now to fuel the economic growth that lifts families out of poverty. They can't afford today's expensive clean energy solutions, and we can't expect them to wait for the technology to get cheaper." *Gatesnotes, The Blog of Bill Gates, June 25, 2014*

Independent experts at places like Stanford University state that U.S. coal exports will not increase the usage of coal in Asia, but will likely replace inferior sources of coal from other countries. As well, they have concluded that exporting U.S. coal will not increase greenhouse gas emissions and may actually reduce them.

As long as coal is to be utilized, from an environmental perspective, Powder River Basin coal is a preferred alternative (and has been called “clean coal” by the USGS), because it is lower in sulfur, ash, and other contaminants. As well, it is mined under the world’s highest labor and environmental standards.

Cloud Peak Energy is the largest U.S. supplier of coal for electricity to South Korea. Last year alone, Cloud Peak Energy shipped 4 million tons to Asian utilities, many of whom are constructing the world’s most-advanced coal-fueled power plants. According to the U.S. Energy Information Administration, “[c]oal consumption in South Korea increased by 55% between 2005 and 2012, driven primarily by growing demand from the electric power sector.” South Korean utilities are currently adding even more coal-fueled power plants to meet the country’s increasing need for electricity.

The increasing demand for power from coal has raised questions about air quality impacts, both locally and globally. It is important to note that Powder River Basin coal from Crow mines is lower in sulfur dioxide and nitrogen oxide, which is better for the environment than the coal that is currently mined in Asian countries. Together with modern power plant technology being developed in Asia, use of Powder River Basin coal may reduce, and not raise, global emissions of air pollutants and carbon emissions.

#### *D. Rail Transportation*

BNSF is the leading railroad in the U.S. with a network of 32,500 route miles, 48,000 employees and 8,000 locomotives. Montana and Wyoming are home to over 4,000 BNSF employees and their families. Payroll for these two states exceeds \$300 million. BNSF is aggressively investing to preserve, maintain, and grow capacity across its 28-state network with a capital investment plan of over \$5 billion in 2014 and \$6 billion in 2015. Much of this investment is dedicated along its major coal routes.

BNSF Railway serves the Powder River Basin (PRB) region, transporting coal to customers throughout the Midwest and southern regions of the U.S., as well as to the west coast for export. Since 2000, BNSF has doubled coal delivery to Eastern customers from 50 to 100 million tons. In addition, BNSF delivers more coal than any other US company, including 57% from the PRB region.

The Federal Railroad Administration determined that 2013 and 2014 were the safest in US history for freight railroads. With major investment in infrastructure, safe operating practices, and a comprehensive safety culture, BNSF continues to make great strides in their highest priority of safety.

#### *E. Gateway Pacific Terminal*

The Terminal developer, SSA Marine, is a Washington State corporation founded in 1949 in Bellingham, Washington. They have grown to be the largest privately held terminal operating company in the world. In 1991, SSA Marine's subsidiary, Pacific International Terminals, Inc., secured the property at Cherry Point, Washington State. Since then, they have taken thoughtful steps to develop the 1,500-acre property located in Whatcom County, 17 miles south of the U.S.-Canadian border. Pacific International Terminals has committed to develop the Terminal while ensuring that the environment, the community and shippers' interests all benefit.

Pacific International Terminals submitted an application for project permits in February 2011 to develop and operate the proposed Gateway Pacific Terminal ("Terminal") as a multi-commodity bulk terminal for transshipment of dry bulk commodities between rail and marine transportation systems. It is intended to meet the need for a West Coast marine shipping facility to serve the transpacific market.

The Terminal is designed to process up to 54 million tons of dry bulk commodities annually, including up to 48 million tons of coal. Other potential cargoes are grains, potash and wood bio-fuels. It will be the fourth pier at Cherry Point, a designated Heavy Impact Industrial zone, located next to the existing BP Cherry Point Refinery, the ALCOA – Intalco Works aluminum smelter and Phillips 66 Ferndale Refinery.

Cherry Point is an ideal location for the Terminal. The existing heavy industrial utilities and existing rail line are essential for efficient operation of the marine shipping facility. Even more important is the naturally occurring deep water requiring no dredging to construct a wharf that will accommodate deep-draft "Capesize" bulk cargo vessels. The Terminal is adjacent to a designated international shipping corridor that is highly regulated by a Vessel Traffic System jointly operated by the U.S. and Canadian Coast Guards for over 40 years with great success.

The economies of scale of Capesize vessels allows them to be more fuel, carbon, and cost-efficient than smaller ships in moving a ton of product. Approximately 75% of the cost of landing U.S. bulk cargo in Asia is related to transportation. Shipping U.S. commodities in Capesize vessels can cut overall ocean transportation costs by 20-30%. This is an important factor allowing Crow and other U.S. producers to be competitive in the growing Asian markets.

The Terminal is being designed and engineered to meet Washington State's high environmental standards and is already undergoing a rigorous evaluation of the environmental, social, and economic benefits and impacts in an Environmental Impact Statement (EIS). The State Environmental Policy Act (SEPA) EIS, led by Whatcom County and the Washington Department of Ecology. The U.S. Army Corps of Engineers is the Federal lead agency for the National Environmental Policy Act (NEPA). The State and Federal EIS's will provide the basis for making informed decisions on the Terminal project.

The privately funded Terminal will provide a big lift to the local economy during construction, and a permanent boost in Whatcom County's industrial sector with hundreds of new, permanent family-wage jobs. Construction will generate approximately 4,430 direct and indirect jobs and nearly \$92 million in state and local taxes over two years. When operating at full capacity, the

Terminal will sustain approximately 1,250 permanent direct and indirect jobs and generate about \$11 million annually in local and state tax revenues. Altogether, with the tax revenue and wages during two years of construction plus 10 years of full operations, the Terminal would bring more than \$1.8 billion in revenue to the region.

## **V. Conclusion**

Today, the Crow Nation desires to develop its vast coal resources not only for itself, but for our energy partners, the surrounding communities and for the United States. By developing Crow coal via domestic markets, export terminals and coal conversion, we firmly believe we can help ourselves while simultaneously meeting national energy goals -- achieving energy independence, securing a domestic supply of valuable energy, and reducing the country's dependence on foreign oil. My administration has been very busy in working to develop our coal resources and to remove obstacles to successful development.

I simply desire for the Crow Nation to become self-sufficient by developing its own coal resources and to provide basic services for the health, hopes and future of the Crow people. With help from you - our historic treaty ally – in leveling the energy development playing field, we can achieve my vision and both benefit immensely.

Mr. Chairman and Committee members, thank you again for the opportunity to testify on this critical subject before you today. I would be happy to answer any questions.

## Addendum

### Additional Crow Nation Perspective on World Energy Demand and Coal Exports

*The Crow Nation has carefully examined its options for providing economic opportunity for its members and has elected to monetize its coal asset for export to Pacific Rim countries.*

Global climate issues are an administration priority and the Crow people share the President's concern. Coal is an important component of the world's energy portfolio until better solutions are arrived at, especially in those countries that are in need of electrification to resolve poverty.<sup>1 2</sup> A key goal of the Copenhagen Accord of 2010 is to provide energy to these impoverished populations. For the time being, coal is simply an essential source of fuel.<sup>3</sup>

Bill Gates offered this observation on the present need for the use of fossil fuels in developing countries: “[People in poor countries] desperately need cheap sources of energy now to fuel the economic growth that lifts families out of poverty. They can't afford today's expensive clean energy solutions, and we can't expect them wait for the technology to get cheaper.” *Gatesnotes*, The Blog of Bill Gates, June 25, 2014

U.S. coal exports will not increase the usage of coal in Asia<sup>4</sup>, but will likely replace inferior sources of coal from other countries. As long as coal is to be utilized, from an environmental perspective, Powder River Basin coal is a preferred alternative (and has been called “clean coal” by the USGS), because it is lower in sulfur, ash, and other contaminants.<sup>5 9</sup> As well, it is mined under the world's highest labor and environmental standards.

Exporting U.S. coal will not increase greenhouse gas emissions and may actually reduce them.<sup>6</sup> If the U.S. does not build the port capacity to export its own coal, then Canada and/or Mexico are likely to do so.<sup>7</sup>

The Crow need the option of shipping their product through an efficient west coast port. The proposed Gateway Pacific Terminal in northwest Washington would have a maximum coal exporting capacity of 48 million metric tons per year. (The facility is being proposed by Washington-based SSA Marine, which is the nation's leading shipping terminal operator with 125 locations worldwide.) Although this would be an economically transformative activity for the Crow people, it would constitute a tiny fraction of coal consumption in Asia.<sup>8</sup>

Crow coal exports will support the purposes of the administration's National Export Initiative and NEI/NEXT, and help to increase trade with other countries. As well, it is consistent with national policies (such as those articulated in the National Defense Authorization Act) that aim to support our Asian allies, who need affordable and geo-politically stable sources of fuel.

Freedom of interstate commerce and reservation of power to regulate commerce (national and tribal nations) to the Congress (as opposed to individual states) are foundational principles embedded in Article I, Section 3 of the U.S. Constitution. That same section reserves to the Congress the exclusive power to regulate commerce "with the Indian tribes." The governments of North Dakota, Wyoming, and Montana have expressed concerns that the environmental review processes for west coast coal export projects are being used to interfere with constitutionally protected interstate commerce.

***The export of Crow coal supports the people of the Crow Nation and is consistent with the federal government's constitutional and treaty trust obligations to the tribe.***

Footnote References--World Energy Demand and Coal Exports

<sup>1</sup> The Global Energy Network Institute has confirmed, “Every single one of the United Nations’ Millennium Development Goals requires access to electricity as a necessary prerequisite.” The International Energy Agency’s (IEA) Faith Birol, agrees and states, **“The importance of coal in the global energy mix is now the highest since 1971. It remains the backbone of electricity generation and has been the fuel underpinning the rapid industrialization of emerging economies, helping to raise living standards and lift hundreds of millions of people out of poverty.”**

*Letter from National Mining Association to Export-Import Bank of the U.S., November 8, 2013*

<sup>2</sup> **“Like it or not, coal is here to stay for a long time to come... Coal is abundant and geopolitically secure, and coal-fired plants are easily integrated into existing power systems.”**

## MEMORANDUM

**TO: CHAIRMAN BARRASSO, VICE CHAIRMAN TESTER, AND MEMBERS OF THE COMMITTEE ON INDIAN AFFAIRS**

**FROM: T. MICHAEL ANDREWS, MAJORITY STAFF DIRECTOR AND CHIEF COUNSEL**

**DATE: MONDAY, APRIL 6, 2015**

**RE: OVERSIGHT FIELD HEARING ON “EMPOWERING INDIAN COUNTRY: COAL, JOBS, AND SELF-DETERMINATION”**

---

On Wednesday, April 8, 2015, at 10:30 a.m., MDT, at the Health & Wellness Center of the Little Big Horn College in Crow Agency, MT, the Committee will hold an oversight field hearing on “Empowering Indian Country: Coal, Jobs, and Self-Determination.” The purpose of the hearing is to examine the impact of coal development by tribes and how the Environmental Protection Agency’s proposed rule will effect existing stationary sources who use tribal coal.

### WITNESSES

The following witnesses have been invited:

#### **Panel I**

- **THE HONORABLE DARRIN OLD COYOTE**, Chairman, Crow Tribe of Montana, Crow Agency, MT
- **THE HONORABLE TIM FOX**, Attorney General, State of Montana, Helena, MT

## OVERVIEW

Coal is a fossil fuel, composed of carbon, hydrogen and oxygen.<sup>1</sup> It is more plentiful than oil or gas and found worldwide. In the United States, coal reserves stand at 264 billion tons.<sup>2</sup> The three major coal-producing states are in Wyoming, West Virginia, and Kentucky.<sup>3</sup> Coal has many purposes but the most significant uses are for electricity generation, steel production, and cement manufacturing.<sup>4</sup>

Coal is mined by two methods: surface or opencast mining and underground or deep mining. Surface mining is used by the Crow Tribe, the Navajo Nation, and the Hopi Tribe, but tribes may use either method, if possible. Surface mining is used when the coal seam is located near the surface, where 90% or more of the coal can be recovered. After the soil and rock are broken up with explosives and the coal seam is opened, equipment is used to drill, fracture, and mine with the coal being sent to a preparation plant for shipment or sent directly for use.

The Crow Tribe, the Navajo Nation, the Hopi Tribe, and the Ute Tribe of the Uintah and Ouray Reservation mine coal. The Northern Cheyenne Tribe in Montana are considering mining coal on their lands. The Crow Tribe has been known to hold about 24% of the U.S. coal reserves.<sup>5</sup>

In 2002, the Powder River Basin located in Montana and Wyoming surged past the Appalachian coalfields to become the nation's largest coal-producing region.<sup>6</sup> The Crow Indian Reservation contains 2 million acres in subsurface mineral rights, including an estimated 9 billion tons of coal. The Tribe's coal reserves are found within the Powder River Basin, which accounts for about 40% of U.S. coal production.<sup>7</sup>

The Crow Tribe of Montana has contracted with Cloud Peak Energy to mine 20 million tons of coal annually to be shipped through two proposed ports on the west coast to Asia.<sup>8</sup> Cloud Peak Energy is currently exploring the Crow Indian Reservation to confirm the quality and quantity of coal available. The "option to lease" contract between the Crow Tribe and Cloud Peak Energy agrees to: future payments to the Tribe for a five-year lease, production taxes and royalties to the

Tribe on any coal extracted from the reservation, tribal hiring preference for mining jobs, and scholarships for tribal members.<sup>910</sup>

Since 1974, Westmoreland Resources, Inc. has been mining coal on the Crow Indian Reservation. It produces about 6 million tons of coal a year and employs about 80 people. 70% of the mine's workforce are tribal members and they are the largest private employer within the Crow Indian Reservation. In 2010, when the mine was operating at full-capacity the Tribe received \$20 million in production taxes and royalties. The revenue generated from the mine contributes up to two-thirds of the Crow Tribe's annual non-federal budget.

### **EPA PROPOSED RULE ON EXISTING POWER PLANTS**

In 2009, President Obama pledged to reduce greenhouse gas emissions (GHGs) in the United States by 17% below the 2005 levels by 2020, and by 80% by 2050. In November 2014, the President announced additional goals to reduce GHGs by 26-28% by 2025.

On June 2, 2014, the Environmental Protection Agency (EPA) proposed standards for limiting GHGs from existing fossil fuel power plants under Section 111(d) of the Clean Air Act. The proposal appeared in the Federal Register on June 18, 2014 as "Carbon Pollution Emission Guidelines for Existing Stationary Sources: Electric Utility Generating Unit" (Clean Power Plan). The public comment period ended December 1, 2014 where the EPA received almost 2 million comments on the proposed rule. In addition to the comment period, the EPA held hearings in Denver, Atlanta, Pittsburgh, and Washington, DC. The final rule is set to be published this summer.

The proposed rule is to reduce GHGs and meet certain target rates from existing power plants within a set timeframe, starting in 2020 and going to 2030. The Clean Power Plan uses 2012 carbon emission levels as the baseline for measuring target rates. The EPA encourages states to adopt plans that incorporate cleaner energies such as: renewable energy standards, retirements, expanding nuclear, efficiency improvements at plants, and more. States can develop their own plans or work together with other states. If a state does not submit a plan or the plan submitted is not approved by the agency, the EPA will issue a Federal Implementation Plan (FIP). A "FIP is a federally implemented plan to achieve attainment of air quality standards and is used when a state is unable to develop an adequate plan."<sup>11</sup>

COMMITTEE ON INDIAN AFFAIRS

WASHINGTON, DC 20510-6450

MIKE ANDREWS, MAJORITY STAFF DIRECTOR  
ANTHONY WALTERS, MINORITY STAFF DIRECTOR

Another EPA proposal dated November 4, 2014 and titled, “Clean Power Plan for Indian Country,” aims to “maintain an affordable, reliable energy system, while cutting this harmful pollution and protecting our health and environment now and for future generations.”<sup>12</sup> There are two main elements to the plan: 1) emission rate-based goals specific to each area of Indian country and U.S. territory that has affected electric generating units (EGUs); and 2) guidelines for the development, submission and implementation of plans to achieve the goals. The goal is to meet the target areas by 2030, while making meaningful efforts by 2020.<sup>13</sup>

The EPA is proposing goals for affected power plants within the Navajo Nation, the Ute Tribe of the Uintah and Ouray Reservation, and the Fort Mojave Tribe. The four sources addressed in the plan is: 1) South Point Energy Center in the Fort Mojave Indian Reservation, 2) Navajo Generating Station in the Navajo Nation, 3) Four Corners Power Plant in the Navajo Nation, and 4) Bonanza Power Plant in the Ute Indian Reservation.<sup>14</sup>

Many states including Montana, Oklahoma, West Virginia, Nebraska, Alabama, Ohio, South Carolina, South Dakota, Utah, and Wyoming, have filed comments in objection to the Proposed Rule. Based on the comments submitted, 32 states have opposed the existing power plants rule.

## **EPA PROPOSED RULE AND ITS EFFECT ON INDIAN COUNTRY**

For the tribes who mine coal, the revenues they receive account for a majority of their operating budget. For the Crow Tribe, 90% of the coal mined is sold to an electrical generating unit in Minnesota. The EPA proposed rule would encourage the older power plants to close or meet the demands of reduced GHGs. It may limit tribes’ options when exercising their authority to develop coal resources.

If the proposed rule goes into effect, the Crow Tribe and other tribes will lose non-federal sources of revenue. These revenues help tribes decrease their unemployment rate, fund services and programs on reservations, increase education opportunities among the tribal youth, assist members with housing access, and create jobs for Natives and non-Natives.

Hi Stephenne –

Hopefully you had a chance to enjoy some of the recess. I have a few items to follow up on.

**LWCF Hearing**

Can confirm that Michael Connor, the Deputy Secretary of the Department of the Interior will be testifying at the LWCF hearing? I want to get the formal invitations out ASAP.

Please provide the full address for the invite and the name and phone number for his assistant so that I can pass that along to our Administrative Director.

**BLM Fracturing Rule Subcommittee hearing**

Please provide the full address for Neil for the invite and the name and phone number for his assistant so that I can pass that along to our Administrative Director.

We will be sure you are cc'd on the emailed invites when they go out.

Thanks, Lucy

Lucy--

We can confirm that Deputy Secretary Connor will be our witness for the April 22nd Hearing.

The address for the invite is:

1849 C Street NW  
Washington, DC 20240

You can use my or Sarah's information for your contact as both their assistants.

Thanks,

Stephenne

MEMORANDUM FOR THE BOARD OF DIRECTORS

Table with 8 columns: ID, Description, Date, Amount, Unit, Location, Historical OIDs, and Comments. Row 1: 36 64329.3, Bill Williams Over, prior to 1905, Irrigation, 1,143.9 Acre, Irrigation with Litch and Litch, Historical OIDs: 55 608743-55 522657, revise 36 Claim to specific claimed area as 1,143.9 Acre following partial severance and transfer of this water right to Creech and Creech.

61 The tribe and the stated states as trustee for the tribe agree to confirm 2,325.6 Acre of water rights at Litch and Litch and to the partial severance and transfer of 1,181.7 Acre of those water rights to the Creech and Creech. See Exhibit 4.1 (b). The attached listed in this section is the volume of water rights that will remain in place at Litch and Litch.

**RESTRICTIVE COVENANT**

This Restrictive Covenant is made this \_\_\_\_\_ day of \_\_\_\_\_, 2014, among Freeport Minerals Corporation through its wholly owned subsidiary AZ Big Sandy, LLC (collectively "Freeport") and the Hualapai Tribe (the "Tribe") (collectively the "Parties").

**1.0 RECITALS**

- 1.1 The Parties have executed the Hualapai Tribe Bill Williams River Water Rights Settlement Agreement ("Agreement") to resolve all remaining legal disputes relating to certain water right claims of Freeport, DOI and the Tribe.
- 1.2 Freeport is the owner of certain real property located within Mohave County, Arizona, as more particularly depicted in **Attachment A** attached hereto, and referenced by name herein as the "Banegas Ranch Parcel."
- 1.3 The provisions of this Restrictive Covenant are intended to further the purposes of the Agreement by prohibiting Freeport from drilling new production wells on the Banegas Ranch Parcel and limiting Freeport's right to divert water from certain existing and new wells located on the Banegas Ranch Parcel, as set forth herein.

**2.0 GENERAL DECLARATION**

- 2.1 Freeport, in consideration of the mutual promises set forth in the Agreement, grants this Restrictive Covenant and, in so doing, declares that the Banegas Ranch Parcel is now subject to and shall in the future be conveyed, transferred, leased, encumbered, occupied, or otherwise used, in whole or in part, subject to this Restrictive Covenant.
- 2.2 The purpose of this Restrictive Covenant is to assist the Parties in resolving certain water right claims of the Parties and to provide protection for Cofer Hot Spring, which is located with the boundaries of the real property described in

**Attachment B** attached hereto and referred to herein as the □Cholla Canyon Ranch.□

- 3 Each condition and restriction set forth in this Restrictive Covenant touches and concerns all of the Banegas Ranch Parcel, and the Restrictive Covenant granted in paragraph 3.0 shall run with the Banegas Ranch Parcel, shall be binding upon all current and future owners of the Banegas Ranch Parcel, and shall inure to the benefit of the Tribe and be appurtenant to the Cholla Canyon Ranch as described in **Attachment B** hereto.□
- 4 Freeport further conveys to the Tribe the right to enforce the conditions and restrictions set forth in this Restrictive Covenant.

### **3.0 RESTRICTIVE COVENANT**

**3.1** From and after the Enforceability Date set forth in the Agreement, and subject to Section 3.2 below, Freeport shall not:

(a) Divert Water from the PW-2 (ADWR Registration No. 55-581262), OW-2 (No. 55-582104), and OW-4 (No. 55-581265) wells located on the Banegas Ranch Parcel; or

(b) drill new Production Wells within the Banegas Ranch Parcel in the volcanic aquifer that supplies Cofer Hot Spring.

**3.□** Notwithstanding the foregoing, Freeport shall have the right to Divert up to 35 gpm of Water from wells PW-2, OW-2 and OW-4, and to drill new Exempt Wells in the volcanic aquifer within the Banegas Ranch Parcel.

**3.3** This Restrictive Covenant does not limit the number of wells Freeport may drill in the alluvial aquifer or other aquifers that are not connected to the volcanic aquifer that supplies Cofer Hot Spring.

**3.4** For the purposes of this Restrictive Covenant

(a) the term □Production Wells□ shall mean wells with a pumping capacity greater than 35 gallons per minute used to withdraw Water for mining, agricultural, or industrial purposes, and for domestic uses incidental thereto.

(b) the term □Exempt Well□ shall mean a well having a pump with a maximum capacity of not more than 35 gallons per minute.

(c) the term □Divert□ shall mean to remove, withdraw, develop, produce or capture Water by means of a ditch, canal, flume, bypass, pipeline, pit, collection or infiltration gallery, conduit, well, pump, turnout, other mechanical device, or any other act of man.

- (d) the term "Water" shall mean, Groundwater, Surface Water or Effluent.
- (e) the term "Effluent" shall mean water which, after being used for domestic, municipal, industrial, or mining purposes, is available for reuse for any purpose, whether or not the water has been treated to improve its quality, except water that has been used solely for hydropower generation.
- (f) the term "Groundwater" shall mean water underneath the surface of the Earth within Arizona that is not Surface Water or Effluent.
- (g) "Surface Water" shall mean all water that is appropriable under Arizona law.

**3.5** If the Tribe believes the diversions described in Subparagraph 3.2 above or the number or location of Exempt Wells drilled into the volcanic aquifer on the Banegas Ranch Parcel is causing an adverse impact to the flow of Cofer Hot Spring, the Tribe and Freeport shall attempt to resolve the issue through informal discussion or, if required, through formal dispute resolution, utilizing the process described in Paragraph 9.0 of the Agreement.

**4.0 GENERAL PROVISIONS**

- 4.1** Upon the Enforceability Date as defined in Section 2.17 of the Agreement, Freeport shall record this Restrictive Covenant in a timely fashion with the Mohave County Recorder.
- 4.2** Upon the recording of this Restrictive Covenant, all successors, assigns or owners of any portion of the Banegas Ranch Parcel or the Cholla Canyon Ranch shall be conclusively deemed to have consented and agreed to every condition and restriction contained in this Restrictive Covenant, whether or not any reference to this Restrictive Covenant is contained in an instrument by which such person or entity occupies or acquires an interest in the Banegas Ranch Parcel or the Cholla Canyon Ranch.
- 4.3** Upon any violation by Freeport of any condition or restriction contained in this Restrictive Covenant, the Tribe shall have the remedies described in the Agreement. Upon any violation by any other person who is bound by this Restrictive Covenant of any condition or restriction contained in this Restrictive Covenant, the Tribe may enforce this Restrictive Covenant through any available legal or equitable remedy.

[SIGNATURE PAGES FOLLOW]

IN WITNESS WHEREOF, Freeport and the Tribe have executed this Restrictive Covenant as of the date and year set forth above.

**LEGAL DESCRIPTION FOR BANEGAS RANCH PARCEL**

**PARCEL NO. 1:**

The South half of Section 5, Township 15 North, Range 12 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT the Northwest quarter of the Southwest quarter.

Said land being shown on Record of Survey Plat recorded October 30, 2000 in Book 20 of Records of Surveys, Page 23, records of Mohave County, Arizona.

**PARCEL NO. 2:**

That portion of the West half of Section 7, Township 15 North, Range 12 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona and being more particularly described as follows:

BEGINNING at the North quarter Section corner of said Section 7 and running thence South 00 degrees 03 minutes 55 seconds East, along the East boundary of the West half of said Section 7, a distance of 4212.25 feet;

Thence South 89 degrees 56 minutes 05 seconds West, a distance of 387.20 feet;

Thence North 00 degrees 03 minutes 55 seconds West, a distance of 225.00 feet;

Thence North 89 degrees 56 minutes 05 seconds East, a distance of 337.20 feet;

Thence North 00 degrees 03 minutes 55 seconds West, along the line 50.00 feet West of and parallel with the East boundary of the West half of said Section 7, a distance of 1087.98 feet;

Thence South 89 degrees 55 minutes 03 seconds West, a distance of 200.00 feet;

Thence North 00 degrees 03 minutes 55 seconds West, a distance of 245.66 feet;

Thence North 89 degrees 59 minutes 36 seconds West, a distance of 2273.21 feet;

Thence South 00 degrees 09 minutes 08 seconds East, a distance of 245.35 feet;

Thence South 00 degrees 08 minutes 27 seconds East, a distance of 779.58 feet;

Thence North 89 degrees 51 minutes 33 seconds East, a distance of 346.00 feet;

Thence South 00 degrees 08 minutes 27 seconds East, a distance of 220.00 feet;

Thence South 89 degrees 51 minutes 33 seconds West, a distance of 346.00 feet;

Thence South 00 degrees 08 minutes 27 seconds East, along a line being 50.00 feet East of and parallel with the West line of said Section 7, a distance of 1636.12 feet to a point on the South line of said Section 7;

Thence South 89 degrees 43 minutes 53 seconds West, along the South line of said Section 7, a distance of 50.00 feet to the Southwest corner of said Section 7;

Thence North 00 degrees 08 minutes 27 seconds West, along the West line of said Section 7, a distance of 2635.80 feet to the West quarter Section corner of said Section 7;

Thence North 00 degrees 09 minutes 08 seconds West, along the West line of said Section 7, a distance of 2641.62 feet to the Southeast corner of Section 1, Township 15 North, Range 13 West;

Thence North 00 degrees 04 minutes 46 seconds West, along the line common to the West line of said Section 7 and the East line of said Section 1, a distance of 248.25 feet to the Northwest corner of said Section 7;

Thence North 89 degrees 47 minutes 36 seconds East, along the North line of said Section 7, a distance of 2576.91 feet to the Point of Beginning.

PARCEL NO. 3:

Government Lots 3 and 4 of Section 18, Township 15 North, Range 12 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT that portion of said Lot 3 conveyed to the State of Arizona for Highway 93 and more fully described in Book 3759, Page 677 of Official Records.

PARCEL NO. 4:

The East half of the Southwest quarter of Section 12, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

PARCEL NO. 5:

A) The Southeast quarter of the Northwest quarter and the Southwest quarter of the Northeast quarter of Section 13, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT all oil, gas, coal and minerals as reserved in Deed recorded in Book 60 of Deeds, Page 195.

B) The Southeast quarter of the Northeast quarter, the North half of the Northeast quarter, the Northeast quarter of the Northwest quarter and the East half of the Southeast quarter of Section 13, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT all oil, gas, coal and minerals as reserved in Deed recorded in Book 84 of Deeds, Page 362.

C) The West half of the Southeast quarter of Section 13, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT the South 600.00 feet thereof.

PARCEL NO. 6:

The Southwest quarter of Section 36, Township 16 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT therefrom the following:

A) COMMENCING at the West quarter corner of said Section 36;

Thence South 89 degrees 43 minutes 25 seconds East, a distance of 360.00 feet;

Thence South 00 degrees 00 minutes 00 seconds East, a distance of 18.00 feet to the TRUE POINT OF BEGINNING, said point being marked by a 5/8 inch rebar cap RLS 19319 North 00 degrees 00 minutes 00 seconds East 19.00 feet;

Thence South 89 degrees 43 minutes 23 seconds East, a distance of 594.12 feet to a point being marked North 07 degrees 17 minutes 44 seconds East, 19,15 feet by a 5/8 inch rebar and cap RLS 19319;

Thence South 07 degrees 17 minutes 44 seconds West, a distance of 1082.26 feet;

Thence South 79 degrees 34 minutes 07 seconds West, a distance of 117.76 feet;

Thence North 26 degrees 02 minutes 16 seconds West, a distance of 776.51 feet;

Thence North 00 degrees 00 minutes 00 seconds East, a distance of 400.00 feet to the True Point of Beginning.

B) COMMENCING at the Southwest corner of said Section 36;

Thence along the South line of said Section 36, East, a distance of 1642.30 feet to the TRUE POINT OF BEGINNING;

Thence North 40 degrees 04 minutes 15 seconds West, a distance of 186.33 feet to a 1 1/4 inch galvanized iron pipe tagged RLS 5576;

Thence South 84 degrees 40 minutes 32 seconds West, a distance of 66.00 feet;

Thence North 50 degrees 55 minutes 36 seconds East, a distance of 462.78 feet;

Thence South 60 degrees 00 minutes 55 seconds East, a distance of 349.00 feet;

Thence South 11 degrees 08 minutes 11 seconds East, a distance of 258.61 feet to a point on the South line of said Section 36;

Thence West, along the South line of said Section 36, a distance of 525.85 feet to the True Point of Beginning;

C) BEGINNING at the West quarter corner of said Section 36;

Thence 330.00 feet in an Easterly direction along the fence line to a steel post;

Thence 660.00 feet in a Southerly direction to a steel post;

Thence 330.00 feet in a Westerly direction to a steel post;

Thence 660.00 feet in a Northerly direction, along the fence line to the Point of Beginning;

D) The Southwest quarter of the Southwest quarter.

## RIGHT OF FIRST REFUSAL AGREEMENT

THIS RIGHT OF FIRST REFUSAL AGREEMENT (this "Agreement") dated \_\_\_\_\_, 2014 (the "Effective Date"), is between FREEPORT MINERALS CORPORATION, a Delaware corporation ("Freeport"), BYNER CATTLE COMPANY, a Nevada corporation and wholly owned subsidiary of Freeport Minerals Corporation ("Byner"), CYPRUS MINES CORPORATION, a Delaware corporation and wholly owned subsidiary of Freeport Minerals Corporation ("Cyprus"), AZ BIG SANDY, LLC, a Nevada limited liability company and wholly owned subsidiary of Freeport Minerals Corporation ("AZ Big Sandy"), and the HUALAPAI TRIBE, a Tribe of Hualapai Indians organized under section 16 of the Act of June 18, 1934 (25 U.S.C. § 476) (commonly known as the "Indian Reorganization Act"), and duly recognized by the Secretary of the Interior (the "Tribe").

- A. This Agreement is being entered into in connection with and in accordance with that certain *Hualapai Bill Williams River Water Rights Settlement Agreement* by and among the Hualapai Tribe, the United States as Trustee for the Tribe, its Members and the Allottees, and Freeport Minerals Corporation dated \_\_\_\_\_, 2014 (the "Hualapai BWR Agreement").
- B. For purposes of this Agreement, "Freeport" includes all of Freeport's subsidiaries, affiliates, successors and assigns, including but not limited to Byner Cattle Company, a Nevada corporation, Cyprus Mines Corporation, a Delaware corporation and AZ Big Sandy, LLC, a Nevada limited liability company.
- C. The Hualapai BWR Agreement provides in paragraphs 4.2(iii)(g) and 4.2(iv)(a) thereof that Freeport shall grant to the Tribe a right of first refusal with respect to certain parcels of real property owned by Freeport and located in Mohave County, Arizona. These parcels, defined as and referred to in the Hualapai BWR Agreement as "Banegas Ranch" and the "ROFR Lands," are more particularly described on Exhibit A hereto (collectively, the "Property").
- D. In furtherance of the terms of the Hualapai BWR Agreement, Freeport desires to grant to the Tribe, for the period beginning on the date of recordation of this Agreement in the Mohave County, Arizona Recorder's Office and continuing until such time as Freeport (or a successor to Freeport by virtue of one of the events described in Section 6 below) is no longer the owner of any portion of the Property (the "Expiration Date"), a right of first refusal to purchase the Property, subject to the terms, conditions and exclusions set forth below.

NOW THEREFORE, in consideration of the sum of \$10.00 in hand paid by the Tribe to Freeport and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties agree as follows:

- 1. Grant of Right. If, at any time after the date of this Agreement but prior to the Expiration Date, Freeport shall desire to sell the Property or any part thereof to a third party ("Third

Party), Freeport, before accepting an offer therefore, shall comply with the following:

- a. First Opportunity. If Freeport desires to sell the Property or any part thereof to any Third Party, Freeport shall provide to the Tribe a written notice of its desire to sell the Property or part thereof to the Third Party ("Notice") together with a copy of the Third Party's proposed written contract for purchase and sale ("Offer to Purchase"), which shall be a *bona fide* offer and shall include the Terms (as hereafter defined) upon which Freeport would be willing to sell the Property or any part thereof to such Third Party. "Terms" means the sales price, financing terms (if any, including interest rate, term, and carry-back by Freeport), the listing broker, the feasibility period, the closing date and such other information and terms as are customarily provided by sellers of real property. The Tribe shall have the right, within thirty (30) days of its receipt of the Notice and Offer to Purchase (the "Exercise Period"), to exercise its right of first refusal to purchase the Property or any part thereof which is the subject of the Offer to Purchase on the same Terms as set forth in the Offer to Purchase ("Right of First Refusal"). If the Tribe elects to exercise the Right of First Refusal, the Tribe must do so by executing one copy of the Notice and returning it to Freeport, along with a Tribal Resolution authorizing the purchase of the property and the execution of the Notice, within the Exercise Period (the "Exercise Notice"). Within ten (10) days after expiration of the Exercise Period, if the Tribe shall have timely delivered its Exercise Notice to Freeport, Freeport shall provide the Tribe with a contract for purchase that includes the Terms for the Tribe's approval and signature (the "Contract").
  - b. Closing. The Tribe shall be obligated to close the purchase of the Property or applicable part thereof from Freeport no later than sixty (60) days after both parties have executed the Contract, unless such period is extended in writing by Freeport or the closing is delayed no more than 30 days due to circumstances beyond the reasonable control of the Tribe, provided that prior to the expiration of the sixty (60) day period the Tribe provides written notice to Freeport that attests to the circumstances which necessitate the delay and that they are beyond the reasonable control of the Tribe. If the closing does not occur within said period, then the Right of First Refusal shall be deemed waived by the Tribe with respect to the portion of the Property which is the subject of the Contract and shall be of no further force or effect with respect to that portion of the Property that is the subject of the Contract.
2. Non-Acceptance by the Tribe. If the Tribe delivers to Freeport both an executed written statement and a Tribal Resolution declining to exercise the Right of First Refusal with respect to a pending Offer to Purchase, or if the Tribe does not deliver an Exercise Notice and corresponding Tribal Resolution to Freeport prior to the expiration of the Exercise Period, as the case may be, then the Right of First Refusal shall be deemed waived by the Tribe with respect to the pending Offer to Purchase and shall be of no further force or effect with respect to that Offer to Purchase. In either case, the Tribe shall promptly execute and deliver to

Freeport, within thirty (30) days following Freeport's request, an instrument for recording evidencing the Tribe's waiver of the Right of First Refusal with respect to the pending Offer to Purchase and acknowledging the termination of the Right of First Refusal with respect to that Offer to Purchase, which instrument shall be in recordable form and bearing original signature, such that it may be recorded upon the consummation of the transaction contemplated by the Offer to Purchase, along with a Tribal Resolution authorizing the execution and recording of such instrument. In the event of the Tribe's failure to timely deliver either or both of such items, Freeport shall be entitled unilaterally to record such termination of the Right of First Refusal. If the Property or any part thereof which is the subject of the Offer to Purchase is not sold to the Third Party or its assignee pursuant to the Offer to Purchase, then any further Offer to Purchase that Property or part of the Property received by Freeport prior to the Expiration Date must first be submitted to the Tribe in accordance with the provisions of Section 1 above. No express or implied waiver by the Tribe pursuant to this Section 2 with respect to an Offer to Purchase shall be deemed a waiver by the Tribe of its rights under Section 1 above with respect to any other Offer to Purchase.

3. New Offers. If Freeport, during the aforesaid Exercise Period, decides to revise the terms of the Offer to Purchase, so that the Property or any part thereof is offered for sale upon any Term or Terms that are less favorable to Freeport (and consequently, more favorable to a purchaser) than those contained in the Notice and Offer to Purchase previously submitted to the Tribe. or if Freeport receives from a Third Party a *bona fide* Offer to Purchase the Property or any part thereof on Terms which are less favorable to Freeport (and consequently, more favorable to the Third Party), which offer Freeport is willing to accept (such less favorable Terms being hereinafter referred to as a "New Offer"), then with respect to each such New Offer: (a) before offering the Property or such part thereof for sale to others on the Terms embodied in the New Offer, Freeport shall offer to sell the Property or such part thereof in accordance with the Terms of such New Offer to the Tribe pursuant to Section 1.a above; or (b) before accepting the New Offer from a Third Party, Freeport shall offer to sell the Property or such part thereof to the Tribe on the Terms contained in the then current New Offer pursuant to Section 1.a above. Any non-acceptance of any New Offer by the Tribe shall be in accordance with Section 2 herein; provided, however, that in the event the Property or such part thereof is not sold to a Third Party or its assignee pursuant to the Offer to Purchase or New Offer, then any further offers with respect to the Property or any part thereof prior to the Expiration Date must be submitted to the Tribe in accordance with the provisions of Section 1 above.
4. Other Grants and Conveyances. Freeport covenants that, so long as this Agreement remains in effect, it shall not convey, grant or otherwise transfer to any Third Party any lease, license or other interest in any portion of the Property that would afford the grantee, transferee or licensee any right to withdraw or remove a greater quantity of water from that portion of the Property than Freeport itself could have withdrawn or removed under the terms of the Hualapai BWR Agreement. Freeport shall provide to the Tribe a copy of any proposed lease, license or other instrument that would authorize the grantee, transferee or licensee to withdraw or remove water from any portion

of the Property at least ten days before the execution thereof.

5. Mortgages. Any mortgages or deeds of trust encumbering any portion of the Property shall at all times be subordinate to the terms of this Agreement and any party foreclosing any such mortgage or deed of trust, or acquiring title by deed in lieu of foreclosure or trustee's sale, shall acquire title subject to all of the terms and provisions of this Agreement. Freeport represents and warrants that, as of the Effective Date, the Property is free and clear of any mortgages, deeds of trust or other monetary encumbrances, other than the lien for current real property taxes and assessments not yet due and payable.
  
6. Exclusions from Right. Notwithstanding any provision or right contained in this Agreement to the contrary, the Right of First Refusal shall not apply to, and shall continue in existence unaffected by, any of the following events, sales, dispositions or transfers, whether occurring in one transaction or a series of transactions as described below. However, upon the occurrence of any such event, sale, disposition or transfer, Freeport shall provide to the Tribe all such written assurances as the Tribe may reasonably require in order to satisfy itself as to the continued existence of the Right of First Refusal and the recognition thereof by all parties to any such event, sale, disposition or transfer, as well the recognition by all parties to any such event, sale, disposition or transfer that the Property shall continue to be subject to the water use restrictions set forth in Paragraph 4.2(iv) of the Hualapai BWR Agreement.
  - a. any disposition, sale or other transfer of the Property to any affiliate of Freeport; any change in the form of business entity or ownership of Freeport, including any change by merger or consolidation of Freeport; any acquisition, sale, disposition or other transfer of all or a substantial portion of the assets or business of Freeport; any sale, disposition, pledge, creation, issuance, repurchase, redemption, exchange or swap of common stock, preferred stock or other equity interests of any type or nature in Freeport, or any capitalization, recapitalization or reorganization in any form of Freeport, or any disposition, sale, assignment or other transfer of the Property by Freeport to a corporation, trust or other entity identified by Freeport and the issuance of certificates or other instruments evidencing interests in pools of properties (of which the Property forms all or a part), in connection with any asset securitization or other financing or investment arrangement: or
  
  - b. any disposition, sale or other transfer of the Property, or any part thereof, to the holder of a mortgage, lien or deed of trust covering Freeport's interest in the Property, or any nominee of such holder, or any other person, firm, corporation or other entity who or which shall acquire title to Freeport's interest in the Property as a result of a foreclosure of such mortgage, lien or deed of trust as a result of delivery of a deed in lieu of foreclosure; or
  
  - c. any disposition, sale or other transfer of the Property, or any part thereof, that requires a restrictive covenant to be recorded, at the time of the sale, that permanently limits the

use of the Property, or any part thereof, to creating and conserving habitat for endangered, threatened or otherwise sensitive species of plants or animals native to Arizona, provided that the restrictive covenant associated with such disposition, sale or other transfer of the Property, or any part thereof, incorporates the water use restrictions for the Property that are set forth in Paragraph 4.2(iv) of the Hualapai BWR Agreement.

As used in this Section 6, "affiliate" means, with respect to any entity, any other entity that directly or indirectly controls, is controlled by, or is under common control with, such entity.

7. Assignment by the Tribe. The Tribe shall not have the right to assign this Agreement without Freeport's prior written consent, and any attempted assignment without such prior consent shall be null and void.
8. Binding Effect and Termination. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors and assigns, subject to Section 7 above. The rights and obligations created hereunder shall automatically terminate as to any portion of the Property which is transferred to a Third Party without violating the Right of First Refusal, and as to the Property as a whole upon the Expiration Date defined above.
9. Notice. All notices, demands, consents, approvals and other communications which are required or desired to be given by either party to the other hereunder shall be in writing and shall be hand delivered or sent by United States registered or certified mail, postage prepaid, return receipt requested, addressed to the appropriate party at its address set forth below, or at such other address as such party shall have last designated by notice to the other. Notices, demands, consents, approvals and other communications shall be deemed given when delivered or three days after mailing; provided, however, that if any such notice or other communication shall also be sent by telecopy or fax machine, such notice shall be deemed given at the time and on the date of machine transmittal if the sending party receives a written send verification on its machines and forwards a copy thereof with its mailed or courier delivered notice or communication.

Peach Springs, Arizona 86434

10. Severability; Perpetuities Saving Clause. In the event any provision of this Agreement or any interpretation thereof shall be determined illegal, invalid, or unenforceable by a court of competent jurisdiction, the remainder of this Agreement and the application or interpretation of such provisions shall not be affected thereby. In the event any provision of this Agreement or any interpretation thereof shall be determined by a court of competent jurisdiction to violate the Rule Against Perpetuities, then such provision shall be reformed by the court to comply with the Rule Against Perpetuities.
11. Dispute Resolution. Any dispute concerning or arising out of this Agreement shall be resolved in accordance with the dispute resolution procedure specified in Section 9 of the Settlement Agreement, subject to Section 10.5 of the Settlement Agreement.
12. Time Periods. If the time for the performance of any obligation or taking any action under this Agreement expires on a Saturday, Sunday or legal holiday of the State of Arizona, the time for performance or taking such action shall be extended to the next succeeding day which is not a Saturday, Sunday or legal holiday.
13. Counterpart Execution. This Agreement may be executed in any number of counterparts and each counterpart executed by any of the undersigned, together with all other counterparts so executed, shall constitute a single instrument and agreement of the undersigned.
14. Applicable Law. This Agreement shall be governed by and construed in accordance with the applicable laws of the State of Arizona.
15. Entire Agreement. This Agreement, which includes Exhibit A represents the entire agreement between the parties pertaining to the subject matter contained herein. All prior and contemporaneous agreements, representations and understandings of the parties, oral or written, are superseded by and merged into this Agreement. No supplement, modification or amendment to this Agreement shall be binding unless in writing and executed with the same formality by the parties.
16. Recordation of Agreement. Upon the execution of this Agreement, the Tribe shall be authorized to record the same in the Office of the Mohave County Recorder.

**EXHIBIT A**

**LEGAL DESCRIPTION FOR PROPERTY**

**Banegas Ranch**

**PARCEL NO. 1:**

The South half of Section 5, Township 15 North, Range 12 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT the Northwest quarter of the Southwest quarter.

Said land being shown on Record of Survey Plat recorded October 30, 2000 in Book 20 of Records of Surveys, Page 23, records of Mohave County, Arizona.

**PARCEL NO. 2:**

That portion of the West half of Section 7, Township 15 North, Range 12 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona and being more particularly described as follows:

BEGINNING at the North quarter Section corner of said Section 7 and running thence South 00 degrees 03 minutes 55 seconds East, along the East boundary of the West half of said Section 7, a distance of 4212.25 feet;

Thence South 89 degrees 56 minutes 05 seconds West, a distance of 387.20 feet;

Thence North 00 degrees 03 minutes 55 seconds West, a distance of 225.00 feet;

Thence North 89 degrees 56 minutes 05 seconds East, a distance of 337.20 feet;

Thence North 00 degrees 03 minutes 55 seconds West, along the line 50.00 feet West of and parallel with the East boundary of the West half of said Section 7, a distance of 1087.98 feet;

Thence South 89 degrees 55 minutes 03 seconds West, a distance of 200.00 feet;

Thence North 00 degrees 03 minutes 55 seconds West, a distance of 245.66 feet;

Thence North 89 degrees 59 minutes 36 seconds West, a distance of 2273.21 feet;

Thence South 00 degrees 09 minutes 08 seconds East, a distance of 245.35 feet;

Thence South 00 degrees 08 minutes 27 seconds East, a distance of 779.58 feet;

Thence North 89 degrees 51 minutes 33 seconds East, a distance of 346.00 feet;

Thence South 00 degrees 08 minutes 27 seconds East, a distance of 220.00 feet;

Thence South 89 degrees 51 minutes 33 seconds West, a distance of 346.00 feet;

Thence South 00 degrees 08 minutes 27 seconds East, along a line being 50.00 feet East of and parallel with the West line of said Section 7, a distance of 1636.12 feet to a point on the South line of said Section 7;

Thence South 89 degrees 43 minutes 53 seconds West, along the South line of said Section 7, a distance of 50.00 feet to the Southwest corner of said Section 7;

Thence North 00 degrees 08 minutes 27 seconds West, along the West line of said Section 7, a distance of 2635.80 feet to the West quarter Section corner of said Section 7;

Thence North 00 degrees 09 minutes 08 seconds West, along the West line of said Section 7, a distance of 2641.62 feet to the Southeast corner of Section 1, Township 15 North, Range 13 West;

Thence North 00 degrees 04 minutes 46 seconds West, along the line common to the West line of said Section 7 and the East line of said Section 1, a distance of 248.25 feet to the Northwest corner of said Section 7;

Thence North 89 degrees 47 minutes 36 seconds East, along the North line of said Section 7, a distance of 2576.91 feet to the Point of Beginning.

PARCEL NO. 3:

Government Lots 3 and 4 of Section 18, Township 15 North, Range 12 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT that portion of said Lot 3 conveyed to the State of Arizona for Highway 93 and more fully described in Book 3759, Page 677 of Official Records.

PARCEL NO. 4:

The East half of the Southwest quarter of Section 12, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

PARCEL NO. 5:

A) The Southeast quarter of the Northwest quarter and the Southwest quarter of the Northeast quarter of Section 13, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT all oil, gas, coal and minerals as reserved in Deed recorded in Book 60 of Deeds, Page 195.

B) The Southeast quarter of the Northeast quarter, the North half of the Northeast quarter, the Northeast quarter of the Northwest quarter and the East half of the Southeast quarter of Section 13, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT all oil, gas, coal and minerals as reserved in Deed recorded in Book 84 of Deeds, Page 362.

C) The West half of the Southeast quarter of Section 13, Township 15 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT the South 600.00 feet thereof.

PARCEL NO. 6:

The Southwest quarter of Section 36, Township 16 North, Range 13 West of the Gila and Salt River Base and Meridian, Mohave County, Arizona.

EXCEPT therefrom the following:

A) COMMENCING at the West quarter corner of said Section 36;

Thence South 89 degrees 43 minutes 25 seconds East, a distance of 360.00 feet;

Thence South 00 degrees 00 minutes 00 seconds East, a distance of 18.00 feet to the TRUE POINT OF BEGINNING, said point being marked by a 5/8 inch rebar cap RLS 19319 North 00 degrees 00 minutes 00 seconds East 19.00 feet;

Thence South 89 degrees 43 minutes 23 seconds East, a distance of 594.12 feet to a point being marked North 07 degrees 17 minutes 44 seconds East, 19,15 feet by a 5/8 inch rebar and cap RLS 19319;

Thence South 07 degrees 17 minutes 44 seconds West, a distance of 1082.26 feet;

Thence South 79 degrees 34 minutes 07 seconds West, a distance of 117.76 feet;

Thence North 26 degrees 02 minutes 16 seconds West, a distance of 776.51 feet;

Thence North 00 degrees 00 minutes 00 seconds East, a distance of 400.00 feet to the True Point of Beginning.

B) COMMENCING at the Southwest corner of said Section 36;

Thence along the South line of said Section 36, East, a distance of 1642.30 feet to the TRUE POINT OF BEGINNING;

Thence North 40 degrees 04 minutes 15 seconds West, a distance of 186.33 feet to a 1 1/4 inch galvanized iron pipe tagged RLS 5576;

Thence South 84 degrees 40 minutes 32 seconds West, a distance of 66.00 feet;

Thence North 50 degrees 55 minutes 36 seconds East, a distance of 462.78 feet;

Thence South 60 degrees 00 minutes 55 seconds East, a distance of 349.00 feet;

Thence South 11 degrees 08 minutes 11 seconds East, a distance of 258.61 feet to a point on the South line of said Section 36;

Thence West, along the South line of said Section 36, a distance of 525.85 feet to the True Point

of Beginning;

C) BEGINNING at the West quarter corner of said Section 36;

Thence 330.00 feet in an Easterly direction along the fence line to a steel post;

Thence 660.00 feet in a Southerly direction to a steel post;

Thence 330.00 feet in a Westerly direction to a steel post;

Thence 660.00 feet in a Northerly direction, along the fence line to the Point of Beginning;

D) The Southwest quarter of the Southwest quarter.

**Exhibit 4.1(ii) AGFC Water Rights Confirmed by Freeport**

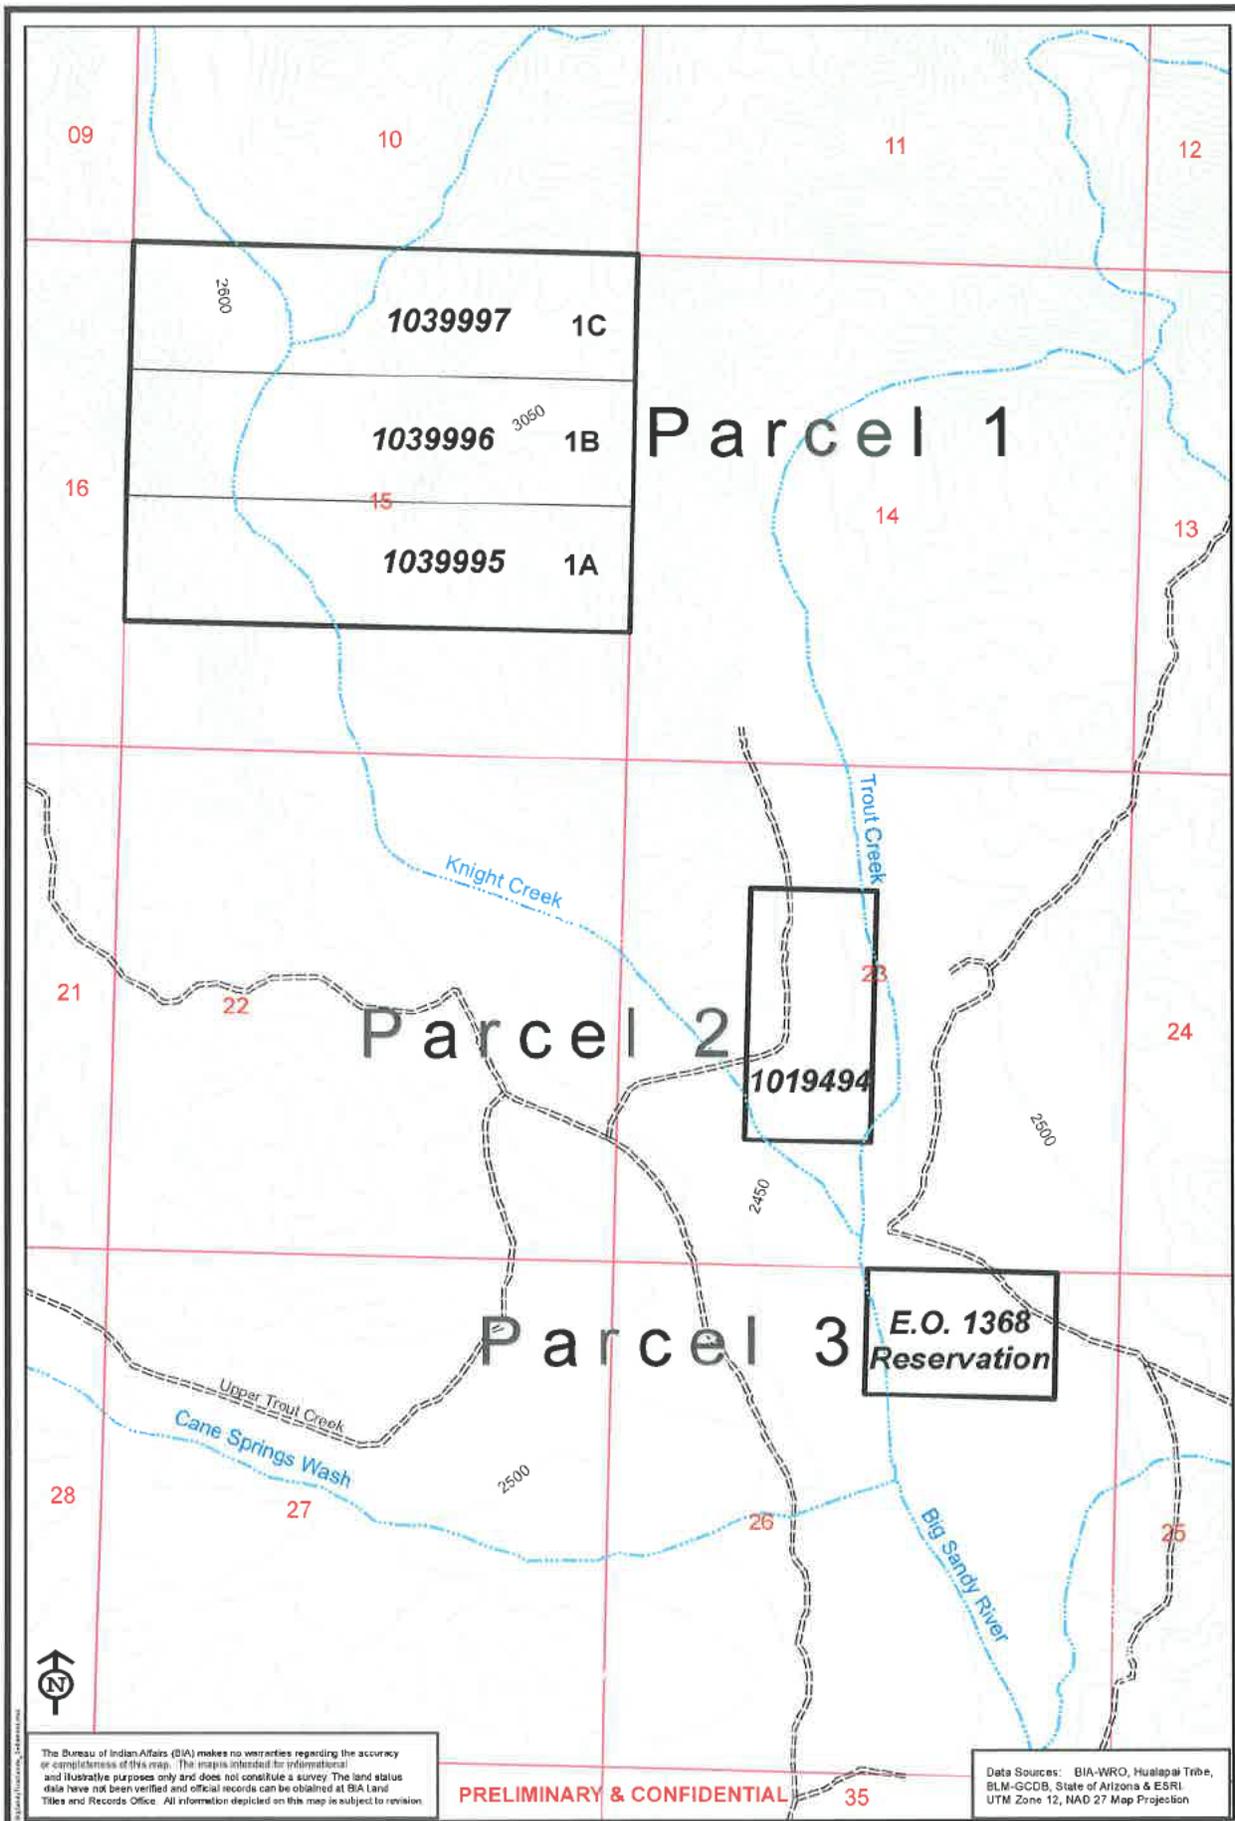

<b>ADWR Filing No.</b>	<b>Priority Date</b>	<b>Annual Volume and Beneficial use</b>	<b>Legal Description for Place of Use and Point Of Diversion</b>	<b>Protests</b>
CWR No. 3525 App No. 4A-4679	August 16, 1963	Storage right for permanent pool of 7,180 acre-feet for recreation, wildlife, fish and waterfowl purposes	Alamo Lake	N/A
CWR No. 33-29303	February 7, 1975	Storage right to increase Alamo Lake permanent pool by 17,820 acre-feet for recreation, fish and wildlife purposes  (The 17,820 acre-feet under CWR 33-29303 is in addition to storage rights under CWR 3525 and resulted in total AGFC storage rights in Alamo Lake of 25,000 acre-feet)	Alamo Lake	N/A
Application No. 33-94867 (filed with co-applicant AZ State Parks)	Filed October 24, 1989	Application to appropriate Bill Williams River water to increase storage pool in Alamo Lake by additional 321,480 acre-feet for recreation, fish and wildlife purposes	Alamo Lake	BLM; City of Scottsdale; CAWCD
Application No. 33-94160  (Application filed by City of Scottsdale. Pursuant to Section 5.1(vii) of the Phase One Settlement Agreement, Freeport to assign interest obtained from City of Scottsdale to AGFC)	Filed January 19, 1988	Application to appropriate unappropriated water available in the Bill Williams River, with an estimated average annual volume of 75,000 acre-feet. The application requests use for municipal purposes.  AGFC will attempt amend the application to change proposed purposes of use to recreation, fish and wildlife purposes.	Water to be diverted from Alamo Lake and transported to City of Scottsdale water service area.  AGFC will attempt to amend the application to change proposed point of diversion and place of use to Alamo Lake.	Central Arizona, Maricopa-Stanfield and New Magma Irrigation and Drainage Districts; City of Tucson

Privileged & Confidential Communication  
 Attorney-Client Communication and Attorney Work Product  
 Subject to Rule 408/A.R.S. 12-2238  
 Subject to parties' Confidentiality Agreements

Location:	Hualapai Indian Reservation – Big Sandy River Basin
Owner:	United States of America – U.S. Bureau of Indian Affairs
Name of Structure:	To Be Determined
Priority Date:	June 2, 1911 (Executive Order 1368)
Source:	Big Sandy River & Groundwater located in Big Sandy River Watershed in the Bill Williams River Basin.
Place of Use:	Hualapai Indian Reservation located in NW1/4 NE1/4 and W1/2 NE1/4 NE1/4 of Section 26, T18N, R13W, Gila and Salt River Meridian.
Amount:	Annual diversion amount of 300 acre-feet/year based on a preliminary arable land analysis of the Executive Order Reservation for irrigated agriculture. The amount is based on identification of 37 acres of potentially arable land with a water requirement of 8.10 feet/acre for the irrigation of alfalfa.
Beneficial Use:	Irrigated agriculture.
Basis of Right:	Federal Reserved Water Right --- Executive Order 1368
Comments:	The Executive Order Reservation has been previously irrigated, but currently no irrigation is occurring at this time. The claimed amount is the amount agreed to by the United States to help facilitate this agreement, but does not constitute the amount the United States would pursue in an adjudication of all water rights in the basin.

Privileged & Confidential Communication  
 Attorney-Client Communication and Attorney Work Product

Location:	Hualapai Indian Trust Allotments – Big Sandy River Basin
Owner:	United States of America – U.S. Bureau of Indian Affairs
Name of Structure:	To Be Determined
Priority Dates:	Parcel 1 - August 18, 1930 ; Parcel 2 - September 24, 1928
Source:	Big Sandy River and tributaries & Groundwater located in Big Sandy River Watershed in the Bill Williams River Basin.
Place of Use:	<p>Hualapai Indian Trust Allotments:</p> <p>Parcel 1 (480 acres) – Comprised of three contiguous allotments all located in T18N R13W, Gila and Salt River Meridian:</p> <ul style="list-style-type: none"> <li>• Patent No. 1039995 - located in N/2 S/2 of Section 15 (160 acres)</li> <li>• Patent No. 1039996 – located in S/2 N/2 of Section 15 (160 acres)</li> <li>• Patent No. 1039997 – located in N/2 N/2 of Section 15 (160 acres)</li> </ul> <p>Parcel 2 (80 acres) – Patent No. 1019494 - located in SE1/4 NW1/4 and NE1/4 SW1/4 of Section 23, T18N R13W, Gila and Salt River Meridian.</p>
Amount:	<p>Parcel 1 - Annual diversion amount of 82 acre-feet/year based on a preliminary analysis of a proposed sand and gravel facility. The amount is based on operations and water requirements for material washing and dust control of nearby sand and gravel operations.</p> <p>Parcel 2 – Annual diversion of 312 acre-feet/year based on a preliminary arable land analysis. The amount is based on identification of 38.5 acres of potentially arable land with a water requirement of 8.10 feet/acre for the irrigation of alfalfa.</p>
Beneficial Use:	<p>Parcel 1 – Gravel Operation.</p> <p>Parcel 2 - Irrigated agriculture.</p>
Basis of Right:	<p>Federal Reserved Water Right ---</p> <p>Parcel 1 – Trust Patent Nos.: 1039995, 1039996 and 1039997 (all 8/18/1930)</p> <p>Parcel 2 - Trust Patent No. 1019494 (9/24/1928)</p>
Comments:	<p>The allotments have been inhabited in the past, but are currently uninhabited. The claimed amount is the amount agreed to by the United States to help facilitate this agreement, but does not constitute the amount the United States would pursue in an adjudication of all water rights in the basin.....</p>

4084 (4A:4625)	7.26.1962	N 1/4 Sec 32 11N, 16E (ell 55.619414)	Irrigation of 270 acres	1,620 Acre	1,440,000 Gallons per year for stockwater		1,435.4 Acre
4085 (4A:4652)	4.16.1963	N 1/4 Sec 32 11N, 16E (ell 55.619420)	Irrigation of 130 acres	780 Acre	1,200,000 Gallons per year for stockwater		692.7 Acre
4085 (4A:4652)	4.16.1963	N 1/4 Sec 33 11N, 16E (ell 55.619416)	Irrigation of 235 acres	1,410 Acre	1,100,000 Gallons per year for stockwater		1,248.9 Acre

<sup>1</sup> The term "Capex" in this exhibit refers to the 10,055 Acre limit on Freeport Diversions from the Baddad Mire Complex and Baddad site as defined in Section 4.2.2 and 4.2.3 of the Baddad Mire Complex Lease Agreement.

<sup>2</sup> AD# and flow numbers may change following AD# approval of a severance and transfer of the Lateral and Baddad Mire Complex water rights listed in this exhibit.

<sup>3</sup> Unless stated otherwise, the severance and transfer of use for Lateral and Baddad Mire Complex water rights is as provided on current AD# statement of claim or certificate of water right, as applicable.

<sup>4</sup> Claimed entitlement for irrigation is the actual diversion limit under the severance and transfer water right.

<sup>5</sup> Claimed entitlement for municipal use and municipal purposes at the Baddad Mire Complex and Baddad site for cost-severance and transfer water right is for 100% consumptive use. Claimed amount for irrigation of Lateral Mire Complex Leased Lands is the actual diversion limit.

<sup>6</sup> "Certificate of Water Right"

<sup>7</sup> The Baddad Mire Complex is the geographic area defined in Section 2.58 and depicted on exhibit 2.10 of the Baddad Mire Complex Lease Agreement. The Baddad Mire Complex water rights, as defined in Section IV of exhibit 4.1(a) to the Baddad Mire Complex Lease Agreement, are the current water rights in the Baddad Mire Complex. The specific wells comprising the Baddad Mire Complex water rights are defined in the future in accordance with the provisions of the Baddad Mire Complex Lease Agreement.

<sup>8</sup> Municipal uses as defined in Section 2.37 of the Baddad Mire Complex Lease Agreement.

<sup>9</sup> Municipal purposes as defined in Section 2.38 of the Baddad Mire Complex Lease Agreement.

<sup>10</sup> Claimed entitlements for Municipal uses and Municipal purposes at the Baddad Mire Complex and Baddad site are based on prior consumptive water use for irrigation and, where applicable, stockwater uses on Lateral and Lateral.

<sup>11</sup> Use of notation marks in columns in this exhibit means same as above.

---

Good Afternoon Lisa, Robin & Stephenne,

Hope you are doing well.

Based on the Federal Register's announcement (<https://www.federalregister.gov/articles/2015/03/27/2015-07082/opening-of-nomination-period-for-members-of-the-advisory-committee-on-climate-change-and-natural>), Senator Shaheen would like to nominate Dr. Cameron Wake for a position on the Advisory Committee on Climate Change and Natural Resource Science.

Attached is the letter of support for Dr. Cameron, as well as his CV. Dr. Cameron is aware of his nomination and his contact information is included in the attachment.

Thank you for your assistance and please let me know if you have any questions,  
Justin

**THE SHAHEEN REPORT**

JEANNE SHAHEEN  
NEW HAMPSHIRE

## United States Senate

WASHINGTON, DC 20510

April 15, 2015

Mr. Robin O'Malley, Designated Federal Officer  
Advisory Committee on Climate Change and Natural Resource Science  
Policy and Partnership Coordinator  
National Climate Change and Wildlife Science Center  
U.S. Geological Survey  
12201 Sunrise Valley Drive, Mail Stop 516  
Reston, VA 20192

Dear Mr. O'Malley:

I write to enthusiastically recommend Dr. Cameron Wake for a position on the Advisory Committee on Climate Change and Natural Resource Science. Dr. Wake's extensive experience in the field of regional climate and environmental change make him well qualified to serve on the Committee.

Currently, Dr. Wake is a Research Associate Professor at the Institute for the Study of Earth, Oceans and Space at the University of New Hampshire (UNH). Dr. Wake leads a research program investigating regional climate and environmental change through the analysis of ice cores and instrumental data. In addition, Dr. Wake is the Josephine A. Lamprey Professor in Climate and Sustainability at the UNH Sustainability Institute. In this role, he provides leadership within the University and across New England in efforts to educate a wide variety of stakeholders on the issue of regional climate change and pursue a sustainable energy future through innovative approaches to mitigation and adaptation

As a leader of Climate Solutions New England, a public-private partnership based out of the UNH, Dr. Wake has focused on raising awareness about climate and energy issues. Working to develop integrated solutions that address the challenges of climate change in a cost effective manner and to promote economic development, Dr. Wake conducts and disseminates independent analysis and research on climate change. His work has been published in hundreds of publications.

In addition, Dr. Wake is a leader of the New Hampshire's Experimental Program to Stimulate Competitive Research project on Ecosystems and Society, a program funded by the National Science Foundation. Dr. Wake's responsibilities include guiding project research, examining the influence of snow cover on regional climate, and developing scenarios of changing climate and land cover that will be used to explore potential future changes in ecosystem services across New England.

Thank you for your consideration of my endorsement. I wholeheartedly support Dr. Cameron Wake's candidacy to serve on the Advisory Committee on Climate Change and Natural Resource Science. If I can provide any additional information regarding Dr. Wake and his qualifications, please do not hesitate to contact me.

Sincerely,

A handwritten signature in blue ink that reads "Jeanne Shaheen".

Jeanne Shaheen  
United States Senator

**EDUCATION**

- 1993 Ph.D. Geochemical Systems, Dept. of Earth Sciences, University of New Hampshire  
*The Spatial Distribution of Snow and Aerosol Chemistry in the Mountains of Central Asia*  
Advisor: Dr. Paul A. Mayewski
- 1987 M.A. Dept. of Geography, Wilfrid Laurier University, Waterloo, Ontario  
*The Spatial and Temporal Variation of Snow Accumulation in the Central Karakoram, Northern Pakistan* Advisor: Dr. Kenneth Hewitt
- 1984 B.Sc. Dept. of Geology, University of Ottawa, Ottawa, Ontario (Honors Program)

**ACADEMIC AND RESEARCH EXPERIENCE**

- 2011 - *Josephine A. Lamprey Professor, Climate and Sustainability, UNH Sustainability Institute*
- 2007 - *Director, Climate Solutions New England*
- 2003 - *Research Associate Professor*  
Institute for the Study of Earth, Oceans and Space, and  
Department of Earth Sciences, UNH
- 2003 - 2010 *Faculty Fellow*  
Office of the Senior Vice-Provost for Engagement and Academic Outreach, UNH
- 1995 - 2003 *Research Assistant Professor*  
Institute for the Study of Earth, Oceans and Space, and  
Department of Earth Sciences, UNH
- 1993 - 1995 *Research Scientist*  
Institute for the Study of Earth, Oceans and Space, UNH
- 1988 - 1993 *Research Assistant*  
Institute for the Study of Earth, Oceans and Space, UNH

**TEACHING EXPERIENCE**

- 1999 - ESCI 405 Global Environmental Change
- 2004 - 2012 PHP 930 Climate Change and Health
- 2004 - 2010 NR 767/867 Earth System Science: Understanding Our Global Environment
- 1996 - 2001 EOS 895 Introduction to Climate
- 1994 - 2003 ESCI 764/864 Paleoclimate Analysis

*Cameron Wake - CV*

2011, 2012, 2014 Instructor for the UNH/NH Business for Social Responsibility – Corporate Sustainability Leadership Program

**FIELD RESEARCH EXPERIENCE**

Over the past thirty years I have led over twenty glaciological field research expeditions to the Canadian Rockies, Himalaya, Tibetan Plateau, and Arctic. The primary focus of these research expeditions was the collection of ice cores, snow samples, and aerosol samples for chemical analysis for use in reconstructing climate change.

**FUNDED RESEARCH GRANTS** *(Principal Investigator unless otherwise noted)*

24th NSF EPSCoR National Conference. NSF Experimental Program to Stimulate Competitive Research (EPSCoR), 2014-2016, \$402,678  
Analysis and Communication of Flood Damage Cost Avoidance in the Lamprey River Watershed of New Hampshire. New Hampshire Sea Grant, Feb. 2014-Jan. 2016, \$120,000.  
Public Health Program Services Support – Climate Change and Public Health Adaptation Planning. Subcontract from John Snow Institute (dba Community Health Institute), NH, July 2013 – June 2014, \$30,000.  
Building Resilience Against Climate Effects. New Hampshire Division of Public Health Services, Climate Change and Public Health program, May-Dec 2013, \$50,000.  
Collaborative Research: Reconstructing central Alaskan precipitation variability and atmospheric circulation during the past millennium. National Science Foundation - Paleo Perspectives on Climate Change, 2012-2015, \$207,061.  
Enhancing Scholarly Collaboration on New England Climate Change (co-PI), UNH ADVANCE Program, 2012-13, \$35,222.  
Collaborative Planning for Climate Change Adaptation (Exeter, NH)(co-PI). NOAA National Estuarine Research Reserve Science Collaborative, 2011-2014, \$655,963.  
New Hampshire Sustainable Communities Initiative (sub-contract for New Hampshire climate assessment). US Housing and Urban Development, 2012-2017, \$17,789.  
New Hampshire Energy and Climate Collaborative (New Hampshire Charitable Foundation) 2012-2013, 24,949.  
Interactions among climate, land use, ecosystem services and society (co-PI), NSF Experimental Program to Stimulate Competitive Research (EPSCoR), 2011-2016, \$20 million.

Science Consultant for Weekly Reader's Electronic-Issues on "Current Science: A Matter of Degrees". [more info](#)

Scientific consultant with the New York Botanical Gardens, 2005-2007.

Led an NASA funded team that developed the "[Design Guide for Undergraduate Earth System Science Education: A Resource for Teaching Earth System Science](#)" based on lessons learned from 15 years of NASA supported Earth system science education programs at 57 colleges and universities in the United States.

Developed and installed museum quality displays on air quality and health at Exeter Hospital (Exeter, NH) and Seacoast Science Center (Rye, NH)

## GRADUATE STUDENTS ADVISED

*Names in bold indicates students for whom I am or was committee chair.*

Jonathan Buzan, Ph.D. (in prep., advanced to candidacy) Quantifying human/animal heat stress in working environments, and their relationship to atmospheric dynamics, due to global climate change.

Deana Aulisio, Ph.D. (in prep., advanced to candidacy) New Hampshire's Societal Metabolism: Material Flows and the Industry-Human-Nature Connection

Dovev Levine, Ph.D. (in prep., advanced to candidacy) The Impact of External Factors on Renewable Energy Usage in the Higher Education Sector

Matt Cutler, Ph.D. (in prep., advanced to candidacy) Contextual Factors and Shared Perceptions of Extreme or Unusual Weather.

**Eric Kelsey**, Ph.D. (2014) Ice core records of changes in atmospheric circulation in the Arctic. UNH, Durham, NH.

Elizabeth Burakowski, Ph.D. (2013) Winter Climate Impacts of Historical Deforestation in New England. UNH, Durham, NH.

Chris Keeley, M.Sc. (2012) Preparing for Climate Change in Three New England Coastal Communities: Lessons on Motivations, Approaches, and Outcomes. UNH, Durham, NH

Ann Scholz, M. Sc. (2011) Consequences of Changing Climate and Land Use to 100-Year Flooding in The Lamprey River Watershed of New Hampshire. UNH, Durham, NH.

**Tracey Wawrzeniak**, M.Sc. (2010) Reconstruction of the North Atlantic Oscillation via Analysis of Multiple northern Hemisphere Ice Cores. UNH, Durham, NH.

**Susan Spierre**, M.Sc. (2008) Extreme Precipitation Trends in New England. UNH, Durham, NH.

**Elizabeth Burakowski** M.Sc. (2008) Records of changing snowfall in the Northeast US over the past four decades. UNH, Durham, NH.

## *Cameron Wake - CV*

- Ajaya Upadhyay, M.Sc. (2007) Association between Respiratory Symptoms, Ozone, and Fine Particles in a Diverse New England Population. UNH, Durham, NH.
- Tom Lambert**, M.Sc. (2006). Air Quality and Pulmonary Function in New England during the Summer of 2004. UNH, Durham, NH.
- Amy Frappier**, Ph.D. (2006) Recent Extreme Events in a Tropical Stalagmite: Multi-Proxy Records and Analysis of Ecosystem  $\delta^{13}\text{C}$  Value Sensitivity to Weak Climate Forcing. UNH, Durham, NH.
- Kaplan Yalcin**, Ph.D. (2005) A Glaciochemical Record of Anthropogenic and Natural Environmental Change from Eclipse Icefield, Yukon Territory, Canada. UNH, Durham, NH.
- Daniel Voisin, M.Sc. (2005) A 2000-Year History of Antarctica Volcanism From Tephra in the Siple Dome Ice Core. UNH, Durham, NH.
- Emily Fisher, M.Sc. (2004) Source Region of Ozone and Soluble Ions at Mt. Washington, NH.
- Zachary Irons**, M.Sc. (2004) Source Region identification of Extreme water-Soluble nitrate and Sulfate Aerosol Concentrations at the New Hampshire Seacoast. UNH, Durham, NH.
- Adam Wilson**, M.Sc. (2003) Air Quality, Weather, and Respiratory Hospital visits in Northern New England. UNH, Durham, NH.
- Amy Frappier, M.Sc. (2002) High Resolution Stable isotope Dynamics Recorded by Speleothem Calcite: A new Tool for Paleotemperature, Paleometeorology, and Paleoecology. UNH, Durham, NH.
- Kaplan Yalcin**, M.Sc. (2001) Anthropogenic and Volcanic Signals in an Ice Core from Eclipse Icefield, Yukon Territory, Canada. UNH, Durham, NH.
- Alison Murphy, M. Sc. (2000) A Glaciochemical record from the Devon Ice Cap and Late-Holocene reconstruction of past Sea ice extent in the North Water Polynya, Eastern Canadian Arctic. UNH, Durham, NH.
- Arun Shrestha**, Ph.D. (1998) Physical and Chemical Climate in the Nepal Himalaya. UNH, Durham, NH.
- Christian Zdanowicz, Ph.D. (1999) Paleoclimatic Significance of Insoluble Microparticle records from Canadian Arctic and Greenland Ice Cores. UNH, Durham, NH.
- Nancy Grumet**, M.Sc. (1997) Late Holocene Climate Variability Characterized by the Major Ion Record Derived from the Penny Ice Core. UNH, Durham, NH.
- Qinzhao Yang, Ph.D. (1995) Investigation of Greenland Glaciochemical Records. UNH, Durham, NH.

### **UNDERGRADUATE STUDENTS ADVISED**

- Sara Large. Climate Change Assessments for New England. Summer 2014 Intern funded by the UNHSI Climate Fellowship program.
- Tristan Amaral. How Does Snowpack Evolution Affect Climate? Presented at UNH Undergraduate Research Conference in 2014 (<http://www.unh.edu/urc/>). Presentation received a URC Award of Excellence.
- Peter Wilkinson. Summer 2012 Research for report on Climate Change in New Hampshire: Past, Present, and Future. <http://climatesolutionsne.org>
- Kathryn Thomson. What Does an Oil-spill from the Montreal to Portland Pipeline Mean for Water Quality in New England's Rivers? NH EPSCoR Summer 2012 Research Experience for Undergraduates. Presented at the NH EPSCoR All Hands Meeting (20 November 2013, Concord, NH) and at the UNH Undergraduate Research Conference in 2014 (<http://www.unh.edu/urc/>)
- Lauren Johnson. Climate Change and Food Production in New England. Summer 2013 Intern funded by the Clean Air - Cool Planet Climate Fellowship program.
- Kyle Bouchard, Brenna Cahill, Tiffane Cormier, Emily Donnery, Jordan Lachance,

---

Can we set up a time to talk about the HF rule with appropriate folks on your end?

Fyi we are likely to have a ND member of WORC as a witness.

**Date:** Wednesday, April 22, 2015 11:24:34 AM

---

Someone(s) familiar with what and how states are doing less than the rule requires.

How variances are expected to be processed.

Great, thank you very much. A follow up (not urgent) – Can you possibly send me a map of federal subsurface mineral ownership East of the 100<sup>th</sup> meridian?

If that map also shows federal surface ownership (or has a layer with federal ownership that can be turned on), that would be great.

Thanks, sorry for all the questions.

**Subject:** To answer your question.

The HF rule applies to all Federal Minerals. Fed minerals under USFS lands and it applies. Private minerals under USFS lands does NOT apply. Neil responded to this issue during the budget hearings.

Good afternoon, Sarah:

Attached are Questions for the Record which have been submitted to Deputy Secretary Connor from Members of the Energy Committee regarding the hearing which was held on Wednesday regarding the Land and Water Conservation Fund. We respectfully request that Deputy Secretary Connor provide his responses to these questions by **Friday, May 15, 2015** for inclusion in the official hearing record.

Please provide the responses directly to me, and feel free to contact me if you have any questions.

Sincerely,

Darla Ripchensky, PMP  
Administrative Director  
U.S. Senate Committee on Energy and Natural Resources  
304 Dirksen Senate Office Building  
Washington, DC 20510  
202.224.3607

**U.S. Senate Committee on Energy and Natural Resources**  
**April 2015 Hearing The Land and Water Conservation Fund**  
**Questions for the Record Submitted to Deputy Secretary Michael Connor**

**Questions from Chairman Lisa Murkowski**

**Question 1** Many federal lands that have great benefit to sportsmen and women are inaccessible to varying degrees. What is the administration's plan to address access challenges on federal lands?

**Question 2** On March 12, BLM testified before this Committee that the Department strongly supports the reauthorization of the Federal Land Transfer Facilitation Act (FLTFA). Since FLTFA was enacted, has the BLM use it to sell public lands at auction to the highest bidder? What portion of those sales conducted under FLTFA has been made to private citizens or companies?

**Question 3** States are required to engage in planning for their outdoor recreation needs and to select, based on established criteria in those plans, high priority state and local projects. What kind of planning process exists on the federal side for land acquisitions? Does the LWCF Act require a planning process on the federal side for land acquisitions? How is the public engaged in the process?

**Question 4** How many acres have been acquired with LWCF funds since the beginning of the program? For the federal acquisitions acres, please include a table that lists the acquisitions by agency (National Park Service, Fish and Wildlife Service, Bureau of Land Management, and Forest Service) and includes the acres and the state for each.

**Question 5** Is the \$11.4 billion maintenance backlog within the National Park Service for high priority assets only? What is the maintenance backlog for medium and low priority assets (listed separately) within the National Park Service?

**Questions from Senator Bill Cassidy**

**Questions** Can you please share the primary sources of revenue to the Land and Water Conservation Fund (LWCF)? There are members of the committee, as well as some of you, who have advocated for the LWCF to be reauthorized and fully funded. While I agree that the LWCF needs to be re-authorized, I believe we can derive revenues for the fund through increased access to our energy resources on the Outer Continental Shelf. Could or should an increase in funding to the LWCF come from future OCS exploration and production as opposed to an appropriations increase that may require an offset?

**Questions from Senator Ron Widen**

**Question 1** The National Park Service is dealing with a maintenance backlog in the nation's parks. What has the Department of the Interior and the National Park Service

**U.S. Senate Committee on Energy and Natural Resources**  
**April 2015 Hearing The Land and Water Conservation Fund**  
**Questions for the Record Submitted to Deputy Secretary Michael Connor**

done, or what does it plan to do in the future, to take care of the maintenance backlog so that programs like LWCF don't get needlessly reorganized to pay for that backlog?

**Question 2** In your testimony you mentioned that federal land acquisition actually reduces the cost of managing federal lands. Can you explain how inholdings are identified for acquisition and the process for completing the purchase of the land? And, how specifically does acquisition of inholdings improve maintenance and land management on large tracts of federal lands?

**Question 3** In the hearing, there was a lot of discussion around the source of the maintenance backlog, and that somewhere around 50% of the maintenance backlog was due to roads and other transportation projects within park boundaries that should actually be paid for by the Department of Transportation rather than the federal land management agencies. Can you provide the breakdown for the National Park Service how much of your maintenance backlog consists of transportation projects and how much consists of other work such as facilities repairs or trail maintenance?

**Questions from Senator Debbie Stabenow**

**Question 1:** In your testimony, you stated that over the last five years, 99.25% of the lands acquired by the Department of the Interior were inholdings. You also described how the acquisition of inholdings helps to reduce maintenance costs within federal land units.

With funding from the Land and Water Conservation Fund being used almost exclusively to acquire inholdings, and the role these acquisitions play in reducing maintenance, would you say that the LWCF is already helping to combat maintenance backlogs?

**Question 2** Could you provide a few additional examples, beyond those in your written testimony, that demonstrate how acquiring inholdings reduces maintenance costs?

**Questions from Senator Jeff Flake**

**Question 1** Part of the cost of acquiring new Federal land should be mitigating the loss of a vibrant tax base for local governments. In FY2002, PILT payments were made from the LWCF and in the Department of Interior Budget hearing in this committee two months ago Secretary Jewell suggested that a portion of the funding stream currently dedicated to LWCF could be dedicated to PILT. Would you elaborate on the Secretary's suggestion that LWCF funding streams could be used to meet PILT obligations?

**Question 2** In your written testimony you express the amount of inholdings that were purchased by the DOI over the past five years as a percentage of the total amount of land

**U.S. Senate Committee on Energy and Natural Resources**  
**April 15, 2015 Hearing on The Land and Water Conservation Fund**  
**Questions for the Record Submitted to Deputy Secretary Michael Connor**

purchased by the DOI during that time. In your response to questions on this subject during the hearing you referred to "edgeholdings." Please define the term "edgeholding" and provide, by state and by agency (BLM, NPS, and FWS), the amount of land acquired over the past 10 years under LWCF authorities which were completely surrounded by Federal land and which were on the boundaries of Federal land. Please compare these amounts to those LWCF acquisitions by the Forest Service over the same time period.

**Questions from Senator Rob Portman**

**Question 1** I am a very strong supporter of LWCF, and as you know I also am strongly committed to addressing the critical unmet maintenance needs in our national parks and other public lands. Clearly, we need LWCF to secure the inholdings and other lands that make our parks the important resources they are for the American people. At the same time and for similar reasons, we absolutely need to address the Park Service maintenance backlog as we head toward the Centennial of the National Parks, which I am working to do.

Regarding LWCF, I have seen the critical importance of strategic acquisitions of key properties and conservation easements in my own state at Cuyahoga Valley National Park, which is among the top most visited urban National Parks in the entire country, where lands secured by the Park Service at the Blossom Music Center, the old Cleveland Cavaliers coliseum site, and elsewhere were essential to maintaining the character of the Park and now provide well-used recreation opportunities. And we are seeing it too at Dayton Aviation Heritage National Historic Park, which already includes some of the most pivotal sites needed to tell the story of the birth of aviation, such as the Wright brothers' famous bike shop, but which has yet to protect other features including the actual Wright Company factory buildings where they built the world's first airplanes.

These places are important to our communities not only for their recreational, scenic, and historic value, but also for their economic value as well. With 2.2 million visitors each year, Cuyahoga Valley is a major component of Ohio's recreation economy, which the Outdoor Industry Association affirms is responsible for \$17.4 billion in consumer spending in my state and supports 196K direct Ohio jobs. Similarly, Dayton Aviation does more than fire up the imagination of visitors from around the world - it also is bringing tourist dollars to Dayton and serving as the focal point for an Aviation and Aerospace Innovation District, with deep local government and nonprofit engagement, that could play a vital role in the city's future. The beautiful landscape at Cuyahoga and the irreplaceable factory buildings at Dayton are the infrastructure for these economic engines, and investments through LWCF have been and will continue to be crucial to that infrastructure.

Meanwhile, these and other parks face another infrastructure crisis, with roads and facilities in desperate need of repair and rehab. It's really two sides of the coin: to do

**U.S. Senate Committee on Energy and Natural Resources**  
**April 2015 Hearing The Land and Water Conservation Fund**  
**Questions for the Record Submitted to Deputy Secretary Michael Connor**

right by visitors to our parks and the communities that depend on them, we need to fix what's broken in our parks and secure the inholdings that are essential to the natural or historic reasons people visit in the first place.

Mr. Connor, can you comment on the connection between maintenance and acquisition needs in the Parks, and how your Department plans to address both, as I believe we must?

**Question** Can you please describe for me the Bureau of Land Management's role in permitting conventional and unconventional oil and natural gas production in Ohio's, Wayne National Forest prior to issuance of the agency's new fracking rule. How will BLM's role change now that the fracking rule is final?

**Questions from Senator John Barrasso**

**Question** Mr. Connor, Secretary Jewell often talks about the importance of taking a landscape-scale approach to ecosystem health and watersheds. In your testimony you also talked about the importance of being able to acquire private inholdings within exterior federal land boundaries.

Do you believe the over 18 million acres of state parks and forests, recreation sites, and natural areas should be treated as an integral part of the overall landscape? Should states have the resources to address the needs of their parks and forests and to acquire private inholdings from willing sellers within the exterior boundaries of state parks and forests?

**Question from Senator Al Franken**

**Question** Conservation investments play an important role in improving public access to federal lands for recreational purposes, such as hunting and fishing. But conservation is also essential for maintaining the natural system, and for helping to mitigate the impacts of climate change. For example, the Northwoods of Minnesota help to reduce the impacts of climate change by capturing and storing a significant amount of carbon, while protecting the water quality of some of our nation's greatest rivers and lakes. When choosing which land acquisition projects to prioritize for conservation, do the four land management agencies consider the potential for carbon capture and climate change mitigation?

**Questions from Senator Maria Hirono**

**Question 1 Fate of Landscape Proposals**

The FY 2016 President's Budget request includes a substantial amount of LWCF funding for the Island Forests at Risk Collaborative Landscape Proposal. Portions of this

**U.S. Senate Committee on Energy and Natural Resources**  
**April 2015 Hearing The Land and Water Conservation Fund**  
**Questions for the Record Submitted to Deputy Secretary Michael Connor**

landscape proposal, which seeks to purchase lands in Hawaii, are the number one priority in both the National Park Service's and US Fish and Wildlife Service's land acquisition budgets. These agencies have identified acquisition needs at Hawaii Volcanoes National Park and Hakalau Forest National Wildlife Refuge totaling 45,760 acres and \$38 million.

If LWCF were fully funded at \$900 million these projects could be completed. Based on historic funding levels, however, it is likely that Congress will appropriate much less, leaving a considerable number of unfunded federal needs in my state and across the country. Can you speak on the importance of having a dedicated and fully funded Land and Water Conservation Fund to address these needs now and in the future?

**Question 1 National Park Service Funding**

It is my understanding that out of the government's entire budget, the National Park Service has recently received roughly one-fifteenth of one percent of that budget. That is 0.0007% of the entire federal budget to pay 22,000 individuals to protect and maintain 84 million acres and provide a pleasant experience for almost 300 million visitors each year.

Given the small budget that the Park Service has to work with, they have an estimated maintenance backlog of around \$11.5 billion. Can you comment on how much land acquisitions funded by the LWCF have contributed to this maintenance backlog? What would the maintenance backlog look like if Congress were to adequately fund the National Park Service and address critical transportation legislation?

**Question 3 State Involvement**

One of the arguments used in support of reforming the LWCF is that state agencies and local stakeholders are best at identifying what local constituents want and need for outdoor recreation and that more LWCF funds should be allocated to the Stateside Grant Program.

Can you speak a little bit on the number and variety of partners involved in planning and development of LWCF proposals? Are there instances when state agencies have not played a significant role in working with the federal agencies to identify and prioritize projects?

114TH CONGRESS  
1ST SESSION

# S. 883

To facilitate the reestablishment of domestic, critical mineral designation, assessment, production, manufacturing, recycling, analysis, forecasting, workforce, education, and research capabilities in the United States, and for other purposes.

---

IN THE SENATE OF THE UNITED STATES

MARCH 26, 2015

Ms. MURKOWSKI introduced the following bill; which was read twice and referred to the Committee on Energy and Natural Resources

---

## A BILL

To facilitate the reestablishment of domestic, critical mineral designation, assessment, production, manufacturing, recycling, analysis, forecasting, workforce, education, and research capabilities in the United States, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*

2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) **SHORT TITLE.**—This Act may be cited as the  
5 “American Mineral Security Act of 2015”.

6 (b) **TABLE OF CONTENTS.**—The table of contents of  
7 this Act is as follows:

- Sec. 1. Short title; table of contents.  
 Sec. 2. Definitions.

TITLE I—DESIGNATIONS AND SUPPLY CHAIN

- Sec. 101. Policy.  
 Sec. 102. Critical mineral designations.  
 Sec. 103. Resource assessment.  
 Sec. 104. Permitting.  
 Sec. 105. Application of Executive order.  
 Sec. 106. Federal Register process.  
 Sec. 107. Recycling, efficiency, and alternatives.  
 Sec. 108. Analysis and forecasting.  
 Sec. 109. Education and workforce.

TITLE II—ADMINISTRATION

- Sec. 201. Repeal.  
 Sec. 202. Savings clauses.

1 **SEC. 2. DEFINITIONS.**

2 In this Act:

3 (1) **CRITICAL MINERAL.**—

4 (A) **IN GENERAL.**—The term “critical min-  
 5 eral” means any mineral, element, substance, or  
 6 material designated as critical pursuant to sec-  
 7 tion 102.

8 (B) **EXCLUSIONS.**—The term “critical  
 9 mineral” does not include—

10 (i) fuel minerals, including oil, natural  
 11 gas, or any other fossil fuels; or

12 (ii) water, ice, or snow.

13 (2) **INDIAN TRIBE.**—The term “Indian tribe”  
 14 has the meaning given the term in section 4 of the  
 15 Indian Self-Determination and Education Assistance  
 16 Act (25 U.S.C. 450b).

1           (3) MINERAL MANUFACTURING.—The term  
2 “mineral manufacturing” means—

3           (A) the production, processing, refining,  
4 alloying, separation, concentration, magnetic  
5 sintering, melting, or beneficiation of minerals  
6 within the United States;

7           (B) the fabrication, assembly, or produc-  
8 tion, within the United States, of equipment,  
9 components, or other goods with energy tech-  
10 nology-, defense-, agriculture-, consumer elec-  
11 tronics-, or health care-related applications; or

12           (C) any other value-added, manufacturing-  
13 related use of minerals undertaken within the  
14 United States.

15           (4) STATE.—The term “State” means—

16           (A) a State;

17           (B) the District of Columbia;

18           (C) the Commonwealth of Puerto Rico;

19           (D) Guam;

20           (E) American Samoa;

21           (F) the Commonwealth of the Northern  
22 Mariana Islands; and

23           (G) the United States Virgin Islands.

1       **TITLE I—DESIGNATIONS AND**  
2                                   **SUPPLY CHAIN**

3       **SEC. 101. POLICY.**

4           (a) IN GENERAL.—Section 3 of the National Mate-  
5 rials and Minerals Policy, Research and Development Act  
6 of 1980 (30 U.S.C. 1602) is amended in the second sen-  
7 tence—

8           (1) by striking paragraph (3) and inserting the  
9 following:

10           “(3) establish an analytical and forecasting ca-  
11 pability for identifying critical mineral demand, sup-  
12 ply, and other factors to allow informed actions to  
13 be taken to avoid supply shortages, mitigate price  
14 volatility, and prepare for demand growth and other  
15 market shifts;”;

16           (2) in paragraph (6), by striking “and” after  
17 the semicolon at the end;

18           (3) in paragraph (7), by striking the period at  
19 the end and inserting a semicolon; and

20           (4) by adding at the end the following:

21           “(8) encourage Federal agencies to facilitate  
22 the availability, development, and environmentally  
23 responsible production of domestic resources to meet  
24 national critical material or mineral needs;

1           “(9) avoid duplication of effort, prevent unneces-  
2           sary paperwork, and minimize delays in the ad-  
3           ministration of applicable laws (including regula-  
4           tions) and the issuance of permits and authoriza-  
5           tions necessary to explore for, develop, and produce  
6           critical minerals and to construct mineral manufac-  
7           turing facilities in accordance with applicable envi-  
8           ronmental and land management laws;

9           “(10) strengthen educational and research ca-  
10          pabilities and workforce training;

11          “(11) bolster international cooperation through  
12          technology transfer, information sharing, and other  
13          means;

14          “(12) promote the efficient production, use, and  
15          recycling of critical minerals;

16          “(13) develop alternatives to critical minerals;  
17          and

18          “(14) establish contingencies for the production  
19          of, or access to, critical minerals for which viable  
20          sources do not exist within the United States.”.

21          (b) CONFORMING AMENDMENT.—Section 2(b) of the  
22          National Materials and Minerals Policy, Research and De-  
23          velopment Act of 1980 (30 U.S.C. 1601(b)) is amended  
24          by striking “(b) As used in this Act, the term” and insert-  
25          ing the following:

1 “(b) DEFINITIONS.—In this Act:

2 “(1) CRITICAL MINERAL.—The term ‘critical  
3 mineral’ means any mineral or element designated  
4 as a critical mineral pursuant to section 102 of the  
5 American Mineral Security Act of 2015.

6 “(2) MATERIALS.—The term”.

7 **SEC. 102. CRITICAL MINERAL DESIGNATIONS.**

8 (a) DRAFT METHODOLOGY.—Not later than 90 days  
9 after the date of enactment of this Act, the Director of  
10 the United States Geological Survey (referred to in this  
11 title as the “Director”), in consultation with relevant Fed-  
12 eral agencies and entities, shall publish in the Federal  
13 Register for public comment a draft methodology for de-  
14 termining which minerals qualify as critical minerals  
15 based on an assessment of whether the minerals are—

16 (1) subject to potential supply restrictions (in-  
17 cluding restrictions associated with foreign political  
18 risk, abrupt demand growth, military conflict, violent  
19 unrest, anti-competitive or protectionist behaviors,  
20 and other risks throughout the supply chain); and

21 (2) important in use (including energy tech-  
22 nology-, defense-, currency-, agriculture-, consumer  
23 electronics-, and health care-related applications).

24 (b) AVAILABILITY OF DATA.—If available data is in-  
25 sufficient to provide a quantitative basis for the method-

1 ology developed under this section, qualitative evidence  
2 may be used to the extent necessary.

3 (c) FINAL METHODOLOGY.—After reviewing public  
4 comments on the draft methodology under subsection (a)  
5 and updating the draft methodology as appropriate, not  
6 later than 270 days after the date of enactment of this  
7 Act, the Director shall publish in the Federal Register a  
8 description of the final methodology for determining which  
9 minerals qualify as critical minerals.

10 (d) DESIGNATIONS.—

11 (1) IN GENERAL.—For purposes of carrying out  
12 this title, the Director shall maintain a list of min-  
13 erals and elements designated as critical, pursuant  
14 to the methodology under subsection (c).

15 (2) INITIAL LIST.—Subject to paragraph (1),  
16 not later than 1 year after the date of enactment of  
17 this Act, the Director shall publish in the Federal  
18 Register an initial list of minerals designated as crit-  
19 ical pursuant to the final methodology under sub-  
20 section (c) for the purpose of carrying out this title.

21 (3) INCLUSIONS.—Notwithstanding the criteria  
22 under subsection (a), any mineral or element deter-  
23 mined by another Federal agency to be strategic and  
24 critical to the defense or national security of the  
25 United States may be—

1 (A) considered to be a critical mineral; and  
2 (B) included on the list developed by the  
3 Director under this subsection.

4 (e) SUBSEQUENT REVIEW.—

5 (1) IN GENERAL.—The Director shall review  
6 the methodology and designations under subsections  
7 (c) and (d) at least every 2 years, or more frequently  
8 as the Director considers to be appropriate.

9 (2) REVISIONS.—Subject to subsection (d)(1),  
10 the Director may—

11 (A) revise the methodology described in  
12 this section;

13 (B) determine that minerals or elements  
14 previously determined to be critical minerals are  
15 no longer critical minerals; and

16 (C) designate additional minerals or ele-  
17 ments as critical minerals.

18 (f) NOTICE.—On finalization of the methodology  
19 under subsection (c), the list under subsection (d), or any  
20 revision to the methodology or list under subsection (e),  
21 the Director shall submit to Congress written notice of the  
22 action.

23 **SEC. 103. RESOURCE ASSESSMENT.**

24 (a) IN GENERAL.—Not later than 4 years after the  
25 date of enactment of this Act, in consultation with applica-

1 ble State (including geological surveys), local, academic,  
2 industry, and other entities, the Director shall complete  
3 a comprehensive national assessment of each critical min-  
4 eral that—

5 (1) identifies and quantifies known critical min-  
6 eral resources, using all available public and private  
7 information and datasets, including exploration his-  
8 tories; and

9 (2) provides a quantitative and qualitative as-  
10 sessment of undiscovered critical mineral resources  
11 throughout the United States, including probability  
12 estimates of tonnage and grade, using all available  
13 public and private information and datasets, includ-  
14 ing exploration histories.

15 (b) SUPPLEMENTARY INFORMATION.—In carrying  
16 out this section, the Director may carry out surveys and  
17 field work (including drilling, remote sensing, geophysical  
18 surveys, geological mapping, and geochemical sampling  
19 and analysis) to supplement existing information and  
20 datasets available for determining the existence of critical  
21 minerals on—

22 (1) Federal land;

23 (2) Indian tribal land, at the request or with  
24 the consent of the Indian tribe; and

1           (3) State land, at the request or with the con-  
2           sent of the Governor of the State.

3           (c) TECHNICAL ASSISTANCE.—At the request of the  
4 Governor of a State or the head of an Indian tribe, the  
5 Director may provide technical assistance to State govern-  
6 ments and Indian tribes conducting critical mineral re-  
7 source assessments on non-Federal land.

8           (d) PRIORITIZATION.—

9           (1) IN GENERAL.—The Director may sequence  
10 the completion of resource assessments for each crit-  
11 ical mineral such that critical minerals considered to  
12 be most critical under the methodology established  
13 under section 102 are completed first.

14           (2) REPORTING.—During the period beginning  
15 not later than 1 year after the date of enactment of  
16 this Act and ending on the date of completion of all  
17 of the assessments required under this section, the  
18 Director shall submit to Congress on an annual  
19 basis an interim report that—

20                   (A) identifies the sequence and schedule  
21 for completion of the assessments if the Direc-  
22 tor sequences the assessments; or

23                   (B) describes the progress of the assess-  
24 ments if the Director does not sequence the as-  
25 sessments.

1 (e) UPDATES.—The Director may periodically update  
2 the assessments conducted under this section based on—

3 (1) the generation of new information or  
4 datasets by the Federal Government; or

5 (2) the receipt of new information or datasets  
6 from critical mineral producers, State geological sur-  
7 veys, academic institutions, trade associations, or  
8 other entities or individuals.

9 (f) ADDITIONAL SURVEYS.—The Director shall com-  
10 plete a resource assessment for each additional mineral  
11 or element subsequently designated as a critical mineral  
12 under section 102(e)(2) not later than 2 years after the  
13 designation of the mineral or element.

14 (g) REPORT.—Not later than 2 years after the date  
15 of enactment of this Act, the Director shall submit to Con-  
16 gress a report describing the status of geological surveying  
17 of Federal land for any mineral commodity—

18 (1) for which the United States was dependent  
19 on a foreign country for more than 25 percent of the  
20 United States supply, as depicted in the report  
21 issued by the United States Geological Survey enti-  
22 tled “Mineral Commodity Summaries 2015”; but

23 (2) that is not designated as a critical mineral  
24 under section 102.

1 **SEC. 104. PERMITTING.**

2 (a) PERFORMANCE IMPROVEMENTS.—To improve  
3 the quality and timeliness of decisions, the Secretary of  
4 the Interior (acting through the Director of the Bureau  
5 of Land Management) and the Secretary of Agriculture  
6 (acting through the Chief of the Forest Service) (referred  
7 to in this section as the “Secretaries”) shall, to the max-  
8 imum extent practicable, with respect to critical mineral  
9 production on Federal land, complete Federal permitting  
10 and review processes with maximum efficiency and effec-  
11 tiveness, while supporting vital economic growth, by—

12 (1) establishing and adhering to timelines and  
13 schedules for the consideration of, and final deci-  
14 sions regarding, applications, operating plans, leases,  
15 licenses, permits, and other use authorizations for  
16 mineral-related activities on Federal land;

17 (2) establishing clear, quantifiable, and tem-  
18 poral permitting performance goals and tracking  
19 progress against those goals;

20 (3) engaging in early collaboration among agen-  
21 cies, project sponsors, and affected stakeholders—

22 (A) to incorporate and address the inter-  
23 ests of those parties; and

24 (B) to minimize delays;

25 (4) ensuring transparency and accountability by  
26 using cost-effective information technology to collect

1 and disseminate information regarding individual  
2 projects and agency performance;

3 (5) engaging in early and active consultation  
4 with State, local, and Indian tribal governments to  
5 avoid conflicts or duplication of effort, resolve con-  
6 cerns, and allow for concurrent, rather than sequen-  
7 tial, reviews;

8 (6) providing demonstrable improvements in the  
9 performance of Federal permitting and review proc-  
10 esses, including lower costs and more timely deci-  
11 sions;

12 (7) expanding and institutionalizing permitting  
13 and review process improvements that have proven  
14 effective;

15 (8) developing mechanisms to better commu-  
16 nicate priorities and resolve disputes among agencies  
17 at the national, regional, State, and local levels; and

18 (9) developing other practices, such as  
19 preapplication procedures.

20 (b) REVIEW AND REPORT.—Not later than 1 year  
21 after the date of enactment of this Act, the Secretaries  
22 shall submit to Congress a report that—

23 (1) identifies additional measures (including  
24 regulatory and legislative proposals, as appropriate)  
25 that would increase the timeliness of permitting ac-

1 activities for the exploration and development of do-  
2 mestic critical minerals;

3 (2) identifies options (including cost recovery  
4 paid by permit applicants) for ensuring adequate  
5 staffing and training of Federal entities and per-  
6 sonnel responsible for the consideration of applica-  
7 tions, operating plans, leases, licenses, permits, and  
8 other use authorizations for critical mineral-related  
9 activities on Federal land;

10 (3) quantifies the amount of time typically re-  
11 quired (including range derived from minimum and  
12 maximum durations, mean, median, variance, and  
13 other statistical measures or representations) to  
14 complete each step (including those aspects outside  
15 the control of the executive branch, such as judicial  
16 review, applicant decisions, or State and local gov-  
17 ernment involvement) associated with the develop-  
18 ment and processing of applications, operating  
19 plans, leases, licenses, permits, and other use au-  
20 thorizations for critical mineral-related activities on  
21 Federal land, which shall serve as a baseline for the  
22 performance metric under subsection (c); and

23 (4) describes actions carried out pursuant to  
24 subsection (a).

1           (c) PERFORMANCE METRIC.—Not later than 90 days  
2 after the date of submission of the report under subsection  
3 (b), the Secretaries, after providing public notice and an  
4 opportunity to comment, shall develop and publish a per-  
5 formance metric for evaluating the progress made by the  
6 executive branch to expedite the permitting of activities  
7 that will increase exploration for, and development of, do-  
8 mestic critical minerals, while maintaining environmental  
9 standards.

10          (d) ANNUAL REPORTS.—Beginning with the first  
11 budget submission by the President under section 1105  
12 of title 31, United States Code, after publication of the  
13 performance metric required under subsection (c), and an-  
14 nually thereafter, the Secretaries shall submit to Congress  
15 a report that—

16           (1) summarizes the implementation of rec-  
17 ommendations, measures, and options identified in  
18 paragraphs (1) and (2) of subsection (b);

19           (2) using the performance metric under sub-  
20 section (c), describes progress made by the executive  
21 branch, as compared to the baseline established pur-  
22 suant to subsection (b)(3), on expediting the permit-  
23 ting of activities that will increase exploration for,  
24 and development of, domestic critical minerals; and

1           (3) compares the United States to other coun-  
2 tries in terms of permitting efficiency and any other  
3 criteria relevant to the globally competitive critical  
4 minerals industry.

5           (e) INDIVIDUAL PROJECTS.—Using data from the  
6 Secretaries generated under subsection (d), the Director  
7 of the Office of Management and Budget shall prioritize  
8 inclusion of individual critical mineral projects in the per-  
9 mit performance dashboard.

10          (f) REPORT OF SMALL BUSINESS ADMINISTRA-  
11 TION.—Not later than 1 year and 300 days after the date  
12 of enactment of this Act, the Administrator of the Small  
13 Business Administration shall submit to the applicable  
14 committees of Congress a report that assesses the per-  
15 formance of Federal agencies with respect to—

16           (1) complying with chapter 6 of title 5, United  
17 States Code (commonly known as the “Regulatory  
18 Flexibility Act”), in promulgating regulations appli-  
19 cable to the critical minerals industry; and

20           (2) performing an analysis of regulations appli-  
21 cable to the critical minerals industry that may be  
22 outmoded, inefficient, duplicative, or excessively bur-  
23 densome.

1 **SEC. 105. APPLICATION OF EXECUTIVE ORDER.**

2 Domestic mines that will produce critical minerals  
3 and critical mineral manufacturing projects shall be con-  
4 sidered to be infrastructure projects, as described in Exec-  
5 utive Order 13604 (5 U.S.C. 601 note; relating to improv-  
6 ing performance of Federal permitting and review of infra-  
7 structure projects).

8 **SEC. 106. FEDERAL REGISTER PROCESS.**

9 (a) PREPARATION.—The preparation of Federal Reg-  
10 ister notices required by law associated with the issuance  
11 of a critical mineral exploration or mine permit shall be  
12 delegated to the organizational level within the agency re-  
13 sponsible for issuing the critical mineral exploration or  
14 mine permit.

15 (b) TRANSMISSION.—All Federal Register notices re-  
16 garding official document availability, announcements of  
17 meetings, or notices of intent to undertake an action shall  
18 be originated in, and transmitted to the Federal Register  
19 from, the office in which, as applicable—

20 (1) the documents or meetings are held; or

21 (2) the activity is initiated.

22 (c) DEPARTMENTAL REVIEW.—Absent any extraor-  
23 dinary circumstance, and except as otherwise required by  
24 law, each Federal Register notice described in subsection  
25 (a) shall be—

1 (1) subject to any required reviews within the  
2 Department of the Interior or the Department of  
3 Agriculture; and

4 (2) published in final form in the Federal Reg-  
5 ister not later than 45 days after the date of initial  
6 preparation of the notice.

7 **SEC. 107. RECYCLING, EFFICIENCY, AND ALTERNATIVES.**

8 (a) ESTABLISHMENT.—The Secretary of Energy, in  
9 consultation with the Director, shall conduct a program  
10 of research and development—

11 (1) to promote the efficient production, use,  
12 and recycling of critical minerals throughout the  
13 supply chain; and

14 (2) to develop alternatives to critical minerals  
15 that do not occur in significant abundance in the  
16 United States.

17 (b) COOPERATION.—In carrying out the program, the  
18 Secretary of Energy shall cooperate with appropriate—

19 (1) Federal agencies and National Laboratories;

20 (2) critical mineral producers;

21 (3) critical mineral processors;

22 (4) critical mineral manufacturers;

23 (5) trade associations;

24 (6) academic institutions;

25 (7) small businesses; and

1 (8) other relevant entities or individuals.

2 (c) ACTIVITIES.—Under the program, the Secretary  
3 of Energy, in consultation with the Director, shall carry  
4 out activities that include the identification and develop-  
5 ment of—

6 (1) advanced critical mineral extraction, pro-  
7 duction, separation, alloying, or processing tech-  
8 nologies that decrease the energy consumption, envi-  
9 ronmental impact, and costs of those activities, in-  
10 cluding—

11 (A) efficient water and wastewater man-  
12 agement strategies;

13 (B) technologies and management strate-  
14 gies to control the environmental impacts of  
15 radionuclides in ore tailings; and

16 (C) technologies for separation and proc-  
17 essing;

18 (2) technologies or process improvements that  
19 minimize the use, or lead to more efficient use, of  
20 critical minerals across the full supply chain;

21 (3) technologies, process improvements, or de-  
22 sign optimizations that facilitate the recycling of  
23 critical minerals, and options for improving the rates  
24 of collection of products and scrap containing critical

1 minerals from post-consumer, industrial, or other  
2 waste streams;

3 (4) commercial markets, advanced storage  
4 methods, energy applications, and other beneficial  
5 uses of critical minerals processing byproducts;

6 (5) alternative minerals, metals, and materials,  
7 particularly those available in abundance within the  
8 United States and not subject to potential supply re-  
9 strictions, that lessen the need for critical minerals;  
10 and

11 (6) alternative energy technologies or alter-  
12 native designs of existing energy technologies, par-  
13 ticularly those that use minerals that—

14 (A) occur in abundance in the United  
15 States; and

16 (B) are not subject to potential supply re-  
17 strictions.

18 (d) REPORTS.—Not later than 2 years after the date  
19 of enactment of this Act, and annually thereafter, the Sec-  
20 retary of Energy shall submit to Congress a report sum-  
21 marizing the activities, findings, and progress of the pro-  
22 gram.

23 **SEC. 108. ANALYSIS AND FORECASTING.**

24 (a) CAPABILITIES.—In order to evaluate existing crit-  
25 ical mineral policies and inform future actions that may

1 be taken to avoid supply shortages, mitigate price vola-  
2 tility, and prepare for demand growth and other market  
3 shifts, the Director, in consultation with the Energy Infor-  
4 mation Administration, academic institutions, and others  
5 in order to maximize the application of existing com-  
6 petencies related to developing and maintaining computer-  
7 models and similar analytical tools, shall conduct and pub-  
8 lish the results of an annual report that includes—

9           (1) as part of the annually published Mineral  
10       Commodity Summaries from the United States Geo-  
11       logical Survey, a comprehensive review of critical  
12       mineral production, consumption, and recycling pat-  
13       terns, including—

14           (A) the quantity of each critical mineral  
15       domestically produced during the preceding  
16       year;

17           (B) the quantity of each critical mineral  
18       domestically consumed during the preceding  
19       year;

20           (C) market price data or other price data  
21       for each critical mineral;

22           (D) an assessment of—

23           (i) critical mineral requirements to  
24       meet the national security, energy, eco-  
25       nomic, industrial, technological, and other

1 needs of the United States during the pre-  
2 ceding year;

3 (ii) the reliance of the United States  
4 on foreign sources to meet those needs  
5 during the preceding year; and

6 (iii) the implications of any supply  
7 shortages, restrictions, or disruptions dur-  
8 ing the preceding year;

9 (E) the quantity of each critical mineral  
10 domestically recycled during the preceding year;

11 (F) the market penetration during the pre-  
12 ceding year of alternatives to each critical min-  
13 eral;

14 (G) a discussion of international trends as-  
15 sociated with the discovery, production, con-  
16 sumption, use, costs of production, prices, and  
17 recycling of each critical mineral as well as the  
18 development of alternatives to critical minerals;  
19 and

20 (H) such other data, analyses, and evalua-  
21 tions as the Director finds are necessary to  
22 achieve the purposes of this section; and

23 (2) a comprehensive forecast, entitled the “An-  
24 nual Critical Minerals Outlook”, of projected critical

1 mineral production, consumption, and recycling pat-  
2 terns, including—

3 (A) the quantity of each critical mineral  
4 projected to be domestically produced over the  
5 subsequent 1-year, 5-year, and 10-year periods;

6 (B) the quantity of each critical mineral  
7 projected to be domestically consumed over the  
8 subsequent 1-year, 5-year, and 10-year periods;

9 (C) an assessment of—

10 (i) critical mineral requirements to  
11 meet projected national security, energy,  
12 economic, industrial, technological, and  
13 other needs of the United States;

14 (ii) the projected reliance of the  
15 United States on foreign sources to meet  
16 those needs; and

17 (iii) the projected implications of po-  
18 tential supply shortages, restrictions, or  
19 disruptions;

20 (D) the quantity of each critical mineral  
21 projected to be domestically recycled over the  
22 subsequent 1-year, 5-year, and 10-year periods;

23 (E) the market penetration of alternatives  
24 to each critical mineral projected to take place

1 over the subsequent 1-year, 5-year, and 10-year  
2 periods;

3 (F) a discussion of reasonably foreseeable  
4 international trends associated with the dis-  
5 covery, production, consumption, use, costs of  
6 production, and recycling of each critical min-  
7 eral as well as the development of alternatives  
8 to critical minerals; and

9 (G) such other projections relating to each  
10 critical mineral as the Director determines to be  
11 necessary to achieve the purposes of this sec-  
12 tion.

13 (b) PROPRIETARY INFORMATION.—In preparing a re-  
14 port described in subsection (a), the Director shall ensure,  
15 consistent with section 5(f) of the National Materials and  
16 Minerals Policy, Research and Development Act of 1980  
17 (30 U.S.C. 1604(f)), that—

18 (1) no person uses the information and data  
19 collected for the report for a purpose other than the  
20 development of or reporting of aggregate data in a  
21 manner such that the identity of the person or firm  
22 who supplied the information is not discernible and  
23 is not material to the intended uses of the informa-  
24 tion;

1           (2) no person discloses any information or data  
2           collected for the report unless the information or  
3           data has been transformed into a statistical or ag-  
4           gregate form that does not allow the identification of  
5           the person or firm who supplied particular informa-  
6           tion; and

7           (3) procedures are established to require the  
8           withholding of any information or data collected for  
9           the report if the Director determines that with-  
10          holding is necessary to protect proprietary informa-  
11          tion, including any trade secrets or other confiden-  
12          tial information.

13 **SEC. 109. EDUCATION AND WORKFORCE.**

14          (a) **WORKFORCE ASSESSMENT.**—Not later than 1  
15          year and 300 days after the date of enactment of this Act,  
16          the Secretary of Labor (in consultation with the Director,  
17          the Director of the National Science Foundation, institu-  
18          tions of higher education with substantial expertise in  
19          mining, and employers in the critical minerals sector) shall  
20          submit to Congress an assessment of the domestic avail-  
21          ability of technically trained personnel necessary for crit-  
22          ical mineral exploration, development, assessment, produc-  
23          tion, manufacturing, recycling, analysis, forecasting, edu-  
24          cation, and research, including an analysis of—

1           (1) skills that are in the shortest supply as of  
2 the date of the assessment;

3           (2) skills that are projected to be in short sup-  
4 ply in the future;

5           (3) the demographics of the critical minerals in-  
6 dustry and how the demographics will evolve under  
7 the influence of factors such as an aging workforce;

8           (4) the effectiveness of training and education  
9 programs in addressing skills shortages;

10           (5) opportunities to hire locally for new and ex-  
11 isting critical mineral activities;

12           (6) the sufficiency of personnel within relevant  
13 areas of the Federal Government for achieving the  
14 policies described in section 3 of the National Mate-  
15 rials and Minerals Policy, Research and Develop-  
16 ment Act of 1980 (30 U.S.C. 1602); and

17           (7) the potential need for new training pro-  
18 grams to have a measurable effect on the supply of  
19 trained workers in the critical minerals industry.

20 (b) CURRICULUM STUDY.—

21           (1) IN GENERAL.—The Director and the Sec-  
22 retary of Labor shall jointly enter into an arrange-  
23 ment with the National Academy of Sciences and the  
24 National Academy of Engineering under which the

1 Academies shall coordinate with the National  
2 Science Foundation on conducting a study—

3 (A) to design an interdisciplinary program  
4 on critical minerals that will support the critical  
5 mineral supply chain and improve the ability of  
6 the United States to increase domestic, critical  
7 mineral exploration, development, production,  
8 manufacturing, and recycling;

9 (B) to address undergraduate and grad-  
10 uate education, especially to assist in the devel-  
11 opment of graduate level programs of research  
12 and instruction that lead to advanced degrees  
13 with an emphasis on the critical mineral supply  
14 chain or other positions that will increase do-  
15 mestic, critical mineral exploration, develop-  
16 ment, production, manufacturing, and recycling;

17 (C) to develop guidelines for proposals  
18 from institutions of higher education with sub-  
19 stantial capabilities in the required disciplines  
20 for activities to improve the critical mineral  
21 supply chain and advance the capacity of the  
22 United States to increase domestic, critical min-  
23 eral exploration, research, development, produc-  
24 tion, manufacturing, and recycling; and

1           (D) to outline criteria for evaluating per-  
2           formance and recommendations for the amount  
3           of funding that will be necessary to establish  
4           and carry out the program described in sub-  
5           section (c).

6           (2) REPORT.—Not later than 2 years after the  
7           date of enactment of this Act, the Director shall  
8           submit to Congress a description of the results of  
9           the study required under paragraph (1).

10          (c) PROGRAM.—

11           (1) ESTABLISHMENT.—The Director and the  
12           Secretary of Labor shall jointly conduct a competi-  
13           tive grant program under which institutions of high-  
14           er education may apply for and receive 4-year grants  
15           for—

16           (A) startup costs for newly designated fac-  
17           ulty positions in integrated critical mineral edu-  
18           cation, research, innovation, training, and work-  
19           force development programs consistent with  
20           subsection (b);

21           (B) internships, scholarships, and fellow-  
22           ships for students enrolled in programs related  
23           to critical minerals;

1 (C) equipment necessary for integrated  
 2 critical mineral innovation, training, and work-  
 3 force development programs; and

4 (D) research of critical minerals and their  
 5 applications, particularly concerning the manu-  
 6 facture of critical components vital to national  
 7 security.

8 (2) RENEWAL.—A grant under this subsection  
 9 shall be renewable for up to 2 additional 3-year  
 10 terms based on performance criteria outlined under  
 11 subsection (b)(1)(D).

## 12 **TITLE II—ADMINISTRATION**

### 13 **SEC. 201. REPEAL.**

14 (a) IN GENERAL.—The National Critical Materials  
 15 Act of 1984 (30 U.S.C. 1801 et seq.) is repealed.

16 (b) CONFORMING AMENDMENT.—Section 3(d) of the  
 17 National Superconductivity and Competitiveness Act of  
 18 1988 (15 U.S.C. 5202(d)) is amended in the first sentence  
 19 by striking “, with the assistance of the National Critical  
 20 Materials Council as specified in the National Critical Ma-  
 21 terials Act of 1984 (30 U.S.C. 1801 et seq.),”.

### 22 **SEC. 202. SAVINGS CLAUSES.**

23 (a) IN GENERAL.—Nothing in this Act or an amend-  
 24 ment made by this Act modifies any requirement or au-  
 25 thority provided by the matter under the heading “**GEO-**

1 **LOGICAL SURVEY**’ of the first section of the Act of  
2 March 3, 1879 (43 U.S.C. 31(a)).

3 (b) POTASH.—Nothing in this Act affects any aspect  
4 of Secretarial Order 3324, issued by the Secretary of the  
5 Interior on December 3, 2012, with respect to potash and  
6 oil and gas operators.

## **DEFENSE:**

### **Dems trying to reverse committee votes on sage grouse listing, biofuels**

Ariel Wittenberg, E&E reporter

Published: Monday, May 11, 2015

House Democrats are taking another crack at votes they lost on an imperiled bird and biofuels policy during last month's House Armed Services Committee markup of the fiscal 2016 National Defense Authorization Act.

Democrats have offered amendments for this week's expected floor debate of the bill that would reverse language added in committee to limit an endangered species listing for the greater sage grouse and the Pentagon's ability to invest in biofuels.

Along with eight co-sponsors, Rep. Niki Tsongas (D-Mass.) has renewed her attempt to scrap language from the bill that would delay a sage grouse listing and repeal federal sage grouse conservation plans. Her amendment was thwarted last month by a vote of 26-36 after a heated committee debate between her and Rep. Rob Bishop (R-Utah) ([E&E Daily](#), April 30).

The House Rules Committee will meet this week to decide which of the offered amendments will be allowed floor votes.

Democrats are also hoping to undo a provision narrowly passed in committee that would limit Pentagon investments in biofuel refineries, preventing the Department of Defense from entering into any contracts for the "planning, design, refurbishing or construction of a biofuels refinery" without congressional approval.

Rep. Mark Pocan (D-Wis.) has submitted an amendment to simply strike that provision, while Rep. Scott Peters (D-Calif.) has submitted an amendment to specifically allow the Pentagon to enter into such contracts. Under Peters' amendment, the Department of Defense would have to certify that the project was necessary to protect national security and notify both the House and Senate armed services committees.

Also this week, the Senate Armed Services Committee will take up its version of the fiscal 2016 Defense Authorization Act.

The Senate panel's markups have historically been conducted behind closed doors for reasons of national security. For the first time, some subcommittee markups this year will be open to the public, including that of the Readiness and Management Support Subcommittee, which deals with energy and environmental issues.

Congressional observers say they expect Senate Republicans will resume their perennial efforts to target the Pentagon's biofuels program.

Tom Swanson, of the PEW Project on National Security, Energy and Climate, said he expects Senate Republicans might try to repeal a section of a 2007 law that prohibits the federal government from buying alternative fuels with a larger greenhouse gas footprint than petroleum.

The House Armed Services Committee last month added language to its version of the defense authorization repealing Section 526 of the Energy Independence and Security Act, and Swanson said he expects the Senate panel to follow suit.

"On the House it has been a bit of a redux of past years, so we will have to see if that happens in the Senate, too," Swanson said.

One surprise on the Senate side last year was an attempt from Sen. Ted Cruz (R-Texas) to repeal renewable energy mandates at the Department of Defense. That effort failed, but Swanson said he is unsure whether something similar could occur this year.

"It is a bit different now that Republicans are in the majority," he said.

**Schedule:** The Senate Armed Services Subcommittee on Readiness and Management Support markup is Tuesday, May 12, at 2 p.m. in Dirksen 106.

No. We've asked DOD and they are not comfortable with us doing that. They keep pushing us back to their OSD statement. I don't think FWS is comfortable with asking them out of the chain of command and DOD is not either. If you want, I can connect you with the proper person at DOD leg and you can ask her....

Hi Latricia:

Are you the correct contact for this Interior hearing for the Bureau of Land Management? Please let me know.

Thank you,

Elmer

**United States Senate**  
COMMITTEE ON APPROPRIATIONS

**TRANSCRIPT FOR REVIEW**

Attached please find a PDF file of the Interior, Environment, and Related Agencies Appropriations for Fiscal Year 2016 Hearing Held on Wednesday, May 13, 2015. We send PDF files of the hearing transcripts to eliminate picking up the paper copy. You can print a copy in your office, mark it up, and send back the corrected pages via PDF, in person, or by fax (to 202-228-2348).

DUE DATE: **Friday, June 19, 2015**.

**CORRECTIONS**

If possible, please mark corrections within the body of the text; otherwise, utilize marginal space. Do not use flair or marking type pens.

Please Note: We maintain (or change) capitalization and numeral style to reflect the Government Printing Office Style Manual. Please refer to hearing and transcript instructions.

**HEADINGS**

Insert a minimum of one heading on each 3 pages of transcript or when subject matter changes.

Insert a heading after each insert.

## INSERTS

Furnish clean, legible copy (suitable for reproduction). All inserts should be proofread before being submitted.

All inserts (i.e., statements, questions and answers, and any other inserts) should be e-mailed to Editorial, Printing, and Documents at:

[elmer\\_barnes@appro.senate.gov](mailto:elmer_barnes@appro.senate.gov)

OR

[print-ed@appro.senate.gov](mailto:print-ed@appro.senate.gov)

All inserts should follow the pages where indicated. Do not attach to manuscript.

For further information call 202-224-7266.

If hand delivering, return the corrected manuscript (Do not return a Xerox copy) to:

Elmer L. Barnes Jr.  
Committee on Appropriations  
Editorial, Printing, and Documents  
SD-126  
Dirksen Senate Office Building

Thank you.

---

Elmer L. Barnes, Jr.

United States Senate  
Committee on Appropriations*

Office hours: 7 p.m. - 3:30 a.m.

Work: (202) 224-7266

Fax: (202) 228-2348

[elmer\\_barnes@appro.senate.gov](mailto:elmer_barnes@appro.senate.gov)

## **PROCEDURES TO FOLLOW IN PREPARING AND EDITING HEARING TRANSCRIPTS AND SUBMITTED QUESTIONS FOR THE RECORD**

Because of time constraints placed on the Senate Appropriations Committee in processing hearings, the Committee requests you to observe the following instructions when preparing hearing transcripts.

### **GENERAL**

One copy of the transcript (the original will be sent to you as soon as possible after each hearing. This original copy is to be returned to the Committee Editorial, Printing, and Documents Office (Room SD-126) by the due date posted on the transcript (usually 3 weeks). The returned transcript should include all inserts and responses to any questions asked during the hearing which required further explanation.

PLEASE E-MAIL ALL WITNESSES' STATEMENTS AND ANY INSERTS TO:

[Valerie Hutton@appro.senate.gov](mailto:Valerie.Hutton@appro.senate.gov)

OR TO

[Print-ed@appro.senate.gov](mailto:Print-ed@appro.senate.gov)

INCLUDE IN THE E-MAIL THE AGENCY SUBMITTING THE DATA AND THE DATE OF THE HEARING.

If there should be an insert or explanation which requires a longer time to prepare than the due date given on the transcript, indicate what insert or question is missing when returning the transcript. This privilege should not be abused. It is extremely important that the transcript be returned to the Committee by the date specified.

Responses to questions for the record submitted to the agency at the close of the hearing should be returned to the Committee (with one photocopied set) within 3 weeks of receipt.

All statements, inserted material, and record questions and answers should be e-mailed. Any questions may be answered by calling the Editorial, Printing, and Documents Office (202) 224-7265.

It will be the responsibility of the Budget Liaison Officers to make certain that Committee instructions on transcripts and submitted questions are followed by offices contributing material to transcripts or answers submitted to questions. Material not submitted in proper format will be returned for correct form.

### **THE TRANSCRIPT**

Transcripts can be returned from the Department either by hard copy, fax, or PDF file e-mailed of the corrected pages.

Short headings should be inserted at a minimum of one heading every three pages of transcript copy. A new heading should be added after each insert.

If a subcommittee member requests information to be provided for the hearing record during the hearing, the information should be inserted at the proper place following the request. One additional copy should be furnished to the subcommittee staff.

All inserts should be original copy, whenever possible, free from punched holes, contain no staples, and if two sided, two copies must be furnished.

Inserts should be inserted following the appropriate pages in the hearing record. The transcript page number where the material should be inserted, together with an identifying letter, encircled in pencil, should be arrowed in between the lines of the transcript, as "Insert 23A follows". The insert should then be inserted behind the page referred to with the notation

“23A” in the top right corner.

Be certain to spell out acronyms the first time used.

Spell out “million” instead of using M to indicate amount. Show dollar figures as decimal to one place as follows: “\$7.8 million”; or full numerical figure when rounding to one decimal is not appropriate: “\$7,845,000”. “Thousands” should be written in full figures (e.g. \$25,000, not “\$25 thousand”).

Any charts used in oral testimony should be numbered (1, 2, etc.) and should be placed in appropriate place of the transcript.

A Senator’s remarks should be corrected only for typographical errors. If there is a misstatement of fact or some other reasons which you believe justifies making a change, do not make the change, but attach a note with the suggested change on the page where you believe the change should be made.

Any photographs or graphs to be reproduced in hearing record must be clear and legible. If a PowerPoint file or other data file is available please e-mail to

[Valerie.Hutton@appro.senate.gov](mailto:Valerie.Hutton@appro.senate.gov)

### **SUBMITTED RECORD QUESTIONS**

Submitted questions will be given to the appropriate budget officer after each hearing. Record questions must be returned to the Committee 3 weeks after date of receipt.

An original and one copy of submitted questions and answers should be provided to the Committee. The copy is for transmittal to the Senator submitting questions.

In order to obtain conformity in style in typing submitted questions and answers, please observe the following:

Answers to written questions submitted by the presiding Senator or subcommittee staff shall carry the heading centered:

“QUESTIONS SUBMITTED BY SENATOR \_\_\_\_\_”

Each question submitted should be retyped in full prior to respondent's answer. Questions should be prefaced by the word “Question.”, and the answer prefaced by the word “Answer.” (each followed by a period)

Center headings should be typed in all capitals in space provided with only one blank line above and below heading

Each question and answer should be typed single-spaced. You may answer more than one question on a page. Double space between the answer and the next question. Indent each paragraph five spaces.

Do not number questions.

Avoid personal or individual references. It is the Department or Agency responding, not individuals.

In a series of submitted questions relating to the same subject matter, answer each question separately. In other words, do not type all the questions and then all the answers. There may be a few exceptions where one or two questions may best be combined in a single answer. Check with the Committee staff to determine whether this is appropriate.

Any charts, tables, etc. in an answer should follow as soon thereafter as possible any written explanation. In other words, do not identify a table as Table A, and then insert the table after an entire series of questions and answers. Insert the pertinent chart or table following reference to it.

Indicate in charts and tables whether figures are in thousands, millions, etc. All tables

should have totals. (For example, a listing and description of R&D contracts should include a total at the end.)

If similar questions are submitted which require identical answers, refer the questions and answers to the attention of the Committee staff, so they may determine whether it is appropriate to modify or delete one of the questions.

## **PROOFS**

Proofs must be returned to the Committee by date requested.

Check proofs of all material submitted to see that they have been inserted in the appropriate places in the proofs.

All corrections on proofs should be made with colored pen or pencil, preferably red, in the main. Make corrections easy to find and read.

Make note of, and supply, any missing inserts as indicated by the printer.

Corrected pages can be faxed or e-mail a PDF file.

ATTACHMENT: Sample sheet for preparation of record questions

## INSTRUCTIONS FOR PREPARING QUESTIONS AND ANSWERS

More than one question and answer may appear on a page. In fact, it is preferable to fill the page. Group questions and answers by Senator.

Any questions, please call 224-7265, 7266, 7217, or 7267

### SAMPLE AS TYPED BY AGENCY

#### QUESTIONS SUBMITTED BY SENATOR HATFIELD

##### PROGRAM PARTICIPATION

Question. In all the Child Nutrition Programs, there is an anticipated increase in the number of free and reduced price meals served. To what do you attribute this increase?

Answer. The anticipated increase in the number of free, reduced price and paid meals served is based on increased school enrollments and higher.

##### STATE ADMINISTRATIVE EXPENSES

Question. Within the Child Nutrition account, there is a line item called "State Administrative Expenses," (SEA), which provides matching funds to the States for administering Child Nutrition Programs.

Answer. There has been continuing concern with the fact that almost one-half the amount allocated for State administrative expenses remains unused. SAE funds which remain unobligated by a State on September 30, 1986.

OFFICE	FY 1993	FY 1994	FY 1995
Policy and Direction	\$26,600	\$25,500	\$25,500
Aviation Safety	11,000	11,000	11,000
Surface Transportation	5,500	8,000	8,000
Research and Engineering	5,500	8,000	8,000
Administration	5,500	5,500	5,500
TOTAL	54,100	58,000	58,000

### DO NOT TYPE QUESTIONS AND ANSWERS AS FOLLOWS

Question: In all the Child Nutrition Programs, there is an anticipated increase in the number of free and reduced price meals served. To what do you attribute this increase?

Answer. The anticipated increase in the number of free, reduced price and paid meals served is based on increased school enrollments and higher.

**BUREAU OF LAND MANAGEMENT**

1 INTERIOR, ENVIRONMENT, AND RELATED AGENCIES

2 APPROPRIATIONS FOR FISCAL YEAR 2016

3 -----

4 WEDNESDAY, MAY 13, 2015

5  
6 U.S. Senate,

7 Subcommittee of the Committee on Appropriations,

8 Washington, DC.

9  
10 The subcommittee met at 10:07 a.m., in room SD-124,  
11 Dirksen Senate Office Building, Hon. Lisa Murkowski  
12 (chairwoman) presiding.

13 Present: Senators Murkowski, Cochran, Hoeven, Daines,  
14 Cassidy, Udall, and Merkley.

15 DEPARTMENT OF THE INTERIOR

16 BUREAU OF LAND MANAGEMENT

17 STATEMENT OF NEIL KORNZE, DIRECTOR

18 OPENING STATEMENT OF SENATOR LISA MURKOWSKI

19 Senator Murkowski: We will call to order the Senate  
20 Appropriations Subcommittee on the Interior, Environment, and  
21 Related Agencies.

22 Welcome to the committee, Mr. Kornze. We appreciate you  
23 being here today.

24 I think it is fair to say that in recent years discussions

1 about the Bureau of Land Management (BLM) budget or oversight  
2 issues in this subcommittee have been wrapped up into the  
3 bigger, broader budget hearing for the entire Department of the  
4 Interior. As we move toward marking up a bill, I do think that  
5 it is beneficial for subcommittee members to have an  
6 opportunity to discuss the operations and programs of the  
7 largest land manager in the United States in greater detail  
8 than can be accomplished at the broader department-wide budget  
9 hearing for the Interior.

10 For fiscal year 2016, the President's budget has requested  
11 \$1.2 billion for the BLM. This is a \$107.6 million amount more  
12 than the current level. As I have noted in our subcommittee  
13 hearings, the President's request assumes Congress does not  
14 have to comply with spending limits. But with the budget that  
15 we passed last week, that assumption is no longer relevant.  
16 This subcommittee will have to make some tough choices about  
17 where to spend limited resources given the spending limits that  
18 we face in a way that the President's budget was able to avoid.

19 The BLM is responsible for managing roughly 250 million  
20 acres of Federal land -- this is about 38 percent of the entire  
21 Federal surface estate -- and 700 million acres of subsurface  
22 estate. The vast majority of this land is in our 11 Western  
23 States and Alaska.

24 BLM has a multiple use mission, part of which is

1 facilitating most Federal onshore natural resource development.  
2 Consequently, BLM-managed lands are important economic drivers  
3 beyond recreation and conservation, and this is especially true  
4 in Alaska.

5 While BLM only manages a small portion of the Alaska land  
6 base because of the large size of my State, nearly one-quarter  
7 of all BLM lands are located in the State of Alaska, the  
8 largest portion of this land is within the National Petroleum  
9 Reserve Alaska, NPRA. It is no secret that I believe  
10 responsible development of our Nation's energy resources is  
11 important to both our economic and our national security. The  
12 resources within NPRA can and must be developed in a  
13 responsible manner, and as a Nation we are relying on the BLM  
14 to make this responsible development possible.

15 The work to bring affordable energy to our homes has come  
16 with some challenges. Prior to 1982, the Federal Government  
17 drilled more than 130 exploratory wells in an effort to  
18 determine the extent of oil and gas resources in the region.  
19 But unfortunately, those wells were abandoned and many of them  
20 are awaiting cleanup to this day.

21 Passage of the Helium Stewardship Act a couple years ago  
22 provided BLM with the funding needed to make progress on  
23 cleanup of these blights, and we have made some headway in that  
24 area. We recognize that there is more to be done here, and I

## BUREAU OF LAND MANAGEMENT

1 look forward to asking you, Mr. Kornze, about both the  
2 contaminated well issue and implementation of the Helium  
3 Stewardship Act.

4 The BLM has made considerable progress on issues important  
5 to me and to Alaskans. I would like to thank you, Mr. Kornze,  
6 as well as Alaska State Director Bud Cribley. The team that  
7 has been working to complete the transfer of the economic  
8 tracks to see Alaska has worked well, and I appreciate that. I  
9 did have the opportunity to meet with Mr. Cribley a couple  
10 weeks ago. We are making some progress on the conveyance of  
11 Alaska lands under the Alaska Native Claims Settlement Act  
12 (ANCSA). It has been a long time in coming, though. It was  
13 the Alaska Lands Conveyance Act of 2004 that we passed and was  
14 signed into law, and the promise at that time was that the  
15 completion of the conveyances would be done by the 50th  
16 anniversary of statehood, which of course was 2009. We are  
17 sitting here in 2015. While we may be on track, we still have  
18 a ways to go there.

19 We have some other challenging issues that need to be  
20 addressed. The Greater Mooses Tooth Project. I have expressed  
21 my frustration with the mitigation requirements and other  
22 process issues that have proceeded throughout that process. And  
23 some of the issues have been settled, but we are still in a  
24 place where the Federal Government is proposing to put

1 conditions on the project that threaten to make it unaffordable  
2 to move forward.

3 This is really about prioritization and pace of  
4 responsible energy development on public lands not only in  
5 Alaska but in the Lower 48 as well. I think many of my  
6 colleagues from the West can relate to the struggles that we  
7 face in Alaska.

8 The most challenging issues facing the interior West where  
9 most of the BLM-managed lands in the lower 48 are located is  
10 potential regulatory action relating to the greater sage  
11 grouse. While the threat of an Endangered Species Act listing  
12 looms, there are significant fears that regulations put in  
13 place to preserve sage grouse habitat are perhaps even more  
14 restrictive and provide less certainty in the permitting  
15 process than an ESA listing. It is my understanding that the  
16 land use plan amendments that will govern management for sage  
17 grouse on BLM and Forest Service lands will be made public at  
18 the end of this month. And like my colleagues, I look forward  
19 to the release, the evaluation, and reception by impacted  
20 States. The contents of those plans will help this  
21 subcommittee determine the merits of the requested \$45 million  
22 increase BLM requested for sage grouse activities in the fiscal  
23 year 2016 budget.

24 The BLM included several other notable budget proposals,

1 including the request to once again raise fees on public land  
2 users like grazers and onshore oil and gas producers. Oil and  
3 gas activities on public lands contributed more than \$5 billion  
4 to the Federal Treasury in 2014. So I am not convinced that  
5 raising fees will not reduce this contribution by discouraging  
6 activity on our Federal lands. Less activity will ultimately  
7 result in less revenue to the Treasury and the communities  
8 which rely on these activities for economic sustainability.

9       So, Mr. Kornze, I look forward to hearing from you this  
10 morning about BLM's national priorities, including renewable  
11 energy development, their role in the Secretary's wildfire  
12 strategy, and many other important issues before the committee.

13       So again, thank you for agreeing to be with us this  
14 morning.

15       And with that, I turn to my friend and ranking member,  
16 Senator Udall.

17

# BUREAU OF LAND MANAGEMENT

7

1 STATEMENT OF SENATOR TOM UDALL

2 Senator Udall: Thank you, Chairman Murkowski. Good  
3 morning.

4 And I would also like to welcome Director Kornze. Thank  
5 you for joining us today as we discuss the fiscal year 2016  
6 budget request for the Bureau of Land Management.

7 The lands managed by BLM in New Mexico are vital to our  
8 economic vitality and to our natural and cultural heritage. Oil  
9 and gas production, mineral extraction, renewable energy,  
10 grazing, and hunting and recreational opportunities from hiking  
11 to class 6 rapids all can be found on BLM lands and are a part  
12 of what makes New Mexico la tierra encantada.

13 I am proud to have worked with my constituents and this  
14 administration to designate two of BLM's newest conservation  
15 units, the Organ Mountains-Desert Peaks National Monument in  
16 the south and the Rio Grande del Norte National Monument in  
17 northern New Mexico. Director Kornze, I really appreciate that  
18 you came to the State personally to walk the land we were  
19 talking about protecting. You and the BLM employees in New  
20 Mexico were so supportive and helpful to work with us on these  
21 designations. And I appreciate the outreach that is taking  
22 place now to include the local communities in the planning  
23 process. Both monuments are up for increased spending in the  
24 President's budget. We will talk about that today.

1 I am also glad that we will have time to discuss oil and  
2 gas production. We hear a lot about offshore production, but  
3 Federal lands are an important energy producer as well. In  
4 2014, Federal lands were responsible for 41 percent of U.S.  
5 coal, 40 percent of geothermal, 11 percent of domestic natural  
6 gas, and 5 percent of domestically produced oil.

7 BLM also approved renewable energy projects for up to  
8 16,000 megawatts of power. That is enough energy to take care  
9 of 4.8 million homes.

10 And BLM provides key access to minerals, including  
11 uranium, gold, silver, potash, gypsum, and building stones,  
12 sand, and gravel. This all makes a difference to our economy,  
13 our vitality, and our security.

14 I believe in responsible energy production and have long  
15 called for a "do it all, do it right" approach. Despite what  
16 its detractors may say, this administration has overseen a  
17 remarkable increase in oil development. We have seen an  
18 incredible 81 percent increase in production on public and  
19 tribal lands in 2014 versus 2008. Energy development is  
20 important to our economy in my State and elsewhere. But we  
21 also need to protect the environment and drinking water and  
22 make sure that the American public receives its fair share of  
23 revenue from industry's production of public resources.

24 The Government Accountability Office has had the Interior

1 Department's oil and gas programs on its high risk list for  
2 many years. There are two major concerns: the BLM's lack of  
3 authority to collect inspection fees and the difficulty in  
4 hiring and retaining a skilled workforce. The President's  
5 budget once again proposes to collect \$48 million from new  
6 inspection fees for onshore oil and gas producers. This would  
7 bring onshore production in line with offshore production where  
8 Congress instituted an inspection fee in fiscal year 2012. And  
9 it would put the responsibility for paying for inspections on  
10 leaseholders not the American taxpayer.

11 Director Kornze, another issue is the sage grouse. I know  
12 that you have spent a good deal of time on this. I would like  
13 to talk about the next steps with you this morning. While not  
14 on the same scale in New Mexico as we have recently dealt with  
15 the endangered species issues from the lesser prairie chicken  
16 and the sand dune lizard, listing and delisting of species by  
17 Congress goes against the intent of the Endangered Species Act.  
18 It requires that the Government make these decisions based on  
19 science not politics.

20 I believe that in New Mexico, we have created an effective  
21 model. In the case of the sand dune lizard, the U.S. Fish and  
22 Wildlife Service found that enough acres were enrolled  
23 voluntarily for legally binding conservation agreements for  
24 that protection to last and to take care of the species. It

1 concluded that a listing was not warranted. For the lesser  
2 prairie chicken, Fish and Wildlife found that the significant  
3 conservation efforts were able to avoid an endangered species  
4 listing, but it was not enough to prevent a threatened listing.

5 And the Service is working closely with the States to provide  
6 maximum flexibility under the law. I believe the process is  
7 working, bringing all stakeholders in to discuss how to protect  
8 species and habitat while ensuring economic growth.

9 So I look forward to talking with you, Director Kornze,  
10 about oil and gas, national monuments, sage grouse conservation  
11 efforts, and other important matters. Thank you again for  
12 being here this morning.

13 Thank you, Madam Chair.

14

## BUREAU OF LAND MANAGEMENT

1           Senator Murkowski: Thank you, Senator Udall.

2           Mr. Kornze, welcome to the committee. Mr. Kornze is the  
3 Director of the Bureau of Land Management for the U.S.  
4 Department of the Interior. You have generated a crowd this  
5 morning, which I am assuming is a good thing. It could be fan  
6 club. It could be lots of people with equal interests in this  
7 aspect of the Department of the Interior. So, again, we thank  
8 you for being here before the subcommittee this morning. We  
9 look forward to your opening statement and for the opportunity  
10 to ask some questions. So, Mr. Kornze, if you want to begin  
11 with your comments. Thank you. Welcome.

12

# BUREAU OF LAND MANAGEMENT

12

## SUMMARY STATEMENT OF NEIL KORNZE

1  
2 Mr. Kornze: Thank you very much. Chairman Murkowski,  
3 Ranking Member Udall, Chairman Cochran, members of the  
4 subcommittee, thank you for the opportunity to be here with you  
5 today.

6 The Bureau of Land Management manages nearly 250 million  
7 acres of land across the country and 700 million acres of  
8 subsurface estate. That means 10 percent of the Nation's  
9 surface or more and nearly a third of the Nation's minerals and  
10 soils. We manage these lands under the dual framework of  
11 multiple use and sustained yield.

12 As you know, the BLM also manages nearly 20 percent of the  
13 State of Alaska.

14 I recently traveled to Alaska to meet with the Governor to  
15 discuss our innovative approach for surveying for land  
16 conveyances and hosted a Federal roundtable related to  
17 contaminated lands. We appreciate your partnership and support  
18 as we address the unique issues on public lands in places like  
19 Alaska and New Mexico.

20 Today, the entire Bureau's work is more complicated than  
21 ever, and the professionals at the BLM have to work hard to  
22 make quality choices in a difficult environment every day. And  
23 we make sure that the public has a strong voice in the work  
24 that we do. We play a major role in the economies of many

1 States in supporting oil and gas development, all kinds of  
2 recreation, hunting and fishing, helium production, timber,  
3 coal production, ranching, wildland fire fighting, and even  
4 beekeeping.

5 Last year the BLM and the lands we manage supported more  
6 than 450,000 jobs across the country, and we are one of only a  
7 handful of agencies that returns more revenue to the Government  
8 than we receive in appropriations. In fact, for every dollar  
9 you provide, we return \$5.

10 In terms of the 2016 budget, I want to highlight four  
11 different programs today.

12 First is sage grouse. The Bureau of Land Management is  
13 leading the west-wide effort with Western Governors from 11  
14 States to strengthen management of sage grouse habitat  
15 including extensive collaboration with State agencies, the  
16 Forest Service, the Fish and Wildlife Service, counties, and  
17 many other partners. The President's budget requests a total  
18 \$60 million to engage our partners and implement projects on  
19 the ground that will reduce the threat of wildfire, that will  
20 slow and reverse the spread of invasive species, that will  
21 improve riparian areas, and that will remove hundreds of  
22 thousands of pinyon juniper trees. Without this investment in  
23 proactive sage grouse conservation, the agency is more likely  
24 to be faced with difficult decisions in the future regarding

1 balancing the conservation of this bird and many other  
2 important resources.

3       The second program I want to highlight is our national  
4 conservation lands. The President requests an important  
5 increase in this program this year. These special areas make  
6 up roughly 10 percent of the lands that we manage, but they  
7 receive roughly 25 percent of the visitors that we have to the  
8 Nation's public lands. Additional support for these  
9 congressionally and presidentially protected areas will allow  
10 us to provide basic levels of service to our many visitors and  
11 will boost the economies of local communities that rely on  
12 visitation to these areas.

13       The third program is the BLM Foundation. In connection  
14 with this budget, the President has moved forward language that  
15 would allow Congress to establish a chartered foundation, a  
16 nonprofit, that would support the Bureau in a manner very  
17 similar to the work done by the National Park Foundation, the  
18 National Forest Foundation, and the National Fish and Wildlife  
19 Foundation. I would submit to you that the Bureau of Land  
20 Management has the most complicated mission of any of these  
21 agencies, and we could greatly use the support and the outside  
22 facilitation that would come with the BLM Foundation.

23       The fourth program I would like to highlight today is the  
24 oil and gas fee proposal. In the last 10 years, the BLM has

1 authorized more than 50,000 new oil and gas wells, bringing our  
2 total portfolio to nearly 100,000 wells nationwide. We are  
3 proud of oil and gas production on lands that we have a role in  
4 regulating. The production on those lands closely tracks  
5 comparable production on State and private lands. From 2008 to  
6 2014, the years during this administration, oil production from  
7 lands requiring a BLM permit has increased 81 percent, from 113  
8 million barrels to 205 million barrels. With the modest fee  
9 that we are requesting, we are seeking the ability to be  
10 responsive to the ups and downs of the oil and gas industry,  
11 ensuring that these activities are done safely on the public  
12 lands, and our expanding portfolio requires that we have more  
13 inspectors than ever before. It is a natural consequence of  
14 the success of the oil and gas program that we have. Today we  
15 have roughly 160 inspectors. We need 220. In order to get to  
16 where we need to be for a safe and responsible program, we need  
17 your help.

18 In conclusion, this is a very important time for the  
19 American West, for the Bureau of Land Management. And we  
20 greatly appreciate the relationship that we have had with this  
21 committee in years past and we look forward to working with you  
22 on the 2016 budget. Thank you.

23 [The statement follows:]

24 **INSERT NEIL KORNZE\_CARRY**

## BUREAU OF LAND MANAGEMENT

1           Senator Murkowski: Thank you, Director Kornze.

2           As a courtesy to the chairman of our full committee, I am  
3 going to turn to Senator Cochran for any comments that he might  
4 make and he may ask the first question.

5

1           Senator Cochran: Well, thank you very much, Madam  
2 Chairman. I am pleased to join you in welcoming our witnesses  
3 today to review the BLM's budget request for fiscal year 2016.

4           In my State of Mississippi, the Piney Woods School is  
5 located in the central part of the State and has an agreement  
6 with the Bureau of Land Management to house a wild horse and  
7 burro short-term holding facility. That agreement ended in  
8 March, and it is my understanding that there have been some  
9 complications related to closure of the facility. I hope we can  
10 get your commitment to personally look into this and work with  
11 the Piney Woods School to reach a reasonable resolution of this  
12 issue.

13          Mr. Kornze: Chairman, I appreciate your raising this  
14 issue. I just recently became aware of sort of the parting of  
15 ways between our program and the Piney Woods School, and I have  
16 asked my State director to head down there. She will be there  
17 before the end of the month. And we will take a close look at  
18 what is going on and see what we can do.

19          Senator Cochran: Thank you very much.

20          I yield back. Thank you.

21          Senator Murkowski: Thank you.

22          I will go ahead and turn to Senator Udall for his  
23 questions, and the next is Senator Cassidy.

24

1 Senator Udall: Madam Chair, thank you very much.

2 Chaco Canyon is critically important to my State as an  
3 incredibly rich cultural destination, as well as a sacred place  
4 to the tribes of the Southwest. But as you know, Chaco Canyon  
5 is situated right in one of the most productive oil and gas  
6 production areas in the country. It appears that many new  
7 leases are getting closer to the Chaco Cultural National  
8 Historic Park, which really concerns me. Our congressional  
9 delegation in a letter we sent yesterday -- I believe you have  
10 a copy of that. It was sent to Secretary Jewell and the  
11 Assistant secretaries. And what we are requesting is that the  
12 assistant secretaries take a personal look at this issue and  
13 come to New Mexico to hear the concerns of our constituents.

14 I have a couple of questions here. One, can I get your  
15 commitment to work with me to ensure that oil and gas leasing  
16 near this iconic site are handled with the utmost consideration  
17 for the archaeological value that Chaco holds?

18 Mr. Kornze: Absolutely, sir. I have not had the pleasure  
19 of seeing Chaco myself, but I look forward to it. And I know  
20 that this is an issue that we have been taking very seriously  
21 and we will continue to work with you on.

22 Senator Udall: Thank you. Thank you very much.

23 I understand there is some potential for increased  
24 production in the San Juan Basin both for shale gas and shale

1 oil. What is the status of the regional resource management  
2 plan, and how will it address future increased production in  
3 and around Chaco?

4 Mr. Kornze: So right now we are operating under a plan  
5 from 2003 for the Mancos shale area, or the San Juan Basin. We  
6 initiated a new plan last year in 2014. It will take us  
7 reasonably another 3 or 4 years to complete that plan. But in  
8 the time since 2003, there has been the revolution in shale  
9 production, and so we will address that and look at the future  
10 prospectivity and make sure that is built into our operations.

11 Senator Udall: And you work through these issues in all  
12 your resource plans I believe.

13 Mr. Kornze: We do.

14 Senator Udall: Shifting direction here a little bit, you  
15 and I have talked about a possible proposal to merge the New  
16 Mexico and Arizona State BLM offices. As you know, I am very  
17 skeptical of this idea. Having a State director in New Mexico  
18 focused on New Mexico's many unique public lands issues has  
19 served us well for decades. Many New Mexico stakeholders,  
20 including former Bureau managers, are concerned that a merger  
21 might mean less for a State director to focus on New Mexico.  
22 And I share those concerns.

23 What I want is for the people on the ground to have the  
24 best customer service. How can you assure us that services

1 will not suffer? Will there not be a negative local impact?

2 Mr. Kornze: I appreciate you raising this issue. Your  
3 priority is also my priority in making sure that we have the  
4 best customer service in the offices where we have the most  
5 contact with the public. So in the last 5 years, we have seen  
6 a reduction of 12 percent in BLM employees in full-time  
7 equivalents (FTE's). It is a major reduction in our workforce.  
8 It means less public contact. It means more work falling on  
9 the shoulders of fewer people. I am very proud of the work  
10 that the agency does, but it really puts us in a very difficult  
11 position in terms of serving the needs of the communities that  
12 are important to you and important to us.

13 So part of the Arizona-New Mexico concept, which no  
14 decisions have been made on, is we kind of have to run on two  
15 tracks.

16 So one is working with you. We have a budget in front of  
17 you that we think is a great blueprint for success and allows  
18 us to move in the direction of fulfilling our mission better  
19 and more fully.

20 On the other hand, we frequently receive requests from  
21 Congress to figure out within the pie that we have how could we  
22 run more efficiently. And so one of the tools that we have is  
23 to look within our management structure and see are there ways  
24 where we can push more of the resources that have previously

1 been invested there to our field offices, to our district  
2 offices so that our boots on the ground are there and that we  
3 have the people and the support for the communities that see  
4 the greatest impact in places where the permitting gets done or  
5 plans get done.

6 So I look forward to working with you on this. I think a  
7 lot more conversation should take place, and I appreciate you  
8 keeping an open mind about it as we proceed.

9 Senator Udall: I could not agree with you more, Director  
10 Kornze. I want to work with you on this and hear all of your  
11 proposals that you lay out.

12 I have two additional questions that I will give you for  
13 the record because I know you are preparing some things to move  
14 us down the right road here. What is your plan for stakeholder  
15 outreach in the five States that will be impacted by this  
16 proposal? And do you have the metrics from past efforts that  
17 demonstrate the pros and cons of this kind of consolidation?

18 But my next question -- and I am running out of time here  
19 -- is pretty quick. But New Mexico has these two new national  
20 monuments I talked about. And the President's budget includes  
21 \$4.4 million for New Mexico's national monuments and national  
22 conservation areas, including Organ Mountains-Desert Peaks and  
23 the Rio Grande del Norte. One of the reasons I supported  
24 creating these national monuments was to increase awareness

1 across the country of the uniqueness of these landscapes.

2 Have you already seen an uptick in visitors to these  
3 areas? What can you report there in terms of what is happening  
4 on the ground?

5 Mr. Kornze: One of my favorite examples of the power of  
6 some of these protected areas is the Rio Grande del Norte. In  
7 the 1 year after designation, the local county saw a 30 percent  
8 uptick in room taxes, and they expect that was corresponding to  
9 a 40 percent increase in visitorship. So the local economy was  
10 very excited about that. There were a lot of businesses on  
11 board, and I think that is paying dividends for the investment  
12 that they are making in their nearby public lands.

13 Senator Udall: Thank you very much.

14 Thank you, Madam Chair.

15 Senator Murkowski: Senator Cassidy.

16

1 Senator Cassidy: Hi, sir.

2 So Louisiana has 738 acres in the BLM. But then I look at  
3 this map, and you guys own Nevada.

4 Mr. Kornze: We manage quite a bit of it. We do.

5 Senator Cassidy: And he tells me you own a third of -- or  
6 the Feds own a third of Montana. And Alaska -- I believe I  
7 learned more about Alaska, since becoming a Senator, than I  
8 ever thought I wanted to know.

9 Senator Cassidy: But you are impressive on this map. Why  
10 do you want \$38 million more to buy more land? I mean, I am  
11 looking at this thinking, wow, let us break the addiction. You  
12 see what I am saying? We need some rehab. So why do you want  
13 to buy more?

14 Mr. Kornze: So I think you are talking about the Land and  
15 Water Conservation Fund and potential land acquisitions that  
16 would come with that. It has been a very important program for  
17 the Nation in terms of a decision that this Congress made to  
18 reinvest proceeds from the Continental Shelf --

19 Senator Cassidy: We are billions behind in maintenance.  
20 And you got, Mr. Udall, 12.5 million acres in New Mexico?

21 Senator Udall: That is right.

22 Senator Cassidy: It seems like we should be selling. I  
23 say that in all seriousness. If I was Nevada, I would be  
24 really angry. Do you see what I am saying? They do not

1 control their destiny. You do. Why are we buying more?

2 Mr. Kornze: Well, I think the simple answer from the  
3 perspective of the Bureau of Land Management is this Congress  
4 and a previous President decided that -- and made a very bold  
5 decision in the 1970's -- that the estate that we have should  
6 remain in Federal management for the benefit of the public  
7 good. So that is our organic act that lays out that desire.

8 Now, the estate that we help manage is more scattered than  
9 other agencies. If you work for the Park Service or the Fish  
10 and Wildlife Service, you have a nice bright line around the  
11 lands that they manage. For us, however, sometimes it is  
12 checkerboard, you know, across much of northern Nevada where I  
13 am from.

14 Senator Cassidy: So we you want to fill in the  
15 checkerboard.

16 Mr. Kornze: There is a very significant pattern of  
17 complexity, and so in many cases, whether it is in a  
18 conservation unit or elsewhere, acquisitions can, in fact,  
19 decrease our management costs by providing a more unified --

20 Senator Cassidy: I accept that rationale, though I am  
21 skeptical of the kind of overall kind of, my gosh, how much are  
22 we going to own.

23 I want to move on, not to be rude, but because I have  
24 other things.

1           You want to increase the royalty payments. Now, there is  
2 going to be some price point by which a well is profitable.  
3 Obviously, there is going to be transportation costs. There is  
4 going to be production costs. So if it is \$50 per barrel, as  
5 required for something to remain open, have you all done  
6 modeling of the assets that you lease, their economic viability  
7 given the current price of oil, and what your additional  
8 royalty payments will do to the economic viability of that? I  
9 am asking because of the jobs, and so I ask kind of as an  
10 academic, if you will.

11           Mr. Kornze: Well, I think in order to put some baseline  
12 here, most States have an oil and gas royalty rate of more than  
13 16 percent. Sixteen to twenty-five percent is what most States  
14 have. The Federal Government operates at 12.5 percent. So you  
15 already see a distinction there.

16           The Government Accountability Office (GAO) has put us on  
17 their high risk list, and part of it is because of the royalty  
18 rate and their concerns about our ability to have a fair return  
19 for the American taxpayer.

20           So we have not made any decisions related to a royalty  
21 increase. We have an advance notice of proposed rulemaking out  
22 to the public, which has a number of questions so that we can  
23 look at questions like what you have raised in terms of what  
24 the impact of potential increases would be or potential models

1 that might not simply raise the rate but under certain economic  
2 conditions would allow the rate to rise.

3 Senator Cassidy: So you mentioned your tiered royalty  
4 rate. It would go up under certain circumstances not under  
5 others?

6 Mr. Kornze: Well, under offshore, for instance --

7 Senator Cassidy: No. Onshore.

8 Mr. Kornze: Yes, but I think it is important to note for  
9 the audience that offshore, the rate is 16 percent and a little  
10 bit, and on a lease-by-lease basis, they raise that. So usually  
11 it is more than 18 percent. And so we would be looking at  
12 whether or not models like that or related models would be  
13 something that would be of benefit to the American taxpayer.

14 Senator Cassidy: Got you. I do not know this, and so I  
15 am asking as purely a question to inform myself. You mentioned  
16 repeal legislatively mandated royalty relief. I am not  
17 familiar with that legislatively mandated royalty relief. What  
18 does that pertain to?

19 Mr. Kornze: I would need more context.

20 Senator Cassidy: It is in your testimony.

21 Mr. Kornze: There are a number of proposals that the  
22 Office of Management and Budget (OMB) and others have pulled  
23 together for potential revenue raisers. I think within the oil  
24 and gas lexicon there are some fairly complicated tax law and

**BUREAU OF LAND MANAGEMENT**

1 other financial pieces. We could get back to you with more  
2 detail.

3 [The information follows:]

4 **INSERT POTENTIAL REVENUE RAISERS INFO**

5

1           Senator Cassidy: Please. I am unfamiliar with that, so I  
2 would appreciate that.

3           And I think I will yield back now. Thank you.

4           Senator Murkowski: Senator Merkley.

5

1           Senator Merkley: Thank you, Madam Chair, and thank you,  
2 Director Kornze.

3           A couple questions I wanted to get through. One of the  
4 issues -- and you mentioned it in your testimony -- is the  
5 challenge of draft guidance regarding sage grouse. And under  
6 the BLM's preferred alternative, it mentions the potential  
7 strategy of burying transmission lines as a mitigation measure.  
8 And this particular provision has produced a lot of feedback in  
9 Oregon from our electrical co-ops. The estimate is it would  
10 cost about \$3 million a mile to bury a line.

11           And to give you one example, in eastern Oregon, Harney  
12 Electric -- they have 42 miles of transmission lines through  
13 sage grouse habitat and 201 miles of distribution lines. So  
14 primary lines and then distribution lines. The estimated cost  
15 to bury those lines would be \$400,000 per customer. Obviously,  
16 we stretched a lot of wire to reach communities that were small  
17 communities so they could be electrified.

18           Is this strategy one that remains high consideration by  
19 the BLM, and how would a small electrical co-op possibly pay to  
20 bury lines at \$3 million a mile?

21           Mr. Kornze: So in terms of burial of lines, it is  
22 something that we are looking at more and more in our analysis.  
23 It is not necessarily something we are requiring. But as the  
24 West fills in and as we have more needs and more uses and more

1 sensitivities on the public lands, it is one of those tools in  
2 the toolbox, and I cannot tell you it is something that is  
3 going to be required.

4 In New Mexico, for instance, we were working on a very  
5 long line called SunZia and worked with the military with the  
6 idea that some small portions of that might need to be  
7 undergrounded to prevent impacts to the White Sands Missile  
8 Range.

9 Similarly, if new lines were built, in some areas we might  
10 look at undergrounding as a way to limit impacts on important  
11 bird populations.

12 So a tool in the toolbox. It might be part of an  
13 analysis.

14 Senator Merkley: Under your preferred alternative, I do  
15 not think that it referred specifically to new power lines, but  
16 is that your clarification that you are offering today is that  
17 that is the context within which you look at that?

18 Mr. Kornze: Well, we will be releasing those plans in a  
19 few weeks, so I do not want to get into fine details today.  
20 But this is an issue that I think there is going to be  
21 flexibility for your teams on. My sense is we are not looking  
22 retrospectively.

23 Senator Merkley: That is helpful. Thank you very much.

24 I want to turn to fracking on BLM land. We have about

1 100,000 active wells, others that are not active. 90 percent  
2 of those wells use fracking. And I am pleased that the agency  
3 finalized a rule in March to update the fracking regulations,  
4 but I have some concerns about it.

5 It is weaker than many States. For example, Wyoming  
6 requires publication of the proposed chemical components before  
7 fracking occurs so that a baseline can be established to  
8 compare the impact afterwards. Unfortunately, the BLM rule  
9 does not match Wyoming.

10 Also, there is a loophole in the BLM rule regarding trade  
11 secrets. And specifically, as I understand it, all that a  
12 fracking operator has to do is assert that they believe that  
13 they meet the standard for trade secrets, and that is just a  
14 done deal. So it is very easy. I just say, yes, my chemicals  
15 probably meet this, so therefore this information is not going  
16 to be disclosed, which is a pretty big loophole. That pretty  
17 much violates or wipes out the entire fling of the disclosure.  
18 This is chemicals on public land. This is our public land.  
19 This is not private land. And that is a pretty big deal to  
20 have a secret soup of chemicals that the BLM loophole is going  
21 to allow to continue to be private.

22 And there is also not even, in that situation, a  
23 disclosure provision for first responders and medical  
24 professionals. Colorado has such a program. Pennsylvania has

1 such a program. Texas has such a program. Why did the BLM  
2 have such deficient provisions in its rules in March?

3 Mr. Kornze: Well, the hydraulic fracturing rule I  
4 consider to be a major step forward. A lot of our oil and gas  
5 regulation at the Bureau of Land Management dates back to the  
6 1980s. Some of it dates back to the time of Dwight D.  
7 Eisenhower. So it is time for a fresh look at a lot of our  
8 rules. Hydraulic fracturing has just been finalized as a rule,  
9 as you noted. Our three big pieces --

10 Senator Merkley: But should the public not have a right  
11 to know what chemical soup is put into the ground on public  
12 lands?

13 Mr. Kornze: Yes. And so one of the key pieces of the  
14 three is disclosure. There is an exception for trade secrets.

15 Senator Merkley: But does that not wipe out the self-  
16 assertion of trade secrets, wipe out the requirement for  
17 disclosure?

18 Mr. Kornze: We are operating in a similar way to most  
19 States. So Wyoming, which you pulled as a best case scenario  
20 under a different piece -- they have a trade secrets exception.  
21 We do as well.

22 However, we have the ability to go and get that  
23 information. So it is held by the company. They have to sign  
24 an affidavit that the information that they are withholding

1 meets a whole set of standards, and they have to sign that at a  
2 fairly high level within their company. If we have doubts  
3 about that or if we have a medical incident or we have other  
4 concerns, we can access that information and we can use that  
5 information in an appropriate way. So it is not as though that  
6 information is off to the side and is some sort of secret soup.

7       Senator Merkley: So I am out of time, but it is secret  
8 soup if it is not posted for the public to be able to access it  
9 and if a company can easily assert, as I understand they can,  
10 the trade secrets provision. You say they have to sign an  
11 affidavit. However, that is a signature. That is a pretty  
12 simple standard there.

13       And the information under your rule is put on an industry-  
14 funded website that has been reported to be inconsistent  
15 information, limited information, and very difficult for the  
16 public to search. And so it does not meet the Federal  
17 standards for databases.

18       So these are real concerns, and I think it is important to  
19 keep looking at it. The public deserves to know what chemicals  
20 are put into the ground on public land.

21       Mr. Kornze: I am saying on the trade secrets that there  
22 are trade secret laws that have been passed by this country.  
23 So we are trying to honor that while also having disclosure  
24 that is meaningful for the public. So it is a balancing act.

1           And in terms of the disclosure mechanism, FracFocus, we  
2 are now a member of the FracFocus board. We have commitments  
3 from FracFocus to make significant improvements related to the  
4 searchability of their database and the information that is on  
5 there. And part of the use of that system, frankly, is a  
6 matter of just practicality. Many States -- I believe  
7 somewhere in the ball park of 20 States -- are already using  
8 it. So we are trying to go in a place where industry has some  
9 experience. Department of Energy is doing a lot of funding of  
10 that system now. But also when the Secretary of Energy's  
11 advisory board estimated what it would cost the Bureau of Land  
12 Management to stand up and maintain a system like that, it was  
13 somewhere in the realm of \$25 million. So I am trying to  
14 scrape together every dollar I can for work, the sage grouse,  
15 land conveyances, other programs, and if there is an outside  
16 system that we think can get to a quality standard that meets  
17 public standards, it is important that we head in that  
18 direction.

19           Senator Merkley: Thank you.

20           Senator Murkowski: Senator Daines.

21

1 Senator Daines: Thank you, Madam Chair.

2 It is good to see you here this morning, Director Kornze.

3 Also, you notice we have a lot of Western States here. We  
4 have got Oregon. We have got New Mexico. We have got Alaska.  
5 We have got Montana.

6 And I know Senator Cassidy was talking about, I think,  
7 less than 1,000 acres of BLM ground there in Louisiana. I will  
8 say he made the comment about the Land and Water Conservation  
9 Fund. It is a very important tool in the tool chest in my  
10 opinion as it relates to our ability actually to improve our  
11 access to our public lands. We have 2 million acres in Montana  
12 of public lands that we do not have access to, and the LWCF is  
13 a tool that we use to provide better access for the public to  
14 their lands.

15 But thank you for being here this morning.

16 As we have spoken before, Montanans rely heavily on their  
17 natural resources for energy, for mineral development, for  
18 jobs, for tax revenues to fund our teachers and our schools.  
19 And we understand that acting safely and responsibly is the  
20 only option when exploring and producing these resources.

21 Unfortunately, developing our Federal land in Montana has  
22 become laden with red tape and creating challenges both in  
23 terms of time and money for responsible development.

24 As I mentioned in April at the Energy and Natural

1 Resources Committee hearing on hydraulic fracturing, Montana  
2 updated its rules in 2011. And as Senator Merkley was talking  
3 about the regulations, we have some of the most robust  
4 hydraulic fracturing rules and regulations in Montana developed  
5 there in the State in the Nation. And our State depends on  
6 hydraulic fracturing to be able to access these mineral  
7 resources to create the jobs, generate the tax revenues I  
8 talked about.

9 The question for you is, how exactly is BLM proceeding in  
10 implementing the final rule for hydraulic fracturing, and how  
11 much do you believe it will cost BLM to do that?

12 Mr. Kornze: So I appreciate the opportunity to continue  
13 our conversation from a previous hearing on this.

14 We are moving ahead through a lot of public outreach,  
15 number one. We have had a number of conversations with State  
16 regulators to make sure that we are sitting down and we are  
17 understanding the best ways to work together because there is  
18 some flexibility built into our rule to make sure that we can  
19 honor higher standards like the ones that you are calling out  
20 for the State of Montana, and then similarly sitting down with  
21 industry and making sure they understand what the regulations  
22 are. We have sat down with hundreds of operators. And so we  
23 are being very aggressive about that outreach to make sure  
24 there are no surprises and that we have a fluid, successful

1 implementation.

2 Senator Daines: Do you have idea what it might cost? And  
3 the reason I ask that question is here we are struggling in  
4 Washington, wanting to achieve balance in our budgets,  
5 safeguarding the taxpayer. And yet, there is a redundancy now  
6 coming in in Montana. We have very robust regulations for  
7 hydraulic fracturing, and now we have the BLM coming in saying  
8 we also want to be a part of this equation, when we think we  
9 could save the taxpayer a lot of money, as well as ensure that  
10 we are safeguarding our resource with these very robust  
11 regulations. Any idea what it might cost BLM to implement  
12 these regs?

13 Mr. Kornze: Well, I will give you some numbers to work  
14 with on potential costs. But I think it is important to point  
15 out that we work in a federalist system, and the Bureau of Land  
16 Management has oil and gas leases in 32 different States that  
17 we have oversight responsibility for. Montana may have done a  
18 knock-out job. Alaska may have done a knock-out job with their  
19 rules locally, but only roughly half of the States that we have  
20 to regulate in have stepped forward and put forward hydraulic  
21 fracturing rules. So we designed a rule to be a basic layer or  
22 basic standard largely modeled off of efforts throughout the  
23 West.

24 Related to cost, we think this is going to take us on

1 average for your average drilling permit, application for  
2 permit to drill (APD), about an additional 4 hours. So when  
3 you add that together against all the APD's that are coming in,  
4 we think it will be about an additional 12 positions that we  
5 will have to fill.

6 Senator Daines: I want to pivot over and talk about sage  
7 grouse. Another potential major challenge to responsible  
8 energy development in Montana is the potential listing of the  
9 greater sage grouse and specifically the proposed stipulations  
10 in BLM's resource management plans. Now Montana recently  
11 approved and funded its sage grouse conservation plan. It is  
12 good news. It is investing significant resources. It is my  
13 understanding the Montana plan is significantly different than  
14 the draft Federal plans, including when it comes to surface  
15 occupancy around leks.

16 My question is when is the BLM scheduled to release the  
17 final resource management plans in Montana?

18 Mr. Kornze: I would note we have had a fantastic dialogue  
19 with Governor Bullock and Tim Baker, a lot of folks in your  
20 State. We do appreciate them stepping forward and your entire  
21 legislature recently in funding a very good system on the State  
22 side.

23 The BLM plans will be coming out within a few weeks, so  
24 before the end of the month.

1           Senator Daines: And how will these plans reflect  
2 Montana's plan?

3           Mr. Kornze: So we will have to see in the final, when it  
4 comes out, the fine details. But I will tell you that we have  
5 built in special flexibility related on the needs of each  
6 State. So Oregon has a special system. Idaho has a special  
7 system. Montana has a special system. Wyoming has a special  
8 system. There is commonality amongst all of them, but we have  
9 been at the table and listening intently and working closely  
10 with partners in the State of Montana to make sure that we can  
11 get as close to something that works for them as possible.

12          Senator Daines: I appreciate the flexibility you have  
13 been able to give on that so we can come together with a  
14 solution that will ensure that the sage grouse is not listed.  
15 So we look forward to further discussions.

16          Last question is regarding the increased royalty rates.  
17 Director Kornze, I am aware of the Department of the Interior's  
18 proposed budget requesting reforms to Federal onshore royalty  
19 rates and also the Department of the Interior's advance notice  
20 of proposed rulemaking. Now, according to a Department of the  
21 Interior report for 2011, increasing Federal royalty rates  
22 could result in a competitive disadvantage for energy  
23 production on Federal lands.

24          Has your Department done analysis how increasing royalty

1 rates on Federal land would increase or potentially decrease  
2 production on Federal lands?

3 Mr. Kornze: So we are at the first step of a multi-step  
4 process in a potential rulemaking related to royalty rates. So  
5 we will have an analysis on those questions as part of what we  
6 do.

7 One thing to point out about the GAO concerns and the  
8 reason that we are on the high risk list, which is a list you  
9 do not want to be on if you are a Government agency -- there  
10 are only 25-30 different programs on it -- is that they believe  
11 -- and they have put this in their reports -- we are passing up  
12 on billions of dollars in revenue annually that belong to the  
13 American taxpayer.

14 So we will balance all these things out, but the ability  
15 for industry to lean forward and produce and make American  
16 energy is something that we care greatly about.

17 Senator Daines: Yes. And I look forward to further  
18 discussions. I know I am out of time, Madam Chair. I know we  
19 have seen production certainly on private and State lands is up  
20 60 percent since the President took office. It is down 6  
21 percent on Federal lands. So I look forward to further  
22 discussions as it relates to how we are continuing to help out  
23 the taxpayer, creating jobs. Those jobs are paying taxes and  
24 certainly have been a big boost to this economy.

1 Thank you.

2 Senator Murkowski: Thank you, Senator Daines.

3 And I will just follow up with some comments here. It is  
4 somewhat interesting in recognizing it was out of the  
5 Department of the Interior in 2013, the report that was  
6 commissioned by the Department of the Interior (DOI), that did  
7 conclude that raising the royalty rates on the onshore oil and  
8 gas production would discourage investment and thus bring less  
9 money into the Treasury and thus was not warranted.

10 So now GAO comes out with a report, and what we see is, in  
11 the budget proposal, we are going to increase the -- the  
12 proposal is to increase the rates.

13 I appreciate the fact that you are saying you are going to  
14 do an analysis, but one would think that you would do the  
15 analysis before you move to advance it through a budget  
16 proposal. So I agree with Senator Daines. That is something  
17 that I am concerned about because I think it is going to have  
18 an unintended consequence or perhaps intended, depending on  
19 your perspective. I think it is important that we do what we  
20 what we can to increase production on our public lands and thus  
21 increase revenues to our Treasury because production is up.

22 It is interesting to me that when you look at the leasing  
23 statistics through BLM over the past couple decades, we are  
24 seeing a decline in the leasing. Throughout the Clinton

1 administration, the average acres leased per year was 3.3  
2 million. Then in the Bush administration, the average was 3.6  
3 million per year. During the first 6 years of the Obama  
4 administration, the number drops to an average of about 1.6  
5 million acres per year. So this is a trend that in my view is  
6 not good for us, and then when you overlay the hydraulic  
7 fracking rules, the proposals to increase regulation on  
8 methane, possibly this proposal to increase royalty rates, I  
9 see that just pushing it down further.

10 Can you give me any hope that in fact we are not going to  
11 continue this downward trend but that we are going to see  
12 increased production on our public lands?

13 Mr. Kornze: So I can give you a lot of hope.

14 Senator Murkowski: Good. I want a lot of hope.

15 Mr. Kornze: Because we have seen an 81 percent increase.  
16 On the places where you need a BLM permit to operate, we have  
17 seen an 81 percent increase in oil production during this  
18 administration.

19 Senator Murkowski: So not necessarily new leases but on  
20 existing leases, you are seeing increased production.

21 Mr. Kornze: It would be a combination of both. So we  
22 have seen a huge increase, which we are very proud of being  
23 part of.

24 And then there are also some important numbers out there.

1 One is that 34 million acres of land have been leased. Only a  
2 third of that is producing. So within industry's hands today  
3 there is significant head room for development.

4 Senator Murkowski: Would you agree that some of the  
5 limitations on the ability to produce have been related to some  
6 of the regulatory issues? I mean, all you need to do is look  
7 at National Petroleum Reserve Alaska (NPRA), and it is a  
8 perfect case in point in terms of acreage out there that is  
9 being leased. But we are not seeing a drop of anything at this  
10 point in time, and it is not because you do not have operators  
11 that are willing and able to move forward. You have got a lot  
12 of going at one another through regulatory requirements that is  
13 just stalling out any initiative there.

14 Mr. Kornze: Well, I am not sure that is always the case.  
15 So in the Lower 48, there is an average of about 3,000 wells  
16 drilled on public and Indian lands each year. We, however,  
17 have 6,000 permits that we have approved and are ready to go.  
18 So industry has come in. They said we would like to drill  
19 here. We have approved that application. It needs no further  
20 work from us at all. They can start today.

21 Senator Murkowski: How do you respond, though, to those -  
22 - and I was out in North Dakota with Senator Hoeven some years  
23 ago, and you talk to the operators that are ready, willing, and  
24 able to go. They have got Federal leases. But quite honestly,

1 they can move to production so much more quickly on State and  
2 private lands than they can on the Federal that they will  
3 literally go around Federal lands. They will look for every  
4 opportunity to be anywhere except our public lands.

5 Mr. Kornze: Well, I think when you look at the fact that  
6 we have a 2-year front-log essentially of permits that are  
7 ready to go, I think there are some where there is a disconnect  
8 that is very important because there is huge opportunity out  
9 there for industry to produce today.

10 Senator Murkowski: We understand that there is huge  
11 opportunity, and as I am talking to those who are ready,  
12 willing, and able to go, they tell me their biggest obstacle is  
13 our Federal Government. It is not that they do not have the  
14 technology. It is not that they do not have the capital to  
15 invest. It is the regulatory hurdles that they face in  
16 accessing our public lands.

17 Mr. Kornze: And I hear that occasionally too. Those  
18 6,000 permits, the 2 years' worth of work that can be done  
19 today -- there are no hurdles. There is nothing. So there are  
20 2 years' worth of work. There are billions of dollars of  
21 investment that is available.

22 And I do appreciate that we need to have a forward-leaning  
23 system for developing American energy. We are doing that.  
24 There are places where we certainly can improve. Our

1 permitting times are one of those. So a few years ago, when I  
2 joined the Bureau of Land Management, we were at 300 days per  
3 permit. We are down to roughly 200-225 days.

4 Senator Murkowski: That is certainly not in Alaska.

5 Mr. Kornze: Well, we are headed in the right direction.  
6 One thing that we are doing system-wide is we are going to an  
7 online system so that instead of passing paper back and forth,  
8 which is a big time-killer, we potentially can get down to  
9 averages like they have seen at times in Carlsbad, New Mexico  
10 where it is in the 60-70 day realm. So we are moving  
11 aggressively. We are trying to find some of the efficiencies  
12 that I think you are pointing at.

13 Senator Murkowski: Well, and we need to find those  
14 efficiencies. I wish I had the chart with me today that shows  
15 how long it takes to get to permitting on State, private lands  
16 versus how long it is taking us through our BLM lands. And the  
17 contrast is extraordinary. And there are lands that are  
18 literally side by side, and in many cases, operators that  
19 clearly know what they are doing. So saying that we can do a  
20 better job I think belies the obvious, and I think this is one  
21 of those things that we need to get down to.

22 I know that within the Department of the Interior, you  
23 have got a stated goal of permitting 10,000 megawatts of  
24 renewable energy production on Federal lands. We met that goal

1 back in 2012, I am told. But it does not seem that we are  
2 willing to dedicate equal focus to our more traditional energy  
3 sources on public lands.

4 Do you even have a measurable goal for conventional  
5 production of oil and gas on our public lands?

6 Mr. Kornze: I would say that our budget reflects a  
7 serious commitment to conventional energy.

8 Senator Murkowski: But I mean, do you have a goal? As  
9 you stated earlier within the Department in terms of what it is  
10 that we want to see with renewables, you set a goal out there.  
11 You met it. Do we do the same for conventional?

12 Mr. Kornze: We do not.

13 Senator Murkowski: Why is that?

14 Mr. Kornze: Well, the renewable energy goal that you  
15 noted was created here in Congress. It was part of the 2005  
16 Energy Act.

17 Senator Murkowski: So we would just need to create in  
18 Congress a goal for our conventional fuels on public lands.

19 Mr. Kornze: Well, I am saying that in the 2005 Energy  
20 Act, there was an aspirational goal saying that by 2015, we  
21 would like to see the Department of the Interior authorize  
22 10,000 megawatts. We exceeded that. At this point, we are at  
23 14,000 megawatts plus. We are very proud of that. We took a  
24 program that basically did not exist and turned it into

1 something pretty spectacular.

2 On the oil and gas side, we need the resources to do the  
3 same. So that is part of our roughly 20 percent budget  
4 increase request for our oil program --

5 Senator Murkowski: Well, wait a minute. When you say you  
6 need the resources to do the same, you have got the private  
7 sector that is out there that is ready, willing, and able to go  
8 after the resource. So it is not as if you and BLM need to  
9 reinvent the wheel. In my view, you need to have a more  
10 expedited process. In many cases, you just need to get out of  
11 the way. So I do not understand why you would say we need more  
12 resourcing to do this.

13 Now, you mentioned earlier that you do need additional  
14 resources for inspectors. We know that we have got to have a  
15 level of safety and protocol out there. I certainly understand  
16 that.

17 But again, I think when you are looking at those ways,  
18 those measures that you can enhance production on our Federal  
19 lands to increase jobs, to increase revenues, it is not  
20 something that as a Department you need to increase your budget  
21 to do that. I think you have got an industry that is ready to  
22 go to work, but we make it so hard on our public lands. We  
23 make it so difficult that those that are ready, willing, and  
24 able will go out of their way to avoid the production on our

1 public lands. And you have cited that you are pleased with the  
2 level of leasing that you have, but in fact what we have seen  
3 is a very direct and clear trajectory downward in terms of  
4 leasing on our public lands over this past 6 years here.

5       And so, yes, we might be able to say that production is  
6 up. Production is up because you have got a commitment to  
7 extract as much as you can out of these existing leases. But  
8 it is tough to be able to explain to people who believe very  
9 strongly that our energy assets are something that we should  
10 value when we say on our Federal lands, it is just that much  
11 more difficult. It is just that much more complicated. And  
12 yet, you have got good operators making things happen on State  
13 and private lands, contributing to jobs, contributing to our  
14 energy security.

15       And there is a disconnect here, and I am trying to drill  
16 down to how we can do the reconnect. And we need to be working  
17 with you on these initiatives to make that difference.

18       I have gone over my time. I want to turn to the Senator  
19 from North Dakota.

20

1           Senator Hoeven: Thank you, Madam Chairman.

2           Director, good to see you and thanks for being here today.

3           We are trying to reduce flaring in our State. Actually  
4 the highest flaring is on Federal lands and particularly on  
5 some of our Native American lands. Now, the right-of-way is  
6 the issue. Getting the right-of-way fast enough is the issue  
7 with getting these gas-gathering systems put in place.

8           And so how can the BLM help? And I know that BIA is  
9 primarily responsible here, but can you help in some way to  
10 expedite getting this right-of-way so that we can get these  
11 gathering systems put in place to reduce natural gas flaring?

12          Mr. Kornze: Flaring is very important, and we appreciate  
13 that North Dakota has stepped out on this issue. So thank you  
14 for being part of that leadership team.

15          Related to the rights-of-way for the capture systems,  
16 absolutely part of the equation. So around the Bureau of Land  
17 Management, we have been focused on getting the right realty  
18 staff in the right places to help make sure that we are not  
19 part of the holdup. I do think that we could -- we are in the  
20 course of getting the right people in places like Dickinson  
21 where we have had huge human capital challenges. Folks can  
22 walk across the street and often make twice as much. And so we  
23 have been working hard to get special pay rates and locality  
24 pay for folks in those offices so they have got a reason to

1 stay and to make sure that we do not have the turnover, which  
2 also impacts our ability to get those rights-of-ways and other  
3 efforts.

4 Senator Hoeven: Is there something Congress can do to  
5 help expedite the process?

6 Mr. Kornze: Well, having the right people matters. So I  
7 will tell you our special pay rate for our petroleum engineers  
8 and petroleum engineer techs expires at the end of this year.  
9 We have had it for 2 years. It has been a very important thing  
10 for our oil and gas system across the board. We would be  
11 interested in working with you on a potential extension of  
12 that.

13 Senator Hoeven: Well, one of the things -- before 2008, I  
14 think there was one oil well drilled on the Three Affiliated  
15 Tribes reservation. I then signed an agreement -- I was  
16 Governor at that time -- with the tribe whereby they agreed to  
17 have the State regulatory process apply on the reservation too.

18 So that was an agreement we signed. And, of course, now I  
19 think if that reservation were a State, it would be like the  
20 eighth largest oil-producing State in the country. I mean,  
21 they are just doing tremendously well, which of course  
22 necessitates the need for more infrastructure.

23 So is there some kind of cooperative agreement or  
24 something we could do interagency here, or is there legislation

1 that would help expedite this right-of-way process? And you  
2 know, the chairwoman, Senator Barrasso, and myself have got  
3 some legislation in to try to expedite these gas-gathering  
4 systems and getting this right-of-way. Is that something you  
5 can work with us on? Do you see some ability to help get some  
6 tools out there so we can leverage the manpower that you have?

7 Mr. Kornze: I do. And so I would be very interested to  
8 have some offline conversations with you about how we can use  
9 tools like the Bakken Executive Group to put a focus on this --

10 Senator Hoeven: Right.

11 Mr. Kornze [continuing]: And see if there are other  
12 national resources we need to bring to bear.

13 Senator Hoeven: Between BIA, BLM, Grasslands, I think  
14 there is enough people. We could certainly better leverage our  
15 efforts, and if there is some legislation required, I would be  
16 very interested in getting your assistance on a number of bills  
17 that we have proposed to expedite this process.

18 Along that same line, BLM has come out recently with its  
19 hydraulic fracturing rule. So now we have a situation where  
20 States like North Dakota, Alaska, Texas -- you know, I think  
21 there are 27 States that produce 99.9 percent of the country's  
22 oil and natural gas. And so we have these hydraulic fracturing  
23 rules that require disclosure. They require using FracFocus.  
24 They require making sure that your seals and your cement and

1 all these things are properly in place and that you are  
2 monitoring the integrity of the well, the catch basin, the very  
3 things that apply in the Federal rule.

4 So now we have got this duplicate situation. We have got  
5 the State regulation, and then we have also got the Federal  
6 hydraulic fracturing regulation. So now the energy producers  
7 face two sets of regulation, and they are largely the same. So  
8 you could say, well, what is wrong with that? Right? I mean,  
9 they are the same except now you have got to go through the  
10 State regulatory process and you have got to go through the  
11 Federal regulatory process, and we are back to this long period  
12 of time and delays.

13 How do we work with BLM so that the State can get primacy  
14 for the regulatory oversight as long as they are properly  
15 overseeing all these things that we both agree should be there?  
16 We do it with air. We do it with water. How do we accomplish  
17 that with hydraulic fracturing?

18 Mr. Kornze: Well, we specifically designed the hydraulic  
19 fracturing rule to allow for variances, and what that means  
20 essentially is you nest the Federal and the State rule  
21 together. Wherever the higher standard is, that is what we are  
22 going to follow. So if North Dakota has higher standards than  
23 what we put forward, we will be following the North Dakota  
24 standard.

1           And I think it is important to note that this how oil and  
2 gas has always worked. So the State of North Dakota and the  
3 Bureau of Land Management have not had completely parallel and  
4 completely matching rules and regulations in all areas of  
5 drilling and oversight. But yet, we have found a way through  
6 decades to work together and to make sure that we have an  
7 efficient system. This is no different. And we have been  
8 quite explicit in this rule to make sure folks understand that  
9 if there are local standards that are better, that we look at  
10 those and we will adopt those.

11           Senator Hoeven: Where are we in that process of providing  
12 variances to the States? As you know, you have got litigation  
13 going with a number of States. It seems to me this might be,  
14 again, a way we work together to address the challenge. If we  
15 can make that variance process a very clear, understandable  
16 process that States can go through in a straightforward way,  
17 maybe be can address it. So, again, if there is some help  
18 needed from Congress -- or you tell me how do we make sure that  
19 then States can go through that process in a straightforward  
20 way so that we are not duplicating regulation.

21           Mr. Kornze: So I believe that Lynn Helms, your regulator,  
22 and our team are in conversation. If that has not taken place,  
23 all they need to do is pick up the phone and call Jamie or call  
24 myself, and we can get that conversation --

1           Senator Hoeven: But essentially your intent is, through  
2 this variance process, to enable States to play that primacy  
3 role as long as they go through the process and you are  
4 comfortable that the oversight is there.

5           Mr. Kornze: The way that we are going to work this, we  
6 put the rules -- and this is how it has always worked. You put  
7 the two standards side by side. There is going to be a lot of  
8 commonality. And so if the State standard is equal to or  
9 better than ours, that will continue to be what we enforce on  
10 the Federal lands.

11          Senator Hoeven: Okay, but there just has to be a  
12 straightforward way to get through that in a timely way so we  
13 do not get back to this we are taking a long time and we are  
14 not getting through the process. That is what I am after here  
15 is a rational process that we can get through in a  
16 straightforward and timely way.

17          Mr. Kornze: And the rule is fairly straightforward, and  
18 our team has a great relationship with your team.

19          Senator Hoeven: Yes.

20          Mr. Kornze: So I do not see a problem there.

21          Senator Hoeven: So you will work with us on it to see if  
22 we cannot make sure that process works.

23          Mr. Kornze: Absolutely.

24          Senator Hoeven: Thanks. I appreciate it, Director.

**BUREAU OF LAND MANAGEMENT**

1 Senator Murkowski: Thank you, Senator Hoven.

2 Senator Udall.

3

1           Senator Udall: Thank you, Madam Chair.

2           As has been mentioned several times, the President's  
3 budget proposes a new inspection fee for onshore oil and gas  
4 leases. How will instituting this fee impact your inspection  
5 and enforcement programs, or asked another way, what are you  
6 not able to do today without these fees in place?

7           Mr. Kornze: Thank you for the question.

8           We have roughly 30,000 oil and gas inspections that we  
9 have to do on an annual basis. About half of those are high  
10 priority. Without the right number of folks, it puts us in a  
11 position where we have to really juggle resources and perhaps  
12 stretch them in a way that is not maximizing our full system on  
13 the production side. We have to be able to cover those  
14 inspections and make sure that we have a safe and responsible  
15 system. That has got to be the foundation of what we do. From  
16 there, you have got your APD's that you are working on, and  
17 then above that, you have got your leasing system. So we have  
18 to do multiple systems at once. We need the resources to do all  
19 of that.

20           What the fee, which would be roughly \$1,000 per lease on  
21 average -- what that would do is that would allow us, similar  
22 to the offshore oil and gas system, which has a similar fee,  
23 which is significantly higher than what we are asking for -- it  
24 would allow us to go in places like North Dakota where there is

1 going to be a huge amount of production. It allows us to staff  
2 up there because those fees go to those local offices and it  
3 returns into the system. So we need to be able to make sure we  
4 have a safe, responsible program that allows us to build in  
5 areas like production.

6 Senator Udall: Thank you for that answer.

7 Shifting over on the sage grouse, I understand that your  
8 land use plans covering the priority areas for conservation are  
9 almost finalized and will be public very soon. Can you preview  
10 for us what we can expect from the release of these plans and  
11 what has been the preliminary reaction from cooperating States?

12 Mr. Kornze: So the Fish and Wildlife Service has been  
13 very clear with us that they need essentially -- they see a  
14 three-tiered stool or a three-legged stool hopefully getting to  
15 a point where they do not have to list the greater sage grouse.

16 And I would note that there was success recently on the  
17 bi-State sage grouse population on the Nevada-California border  
18 where the Fish and Wildlife Service declared that as not  
19 warranted based on plans the Federal agencies and local  
20 partners put forward.

21 So there are three pieces that the Fish and Wildlife  
22 Service has asked for. One is strong Federal plans to make  
23 sure that we have allocations and plans in place that will  
24 limit disturbance in places that are important to the sage

1 grouse to allow those important population areas to prosper.

2       The second is making sure that there are similar  
3 conservation-oriented efforts and allocations when possible on  
4 private and State lands. So you have States like Idaho that  
5 have just stepped forward on their State lands to do something  
6 similar.

7       And then thirdly, they want to make sure that there is  
8 activity in fire to make sure that -- the greatest threat to  
9 greater sage grouse in the Great Basin, for instance, is fire  
10 and the invasive plants that come in afterwards -- and make  
11 sure that we are making headway there with things like the fire  
12 fix and then also efforts related to making sure simply that we  
13 are not losing that habitat. So we are working carefully with  
14 our fire teams to make sure the sage grouse and rangeland  
15 priorities are built into the way that we operate this summer  
16 and in all future years.

17       Senator Udall: Now, how are you ensuring that the most  
18 important sage grouse habitat is protected while still  
19 fulfilling your mandate for multiple use and providing access  
20 to resources?

21       Mr. Kornze: So our multiple use and sustained yield  
22 mission is a continuum. In some places, you are going to have  
23 very significant development and use. In other places, you are  
24 going to have less use, and that can change over time. So it

1 is well within the bounds of the BLM's mission to have some  
2 places that are set aside for certain uses like wildlife  
3 habitat and for helping this bird recover. And we will have  
4 other uses, traditional uses like grazing on those lands. So  
5 it is part of the balancing act we do on a daily basis.

6 Senator Udall: The President's budget request proposes an  
7 increase of \$45 million for the restoration and protection of  
8 the sage steppe ecosystem for a total of \$60 million. This is  
9 a major increase for this program. What will BLM do with this  
10 funding? How is this funding critical to ensure that we can  
11 avoid a listing of the sage grouse?

12 Mr. Kornze: So we will do a few things. One, we need to  
13 have an investment in our partners. We do not know everything  
14 about the bird. We have got ranchers. We have got counties.  
15 We have got State agencies that we have to be working hand in  
16 hand with. So part of that money is to build on those  
17 partnerships and make sure that we have those links firmly in  
18 place.

19 Another piece is making sure simply that we have boots on  
20 the ground. In places like Elko County where I was last week  
21 to check on the drought conditions and the fire season, we have  
22 one range conservationist, one range con, for about every  
23 million acres. We are going to have to do better than that in  
24 terms of giving our teams the resources to be working with

1 grazers and working with other land users to make sure that we  
2 are doing the best thing for multiple use and the best thing  
3 for the bird. So we will be taking steps along those lines.

4 Senator Udall: And my understanding is it takes a lot of  
5 time and effort and people on the ground to work in a  
6 collaborative way to try to make sure you are moving in the  
7 direction of not listing.

8 Mr. Kornze: Absolutely.

9 And the other thing we will do is we will be doing  
10 projects related to making sure that our wet meadows are of  
11 high quality, that our springs are good, that our riparian  
12 areas are supporting good wildlife habitat.

13 And pinyon juniper encroachment, which is the situation  
14 that is largely in the Great Basin, is a spectacular and  
15 sometimes terrifying thing to look at these valleys that used  
16 to have pinyon juniper at a high elevation and because of the  
17 changed fire regime and climatic changes, these trees are  
18 choking out the sagebrush and sage grouse and almost completely  
19 filling in these giant, say, 500,000-acre valleys. You can see  
20 it marching down year by year. So we will be making sure that  
21 we are pushing back on those trees and making sure that the  
22 sagebrush that we have that is high quality is protected and  
23 preserved.

24 Senator Udall: Thank you, Madam Chair.

1 Senator Murkowski: Thank you.

2 Let me talk a little bit or let us have a discussion here  
3 about where we are with the contaminated lands that were  
4 conveyed to Alaska Natives, as well as the abandoned well  
5 cleanup there in National Petroleum Reserve Alaska (NPRA). I  
6 am going to be sitting down with Mr. Cribley in Alaska over the  
7 Memorial Day week and be able to go through some certain maps.

8 So I am not going to drill down too hard here.

9 But it is my understanding that with the lands that were  
10 conveyed to natives under the Alaska Native Claims Settlement  
11 Act (ANCSA), that we are building out the database, the  
12 inventory that needs to be completed. And it is my  
13 understanding that we are going to find out that a majority of  
14 the sites are not on BLM lands. So identifying the responsible  
15 party is clearly important, but that is just one step of it.  
16 Then we need somebody who serves as the point person, the point  
17 agency, if you will, to work with all the responsible Federal  
18 agencies.

19 Is this something that BLM will agree to do, to be that  
20 facilitator once we have identified the inventory and just the  
21 priorities there? Is BLM prepared to be able to step up to  
22 then coordinate with all the Federal agencies?

23 Mr. Kornze: Let me give you a description of where we are  
24 at.

1 Senator Murkowski: Okay.

2 Mr. Kornze: So we have got with the State and looked for  
3 how many contaminated sites are there across the State that are  
4 known. Roughly it is around 6,000. We did an overview to see  
5 how many of those were on conveyed lands. We got down to about  
6 900. We have found that about two-thirds of those, so ball  
7 park 600, are either cleaned up or are in a state of some sort  
8 of remediation. So we have got about 300 that are open  
9 question. You will see that roughly half of those, our current  
10 information suggests, would be DOD-related, and then the other  
11 half is sort of a rainbow of different organizations.

12 So going forward, I would like to have a conversation with  
13 you about whether or not BLM is the right agency because part  
14 of what you need is someone to compel action. I think you were  
15 looking for cleanup.

16 Senator Murkowski: Yes.

17 Mr. Kornze: And I think potentially the Environmental  
18 Protection Agency (EPA) or the State with delegated authorities  
19 from EPA would have a better handle on that kind of work than  
20 we do traditionally.

21 Senator Murkowski: Well, what I would like to do is  
22 figure that out because, again, it is one thing to identify  
23 that these are these areas. It is another thing to have the  
24 action plan and have everybody understand what that action plan

1 is and the level of expectation. So probably after my sit-down  
2 with Mr. Cribley in Alaska, we will have an opportunity to  
3 better identify that.

4 On the abandoned wells, the good news for us is that we  
5 were able to secure some resources to address the abandoned  
6 well cleanup through the Helium Stewardship Act. It was really  
7 just kind of fortuitous. Actually it was a long of dang hard  
8 work. Thank you very much. And we have been able to finish up  
9 work on three of the wells this month at Umiat. So that is  
10 good.

11 But this is, again, an area where we need to be looking  
12 beyond those one-time monies that we received within the Helium  
13 Stewardship Act to better define how we are going to address  
14 the cost of this cleanup, how we are going to be working with  
15 the State to make sure that there is some efficient use of  
16 dollars here for the cleanup. So we need to address that  
17 further just in terms of how much more you are going to be  
18 looking at to complete the cleanup after we expend the monies  
19 that were received under the Helium Stewardship Act.

20 Do you want to comment on that?

21 Mr. Kornze: Yes.

22 So, first, I want to thank you and Senator Wyden for all  
23 the work that you did to get that funding. It was very  
24 significant.

1           So we have cleaned up the wells in Umiat, as you noted.  
2           The next group that we will be working on is around Barrow.  
3           There are around seven wells there. The next step after that  
4           will be the Simpson Peninsula. So at that point, we will  
5           likely have expended most of the \$50 million. That will be a  
6           2- to 3-year work plan from now. And we are thinking carefully  
7           about what that larger universe of costs might be. Once we get  
8           past those clusters of wells on those sites that I noted, they  
9           get more spread out. And so we are going to have to get more  
10          creative about potentially piggybacking on new infrastructure  
11          that is built and other opportunities.

12          Senator Murkowski: Well, and this is where really having  
13          somebody that is coordinating and helping to facilitate, again,  
14          some efficiencies -- the costs are extraordinary.

15          Mr. Kornze: They are.

16          Senator Murkowski: We acknowledge that. But the  
17          obligation is paramount as well.

18          Sticking to issues up within the north there and related  
19          to NPRA and Greater Mooses Tooth 1, as I mentioned in my  
20          opening comments, we are kind of at a stall-out or a standstill  
21          here with GMT1 regarding the outstanding issue of measuring  
22          production. I think we are, hopefully, done with the  
23          mitigation piece.

24          But BLM is proposing this dedicated test separator as

1 opposed to the multi-phase metering and allocation  
2 methodologies that are currently being used on State land, have  
3 been used on State land for decades. The Alaska Oil and Gas  
4 Conservation Commission, AOGCC, has been working with EPA for  
5 years. There has never been an issue. There has never been a  
6 problem. But now we have got coming out of Interior and BLM  
7 saying, well, you have to have this separate metering system,  
8 this test separator, and an appreciation and understanding in  
9 terms of what the costs then do to the project.

10 It has not only been the operator Conoco that is saying  
11 this just is not reasonable. You have got the State of Alaska  
12 that has weighed in. You have the Arctic Slope Regional  
13 Corporation, which has objected to the requirement because of  
14 the added costs without appreciable benefits.

15 So I guess the question to you is have you engaged with  
16 the Alaska Oil and Gas Conservation Commission (AOGCC)  
17 regarding this added requirement and why you think that the way  
18 it has been done for the past several decades is not sufficient  
19 and what we can do to resolve this because I think it is  
20 somewhat telling that it has been decades now that Conoco has  
21 been trying to get something going within the NPRA and we still  
22 have not seen a drop of anything. So we would like to get  
23 there. We thought that Conoco was going to be able to sanction  
24 this project this season and of course they have not. Where

1 are we with this additional requirement for a test separator?

2 Mr. Kornze: So the question that we are trying to work  
3 out is basically the error rates. What kind of confidence can  
4 we have in how much oil is flowing through those pipelines?

5 Senator Murkowski: But have you talked with AOGCC about  
6 the confidence that they have and have had for years now?

7 Mr. Kornze: So the system that ConocoPhillips has put  
8 forward, as you noted, has been used on State lands and under  
9 AOGCC authority. We look at that. ConocoPhillips operates on  
10 BLM lands in southern Alaska and places like New Mexico, and  
11 they have been meeting the standard that we have in place,  
12 which is roughly a .35 error rate. The system that they are  
13 putting forward likely has an error rate of somewhere between 4  
14 and 10 percent, and it is hard to verify.

15 Senator Murkowski: Have we ever had problems, though,  
16 with the Alaska methodology?

17 Mr. Kornze: Well, I am not sure there have been problems,  
18 but we certainly have some difference in the demand we are  
19 putting forward in terms of the error rate. So we have a very  
20 important responsibility to make sure that the American  
21 taxpayer and the tribes that we work with and other native  
22 populations --

23 Senator Murkowski: Well, right now, the American taxpayer  
24 is getting 100 percent of nothing, and the tribes, the native

1 corporations are not being benefited at all because there is no  
2 production. So we have got a situation where Conoco is  
3 prepared to say we cannot make this pencil out. We just cannot  
4 make it pencil out. And so if you are trying to talk benefits  
5 here, again, if those that are willing to invest hundreds of  
6 millions of dollars into a project and have nothing to show for  
7 it and may be forced to walk away from this project, walk away  
8 from this investment because of an overlay of a requirement  
9 that, again, adds substantial cost, with again minimal to no  
10 appreciable benefit, it causes people to say this does not make  
11 any sense.

12 And this is where I think the administration gets the  
13 black mark in saying, you know, you say you support an all-of-  
14 the-above energy policy. You say you support increased  
15 production or production on the National Petroleum Reserve  
16 Alaska, but you are not doing much to facilitate it. We just  
17 cannot figure out how we cannot come together to make sense on  
18 this. You see my point.

19 Mr. Kornze: I do.

20 And our goal is to get to production on Greater Mooses  
21 Tooth, and I believe we will get there. Part of the more  
22 complicated situation that we are within is that, one,  
23 ConocoPhillips is meeting the standard elsewhere where they  
24 operate on BLM lands in Alaska and in the lower 48. So there

1 are no surprises here.

2           Senator Murkowski: But they would have to build a  
3 completely separate system -- a completely separate system --  
4 up north within NPRA, a redundant system at extraordinary cost.

5           Mr. Kornze: It depends on what your standards are. So we  
6 are held to a very high standard at the Bureau of Land  
7 Management.

8           Senator Murkowski: And I think Alaska has led in terms of  
9 the standard. If the system was not working for us up there, I  
10 think that there is probably more room for a discussion, but  
11 nobody has ever questioned the soundness, the validity, the  
12 reliability. And that is where I think we have got somewhat of  
13 an impasse.

14           Let me go to my colleague here for further questions.

15

1           Senator Udall: Madam Chair, I have a couple more  
2 questions for the record, but I think I will submit those. So  
3 I have completed my questioning.

4           Senator Murkowski: I just have a couple more, if I may.

5           Senator Udall: Please go ahead.

6

1           Senator Murkowski: And very quickly to you, as you know,  
2 with the land conveyances, we have been trying to get moving  
3 forward. We have been held back in being able to do the  
4 surveys. I appreciate the Department moving forward and saying  
5 there are other ways that we can do the surveys through GPS.  
6 Are we any closer to getting that level of acceptance and  
7 cooperation with the State on BLM's proposal for Global  
8 Positioning System (GPS) surveys?

9           Mr. Kornze: So I strongly share your desire to fulfill  
10 the Alaska Statehood Act and what is owed to the native  
11 corporations. And so I think this is an important step. I  
12 went up to Alaska 2 months ago to sit down the Governor and the  
13 Lieutenant Governor and tell them how much faster we can go and  
14 at what a decreased cost to the Federal Government and to the  
15 State potentially and then also truly if we can come together  
16 on this, I think it is a huge opportunity for all of us. So  
17 that was a positive conversation.

18           Our teams have been meeting since then. So Ed Vogel's  
19 team and Mark Meyers' team have been sitting down with ours.

20           I am interested in, hopefully, seeing if we can alter our  
21 MOU with the State, which was signed in 1973. Technology was  
22 very different then. We can provide the State of Alaska with a  
23 much better product with much finer detail that they can use  
24 going forward. So any support you can provide on that front is

1 greatly appreciated.

2       Senator Murkowski: Well, it is something that we are all  
3 trying to achieve the same goal here, and if we can utilize  
4 technologies to our advantage, it seems to me to make sense.  
5 So let us work on that.

6       Let me ask about the helium issue. I mentioned a couple  
7 times the Helium Stewardship Act, which I think there was a  
8 good deal of benefit that came out of that, not the least of  
9 which was some revenues that helped.

10       But just a few weeks ago, we saw a report from GAO raising  
11 questions about BLM's implementation of the act, which  
12 certainly has some repercussions for the helium industry and  
13 taxpayer.

14       The first area that GAO raised concerns is with regard to  
15 these tolling agreements between the refiners and non-refiners.  
16 And unless both sides can reach agreements on tolling, one of  
17 the central elements of the Helium Stewardship Act, to bring  
18 more competition into the helium program, it is not going to be  
19 achieved.

20       So can you give me your response to this GAO report? It  
21 is something that there is some real concern about. And we  
22 want to make sure that the provisions of that act function and  
23 that in fact we are able to see a level of competition that  
24 will allow for greater access to helium on the market. So can

1 you address the GAO?

2 Mr. Kornze: Absolutely. So I think we appreciate the  
3 revision of the system a few years ago through legislation,  
4 which I know was not an easy lift. That legislation was  
5 designed at a time when the Bush Dome, the system that we  
6 operate out of Amarillo, Texas, was a much larger player. So  
7 since then, Qatar, Algeria, a plant in Wyoming have all either  
8 come on line or increased their production significantly, and  
9 it has really changed the dynamics around the system.

10 Related to tolling, so the idea is that we have producers  
11 that are on the system, and if they have excess capacity, they  
12 need to be allowing that to be used by folks who are off the  
13 system that might also have helium that needs to be processed.  
14 One of the things that we are seeing in our gas reservoir is  
15 that the pressure is going down significantly. So we are not  
16 able to push as much gas to these producers as they would want  
17 to consume for their own production. So we are seeing  
18 significantly less gas being refined than sort of at an optimal  
19 level that they would need to hit in order to get to this  
20 concept of the requirement that they use their excess capacity  
21 for tolling.

22 So I think it is a fairly complex situation, but we are  
23 talking to GAO about some of the complexity. We do not  
24 necessarily see eye to eye with 100 percent of what they came

1 out with. We would be happy to visit with your staff further  
2 about the situation.

3 Senator Murkowski: Yes. I know that we want to explore  
4 this further. I want to make sure that we have got this right  
5 and, again, that we are achieving the progress.

6 My last issue is one that I probably should not have saved  
7 for the end because it is going to be really animated and  
8 agitated. We have had an opportunity to talk about the BLM's  
9 eastern interior resource management plan. This is the  
10 management plan up in the interior of the State that will  
11 withdraw close to 700,000 acres in the district from mineral  
12 entry. This is something that the small miners in the  
13 Fortymile District are just beside themselves about. These are  
14 small operators, small operators in an extraordinarily remote  
15 part of the country. And to them, they are looking at this  
16 proposal and saying decisions that are being made 4,000 miles  
17 from here we cannot comprehend.

18 As you know, there is a meeting in Chicken on the 29th of  
19 May. You had been invited to attend. I had asked that you  
20 attend. I understand that you will not be, but I understand  
21 that Bud Cribley is going up. Is anybody from Washington, DC,  
22 going up, do you know?

23 Mr. Kornze: So I am looking at my schedule to see if it  
24 is possible to go.

1           Senator Murkowski: That would be fabulous. That would be  
2 fabulous. I think it would be extraordinarily important for  
3 you to hear directly from the men and women on the ground in  
4 their place as to what this means.

5           And the frustration here is that you have got a proposal  
6 to withdraw, again, nearly 700,000 acres in the Fortymile  
7 District, and you have these miners -- not just miners. You  
8 have Alaskans that say, wait a minute. Tell me how this does  
9 not violate the intent of the Alaska National Interest Lands  
10 Conservation Act (ANILCA) and the no-more clause when you have  
11 in place a proposal like this. And I look at it and say I do  
12 not see how, other than a difference in terminology, this is  
13 not just a flagrant, in-your-face violation of the no-more  
14 clause under ANILCA.

15           And then it is not just the eastern interior land plan, it  
16 is this current planning effort for the Bering Sea western  
17 interior area plan. These are areas that are being proposed  
18 for set-aside for environmental protection as areas of critical  
19 environmental concern, ACEC's. I can tell you most people in  
20 Alaska have never heard of an ACEC, but the proposals that we  
21 have here in terms of limitations on opportunity for access are  
22 really quite extraordinary, proposing to place off limits most  
23 any form of development.

24           Now, I do understand that the current version of the plan

1 reduces from 11 to 8 the number of existing ACEC's in western  
2 Alaska, but it also proposes to create eight new conservation  
3 areas. Some like the Unalakleet River ACEC are pretty large.  
4 You have another, the new sheefish spawning area just south of  
5 McGrath surrounding the Big River. You cannot see it from  
6 here, but you look at the map here along the rivers, and the  
7 impact for any level of development is considerable. It is  
8 beyond considerable. It will potentially block the route for a  
9 pipeline to bring any kind of energy to proposed Donlin Creek  
10 mine, an opportunity that the folks in that region have been  
11 keyed in intently. But in order to access mineral resources  
12 there, you have got to have some form of energy other than just  
13 diesel.

14 But again, we have got provisions within ANILCA that make  
15 it illegal. You cannot do it. You cannot withdraw more than  
16 5,000 acres in Alaska for any single use without congressional  
17 approval. But under many of the agency's pending ACEC's, you  
18 are administratively affecting far more than 5,000 acres for  
19 single purposes, whether it is the sheefish spawning, even  
20 though their original spawning areas are actually outside of  
21 these proposed ACEC's.

22 So I wander around with a map in my everyday folder that  
23 is what gets me up in the morning. It is what reminds me of my  
24 purpose here in the United States Senate. And these are

1 Alaskan lands and waters that are withdrawn from development.  
2 And it is things like wilderness and NPRA withdrawals and  
3 withdrawals in the North Aleutian Basin and critical habitat  
4 proposed and wilderness and national park and Federal lands.  
5 And the colors just make a brilliant patchwork.

6 But what this then does is take that patchwork and muddy  
7 all the colors so that it is even more restrictive so that in  
8 those areas where we thought we might have an opportunity for a  
9 small placer miner to engage in a little bit of income or for a  
10 community to perhaps have an opportunity for some jobs in a  
11 region or for some cheaper energy in a region, but if we are  
12 not going to be able to even allow for a pipeline corridor  
13 because now we have all of these ACEC's, we are going to be  
14 looking at the ESA, the Endangered Species Act, and critical  
15 habitat as chump change because everything else around the  
16 State is going to be blocked off.

17 And I know I sound apocalyptic, but you have to appreciate  
18 the frustration, the anxiety. We felt that we had in place  
19 laws that are specific and unique to Alaska. Alaska is the "A"  
20 in ANILCA, and we thought we had a pretty good understanding as  
21 to what the no-more clause meant. And yet, what we are finding  
22 now is our Federal agencies are coming up with changes in  
23 semantics basically to get around what was clearly a well-  
24 defined law. When it says that you cannot withdraw more than

1 5,000 acres without congressional approval, we kind of thought  
2 that it meant what it said.

3 And so now we are dealing with areas of critical  
4 environmental concern, but it effectively puts you again in a  
5 state of de facto wilderness, not unlike what the President did  
6 with his proposal up in the Arctic National Wildlife Refuge  
7 (ANWR). So it seems like anyway you slice it, any term that  
8 you want to call it, what it ends up being is withdrawal,  
9 restriction, and an inability of a State and a people to access  
10 a resource -- resources that we were promised at statehood,  
11 land that we were promised at statehood. So we are feeling a  
12 little burned.

13 I would encourage you -- encourage you -- to go to Alaska  
14 and to hear the people. And I thank you for the trips that you  
15 have made. And I know that they are not easy because Alaskans  
16 are pretty unfiltered. We will tell you what is on our mind,  
17 but I think that that is important. I think that that is  
18 important because this is our life. This is our livelihood,  
19 and we want to make sure that our lands are cared for. And we  
20 are kind of proud of how we have done it over the decades. But  
21 sometimes we feel like you all are trying to protect us from  
22 ourselves, and that makes us pretty angry.

23 So I would encourage you to go to Chicken. I would  
24 encourage you to listen to the people on the ground. We have

1 some things that we need to be working on together, clearly. I  
2 appreciate the efforts that you are making on the cleanup and  
3 the obligation that the Federal Government has there. We have  
4 got some other things that we need to do. But we must -- must  
5 -- address some of these withdrawal issues that are strangling  
6 Alaskans. So I appreciate your attention to that as well.

7       Mr. Kornze: It will have my attention, and let me say  
8 thank you both for your significant investment in issues  
9 related to the Bureau of Land Management and the Department of  
10 the Interior. The personal attention is greatly appreciated.

ADDITIONAL COMMITTEE QUESTIONS

Senator Murkowski: Thank you.

[The following questions were not asked at the hearing,  
but were submitted to the Bureau for response subsequent to the  
hearing:]

---

Good morning Jeremy,

I hope things are well. It's been a while since we've chatted, we should catch up soon!

I wanted to run the traps with the Administration on this bill, as it relates to the new changes. My boss was a co-sponsor last Congress and I'd like to know if the Administration has concerns with advancing this legislation, and if so, what those concerns might be?

Thanks as always for your and the rest of your staff's help with this!

Best, Scott

**From:** Small, Jeff  
**Sent:** Tuesday, June 02, 2015 10:29 AM  
**To:** GOPLDs; Democratic LDs  
**Subject:** Reintroduction of the Public Lands Renewable Energy Development Act

LD's,

This Thursday, Congressmen Paul Gosar (R-AZ), Jared Polis (D-CO), Joe Heck (R-NV), Mike Thompson (D-CA), Trent Franks (R-AZ) and Raul Ruiz (D-CA) plan to reintroduce the Public Lands Renewable Energy Development Act (H.R.596 in the 113<sup>th</sup> Congress).

This legislation streamlines the permitting process for wind, solar and geothermal development on public lands and establishes a revenue sharing mechanism that ensures a fair return for all.

Cosponsors of the bill in the 113<sup>th</sup> Congress (61): Mark E. Amodei, Dan Benishek, Earl Blumenauer, Bruce L. Braley, Julia Brownley, Tony Cardenas, Matt Cartwright, Judy Chu, David N. Cicilline, Mike Coffman, Gerald E. Connolly, Jim Cooper, Jim Costa, Kevin Cramer, Steve Daines, Peter A. DeFazio, Diana DeGette, Suzan K. DelBene, Jeff Denham, Trent Franks, Pete P. Gallego, Joe Garcia, Cory Gardner, Joseph J. Heck, Steven A. Horsford, Jared Huffman, Derek Kilmer, Ann Kirkpatrick, Raul R. Labrador, David Loebsack, Zoe Lofgren, Alan S. Lowenthal, Michelle Lujan Grisham, Ben Ray Lujan, Cynthia M. Lummis, Cathy McMorris Rodgers, Ed Pastor, Stevan Pearce, Ed Perlmutter, Gary C. Peters, Jared Polis, Raul Ruiz, Matt Salmon, Kurt Schrader, David Schweikert, Carol Shea-Porter, Michael K. Simpson, Kyrsten Sinema, Christopher H. Smith, Steve II Southerland, Jackie Speier, Chris Stewart, Steve Stivers, Mark Takano, Mike Thompson, Scott R. Tipton, Dina Titus, Niki Tsongas, David G. Valadao, Robert J. Wittman, Don Young.

This bill was also supported last Congress by 60+ organizations including the Congressional Sportsmen's Foundation, NACo, the Western Governors' Association, as well as numerous county, sportsmen and local conservation groups.

We have already picked up a new, strong endorsement this year from the Geothermal Energy Association.

Senators Dean Heller (R-NV), Martin Heinrich (D-NM), Jim Risch (R-ID), and Jon Tester (D-MT) [introduced the Senate companion](#) on May 21, 2015 and this bill contains the exact same text.

Notable changes to the bill since last Congress:

- Removes the outdated pilot program provision. The new permit language is modeled after the oil and gas permitting pilot program established by Sec. 345 of the Energy Policy Act of 2005 and modernized last December by the bipartisan BLM Permit Processing Improvement Act of 2014.
- This Congress' bill includes an important provision that makes clear counties will not be penalized by the revenue sharing provisions in the bill and that such payments to counties are in addition to PILT payments.
- Establishes Variance Areas, additional federal lands identified by the Secretary of Interior that are suitable for responsible renewable energy development.
- Requires interagency coordination as well as coordination with states, tribes and local governments.

The dear colleague and bill text are attached.

Please let me know if you have questions or if your boss would like to be an original cosponsor.

Deadline to be an original, is Noon Thursday, June 4<sup>th</sup>.

Sincerely,

Jeff Small  
Legislative Director  
Congressman Paul A. Gosar, D.D.S.  
Arizona's 4th District  
504 Cannon HOB | Washington, DC 20515

114TH CONGRESS  
1ST SESSION

# H. R.

To promote the development of renewable energy on public land, and for other purposes.

---

## IN THE HOUSE OF REPRESENTATIVES

Mr. GOSAR introduced the following bill; which was referred to the Committee on

---

# A BILL

To promote the development of renewable energy on public land, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the  
5 “Public Land Renewable Energy Development Act of  
6 2015”.

7 (b) TABLE OF CONTENTS.—The table of contents for  
8 this Act is as follows:

Sec. 1. Short title; table of contents.

TITLE I—GEOTHERMAL ENERGY

Sec. 101. Extension of funding for implementation of Geothermal Steam Act of 1970.

TITLE II—DEVELOPMENT OF GEOTHERMAL, SOLAR, AND WIND ENERGY ON PUBLIC LAND

Subtitle A—Environmental Reviews and Permitting

- Sec. 201. Definitions.
- Sec. 202. Land use planning; supplements to programmatic environmental impact statements.
- Sec. 203. Environmental review on covered land.
- Sec. 204. Program to improve renewable energy project permit coordination.

Subtitle B—Revenues and Enforcement

- Sec. 211. Definitions.
- Sec. 212. Disposition of revenues.
- Sec. 213. Royalties.
- Sec. 214. Enforcement of royalty and payment provisions.
- Sec. 215. Enforcement.
- Sec. 216. Segregation from appropriation under mining and Federal land laws.
- Sec. 217. Study and report on conservation banking.
- Sec. 218. Applicability of law.

**1 TITLE I—GEOTHERMAL ENERGY**

**2 SEC. 101. EXTENSION OF FUNDING FOR IMPLEMENTATION**

**3 OF GEOTHERMAL STEAM ACT OF 1970.**

4 (a) IN GENERAL.—Section 234(a) of the Energy Pol-  
 5 icy Act of 2005 (42 U.S.C. 15873(a)) is amended by strik-  
 6 ing “in the first 5 fiscal years beginning after the date  
 7 of enactment of this Act” and inserting “through fiscal  
 8 year 2020”.

9 (b) AUTHORIZATION.—Section 234(b) of the Energy  
 10 Policy Act of 2005 (42 U.S.C. 15873(b)) is amended—

11 (1) by striking “Amounts” and inserting the  
 12 following:

13 “(1) IN GENERAL.—Amounts”; and

14 (2) by adding at the end the following:

1           “(2) AUTHORIZATION.—Effective for fiscal year  
2           2015 and each fiscal year thereafter, amounts de-  
3           posited under subsection (a) shall be available to the  
4           Secretary of the Interior for expenditure, subject to  
5           appropriation and without fiscal year limitation, to  
6           implement the Geothermal Steam Act of 1970 (30  
7           U.S.C. 1001 et seq.) and this Act.”.

8           **TITLE II—DEVELOPMENT OF**  
9           **GEOHERMAL, SOLAR, AND**  
10           **WIND ENERGY ON PUBLIC**  
11           **LAND**

12           **Subtitle A—Environmental**  
13           **Reviews and Permitting**

14           **SEC. 201. DEFINITIONS.**

15           In this subtitle:

16           (1) COVERED LAND.—The term “covered land”  
17           means land that is—

18                   (A) public land administered by the Sec-  
19                   retary; and

20                   (B) not excluded from the development of  
21                   geothermal, solar, or wind energy under—

22                           (i) a land use plan established under  
23                           the Federal Land Policy and Management  
24                           Act of 1976 (43 U.S.C. 1701 et seq.); or

25                           (ii) other Federal law.

1           (2) DIRECTOR.—The term “Director” means  
2 the Director of the Bureau of Land Management.

3           (3) EXCLUSION AREA.—The term “exclusion  
4 area” means covered land that is identified by the  
5 Bureau of Land Management as not suitable for de-  
6 velopment of renewable energy projects.

7           (4) PRIORITY AREA.—The term “priority area”  
8 means covered land identified by the land use plan-  
9 ning process of the Bureau of Land Management as  
10 being a preferred location for a renewable energy  
11 project.

12           (5) RENEWABLE ENERGY PROJECT.—The term  
13 “renewable energy project” means a project carried  
14 out on covered land that uses wind, solar, or geo-  
15 thermal energy to generate energy.

16           (6) SECRETARY.—The term “Secretary” means  
17 the Secretary of the Interior.

18           (7) VARIANCE AREA.—The term “variance  
19 area” means covered land that is—

20                   (A) not an exclusion area; and

21                   (B) not a priority area.

22 **SEC. 202. LAND USE PLANNING; SUPPLEMENTS TO PRO-**  
23 **GRAMMATIC ENVIRONMENTAL IMPACT**  
24 **STATEMENTS.**

25           (a) PRIORITY AND VARIANCE AREAS.—

1           (1) IN GENERAL.—The Director shall establish  
2           priority and variance areas on covered land for geo-  
3           thermal, solar, and wind energy projects.

4           (2) DEADLINE.—

5                 (A) GEOTHERMAL ENERGY.—For geo-  
6           thermal energy, the Director shall establish pri-  
7           ority and variance areas as soon as practicable,  
8           but not later than 5 years, after the date of en-  
9           actment of this Act.

10                (B) SOLAR ENERGY.—For solar energy,  
11           the 2012 western solar plan of the Bureau of  
12           Land Management shall be considered to estab-  
13           lish priority and variance areas for solar energy  
14           projects.

15                (C) WIND ENERGY.—For geothermal en-  
16           ergy, the Director shall establish priority and  
17           variance areas as soon as practicable, but not  
18           later than 5 years, after the date of enactment  
19           of this Act.

20           (3) REVIEW AND MODIFICATION.—Not less fre-  
21           quently than once every 10 years, the Director  
22           shall—

23                 (A) review the adequacy of land allocations  
24           for geothermal, solar, and wind energy priority  
25           and variance areas; and

1 (B) based on the review carried out under  
2 subparagraph (A), add, modify, or eliminate  
3 priority and variance areas.

4 (b) COMPLIANCE WITH THE NATIONAL ENVIRON-  
5 MENTAL POLICY ACT.—For purposes of this section, com-  
6 pliance with the National Environmental Policy Act of  
7 1969 (42 U.S.C. 4321 et seq.) shall be accomplished—

8 (1) for geothermal energy, by supplementing  
9 the October 2008 final programmatic environmental  
10 impact statement for geothermal leasing in the west-  
11 ern United States;

12 (2) for solar energy, by supplementing the July  
13 2012 final programmatic environmental impact  
14 statement for solar energy projects; and

15 (3) for wind energy, by supplementing the July  
16 2005 final programmatic environmental impact  
17 statement for wind energy projects.

18 (c) NO EFFECT ON PROCESSING APPLICATIONS.—A  
19 requirement to prepare a supplement to a programmatic  
20 environmental impact statement under this section shall  
21 not result in any delay in processing an application for  
22 a renewable energy project.

23 (d) COORDINATION.—In developing a supplement re-  
24 quired by this section, the Secretary shall coordinate, on  
25 an ongoing basis, with appropriate State, tribal, and local

1 governments, transmission infrastructure owners and op-  
2 erators, developers, and other appropriate entities to en-  
3 sure that priority areas identified by the Secretary are—

4 (1) economically viable (including having access  
5 to transmission);

6 (2) likely to avoid or minimize conflict with  
7 habitat for animals and plants, recreation, and other  
8 uses of covered land; and

9 (3) consistent with local planning efforts.

10 (e) REMOVAL FROM CLASSIFICATION.—In carrying  
11 out subsections (a), (b), and (c), if the Secretary deter-  
12 mines an area previously suited for development should  
13 be removed from priority or variance classification, not  
14 later than 90 days after the date of the determination,  
15 the Secretary shall submit to Congress a report on the  
16 determination.

17 **SEC. 203. ENVIRONMENTAL REVIEW ON COVERED LAND.**

18 (a) IN GENERAL.—If the Director determines that a  
19 proposed renewable energy project has been sufficiently  
20 analyzed by a programmatic environmental impact state-  
21 ment conducted under section 202(b), the head of the ap-  
22 plicable Federal agency shall not require any additional  
23 review under the National Environmental Policy Act of  
24 1969 (42 U.S.C. 4321 et seq.).

1 (b) ADDITIONAL ENVIRONMENTAL REVIEW.—If the  
2 Director determines that additional environmental review  
3 under the National Environmental Policy Act of 1969 (42  
4 U.S.C. 4321 et seq.) is necessary for a proposed renewable  
5 energy project, the head of the applicable Federal agency  
6 shall rely on the analysis in the programmatic environ-  
7 mental impact statement conducted under section 202(b),  
8 to the maximum extent practicable when analyzing the po-  
9 tential impacts of the project.

10 **SEC. 204. PROGRAM TO IMPROVE RENEWABLE ENERGY**  
11 **PROJECT PERMIT COORDINATION.**

12 (a) ESTABLISHMENT.—The Secretary shall establish  
13 a program to improve Federal permit coordination with  
14 respect to renewable energy projects on covered land.

15 (b) MEMORANDUM OF UNDERSTANDING.—

16 (1) IN GENERAL.—Not later than 90 days after  
17 the date of enactment of this Act, the Secretary  
18 shall enter into a memorandum of understanding for  
19 purposes of this section with—

20 (A) the Secretary of Agriculture;

21 (B) the Administrator of the Environ-  
22 mental Protection Agency; and

23 (C) the Chief of Engineers.

24 (2) STATE PARTICIPATION.—The Secretary  
25 may request the Governor of any interested State to

1 be a signatory to the memorandum of understanding  
2 under paragraph (1).

3 (c) INTERAGENCY COORDINATION.—The Secretary  
4 shall establish an ombudsperson in the Office of the Sec-  
5 retary, who shall be responsible for resolving interagency  
6 disputes between 2 or more of the following agencies:

7 (1) The United States Fish and Wildlife Serv-  
8 ice.

9 (2) The National Park Service.

10 (3) The Bureau of Land Management.

11 (d) VARIANCE AREAS.—

12 (1) IN GENERAL.—In carrying out subsections  
13 (b) and (c), the heads of the Federal agencies de-  
14 scribed in those subsections shall consider entering  
15 into agreements and memoranda of understanding  
16 to expedite the environmental analysis of applica-  
17 tions for projects proposed on covered land deter-  
18 mined by the Secretary to be a variance area under  
19 section 202.

20 (2) AVAILABILITY FOR RENEWABLE ENERGY  
21 PROJECT DEVELOPMENT.—To the maximum extent  
22 practicable, the variance areas described in para-  
23 graph (1) shall be made available for renewable en-  
24 ergy project development, after completion of an en-  
25 vironmental impact statement or similar analysis re-

1        required under the National Environmental Policy Act  
2        of 1969 (42 U.S.C. 4321 et seq.), and subject to the  
3        policies and procedures set forth by the Secretary  
4        for evaluating variance applications in the pro-  
5        grammatic environmental impact statement de-  
6        scribed in section 202(b).

7        (e) DESIGNATION OF QUALIFIED STAFF.—

8            (1) IN GENERAL.—Not later than 30 days after  
9        the date on which the memorandum of under-  
10       standing under subsection (b) is executed, all Fed-  
11       eral signatories, as appropriate, shall assign to each  
12       of the field offices described in subsection (f) an em-  
13       ployee who has expertise in the regulatory issues re-  
14       lating to the office in which the employee is em-  
15       ployed, including, as applicable, particular expertise  
16       in—

17            (A) consultation regarding, and prepara-  
18       tion of, biological opinions under section 7 of  
19       the Endangered Species Act of 1973 (16 U.S.C.  
20       1536);

21            (B) permits under section 404 of Federal  
22       Water Pollution Control Act (33 U.S.C. 1344);

23            (C) regulatory matters under the Clean Air  
24       Act (42 U.S.C. 7401 et seq.);

1 (D) planning under section 14 of the Na-  
2 tional Forest Management Act of 1976 (16  
3 U.S.C. 472a);

4 (E) the Federal Land Policy and Manage-  
5 ment Act of 1976 (43 U.S.C. 1701 et seq.);

6 (F) the Migratory Bird Treaty Act (16  
7 U.S.C. 703 et seq.); and

8 (G) the preparation of analyses under the  
9 National Environmental Policy Act of 1969 (42  
10 U.S.C. 4321 et seq.).

11 (2) DUTIES.—Each employee assigned under  
12 paragraph (1) shall—

13 (A) not later than 90 days after the date  
14 of assignment, report to field managers of the  
15 Bureau of Land Management in the office to  
16 which the employee is assigned;

17 (B) be responsible for all issues relating to  
18 the jurisdiction of the home office or agency of  
19 the employee; and

20 (C) participate as part of the team of per-  
21 sonnel working on proposed energy projects,  
22 planning, monitoring, inspection, enforcement,  
23 and environmental analyses.

24 (f) FIELD OFFICES.—The field offices referred to in  
25 subsection (e)(1) shall include field offices of the Bureau

1 of Land Management in, at a minimum, the States of Ari-  
2 zona, California, Colorado, Idaho, Montana, Nevada, New  
3 Mexico, Oregon, Utah, Washington, and Wyoming.

4 (g) ADDITIONAL PERSONNEL.—The Secretary shall  
5 assign to each field office described in subsection (f) such  
6 additional personnel as are necessary to ensure the effec-  
7 tive implementation of any programs administered by the  
8 field offices, including inspection and enforcement relating  
9 to renewable energy project development on covered land,  
10 in accordance with the multiple use mandate of the Fed-  
11 eral Land Policy and Management Act of 1976 (43 U.S.C.  
12 1701 et seq.).

13 (h) REPORT TO CONGRESS.—

14 (1) IN GENERAL.—Not later than February 1  
15 of the first fiscal year beginning after the date of en-  
16 actment of this Act, and each February 1 thereafter,  
17 the Secretary shall submit to the Chairperson and  
18 Ranking Member of the Committee on Energy and  
19 Natural Resources of the Senate and the Committee  
20 on Natural Resources of the House of Representa-  
21 tives a report describing the progress made pursuant  
22 to the program under this subtitle during the pre-  
23 ceding year.

24 (2) INCLUSIONS.—Each report under this sub-  
25 section shall include—

1 (A) projections for renewable energy pro-  
2 duction and capacity installations; and

3 (B) a description of any problems relating  
4 to leasing, permitting, siting, or production.

5 **Subtitle B—Revenues and**  
6 **Enforcement**

7 **SEC. 211. DEFINITIONS.**

8 In this subtitle:

9 (1) COVERED LAND.—The term “covered land”  
10 means land that is—

11 (A)(i) public land administered by the Sec-  
12 retary; or

13 (ii) National Forest System land adminis-  
14 tered by the Secretary of Agriculture; and

15 (B) not excluded from the development of  
16 solar or wind energy under—

17 (i) a final land use plan established  
18 under the Federal Land Policy and Man-  
19 agement Act of 1976 (43 U.S.C. 1701 et  
20 seq.);

21 (ii) a final land use plan established  
22 under the National Forest Management  
23 Act of 1976 (16 U.S.C. 1600 et seq.); or

24 (iii) other Federal law.

1           (2) FEDERAL LAND.—The term “Federal land”  
2 means—

3           (A) land of the National Forest System (as  
4 defined in section 11(a) of the Forest and  
5 Rangeland Renewable Resources Planning Act  
6 of 1974 (16 U.S.C. 1609(a)); or

7           (B) public land.

8           (3) FUND.—The term “Fund” means the Re-  
9 newable Energy Resource Conservation Fund estab-  
10 lished by section 212(c)(1).

11           (4) PUBLIC LAND.—The term “public land”  
12 has the meaning given the term “public lands” in  
13 section 103 of the Federal Land Policy and Manage-  
14 ment Act of 1976 (43 U.S.C. 1702).

15           (5) SECRETARIES.—The term “Secretaries”  
16 means—

17           (A) in the case of public land administered  
18 by the Secretary, the Secretary; and

19           (B) in the case of National Forest System  
20 land administered by the Secretary of Agri-  
21 culture, the Secretary of Agriculture.

22           (6) SECRETARY.—The term “Secretary” means  
23 the Secretary of the Interior.

1 **SEC. 212. DISPOSITION OF REVENUES.**

2 (a) DISPOSITION OF REVENUES.—Without further  
3 appropriation or fiscal year limitation, of the amounts col-  
4 lected as bonus bids, royalties, rentals, fees, or other pay-  
5 ments under a right-of-way, permit, lease, or other author-  
6 ization for the development of wind or solar energy on cov-  
7 ered land—

8 (1) 25 percent shall be paid by the Secretary of  
9 the Treasury to the State within the boundaries of  
10 which the revenue is derived;

11 (2) 25 percent shall be paid by the Secretary of  
12 the Treasury to the 1 or more counties within the  
13 boundaries of which the revenue is derived, to be al-  
14 located among the counties based on the percentage  
15 of land from which the revenue is derived;

16 (3) to be deposited in the Treasury and be  
17 made available to the Secretary to carry out the pro-  
18 gram established by section 204, including the trans-  
19 fer of the funds by the Bureau of Land Management  
20 to other Federal agencies and State agencies to fa-  
21 cilitate the processing of renewable energy permits  
22 on Federal land, with priority given to using the  
23 amounts, to the maximum extent practicable, to re-  
24 ducing the backlog of renewable energy permits that  
25 have not been processed in the State from which the  
26 revenues are derived—

1 (A) 15 percent for each of fiscal years  
2 2015 through 2030;

3 (B) 14 percent for fiscal year 2031;

4 (C) 13 percent for fiscal year 2032;

5 (D) 12 percent for fiscal year 2033;

6 (E) 11 percent for fiscal year 2034; and

7 (F) 10 percent for fiscal year 2035 and  
8 each fiscal year thereafter; and

9 (4) to be deposited in the Renewable Energy  
10 Resource Conservation Fund established by sub-  
11 section (c)—

12 (A) 35 percent for each of fiscal years  
13 2015 through 2030;

14 (B) 36 percent for fiscal year 2031;

15 (C) 37 percent for fiscal year 2032;

16 (D) 38 percent for fiscal year 2033;

17 (E) 39 percent for fiscal year 2034; and

18 (F) 40 percent for fiscal year 2035 and  
19 each fiscal year thereafter.

20 (b) PAYMENTS TO STATES AND COUNTIES.—

21 (1) IN GENERAL.—Amounts paid to States and  
22 counties under subsection (a) shall be used con-  
23 sistent with section 35 of the Mineral Leasing Act  
24 (30 U.S.C. 191).

1           (2) PAYMENTS IN LIEU OF TAXES.—A payment  
2           to a county under paragraph (1) shall be in addition  
3           to a payment in lieu of taxes received by the county  
4           under chapter 69 of title 31, United States Code.

5           (c) RENEWABLE ENERGY RESOURCE CONSERVATION  
6 FUND.—

7           (1) IN GENERAL.—There is established in the  
8           Treasury a fund, to be known as the “Renewable  
9           Energy Resource Conservation Fund”, to be admin-  
10          istered by the Secretary, in consultation with the  
11          Secretary of Agriculture, for use in regions affected  
12          by the development of wind or solar energy on Fed-  
13          eral land.

14          (2) USE.—

15                (A) IN GENERAL.—Amounts in the Fund  
16                shall be available to the Secretary, who may  
17                make amounts available to the Secretary of Ag-  
18                riculture, to other Federal or State agencies,  
19                and other interested persons in an impacted re-  
20                gion, as appropriate, for the purposes of—

21                    (i) protecting and restoring important  
22                    fish and wildlife habitat on Federal land in  
23                    the impacted region; and

24                    (ii) ensuring and improving right-of-  
25                    way access to Federal land and water in

1           the impacted region for fishing, hunting,  
2           and other forms of outdoor recreation in a  
3           manner consistent with the conservation of  
4           fish and wildlife habitat.

5           (B) ADVISORY BOARD.—The Secretaries  
6           shall establish an independent advisory board  
7           composed of key stakeholders and technical ex-  
8           perts to provide recommendations and guidance  
9           on the disposition of any amounts expended  
10          from the Fund.

11          (3) INVESTMENT OF FUND.—

12           (A) IN GENERAL.—Any amounts deposited  
13           in the Fund shall earn interest in an amount  
14           determined by the Secretary of the Treasury on  
15           the basis of the current average market yield on  
16           outstanding marketable obligations of the  
17           United States of comparable maturities.

18           (B) USE.—Any interest earned under sub-  
19           paragraph (A) may be expended in accordance  
20           with this subsection.

21          (4) INTENT OF CONGRESS.—It is the intent of  
22          Congress that the revenues deposited and used in  
23          the Fund shall supplement and not supplant annual  
24          appropriations for conservation activities described  
25          in paragraph (2)(A).

1 **SEC. 213. ROYALTIES.**

2 (a) IN GENERAL.—The Secretaries shall require as  
3 a term and condition of any lease, right-of-way, permit,  
4 or other authorization for the development of wind or solar  
5 energy on covered land the payment of a royalty.

6 (b) RATE CONSIDERATIONS.—The Secretary, in con-  
7 sultation with the Secretary of Agriculture, shall establish,  
8 through rulemaking, a royalty payable under subsection  
9 (a) that shall be a percentage of the gross proceeds from  
10 the sale of electricity at a rate that—

11 (1) encourages production of solar or wind en-  
12 ergy;

13 (2) ensures a fair return to the public com-  
14 parable to the return that would be obtained on  
15 State and private land; and

16 (3) encourages the maximum energy generation  
17 while disturbing the least quantity of covered land  
18 and other natural resources, including water.

19 (c) DIFFERENT ROYALTY RATES.—The Secretaries  
20 shall establish—

21 (1) a different royalty rate for wind or solar en-  
22 ergy generation, which takes into account relative  
23 capacity factors for the respective generation  
24 sources; and

1           (2) a reduced royalty rate for projects located  
2           within a zone identified for development of solar or  
3           wind energy.

4           (d) EXCLUSIVE PAYMENT ON SALE OF ELEC-  
5           TRICITY.—During the period of production, a royalty paid  
6           under subsection (a) shall be the only rent, royalty, or  
7           similar payment to the Federal Government required with  
8           respect to the sale of electricity produced under a lease.

9           (e) ROYALTY RELIEF.—To promote the generation of  
10          renewable energy, the Secretaries may reduce any royalty  
11          otherwise required on a showing by clear and convincing  
12          evidence by the person holding a lease, right-of-way, per-  
13          mit, or other authorization for the development of wind  
14          or solar energy on covered land under which the genera-  
15          tion of energy is or will be produced in commercial quan-  
16          tities that—

17                 (1) collection of the full royalty would unreason-  
18                 ably burden energy generation; and

19                 (2) the royalty reduction is in the public inter-  
20                 est.

21          (f) PERIODIC REVIEW AND REPORT.—

22                 (1) IN GENERAL.—Not later than 5 years after  
23                 the date of enactment of this Act and every 5 years  
24                 thereafter, the Secretary, in consultation with the  
25                 Secretary of Agriculture, shall—

1 (A) complete a review of collections and  
2 impacts of the royalty and fees provided under  
3 this subtitle; and

4 (B) submit to the Committees on Energy  
5 and Natural Resources and Agriculture, Nutri-  
6 tion, and Forestry of the Senate and the Com-  
7 mittees on Natural Resources and Agriculture  
8 of the House of Representatives a report de-  
9 scribing the results of the review.

10 (2) TOPICS.—The report shall address—

11 (A) the total revenues received (by cat-  
12 egory) on an annual basis as royalties from  
13 wind, solar, and geothermal development and  
14 production (specified by energy source) on cov-  
15 ered land;

16 (B) whether the revenues received for the  
17 development of wind, solar, and geothermal de-  
18 velopment are comparable to the revenues re-  
19 ceived for similar development on State and pri-  
20 vate land;

21 (C) any impact on the development of  
22 wind, solar, and geothermal development and  
23 production on covered land as a result of the  
24 royalties; and

1 (D) any recommendations with respect to  
2 changes in Federal law (including regulations)  
3 relating to the amount or method of collection  
4 (including auditing, compliance, and enforce-  
5 ment) of the royalties.

6 (g) REGULATIONS.—Not later than 2 years after the  
7 date of enactment of this Act, the Secretaries shall jointly  
8 issue final regulations to carry out this section.

9 **SEC. 214. ENFORCEMENT OF ROYALTY AND PAYMENT PRO-**  
10 **VISIONS.**

11 (a) DUTIES OF THE SECRETARY.—The Secretary  
12 shall establish a comprehensive inspection, collection, fis-  
13 cal, and production accounting and auditing system—

14 (1) to accurately determine royalties, interest,  
15 fines, penalties, fees, deposits, and other payments  
16 owed under this subtitle; and

17 (2) to collect and account for the payments in  
18 a timely manner.

19 (b) APPLICABILITY OF OTHER LAW.—The Federal  
20 Oil and Gas Royalty Management Act of 1982 (30 U.S.C.  
21 1701 et seq.) (including the civil and criminal enforcement  
22 provisions of that Act) shall apply to leases, permits,  
23 rights-of-way, or other authorizations issued for the devel-  
24 opment of solar or wind energy on covered land and the  
25 holders and operators of the leases, permits, rights-of-way,

1 or other authorizations (and designees) under this subtitle,  
2 except that in applying that Act—

3 (1) “wind or solar leases, permits, rights-of-  
4 way, or other authorizations” shall be substituted  
5 for “oil and gas leases”;

6 (2) “electricity generated from wind or solar re-  
7 sources” shall be substituted for “oil and gas”  
8 (when used as nouns);

9 (3) “lease, permit, right-of-way, or other au-  
10 thORIZATION for the development of wind or solar en-  
11 ergy” shall be substituted for “lease” and “lease for  
12 oil and gas” (when used as nouns); and

13 (4) “lessee, permittee, right-of-way holder, or  
14 holder of an authorization for the development of  
15 wind or solar energy” shall be substituted for “les-  
16 see”.

17 **SEC. 215. ENFORCEMENT.**

18 (a) IN GENERAL.—Sections 302(c) and 303 of the  
19 Federal Land Policy and Management Act of 1976 (43  
20 U.S.C. 1732(c), 1733) shall apply to activities conducted  
21 on covered land under this subtitle.

22 (b) APPLICABILITY OF OTHER ENFORCEMENT PRO-  
23 VISIONS.—Nothing in this subtitle reduces or limits the  
24 enforcement authority vested in the Secretary or the At-  
25 torney General by any other law.

1 **SEC. 216. SEGREGATION FROM APPROPRIATION UNDER**  
2 **MINING AND FEDERAL LAND LAWS.**

3 (a) **IN GENERAL.**—On covered land identified by the  
4 Secretary or the Secretary of Agriculture for the develop-  
5 ment of renewable energy projects under this subtitle or  
6 other applicable law, the Secretary or the Secretary of Ag-  
7 riculture may temporarily segregate the identified land  
8 from appropriation under the mining and public land laws.

9 (b) **ADMINISTRATION.**—Segregation of covered land  
10 under this section—

11 (1) may only be made for a period not to exceed  
12 10 years; and

13 (2) shall be subject to valid existing rights as  
14 of the date of the segregation.

15 **SEC. 217. STUDY AND REPORT ON CONSERVATION BANK-**  
16 **ING.**

17 (a) **STUDY.**—

18 (1) **IN GENERAL.**—Not later than 180 days  
19 after the date of enactment of this Act, the Secre-  
20 taries shall carry out a study on the siting, develop-  
21 ment, and management of projects to determine the  
22 feasibility of carrying out a conservation banking  
23 program on Federal land.

24 (2) **CONTENTS.**—The study under paragraph

25 (1) shall—

26 (A) identify areas in which—

1 (i) privately owned land is not avail-  
2 able to fully offset the impacts of solar or  
3 wind energy development on federally ad-  
4 ministered land; or

5 (ii) mitigation investments on Federal  
6 land are likely to provide greater conserva-  
7 tion value for impacts of solar or wind en-  
8 ergy development on federally administered  
9 land; and

10 (B) examine—

11 (i) the effectiveness of laws (including  
12 regulations) and policies in effect on the  
13 date of enactment of this Act in facili-  
14 tating the development and effective oper-  
15 ation of conservation banks;

16 (ii) the advantages and disadvantages  
17 of using conservation banks on Federal  
18 land to mitigate impacts to natural re-  
19 sources on State, tribal, and private land;  
20 and

21 (iii) any changes in Federal law (in-  
22 cluding regulations) or policy necessary to  
23 further develop a Federal conservation  
24 banking program.

1 (b) REPORT TO CONGRESS.—Not later than 18  
2 months after the date of enactment of this Act, the Secre-  
3 taries shall jointly submit to Congress a report that in-  
4 cludes—

5 (1) the recommendations of the Secretaries re-  
6 lating to—

7 (A) the most effective system for Federal  
8 land described in subsection (a)(2)(A) to meet  
9 the goals of facilitating the development of a  
10 conservation banking program on Federal land;  
11 and

12 (B) any change to Federal law (including  
13 regulations) or policy necessary to address more  
14 effectively the siting, development, and manage-  
15 ment of conservation banking programs on Fed-  
16 eral land to mitigate impacts to natural re-  
17 sources on State, tribal, and private land; and

18 (2) any administrative action to be taken by the  
19 Secretaries in response to the recommendations.

20 (c) AVAILABILITY TO THE PUBLIC.—Not later than  
21 30 days after the date on which the report described in  
22 subsection (b) is submitted to Congress, the Secretaries  
23 shall make the results of the study available to the public.

1 **SEC. 218. APPLICABILITY OF LAW.**

2 Wind or solar generation projects with a capacity of  
3 20 megawatts or more that are issued a lease, right-of-  
4 way, permit, or other authorization under applicable law  
5 shall not be subject to the rental fee exemption for rights-  
6 of-way under section 504(g) of the Federal Land Policy  
7 and Management Act of 1976 (43 U.S.C. 1764(g)).

Support a true all-of-the-above domestic energy policy  
Become an original cosponsor of the Public Lands Renewable Energy Development Act of 2015

Cosponsors in the 113<sup>th</sup> Congress (61): Mark E. Amodei, Dan Benishek, Earl Blumenauer, Bruce L. Braley, Julia Brownley, Tony Cardenas, Matt Cartwright, Judy Chu, David N. Cicilline, Mike Coffman, Gerald E. Connolly, Jim Cooper, Jim Costa, Kevin Cramer, Steve Daines, Peter A. DeFazio, Diana DeGette, Suzan K. DelBene, Jeff Denham, Trent Franks, Pete P. Gallego, Joe Garcia, Cory Gardner, Joseph J. Heck, Steven A. Horsford, Jared Huffman, Derek Kilmer, Ann Kirkpatrick, Raul R. Labrador, David Loebsack, Zoe Lofgren, Alan S. Lowenthal, Michelle Lujan Grisham, Ben Ray Lujan, Cynthia M. Lummis, Cathy McMorris Rodgers, Ed Pastor, Stevan Pearce, Ed Perlmutter, Gary C. Peters, Jared Polis, Raul Ruiz, Matt Salmon, Kurt Schrader, David Schweikert, Carol Shea-Porter, Michael K. Simpson, Kyrsten Sinema, Christopher H. Smith, Steve II Southerland, Jackie Speier, Chris Stewart, Steve Stivers, Mark Takano, Mike Thompson, Scott R. Tipton, Dina Titus, Niki Tsongas, David G. Valadao, Robert J. Wittman, Don Young.

Dear Colleague:

Renewable energy sources like wind, solar and geothermal are an integral part of the United States' all-of-the-above energy strategy. Our nation's public lands can play a critical role in supporting that mission, but uncertainty in the permitting process impedes or delays our ability to harness their renewable energy potential. To address this problem, we plan to reintroduce the Public Lands Renewable Energy Development Act (H.R.596 in the 113<sup>th</sup> Congress).

Public land management agencies need a permitting process tailored to the unique characteristics and impacts of renewable energy projects. This bipartisan bill removes government red tape and develops a streamlined process that will drive investment towards the highest quality renewable sources.

The legislation also establishes a revenue sharing mechanism that ensures a fair return for all. The Public Lands Renewable Energy Development Act distributes certain revenues derived through this Act by returning 25% to the state where development takes place, 25% to the counties of origin, 15% is directed for the purposes of more efficiently processing permit applications and reducing the backlog of renewable energy permits, and 35% is deposited into a fund for sportsmen and conservation purposes, including increasing access and outdoor recreation like hunting and fishing.

Since federal lands are not taxable, state and local governments deserve a share of the revenues from the sales of energy production on lands within their borders. These resources will help local governments deliver critical services and develop much-needed capital improvement projects, such as road maintenance, public safety, and law enforcement.

Our nation's public lands must play a critical role in our country's energy future. We encourage you to become an original cosponsor of the Public Lands Renewable Energy Development Act of 2015 and help the United States create jobs, make further progress towards energy independence, and preserve our nation's natural wonders.

To cosponsor this legislation, please contact Jeff Small at [Jeff.small@mail.house.gov](mailto:Jeff.small@mail.house.gov)

## Editorial: Keep oil off our coast (Sarasota Herald-Tribune)

By Editorial Board

Published: May 27, 2015

As an Associated Press article in Tuesday's Herald-Tribune reported, tourism on the northern Gulf Coast is beginning to recover -- five years after the BP oil spill.

It makes you wonder: How would Florida cope with a five-year drought in tourism?

And the answer is: It would be a disaster, in and of itself. Tourism is a \$70 billion industry in Florida. More than a million Floridians -- one of every 9 workers -- have jobs tied to the tourism industry, according to the state Department of Economic Opportunity.

The threat of a major oil spill to this state should concern all Florida residents and their elected officials, because some U.S. senators are ready to take that risk.

Sen. Bill Cassidy, R-La., has introduced a bill that would repeal a federal moratorium on oil drilling within 125 miles of Florida's Gulf Coast; the no-drilling zone extends out 235 miles at some points.

Cassidy's bill would allow oil rigs just 50 miles off Florida's coast. Several Republican senators from Gulf

Coast states -- Louisiana's other senator, David Vitter, two senators from Mississippi and one from Texas -- co-filed the bill.

'Florida is under siege'

Cassidy said drilling closer to Florida could produce an estimated million barrels of oil per day, provide jobs and boost the region's economy.

Unless, of course, there's yet another oil disaster -- one just 50 miles from Florida's west coast. The Deepwater Horizon rig that exploded in 2010, causing the BP spill, was 49 miles off Louisiana's coast.

Florida Sen. **Bill Nelson**, a Democrat, is outraged -- as he should be. He wrote the 2006 legislation that established the no-drilling zone, which is to remain in place until 2022.

"Florida is under siege," **Nelson** said last week. "At some point, folks need to ignore Big Oil's greed and simply do what's right."

Besides threatening Florida's tourism industry, **Nelson** said, oil drilling poses a serious risk to Florida's delicate environment and to U.S. military training areas in the eastern Gulf.

In response to Cassidy's bill, **Nelson** filed legislation last week that would extend the current moratorium for five years, to 2027.

We hope Florida's Republican senator, Marco Rubio, joins with **Nelson** to condemn Cassidy's bill and back the moratorium's extension. As a presidential candidate, Rubio could demonstrate leadership within the Senate's Republican majority.

Not a partisan issue

Gov. Rick Scott should also support **Nelson's** stand, as should Republican leaders in the Florida Legislature. As Scott said recently of the state's tourism: "There's jobs all over the state because people are coming here or tourists are buying homes and moving their business here."

Scott, a Republican, should tell that to Cassidy and his GOP colleagues.

Protecting Florida from the risks inherent in oil drilling has never been a partisan issue in this state. **Nelson's** 2006 bill was co-sponsored by Mel Martinez, Florida's Republican senator at the time. As governor, Jeb Bush also opposed oil rigs off the Florida coast.

If Cassidy and his Senate backers want to risk another oil disaster off their coasts, that's their business -- but not if Florida's economy and environment are placed in further jeopardy.

Florida's business depends on tourism and the environment, and those resources should not be put up for sale to the oil industry at any price.

It took five years for tourism in Louisiana, Mississippi and Alabama to begin to recover from the Deepwater Horizon spill. If a similar disaster occurred 50 miles off Florida's Gulf Coast, how long would it take this state to recover? Floridians should not have to find out.

# Editorial: Still antsy after all these years (Northwest Florida Daily News)

By Editorial Board

Published: May 30, 2015

The massive oil spill that befouled the Gulf of Mexico in the summer of 2010 left us all a little nervous. Now, whenever somebody on TV mentions oil gushing onto a beach, we reflexively think: “Uh-oh. Hope it’s not here.”

So far, so good. Last week’s spill wasn’t here but in California. A pipe ruptured and spewed more than 100,000 gallons of crude onto beaches in the Santa Barbara area, just north of Los Angeles.

The Associated Press noted that the latest spill was tiny compared with the 3-million-gallon Santa Barbara oil spill of 1969, a disaster that sparked the 1970s environmental movement. And it was minuscule compared with the Gulf of Mexico spill, which clobbered OUR coast with more than 200 million gallons.

Nevertheless, folks in California have our sympathy. The effects of any oil spill will linger.

They certainly lingered here. The same week the pipe burst near Santa Barbara, researchers with the National Oceanic and Atmospheric Administration announced that the BP spill in 2010 probably played a “significant” role in dolphin deaths along the northern Gulf Coast over the following two years.

The dead dolphins had lung lesions that “basically ... make a direct link to the oil,” said NOAA spokesman Ben Sherman.

The bad news kept coming. About the same time we were learning about the California spill and the Gulf of Mexico dolphin deaths, Florida Sen. **Bill Nelson** issued a news release noting that another U.S. senator had filed a bill to repeal a moratorium that protects much of Florida’s Gulf Coast from offshore drilling.

The moratorium is supposed to last through 2022. The senator who wants to knock it down is from Louisiana — which has the kind of oil retrieval infrastructure our state doesn’t.

Sen. **Nelson**’s news release argued that Louisiana politicians “are really seeking ... to boost the royalties their state would receive by opening up more of the Gulf of Mexico to drilling.”

Five years after the BP spill, there’s still reason to be a little nervous.

# Editorial: Bush, Rubio send wrong signal on oil drilling off Florida (Tampa Bay Times)

By Editorial Board

Published: June 1, 2015

For decades, Florida leaders from both parties worked together to keep offshore oil rigs from creeping

further toward Florida's coast. It was an admirable, commonsense commitment that looks particularly smart given the significant damage from the BP oil spill five years ago. But that long history of bipartisan consensus is showing signs of cracking. Two Republicans eyeing the White House, Sen. Marco Rubio and former Gov. Jeb Bush, are leaving the door open to bringing offshore rigs closer to Florida's coast. That is a betrayal of the state and sends the wrong signal to oil drilling advocates in Congress.

Rubio and Bush had an ideal opportunity last week to demonstrate their home state commitment and stake principled ground in the fast-emerging push by oil state lawmakers to open up more of the Gulf of Mexico to drilling. But neither got behind legislation that Florida's senior senator, Democrat **Bill Nelson**, filed to block a proposal from gulf state legislators to end a ban on drilling near Florida's coast. It was a self-serving pass by Rubio and Bush, who are looking for every fundraising dollar, and they should not forget their Florida roots.

**Nelson** is seeking to block a move by Sen. Bill Cassidy, R-La., to allow rigs as close as 50 miles from Florida's Gulf Coast. The proposal would undo the deal that Congress agreed to in 2006 that bans drilling within 235 miles of Tampa Bay and 125 miles of the Panhandle. That ban, which was established in part to provide a buffer for military training off Florida's coast, expires in 2022. **Nelson** is fighting Cassidy's bill and filed counter-legislation that would extend the current ban until 2027.

The proponents who argue that drilling is safer in the aftermath of the BP spill are some of same cheerleaders who have long championed more deepwater drilling in the gulf. Guarantees about safety exist on paper, as they did in 2010, when BP offered assurances early on that it could contain the disaster, and that certainly wasn't the case. And for those who believe a 50-mile limit would protect Florida, BP's rig was 49 miles off Louisiana — and the oil that gushed from it went on to foul more than 100 miles of Florida coastline, growing into a slick the size of South Carolina.

Why give oil drillers more territory? The industry has tens of millions of acres available it is not using now. The area under lease and the number of active leases are both below the figures from 2010. There is no reason to come closer to Florida. Officials are still adding up the environmental damage from the BP spill, but lost wages and other damages for Floridians totaled more than \$1.3 billion. Tens of thousands of Florida residents are still awaiting action on their claims. If that is the impact from what happened five years ago off Louisiana, imagine the impact today off the coast of Pinellas County.

Florida's political leaders have long recognized the need to speak on drilling in the same firm voice. By equivocating, Rubio and Bush have opened a dangerous window to a flurry of powerful voices outside Florida's control. Presidential bids test leadership. And drilling presents a serious threat to Florida's economy and quality of life. That has been abundantly clear to generations of Florida leaders, and it should be clear to the junior senator and his mentor, the former governor.

## Editorial: Fight offshore drilling scheme (Tampa Tribune)

By Editorial Board

Published: June 4, 2015

Sen. **Bill Nelson** is rightly raising the alarm about a proposal that would allow oil drilling 50 miles off Florida's coast, and it is disappointing that so far he is getting no help from Marco Rubio, his fellow Florida senator and a presidential candidate.

Unlike **Nelson**, Rubio has been muted about a measure proposed by Sen. Bill Cassidy of Louisiana that would eliminate current protections for Florida's coast that prohibit drilling within 125 miles of the coast but extend to 235 miles at some points.

The buffer safeguards Florida's shores and also protects military aviation training areas in the eastern Gulf of Mexico.

**Nelson** has filed legislation to extend the present drilling moratorium, due to run to 2022, for another five years, but Rubio is not helping.

Not long ago, Florida leaders, regardless of party, banded together to fight drilling close to Florida's West Coast beaches.

Former Republican Sen. Mel Martinez worked with **Nelson**, a Democrat, in prior efforts to protect Florida's coast — and a \$70 billion-a-year tourism industry that last year attracted 97 million visitors.

The late Rep. Bill Young was known for his relentless defense of Florida's coast, as well his commitment to a strong military.

Former Florida Sen. Connie Mack was a conservative Republican and by no means an environmental zealot. But he joined former Democratic Sen. Bob Graham in fighting schemes to allow rigs close to our shores.

In 1997, Mack said, "The reason for our ongoing crusade to end drilling off Florida's coast is simple. In Florida, a healthy environment means a healthy economy. It would only take one disaster to change that."

Mack was right. Five years ago, the BP oil spill off the Louisiana coast left oil on beaches in the Florida Panhandle but affected tourism throughout the Gulf Coast as U.S. and foreign tourists worried about the spreading oil, avoiding beaches that were untouched by the spill. One study found more than 40,000 jobs were lost.

Moreover, the Gulf of Mexico continues to suffer enduring harm. Hundreds of dolphins have died or suffered afflictions caused by the oil. Hundreds of thousands of shorebirds were killed. Fish numbers, including red snapper and speckled trout, dramatically declined. And oil damage has been found on coral reefs around the Gulf.

The claim that offshore drilling can be made risk-free is a fantasy. Massive spills are a rarity, but there is no way to eliminate accidents in what is inherently a messy business. Last month a pipeline carrying crude oil from an offshore rig in California ruptured and leaked oil for hours.

Despite such risks, it is necessary that offshore drilling be part of the nation's strategy to become energy independent. But our leaders need to be discerning about where drilling is appropriate.

It makes no sense to allow drilling close to Florida's West Coast, whose renowned sugar-sand beaches would lose their appeal as soon as tar balls began to wash ashore.

There are abundant areas accessible to the oil industry, including in the Gulf of Mexico, that can be tapped with little threat to the shoreline. Moreover, with the fracking explosion, the nation is hardly desperate for energy sources.

It is a pity that some Florida Republicans these days appear more worried about appeasing the "drill, baby, drill" crowd than defending our coast. They should help the GOP develop a more mature energy outlook.

The GOP used to have no shortage of thoughtful leaders, such as Mack, Mel Martinez, Young and former Gov. Bob Martinez, who had the insight and courage to make such distinctions.

Rubio should consider their example.

## Editorial: Seismic testing risky first step to offshore oil drilling (Palm Beach Post)

By Editorial Board

Published: June 6, 2015

Following last year's announcement to allow seismic testing, the Obama administration has been moving forward on plans to allow oil and gas companies to conduct seismic tests for the purpose of finding oil deposits off the Atlantic Coast of Florida.

But we agree with Florida's U.S. Sen. **Bill Nelson**, who has proposed legislation to ban the practice. Florida, which relies on our beaches for tourism, is especially vulnerable to long-term damage from oil spills. As such, protecting our coastline should be a top priority. No one comes to this state for a beautiful view of oil rigs.

Seismic testing is a technique that allows mapping under the sea floor by sending pulses of sound into the ocean bottom. Supporters of the testing claim it is safe. They claim that the tests are just a way to survey the amounts and locations of oil off the coast. In their view, seismic tests are about information-gathering, not drilling.

This explanation seems to be misleading, at best. Using sonic pulses may have unanticipated effects on sensitive ocean life and the environment. The U.S. government's report on the environmental impact concedes that there could be moderate injury to marine mammals and turtles. Further, there is no point in finding oil if there was not at least some desire to exploit the resource. It seems preposterous to argue that after mapping and classifying the coastal area, there will not be a push to drill for any oil that is found.

Already in Congress there are attempts to roll back the protections we have against offshore drilling. Sen. Bill Cassidy, R-La., has introduced legislation to reduce the 225-mile drilling ban off our coasts to only 50 miles. For a Louisiana senator to champion this effort is surprising, since the Gulf region is still recovering from the disastrous Deepwater Horizon oil spill in 2010. That spill occurred 49 miles off the coast, spewing 3.1 million gallons of oil into the Gulf of Mexico, and its effects will likely be felt for years to come. It appears the tons of oil sludge deposited across the Gulf may be around for a long time. As a result, scientists are still studying possible long-term consequences, especially to ocean life and the coastal marshlands.

In Florida, protecting our coasts has never been a partisan issue. Both Republican and Democratic governors, including former rivals Jeb Bush and Lawton Chiles, have supported offshore drilling bans. Florida's miles of beaches remain one of the most valuable natural resources in the state, if not the country. Putting them at risk is shortsighted, especially in light of the damaging spills that have occurred off our coast, and just recently in California. Oil and gas companies might want to take the risk. We do not.

The ongoing expansion of oil exploration across the United States has been positive for our nation's economy, and our goal of long-term energy independence. Everyone likes cheap gas, and the recent boom in oil production has benefited commuters and businesses, as well as other oil and gas consumers.

Nonetheless, increased production poses risks, especially offshore drilling. While keeping energy costs down is a laudable and important goal, it has to be balanced with protection of our lands and coasts.

To that end, **Nelson** is right to fight to protect our unique beaches and environment against seismic testing. It is the proverbial camel's nose under the tent. And there are some places that are just too important to be subject to this kind of risk. The Florida coastline is one of them.

## Editorial: Wherever you stand is where your beach is (Baton Rouge Advocate)

By GREGORY ROBERTS

Published: June 6, 2015

Washington — To the proverbial visitor from Mars, it might seem reasonable to expect Louisiana's elected officials to take a tough line on offshore oil drilling, to stand vigilant watch against threats to the state's fragile coastline and to harbor deep skepticism or even hostility toward the offshore energy industry.

After all, the explosion of the Deepwater Horizon oil rig in 2010 occurred fewer than 50 miles off the Louisiana coast, killing 11 workers. The explosion triggered the largest accidental oil spill in the world — visible from space, if not Mars itself — resulting in what is considered the worst environmental disaster in the history of the United States. The spill took an enormous toll on marine life and devastated Louisiana's fishing industry in the Gulf of Mexico. Investigations revealed negligence and malfeasance contributed to the disaster, and oil company officials pleaded guilty to a slew of criminal charges.

But as the Martian visitor would discover, the ways of the earthlings can be puzzling indeed.

Consider U.S. House Majority Whip Steve Scalise, a Republican from Jefferson. On April 20, the fifth anniversary of the explosion, he issued a statement that “our thoughts go out to the loved ones of the 11 people who lost their lives during the Deepwater Horizon disaster,” which, he said, “also unleashed an environmental tragedy that is still impacting Louisiana and its people today.”

Nothing there to raise the eyebrows of the visiting extraterrestrial, if it has any eyebrows at all. Then, in an opinion piece published that day in *The Advocate*, Scalise addressed the oil industry that was responsible for the disaster — offering not condemnation but praise.

“Since 2010's Deepwater Horizon tragedy, the oil and gas industry has advanced standards for safety systems, well integrity, blowout preventers and communication among companies,” he wrote. “The industry realized it had a problem and took proactive steps to increase safety standards.”

Maybe that's why he said “this tragedy has made us stronger.”

Scalise also wrote — in case there was any doubt — “I am a proud advocate of offshore energy production.” So, too, apparently, are a couple of other Louisiana Republicans, U.S. Sens. Bill Cassidy and David Vitter.

In May, Cassidy introduced the Offshore Energy and Jobs Act of 2015, with Vitter as a co-sponsor. The

bill would, among other things, increase energy production in the Gulf by ending in 2017 a moratorium on drilling within 125 miles of the Florida Panhandle (and within 235 miles of Tampa Bay), now scheduled to expire in 2022. Cassidy's bill would shrink the drilling-free zone to 50 miles off the Florida coast.

"Developing oil and natural gas resources in the Gulf of Mexico could create more than 200,000 jobs, add more than \$18 billion per year to the U.S. economy and strengthen our national security," Cassidy said in a statement announcing the filing of the bill. "What is there to oppose? Time for everyone to get on board."

But his plea fell on deaf ears among some members of Congress — particularly several from Florida.

"Florida is under siege," U.S. Sen. Bill Nelson, a Florida Democrat, said in a statement of his own on the Cassidy bill. "At some point, folks need to ignore Big Oil's greed and simply do what's right."

Nelson has filed a counterproposal to extend the existing moratorium to 2027. He's been joined in that effort by members of the U.S. House delegation from Florida, including at least two Republicans. One of those Florida Republicans, David Jolly, specifically referred to Deepwater Horizon in expressing his support for lengthening the moratorium.

This mystifies Cassidy.

"Families across the nation, including in Florida, would hold jobs with better wages and better benefits that are created by expanding offshore energy production," he said in a follow-up statement. "I don't understand why anyone would deny Floridians, or anyone else, access to these jobs."

It's jobs that help explain the dispute — or, maybe more accurately, the businesses that include those jobs and the influence those businesses exert in each state's politics. What the energy industry is to Louisiana — the mainstay of the economy — tourism is to Florida, and its oil-free Gulf Coast beaches are a popular draw.

How different the world might be if Florida instead of Louisiana were awash in oil and gas, and if spring breakers flocked to Grand Isle instead of Panama City — although possibly no less confusing to a visitor from Mars.

*Gregory Roberts is chief of The Advocate Washington bureau.*

## **Editorial: Squash latest lawmaker push to allow oil drilling closer to Florida's Gulf shores (Bradenton Herald)**

By Editorial Board

Published: June 7, 2015

Despite history and the prospects of future oil spills from offshore rigs and wells fouling the Gulf of Mexico, oil state congressmen and senators are pushing legislation to allow rigs closer to Florida's coastline.

Even as America is awash in oil and natural gas -- becoming the largest global producer of petroleum in

2012 with the upward surge continuing -- this bill would open access to oil and gas exploration to within 50 miles of Florida's shores.

That's quite a difference from the current bans of 235 miles from Tampa Bay and 125 miles from the Panhandle.

Florida stands in a unique position, being in its own federal planning region for Gulf energy resources management. The other two, the western zone for Texas and the central one south of Louisiana, Mississippi and Alabama, already allow exploration and drilling within 50 miles of those shorelines.

When proponents of offshore drilling close to Florida beaches cite the need for energy independence and national energy security, they ignore the fact that Big Oil hasn't taken advantage of the thousands of available leases in the western and central planning areas. America's burgeoning oil production also weakens the security argument.

Gulf oil production is vital to the nation's future, but there are plenty of opportunities for drilling beyond Florida's coastline.

Two Florida Republican contenders for the White House -- former Gov. Jeb Bush and Sen. Marco Rubio - support an expansion of domestic energy production. That's a flip-flop for Bush, who as governor fought such bids to allow rigs closer to Florida's coastline.

Democratic Sen. **Bill Nelson** of Florida came out as the state's initial defender by recently filing a bill that counters the pro-drilling measure. **Nelson's** measure would extend the 2006 ban on near-shore drilling, set to expire in 2022, to 2027.

GOP Rep. Vern Buchanan, who has represented the Manatee and Sarasota communities well with his opposition to the expansion of Gulf drilling close to Florida, followed **Nelson's** lead last week. The congressman signed on as a cosponsor to House legislation that also extends the current ban through 2027.

Rep. David Jolly, R-Indian Shores, introduced the House measure on Thursday with Rep. Gwen Graham, a Tallahassee Democrat, showing the opposition is bipartisan.

In a statement, Jolly put this matter in sharp focus, refuting the pro-drilling arguments about job creation and energy security: "The economic benefits do not outweigh the risks. We can achieve energy independence and national energy security without jeopardizing our natural resources."

And, we must add, without threatening all the tourism-related jobs and businesses, more valuable than far fewer oil workers.

The lesson of the BP oil spill five years ago appears lost on Big Oil supporters. The Deepwater Horizon rig exploded, and BP's well blew out and gushed more than 200 million gallons of crude into the Gulf over 87 days.

That rig stood only 50 miles from Louisiana's shore, and oil wreaked havoc on the environment. The crude fouled more than 100 miles of Florida's coast, and devastated the tourism industries in beach communities.

The cleanup and damage cost BP billions. The environmental impact has yet to be fully determined.

In the wake of the catastrophe, the federal government established new safety protocols and equipment standards and stricter enforcement regulations. These improvements, however, exist on paper and depend on compliance by the oil industry.

And given human failings, there are no guarantees another underwater gusher would not occur. Even with improvements in company operations and drilling equipment, oil industry assurances cannot ensure public safety.

Even White House Press Secretary Josh Earnest recently admitted "the need to put in place even more rigorous safety standards." That does not lend confidence in the reforms initiated by the BP disaster.

Fortunately Manatee County beaches and ecosystems escaped the flood of BP oil.

Thanks to promotional messages about our clean beaches after the spill, the county saw a 12 percent increase in visitation, many from tourists who frequented the Panhandle.

Tourism is Manatee's economic lifeblood, and our beaches, marine ecosystems and clean waterways also yield an enviable quality of life. Imagine the threat from drilling rigs only 50 miles offshore here and a well blowout. Keep the rigs far from our coast to help minimize the danger.

As Floridians, Bush and Rubio should side with Gulf beach communities and tourism economies instead of Big Oil and outsized profits.

## **Opinion: Florida's Presidential Hopefuls Have Forgotten about Deepwater Horizon (Context Florida)**

By Diane Roberts

Published: June 7, 2015

OCCUPIED TALLAHASSEE – The not-remotely-special special session limps along, costing taxpayers about \$75,000 a day. The bars in Tallahassee are making out pretty well. The rest of us, not so much.

The Senate wants to expand Medicaid, but can't call it "Medicaid," because, you know, Obama. The House won't call it anything other than "Medicaid!" because, you know, Obama. The Reps say it's a "failed program." Which it isn't.

More than 850,000 Floridians will go without health insurance because these guys are happy for poor people to suffer. If God liked poor people, they wouldn't be poor, right?

Where's Florida's alleged governor? Battling in the capitol trenches, demonstrating leadership, bringing warring legislative leaders together so that the state can go forward?

Aw, hell no. The critter's been at Disney World, at an "economic summit," preening himself in front of the presidential campaign second string – Messrs Jindal, Walker, Perry, Christie – and one first-stringer, Scott's mansion predecessor John Ellis Bush.

Mickey Mouse was also in attendance.

Meanwhile, as we all stare at the Legislature in despair and disbelief, over in the far right-hand corner, Marco Rubio is wrapping his little arms around the same "Drill, Baby, Drill" agenda which made Sarah Palin such a beloved figure in American politics.

Marcocito insists that because, "I'm not a scientist, man," he doesn't know how old the earth is, or whether climate change is real, yet he's somehow qualified to head the Senate subcommittee on oceans, the atmosphere and fisheries. And he's confident parking oil wells almost within sight of Florida beaches

is a great idea.

A Louisiana senator, who's either malicious or clueless (though he could be both), wants to strip away the restrictions on drilling near our coasts, also known as the thing which saved Florida from the most horrible effects of the 2010 BP spill. You remember the spill: the worst in U.S. history? The one which is still harming sea grasses, fish and other marine life throughout the Gulf of Mexico?

Deepwater Horizon was about 50 miles from the Louisiana shore. Imagine if those wells had been 50 miles off Walton, Okaloosa, Escambia and Bay counties instead of Louisiana. Environmental Armageddon. Economic meltdown.

Maybe worse: the Floridan Aquifer extends out into the Gulf, as well as the Atlantic. Drill in the wrong place and you've just admitted a whole lot of salt water into our major drinking water source.

Drill, Baby, drillers insist that Florida could maybe make \$1.6 billion over ten years. That sounds like a lot of large until you consider what it might cost to replace our natural source of fresh water with a desalination plant or three (\$1 billion is about average for a good one), plus clean-up if there's a spill (Deepwater Horizon is clocking in at \$16 billion – so far), not to mention the carbon footprint.

Makes \$160 million a year look paltry.

Nevertheless, some Republicans, including Marcocito and Jeb Bush (who used to kind of pretend he was anti-drilling, back when that would help him get re-elected) don't have a problem with us endangering our tourist economy, our wildlife, our health, and our drinking water to enrich BP, Shell, Exxon, the Koch Bros. and the rest of the whole sick extractive industry crew.

Sen. Bill Nelson, not normally given to hissy fit-pitching, is hollering that Florida is "under siege" from Big Oil. He's trying to defend the state from the drill-vandals who either don't understand that Florida is already suffering the effects of climate change with flooding, saltwater intrusion, and rising sea levels, or don't care. Hey, they'll be dead by the time the ca-ca really hits the fan. In the meantime, rape and pillage for profit!

Some Republicans actually get this: Pinellas County's own Rep. David Jolly, along with Democrat Rep. Gwen Graham (daughter of the more famous Bob) from Tallahassee, are sponsoring legislation to counter the drill-fanciers and extend the ban on drilling close to Florida until 2027.

At which time we will have either got serious about alternative energy sources – geothermal, sun, water, wind – or be thinking about colonizing Mars.

Now if only the governor and the state legislature would start paying attention to the fight between pro-polluters, two of whom are frontrunners for the Republican presidential nomination, and defenders of Florida.

But the governor's too busy increasing his own political clout at the expense of actually, you know, governing. And the Legislature's occupied with arguing over who "deserves" decent healthcare here in a rich state in the richest nation on earth.

I'd compare them all to hogs trampling each other for slops, except that hogs are rather dignified creatures known to be quite intelligent

*Diane Roberts teaches at Florida State University.*

**From:** Rackens, Chris  
**To:** [Bratt, Jeremy](#); [Iacobucci, Francis](#)  
**Subject:** SEEC Meeting Information  
**Date:** Tuesday, June 09, 2015 3:41:08 PM  
**Attachments:** [MEMO SEEC Member Meeting with Interior Secretary Jewell 6.11.15.docx](#)

---

Jeremy and Francis,

I wanted to make sure we were all caught up ahead of Thursday's SEEC Member meeting with Secretary Jewell. My only question for you all is: In addition to the Secretary, who do you expect from DOI will attend?

I'm attaching a memo that has been provided to all SEEC office in preparation for the meeting. This should give you a sense of issues that are of interest to this group. Meeting details, format, and Member RSVPs are below. Please let me know if you have any questions.

**SEEC Member Lunch Meeting**  
**Secretary of the Interior Sally Jewell**  
**Thursday, June 11<sup>th</sup>**  
**12:30-1:30pm**  
**HVC-200**

SEEC Vice-Chair Rep. Jared Polis will Chair the meeting and introduce the Secretary. We'd like to hear from her for 5-10 mins about any issues that she thinks are of interest to this group or warrant member's attention. This is her opportunity to solicit support or input from this group on any issues that are considered a DOI priority. Following the Secretary's remarks we will proceed with questions and discussion. Mr. Polis will moderate the discussion and recognize members for questions.

Here is my list of Confirmed RSVPs:

Langevin  
Connolly  
Tonko  
Matsui  
Lieu  
Pocan  
Huffman  
Price  
Lee  
Lowenthal  
Beyer  
DelBene  
Tsongas  
Brownley  
Speier

Tentative:

Grijalva  
Lee  
Peters  
Pingree  
Kilmer  
Scott  
Nolan

For our full roster of SEEC Members, please see our website: <http://seec-israel.house.gov/membership/members>

Chris Rackens

## MEMORANDUM

**What:** Sustainable Energy and Environment Coalition (SEEC) Member Lunch Meeting

**When:** Thursday, June 11, 2015, 12:30-1:30pm

**Where:** HVC-200

**Topic:** Conversation with Secretary of the Interior Sally Jewell

---

### Meeting Purpose and Format

The purpose of this meeting is to allow SEEC Members an opportunity to hear from and discuss with Secretary Jewell the many issues under the Department of the Interior's jurisdiction.

SEEC Vice-Chair Jared Polis will chair the meeting. The meeting will begin by members introducing themselves. Mr. Polis will then introduce the Secretary. The Secretary will give a brief overview of activities being undertaken by the Department. Once she concludes, SEEC Members will be given the opportunity to ask questions. Members should indicate their intent to speak with a slight hand raise. Please look to Mr. Polis for recognition. Priority will be given to Members that are seated at the beginning of the meeting at 12:30pm.

Below you will find a biography of Secretary Jewell and background on some of the key issues facing the Department of the Interior (DOI).

### Other Business

There are three bills pending SEEC endorsement. We expect these bills to be endorsed by unanimous consent at an appropriate point in the meeting.

- H.R. 1971, Climate Solutions Act of 2015 introduced by Rep. Ted Lieu (CA-33)
- H.R. 2296, Job Creation through Energy Efficient Manufacturing Act introduced by Rep. Matt Cartwright (PA-17)
- H.R. 2132, Nonprofit Energy Efficiency Act introduced by Rep. Matt Cartwright (PA-17)

## Sally Jewell- Secretary of the Interior

Sally Jewell was sworn in as the 51st Secretary of the Interior on April 12, 2013.

In nominating Jewell, President Obama said, "She is an expert on the energy and climate issues that are going to shape our future. She is committed to building our nation-to-nation relationship with Indian Country. She knows the link between conservation and good jobs. She knows that there is no contradiction between being good stewards of the land and our economic progress; that in fact, those two things need to go hand in hand."

As Secretary of the Interior, Jewell leads an agency with more than 70,000 employees. Interior serves as steward for approximately 20 percent of the nation's lands, including national parks, national wildlife refuges, and other public lands; oversees the responsible development of conventional and renewable energy supplies on public lands and waters; is the largest supplier and manager of water in the 17 Western states; and upholds trust responsibilities to the 566 federally recognized American Indian tribes and Alaska Natives.

Prior to her confirmation, Jewell served in the private sector, most recently as President and Chief Executive Officer of Recreation Equipment, Inc. (REI). Jewell joined REI as Chief Operating Officer in 2000 and was named CEO in 2005. During her tenure, REI nearly tripled in business to \$2 billion and was consistently ranked one of the 100 best companies to work for by Fortune Magazine.

Before joining REI, Jewell spent 19 years as a commercial banker, first as an energy and natural resources expert and later working with a diverse array of businesses that drive our nation's economy. Trained as a petroleum engineer, Jewell started her career with Mobil Oil Corp. in the oil and gas fields of Oklahoma and the exploration and production office in Denver, Colo. where she was exposed to the remarkable diversity of our nation's oil and gas resources.

An avid outdoorswoman, Jewell finds time to explore her backyard in the Pacific Northwest where she enjoys skiing, kayaking, hiking and other activities. She has scaled Mount Rainier on seven occasions, and recently climbed Vinson Massif, the highest mountain in Antarctica.

Jewell has worked to ensure that public lands are accessible and relevant to all people from all backgrounds, and to build a connection between the great outdoors and a new generation of Americans.

Jewell is a graduate of the University of Washington. She and her husband, Warren, have two adult children, Peter and Anne.

## **Bureau of Land Management (BLM) Fracking Rule**

On March 20, 2015 the Department of Interior's Bureau of Land Management issued a [final rule](#) to regulate hydraulic fracturing on public and Indian lands. There are more than 100,000 oil and gas wells on federally managed lands, and it is estimated that over 90 percent use hydraulic fracturing. The rule covers three main areas: well-bore integrity, wastewater disposal and public disclosure of chemicals.

### Key components of the rule include:

- Validation of well integrity and strong cement barriers between the wellbore and water zones through which the wellbore passes;
- Requirements to publicly disclose chemicals used in hydraulic fracturing to the Bureau of Land Management through the website FracFocus, within 30 days of completing fracturing operations;
- Higher standards for interim storage (in closed tanks) of recovered waste fluids from hydraulic fracturing, however lined pit storage may still be approved by the BLM as part of a waste fluid disposal plan;
- Requirements to submit more detailed information on the geology, depth, and location of preexisting wells to the BLM, allowing the agency an opportunity to better evaluate and manage unique site characteristics.

Secretary Jewell [said of the rule](#): "This updated and strengthened rule provides a framework of safeguards and disclosure protocols that will allow for the continued responsible development of our federal oil and gas resources.

The American Petroleum Institute (API) [said of the rule](#): "A duplicative layer of new federal regulation is unnecessary, and we urge the BLM to work carefully with the states to minimize costs and delays created by the new rule to ensure that public lands can still be a source of job creation and economic growth."

SEEC issued a [statement](#) on the BLM rules in appreciation of the Secretary's effort to finalize the rules, but calling for stronger fracking regulations, including the reforms in the BREATHE Act, FRESHER Act, FRAC Act, CLEANER Act, and SHARED Act, which would close loopholes for fracking under the Clean Air Act, Clean Water Act, Safe Drinking Water Act, and the Solid Waste Disposal Act.

Several environmental groups were critical of the rule, stating that it could have been stronger (statements by [Sierra Club](#), [EarthJustice](#)).

Recently, Colorado and Wyoming have [challenged](#) the BLM rule in federal court, citing their state's own rules on fracking and claiming that the federal rules will harm their economies. Despite their initial criticism of the fracking rules six environmental groups—the Sierra Club, Earthworks, [The Wilderness Society](#), Conservation Colorado Education Fund, Southern Utah Wilderness Alliance and Western Resource Advocates—represented by [Earthjustice](#), have been working to defend the BLM rule in response to the states' legal challenges.

## **Public Lands Renewable Energy Development**

The Department of the Interior manages one-fifth of the nation's landmass and 1.7 billion acres offshore. Historically, these resources have been used for oil, gas, coal, and mineral development, as well as hydropower, but our public lands are increasingly being used for the deployment of clean, renewable energy like wind, solar, geothermal, and ocean-wave/current energy.

In February 2015 the [Desert Sunlight Solar Farm](#)—the nation's largest solar project on public lands—began operating at full capacity providing 550 megawatts of electricity to the grid, enough energy to power 160,000 average homes. The facility is estimated to displace 614,000 metric tons of carbon dioxide per year.

Desert Sunlight is the sixth solar project approved on public lands that is now operational. Nationwide, the BLM has [approved 55 utility-scale renewable energy projects](#) since 2009 — including 29 solar projects — with a total capacity of over 14,000 megawatts. If built as approved, these projects would provide an estimated 23,000 construction and operations jobs, power about five million homes, and attract private capital investments of approximately \$36.6 billion. Before 2009, there were no solar projects approved on public lands, although there were wind and geothermal.

Offshore, the Bureau of Ocean Energy Management (BOEM) has awarded [nine commercial wind energy leases](#) off the [Atlantic coast](#): two non-competitive leases (Cape Wind in Nantucket Sound off Massachusetts and an area off Delaware) and five competitive leases (two offshore Massachusetts-Rhode Island, two offshore Maryland, one offshore Virginia, and most recently two offshore Massachusetts). Together, the competitive lease sales have generated more than \$14.5 million in high bids for over 711,00 acres in federal waters. BOEM is expected to hold another competitive lease sale auction in New Jersey later this year.

## **Greenhouse Gas Emissions and Public Lands**

On March 17, 2015 Secretary Jewell speaking at the Center for Strategic and International Studies (SCIS) said, "We also need to do more to address the causes of climate change. Helping our nation cut carbon pollution should inform our decisions about where we develop, how we develop, and what we develop."

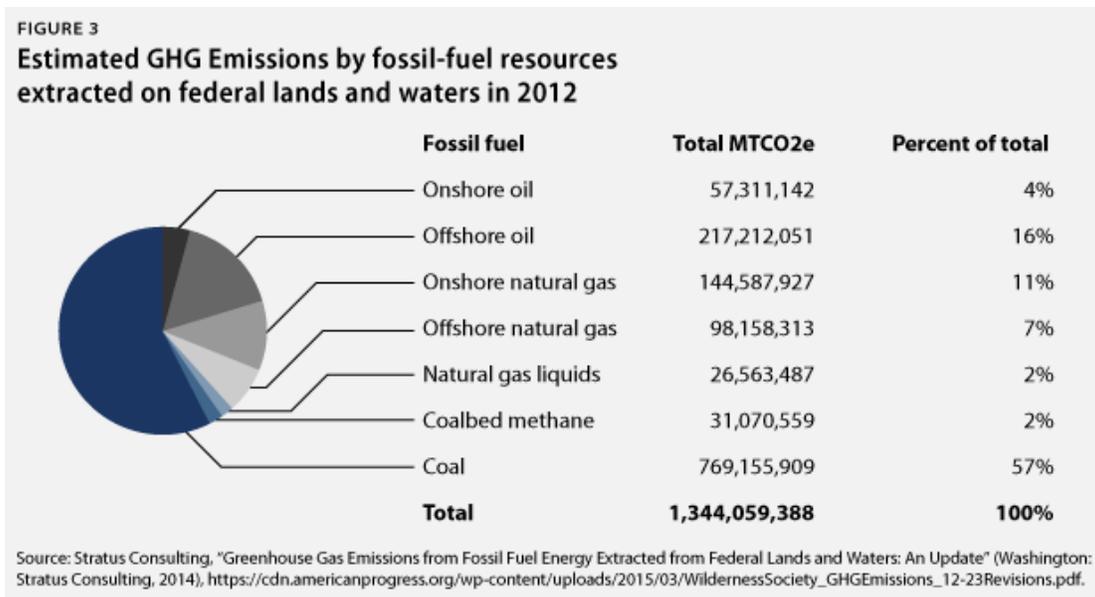

In the Administration's [Priority Agenda for Enhancing the Climate Resilience of America's Natural Resources](#), released in October 2014, the Administration recognizes the critical importance of America's lands and waters in climate policy. The priority agenda is aimed at making "the Nation's natural resources more resilient to a changing climate" and outlines actions to "foster climate-resilient lands and waters." The agenda prioritizes measuring and enhancing the ability of land and waters to absorb carbon dioxide and directs the U.S. Department of Agriculture (USDA), along with the EPA, the State Department, and DOI to "establish a robust capacity to provide projections of greenhouse gas emissions and carbon sequestration from agricultural lands, forests, and grasslands on a biennial basis."

Other actions related to public lands were also included as part of an [announcement](#) on building community resilience by strengthening America’s natural resources and supporting green infrastructure.

According to the first ever [carbon storage assessment](#) conducted by NPS and USGS , National Parks in the lower 48 states absorb 14.8 million metric tons of carbon dioxide (CO2) each year. Using the Social Cost of Carbon (SCC) the estimated ecosystem services economic value of carbon sequestration in our National Parks is \$582.5 million. The assessment was required under the Energy Independence and Security Act (EISA) of 2007.

Great Smoky Mountains National Park was found to sequester the largest amount of CO2, valued at nearly \$64.4 million in 2013. Notably, several desert environments ranked among the top twenty park units in terms of carbon sequestration value, including Mojave National Preserve, Joshua Tree National Park, and Death Valley National Park.

Although National Parks sequester a large amount of CO2, resource extraction on federal lands is a significant source of domestic greenhouse gas emissions. According to a March 2015 report by the Center for American Progress and The Wilderness Society, [Cutting Greenhouse Gas from Fossil-Fuel Extraction on Federal Lands and Waters](#), taxpayer-owned gas, oil, and coal extracted from federal lands and waters by private companies are one of the nation’s most significant sources of GHG emissions, accounting for more than one-fifth of all U.S. GHG emissions.

While the above numbers are expressed in metric ton CO2 equivalent (MTCO2e), methane emissions are particularly concerning because methane is a much more powerful GHG: Over a 100-year period, the effect of methane is 34 times greater per metric ton than that of carbon dioxide and even greater in the near term.

According to the EPA, 29 percent of all U.S. methane emissions come from natural gas and petroleum systems, and 10 percent come from coal mining in the United States.

In January 2015 the Administration announced steps under the Climate Action Plan to [cut methane emissions](#). BLM is currently in the [process](#) of proposing regulations to curtail the waste of natural gas resources through venting and flaring activities on public lands, with the goal of reducing methane emissions from the oil and gas sector by 40-45% of 2012 levels by 2025.

## **Royalties from Resource Extraction on Public Lands**

### Coal

A January 2015 [report from](#) the Center for American Progress looked at issues related to subsidies and loopholes in the Department of the Interior's coal program. Under the Mineral Leasing Act of 1920 and its amendments, coal companies are required to pay a royalty of at least 12.5 percent of the value of surface-mined coal and 8 percent for coal from underground mines.

The report had three primary findings:

1. **The assessment of royalties on the so-called "first arm's-length sale" price of coal instead of the true market value** are not reflective of the true value of coal, which in turn results in lower royalty returns to taxpayers. A 2012 Reuters investigation estimated that the loophole allowed companies to pocket at least an additional \$40 million on coal exports from Wyoming and Montana alone in 2011.
2. **The BLM provides royalty reductions for non-economically viable coal production or financial hardship.** As low as 2 percent of the sale price if a mine becomes unprofitable due to unfavorable conditions—such as limited access to coal or a decrease in its quality—or if a mining company can show it is facing financial hardship.
3. **Currently coal lessees can deduct transportation and washing costs with no cap on deductions from the total sale price upon which federal coal royalties are due.** This translates into an allowance for the full cost of transporting federal coal from the mine mouth to a remote point of sale or to transport the coal to a distant wash plant. Unlike coal, transportation deductions for oil and gas are capped at 50 percent of the value of the resource.

In December 2014 DOI [announced](#) draft proposed federal regulation by the Office of Natural Resources Revenue (ONRR) governing the valuation of federal oil and gas, and federal and American Indian coal resources, as well as expanded guidance on the production of coal on public lands issued by the Bureau of Land Management (BLM). Both initiatives seek to provide greater clarity and certainty for the energy industry and are part of the Department's larger effort to help ensure the American public receives every dollar due for domestic energy resources.

### Oil and Gas

A June 2015 [report](#) from the Institute for Policy Integrity looks at "How Modernizing the Department of the Interior's Fiscal Terms for Oil, Gas, and Coal Leases Can Ensure a Fair Return to the American Public." The report makes several suggestions for policy changes at DOI that would ensure a fair return to the public on oil and gas resources extracted from public lands:

- Raise minimum bids to account for option value, and evaluate methods to quantify option value for both offshore and onshore leasing.

- The option value of energy resources is the value of waiting for more information on energy prices and extraction risks before deciding whether and when to lease the public's energy resources to private companies
- Ensure that rental rates incorporate the environmental and social externalities associated with exploration and resource development.
- Increase royalty rates to reflect environmental and social costs that result from production.

In April, Secretary Jewell [announced](#) that the Bureau of Land Management (BLM) will open a public dialogue on potential changes to federal onshore oil and gas regulations as part of President Obama's strategy to support a balanced, prosperous energy future. The BLM is issuing an [Advance Notice of Proposed Rulemaking \(ANPR\)](#) to seek public comment on potential updates to BLM rules governing oil and gas royalty rates, rental payments, lease sale minimum bids, civil penalty caps and financial assurances.

### **Offshore Arctic Drilling**

On January 27, 2015, Secretary Jewell [announced](#) the [Draft Proposed Program \(DPP\)](#) for a 2017-2022 offshore program. The DPP includes eight planning areas—three in the Gulf of Mexico, two in the Atlantic, and three in Alaska—and nearly 80% of estimated undiscovered technically available oil and gas resources on the U.S. Outer Continental Shelf. The DPP schedules 14 potential lease sales in those areas for the 2017-2022 period in eight program areas—10 sales in the Gulf of Mexico, one in the Atlantic (which would cover portions of two planning areas) and three off the coast of Alaska.

In the Arctic, the Bureau of Safety and Environmental Enforcement (BSEE) and the Bureau of Ocean Energy Management (BOEM) have [released](#) proposed regulations in an attempt to improve the safety and reliability of exploratory drilling activities on the U.S. Arctic Outer Continental Shelf within the Beaufort Sea and Chukchi Sea Planning Areas.

The release of these proposed regulations preceded DOI's [Record of Decision affirming](#) Chukchi Sea OCS Oil and Gas Lease Sale 193 and the remaining oil and gas leases issued in 2008 as a result of the sale. This decision allows BOEM to begin formal review of a company's exploration plan for the Chukchi Sea. Shell is planning to drill in the Arctic this summer.

In April, five years after the Deepwater Horizon Gulf Oil Spill, DOI's Bureau of Safety and Environmental Enforcement (BSEE) [released](#) a proposed rule to help improve the safety of offshore oil and gas development. The proposed rule addresses the range of systems and equipment related to well control operations, including blowout preventers which were a critical point of failure in the Deepwater Horizon event. The rule also includes reforms in well design, well control, casing, cementing, real-time well monitoring and subsea containment.

## **Land and Water Conservation Fund (LWCF)**

The Land and Water Conservation Fund was established by Congress in 1964 to ensure access to outdoor recreation resources for present and future generations, and to provide money to federal, state and local governments to purchase land, water and wetlands for the benefit of all Americans. Over the course of the Fund's existence, it has reinvested a small portion of revenues from federal oil and gas leases on the Outer Continental Shelf in over 40,000 local conservation and outdoor recreation projects that protect our nation's land, water and wildlife heritage. Congress later expanded the use of the Fund to include the acquisition of Civil War battlefields and, more recently, Revolutionary War and War of 1812 battlefields.

Only once in the past 50 years has Congress appropriated Land and Water Conservation Fund funding at the full authorized level of \$900 million. The program is set to expire this year without action from Congress. President Obama has proposed to fully and permanently fund the program.

Resources Committee Ranking Member Grijalva (D-AZ) has introduced [H.R. 1814](#), a bill to permanently reauthorize the Land and Water Conservation Fund. As of June 9, 2015 the bill has 82 bipartisan cosponsors (10 Rs, 72 Ds).

Despite the bill's bipartisan support many Republicans, such as Resource Committee Chairman Rob Bishop (R-UT), have [argued](#) that the program should not be reauthorized without making significant reforms.

## **National Park Service Centennial Initiatives**

According to a recent [report released](#) by Secretary of the Interior Sally Jewell and National Park Service Director Jonathan B. Jarvis, a record number of visitors to national parks in 2014 translated into \$29.7 billion in economic activity that supported nearly 277,000 jobs across the country.

As the National Park Service Centennial in 2016 approaches, the Department of Interior has undertaken a number of initiatives to connect a broader audience to public lands, and expand visitation, especially among a younger, more diverse generation of Americans.

### Department of Interior Youth Initiative

Interior Secretary Sally Jewell first outlined her youth initiative in a [speech](#) at the National Press Club where she emphasized the need to bridge the growing disconnect between young people and the great outdoors.

The goals of Interior's youth initiative include:

- **Play** Interior will develop or enhance outdoor recreation partnerships in a total of 50 cities over four years to create new, systemic opportunities for outdoor play for more than 10 million young people.
- **Learn**: Provide educational opportunities to at least 10 million of the nation's K-12 student population annually. In addition to welcoming students into nature's classroom,

Interior is developing and strengthening new online education resources, to reach more students.

- **Serve:** Engage 1 million volunteers annually on public lands, effectively tripling the current volunteer numbers. Many more people are interested in volunteering at national parks, wildlife refuges and public lands, but there are often insufficient staff resources to coordinate them. In order to achieve the volunteer goal, a renewed emphasis will be placed on volunteer coordination and management.
- **Work:** To develop the next generation of lifelong conservation stewards and ensure our own skilled and diverse workforce pipeline, Interior will provide 100,000 work training opportunities to young people and veterans within our bureaus and through public-private partnerships. As part of this effort, the Department aims to raise an additional \$20 million from private and corporate donors to support youth work and training opportunities.

#### Every Kid in a Park Initiative

In February 2015 President Obama [launched](#) an "Every Kid in a Park" initiative that will provide all fourth grade students and their families with free admission to National Parks and other federal lands and waters for a full year.

#### Public Lands Volunteer Initiative

As part of the Interior Department's Youth Initiative to engage the next generation of outdoor stewards and inspire millions of young adults to play, learn, serve and work in the great outdoors, Secretary Jewell has launched a nationwide effort in [50 U.S. cities](#) to increase awareness, support and participation in outdoor programs. Public-private partnerships are key to this effort and American Express has [committed](#) \$5 million to help the Department reach its goal of one million volunteers on public lands annually.

#### 21st Century Conservation Service Corps (21CSC)

Inspired by President Franklin Delano Roosevelt's Civilian Conservation Corps of the 1930s, the [21st Century Conservation Service Corps](#) (21CSC) is a national collaborative effort to put America's youth and returning veterans to work protecting, restoring and enhancing America's public lands. The 21CSC builds on existing partnerships with youth conservation corps across the country to help young people—including diverse low-income, underserved and at-risk youth, as well as returning veterans—gain valuable training and work experience while accomplishing needed conservation and restoration work on public lands, waterways and cultural heritage sites. The 21CSC is a central component of the Department of the Interior's ambitious youth initiative to inspire millions of young people to play, learn, serve and work in the great outdoors.

#### Antiquities Act

The Antiquities Act was first exercised by President Theodore Roosevelt in 1906 to designate Devils Tower National Monument in Wyoming. Since then, 16 presidents have used this authority to protect unique natural and historic features in America, such as the Grand Canyon, the Statue of Liberty, and Colorado's Canyons of the Ancients.

President Obama has used the Antiquities Act to establish or expand 16 national monuments. Altogether, he has protected more than 260 million acres of public lands and waters — more than any other President — as well as preserved sites that help tell the story of significant people or extraordinary events in American history. Together, these monuments will help tell the story of significant events in American history and protect unique natural resources for the benefit of all Americans.

#### President Obama’s Antiquities Act Designations

- Honouliuli National Monument (Hawaii)
- Browns Canyon National Monument (Colorado)
- The Pullman National Monument (Illinois)
- San Gabriel Mountains National Monument (California)
- Remote Islands National Marine National Monument - expanded (SSW of Hawaii)
- Organ Mountains-Desert Peaks (New Mexico)
- California Coastal National Monument, Point Arena-Stornetta — expanded (California)
- San Juan Islands National Monument (Washington)
- Rio Grande del Norte National Monument (New Mexico)
- Harriet Tubman Underground Railroad National Monument (Maryland)
- First State National Monument (Delaware)
- Charles Young Buffalo Soldiers National Monument (Ohio)
- César E. Chávez National Monument (California)
- Chimney Rock National Monument (Colorado)
- Fort Ord National Monument (California)
- Fort Monroe National Monument (Virginia)

#### Pollinators

In June 2014 President Obama [released](#) a federal strategy to promote the health of honey bees and other pollinators.

The Department of Interior has a role on the Pollinator Health Task Force created under this strategy. The Department of the Interior also has a role in developing best management practices for executive departments and agencies to enhance pollinator habitat on Federal lands; establishing a reserve of native seed mixes, including pollinator-friendly plants, for use on post-fire rehabilitation projects and other restoration activities; and assisting States and State wildlife organizations, as appropriate, in identifying and implementing projects to conserve pollinators at risk of endangerment and further pollinator conservation through the revision and implementation of individual State Wildlife Action Plans.

## Endangered Species Act (ESA)

← This is a Sage Grouse

This is where it lives →

For the last several years the Endangered Species Act has been under direct attack by House Republicans. Opponents of the law claim that the ESA has failed to conserve species, that listing decisions lack appropriate data and transparency, and that the law is being primarily used as a tool for litigation negatively affecting recovery efforts and other economic activities. A primary claim against the law is that less than 2% of species listed under the act have been delisted. However, proponents of the law respond by saying that less than 1% of listed species have gone extinct.

The impending listing decision of one specific species—the sage grouse—has been the topic of much criticism and debate. The Fish and Wildlife Service is under court order to make a listing determination for the greater sage-grouse by September 30, 2015.

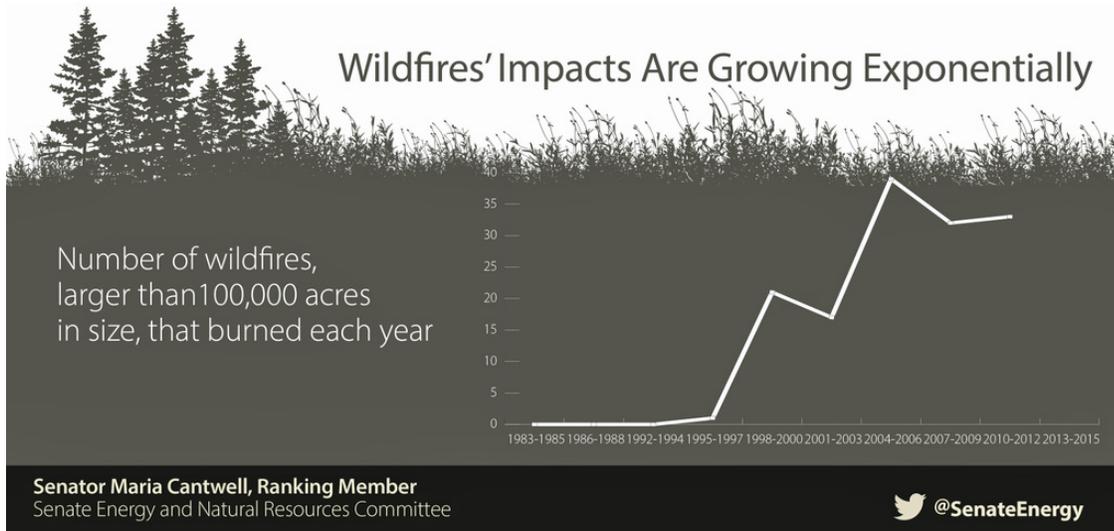

The sage grouse range includes sagebrush landscapes across 10 western states. This habitat is under threat from rangeland fire, invasive plants, development and habitat fragmentation. Because of the potential effect that an Endangered Species Act listing would have on land management decisions across such a broad range, many parties have undertaken [conservation efforts](#) with the goal of avoiding an ESA listing for the sage grouse.

In the last several months DOI has released a [strategy](#) to protect and restore sagebrush lands threatened by fire; final environmental reviews for [land use plans](#) that aim to conserve greater sage-grouse habitat and support sustainable economic development across their range; and [proposed actions](#) to better engage the states, promote the use of the best available science and transparency in the scientific process, incentivize voluntary conservation efforts, and focus resources in ways that will generate even more successes under the ESA.

The recently House-passed National Defense Authorization Act (NDAA) included a sage grouse rider that would prohibit an ESA listing of the species. On the Floor the bill also picked up an ESA rider related to the lesser prairie chicken and burying beetle.

## **Wildfires**

Ongoing drought and the effects of climate change have combined to increase the risk of wildfires across Western landscapes. In May, Secretary Jewell released [a comprehensive, science-based strategy](#) to address the increasing threat of wildfires that are damaging vital sagebrush landscapes and productive rangelands in the West. In addition, the President's fiscal year 2016 budget proposes a special disaster relief cap adjustment to fund the most severe fires and treat extreme fire seasons like other natural disasters.

An April 2014 [report](#), released by House Natural Resources Committee Democrats, shows that deep budget cuts have hindered efforts by the U.S. Forest Service (Service) and the Department of Interior (DOI) to fight catastrophic wildfires. The report found that fire suppression funding for the Service was slashed nearly in half over the last few years, from \$1.4 billion in FY2010 to \$850 million in FY2012. These cuts have forced the Service and DOI to "borrow" or transfer funds, from other fire prevention and restoration programs to respond to the extreme wildfires of recent years and fill shortfalls in suppression funding.

Several bills have been introduced in the 114<sup>th</sup> Congress to address the shortage of available funding to respond to wildfires:

- Rep. Ruiz (D-CA) has introduced the [Wildfire Prevention Act](#), which would amend the Stafford Act to authorize the President to provide: (1) hazard mitigation assistance in any area affected by a fire for which t assistance was provided, whether or not a major disaster had been declared; and (2) fire management assistance in any area affected by a fire for which hazard mitigation assistance was provided.
- Rep. Simpson (R-ID) has introduced [Wildfire Disaster Funding Act](#), which would require specified adjustments to discretionary spending limits in FY2015-FY2022 to accommodate appropriations for wildfire suppression operations in the Wildland Fire Management accounts at the Department of Agriculture (USDA) or the Department of the Interior.

## **California Drought**

On February 6, 2015, Secretary Jewell [announced](#) that the Bureau of Reclamation was making \$50 million in funds available immediately for drought relief projects throughout the West □ including:

- \$19.9 million for California's Central Valley Project.
  - This includes: \$5.37 million for Delta needs, including drought monitoring for endangered species and mechanisms to increase flexibility in water operations; \$2.38 million for the Friant-Kern Canal Reverse Flow Pumping Project to bank groundwater for the southern portion of the Friant Division; \$3.65 million for Water and Power Operations to facilitate water transfers in the summer months; \$1 million to continue the Battle Creek habitat conservation work; \$1.5 million to support the Livingston Stone Hatchery; and \$6 million for refuges, including acquisition, conveyance and diversification of water supplies.
- \$9 million for WaterSMART and Title XVI Water Reclamation and Reuse Program grants. The competitive grants programs support water conservation initiatives and technological breakthroughs that promote water reuse, recycling and conservation in partnership with states, tribes and other partners.
- \$5 million for Drought Response and Comprehensive Drought Plans. This new program is helping states, tribes and local governments prepare for and address drought in advance of a crisis with 50/50 percent federal/non-federal funding.
- \$8.6 million for the Lower Colorado River Basin Drought Response Action Plan. Funding will be used to generate up to 10,000 acre-feet of water annually in the Colorado River system storage.

In April 2015 the State of California and DOI [announced](#) a plan to accelerate restoration of the Sacramento San Joaquin Delta's ecosystem and fix the state's aging water infrastructure.

In May 2015 Interior provided [further information](#) on how this funding would be used.

**Subject:** Fracking RULE Talking Points  
**Date:** Thursday, June 11, 2015 7:10:05 PM

---

Bill – I'm looking for some talking points on the new fracking rule. Opponents suggest that states should have primacy and that if they have adequate regulations, a federal standard is not necessary. I'd like to know if the Department has talking points available that explain why a universal federal standard is appropriate.

**From:** Sarri, Kristen (Kris)  
**To:** [Rachael Taylor \(Appropriations\)](#)  
**Subject:** Energy  
**Date:** Thursday, June 11, 2015 9:16:59 PM

---

Here is info on energy rules, note that not all information public. Let me know what you need and I will do more digging.

### Onshore Energy

- BLM's final hydraulic fracturing rule – done, becomes effective June 24, litigation pending
  - The rule is one aspect of DOI's overall efforts to modernize our onshore regulator
  - Current regulations governing HF are over 30 years old and do not reflect modern technology
  - Final rule focuses on ensuring well integrity, improving public disclosure about fracturing fluids, and improving water management on public lands
- BLM draft venting and flaring rule – currently under development at BLM
  - Draft rule aimed at preventing waste of produced gas and modernizing requirements regarding venting and flaring
  - IG and GAO have identified waste as high risk issue for BLM to address to ensure fair return to the taxpayer
  - Rule is also part of the Interagency Methane Strategy under the Climate Action Plan
- BLM draft rules regarding various O&G measurement and royalty issues
  - 3 proposed rules regarding measurement and site security issues, referred to as Onshore Orders 3,4,5 – each meant to ensure proper measurement and accounting of O&G produced from federal leases
  - 1 Advance Notice of Proposed Rulemaking seeking public comment on the appropriate royalty rates for oil and gas produced from public lands; issued in April
- OSMRE draft stream protection rule – currently under review at OIRA
  - Draft rule would improve the balance between environmental protection and the Nation's need for coal by better protecting streams from the adverse impacts of surface coal mining operations
- NPS rulemaking regarding O&G operations on their respective lands
  - NPS draft rule would update and improve current requirements for O&G operations on NPS land to account for new technology and industry practices, eliminate regulatory exemptions, update new legal requirements, remove caps on bond amounts, and allow NPS to recover compliance costs associated with administering the regulations

### Offshore Energy

- BSEE draft offshore well integrity and BOP rule – released in April

- Draft rule would upgrade regulations related to the design, manufacture, and repair of blowout preventers (BOPs) as well as address well design, well control, safe drilling margins, casing, cementing, real-time monitoring, and subsea containment
  - Aimed at addressing many of the issues raised following the Deepwater Horizon incident and has been developed with extensive stakeholder collaboration
- BOEM updates to the air quality program - draft rule currently under development at BOEM
  - Proposed rule will more closely link DOI's emission control requirements to EPA's current and future emission control standards

---

We could definitely use more on fracking – I'm nervous about seeing some energy related stuff --

Why you need new Federal standards when states are regulating, what protections are being lost by letting state laws have primacy.

Is there a particular issue related to disclosure?

What arguments are plaintiffs making?

Also on venting and flaring do you have any Q&A's on the taxpayer-return issue, and data on environmental impacts of status quo?

DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND  
RELATED AGENCIES APPROPRIATIONS BILL, 2016

, 2015.—Committed to the Committee of the Whole House on the State of the Union  
and ordered to be printed

Mr. CALVERT, from the Committee on Appropriations,  
submitted the following

R E P O R T

[To accompany H.R.     ]

The Committee on Appropriations submits the following report in explanation of the accompanying bill making appropriations for the Department of the Interior, the Environmental Protection Agency, and Related Agencies for the fiscal year ending September 30, 2016. The bill provides regular annual appropriations for the Department of the Interior (except the Bureau of Reclamation and the Central Utah Project), the Environmental Protection Agency, and for other related agencies, including the Forest Service, the Indian Health Service, the Smithsonian Institution, and the National Foundation on the Arts and the Humanities.

INDEX TO BILL AND REPORT

Title IV—General Provisions:	109	87

## INTRODUCTION

The Department of the Interior, Environment, and Related Agencies Appropriations bill for fiscal year 2016 totals \$30,170,000,000. This amount reflects a \$246,000,000 reduction from the amount appropriated in fiscal year 2015 and a \$3,092,409,000 reduction from the budget request.

The amounts in the accompanying bill are reflected by title in the table below.

## BUDGET AUTHORITY RECOMMENDED IN BILL BY TITLE

Activity	Budget estimates, fiscal year 2016	Committee bill, fiscal year 2016	Committee bill compared with bud- get estimates
Title I, Department of the Interior: New budget authority .....	\$12,024,515,000	\$11,369,207,000	\$655,308,000
Title II, Environmental Protection Agency: New budget authority .....	\$8,591,718,000	\$7,422,157,000	\$1,169,561,000
Title III, Related Agencies: New budget authority .....	\$12,646,176,000	\$11,378,636,000	\$1,267,540,000
Title IV, General Provisions: New budget authority .....	\$0	\$0	\$0
Grand total, New budget authority .....	\$33,262,409,000	\$30,170,000,000	\$3,092,409,000

## COMMITTEE OVERSIGHT

Members of Congress have provided considerable input in fashioning this bill. In total, 304 Members submitted nearly 3,500 programmatic requests relating to multiple agencies and programs.

The Interior, Environment, and Related Agencies Subcommittee takes seriously its oversight responsibility and conducted 14 budget hearings this year (including six hearings involving public witnesses and American Indians and Alaska Natives) to carefully review the programs and budgets under its jurisdiction. The Subcommittee held the following oversight hearings:

Indian Health Service FY16 budget oversight hearing—February 11, 2015

Department of the Interior FY16 budget oversight hearing—February 25, 2015

Environmental Protection Agency FY16 budget oversight hearing—February 26, 2015

Bureau of Indian Affairs/Bureau of Indian Education FY16 budget oversight hearing—February 27, 2015

U.S. Forest Service FY16 budget oversight hearing—March 3, 2015

Fish and Wildlife Service FY16 budget oversight hearing—March 17, 2015

National Park Service FY16 budget oversight hearing—March 17, 2015

Public Witnesses—March 18, 2015 (morning)

Public Witnesses—March 18, 2015 (afternoon)

Bureau of Land Management FY16 budget oversight hearing—March 19, 2015

American Indian/Alaska Native Public Witnesses—March 24, 2015 (morning)

American Indian/Alaska Native Public Witnesses—March 24, 2015 (afternoon)

American Indian/Alaska Native Public Witnesses—March 25, 2015 (morning)

American Indian/Alaska Native Public Witnesses—March 25, 2015 (afternoon)

In total, 142 individuals representing the Executive Branch, Congress, State, tribal, and local governments, and the general public testified before the Subcommittee. In addition to those who testi-

fied personally, another 123 individuals and organizations provided written testimony for the permanent hearing record. These hearings are contained in eight published volumes totaling almost 9,000 pages which are publicly available online.

#### COST OF WILDLAND FIRE

In seven of the last ten years, the Forest Service and the Department of the Interior have exceeded their wildland fire suppression budgets despite being fully funded at the ten-year suppression average for such costs. Fire seasons have grown longer and more destructive, putting people, communities, and ecosystems at greater risk. Fire borrowing has now become routine rather than extraordinary. Borrowing from non-fire accounts to pay suppression costs results in the Forest Service and Department of the Interior having fewer resources available for forest management activities, including hazardous fuels management and other proven efforts, to improve overall forest health and reduce the risk of catastrophic wildland fires.

The Committee maintains that the most catastrophic wildland fires should be treated similar to other major natural disasters such as floods and hurricanes and funded through the disaster cap adjustment established by the Budget Control Act of 2011 (P.L. 112–25). This common sense reform would allow for a more responsible and stable way to budget for wildland fire costs.

As Congress continues to debate the best approach for fire budgeting, the Committee has provided robust wildland fire funding in its fiscal year 2016 bill. The bill includes a total of \$3,584,873,000 in wildland fire funding for the Department of the Interior and the Forest Service, \$51,736,000 above the fiscal year 2015 enacted level. Fire suppression accounts (including FLAME) are again fully funded at the ten-year average level. Hazardous fuels funding, a critical component of an effective overall fire strategy, is maintained at the fiscal year 2015 enacted level of \$525,749,000.

#### PAYMENTS IN LIEU OF TAXES (PILT)

The Payments in Lieu of Taxes (PILT) program provides compensation to local governments for the loss of tax revenue resulting from the presence of Federal land in their county or State. In 2015, 49 States, the District of Columbia, Guam, the Commonwealth of Puerto Rico, and the U.S. Virgin Islands will receive PILT payments. The Committee includes bill language providing full PILT funding for fiscal year 2016.

#### WESTERN DROUGHT

The U.S. Drought Monitor confirms that a population of nearly 55 million in the Western United States is currently affected by drought conditions, with significant portions of the States suffering from severe to exceptional drought. California has entered a fourth consecutive year of drought.

Drought conditions are difficult to address at the time the drought is occurring. A declining water supply puts pressure on regulators and competition between human and environmental uses of water is likely to intensify. However, there are steps that can be taken to stretch available water supplies.

Given that drought heightens conflicts over water allocations, the Committee directs the Department of the Interior to use all of the flexibility and tools available to mitigate the impacts of this drought. The Committee notes that reduced water flows during times of drought are not the sole source of ecosystem stress, and believes that environmental water use can be made more effective through adopting new approaches to management. It is not possible to undo all the ecological changes that have occurred over decades of human water and land use. Strategies need to adapt to changing conditions in ways that benefit ecosystems as well as local economies.

#### RECREATION FEE AUTHORITY

Enacted in 2004, the Federal Land Recreation Enhancement Act (FLREA) authorized five agencies to collect and expend recreation fees on land they manage: the Department of the Interior's Bureau of Land Management, Bureau of Reclamation, National Park Service, and U.S. Fish and Wildlife Service, and the U.S. Department of Agriculture's Forest Service. These fees, which leverage other funding sources and complement appropriated funds, fund projects that directly benefit the visitor experience.

The authority for FLREA is scheduled to sunset at the end of the current fiscal year. This expiration would impact the Department of the Interior's estimated annual collection of \$217 million, of which the National Park Service collects nearly \$192 million. In 2014, the recreation fee program collected nearly \$279 million from the Forest Service and the Department of the Interior combined. An extension of recreation fee authority is necessary for land managers to plan for upcoming seasons including selling annual passes, hiring seasonal employees, planning projects, organizing volunteers, and accepting reservations. The Committee has included within Title IV General Provisions a one-year extension of the current recreation fee authority as requested.

#### COST OF LITIGATION

The Committee remains concerned that many of the legitimate goals of the Forest Service, the Department of the Interior, and other agencies under the Committee's jurisdiction—as well as the work of this Committee—are undermined by litigation filed in an effort to shift land management decisions from the agencies to the courts, regardless of merit.

Litigation is a significant unbudgeted cost for all agencies. The Committee is concerned that, as budgets shrink, agencies are forced to settle lawsuits quickly because they don't have funds available to complete court-imposed work. In addition, the courts are not concerned whether agencies have funding necessary to meet court mandates. As a result, the courts are playing an increasing role in determining how and where agencies use their funding.

Given ongoing concerns, the Department of the Interior, EPA, and the Forest Service are directed to provide to the House and Senate Committees on Appropriations, and to make publicly available not later than 60 days after enactment of this Act, detailed Equal Access to Justice Act fee information as specified in the Consolidated and Further Appropriations Act, 2015.

## STATE WILDLIFE DATA

The Committee is concerned that the Department of the Interior, its bureaus, and the Forest Service are not maximizing the opportunity to save funds and leverage States' on-the-ground wildlife expertise. State wildlife agencies often have the best available science on species and retain primary jurisdiction over most wildlife on Federal, State, and private lands. The Federal government should recognize and fully utilize State resources, including scientific information about species population numbers, conservation status, and habitat availability, among other data. The Committee directs Federal agencies to cooperatively engage with State wildlife agencies and to use State fish and wildlife data and analyses as a primary source to inform Federal land use, land planning, and related natural resource decisions. The agencies should not duplicate analysis of raw data previously prepared by the States. Federal agencies should also provide their data to State wildlife managers to ensure that the most complete data is available to be incorporated into all decision support systems.

## REPROGRAMMING GUIDELINES

The following are the procedures governing reprogramming actions for programs and activities funded in the Department of the Interior, Environment, and Related Agencies Appropriations Act. The Committee reminds the agencies funded in this Act that these reprogramming guidelines are in effect, and must be complied with, until such time as the Committee modifies them through bill or report language.

*Definitions.*—"Reprogramming," as defined in these procedures, includes the reallocation of funds from one budget activity, budget line item or program area, to another within any appropriation funded in this Act.

For construction, land acquisition, and forest legacy accounts, a reprogramming constitutes the reallocation of funds, including unobligated balances, from one construction, land acquisition, or forest legacy project to another such project.

A reprogramming shall also consist of any significant departure from the program described in the agency's budget justifications. This includes proposed reorganizations, especially those of significant national or regional importance, even without a change in funding. Any change to the organization table presented in the budget justification shall be subject to this requirement.

*General Guidelines for Reprogramming.*—

(a) A reprogramming should be made only when an unforeseen situation arises, and then only if postponement of the project or the activity until the next appropriation year would result in actual loss or damage.

(b) Any project or activity, which may be deferred through reprogramming, shall not later be accomplished by means of further reprogramming, but instead, funds should again be sought for the deferred project or activity through the regular appropriations process.

(c) Except under the most urgent situations, reprogramming should not be employed to initiate new programs or increase alloca-

tions specifically denied or limited by Congress, or to decrease allocations specifically increased by the Congress.

(d) Reprogramming proposals submitted to the House and Senate Committees on Appropriations for approval shall be considered approved 30 calendar days after receipt if the Committees have posed no objection. However, agencies will be expected to extend the approval deadline if specifically requested by either Committee.

*Criteria and Exceptions.*—A reprogramming must be submitted to the Committees in writing prior to implementation if it exceeds \$1,000,000 annually or results in an increase or decrease of more than 10 percent annually in affected programs, with the following exceptions:

(a) With regard to the tribal priority allocations of the Bureau of Indian Affairs and Bureau of Indian Education, there is no restriction on reprogrammings among these programs. However, the Bureaus shall report on all reprogrammings made during a given fiscal year no later than 60 days after the end of the fiscal year.

(b) With regard to the EPA, State and Tribal Assistance Grants account, the Committee does not require reprogramming requests associated with States and Tribes Partnership Grants.

*Assessments.*—“Assessment” as defined in these procedures shall refer to any charges, reserves, or holdbacks applied to a budget activity or budget line item for costs associated with general agency administrative costs, overhead costs, working capital expenses, or contingencies.

(a) No assessment shall be levied against any program, budget activity, subactivity, budget line item, or project funded by the Interior, Environment, and Related Agencies Appropriations Act unless such assessment and the basis therefor are presented to the Committees on Appropriations in the budget justifications and are subsequently approved by the Committees. The explanation for any assessment in the budget justification shall show the amount of the assessment, the activities assessed, and the purpose of the funds.

(b) Proposed changes to estimated assessments, as such estimates were presented in annual budget justifications, shall be submitted through the reprogramming process and shall be subject to the same dollar and reporting criteria as any other reprogramming.

(c) The Committee directs that each agency or bureau which utilizes assessments shall submit an annual report to the Committees which provides details on the use of all funds assessed from any other budget activity, line item, subactivity, or project.

(d) In no case shall contingency funds or assessments be used to finance projects and activities disapproved or limited by Congress, or to finance programs or activities that could be foreseen and included in the normal budget review process.

(e) New programs requested in the budget should not be initiated before enactment of the bill without notification to, and the approval of, the Committees on Appropriations. This restriction applies to all such actions regardless of whether a formal reprogramming of funds is required to begin the program.

*Quarterly Reports.*—All reprogrammings between budget activities, budget line items, program areas, or the more detailed activity levels shown in this agreement, including those below the monetary thresholds established above, shall be reported to the Committees within 60 days of the end of each quarter and shall include

cumulative totals for each budget activity, budget line item, or construction, land acquisition, or forest legacy project.

*Land Acquisitions, Easements, and Forest Legacy.*—Lands shall not be acquired for more than the approved appraised value (as addressed in section 301(3) of Public Law 91–646), unless such acquisitions are submitted to the Committees on Appropriations for approval in compliance with these procedures.

*Land Exchanges.*—Land exchanges, wherein the estimated value of the Federal lands to be exchanged is greater than \$1,000,000, shall not be consummated until the Committees have had a 30-day period in which to examine the proposed exchange. In addition, the Committees shall be provided advance notification of exchanges valued between \$500,000 and \$1,000,000.

*Budget Structure.*—The budget activity or line item structure for any agency appropriation account shall not be altered without advance approval of the House and Senate Committees on Appropriations.

## TITLE I—DEPARTMENT OF THE INTERIOR

### BUREAU OF LAND MANAGEMENT

#### MANAGEMENT OF LANDS AND RESOURCES

Appropriation enacted, 2015 .....	\$970,016,000
Budget estimate, 2016 .....	1,067,466,000
Recommended, 2016 .....	1,015,046,000
Comparison:	
Appropriation, 2015 .....	+45,030,000
Budget estimate, 2016 .....	–52,420,000

The Committee recommends \$1,015,046,000 for Management of Lands and Resources, \$45,030,000 above the fiscal year 2015 enacted level and \$52,420,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report. The Committee recommendation includes further details below. The Committee does not accept the proposal to transfer funds from various accounts to National Conservation Lands.

*Soil, Water, and Air Management.*—The Committee recommends \$43,239,000 for soil, water, and air management, equal to the fiscal year 2015 enacted level and \$3,516,000 below the budget request. The Colorado River Basin Salinity Program is funded at \$1,500,000. The Committee urges the Bureau to provide additional information, such as a table, in its fiscal year 2017 budget request for this program.

*Rangeland Management.*—The Committee recommends \$79,000,000 for rangeland management, equal to the fiscal year 2015 enacted level and \$2,556,000 above the budget request. The Committee directs the Bureau to focus on reducing the grazing permit backlog and carrying out a systematic program of range monitoring, land health assessments, development and implementation of allotment management plans, and adaptive management. The Committee rejects the Bureau’s proposal to impose new grazing fees.

*Wild Horse and Burro Management.*—The Committee recommends \$77,245,000 to implement Public Law 92–195 (16 U.S.C. 1331 et seq.) requiring the protection, management, and control of

free-roaming horses and burros on public lands, equal to the fiscal year 2015 enacted level and \$3,310,000 below the budget request.

Within this amount, the Committee recommends \$1,000,000 to continue to study and test the feasibility of implementing a scientifically sound and humane sterilization program in partnership with universities and non-profit organizations. The Committee supports continued research to develop and refine a variety of fertility-control methods, including immunocontraceptives, which allow for self-sustaining populations of wild horses and burros while maintaining the genetic viability of the protected herds.

The Committee also remains concerned about the large number of horses that are held in long-term holding. Given the increasing costs of operating the program, the Committee encourages BLM to increase the development and use of population control measures and to begin implementation of the recommendations of the National Academy of Sciences regarding the use of currently available fertility control methods while research continues.

The bill continues a prohibition on funds to implement Section 1333(b)(2)(C) of Title 16, United States Code, requiring the humane destruction of excess animals that are not adopted. The bill also continues a general provision within Title I allowing the BLM to enter into long-term contracts and agreements for holding facilities off the range.

*Wildlife and Fisheries.*—The Committee recommends \$101,911,000 for wildlife and fisheries, \$37,043,000 above the fiscal year 2015 enacted level and \$155,000 below the budget request. Within the total provided, the Committee recommends \$89,381,000 for wildlife management. The additional \$37,043,000 is intended for BLM to implement the sage-grouse conservation plans. The Committee recommends \$12,530,000 for fisheries management.

*Plant Conservation Program.*—The Committee recognizes the Bureau's efforts to develop a National Seed Strategy in collaboration with other Federal agencies, States, industry, and partners and encourages BLM to actively implement the plan. Funding for plant conservation activities is provided through a number of accounts. The Committee requests that the Bureau provide a recommendation in its fiscal year 2017 budget request regarding the proposal to consolidate plant conservation program activities under a single budget subactivity.

The Committee continues to be concerned that the Bureau's policy of using highly localized genetic varieties of native seeds may be unnecessarily limiting, driving up procurement costs, and causing delays in re-seeding areas burned by fire. The Bureau is directed to publish its yearly estimated seed needs by variety to be more transparent with the science supporting its policy. The Committee requests additional information on its relationship with the U.S. Department of Agriculture's Plant Material Centers and efforts to avoid duplicative expenses and efforts.

*Recreation Management.*—The Committee recommends \$66,961,000 for recreation management, equal to the fiscal year 2015 enacted level and \$8,449,000 below the budget request. The bill includes a general provision in Title IV prohibiting the use of funds to close areas open to recreational hunting and shooting as of January 1, 2013.

The Committee is concerned about the BLM's potential development or expansion of new public lands along a portion of the Red River between Texas and Oklahoma that are the subject of a long-standing boundary dispute. The Committee directs the Secretary to consult with the States and Congress before taking any further action.

*Energy and Minerals.*—The Committee recommends \$143,551,000 for energy and minerals, equal to the fiscal year 2015 enacted level and \$24,652,000 above the budget request. The Committee does not accept the proposal to increase onshore inspection fees.

The Committee is aware that Applications for Permits to Drill (APD) fee collections will transition from discretionary funding to mandatory funding. In prior years, APD fees were appropriated and available for expenditure in advance of collections. However, beginning in fiscal year 2016, BLM can access the fees only as they are collected. The reliance on realized collections may result in a shortfall in funding early in the fiscal year, particularly in the first year of the transition. The Committee believes this transition can be appropriately accommodated given the flexibility to use base appropriated funding in the Oil and Gas Management program for APD permitting program operations. The Committee does not support the proposal to establish a new budget line for these activities and instead provides sufficient funding within Oil and Gas Management to maintain the current level of APD program support. The Committee believes continuation of the current budget structure, sufficient appropriated funding for processing activities, and the ability to reprogram funds as needed, will enable the BLM to cover operating costs in early fiscal year 2016.

*Resource Protection and Maintenance.*—The Committee recommends \$104,049,000 for resource protection and maintenance, \$8,000,000 above the fiscal year 2015 enacted level and \$16,519,000 below the budget request.

*Resource Management Planning.*—The Committee recommends \$46,125,000 for resource management planning, \$8,000,000 above the fiscal year 2015 enacted level and \$13,216,000 below the budget request. Included is \$8,000,000 for monitoring in support of the greater sage-grouse conservation initiative. The Committee reminds the Bureau not to duplicate existing efforts at the U.S. Geological Survey and in the private sector.

*Law Enforcement.*—The Committee recommends \$25,325,000 for law enforcement, equal to the fiscal year 2015 enacted level and \$170,000 below the budget request. The Bureau is directed to focus on visitor safety and archaeological resource protection, and to defer to the Department of Justice and the Department of Homeland Security for investigative and other non-emergency matters of Federal law not unique to Bureau lands or property.

*Challenge Cost Share.*—The Committee recommends \$2,400,000 for the challenge cost share program, \$13,000 below the fiscal year 2015 enacted level and \$10,016,000 below the budget request. Of the funds provided, \$300,000 is for long-standing outdoor ethics education and stewardship programs designed to help keep America's public lands healthy, open and accessible for opportunities to enjoy responsible outdoor recreation, especially high-impact activities such as recreational shooting and off-highway vehicle use.

*National Landscape Conservation System.*—The Committee recommends \$31,819,000 for the national landscape conservation system, equal to the fiscal year 2015 enacted level and \$16,651,000 below the budget request. The bill includes a general provision in Title I prohibiting the use of funds to implement Secretarial Order Number 3310 pertaining to wild lands.

*State Office Consolidation.*—The Committee directs the Bureau not to consolidate the Arizona and New Mexico State offices and reminds the Bureau that office consolidation proposals are subject to the Committee’s reprogramming requirements.

*Sage-grouse Conservation.*—Over the past three years, Congress, the Departments of the Interior and Agriculture, 11 western States, and other partners have undertaken a major, collaborative effort to prevent a listing of the sage-grouse as endangered under the Endangered Species Act. As part of that process, the Bureau of Land Management (BLM) and U.S. Forest Service (USFS) recently released their proposed resource management plans to protect the sage-grouse and the sage-brush ecosystem. The Committee is aware some States have serious concerns with the plans, and that BLM and USFS appear to have disregarded some of the recommendations the States provided. These include concerns about transparency and consultation with the public, the rationale for limiting certain activities while fire and invasive species cause greater harm to the sage-grouse, lack of fairness in balancing livestock grazing with the management of wild horses and burros, and unexplained changes between the draft and final management plans. In order for the sage-grouse, communities, and States to thrive, all partners must work in good faith. As such, the Committee directs BLM and USFS to closely work with each of the 11 States and the affected communities to address the issues unique to each State and seek to collaboratively resolve all issues. In addition, the Committee directs BLM and USFS to report to the Committees on Appropriations of the House and Senate on each concern raised by a State and the resolution thereof within 30 days after the comment period closes on the proposed resource management plans. The Committee will continue to monitor the Administration’s actions regarding the sage-grouse, especially the discussions between the States and BLM and USFS, and will provide additional direction as needed.

LAND ACQUISITION

Appropriation enacted, 2015 .....	\$19,746,000
Budget estimate, 2016 .....	38,000,000
Recommended, 2016 .....	7,250,000
Comparison:	
Appropriation, 2015 .....	– 12,496,000
Budget estimate, 2016 .....	– 30,750,000

The Committee recommends \$7,250,000 for Land Acquisition, \$12,496,000 below the fiscal year 2015 enacted level and \$30,750,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report. The Committee recommendation includes further details below.

The recommendation includes \$2,500,000 for land acquisition projects included in the fiscal year 2016 budget request. The Bureau is directed to re-prioritize its project list as necessary to focus

on acquisitions where opportunities for recreation, and local, State, and congressional support, are strongest.

Consistent with other land acquisition accounts funded by this appropriation, the recommendation includes \$2,000,000 for acquisitions that improve access to existing Federal public lands via road, river, or trail for hunting, fishing, and other public recreation, as authorized by law or regulation.

The recommendation includes \$1,000,000 for inholdings and other acquisitions considered by the Bureau to be emergencies or hardships. The Bureau is directed to notify the Committee of any land acquired with these funds. The Committee defines “inholding” as non-Federal land within designated management areas and bordered by not less than 51 percent of Federal public land.

OREGON AND CALIFORNIA GRANT LANDS

Appropriation enacted, 2015 .....	\$113,777,000
Budget estimate, 2016 .....	107,734,000
Recommended, 2016 .....	110,602,000
Comparison:	
Appropriation, 2015 .....	-3,175,000
Budget estimate, 2016 .....	+2,868,000

The Committee recommends \$110,602,000 for the Oregon and California grant lands, \$3,175,000 below the fiscal year 2015 enacted level and \$2,868,000 above the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report.

RANGE IMPROVEMENTS

The Committee recommends an indefinite appropriation of not less than \$10,000,000 to be derived from public lands receipts and Bankhead-Jones Farm Tenant Act lands grazing receipts, as requested.

SERVICE CHARGES, DEPOSITS, AND FORFEITURES

The Committee recommends an indefinite appropriation estimated to be \$31,050,000 for Service Charges, Deposits, and Forfeitures, as requested.

MISCELLANEOUS TRUST FUNDS

The Committee recommends an indefinite appropriation estimated to be \$24,000,000, as requested for Miscellaneous Trust Funds.

ADMINISTRATIVE PROVISIONS, BUREAU OF LAND MANAGEMENT

The Committee recommendation includes the requested Administrative Provisions.

UNITED STATES FISH AND WILDLIFE SERVICE

The mission of the U.S. Fish and Wildlife Service (Service) is to conserve, protect and enhance fish and wildlife and their habitats for the continuing benefit of people. Although the States are primarily responsible for management of fish and wildlife within their borders, the Service has been delegated responsibilities for certain threatened and endangered species, interjurisdictional fish and mi-

gratory bird species, and marine mammals, in addition to managing the National Fish Hatchery System and the National Wildlife Refuge System.

RESOURCE MANAGEMENT

Appropriation enacted, 2015 .....	\$1,207,658,000
Budget estimate, 2016 .....	1,326,832,000
Recommended, 2016 .....	1,220,343,000
Comparison:	
Appropriation, 2015 .....	+12,685,000
Budget estimate, 2016 .....	-106,489,000

The Committee recommends \$1,220,343,000 for Resource Management, \$12,685,000 above the fiscal year 2015 enacted level and \$106,489,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report. Proposed internal transfers and program changes for fiscal year 2016 are recommended where discussed below.

*Tribal Consultation.*—The recommendation does not include the proposed consolidation of tribal consultation funding within the central office because of recent reports by the Government Accountability Office (GAO) and others highlighting the problems caused by the centralization of programs for Indian tribes elsewhere within the Department of the Interior.

*Ecological Services.*—The recommendation includes \$231,920,000 for the Ecological Services activity. Proposed budget structure changes and associated internal transfers are recommended except that Recovery should remain a distinct subactivity, as described in further detail below. The States and other Service partners have raised valid concerns about transparency in the Service’s budget realignment proposal. The Committee recommendation attempts to address these specific concerns while at the same time helping the Service to achieve efficiencies and cost savings. Nevertheless, the Service must improve its ability to account for expenditures to implement certain laws passed by the Congress, particularly the Endangered Species Act (ESA). As a first step, the Service should include in annual budget submissions a crosscut table estimating amounts budgeted for implementation of the ESA, by subactivity, across the Service’s budget. The Service should also more closely align its presentation of authorizing statutes and budget subactivities in annual budget submissions.

*Listing.*—The recommendation includes \$10,257,000 for foreign and domestic listings, responses to petitions to list, and designation of critical habitat pursuant to the Endangered Species Act.

The Committee remains concerned that deadlines imposed by the 2011 multispecies litigation settlements may be compromising the Service’s ability to be thorough in its economic impact analyses, to provide fair public notice and opportunity to comment, to base decisions upon the best available scientific evidence, and to be exceptionally transparent with the information upon which its decisions are made. The Service is directed to re-evaluate its workplans in order to meet these obligations in light of the budget, and to request deadline extensions as necessary.

The Committee is concerned about the critical habitat proposal for the western distinct population segment of the yellow-billed cuckoo, published in the Federal Register on August 15, 2014. The proposal designates a Federal flood control reservoir as critical

habitat. The Army Corps of Engineers, which manages the reservoir, has publicly stated its objection because any compromises in the management of the dam and reservoir for flood control purposes “may increase the risk of loss of human life and cause significant impacts to economics downstream.” The Endangered Species Act is clear in its directive that the Service must take into consideration the economic impact and any other relevant impact of specifying any particular area as critical habitat. The Committee maintains that flood control for the purposes of protecting human lives and property must not only be taken into consideration but must also be off-limits to critical habitat designations. The Service is urged to exercise common sense and sound judgment before finalizing the critical habitat rule for the yellow-billed cuckoo.

*Planning and Consultation.*—The recommendation includes \$100,787,000 for evaluations and permitting of proposed infrastructure and other development projects. The increase requested for more timely evaluations and permits is partially funded at \$1,951,000. The Service is directed to more clearly define timeliness and to update its performance measures beginning with the fiscal year 2017 budget request. The request to handle the Service’s increased permitting workload in the Gulf as a result of the 2010 Deepwater Horizon oil spill is partially funded at \$500,000.

The Committee recognizes the important role of Habitat Conservation Plans (HCPs) in both recovery of species and in providing economic certainty and growth to municipalities affected by listed species, and encourages the Service to place a priority on working with partners making good faith efforts to develop and implement responsible HCPs.

*Conservation and Restoration.*—The recommendation includes \$33,396,000 for conservation and restoration activities not specifically directed at the recovery of threatened and endangered species. Coastal Barrier Resources Protection Act implementation is funded at \$1,390,000 as requested. The National Wetlands Inventory program is funded at \$3,721,000, which is \$250,000 above the fiscal year 2015 enacted level. The sagebrush steppe ecosystem is funded at \$4,000,000 as requested.

*Recovery.*—The recommendation includes \$87,480,000 for recovery planning and oversight, five-year status reviews, and associated downlisting and delisting activities. The increase requested to address the backlog of species that have been identified for potential delisting or downlisting based upon recent five-year reviews is fully funded at \$7,741,000. The Service is directed to submit annually with its budget request a complete list of all species with completed 5-year reviews recommending downlisting or delisting that have not yet been acted on. The recommendation includes the requested increase for ecosystem restoration. The recommendation includes \$500,000 for annual state-of-the-birds status reporting. Not less than \$2,000,000 is recommended for the recovery of listed bat species impacted by white-nose syndrome. General program activities are funded at \$78,878,000 as requested. Notwithstanding the reprogramming guidelines in the front of this report, the Service is directed to submit a reprogramming request to the Committee if necessary to comply with the directives below.

The Service is directed to develop recovery plans for all listed species as required by law; to include in each recovery plan meas-

urable recovery goals that the Service, the States, and their partners can strive for; and to report to the Congress on any species for which the Secretary finds that a recovery plan will not promote the conservation of the species, including the justification.

The Service is directed to complete all status reviews within the five-year period required by law, and, for any determination on the basis of such review whether a species should be delisted, downlisted, or uplisted, promulgate an associated regulation prior to initiating the next status review for such species.

The Committee is concerned that the Service's proposed rule to change the designation of critical habitat (79 Fed. Reg. 27066) could unfairly broaden areas so designated. The Committee is concerned that the Service's proposed rule to change the definition of "adverse modification or destruction" (79 Fed. Reg. 27060) could preclude the Service from carrying out reasonable and timely section 7 consultations or approving incidental take statements. The Service is directed to convene meetings upon request with organizations seeking changes to the proposed rules, and act in good faith to address those changes before the finalization, implementation, issuance, or publication of the proposed rules.

The cooperative recovery initiative with other Service programs is funded at \$1,943,000, which is \$1,570,000 above the fiscal year 2015 enacted level and \$957,000 below the budget request. Funds may be transferred to other budget activities within Resource Management, notwithstanding the reprogramming guidelines in the front of this report, provided the funds are strictly used for this initiative.

The recommendation includes \$2,500,000 in matching funds for recovery actions with non-governmental partners, \$2,000,000 above the budget request. The Committee recognizes the important role that non-governmental partners have played in the recovery of endangered species, such as the California condor and the aplomado falcon, and directs the Service to continue to foster these and similar partnerships nationwide.

The Committee is concerned that the Service's interim 4(d) rule with respect to the northern long-eared bat, which prescribed habitat conservation measures for certain activities exempted from incidental take prohibitions, unfairly failed to exempt other activities that could be conducted in accordance with these same measures. The Committee maintains that section 4(d) of the Endangered Species Act authorizes the Service to prohibit certain acts on threatened species but does not authorize the Service to prejudge individual activities that may result in such acts. Therefore, the bill includes language directing the Secretary to: (1) amend the current interim 4(d) rule for the northern long-eared bat to exempt without prejudice any activity that complies with the habitat conservation measures prescribed in the rule; and (2) re-initiate a public process in accordance with existing law to develop a final 4(d) rule. Recognizing the seriousness of white-nose syndrome and its effect on northern long-eared bats and other bat species, and the desire of States, industry, research partners, and others to address the disease, the Committee encourages the Service to work collaboratively with interested partners on the development of fair interim and final 4(d) rules.

The bill includes language directing the Secretary to re-issue final rules delisting recovered gray wolves in Wyoming and the Great Lakes, consistent with congressional action on recovered gray wolves in Idaho and Montana in the fiscal year 2011 appropriation. The Committee is compelled to act again in order to uphold the integrity of the Endangered Species Act, which hinges upon the guarantee that the Federal government will return management to the States once recovery goals are met and scientifically-sound management plans are in place. Upon enactment of this Act, the Service is urged to finalize its proposal to delist recovered gray wolves range-wide.

*Habitat Conservation.*—The recommendation includes \$51,776,000 for the Partners for Fish and Wildlife private lands program, equal to the fiscal year 2015 enacted level, of which \$1,285,000 is for Regional Fisheries Enhancement Groups as requested. The recommendation includes \$13,375,000 for the Coastal Program as requested.

*National Wildlife Refuge System.*—The recommendation includes \$483,054,000 for the National Wildlife Refuge System, \$8,852,000 above the fiscal year 2015 enacted level. Volunteer partnerships are increased by \$500,000 above the fiscal year 2015 enacted level with the goal of increasing the number of volunteer hours, which have declined in recent years. Law enforcement is funded at \$38,959,000 as requested, \$905,000 above the fiscal year 2015 enacted level. Refuge maintenance is funded at \$139,910,000 as requested, \$7,412,000 above the fiscal year 2015 enacted level.

Comprehensive Conservation Plans (CCPs) are increased by \$500,000 above the fiscal year 2015 enacted level with the goal of bringing the Service into compliance with the National Wildlife Refuge System Improvement Act of 1977, which required a CCP for every unit of the National Wildlife Refuge System by 2012 and a revision of every CCP at least every 15 years. The Service's proposal to transform the way it develops CCPs is laudable but is no excuse for missing deadlines. The increase for CCPs is partially offset by a reduction of \$465,000 from planning for more refuges, in order to re-focus the planning program on its higher priority mandates.

Within 90 days of enactment of this Act, the Service should provide to the Committee any written policies and procedures that relate to the use of animal traps within the National Wildlife Refuge System, by State if applicable. The Service is encouraged to comply with State regulations for the use of animal traps for non-consumptive management purposes on national wildlife refuges within each State.

*Migratory Bird Management.*—The recommendation includes \$47,718,000 for migratory bird management, \$1,250,000 above the fiscal year 2015 enacted level. Increases include \$1,000,000 as requested to take corrective action to improve aviation safety; and \$250,000 to improve permitting, particularly for bird/livestock conflicts. The Service is commended for its efforts to work with landowners to reduce black vulture predation on livestock.

*Law Enforcement.*—The recommendation includes \$73,772,000 for law enforcement, \$7,035,000 above the fiscal year 2015 enacted level and \$1,651,000 below the budget request. Wildlife trafficking is funded at \$6,500,000 which is \$3,000,000 above the fiscal year

2015 enacted level. General program activities are funded at \$64,500,000. The Service is directed to enforce illegal logging violations pursuant to the Lacey Act.

The Committee has concerns about the application of 50 CFR Part 14 to the export of sea urchin and sea cucumber. The Service is directed to evaluate whether these types of echinoderms should be included in the exceptions to clearance requirements, as part of Subpart E, Section 14.55(a) and submit a report to the Committee within 60 days of enactment of this Act. Additionally, if the Service determines that sea urchin and sea cucumber should not receive an exception, the report should include an evaluation of the potential application of a 24-hour notice rule to the Service rather than the current 48-hour advanced notice that is currently required.

*International Affairs.*—The recommendation includes \$14,599,000 for international affairs, including an increase of \$93,000 above the fiscal year 2015 enacted level for wildlife trafficking as requested.

The Committee is concerned with the recent increase of illegal trade in rhinoceros horns, elephant ivory from Africa, and illegally harvested timber, the large sums of money that these products command on the black market, and that these activities are providing a significant source of financing for armed insurgencies and groups with links to transnational organized crime and terrorism. These activities threaten the stability and development of African countries and pose a threat to U.S. security interests. The Committee supports Service programs in particular that focus on: (1) site-based law enforcement protection in Africa for the most at-risk populations of forest and savannah elephants; (2) development and implementation of regional wildlife law enforcement networks in Africa and Asia; and (3) training local park guards and other wildlife law enforcement officers. These programs should be carried out in coordination with other U.S. agencies, local governments, and international conservation partners. The Committee encourages coordination between the Service and the Department of Homeland Security at U.S. ports of entry.

The Committee remains concerned about the Service's unilateral regulatory limitation on the trade and transport of products containing ivory that have legally been in the United States for years and in some cases generations, including expensive family heirlooms and rare musical instruments. Therefore, the Committee has included a general provision in Title I to maintain the status quo for legal domestic ivory trade and transport policies until such time as the Service has completed a formal rulemaking process and attempted to address these concerns.

*Fish and Aquatic Conservation.*—The recommendation includes \$52,418,000 for National Fish Hatchery System operations. None of the funds may be used to terminate operations or to close any facility of the National Fish Hatchery System. None of the production programs listed in the March, 2013, National Fish Hatchery System Strategic Hatchery and Workforce Planning Report may be reduced or terminated without advance, informal consultation with affected States and Indian Tribes. General program activities are funded at \$48,152,000 but does not include the \$1,000,000 hold-back fund established in fiscal year 2015 without congressional approval. The aquatic animal drug approval partnership program is funded at not less than \$400,000 as requested. The national wild

fish health survey program is funded at not less than \$930,000 as requested.

The recommendation includes \$19,920,000 for Maintenance and Equipment as requested, including a \$2,000,000 increase above the fiscal year 2015 enacted level to address the deferred maintenance backlog. The Service is directed to modify its allocation methodology so that increases are directed to facilities with the most severe health and safety deficiencies across the System as a whole, rather than by region.

Aquatic habitat and species conservation programs are funded at the fiscal year 2015 enacted level except for Klamath Basin, which is funded at the requested level, cooperative management, which is reduced by \$588,000, and aquatic invasive species State plans, which are funded at \$2,566,000, which is \$1,000,000 above the fiscal year 2015 enacted level. All other invasive species programs are funded at the fiscal year 2015 enacted level.

*Marine Mammals.*—The marine mammals program is transferred to Ecological Services as requested.

*Cooperative Landscape Conservation.*—The recommendation includes \$6,994,000 for landscape conservation cooperatives (LCCs). The Committee continues to be concerned about the lack of State and tribal support for LCCs. The Service should focus on areas where partnerships are strongest.

*Science Support.*—The recommendation includes \$11,727,000 for science support, of which not less than \$2,500,000 shall continue to be used to fight white-nose syndrome in bats. The Committee recognizes that scientific support from the U.S. Geological Survey has been insufficient in meeting the Service’s needs, and supports rebuilding the Service’s capacity for scientific research and application. However, the Service has used its additional science funding in recent years to add a new layer of administrators nationwide, which seems unnecessary. The Committee notes that the National Fish Hatchery System has been a national leader in the science of fish health and fish culture for decades under the existing fisheries program leadership structure. The Committee encourages the Service to reconsider its approach to rebuilding its science capacity and to propose future increases for science within the budgets of existing programs that need the science, such as fisheries, refuges, migratory birds, and endangered species, if such science is a priority for the programs.

*General Operations.*—The recommendation funds general operations at the fiscal year 2015 enacted level except for including the requested reductions for communication and worker’s compensation, and the requested increase for maintenance of the National Conservation Training Center (NCTC). The Service is encouraged to continue to make NCTC available, at cost, to other Federal, State, tribal, and non-governmental entities for the purposes of conservation training.

CONSTRUCTION

Appropriation enacted, 2015 .....	\$15,687,000
Budget estimate, 2016 .....	20,812,000
Recommended, 2016 .....	13,144,000
Comparison:	
Appropriation, 2015 .....	–2,543,000
Budget estimate, 2016 .....	–7,668,000

The Committee recommends \$13,144,000 for Construction, \$2,543,000 below the fiscal year 2015 enacted level and \$7,668,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report.

LAND ACQUISITION

Appropriation enacted, 2015 .....	\$47,535,000
Budget estimate, 2016 .....	58,500,000
Recommended, 2016 .....	27,500,000
Comparison:	
Appropriation, 2015 .....	- 20,035,000
Budget estimate, 2016 .....	- 31,000,000

The Committee recommends \$27,500,000 for land acquisition, \$20,035,000 below the fiscal year 2015 enacted level and \$31,000,000 below the budget request. The amounts recommended by the Committee compared with the budget estimates by activity are shown in the table at the end of this report.

The recommendation includes \$9,000,000 for land acquisition projects included in the fiscal year 2016 budget request. The Service is directed to re-prioritize its project list as necessary to focus on acquisitions where opportunities for recreation, and local, State, and congressional support, are strongest.

The recommendation includes \$2,500,000 for inholdings and other acquisitions considered by the Service to be emergencies or hardships. The Service is directed to notify the Committee of any land acquired with these funds. The Committee defines “inholding” as non-Federal land within authorized National Wildlife Refuge boundaries and bordered by not less than 51 percent of Federal public land.

Consistent with other land acquisition accounts funded by this appropriation, the recommendation includes \$2,000,000 for acquisitions that improve access to existing Federal public lands via road, river, or trail for hunting, fishing, and other public recreation, as authorized by law or regulation.

In a time when budgetary constraints allow for only a limited number of new land acquisition projects, the Committee is encouraged by programs that leverage public/private partnerships for land conservation like the Highlands Conservation Act, which has a record of more than a 2 to 1 ratio in non-Federal matching funds. Therefore, the Committee recommendation includes \$3,000,000 for the Highlands Conservation Act Grants and directs the Fish and Wildlife Service to work with the Highlands States regarding priority projects for fiscal year 2016.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND

The Cooperative Endangered Species Conservation Fund provides grants to States and territories for endangered species recovery actions on non-Federal lands and provides funds for non-Federal land acquisition to facilitate habitat protection.

Appropriation enacted, 2015 .....	\$50,095,000
Budget estimate, 2016 .....	50,000,000
Recommended, 2016 .....	50,095,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	+95,000

The Committee recommends \$50,095,000 for the Cooperative Endangered Species Conservation Fund, equal to the fiscal year 2015 enacted level and \$95,000 above the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report. All funding is to be derived from the Land and Water Conservation Fund, as requested.

NATIONAL WILDLIFE REFUGE FUND

The National Wildlife Refuge Fund makes payments in lieu of taxes based on their fair market value to counties in which Service lands are located. Payments to counties in all 50 States, the Commonwealth of Puerto Rico, Guam, and the U.S. Virgin Islands are estimated to be \$18,712,000 in fiscal year 2016, with \$13,228,000 derived from this appropriation and \$5,484,000 from the net refuge receipts estimated to be collected in fiscal year 2015.

Appropriation enacted, 2015 .....	\$13,228,000
Budget estimate, 2016 .....	0
Recommended, 2016 .....	13,228,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	+13,228,000

The Committee recommends \$13,228,000 for the National Wildlife Refuge Fund, equal to the fiscal year 2015 enacted level and \$13,228,000 above the budget request. The Committee notes the inconsistency with which the Administration proposes full funding for Payments in Lieu of Taxes (as is provided elsewhere in this bill) and proposes zero funding for the National Wildlife Refuge Fund.

NORTH AMERICAN WETLANDS CONSERVATION FUND

The North American Wetlands Conservation Act of 1989 provided for grants to carry out wetlands conservation projects in the United States, Canada, and Mexico for the benefit of wetlands-associated migratory birds and other wildlife. Additional program funding comes from fines, penalties, and forfeitures collected under the Migratory Bird Treaty Act of 1918; from Federal fuel excise taxes on small gasoline engines, as directed by amendments to the Federal Aid in Sport Fish Restoration Act of 1950, to benefit coastal ecosystem projects; and from interest accrued on the fund established under the Federal Aid in Wildlife Restoration Act of 1937. Authorization of appropriations expired in fiscal year 2012.

Appropriation enacted, 2015 .....	\$34,145,000
Budget estimate, 2016 .....	34,145,000
Recommended, 2016 .....	35,000,000
Comparison:	
Appropriation, 2015 .....	+855,000
Budget estimate, 2016 .....	+855,000

The Committee recommends \$35,000,000 for the North American Wetlands Conservation Fund, \$855,000 above the fiscal year 2015 enacted level and the budget request, and consistent with the reauthorization level proposed in the last Congress.

NEOTROPICAL MIGRATORY BIRD CONSERVATION

The Neotropical Migratory Bird Conservation Act of 2000 authorized grants for the conservation of neotropical migratory birds in the United States, Latin America and the Caribbean, with 75 per-

cent of the amounts available to be expended on projects outside the United States. Authorization of appropriations expired in fiscal year 2010.

Appropriation enacted, 2015 .....	\$3,660,000
Budget estimate, 2016 .....	4,160,000
Recommended, 2016 .....	3,660,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 500,000

The Committee recommends \$3,660,000 for neotropical migratory bird conservation, equal to the fiscal year 2015 enacted level and \$500,000 below the budget request.

#### MULTINATIONAL SPECIES CONSERVATION FUND

The Multinational Species Conservation Fund provides technical support and cost-sharing grant assistance to countries to strengthen anti-poaching activities; builds community support for conservation near the species' habitats; conducts surveys, monitoring, and applied research; and provides infrastructure and field equipment necessary to conserve habitats. These funds help to leverage work with partners and other collaborators to conserve and protect African and Asian elephants, rhinoceroses, tigers, great apes and marine turtles and their habitats. Authorizations of appropriations for the programs within this Fund have expired.

Appropriation enacted, 2015 .....	\$9,061,000
Budget estimate, 2016 .....	11,061,000
Recommended, 2016 .....	9,561,000
Comparison:	
Appropriation, 2015 .....	+500,000
Budget estimate, 2016 .....	- 1,500,000

The Committee recommends \$9,561,000 for the Multinational Species Conservation Fund, \$500,000 above the fiscal year 2015 enacted level and \$1,500,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report. The Committee recognizes that international wildlife trafficking has national security implications and therefore supports the Service's interagency and international cooperative efforts. The Committee further urges the Service and other interested parties to seek to evaluate and reauthorize these programs.

#### STATE AND TRIBAL WILDLIFE GRANTS

The State and Tribal Wildlife Grants Program provides Federal grant funds to the States, the District of Columbia, the Commonwealth of Puerto Rico, the territories, and Tribes, to develop and implement programs for the benefit of at-risk fish and wildlife that are not under Federal jurisdiction. The intent is to avoid the costly and time-consuming process entered into through the Endangered Species Act or other regulatory actions.

Appropriation enacted, 2015 .....	\$58,695,000
Budget estimate, 2016 .....	70,000,000
Recommended, 2016 .....	59,195,000
Comparison:	
Appropriation, 2015 .....	+500,000
Budget estimate, 2016 .....	- 10,805,000

The Committee recommends \$59,195,000 for State and Tribal Wildlife Grants, \$500,000 above the fiscal year 2015 enacted level and \$10,805,000 below the budget request. The increase above the enacted level is for State competitive grants. The Service is directed to focus the State competitive grants program on species the Service finds to be warranted for listing but precluded because of higher priorities, and on species proposed for listing but not yet listed. States are encouraged to do the same with the formula grants.

#### NATIONAL PARK SERVICE

The mission of the National Park Service (Service) is to preserve unimpaired the natural and cultural resources and values of the national park system for the enjoyment, education, and inspiration of this and future generations. Established in 1916, the National Park Service has stewardship responsibilities for the protection and preservation of the heritage resources of the national park system. The system, consisting of 407 separate and distinct units, is recognized globally as a leader in park management and resource preservation. The national park system represents much of the finest the Nation has to offer in terms of scenery, historical and archeological relics, and cultural heritage. Through its varied sites, the National Park Service attempts to explain America's history, interpret its culture, preserve examples of its natural ecosystems, and provide recreational and educational opportunities for U.S. citizens and visitors from all over the world. In addition, the National Park Service provides support to tribal, local, and State governments to preserve culturally significant, ecologically important, and public recreational lands.

The National Park Service will be 100 years old in 2016, and the Service has embarked on a ten-year effort to enhance the national parks leading up to this historic celebration. The Committee supports this effort leading to a second century of conservation, environmental stewardship and recreation benefiting millions of visitors from throughout the world.

#### OPERATION OF THE NATIONAL PARK SYSTEM

Appropriation enacted, 2015 .....	\$2,275,773,000
Budget estimate, 2016 .....	2,515,131,000
Recommended, 2016 .....	2,327,811,000
Comparison:	
Appropriation, 2015 .....	+52,038,000
Budget estimate, 2016 .....	-187,320,000

The Committee recommends \$2,327,811,000 for Operation of the National Park System (ONPS), \$52,038,000 above the fiscal year 2015 enacted level and \$187,320,000 below the budget request. The amounts recommended by the Committee compared with the budget estimates by activity are shown in the table at the end of this report.

*Centennial of the National Park Service.*—The Centennial of the National Park Service marks the beginning of a second century of stewardship, education, conservation, and recreation involving some of America's most treasured spaces. The Committee recognizes the importance of this historic national celebration and is committed to its success.

Accordingly, the Committee provides \$52,038,000 in new discretionary funding within the ONPS account to support the Centennial Initiative and related efforts, including funds to address deferred and cyclic maintenance needs. Specifically, the bill provides \$13,538,000 as requested to support new responsibilities and critical needs across the System including critical operating needs at Park Service sites associated with the Civil Rights Movement; \$8,000,000 as requested to restore seasonal ranger staff and enhance education and interpretive services; and \$2,000,000 as requested to support increased volunteer capacity through partner organizations. The bill also includes \$3,500,000 to support the Service's Civil Rights initiative. Lastly, the bill provides new discretionary funding within ONPS to address deferred maintenance needs including \$15,000,000 for repair and rehabilitation projects and \$10,000,000 to address cyclic maintenance needs. These funds are supplemented by \$20,000,000 provided within the Centennial Challenge matching grant program account dedicated to supporting signature projects and programs which provide critical visitor services enhancements for parks beyond amounts provided for basic operations.

Given the scope of the Centennial Initiative, the Committee directs the Service to provide a report, not later than 90 days after enactment of this Act, detailing the distribution of funds supporting the Centennial Initiative and the anticipated return on investment on this substantial Federal investment.

*Resource Stewardship.*—The bill provides \$321,483,000 for resource stewardship. Increases above the fiscal year 2015 enacted level include \$1,276,000 as requested to support new responsibilities and critical needs, and \$3,000,000 to document and preserve Civil Rights history in the National Park System as part of the Service's Civil Rights initiative. The bill also includes \$2,000,000 to continue zebra and quagga mussel containment, prevention, and enforcement. This funding was included in the fiscal year 2015 enacted bill but was not proposed in the budget request.

*Visitor Services.*—The bill provides \$251,447,000 for visitor services. Increases above the fiscal year 2015 enacted level include \$2,000,000 as requested to support increased volunteer capacity through partner organizations; \$4,000,000 as requested to restore seasonal ranger staff; \$1,961,000 as requested to support new responsibilities and critical needs; and \$500,000 as requested to support the Service's Civil Rights initiative. The bill also includes funding for the National Capital Area Performing Arts Program which was proposed for termination in the budget request.

*Park Protection.*—The bill provides \$351,953,000 for park protection. Increases above the fiscal year 2015 enacted level include \$2,000,000 to restore seasonal ranger staff and \$1,151,000 to support new responsibilities and critical needs as requested.

*Facility Maintenance and Operations.*—The bill provides \$731,355,000 for facility maintenance and operations. Increases above the fiscal year 2015 enacted bill include \$2,000,000 as requested to restore seasonal ranger staff and \$7,043,000 as requested to support new responsibilities and critical needs. The recommendation also includes \$15,000,000 for repair and rehabilitation projects and \$10,000,000 to address cyclic maintenance needs.

*Park Support.*—The bill provides \$491,569,000 for park support. Increases above the fiscal year 2015 enacted level include \$2,107,000 as requested to support new responsibilities and critical needs.

*Additional Guidance.*—The Committee recommendation for Operation of the National Park System includes the following additional guidance:

*Aquatic Invasive Species.*—The Committee remains concerned about the spread of quagga and zebra mussels in the West. The Committee directs the Secretary of the Interior to continue developing and updating, using the best available science minimum protocols and training techniques for Federal, State, local, and private entities, a consistent standard of inspection and decontamination of recreational watercraft and equipment, as prescribed in the February 2010 Quagga/Zebra Mussel Action Plan for Western U.S. Waters.

Further, consistent with fiscal year 2015, the Committee provides the Service with \$2,000,000 for quagga and zebra mussel containment, prevention, and enforcement and directs the Service to prioritize the decontamination of watercraft and equipment leaving the watersheds of contaminated bodies, including Lake Powell and Lake Mead. Lastly, the Committee directs the Service to provide, not later than 90 days after enactment of this Act, a progress report on steps taken in recent years to address this pervasive threat to western watersheds.

*White-Nose Syndrome (WNS) in bats.*—The Committee remains concerned over the effects white-nose syndrome is having on the important roles bats perform in ecological functions in parks. The Committee provides funds as requested to support the Service's efforts to control the spread of the disease; protect and better inventory NPS bat and cave resources; expand research and partnerships for research on WNS management; monitor NPS resources for WNS; conduct public education about WNS; and standardize visitor WNS screening procedures across park units.

*Mississippi National River and Recreation Area (MNRRA).*—The Committee understands that the Service is negotiating to extend the lease for the temporary headquarters facility of the Mississippi National River and Recreation Area (MNRRA). Recognizing the temporary nature of the headquarters and the lack of visitor use facilities adjacent to the Mississippi river, the Service is directed to undertake a study for the development of a permanent headquarters and visitor use facility in close proximity to the existing headquarters and the river.

*James A. Garfield Memorial.*—The Committee recognizes that there are a number of nationally significant presidential legacy sites outside of the National Park System. Understanding the historical, educational, cultural, and recreational value these sites offer the American public, the Committee believes presidential legacy sites should remain accessible and structurally protected. Recently, several Members of Congress submitted a letter to the Service requesting a study assessing the suitability of the James A. Garfield Memorial at Lake View Cemetery for inclusion as an affiliated area. The Committee encourages the Service to conduct an assessment as soon as possible.

*Everglades Restoration.*—The Committee notes the substantial progress made toward restoration of the Everglades ecosystem and continues to support this multi-year effort to preserve one of the great ecological treasures of the United States. The Service is directed to work with the Miccosukee Tribe of Indians of Florida and relevant Federal agencies (including but not limited to the Bureau of Indian Affairs and the Environmental Protection Agency) to develop a range of options to address the water quality issues of the L-28 canal system. The Service is to report back to the Committee on these options within 180 days of enactment of this Act.

Further, the Committee encourages the Service to complete the land exchange authorized in section 7107(b)(3) of the Omnibus Public Land Management Act of 2009. According to the Service, the land exchange supports the mission of the Everglades National Park and is vital to the long-term protection of the entire Everglades ecosystem. Completion of the land exchange will ensure that important operational phases, such as freshwater storage and sheet flow restoration, for the federally funded Comprehensive Everglades Restoration Plan (CERP) will not be delayed.

*Golden Spike Sesquicentennial.*—The Committee notes that 2019 marks the sesquicentennial of the completion of the first transcontinental railroad. The Golden Spike National Historic Site in Utah celebrates this historic achievement. The Committee urges the Service to begin planning, in conjunction with State and local governments, the observance of the Golden Spike Sesquicentennial and celebration of this milestone in American history.

*Made in America.*—The Committee directs the Service to identify if authorized concessioners are offering products made in the United States, explore viable ways to encourage the sale of American made products, and provide to the Committee the estimated economic impact of requiring all authorized concessioners to sell only American made goods.

*Intellectual Property.*—The Committee directs the Service to provide a report on intellectual property rights that have been lost by the Service, and processes that can be undertaken to preserve intellectual property of the Service moving forward.

*Eastern Legacy Study (Lewis and Clark Trail Study).*—The Eastern Legacy Study, authorized to determine the feasibility of extending the Lewis and Clark National Historic Trail, is now two years overdue. While the Committee appreciates that the study area is approximately 7,400 miles across 14 eastern States and the District of Columbia, the Committee directs the Service to work expeditiously to complete the study in a timely fashion and report back to the Committee on any impediments to completion.

*NDAA evaluation.*—The Committee urges the Service to evaluate Section 3040 of the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 and report back to the Committee within 90 days of enactment of this Act on the Service’s evaluation.

*GIS tools.*—The Committee is aware of geospatial platforms and GIS tools that may be used to support planning, design, repair, stewardship, and restoration of national parks’ facilities, recreational assets, and natural and cultural resources. Such platforms and tools have been effectively deployed by the Service and other agencies to support conservation and preservation efforts in-

cluding Chesapeake Bay restoration. The Committee urges the Service to provide a report to the Committee not later than 90 days after enactment of this Act on how the use of such platforms and tools could be expanded by the Service to support planning and management.

*Flight 93 Memorial.*—Since the terrorist attacks of September 11, 2001, nearly 2.5 million people have visited the site of the Flight 93 National Memorial in Shanksville, Pennsylvania. The memorial honors the 40 men and women who died saving the White House or U.S. Capitol from a potentially catastrophic terrorist attack. The Committee is pleased by progress of the Visitor Center and Learning Center and looks forward to their formal dedication in September, 2015. The bill provides requested funds to support operations and maintenance, interpretive staff, and other critical needs at the memorial. The Committee remains firmly committed to the timely completion of remaining phases of the Flight 93 Memorial including construction of the pedestrian trail from the Visitor Center to the Wall of Names, and the Tower of Voices.

*U.S. Capitol Concerts.*—The Committee continues its longstanding support for funding for the National Capitol Area Performing Arts Program and directs the Service to maintain funding for the summer concert series staged on the U.S. Capitol grounds at the fiscal year 2015 enacted level.

*Ozark National Scenic Riverways.*—The Committee understands concerns have been expressed regarding potential access restrictions in certain areas of the Ozark National Scenic Riverways. The Service is directed to work collaboratively with affected parties to ensure that implementation of the General Management Plan for the Ozark National Scenic Riverways addresses the legitimate concerns of affected stakeholders including, but not limited to, local communities and businesses.

*America's First Frontier.*—The Committee urges the Service to advance interpretive efforts at existing National Park Service sites and in collaboration with other Federal, State, and local agencies, including other bureaus within the Department of the Interior, to detail the start of westward expansion through the Northwest Territory as America's First Frontier. Further, the Committee directs the Service to report back to the Committee within 90 days of enactment of this Act on steps being taken to advance such interpretive collaboration.

*Midwest Region.*—The Committee understands that the Midwest Region of the National Park Service is conducting a review of the operations of Perry's Victory and International Peace Memorial and River Raisin National Battlefield to determine whether administrative efficiencies can be gained from the two parks sharing certain staff resources. Within 90 days of enactment of this Act, the Committee directs the Service to submit a status report of this review and provide assurances that both parks will be able to continue to carry out their unique missions as directed by Congress in their establishment.

*Yosemite National Park.*—The Committee remains concerned that visitors to Yosemite Valley may experience a diminished level of service as a result of the implementation of the Merced River Plan. The Service is directed to work with its concessioners at Yosemite National Park to ensure there is no interruption to visitor

and recreational services, including bicycle rentals and ice skating, as the park implements the Merced River Plan.

*Leasing of Historic Buildings.*—Leasing of historic park buildings has proven to be an effective public-private partnership that has brought private investment to the repair and maintenance of historic park resources. In previous years, the Committee has encouraged the Service to make expanded use of leasing authority. The Committee commends the Service for recent steps it has taken to increase the utilization of this tool, including establishing a leasing manager to oversee and expand the historic leasing program. The Committee directs the Service to provide a report, within six months of enactment of this Act, detailing its progress towards expanding use of this authority. Included in this report should be (1) an assessment of how many historic structures are leasable, (2) the cost of undertaking a leasing program, and (3) any statutory or regulatory impediments that now inhibit the enhanced use of leasing of historic structures.

*Park Partnerships.*—Over the past several years and most recently in its explanatory statement accompanying the Consolidated and Further Continuing Appropriations Act, 2015, the Committee has expressed its support for ongoing public-private partnerships and strongly encouraged the Service to expand their use. These partnerships can leverage Federal dollars and add value to national parks by bringing wide-ranging perspectives to the efficient management of park resources. The Committee believes such partnerships, especially with Service nonprofit partners such as friends groups and cooperating associations, can be important contributors to enhancing the visitor experience.

Further, the Committee believes there is merit in the Service working with qualified partners to cooperatively finance improvements to park facilities and programs, including repairing and rehabilitating facilities and landscapes to reduce the maintenance backlog, and providing educational and interpretive programs. The Committee commends the Service for efforts thus far made to engage partners and encourages the Service to find ways to further engage partners to facilitate the accomplishment of park projects consistent with the applicable laws and regulations that govern use of Federal appropriations.

*Bill Language.*—The Committee has, since 2006, included bill language authorizing the Secretary of the Interior to acquire or lease property to facilitate the transportation of visitors to and from Ellis, Governors, and Liberty Islands, NY and NJ. The language was necessitated by the need to establish a screening process for visitors to the Statue of Liberty in the aftermath of the events of September 11, 2001. While the location of future, permanent screening facilities for the ferry operation to the Statue of Liberty and Ellis Island is now uncertain, prior-year bill language is retained as the Service reviews the security risks of alternative sites before making final decisions on the future location of permanent security screening facilities. The bill also includes language in Title I General Provisions addressing (1) the Volunteers in Parks (VIP) program, and (2) heritage areas.

## NATIONAL RECREATION AND PRESERVATION

The National Recreation and Preservation account provides for outdoor recreation planning, preservation of cultural and national heritage resources, technical assistance to Federal, State and local agencies, and administration of Historic Preservation Fund grants.

Appropriation enacted, 2015 .....	\$63,117,000
Budget estimate, 2016 .....	54,199,000
Recommended, 2016 .....	62,467,000
Comparison:	
Appropriation, 2015 .....	- 650,000
Budget estimate, 2016 .....	+8,268,000

The Committee recommends \$62,467,000 for National Recreation and Preservation, \$650,000 below the fiscal year 2015 enacted level and \$8,268,000 above the budget request. The amounts recommended by the Committee compared with the budget estimates by activity are shown in the table at the end of this report.

*Additional Guidance.*—The following additional direction and guidance is provided with respect to funding provided within this account:

*Heritage Partnership Program (HPP).*—The Committee recommends \$19,671,000 for the Heritage Partnership Program, \$650,000 below the fiscal year 2015 enacted level. These funds support grants to local non-profit groups in support of historical and cultural recognition, preservation and tourism activities. The reduction below the fiscal year 2015 enacted level reflects funding for a former heritage area that is now a freestanding Service unit no longer funded via the heritage area program. Congress has in recent years expanded from 27 to 49 the number of authorized heritage partnerships, creating additional pressure on available grant funding. The National Park Service, as the administrator of the program, has developed a funding strategy that ensures newer areas receive enough Federal funding to establish themselves to a level that may eventually become self-sustaining. Under this approach, older, more established, areas will continue to receive funds, but at a level that recognizes the decades of significant Federal financial support these areas have received. Heritage areas were never intended to receive Federal funding in perpetuity, yet the Committee notes they continue to depend on annual appropriations at sustained historical levels.

The Committee has in the recent past provided direction for the development of self-sufficiency plans, and the Committee fully expects pressure on HPP funding to increase in future years. Accordingly, the Committee directs that participating heritage areas move expeditiously to develop plans for long-term self-sustainability. The Committee supports the Service's efforts to allocate funding in a manner that moves all heritage areas towards self-sustainability.

*Native American Graves Protection and Repatriation Grants.*—The Committee supports the budget request for the Native American Graves Protection and Repatriation Grant Program.

*Japanese American Confinement Site Grants.*—The Committee supports the budget request for the Japanese American Confinement Site Grant Program which leverages proportional funding through partnerships with local preservation groups to preserve Japanese American World War II confinement sites.

*American Battlefield Protection Program Assistance Grants.*—The Committee supports the budget request for the American Battlefield Protection Program which assists in the preservation and protection of America’s battlefields through site identification, documentation, planning, interpretation, and educational efforts.

HISTORIC PRESERVATION FUND

The Historic Preservation Fund supports the State historic preservation offices to perform a variety of functions. These include State management and administration of existing grant obligations; review and advice on Federal projects and actions; determinations and nominations to the National Register; Tax Act certifications; and technical preservation services. The States also review properties to develop data for planning use. Funding in this account also supports direct grants to qualifying organizations for individual preservation projects and for activities in support of heritage tourism and local historic preservation.

Appropriation enacted, 2015 .....	\$56,410,000
Budget estimate, 2016 .....	89,910,000
Recommended, 2016 .....	60,910,000
Comparison:	
Appropriation, 2015 .....	+4,500,000
Budget estimate, 2016 .....	– 29,000,000

The Committee recommends \$60,910,000 for historic preservation, \$4,500,000 above the fiscal year 2015 enacted level and \$29,000,000 below the budget request.

*Additional Guidance.*—The following guidance is provided with respect to funding provided within this account:

*State and Tribal Historic Preservation Offices.*—The bill provides \$46,925,000 for State Historic Preservation Offices and \$8,985,000 for Tribal Historic Preservation Offices. The bill also provides \$5,000,000 for competitive grants of which \$500,000 is for grants to underserved communities and \$4,500,000 is for competitive grants to document, interpret, and preserve historical sites associated with the Civil Rights Movement.

CONSTRUCTION

Appropriation enacted, 2015 .....	\$138,339,000
Budget estimate, 2016 .....	250,967,000
Recommended, 2016 .....	139,555,000
Comparison:	
Appropriation, 2015 .....	+1,216,000
Budget estimate, 2016 .....	– 111,412,000

The Committee recommends \$139,555,000 for Construction, \$1,216,000 above the fiscal year 2015 enacted level and \$111,412,000 below the budget request.

*Line-Item Construction.*—The bill provides \$62,894,000 in funding for line-item construction projects. The amount provided fully funds the top ten construction projects as prioritized by the Service in the fiscal year 2016 budget request. Requests for reprogramming will be considered pursuant to the guidelines in the front of the report.

*Bill Language.*—The Committee has maintained bill language providing that a single procurement may be issued which includes the full scope of the project for any project initially funded in fiscal

year 2016 with a future phase indicated in the NPS five-year Line Item Construction program. The solicitation and contract in such procurement shall be subject to availability of funds. Executing a single contract has the potential to increase economies of scale and reduce overall costs.

LAND AND WATER CONSERVATION FUND

RESCISSION

Appropriation enacted, 2015 .....	-\$28,000,000
Budget estimate, 2016 .....	- 30,000,000
Recommended, 2016 .....	- 28,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	+2,000,000

The Committee recommends the rescission of the annual contract authority provided by 16 U.S.C. 4601-10a. This authority has not been used in years and there are no plans to use it in fiscal year 2016. The Committee does not agree with the Administration's proposal to permanently cancel the authority.

LAND ACQUISITION AND STATE ASSISTANCE

Appropriation enacted, 2015 .....	\$98,960,000
Budget estimate, 2016 .....	117,500,000
Recommended, 2016 .....	84,367,000
Comparison:	
Appropriation, 2015 .....	- 14,593,000
Budget estimate, 2016 .....	- 33,133,000

The Committee recommends \$84,367,000 for Land Acquisition and State Assistance, \$14,593,000 below the fiscal year 2015 enacted level and \$33,133,000 below the budget request. In addition to the traditional State Conservation Grants, the Committee continues funding for the competitive grant program at the fiscal year 2015 enacted level of \$3,000,000. The recommendation includes \$9,000,000 for the American Battlefield Protection Program, \$14,000 above the fiscal year 2015 enacted level and the budget request. The amounts recommended by the Committee compared with the budget estimates by activity are shown in the table at the end of this report.

The recommendation includes \$9,000,000 for land acquisition projects included in the fiscal year 2016 budget request. The Service is directed to re-prioritize its project list as necessary to focus on acquisitions where opportunities for recreation, and local, State, and congressional support, are strongest.

The recommendation includes \$4,500,000 for inholdings, donations, and exchanges. The Service is directed to notify the Committee of any land acquired with these funds. The Committee defines "inholding" as non-Federal land within authorized National Park Service Unit boundaries and bordered by not less than 51 percent of Federal public land.

Consistent with other land acquisition accounts funded by this appropriation, the recommendation includes \$2,000,000 for acquisitions that improve access to existing Federal public lands via road, river, or trail for hunting, fishing, and other public recreation, as authorized by law or regulation.

## CENTENNIAL CHALLENGE

Appropriation enacted, 2015 .....	\$10,000,000
Budget estimate, 2016 .....	50,000,000
Recommended, 2016 .....	20,000,000
Comparison:	
Appropriation, 2015 .....	+10,000,000
Budget estimate, 2016 .....	-30,000,000

The Committee provides \$20,000,000 for the Centennial Challenge matching grant program, a key component of the Service's Centennial Initiative. The Committee notes that \$10,000,000 in Centennial Challenge funds provided to the Service in fiscal year 2015 was matched with \$15,900,000 from more than 90 partner organizations nationwide. These funds are now financing 106 projects to improve visitor services at more than 100 parks in 31 States and the District of Columbia. The Committee commends the Service for its success in garnering non-Federal assistance for the completion of these and future projects as the Service approaches its Centennial.

The Committee understands that funds provided will be matched on at least a 1:1 basis and administered under existing Service partnership authorities. Funds provided will be dedicated to supporting signature projects and programs which provide critical enhancements for the parks beyond amounts provided for basic operations. The Committee directs that preference be given to projects that have a clear and immediate visitor benefit as well as a higher partner match. The Committee notes that the Service has a long history of working with philanthropic partners and fully supports the use of public-private partnerships wherever feasible.

## UNITED STATES GEOLOGICAL SURVEY

The United States Geological Survey (USGS, or "Survey") was established by an Act of Congress on March 3, 1879, to support the mission of the Department of the Interior and its science requirements. The USGS also works in collaboration with other Federal, State, and tribal cooperators to conduct research and provide scientific data and information to describe and understand the Earth; minimize loss of life and property from natural disasters; manage water, biological, energy, and mineral resources; and enhance and protect our quality of life. The USGS is the Federal government's largest earth-science research agency and the primary source of data on the Nation's surface and ground water resources. Its programs address increasingly complex societal issues such as the development of alternative and unconventional energy resources, management of critical ecosystems, understanding and adaptation to climate change, and responses to natural and human-induced hazards. For more than a century, the diversity of scientific expertise and collaborative partnerships with universities, research institutions, and major public and private laboratories has enabled USGS to carry out large-scale, multi-disciplinary investigations and provide impartial scientific information to resource managers, planners, policymakers, and the public.

## SURVEYS, INVESTIGATIONS, AND RESEARCH

Appropriation enacted, 2015 .....	\$1,045,000,000
Budget estimate, 2016 .....	1,194,782,000
Recommended, 2016 .....	1,045,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 149,782,000

The Committee recommends \$1,045,000,000 for Surveys, Investigations, and Research, equal to the fiscal year 2015 enacted level and \$149,782,000 below the budget request. The Committee recommendation maintains funding for the Survey recognizing that its scientific work is vital to managers at Federal, State, and local levels to inform public policy decisions regarding human health, public safety, and national security.

*Ecosystems.*—The Committee recommends \$154,041,000 for ecosystem programs, \$3,000,000 below the fiscal year 2015 enacted level and \$22,258,000 below the budget request.

*Climate and Land Use Change.*—The Committee recommends \$138,975,000 for climate and land use change programs, \$3,000,000 above the fiscal year 2015 enacted level and \$52,853,000 below the budget request. The Committee supports the continuation of the LandSat program and includes the requested increase of \$4,300,000 for LandSat 9. In addition, the Committee directs the USGS Southeast Center to continue to work on developing strategic decision making approaches to understanding the region's most vulnerable, flood-prone, coastal areas.

The Committee supports all remaining programs at their fiscal year 2015 enacted levels, including the early earthquake warning and event characterization program. As such the bill does not include the proposed \$1,551,000 reduction for early earthquake warning.

Further, the Committee continues to be concerned about the lack of knowledge and onshore, real-time instrumentation available for the Cascadia subduction zone. Scientific understanding of earthquakes and the ocean environment will benefit from collecting offshore data. Therefore, the Committee encourages the Survey to plan for offshore monitoring of the Cascadia subduction zone in future budget requests to ensure maximum effectiveness of the earthquake early warning system. In addition, since 1995, the United States Geological Survey, in conjunction with State and local emergency management officials, has been working to develop the Mount Rainier lahar-warning system. The Committee urges the Survey to develop an estimate for the cost to replace or upgrade any older technologies, and an estimate for the expansion of the lahar-warning system, to encompass all six impacted river valleys.

The Committee understands that marine geohazards (earthquake-induced tsunamis, landslide-induced tsunamis and subsea volcano eruptions) pose a threat to citizens living on the West Coast, as well as the submarine areas in U.S. Island Territories that contain rich deposits of rare earth minerals and other strategic minerals important to national defense. To better understand marine hazard risk and resource availability, the Committee encourages the Survey to work in partnership with other Federal agencies and non-governmental organizations where practicable to

support research and assessments of marine hazards and critical minerals on deepwater ships of exploration.

*White-Nose Syndrome in bats.*—The Committee provides requested funds to support efforts to understand and respond to white-nose syndrome.

*Bill Language.*—The bill provides two-year funding authority except for satellite operations and deferred maintenance and capital improvement projects, which are no-year authority. Provisos include a funding limitation on surveys on private property and a cost-share requirement on topographic mapping and water resources activities in cooperation with States and municipalities.

#### BUREAU OF OCEAN ENERGY MANAGEMENT

The Bureau of Ocean Energy Management is responsible for the environmentally and economically sound development of the Nation's offshore energy and mineral resources. The Bureau's management of these resources helps meet the Nation's energy needs by providing access to—and fair return to the American taxpayer for—offshore energy and mineral resources through strategic planning and resource and economic evaluation. Conventional energy activities include development of the Five-Year Outer Continental Shelf Oil and Gas Leasing Program; assessment of mineral resource potential, tracking of inventories of oil and gas reserves, and development of production projections; and economic evaluation to ensure the receipt of fair value through lease sales and lease terms.

#### OCEAN ENERGY MANAGEMENT

Appropriation enacted, 2015 .....	\$169,770,000
Budget estimate, 2016 .....	170,857,000
Recommended, 2016 .....	167,270,000
Comparison:	
Appropriation, 2015 .....	–2,500,000
Budget estimate, 2016 .....	–3,587,000

The Committee recommends \$167,270,000 for Ocean Energy Management, \$2,500,000 below the fiscal year 2015 enacted level and \$3,587,000 below the budget request. This amount will be partially offset with the estimated collection of offsetting rental receipts and cost recovery fees totaling \$96,622,000. The Committee recommendation does not provide funding for National Ocean Policy Coastal and Marine Spatial Planning.

The Committee continues to include bill language authorizing higher minimum rates of basic pay through fiscal year 2017 for petroleum engineers and technicians at the Bureau of Ocean Energy Management and the Bureau of Safety and Environmental Enforcement.

#### BUREAU OF SAFETY AND ENVIRONMENTAL ENFORCEMENT

The Bureau of Safety and Environmental Enforcement is responsible for oversight of exploration, development, and production operations for oil, gas, and other marine minerals on the Outer Continental Shelf. Leases in Federal waters off the shores of California, Alaska, and the Gulf of Mexico provide about 25 percent of the Nation's oil production and more than 10 percent of domestic natural gas production. The Bureau facilitates the safe and environmentally responsible development of oil and gas and the conserva-

tion of offshore resources. The Bureau’s safety and environmental compliance activities include oil and gas permitting; facility inspections, regulations and standards development; safety and oil spill research; field operations; environmental compliance and enforcement; review of operator oil spill response plans; production and development; and operation of a national training center for inspectors and engineers.

OFFSHORE SAFETY AND ENVIRONMENTAL ENFORCEMENT

Appropriation enacted, 2015 .....	\$189,726,000
Budget estimate, 2016 .....	189,772,000
Recommended, 2016 .....	188,354,000
Comparison:	
Appropriation, 2015 .....	- 1,372,000
Budget estimate, 2016 .....	- 1,418,000

The Committee recommends \$188,354,000 for Offshore Safety and Environmental Enforcement, \$1,372,000 below the fiscal year 2015 enacted level and \$1,418,000 below the budget request. This amount will be partially offset with the estimated collection of offsetting rental receipts, cost recovery fees and inspection fees totaling \$116,207,000.

OIL SPILL RESEARCH

Appropriation enacted, 2015 .....	\$14,899,000
Budget estimate, 2016 .....	14,899,000
Recommended, 2016 .....	14,899,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The Committee recommends \$14,899,000 for Oil Spill Research, equal to the fiscal year 2015 enacted level and the budget request.

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

The Office of Surface Mining Reclamation and Enforcement (OSM), through its regulation and technology account, regulates surface coal mining operations to ensure that the environment is reclaimed once mining is completed. The OSM accomplishes this mission by providing grants and technical assistance to those States that maintain their own regulatory and reclamation programs and by conducting oversight of State programs. Further, the OSM administers the regulatory programs in the States that do not have their own programs and on Federal and tribal lands. Through its Abandoned Mine Land (AML) reclamation program, the OSM provides funding for environmental restoration at abandoned coal mines based on fees collected from current coal production operations. In their un-reclaimed condition these abandoned sites endanger public health and safety, and prevent the beneficial use of land and water resources. Mandatory appropriations provide funding for the abandoned coal mine sites as required under the 2006 amendments to the Surface Mining Control and Reclamation Act (SMCRA).

## REGULATION AND TECHNOLOGY

Appropriation enacted, 2015 .....	\$122,713,000
Budget estimate, 2016 .....	128,388,000
Recommended, 2016 .....	123,253,000
Comparison:	
Appropriation, 2015 .....	+540,000
Budget estimate, 2016 .....	-5,135,000

The Committee recommends \$123,253,000 for Regulation and Technology, \$540,000 above the fiscal year 2015 enacted level and \$5,135,000 below the budget request. The bill funds regulatory grants at \$68,590,000, equal to the fiscal year 2015 enacted level. The bill also includes the requested \$750,000 increase to support electronic permitting.

The Committee continues to reject the proposal to increase inspections and enhance Federal oversight of State regulatory programs. Delegation of the authority to the States is the cornerstone of the surface mining regulatory program, and State regulatory programs do not require enhanced Federal oversight to ensure continued implementation of a protective regulatory framework. Accordingly, the Committee has not provided the requested funding and FTE increase for those activities within the Regulation and Technology account.

## ABANDONED MINE RECLAMATION FUND

Appropriation enacted, 2015 .....	\$27,399,000
Budget estimate, 2016 .....	32,074,000
Recommended, 2016 .....	57,303,000
Comparison:	
Appropriation, 2015 .....	+29,904,000
Budget estimate, 2016 .....	+25,229,000

The Committee recommends \$57,303,000 for the Abandoned Mine Reclamation Fund, \$29,904,000 above the fiscal year 2015 enacted level and \$25,229,000 above the budget request. Of the funds provided, \$27,303,000 shall be derived from the Abandoned Mine Reclamation Fund consistent with the fiscal year 2015 appropriation, and \$30,000,000 shall be derived from the General Fund.

The Committee provides \$30,000,000 for grants to States for the reclamation of abandoned mine lands in conjunction with economic and community development and reuse goals. It is the Committee's intent that States shall use these funds to accelerate the remediation of AML sites with economic and community development end uses in mind. In doing so, the Committee envisions a collaborative partnership between the State AML programs and their respective State and local economic and community development programs that will explore ways to return legacy coal sites to productive reuse. The Committee notes that these grants are provided from the General Fund and are therefore separate from the estimated \$185 million in mandatory payments from the Abandoned Mine Land fund in fiscal year 2016. The Committee believes that an incremental approach is warranted to better understand programmatic impacts of proposing criteria changes to the underlying law. As such, the Committee expects that State efforts under this pilot program will inform future policy discussions, possibly under a reauthorization of SMCRA, which the Committee supports.

Grants shall be provided to the three Appalachian States with the largest unfunded needs for the reclamation of Priority 1 and

Priority 2 sites as delineated in the Abandoned Mine Land Inventory System. State AML programs, in consultation with State economic and community development authorities, shall develop a list of eligible AML projects in Appalachian counties that have a nexus to economic and community development, and select qualifying AML projects that have the potential to create long-term economic benefits. State AML programs should consider whether a model similar to the Appalachian Regional Commission grants process could streamline project selection, and whether an interagency agreement or other contracting mechanisms could streamline program implementation. Eligible grant recipients are limited to State and local governmental entities who may subcontract project-related activities as appropriate.

BUREAU OF INDIAN AFFAIRS AND BUREAU OF INDIAN EDUCATION

The Bureau of Indian Affairs, the Bureau of Indian Education, and the Office of the Assistant Secretary-Indian Affairs (together, “Indian Affairs”) provide services directly or through contracts, grants, or compacts to a service population of more than 1.7 million American Indians and Alaska Natives who are enrolled members of 566 federally recognized Tribes in the 48 contiguous United States and Alaska. While the role of the organization has changed significantly in the last four decades in response to a greater emphasis on Indian self-determination, Tribes still look to Indian Affairs for a broad spectrum of services. Programs are funded and operated in a highly decentralized manner, with almost 85 percent of all appropriations expended at the local level, and more than 62 percent of appropriations provided directly to Tribes and tribal organizations through grants, contracts, and compacts.

In preparation of the fiscal year 2016 budget, the Subcommittee held two days of hearings and received testimony from more than 75 witnesses on a variety of topics pertaining to American Indian and Alaska Native programs. The Federal government has a legal and moral obligation to provide quality services to American Indians and Alaska Natives. On a nonpartisan basis, the Committee continues to protect and, where possible, strengthen the budgets of those agencies and programs serving Indian Country in this bill to address longstanding needs.

OPERATION OF INDIAN PROGRAMS

(INCLUDING TRANSFER OF FUNDS)

Appropriation enacted, 2015 .....	\$2,429,236,000
Budget estimate, 2016 .....	2,660,591,000
Recommended, 2016 .....	2,505,670,000
Comparison:	
Appropriation, 2015 .....	+76,434,000
Budget estimate, 2016 .....	- 154,921,000

The Committee recommends \$2,505,670,000 for the operation of Indian programs, \$76,434,000 above the fiscal year 2015 enacted level and \$154,921,000 below the budget request. Except where indicated below, all budget line items are funded at the fiscal year 2015 enacted level. A detailed table of funding recommendations below the account level is provided at the end of this report.

*Contract Support Costs.*—The recommendation includes \$272,000,000 as requested for full funding of estimated contract

support costs. Bill language has been added making these funds available until expended and protecting against the use of other appropriations to meet unanticipated shortfalls. The Bureau is directed to work with Tribes and tribal organizations to ensure that budget estimates continue to be as accurate as possible.

*Road Maintenance.*—The recommendation includes \$26,693,000 for road maintenance as requested. The Committee recognizes that too many roads on Indian reservations are in poor condition and are a significant safety concern.

*Social Services.*—The recommendation includes \$41,871,000 for social services, \$1,000,000 above the fiscal year 2015 enacted level, for expansion of the Tiwahe (Family) Initiative.

*Trust-Natural Resources Management.*—The Committee is concerned about tribal communities that face severe challenges to their long-term resilience because of risks associated with climate, geography, and extreme weather conditions. The Bureau is encouraged to work with at-risk Tribes to identify and expedite the necessary resources to support mitigation and, where necessary, relocation.

*Trust-Real Estate Services.*—The recommendation includes \$125,817,000 for trust-real estate services, \$1,185,000 below the fiscal year 2015 enacted level.

The Committee is concerned about the Department's goal of placing more than 500,000 acres of land into trust by the end of fiscal year 2016. Such a goal incentivizes haste and leads to situations such as in Clark County, Washington. On March 9, 2015, the Department took into trust approximately 152 acres in Clark County on behalf of the Cowlitz Indian tribe, notwithstanding ongoing litigation in the matter. The Committee directs the Department to: (1) report to the Committee within 30 days of enactment of this Act on (a) the process it has established for taking the land out of trust should the court order the Department to do so; and (b) the cost to the Department of taking the land out of trust; and (2) focus not on an acre goal but on reducing the current backlog of fee-to-trust applications. It is entirely appropriate for the government's goal to be to process those applications as efficiently and fairly as possible. The Committee recommends cuts to central and regional oversight in light of the program's current goal.

*Public Safety and Justice.*—The recommendation includes \$357,358,000 for public safety and justice, \$4,508,000 above the fiscal year 2015 enacted level. Tribal Justice and Support is funded at \$7,245,000, which is \$1,000,000 above the budget request, in order to increase technical assistance and training in Indian Country to carry out the new provisions of the Violence Against Women Reauthorization Act of 2013. Additional increases above the fiscal year 2015 enacted level include \$1,000,000 for expansion of the Tiwahe Initiative, and \$1,500,000 for tribal courts.

For the purpose of addressing the needs of American Indian youth in custody at tribal detention centers operated or administered by the BIA, the Committee considers educational and health-related services to juveniles in custody to be allowable costs for detention/corrections program funding.

*Community and Economic Development.*—The recommendation includes the requested amount to establish the Indian Energy

Service Center. The Bureau is directed to consult with affected tribes regarding staffing and related functions of the new office.

*Bureau of Indian Education.*—The Committee recommends \$854,160,000 for Bureau of Indian Education (BIE) system operations and maintenance, \$43,629,000 above the fiscal year 2015 enacted level and \$50,304,000 below the budget request. Indian education remains among the Committee's top priorities because it is a fundamental trust responsibility and because elementary and secondary students in particular have fallen far behind their peers for reasons now well documented by the Government Accountability Office, the Department of Education, and others.

The Committee recommends \$15,520,000 for early child and family development, equal to the fiscal year 2015 enacted level. The Committee strongly supports early childhood development models that address the achievement gap of Indian children primarily located on rural reservations by teaching preschool Indian children the skills they need to begin school and offering developmental opportunities for parents. The BIE is directed to publish its report on the 2013–14 school year internal review of early childhood education programs in order to improve program direction and transparency.

The recommendation includes \$75,335,000 to fully fund tribal grant support costs, as requested, \$12,940,000 above the fiscal year 2015 enacted level. Fully funding these costs is consistent with the policy of fully funding contract support costs, and is instrumental for tribal control of schools.

The recommendation includes \$2,000,000 as requested for the development and operation of tribal departments or divisions of education as authorized in 25 U.S.C. 2020. The recommendation includes \$1,000,000 to restore juvenile detention education program grants.

The recommendation includes \$14,739,000 for the Johnson-O'Malley program. The Bureau is directed to consult with Tribes and Congress before proposing any changes in the distribution of future funds or in the frequency or method of future counts.

The Bureau is encouraged to coordinate with the Indian Health Service to establish a pilot program integrating preventive dental care at schools within the Bureau system.

The Committee is supportive of standards and curricula that emphasize tribal history, language and culture. As alternative proposals are considered, language immersion should be carefully considered as a serious option for improved language development and student outcomes.

The Committee continues language limiting the expansion of grades and schools in the BIE system, including charter schools. The intent of the language is to prevent already limited funds from being spread further to additional schools and grades. The intent is not to limit tribal flexibility at existing schools. Nothing in the bill is intended to prohibit a Tribe from converting a tribally-controlled school already in the BIE system to a charter school in accordance with State and Federal law.

The recommendation continues bill language providing the Secretary with the authority to approve satellite locations of existing BIE schools if a Tribe can demonstrate that the establishment of such locations would provide comparable levels of education as are

being offered at such existing BIE schools, and would not significantly increase costs to the Federal Government. The intent is for this authority to be exercised only in extraordinary circumstances to provide Tribes with additional flexibility regarding where students are educated without compromising how they are educated, and to significantly reduce the hardship and expense of transporting students over long distances, all without unduly increasing costs that would otherwise unfairly come at the expense of other schools in the BIE system.

The Committee acknowledges the inconsistency that not all tribal colleges and universities are forward-funded so as to align with academic calendars instead of fiscal calendars. The Administration is encouraged to submit a proposal beginning with the fiscal year 2017 budget submission to transition to forward-funding over a period of three to five years the remaining tribal colleges and universities, including the Institute of American Indian and Alaska Native Culture and Arts Development.

The Committee remains concerned that control of BIE’s budget, procurement, hiring, and facilities maintenance and construction reside not within BIE but within the Bureau of Indian Affairs and the Deputy Assistant Secretary—Management (see Government Accountability Office report GAO–13–774). The Secretary is urged to reorganize Indian Affairs so as to improve leadership stability and accountability within the BIE.

*Indirect Costs.*—The Committee is concerned that a recent Administration policy change with regard to indirect cost reimbursements may not fairly apply to Indian Tribes and tribal organizations. The Secretary is directed to report to the Committee justifying this policy change and in particular its application to tribal enrollment activities.

CONSTRUCTION

(INCLUDING TRANSFER OF FUNDS)

Appropriation enacted, 2015 .....	\$128,876,000
Budget estimate, 2016 .....	188,973,000
Recommended, 2016 .....	187,620,000
Comparison:	
Appropriation, 2015 .....	+58,744,000
Budget estimate, 2016 .....	– 1,353,000

The Committee recommends \$187,620,000 for Construction, \$58,744,000 above the fiscal year 2015 enacted level and \$1,353,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report. The Committee recommendation includes further details below.

*Education.*—The recommendation includes \$133,245,000 for Education Construction, as requested, \$58,744,000 above the fiscal year 2015 enacted level. The recommendation reestablishes the budget line item for replacement of individual BIE facilities that pose serious health and safety risks to students, as requested. Serious health and safety hazards exist at BIE facilities across the country, including the Bug-O-Nay-Ge-Shig School of the Leech Lake Band of Ojibwe. The Secretary is directed to develop a comprehensive plan to work with Tribes to repair and replace all substandard educational facilities. The Secretary is urged to consider alternative

funding mechanisms to supplement appropriations for replacing schools and facilities, including the use of bonds.

*Public Safety and Justice.*—The Bureau is encouraged to consider establishing regional detention centers at new or existing facilities, such as the Shoshone-Bannock Tribes' Justice Center, as it works to combat the crime problem in Indian Country.

*Maintenance Shortfalls.*—The Bureau is encouraged to request full funding for facilities maintenance needs in future budget requests.

#### INDIAN LAND AND WATER CLAIM SETTLEMENTS AND MISCELLANEOUS PAYMENTS TO INDIANS

Appropriation enacted, 2015 .....	\$35,655,000
Budget estimate, 2016 .....	67,656,000
Recommended, 2016 .....	65,412,000
Comparison:	
Appropriation, 2015 .....	+29,757,000
Budget estimate, 2016 .....	–2,244,000

The Committee recommends \$65,412,000 for Indian Land and Water Claim Settlements and Miscellaneous Payments to Indians, \$29,757,000 above the fiscal year 2015 enacted level and \$2,244,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report.

The Committee believes that the resolution of pending Indian water rights settlements is critically important to resolve outstanding legal claims against the United States and to provide Tribes with clean and reliable water supplies that are fundamental to economic growth and self-determination. They also benefit surrounding communities by providing water rights certainty. The Committee supports the Department's efforts to fulfill commitments relating to Indian water rights settlements and its participation in negotiations of the Pechanga Band of Luiseno Mission Indians Water Rights Settlement.

#### INDIAN GUARANTEED LOAN PROGRAM ACCOUNT

Appropriation enacted, 2015 .....	\$7,731,000
Budget estimate, 2016 .....	7,748,000
Recommended, 2016 .....	7,731,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	–17,000

The Committee recommends \$7,731,000 for the Indian Guaranteed Loan Program Account, equal to the fiscal year 2015 enacted level and \$17,000 below the budget request. Unemployment is a serious problem in Indian Country. This program enables Indian Tribes and native-owned businesses to secure financing for development projects and for startup and expansion of business operations.

#### DEPARTMENTAL OFFICES

##### OFFICE OF THE SECRETARY

The Office of the Secretary supports a wide-range of Departmental business, policy, and oversight functions. In September 2010, Secretarial Order 3306 established the Office of Natural Resources Revenue as part of the reorganization of the former Min-

erals Management Service (MMS). This revenue collection and compliance function is now managed within the Office of the Secretary.

DEPARTMENTAL OPERATIONS

Appropriation enacted, 2015 .....	\$265,263,000
Budget estimate, 2016 .....	327,939,000
Recommended, 2016 .....	717,279,000
Comparison:	
Appropriation, 2015 .....	+452,016,000
Budget estimate, 2016 .....	+389,340,000

The Committee recommends \$717,279,000 for Departmental Operations, \$452,016,000 above the fiscal year 2015 enacted level and \$389,340,000 above the budget request. Increases above the fiscal year 2015 enacted level include \$1,288,000 to support the Office of Natural Resources Revenue (ONNR) Onshore Production Verification pilot; \$2,600,000 as requested for ONNR to help with certain Trust responsibilities for the Osage Nation consistent with the services ONNR already provides to every other Tribe; and \$452,000,000 to fully fund the Payments in Lieu of Taxes (PILT) program for fiscal year 2016. The bill does not provide requested funds for the Coastal Resilience Fund.

*National Monument Designations.*—The Department is directed to work collaboratively with interested parties, including but not limited to, the Congress, States, local communities, tribal governments and others prior to planning, implementing, or making national monument designations.

*Software License Management.*—The Committee commends the Department for instituting reforms addressing the management of software licenses, including the capability to obtain automated reports on demand, to better manage these assets. The Committee urges the Department to use these reports to manage software spending Department-wide and require its bureaus and smaller offices which include the Office of the Secretary, Office of the Special Trustee, Office of Insular Affairs, Office of the Solicitor, and the Office of the Inspector General, to purchase software licenses on contract vehicles that leverage Interior's economies of scale. The Committee directs the Department to provide a briefing not later than 180 days after enactment of this Act on efficiencies obtained through automated inventories of software licenses in use across the Department.

*Bill Language.*—The Committee has included bill language providing full funding for the Payments in Lieu of Taxes (PILT) Program for fiscal year 2016. The bill does not include language authorizing the establishment of the Department of the Interior Experienced Services Program. While the Committee supports the Department's goal of utilizing the skills of older workers to help it accomplish its mission and objectives, the Committee urges the Department to work closely with the authorizing committees of jurisdiction in the House and Senate to achieve this goal within the context of the upcoming reauthorization of the Older Americans Act.

## INSULAR AFFAIRS

## ASSISTANCE TO TERRITORIES

The Office of Insular Affairs (OIA) was established on August 4, 1995, through Secretarial Order No. 3191, which also abolished the former Office of Territorial and International Affairs. The OIA has important responsibilities to help the United States government fulfill its responsibilities to the four U.S. territories of Guam, American Samoa (AS), U.S. Virgin Islands (USVI) and the Commonwealth of the Northern Mariana Islands (CNMI) and also the three freely associated States: the Federated States of Micronesia (FSM), the Republic of the Marshall Islands (RMI) and the Republic of Palau. The permanent and trust fund payments to the territories and the compact nations provide substantial financial resources to these governments. During fiscal year 2004, financial arrangements for the Compacts of Free Association with the FSM and the RMI were implemented. These also included mandatory payments for certain activities previously provided in discretionary appropriations as well as Compact impact payments of \$30,000,000 per year split among Guam, CNMI, AS, and Hawaii.

Appropriation enacted, 2015 .....	\$85,976,000
Budget estimate, 2016 .....	99,660,000
Recommended, 2016 .....	85,976,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 13,684,000

The Committee recommends \$85,976,000 for Assistance to Territories, equal to the fiscal year 2015 enacted level and \$13,684,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report.

## COMPACT OF FREE ASSOCIATION

Appropriation enacted, 2015 .....	\$16,465,000
Budget estimate, 2016 .....	3,318,000
Recommended, 2016 .....	3,318,000
Comparison:	
Appropriation, 2015 .....	- 13,147,000
Budget estimate, 2016 .....	0

The Committee recommends \$3,318,000 for Compact of Free Association, \$13,147,000 below the fiscal year 2015 enacted level and equal to the budget request. The Committee expects the Compact will be renegotiated and therefore the discretionary stopgap funding will not be necessary in fiscal year 2016. A detailed table of funding recommendations below the account level is provided at the end of this report.

## OFFICE OF THE SOLICITOR

## SALARIES AND EXPENSES

Appropriation enacted, 2015 .....	\$65,800,000
Budget estimate, 2016 .....	69,888,000
Recommended, 2016 .....	65,142,000
Comparison:	
Appropriation, 2015 .....	- 658,000
Budget estimate, 2016 .....	- 4,746,000

The Committee recommends \$65,142,000 for salaries and expenses of the Office of the Solicitor, \$658,000 below the fiscal year 2015 enacted level and \$4,746,000 below the budget request.

OFFICE OF INSPECTOR GENERAL  
SALARIES AND EXPENSES

Appropriation enacted, 2015 .....	\$50,047,000
Budget estimate, 2016 .....	52,224,000
Recommended, 2016 .....	50,047,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-2,177,000

The Committee recommends \$50,047,000 for salaries and expenses of the Office of Inspector General, equal to the fiscal year 2015 enacted level and \$2,177,000 below the budget request. The Office is encouraged to update its 2004 report on Indian detention facilities.

OFFICE OF THE SPECIAL TRUSTEE FOR AMERICAN INDIANS  
FEDERAL TRUST PROGRAMS  
(INCLUDING TRANSFER OF FUNDS)

Congress has designated the Secretary of the Interior as the trustee delegate with responsibility for approximately 55 million surface acres of land, 57 million acres of subsurface mineral interests, and nearly \$4.4 billion that is held in trust by the Federal Government on behalf of American Indians, Alaska Natives, and federally recognized Indian Tribes. The Office of the Special Trustee's trust management of these assets includes conserving, maintaining, accounting, investing, disbursing, and reporting to individual Indians and federally recognized Tribes and tribal organizations on asset transactions generated from sales, leasing and other commercial activities on these lands.

Appropriation enacted, 2015 .....	\$139,029,000
Budget estimate, 2016 .....	142,978,000
Recommended, 2016 .....	139,029,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-3,949,000

The Committee recommends \$139,029,000 for Federal trust programs, equal to the fiscal year 2015 enacted level and \$3,949,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report.

DEPARTMENT WIDE PROGRAMS  
WILDLAND FIRE

The Department's Wildland Fire Management and FLAME wild-fire suppression reserve accounts support fire activities for the Bureau of Land Management, the National Park Service, the Fish and Wildlife Service, and the Bureau of Indian Affairs. The Committee recommends a total of \$896,795,000 for the Department's wildland fire accounts, including \$92,000,000 in the FLAME wildfire sup-

pression reserve fund. This fully funds the fire accounts at the 10-year average of expenditures.

#### WILDLAND FIRE MANAGEMENT

Appropriation enacted, 2015 .....	\$804,779,000
Budget estimate, 2016 .....	805,495,000
Recommended, 2016 .....	804,795,000
Comparison:	
Appropriation, 2015 .....	+16,000
Budget estimate, 2016 .....	- 700,000

The Committee recommends \$804,795,000 for Wildland Fire Management at the Department of the Interior, \$16,000 above the fiscal year 2015 enacted level and \$700,000 below the budget request. The detailed allocation of funding for these accounts is included in the table at the end of this report.

The Committee notes that the budget request included a provision almost identical to legislation that has been developed in the House (H.R. 167) and the Senate (S. 235). The budget request proposes to allow wildland fire suppression costs above 70 percent of the 10-year average for fire suppression to be paid from within the discretionary budget cap adjustment established for natural disasters, recognizing that wildland fires are a natural disaster akin to hurricanes, tornadoes, and floods. As the issue of the disaster cap adjustment falls outside of the Committee's jurisdiction, the Committee's recommendation does not include the request for suppression funding through the disaster cap adjustment. As in recent years, suppression operations are fully funded at the 10-year average level within the suppression operations account and the FLAME wildfire suppression reserve fund.

*Wildfire Preparedness.*—The Committee recommends \$318,970,000 for Wildfire Preparedness, equal to the fiscal year 2015 enacted level and \$4,715,000 below the budget request. The Department should immediately notify the Committees on Appropriations if it appears that funding shortfalls may limit needed fire-fighting capacity.

*Wildfire Suppression Operations.*—The Committee recommends \$291,673,000, for Wildfire Suppression Operations, \$16,000 above the fiscal year 2015 enacted level and \$23,102,000 above the budget request.

*Fuels Management.*—The Committee recommends \$164,000,000 for the Fuels Management program, equal to the fiscal year 2015 enacted level and \$15,721,000 above the budget request.

The Department is directed to implement effective treatments in frequent fire forests that restore forest resiliency and reduce hazardous fuels. Treatments should be placed to effectively modify fire behavior and protect assets at risk including life and property.

*Burned Area Rehabilitation.*—The Committee recommends \$18,035,000 for the Burned Area Rehabilitation program, equal to the fiscal year 2015 enacted level and \$935,000 below the budget request. The Committee notes that funding for emergency stabilization is meant to supplement emergency stabilization funding provided under suppression (generally ten percent), not replace it. The Committee is also concerned by the delay of emergency stabilization and rehabilitation funds to State and/or regional offices and directs the Department to more quickly allocate these funds so that critical work can be completed in a timely manner. Finally, the De-

partment is directed to work with the Bureau of Land Management on the seed procurement direction provided in this report.

The Committee is concerned with the pace of planning and implementation of post-fire rehabilitation by the Department of the Interior. The slow pace of rehabilitation leaves communities unable to access timber resources and delays the regeneration of Federal forests. The Committee directs the Department of the Interior to prioritize and expedite planning and implementation of post-fire rehabilitation projects.

#### FLAME WILDFIRE SUPPRESSION RESERVE FUND

##### (INCLUDING TRANSFER OF FUNDS)

Appropriation enacted, 2015 .....	\$92,000,000
Budget estimate, 2016 .....	0
Recommended, 2016 .....	92,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	+92,000,000

The Committee recommends \$92,000,000 for the FLAME Wildfire Suppression Reserve Fund, equal to the fiscal year 2015 enacted level and \$92,000,000 above the budget request. As discussed above under the Wildland Fire Management account, the Committee fully funds the 10-year average expenditure for wildfire suppression.

#### CENTRAL HAZARDOUS MATERIALS FUND

Appropriation enacted, 2015 .....	\$10,010,000
Budget estimate, 2016 .....	10,011,000
Recommended, 2016 .....	10,010,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-1,000

The Committee recommends \$10,010,000 for the Central Hazardous Materials Fund, equal to the fiscal year 2015 enacted level and \$1,000 below the budget request.

#### NATURAL RESOURCE DAMAGE ASSESSMENT AND RESTORATION

##### NATURAL RESOURCE DAMAGE ASSESSMENT FUND

Appropriation enacted, 2015 .....	\$7,767,000
Budget estimate, 2016 .....	9,236,000
Recommended, 2016 .....	7,689,000
Comparison:	
Appropriation, 2015 .....	-78,000
Budget estimate, 2016 .....	-1,547,000

The Committee recommends \$7,689,000 for the Natural Resource Damage Assessment Fund, \$78,000 below the fiscal year 2015 enacted level and \$1,547,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report.

## WORKING CAPITAL FUND

Appropriation enacted, 2015 .....	\$57,100,000
Budget estimate, 2016 .....	74,462,000
Recommended, 2016 .....	56,529,000
Comparison:	
Appropriation, 2015 .....	– 571,000
Budget estimate, 2016 .....	– 17,933,000

The Committee recommends \$56,529,000 for the Working Capital Fund, \$571,000 below the fiscal year 2015 enacted level and \$17,933,000 below the budget request.

## GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

## (INCLUDING TRANSFERS OF FUNDS)

Section 101 continues a provision providing for emergency transfer authority (intra-bureau) with the approval of the Secretary.

Section 102 continues a provision providing for emergency transfer authority (Department-wide) with the approval of the Secretary.

Section 103 continues a provision providing for the use of appropriations for certain services.

Section 104 continues a provision permitting the transfer of funds between the Bureau of Indian Affairs and Bureau of Indian Education, and the Office of the Special Trustee for American Indians.

Section 105 continues a provision permitting the redistribution of tribal priority allocation and tribal base funds to alleviate funding inequities.

Section 106 continues a provision authorizing the acquisition of lands for the purpose of operating and maintaining facilities that support visitors to Ellis, Governors, and Liberty Islands, NJ and NY.

Section 107 continues a provision allowing Outer Continental Shelf inspection fees to be collected by the Secretary of the Interior.

Section 108 continues a provision allowing for the reorganization of the Bureau of Ocean Energy Management, Regulation and Enforcement only in conformance with Committee reprogramming guidelines.

Section 109 continues a provision allowing the Bureau of Land Management (BLM) to enter into long-term cooperative agreements for long-term care and maintenance of excess wild horses and burros on private land.

Section 110 continues a provision dealing with the U.S. Fish and Wildlife Service's responsibilities for mass marking of salmonid stocks.

Section 111 modifies a provision addressing BLM actions regarding grazing on public lands.

Section 112 continues a provision prohibiting funds to implement, administer or enforce Secretarial Order 3310 issued by the Secretary of the Interior on December 22, 2010.

Section 113 continues a provision providing the Secretary of the Interior statutory authority to enter into rental or lease agreements that benefit Bureau of Indian Education operated schools.

Section 114 addresses the National Park Service's ability to implement the Volunteers in Parks program in anticipation of in-

creased volunteer activity related to the Service's Centennial in 2016.

Section 115 continues a provision allowing the Bureau of Indian Affairs and Bureau of Indian Education to more efficiently and effectively perform reimbursable work.

Section 116 addresses National Heritage Areas.

Section 117 delays the issuance of further rules for sage-grouse.

Section 118 continues a provision providing the Secretary of the Interior certain offshore pay authority.

Section 119 continues a provision providing the Secretary of the Interior certain onshore pay authority.

Section 120 maintains the status quo on regulations relating to the legal domestic trade and transport of products containing ivory.

Section 121 directs the Secretary to reissue two final rules removing recovered wolves in Wyoming and the Great Lakes from the endangered species list.

Section 122 protects human activities unrelated to the decline of the northern long-eared bat.

## TITLE II—ENVIRONMENTAL PROTECTION AGENCY

The Environmental Protection Agency (EPA) was created by Reorganization Plan No. 3 of 1970, which consolidated nine programs from five different agencies and departments. Major EPA programs include air and water quality, drinking water, hazardous waste, research, pesticides, radiation, toxic substances, enforcement and compliance assurance, pollution prevention, Inland oil spill, Superfund, Brownfields, and the Leaking Underground Storage Tank program. In addition, EPA provides Federal assistance for wastewater treatment, sewer overflow control, drinking water facilities, other water infrastructure projects, and diesel emission reduction projects. The Agency is responsible for conducting research and development, establishing environmental standards through the use of risk assessment and cost-benefit, monitoring pollution conditions, seeking compliance through enforcement actions, managing audits and investigations, and providing technical assistance and grant support to States and Tribes, which are delegated authority for much of the program implementation. Under existing statutory authority, the Agency contributes to specific homeland security efforts and may participate in international environmental activities.

Among the statutes for which the Environmental Protection Agency has sole or significant oversight responsibilities are:

National Environmental Policy Act of 1969.

Federal Insecticide, Fungicide, and Rodenticide Act.

Toxic Substances Control Act.

Clean Water Act [Federal Water Pollution Control Act].

Federal Food, Drug and Cosmetic Act.

Ocean Dumping Act [Marine Protection, Research, and Sanctuaries Act of 1972].

Oil Pollution Act of 1990.

Safe Drinking Water Act [Public Health Service Act (Title XIV)].

Solid Waste Disposal Act, as amended by the Resource Conservation and Recovery Act.

Clean Air Act.

Great Lakes Legacy Act of 2002.

Bioterrorism Preparedness and Response Act of 2002.

Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA).

Small Business Liability Relief and Brownfields Revitalization Act of 2002 (amending CERCLA).

Emergency Planning and Community Right-to-Know Act of 1986.

Pollution Prevention Act of 1990.

Pollution Prosecution Act of 1990.

Pesticide Registration Improvement Act of 2003.

Energy Policy Act of 2005.

Energy Independence and Security Act of 2007.

For fiscal year 2016, the Committee recommends \$7,422,157,000 for the Environmental Protection Agency, \$717,730,000 below the fiscal year 2015 enacted level and \$1,169,561,000 below the budget request. Comparison to the budget request and fiscal year 2015 enacted levels is shown by account in the table at the end of the report.

*Reprogramming.*—The Agency is held to the reprogramming limitation of \$1,000,000. This limitation will be applied to each program area in every account at the levels provided in the table at the end of this report. This will allow the Agency the flexibility to reprogram funds within a set program area. However, where the Committee has cited funding levels for certain program projects or activities within a program area, the reprogramming limitation continues to apply to those funding levels. Further, the Agency may not use any amount of de-obligated funds to initiate a new program, office, or initiative without the prior approval of the Committee. The other guidelines laid out in the “Reprogramming Guidelines” section of this report continue to be in effect.

*Congressional Budget Justification.*—The Committee directs the Agency to include in future justifications the following items: (1) a comprehensive index of programs and activities within the program projects; (2) the requested bill language, with changes from the enacted language highlighted, at the beginning of each account section; (3) a justification for every program/project, including those proposed for elimination; (4) a comprehensive, detailed explanation of all changes within a program project; (5) a table showing consolidations, realignments or other transfers of resources and personnel from one program project to another such that the outgoing and receiving program projects offset and clearly illustrate a transfer of resources; and, (6) a table listing the budgets and FTE by major office within each National Program Management area with pay/non-pay breakouts. Further, if EPA is proposing to change state allocation formulas for the distribution of appropriated funds, then EPA should include such proposals in the Congressional justification.

#### SCIENCE AND TECHNOLOGY

The Science and Technology (S&T) account funds all Environmental Protection Agency research (including Superfund research activities paid with funds moved into this account from the Hazardous Substance Superfund account). This account includes programs carried out through grants, contracts, and cooperative agreements, cooperative research and development agreements, and interagency agreements, with other Federal agencies, States, universities, nonprofit organizations, and private business, as well as

in-house research. It also funds personnel compensation and benefits, travel, supplies and operating expenses, including rent, utilities and security, for all Agency research. Research addresses a wide range of environmental and health concerns across all environmental media and encompasses both long-term basic and near-term applied research to provide the scientific knowledge and technologies necessary for preventing, regulating, and abating pollution, and to anticipate emerging environmental issues.

Appropriation enacted, 2015 .....	\$734,648,000
Budget estimate, 2016 .....	769,088,000
Recommended, 2016 .....	704,918,000
Comparison:	
Appropriation, 2015 .....	– 29,730,000
Budget estimate, 2016 .....	– 64,170,000

The bill provides \$704,918,000 for Science and Technology, \$29,730,000 below the fiscal year 2015 enacted level and \$64,170,000 below the budget request. The Committee recommends that \$16,217,000 be paid to this account from the Hazardous Substance Superfund account for ongoing research activities. A detailed table of funding recommendations below the account level is provided at the end of this report, and the Committee provides the following additional detail by program area:

*Homeland Security.*—The Committee recommends \$37,122,000 and rejects the program change for the Climate Ready Water Utilities Initiative.

*Research: Air, Climate and Energy.*—The Committee recommends \$88,282,000 and does not include funding for proposed additional hydraulic fracturing research activities with the Department of Energy and the Department of the Interior.

*Research: Chemical Safety and Sustainability.*—The Committee recommends \$126,930,000, equal to the fiscal year 2015 enacted level. The Committee continues to support EPA’s leadership role in the creation of a new paradigm for chemical risk assessment based on the incorporation of advanced molecular biological and computational methods in lieu of animal toxicity tests. The Committee encourages EPA to continue to expand its support for computational approaches in health research to further define toxicity and disease pathways and develop tools for their integration into evaluation strategies. Fiscal year 2016 funding should be prioritized to expeditiously incorporate these emerging scientifically validated tools in EPA risk assessments along with other Agency programs as a way to more effectively and efficiently identify risks.

*Research: National Priorities.*—The bill provides \$4,100,000 which shall be used for extramural research grants, independent of the STAR grant program, to fund high-priority water quality and availability research by not-for-profit organizations who often partner with the Agency. Funds shall be awarded competitively with priority given to partners proposing research of national scope for “Intelligent Water Systems” and who provide a 25 percent match. The Agency is directed to allocate funds to grantees within 180 days of enactment of this Act.

Further, the Committee provides \$3,000,000 for the Agency to further research on oil and gas development in the Appalachian Basin, of which \$2,000,000 is available for extramural funding.

*Research: Safe and Sustainable Water Resources.*—The Committee recommends \$102,576,000, and includes no funding for the climate research plan that EPA initiated in fiscal year 2015 without Congressional approval. To date Congress has provided nearly \$30 million to fund EPA’s research to determine whether there is a relationship between hydraulic fracturing activities and drinking water. The Committee finds this amount to be sufficient to accomplish the requested study and provides no further funding in fiscal year 2016.

*Additional Guidance.*—The Committee has included the following additional guidance with respect to funding provided under this account.

*Validation and Reproducibility of Scientifically Significant Studies.*—The National Academy of Sciences has acknowledged that reproducibility of research results is fundamental to the scientific process. The Committee understands that EPA is likely to rely on the findings of the Zhang et al. (Cancer Epidemiol Biomarkers Prev; 2010 Jan; 19(1); 80–88) study for scientifically significant decisions in fiscal year 2016. This study, however, has drawn criticisms about its methods and interpretations. Given the public health importance of the findings of this study, validation of the findings is crucial. Therefore, EPA is directed to develop a peer-reviewed protocol to replicate the scientific findings of this study. Following development of the protocol, the Agency is directed to issue a request for proposals and award a contract to conduct this replication study. Further, EPA is directed to incorporate the results of the replication study into any draft or final scientific assessments prior to making such assessments publicly available.

#### ENVIRONMENTAL PROGRAMS AND MANAGEMENT

The Environmental Programs and Management account encompasses a broad range of abatement, prevention, enforcement, and compliance activities, and personnel compensation, benefits, travel, and expenses for all programs of the Agency except Science and Technology, Hazardous Substance Superfund, Leaking Underground Storage Tank Trust Fund, Inland Oil Spill Programs, and the Office of Inspector General.

Abatement, prevention, and compliance activities include setting environmental standards, issuing permits, monitoring emissions and ambient conditions and providing technical and legal assistance toward enforcement, compliance, and oversight. In most cases, the States are directly responsible for actual operation of the various environmental programs, and the Agency’s activities include oversight and assistance.

In addition to program costs, this account funds administrative costs associated with the operating programs of the Agency, including support for executive direction, policy oversight, resources management, general office and building services for program operations, and direct implementation of Agency environmental programs for headquarters, the ten EPA regional offices, and all non-research field operations.

Appropriation enacted, 2015 .....	\$2,613,679,000
Budget estimate, 2016 .....	2,841,718,000
Recommended, 2016 .....	2,472,289,000
Comparison:	
Appropriation, 2015 .....	– 141,390,000
Budget estimate, 2016 .....	– 369,429,000

The bill provides \$2,472,289,000 for Environmental Programs and Management, \$141,390,000 below the fiscal year 2015 enacted level and \$369,429,000 below the budget request. A detailed table of funding recommendations below the account level is provided at the end of this report, and the Committee provides the following additional detail by program area:

*Brownfields.*—The Committee recommends \$23,680,000 and does not include funding for the Smart Growth program, a voluntary interagency partnership established in 2009 without a Congressional mandate.

*Clean Air and Climate.*—The Committee recommends \$247,472,000. Within this amount, the recommendation includes \$20,036,000 for Federal Stationary Source Regulations, and the amount provided does not include funding for EPA’s greenhouse gas rules for stationary sources. Within the funds provided, the Committee includes a \$3,000,000 increase to enhance the efficiency and effectiveness of both preconstruction and operating permitting programs.

*Environmental Protection: National Priorities.*—The bill provides \$12,700,000 for a competitive grant program to provide technical assistance for improved water quality or safe drinking water to rural and urban communities or individual private well owners. The Agency is directed to provide \$11,000,000 for grants to qualified not-for-profit organizations, on a national or multi-state regional basis, for on-site training and technical assistance for water systems in rural or urban communities. The Agency is also directed to provide \$1,700,000 for grants to qualified not-for-profit organizations for technical assistance for individual private well owners, with priority given to organizations that provide technical and educational assistance to individual private well owners. The Agency shall require each grantee to provide a minimum 10 percent match, including in-kind contributions. The Agency is directed to allocate funds to grantees within 180 days of enactment of this Act.

*Geographic Programs.*—The bill provides \$400,523,000. The Committee has provided funding for programs that support restoration and protection of our nation’s most important water bodies, as protection of these resources continues to be a priority. From within the amount provided, the Committee directs the following:

*Great Lakes Restoration Initiative.*—The Committee recommends \$300,000,000 for the Great Lakes Restoration Initiative (GLRI) equal to the fiscal year 2015 enacted level and \$50,000,000 above the budget request. With this funding the Committee has provided more than \$2 billion to restore the Great Lakes since fiscal year 2010 and the GLRI continues to be the largest single recipient of funds within Geographic Programs. The Agency shall continue to follow the direction as provided in House Report 112–589. Further, recent algal blooms have emerged as a significant threat to public health. As such, the Committee supports a coordinated Federal approach to addressing this issue, including the Agency’s collaboration with NASA, NOAA, and the U.S. Geological Survey to develop

an early warning indicator system. The Agency is encouraged to evaluate whether the Great Lakes Federal Interagency Task Force should designate a coordinator to work with Federal, State, tribal, and local governments.

*Chesapeake Bay.*—The Committee recommends \$60,000,000. From within the amount provided, \$5,000,000 is for nutrient and sediment removal grants and \$5,000,000 is for small watershed grants to control polluted runoff from urban, suburban and agricultural lands.

*Puget Sound.*—The Committee recommends \$25,000,000. Funds shall be allocated in the same manner as directed in House Report 112–331. The Committee directs EPA to expeditiously obligate funds, in a manner consistent with the authority and responsibilities under Section 320 and the National Estuary Program.

*Indoor Air and Radiation.*—The Committee recommends \$29,237,000. The Committee rejects the requested increase to support the uranium mill tailings rulemaking and directs EPA to withdraw the proposed rule as the Committee questions whether EPA has enough data to inform a revised standard and proceed with a final rule. Should EPA need additional resources for a data collection, the Committee will consider those requests in the future.

Using funds provided herein for fiscal year 2016, the Administrator shall conduct a study to survey the level of radon present in the Nation's school buildings consistent with 15 USC 2667. The Administrator shall transmit a report to Congress with the data and results of the study and shall share the data and results of the study with State, local and tribal school district administrators consistent with the terms and conditions of this Act for posting of reports. The report should identify school districts in high-risk radon areas.

To facilitate an effective school district response in all areas, not just those in high-risk areas, an additional \$500,000 is provided for the distribution of technical guidance. The Administrator shall distribute technical guidance using consensus national standards to all school districts to guide their engineering and architecture staff, consultants, radon contractors, and other professionals to reduce exposure of children to radon.

Further, using the funds provided, EPA should develop in consultation with the Centers for Disease Control and Prevention, the Department of Housing and Urban Development, and the Department of Agriculture, a national awareness campaign to educate consumers about radon health impacts.

*Information Exchange/Outreach.*—The Committee recommends \$109,010,000 of which \$2,200,000 is for the Administrator's Immediate Office, \$6,100,000 is for the Office of Congressional and Intergovernmental Affairs, and \$4,000,000 is for the Office of Public Affairs. The Committee is troubled by reports that the Agency engaged in grassroots lobbying during the public comment period of the Clean Water Rule: Definition of 'Waters of the United States (WOTUS).' The Agency, in possible violation of the Anti-Lobbying Act (18 U.S. Code § 1913) and Department of Justice legal opinions, sought out public opinion from stakeholders supportive of the WOTUS rule in order to influence the public comment outcome. The EPA Administrator later used the skewed results as evidence of public support before Congress. The Committee instructs the

Agency to follow current law and not engage in inappropriate grassroots lobbying in Agency communications to the public.

*Legal/Science/Regulatory/Economic Review.*—The Committee recommends \$90,503,000 and does not include funding for the Smart Growth Program. The Committee recommends \$20,700,000 for the Office of Policy.

*Operations and Administration.*—The Committee recommends \$480,482,000. The Committee remains concerned about a number of management issues that have surfaced over the past year. The lack of administrative controls for employee payroll, travel, bonuses, and time and attendance has fostered several instances of waste, fraud and abuse of appropriated funds. The Committee continues to be troubled by the Agency's practice of transferring carry-over amounts to fund current year payroll, fixed costs, or contract needs. This practice invalidates Agency estimates of fixed cost needs and further calls into question the Agency's management of funds. The Committee calls for increased oversight and financial management at the Agency and will be closely monitoring adjustments of appropriated funds below the level described in the table at the end of the report.

*Water: Ecosystems.*—The Committee recommends \$44,980,000. From within the amount provided, the recommendation includes \$16,800,000 to provide \$600,000 to each National Estuary Program (NEP) funded under Section 320 of the Clean Water Act. The Committee also provides \$300,000 in competitive grants within the coastal activities and encourages EPA to work in consultation with the NEP directors to identify worthy projects and activities. In addition, the Committee recommends \$19,882,000 for the wetlands program. The Committee directs EPA to use the funds provided to accelerate the processing of mining permits with the Corps of Engineers. Further, the Committee directs EPA, in consultation with the Corps of Engineers, to continue to report monthly on the number of Section 404 permits under review according to the directive in Division G of the Consolidated Appropriations Act, 2014.

*Water Quality Protection.*—The Committee recommends \$192,550,000. The Committee supports EPA's efforts to expand technical assistance for communities seeking to develop and implement an integrated planning approach to meeting Clean Water Act (CWA) requirements.

From within this amount, the Committee provides \$4,400,000 to fund the establishment of the Water Infrastructure Finance and Innovation Act (WIFIA) program within EPA. In doing so the Committee adheres to the annual statutory cap of \$2,200,000 for EPA administrative costs since funds within this account are available for two years. The Committee believes this offers EPA the flexibility to identify and aggressively hire mission critical talent areas at any point during the next two years. The Committee expects that EPA will be well positioned to propose and implement the fully authorized level for WIFIA loans in fiscal year 2017.

*Additional Guidance.*—The Committee has included the following additional guidance with respect to funding provided under this account.

*Administrator Priorities.*—EPA is directed to submit a report within 90 days of enactment of this Act that identifies how any fiscal year 2014 and 2015 funding was used, by account, program

area, and program project. Each activity funded should include a justification for the effort and any anticipated results.

*Antimicrobial Solutions for Citrus Disease.*—The Committee recognizes the importance of antimicrobial crop protection tools in combating citrus greening and continues to support EPA's cooperation with the U.S. Department of Agriculture's Multi-Agency Coordination Group.

*Artificial Turf.*—The Committee is aware of EPA's previous studies on artificial turf and infill products, and its most recent work with the Association of State and Territorial Health Officials to further define the safety of these products. The Committee encourages the Agency to provide guidance about the safety of crumb rubber in artificial turf.

*Composite Wood Products.*—The Formaldehyde Standards for Composite-Wood Products Act directed EPA to develop a national standard for formaldehyde emissions that replicates the California regulations. The Committee urges EPA to finalize a rule on the national formaldehyde standard for composite wood products that is consistent with the California regulations for laminated products and consistent with the intent of the 2010 Act.

*Conflicts of Interest.*—The Committee maintains that clear and consistent conflict-of-interest rules are not applied uniformly to the members of EPA's Science Advisory Boards (SABs), and this has been a long-standing issue across multiple Administrations that EPA has yet to resolve. Further, EPA's process for selecting independent scientific advisors unnecessarily excludes State, local, private sector and tribal experts in a manner that does not allow for a balanced panel of experts and, in fact, ensures a biased process. The lack of transparency in how Board members are selected erodes the credibility and objectivity of the scientific reviews undertaken by these Boards.

For fiscal year 2016, the Administrator shall develop a policy statement on science quality and integrity that shall be adhered to by the SAB and all Board members. EPA's policies shall include not less than 10 percent of membership from States and Tribes who are often underrepresented as noted in the May 2014 National Academy of Sciences review of EPA's IRIS program. Should the Administrator decide that financial-related metrics are appropriate to identify conflicts-of-interest or bias, then EPA's policy shall also include an evaluation of potential bias based on receipt of former and current Federal grants or public statements or positions as well as other appropriate safeguards to ensure balance amongst SAB and other advisory board experts. In addition, the policy statement shall include direction on the treatment of public comments and responses to such comments.

When complete, the Committee directs EPA to submit the draft policy statement to the National Academy of Sciences for review of the updated conflict of interest policy, policy for committee composition and balance, and eligibility requirements for service on the Science Advisory Boards that will ensure fairness and objectivity. The National Academy shall determine if the new policies meet the intent of the directives above and, if so, shall certify to the Committee on Appropriations that EPA's conflict of interest policies offer a revised, balanced framework. EPA shall suspend all current

and planned SAB reviews until such documents have been provided to the Academy for review.

*E15 outreach.*—The Committee directs the Agency to provide a report on efforts in fiscal year 2015 and 2016 to establish and implement public educational outreach for proper and EPA-approved usage of 15 percent by volume ethanol blended gasoline in accordance with the Misfueling Mitigation Plan and as provided in the Consolidated and Further Continuing Appropriations Act, 2015.

*Exempt Aquifers.*—The Committee is concerned that EPA may revoke exempt aquifer designations that have been in effect for more than 30 years. The Committee directs EPA to work in a collaborative manner with the State of California and the energy producing industry on the information and data requested and procedures for the submission of applications for review and processing. Furthermore, the Committee directs EPA to work promptly to review and process applications once submitted to ensure robust oil and natural gas production in the State and the resumption of timely permitting of new oil and natural gas wells.

*Ozone.*—The Committee is aware that the Agency has proposed more stringent standards for ozone and that EPA is scheduled to issue a final rule in fiscal year 2016. The Committee is also aware that the Agency only recently finalized the implementation regulations for States and affected entities to implement the current 2008 standards, effective April 6, 2015. Further, the Committee is aware that the Agency has hundreds of backlogged State Implementation Plans pending with the agency for which EPA has not yet completed its review. As such, the Committee has provided resources under the Federal Support for Air Quality program to allow EPA to address the backlog of operating permits and State Implementation Plans in need of attention, and the Committee has also provided additional resources in the State and Tribal Assistance Grants account to assist States and Tribes in areas of non-attainment. The Committee strongly urges EPA to allow States to fully implement the 2008 standards before making further changes to those standards.

HAZARDOUS WASTE ELECTRONIC MANIFEST SYSTEM FUND

This account supports all activities necessary for the development of the system established by the Hazardous Waste Electronic Manifest Establishment Act (P.L. 112–195).

Appropriation enacted, 2015 .....	\$3,674,000
Budget estimate, 2016 .....	7,368,000
Recommended, 2016 .....	0
Comparison:	
Appropriation, 2015 .....	– 3,674,000
Budget estimate, 2016 .....	– 7,368,000

The Committee continues to support the expeditious development of a system that would allow for the electronic tracking of hazardous waste shipments pursuant to P.L. 112–195. To date the Committee has provided EPA with sufficient funds to develop the system consistent with EPA’s initial cost estimates. Before additional funds are appropriated, the Committee directs EPA to work with the appropriate Committees to extend the authorization for appropriations beyond fiscal year 2015, and to provide a robust jus-

tification for any costs that exceed the amounts appropriated through fiscal year 2015.

OFFICE OF INSPECTOR GENERAL

The Office of Inspector General (OIG) provides audit, evaluation, and investigation products and advisory services to improve the performance and integrity of EPA programs and operations. The Inspector General (IG) will continue to perform the function of IG for the Chemical Safety and Hazard Investigation Board. This account funds personnel compensation and benefits, travel, and expenses (excluding rent, utilities, and security costs) for the Office of Inspector General. In addition to the funds provided under this heading, this account receives funds from the Hazardous Substance Superfund account.

Appropriation enacted, 2015 .....	\$41,489,000
Budget estimate, 2016 .....	50,099,000
Recommended, 2016 .....	40,000,000
Comparison:	
Appropriation, 2015 .....	- 1,489,000
Budget estimate, 2016 .....	- 10,099,000

The bill provides \$40,000,000, which is \$1,489,000 below the fiscal year 2015 enacted level and \$10,099,000 below the budget request. In addition, the Committee recommends \$8,459,000 as a payment to this account from the Hazardous Substance Superfund account. The Inspector General is directed to prioritize funds to projects that prevent and detect fraud, waste and abuse at the Environmental Protection Agency.

BUILDINGS AND FACILITIES

The Buildings and Facilities account provides for the design and construction of EPA-owned facilities as well as for the repair, extension, alteration, and improvement of facilities used by the Agency. The funds are used to correct unsafe conditions, protect health and safety of employees and Agency visitors, and prevent deterioration of structures and equipment.

Appropriation enacted, 2015 .....	\$42,317,000
Budget estimate, 2016 .....	51,507,000
Recommended, 2016 .....	34,467,000
Comparison:	
Appropriation, 2015 .....	- 7,850,000
Budget estimate, 2016 .....	- 17,040,000

The bill provides \$34,467,000, which is \$7,850,000 below the fiscal year 2015 enacted level and \$17,040,000 below the budget request. The Committee supports proposed projects that will reduce Agency operational and rent costs. EPA should prioritize projects based on anticipated cost savings and allocate funds accordingly.

HAZARDOUS SUBSTANCE SUPERFUND

The Hazardous Substance Superfund (Superfund) program was established in 1980 by the Comprehensive Environmental Response, Compensation, and Liability Act to clean up emergency hazardous materials, spills, and dangerous, uncontrolled, and/or abandoned hazardous waste sites. The Superfund Amendments and Reauthorization Act (SARA) expanded the program substantially in 1986, authorizing approximately \$8,500,000,000 in revenues over

five years. In 1990, the Omnibus Budget Reconciliation Act extended the program's authorization through 1994 for \$5,100,000 with taxing authority through calendar year 1995.

The Superfund program is operated by EPA subject to annual appropriations from a dedicated trust fund and from general revenues. Enforcement activities are used to identify and induce parties responsible for hazardous waste problems to undertake cleanup actions and pay for EPA oversight of those actions. In addition, responsible parties have been required to cover the cost of fund-financed removal and remedial actions undertaken at spills and waste sites by Federal and State agencies. Funds are paid from this account to the Office of Inspector General and Science and Technology accounts for Superfund related activities.

Appropriation enacted, 2015 .....	\$1,088,769,000
Budget estimate, 2016 .....	1,153,834,000
Recommended, 2016 .....	1,088,769,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-65,065,000

The bill provides \$1,088,769,000 for the Hazardous Substance Superfund program equal to the fiscal year 2015 enacted level and \$65,065,000 below the budget request.

*Remedial Cleanup.*—The Committee recommends \$725,558,000. While the Committee understands this increase is insufficient to eliminate the backlog of unfunded new starts, the Committee expects the Agency to use the additional funds to initiate remediation at highly contaminated, orphan sites. Further the Committee expects the additional funding will also support pipeline activities such as remedial investigations, feasibility studies, and remedial designs which are critical steps prior to construction. The Committee continues to support EPA's added financial and project management efforts that enable the Agency to de-obligate unused funds from sites and redirect those funds to new construction projects.

*Additional Guidance.*—The Committee has included the following additional guidance with respect to funding provided under this account:

*Financial Assurance.*—The Committee directs the Administrator to complete a thorough analysis of the capacity of the financial and credit markets to provide the necessary instruments (surety bonds, letters of credit, insurance, and trusts) for meeting any new financial responsibility requirements pursuant to section 108(b) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S. C. 9608(b)). The Committee provides no funds for EPA to develop, propose, finalize, implement, enforce, or administer any regulation that would establish any such new financial responsibility requirements until the Administrator demonstrates that such an analysis has been completed.

*Lead at Superfund Sites.*—Using the funds provided, the Administrator of the Environmental Protection Agency shall contract with the National Academy of Sciences to conduct a study of the sources of lead in the environment at each designated Superfund site that is proximal to a historic surface lead mining district. The study shall focus on whether naturally occurring lead, lead-based paint, and the consumer use of products containing lead are significant sources of lead at such sites. The Administrator shall transmit to

Congress a report containing the results of the study not later than one year after the date of enactment of this Act.

*Superfund Special Accounts.*—The Committee supports the steps EPA has taken toward the effective, centralized management of Superfund special accounts, and appreciates the information included as part of the Congressional Justification.

LEAKING UNDERGROUND STORAGE TANK TRUST FUND PROGRAM

Subtitle I of the Solid Waste Disposal Act, as amended by the Superfund Amendments and Reauthorization Act, authorized the establishment of a response program for cleanup of releases from leaking underground storage tanks. Owners and operators of facilities with underground tanks must demonstrate financial responsibility and bear initial responsibility for cleanup. The Federal trust fund is funded through the imposition of a motor fuel tax of one-tenth of a cent per gallon.

In addition to State resources, the Leaking Underground Storage Tanks (LUST) Trust Fund provides funding to clean up sites, enforces necessary corrective actions, and recovers costs expended from the Fund for cleanup activities. The underground storage tank response program is designed to operate primarily through cooperative agreements with States. Funds are also used for grants to non-State entities, including Indian Tribes, under Section 8001 of the Resource Conservation and Recovery Act. The Energy Policy Act of 2005 expanded the authorized activities of the Fund to include the underground storage tank program. In 2006, Congress amended section 9508 of the Internal Revenue Code to authorize expenditures from the trust fund for prevention and inspection activities.

Appropriation enacted, 2015 .....	\$91,941,000
Budget estimate, 2016 .....	95,326,000
Recommended, 2016 .....	91,941,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-3,385,000

The bill provides \$91,941,000 for the Leaking Underground Storage Tank (LUST) Trust Fund Program, equal to the fiscal year 2015 enacted level and \$3,385,000 below the budget request.

INLAND OIL SPILL PROGRAMS

This appropriation, authorized by the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990, provides funds to prepare for and prevent releases of oil and other petroleum products in navigable waterways. In addition, EPA is reimbursed for incident specific response costs through the Oil Spill Liability Trust Fund managed by the United States Coast Guard.

EPA is responsible for directing all cleanup and removal activities posing a threat to public health and the environment; conducting site inspections; providing a means to achieve cleanup activities by private parties; reviewing containment plans at facilities; reviewing area contingency plans; pursuing cost recovery of fund-financed cleanups; and conducting research of oil cleanup techniques. Funds for this appropriation are provided through the Oil Spill Liability Trust Fund which is composed of fees and collections made through provisions of the Oil Pollution Act of 1990, the

Comprehensive Oil Pollution Liability and Compensation Act, the Deepwater Port Act of 1974, the Outer Continental Shelf Lands Act Amendments of 1978, and the Federal Water Pollution Control Act, as amended. Pursuant to law, the Trust Fund is managed by the United States Coast Guard.

Appropriation enacted, 2015 .....	\$18,209,000
Budget estimate, 2016 .....	23,378,000
Recommended, 2016 .....	17,944,000
Comparison:	
Appropriation, 2015 .....	- 265,000
Budget estimate, 2016 .....	- 5,434,000

The bill provides \$17,944,000 for the Inland Oil Spill program, \$265,000 below the fiscal year 2015 enacted level and \$5,434,000 below the budget request.

#### STATE AND TRIBAL ASSISTANCE GRANTS

The State and Tribal Assistance Grants (STAG) account provides grant funds for programs operated primarily by State, local, tribal and other governmental partners. The account includes two broad types of funds: (1) Infrastructure Assistance, which is used primarily by local governments for projects supporting environmental protection; and, (2) Categorical Grants, which assist State and tribal governments and other environmental partners with the operation of environmental programs. The account also includes specific program grants such as competitive Brownfields grants and diesel emissions reduction grants.

In the STAG account, EPA provides funding for infrastructure projects through two State Revolving Funds (Clean Water and Drinking Water), geographic specific projects in Alaskan Native Villages and on the United States-Mexico Border, Brownfields revitalization projects, diesel emission reduction grants, and other targeted infrastructure projects.

The State Revolving Funds (SRFs) provide Federal financial assistance to protect the Nation's water resources. The Clean Water SRF helps eliminate municipal discharge of untreated or inadequately treated pollutants and thereby helps maintain or restore the country's water to a swimmable and/or fishable quality. The Clean Water SRF provides resources for municipal, inter-municipal, State, and interstate agencies and tribal governments to plan, design, and construct wastewater facilities and other projects, including non-point source, estuary, stormwater, and sewer overflow projects. The Safe Drinking Water SRF finances improvements to community water systems so that they can achieve compliance with the mandates of the Safe Drinking Water Act and continue to protect public health.

Many of the major Federal environmental statutes include provisions that allow the Federal government, through EPA, to delegate to the States and Tribes the day-to-day management of environmental programs or to approve State and Tribal environmental programs. The Federal statutes were designed to recognize the States as partners and co-regulators, allowing the States to issue and enforce permits, carry out inspections and monitoring, and collect data. To assist the States in this task, the statutes also authorized EPA to provide grants to the States and Tribes. These grants, which cover every major aspect of environmental protection, in-

clude those programs authorized by sections 319 and 106 of the Clean Water Act (Federal Water Pollution Control Act, as amended) (for non-point source pollution and the water quality permits programs), sections 105 and 103 of the Clean Air Act (for State and Local air quality management programs), section 128 of CERCLA (for State and tribal response programs), section 1443(a) of the Safe Drinking Water Act (for public water system supervision), and section 3011 of RCRA (for the implementation of State hazardous waste programs).

Appropriation enacted, 2015 .....	\$3,545,161,000
Budget estimate, 2016 .....	3,599,400,000
Recommended, 2016 .....	2,979,829,000
Comparison:	
Appropriation, 2015 .....	- 565,332,000
Budget estimate, 2015 .....	- 619,571,000

The bill provides \$2,979,829,000 for the State and Tribal Assistance Grants account, \$565,332,000 below the fiscal year 2015 enacted level and \$619,571,000 below the budget request. The Committee provides the following additional detail by program area:

*Infrastructure Assistance.*—The Committee has appropriated nearly \$25 billion for water and wastewater infrastructure assistance since 2009, and notes that \$6 billion is “revolving” and available for drinking water and wastewater infrastructure projects in fiscal year 2015 from appropriated funds, State match contributions, loan repayments, and interest. Nevertheless, little progress has been made to reduce the known water infrastructure gap. The Committee believes that EPA and the States must expeditiously allocate existing funds to projects in order to address the pressing infrastructure needs facing the country. In addition, the Committee continues to encourage EPA and water infrastructure stakeholders to promote alternate financing mechanisms for water infrastructure at local, State and Federal levels as it is widely accepted that Federal financing through the State Revolving Funds remains an important yet insufficient tool to address the Nation’s water needs. Public-private partnerships, greater access to financing from private activity bonds, and improved asset management are just a few of the mechanisms that the Committee believes could serve to increase investment in a complementary way to Federal appropriations and reduce costs.

In addition, the Committee continues bill language to allow EPA and the States to provide additional forms of subsidy to those communities which cannot afford the below market rates provided by an SRF loan.

The Committee has a history of including a provision affording a procurement preference for iron and steel products produced in the United States in projects receiving funds from the State revolving fund or, now, the Water Infrastructure Finance and Innovation Act. The Committee clarifies the intent that iron and steel products that are substantially transformed in the United States shall be considered “produced in the United States” for the purpose of water infrastructure projects.

*Diesel Emission Reduction Grants (DERA).*—The bill provides \$50,000,000 for DERA grants. The DERA program is the only EPA air program that has been reauthorized by Congress, and at least 10 million older heavily polluting diesel engines remain in use that

have yet to be retrofitted, repowered, or replaced. Further, according to the second report to Congress, approximately 70 percent of competitive projects have occurred in areas of non-attainment for particulate matter and ozone. For fiscal year 2016, the Committee directs EPA to continue to make at least 70 percent of DERA grants available to improve air quality in non-attainment areas. The Committee encourages EPA to provide a third report to Congress prior to January 1, 2016, that includes the analysis requested in Public Law 111-364.

*Targeted Airshed Grants.*—The bill provides \$20,000,000 for targeted airshed grants to reduce air pollution in non-attainment areas. These grants shall be distributed on a competitive basis to non-attainment areas that EPA determines are ranked as the top five most polluted areas relative to annual ozone or particulate matter 2.5 standards. To determine these areas, the Agency shall use the most recent design values calculated from validated air quality data. The Committee notes that these funds are available for emission reduction activities deemed necessary for compliance with national ambient air quality standards and included in a State Implementation Plan submitted to EPA. Not later than the end of fiscal year 2016, EPA should provide a report to the Committees on Appropriations that includes a table showing how fiscal year 2015 and 2016 funds were allocated. The table should also include grant recipients and metrics for anticipated or actual results.

*Categorical Grants.*—For categorical grants to States and other environmental partners for the implementation of delegated programs, the bill provides \$1,044,829,000.

*Radon.*—The Committee continues to support efforts that raise awareness about the associated risks of radon exposure, as ongoing, unmitigated exposures result in over 21,000 radon-induced lung cancer deaths per year. Therefore, the Committee provides \$8,051,000, equal to the fiscal year 2015 enacted level. Following consultation with stakeholders, the Committee finds that the fiscal year 2016 radon funds could be more effectively targeted. Of the funds provided, the Committee directs \$3,000,000 for State efforts to promote radon awareness via hospitals, clinics, and other health care providers and medical professionals. The Committee encourages States to incorporate radon exposure prevention in cancer control plans developed under the National Comprehensive Cancer Control Program. Funding is provided elsewhere in the bill for EPA to develop, in consultation with the Centers for Disease Control and Prevention, the Department of Housing and Urban Development, and the Department of Agriculture, a national awareness campaign to educate consumers about radon health impacts.

Further, the bill provides \$3,000,000 for State grants for radon testing and remediation of schools located in known high-risk radon areas. States shall apply consensus national standards and use professionals certified to conduct radon testing and remediation. Eligible school districts shall include those in high-risk radon areas based on the most current information available to EPA and the States. To the extent that this testing data may inform the EPA study requested elsewhere in the bill, the Committee encourages EPA and the States to incorporate data from this effort into such study.

Lastly, the Committee provides \$2,054,000 for EPA and States to offer continuing education and technical support on radon testing and mitigation standards, techniques, and best practices for home builders, real estate professionals, building code officials, radon testers, mitigators and home inspectors. Using these funds, the Committee also encourages EPA and the States to convene dialogues involving representatives of home builders, real estate professionals, building code officials, radon testers, mitigators, home inspectors, public health officials, and cancer prevention advocates to consider whether updated code requirements for State and/or local adoption may have merit.

### ADMINISTRATIVE PROVISIONS

#### (INCLUDING TRANSFER AND RESCISSION OF FUNDS)

The Committee continues bill language carried in prior years concerning Tribal Cooperative Authority, the collection and obligation of pesticides fees, and additional transfer authorities for the purposes of implementing the Great Lakes Restoration Initiative.

The Committee has included bill language authorizing up to \$150,000 to be spent for facility repairs at any one time.

The Committee has included bill language to guide the direction of the Agency's policies and actions related to carbon dioxide emissions from biomass.

The Committee rescinds \$8,000,000 of unobligated grant funds.

### TITLE III—RELATED AGENCIES

#### DEPARTMENT OF AGRICULTURE

##### FOREST SERVICE

The U.S. Forest Service manages 193 million acres of National Forests, Grasslands, and a Tallgrass Prairie, including lands in 44 States and the Commonwealth of Puerto Rico, and cooperates with States, other Federal agencies, Tribes and private landowners to sustain the Nation's forests and grasslands. The Forest Service administers a wide variety of programs, including forest and rangeland research, State and private forestry assistance, cooperative forest health programs, an international program, National Forest System, and wildland fire management. The National Forest System (NFS) includes 155 national forests, 20 National grasslands, 20 National recreation areas, a National Tallgrass prairie, six National monuments, and six land utilization projects. The NFS is managed for multiple uses, beginning with wood, water and forage, and expanded under the Multiple Use Sustained Yield Act to include recreation, grazing, fish and wildlife habitat management.

*Fiscal Year 2017 Budget Request.*—The Committee appreciates the detailed programmatic information provided by the Forest Service in its budget requests to Congress. For the fiscal year 2017 budget request, the Committee directs the Service to provide project statements showing total available funding, justifications of increases and decreases, and classifications of objects for each account. This will ensure the Committee receives the same information from the Forest Service as it does from all other USDA agen-

cies and offices and the other agencies funded by Interior and Environment Appropriations Acts.

*Air Asset Integrity.*—The Forest Service shall ensure that an Aircraft Structural Integrity Plan or comparable analysis to plan for the maintenance of the seven HC-130H aircraft to be transferred to the Forest Service pursuant to the fiscal year 2014 National Defense Authorization Act (P.L. 113-66) is developed. Based on this analysis, the Forest Service shall submit to the Committees on Appropriations, as part of the annual Congressional justifications, estimated costs for operations and maintenance of the HC-130H aircraft for the current and following five years.

The Forest Service also shall provide estimated operations and maintenance costs for the C-23B Sherpa aircraft to be transferred. Not later than 90 days after the Forest Service takes ownership of the first HC-130H aircraft, and annually thereafter, the Forest Service shall submit a report to the Committees on Appropriations on operations and maintenance costs of each HC-130H and C-23B Sherpa aircraft transferred pursuant to the Fiscal Year 2014 National Defense Authorization Act (P.L. 113-66), as well as light fixed-wing aircraft currently owned by the Forest Service, by tail number.

As part of any request for funds to perform modifications to the C-23B Sherpa aircraft transferred pursuant to the fiscal year 2014 National Defense Authorization Act (P.L. 113-66), the Forest Service shall provide information on the balances remaining in the Working Capital Fund of the Forest Service for light fixed-wing aircraft.

In addition, not later than 90 days after enactment of this Act, the Forest Service shall provide a report to the Committees on Appropriations on the status of efforts to strengthen performance metrics on firefighting aviation, with a focus on the performance of contracted and agency-owned aviation assets.

*Forest Service Hiring Practices.*—The Committee is concerned that past ranger district and national forest consolidations have resulted in fewer Forest Service personnel at the district level and fewer line officers conducting the day-to-day work that is needed in the national forests. As such, the Committee directs the Forest Service to place first priority on hiring ranger district-based employees before hiring for forests and regions. The Committee encourages the Service to set a goal of hiring ranger district-based employees within four months of a vacancy.

*Bill Language.*—The Committee includes the following bill language related to the Forest Service in Title IV General Provisions: Section 407, allowing forest management plans to expire if the Forest Service has made a good faith effort to update plans commensurate with appropriated funds; Section 410, regarding timber sales of Alaskan western red cedar; Section 419, extending the Federal Lands Recreation Enhancement Act for one year; Section 424, prohibiting the use of appropriated funds to close areas open to recreational hunting and shooting as of January 1, 2013; Section 432, allowing the Forest Service to renew grazing permits; Section 433, making vacant allotments for permittees affected by drought or wildfire; and Section 434, prohibiting the Forest Service and Bureau of Land Management from requiring relinquishment of all or a portion of water rights as a condition for permit renewals (this

includes all permits issued by the Bureau and the Forest Service and is not limited to grazing permits).

#### FOREST AND RANGELAND RESEARCH

Appropriation enacted, 2015 .....	\$296,000,000
Budget estimate, 2016 .....	291,982,000
Recommended, 2016 .....	277,507,000
Comparison:	
Appropriation, 2015 .....	- 18,493,000
Budget estimate, 2016 .....	- 14,475,000

The Committee recommends \$277,507,000 for Forest and Rangeland Research, \$18,493,000 below the fiscal year 2015 enacted level and \$14,475,000 below the budget request.

*Forest Inventory and Analysis (FIA).*—The Committee recommends \$70,000,000 for the FIA program, equal to the fiscal year 2015 enacted level and \$13,000,000 below the budget request.

The Committee finds that State forestry agencies and their cooperators are often able to accomplish critical FIA work with equal quality at lower costs than the Forest Service. The Forest Service is directed to work with State foresters to identify ways to more efficiently deliver the program in all States, including timely inventory updates, and should explore opportunities to work with additional State forestry agencies and their cooperators who can accomplish necessary field work at lower cost.

*Forest Products Laboratory.*—The Committee remains concerned about the increasing costs of forest management, hazardous fuels reduction and forest restoration. As such, it encourages the Forest Products Laboratory to focus on strategies to increase markets to offset or alleviate this additional cost. The Committee believes green building markets are a growing opportunity for American-grown wood and continues to encourage the Forest Service to work through the science and technology capabilities of the Laboratory to position wood as a green building material and improve the performance and affordability of wood-framed construction.

The Committee encourages the agency to increase its research on wood building products that can be used to improve the performance and affordability of wood-framed construction.

*Urban Forest Research.*—The Committee encourages the Forest Service to support urban forest research initiatives, related social and socio-economic research, and cooperative activities that help cities monitor and care for their urban forests. The Committee directs the Forest Service to provide information and tools, including inventories of urban forests, to help cities, towns, and metropolitan areas systematically assess the health and changing conditions of their urban forests and to plan strategic actions to sustainably maintain these forests.

*Bighorn Sheep Research.*—The Forest Service is urged to collaborate with the Bureau of Land Management and the Agricultural Research Service on research involving the risk of disease transmission between domestic and bighorn sheep.

*Local Need Research.*—The Committee is concerned about the lack of localized need research projects currently underway. The Committee directs the research stations to focus on the needs of the forests and to develop projects in coordination with the National Forest System.

*Northern Long-Eared Bat.*—The Committee is encouraged by the Forest Service’s research, in partnership with private landowners, State agencies, and non-profit organizations, that successfully treated northern long-eared and other bat species for white-nose syndrome, and directs the Service to allocate \$1,000,000 for additional research on this disease.

## STATE AND PRIVATE FORESTRY

Appropriation enacted, 2015 .....	\$232,653,000
Budget estimate, 2016 .....	236,611,000
Recommended, 2016 .....	220,665,000
Comparison:	
Appropriation, 2015 .....	– 11,988,000
Budget estimate, 2016 .....	– 15,946,000

The Committee recommends \$220,665,000 for State and Private Forestry, \$11,988,000 below the fiscal year 2015 enacted level and \$15,946,000 below the budget request.

*Landscape Scale Restoration.*—The Committee recommends \$14,000,000 for Landscape Scale Restoration, equal to the fiscal year 2015 level and \$9,513,000 below the budget request.

The Committee supports continuing to use the majority of these resources for interstate competitive projects and recommends these competitive projects address national priorities of concern. The Committee encourages application in priority landscapes as identified in State Forest Action Plans, producing measurable economic, ecological and social benefits.

*Forest Health Management.*—The Committee recommends \$99,600,000 for Forest Health Management, \$4,977,000 below the fiscal year 2015 enacted level and \$76,000 below the budget request.

*Forest Stewardship Program.*—The Committee recommends \$23,036,000 for the Forest Stewardship Program, equal to the fiscal year 2015 enacted level and \$13,000 below the budget request.

The Committee recognizes the Forest Stewardship Program is undergoing revisions to better align and focus it on delivering on-the-ground outcomes based on the priorities identified in the State Forest Action Plans. The Committee is encouraged by this progress and urges the agency to continue to deliver on-the-ground results on priority resource concerns, to use program resources for the most efficient strategies for accomplishing results, to leverage collaborative public-private efforts, and to better engage landowners in action that addresses priority resource concerns, especially landowners who are not currently engaged in active management.

*Forest Legacy.*—The recommendation includes \$50,660,000 for Forest Legacy, of which \$44,410,000 fully funds the first 13 projects in the budget request, and of which not to exceed \$6,250,000 may be used for program administration.

*Community Forest and Open Space Conservation.*—The Committee recommends \$1,683,000 for Community Forest and Open Space Conservation, \$317,000 below the fiscal year 2015 enacted level and equal to the budget request.

*Urban and Community Forestry.*—The Committee recommends \$23,686,000 for Urban and Community Forestry, \$4,354,000 below the fiscal year 2015 enacted level and equal to the budget request.

*International Forestry.*—The Committee recommends \$8,000,000 for International Forestry, equal to the fiscal year 2015 enacted level and \$3,996,000 above the budget request.

The Committee supports the Forest Service's International Program and recognizes its successful work to advance international trade for U.S. timber producers and forestry interests at international policy deliberations, to protect the United States from invasive species that threaten our forests, and to recover U.S. migratory waterfowl in decline. The International Program enables experts from the Federal government to participate in negotiations for trade agreements and assist with forestry work abroad. This program plays a large role in protecting the U.S. forest products industry by improving the sustainability and legality of timber management overseas thereby reducing the amount of underpriced and illegally harvested timber on the world market.

#### NATIONAL FOREST SYSTEM

(INCLUDING TRANSFER OF FUNDS)

Appropriation enacted, 2015 .....	\$1,494,330,000
Budget estimate, 2016 .....	1,648,314,000
Recommended, 2016 .....	1,490,093,000
Comparison:	
Appropriation, 2015 .....	– 4,237,000
Budget estimate, 2016 .....	– 158,221,000

The Committee recommends \$1,490,093,000 for the National Forest System, \$4,237,000 below the fiscal year 2015 enacted level and \$158,221,000 below the budget request.

*Integrated Resource Restoration.*—The Committee notes that similar to each of fiscal years 2011 through 2015, the budget request includes a major restructuring in which several programs are combined to form the Integrated Resource Restoration (IRR) budget line. The Committee supports the continuation of the pilot project established in the fiscal year 2012 Interior, Environment, and Related Agencies conference report. The Committee must see demonstrable results from the program, including true management efficiencies, tangible accomplishments, and accountability prior to the consideration of expanding IRR nationwide. As such, the Committee rejects the proposed restructuring and continues funding for the individual budget line items as in the Consolidated and Further Continuing Appropriations Act, 2015.

*Land Management Planning, Inventory and Monitoring.*—The Committee recommends \$32,020,000 for Land Management Planning and \$144,890,000 for Inventory and Monitoring. The Committee does not accept the proposed merging of the Land Management Planning and Inventory and Monitoring line items.

*Recreation, Heritage and Wilderness.*—The Committee recommends \$256,839,000 for Recreation, Heritage and Wilderness, \$4,880,000 below the fiscal year 2015 enacted level and \$7,103,000 below the budget request. Of the funds available to Manage Recreation Operations, \$750,000 shall be for the maintenance of rural airstrips. The Committee directs the Forest Service to consult with Congress, State and local officials, and affected stakeholders prior to making a determination to close or terminate the use of any rural airstrips.

The Committee encourages the Service to continue long-standing partnerships that support outdoor ethics and stewardship programming.

The Committee directs the Forest Service to conduct the appropriate analysis regarding any lands that could be incorporated into the Granite Chief Wilderness area of the Tahoe National Forest. The analysis should take into special consideration the potential effect of expanding the wilderness area on local water agencies, households and other water users. The Committee reminds the Service of the importance to engage all local stakeholders, including local government institutions, private citizens, and community groups, in its analysis.

The Committee understands that the Service is conducting a wilderness inventory and evaluation for portions of the Inyo, Sierra and Sequoia National Forest. Recreation and tourism at these national forests support the economies of many communities near these forests. Under current law and regulation, any land recommended by the Forest Service for wilderness protection will significantly restrict access and recreation in these forests, creating de facto wilderness without Congressional approval. The Committee directs the Service to carefully conduct its analysis, ensuring that it takes into full account the economic effects of its decisions, the desires and needs of the local communities and their local, State and federally elected representatives.

*Grazing Management.*—The Committee recommends \$55,356,000 for Grazing Management, equal to the fiscal year 2015 enacted level and \$5,650,000 above the budget request. The Committee rejects the proposal to increase fees for grazing.

The Committee encourages the Forest Service to improve its monitoring of grazing permits in allotments where riparian streamside health is a concern for listed or threatened species. The Committee also requests each Forest Service region to increase transparency and reporting on how their monitoring resources are used on the ground to satisfy monitoring requirements or for other purposes.

*Forest Products.*—The Committee recommends \$355,000,000 for Forest Products, \$15,870,000 above the fiscal year 2015 enacted level. The Committee rejects the proposal to consolidate this budget line into the Integrated Resource Restoration program.

The Committee believes improving implementation and efficiency of timber sales is a vital component to forest health. The budget request assumes 3.2 billion board feet of timber volume will be sold in fiscal year 2016. The Committee recommends \$15,870,000 above the fiscal year 2015 enacted level for the Forest Products account to support an increased level of timber sales and encourages the Forest Service to implement larger projects and reduce unit costs.

The Committee requests the Forest Service provide a report within 60 days of enactment of this Act regarding personal-use firewood permits and sales. The report should include historical information regarding the personal use of firewood from national forests as well as firewood's relation to the Federal timber program.

The Forest Service has identified 58 million acres at high risk to catastrophic wildfires. The Committee commends the Service for increasing the acres it has treated but notes that to make a substantial reduction in fire suppression costs many more acres need to be

treated per year. As such, the Committee directs the Forest Service to include hard targets in performance evaluations. In addition, individual ranger districts, where appropriate, should develop a systematic, long-term entry approach to access land in need of treatment.

*Vegetation and Watershed Management.*—The Committee recommends \$184,716,000 for Vegetation and Watershed Management, equal to the fiscal year 2015 enacted level. The Committee rejects the proposal to consolidate this budget line into the Integrated Resource Restoration program.

*Wildlife and Fisheries Habitat Management.*—The Committee recommends \$140,466,000 for Wildlife and Fisheries Habitat Management, equal to the fiscal year 2015 enacted level. The Committee rejects the proposal to consolidate this budget line into the Integrated Resource Restoration program.

*Collaborative Forest Landscape Restoration Fund.*—The Committee recommends \$40,000,000, for the Collaborative Forest Landscape Restoration Fund, equal to the fiscal year 2015 enacted level and \$20,000,000 below the budget request.

The Committee recognizes the need to ensure forest resiliency and support multiple uses on national forest lands. The Committee urges the Forest Service to incorporate a variety of landscapes, including wet forests, as it develops future projects for the Collaborative Forest Landscape Restoration Program.

The Committee reminds the Forest Service that stewardship contracts are not intended to replace, diminish, or adversely impact the Service's timber sales program. The Committee encourages the Service to focus on stewardship contracts that include low per-unit costs for timber sales, high-value timber harvesting and hazardous fuels reduction measures.

*Minerals and Geology Management.*—The Committee recommends \$76,423,000 for Minerals and Geology Management, equal to the fiscal year 2015 enacted level and \$5,734,000 above the budget request.

The Committee expects that the Forest Service will not promulgate regulations under the authority provided by section 2508 of Public Law 102–486 regarding certain oil and gas activities where the Federal government has acquired an interest in surface lands but not in oil and gas deposits that may be present under these lands. The Committee intends that the Third Circuit Court of Appeals decision in *Minard Run Oil Co. v. U.S. Forest Serv.*, 670 F.3d 236 (3d Cir. 2011) will continue to apply to all Forest Service actions regarding oil and gas development of outstanding and reserved mineral rights on the Allegheny National Forest.

*Landownership Management.*—The Committee recommends \$77,730,000 for Landownership Management, equal to the fiscal year 2015 enacted level and \$6,129,000 above the budget request.

*Law Enforcement Operations.*—The Committee recommends \$126,653,000 for Law Enforcement Operations, equal to the fiscal year 2015 enacted level and \$623,000 above the budget request.

The Committee continues to be concerned about the increasing incidence of illegal marijuana cultivation on public lands and the corresponding effects it has on the environment, forest restoration and habitat, employee and public safety, tourism, and communities. The Committee believes Forest Service Law Enforcement and In-

vestigations should be included as an integral participant in the annual forest planning process as a means to ensure stronger collaboration among all partners and focused enforcement strategies aimed at safety, interdiction and mitigation.

*Valles Caldera National Preserve.*—The Committee provides no funding for the Preserve. The National Defense Authorization Act, 2015, transferred responsibility for the Preserve from the Forest Service to the Department of the Interior.

CAPITAL IMPROVEMENT AND MAINTENANCE

(INCLUDING TRANSFER OF FUNDS)

Appropriation enacted, 2015 .....	\$360,374,000
Budget estimate, 2016 .....	341,924,000
Recommended, 2016 .....	357,363,000
Comparison:	
Appropriation, 2015 .....	– 3,011,000
Budget estimate, 2016 .....	+15,439,000

The Committee recommends \$357,363,000 for Capital Improvement and Maintenance, \$3,011,000 below the fiscal year 2015 enacted level and \$15,439,000 above the budget request.

*Facilities Maintenance and Construction.*—The Committee recommends \$71,390,000 for Facilities Maintenance and Construction, \$210,000 below the fiscal year 2015 enacted level and \$305,000 below the budget request. Specifically, the Committee recommends \$55,369,000 for facilities maintenance and \$16,021,000 for facilities construction.

*Road Maintenance and Construction.*—The Committee recommends \$165,293,000 for Road Maintenance and Construction, \$2,801,000 below the fiscal year 2015 enacted level and \$11,031,000 above the budget request. Specifically, the Committee recommends \$140,653,000 for road maintenance and \$24,640,000 for road construction.

Should the Forest Service find it necessary within the Gifford Pinchot National Forest or any National Forest within the State of Washington to either reduce the roads to maintenance level 1 or to decommission, the Forest Service should give precedence to the reduction of the road to Maintenance Level 1. Decommissioning should only be done after final plantation restoration work in Late Successional Reserve habitat development, or on a portion of road where resource protection cannot be adequately met by closing and stabilizing.

*Trail Maintenance and Construction.*—The Committee recommends \$77,530,000 for Trail Maintenance and Construction, equal to the fiscal year 2015 enacted level and \$4,986,000 below the budget request. Specifically, the Committee recommends \$69,777,000 for trail maintenance and \$7,753,000 for trail construction.

*Deferred Maintenance.*—The Committee recommends \$3,150,000 for Deferred Maintenance, equal to the fiscal year 2015 enacted level and \$30,301,000 below the budget request.

*Legacy Roads and Trail Remediation.*—The Committee recommends \$40,000,000 for Legacy Roads and Trails, equal to the fiscal year 2015 enacted level. The Committee rejects the proposal to consolidate this budget line into the Integrated Resource Restoration program.

## LAND ACQUISITION

Appropriation enacted, 2015 .....	\$47,500,000
Budget estimate, 2016 .....	63,000,000
Recommended, 2016 .....	20,000,000
Comparison:	
Appropriation, 2015 .....	- 27,500,000
Budget estimate, 2016 .....	- 43,000,000

The Committee recommends \$20,000,000 for Land Acquisition, \$27,500,000 below the fiscal year 2015 enacted level and \$43,000,000 below the budget request. In addition to the table at the end of this report, the recommendation includes the following instructions and changes to the budget request:

The recommendation includes \$9,000,000 for land acquisition projects included in the fiscal year 2016 budget request. The Forest Service is directed to re-prioritize its project list as necessary to focus on acquisitions where opportunities for recreation, and local, State, and congressional support, are strongest.

The recommendation includes \$1,500,000 for inholdings. The Service is directed to notify the Committee of any land acquired with these funds. The Committee defines "inholding" as non-Federal land within authorized National Forest System boundaries and bordered not less than 51 percent by Federal public land.

Consistent with other land acquisition accounts funded by this appropriation, the recommendation includes \$2,000,000 for acquisitions that improve access to existing Federal public lands via road, river, or trail for hunting, fishing, and other public recreation, as authorized by law or regulation.

## ACQUISITION OF LANDS FOR NATIONAL FORESTS SPECIAL ACTS

Appropriation enacted, 2015 .....	\$950,000
Budget estimate, 2016 .....	1,950,000
Recommended, 2016 .....	950,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 1,000,000

The Committee recommends \$950,000 for Acquisition of Lands for National Forests Special Acts, equal to the fiscal year 2015 enacted level and \$1,000,000 below the budget request.

## ACQUISITION OF LANDS TO COMPLETE LAND EXCHANGES

Appropriation enacted, 2015 .....	\$216,000
Budget estimate, 2016 .....	216,000
Recommended, 2016 .....	216,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The Committee recommends \$216,000 for Acquisition of Lands to Complete Land Exchanges under the Act of December 4, 1967 (16 U.S.C. 484a), equal to the fiscal year 2015 enacted level and the budget request.

## RANGE BETTERMENT FUND

Appropriation enacted, 2015 .....	\$2,320,000
Budget estimate, 2016 .....	2,320,000
Recommended, 2016 .....	2,320,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The Committee recommends \$2,320,000, for the Range Betterment Fund, equal to the fiscal year 2015 level and budget request, to be derived from grazing receipts from national forests (Public Law 94-579) and to be used for range rehabilitation, protection, and improvements including seeding, reseeding, fence construction, weed control, water development, and fish and wildlife habitat enhancement in 16 western States.

## GIFTS, DONATIONS AND BEQUESTS FOR FOREST AND RANGELAND RESEARCH

Appropriation enacted, 2015 .....	\$45,000
Budget estimate, 2016 .....	45,000
Recommended, 2016 .....	45,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The Committee recommends \$45,000 for Gifts, Donations and Bequests for Forest and Rangeland Research, equal to the fiscal year 2015 enacted level and the budget request.

## MANAGEMENT OF NATIONAL FOREST LANDS FOR SUBSISTENCE USES

Appropriation enacted, 2015 .....	\$2,500,000
Budget estimate, 2016 .....	\$2,441,000
Recommended, 2016 .....	2,441,000
Comparison:	
Appropriation, 2015 .....	-59,000
Budget estimate, 2016 .....	0

The Committee recommends \$2,441,000 for the Management of National Forest Lands for Subsistence Uses in Alaska, \$59,000 below the fiscal year 2015 enacted level and equal to the budget request.

## WILDLAND FIRE

The Wildland Fire Management and FLAME wildfire suppression reserve accounts support the wildland fire activities of the Forest Service. The Committee recommends a total of \$2,688,078,000 for the Forest Service wildland fire accounts, including \$315,000,000 in the FLAME wildfire suppression reserve fund. This fully funds the fire accounts at the 10-year average of expenditures.

WILDLAND FIRE MANAGEMENT  
(INCLUDING TRANSFERS OF FUNDS)

Appropriation enacted, 2015 .....	\$2,333,298,000
Budget estimate, 2016 .....	2,354,029,000
Recommended, 2016 .....	2,373,078,000
Comparison:	
Appropriation, 2015 .....	+39,780,000
Budget estimate, 2016 .....	+19,049,000

The Committee recommends \$2,373,078,000 for Wildland Fire Management, \$39,780,000 above the fiscal year 2015 enacted level and \$19,049,000 above the budget request.

The Committee notes that the budget request included a provision almost identical to legislation that has been developed in the House (H.R. 167) and the Senate (S. 235). The budget request proposes to allow wildland fire suppression costs above 70 percent of the 10-year average for fire suppression to be paid from within the discretionary budget cap adjustment established for natural disasters, recognizing that wildland fires are a natural disaster akin to hurricanes, tornadoes, and floods. As the issue of the disaster cap adjustment falls outside the Committee's jurisdiction, this Committee's recommendation does not include the request for suppression funding through the disaster cap adjustment. As in recent years, suppression operations are fully funded at the 10-year average level within the suppression operations account and the FLAME wildfire suppression reserve fund.

*Satellite Technologies.*—The Committee encourages the Forest Service to consider the potential use of existing commercial satellite technology to provide early warning, mitigation and response capabilities for wildland fires and to determine whether such technology may provide a low-cost early warning capability to save lives and property.

*Unmanned Aerial Vehicles.*—The Committee is aware of the successful firefighting demonstration performed by an unmanned helicopter at a Federal Aviation Administration unmanned aircraft system test site in November 2014 and urges the Service to continue to evaluate the effectiveness of this technology and its potential integration into the aviation asset modernization plan.

*Partnerships.*—The Committee recognizes the severe threat of wildfire to communities and natural resources within the Wildland Urban Interface. The Committee maintains that limited Federal budgets require innovative approaches that directly improve the capacity and capability of firefighters and communities to respond to and fight wildland fires. The Committee directs the Service to utilize regional partnerships to implement cost-shared approaches to install fire suppression response and suppression infrastructure as well as to coordinate programs that emphasize collaborative management of such programs. Priority should be given to on-going programs that have demonstrated the ability to implement such approaches.

*Wildfire Preparedness.*—The Committee recommends \$1,082,620,000 for Wildfire Preparedness, \$63,220,000 below the fiscal year 2015 enacted level and equal to the budget request.

*Wildfire Suppression Operations.*—The Committee recommends \$811,000,000 for Wildfire Suppression Operations, \$103,000,000 above the fiscal year 2015 enacted level and \$16,466,000 above the budget request. The Committee recommendation fully meets the 10-year average expenditure on all suppression activities.

*Hazardous Fuels.*—The Committee recommends \$361,749,000 for hazardous fuels reduction, equal to the fiscal year 2015 enacted level and \$2,623,000 above the budget request, and includes \$5,000,000 for biomass utilization grants. The Committee recommends prioritizing funding for proactive hazardous fuels management and fire mitigation.

The Forest Service is directed to implement effective treatments in frequent fire forests that restore forest resiliency and reduce hazardous fuels. Treatments should be placed to effectively modify fire behavior and protect assets at risk including life and property.

The Committee continues to be concerned with the pace of planning and implementation of post-fire rehabilitation by the Forest Service. The slow pace of rehabilitation leaves communities unable to access timber resources and delays the regeneration of Federal forests. The Committee directs the Forest Service to prioritize and expedite planning and implementation of post-fire rehabilitation projects.

*Fire Plan Research and Development.*—The Committee recommends \$19,795,000 for Fire Plan Research and Development, equal to the fiscal year 2015 enacted level and \$25,000 below the budget request.

*Joint Fire Science Program.*—The Committee recommends \$6,914,000 for the Joint Fire Science Program, equal to the fiscal year 2015 enacted level and \$3,000 below the budget request.

*State Fire Assistance.*—The Committee recommends \$78,000,000 for State Fire Assistance, equal to the fiscal year 2015 enacted level and \$12,000 below the budget request.

*Volunteer Fire Assistance.*—The Committee recommends \$13,000,000 for Volunteer Fire Assistance, equal to the fiscal year 2015 enacted level and the budget request.

#### FLAME WILDFIRE SUPPRESSION RESERVE FUND

(INCLUDING TRANSFERS OF FUNDS)

Appropriation enacted, 2015 .....	\$303,060,000
Budget estimate, 2016 .....	0
Recommended, 2016 .....	315,000,000
Comparison:	
Appropriation, 2015 .....	+11,940,000
Budget estimate, 2016 .....	+315,000,000

The Committee recommends \$315,000,000 for the FLAME Wildfire Suppression Reserve Fund, \$11,940,000 above the fiscal year 2015 enacted level and \$315,000,000 above the budget request. As discussed above under Wildland Fire Management, the Committee fully funds the 10-year average expenditure for wildfire suppression.

#### ADMINISTRATIVE PROVISIONS, FOREST SERVICE

(INCLUDING TRANSFERS OF FUNDS)

The Committee has included administrative provisions as requested, unless otherwise stated below.

The Committee continues the administrative provision regarding Wildland Fire Management and the FLAME Wildfire Suppression Reserve Fund as included in the Consolidated and Further Appropriations Act, 2015.

The Committee retains the administrative provision regarding reprogramming authority.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## INDIAN HEALTH SERVICE

The provision of Federal health services to Indians is based on a relationship between Indian Tribes and the U.S. Government first set forth in the 1830s by the U.S. Supreme Court under Chief Justice John Marshall. Numerous treaties, statutes, constitutional provisions, and international laws have reconfirmed this relationship. Principal among these is the Snyder Act of 1921, which provides the basic authority for most Indian health services provided by the Federal government to American Indians and Alaska Natives. The Indian Health Service (IHS) provides direct health care services in 28 hospitals, 61 health centers, three school health centers, and 34 health stations. Tribes and tribal groups, through contracts and compacts with the IHS, operate 17 hospitals, 249 health centers, six school health centers, and 70 health stations (including 164 Alaska Native village clinics).

## INDIAN HEALTH SERVICES

Appropriation enacted, 2015 .....	\$4,182,147,000
Budget estimate, 2016 .....	4,463,260,000
Recommended, 2016 .....	4,321,539,000
Comparison:	
Appropriation, 2015 .....	+139,392,000
Budget estimate, 2016 .....	-141,721,000

The Committee recommends \$4,321,539,000 for Indian Health Services, \$139,392,000 above the fiscal year 2015 enacted level and \$141,721,000 below the budget request. In addition to the table at the end of this report, the recommendation includes the following instructions and changes to the budget request:

*Staffing for New Facilities.*—The recommendation includes \$16,222,000 for the staffing of newly opened health facilities, as requested. Funds for the staffing of new facilities are limited to facilities funded through the Health Care Facilities Construction Priority System or the Joint Venture Construction Program that have opened in fiscal year 2015 or will open in fiscal year 2016. None of these funds may be allocated to a facility until such facility has achieved beneficial occupancy status.

*Dental Health.*—The recommendation includes \$178,959,000 for dental health, \$4,977,000 above the fiscal year 2015 enacted level. The Service is encouraged to coordinate with the Bureau of Indian Education to establish a pilot program integrating preventive dental care at schools within the Bureau system.

*Purchased/Referred Care (formerly Contract Health Services).*—The recommendation includes \$935,726,000 for Purchased/Referred Care. The Committee urges the Service, Tribes, and the congressional authorizing committees to make reasonable and expeditious progress to address the concerns and recommendations made by the Government Accountability Office (GAO), most notably with regard to unfair allocations, third-party overbilling, and under-enrollment in other qualifying Federal programs.

The Committee urges the Service to work expeditiously with the relevant Congressional authorizing committees to enact authorization for the Service to cap payment rates for non-hospital services, as recommended by the Government Accountability Office (GAO)

13–272). Failure to do so costs the program an estimated \$30 million annually that could be used to purchase more services.

*Contract Support Costs.*—The recommendation includes \$717,970,000 as requested for full funding of estimated contract support costs. Bill language has been added making these funds available until expended and protecting against the use of other appropriations to meet unanticipated shortfalls. The Service is directed to work with Tribes and tribal organizations to ensure that budget estimates continue to be as accurate as possible.

*Eligibility.*—The Committee recognizes the Federal government’s trust responsibility for providing healthcare for American Indians and Alaska Natives. The Committee is aware that the definition of who is an “Indian” is inconsistent across various Federal health programs, which has led to confusion, increased paperwork and even differing determinations of health benefits within Indian families themselves. The Committee therefore directs the Department of Health and Human Services, the Indian Health Service, and the Department of the Treasury to work together to establish a consistent definition of an “Indian” for purposes of providing health benefits.

*Urban Indian Health.*—The recommendation includes \$44,410,000 for Urban Indian Health, \$806,000 above the fiscal year 2015 enacted level and the budget request. The agency is directed to include current services estimates for Urban Indian Health in future budget requests. The Committee notes the agency’s failure to report the results of the needs assessment directed by House Report 111–180. Therefore the recommendation includes a reduction to the Service leadership budget, along with bill language requiring a program strategic plan developed in consultation with urban Indians and the National Academy of Public Administration.

*Shortage of Health Care Providers.*—The Service is encouraged to work with Tribes and health care organizations to find creative ways to address the Service’s health care provider shortage, including improvements to the credentialing process.

#### INDIAN HEALTH FACILITIES

Appropriation enacted, 2015 .....	\$460,234,000
Budget estimate, 2016 .....	639,725,000
Recommended, 2016 .....	466,329,000
Comparison:	
Appropriation, 2015 .....	+6,095,000
Budget estimate, 2015 .....	– 173,396,000

The Committee recommends \$466,329,000 for Indian Health Facilities, \$6,095,000 above the fiscal year 2015 enacted level and \$173,396,000 below the budget request. In addition to the table at the end of this report, the recommendation includes the following instructions:

*Staffing for New Facilities.*—The recommendation includes \$1,584,000 for the staffing of newly opened health facilities as requested. The stipulations included in the Indian Health Services account regarding the allocation of funds pertains to this account as well.

## NATIONAL INSTITUTES OF HEALTH

## NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

The National Institute of Environmental Health Sciences, an agency within the National Institutes of Health, was authorized in section 311(a) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 and in section 126(g) of the Superfund Amendments and Reauthorization Act of 1986 to conduct certain research and worker training activities associated with the nation's Hazardous Substance Superfund program.

Appropriation enacted, 2015 .....	\$77,349,000
Budget estimate, 2016 .....	77,349,000
Recommended, 2016 .....	77,349,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The Committee recommends \$77,349,000 for the National Institute of Environmental Health Sciences, equal to the fiscal year 2015 enacted level and the budget request.

## AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY

## TOXIC SUBSTANCES AND ENVIRONMENTAL PUBLIC HEALTH

The Agency for Toxic Substances and Disease Registry (ATSDR), an agency in the Department of Health and Human Services, was created in section 104(i) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980. The Agency's mission is to serve the public through responsive public health actions to promote healthy and safe environments and prevent harmful toxic exposures. ATSDR assesses hazardous exposures in communities near toxic waste sites and advises the Environmental Protection Agency (EPA) and other government agencies, community groups and industry partners on actions needed to protect people's health. In addition, ATSDR conducts toxicological and applied research to support environmental assessments, supports health surveillance systems and registries, develops and disseminates information on hazardous substances, provides education and training on hazardous exposures, and responds to environmental emergencies. Through a national network of scientists and public health practitioners in State health departments, regional EPA offices and headquarters, ATSDR helps to protect people from acute toxic exposures that occur from hazardous leaks and spills, environment-related poisonings, and natural and terrorism-related disasters.

Appropriation enacted, 2015 .....	\$74,691,000
Budget estimate, 2016 .....	74,691,000
Recommended, 2016 .....	74,691,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The Committee recommends \$74,691,000 for the Agency for Toxic Substances and Disease Registry, equal to the fiscal year 2015 level and the budget request.

## OTHER RELATED AGENCIES

## EXECUTIVE OFFICE OF THE PRESIDENT

COUNCIL ON ENVIRONMENTAL QUALITY AND OFFICE OF  
ENVIRONMENTAL QUALITY

The Council on Environmental Quality (CEQ) was established by Congress under the National Environmental Policy Act of 1969 (NEPA). The Office of Environmental Quality (OEQ), which provides professional and administrative staff for the Council, was established in the Environmental Quality Improvement Act of 1970. The Council on Environmental Quality has statutory responsibility for overseeing Federal agency implementation of the requirements of NEPA. CEQ also assists in coordinating environmental programs among the Federal agencies in the Executive Branch.

Appropriation enacted, 2015 .....	\$3,000,000
Budget estimate, 2016 .....	3,015,000
Recommended, 2016 .....	3,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 15,000

The Committee recommends \$3,000,000 for the Council on Environmental Quality and Office of Environmental Quality, equal to the fiscal year 2015 enacted level and \$15,000 below the budget request.

## CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

## SALARIES AND EXPENSES

The Chemical Safety and Hazard Investigation Board (CSB) is an independent Federal agency charged with investigating industrial chemical accidents. The board members are appointed by the President and confirmed by the Senate. The CSB conducts root-cause investigations of chemical accidents at fixed industrial facilities. Root causes are usually deficiencies in safety management systems, but can be any factor that would have prevented the accident if that factor had not occurred. Other accident causes often involve equipment failures, human errors, unforeseen chemical reactions or other hazards. CSB does not issue fines or citations, but does make recommendations to plants, regulatory agencies such as the Occupational Safety and Health Administration and the Environmental Protection Agency, industry organizations, and labor groups. Congress designed the CSB to be non-regulatory and independent of other agencies so that its investigations might, where appropriate, review the effectiveness of regulations and regulatory enforcement.

Appropriation enacted, 2015 .....	\$11,000,000
Budget estimate, 2016 .....	12,271,000
Recommended, 2016 .....	11,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 1,271,000

The Committee recommends \$11,000,000 for Salaries and Expenses of the Chemical Safety and Hazard Investigation Board,

equal to the fiscal year 2015 enacted level and \$1,271,000 below the budget request.

OFFICE OF NAVAJO AND HOPI INDIAN RELOCATION

SALARIES AND EXPENSES

(INCLUDING TRANSFER OF FUNDS)

The Office of Navajo and Hopi Indian Relocation was established by Public Law 93–531 to plan and conduct relocation activities associated with the settlement of a land dispute between the Navajo Nation and the Hopi Tribe.

Appropriation enacted, 2015 .....	\$7,341,000
Budget estimate, 2016 .....	8,400,000
Recommended, 2016 .....	7,341,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	–1,059,000

The Committee recommends \$7,341,000 for the Office of Navajo and Hopi Indian Relocation, equal to the fiscal year 2015 enacted level and \$1,059,000 below the budget request. Of this amount, \$200,000 shall be transferred to the Department of the Interior Office of Inspector General to continue auditing the program. Members of the Committee recently traveled to the lands in dispute and met with members of the Hopi Tribe and the Navajo Nation to better understand the issues. The Committee will be working to bring this program to an expeditious and fair end in the near future.

INSTITUTE OF AMERICAN INDIAN AND ALASKA NATIVE CULTURE AND ARTS DEVELOPMENT

2015 PAYMENT TO THE INSTITUTE

Appropriation enacted, 2015 .....	\$9,469,000
Budget estimate, 2016 .....	11,619,000
Recommended, 2016 .....	9,469,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	–2,150,000

The Committee recommends \$9,469,000 in direct appropriations for the Institute of American Indian and Alaska Native Culture and Arts Development, equal to the fiscal year 2015 enacted level and \$2,150,000 below the budget request. The Committee encourages the Institute to submit a budget request beginning with fiscal year 2017, in coordination with other tribal colleges and universities, to transition appropriations to a school calendar as opposed to a fiscal calendar, over a period of three to five years.

SMITHSONIAN INSTITUTION

The Smithsonian Institution is the world’s largest museum and research complex, with 19 museums and galleries, numerous research centers, libraries, archives, and the National Zoological Park. Funded by both private and Federal sources, the Smithsonian is unique in the Federal establishment. Created by an Act of Congress in 1846 to carry out the trust included in James Smithson’s will, it has been engaged for 169 years in the “increase and diffusion of knowledge.” Last year, the Smithsonian attracted

over 27 million visits to its museums, galleries, and zoological park. Additional millions also view Smithsonian traveling exhibitions and participate in the annual Folklife Festival on the National Mall. As custodian of the National Collections, the Smithsonian is responsible for more than 138 million art objects, natural history specimens, and artifacts. These scientific and cultural collections are a vital resource for global research and conservation efforts. The collections are displayed for the enjoyment and education of visitors and are available for research by the staff of the Institution and by thousands of visiting students, scientists, and historians each year.

#### SALARIES AND EXPENSES

Appropriation enacted, 2015 .....	\$675,343,000
Budget estimate, 2016 .....	735,825,000
Recommended, 2016 .....	680,422,000
Comparison:	
Appropriation, 2015 .....	+5,079,000
Budget estimate, 2016 .....	-55,403,000

The Committee recommends \$680,422,000 for Salaries and Expenses of the Smithsonian Institution, \$5,079,000 above the fiscal year 2015 enacted level and \$55,403,000 below the budget request.

*Additional Guidance.*—The following additional direction and guidance is provided with respect to funding provided within this account:

*Collections Care.*—The Committee maintains its longstanding commitment to the preservation of priceless, irreplaceable Smithsonian Institution collections and has provided funds, as requested, for the collections care initiative. The Committee is pleased by continuing efforts to improve the long-term inventory, preservation, and storage of historical collections including the military uniform collection at the National Museum of American History.

*National Museum of African American History and Culture.*—The Committee maintains its support for the National Museum of African American History and Culture (NMAAHC) and recognizes the need to address a number of funding priorities in advance of the museum's opening in 2016.

*Science Education.*—STEM education (Science, Technology, Engineering, and Mathematics) is critical to our country's capacity to innovate and better prepare our Nation's young people for the high technology jobs of tomorrow. The Committee remains concerned by the lack of coordination and communication of STEM activities, budgets, and achievements across the Federal government. The Committee has not included requested funding for STEM engagement believing funds should be directed to higher priority needs within the Institution.

*Latino Programs, Exhibitions, Collections and Public Outreach.*—The Committee supports the Smithsonian Latino Center's goal of promoting the inclusion of Latino contributions in Smithsonian Institution programs, exhibitions, collections and public outreach. The Committee urges collaboration among interested parties to advance these goals more fully by utilizing existing Smithsonian Institution museum locations for the expansion of the Smithsonian Latino Center's programming, exhibition and collection space. The Committee has provided funds, as requested, to support the Institution's Latino initiatives.

*Ocean Education and Research.*—The Smithsonian is encouraged to work with Executive Branch agencies, including NOAA, and other relevant organizations to further education related to America’s oceans and to advance research in marine science.

#### FACILITIES CAPITAL

Appropriation enacted, 2015 .....	\$144,198,000
Budget estimate, 2016 .....	200,000,000
Recommended, 2016 .....	139,119,000
Comparison:	
Appropriation, 2015 .....	– 5,079,000
Budget estimate, 2016 .....	– 60,881,000

The Committee recommends \$139,119,000 for Facilities Capital, \$5,079,000 below the fiscal year 2015 enacted level and \$60,881,000 below the budget request.

The Committee supports revitalization of Smithsonian Institution facilities and the planning and design of future projects. The Committee has provided funds to continue ongoing revitalization projects at the National Museum of Natural History, National Zoological Park, National Museum of American History, National Air and Space Museum, National Museum of the American Indian, Museum Support Center, and the Suitland Collections Facility. The Committee urges the Smithsonian to use remaining revitalization funds provided to support the highest priority projects on the Facilities Capital Program list.

#### NATIONAL GALLERY OF ART

The National Gallery of Art is one of the world’s great galleries. Its magnificent works of art, displayed for the benefit of millions of visitors annually, and its two iconic buildings and sculpture garden, serve as an example of a successful cooperative endeavor between private individuals and institutions and the Federal government. With the special exhibitions shown in the Gallery, and through the many exhibitions which travel across the country, the Gallery brings great art treasures to Washington, D.C., and to the Nation. Through its educational and teacher training programs and its website, the Gallery provides art history materials, rich online educational materials, direct loans, and broadcast programs to millions of Americans in every State.

#### SALARIES AND EXPENSES

Appropriation enacted, 2015 .....	\$119,500,000
Budget estimate, 2016 .....	126,660,000
Recommended, 2016 .....	119,500,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	– 7,160,000

The Committee recommends \$119,500,000 for Salaries and Expenses of the National Gallery of Art, equal to the fiscal year 2015 enacted level and \$7,160,000 below the budget request.

*Bill Language.*—The Committee has included bill language, as requested, specifying the amount provided for Special Exhibitions.

## REPAIR, RESTORATION AND RENOVATION OF BUILDINGS

Appropriation enacted, 2015 .....	\$19,000,000
Budget estimate, 2016 .....	26,000,000
Recommended, 2016 .....	19,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-7,000,000

The Committee recommends \$19,000,000 for Repair, Restoration and Renovation of buildings at the National Gallery of Art, equal to the fiscal year 2015 enacted level and \$7,000,000 below the budget request.

*Bill Language.*—The Committee has included bill language, as requested, relating to lease agreements of no more than 10 years that addresses space needs created by ongoing renovations in the Master Facilities Plan.

## JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

The John F. Kennedy Center for the Performing Arts is a living memorial to the late President Kennedy and is the National Center for the Performing Arts. The Center houses nine stages and seven theaters which have a total of more than 7,300 seats. The Center consists of over 1.5 million square feet of usable floor space with visitation averaging 8,000 on a daily basis. The support systems in the building often operate at capacity 18 hours a day, seven days a week, 365 days a year.

## OPERATIONS AND MAINTENANCE

Appropriation enacted, 2015 .....	\$22,000,000
Budget estimate, 2016 .....	21,660,000
Recommended, 2016 .....	21,660,000
Comparison:	
Appropriation, 2015 .....	-340,000
Budget estimate, 2016 .....	0

The Committee recommends \$21,660,000 for Operations and Maintenance, \$340,000 below the fiscal year 2015 enacted level and equal to the budget request.

## CAPITAL REPAIR AND RESTORATION

Appropriation enacted, 2015 .....	\$10,800,000
Budget estimate, 2016 .....	14,740,000
Recommended, 2016 .....	11,140,000
Comparison:	
Appropriation, 2015 .....	+340,000
Budget estimate, 2016 .....	-3,600,000

The Committee recommends \$11,140,000 for Capital Repair and Restoration \$340,000 above the fiscal year 2015 enacted level and \$3,600,000 below the budget request.

## WOODROW WILSON INTERNATIONAL CENTER FOR SCHOLARS

## SALARIES AND EXPENSES

The Woodrow Wilson International Center for Scholars promotes policy-relevant research and dialogue to increase understanding and enhance the capabilities and knowledge of leaders, citizens, and institutions worldwide. The Center hosts scholars and policy makers to do their own advanced study, research and writing and

facilitates debate and discussions among scholars, public officials, journalists and business leaders from across the country on relevant, major long-term issues facing this Nation and the world.

Appropriation enacted, 2015 .....	\$10,500,000
Budget estimate, 2016 .....	10,420,000
Recommended, 2016 .....	10,420,000
Comparison:	
Appropriation, 2015 .....	- 80,000
Budget estimate, 2016 .....	0

The Committee recommends \$10,420,000 for Salaries and Expenses of the Woodrow Wilson International Center for Scholars, \$80,000 below the fiscal year 2015 enacted level and equal to the budget request.

#### NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

#### NATIONAL ENDOWMENT FOR THE ARTS

#### GRANTS AND ADMINISTRATION

Appropriation enacted, 2015 .....	\$146,021,000
Budget estimate, 2016 .....	147,949,000
Recommended, 2016 .....	146,021,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 1,928,000

The Committee recommends \$146,021,000 for the National Endowment for the Arts (NEA), equal to the fiscal year 2015 enacted level and \$1,928,000 below the budget request.

Consistent with the Consolidated and Further Continuing Appropriations Act, 2015, no funds have been provided for the “Our Town” initiative. The Committee believes direct grant funding can be better utilized supporting other effective priorities including arts therapy and engagement treatment programs for service members. The Committee supports the NEA’s participation in the National Initiative on Arts and the Military, a collaborative effort involving Federal agencies, the military, and nonprofit and private sector partners working to advance the policy, research, and practice of arts therapy for military veterans and their families.

Further, the Committee commends the NEA for its collaboration with the Walter Reed National Military Center in creating the NEA/Walter Reed Healing Arts Partnership. Since 2011, this unique partnership has supported creative and innovative arts therapies for service members returning from Afghanistan and Iraq. This collaborative relationship has also resulted in clinical research at the Fort Belvoir Community Hospital Brain Injury Clinic in Virginia to evaluate the potential health benefits of creative arts therapy interventions for troops including service members with Traumatic Brain Injury and Post Traumatic Stress.

The Committee values greatly the longstanding collaborative relationship between the NEA and the States. State Arts Agencies support the arts for communities at the grassroots level regardless of their geographic location, providing much of their funding to smaller organizations, community groups, and schools rather than well-established arts organizations.

The Committee remains committed to supporting proven national initiatives with broad geographic reach. The Big Read, Challenge

America, and Shakespeare in American Communities are among the cost-effective grant programs with broad, bipartisan Congressional support that meet these criteria, supporting the NEA's goal of extending the arts to underserved populations in both urban and rural communities across the United States.

*Bill Language.*—Each year, the Committee provides in bill language specific guidelines under which the Endowment is directed to distribute taxpayer dollars in support of the arts. With the exception of established honorific programs, grant funding to individual artists is strictly prohibited. The Committee directs that priority be given to providing services or grant funding for projects, productions, or programs that encourage public knowledge, education, understanding, and appreciation of the arts. Any reduction in support to the States for arts education should be no more than proportional to other funding decreases taken in other NEA programs.

Reforms originally instituted by the Committee in P.L. 108–447 relating to grant guidelines and program priorities are fully restated in Sections 413 and 414 of the bill. The Committee expects the NEA to adhere to them fully. These reforms maintain broad bipartisan support and continue to serve well both the NEA and the public.

#### NATIONAL ENDOWMENT FOR THE HUMANITIES

##### GRANTS AND ADMINISTRATION (INCLUDING MATCHING GRANTS)

Appropriation enacted, 2015 .....	\$146,021,000
Budget estimate, 2016 .....	147,942,000
Recommended, 2016 .....	146,021,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	–1,921,000

The Committee recommends a total of \$146,021,000 for the National Endowment for the Humanities (NEH), equal to the fiscal year 2015 enacted level and \$1,921,000 below the budget request.

The Committee commends the NEH for its support of grant programs like the Warrior-Scholar Project to benefit veterans and service members transitioning to civilian life. Within funds provided, the Committee encourages the NEH to prioritize efforts to connect the humanities to the experience of veterans and provide educational opportunities for these American heroes.

The Committee commends the NEH Federal/State Partnership for its ongoing, successful collaboration with State humanities councils in each of the 50 states as well as Washington, D.C., the Commonwealth of Puerto Rico, the U.S. Virgin Islands, Guam, the Commonwealth of the Northern Mariana Islands, and American Samoa. Every NEH dollar received by a council is matched by a local contribution. In recent years, the proportion of NEH program funds supporting the work of State humanities councils has grown to nearly 40 percent. The Committee urges the NEH to provide program funding to support the work of State humanities councils consistent with the guidance provided in the Consolidated and Further Continuing Appropriations Act, 2015.

## COMMISSION OF FINE ARTS

The Commission of Fine Arts was established in 1910 to advise the Federal government on matters pertaining to the design of national symbols, and particularly to guide the architectural development of Washington, D.C. The Commission's work includes advice on designs for parks, public buildings, public art, as well as the design of national monuments, coins and medals, and overseas American military cemeteries. In addition, the Commission conducts design reviews of semipublic and private structures within the Old Georgetown Historic District and within certain areas of the National Capital that are adjacent to areas of Federal interest. The Commission reviews approximately 700 projects annually. The Commission also administers the National Capital Arts and Cultural Affairs program.

## SALARIES AND EXPENSES

Appropriation enacted, 2015 .....	\$2,524,000
Budget estimate, 2016 .....	2,653,000
Recommended, 2016 .....	2,524,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 129,000

The Committee recommends \$2,524,000 for Salaries and Expenses of the Commission of Fine Arts, equal to the fiscal year 2015 enacted level and \$129,000 below the budget request.

## NATIONAL CAPITAL ARTS AND CULTURAL AFFAIRS

Appropriation enacted, 2015 .....	\$2,000,000
Budget estimate, 2016 .....	2,000,000
Recommended, 2016 .....	2,000,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	0

The National Capital Arts and Cultural Affairs (NCACA) program was established in Public Law 99-190 to support organizations that perform, exhibit, and/or present the arts in the Nation's Capital. The Committee recommends \$2,000,000, equal to the fiscal year 2015 enacted level and the budget request.

*Bill Language.*—The bill does not include requested language addressing limitations on grant recipient eligibility. The Committee directs the program to provide a report, not later than 90 days after enactment of this Act, detailing the potential future impact of inclusion of such bill language on those arts and cultural affairs organizations that received NCACA grant funding in fiscal year 2015.

## ADVISORY COUNCIL ON HISTORIC PRESERVATION

## SALARIES AND EXPENSES

The National Historic Preservation Act of 1966 established the Advisory Council on Historic Preservation (ACHP). The ACHP was granted permanent authorization as part of the National Historic Preservation Act Amendments of 2006 (Public Law 109-453). The ACHP promotes the preservation, enhancement, and productive

use of our nation's historic resources and advises the President and Congress on national historic preservation policy.

Appropriation enacted, 2015 .....	\$6,204,000
Budget estimate, 2016 .....	6,080,000
Recommended, 2016 .....	6,080,000
Comparison:	
Appropriation, 2015 .....	- 124,000
Budget estimate, 2016 .....	0

The Committee recommends \$6,080,000 for Salaries and Expenses of the Advisory Council on Historic Preservation (ACHP), \$124,000 below the fiscal year 2015 enacted level and equal to the budget request.

#### NATIONAL CAPITAL PLANNING COMMISSION

##### SALARIES AND EXPENSES

The National Capital Planning Act of 1952 designated the National Capital Planning Commission as the central planning agency for the Federal government in the National Capital Region. The three major functions of the Commission are to prepare and adopt the Federal elements of the National Capital Comprehensive Plan; prepare an annual report on a five-year projection of the Federal Capital Improvement Program; and review plans and proposals submitted to the Commission.

Appropriation enacted, 2015 .....	\$7,948,000
Budget estimate, 2016 .....	8,348,000
Recommended, 2016 .....	7,948,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 400,000

The Committee recommends \$7,948,000 for Salaries and Expenses of the National Capital Planning Commission, equal to the fiscal year 2015 enacted level and \$400,000 below the budget request.

#### UNITED STATES HOLOCAUST MEMORIAL MUSEUM

##### HOLOCAUST MEMORIAL MUSEUM

In 1980, Congress passed legislation creating a 65-member Holocaust Memorial Council with the mandate to create and oversee a living memorial/museum to victims of the Holocaust. The museum opened in April 1993. Construction costs for the museum came solely from donated funds raised by the U.S. Holocaust Memorial Museum Campaign, and appropriated funds were used for planning and development of programmatic components, overall administrative support, and annual commemorative observances. Since the opening of the museum, appropriated funds have been provided to pay for the ongoing operating costs of the museum as authorized by Public Law 102-529 and Public Law 106-292. Private funds support educational outreach throughout the United States.

Appropriation enacted, 2015 .....	\$52,385,000
Budget estimate, 2016 .....	54,959,000
Recommended, 2016 .....	52,385,000
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	- 2,574,000

The Committee recommends \$52,385,000 for the Holocaust Memorial Museum, equal to the fiscal year 2015 enacted level and \$2,574,000 below the budget request.

#### DWIGHT D. EISENHOWER MEMORIAL COMMISSION

The Dwight D. Eisenhower Memorial Commission was created by Congress in 1999 through Public Law 106–79 for the purpose of establishing a permanent national memorial to Dwight D. Eisenhower, Supreme Commander of the Allied Forces in Europe in World War II and 34th President of the United States. The Commission consists of 12 members including four members of the House of Representatives, four Senators, and four private citizens appointed by the President.

#### SALARIES AND EXPENSES

Appropriation enacted, 2015 .....	\$1,000,000
Budget estimate, 2016 .....	2,000,000
Recommended, 2016 .....	0
Comparison:	
Appropriation, 2015 .....	–1,000,000
Budget estimate, 2016 .....	–2,000,000

The bill does not include funding for the Salaries and Expenses account.

The Committee strongly supports the construction of a permanent memorial to Dwight D. Eisenhower. However, the Commission’s ongoing indifference to the views of the Eisenhower family, and the resulting lack of consensus on the memorial design, remain an area of significant concern. It is inconceivable and unacceptable to the Committee that a memorial to Dwight D. Eisenhower could be designed, approved, and built without the active support of the Eisenhower family. Legitimate issues raised by the Eisenhower family over the size, scope, and values reflected in the memorial’s design have been routinely disregarded even as the Commission has continued to aggressively pursue required project approvals.

Accordingly, the Committee believes a “reset” is necessary in order for the project to continue. Such a reset should include 1) an open competition and selection and approval of a new design utilizing the existing designated memorial site that includes the participation of the Eisenhower family and other partners in the planning and approval process and, 2) the appointment of new Commission staff.

The Committee notes with concern both the number of consultants under contract with the Commission and the amount paid to these consultants. The Committee has learned that, to date, the Commission has paid contract staff and consultants nearly \$7,000,000 from the salaries and expenses account. Additional amounts, including \$16,000,000 for the memorial’s architect and design firm, have been paid from the construction account. The Committee understands that some contract expenses which had been paid from the salaries and expenses account are now being paid using previously appropriated construction account funds.

The Committee further understands that the unobligated balance for the Salary and Expenses account is presently more than \$1,000,000. The Committee believes additional review of these Commission expenditures is necessary and, therefore, directs the

Commission to provide not later than 30 days after enactment of this Act, a list of all paid contractors and consultants to the Commission since fiscal year 2011, their function, contract amount, payment amounts made to each to date, and whether payments to such contractors or consultants have been paid from the Salaries and Expenses account or the Construction account.

Also worth noting is the Commission's anemic fundraising record. In spite of paying a fundraising consultant \$1,400,000 over the last four years, the Commission has raised less than \$450,000 to date (including \$300,000 from a single donor). This leaves the Commission well behind its fundraising goal to complete the memorial. The Eisenhower family, whose support is critical to raising funds, has indicated its willingness and desire to assist with fundraising should a memorial be built that more closely reflects the Eisenhower family's values.

Given these concerns, the Committee strongly urges the authorizers of jurisdiction in the House and Senate to work expeditiously on legislation to authorize an open, public, and transparent new design process that is collaborative and involves the various constituencies as partners including, but not limited to, the Congress, the Eisenhower family, the Eisenhower Commission, the National Park Service, the Commission on Fine Arts, and the National Capitol Planning Commission. Such legislation should direct the appointment of a new Commission staff.

In the interim, the Committee directs that monthly expenditures by the Commission shall be limited to payroll, rent, utilities and other fixed costs associated with essential daily operations of the Commission only. No funds previously appropriated shall be used for travel-related expenses. The Committee also directs the Commission to submit to the Committees on Appropriations a monthly report on all expenditures from amounts previously appropriated.

#### CAPITAL CONSTRUCTION

Appropriation enacted, 2015 .....	\$0
Budget estimate, 2016 .....	68,200,000
Recommended, 2016 .....	0
Comparison:	
Appropriation, 2015 .....	0
Budget estimate, 2016 .....	-68,200,000

The bill does not include funding for the Capital Construction account. No additional funding will be provided until a public competition for a new design occurs utilizing the existing designated memorial site. The Committee continues bill language maintaining the approved site of the memorial and preventing construction of the memorial to begin until all necessary construction funds have been appropriated.

#### TITLE IV—GENERAL PROVISIONS

Section 401 continues a provision prohibiting activities to promote public support or opposition to legislative proposals.

Section 402 continues a provision providing for annual appropriations unless expressly provided otherwise in this Act.

Section 403 continues a provision providing restrictions on departmental assessments unless approved by the Committees on Appropriations.

Section 404 continues a limitation on accepting and processing applications for patents and on the patenting of Federal lands; permits processing of grandfathered applications; and permits third-party contractors to process grandfathered applications.

Section 405 continues a provision regarding the payment of contract support costs for fiscal year 2014 and prior years.

Section 406 addresses the payment of contract support costs for fiscal year 2016.

Section 407 continues a provision allowing Forest Service land management plans to be more than 15 years old if the Secretary is acting in good faith to update such plans and prohibiting the use of funds to implement new wilderness directives under the planning rule.

Section 408 continues a provision limiting preleasing, leasing, and related activities within the boundaries of National Monuments.

Section 409 continues a provision which restricts funding for acquisition of land from being used for declarations of taking or complaints in condemnation.

Section 410 continues a provision addressing timber sales involving Alaskan western red cedar.

Section 411 continues a provision which prohibits no-bid contracts and grants except under certain circumstances.

Section 412 continues a provision which requires public disclosure of certain reports.

Section 413 continues a provision which delineates the grant guidelines for the National Endowment for the Arts.

Section 414 continues a provision which delineates the program priorities for the programs managed by the National Endowment for the Arts.

Section 415 continues a provision requiring the Department of the Interior, the EPA, the Forest Service, and the Indian Health Service to provide the Committees on Appropriations a quarterly report on the status of balances of appropriations.

Section 416 requires the President to submit a report to the Committees on Appropriations no later than 120 days after the fiscal year 2017 budget is submitted to Congress describing in detail all Federal agency obligations and expenditures for climate change programs and activities in fiscal years 2015 and 2016.

Section 417 continues a provision prohibiting the use of funds to promulgate or implement any regulation requiring the issuance of permits under title V of the Clean Air Act for carbon dioxide, nitrous oxide, water vapor, or methane emissions.

Section 418 continues a provision prohibiting the use of funds to implement any provision in a rule if that provision requires mandatory reporting of greenhouse gas emissions from manure management systems.

Section 419 provides a one-year extension of the current recreation fee authority.

Section 420 continues a provision from the Consolidated and Further Continuing Appropriations Act, 2015 modifying authorities relating to the Dwight D. Eisenhower Memorial Commission.

Section 421 prohibits the use of funds to regulate the lead content of ammunition or fishing tackle.

Section 422 prohibits the use of funds to develop, adopt, implement, administer, or enforce a change or supplement to a rule or guidance documents pertaining to the definition of waters under the Federal Water Pollution Control Act.

Section 423 prohibits the use of funds to develop, carry out, implement, or enforce proposed regulations published on June 18, 2010.

Section 424 prohibits the use of funds to limit recreational shooting and hunting on Federal and public lands except for public safety.

Section 425 prohibits the use of funds for the National Ocean Policy developed under Executive Order 13547.

Section 426 prohibits EPA from using funds to implement, administer, or enforce the lead renovation rule until EPA has approved a commercially available lead test kit.

Section 427 prohibits EPA from using funds to develop, propose, finalize, implement, enforce, or administer any regulation that would establish new financial responsibility requirements under CERCLA.

Section 428 prohibits EPA from using funds to develop, issue, implement, or enforce any greenhouse gas New Source Performance Standards on any new or existing source that is an electric utility generating unit.

Section 429 prohibits the use of funds from making any change to the regulations in effect on October 1, 2012, pertaining to the definitions of the terms “fill material” or “discharge of fill material”.

Section 430 continues a provision through fiscal year 2017 authorizing the Secretary of the Interior and the Secretary of Agriculture to consider local contractors when awarding contracts for certain activities on public lands.

Section 431 extends the authorization for the Chesapeake Bay Initiative.

Section 432 extends certain authorities through fiscal year 2016 allowing the Forest Service to renew grazing permits.

Section 433 makes available vacant allotments for permittees impacted by drought or wildland fire.

Section 434 clarifies the protection of water rights with regard to Forest Service and Bureau of Land Management permits.

Section 435 limits the use of funds for status changes of certain chemicals.

Section 436 sets requirements for the use of American iron and steel for certain loans and grants.

Section 437 prohibits the use of funds pertaining to certain updates to the social cost of carbon.

Section 438 establishes a Spending Reduction Account in the bill.

#### BILL-WIDE REPORTING REQUIREMENTS

The following items are included in accordance with various requirements of the Rules of the House of Representatives:

#### FULL COMMITTEE VOTES

Pursuant to the provisions of clause 3(b) of rule XIII of the Rules of the House of Representatives, the results of each roll call vote

on an amendment or on the motion to report, together with the names of those voting for and those voting against, are printed below:

**[INSERT FULL COMMITTEE VOTES]**

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

Pursuant to clause 3(c)(4) of rule XIII of the Rules of the House of Representatives, the following is a statement of general performance goals and objectives for which this measure authorizes funding:

The Committee on Appropriations considers program performance, including a program's success in developing and attaining outcome-related goals and objectives, in developing funding recommendations.

RESCISSION OF FUNDS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following table is submitted describing the rescission recommended in the accompanying bill:

Department and activity:  
Amounts recommended for rescission:

Department of the Interior: Land and Water Conservation	
Fund (contract authority) .....	\$28,000,000.
Environmental Protection Agency: STAG .....	\$8,000,000.

TRANSFERS OF FUNDS

Pursuant to clause 3(f)(2) of rule XIII of the Rules of the House of Representatives, the following table is submitted describing the transfer of funds in the accompanying bill.

## APPROPRIATION TRANSFERS RECOMMENDED IN THE BILL

Account from which transfer is made	Amount (000's)	Account to which transfer is made	Amount (000's)
Department of the Interior, National Park Service	not specified	Department of Transportation, Federal Highway Administration	not specified
Department of the Interior, BIA/BIE, Operation of Indian Programs	not specified	Indian forest land assistance accounts	not specified
Department of the Interior, Bureau of Indian Affairs Construction	not specified	Bureau of Reclamation	not specified
Department of the Interior, Office of Insular Affairs	not specified	Secretary of Agriculture	not specified
Department of the Interior, Office of the Special Trustee for American Indians	not specified	Department of the Interior, BIA/BIE, Operation of Indian Programs, Office of the Solicitor, Salaries and Expenses; Office of the Secretary, Departmental Operations	not specified
Department of the Interior, Wildland Fire Management	not specified	Department of the Interior, for repayment of advances made during emergencies	not specified
Department of the Interior, Wildland Fire Management	up to \$50,000	Forest Service, Wildland Fire Management	up to \$50,000
Department of the Interior, FLAME Wildfire Suppression Reserve Fund	not specified	Department of the Interior, Wildland Fire Management	not specified
Department of the Interior, Intra-Bureau	not specified	Department of the Interior, Intra-Bureau, for emergency purposes as specified	not specified
Department of the Interior, Department-Wide	not specified	Department of the Interior, Department-Wide, for emergency purposes as specified	not specified
Bureau of Indian Affairs and Bureau of Indian Education, and Office of the Special Trustee	not specified	Indian trust management and reform activities	not specified
Environmental Protection Agency, Hazardous Substance Superfund	not specified	Other Federal Agencies	not specified

Forest Service, Administrative Provisions	up to \$14,500	USDA, Greenbook	up to \$14,500
Office of Navajo and Hopi Indian Relocation, Salaries and Expenses	\$200	Department of the Interior, Office of Inspector General	\$200

DISCLOSURE OF EARMARKS AND CONGRESSIONALLY DIRECTED  
SPENDING ITEMS

Neither the bill nor the report contains any Congressional earmarks, limited tax benefits, or limited tariff benefits as defined by clause 9 of rule XXI.

COMPLIANCE WITH RULE XIII, CLAUSE 3(e) (RAMSEYER RULE)

In compliance with clause 3(e) of rule XIII of the Rules of the House of Representatives, changes in existing law made by the bill, as reported, are shown as follows (existing law proposed to be omitted is enclosed in black brackets, new matter is printed in italic, and existing law in which no change is proposed is shown in roman):

**[INSERT FROM LEGISLATIVE COUNSEL]**

CHANGES IN APPLICATION OF EXISTING LAW

Pursuant to clause 3(f)(1)(A) of rule XIII of the Rules of the House of Representatives, the following statements are submitted describing the effect of provisions in the accompanying bill, which directly or indirectly change the application of existing law. In most instances these provisions have been included in prior appropriations Acts.

The bill includes the following changes in application of existing law:

OVERALL BILL

Providing that certain appropriations remain available until expended or extends the availability of funds beyond the fiscal year where programs or projects are continuing but for which legislation does not specifically authorize such extended availability. This authority tends to result in savings by preventing the practice of committing funds on low priority projects at the end of the fiscal year to avoid losing the funds.

Limiting, in certain instances, the obligation of funds for particular functions or programs. These limitations include restrictions on the obligation of funds for administrative expenses, travel expenses, the use of consultants, and programmatic areas within the overall jurisdiction of a particular agency.

Limiting official entertainment or reception and representation expenses for selected agencies in the bill.

Continuing ongoing activities of those Federal agencies, which require annual authorization or additional legislation, which has not been enacted.

TITLE I—DEPARTMENT OF THE INTERIOR

BUREAU OF LAND MANAGEMENT

MANAGEMENT OF LANDS AND RESOURCES

Providing funds to the Bureau for the management of lands and resources.

Providing funds to the National Fish and Wildlife Foundation under certain conditions.

Permitting the use of fees for processing applications for permit to drill.

Permitting the use of mining fee collections for program operations.

Permitting the use of fees from communication site rentals.

#### LAND ACQUISITION

Providing that the appropriation shall be derived from the Land and Water Conservation Fund.

#### OREGON AND CALIFORNIA GRANT LANDS

Providing funds for the Oregon and California Grant Lands.

Authorizing the transfer of certain collections from the Oregon and California Land Grants Fund to the Treasury.

#### RANGE IMPROVEMENTS

Allowing certain funds to be transferred to the Department of the Interior for range improvements.

#### SERVICE CHARGES, DEPOSITS, AND FORFEITURES

Allowing the use of certain collected funds for certain administrative costs and operation of termination of certain facilities.

Allowing the use of funds on any damaged public lands.

Authorizing the Secretary to use monies from forfeitures, compromises or settlements for improvement, protection and rehabilitation of public lands under certain conditions.

#### MISCELLANEOUS TRUST FUNDS

Allowing certain contributed funds to be advanced for administrative costs and other activities of the Bureau.

#### ADMINISTRATIVE PROVISIONS

Permitting the Bureau to enter into agreements with public and private entities, including States.

Permitting the Bureau to manage improvements to which the United States has title.

Permitting the payment of rewards for information on violations of law on Bureau lands.

Providing for cost-sharing arrangements for printing services.

Permitting the Bureau to conduct certain projects for State governments on a reimbursable basis.

Prohibiting the use of funds for the destruction of wild horses and burros.

#### UNITED STATES FISH AND WILDLIFE SERVICE

##### RESOURCE MANAGEMENT

Limiting funds for certain Endangered Species Act programs.

##### LAND ACQUISITION

Providing that the appropriation shall be derived from the Land and Water Conservation Fund.

Providing that funding for projects may not be used for administrative costs.

COOPERATIVE ENDANGERED SPECIES CONSERVATION FUND

Providing that the appropriation shall be derived from the Land and Water Conservation Fund.

STATE AND TRIBAL WILDLIFE GRANTS

Providing for a State and Tribal wildlife grants program.

ADMINISTRATIVE PROVISIONS

Providing that programs may be carried out by direct expenditure, contracts, grants, cooperative agreements and reimbursable agreements with public and private entities.

Providing for repair of damage to public roads.

Providing options for the purchase of land not to exceed \$1.

Permitting cost-shared arrangements for printing services.

Permitting the acceptance of donated aircraft.

Providing that fees collected for non-toxic shot review and approval shall be available without further appropriation for the expenses of non-toxic shot review related expenses.

NATIONAL PARK SERVICE

OPERATION OF THE NATIONAL PARK SYSTEM

Designating funds for Everglades restoration.

Providing for repair, rehabilitation and maintenance of National Park Service assets.

NATIONAL RECREATION AND PRESERVATION

Providing for expenses not otherwise provided for.

HISTORIC PRESERVATION

Providing for expenses derived from the Historic Preservation Fund.

CONSTRUCTION

Providing funds for construction, improvements, repair or replacement of physical facilities including modified water deliveries to Everglades National Park with certain restrictions.

Providing that a single procurement may be issued for any project funded in fiscal year 2015 with a future phase indicated in the National Park Service 5-year Line Item Construction Plan.

LAND AND WATER CONSERVATION FUND

Rescinding Land and Water Conservation Fund contract authority.

LAND ACQUISITION AND STATE ASSISTANCE

Providing that the appropriation shall be derived from the Land and Water Conservation Fund.

CENTENNIAL CHALLENGE

Providing funds for Centennial Challenge projects with no less than 50 percent of the cost of each project derived from non-Federal sources.

## ADMINISTRATIVE PROVISIONS

Allowing certain franchise fees to be available for expenditure without further appropriation to extinguish or reduce liability for certain possessory interests.

Providing for the retention of administrative costs under certain Land and Water Conservation Fund programs.

Allowing National Park Service funds to be transferred to the Federal Highway Administration for purposes authorized under 23 U.S.C. 204 for reasonable administrative support costs.

## UNITED STATES GEOLOGICAL SURVEY

## SURVEYS, INVESTIGATIONS, AND RESEARCH

Providing funds to classify lands as to their mineral and water resources.

Providing funds to give engineering supervision to power permittees and Federal Energy Regulatory Commission licensees.

Limiting funds for the conduct of new surveys on private property without permission.

Limiting funds for cooperative topographic mapping or water resource data collection and investigations.

## ADMINISTRATIVE PROVISIONS

Allowing funds to be used for certain contracting, technical services, construction, maintenance, acquisition, and representation expenses.

Permitting the use of certain contracts, grants, and cooperative agreements.

Recognizing students and recent graduates as Federal employees for the purposes of travel and work injury compensation.

## BUREAU OF OCEAN ENERGY MANAGEMENT

Permitting funds for mineral leasing and environmental study; enforcing laws and contracts; and for matching grants.

Providing that funds may be used which shall be derived from non-refundable cost recovery fees collected in 2014.

Permitting the use of certain excess receipts from Outer Continental Shelf leasing activities.

Providing for reasonable expenses related to volunteer beach and marine cleanup activities.

Prohibiting the use of funds for regulating non-lease holders.

## BUREAU OF SAFETY AND ENVIRONMENTAL ENFORCEMENT

Permitting funds for mineral leasing and environmental study; enforcing laws and contracts; and for matching grants.

Providing that funds may be used which shall be derived from non-refundable cost recovery fees collected in 2014.

Permitting the use of certain excess receipts from Outer Continental Shelf leasing activities.

Permitting the use of funds derived from non-refundable inspection fees collecting in 2014.

Requiring that not less than 50 percent of inspection fees expended be used on personnel, expanding capacity and reviewing applications for permit to drill.

#### OIL SPILL RESEARCH

Providing that funds shall be derived from the Oil Spill Liability Trust Fund.

#### OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

##### REGULATION AND TECHNOLOGY

Permitting payment to State and tribal personnel for travel and per diem expenses for training.

Permitting the use of certain offsetting collections from permit fees.

#### ABANDONED MINE RECLAMATION FUND

Allowing the use of debt recovery to pay for debt collection.

Allowing that certain funds made available under title IV of Public Law 95-87 may be used for any required non-Federal share of the cost of certain projects.

Allowing funds to be used for travel expenses of State and tribal personnel while attending certain OSM training.

#### BUREAU OF INDIAN AFFAIRS AND BUREAU OF INDIAN EDUCATION

##### OPERATION OF INDIAN PROGRAMS

Limiting funds for official reception and representation expenses.

Limiting funds for welfare assistance payments, except for disaster relief.

Allowing tribal priority allocation funds to be used for unmet welfare assistance costs.

Providing forward-funding for school operations of Bureau-funded schools and other education programs.

Providing that limited funds shall be available until expended for certain purposes.

Allowing the transfer of certain forestry funds.

Allowing the use of funds to purchase uniforms or other identifying articles of clothing for personnel.

#### CONSTRUCTION

Providing for the transfer of Navajo irrigation project funds to the Bureau of Reclamation.

Providing that six percent of Federal Highway Trust Fund contract authority may be used for construction management costs.

Providing Safety of Dams funds on a non-reimbursable basis.

Requiring the use of administrative and cost accounting principles for certain school construction projects and exempting such projects from certain requirements.

Requiring conformance with building codes and health and safety standards.

Specifying the procedure for dispute resolution.

Limiting the control of construction projects when certain time frames have not been met.

Allowing reimbursement of construction costs from the Office of Special Trustee.

#### INDIAN GUARANTEED LOAN PROGRAM ACCOUNT

Limiting funds for administrative expenses and for subsidizing total loan principal.

#### ADMINISTRATIVE PROVISIONS

Allowing the use of funds for direct expenditure, contracts, cooperative agreements, compacts, and grants.

Allowing contracting for the San Carlos Irrigation Project.

Limiting the use of funds for certain contracts, grants and cooperative agreements.

Allowing Tribes to return appropriated funds.

Prohibiting funding of Alaska schools.

Limiting the number of schools and the expansion of grade levels in individual schools.

Specifying distribution of indirect and administrative costs for certain Tribes.

Prohibiting the implementation of a new tribal recognition rule.

#### DEPARTMENTAL OFFICES

##### OFFICE OF THE SECRETARY, SALARIES AND EXPENSES

Allowing the use of certain funds for official reception and representation expenses.

Permitting payments to former Bureau of Mines workers.

Designating funds for mineral revenue management activities.

Designating funds for consolidated appraisal services to be derived from the Land and Water Conservation Fund.

Designating funds for mineral revenue management activities.

Allowing certain refunds of overpayments in connection with certain Indian leases.

#### ADMINISTRATIVE PROVISIONS

Allowing certain payments authorized for the Payments in Lieu of Taxes Program to be retained for administrative expenses.

Providing that no Payments in Lieu of Taxes Program payment be made to otherwise eligible units of local government if the computed amount of the payment is less than \$100.

Providing that a payment made to a unit of general local government for fiscal year 2016 may be reduced by the Secretary to correct overpayments, and increased by the Secretary to correct underpayments, to such unit of local government for the previous fiscal year.

Extending funding for Payment in Lieu of Taxes.

#### INSULAR AFFAIRS

##### ASSISTANCE TO TERRITORIES

Designating funds for various programs and for salaries and expenses of the Office of Insular Affairs.

Allowing audits of the financial transactions of the Territorial and Insular governments by the GAO.

Providing grant funding under certain terms of the Agreement of the Special Representatives on Future United States Financial Assistance for the Northern Mariana Islands.

Providing for capital infrastructure in various Territories.

Allowing appropriations for disaster assistance to be used as non-Federal matching funds for hazard mitigation grants.

#### COMPACT OF FREE ASSOCIATION

Providing grants to Palau, the Marshall Islands, and Micronesia.

#### ADMINISTRATIVE PROVISIONS, INSULAR AFFAIRS

Allowing, at the request of the Governor of Guam, for certain discretionary or mandatory funds to be used to assist securing certain rural electrification loans through the U.S. Department of Agriculture.

#### OFFICE OF SPECIAL TRUSTEE FOR AMERICAN INDIANS

##### FEDERAL TRUST PROGRAMS

Limiting the amount of funding available for the historical accounting of Indian trust fund accounts.

Allowing transfers to other Department of the Interior accounts.

Providing no-year funding for certain Indian Self-Determination Act grants.

Exempting quarterly statements for Indian trust accounts \$15 or less.

Requiring annual statements and records maintenance for Indian trust accounts.

Limiting use of funds to correct administrative errors in Indian trust accounts.

Permitting the use of recoveries from erroneous payments pursuant to Indian trust accounts.

#### DEPARTMENT-WIDE PROGRAMS

##### WILDLAND FIRE MANAGEMENT

Providing funds for wildland fire management.

Designating funds for renovation or construction of fire facilities and designating funds for Wildfire suppression operations.

Permitting the repayments of funds transferred from other accounts for firefighting.

Designating funds for hazardous fuels and burned area rehabilitation.

Permitting the use of funds for lodging and subsistence of firefighters.

Permitting the use of grants, contracts and cooperative agreements for hazardous fuels reduction, including cost-sharing and local assistance.

Permitting cost-sharing of cooperative agreements with non-Federal entities under certain circumstances.

Providing for local competition for hazardous fuel reduction activities.

Permitting reimbursement to the U.S. Fish and Wildlife Service and the National Marine Fisheries Service for consultation activities under the Endangered Species Act.

Providing certain terms for leases of real property with local governments.

Providing for the transfer of funds between the Department of the Interior and the Department of Agriculture for wildland fire management.

Providing funds for support of Federal emergency response actions.

Allowing for international forestry assistance to or through the Department of State.

#### FLAME WILDFIRE SUPPRESSION RESERVE FUND

Providing funds for the FLAME fund.

#### CENTRAL HAZARDOUS MATERIALS FUND

Providing funds for response action, including associated activities, performed pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act.

#### WORKING CAPITAL FUND

Allowing funds for the financial and business management system and information technology improvement.

Prohibiting use of funds to establish reserves in the working capital fund with exceptions.

Allowing assessments for reasonable charges for training services at the National Indian Program Center and use of these funds under certain conditions.

Providing space and related facilities or the lease of related facilities, equipment or professional services of the National Indian Program Training Center to state, local and Tribal employees or other persons for cultural, educational or recreational activities.

Providing that the Secretary may enter into grants and cooperative agreements to support the Office of Natural Resource Revenue's collection and disbursement of royalties, fees, and other mineral revenue proceeds, as authorized by law.

#### ADMINISTRATIVE PROVISION

Allowing acquisition of certain aircraft.

Allowing the sale of existing aircraft with proceeds used to offset the purchase price of replacement aircraft.

#### GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

Allowing transfer of funds for certain reconstruction of facilities, aircraft or utilities in emergency situations.

Allowing transfer of funds in certain emergency situations, including wildfires and oil spill response, if other funds provided in other accounts will be exhausted within 30 days and a supplemental appropriation is requested as promptly as possible.

Permitting the Department to use limited funding for certain services.

Permitting the transfer of funds between the Bureau of Indian Affairs and the Office of Special Trustee for American Indians and limiting amounts for historical accounting activities.

Authorizing the redistribution of Tribal Priority Allocation funds to address unmet needs.

Authorizing the acquisition of lands and leases for Ellis, Governors and Liberty Islands.

Providing the authority for the Secretary to collect nonrefundable inspection fees.

Permitting the reorganization of the Bureau of Ocean Energy Management, Enforcement and Regulation.

Permitting the Secretary of the Interior to enter into long-term agreements for wild horse and burro holding facilities.

Requiring the U.S. Fish and Wildlife Service to mark hatchery salmon.

Addressing BLM actions regarding grazing on public lands.

Prohibiting the use of funds to implement, administer or enforce Secretarial Order 3310.

Providing the Secretary of the Interior statutory authority to enter into rental or lease agreements that benefit Bureau of Indian Education operated schools.

Authorizing funds for the Volunteers in Parks program.

Authorizing Indian Affairs to record obligations against accounts receivable, provided that total obligations do not exceed total budgetary resources.

Providing authorities for heritage areas.

Limiting funds for a proposed rule for sage-grouse pursuant to the Endangered Species Act.

Extending authority to pay certain offshore petroleum-related personnel at a higher rate.

Extending authority to pay certain onshore petroleum-related personnel at a higher rate.

Maintaining the status quo on regulations relating to the legal domestic trade and transport of products containing ivory.

Requiring the reissuance of certain final rules and prohibiting such rules from further judicial review.

Requiring that an interim rule pursuant to section 4(d) of the Endangered Species Act be amended.

## TITLE II—ENVIRONMENTAL PROTECTION AGENCY

### SCIENCE AND TECHNOLOGY

Providing for operating expenses in support of research and development.

Designating funding for National Priorities research as specified in the explanatory statement to this Act.

### ENVIRONMENTAL PROGRAMS AND MANAGEMENT

Allowing hire and maintenance of passenger motor vehicles and operation of aircraft and purchase of reprints and library memberships in societies or associations which issue publications to members only or at a price to members lower than to subscribers who are not members.

Limiting amounts for official representation and reception expenses.

Providing two-year funding availability for administrative costs of Brownfields program.

Designating funding for National Priorities as specified in the explanatory statement to this Act.

HAZARDOUS SUBSTANCE SUPERFUND

Allowing distribution of funds to purchase services from other agencies under certain circumstances.

Providing for the transfer of funds within certain agency accounts.

LEAKING UNDERGROUND STORAGE TANK PROGRAM

Providing for grants to Federally-recognized Indian Tribes.

STATE AND TRIBAL ASSISTANCE GRANTS

Limiting funding amounts for certain programs.

Specifying funding for capitalization grants for the Clean Water and Drinking Water State Revolving Funds and allowing certain amounts for additional subsidies.

Designating funds for specific sections of law.

Providing certain grants under authority of Section 103, Clean Air Act.

Providing waivers for certain uses of Clean Water and Drinking Water State Revolving Funds for State administrative costs for grants to federally-recognized Indian Tribes and grants to specific Territories and Freely Associated States.

Requiring that 10 percent Clean Water and 20 percent of Drinking Water funds shall be used by States for forgiveness of principal or negative interest loans.

Prohibiting the use of funds for jurisdictions that permit development or construction of additional colonia areas.

Providing funding for environmental information exchange network initiatives grants, statistical surveys of water resources and enhancements to State monitoring programs, tribal grants, and underground storage tank projects.

ADMINISTRATIVE PROVISIONS

Allowing awards of grants to federally-recognized Indian Tribes.

Authorizing the collection and obligation of pesticide registration service fees.

Allowing the transfer of funds from the "Environmental Programs and Management" account to support the Great Lakes Restoration Initiative and providing for certain interagency agreements and grants to various entities in support of this effort.

Providing amounts for construction, alteration, repair, rehabilitation, and renovation of facilities.

Rescinding unobligated grants.

Providing for grants to federally recognized Tribes.

## TITLE III—RELATED AGENCIES

## FOREST SERVICE

## FOREST AND RANGELAND RESEARCH

Providing funds for forest and rangeland research.  
Designating funds for the forest inventory and analysis program.

## STATE AND PRIVATE FORESTRY

Providing for forest health management, including treatments of certain pests or invasive plants, and for restoring damaged forests, and for cooperative forestry, education and land conservation activities, and conducting an international program.

Providing that the appropriation for the Forest Legacy program shall be derived from the Land and Water Conservation Fund.

## NATIONAL FOREST SYSTEM

Providing funds for the National Forest System.  
Depositing funds in the Collaborative Forest Landscape Restoration Fund.  
Designating funds for forest products.  
Designating funds in the Integrated Resource Restoration pilot program.

## CAPITAL IMPROVEMENT AND MAINTENANCE

Providing funds for construction, reconstruction, and maintenance and acquisition of buildings and other facilities and infrastructure; and for construction, capital improvement, decommissioning, and maintenance of forest roads and trails.

Requiring that funds becoming available in fiscal year 2016 for the road and trails fund (16 U.S.C. 501) shall be transferred to the Treasury.

Providing for the transfer of funds to the National Forest System for the Integrated Resource Restoration pilot program.

## LAND ACQUISITION

Providing that the appropriation shall be derived from the Land and Water Conservation Fund.

## ACQUISITION OF LANDS FOR NATIONAL FORESTS SPECIAL ACTS

Requiring that funding for the program is derived from forest receipts.

## ACQUISITION OF LANDS TO COMPLETE LAND EXCHANGES

Requiring that funding for the program is derived from funds deposited by State, county, or municipal governments and non-Federal parties pursuant to Land Sale and Exchange Acts.

## RANGE BETTERMENT FUND

Providing that fifty percent of monies received for grazing fees shall be used for range improvements and limiting administrative expenses to six percent.

## GIFTS, DONATIONS AND BEQUESTS

Providing for gifts, donations and bequest per Federal law.

## MANAGEMENT OF NATIONAL FORESTS FOR SUBSISTENCE USES

Providing funds for subsistence uses per the Alaska National Interest Lands Conservation Act.

## WILDLAND FIRE MANAGEMENT

Permitting the use of funds for emergency rehabilitation and restoration and hazardous fuels reduction to support emergency response and wildfire suppression.

Allowing the use of wildland fire funds to repay advances from other accounts.

Allowing reimbursement of States for certain wildfire emergency activities.

Designating funds for the Joint Fire Sciences Program and extending authorities for Fire Science Research.

Allowing funds to be available for emergency rehabilitation, hazardous fuels reduction and emergency response.

Designating funds for suppression, hazardous fuels reduction and national fire plan research.

Designating funds for State fire assistance and volunteer fire assistance Federal and State and private lands.

Providing for cooperative agreements and grants.

Allowing funds available for Community Forest Restoration Act to be used on non-Federal land.

Limiting the transfer of wildland fire management funds between the Department of the Interior and the Department of Agriculture.

Designating the use of hazardous fuels reduction funds for biomass grants.

Providing that funds transferred from the FLAME Wildfire Suppression Reserve Fund shall be assessed for cost pools.

Permitting the transfer of funds for the Integrated Resources Restoration pilot.

## FLAME WILDFIRE SUPPRESSION RESERVE FUND

Providing funds for the FLAME fund and authorizing transfers under certain conditions.

## ADMINISTRATIVE PROVISIONS

Permitting the purchase of passenger motor vehicles and proceeds from the sale of aircraft may be used to purchase replacement aircraft.

Allowing funds for certain employment contracts.

Allowing funds to be used for purchase and alteration of buildings.

Allowing for acquisition of certain lands and interests.

Allowing expenses for certain volunteer activities.

Providing for the cost of uniforms.

Providing for debt collections on certain contracts.

Allowing transfer of funds in certain emergency situations if all other funds provided for wildfire suppression will be obligated within 30 days and the Secretary notifies the Committees.

Allowing funds to be used through the Agency for International Development for work in foreign countries and to support other forestry activities outside of the United States.

Allowing the Forest Service, acting for the International Program, to sign certain funding agreements with foreign governments and institutions as well as with certain domestic agencies.

Authorizing the expenditure or transfer of funds for wild horse and burro activities.

Prohibiting the transfer of funds under the Department of Agriculture transfer authority under certain conditions.

Limiting the transfer of funds for the Working Capital Fund and Department Reimbursable Program (also known as Greenbook charges).

Limiting funds to support the Youth Conservation Corps and Public Lands Corps.

Limiting the use of funds for official reception and representation expenses.

Providing for matching funds for the National Forest Foundation.

Providing for matching funds for the National Fish and Wildlife Foundation.

Allowing funds to be used for technical assistance for certain rural communities.

Allowing funds for payments to counties in the Columbia River Gorge National Scenic Area.

Allowing funds to be used for the Older Americans Act.

Permitting funding assessments for facilities maintenance, rent, utilities, and other support services.

Limiting funds to reimburse the Office of General Counsel at the Department of Agriculture.

Permitting eligible employees to be considered a Federal Employee.

#### INDIAN HEALTH SERVICE

#### INDIAN HEALTH SERVICES

Providing that tribal contract and grant funding is deemed obligated at the time of grant or contract award and remains available until expended.

Providing no-year funds for contract medical care including the Indian Catastrophic Health Emergency Fund.

Providing for loan repayment under sections 104 and 108 of the Indian Health Care Improvement Act with certain conditions and making the funds available for certain other purposes.

Providing that certain contracts and grants may be performed in two fiscal years.

Providing for use of collections and reporting of collections under Title IV of the Indian Health Care Improvement Act.

Providing no-year funding for scholarship funds.

Providing for the collection of individually identifiable health information relating to the Americans with Disabilities Act by the Bureau of Indian Affairs.

Permitting the use of Indian Health Care Improvement Fund monies for facilities improvement and providing no-year funding availability.

Providing that certain funds are made available until expended.

#### INDIAN HEALTH FACILITIES

Providing that facilities funds may be used to purchase land, modular buildings and trailers.

Providing for TRANSAM equipment to be purchased from the Department of Defense.

Prohibiting the use of funds for sanitation facilities for new homes funded by the Department of Housing and Urban Development.

Allowing for the purchase of ambulances.

Providing for a demolition fund.

#### ADMINISTRATIVE PROVISIONS

Providing for per diem expenses for senior level positions.

Providing for payments for telephone service in private residences in the field, purchase of motor vehicles, aircraft and reprints.

Providing for purchase and erection of modular buildings.

Providing funds for uniforms.

Allowing funding to be used for attendance at professional meetings.

Providing that health care may be extended to non-Indians at Indian Health Service facilities, subject to charges, and for the expenditure of collected funds.

Providing for transfers of funds from the Department of Housing and Urban Development to the Indian Health Service.

Prohibiting limitations on certain Federal travel and transportation expenses.

Allowing de-obligation and re-obligation of funds applied to self-governance funding agreements.

Prohibiting the expenditure of funds to implement new eligibility regulations.

Permitting certain reimbursements for goods and services provided to Tribes.

Providing that reimbursements for training, technical assistance, or services include total costs.

Providing that a strategic plan be developed for the Urban Indian Health Program in consultation with the National Academy of Public Administration.

#### AGENCY FOR TOXIC SUBSTANCES AND DISEASE REGISTRY TOXIC SUBSTANCES AND ENVIRONMENTAL PUBLIC HEALTH

Providing for the conduct of health studies, testing, and monitoring.

Providing deadlines for health assessments and studies.

Limiting the number of toxicological profiles.

EXECUTIVE OFFICE OF THE PRESIDENT  
COUNCIL ON ENVIRONMENTAL QUALITY AND OFFICE OF  
ENVIRONMENTAL QUALITY

Limiting the use of funds for official reception and representation expenses.

Designating the appointment and duties of the chairman.

OFFICE OF NAVAJO AND HOPI INDIAN RELOCATION

Providing for the transfer of funds to the Department of the Interior Office of Inspector General.

CHEMICAL SAFETY AND HAZARD INVESTIGATION BOARD

Permitting use of funds for hire of passenger vehicles, uniforms or allowances, and limiting the use of funds for per diem expenses and the number of senior level positions.

SMITHSONIAN INSTITUTION

SALARIES AND EXPENSES

Limiting certain lease terms.

Providing for purchase of passenger vehicles and certain rental, repair and cleaning of uniforms.

Designating funds for certain programs including the National Museum of African American History and Culture and providing no-year funds.

Providing that funds may be used to support American overseas research centers.

Allowing for advance payments to independent contractors performing research services or participating in official Smithsonian presentations.

FACILITIES CAPITAL

Designating funds for maintenance, repair, rehabilitation, and construction and for consultant services.

NATIONAL GALLERY OF ART

SALARIES AND EXPENSES

Allowing payment in advance for membership in library, museum, and art associations or societies.

Allowing for purchase, repair, and cleaning of uniforms for guards and employees and allowances therefor.

Allowing purchase or rental of devices for protecting buildings and contents thereof, and maintenance, alteration, improvement, and repair of buildings, approaches, and grounds.

Providing for restoration and repair of works of art by contract under certain circumstances.

Providing no-year funds for special exhibitions.

## REPAIR, RESTORATION, AND RENOVATION OF BUILDINGS

Providing lease agreements of no more than 10 years addressing space needs created by renovations under the Master Facilities Plan.

Permitting the Gallery to perform work by contract under certain circumstances.

## JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

## OPERATIONS AND MAINTENANCE

Providing funds to the John F. Kennedy Center for the Performing Arts Kennedy Center for operational and maintenance costs.

## CAPITAL REPAIR AND RESTORATION

Providing funds to the John F. Kennedy Center for the Performing Arts Kennedy Center for facility repair.

## NATIONAL ENDOWMENT FOR THE ARTS

## GRANTS AND ADMINISTRATION

Providing funds for the support of projects and productions in the arts, including arts education and public outreach activities.

## NATIONAL ENDOWMENT FOR THE HUMANITIES

## GRANTS AND ADMINISTRATION

Specifying funds to carry out the matching grants program.

Allowing obligation of National Endowment for the Humanities current and prior year funds from gifts, bequests, and devises of money for which equal amounts have not previously been appropriated.

Administrative Provisions, National Foundation on the Arts and the Humanities Prohibiting the use of funds for grants and contracts which do not include the text of 18 U.S.C. 1913.

Prohibiting the use of appropriated funds and permitting the use of non-appropriated funds for reception expenses.

Allowing the chairperson of the National Endowment for the Arts to approve small grants under certain circumstances.

## COMMISSION OF FINE ARTS

## SALARIES AND EXPENSES

Permitting the charging and use of fees for its publications and accepting gifts related to the history of the Nation's Capital.

## NATIONAL CAPITAL ARTS AND CULTURAL AFFAIRS

Providing funding for the National Capital Arts and Cultural Affairs.

## NATIONAL CAPITAL PLANNING COMMISSION

Providing funding for the National Capital Planning Commission.

Providing that one-quarter of one percent may be used for official reception and representational expenses.

#### UNITED STATES HOLOCAUST MEMORIAL MUSEUM

Designating funds for equipment replacement.

Designating funds for repair, rehabilitation and for exhibition design and production and providing no year availability for these funds.

#### TITLE IV—GENERAL PROVISIONS

Prohibiting the use of funds to promote or oppose legislative proposals on which Congressional action is incomplete.

Providing for annual appropriations unless expressly provided otherwise in this Act.

Providing for reprogramming procedures, disclosure of administrative expenses, assessments and requirements for operating plans.

Continuing a limitation on accepting and processing applications for patents and on the patenting of Federal lands; permitting processing of grandfathered applications; and permitting third-party contractors to process grandfathered applications.

Limiting the use of funds for contract support costs on Indian contracts.

Allowing the extension of forest plans and prohibiting funds for the revised Chapter 70 of the Forest Service Handbook related to wilderness per the Forest and Rangeland Renewable Resources Planning Act.

Limiting leasing and preleasing activities within National Monuments.

Limiting takings for acquisition of lands except under certain conditions.

Modifying a provision addressing timber sales involving Alaskan Red Cedar.

Prohibiting funds to enter into certain no-bid contracts except under certain conditions.

Requiring reports to Congress to be posted on public agency websites.

Continuing a provision that delineates grant guidelines for the National Endowment for the Arts.

Continuing a provision that delineates program priorities for the programs managed by the National Endowment for the Arts.

Requiring that the Department of the Interior, the EPA, the Forest Service, and the Indian Health Service provide the Committees on Appropriations a quarterly report on the status of balances of appropriations.

Requiring a government-wide report regarding expenditures on climate change.

Continuing a provision prohibiting the use of funds to promulgate or implement any regulation requiring the issuance of permits under title V of the Clean Air Act for carbon dioxide, nitrous oxide, water vapor, or methane emissions.

Continuing a provision prohibiting the use of funds to implement any provision in a rule if that provision requires mandatory report-

ing of greenhouse gas emissions from manure management systems.

Providing a one-year extension of the Federal Lands Recreation Enhancement Act.

Modifying authorities relating to the Dwight D. Eisenhower Memorial Commission.

Prohibiting the use of funds to regulate the lead content of ammunition or fishing tackle.

Prohibiting the use of funds to develop, adopt, implement, administer, or enforce a change or supplement to a rule or guidance documents pertaining to the definition of waters under the Federal Water Pollution Control Act.

Prohibiting the use of funds to develop, carry out, implement, or enforce proposed regulations published on June 18, 2010.

Prohibiting the use of funds to limit recreational shooting and hunting on Federal and public lands except for public safety.

Prohibiting the use of funds to implement the National Ocean Policy under Executive Order 13547.

Prohibiting EPA from using funds to implement, administer, or enforce the lead renovation rule until EPA has approved a commercially available lead test kit.

Prohibiting EPA from using funds to develop, propose, finalize, implement, enforce, or administer any regulation that would establish new financial responsibility requirements under CERCLA.

Prohibiting the use of funds to develop, issue, implement, or enforce any greenhouse gas New Source Performance Standards on any new or existing source that is an electric utility generating unit.

Prohibiting the use of funds from making any change to the regulations in effect on October 1, 2012, pertaining to the definitions of the terms “fill material” or “discharge of fill material”.

Continuing a provision through fiscal year 2017 authorizing the Secretary of the Interior and the Secretary of Agriculture to consider local contractors when awarding contracts for certain activities on public lands.

Extending the authority for the Chesapeake Bay Initiative.

Extending the maximum authorized term for grazing permits and leases.

Making available vacant grazing allotments for permittees impacted by drought or wildfire.

Clarifying the protection of water rights with regard to Forest Service and Bureau of Land Management permits.

Limiting the use of funds for status changes of certain chemicals.

Applying requirements for the use of American iron and steel for certain loans and grants.

Prohibiting the use of funds pertaining to certain updates to the social cost of carbon.

Establishing a Spending Reduction Account in the bill.

#### APPROPRIATIONS NOT AUTHORIZED BY LAW

Pursuant to clause 3(f)(1)(B) of rule XIII of the Rules of the House of Representatives, the following table lists the appropriations in the accompanying bill which are not authorized by law:

[Dollars in thousands]

	Last year of authorization	Authorization level	Appropriations in last year of authorization	Appropriations in this bill
<b>Bureau of Land Management</b>				
All discretionary programs	2002	Such sums...	1,862,170	1,116,594
<b>U.S. Fish and Wildlife Service</b>				
Endangered Species Act (16 U.S.C. 1531 et seq.)	1992	41,500	42,373	151,648*
Marine Mammal Protection Act (16 U.S.C. 1361 – 1407)	1999	14,768	2,008	5,470
Nonindigenous Aquatic Nuisance Species Prevention and Control Act (16 U.S.C. 4701 et seq.)	2002	6,000	6,000	13,056
African Elephant Conservation Act (16 U.S.C. 4201 et seq.)	2012	5,000	1,645	1,832
Rhinoceros and Tiger Conservation Act (16 U.S.C. 5301 et seq.)	2012	10,000	2,471	2,690
Asian Elephant Conservation Act (16 U.S.C. 4201 et seq.)	2012	5,000	1,645	1,557
North American Wetlands Conservation Act (16 U.S.C. 4401-4406)	2012	75,000	35,554	35,000
Coastal Barrier Resources Act of 1982, amended by Improvement Act of 2000 & Reauthorization Act of 2005	2010	2,000	1,390	1,390
Great Ape Conservation Act (16 U.S.C. 6301 et seq.)	2010	5,000	2,500	1,975
Marine Turtle Conservation Act (16 U.S.C. 6601)	2009	5,000	2,000	1,507
National Fish and Wildlife Foundation Establishment Act (16 U.S.C. 3701 et seq.)	2010	25,000	7,537	7,022
Neotropical Migratory Bird Conservation Act of 2000 (16 U.S.C. 6101 et seq.)	2010	6,500	5,000	3,660
Partners for Fish and Wildlife Act (16 U.S.C. 3771 et seq.)	2011	75,000	60,134	51,776
<b>U.S. Geological Survey</b>				
Energy Resources Program (50 U.S.C. 167n, P.L. 113-40)	2015	1,000	24,895	24,895
Earthquake Hazards Program (P.L. 108-360, 42 U.S.C. Sec. 7701-7709)	2009	88,900	55,126	59,503
Science Synthesis, Analysis, and Research (42 U.S.C. 15908 sec 351, P.L. 109-58)	2010	30,000	1,000	24,299
Water Resources Research Act Program (42 U.S.C. 10301 – 10303, P.L. 109-471)	2011	12,000	6,486	6,500
<b>Bureau of Indian Affairs</b>				
The No Child Left Behind Act (20 U.S.C. 7401 et seq., P.L. 107-110)	2007	N/A	549,293	722,193
Indian Child Protection and Family Violence Prevention Act (25 U.S.C. 3210, 104 Stat. 4531, P.L. 101 630, Title IV.)	1997	30,000	26,116	41,871
Indian Tribal Justice Act, as amended by TLOA (Tribal Law and Order Act of 2010, P.L. 111-211)	2015	58,400	28,617	32,025
The Higher Education Act of 1965 (20 U.S.C. 1001 et seq P.L. 110-315)	2013	N/A	52,398	57,368
Tribally Controlled Colleges or University Assistance Act of 1978 (20 U.S.C. 1018 et seq P.L. 110-315)	2013	N/A	64,947	69,793
The Higher Education Act of 1965 (25 USC 1862 (a) and (b))	2013	N/A	6,434	6,814
<b>Office of Insular Affairs</b>				
Brown Tree Snake Control and Eradication Act of 2004(P.L. 108-384)	2010	No more than 3,000	2,994	3,500
<b>Environmental Protection Agency</b>				
Clean Air Act	1997	Such sums...	450,000	647,000
Hazardous Substance Superfund	1994	5,100	1,480,853	1,088,769
Great Lakes	2008	\$25,000	\$475,000	300,000

Lake Champlain Basin	2008	\$11,000	\$3,000	1,399
Long Island Sound Restoration	2010	\$40,000	\$7,000	3,940
Lake Pontchartrain Basin	2011	\$20,000	\$1,000	948
Chesapeake Bay Restoration	2005	\$40,000	\$23,000	60,000
National Estuary Program	2010	\$35,000	\$33,000	25,098
State and Tribal Assistance Grants:				
Alaska and Rural Native Villages	2010	\$13,000	\$13,000	10,000
CERCLA/Brownfields Cat Grant	2006	50,000	49,000	47,745
Brownfield Revitalization Funding	2006	200,000		75,000
Drinking Water SRF	2003	1,000,000	845,000	757,000
Grants for State Public Water	2003	100,000	93,000	101,963
Lead Containment Control Act of 1988	1992	Such sums .	15,000	14,049
Mexico Border	2011	--	\$17,000	5,000
Non-Point Source Management Program	1991	130,000	51,000	159,252
Pollution Control	1990	\$75,000	\$73,000	230,806
Pollution Prevention Act	1993	8,000	6,800	4,765
Radon Abatement Act	1991	10,000	9,000	8,051
Underground Storage Tanks	1988	25,000	7,000	1,498

National Endowment for the Arts	1993	Such sums...	174,460	146,021
National Endowment for the Humanities	1993	Such sums...	177,413	146,021

\* Appropriations in this bill for Endangered Species Act implementation are a conservative estimate.

\*\* Reauthorization has not happened as of the date this document was printed.

## COMPARISON WITH BUDGET RESOLUTION

Section 308(a)(1)(A) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93-344), as amended, requires that the report accompanying a bill providing new budget authority contain a statement detailing how the authority compares with the reports submitted under section 302 of the Act for the most recently agreed to concurrent resolution on the budget for the fiscal year. This information follows:

**[INSERT COMPARISON WITH BUDGET RESOLUTION TABLE]**

## FIVE-YEAR OUTLAY PROJECTIONS

In compliance with section 308(a)(1)(B) of the Congressional Budget Act of 1974 (Public Law 93-344), as amended, the following table contains five-year projections associated with the budget authority provided in the accompanying bill:

**[INSERT FIVE YEAR OUTLAY PROJECTIONS TABLE]**

## ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

In accordance with section 308(a)(1)(C) of the Congressional Budget Act of 1974 (Public Law 93-344), as amended, the financial assistance to State and local governments is as follows:

**[INSERT ASSISTANCE TO STATE AND LOCAL GOVERNMENTS TABLE]**

## PROGRAM DUPLICATION

No provision of this bill establishes or reauthorizes a program of the Federal government known to be duplicative of another Federal program, a program that was included in any report from the Government Accountability Office to Congress pursuant to section 21 of Public Law 111-139, or a program related to a program identified in the most recent Catalog of Federal Domestic Assistance.

## DIRECTED RULE MAKING

Pursuant to section 3(1) of H. Res. 5 (114th Congress), the Committee estimates that the bill directs three rule makings in section 121 and section 122.

## TABLE OF FUNDING RECOMMENDATIONS

The following table provides the amounts recommended by the Committee compared with the budget estimates by account.
