**EXECUTIVE OFFICE OF THE PRESIDENT**  
**OFFICE OF MANAGEMENT AND BUDGET**  
WASHINGTON, D.C. 20503

June 23, 2015  
(House Rules)

**STATEMENT OF ADMINISTRATION POLICY**  
**H.R. 2822 — Department of the Interior, Environment, and Related Agencies**  
**Appropriations Act, 2016**  
(Rep. Rogers, R-KY)

The Administration strongly opposes House passage of H.R. 2822, making appropriations for the Department of the Interior, Environment, and related agencies for the fiscal year ending September 30, 2016, and for other purposes. The bill drastically underfunds core Department of the Interior programs as well as the Environmental Protection Agency's operating budget, which supports nationwide protection of human health and our vital air, water and land resources. Funding levels in the bill would prevent investments that reduce future costs to taxpayers by facilitating increased energy development and maintaining facilities and infrastructure in national parks, refuges, forests, public lands, and Indian Country. They would make it harder for States and businesses to plan and execute changes that would decrease carbon pollution and address the challenges the Nation faces from climate change. They would also reduce support for partnerships and effective collaboration with States, local governments and private entities on efforts to restore and conserve natural resources. Further, the bill includes numerous highly problematic ideological provisions that have no place in funding legislation. These provisions threaten to undermine the ability of States and communities to address climate change and protect a resource that is essential to America's health—clean water, as well as the most basic protections for America's special places and the people and wildlife that rely on them. If the President were presented with H.R. 2822, his senior advisors would recommend that he veto the bill.

Enacting H.R. 2822 and adhering to the congressional Republican budget's overall spending limits for fiscal year (FY) 2016 would hurt our economy and shortchange investments in middle-class priorities. Sequestration was never intended to take effect: rather, it was supposed to threaten such drastic cuts to both defense and non-defense funding that policymakers would be motivated to come to the table and reduce the deficit through smart, balanced reforms. The Republican framework would bring base discretionary funding for both non-defense and defense for FY 2016 to the lowest real levels in a decade. Compared to the President's Budget, the cuts would result in tens of thousands of the Nation's most vulnerable children losing access to Head Start, millions fewer workers receiving job training and employment services, and drastic cuts to research awards and grants, along with other impacts that would hurt the economy, the middle class, and Americans working hard to reach the middle class.

Sequestration funding levels would also put our national security at unnecessary risk, not only through pressures on defense spending, but also through pressures on State, USAID, Homeland Security, and other non-defense programs that help keep us safe. More broadly, the strength of our economy and the security of our Nation are linked. That is why the President has been clear that he is not willing to lock in sequestration going forward, nor will he accept fixes to defense without also fixing non-defense.

The President's senior advisors would recommend that he veto H.R. 2822 and any other legislation that implements the current Republican budget framework, which blocks the investments needed for our economy to compete in the future. The Administration looks forward to working with the Congress to reverse sequestration for defense and non-defense priorities and offset the cost with commonsense spending and tax expenditure cuts, as Members of Congress from both parties have urged.

The Administration would like to take this opportunity to share additional views regarding the Committee's version of the bill.

### Environmental Protection Agency (EPA)

*EPA Operating Budget.* The Administration disagrees strongly with the bill's reduction to EPA's operating budget by \$474 million, or 13 percent, compared to the FY 2016 Budget request. This reduced level of funding would significantly undermine implementation of the Clean Power Plan and the recently finalized Clean Water Rule. The Clean Power Plan is a flexible and practical approach to addressing the risks of climate change by reducing carbon pollution from the electric power sector, the largest source of carbon pollution in the United States. Climate change is not only an environmental challenge, it is also an economic, public health, and national security challenge. Unabated climate change is projected to hamper economic growth in the United States and put the health and well-being of the Nation at risk from extreme weather events, wildland fire, poor air quality, and illnesses transmitted by food, water, and disease carriers such as mosquitos and ticks. Failing to address climate change would also exacerbate poverty and contribute to environmental degradation in developing countries, potentially resulting in resource shortages, political instability, and conflict. Meanwhile, the bill also reduces funding to implement the recently finalized Clean Water Rule that would ensure waters protected under the Clean Water Act are more precisely defined and predictably determined. By delaying implementation of this rule, business and industry face a more costly, difficult, and slower permitting process.

*State Categorical Grants.* The Administration opposes the \$118 million reduction to State and Tribal Categorical grants compared to the FY 2016 Budget request. Often, States and Tribes implement environmental programs through delegated authorities. However, the bill reduces these grants to States and Tribes to carry out activities such as water quality permitting, air monitoring, and hazardous waste management programs. In addition, the bill reduces funding for brownfields projects by \$35 million, or 32 percent, from the FY 2016 Budget request. This reduced level of funding severely limits opportunities for local communities to revitalize their contaminated lands to improve environmental quality and spark economic redevelopment.

*State Revolving Funds (SRFs).* The Administration objects to the funding levels provided for EPA's Clean Water and Drinking Water SRFs. The bill reduces SRF funding by a combined \$527 million from the FY 2016 Budget request, reducing necessary support to help communities finance water infrastructure improvements, resulting in approximately 200 fewer projects being funded nationally.

*Greenhouse Gas (GHG) Limits for Power Plants.* The Administration strongly objects to section 428 of the bill, which would prohibit the use of funds to propose, finalize, implement or enforce carbon pollution standards for fossil fuel-fired electric generating units that are the largest source

of carbon pollution in the United States. The bill seeks to derail Administration efforts to address under section 111 of the Clean Air Act the urgent economic, public health, and national security impacts of unabated climate change. Failure to reduce the utility sector's carbon footprint places the Nation at risk from extreme weather events, wildland fire, poor air quality, global instability, accelerated environmental degradation, and illnesses transmitted by food, water, and disease carriers such as mosquitos and ticks.

*Clean Water Act (CWA).* The Administration believes that the CWA provisions in the bill undermine efforts to protect America's clean water resources, which are critical to American families and businesses. The Administration strongly objects to section 422 of the bill in particular, which would disrupt the Administration's current efforts to clarify the scope of CWA, hamstringing future regulatory efforts, and create significant ambiguity regarding existing regulations and guidance.

*Social Cost of Carbon (SCC).* The Administration regards the SCC as an essential component of the environmental rulemaking process and opposes the Congress' interference with the Interagency Working Group's (IWG) development of the SCC. The Administration strongly objects to section 437 of the bill, which would force the IWG to revise the SCC using only the discount rates and "domestic" SCC values stated in Executive Order 12866 and Office of Management and Budget Circular A-4. This revision would ignore the trans-boundary movement of carbon, fail to capture key costs of carbon emissions, and disrupt dozens of upcoming rules that would use the SCC to monetize carbon reduction benefits.

*Limitations on Significant New Alternatives Policy (SNAP) Program under the Clean Air Act (CAA).* The Administration objects to section 435 of the bill, which would block the finalization, implementation, and enforcement of a rule to prohibit certain uses of climate super-pollutants known as hydrofluorocarbons (HFCs). Domestic action to reduce use of HFCs is consistent with U.S. advocacy for addressing HFCs on a global basis, such as through an amendment to the Montreal Protocol.

*National Ocean Policy.* The Administration objects to section 425 of the bill, which prohibits any funding provided in the bill from being used to implement the marine planning components of the National Ocean Policy. This provision would prohibit the Department of the Interior (DOI) and EPA from participating in marine and coastal planning efforts, a process to better determine how the ocean, the Nation's coasts, and the Great Lakes are managed in an efficient manner.

*Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) Financial Assurance.* The Administration objects to section 427 of the bill, which prohibits the use of funds to develop, propose, finalize, and implement financial responsibility requirements under CERCLA 108(b). On May 19, 2015, the U.S. Court of Appeals for the District of Columbia Circuit ordered EPA to develop an expedited schedule for financial responsibility rules for the hardrock mining industry and for three other industries. This provision would severely limit EPA's ability to develop these rules in a timely manner and abrogates EPA's responsibilities laid out in CERCLA 108(b).

*Classification of Forest Biomass Fuels as Carbon-Neutral.* The Administration objects to the bill's representation of forest biomass as categorically "carbon-neutral." This language conflicts with existing EPA policies on biogenic CO<sub>2</sub> and interferes with the position of States that do not

apply the same policies to forest biomass as other renewable fuels like solar or wind. This language stands in contradiction to a wide-ranging consensus on policies and best available science from EPA's own independent Science Advisory Board, numerous technical studies, many States, and various other stakeholders.

*e-Manifest.* The Administration objects to the elimination of funding for e-Manifest development, EPA's system for electronically tracking the transport of hazardous waste. While the Administration acknowledges the concern about the pace of development of the e-Manifest, eliminating the requested \$7 million in funding at this time would jeopardize EPA's ongoing progress to develop the system and begin operations in the coming years.

*Lead Test Kits.* The Administration objects to section 426 of the bill that would disrupt EPA's current activities under the 2008 Lead Renovation, Repair and Painting rule until EPA approves a commercially available "improved" lead paint test kit. This provision would undermine EPA's efforts to protect sensitive populations from exposure to lead, a known toxin to children and developing fetuses, during home renovation projects.

#### Department of the Interior (DOI)

*Bureau of Indian Affairs (BIA) Topline.* The Administration opposes the \$159 million, or 5 percent, reduction to BIA as compared to the FY 2016 Budget request. This funding level would limit DOI's ability to make key investments in education and wrap-around services to support Native youth, eliminating all increases to post-secondary scholarships and \$10 million for education program enhancement funds to allow Bureau of Indian Education to drive school improvement and reforms. The bill reduces funding for initiatives aimed at supporting tribal self-determination through the creation of a one-stop portal to facilitate access to Federal resources and funding to address data gaps in Indian Country, and the creation of an Office of Indian Affairs Policy, Program Evaluation, and Data to support effective, data-driven, tribal policy making and program implementation. In addition, this bill eliminates all increases to natural resources management on tribal lands, including funds to help tribal communities prepare for and respond to the impacts of climate change.

*National Park Service (NPS) Centennial.* The Administration opposes funding levels provided for the NPS Centennial. The bill fails to provide adequate funding to prepare for the Centennial in 2016, resulting in the delay of roughly 70 percent of line-item park construction projects and 36 percent of repair and rehabilitation projects, and forgoes millions in matching private donations. The bill also fails to provide funding for engaging youth and cultivating the next generation of conservation-minded individuals, including funding for transportation assistance to students from Title I schools.

*Onshore Inspection Fees.* The bill does not include a proposal in the FY 2016 Budget request to institute a new onshore oil and gas inspection fee program. The proposal, which is similar to the program already in place for offshore operations, would cover the cost of inspection activities and reduce the net cost to taxpayers of operating the Bureau of Land Management's (BLM) oil and gas program. Failure to adopt the new fees and associated funding would hamper the BLM's ability to protect human safety, conserve energy resources, facilitate the proper reporting of oil and gas production, and ensure environmental requirements are being followed in all phases of development.

*State and Tribal Wildlife Grants.* The Administration opposes the 15 percent reduction to State and Tribal Wildlife Grants compared to the FY 2016 Budget request. This important program allows States and Tribes, key partners in conservation, to strategically protect wildlife and conserve habitat in a way that complements Federal investments and yields better results for the public.

*Payments in Lieu of Taxes (PILT).* The bill provides \$452 million for PILT, which the Administration has proposed to fund through a separate mandatory appropriation in line with its previous congressional enactment. While the Administration appreciates the Committee's support for PILT, inclusion of these funds in the bill comes at the expense of all other programs funded by the bill.

*Carcieri Land into Trust.* The bill fails to include the provision in the FY 2016 Budget request to clarify and reaffirm the Secretary of the Interior's authority to acquire land in trust under the Indian Reorganization Act (IRA). In *Carcieri v. Salazar*, 555 U.S. 397 (2009), the Supreme Court held that the Secretary could acquire land in trust under the IRA only for tribes that were "under Federal jurisdiction" in 1934. A legislative solution would help achieve the goals of the IRA and tribal self-determination by clarifying that DOI's authority under the law applies to all tribes, whether recognized in 1934 or after. Such legislation would be consistent with the longstanding policy of assisting Tribes in establishing and protecting a land base sufficient to allow them to provide for the health, welfare, and safety of tribal members, and in treating all tribes equally for purposes of setting aside lands for tribal communities.

*Hydraulic Fracturing:* Section 439 of the bill would block DOI from implementing, administering or enforcing the Bureau of Land Management's recently-finalized Hydraulic Fracturing rule. This would leave the agency reliant on 30-year old requirements and prevent it from taking key steps to improve the safety of oil and gas drilling activities and improve opportunities for BLM to coordinate standards and processes with States and Tribes to reduce administrative costs and improve efficiency.

*Stream Buffer Regulation.* Section 423 would prohibit DOI's Office of Surface Mining, Reclamation, and Enforcement from updating 30-year-old stream protection regulations to reflect modern science and technology and better protect people and the environment, provide industry more certainty, and address recent court decisions.

*Hunting, Fishing and Recreational Shooting.* Sections 421 and 424 would substantially impair the enforcement of a longstanding ban on the use of lead ammunition in the hunting of migratory waterfowl, and would complicate in other ways the overall implementation of hunting, fishing, and recreational shooting on public lands.

*Wildlife Trafficking.* Section 120 would interfere with ongoing Fish and Wildlife Service (FWS) actions to combat wildlife trafficking, curb the poaching of African Elephants, and restrict trade in ivory, which would impair U.S. leadership in the global fight against ivory poaching.

*Endangered Species Act Restrictions.* Sections 117, 121, and 122 of the bill undercut the Endangered Species Act by limiting the ability of the FWS to properly protect, based on the best available science, a number of species, including the greater sage grouse, northern long-eared bat, and certain gray wolf populations. Language provisions, like those affecting the sage

grouse, would only create additional uncertainty and undermine unprecedented efforts to conserve the sagebrush landscape and the Western way of life.

*Federal Acknowledgement of American Indian Tribes.* Language under the heading "Bureau of Indian Affairs, Administrative Provisions" in the bill would block DOI from finalizing, implementing, administering, or enforcing the Administration's proposed Federal acknowledgment rule, preventing DOI's effort to improve the regulations governing the process and criteria by which the Secretary of the Interior acknowledges an Indian Tribe.

#### DOI and Department of Agriculture (USDA), Forest Service

*Land and Water Conservation Fund (LWCF).* The Administration objects to the drastic reduction of \$152 million, or 38 percent, to the requested discretionary funding for DOI and USDA LWCF programs. LWCF is a cornerstone of Federal conservation and recreation preservation efforts. This funding level would severely impede agency capacity to further protect our Nation's natural heritage. To date, the LWCF has contributed to the protection of key public lands, such as Rocky Mountain National Park, Mount Rainier National Park, and portions of the Appalachian Trail, among others, as well as State and local recreation projects and important cultural heritage sites.

*Wildland Fire Suppression.* The Administration's cap adjustment for wildfire suppression was not included in this bill. Continued inaction on this proposal, which has bipartisan support, would increase the likelihood of disruptive funding transfers for suppression and away from the very restoration and fire risk reduction programs that are meant to restore landscapes and reduce suppression costs and restore landscapes.

*Land Management Operations.* The Administration opposes the \$502 million, or 8 percent, reduction to operational funding to land management agencies, relative to the FY 2016 Budget request. This reduction would undermine support for the provision of basic public and business services that support the long-term health and resilience of national parks, forests, refuges, and other public lands.

*Water Rights on Federal Land.* Section 434 prohibits agencies from conditioning land use authorizations on the transfer, relinquishment, or impairment of a water right, or on the acquisition of a water right in the name of the United States. This language is unnecessary for its intended purpose, and would preclude land management agencies from protecting the public interest. The provision would eliminate the ability of land management agencies to maintain sufficient water for other congressionally-designated purposes and ensure water rights are tied to the activities for which they were developed. These restrictions would also hamper cooperative work with land users to improve land conditions, such as range improvements, or conduct habitat mitigation activities as part of land use agreements.

#### Department of Agriculture (USDA), Forest Service

*Land Management Improvements.* The bill provides \$357 million for capital improvement and maintenance of the national forest system, a 5 percent increase from the FY 2016 Budget request. While the Administration supports the capital improvement and maintenance of the Nation's public forests in order to increase its health, resilience, and accessibility, the increase in this bill comes at the expense of other needed priorities.

## Department of Health and Human Services

*Indian Health Service (IHS) Topline.* The Administration strongly opposes the reduction to funding for Native American health care programs and facilities of the Indian Health Service (IHS) by \$300 million, or 6 percent, below the FY 2016 Budget request. This would result in inadequate funding for the provision of health care to a population that is sicker and poorer compared to national averages. For example, compared to the FY 2016 Budget request, the bill reduces funding by nearly \$50 million for Purchased and Referred Care, a program that supports health care not available in IHS and tribal facilities, which would exacerbate existing levels of denied care and waiting lists for services.

*Contract Support Costs.* The Administration objects to the limitation in funding for tribal Contract Support Costs (CSC) for BIA and IHS. Specifically, the bill would limit funding for CSC that could perpetuate the funding issues described in the Supreme Court's *Salazar v. Ramah Navajo Chapter* decision. The Congress should pursue a long-term solution for CSC appropriations, providing an increase in funding in FY 2016 as part of a transition to a new three-year mandatory funding stream in FY 2017, as proposed in the President's Budget.

## Other Provisions

*Smithsonian Institution.* The bill reduces funding for the Smithsonian Institution by \$116 million, or 12 percent, below the FY 2016 Budget request—a reduction that can be expected to reduce public access to the Smithsonian as well as increase safety concerns through delays in planned renovations. With over 30 million visits to Smithsonian facilities recorded in 2014, it is important to ensure the museums, galleries, National Zoological Park, and nine research facilities that make up the world's largest museum and research complex remain open, maintained, and available to the generations of Americans who make use of this unique institution each year. Specifically, the bill reductions would delay renovation for the National Air and Space Museum, where the museum has had to establish temporary covered walkways to protect the public from potential falling debris from its facade, and would reduce operating hours for the museums, including the new National Museum of African American History and Culture.

*Digital Accountability and Transparency Act of 2014 (DATA Act).* The Administration urges the Congress to fully fund the FY 2016 Budget requests for DOI and EPA to implement the DATA Act. This funding would support efforts to provide more transparent Federal spending data, such as updating information technology systems, changing business processes, and employing a uniform procurement instrument identifier.

*U.S. Digital Service Team.* The Administration urges the Congress to fully fund the FY 2016 Budget requests for DOI and EPA to develop U.S. Digital Service teams. This funding would support managing the agency's digital services that have the greatest impact to citizens and businesses.

## Constitutional Concerns

Several provisions in the bill raise separation of powers concerns.

The Administration looks forward to working with the Congress as the FY 2016 appropriations process moves forward.

**EXECUTIVE OFFICE OF THE PRESIDENT**  
**OFFICE OF MANAGEMENT AND BUDGET**  
WASHINGTON, D.C. 20503

June 23, 2015  
(House Rules)

**STATEMENT OF ADMINISTRATION POLICY**  
**H.R. 2822 – Department of the Interior, Environment, and Related Agencies**  
**Appropriations Act, 2016**  
(Rep. Rogers, R-KY)

The Administration strongly opposes House passage of H.R. 2822, making appropriations for the Department of the Interior, Environment, and related agencies

for the fiscal year ending September 30, 2016, and for other purposes. The bill drastically underfunds core Department of the Interior programs as well as the Environmental Protection Agency's operating budget, which supports nationwide protection of human health and our vital air, water and land resources. Funding levels in the bill would prevent investments that reduce future costs to taxpayers by facilitating increased energy development and maintaining facilities and infrastructure in national parks, refuges, forests, public lands, and Indian Country. They would make it harder for States and businesses to plan and execute changes that would decrease carbon pollution and address the challenges the Nation faces from climate change. They would also reduce support for partnerships and effective collaboration with States, local governments and private entities on efforts to restore and conserve natural resources. Further, the bill includes numerous highly problematic ideological provisions that have no place in funding legislation. These provisions threaten to undermine the ability of States and communities to address climate change and protect a resource that is essential to America's health—clean water, as well as the most basic protections for America's special places and the people and wildlife that rely on them. If the President were presented with H.R. 2822, his senior advisors would recommend that he veto the bill.

Enacting H.R. 2822 and adhering to the congressional Republican budget's overall spending limits for fiscal year (FY) 2016 would hurt our economy and shortchange investments in middle-class priorities. Sequestration was never intended to take effect: rather, it was supposed to threaten such drastic cuts to both defense and non-defense funding that policymakers would be motivated to come to the table and reduce the deficit through smart, balanced reforms. The Republican framework would bring base discretionary funding for both non-defense and defense for FY 2016 to the lowest real levels in a decade. Compared to the President's Budget, the cuts would result in tens of thousands of the Nation's most vulnerable children losing access to Head Start, millions fewer workers receiving job training and employment services, and drastic cuts to research awards and grants, along with other impacts that would hurt the economy, the middle class, and Americans working hard to reach the middle class.

Sequestration funding levels would also put our national security at unnecessary risk, not only through pressures on defense spending, but also through pressures on State, USAID, Homeland Security, and other non-defense programs that help keep us safe. More broadly, the strength of our economy and the security of our Nation are linked. That is why the President has been clear that he is not willing to lock in sequestration going forward, nor will he accept fixes to defense without also fixing non-defense.

The President's senior advisors would recommend that he veto H.R. 2822 and any other legislation that implements the current Republican budget framework, which blocks the investments needed for our economy to compete in the future. The Administration looks forward to working with the Congress to reverse sequestration for defense and non-defense priorities and offset the cost with commonsense spending and tax expenditure cuts, as Members of Congress from both parties have urged.

The Administration would like to take this opportunity to share additional views regarding the Committee's version of the bill.

#### Environmental Protection Agency (EPA)

*EPA Operating Budget.* The Administration disagrees strongly with the bill's reduction to EPA's operating budget by \$474 million, or 13 percent, compared to the

FY 2016 Budget request. This reduced level of funding would significantly undermine implementation of the Clean Power Plan and the recently finalized Clean Water Rule. The Clean Power Plan is a flexible and practical approach to addressing the risks of climate change by reducing carbon pollution from the electric power sector, the largest source of carbon pollution in the United States. Climate change is not only an environmental challenge, it is also an economic, public health, and national security challenge. Unabated climate change is projected to hamper economic growth in the United States and put the health and well-being of the Nation at risk from extreme weather events, wildland fire, poor air quality, and illnesses transmitted by food, water, and disease carriers such as mosquitos and ticks. Failing to address climate change would also exacerbate poverty and contribute to environmental degradation in developing countries, potentially resulting in resource shortages, political instability, and conflict. Meanwhile, the bill also reduces funding to implement the recently finalized Clean Water Rule that would ensure waters protected under the Clean Water Act are more precisely defined and predictably determined. By delaying implementation of this rule, business and industry face a more costly, difficult, and slower permitting process.

*State Categorical Grants.* The Administration opposes the \$118 million reduction to State and Tribal Categorical grants compared to the FY 2016 Budget request. Often, States and Tribes implement environmental programs through delegated authorities. However, the bill reduces these grants to States and Tribes to carry out activities such as water quality permitting, air monitoring, and hazardous waste management programs. In addition, the bill reduces funding for brownfields projects by \$35 million, or 32 percent, from the FY 2016 Budget request. This reduced level of funding severely limits opportunities for local communities to revitalize their contaminated lands to improve environmental quality and spark economic redevelopment.

*State Revolving Funds (SRFs).* The Administration objects to the funding levels provided for EPA's Clean Water and Drinking Water SRFs. The bill reduces SRF funding by a combined \$527 million from the FY 2016 Budget request, reducing necessary support to help communities finance water infrastructure improvements, resulting in approximately 200 fewer projects being funded nationally.

*Greenhouse Gas (GHG) Limits for Power Plants.* The Administration strongly objects to section 428 of the bill, which would prohibit the use of funds to propose, finalize, implement or enforce carbon pollution standards for fossil fuel-fired electric generating units that are the largest source of carbon pollution in the United States. The bill seeks to derail Administration efforts to address under section 111 of the Clean Air Act the urgent economic, public health, and national security impacts of unabated climate change. Failure to reduce the utility sector's carbon footprint places the Nation at risk from extreme weather events, wildland fire, poor air quality, global instability, accelerated environmental degradation, and illnesses transmitted by food, water, and disease carriers such as mosquitos and ticks.

*Clean Water Act (CWA).* The Administration believes that the CWA provisions in the bill undermine efforts to protect America's clean water resources, which are critical to American families and businesses. The Administration strongly objects to section 422 of the bill in particular, which would disrupt the Administration's current efforts to clarify the scope of CWA, hamstringing future regulatory efforts, and create significant ambiguity regarding existing regulations and guidance.

*Social Cost of Carbon (SCC).* The Administration regards the SCC as an essential component of the environmental rulemaking process and opposes the Congress' interference with the Interagency Working Group's (IWG) development of the SCC. The Administration strongly objects to section 437 of the bill, which would force the IWG to revise the SCC using only the discount rates and "domestic" SCC values stated in Executive Order 12866 and Office of Management and Budget Circular A-4. This revision would ignore the trans-boundary movement of carbon, fail to capture key costs of carbon emissions, and disrupt dozens of upcoming rules that would use the SCC to monetize carbon reduction benefits.

*Limitations on Significant New Alternatives Policy (SNAP) Program under the Clean Air Act (CAA).* The Administration objects to section 435 of the bill, which would block the finalization, implementation, and enforcement of a rule to prohibit certain uses of climate super-pollutants known as hydrofluorocarbons (HFCs). Domestic action to reduce use of HFCs is consistent with U.S. advocacy for addressing HFCs on a global basis, such as through an amendment to the Montreal Protocol.

*National Ocean Policy.* The Administration objects to section 425 of the bill, which prohibits any funding provided in the bill from being used to implement the marine planning components of the National Ocean Policy. This provision would prohibit the Department of the Interior (DOI) and EPA from participating in marine and coastal planning efforts, a process to better determine how the ocean, the Nation's coasts, and the Great Lakes are managed in an efficient manner.

-  
*Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) Financial Assurance.* The Administration objects to section 427 of the bill, which prohibits the use of funds to develop, propose, finalize, and implement financial responsibility requirements under CERCLA 108(b). On May 19, 2015, the U.S. Court of Appeals for the District of Columbia Circuit ordered EPA to develop an expedited schedule for financial responsibility rules for the hardrock mining industry and for three other industries. This provision would severely limit EPA's ability to develop these rules in a timely manner and abrogates EPA's responsibilities laid out in CERCLA 108(b).

-  
*Classification of Forest Biomass Fuels as Carbon-Neutral.* The Administration objects to the bill's representation of forest biomass as categorically "carbon-neutral." This language conflicts with existing EPA policies on biogenic CO<sub>2</sub> and interferes with the position of States that do not apply the same policies to forest biomass as other renewable fuels like solar or wind. This language stands in contradiction to a wide-ranging consensus on policies and best available science from EPA's own independent Science Advisory Board, numerous technical studies, many States, and various other stakeholders.

*e-Manifest.* The Administration objects to the elimination of funding for e-Manifest development, EPA's system for electronically tracking the transport of hazardous waste. While the Administration acknowledges the concern about the pace of development of the e-Manifest, eliminating the requested \$7 million in funding at this time would jeopardize EPA's ongoing progress to develop the system and begin operations in the coming years.

*Lead Test Kits.* The Administration objects to section 426 of the bill that would disrupt EPA's current activities under the 2008 Lead Renovation, Repair and Painting rule until EPA approves a commercially available "improved" lead paint test kit. This

provision would undermine EPA's efforts to protect sensitive populations from exposure to lead, a known toxin to children and developing fetuses, during home renovation projects.

#### Department of the Interior (DOI)

*Bureau of Indian Affairs (BIA) Topline.* The Administration opposes the \$159 million, or 5 percent, reduction to BIA as compared to the FY 2016 Budget request. This funding level would limit DOI's ability to make key investments in education and wrap-around services to support Native youth, eliminating all increases to post-secondary scholarships and \$10 million for education program enhancement funds to allow Bureau of Indian Education to drive school improvement and reforms. The bill reduces funding for initiatives aimed at supporting tribal self-determination through the creation of a one-stop portal to facilitate access to Federal resources and funding to address data gaps in Indian Country, and the creation of an Office of Indian Affairs Policy, Program Evaluation, and Data to support effective, data-driven, tribal policy making and program implementation. In addition, this bill eliminates all increases to natural resources management on tribal lands, including funds to help tribal communities prepare for and respond to the impacts of climate change.

*National Park Service (NPS) Centennial.* The Administration opposes funding levels provided for the NPS Centennial. The bill fails to provide adequate funding to prepare for the Centennial in 2016, resulting in the delay of roughly 70 percent of line-item park construction projects and 36 percent of repair and rehabilitation projects, and forgoes millions in matching private donations. The bill also fails to provide funding for engaging youth and cultivating the next generation of conservation-minded individuals, including funding for transportation assistance to students from Title I schools.

*Onshore Inspection Fees.* The bill does not include a proposal in the FY 2016 Budget request to institute a new onshore oil and gas inspection fee program. The proposal, which is similar to the program already in place for offshore operations, would cover the cost of inspection activities and reduce the net cost to taxpayers of operating the Bureau of Land Management's (BLM) oil and gas program. Failure to adopt the new fees and associated funding would hamper the BLM's ability to protect human safety, conserve energy resources, facilitate the proper reporting of oil and gas production, and ensure environmental requirements are being followed in all phases of development.

*State and Tribal Wildlife Grants.* The Administration opposes the 15 percent reduction to State and Tribal Wildlife Grants compared to the FY 2016 Budget request. This important program allows States and Tribes, key partners in conservation, to strategically protect wildlife and conserve habitat in a way that complements Federal investments and yields better results for the public.

*Payments in Lieu of Taxes (PILT).* The bill provides \$452 million for PILT, which the Administration has proposed to fund through a separate mandatory appropriation in line with its previous congressional enactment. While the Administration appreciates the Committee's support for PILT, inclusion of these funds in the bill comes at the expense of all other programs funded by the bill.

*Carcieri Land into Trust.* The bill fails to include the provision in the FY 2016 Budget request to clarify and reaffirm the Secretary of the Interior's authority to acquire land

in trust under the Indian Reorganization Act (IRA). In *Carciari v. Salazar*, 555 U.S. 397 (2009), the Supreme Court held that the Secretary could acquire land in trust under the IRA only for tribes that were "under Federal jurisdiction" in 1934. A legislative solution would help achieve the goals of the IRA and tribal self-determination by clarifying that DOI's authority under the law applies to all tribes, whether recognized in 1934 or after. Such legislation would be consistent with the longstanding policy of assisting Tribes in establishing and protecting a land base sufficient to allow them to provide for the health, welfare, and safety of tribal members, and in treating all tribes equally for purposes of setting aside lands for tribal communities.

*Hydraulic Fracturing*: Section 439 of the bill would block DOI from implementing, administering or enforcing the Bureau of Land Management's recently-finalized Hydraulic Fracturing rule. This would leave the agency reliant on 30-year old requirements and prevent it from taking key steps to improve the safety of oil and gas drilling activities and improve opportunities for BLM to coordinate standards and processes with States and Tribes to reduce administrative costs and improve efficiency.

*Stream Buffer Regulation*. Section 423 would prohibit DOI's Office of Surface Mining, Reclamation, and Enforcement from updating 30-year-old stream protection regulations to reflect modern science and technology and better protect people and the environment, provide industry more certainty, and address recent court decisions.

*Hunting, Fishing and Recreational Shooting*. Sections 421 and 424 would substantially impair the enforcement of a longstanding ban on the use of lead ammunition in the hunting of migratory waterfowl, and would complicate in other ways the overall implementation of hunting, fishing, and recreational shooting on public lands.

*Wildlife Trafficking*. Section 120 would interfere with ongoing Fish and Wildlife Service (FWS) actions to combat wildlife trafficking, curb the poaching of African Elephants, and restrict trade in ivory, which would impair U.S. leadership in the global fight against ivory poaching.

*Endangered Species Act Restrictions*. Sections 117, 121, and 122 of the bill undercut the Endangered Species Act by limiting the ability of the FWS to properly protect, based on the best available science, a number of species, including the greater sage grouse, northern long-eared bat, and certain gray wolf populations. Language provisions, like those affecting the sage grouse, would only create additional uncertainty and undermine unprecedented efforts to conserve the sagebrush landscape and the Western way of life.

*Federal Acknowledgement of American Indian Tribes*. Language under the heading "Bureau of Indian Affairs, Administrative Provisions" in the bill would block DOI from finalizing, implementing, administering, or enforcing the Administration's proposed Federal acknowledgment rule, preventing DOI's effort to improve the regulations governing the process and criteria by which the Secretary of the Interior acknowledges an Indian Tribe.

#### DOI and Department of Agriculture (USDA), Forest Service

*Land and Water Conservation Fund (LWCF)*. The Administration objects to the drastic reduction of \$152 million, or 38 percent, to the requested discretionary funding for DOI and USDA LWCF programs. LWCF is a cornerstone of Federal conservation

and recreation preservation efforts. This funding level would severely impede agency capacity to further protect our Nation's natural heritage. To date, the LWCF has contributed to the protection of key public lands, such as Rocky Mountain National Park, Mount Rainier National Park, and portions of the Appalachian Trail, among others, as well as State and local recreation projects and important cultural heritage sites.

*Wildland Fire Suppression.* The Administration's cap adjustment for wildfire suppression was not included in this bill. Continued inaction on this proposal, which has bipartisan support, would increase the likelihood of disruptive funding transfers for suppression and away from the very restoration and fire risk reduction programs that are meant to restore landscapes and reduce suppression costs and restore landscapes.

*Land Management Operations.* The Administration opposes the \$502 million, or 8 percent, reduction to operational funding to land management agencies, relative to the FY 2016 Budget request. This reduction would undermine support for the provision of basic public and business services that support the long-term health and resilience of national parks, forests, refuges, and other public lands.

*Water Rights on Federal Land.* Section 434 prohibits agencies from conditioning land use authorizations on the transfer, relinquishment, or impairment of a water right, or on the acquisition of a water right in the name of the United States. This language is unnecessary for its intended purpose, and would preclude land management agencies from protecting the public interest. The provision would eliminate the ability of land management agencies to maintain sufficient water for other congressionally-designated purposes and ensure water rights are tied to the activities for which they were developed. These restrictions would also hamper cooperative work with land users to improve land conditions, such as range improvements, or conduct habitat mitigation activities as part of land use agreements.

-  
Department of Agriculture (USDA), Forest Service

*Land Management Improvements.* The bill provides \$357 million for capital improvement and maintenance of the national forest system, a 5 percent increase from the FY 2016 Budget request. While the Administration supports the capital improvement and maintenance of the Nation's public forests in order to increase its health, resilience, and accessibility, the increase in this bill comes at the expense of other needed priorities.

Department of Health and Human Services

*Indian Health Service (IHS) Topline.* The Administration strongly opposes the reduction to funding for Native American health care programs and facilities of the Indian Health Service (IHS) by \$300 million, or 6 percent, below the FY 2016 Budget request. This would result in inadequate funding for the provision of health care to a population that is sicker and poorer compared to national averages. For example, compared to the FY 2016 Budget request, the bill reduces funding by nearly \$50 million for Purchased and Referred Care, a program that supports health care not available in IHS and tribal facilities, which would exacerbate existing levels of denied care and waiting lists for services.

-  
*Contract Support Costs.* The Administration objects to the limitation in funding for tribal Contract Support Costs (CSC) for BIA and IHS. Specifically, the bill would

limit funding for CSC that could perpetuate the funding issues described in the Supreme Court's *Salazar v. Ramah Navajo Chapter* decision. The Congress should pursue a long-term solution for CSC appropriations, providing an increase in funding in FY 2016 as part of a transition to a new three-year mandatory funding stream in FY 2017, as proposed in the President's Budget.

### Other Provisions

*Smithsonian Institution.* The bill reduces funding for the Smithsonian Institution by \$116 million, or 12 percent, below the FY 2016 Budget request—a reduction that can be expected to reduce public access to the Smithsonian as well as increase safety concerns through delays in planned renovations. With over 30 million visits to Smithsonian facilities recorded in 2014, it is important to ensure the museums, galleries, National Zoological Park, and nine research facilities that make up the world's largest museum and research complex remain open, maintained, and available to the generations of Americans who make use of this unique institution each year. Specifically, the bill reductions would delay renovation for the National Air and Space Museum, where the museum has had to establish temporary covered walkways to protect the public from potential falling debris from its facade, and would reduce operating hours for the museums, including the new National Museum of African American History and Culture.

*Digital Accountability and Transparency Act of 2014 (DATA Act).* The Administration urges the Congress to fully fund the FY 2016 Budget requests for DOI and EPA to implement the DATA Act. This funding would support efforts to provide more transparent Federal spending data, such as updating information technology systems, changing business processes, and employing a uniform procurement instrument identifier.

*U.S. Digital Service Team.* The Administration urges the Congress to fully fund the FY 2016 Budget requests for DOI and EPA to develop U.S. Digital Service teams. This funding would support managing the agency's digital services that have the greatest impact to citizens and businesses.

### Constitutional Concerns

Several provisions in the bill raise separation of powers concerns.

The Administration looks forward to working with the Congress as the FY 2016 appropriations process moves forward.

**Subject:** Fracking Ruling from the Bench

FYI: This is for close hold as things unfold....

The current state of play is that the BLM is consulting with the Office of the Solicitor and the Department of Justice about the decision of the U.S. District Court in Wyoming to temporarily stay implementation of the hydraulic fracturing rule. While the matter is being resolved, the BLM will follow the Court's order and will continue to process applications for permit to drill and inspect well sites under its pre-existing regulations.

All that said, since it was ruled from the Bench and there is nothing in writing, everything is still in flux as people try and figure out exactly what is going to happen and what exactly the judge intended so as that comes out the previous statement could change.

Stay tuned...I'll try and send you more as things evolve.

**Subject:** FW: FLOOR UPDATE - 18 VOTES  
**Date:** Wednesday, July 08, 2015 1:46:12 PM

---

**From:** Democratic Whip  
**Sent:** Wednesday, July 08, 2015 1:45:36 PM (UTC-05:00) Eastern Time (US & Canada)  
**Subject:** FLOOR UPDATE - 18 VOTES

dem\_whip\_floor\_update.jpg

At approximately 1:45 – 1:50 p.m., the House will take the following votes:

- 1) **H.Res. 347** – H.R. 5 – Elementary and Secondary Education Reauthorization Act and H.R. 2647 – Resilient Federal Forests Act – **VOTE NO** – 15 minutes
- 2) **Garamendi Amendment** – Increases the Fish and Wildlife Services Resource Management account for the removal of aquatic vegetation by \$3.9 million and decreases the Bureau of Land Management account by \$4.1 million – 2 minutes
- 3) **Capps Amendment** – Increases the Inland Oil Spill Programs account by \$5.4 million and decreases the Bureau of Ocean Energy Management Ocean Energy Management account by the same amount – 2 minutes
- 4) **Sablan Amendment** – Increases the Insular Affairs Assistance to Territories account by \$5 million and decreases the Office of the Secretary Departmental Operations account by the same amount – 2 minutes
- 5) **Castor Amendment** – Increases the Environmental Protection Agency’s (EPA) Environmental Programs and Management account by \$1.9 million to add money to the Brownfields program and decreases the Office of the Secretary Departmental Operations account by the same amount – 2 minutes
- 6) **Grijalva/Lowenthal Amendment #1** – Strikes section 423 of the underlying bill, a section which prohibits the Office of Surface Mining from updating the stream buffer rule to protect streams from the disposal of surface mining waste – 2 minutes
- 7) **Tsongas Amendment #1** – Strikes section 425 of the underlying bill, a section which prohibits the use of funds in the bill for implementation of the coastal and marine spatial planning and ecosystem-based management components of the National Ocean Policy – 2 minutes
- 8) **Grijalva Amendment #2** – Strikes section 433 of the underlying bill, a section which requires the Secretaries of Agriculture or Interior to make vacant grazing allotments available, without environmental review, to grazing permit holders who are leasing grazing lands that are unusable because of drought or wildfire – 2 minutes
- 9) **Polis Amendment #1** – Strikes section 437 of the underlying bill, a section that would prohibit any agency in the bill from using funds to conduct rulemakings or issue guidance that takes into account the social cost of carbon pollution – 2 minutes

- 10) **Edwards Amendment** – Strikes section 438, a section that would prohibit the EPA Administrator from using funds to propose, promulgate, administer or enforce air quality standards with respect to ozone pollution – 2 minutes
- 11) **Lawrence Amendment** – Strikes section 439, a section that prohibits the Interior Department from using funds to implement, administer, or enforce the final rule entitled “Hydraulic Fracturing on Federal and Indian Lands” – 2 minutes
- 12) **Polis Amendment #2** – Prohibits the use of funds in the bill to sell federal public lands in contravention of existing land sale authorities under the Federal Land Policy and Management Act and without full environmental review – 2 minutes
- 13) **Tsongas Amendment #2** – Prohibits the use of funds to implement or enforce sections 117, 121, and 122 of the underlying bill related to endangered and threatened species protections. These sections prohibit the Secretary of the Interior from writing or issuing a proposed rule for the protection of sage-grouse, require the Secretary to reissue final rules overturned by a federal court to delist wolves in the Great Lakes region and Wyoming, and direct the Secretary to amend an interim rule on the conservation of the threatened northern long-eared bat to reopen the rule’s comment period and allow incidental killing of the animals – 2 minutes
- 14) **Grijalva Amendment #3** – Prohibits the use of funds to implement or enforce section 120 of the underlying bill, a section which prohibits the Interior Department from developing or revising regulations regarding imported ivory – 2 minutes
- 15) **Beyer Amendment** – Prohibits the use of funds in contravention of Presidential executive orders that direct federal agencies to incorporate climate-resilience considerations into policies and procedures throughout the Federal Government (Executive Order 13514 of October 5, 2009 or Executive Order 13653 of November 1, 2013) – 2 minutes
- 16) **Blackburn Amendment** – Cuts all accounts in the bill by 1% across-the-board – 2 minutes
- 17) **Pearce Amendment** – Prohibits the use of funds in the bill to increase the rate of any royalty required to be paid to the United States for oil and gas produced on Federal land, or to prepare or publish a proposed rule relating to such an increase – 2 minutes
- 18) **Hardy Amendment** – Prohibits the use of funds in the bill for the designation of a National Monument in the counties of Mohave and Coconino in Arizona; Modoc and Siskiyou in California; Chaffee, Moffat, and Park, Colorado; Lincoln, Clark, and Nye, Nevada; Otero in New Mexico; Jackson, Josephine, and Malheur in the Oregon; or in Wayne, Garfield, and Kane in Utah – 2 minutes

Following votes, the House will debate H.Res. 310 – Expressing the sense of the House of Representatives regarding Srebrenica and H.Res. 337 – Calling for substantive dialogue, without preconditions, in order to address Tibetan grievances and secure a negotiated agreement for the Tibetan people, as amended – under suspension of the Rules.

After suspension debate, the House will debate the four amendments to H.R. 5. Following amendment debate, the House will take votes. These will be the last votes for the day.

After last votes, the House will continue debating amendment at the end of the bill to H.R. 2822 – Department of the Interior, Environment, and Related Agencies Appropriations Act, 2016. Any recorded votes requested will be postponed.

**\*\*Members are advised, that if they have amendments to the end of the bill, they need to come to the Floor today to offer their amendment.**

Next/Last votes predicted: approximately 4:30 – 4:45 p.m., on amendments, motion to recommit, and passage of H.R. 5 and suspensions.

**\*\*When the House is in session, additional updates from the House Floor can be found on the [DemCom Floor Feed](#), a secure site for Democratic staff. Login with your House username and password. Please e-mail [DemCom@mail.house.gov](mailto:DemCom@mail.house.gov) with any questions or problems.**

**If you have any questions please contact: Shuwanza Goff or Danielle Aviles at 5-3130.**

dem\_whip\_floor\_update.jpg

The House is now taking the following votes:

- 1) **H.Res. 347** – Rule providing for consideration of H.R. 5 – Elementary and Secondary Education Reauthorization Act and H.R. 2647 – Resilient Federal Forests Act – **VOTE NO** – 15 minutes
- 2) **Garamendi Amendment** – Increases the Fish and Wildlife Services Resource Management account for the removal of aquatic vegetation by \$3.9 million and decreases the Bureau of Land Management account by \$4.1 million – 2 minutes
- 3) **Capps Amendment** – Increases the Inland Oil Spill Programs account by \$5.4 million and decreases the Bureau of Ocean Energy Management Ocean Energy Management account by the same amount – 2 minutes
- 4) **Sablan Amendment** – Increases the Insular Affairs Assistance to Territories account by \$5 million and decreases the Office of the Secretary Departmental Operations account by the same amount – 2 minutes
- 5) **Castor Amendment** – Increases the Environmental Protection Agency’s (EPA) Environmental Programs and Management account by \$1.9 million to add money to the Brownfields program and decreases the Office of the Secretary Departmental Operations account by the same amount – 2 minutes
- 6) **Grijalva/Lowenthal Amendment #1** – Strikes section 423 of the underlying bill, a section which prohibits the Office of Surface Mining from updating the stream buffer rule to protect streams from the disposal of surface mining waste – 2 minutes
- 7) **Tsongas Amendment #1** – Strikes section 425 of the underlying bill, a section which prohibits the use of funds in the bill for implementation of the coastal and marine spatial planning and ecosystem-based management components of the National Ocean Policy – 2 minutes
- 8) **Grijalva Amendment #2** – Strikes section 433 of the underlying bill, a section which requires the Secretaries of Agriculture or Interior to make vacant grazing allotments available, without environmental review, to grazing permit holders who are leasing grazing lands that are unusable because of drought or wildfire – 2 minutes
- 9) **Polis Amendment #1** – Strikes section 437 of the underlying bill, a section that would prohibit any agency in the bill from using funds to conduct rulemakings or issue guidance that takes into account the social cost of carbon pollution – 2 minutes

- 10) **Edwards Amendment** – Strikes section 438, a section that would prohibit the EPA Administrator from using funds to propose, promulgate, administer or enforce air quality standards with respect to ozone pollution – 2 minutes
- 11) **Lawrence Amendment** – Strikes section 439, a section that prohibits the Interior Department from using funds to implement, administer, or enforce the final rule entitled “Hydraulic Fracturing on Federal and Indian Lands” – 2 minutes
- 12) **Polis Amendment #2** – Prohibits the use of funds in the bill to sell federal public lands in contravention of existing land sale authorities under the Federal Land Policy and Management Act and without full environmental review – 2 minutes
- 13) **Tsongas Amendment #2** – Prohibits the use of funds to implement or enforce sections 117, 121, and 122 of the underlying bill related to endangered and threatened species protections. These sections prohibit the Secretary of the Interior from writing or issuing a proposed rule for the protection of sage-grouse, require the Secretary to reissue final rules overturned by a federal court to delist wolves in the Great Lakes region and Wyoming, and direct the Secretary to amend an interim rule on the conservation of the threatened northern long-eared bat to reopen the rule’s comment period and allow incidental killing of the animals – 2 minutes
- 14) **Grijalva Amendment #3** – Prohibits the use of funds to implement or enforce section 120 of the underlying bill, a section which prohibits the Interior Department from developing or revising regulations regarding imported ivory – 2 minutes
- 15) **Beyer Amendment** – Prohibits the use of funds in contravention of Presidential executive orders that direct federal agencies to incorporate climate-resilience considerations into policies and procedures throughout the Federal Government (Executive Order 13514 of October 5, 2009 or Executive Order 13653 of November 1, 2013) – 2 minutes
- 16) **Blackburn Amendment** – Cuts all accounts in the bill by 1% across-the-board – 2 minutes
- 17) **Pearce Amendment** – Prohibits the use of funds in the bill to increase the rate of any royalty required to be paid to the United States for oil and gas produced on Federal land, or to prepare or publish a proposed rule relating to such an increase – 2 minutes
- 18) **Hardy Amendment** – Prohibits the use of funds in the bill for the designation of a National Monument in the counties of Mohave and Coconino in Arizona; Modoc and Siskiyou in California; Chaffee, Moffat, and Park, Colorado; Lincoln, Clark, and Nye, Nevada; Otero in New Mexico; Jackson, Josephine, and Malheur in the Oregon; or in Wayne, Garfield, and Kane in Utah – 2 minutes

Following votes, the House will debate H.Res. 310 – Expressing the sense of the House of Representatives regarding Srebrenica and H.Res. 337 – Calling for substantive dialogue, without preconditions, in order to address Tibetan grievances and secure a negotiated agreement for the Tibetan people, as amended – under suspension of the Rules.

After suspension debate, the House will debate the four amendments to H.R. 5. Following amendment debate, the House will take votes. These will be the last votes for the day.

After last votes, the House will continue debating amendment at the end of the bill to H.R. 2822 – Department of the Interior, Environment, and Related Agencies Appropriations Act, 2016. Any recorded votes requested will be postponed.

**\*\*Members are advised, that if they have amendments to the end of the bill, they need to come to the Floor today to offer their amendment.**

Next/Last votes predicted: approximately 4:30 – 4:45 p.m., on amendments, motion to recommit, and passage of H.R. 5 and suspensions.

**\*\*When the House is in session, additional updates from the House Floor can be found on the [DemCom Floor Feed](#), a secure site for Democratic staff. Hey Stephenne –

I just left you a voicemail concerning the OSM SBZ rule which is proposed to be released tomorrow. I was wondering if there would be an “embargoed” press release that would be released early to staff, and if you get send that my way, as you had w/ the HF rule.

My number is 226-3044, and I look forward to hearing from you.

Thanks!

**Date:** Thursday, July 16, 2015 10:59:42 AM  
**Attachments:** [CRS Memo Offshore Energy Territories-10-28-2011.pdf](#)  
[Nov 2013 USGS Assesment of Underwater Energy Resources in PR and USVI.pdf](#)

---

Rebecca,

FYI, in support of our conversation just now about inclusion of Puerto Rico and the other territories in OCSLA:

As of today, Puerto Rico is not within the scope of the *Outer Continental Shelf Lands Act* (OCSLA)—which governs how the federal government, through the Department of the Interior, grants leases to the highest qualified responsible bidder on the basis of sealed competitive bids for the extraction and development of minerals (including oil and gas deposits) that lie beneath or on the seabed. Because Puerto Rico and the other U.S. territories are not defined as being a part of the “Outer Continental Shelf” under OCSLA, the Interior Department does not extend its process for granting leases to these areas. Congress would need to amend OCSLA to extend this leasing program and authority to these territories. That has been considered in the past, but legislation to accomplish that objective passed the House of Representatives in the 113<sup>th</sup> Congress but died in the Senate.

As you know the larger debate about federal leasing for offshore oil and gas exploration and development around the United States has its fair share of controversy—notwithstanding the more technical question of whether Puerto Rico and the other territories are included in the program or not.

You can read generally about how leasing rights are obtained on-line at Interior Department-BOEM’s website at—

<http://www.boem.gov/OCS-Lands-Act-History/>

The process involves BOEM developing a 5-year leasing plan in which the federal government identifies the various areas of the outer continental shelf (OCS) that it plans to open up for oil and gas exploration and development. The interested companies silently bid on those proposed leases, and BOEM selects the winner bidder and grants the lease. If Congress were to expand the scope of OCSLA to encompass Puerto Rico, it would still be up to BOEM to decide whether to propose leasing in the waters off Puerto Rico—but BOEM would, unlike is the case now, have that option.

I have attached a legal memorandum that the Resident Commissioner had the Congressional Research Service (CRS) prepare in 2011 on this issue. I have also attached the November 2013 assessment of resources that the U.S. Geologic Survey (USGS) prepared for Puerto Rico.

---

**INFORMATION FROM 2014:**

Thank you for your telephone call last week inquiring about how an individual or entity can effectively file a claim with the federal government to potentially explore and extract the 244 billion cubic feet of gas and six million barrels of natural gas liquids estimated last year by the United States Geologic Survey (USGS) to be lying within the portion of the “*Muertos Deformed Belt Assessment Unit*” that is part of the Puerto Rico–U.S. Virgin Islands EEZ (see: <http://pubs.usgs.gov/fs/2013/3101/>; December 2013).

As we discussed there is currently no federally-permitted or leasing regime in place to facilitate private exploration of resources in the EEZ surrounding Puerto Rico and the U.S. Virgin Islands. This is because both territories are not defined to be within the [Outer Continental Shelf Lands Act](#) (OCSLA), the statute that authorizes the U.S. Department of the Interior to lease areas of the EEZ for exploration. Under the OCSLA, the Bureau of Ocean Energy Management (BOEM) within the Department identifies areas of the EEZ that would be open for leasing auctions every five years. Below is the most recent notice for public comment on the latest proposed five-year leasing plan.

The U.S. House of Representatives has passed legislation to add Puerto Rico and each of the other U.S. territories in the OCSLA, action that if enacted into law would permit BOEM to include the EEZs surrounding the territories in future five-year leasing plans. Although this legislation has passed the House, it remains pending in the U.S. Senate. It is part of a larger bill proposing to open up more areas of the U.S. EEZ to oil and gas exploration, and it faces opposition because it seeks to make decisions that are otherwise presently left to the discretion of the Administration, i.e. BOEM.

The relevant section of this legislation for the territories is Section 501 of H.R. 2231, the [Offshore Energy and Jobs Act](#). Here is the excerpt:

**TITLE V--UNITED STATES TERRITORIES**  
**SEC. 501. APPLICATION OF OUTER CONTINENTAL SHELF LANDS**  
**ACT WITH RESPECT TO TERRITORIES OF THE UNITED STATES.**

Section 2 of the Outer Continental Shelf Lands Act (43 U.S.C. 1331) is amended--

- (1) in paragraph (a), by inserting after `control' the following: `or lying within the United States exclusive economic zone and the Continental Shelf adjacent to any territory of the United States';
- (2) in paragraph (p), by striking `and' after the semicolon at the end;
- (3) in paragraph (q), by striking the period at the end and inserting `; and'; and
- (4) by adding at the end the following:

`(r) The term `State' includes each territory of the United States.'.

**From:** On Behalf Of Congressional Affairs, BOEM  
**Sent:** Wednesday, July 30, 2014 10:01 AM  
**Subject:** BOEM Extends Comment Period for Information Request on Next Five Year Oil and Gas Leasing Program

**For Immediate Release:**  
July 30, 2014

**BOEM Extends Comment Period for Information Request  
on Next Five Year Oil and Gas Leasing Program**

**WASHINGTON** — The Bureau of Ocean Energy Management (BOEM) announced today that it is extending the public comment period for the Request for Information (RFI) and Comments on the Preparation of the 2017-2022 Outer Continental Shelf (OCS) Oil and Gas Leasing Program. The RFI was released in mid-June as the initial step in the multi-year offshore oil and gas planning process. This extension of the comment period is being issued in response to requests from several states.

The bureau will allow an additional 15 days for the public to submit information and comments.

The June publication of the RFI began a 45-day comment period. With the extension, BOEM will accept comments until August 15. Substantial public involvement and extensive analysis will accompany all stages of the planning process, which will take up to three years to complete.

The RFI itself does not identify any specific course of action. As required by statute and consistent with previous efforts, BOEM will evaluate all of the OCS planning areas during this first stage of the planning process.

The OCS Lands Act requires the Secretary of the Interior, through BOEM, to prepare and maintain a schedule of proposed oil and gas lease sales in federal waters, indicating the size, timing and location of auctions that would best meet national energy needs for the five-year period following its approval. In developing the Five Year Program, the Secretary is required to achieve an appropriate balance among the potential for environmental impacts, discovery of oil and gas, and adverse effects on the coastal zone.

Using the information received from the RFI, BOEM will prepare a Draft Proposed Program, followed by a Proposed Program and a Proposed Final Program. Throughout the planning process, BOEM consults with all interested parties and seeks additional public comment. Concurrently, BOEM will prepare a Programmatic Environmental Impact Statement (PEIS) required by the National Environmental Policy Act to evaluate the potential environmental impacts of various OCS oil and gas leasing alternatives under the Proposed Program and to help inform decisions on the Proposed Final Program.

The current Five Year Program for 2012–2017, which expires in August 2017, schedules 15 potential lease sales in six planning areas with the greatest resource potential, including more than 75 percent of the estimated undiscovered, technically recoverable oil and gas resources in federal offshore waters. BOEM has held five sales thus far, including annual auctions in the Central and Western Gulf of Mexico and a single sale in the portion of the Eastern Gulf not subject to the Congressional moratorium.

BOEM will accept comments on our website or in writing. To submit via [our website](#), click on the “Open Comment Documents” link and follow instructions to view relevant documents and submit comments. In written form, deliver to: Ms. Kelly Hammerle, Five Year Program Manager; Bureau of Ocean Energy Management; 381 Elden Street - HM-3120; Herndon, Virginia 20170. Additional information on the process of developing the next Five-Year Program as well as on the current Five Year Program can be found [here](#).

**MEMORANDUM**

October 24, 2011

**To:** Honorable Pedro Pierluisi  
Attention: Jed Bullock

**From:** Adam Vann, Legislative Attorney, 7-6978

**Subject:** **Federal Statutes Governing Permitting of Offshore Renewable Energy Projects near U.S. Territories**

---

This memorandum summarizes the statutory framework governing federal permitting and oversight of offshore wind farms and other offshore renewable energy technologies and analyzes the applicability of these statutes to areas off the coasts of U.S. territories. The memorandum discusses the Outer Continental Shelf Lands Act (OCSLA), its applicability to wind energy projects generally, and the applicability of the terms of that act to the areas off the coasts of U.S. territories. The memorandum also analyzes the applicability of other renewable energy statutes to these areas.

There is no overarching rule that governs the applicability of federal statutes to the territories. Instead, applicability is determined on a case by case basis based on perceived Congressional intent. Therefore, analysis of each of the various statutes governing renewable offshore energy production is necessary in order to determine whether and how a particular framework applies to areas off the coasts of the territories. Because different statutory and regulatory frameworks govern offshore wind energy projects and other types of offshore renewable energy projects, the memorandum discusses various types of projects in turn.

## **Offshore Wind Energy**

### **Applicability of the OCSLA to Wind Energy Projects and to the Territories**

The OCSLA is the primary federal statute that governs energy exploration and production in offshore areas subject to the control of the federal government. The statute governs such activity only on the areas of the “outer Continental shelf” subject to the control of the federal government.

Prior to 2005, it was not clear whether and how the OCSLA applied to the permitting of offshore wind energy projects. The Army Corps of Engineers exercised primary permitting authority pursuant to Section 10 of the Rivers and Harbors Act,<sup>1</sup> but there were questions as to whether the Federal Energy

---

<sup>1</sup> 33 U.S.C. § 403.

Regulatory Commission (FERC), or the Minerals Management Service (MMS) of the Department of the Interior, also had authority over such projects.

This uncertainty regarding permitting and regulation of offshore renewable energy projects was clarified by Section 388 of the Energy Policy Act of 2005. Section 388 of EPAct amended the OCSLA by adding a new subsection that authorizes the Secretary of the Interior, in consultation with other federal agencies, to grant leases, easements, or rights-of-way on the OCS for certain activities—wind energy development among them—not authorized by other OCSLA provisions, the Deepwater Port Act, the Ocean Thermal Energy Conversion Act, or “other applicable law.”<sup>2</sup> A memorandum of understanding between the Department of the Interior and FERC signed in April of 2009 confirmed the exclusive jurisdiction of the Secretary of the Interior, exercised through the Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE),<sup>3</sup> over “the production, transportation, or transmission of energy from non-hydrokinetic renewable energy projects on the OCS.”<sup>4</sup>

Section 388 of EPAct clarifies that renewable energy projects on the OCS, like offshore oil and gas exploration and production, are permitted and regulated by BOEMRE under the OCSLA. Because the applicability of federal law to the U.S. territories is determined on a case by case basis, the terms of the OCSLA dictate whether and how the federal government permits and regulates energy projects on the outer continental shelf off the coasts of the territories.

Section 8(a) of the OCSLA authorizes the leasing of the “submerged lands of the outer Continental shelf” for oil and natural gas exploration and production.<sup>5</sup> Similarly, Section 8(p), added to the OCSLA by Section 388 of EPAct, authorizes leasing “on the outer Continental shelf” for other “energy-related purposes.” The OCSLA defines the “outer Continental shelf” as “all submerged land lying seaward and outside of the areas of lands beneath navigable waters as defined in Section 2 of the Submerged Lands Act, ... and of which the subsoil and seabed appertain to the United States and are under its jurisdiction and control.”<sup>6</sup> The Submerged Lands Act defines “land beneath navigable waters” as the lands within the boundaries of the States or extending three miles from the coast lines of the States (or further if such boundaries were established at the time the State joined the Union).<sup>7</sup> Therefore, the applicability of the OCSLA depends on whether the waters off the coasts of the U.S. territories constitutes land “lying seaward and outside” the areas off the coasts of the States.

It seems unlikely that the waters off the coasts of the territories would be considered to be “lying seaward and outside” the areas off the coasts of the States. The use of the term “States” without reference to the territories suggests that the Submerged Lands Act intended to exclude waters off the coasts of the

---

<sup>2</sup> 43 U.S.C. § 1337(p)(1).

<sup>3</sup> This Memorandum of Understanding originally confirmed the exclusive jurisdiction of MMS over the described projects. BOEMRE was created in June 2010 as a successor agency to MMS. Department of the Interior Secretarial Order No. 3302, *Change of the Name of the Minerals Management Service to the Bureau of Ocean Energy Management, Regulation, and Enforcement* (June 18, 2010). Thus the jurisdiction of MMS agreed to in the April 2009 MOU was transferred to BOEMRE in June of 2010. Similarly, many of the rulemakings or other administrative actions taken by MMS as described in this memorandum now authorize activity by or assert the jurisdiction of BOEMRE as the successor agency to MMS.

<sup>4</sup> Memorandum of Understanding Between the U.S. Department of the Interior and the Federal Energy Regulatory Commission, April 9, 2009 (2009 MOU), available at <http://www.ferc.gov/legal/maj-ord-reg/mou/mou-doi.pdf>. Federal jurisdiction over offshore hydrokinetic projects, which are projects that use the movement of water to generate energy, are discussed later in this report.

<sup>5</sup> 43 U.S.C. § 1337(a)(1).

<sup>6</sup> 43 U.S.C. § 1331(a).

<sup>7</sup> 43 U.S.C. § 1301(a).

---

territories from its definition of lands beneath navigable waters. Although waters off the coasts of territories are obviously “outside” the areas of the coasts of the States, they likely would not be considered “seaward” of such waters. The term “seaward” is not defined in the OCSLA, so there is some ambiguity with respect to whether waters off the coasts of territories would be considered “seaward” of the state coastal areas, but it seems unlikely that the term would be interpreted as encapsulating areas so far from the coasts of the states. The definition of the term “boundaries” found in the Submerged Lands Act suggests that “seaward” is not intended to capture such areas. Boundaries are defined to include “the seaward boundaries of a State or its boundaries in the Gulf of Mexico or any of the Great Lakes,”<sup>8</sup> suggesting that “seaward” boundaries include only the offshore areas on the east and west coasts of the continental United States. Because waters must be both “outside” and “seaward” of the areas off the coasts of the States to be considered part of the “outer Continental shelf” for purposes of the OCSLA, the areas off the coasts of the U.S. territories may not be considered part of the “outer Continental shelf,” and if that is the case such areas could not be leased for oil and gas exploration production or for other energy-related purposes pursuant to the OCSLA.

Although there is some ambiguity in the definition of “outer Continental shelf” in the OCSLA, and thus some ambiguity about its applicability to the waters off the coasts of U.S. territories, it should be noted that the federal agencies tasked with leasing under the OCSLA do not lease the areas off the coasts of U.S. territories for oil and gas exploration and production or other energy-related purposes. This may be due to a lack of resource potential as well as the terms of the OCSLA. A report by the Department of the Interior concerning the application of federal laws in the U.S. territories noted that “[t]here is no authority for the leasing of such OCS submerged lands off the coasts of the territories, and apparently it has never become an issue—possibly because of the absence of known mineral deposits, or possibly because of the absence at least in the case of some territories of anything resembling a continental shelf.”<sup>9</sup>

### **Applicability of the Rivers and Harbors Act**

As noted above, EPAAct 2005 and a subsequent MOU between FERC and MMS/BOEMRE clarified that BOEMRE is tasked with permitting non-hydrokinetic energy projects on the U.S. OCS. As the above analysis concludes, the areas off the coasts of the U.S. territories appears not to be part of the “outer Continental shelf” as that phrase is defined in the OCSLA. However, Section 10 of the Rivers and Harbors Act provides that “[t]he creation of any obstruction not affirmatively authorized by Congress, to the navigable capacity of any of the waters of the United States is prohibited ... except on plans recommended by the Chief of Engineers and authorized by the Secretary of the Army.”<sup>10</sup>

Although it is not made explicit in the text of the act, “navigable waters of the United States” has been interpreted to include the navigable waters of the territories.<sup>11</sup> Although it cannot be said conclusively if a particular offshore area would constitute a “navigable water” without knowledge of the characteristics of that area, it is likely that many offshore areas near the coasts of the territories would be considered navigable waters. The regulations adopted by the Army Corps of Engineers clarify the Corps’ jurisdiction under this act by providing that “[t]he navigable waters of the United States over which the Corps of Engineers regulatory jurisdiction extends include all ocean and coastal waters within a zone three

<sup>10</sup> 33 U.S.C. § 403.

<sup>11</sup> *The Application of Federal Laws In ... American Samoa, Guam, the Northern Marianas Islands, and the U.S. Virgin Islands*, U.S. Department of the Interior, Office of the Solicitor, Memorandum 33-1(a) (April 1987).

geographical (nautical) miles seaward from the baseline (The Territorial Seas).<sup>12</sup> Projects located off the coasts of the territories that fall within this definition of “navigable waters” would be permitted by the Army Corps of Engineers under the Rivers and Harbors Act.

## Other Offshore Alternative Energy Projects

Offshore wind farms are not the only non-fossil fuel offshore energy projects addressed by federal statute and regulation. There are also legal frameworks in place for the authorization and oversight of offshore thermal and hydrokinetic energy projects.

### Hydrokinetic Energy

Hydrokinetic energy is the production of energy through the harnessing of the movements of a body of water; for example waves, tides and currents. Currently there are no hydrokinetic projects off the coast of the United States or the territories. However, FERC is authorized to license these facilities pursuant to Section 4(e) of the Federal Power Act, which authorizes the agency to issue licenses:

for the development, transmission, and utilization of power across, along, from or in any of the streams or other bodies of water over which Congress has jurisdiction under its authority to regulate commerce with foreign nations and among the several States, or upon any part of the public lands and reservations of the United States (including the Territories) ...<sup>13</sup>

The 2009 MOU mentioned previously in this memorandum further confirms that FERC’s jurisdiction extends to hydrokinetic projects, stating that “[t]he Commission will issue licenses under Part I of the Federal Power Act ... for the construction and operation of hydrokinetic projects on the OCS and will conduct any necessary analyses ... related to those actions.”

### Ocean Thermal Energy Conversion

Another potential offshore alternative energy source is ocean thermal energy. Ocean thermal energy is a technology that uses the differences in ocean water temperatures at various depths to generate electric power. Although a number of experiments have taken place to demonstrate the possibilities of this alternative energy source, there are currently no commercial-scale thermal energy conversion operations. However, there is a federal law that contemplates such projects. The Ocean Thermal Energy Conversion Act of 1980 (OTECA) grants the Administrator of the National Oceanic and Atmospheric Administration (NOAA) the authority to issue licenses for ocean thermal energy projects in the territorial seas of the United States (out to 12 nautical miles from the shoreline).<sup>14</sup> The Department of Energy, after consultation with NOAA, may also authorize small-scale demonstration projects that do not need to comply with NOAA licensing requirements.<sup>15</sup> OTECA applies to the waters off the coasts of the U.S. territories including Puerto Rico, as each are defined as “States” in the act.<sup>16</sup>

<sup>12</sup> 33 C.F.R. § 329.12.

<sup>13</sup> 16 U.S.C. § 797(e).

<sup>14</sup> 42 U.S.C. § 9111.

<sup>15</sup> *Id.* at § 9126.

<sup>16</sup> *Id.* at § 9102(15).

## Federal Environmental Statutes

The statutes discussed above direct various federal authorities to issue permits or licenses for offshore alternative energy projects. However, they are not the only statutes that need to be considered before an offshore energy project can be installed. Other statutes that may impact potential offshore energy development include, but are not limited to, environmental protection statutes such as:

- The Coastal Zone Management Act (CZMA).<sup>17</sup> The CZMA encourages states to enact coastal zone management plans to coordinate protection of habitats and resources in coastal waters. Projects that may impact a state's coastal zone must conform with the state's coastal zone management program, if the state has adopted such a plan and the plan has been approved by NOAA.<sup>18</sup> The act includes all of the territories under its definition of "coastal states" and therefore the statute applies to the territories. Puerto Rico has a coastal zone management plan approved by NOAA; thus projects that impact the coastal areas of Puerto Rico must demonstrate that they are consistent with the plan.
- The National Environmental Protection Act (NEPA).<sup>19</sup> NEPA requires federal agencies to take a "hard look" at, and to disclose, the environmental consequences of their actions. In general, NEPA and its implementing regulations require various levels of environmental analysis depending on the circumstances and the type of federal action contemplated. Federal case law has concluded that the requirements of NEPA apply to all federal agency actions that impact the environment in the U.S. territories.<sup>20</sup>
- The Endangered Species Act (ESA),<sup>21</sup> the Marine Mammal Protection Act (MMPA),<sup>22</sup> and the Migratory Bird Treaty Act (MBTA).<sup>23</sup> Briefly, each of these laws sets parameters for federal activities that potentially inflict certain kinds of harm upon designated species of plants and animals. Each are likely applicable to activities in or near the territories, although some have argued that there is ambiguity with respect to their applicability to the territories.<sup>24</sup>

---

<sup>17</sup> 16 U.S.C. § 1451 *et seq.*

<sup>18</sup> *Id.* at § 1456(c). The act does allow parties to petition the Secretary of Commerce to override a negative consistency determination from the state agency tasked with evaluating coastal zone management plan consistency.

<sup>19</sup> 42 U.S.C. §§ 4321 *et seq.*

<sup>20</sup> *See, e.g., People of Saipan, By and Through Guerrero v. U.S. Dept. of the Interior*, 502 F.2d 90, 94 (9<sup>th</sup> Cir. 1974).

<sup>21</sup> 16 U.S.C. §§ 1531 *et seq.*

<sup>22</sup> 16 U.S.C. §§ 1361 *et seq.*

<sup>23</sup> 16 U.S.C. §§ 703 *et seq.*

<sup>24</sup> For further discussion of the applicability of these statutes in the territories, *see The Application of Federal Laws In ... American Samoa, Guam, the Northern Marianas Islands, and the U.S. Virgin Islands*, U.S. Department of the Interior, Office of the Solicitor, Memoranda 16-5, 16-13 and 16-16 (October 1984).

## World Petroleum Resources Project

# Assessment of Undiscovered Technically Recoverable Oil and Gas Resources of Puerto Rico and the Puerto Rico–U.S. Virgin Islands Exclusive Economic Zone, 2013

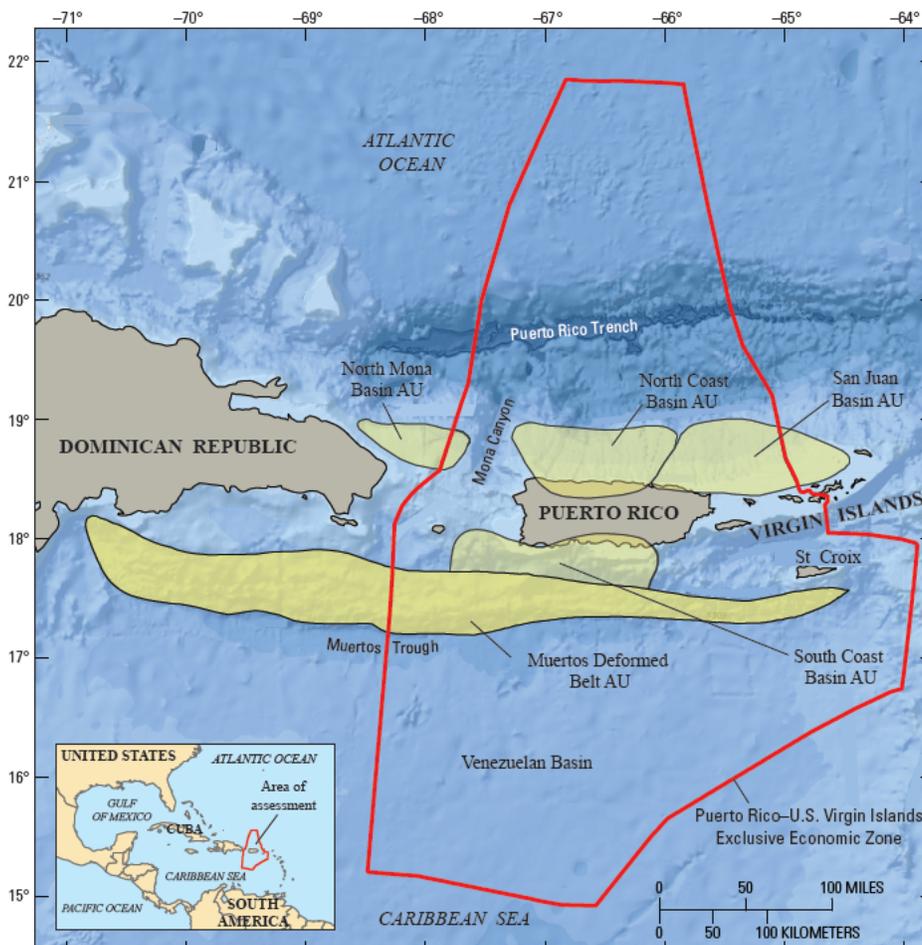

*Using a geology-based assessment methodology, the U.S. Geological Survey estimated means of 19 million barrels of undiscovered, technically recoverable oil and 244 billion cubic feet of undiscovered natural gas in the Puerto Rico–U.S. Virgin Islands Exclusive Economic Zone.*

### Introduction

The U.S. Geological Survey (USGS) assessed the potential for undiscovered conventional oil and natural gas resources of Puerto Rico and the Puerto Rico–U.S. Virgin Islands Exclusive Economic Zone (EEZ; EEZ–Scan Scientific Staff, 1987) (fig. 1). The assessment was based on the postulated presence and viability of petroleum-system elements including petroleum source rocks (quality, source-rock maturation, generation, and migration), reservoir rocks (depositional environments, sequence stratigraphy, and petrophysical properties), traps (type and formation), and timing considerations. Using this geologic framework, the USGS defined three hypothetical petroleum systems and five assessment units (AUs) (table 1). This study assessed the potential for technically

recoverable resources in new field discoveries; economic resources were not evaluated.

Five hypothetical AUs were geologically defined to encompass those areas of the EEZ that were further evaluated for potential oil and gas resources (fig. 1): North Coast Basin AU, San Juan Basin AU, South Coast Basin AU, North Mona Basin AU, and the Muertos Deformed Belt AU. The five AUs combine to form about 13 percent of the total area of evaluation. Most of the evaluation area, including Atlantic oceanic crust, Caribbean oceanic crust, Puerto Rico Trench area, and shelf areas have no petroleum potential and were not considered further. In addition, there is no potential for oil and gas resources within the onshore area of Puerto Rico or the U.S. Virgin Islands.

**Figure 1.** Map showing the extent of the Puerto Rico–U.S. Virgin Islands Exclusive Economic Zone (red line) and the five geologic assessment units (AUs) defined for this study (yellow polygons).

**Table 1.** Puerto Rico–U.S. Virgin Islands Exclusive Economic Zone assessment results.

[MMBO, million barrels of oil; BCFG, billion cubic feet of gas; MMBNGL, million barrels of natural gas liquids. Results shown are fully risked estimates. For gas accumulations, all liquids are included as NGL (natural gas liquids). Undiscovered gas resources are the sum of nonassociated gas (gas in gas accumulations) and associated gas (gas in oil accumulations). F95 represents a 95-percent chance of at least the amount tabulated; other fractiles are defined similarly. Fractiles are additive under the assumption of perfect positive correlation. TPS, Total Petroleum System; AU, Assessment Unit. Gray shading indicates not applicable]

Total Petroleum Systems (TPS) and Assessment Units (AU)	AU Probability	Field Type	Total Undiscovered Resources											
			Oil (MMBO)				Gas (BCFG)				NGL (MMBNGL)			
			F95	F50	F5	Mean	F95	F50	F5	Mean	F95	F50	F5	Mean
<b>Paleogene TPS</b>														
North Coast Basin AU (61170201)	0.04	Oil	Not quantitatively assessed											
		Gas												
San Juan Basin AU (61170202)	0.04	Oil	Not quantitatively assessed											
		Gas												
North Mona Basin AU (61170203)	0.02	Oil	Not quantitatively assessed

		Gas					0	0	1,296	205	0	0	30	5
<b>Total conventional resources</b>			<b>0</b>	<b>0</b>	<b>120</b>	<b>19</b>	<b>0</b>	<b>0</b>	<b>1,532</b>	<b>244</b>	<b>0</b>	<b>0</b>	<b>39</b>	<b>6</b>

### Resource Summary

The areas represented by the AUs of the Puerto Rico–U.S. Virgin Islands EEZ, with the exception of the Muertos Deformed Belt AU, have been considered in previous oil and gas investigations (Zapp and others, 1948; Monroe, 1973; Meyerhoff and others, 1983; Larue and Torrini, 1995). In this study the postulated petroleum-system elements of the North Coast Basin AU, San Juan Basin AU, South Coast Basin AU, and the North Mona Basin AU are highly uncertain resulting in low geologic probabilities (that is, the geologic probability of at least one oil or gas accumulation of 5 million barrels of oil equivalent or greater based on postulated petroleum-system elements) (table 1) and were not quantitatively assessed. The petroleum-system elements of the Muertos Deformed Belt AU, although largely uncertain and risked, resulted in geologic AU probability above the threshold of 10 percent, and the AU was assessed quantitatively (table 1). Within the portion of the Muertos Deformed Belt AU that is part of the Puerto Rico–U.S. Virgin Islands EEZ, we estimated fully risked means of 19 million barrels of oil, 244 billion cubic feet of gas, and 6 million barrels of natural gas liquids. The assessment of undiscovered petroleum resources at the 95th and 50th fractiles (table 1) is zero and reflects the low geologic AU probability of 20 percent and high geologic uncertainty on petroleum-system elements.

### For Further Information

Supporting geologic studies of the Puerto Rico–U.S. Virgin Islands EEZ assessment are in progress. Assessment results are available at the USGS Energy Program Web site at <http://energy.usgs.gov/OilGas/>.

Made an offer to Hoeven for a pilot program in ND for 3 years using any extra pilot streamlining office funds and (Hoeven's addition) allowing the Secretary to delegate (Hoeven wants to the state director) authority to waive APD requirements.

Looks like will be accepted.

**Subject:** Reid Announces President Obama As Keynote For National Clean Energy Summit

**FOR IMMEDIATE RELEASE**

Aug. 1, 2015

## **PRESIDENT BARACK OBAMA TO DELIVER KEYNOTE ADDRESS AT “NATIONAL CLEAN ENERGY SUMMIT 8.0: POWERING PROGRESS” IN LAS VEGAS, AUG. 24**

**LAS VEGAS** — President Barack Obama will lead the nation’s foremost clean energy conversation as the keynote speaker during the “[National Clean Energy Summit 8.0: Powering Progress](#)” at [Mandalay Bay Resort Convention Center](#) in Las Vegas Monday, Aug. 24. In its eighth year, the annual summit brings together clean energy advocates, business leaders, students, public officials and decision makers to discuss solutions for the advancement of the clean energy economy.

“I have so much affection and admiration for President Obama and we are thrilled to welcome him to participate in this year’s summit,” said U.S. Senator Harry Reid. “President Obama’s record on clean energy and climate stands above all others. His administration has made the largest investment in clean energy in American history and there is no place better than Nevada to discuss how we will continue this progress.”

Under the direction of President Obama, the United States is leading global efforts to address the threat of climate change, while making great strides domestically by increasing the use of wind, geothermal and solar power and reducing carbon emissions in record numbers. During the summit, President Obama and other clean energy visionaries will discuss topics such as securing greater energy independence, empowering Americans to develop existing clean energy resources and job creation through renewable energy initiatives.

“It’s a tremendous honor to welcome President Obama as the keynote speaker at this year’s summit,” said Board Chair of the Clean Energy Project, Kathleen Drakulich. “Clean energy solutions have grown and diversified Nevada’s economy and are key to the future of our country. We are thrilled at the opportunity to hear the President’s vision for continued innovation and development during his visit to Nevada, one of the leading states for clean energy.”

“MGM Resorts International believes in the need for businesses to make a conscious effort to reduce their carbon footprint,” said Chairman and CEO of MGM Resorts International, Jim Murren. “President Obama has made significant strides in this space and has been a strong ally in the fight for clean energy.”

“We’re so delighted that President Obama will be this year’s keynote speaker at the National Clean Energy Summit,” said President of the Center for American Progress, Neera Tanden. “At the Center for American Progress, we’re dedicated to improving the lives of all Americans and finding alternative energy solutions today that will benefit generations to come.”

“UNLV is a proud co-sponsor of The National Clean Energy Summit,” said President of the University of Nevada, Las Vegas, Len Jessup. “President Obama has prioritized funding for important clean energy research and education activities that are making a positive impact in Nevada.”

“National Clean Energy Summit 8.0: Powering Progress” is co-sponsored by [U.S. Senator Harry Reid](#), [Center for American Progress](#), the [Clean Energy Project](#), [MGM Resorts International](#) and the [University of Nevada, Las Vegas](#). Past speakers at the annual summit include Hillary Clinton, Bill Clinton, Joe Biden, Arnold Schwarzenegger, Elon Musk and many more. Sen. Harry Reid, John Podesta and Secretary Ernest Moniz will join President Obama as speakers at this year’s summit, with additional speakers and details about panels to follow.

**WHAT:** “National Clean Energy Summit 8.0: Powering Progress”

**WHO:** **President Barack Obama**, 44th President of the United States  
U.S. Senator Harry Reid  
John Podesta, Former Counselor to President Barack Obama  
Secretary Ernest Moniz, Secretary of Energy  
Dan Klaich, Chancellor of the Nevada System of Higher Education (NSHE)  
Diarmuid O’Connell, Vice President of Business Development at Tesla Motors  
Jamie Evans, Managing Director at Panasonic Eco Solutions  
Dr. Ellen Williams, Director of the Advanced Research Projects Agency–Energy (ARPA-E)  
Thomas Voss, Chairman of Smart Wires  
Amy Ericson, Country President for the United States at Alstom  
Susan Kennedy, CEO and Board Member of Advanced Microgrid Solutions  
Neera Tanden, President of the Center for American Progress  
Bill Ritter, Former Governor of Colorado  
Antonio Villaraigosa, Former Mayor of Los Angeles  
Nancy Pfund, Founder and Managing Partner of DBL Investors

Geisha Williams, President of Electric Operations at Pacific Gas and Electric Company

**WHEN:** Monday, Aug. 24, 2015  
9 a.m. – 6 p.m.

**WHERE:** Mandalay Bay Resort Convention Center  
3950 S. Las Vegas Blvd.  
Las Vegas, NV 89119

**REGISTER:** To register for Summit 8.0 and for the latest information about the panels and panelists, please visit [cleanenergysummit.org](http://cleanenergysummit.org)

District Update | September 2, 2015

[Click here](#) if you have trouble viewing this email

## Off to a great start

I want to update you on my efforts during the first half of 2015.

First of all, it is an honor to serve as the Congressman of Virginia's 8th district. I am finding the House of Representatives to be an often-collaborative, energized body. Many issues bridge the partisan divide, and I believe there is appetite for even more. My main areas of focus are creating the new American economy, climate change, and women's economic empowerment.

As we continue our work to bring the economy back to full steam, I am working with many members of Congress to end sequestration, a critical issue nationally and an essential issue for our local economy, where the federal government presence is strong. I am a cosponsor of legislation to raise the minimum wage, and I support President Obama's executive order to increase the number of people eligible for [overtime pay](#). And I have pushed the Securities and Exchange Commission to require CEOs of public companies to disclose the ratio of their pay to median employee pay.

On our efforts to fight [climate change](#), I am a cosponsor of the Healthy Climate and Family Security Act of 2015, which would put a price on carbon and return the dividends to the American people. To continue protecting our natural resources, I fought attempts to strip funds from the Environmental Protection Agency and the Department of the Interior during appropriations efforts on the House floor. [I rose to speak](#) for land and water conservation, to defend the Endangered Species Act as well as the President's ban on ivory, national ocean planning, as well as the critical issue of infrastructure funding for our own [Memorial Bridge](#).

In order to spur the nation's economy, we must do more to promote women's economic empowerment. I introduced the [Gender Diversity Investment Act](#), which would enable federal employees to invest in companies with demonstrable commitment to pay equity, women's

### Are you signed up?

I hope you will [sign up for my e-newsletter](#) so that I can keep in touch with you about the work I am doing in Congress.

### [Sign up today!](#)

Join me for our first [women's conference on October 10th](#).

Did you see my piece for MSNBC on [Why I'll Vote in favor of the Iran Deal?](#)

Did you know that I re-introduced the [Humane Cosmetics Act?](#)

[Share on Facebook](#)

[Share on Twitter](#)

representation on boards, and flexible work and leave policies. I am a cosponsor of the [Paycheck Fairness Act](#), as well as legislation to require paid family and medical leave for federal employees (as a model for the private sector). I hope you will join me for our first [women's conference on October 10th](#) to discuss this and more.

While I focus on those priorities, many other vital issues are in the mix. I have been the lead or co-lead on eights bills, ranging from [education](#) and [innovation](#) to [federal employee pay and benefits](#), to the [Keeping Guns from Criminals Act](#). And with so much communication from you, the deeply educated and politically astute residents of northern Virginia, my staff and I are keeping abreast of many other issues in our neighborhoods and beyond.

There is much more that I hope to do, and will do with your help. Relentless, optimistic, creative, and bold – together, we can provide the leadership to achieve sustained higher economic growth, and renew the strength of our middle class and create new pathways to get there.

It is an honor to represent you in Congress.

My best,

**EXECUTIVE OFFICE OF THE PRESIDENT**  
**OFFICE OF MANAGEMENT AND BUDGET**  
**WASHINGTON, D.C. 20503**

June 23, 2015  
(House Rules)

## **STATEMENT OF ADMINISTRATION POLICY**

**H.R. 2822 – Department of the Interior, Environment, and Related Agencies**

**Appropriations Act, 2016**

(Rep. Rogers, R-KY)

The Administration strongly opposes House passage of H.R. 2822, making appropriations for the Department of the Interior, Environment, and related agencies for the fiscal year ending September 30, 2016, and for other purposes. The bill drastically underfunds core Department of the Interior programs as well as the Environmental Protection Agency's operating budget, which supports nationwide protection of human health and our vital air, water and land resources. Funding levels in the bill would prevent investments that reduce future costs to taxpayers by facilitating increased energy development and maintaining facilities and infrastructure in national parks, refuges, forests, public lands, and Indian Country. They would make it harder for States and businesses to plan and execute changes that would decrease carbon pollution and address the challenges the Nation faces from climate change. They would also reduce support for partnerships and effective collaboration with States, local governments and private entities on efforts to restore and conserve natural resources. Further, the bill includes numerous highly problematic ideological provisions that have no place in funding legislation. These provisions threaten to undermine the ability of States and communities to address climate change and protect a resource that is essential to America's health—clean water, as well as the most basic protections for America's special places and the people and wildlife that rely on them. If the President were presented with H.R. 2822, his senior advisors would recommend that he veto the bill.

Enacting H.R. 2822 and adhering to the congressional Republican budget's overall spending limits for fiscal year (FY) 2016 would hurt our economy and shortchange investments in middle-class priorities. Sequestration was never intended to take effect: rather, it was supposed to threaten such drastic cuts to both defense and non-defense funding that policymakers would be motivated to come to the table and reduce the deficit through smart, balanced reforms. The Republican framework would bring base discretionary funding for both non-defense and defense for FY 2016 to the lowest real levels in a decade. Compared to the President's Budget, the cuts would result in tens of thousands of the Nation's most vulnerable children losing access to Head Start, millions fewer workers receiving job training and employment services, and drastic cuts to research awards and grants, along with other impacts that would hurt the economy, the middle class, and Americans working hard to reach the middle class.

Sequestration funding levels would also put our national security at unnecessary risk, not only through pressures on defense spending, but also through pressures on State, USAID, Homeland Security, and other non-defense programs that help keep us safe. More broadly, the strength of our economy and the security of our Nation are linked. That is why the President has been clear that he is not willing to lock in sequestration going forward, nor will he accept

fixes to defense without also fixing non-defense.

The President's senior advisors would recommend that he veto H.R. 2822 and any other legislation that implements the current Republican budget framework, which blocks the investments needed for our economy to compete in the future. The Administration looks forward to working with the Congress to reverse sequestration for defense and non-defense priorities and offset the cost with commonsense spending and tax expenditure cuts, as Members of Congress from both parties have urged.

The Administration would like to take this opportunity to share additional views regarding the Committee's version of the bill.

#### Environmental Protection Agency (EPA)

*EPA Operating Budget.* The Administration disagrees strongly with the bill's reduction to EPA's operating budget by \$474 million, or 13 percent, compared to the FY 2016 Budget request. This reduced level of funding would significantly undermine implementation of the Clean Power Plan and the recently finalized Clean Water Rule. The Clean Power Plan is a flexible and practical approach to addressing the risks of climate change by reducing carbon pollution from the electric power sector, the largest source of carbon pollution in the United States. Climate change is not only an environmental challenge, it is also an economic, public health, and national security challenge. Unabated climate change is projected to hamper economic growth in the United States and put the health and well-being of the Nation at risk from extreme weather events, wildland fire, poor air quality, and illnesses transmitted by food, water, and disease carriers such as mosquitos and ticks. Failing to address climate change would also exacerbate poverty and contribute to environmental degradation in developing countries, potentially resulting in resource shortages, political instability, and conflict. Meanwhile, the bill also reduces funding to implement the recently finalized Clean Water Rule that would ensure waters protected under the Clean Water Act are more precisely defined and predictably determined. By delaying implementation of this rule, business and industry face a more costly, difficult, and slower permitting process.

*State Categorical Grants.* The Administration opposes the \$118 million reduction to State and Tribal Categorical grants compared to the FY 2016 Budget request. Often, States and Tribes implement environmental programs through delegated authorities. However, the bill reduces these grants to States and Tribes to carry out activities such as water quality permitting, air monitoring, and hazardous waste management programs. In addition, the bill reduces funding for brownfields projects by \$35 million, or 32 percent, from the FY 2016 Budget request. This reduced level of funding severely limits opportunities for local communities to revitalize their contaminated lands to improve environmental quality and spark economic redevelopment.

*State Revolving Funds (SRFs).* The Administration objects to the funding levels provided for EPA's Clean Water and Drinking Water SRFs. The bill reduces SRF funding by a combined \$527 million from the FY 2016 Budget request, reducing necessary support to help communities finance water infrastructure improvements, resulting in approximately 200 fewer projects being funded nationally.

*Greenhouse Gas (GHG) Limits for Power Plants.* The Administration strongly objects to section 428 of the bill, which would prohibit the use of funds to propose, finalize, implement

or enforce carbon pollution standards for fossil fuel-fired electric generating units that are the largest source of carbon pollution in the United States. The bill seeks to derail Administration efforts to address under section 111 of the Clean Air Act the urgent economic, public health, and national security impacts of unabated climate change. Failure to reduce the utility sector's carbon footprint places the Nation at risk from extreme weather events, wildland fire, poor air quality, global instability, accelerated environmental degradation, and illnesses transmitted by food, water, and disease carriers such as mosquitos and ticks.

*Clean Water Act (CWA).* The Administration believes that the CWA provisions in the bill undermine efforts to protect America's clean water resources, which are critical to American families and businesses. The Administration strongly objects to section 422 of the bill in particular, which would disrupt the Administration's current efforts to clarify the scope of CWA, hamstring future regulatory efforts, and create significant ambiguity regarding existing regulations and guidance.

*Social Cost of Carbon (SCC).* The Administration regards the SCC as an essential component of the environmental rulemaking process and opposes the Congress' interference with the Interagency Working Group's (IWG) development of the SCC. The Administration strongly objects to section 437 of the bill, which would force the IWG to revise the SCC using only the discount rates and "domestic" SCC values stated in Executive Order 12866 and Office of Management and Budget Circular A-4. This revision would ignore the trans-boundary movement of carbon, fail to capture key costs of carbon emissions, and disrupt dozens of upcoming rules that would use the SCC to monetize carbon reduction benefits.

*Limitations on Significant New Alternatives Policy (SNAP) Program under the Clean Air Act (CAA).* The Administration objects to section 435 of the bill, which would block the finalization, implementation, and enforcement of a rule to prohibit certain uses of climate super-pollutants known as hydrofluorocarbons (HFCs). Domestic action to reduce use of HFCs is consistent with U.S. advocacy for addressing HFCs on a global basis, such as through an amendment to the Montreal Protocol.

*National Ocean Policy.* The Administration objects to section 425 of the bill, which prohibits any funding provided in the bill from being used to implement the marine planning components of the National Ocean Policy. This provision would prohibit the Department of the Interior (DOI) and EPA from participating in marine and coastal planning efforts, a process to better determine how the ocean, the Nation's coasts, and the Great Lakes are managed in an efficient manner.

*Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) Financial Assurance.* The Administration objects to section 427 of the bill, which prohibits the use of funds to develop, propose, finalize, and implement financial responsibility requirements under CERCLA 108(b). On May 19, 2015, the U.S. Court of Appeals for the District of Columbia Circuit ordered EPA to develop an expedited schedule for financial responsibility rules for the hardrock mining industry and for three other industries. This provision would severely limit EPA's ability to develop these rules in a timely manner and abrogates EPA's responsibilities laid out in CERCLA 108(b).

*Classification of Forest Biomass Fuels as Carbon-Neutral.* The Administration objects to the bill's representation of forest biomass as categorically "carbon-neutral." This language conflicts with existing EPA policies on biogenic CO<sub>2</sub> and interferes with the position of States

that do not apply the same policies to forest biomass as other renewable fuels like solar or wind. This language stands in contradiction to a wide-ranging consensus on policies and best available science from EPA's own independent Science Advisory Board, numerous technical studies, many States, and various other stakeholders.

*e-Manifest.* The Administration objects to the elimination of funding for e-Manifest development, EPA's system for electronically tracking the transport of hazardous waste. While the Administration acknowledges the concern about the pace of development of the e-Manifest, eliminating the requested \$7 million in funding at this time would jeopardize EPA's ongoing progress to develop the system and begin operations in the coming years.

*Lead Test Kits.* The Administration objects to section 426 of the bill that would disrupt EPA's current activities under the 2008 Lead Renovation, Repair and Painting rule until EPA approves a commercially available "improved" lead paint test kit. This provision would undermine EPA's efforts to protect sensitive populations from exposure to lead, a known toxin to children and developing fetuses, during home renovation projects.

#### Department of the Interior (DOI)

*Bureau of Indian Affairs (BIA) Topline.* The Administration opposes the \$159 million, or 5 percent, reduction to BIA as compared to the FY 2016 Budget request. This funding level would limit DOI's ability to make key investments in education and wrap-around services to support Native youth, eliminating all increases to post-secondary scholarships and \$10 million for education program enhancement funds to allow Bureau of Indian Education to drive school improvement and reforms. The bill reduces funding for initiatives aimed at supporting tribal self-determination through the creation of a one-stop portal to facilitate access to Federal resources and funding to address data gaps in Indian Country, and the creation of an Office of Indian Affairs Policy, Program Evaluation, and Data to support effective, data-driven, tribal policy making and program implementation. In addition, this bill eliminates all increases to natural resources management on tribal lands, including funds to help tribal communities prepare for and respond to the impacts of climate change.

*National Park Service (NPS) Centennial.* The Administration opposes funding levels provided for the NPS Centennial. The bill fails to provide adequate funding to prepare for the Centennial in 2016, resulting in the delay of roughly 70 percent of line-item park construction projects and 36 percent of repair and rehabilitation projects, and forgoes millions in matching private donations. The bill also fails to provide funding for engaging youth and cultivating the next generation of conservation-minded individuals, including funding for transportation assistance to students from Title I schools.

*Onshore Inspection Fees.* The bill does not include a proposal in the FY 2016 Budget request to institute a new onshore oil and gas inspection fee program. The proposal, which is similar to the program already in place for offshore operations, would cover the cost of inspection activities and reduce the net cost to taxpayers of operating the Bureau of Land Management's (BLM) oil and gas program. Failure to adopt the new fees and associated funding would hamper the BLM's ability to protect human safety, conserve energy resources, facilitate the proper reporting of oil and gas production, and ensure environmental requirements are being followed in all phases of development.

*State and Tribal Wildlife Grants.* The Administration opposes the 15 percent reduction to

State and Tribal Wildlife Grants compared to the FY 2016 Budget request. This important program allows States and Tribes, key partners in conservation, to strategically protect wildlife and conserve habitat in a way that complements Federal investments and yields better results for the public.

*Payments in Lieu of Taxes (PILT).* The bill provides \$452 million for PILT, which the Administration has proposed to fund through a separate mandatory appropriation in line with its previous congressional enactment. While the Administration appreciates the Committee's support for PILT, inclusion of these funds in the bill comes at the expense of all other programs funded by the bill.

*Carcieri Land into Trust.* The bill fails to include the provision in the FY 2016 Budget request to clarify and reaffirm the Secretary of the Interior's authority to acquire land in trust under the Indian Reorganization Act (IRA). In *Carcieri v. Salazar*, 555 U.S. 397 (2009), the Supreme Court held that the Secretary could acquire land in trust under the IRA only for tribes that were "under Federal jurisdiction" in 1934. A legislative solution would help achieve the goals of the IRA and tribal self-determination by clarifying that DOI's authority under the law applies to all tribes, whether recognized in 1934 or after. Such legislation would be consistent with the longstanding policy of assisting Tribes in establishing and protecting a land base sufficient to allow them to provide for the health, welfare, and safety of tribal members, and in treating all tribes equally for purposes of setting aside lands for tribal communities.

*Hydraulic Fracturing:* Section 439 of the bill would block DOI from implementing, administering or enforcing the Bureau of Land Management's recently-finalized Hydraulic Fracturing rule. This would leave the agency reliant on 30-year old requirements and prevent it from taking key steps to improve the safety of oil and gas drilling activities and improve opportunities for BLM to coordinate standards and processes with States and Tribes to reduce administrative costs and improve efficiency.

*Stream Buffer Regulation.* Section 423 would prohibit DOI's Office of Surface Mining, Reclamation, and Enforcement from updating 30-year-old stream protection regulations to reflect modern science and technology and better protect people and the environment, provide industry more certainty, and address recent court decisions.

*Hunting, Fishing and Recreational Shooting.* Sections 421 and 424 would substantially impair the enforcement of a longstanding ban on the use of lead ammunition in the hunting of migratory waterfowl, and would complicate in other ways the overall implementation of hunting, fishing, and recreational shooting on public lands.

*Wildlife Trafficking.* Section 120 would interfere with ongoing Fish and Wildlife Service (FWS) actions to combat wildlife trafficking, curb the poaching of African Elephants, and restrict trade in ivory, which would impair U.S. leadership in the global fight against ivory poaching.

*Endangered Species Act Restrictions.* Sections 117, 121, and 122 of the bill undercut the Endangered Species Act by limiting the ability of the FWS to properly protect, based on the best available science, a number of species, including the greater sage grouse, northern long-eared bat, and certain gray wolf populations. Language provisions, like those affecting the sage grouse, would only create additional uncertainty and undermine unprecedented efforts to conserve the sagebrush landscape and the Western way of life.

*Federal Acknowledgement of American Indian Tribes.* Language under the heading "Bureau of Indian Affairs, Administrative Provisions" in the bill would block DOI from finalizing, implementing, administering, or enforcing the Administration's proposed Federal acknowledgment rule, preventing DOI's effort to improve the regulations governing the process and criteria by which the Secretary of the Interior acknowledges an Indian Tribe.

#### DOI and Department of Agriculture (USDA), Forest Service

*Land and Water Conservation Fund (LWCF).* The Administration objects to the drastic reduction of \$152 million, or 38 percent, to the requested discretionary funding for DOI and USDA LWCF programs. LWCF is a cornerstone of Federal conservation and recreation preservation efforts. This funding level would severely impede agency capacity to further protect our Nation's natural heritage. To date, the LWCF has contributed to the protection of key public lands, such as Rocky Mountain National Park, Mount Rainier National Park, and portions of the Appalachian Trail, among others, as well as State and local recreation projects and important cultural heritage sites.

*Wildland Fire Suppression.* The Administration's cap adjustment for wildfire suppression was not included in this bill. Continued inaction on this proposal, which has bipartisan support, would increase the likelihood of disruptive funding transfers for suppression and away from the very restoration and fire risk reduction programs that are meant to restore landscapes and reduce suppression costs and restore landscapes.

*Land Management Operations.* The Administration opposes the \$502 million, or 8 percent, reduction to operational funding to land management agencies, relative to the FY 2016 Budget request. This reduction would undermine support for the provision of basic public and business services that support the long-term health and resilience of national parks, forests, refuges, and other public lands.

*Water Rights on Federal Land.* Section 434 prohibits agencies from conditioning land use authorizations on the transfer, relinquishment, or impairment of a water right, or on the acquisition of a water right in the name of the United States. This language is unnecessary for its intended purpose, and would preclude land management agencies from protecting the public interest. The provision would eliminate the ability of land management agencies to maintain sufficient water for other congressionally-designated purposes and ensure water rights are tied to the activities for which they were developed. These restrictions would also hamper cooperative work with land users to improve land conditions, such as range improvements, or conduct habitat mitigation activities as part of land use agreements.

#### Department of Agriculture (USDA), Forest Service

*Land Management Improvements.* The bill provides \$357 million for capital improvement and maintenance of the national forest system, a 5 percent increase from the FY 2016 Budget request. While the Administration supports the capital improvement and maintenance of the Nation's public forests in order to increase its health, resilience, and accessibility, the increase in this bill comes at the expense of other needed priorities.

#### Department of Health and Human Services

*Indian Health Service (IHS) Topline.* The Administration strongly opposes the reduction to funding for Native American health care programs and facilities of the Indian Health Service (IHS) by \$300 million, or 6 percent, below the FY 2016 Budget request. This would result in inadequate funding for the provision of health care to a population that is sicker and poorer compared to national averages. For example, compared to the FY 2016 Budget request, the bill reduces funding by nearly \$50 million for Purchased and Referred Care, a program that supports health care not available in IHS and tribal facilities, which would exacerbate existing levels of denied care and waiting lists for services.

*Contract Support Costs.* The Administration objects to the limitation in funding for tribal Contract Support Costs (CSC) for BIA and IHS. Specifically, the bill would limit funding for CSC that could perpetuate the funding issues described in the Supreme Court's *Salazar v. Ramah Navajo Chapter* decision. The Congress should pursue a long-term solution for CSC appropriations, providing an increase in funding in FY 2016 as part of a transition to a new three-year mandatory funding stream in FY 2017, as proposed in the President's Budget.

### Other Provisions

*Smithsonian Institution.* The bill reduces funding for the Smithsonian Institution by \$116 million, or 12 percent, below the FY 2016 Budget request—a reduction that can be expected to reduce public access to the Smithsonian as well as increase safety concerns through delays in planned renovations. With over 30 million visits to Smithsonian facilities recorded in 2014, it is important to ensure the museums, galleries, National Zoological Park, and nine research facilities that make up the world's largest museum and research complex remain open, maintained, and available to the generations of Americans who make use of this unique institution each year. Specifically, the bill reductions would delay renovation for the National Air and Space Museum, where the museum has had to establish temporary covered walkways to protect the public from potential falling debris from its facade, and would reduce operating hours for the museums, including the new National Museum of African American History and Culture.

*Digital Accountability and Transparency Act of 2014 (DATA Act).* The Administration urges the Congress to fully fund the FY 2016 Budget requests for DOI and EPA to implement the DATA Act. This funding would support efforts to provide more transparent Federal spending data, such as updating information technology systems, changing business processes, and employing a uniform procurement instrument identifier.

*U.S. Digital Service Team.* The Administration urges the Congress to fully fund the FY 2016 Budget requests for DOI and EPA to develop U.S. Digital Service teams. This funding would support managing the agency's digital services that have the greatest impact to citizens and businesses.

### Constitutional Concerns

Several provisions in the bill raise separation of powers concerns.

The Administration looks forward to working with the Congress as the FY 2016 appropriations process moves forward.

## **President Obama Wants to Lift the Iranian Oil Export Ban But Keep America's**

Lifting the oil export ban would grow our economy, improve our trade, and bolster our geopolitical standing. **So why would President Obama want to keep the oil export ban on America while lifting the sanction on Iranian oil?**

Currently, Iranian oil is under sanction because the world understands that if Iran sold more of their oil abroad it would be a boom for their economy and would increase their influence in the region and the world. In fact, the sanctions on Iranian oil have been so devastating that they helped to bring Iran to the negotiating table. Lifting the oil export ban was a key bargaining chip, and in negotiations the Obama Administration agreed to lift them.

But when it comes to America, President Obama is much less willing to negotiate. White House Spokesman Josh Earnest **said** today that the

president doesn't support legislation [announced](#) by Leader McCarthy to lift the oil export ban even though lifting the ban would improve our economy.

**It makes absolutely no sense that the President would want to let Iran benefit from free energy trade while denying those same benefits to America.**

If there was ever a time to lift the oil export ban, it's now. This outdated policy from the 1970s was created in a time when people thought Peak Oil was just on the horizon and scarcity left Americans waiting in lines to get gasoline. Now, America is [the world's leading producer of gas and oil](#), which has lifted up our economy and helped us largely break free from our dependence on foreign oil.

But the benefits of American energy can extend beyond our borders. Our allies, especially in Europe, do not share our newfound energy independence. For example, Russia continues to use its energy as a weapon to keep Europe at bay and cow Ukraine into submission. American energy can relieve our allies' dependence on energy from Russia, bringing them greater security and independence.

But keeping America's oil export ban while opening world markets to Iranian oil would have the exact opposite effect. Instead of growing America's economy, Iran's would grow. Instead of relieving our allies' dependence on oil from destabilizing countries, their dependence would increase. **So the question is, when it comes to energy, why would this Administration want to help Iran and hinder the United States?**

**To:** Stephenne Harding  
**Subject:** BLM's Fracking Rule Court Decision

All--

A federal judge in Wyoming today issued a preliminary injunction against the Interior Department's fracking regulations. At this point the BLM is consulting with the Office of the Solicitor and the Department of Justice about the decision of the U.S. District Court in Wyoming to issue a preliminary injunction of the hydraulic fracturing rule. While the matter is being resolved, the BLM will follow the Court's order and will continue to process applications for permit to drill and inspect well sites under its pre-existing regulations.

Please let me know if you have further questions.

Cheers,

Stephenne

Office of the Democratic Whip Steny H. Hoyer

DemocraticWhip.gov - (202) 225-3130

**FLOOR SCHEDULE FOR THURSDAY, OCTOBER 8, 2015**

HOUSE MEETS AT:	FIRST VOTE PREDICTED:	LAST VOTE PREDICTED:
10:00 a.m.: Morning Hour 12:00 p.m.: Legislative Business Fifteen "One Minutes"	???	???

**\*\*Members are advised that the House will meet at 12:00 p.m. and recess immediately to allow for the Republican Conference Meeting. One minutes will occur after the House reconvenes.**

**H.Res. 462 – Rule providing for consideration of both H.R. 538 – Native American Energy Act (Rep. Young (AK) – Natural Resources) and H.R. 702 – To Adapt to Changing Crude Oil Market Conditions (Rep. Barton – Energy and Commerce) (One hour of debate).**

For H.R. 538, the Rules Committee has recommended a structured Rule that provides for one hour of general debate equally divided and controlled by the Chair and Ranking Member of the Committee on Natural Resources. The Rule allows for 2 amendments, debatable for 10 minutes equally divided between the offeror and an opponent. The Rule allows one motion to recommit, with or without instructions, and waives all points of order against the legislation.

For H.R. 702, the Rules Committee has recommended a structured Rule that provides for one hour of general debate equally divided and controlled by the Chair and Ranking Member of the Committee on Energy and Commerce. The Rule allows for 10 amendments, debatable for 10 minutes equally divided between the offeror and an opponent. The Rule allows one motion to recommit, with or without instructions, and waives all points of order against the legislation.

The Rules Committee rejected a motion by Mr. McGovern of Massachusetts to consider H.R. 538 and H.R. 702 under open Rules. **Members are urged to VOTE NO.**

**H.R. 538 – Native American Energy Act (Rep. Young (AK) – Natural Resources).** H.R. 538 seeks to foster energy development on Native American tribal lands by authorizing expedited review and consideration of energy projects or appraisals, which in turn will lead to less environmental protection, public involvement, and regulatory oversight. H.R. 538 would deem an appraisal approved if the Department of the Interior fails to respond within sixty days.

H.R. 538 will also amend the National Environmental Policy Act (NEPA) to limit review of an environmental impact statement for projects on Native American tribal lands to only tribal members and individuals residing within an undefined "affected area." The

language in H.R. 538 is so broadly written that there are no specifics on what an affected area would include and this provision could potentially apply to additional projects such as mining contracts, proposed water development projects, construction of solid waste facilities, construction of tribal casinos, and non-tribal partner projects that are located on Indian lands.

H.R. 538 weakens environmental justice protections by making it extremely difficult for members of the public to challenge energy projects by preventing the recovery of attorney's fees for their claims and potentially making the plaintiff responsible for the defendant's attorney fees and costs.

Lastly, H.R. 538 contains a provision that would exempt tribal land from the Department of the Interior's regulations on hydraulic fracturing or "fracking."

The Rule provides for no further general debate and makes in order 10 amendments, debatable for 10 minutes, equally divided between the offeror and an opponent. The amendments are:

**Young (AK) Manager's Amendment.** Clarifies that a state, tribes, and local governments in an affected area of a proposed federal action on Indian lands may continue, as provided under current law, to comment on an environmental impact statement required under the National Environmental Policy Act, and that Section 4 shall not limit any public comment on a federal action concerning gaming on Indian lands under the Indian Gaming Regulatory Act.

**Lujan Grisham Amendment.** Allows the Forest Service to create a pilot program that would execute contracts with tribes to perform administrative, management, and other functions of programs of the Tribal Forest Protection Act of 2004.

**TOMORROW'S OUTLOOK**

The GOP Leadership has announced the following schedule for Friday, October 9: The House will meet at 9:00 a.m. for legislative business. The House is expected to consider H.R. 702 – To Adapt to Changing Crude Oil Market Conditions (Rep. Barton – Energy and Commerce) (Subject to a Rule).

**THE DAILY QUOTE**

"This is getting ridiculous. A clear majority of Congress wants to reauthorize the

[Export-Import] bank... So let's just do it already."

- Rep. Stephen Fincher (R-TN), The Hill, 10/7/2015

**Date:** Thursday, October 08, 2015 9:55:24 AM

Office of the Democratic Whip Steny H. Hoyer

DemocraticWhip.gov - (202) 225-3130

**FLOOR SCHEDULE FOR THURSDAY, OCTOBER 8, 2015**

<b>HOUSE MEETS AT:</b>	<b>FIRST VOTE PREDICTED:</b>	<b>LAST VOTE PREDICTED:</b>
10:00 a.m.: Morning Hour 12:00 p.m.: Legislative	???	???

Business		
Fifteen "One Minutes"		

**\*\*Members are advised that the House will meet at 12:00 p.m. and recess immediately to allow for the Republican Conference Meeting. One minutes will occur after the House reconvenes.**

**[H.Res. 462](#) – Rule providing for consideration of both [H.R. 538](#) – Native American Energy Act (Rep. Young (AK) – Natural Resources) and [H.R. 702](#) – To Adapt to Changing Crude Oil Market Conditions (Rep. Barton – Energy and Commerce) (One hour of debate).**

For H.R. 538, the Rules Committee has recommended a structured Rule that provides for one hour of general debate equally divided and controlled by the Chair and Ranking Member of the Committee on Natural Resources. The Rule allows for 2 amendments, debatable for 10 minutes equally divided between the offeror and an opponent. The Rule allows one motion to recommit, with or without instructions, and waives all points of order against the legislation.

For H.R. 702, the Rules Committee has recommended a structured Rule that provides for one hour of general debate equally divided and controlled by the Chair and Ranking Member of the Committee on Energy and Commerce. The Rule allows for 10 amendments, debatable for 10 minutes equally divided between the offeror and an opponent. The Rule allows one motion to recommit, with or without instructions, and waives all points of order against the legislation.

The Rules Committee rejected a motion by Mr. McGovern of Massachusetts to consider H.R. 538 and H.R. 702 under open Rules. **Members are urged to VOTE NO.**

**[H.R. 538](#) – Native American Energy Act (Rep. Young (AK) – Natural Resources).** H.R. 538 seeks to foster energy development on Native American tribal lands by authorizing expedited review and consideration of energy projects or appraisals, which in turn will lead to less environmental protection, public involvement, and regulatory oversight. H.R. 538 would deem an appraisal approved if the Department of the Interior fails to respond within sixty days.

H.R. 538 will also amend the National Environmental Policy Act (NEPA) to limit review of an environmental impact statement for projects on Native American tribal lands to only tribal members and individuals residing within an undefined "affected area." The language in H.R. 538 is so broadly written that there are no specifics on what an affected area would include and this provision could potentially apply to additional projects such as mining contracts, proposed water development projects, construction of solid waste facilities, construction of tribal casinos, and non-tribal partner projects that are located on Indian lands.

H.R. 538 weakens environmental justice protections by making it extremely difficult for members of the public to challenge energy projects by preventing the recovery of attorney's fees for their claims and potentially making the plaintiff responsible for the defendant's attorney fees and costs.

Lastly, H.R. 538 contains a provision that would exempt tribal land from the Department of the Interior's regulations on hydraulic fracturing or "fracking."

The Rule provides for no further general debate and makes in order 10 amendments, debatable for 10 minutes, equally divided between the offeror and an opponent. The amendments are:

[House Report \(PDF Version\)](#)

**TOMORROW'S OUTLOOK**

The GOP Leadership has announced the following schedule for Friday, October 9: The House will meet at 9:00 a.m. for legislative business. The House is expected to consider H.R. 702 – To Adapt to Changing Crude Oil Market Conditions (Rep. Barton – Energy and Commerce) (Subject to a Rule).

**THE DAILY QUOTE**

"This is getting ridiculous. A clear majority of Congress wants to reauthorize the [Export-Import] bank... So let's just do it already."

- Rep. Stephen Fincher (R-TN), The Hill, 10/7/2015

**Subject:** OFFICIAL RELEASE: Statement of Administration Policy on H.R. 2028 – Energy and Water Development and Related Agencies Appropriations Act, 2016

**EXECUTIVE OFFICE OF THE PRESIDENT**  
**OFFICE OF MANAGEMENT AND BUDGET**  
**WASHINGTON, D.C. 20503**

October 8, 2015

(Senate)

**STATEMENT OF ADMINISTRATION POLICY**  
**H.R. 2028 – Energy and Water Development and Related Agencies**  
**Appropriations Act, 2016**  
(Sen. Cochran, R-MS)

The Administration strongly opposes Senate passage of H.R. 2028, making appropriations for energy and water development, and related agencies for the fiscal year ending September 30, 2016, and for other purposes. Although the bill supports key national security items, the bill drastically underfunds critical investments that develop American energy sources to build a clean and secure energy future; develop and commercialize the emerging technologies that create high-quality jobs and enhance the Nation's economic competitiveness; and improve resilience against current and ongoing climate impacts that threaten our economy, public health, and natural resources. As a result, it would put at risk U.S. competitiveness in new markets for clean energy industries such as advanced vehicles, advanced manufacturing, energy efficiency for homes and businesses, and domestic renewable energy such as wind, solar, and biomass. If the President were presented with H.R. 2028, his senior advisors would recommend that he veto the bill.

Enacting H.R. 2028 and adhering to the congressional Republican budget's overall spending limits for fiscal year (FY) 2016 would hurt our economy and shortchange investments in middle-class priorities. Sequestration was never intended to take effect: rather, it was supposed to threaten such drastic cuts to both defense and non-defense funding that policymakers would be motivated to come to the table and reduce the deficit through smart, balanced reforms. The Republican framework would bring base discretionary funding for both non-defense and defense for FY 2016 to the lowest real levels in a decade. Compared to the President's Budget, the cuts would result in tens of thousands of the Nation's most vulnerable children losing access to Head Start, millions fewer workers receiving job training and employment services, and drastic cuts to scientific research awards and grants, along with other impacts that would hurt the economy, the middle class, and Americans working hard to reach the middle class.

Sequestration funding levels would also put our national security at unnecessary risk, not only through pressures on defense spending, but also through pressures on State, USAID, Homeland Security, and other non-defense programs that help keep us safe. More broadly, the strength of our economy and the security of our Nation are linked. That is why the President has been clear that he is not willing to lock in sequestration going forward, nor will he accept fixes to defense without also fixing non-defense.

The President's senior advisors would recommend that he veto H.R. 2028 and any other legislation that implements the current Republican budget framework, which blocks the investments needed for our economy to compete in the future. The Administration looks forward to working with the Congress to reverse sequestration for defense and non-defense priorities and offset the cost with commonsense spending and tax expenditure cuts, as Members of Congress from both parties have urged.

The Administration would like to take this opportunity to share additional views regarding the Committee's version of the bill.

#### Department of Energy (DOE)

*Office of Energy Efficiency and Renewable Energy.* The Administration strongly objects to the \$1.9 billion provided in the bill for the Office of Energy Efficiency and Renewable Energy. Overall, this level is \$790 million below the FY 2016 Budget request. Relative to the FY 2016 Budget request, the bill reduces funding for renewable energy by 34 percent, sustainable transportation by 23 percent, and energy efficiency by 35 percent. These reductions would significantly underfund critical activities that support the development and commercialization of clean energy technologies including wind energy and advanced manufacturing capabilities. At this funding level, the number of research, development, and demonstration projects supported in cooperation with industry, universities, and the national labs would be reduced, limiting innovation and technological advancement, curtailing solutions to reduce U.S. dependence on oil and reduce energy waste, and undermining the Nation's industrial competitiveness in the future global clean energy economy. The Congress is urged to fully fund the FY 2016 Budget request of \$2.7 billion.

*Advanced Research Projects Agency-Energy (ARPA-E).* The Administration objects to the \$291 million provided in the bill for ARPA-E, which is \$34 million or 10 percent below the FY 2016 Budget request. This funding reduction would impact investments in transformational technologies that reduce energy-related emissions, increase energy efficiency across multiple economic sectors, and reduce energy imports.

*Electricity Delivery and Energy Reliability.* The Administration objects to the \$151 million provided in the bill for Electricity Delivery and Energy Reliability, which is \$119 million or 44 percent below the FY 2016 Budget request. At the funding levels provided in the bill, critical activities supporting a secure, reliable, and modernized electricity grid as well as energy assurance, would go unfunded. Investments in a modernized grid are necessary to move the Nation to a cleaner more secure energy future.

*Fossil Energy and Nuclear Energy.* The Administration notes that the bill includes funding above the FY 2016 Budget request in some areas that are already well established in the market, including for nuclear (\$948 million, \$41 million or 4.5 percent above the FY 2016 Budget request) and for Fossil Energy Research and Development (\$598 million, \$38 million or 6.8 percent above the FY 2016 Budget request), yet makes drastic reductions in those areas that are most crucial to the Nation's clean energy future and continued U.S. technology leadership. The Administration encourages the Congress to fund DOE's energy programs at the requested level, as this balances the portfolio among items of short-, medium-, and long-term progress and accounts for the potential contributions to U.S. leadership in these technology areas.

*Office of Science.* The Administration appreciates the Committee's support for the Office of Science, in particular the support for capable exascale computing. However, the level of funding provided, which is \$0.2 billion below the FY 2016 Budget request of \$5.3 billion, would reduce research and development programs throughout the agency and the Administration encourages the Congress to fully fund the FY 2016 Budget request.

*Strategic Petroleum Reserve (SPR).* The Administration opposes the \$200 million level provided for the SPR, which is \$57 million or 22 percent below the FY 2016 Budget request of \$257 million. At this funding level, the bill fails to fund activities supporting timely replacement of equipment and physical systems that are necessary to begin to address the backlog of deferred maintenance activities, and to enhance distribution flexibility and reliability. Absent this funding, the SPR's energy security mission might be at risk.

*Energy Information Administration (EIA).* The Administration urges the Congress to fully fund the FY 2016 Budget request of \$131 million for EIA to address critical energy data gaps, expand domestic energy data and analysis, and increase energy data integration with Canada and Mexico.

*Nuclear Waste.* The Administration appreciates the Committee's support for implementing a workable solution for the management and disposal of the Nation's nuclear waste.

*Federal Information Technology Acquisition Reform Act.* The Administration strongly objects to section 312 of the bill, which excludes information technology (IT) spending at DOE labs from the management improvements and accountability introduced by the Federal Information Technology Acquisition Reform Act. This exclusion would

constrain the ability of the Secretary and Chief Information Officer to ensure the Department's mission is effectively and efficiently executed by reducing duplicative IT systems, implementing a comprehensive cybersecurity solution, and addressing other IT management issues, which support the President's goal to deliver a Government that is more effective, efficient, and accountable.

*Digital Accountability and Transparency Act of 2014 (DATA Act).* The Administration urges the Congress to fully fund the FY 2016 Budget request for DOE and the Nuclear Regulatory Commission to implement the DATA Act. This funding would support efforts to provide more transparent Federal spending for data activities, updating IT systems, changing business processes, and employing a uniform procurement instrument identifier.

*U.S. Digital Service Team.* The Administration urges the Congress to fund the FY 2016 Budget request for DOE and the Nuclear Regulatory Commission to develop a U.S. Digital Service team. This funding would support efforts to manage digital services that have the greatest impact to citizens and businesses.

#### Corps of Engineers – Civil Works (Corps)

*Overall Funding.* The bill funds the Corps civil works program at a net level of \$5.4 billion. The Administration believes the more appropriate overall funding levels proposed in the FY 2016 Budget request would limit spending on projects that provide a low return to the Nation.

*Office of the Assistant Secretary.* The bill funds the Office of the Assistant Secretary at \$3 million, a roughly \$2 million, or 35 percent, decrease from the FY 2016 Budget request. This reduction would not support the staffing necessary to provide oversight of the civil works program.

*Corps Regulatory Program.* The Administration encourages the Congress to fund the Corps' regulatory program at the requested level. A \$5 million reduction in funding would inhibit the Corps' ability to issue permits in a timely manner, which could negatively affect business and development, and to protect important aquatic resources, while undertaking needed programmatic improvements, including implementation of the Clean Water rulemaking.

*Fill Material under the Clean Water Act.* The Administration believes it is essential to retain Federal Agency discretion to pursue rulemakings they deem necessary to protect America's clean water resources, which are critical to American families and businesses. The Administration strongly opposes section 104 of the bill, which could hamstring future regulatory work.

*Federal Flood Risk Management Standard.* The Administration objects to section 503 of the bill, which prohibits funds from being used to implement, administer, carry out, modify, revise, or enforce Executive Order 13690 entitled "Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input." If enacted, this provision would undermine Federal agencies' ability to protect Federal investments and could make our communities more vulnerable to flood risks.

#### Department of the Interior, Bureau of Reclamation, and Central Utah Project

*Overall Funding.* The bill provides \$1.1 billion for the Bureau of Reclamation and \$10 million for the Central Utah Project. The Administration appreciates the Committee's support of the Bureau and the Central Utah Project.

*Indian Water Rights Settlements.* The Administration objects to the \$23 million or 23 percent reduction to the FY 2016 Budget request for the Bureau of Reclamation for implementing enacted Indian Water Rights Settlements, including reductions in funding for the Crow settlement of over 80 percent, the Aamodt settlement by more than half, and the Navajo-Gallup settlement by over 10 percent. The funding requested for these settlements carefully considered funding levels necessary in FY 2016 and future years to meet the dates mandated in the settlement acts. This reduction would make it difficult to meet Congress' own statutorily-defined deadlines. Indian water settlement agreements can provide water supply certainty for tribal communities, boost economic growth, and end expensive and protracted litigation. The Administration urges the Congress to restore funding for this important program to the levels in the FY 2016 Budget request.

*San Joaquin River Restoration.* The Administration appreciates the Committee's support of this important program to restore and maintain fish populations and reduce or avoid water supply impacts. This restoration program is a multi-year effort that is integral to the implementation of Federal legislation that settled 18 years of litigation.

*California Storage Projects.* The Administration strongly supports efforts to help alleviate the effects of drought in the West; however, the Administration is concerned with section 207, which establishes deadlines for completing feasibility studies for certain water storage projects. The provision is unnecessary and the dates provided in the bill could prevent the participation of non-Federal partners in certain of the studies and may inhibit the Administration's

ability to consider a full range of options for addressing these issues.

*Dam Safety Authorization.* Section 205 of the bill amends the Reclamation Safety of Dams Act to allow new or supplementary non-safety-related project construction in conjunction with Safety of Dams work, provided that the additional costs are allocated to the authorized project purposes. Any such authorization should ensure that the beneficiaries of the non-safety-related project construction pay their full share of the costs as a condition of construction and that there be no repayment contract for that portion of the project.

#### Constitutional Concerns

Certain provisions in the bill, including sections 101 and 201, raise separation of powers concerns.

The Administration looks forward to working with the Congress as the FY 2016 appropriations process moves forward.

Thanks Melanie. Can't speak for Letty and she is in Africa but Fain and I had not seen this. Budget communication challenges still alive and well around here. Glad there is a veto threat.

**EXECUTIVE OFFICE OF THE PRESIDENT**  
**OFFICE OF MANAGEMENT AND BUDGET**  
WASHINGTON, D.C. 20503

October 8, 2015

(Senate)

**STATEMENT OF ADMINISTRATION POLICY**

**H.R. 2028 – Energy and Water Development and Related Agencies**

**Appropriations Act, 2016**

(Sen. Cochran, R-MS)

The Administration strongly opposes Senate passage of H.R. 2028, making appropriations for energy and water development, and related agencies for the fiscal year ending September 30, 2016, and for other purposes. Although the bill supports key national security items, the bill drastically underfunds critical investments that develop American energy sources to build a clean and secure energy future; develop and commercialize the emerging technologies that create high-quality jobs and enhance the Nation's economic competitiveness; and improve resilience against current and ongoing climate impacts that threaten our economy, public health, and natural resources. As a result, it would put at risk U.S. competitiveness in new markets for clean energy industries such as advanced vehicles, advanced

manufacturing, energy efficiency for homes and businesses, and domestic renewable energy such as wind, solar, and biomass. If the President were presented with H.R. 2028, his senior advisors would recommend that he veto the bill.

Enacting H.R. 2028 and adhering to the congressional Republican budget's overall spending limits for fiscal year (FY) 2016 would hurt our economy and shortchange investments in middle-class priorities. Sequestration was never intended to take effect: rather, it was supposed to threaten such drastic cuts to both defense and non-defense funding that policymakers would be motivated to come to the table and reduce the deficit through smart, balanced reforms. The Republican framework would bring base discretionary funding for both non-defense and defense for FY 2016 to the lowest real levels in a decade. Compared to the President's Budget, the cuts would result in tens of thousands of the Nation's most vulnerable children losing access to Head Start, millions fewer workers receiving job training and employment services, and drastic cuts to scientific research awards and grants, along with other impacts that would hurt the economy, the middle class, and Americans working hard to reach the middle class.

Sequestration funding levels would also put our national security at unnecessary risk, not only through pressures on defense spending, but also through pressures on State, USAID, Homeland Security, and other non-defense programs that help keep us safe. More broadly, the strength of our economy and the security of our Nation are linked. That is why the President has been clear that he is not willing to lock in sequestration going forward, nor will he accept fixes to defense without also fixing non-defense.

The President's senior advisors would recommend that he veto H.R. 2028 and any other legislation that implements the current Republican budget framework, which blocks the investments needed for our economy to compete in the future. The Administration looks forward to working with the Congress to reverse sequestration for defense and non-defense priorities and offset the cost with commonsense spending and tax expenditure cuts, as Members of Congress from both parties have urged.

The Administration would like to take this opportunity to share additional views regarding the Committee's version of the bill.

#### Department of Energy (DOE)

*Office of Energy Efficiency and Renewable Energy.* The Administration strongly objects to the \$1.9 billion provided in the bill for the Office of Energy Efficiency and Renewable Energy. Overall, this level is \$790 million below the FY 2016 Budget request. Relative to the FY 2016 Budget request, the bill reduces funding for renewable energy by 34 percent, sustainable transportation by 23 percent, and energy efficiency by 35 percent. These reductions would significantly underfund critical activities that support the development and commercialization of clean energy technologies including wind energy and advanced manufacturing capabilities. At this funding level, the number of research, development, and demonstration projects supported in cooperation with industry, universities, and the national labs would be reduced, limiting innovation and technological advancement, curtailing solutions to reduce U.S. dependence on oil and reduce energy waste, and undermining the Nation's industrial competitiveness in the future global clean energy economy. The Congress is urged to fully fund the FY 2016 Budget request of \$2.7 billion.

*Advanced Research Projects Agency-Energy (ARPA-E).* The Administration objects to the \$291 million provided in the bill for ARPA-E, which is \$34 million or 10 percent below the FY 2016 Budget request. This funding reduction would impact investments in transformational technologies that reduce energy-related emissions, increase energy efficiency across multiple economic sectors, and reduce energy imports.

*Electricity Delivery and Energy Reliability.* The Administration objects to the \$151 million provided in the bill for Electricity Delivery and Energy Reliability, which is \$119 million or 44 percent below the FY 2016 Budget request. At the funding levels provided in the bill, critical activities supporting a secure, reliable, and modernized electricity grid as well as energy assurance, would go unfunded. Investments in a modernized grid are necessary to move the Nation to a cleaner more secure energy future.

*Fossil Energy and Nuclear Energy.* The Administration notes that the bill includes funding above the FY 2016 Budget request in some areas that are already well established in the market, including for nuclear (\$948 million, \$41 million or 4.5 percent above the FY 2016 Budget request) and for Fossil Energy Research and Development (\$598 million, \$38 million or 6.8 percent above the FY 2016 Budget request), yet makes drastic reductions in those areas that are most crucial to the Nation's clean energy future and continued U.S. technology leadership. The Administration encourages the Congress to fund DOE's energy programs at the requested level, as this balances the portfolio among items of short-, medium-, and long-term progress and accounts for the potential contributions to U.S. leadership in these technology areas.

*Office of Science.* The Administration appreciates the Committee's support for the Office of Science, in particular the support for capable exascale computing. However, the level of funding provided, which is \$0.2 billion below the FY

2016 Budget request of \$5.3 billion, would reduce research and development programs throughout the agency and the Administration encourages the Congress to fully fund the FY 2016 Budget request.

*Strategic Petroleum Reserve (SPR).* The Administration opposes the \$200 million level provided for the SPR, which is \$57 million or 22 percent below the FY 2016 Budget request of \$257 million. At this funding level, the bill fails to fund activities supporting timely replacement of equipment and physical systems that are necessary to begin to address the backlog of deferred maintenance activities, and to enhance distribution flexibility and reliability. Absent this funding, the SPR's energy security mission might be at risk.

*Energy Information Administration (EIA).* The Administration urges the Congress to fully fund the FY 2016 Budget request of \$131 million for EIA to address critical energy data gaps, expand domestic energy data and analysis, and increase energy data integration with Canada and Mexico.

*Nuclear Waste.* The Administration appreciates the Committee's support for implementing a workable solution for the management and disposal of the Nation's nuclear waste.

*Federal Information Technology Acquisition Reform Act.* The Administration strongly objects to section 312 of the bill, which excludes information technology (IT) spending at DOE labs from the management improvements and accountability introduced by the Federal Information Technology Acquisition Reform Act. This exclusion would constrain the ability of the Secretary and Chief Information Officer to ensure the Department's mission is effectively and efficiently executed by reducing duplicative IT systems, implementing a comprehensive cybersecurity solution, and addressing other IT management issues, which support the President's goal to deliver a Government that is more effective, efficient, and accountable.

*Digital Accountability and Transparency Act of 2014 (DATA Act).* The Administration urges the Congress to fully fund the FY 2016 Budget request for DOE and the Nuclear Regulatory Commission to implement the DATA Act. This funding would support efforts to provide more transparent Federal spending for data activities, updating IT systems, changing business processes, and employing a uniform procurement instrument identifier.

*U.S. Digital Service Team.* The Administration urges the Congress to fund the FY 2016 Budget request for DOE and the Nuclear Regulatory Commission to develop a U.S. Digital Service team. This funding would support efforts to manage digital services that have the greatest impact to citizens and businesses.

#### Corps of Engineers – Civil Works (Corps)

*Overall Funding.* The bill funds the Corps civil works program at a net level of \$5.4 billion. The Administration believes the more appropriate overall funding levels proposed in the FY 2016 Budget request would limit spending on projects that provide a low return to the Nation.

*Office of the Assistant Secretary.* The bill funds the Office of the Assistant Secretary at \$3 million, a roughly \$2 million, or 35 percent, decrease from the FY 2016 Budget request. This reduction would not support the staffing necessary to provide oversight of the civil works program.

*Corps Regulatory Program.* The Administration encourages the Congress to fund the Corps' regulatory program at the requested level. A \$5 million reduction in funding would inhibit the Corps' ability to issue permits in a timely manner, which could negatively affect business and development, and to protect important aquatic resources, while undertaking needed programmatic improvements, including implementation of the Clean Water rulemaking.

*Fill Material under the Clean Water Act.* The Administration believes it is essential to retain Federal Agency discretion to pursue rulemakings they deem necessary to protect America's clean water resources, which are critical to American families and businesses. The Administration strongly opposes section 104 of the bill, which could hamstring future regulatory work.

*Federal Flood Risk Management Standard.* The Administration objects to section 503 of the bill, which prohibits funds from being used to implement, administer, carry out, modify, revise, or enforce Executive Order 13690 entitled "Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input." If enacted, this provision would undermine Federal agencies' ability to protect Federal investments and could make our communities more vulnerable to flood risks.

#### Department of the Interior, Bureau of Reclamation, and Central Utah Project

*Overall Funding.* The bill provides \$1.1 billion for the Bureau of Reclamation and \$10 million for the Central Utah Project. The Administration appreciates the Committee's support of the Bureau and the Central Utah Project.

*Indian Water Rights Settlements.* The Administration objects to the \$23 million or 23 percent reduction to the FY 2016 Budget request for the Bureau of Reclamation for implementing enacted Indian Water Rights Settlements, including reductions in funding for the Crow settlement of over 80 percent, the Aamodt settlement by more than half, and the Navajo-Gallup settlement by over 10 percent. The funding requested for these settlements carefully considered funding levels necessary in FY 2016 and future years to meet the dates mandated in the settlement acts. This reduction would make it difficult to meet Congress' own statutorily-defined deadlines. Indian water settlement agreements can provide water supply certainty for tribal communities, boost economic growth, and end expensive and protracted litigation. The Administration urges the Congress to restore funding for this important program to the levels in the FY 2016 Budget request.

*San Joaquin River Restoration.* The Administration appreciates the Committee's support of this important program to restore and maintain fish populations and reduce or avoid water supply impacts. This restoration program is a multi-year effort that is integral to the implementation of Federal legislation that settled 18 years of litigation.

October 16, 2015

The Honorable Neil Kornze  
Director  
U.S. Bureau of Land Management  
1849 C Street NW, Room 5665  
Washington, DC 20240

Dear Director Kornze:

The hydraulic fracturing rule finalized by the Bureau of Land Management in March 2015 will impinge on thousands of wells, impose significant costs, and expand federal oversight of hydraulic fracturing operations in the West.<sup>1</sup> As a result, several states, including Utah and Wyoming, Indian tribes and other affected parties, have litigated to prevent the rule from being implemented.<sup>2</sup> On September 30, 2015, a federal judge in Wyoming granted an injunction that blocked the rule on the grounds that BLM exceeded its authority to regulate hydraulic fracturing.<sup>3</sup>

Given the controversy surrounding this rule, and the impact that it will have on the West, the Committee is reviewing the process by which the rule was made. To assist the Committee, please provide the following documents and information:

1. All documents and communications that comprise the full administrative record relating to the hydraulic fracturing rule issued by BLM on or about March 20, 2015.
2. All documents and communications, including, but not limited to, maps, charts, diagrams, photos, logs, illustrations, memoranda, guidelines, orders, instructions, regulations, journals, notes, periodicals, studies, proposals, meeting minutes/agendas, agreements, reports, contracts, matrices, comments, correspondence, lists, and presentations, referring or relating to the hydraulic fracturing rule.

---

October 16, 2015

Page 2

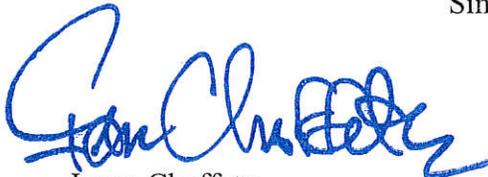

It is our understanding that much of this information has already been gathered as part of the litigation process and we expect that BLM will produce those records promptly. Records that BLM has withheld from plaintiffs as privileged should also be produced pursuant to this request.

Please provide the requested information as soon as possible, but no later than 5:00 p.m. on October 30, 2015. An attachment to this letter provides additional information about responding to the Committee's request. When producing documents to the Committee, please deliver production sets to the OGR Majority staff in room 2157 of the Rayburn House Office Building and the OGR Minority staff in room 2471 of the Rayburn House Office Building. The Committee prefers, if possible, to receive all documents in electronic format.

The Committee on Oversight and Government Reform is the principal oversight committee of the House of Representatives and has broad authority to investigate "any matter" at "any time" under House Rule X.

Please contact Bill McGrath of the Committee staff at (202) 225-5074 with any questions about this request. Thank you for your prompt attention to this matter.

Sincerely,

Jason Chaffetz  
Chairman

Cynthia Lummis  
Chairman  
Subcommittee on the Interior

cc: The Honorable Elijah E. Cummings, Ranking Member

The Honorable Brenda L. Lawrence, Ranking Member  
Subcommittee on the Interior

Enclosure

## Responding to Committee Document Requests

1. In complying with this request, you are required to produce all responsive documents that are in your possession, custody, or control, whether held by you or your past or present agents, employees, and representatives acting on your behalf. You should also produce documents that you have a legal right to obtain, that you have a right to copy or to which you have access, as well as documents that you have placed in the temporary possession, custody, or control of any third party. Requested records, documents, data or information should not be destroyed, modified, removed, transferred or otherwise made inaccessible to the Committee.
2. In the event that any entity, organization or individual denoted in this request has been, or is also known by any other name than that herein denoted, the request shall be read also to include that alternative identification.
3. The Committee's preference is to receive documents in electronic form (i.e., CD, memory stick, or thumb drive) in lieu of paper productions.
4. Documents produced in electronic format should also be organized, identified, and indexed electronically.
5. Electronic document productions should be prepared according to the following standards:
  - (a) The production should consist of single page Tagged Image File ("TIF"), files accompanied by a Concordance-format load file, an Opticon reference file, and a file defining the fields and character lengths of the load file.
  - (b) Document numbers in the load file should match document Bates numbers and TIF file names.
  - (c) If the production is completed through a series of multiple partial productions, field names and file order in all load files should match.
  - (d) All electronic documents produced to the Committee should include the following fields of metadata specific to each document:  
  
BEGDOC, ENDDOC, TEXT, BEGATTACH, ENDATTACH,  
PAGECOUNT, CUSTODIAN, RECORDTYPE, DATE, TIME, SENTDATE,  
SENTTIME, BEGINDATE, BEGINTIME, ENDDATE, ENDTIME, AUTHOR, FROM,  
CC, TO, BCC, SUBJECT, TITLE, FILENAME, FILEEXT, FILESIZE,  
DATECREATED, TIMECREATED, DATELASTMOD, TIMELASTMOD,  
INTMSGID, INTMSGHEADER, NATIVELINK, INTFILPATH, EXCEPTION,  
BEGATTACH.
6. Documents produced to the Committee should include an index describing the contents of the production. To the extent more than one CD, hard drive, memory stick, thumb drive, box or folder is produced, each CD, hard drive, memory stick, thumb drive, box or folder should contain an index describing its contents.

7. Documents produced in response to this request shall be produced together with copies of file labels, dividers or identifying markers with which they were associated when the request was served.
8. When you produce documents, you should identify the paragraph in the Committee's schedule to which the documents respond.
9. It shall not be a basis for refusal to produce documents that any other person or entity also possesses non-identical or identical copies of the same documents.
10. If any of the requested information is only reasonably available in machine-readable form (such as on a computer server, hard drive, or computer backup tape), you should consult with the Committee staff to determine the appropriate format in which to produce the information.
11. If compliance with the request cannot be made in full by the specified return date, compliance shall be made to the extent possible by that date. An explanation of why full compliance is not possible shall be provided along with any partial production.
12. In the event that a document is withheld on the basis of privilege, provide a privilege log containing the following information concerning any such document: (a) the privilege asserted; (b) the type of document; (c) the general subject matter; (d) the date, author and addressee; and (e) the relationship of the author and addressee to each other.
13. If any document responsive to this request was, but no longer is, in your possession, custody, or control, identify the document (stating its date, author, subject and recipients) and explain the circumstances under which the document ceased to be in your possession, custody, or control.
14. If a date or other descriptive detail set forth in this request referring to a document is inaccurate, but the actual date or other descriptive detail is known to you or is otherwise apparent from the context of the request, you are required to produce all documents which would be responsive as if the date or other descriptive detail were correct.
15. Unless otherwise specified, the time period covered by this request is from January 1, 2009 to the present.
16. This request is continuing in nature and applies to any newly-discovered information. Any record, document, compilation of data or information, not produced because it has not been located or discovered by the return date, shall be produced immediately upon subsequent location or discovery.
17. All documents shall be Bates-stamped sequentially and produced sequentially.
18. Two sets of documents shall be delivered, one set to the Majority Staff and one set to the Minority Staff. When documents are produced to the Committee, production sets shall be delivered to the Majority Staff in Room 2157 of the Rayburn House Office Building and the Minority Staff in Room 2471 of the Rayburn House Office Building.

19. Upon completion of the document production, you should submit a written certification, signed by you or your counsel, stating that: (1) a diligent search has been completed of all documents in your possession, custody, or control which reasonably could contain responsive documents; and (2) all documents located during the search that are responsive have been produced to the Committee.

### **Definitions**

1. The term “document” means any written, recorded, or graphic matter of any nature whatsoever, regardless of how recorded, and whether original or copy, including, but not limited to, the following: memoranda, reports, expense reports, books, manuals, instructions, financial reports, working papers, records, notes, letters, notices, confirmations, telegrams, receipts, appraisals, pamphlets, magazines, newspapers, prospectuses, inter-office and intra-office communications, electronic mail (e-mail), contracts, cables, notations of any type of conversation, telephone call, meeting or other communication, bulletins, printed matter, computer printouts, teletypes, invoices, transcripts, diaries, analyses, returns, summaries, minutes, bills, accounts, estimates, projections, comparisons, messages, correspondence, press releases, circulars, financial statements, reviews, opinions, offers, studies and investigations, questionnaires and surveys, and work sheets (and all drafts, preliminary versions, alterations, modifications, revisions, changes, and amendments of any of the foregoing, as well as any attachments or appendices thereto), and graphic or oral records or representations of any kind (including without limitation, photographs, charts, graphs, microfiche, microfilm, videotape, recordings and motion pictures), and electronic, mechanical, and electric records or representations of any kind (including, without limitation, tapes, cassettes, disks, and recordings) and other written, printed, typed, or other graphic or recorded matter of any kind or nature, however produced or reproduced, and whether preserved in writing, film, tape, disk, videotape or otherwise. A document bearing any notation not a part of the original text is to be considered a separate document. A draft or non-identical copy is a separate document within the meaning of this term.
2. The term “communication” means each manner or means of disclosure or exchange of information, regardless of means utilized, whether oral, electronic, by document or otherwise, and whether in a meeting, by telephone, facsimile, email (desktop or mobile device), text message, instant message, MMS or SMS message, regular mail, telexes, releases, or otherwise.
3. The terms “and” and “or” shall be construed broadly and either conjunctively or disjunctively to bring within the scope of this request any information which might otherwise be construed to be outside its scope. The singular includes plural number, and vice versa. The masculine includes the feminine and neuter genders.
4. The terms “person” or “persons” mean natural persons, firms, partnerships, associations, corporations, subsidiaries, divisions, departments, joint ventures, proprietorships, syndicates, or other legal, business or government entities, and all subsidiaries, affiliates, divisions, departments, branches, or other units thereof.

5. The term “identify,” when used in a question about individuals, means to provide the following information: (a) the individual's complete name and title; and (b) the individual's business address and phone number.
6. The term “referring or relating,” with respect to any given subject, means anything that constitutes, contains, embodies, reflects, identifies, states, refers to, deals with or is pertinent to that subject in any manner whatsoever.
7. The term “employee” means agent, borrowed employee, casual employee, consultant, contractor, de facto employee, independent contractor, joint adventurer, loaned employee, part-time employee, permanent employee, provisional employee, subcontractor, or any other type of service provider.

---

Good afternoon, Sarah and Stephenne. Attached are Questions for the Record which have been submitted to Ms. Sarri by various Members of the Energy Committee from Tuesday's nominations hearing. We respectfully request that you provide Ms. Sarri's responses to these questions as soon as possible but no later than **Tuesday, November 3, 2015** for inclusion in the official hearing record.

Please provide the responses directly to me, and feel free to contact me if you have any questions. Thank you for your assistance with this request.

Sincerely,

Darla Ripchensky, PMP  
Chief Clerk  
U.S. Senate Committee on Energy and Natural Resources  
304 Dirksen Senate Office Building  
Washington, DC 20510  
202.224.3607

**U.S. Senate Committee on Energy and Natural Resources**  
**October 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

**Questions from Chairman Lisa Murkowski**

**Question 1** On Friday, October 16, Interior denied lease extensions for Shell and Statoil, while canceling offshore lease sales that were planned for the Arctic in 2016 and 2017.

- a. Please provide a log of all documents, including any economic or national security analyses that Interior carried out prior to these decisions and any communications Interior had with environmental groups about them.
- b. The press release from Interior cited "low industry interest" in the region. Please provide specific evidence of "low interest" based on actual comments from industry.
- c. Without a final and stable regulatory regime, interested companies have been unable to initiate any exploration program in the Arctic. In contrast to Shell, these companies have not announced a suspension of their interest. Why is Interior not working with them to ensure a fair pathway—especially lease extensions—that will facilitate commercial exploration?
- d. The only federal production on Alaska's North Slope has been from Northstar, in the federal area of the Beaufort. The State has annual lease sales for waters within three miles of shore, and two of the three recent fields that have been developed in Alaska are in that offshore area. Did Interior consider this when canceling the 2017 sale planned for the Beaufort? And, if not, why?
- e. Why didn't Interior consider the language in S. 2011, which would establish an annual near-shore Beaufort area lease sale, and consider working with the State of Alaska to leverage state and federal resources to develop these shallow-water areas?
- f. Interior's press release also cited "current market conditions" as a reason for the denials and cancellations. What is the approximate timeline for the development of an Arctic lease, from the day the lease is won at auction until the first day of commercial production from it? Does Interior believe that "current market conditions" will prevail for the duration of the timeline for the development of Arctic leases? Please provide copies of any analyses that Interior conducted to corroborate this statement.

**Question 2** Given that the State of Alaska has overseen more than 17 billion barrels of production on the North Slope, and that BLM has limited resources, why has Interior not partnered with Alaska to ensure a consistent commercial environment?

**Question 3** Why has Interior demanded a dedicated separator unit at GMT-1, as opposed to a multi-phase meter?

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

**Question 4** This summer, Interior undertook field work to advance the completion of land conveyances owed to the State of Alaska under its original Statehood entitlement from 1959 and to Alaska Natives as a result of the Alaska Native Claims Settlement Act of 1971 and the Alaska Native Allotment program. But, to my knowledge, the Department still has 1.9 million acres to convey by interim conveyance and more than 40 million acres left to convey by patent.

There is disagreement between BLM and the State over the documentation that should be provided by the federal government to complete patenting of lands. The Department wants to amend a 1973 agreement with the State to reduce the number of physical property boundaries required in the patenting process—a reduction to which the State objects—given concerns about the underlying accuracy of GPS ground data calibration stations in Alaska.

- a. What do you anticipate to be the outcome of this dispute?
- b. How will BLM proceed in the future if the State does not agree to a GPS-based patenting process?
- c. How long is the Department predicting it will take to complete all currently pending conveyances by patent to the State and to Alaska Natives?

**Question 5** BLM is currently in the process of updating a number of regional land plans in Alaska. The plans all appear to propose a significant expansion in the number and acreage of Areas of Critical Environmental Concern (ACECs) compared to the existing area land plans.

- a. What is prompting the significant increase in proposed ACECs?
- b. What assurances can you give Alaskans that they will continue to be able to utilize BLM lands for economic activities and development? Please provide specific examples to support your answer.

**Question 6** The federal government owns roughly 640 million acres, or about 28 percent of the land in the United States. Three Interior agencies manage large amounts of this total: BLM, with 247 million acres; FWS, with 89 million acres, and NPS, with 80 million acres. Federal land ownership is concentrated in the West, and more than 60 percent of Alaska is federal land. A number of states, especially in the West, are seeking more state and local control over land and resources and are requesting transfers of land to the states.

- a. What is the Interior Department's position on the transfer of federal lands to states?
- b. Does the Interior Department believe there should be a limit on the maximum amount of federal land within a state? Please provide a percentage limit, if Interior believes such a limit should exist.

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

- c. Are there other ways in which Interior could provide states with more control over federal land within their borders?

**Question 9** I understand Interior is almost finished developing a database of all lands in Alaska conveyed to Alaska Native Corporations as a part of ANILCA that contained known contamination caused by the federal government prior to conveyance.

- a. How does Interior plan to speed up and coordinate the clean-up of contamination caused by federal agencies on these lands?
- b. Would BLM be willing to serve as the coordinating agency to speed up the clean-up of environmental contamination on lands conveyed to Native corporations in Alaska?

**Question 10** Through September of this year, 50,000 wildland fires have burned 9.1 million acres. More acres have burned in the first nine months of 2015 than in all of 2013 and 2014 combined. More than half of that acreage burned on lands managed by Interior agencies (5.1 million acres). Federal spending on wildland fire management has more than doubled over the past two decades (in terms of 2014 dollars), and the cost to suppress wildfires continues to escalate. Several GAO reports have identified potential issues with Interior's wildland fire responsiveness and stewardship of appropriated funds.

- a. What measures has Interior implemented, or will Interior implement in the future, to ensure that Interior is responsibly managing its lands to reduce the risk of catastrophic wildfires?

**Question 11** Currently, there is a considerable difference of opinion among the American public about the role of Interior in managing lands and resources. Differences center on whether land should be used to produce local or national benefits; the extent, type, and location of development versus protection; and the role of states and the public in deciding how federal lands and resources should be managed.

- a. How will you resolve differing views of the role of Interior in managing natural resources? And what facts in your background can you identify that show that you are unbiased?
- b. Should Interior's management of lands and resources prioritize national or local benefits?
- c. Under your leadership, what balance would Interior seek to strike in managing lands for protection and development?

**Question 12** Interior, along with other federal departments, will likely have flat or declining budgets for the foreseeable future. This heightens the need for Interior to manage fiscal resources

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

efficiently and become more effective in delivering services. It also raises a number of broad fiscal and management issues.

- a. What is the process within and the role of PMB regarding the development of the budget?
- b. Does PMB review bureau budgets before they are proposed to the Secretary, and what role do you personally play in reviewing agency budgets?
- c. Do you meet with bureau directors and assistant secretaries?
- d. What do you see as your role in ensuring presidential priorities are reflected in bureau budgets?
- e. How do you advise the Secretary on budget decisions?
- f. What actions can Interior take to restructure agencies and programs, particularly to minimize duplication and fragmentation? What role do you play in such an effort? Have you begun any such effort at this point? Do you plan to?
- g. How do you believe the Department and its bureaus should prioritize its many functions and activities to focus on the most critical services and aspects of its mission? Do you believe your office will play a lead role in the effort? What do you believe are the most critical services and aspects of the Department's mission?

**Question 11** Interior is currently considering a number of applications for geological and geophysical (G&G) permits to perform seismic surveys in the Atlantic Ocean. Interior issued a record of decision broadly approving G&G activities in the Atlantic in summer 2014, but many of the individual permit applications are still undergoing review.

- a. What priority would you place on expediting the review of the seismic permits?

**Question 1** The Energy Policy Act of 2005 (EPA) included a provision to initiate and fund a pilot program at seven BLM field offices in an effort to streamline the permitting process for oil and gas leases on federal lands. Initial results from the pilot project were published by Interior according to the timetable required by EPA (within three years after enactment). The conclusion was that the pilot program improved the processing times for applications for permits to drill at the pilot offices overall and increased the number of environmental inspections.

- a. What is your assessment of the pilot program today to streamline oil and gas permits?
- b. Has Interior considered a similar program to expedite permitting for offshore leases?

**U.S. Senate Committee on Energy and Natural Resources**  
**October 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

**Question 13** Interior has taken many steps since 2010 to effectively enhance offshore operations. This includes drilling safety regulations, safety and environmental management systems regulations, and various notices to lessees with additional requirements.

- a. Do the new regulations that have already been finalized over the past six years include new and heightened standards for well control and blowout preventer equipment?
- b. Have regulations addressing questions that arose out of the Macondo incident been finalized? If so, for how long?
- c. Did Interior undertake an assessment of the regulatory requirements already set in place to identify any gaps that may exist, focus on those areas for regulatory updates, and use those as the basis for the items included in the BSEE-proposed Well Control Rule?
- d. When Interior is promulgating new rules and regulations, should it utilize the experience and on the ground expertise of the regional staff, whether BSEE or BLM personnel?
- e. How extensive was Interior's Headquarters outreach to the Gulf of Mexico BSEE regional staff in the development and now the updating of the proposed Well Control rule? Are Headquarters staff the best experts to develop such a technical rule for offshore operations?
- f. There is great concern that the proposed Well Control Rule may actually increase risk and decrease safety, and that a number of operational technical issues must be fixed for the proposed rule to enhance safety rather than decrease it.
  - i. How many meetings has BSEE held with technical experts from companies operating offshore? Have the meetings been time-constrained?
  - ii. Would you agree that a number of key safety concerns have yet to be fully discussed and vetted?
  - iii. Do you believe that Interior should undertake additional technical engagement so that the complex issues and concerns associated with the rule are addressed?
  - iv. Will you commit to ensuring that safety concerns are addressed and offshore personnel and the environment are protected before the Well Control rule goes final?

**Question 14** Over the last several years Interior has proposed or finalized a number of offshore and onshore rules and regulations, including the BLM hydraulic fracturing rule; updates to BLM

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

Onshore Order 3, 4, and 5; controversial BLM Land Use Plan Amendments that limit areas where oil and natural gas development can take place; changes to ONRR's civil penalty regulations; additional regulations for Arctic OCS operations; the Well Control Rule; potential changes to onshore royalties and bonus bids; and more. Interior is also expected to propose increased regulation of onshore venting and flaring soon, and there are also a number of additional items included in the Unified Agenda that have not been proposed.

All of this regulatory activity is taking place at a time when private investment on federal land for oil and natural gas production continues to fall. Each of these items on their own may have a chilling effect on future investment and interest in federal production of oil and gas. Taken together, the cumulative impacts could alter not only production on federal lands, but also government revenues that result from such production.

- a. Is anyone (whether an office or individual) at Interior responsible for analyzing and considering the cumulative effect of each regulation on an individual basis, as well as in conjunction with the entire suite of regulations issued by Interior? And, if so, please identify the Office or individual responsible.
- b. Is anyone (whether an office or individual) at Interior responsible for analyzing and considering the effects that rules from other agencies—for example, EPA—will have, on an individual and cumulative basis, on energy production on federal lands and revenues resulting from it? And, if so, please identify the Office or individual responsible.
- c. Are the responsibilities listed in questions (a) and (b) above suitable for the Assistant Secretary for Policy, Management and Budget? And, if not, why not?
- d. If confirmed, what will you do to ensure that Interior adheres to its multiple use mandate, and continues to place great value on the oil and gas production on federal lands and the important revenues that come to the Treasury as a result of it?
- e. If confirmed, will you undertake an assessment of the cumulative impacts that Interior's decisions and regulations are having on energy production on federal land, including in Alaska, and the revenues that flow to the Treasury as a result?

**Question 15** Because ESA is such a powerful statute, a handful of special interest groups and even elements within the listing services have begun using it not for conservation, but as a means to impose controls on management of federal and even private lands. It appears the purpose of the ESA is being shifted away from pursuing the recovery of species to listing as many species as possible. The effect is that more and more of the USFWS's resources are being diverted away from programs and actions that would assist in recovery of species, and instead to the task of deciding whether to list them under the ESA.

- a. Do you agree with these assertions? And, if not, why?

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

- b. How effective is the significant regulatory framework that has grown from it?
- c. How do you believe that expertise within the USFWS, coupled with expertise in the state, academic, and private sectors, can be harnessed together to pursue recovery of species, as opposed to endless battles over listings?
- d. To what extent do funding programs that incentivize partnerships to meet the requirements of the ESA, guide your thinking when reviewing the USFWS budget? Should this be a priority?

**Question 16** The Obama Administration routinely calls for higher taxes on domestic oil and gas producers in its annual budget requests and other proposals.

- a. Has the Office of Policy, Management, and Budget conducted any analysis of the impact that these tax increases would have on domestic oil and gas production levels, particularly in the current low-price environment? And, if not, why not?
- b. What level of decreased domestic oil and gas production would the Administration be willing to accept as a result of higher taxes on oil and gas producers?

**Question 1** Oil and gas production in Alaska's federal areas would produce significant revenues for the Treasury through bonus bids, rents, royalties, corporate and individual income taxes, and more.

- a. Has the Office of Policy, Management, and Budget conducted any analysis of the revenues that the federal government could accrue if the resources in the National Petroleum Reserve-Alaska, the non-wilderness portion of ANWR, and the Beaufort and Chukchi Seas are fully explored and produced? And, if not, why?
- b. Has the Office of Policy, Management, and Budget conducted any analysis of the revenues that will be lost to the federal government as a result of Interior's decisions to block and delay development in the areas listed in (a)? And if not, why?

**Question 1** Although not located on Interior-managed lands, the Gold King Mine incident in Colorado involving a surge of acid mine drainage illustrates the potential hazards at abandoned hardrock mining sites. Interior is conducting a technical review of this incident at the request of EPA.

- a. What is the status of Interior's technical review of the Gold King Mine incident?
- b. What is Interior doing to ensure the independence of this review?

**U.S. Senate Committee on Energy and Natural Resources**  
**October 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

**Question 1** The Bureau of Reclamation manages hundreds of dams, reservoirs and related water supply and delivery facilities which are in need of costly maintenance and upgrades.

- a. How might you address Reclamation's aging infrastructure challenges?
- b. Should there be a Department-level approach to address not only Reclamation's aging infrastructure challenges, but also the maintenance backlog and capital needs of other DOI bureaus (e.g., NPS, FWS, etc.)? And, if not, why not?
- c. Do you favor the use of public-private partnerships to help fund improvements for aging infrastructure? And, if not, why not?
- d. Should the federal government divest itself of some of Reclamation's assets? If so, has the Bureau or the Department determined the assets that are candidates for divestment?

**Question 2** USGS is considered the scientific arm of Interior, yet several Interior agencies contain scientific expertise and scientific programs. This could lead to questions about the roles of the respective agencies, their coordination and cooperation, and their partnerships with nonfederal entities.

- a. How would you ensure that scientific activities within Interior are complementary and not duplicative among agencies?
- b. How would you expand or enhance cooperative scientific partnerships with other federal agencies? Would you enhance public-private partnerships related to science with nonfederal agencies, and if so, how?

**Question 3** The Administration is seeking \$900 million per year for the Land and Water Conservation Fund, in perpetuity, yet many Americans wonder why the Federal Government is buying more land when it cannot afford to properly maintain and safeguard what it currently owns.

- a. What is the current maintenance backlog for the agencies within the Department of the Interior? Please provide a total estimated number and a breakdown of the backlog between individual agencies.
- b. Do you agree that the Department or any of its constituent elements should address the maintenance backlog before we acquire additional federal lands? If not, can you please explain why, with such an enormous maintenance backlog, Interior would focus such a large amount of money on acquiring more federal land?
- c. More generally, how do you reconcile additional federal land acquisition, adding to the federal burden at this time of staggering national debt and maintenance backlogs?

**U.S. Senate Committee on Energy and Natural Resources**  
**October 30, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

**Question 2** The National Park Service has closed a number of preserves in Alaska to certain methods of bear and wolf hunting or shortened the hunting seasons as defined by the Alaska Board of Game. When instituting the closures, the NPS has cited "Park Values" in those closures.

- a. Do you believe that Alaskans should be able to conduct their traditional and customary hunting techniques in Alaska?
- b. Please provide a definition of "Park Values."
- c. Do you believe that the State of Alaska has the right to manage wildlife within the borders of the State? Under what circumstances and subject to what limits is it proper for the federal government to reverse State Board of Game decisions?

**Question 3** The Department of the Interior controls more than 60 percent of the land in Alaska, which amounts to well over 200 million acres. If confirmed, Alaska-related issues would likely make up a large percentage of your policy portfolio, so I want to ensure that you have appropriate knowledge and expertise before you are confirmed.

- a. Have you ever been to Alaska? If so, please elaborate on your experience in the State.
- b. What do you understand to be Alaskans' main concerns with the Department of the Interior?
- c. Are you aware of the percentage of Alaskans who support offshore drilling in the Arctic, as well as drilling in the non-wilderness portion of ANWR? Do you dispute the figures I offered in my opening statement at the hearing?
- d. Please explain, in detail, your knowledge of and experience in working with ANILCA and ANCSA. If you do not have knowledge of those laws, how do you plan to fill in the gaps of your experience?

**Question 4** I mentioned in my opening statement that I am not about to forget the isolated community of King Cove, Alaska or how the Department of the Interior has left its nearly 1,000 residents without reliable access to emergency medical transportation.

- a. Whether from within the Department or from another agency in the Administration, were you involved in Secretary Jewell's decision to reject the land exchange that would have facilitated a life-saving road for King Cove? If so, please describe your involvement.
- b. Have you been involved in any effort of the Department related to King Cove since you have been with the Department? If so, please describe your involvement.

**U.S. Senate Committee on Energy and Natural Resources**  
**October 30, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

- c. How many medevacs have been carried out from King Cove since Secretary Jewell rejected a life-saving road for the community on December 23, 2013?
- d. How many of those medevacs have been carried out by the Coast Guard?
- e. What is the average cost of a Coast Guard medevac from King Cove?
- f. Do you believe that the Department of the Interior has adequately fulfilled its Trust Responsibility to the Aleut Native people of King Cove?
- g. Who, specifically, at the Department is working to identify and evaluate options that would improve access to affordable transportation and health care for the residents of King Cove, as Secretary Jewell pledged would happen?

**Question 5** The King Cove road decision by Secretary Jewell has highlighted a very real reason why I am deeply concerned about any new proposals to designate wilderness in Alaska, or anywhere, for that matter.

- a. Do you believe there is ever a time when it is appropriate to adjust a boundary of a wilderness area?
- b. Do you believe it would be appropriate for the President to designate more land in Alaska as wilderness? If so, please identify such lands and state the legal basis under which those lands could be designated as wilderness.

**Questions from Senator John Barrasso**

**Question 1** Earlier this year, the Department of the Interior (DOI) announced a series of listening sessions on the federal coal program. According to DOI, the purpose of these listening sessions was to seek information from the public about how the BLM can best carry out its responsibility to ensure that American taxpayers receive a fair return on the coal resources managed by the federal government on their behalf.

Please explain in detail why you believe now is an appropriate time for DOI to consider raising royalty rates and other costs on the production of federal coal.

**Question 2** Would exports of federal coal from ports in the states of Oregon and Washington raise additional revenue for the federal government? Please answer yes or no. If no, please explain your answer.

**Question 3** What specific steps, if any, have you taken to assist other federal agencies, such as the Army Corps of Engineers, in addressing permit applications for coal export terminals in the states of Oregon and Washington?

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

**Question from Senator Debbie Stabenow**

**Question** The Great Lakes ecosystem has been severely damaged by more than 180 invasive and non-native species. A study found the total economic impact of invasive species in the Great Lakes region to be as high as \$5.7 billion per year. Great Lakes sport and commercial fishing are the most impacted industries, with losses estimated at \$4.5 billion annually.

One of my top priorities is to make sure measures are taken to prevent Asian Carp from becoming another invasive to wreak havoc on the Great Lakes. The Fish and Wildlife Service and the US Geological Service are important partners in this effort, and I applaud both for their valuable contributions. However, this work can only continue with sufficient resources.

Can you assure me that the Interior Department will request the necessary funding and provide sufficient direction in FY2017 to enable the Fish and Wildlife Service and the U.S. Geological Service to continue providing vital assistance to efforts to combat Asian Carp in the Great Lakes basin?

**Question from Senator Jeff Flake**

**Question** On October 13, 2015, the Office of Inspector General (OIG) released a report titled, "Reimbursable Activities Funded Through the National Park Service's Construction Account." Among its findings, the OIG concluded that the National Park Service (NPS or Park Service) improperly used its construction account to fund reimbursable activities performed under interagency agreements. It further states, "NPS is using the construction account to pay nonconstruction expenses and treating its account as if it were a revolving fund." According to the OIG, the Park Service believes this is "a convenient method to fund reimbursable agreements." Do you agree with the OIG's conclusions in the report? If confirmed, what if anything would you do to address the OIG's concerns?

**Questions from Senator Steve Daines**

**Background** Montana is home to twelve federally recognized Indian Tribes, seven Indian reservations and the state-recognized Little Shell Tribe. Many decisions by federal agencies impact these tribes' sovereignty and their livelihoods—whether it's the Department of Interior agencies, or others like the Department of Defense (U.S. Air Force and U.S. Army Corps of Engineers) or the EPA. However, too often these federal agencies fail to meaningfully consult with Indian Tribes, even after President Obama has reinforced the importance of the federal government's tribal trust relationship through his Executive Order 13175. In Montana specifically, the Crow Tribe has been very disappointed in the lack of consultation regarding the

**U.S. Senate Committee on Energy and Natural Resources**  
**October 10, 2015 Hearing on Pending Nominations**  
**Questions for the Record Submitted to Kristin Sarri**

Gateway Pacific Terminal project in Washington State by the Corps of Engineers. Moreover, the EPA's tribal consultation on the Clean Power Plan was also disappointing to the Crow Tribe and other Indian Tribes like the Navajo Nation. The Crow Tribe relies on coal production for most of its nonfederal revenue and good-paying jobs for tribal members. It is the duty of the Department of Interior, especially, to uphold the tribal trust responsibility.

**Question 1** What is your view on the duty of Department of Interior to ensure it undergoes meaningful consultation in regards to federal decisions impacting Indian Tribes; and, intervene in other decisions by other federal agencies in consultation if and when necessary?

**Question 2** What will you do differently, if confirmed, to ensure tribes like the Crow Tribe have the opportunity for meaningful consultation with agencies within the Department of Interior and within other Departments/agencies like the U.S. Army Corps of Engineers and the Environmental Protection Agency regarding federal decisions?

**Questions from Senator Lamar Alexander**

**Question 1** Earlier this year, I introduced the James K. Polk Presidential Home Study Act to direct the Park Service to conduct a special resource study for the James K. Polk home in Columbia, Tennessee. In July, the Senate Energy and Natural Resources Committee approved the legislation. During a legislative hearing this summer, the National Park Service expressed support for my legislation and requested a few minor changes, which have been made. If confirmed, will you recommend that the Department of the Interior support my legislation to determine if the James K. Polk Home meets the criteria for inclusion in the National Park System?

**Question 2** This summer, the Department of Interior announced that site managers for the new Manhattan Project National Historical Park will be located in three communities — Oak Ridge, Hanford, and Los Alamos. How does the Department anticipate the relationship between the site managers and the superintendent will work? If regular appropriations are provided for the park, how long does the Department anticipate it will take before the park is open to the public?

**Question 3** Last year, Secretary Jewell said she would not resist legislation to reimburse states for keeping the parks open during the government shutdown. Do you agree that states should be reimbursed for keeping the parks open during the government shutdown if this bill becomes law?

Hi Jason – We received BLM's Oct. 30 document production for the fracking rule per the request by Chairs Chaffetz and Lummis in their Oct. 16 letter. After looking through it, we wanted to follow up with you on a couple of matters. Are you free tomorrow morning for a brief phone call – either between 9:30-10am or 11-noon?

Thank you,

Drew

Good morning, Patrick and Lara. Can you please advise when we can expect to receive Director Kornze's responses to QFRs for the April 30<sup>th</sup> hearing? We have received requests from Members and it has now been over 5 months since the hearing on April 30. I would be most appreciative of an update or, even better, receiving the responses for the official hearing record. Many thanks for your help with this request.

Sincerely,  
Darla Ripchensky

Good afternoon, Director Kornze. Attached are Questions for the Record which have been submitted to you by various Members of the ENR Committee from the subcommittee hearing which was held last Thursday regarding "The BLM's Final Rule on Hydraulic Fracturing." We respectfully request that you provide your responses to these questions by **Thursday, May 21, 2015** for inclusion in the official hearing record.

Please provide the responses directly to me, and feel free to contact me if you have any questions. Thank you for your assistance with this request.

Sincerely,

Darla Ripchensky, PMP

**Subject:** RE: BLM's Fracking Rule Court Decision  
**Date:** Monday, November 16, 2015 8:14:47 PM

---

Working on pushback of House/Senate riders. Can I have an update on fracking rule – has BLM decided whether to appeal district court's injunction? What else is happening on fracking rule, and why not accept either rider if rule doesn't move forward in current form?

**From:** Harding, Stephenne [mailto:[stephenne\\_harding@ios.doi.gov](mailto:stephenne_harding@ios.doi.gov)]  
**Sent:** Wednesday, September 30, 2015 4:41 PM  
**To:** Stephenne Harding  
**Subject:** BLM's Fracking Rule Court Decision

All--

A federal judge in Wyoming today issued a preliminary injunction against the Interior Department's fracking regulations. **At this point** the BLM is consulting with the Office of the Solicitor and the Department of Justice about the decision of the U.S. District Court in Wyoming to issue a preliminary injunction of the hydraulic fracturing rule. While the matter is being resolved, the BLM will follow the Court's order and will continue to process applications for permit to drill and inspect well sites under its pre-existing regulations.

Please let me know if you have further questions.

Cheers,

Stephenne

## Summary

On May 27, the Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers (Corps) jointly announced a final rule defining the scope of waters protected under the Clean Water Act (CWA). The rule revises regulations that have been in place for more than 25 years. Revisions are being made in light of 2001 and 2006 Supreme Court rulings that interpreted the regulatory scope of the CWA more narrowly than the agencies and lower courts were then doing, and created uncertainty about the appropriate scope of waters protected under the CWA.

According to the agencies, the new rule revises the existing administrative definition of “waters of the United States” consistent with the CWA, legal rulings, the agencies’ expertise and experience, and science concerning the interconnectedness of tributaries, wetlands, and other waters and effects of these connections on the chemical, physical, and biological integrity of downstream waters. Waters that are “jurisdictional” are subject to the multiple regulatory requirements of the CWA. Non-jurisdictional waters are not subject to those requirements.

This report describes the final revised rule—which the agencies refer to as the Clean Water Rule—and includes a table comparing the existing regulatory language that defines “waters of the United States” with the revisions. The rule is particularly focused on clarifying the regulatory status of surface waters located in isolated places in a landscape. It does not modify some categories of waters that are jurisdictional under existing rules (traditional navigable waters, interstate waters and wetlands, the territorial seas, and impoundments). The rule also lists waters that would not be jurisdictional, such as prior converted cropland and certain ditches. It makes no change to existing statutory exclusions, such as CWA permit exemptions for normal farming and ranching activities. The rule will replace EPA-Corps guidance that was issued in 2003 and 2008, which has guided agency interpretation of the Court’s rulings but also has caused considerable confusion. Much of the controversy since the Supreme Court rulings has focused on the degree to which isolated waters and small streams are jurisdictional. Under the EPA-Corps guidance, many of these waters have required case-specific evaluation to determine if jurisdiction applies. Under the final rule, some of these waters would continue to need case-specific review, but fewer than under the existing agency guidance documents. The final rule also explicitly excludes specified waters from the definition of “waters of the United States” (e.g., prior converted croplands, stormwater management systems, and groundwater).

Changes in the final rule would increase the *categorical* assertion of CWA jurisdiction, in part as a result of expressly declaring some types of waters jurisdictional by rule (such as all waters adjacent to a jurisdictional water), making these waters subject to the act’s permit and other requirements if pollutant discharges occur. Nevertheless, the agencies believe that the rule does not exceed the CWA’s lawful coverage or protect new types of waters that have not been protected historically (i.e., under existing rules that the new rule will replace). While it would enlarge jurisdiction beyond that under the existing EPA-Corps guidance, they believe that it would not enlarge jurisdiction beyond what is consistent with the Supreme Court’s current reading of jurisdiction and would reduce jurisdiction over some waters, as a result of exclusions and exemptions. The agencies estimate that the new rule will result in approximately 3-5% more positive assertions of jurisdiction over U.S. waters, compared with current field practice.

Congressional interest in the rule has been strong since it was proposed in 2014 and is continuing in the 114<sup>th</sup> Congress. The agencies contend that the final rule responds to those criticisms of the proposed rule. Their stated intention has been to clarify the rules and make jurisdictional determinations more predictable, less ambiguous, and more timely. Some stakeholders believe that the agencies largely succeeded in that objective, while others do not. Challenges to the rule were filed in multiple federal district and appellate courts by industry groups, more than half of

the states, and several environmental groups. The rule became effective on August 28, 2015, but on October 9, a federal court blocked the rule's implementation nationwide.

## Introduction

On May 27, the Environmental Protection Agency (EPA) and the U.S. Army Corps of Engineers (Corps) jointly announced a final rule defining the scope of waters protected under the Clean Water Act (CWA). The rule would revise regulations that have been in place for more than 25 years.<sup>1</sup> Revisions were proposed in March 2014 in light of Supreme Court rulings in 2001 and 2006 that interpreted the regulatory scope of the CWA more narrowly than the agencies and lower courts were then doing, and created uncertainty about the appropriate scope of waters protected under the CWA.<sup>2</sup>

In April 2011, EPA and the Corps proposed guidance on policies for determining CWA jurisdiction to replace guidance previously issued in 2003 and 2008; all were intended to lessen confusion over the Court's rulings for the regulated community, regulators, and the general public. The guidance documents sought to identify, in light of the Court's rulings, categories of waters that remain jurisdictional, categories not jurisdictional, and categories that require a case-specific analysis to determine if CWA jurisdiction applies. The 2011 proposed guidance identified similar categories as in the 2003 and 2008 documents, but it would have narrowed categories that require case-specific analysis in favor of asserting jurisdiction categorically for some types of waters. The new rule will replace the existing 2003 and 2008 guidance, which had remained in effect because the 2011 proposed guidance was not finalized.<sup>3</sup>

The 2011 proposed guidance was extremely controversial, especially with groups representing property owners, land developers, and the agriculture sector, who contended that it represented a massive federal overreach beyond the agencies' statutory authority. Most state and local officials were supportive of clarifying the extent of CWA-regulated waters, but some were concerned that expanding the CWA's scope could impose costs on states and localities as their own actions (e.g., transportation projects) become subject to new requirements. Most environmental advocacy groups welcomed the proposed guidance, which would more clearly define U.S. waters that are subject to CWA protections, but some in these groups favored even a stronger document. Still, both supporters and critics of the 2011 proposed guidance urged the agencies to replace guidance, which is non-binding and not subject to full notice-and-comment rulemaking procedures, with revised regulations that define "waters of the United States." Three opinions in the 2006 Supreme Court *Rapanos* ruling similarly urged the agencies to initiate a rulemaking, as they did subsequently.

In the 112<sup>th</sup> and 113<sup>th</sup> Congresses, a number of legislative proposals were introduced to bar EPA and the Corps from implementing the 2011 proposed guidance or developing regulations based on it; none of these proposals was enacted. Similar criticism followed almost immediately after release of the proposed rule on March 25, 2014, with some Members asserting that it would result in job losses and damage economic growth. Supporters of the Administration, on the other hand, defended the agencies' efforts to protect U.S. waters and reduce frustration that has resulted from

---

<sup>1</sup> Definition of "waters of the United States" is found at 33 C.F.R. §328.3 (Corps) and 40 C.F.R. §122.2 (EPA). The term is similarly defined in other EPA regulations, as is the term "navigable waters." It is not defined in the CWA. See **Table 1**.

<sup>2</sup> *Solid Waste Agency of Northern Cook County v. U.S. Army Corps of Engineers (SWANCC)*, 531 U.S. 159 (2001), and *Rapanos v. United States*, 547 U.S. 715 (2006).

<sup>3</sup> For background on the Supreme Court rulings, subsequent guidance, and other developments, see CRS Report RL33263, *The Wetlands Coverage of the Clean Water Act (CWA): Rapanos and Beyond*, by Robert Meltz and Claudia Copeland.

the unclear jurisdiction of the act.<sup>4</sup> Support was expressed by environmental and conservation organizations, among others.<sup>5</sup>

## The CWA and the Revised Rule

The proposed rule was published in the *Federal Register* on April 21, 2014.<sup>6</sup> The revised rule became effective August 28, 2015, 60 days after publication in the *Federal Register*.<sup>7</sup> Judicial review of the rule began on July 13, 2015,<sup>8</sup> but legal challenges were filed in multiple federal courts even before that date, and on October 9, a federal court issued an order to stay implementation of the rule nationwide, pending further developments (see "Recent Developments"). **Table 1** in this report provides a comparison of the existing regulatory language promulgated in 1986 that defines "waters of the United States" with language in the proposed rule and the final rule.

The CWA protects "navigable waters," a term defined in the act to mean "the waters of the United States, including the territorial seas."<sup>9</sup> Waters need not be truly navigable to be subject to CWA jurisdiction. Both the legislative history and the case law surrounding the CWA confirm that jurisdiction is not limited to traditional navigable waters, that is, waters that are, were, or could be used in interstate or foreign commerce.<sup>10</sup> Waters that are jurisdictional are subject to the multiple regulatory requirements of the CWA: standards, discharge limitations, permits, and enforcement. Non-jurisdictional waters, in contrast, are not subject to these federal legal requirements. The act's single definition of "navigable waters" applies to the entire law. In particular, it applies to federal prohibition on discharges of pollutants except in compliance with the act's requirements (§301), requirements for point sources to obtain a permit prior to discharge (§§402 and 404), water quality standards and measures to attain them (§303), oil spill liability and oil spill prevention and control measures (§311), certification that federally permitted activities comply with state water quality standards (§401), and enforcement (§309). It impacts the Oil Pollution Act and other environmental laws, as well.<sup>11</sup> The CWA leaves it to the agencies to define the term "waters of the United States" in regulations, which EPA and the Corps have done several times, most recently in 1986.

<sup>11</sup> For example, the reach of the Endangered Species Act (ESA) is affected, because that act's requirement for consultation by federal agencies over impacts on threatened or endangered species is triggered through the issuance of federal permits.

According to the agencies, the new rule—which they now refer to as the Clean Water Rule—revises the existing administrative definition of “waters of the United States” in regulations consistent with legal rulings—especially the recent Supreme Court cases—and science concerning the interconnectedness of tributaries, wetlands, and other waters to downstream waters and effects of these connections on the chemical, physical, and biological integrity of downstream waters. The agencies assert that the rule also reflects their expertise and experience in administering the CWA, including making more than 120,000 case-specific jurisdictional determinations since 2008. The rule is particularly focused on clarifying the regulatory status of surface waters located in isolated places in a landscape (the types of waters with ambiguous jurisdictional status following the Supreme Court’s 2001 ruling in *SWANCC*) and small streams, rivers that flow for part of the year, and nearby wetlands (the types of waters affected by the Court’s 2006 ruling in *Rapanos*).

In developing the rule, EPA and the Corps relied on a synthesis prepared by EPA’s Office of Research and Development of more than 1,200 published and peer-reviewed scientific reports; the synthesis discusses the current scientific understanding of the connections or isolation of streams and wetlands relative to large water bodies such as rivers, lakes, estuaries, and oceans. The purpose of the scientific synthesis report was to summarize current understanding of these connections, the factors that influence them, and the mechanisms by which connected waters affect the function or condition of downstream waters. The document was reviewed by EPA’s Science Advisory Board (SAB), which provides independent engineering and scientific advice to the agency and which completed its review in October 2014. A number of EPA’s critics suggested that the agencies should have deferred developing or proposing a rule until a final scientific review document was complete. Some also expressed concern that the final report would not be available during the public comment period on the rule, which closed on November 14, 2014. Based on completion of the SAB review, EPA issued a final scientific assessment report in January 2015, saying that it would assist the agencies in developing the final rule. (See the **Appendix** for discussion of the connectivity report.)

A key conclusion in the science report that was also emphasized by the SAB review is that streams and wetlands fall along a gradient of connectivity that can be described in terms of frequency; duration; magnitude; timing; and rates of change of water, material, and biotic fluxes to downstream waters. However, science cannot in all cases provide “bright lines” to interpret and implement policy. In the preamble to the final rule, EPA and the Corps acknowledge this point.

... the agencies’ interpretive task in this rule ... requires scientific and policy judgment, as well as legal interpretation. The science demonstrates that waters fall along a gradient of chemical, physical, and biological connection to traditional navigable waters, and it is the agencies’ task to determine where along that gradient to draw lines of jurisdiction under the CWA. In making this determination, the agencies must rely, not only on the science, but also on their technical expertise and practical experience in implementing the CWA during a period of over 40 years. In addition, the agencies are guided, in part, by the compelling need for clearer, more consistent, and easily implementable standards to govern the administration of the Act, including brighter line boundaries where feasible and appropriate.<sup>12</sup>

---

<sup>12</sup> Final Rule, p. 37057.

## Overview of the Revised Rule

The final rule announced on May 27 retains much of the structure of the agencies' existing definition of "waters of the United States." Like the 2003 and 2008 guidance and the 2014 proposal, it identifies categories of waters that are and are not jurisdictional, as well as categories of waters that require a case-specific evaluation. The final rule revises parts of the 2014 proposed rule; the text box, below, lists the key changes in the final rule.

### **Key Changes in the Final Rule from the Proposed Rule**

In the preamble to the final rule, EPA and the Corps observe that—

many ... commenters and stakeholders urged EPA to improve upon the April 2014 proposal, by providing more bright line boundaries and simplifying definitions that identify waters that are protected under the CWA, all for the purpose of minimizing delays and costs, making protection of clean water more effective, and improving predictability and consistency for landowners and regulated entities. (Final Rule, p. 37057)

To that end, the final rule revises parts of the proposal.

- **Adjacent waters**—the final rule establishes distance limits, based on waters that are defined as "neighboring," which is an aspect of "adjacent."
- **Tributaries**—the final rule removes wetlands and other waters that typically lack a bed and bank and an ordinary high water mark from the definition of "tributary" and moves such waters to "adjacent waters."
- The final rule identifies two sets of waters for purposes of conducting a case-specific significant nexus analysis to determine if CWA jurisdiction applies, narrowing the scope of waters that could be assessed under a case-specific significant nexus analysis compared with the proposed rule. First are five specific subcategories of waters (prairie potholes, Carolina bays and Delmarva bays, pocosins, western vernal pools, and Texas coastal prairie wetlands). Second are waters located in whole or in part within the 100-year floodplain of a traditional navigable water, interstate water, or the territorial seas and within 4,000 feet of the high tide line or ordinary high water mark of a jurisdictional water.
- The final rule redefines excluded ditches.
- The final rule refines proposed exclusions (e.g., artificial lakes and ponds, certain water-filled depressions).
- The final rule adds exclusions for features that were not previously excluded (e.g., stormwater management structures and systems, water distributary and wastewater recycling structures, groundwater recharge basins, puddles).

## Waters That Are Categorically Jurisdictional

Under the first section of the revised regulation, the following six categories of waters would be jurisdictional by rule without additional or case-specific analysis:

- Waters susceptible to interstate commerce, known as traditional navigable waters (no change from existing rules or the 2014 proposal);
- All interstate waters, including interstate wetlands (no change from existing rules or the 2014 proposal);
- The territorial seas (no change from existing rules or 2014 the proposal);
- Tributaries of the above waters if they meet the definition of "tributary" (these waters are jurisdictional under existing rules, but the term "tributary" is newly defined in the proposed and final rule);
- Impoundments of the above waters or a tributary, as defined in the rule (no change from existing rules or the 2014 proposal); and

- All waters, including wetlands, ponds, lakes, oxbows, and similar waters, that are adjacent to a water identified in the above categories (these are considered jurisdictional under the final rule because the agencies conclude that they have a significant nexus to a traditional navigable water, interstate water, or the territorial seas; the final rule provides a revised definition that for the first time sets limits on what will be considered "adjacent").

The concept of significant nexus is critical because courts have ruled that, to establish CWA jurisdiction of waters, there needs to be "some measure of the significance of the connection for downstream water quality," as Justice Kennedy stated in the 2006 *Rapanos* case. He said, "Mere hydrologic connection should not suffice in all cases; the connection may be too insubstantial for the hydrologic linkage to establish the required nexus with navigable waters as traditionally understood."<sup>13</sup> However, as EPA and the Corps observed in the proposed and final rules, significant nexus is not itself a scientific term, but rather a determination made by the agencies in light of the law, science, and the agencies' experience and expertise. Functions that might demonstrate significant nexus include sediment trapping and retention of flood waters. In the rule, the agencies note that a hydrologic connection is not necessary to demonstrate significant nexus, because the function may be demonstrated even in the absence of a connection (e.g., pollutant trapping is another such function).

In the final rule, the agencies responded to comments that had requested some limits on the definition of adjacent waters. Under the rule, a water that is adjacent to a jurisdictional water is itself jurisdictional if it meets the related definition of "neighboring" (see **Table 1**). The final rule establishes maximum distances, or specific boundaries from jurisdictional waters, for purposes of defining "neighboring:"

1. all waters located in whole or in part within 100 feet of the ordinary high water mark (OHWM)<sup>14</sup> of a jurisdictional water;
2. all waters located in whole or in part within the 100-year floodplain<sup>15</sup> that are not more than 1,500 feet from the OHWM of a jurisdictional water;
3. all waters located in whole or in part within 1,500 feet of the high tide line of a jurisdictional water and within 1,500 feet of the OHWM of the Great Lakes.

The entire water is "neighboring" if a portion of it is located within these defined boundaries. Also, for purposes of adjacency, an open water such as a pond includes any wetlands within or abutting its ordinary high water mark.

Under existing regulations, tributaries have been jurisdictional without qualification and were not defined. In the final rule, a tributary can be natural or constructed, but it must have both a bed and bank<sup>16</sup> and ordinary high water mark to be categorically jurisdictional. A tributary as defined by the rule does not lose its jurisdictional status even if there is one or more natural breaks (e.g., a debris pile) or constructed/man-made breaks (e.g., a bridge or dam).

---

<sup>13</sup> 547 U.S. at 784-785.

<sup>14</sup> Ordinary high water mark (OHWM) generally defines the lateral limits of a water. The term is defined in the final rule; see **Table 1**.

<sup>15</sup> The 100-year floodplain is the land that is predicted to flood during a 100-year storm, that is, a storm which has a 1% chance of occurring in any given year.

<sup>16</sup> In many tributaries, the bed is that part of the channel below the OHWM, and the banks often extend above the OHWM.

## Waters Requiring Significant Nexus Analysis

Beyond the categories of waters that would be categorically jurisdictional under the rule are waters that will be jurisdictional based on a determination that there is a significant nexus to a jurisdictional downstream water. Under existing rules, the regulatory term "other waters" applies to wetlands and non-wetland waters that do not fall into the category of waters that are susceptible to interstate commerce (traditional navigable waters), interstate waters, the territorial seas, tributaries, or waters adjacent to waters in one of these four categories. Existing regulations contain a non-exclusive list of "other waters," such as intrastate lakes, mudflats, prairie potholes, and playa lakes (see **Table 1**). Headwaters, which constitute most "other waters," supply most of the water to downstream traditional navigable waters, interstate waters, and the territorial seas.

EPA and the Corps recognize that the Supreme Court decisions in *SWANCC* and *Rapanos* put limitations on the scope of waters that may be determined to be jurisdictional under the CWA. Much of the controversy since the Court's rulings has focused on uncertainty as to what degree "other waters" are jurisdictional, either by definition/rule, or as determined on a case-by-case basis to evaluate significant nexus to a jurisdictional water. In his opinion in the *Rapanos* case, Justice Kennedy concluded that wetlands have the requisite significant nexus to a jurisdictional water if the wetlands "either alone or in combination with similarly situated [wet]lands in the region, significantly affect the chemical, physical, and biological integrity of other covered waters more readily understood as 'navigable.'"<sup>17</sup>

Since *SWANCC*, intrastate, non-navigable waterbodies (often referred to as geographically isolated waters) for which the sole basis for asserting jurisdiction is interstate commerce are excluded from jurisdiction, unless Corps and EPA Headquarters jointly approve case-specific assertion of jurisdiction. Under the 2003 and 2008 guidance, which will be replaced by the new rule, all other "other waters" have required a case-by-case evaluation to determine if a significant nexus exists, thus providing a finding of CWA jurisdiction. There likewise has been uncertainty as to what degree "other waters" that are not excluded from jurisdiction are similarly situated and thus may be aggregated or combined for a significant nexus determination, as described by Justice Kennedy in *Rapanos*.

In the proposed rule, "other waters," including wetlands, that are adjacent to a jurisdictional water were categorically jurisdictional. Non-adjacent "other waters" and wetlands would continue to require a case-by-case determination of significant nexus. Also, the proposed rule allowed broader aggregation of "other waters" that are similarly situated than under the existing guidance,<sup>18</sup> which could result in more "other waters" being found to be jurisdictional following a significant nexus evaluation.

Some in the regulated community urged EPA and the Corps to provide metrics, such as quantifiable flow rates or minimum number of functions for "other waters," to establish a significant nexus to jurisdictional waters. The agencies declined to do so in the proposed rule, saying that absolute standards would not allow sufficient flexibility to account for variability of conditions and the varied functions that different waters provide.

The agencies acknowledged that there may be more than one way to determine which "other waters" are jurisdictional, and they requested comment on alternate approaches, combinations of

---

<sup>17</sup> 547 U.S. at 780.

<sup>18</sup> Under the proposed rule, "other waters" could be aggregated for a significant nexus determination if they perform similar functions and are located sufficiently close together to be evaluated as a single landscape unit in the same watershed with regard to their effect on a jurisdictional downstream water.

approaches, scientific and technical data, case law, and other information that would clarify which “other waters” should be considered categorically jurisdictional or following a case-specific significant nexus determination. In addition, they asked for public comment on whether to conclude by rule that certain types of “other waters”—prairie potholes, pocosins, and perhaps other categories of waters—have a significant nexus and are *per se* jurisdictional. These waters would not require a case-by-case analysis.

The final rule no longer refers to “other waters,” but it establishes two defined sets of additional waters that will be a “water of the United States” if they are determined to have a significant nexus to a jurisdictional water. Under the rule, only these waters will require case-specific evaluation, as others are either categorically jurisdictional or categorically excluded from jurisdiction.

First are five subcategories of waters previously considered “other waters”: prairie potholes, Carolina bays and Delmarva bays, pocosins, western vernal pools, and Texas coastal prairie wetlands. Historically under existing rules (which the new rule will replace), these were “other waters” and were jurisdictional if their use, degradation, or destruction could affect interstate or foreign commerce. Since 2008, some waters in these categories (e.g., vernal pools, pocosins) that are adjacent to a tributary system have been subject to case-specific significant nexus evaluation to determine if jurisdiction applies. According to the Corps, broadly speaking, when a significant nexus evaluation has been completed under the 2008 guidance on any type of aquatic resource, a high percentage of those evaluations resulted in a finding of jurisdiction.<sup>19</sup>

In the final rule, based on reviewing the science concerning these types of waters, the agencies concluded that waters within the five subcategories are “similarly situated” in areas of the country where they are located (following Justice Kennedy’s opinion). Under the rule, they will be jurisdictional if a significant nexus to downstream waters is found, based on case-specific evaluation in combination with waters from the same subcategory in the same watershed. While these subcategories of waters are not jurisdictional as a class under the final rule—as some environmental advocates would prefer—the rule allows for case-specific analysis that may find them to be a “water of the United States”<sup>20</sup> and is likely to find them jurisdictional in most cases, according to EPA.<sup>21</sup>

The second set of additional waters that require a significant nexus evaluation under the final rule are waters located in whole or in part within the 100-year floodplain of a traditional navigable water, interstate water, or the territorial seas and within 4,000 feet of the high tide line or OHWM of a jurisdictional water. However, because waters located in the 100-year floodplain and within 1,500 feet of the OHWM of a jurisdictional water are “adjacent” under the new rule, they are categorically jurisdictional. Thus, this second set of waters requiring a significant nexus analysis really applies to waters located within the 100-year floodplain of a traditional navigable water, interstate water, or the territorial seas that are between 1,500 feet and 4,000 feet of the OHWM of a jurisdictional water.

As noted previously, one of the agencies’ goals in developing the new rule was to clarify its requirements and lessen the number of instances requiring a time-consuming analysis to determine if CWA jurisdiction applies. The final rule provides two specific categories or

---

<sup>19</sup> U.S. Army Corps of Engineers, personal communication, June 5, 2015.

<sup>20</sup> Also under the final rule, if a water in any of these subcategories meets the rule’s definition of “adjacent,” it is jurisdictional without requiring a significant nexus determination.

<sup>21</sup> Annie Snider, “In Major Shift, new Rule Excludes Some Wetlands, Ponds,” *E&E News*, May 28, 2015.

subcategories of waters that will need a significant nexus evaluation, which is more limited than under current field practice and the existing EPA-Corps guidance documents. Under the final rule, waters other than these two types are either categorically jurisdictional or categorically excluded from jurisdiction.

## **Exclusions and Definitions**

The second section of the final rule excludes specified waters from the definition of “waters of the United States.” The listed waters and features are not jurisdictional even if they would otherwise be included within categories that are jurisdictional. The exclusions are:

- Waste treatment systems, including treatment ponds or lagoons that are designed to meet CWA requirements (no substantive change from existing rules or the 2014 proposal);
- Prior converted cropland (no change from existing rules or the 2014 proposal);
- A list of features that have been excluded by long-standing practice and guidance and would now be excluded by rule, such as artificially irrigated areas that would revert to dry land should application of irrigation water to the area cease; artificial reflecting pools or swimming pools created in dry land; and puddles (see **Table 1** for the full list);
- Groundwater (traditionally not regulated under the CWA and expressly excluded under the rule);
- Stormwater control features constructed to convey, treat, or store stormwater that are created in dry land (new provision in the final rule responding to concerns that the rule would adversely affect the ability of municipalities to operate and maintain stormwater systems, including rain gardens and green infrastructure);
- Constructed detention and retention basins created in dry land used for wastewater recycling, as well as groundwater recharge basins and percolation ponds built for wastewater recycling (new in the final rule, in response to public comments); and
- Three types of ditches: ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary; ditches with intermittent flow that are not a relocated tributary, or excavated in a tributary, or that do not drain wetlands, regardless of whether or not the wetland is a jurisdictional water; and ditches that do not flow, either directly or through another water, to a traditional navigable water, interstate water, impoundment, or the territorial seas, regardless of whether the flow is ephemeral, intermittent, or perennial. The treatment of ditches was one of the largest controversies of the proposed rule (see “Concerns of Agriculture and Local Governments”). Under existing rules and long-standing practice, many but not all ditches have been jurisdictional. The proposed rule for the first time attempted to define which ditches are and are not protected under the CWA, but the proposal was confusing and widely criticized. Under the final rule, a ditch may be a “water of the United States” only if it meets the definition of “tributary” and is not otherwise excluded under this provision.

The final rule makes no change to and does not affect existing statutory and regulatory exclusions: exemptions for normal farming, ranching, and silviculture activities such as plowing, seeding, and cultivation (CWA §404(f)); exemptions for permitting of agricultural stormwater

discharges and return flows from irrigated agriculture; or exemptions for water transfers that do not introduce pollutants into a waterbody. Nor would it directly change permitting processes.

Definitions of key terms are included in the third section of the rule. Because definitions often are critical to interpreting statutory law and regulations, some stakeholder groups criticized the proposed rule, suggesting that the definitions would enable broader assertion of CWA jurisdiction than is consistent with law and science. Many argued that several of the defined terms in the proposal were confusing, and further that the proposed rule failed to define terms such as "upland," "gullies," and "rills," which they believed needed to be clarified.

The agencies responded in several ways (See **Table 1**):

- In some cases, a particular term that was controversial with public commenters is not used in the final rule, therefore no definition is needed (e.g., "upland").
- In some cases, the term is clarified in the preamble to the rule (e.g., "ephemeral, intermittent, and perennial," "bed and banks," "dry land," and "puddle").
- In some cases, the rule was modified to clarify the term (e.g., "significant nexus").
- In some cases, the agencies declined to add a definition if they concluded that doing so might lead to more confusion (e.g., "ditch").
- Two terms defined in other Corps regulations are carried forward into the final rule, without change, at the request of commenters ("ordinary high water mark" and "high tide line").
- Finally, the agencies declined to define some terms that might have a narrow or geographic-specific application that would not be appropriate for a national rule.

Definitions of two terms in the proposed rule ("riparian area" and "floodplain") are omitted from the final rule, although they are defined in the preamble to the new rule. Both terms had been criticized by commenters for vagueness or ambiguity. Many requested that a specific floodplain interval or other clear limitation be established. In the final rule, the agencies reference the "100-year floodplain," in part because the Federal Emergency Management Agency (FEMA) and Natural Resources Conservation Service (NRCS) have mapped large portions of these areas in the United States, producing maps that are publicly available, well known, and well understood. Also, the agencies concluded that the use of "riparian area" was unnecessarily complicated and that, as a general matter, waters in a riparian area will also be in the 100-year floodplain.<sup>22</sup>

## Impacts of the Proposed Rule

Overall, EPA and the Corps say that their intent in the Clean Water rule was to clarify their jurisdiction, in light of the Supreme Court's ruling, not to expand it. Nevertheless, the agencies acknowledge that the rule would increase the *categorical* assertion of CWA jurisdiction, when compared to a baseline of current practices under the 2003 and 2008 EPA-Corps guidance. This results in part from the agencies' expressly declaring some types of waters categorically jurisdictional and not requiring case-specific evaluation of them (such as all waters adjacent to a jurisdictional water).

---

<sup>22</sup> Final Rule, p. 37082. The rule does not address changes that might result from future revisions to or updating of FEMA and NRCS maps.

In changing the regulatory definition of “waters of the United States,” there may be instances in which the CWA applies categorically for the first time, and there also may be instances in which the CWA no longer applies (i.e., as a result of exemptions and exclusions). The agencies intend that the rule will result in less ambiguity about whether the CWA applies than under existing regulations, legal rulings, and guidance.

The agencies believe that the rule does not protect any new types of waters that have not been protected historically (that is, beyond the existing regulations, which the new rule will replace) and that it does not exceed the CWA’s coverage. That is, while it would enlarge *categorical* jurisdiction beyond that under the 2003 and 2008 EPA-Corps guidance, which the agencies believe was narrower than is justified by science and the law, they believe that it would not enlarge jurisdiction beyond what is consistent with the Supreme Court’s current reading of jurisdiction.

The agencies’ categorical assertion of waters that are jurisdictional, compared to current practice, does not identify specific waters that will be found to be jurisdictional—i.e., a particular stream or pond—but the rule attempts to draw more of a bright line of CWA jurisdiction than in the past. Moreover, the agencies made a number of changes in the final rule to provide more certainty and clarity, including “bright lines” of jurisdictional demarcation in several parts of the rule.

In an Economic Analysis document accompanying the final rule, the agencies estimate that the new rule will result in 2.84%–4.65% more positive assertions of jurisdiction over U.S. waters, compared with current field practice.<sup>23</sup> However, compared with the agencies’ existing regulations, the final rule reflects a reduction in waters protected by the CWA, according to EPA and the Corps.

According to the analysis, costs to regulated entities and governments (federal, state, and local) are likely to increase as a result of the rule, but the rule itself does not impose direct costs. Indirect costs would result from additional permit application expenses (for CWA Section 404 permitting; stormwater permitting for construction and development activities; and permitting of pesticide discharges and confined animal feeding operations [CAFOs] for discharges to waters that would now be determined jurisdictional) and additional requirements for oil storage and production facilities needing to develop and implement spill prevention, control and countermeasure (SPCC) plans. Federal and state governments would likely experience about \$1 million annually in additional costs to administer and process permits. Other costs would likely include compensatory mitigation requirements for permit impacts (if applicable), affecting land developers and state and local governments. The economic analysis considered two scenarios for analyzing impacts of the rule. The agencies estimate that indirect costs associated with the final rule range from \$158 million to \$307 million per year under a “low end” estimate and \$237 million to \$465 million per year under a “high end” estimate.<sup>24</sup>

The Section 404 program would see the greatest potential impact as a result of revised assertion of CWA jurisdiction. Most of the projected costs are likely to affect landowners and development companies, state and local governments investing in infrastructure, and industries involved in resource extraction.

---

<sup>23</sup> U.S. Environmental Protection Agency and U.S. Department of the Army, *Economic Analysis of the EPA-Army Corps Clean Water Rule*, May 2015, <http://www2.epa.gov/cleanwaterrule/final-clean-water-rule-economic-analysis>, p. 53. Hereinafter, Economic Analysis.

<sup>24</sup> See the Economic Analysis for explanation and details.

The agencies believe that indirect benefits accruing from the proposed rule include the value of ecosystem services provided by the waters and wetlands protected as a result of CWA requirements, such as habitat for aquatic and other species, support for recreational fishing and hunting, and flood protection. Other benefits would include government savings on enforcement expenses, because the rule is intended to provide greater regulatory certainty, thus reducing the need for government enforcement. Business and government may also achieve savings from reduced uncertainty concerning where CWA jurisdiction applies, they believe. In all, the agencies estimate that benefits of the final rule range from \$339 million to \$350 million per year under a “low end” estimate and \$555 million to \$572 million under a “high end” estimate. However, they note that there is uncertainty and there are limitations associated with the results, due to data and information gaps, as well as analytic challenges. The analysis does not quantify all possible costs and benefits, and values are meant to be illustrative, not definitive.<sup>25</sup> Overall, they conclude that benefits would exceed costs.

## **Concerns of Agriculture and Local Governments**

The agriculture sector has been vigorous in criticizing and challenging EPA regulatory actions that may affect the sector’s operations, making potential impacts of the proposed rule on agriculture a likely focus of controversy. Even before release of the proposed rule, one of the sector’s concerns about a new “waters of the United States” rule has been whether it would modify existing statutory provisions that exempt “normal farming and ranching” practices from dredge and fill permitting or others that exclude certain agricultural discharges, such as irrigation return flow and stormwater runoff, from all CWA permitting. As described above, the final rule makes no change and does not affect these exemptions, which are self-implementing. An EPA fact sheet discusses the continued exclusions and exemptions.<sup>26</sup> Another of agriculture’s concerns was the proposed rule’s exclusion of some ditches; many said that the proposal was confusing and could be interpreted as extending CWA jurisdiction to agricultural drainage ditches.

Simultaneous with announcing the Clean Water Rule in March 2014, EPA and the Corps issued an interpretive rule that identified 56 conservation practices approved by the U.S. Department of Agriculture’s Natural Resources Conservation Service (NRCS) that qualify for exemption under the CWA Section 404(f)(1)(A) exclusion of “normal farming and ranching” activities from Section 404 permit requirements and do not require determination whether the discharge involves a “water of the United States.” Essentially, the interpretive rule was intended to provide guidance to determine activities that qualify for 404(f)(1)(A) exemptions. The 56 practices, which are a subset of all NRCS conservation practices, are practices such as stream crossings and wetland restoration that take place in aquatic, riparian, or wetland environments. Through this interpretive rule, the agencies intended to resolve uncertainties about “normal farming” activities that are exempt from permitting when these conservation practices are used. In other words, effective immediately, producers who utilize any of the 56 identified practices according to NRCS technical standards would not need to seek a determination of CWA jurisdiction nor seek a CWA permit. The three agencies also signed a Memorandum of Understanding detailing implementation of the interpretive rule and identifying a process for reviewing and updating the

<sup>25</sup> *Ibid.*, p. v.

<sup>26</sup> See [http://www2.epa.gov/sites/production/files/2014-03/documents/cwa\\_ag\\_exclusions\\_exemptions.pdf](http://www2.epa.gov/sites/production/files/2014-03/documents/cwa_ag_exclusions_exemptions.pdf). Comments submitted to the docket for the interpretive rule (Docket ID No. EPA-HQ-OW-2013-0820) are available at <http://www.regulations.gov>.

list of qualifying NRCS conservation practices. Although the interpretive rule became effective immediately, EPA and the Corps accepted public comment until July 7, 2014.<sup>27</sup>

The interpretive rule was intended to clarify agricultural practices that are exempt from CWA Section 404 permitting. Nevertheless, there was confusion about many issues, including NRCS's role in providing technical assistance to farmers with respect to 404 permitting, and the apparent requirement that these practices had to meet NRCS technical standards to qualify for the exemption. Public comments submitted on the interpretive rule were uniformly critical—including comments submitted by agriculture stakeholder groups, environmental groups, and some state environmental agencies. Agriculture groups argued that it was procedurally flawed, because it would have substantive impact on farmers, and thus should have been subject to notice-and-comment rulemaking procedures under the Administrative Procedure Act. Many also argued that the interpretive rule narrowed the CWA 404(f)(1)(A) statutory exemptions, because the practices listed in the rule already were excluded from Section 404. Under the interpretive rule, farmers would have to comply with NRCS standards in order to qualify for exemption, resulting in a disincentive to conservation, they said. On the other hand, environmental groups and some state environmental agencies were critical of the interpretive rule for different reasons. They contended that it would exempt activities from permitting that are not truly associated with ongoing farming and that the rule was thus too broad. Some of the listed practices, such as stream crossings, can have significant harmful impacts on water quality and result in violations of state water quality standards, they said.

EPA and Corps officials acknowledged that the 2014 interpretive rule did not appear to have had the intended benefits of clarifying agricultural exemptions and exempting, not contracting, the number of exempted activities, and they said that the agencies and U.S. Department of Agriculture (USDA) were weighing alternatives to the rule. However, before the agencies proposed or took action on the interpretive rule, in the FY2015 omnibus appropriations act, passed in December 2014 (H.R. 83/P.L. 113-235), Congress included a provision directing EPA and the Corps to withdraw it (see "Conclusion" below). On January 29, 2015, the agencies signed a memorandum withdrawing the interpretive rule, effective immediately.<sup>28</sup> Following Congress's action in December, the EPA Administrator indicated that the agency would work with USDA to provide certainty to the regulated community, in a way that provides value both to the government and the agriculture community. No further actions have been announced.

## **Local Government Concerns**

Some local governments also criticized the proposed "waters of the United States" rule. In particular, the National Association of Counties (NACo) argued that counties and other local governments would be affected by the proposed rule in the arena of ditches. NACo pointed out that local governments own and maintain public infrastructure including roadside ditches, flood control channels, and stormwater management structures. Because the proposed rule would have defined some ditches as "waters of the United States" if they meet certain conditions, NACo

---

<sup>27</sup> Department of Defense, Department of the Army, Corps of Engineers, and Environmental Protection Agency, "Notice of Availability Regarding the Exemption From Permitting Under Section 404(f)(1)(A) of the Clean Water Act to Certain Agricultural Conservation Practices," 79 *Federal Register* 22276, April 21, 2014. The list of practices, the Memorandum of Understanding, and the interpretive rule are available at <http://water.epa.gov/lawsregs/guidance/wetlands/agriculture.cfm>. USDA had no formal role in developing the Corps-EPA proposed rule, but it was among the federal agencies commenting on it during interagency review.

<sup>28</sup> Environmental Protection Agency and Department of Defense, "Notice of Withdrawal," 80 *Federal Register* 6705, February 6, 2015.

contended that the proposal potentially increases the number of county-owned ditches under federal jurisdiction. Permit requirements are not an issue, NACo says, but permitting can be time-consuming and expensive.

EPA and Corps officials believed that exclusion of most ditches in the proposed rule actually would decrease federal jurisdiction over ditches. But the issue remained controversial and was addressed with modifications in the final rule. The agencies believe that the exclusions included in the final rule will address the vast majority of roadside and other transportation ditches, as well as ditches on agricultural lands.<sup>29</sup>

## Conclusion

The EPA Administrator stated at a congressional hearing in 2014 that it generally takes about one year to finalize a rule. Complex and controversial rules often take much longer from proposal to promulgation. This rule to define “waters of the United States” was finalized 14 months after the proposed rule was announced.

Legal challenges are likely to delay implementation of any rule for years. New regulations may clarify many current questions, but they are unlikely to please all of the competing interests, as one environmental advocate observed.

However, a rulemaking would only benefit wetlands if it did not reduce the jurisdiction offered by current regulations and if the Administration remained faithful to sound science. If politics were to trump science in the rulemaking process, the likelihood of such a protective rule would not be promising. Also, rules are subject to legal challenge and can be tied up in court for years before they are implemented.<sup>30</sup>

Another consideration is possible action by Congress, even though a final rule has been promulgated. Congressional interest in the rule has been strong since the proposed rule was announced in March 2014. Hearings were held during the 113<sup>th</sup> Congress and have continued in the 114<sup>th</sup> Congress; bills to bar the agencies from finalizing the proposed rule or otherwise alter the agencies' course regarding the rule have been introduced. (For information, see CRS Report R43943, *EPA and the Army Corps' "Waters of the United States" Rule: Congressional Response and Options*, by Claudia Copeland.)

Many critics in Congress and elsewhere urged that the proposed Clean Water Rule be withdrawn, or that the agencies propose a supplemental rule, subject to another round of public comments. EPA and Corps officials pointed out that doing so would leave in place the status quo—with determinations of CWA jurisdiction being made by 38 Corps districts pursuant to existing regulations, coupled with non-binding agency guidance, and many of these determinations involving time-consuming case-specific evaluation.

Some industry and agriculture groups that had criticized the status quo in the past said more recently that they preferred it to the 2014 proposed rule, which they believed was ambiguous and overly broad. EPA and Corps officials believe that the final rule responds to those criticisms. The agencies' intention has been to clarify the rules and make jurisdictional determinations more predictable, less ambiguous, and more timely. Based on press reports of stakeholders' early

reactions to the final rule, some believe that the agencies largely succeeded in that objective, while others believe that they did not.<sup>31</sup>

## Recent Developments

Legal challenges to the Clean Water Rule were filed in multiple federal courts soon after it was announced. These lawsuits, filed by industry groups, more than half of the states, and several environmental groups (nearly 90 plaintiffs so far), will test whether the agencies' interpretation of CWA jurisdiction is consistent with the Supreme Court's rulings and whether the rule complies with substantive and procedural requirements of the CWA and other laws.

Because of some uncertainty about the correct judicial venue for challenging the rule,<sup>32</sup> petitions for review have been filed both in federal district courts and courts of appeal. As of October 1, petitions for review of the rule filed in eight appellate courts have been consolidated in the Sixth Circuit. Sixteen separate challenges also were filed in 12 federal district courts. On October 9, a three-judge panel of the U.S. Court of Appeals for the Sixth Circuit placed a nationwide stay on the 2015 rule, pending further developments, including the need to determine the court's own jurisdictional authority.<sup>33</sup> On the substance of the complaints, the court said there was a good chance that the plaintiffs would prevail on the merits. A two-judge majority said that the significance of the new rule warranted leaving the prior regulatory regime in place, while the third judge said that until the question of subject-matter jurisdiction is answered, the new rule should not be stayed.<sup>34</sup> As a result of the court's order, the Corps and EPA will continue to make CWA jurisdictional determinations based on the 2008 guidance, as they did before promulgation of the 2015 rule.

<sup>31</sup> See, for example, Amena H. Saiyid, "Obama Says Water Jurisdiction Rule Provides Clarity, Certainty; Critics Claim Overreach," *Daily Environment Report*, May 28, 2015, p. A-1. Also see releases from organizations such as the American Farm Bureau Federation, "Final 'Waters of the U.S.' Rule: No, No, No! No Clarity, No Certainty, No Limits on Agency Power," June 11, 2015 ([http://www.fb.org/index.php?action=newsroom\\_news\\_article&id=311](http://www.fb.org/index.php?action=newsroom_news_article&id=311)); and the National Association of Counties, "NACo Voices Concern on Final 'Waters of the U.S.' Rule," June 8, 2015 (<http://www.naco.org/legislation/WW/Lists/Posts/Post.aspx?ID=1037>).

<sup>32</sup> The judicial review section of the CWA, Section 509, vests exclusive, original review jurisdiction over enumerated EPA actions under the act in the federal courts of appeals. The initial issue with Section 509 is that none of the listed EPA actions clearly cover the Clean Water Rule. Indeed, in the preamble to the final rule, EPA and the Corps acknowledge that "[t]he Supreme Court and lower courts have reached different conclusions on the types of actions that fall within section 509," and offers no opinion of its own as to review of the Clean Water Rule. If a court finds that the rule is not covered by Section 509, review jurisdiction presumably will lie in the district courts pursuant to the federal question statute. That statute, applicable where no more specific statute provides otherwise, gives the district courts original jurisdiction over "all civil actions arising under the ... laws ... of the United States." (28 U.S.C. §1331) See CRS Legal Sidebar WSLG1369, *The EPA/Corps Clean Water Rule: What Court or Courts Get to Rule on the Legal Challenges?*

<sup>33</sup> On August 27, a district court in North Dakota issued a preliminary injunction that blocked implementation of the rule in 13 states, but not in the remaining 37 states.

**Table I. Comparison of “Definition of Waters of the United States” Regulatory Language**

Existing Regulatory Language, 2014 Proposed Rule, and Revised Language in Final Rule Announced May 27, 2015

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
(a) The term <i>waters of the United States</i> means	(a) For purposes of all sections of the Clean Water Act, 33 U.S.C. 1251 <i>et seq.</i> and its implementing regulations, subject to the exclusions in subsection (b) of this section, the term “waters of the United States” means:	(a) For purposes of all sections of the Clean Water Act, 33 U.S.C. 1251 <i>et seq.</i> and its implementing regulations, subject to the exclusions in subsection (b) of this section, the term “waters of the United States” means:	
(1) All waters which are currently used, or were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;	(1) All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;	(1) All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;	These waters are often referred to as “traditional navigable waters” (TNWs), which include but are not limited to the “navigable waters of the United States” within the meaning of Section 10 of the Rivers and Harbors Act of 1899. No change from the existing rule or 2014 proposal.
(2) All interstate waters including interstate wetlands;	(2) All interstate waters, including interstate wetlands;	(2) All interstate waters, including interstate wetlands;	These waters include tributaries to interstate waters, waters adjacent to interstate waters, waters adjacent to tributaries of interstate waters, and others that have a significant nexus to interstate waters. No change from the existing rule or 2014 proposal. Interstate waters would continue to be “waters of the United States” even if they are not navigable in fact and do not connect to such waters.
(3) All other waters such as intrastate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds, the use, degradation or destruction of which could affect interstate or foreign commerce including any such waters:  (i) Which are or could be used by	(7) On a case-specific basis, other waters, including wetlands, provided that those waters alone, or in combination with other similarly situated waters, including wetlands, located in the same region, have a significant nexus to a water identified in paragraphs (a)(1) through (3) of this section.	(7) All waters in paragraphs (i) through (v) of this paragraph where they are determined, on a case-specific basis, to have a significant nexus to a water identified in paragraphs (a)(1) through (3) of this section. The waters identified in paragraphs (i) through (v) of this paragraph are similarly situated and shall be combined, for purposes of a	In the existing rule, there is a non-exclusive list of the types of “other waters” which may be found to be “waters of the U.S.”  The existing description is omitted under the final rule as unnecessary and confusing because it has been incorrectly read as an exclusive list.

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
<p>interstate or foreign travelers for recreational or other purposes; or</p> <p>(ii) From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or</p> <p>(iii) Which are or could be used for industrial purpose by industries in interstate commerce;</p>		<p>significant nexus analysis, in the watershed that drains to the nearest water identified in paragraphs (a)(1) through (3) of this section. Waters identified in this paragraph shall not be combined with waters identified in paragraph (a)(6) of this section when performing a significant nexus analysis. If waters identified in this paragraph are also an adjacent water under paragraph (a)(6), they are an adjacent water and no case-specific significant nexus analysis is required.</p> <p>(i) <i>Prairie potholes</i>. Prairie potholes are a complex of glacially formed wetlands, usually occurring in depressions that lack permanent natural outlets, located in the upper Midwest.</p> <p>(ii) <i>Carolina bays and Delmarva bays</i>. Carolina bays and Delmarva bays are ponded, depressional wetlands that occur along the Atlantic coastal plain.</p> <p>(iii) <i>Pocosins</i>. Pocosins are evergreen shrub- and tree-dominated wetlands found predominantly along the Central Atlantic coastal plain.</p> <p>(iv) <i>Western vernal pools</i>. Western vernal pools are seasonal wetlands located in parts of California and associated with topographic depression, soils with poor drainage, mild, wet winters and hot, dry summers.</p> <p>(v) <i>Texas coastal prairie wetlands</i>. Texas coastal prairie wetlands are freshwater wetlands that occur as a mosaic of depressions, ridges, intermound flats, and mima mound wetlands located along</p>	<p>Under the final rule, the five subcategories of waters listed in this paragraph are not jurisdictional as a single category or class, but the agencies have determined that they are similarly situated because they perform similar functions and are located sufficiently close to each other to function together in affecting downstream waters. Therefore, EPA and the Corps believe that it is reasonable that these waters be evaluated in combination (i.e., prairie potholes with prairie potholes) for purposes of a case-specific significant nexus. They may be evaluated either individually or as a group of waters in a region, meaning the watershed that drains to the nearest traditional navigable water, interstate water, or the territorial seas through a single point of entry.</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
(4) All impoundments of waters otherwise defined as waters of the United States under the definition;	(4) All impoundments of waters identified in paragraphs (a)(1) through (3) and (5) of this section;	<p>the Texas Gulf Coast.</p> <p>(8) All waters located within the 100-year floodplain of a water identified in (a)(1) through (3) of this section and all waters located within 4,000 feet of the high tide line or ordinary high water mark of a water identified in paragraphs (a)(1) through (5) of this section where they are determined on a case-specific basis to have a significant nexus to a water identified in paragraphs (a)(1) through (3) of this section. For waters determined to have a significant nexus, the entire water is a water of the United States if a portion is located within the 100-year floodplain of a water identified in (a)(1) through (3) of this section or within 4,000 feet of the high tide line or ordinary high water mark. Waters identified in this paragraph shall not be combined with waters identified in paragraph (a)(6) of this section when performing a significant nexus analysis. If waters identified in this paragraph are also an adjacent water under paragraph (a)(6), they are an adjacent water, and no case-specific significant nexus is required.</p> <p>(4) All impoundments of waters otherwise identified as waters of the United States under this section;</p>	<p>For these waters, the agencies have not made a determination that the waters are “similarly situated” (unlike the waters described in paragraph (a)(7)). As a result, a significant nexus analysis for these waters will include a case-specific assessment of whether there are any similarly situated waters, as well as whether the water, alone or in combination with any waters determined to be similarly situated, has a significant nexus to a traditional navigable water, interstate water, or territorial seas.</p> <p>In a change from the proposed rule, the final rule sets a distance threshold for case-specific evaluation of these waters for significant nexus. In addition to distance, aquatic functions will play a prominent role in determining whether specific waters covered by this paragraph have a significant nexus.</p> <p>Impoundments of a traditional navigable water, interstate water, the territorial seas, or a tributary are jurisdictional by rule.</p> <p>As a matter of policy and law, impoundments do not de-federalize a water, even where there is no longer flow below the impoundment. That is, damming or impounding a water of the United States does not make the water</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
(5) Tributaries of waters identified in paragraphs (a)(1) through (4) of this section;	(5) All tributaries of waters identified in paragraphs (a)(1) through (4) of this section;	(5) All tributaries, as defined in paragraph (c)(3) of this section, of waters identified in paragraphs (a)(1) through (3) of this section;	<p>non-jurisdictional.</p> <p>Tributaries, as defined in the final rule, of a traditional navigable water, interstate water, the territorial seas, or an impoundment would be jurisdictional by rule and do not require a case-specific significant nexus analysis.</p> <p>Unless excluded under subsection (b) of the rule, any water that meets the rule's definition of tributary is a water of the United States. Waters that meet the rule's definition of tributary remain tributaries even if there is a manmade or natural break at some point along the connection to the traditional navigable water, interstate water, or the territorial sea, so long as bed and banks and an ordinary high water mark are present upstream of the break.</p> <p>"Tributary" is defined below. It includes natural, undisturbed waters and those that have been man-altered or constructed, but which science shows function as a tributary.</p>
(6) The territorial seas;	(3) The territorial seas;	(3) The territorial seas;	<p>This term establishes the seaward limit of "waters of the United States." Jurisdictional by rule; no change from the existing rule. The term generally refers to the part of the ocean immediately adjacent to shoreline and extending seaward up to 12 miles.</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
(7) Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in paragraphs (a)(1) through (6) of this section.	(6) All waters, including wetlands, adjacent to a water identified in paragraphs (a)(1) through (5) of this section; and	(6) All waters adjacent to a water identified in paragraphs (a)(1) through (5) of this section, including wetlands, ponds, lakes, oxbows, impoundments, and similar waters;	All waters adjacent to a traditional navigable water, interstate water, the territorial seas, impoundment, or tributary would be jurisdictional by rule. Under the rule, an adjacent water includes wetlands within or abutting its ordinary high water mark. Waters separated by a berm or other similar feature remain “adjacent.”
(8) Waters of the United States do not include prior converted cropland. <sup>c</sup> Notwithstanding the determination of an area’s status as prior converted cropland by any other Federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA.	<b>(b) The following are not “waters of the United States”</b>  (2) Prior converted cropland. Notwithstanding the determination of an area’s status as prior converted cropland by any other federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA.	<b>(b) The following are not “waters of the United States”</b>  (2) Prior converted cropland. Notwithstanding the determination of an area’s status as prior converted cropland by any other federal agency, for the purposes of the Clean Water Act, the final authority regarding Clean Water Act jurisdiction remains with EPA.	No change proposed.
Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of CWA (other than cooling ponds as defined in 40 C.F.R. 423.11(m) which also meet the criteria of this definition) are not waters of the United States. <sup>d</sup>	(1) Waste treatment systems, including treatment ponds or lagoons, designed to meet the requirements of the Clean Water Act.	(1) Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of the Clean Water Act.	The agencies do not believe that omitting the parenthetical reference to 40 C.F.R. 423.11(m) is a change in substance to the waste treatment exclusion or how it is applied.
	(3) Ditches that are excavated wholly in uplands, drain only uplands or non-jurisdictional waters, and have less than perennial flow.	(3) The following ditches: (i) Ditches with ephemeral flow that are not a relocated tributary or excavated in a tributary.	Under the final rule, a ditch may be a “water of the United States” only if it meets the definition of “tributary” and is not excluded under this subparagraph.
	(4) Ditches that do not contribute flow, either directly or through another water, to a water identified in paragraphs (a)(1) through (4) of this section.	(ii) Ditches with intermittent flow that are not a relocated tributary, excavated in a tributary, or drain wetlands. (iii) Ditches that do not flow, either directly or through another water, into a	The final rule codifies and clarifies long-standing practice and guidance (including 1986 and 1988 preamble language), which has been to exclude these waters from jurisdiction.

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
	<p>(5) The following features:</p> <p>(i) Artificially irrigated areas that would revert to upland should application of irrigation water to that area cease;</p> <p>(ii) artificial lakes or ponds created by excavating and/or diking dry land and used exclusively for such purposes as stock watering, irrigation, settling basins, or rice growing;</p> <p>(iii) artificial reflecting pools or swimming pools created by excavating and/or diking dry land;</p> <p>(iv) small ornamental waters created by excavating and/or diking dry land for primarily aesthetic reasons;</p> <p>(v) water-filled depressions created incidental to construction activity;</p>	<p>water identified in paragraphs (a)(1) through (3) of this section.</p> <p>(4) The following features:</p> <p>(i) Artificially irrigated areas that would revert to dry land should application of water to that area cease;</p> <p>(ii) Artificial, constructed lakes and ponds created in dry land such as farm and stock watering ponds, irrigation ponds, settling basins, fields flooded for rice growing, log cleaning ponds, or cooling ponds;</p> <p>(iii) Artificial reflecting pools or swimming pools created in dry land;</p> <p>(iv) Small ornamental waters created in dry land;</p> <p>(v) Water-filled depressions created in dry land incidental to mining or construction activity, including pits</p>	<p>A ditch that relocates a stream is not an excluded ditch, and a stream is relocated either when at least a portion of its original channel has been physically moved, or when the majority of its flow has been redirected.</p> <p>If a ditch has been cut to carry intermittent or perennial flow from a wetland, the ditch is serving as a conduit for transferring flow from a wetland to a downstream water. Thus, the ditch has changed the wetland's hydrologic regime, and the segment of the ditch that physically intersects the wetland would be considered jurisdictional.</p> <p>The final rule confirms long-standing policy that ditches may function as point sources that discharge pollutants, thus subject to CWA Section 402.</p> <p>The final rule codifies long-standing practice and guidance (including 1986 and 1988 preamble language), which has been to exclude these waters from jurisdiction. These waters would not be jurisdictional by rule. The final rule is revised to omit terms that were confusing in the proposal (e.g., "upland") and clarify others (e.g., "water-filled depressions").</p> <p>The list of excluded features is illustrative, not exhaustive.</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
	<p>(vi) groundwater, including groundwater drained through subsurface drainage systems; and</p> <p>(vii) gullies and rills and non-wetland swales.</p>	<p>excavated for obtaining fill, sand, or gravel that fill with water;</p> <p>(vi) Erosional features, including gullies, rills, and other ephemeral features that do not meet the definition of tributary, non-wetland swales, and lawfully constructed grassed waterways; and</p> <p>(vii) Puddles.</p> <p>(5) Groundwater, including groundwater drained through subsurface drainage systems.</p> <p>(6) Stormwater control features constructed to convey, treat, or store stormwater that are created in dry land.</p> <p>(7) Wastewater recycling structures constructed in dry land; detention and retention basins build for wastewater recycling; groundwater recharge basins; percolation ponds built for wastewater recycling; and water distributary structures built for wastewater recycling.</p>	<p>The exclusion does not apply to surface expressions of groundwater, such as where groundwater emerges on the surface and becomes baseflow in streams or spring fed ponds.</p> <p>The exclusion is intended to address engineered stormwater control structures in municipal or urban environments.</p> <p>It is intended to exclude the diverse range of stormwater control features that are currently in place, such as rain gardens, low impact development and flood control systems, and may be developed in the future.</p> <p>This exclusion codifies long-standing agency practice and encourages water management practices that the agencies agree are important and beneficial.</p>

<p>(e) The term <i>ordinary high water mark</i> means that line on the shore established by the fluctuations of water and indicated by physical characteristics such as clear, natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding area.</p>	<p>No change proposed</p>	<p>(6) <i>Ordinary high water mark</i>. The term <i>ordinary high water mark</i> means that line on the shore established by the fluctuations of water and indicated by physical characteristics such as a clear, natural line impressed on the bank, shelving, changes in the character of soil, destruction of terrestrial vegetation, the presence of litter and debris, or other appropriate means that consider the characteristics of the surrounding area.</p>	<p>“Ordinary high water mark” sets the boundary of adjacent non-wetland waters (e.g., open waters such as lakes and ponds). Physical indicators of ordinary high water mark can be created by perennial, intermittent, and ephemeral flows.</p>
	<p>(2) <b>Neighboring</b>: The term <i>neighboring</i>, for purposes of the term “adjacent” in this section, includes waters located within the riparian area or floodplain of a water identified in paragraphs (a)(1) through (a)(5) of this section, or waters with a surface or shallow subsurface hydrologic connection to such a jurisdictional water.</p>	<p>(2) <i>Neighboring</i>. The term <i>neighboring</i> means: (i) All waters located within 100 feet of the ordinary high water mark of a water identified in paragraphs (a)(1) through (5) of this section. The entire water is neighboring if a portion is located within 100 feet of the ordinary high water mark; (ii) All waters located within the 100-year floodplain of a water identified in</p>	<p>“Neighboring” is the key determinant of whether a water is “adjacent,” and thus jurisdictional by rule. Where the 100-year floodplain is greater than 1,500 feet, all wetlands within 1,500 feet of the tributary’s ordinary high water mark are jurisdictional because they are “neighboring” to the tributary, regardless of the wetland’s position relative to each other. Waters within the 100-year floodplain</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
	<p>(3) <b>Riparian area:</b> The term <i>riparian area</i> means an area bordering a water where surface or subsurface hydrology influence the ecological processes and plant and animal community structure in that area. Riparian areas are transitional areas between aquatic and terrestrial ecosystems that influence the exchange of energy and materials between those ecosystems.</p> <p>(4) <b>Floodplain:</b> The term floodplain means an area bordering inland or coastal waters that was formed by sediment deposition from such water under present climatic conditions and is inundated during periods of moderate to high water flows.</p> <p>(5) <b>Tributary:</b> The term <i>tributary</i> means a waterbody physically characterized by the presence of a bed and banks and</p>	<p>paragraphs (a)(1) through (5) of this section and not more than 1,500 feet from the ordinary high water mark of such water. The entire water is neighboring if a portion is located within 1,500 feet of the ordinary high water mark and within the 100-year floodplain;</p> <p>(iii) All waters located within 1,500 feet of the high tide line of a water identified in paragraphs (a)(1) or (a)(3) of this section, and all waters within 1,500 feet of the ordinary high water mark of the Great Lakes. The entire water is neighboring if a portion is located within 1,500 feet of the high tide line or within 1,500 feet of the ordinary high water mark of the Great Lakes.</p>	<p>that are located more than 1,500 feet and up to 4,000 feet from the ordinary high water mark, or high tide line, are subject to case-specific significant nexus analysis under paragraph (a)(8).</p> <p>Omitted in the final rule because the agencies determined that the use of the riparian area was unnecessarily complicated and that as a general matter, waters within the riparian area will be within the 100-year floodplain.</p> <p>Omitted in the final rule, which uses reference to 100-year floodplain in order to more clearly identify the outer limit of “neighboring.”</p> <p>This term has not previously been defined in any regulation or preamble. Bed and banks and ordinary high water</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
<p>ordinary high water mark, as defined at 33 C.F.R. §328.3(e), which contributes flow, either directly or through another water, to a water identified in paragraphs (a)(1) through (4) of this section. In addition, wetlands, lakes, and ponds are tributaries (even if they lack a bed and banks or ordinary high water mark) if they contribute flow, either directly or through another water to a water identified in paragraphs (a)(1) through (3) of this section. A water that otherwise qualifies as a tributary under this definition does not lose its status as a tributary if, for any length, there are one or more man-made breaks (such as bridges, culverts, pipes, or dams) or one or more natural breaks (such as wetlands at the head of or along the run of a stream, debris piles, boulder fields, or a stream that flows underground) so long as a bed and banks and an ordinary high water mark can be identified upstream of the break. A tributary, including wetlands, can be a natural, man-altered, or man-made waterbody and includes waters such as rivers, streams, lakes, ponds, impoundments, canals, and ditches not excluded in paragraph (b)(3) or (4) of this section.</p>		<p>directly or through another water (including an impoundment identified in paragraph (a)(4) of this section), to a water identified in paragraphs (a)(1) through (3) of this section that is characterized by the presence of the physical indicators of a bed and banks and an ordinary high water mark. These physical indicators demonstrate there is volume, frequency, and duration of flow sufficient to create a bed and banks and an ordinary high water mark, and thus to qualify as a tributary. A tributary can be a natural, man-altered, or man-made water and includes waters such as rivers, streams, canals, and ditches not excluded under paragraph (b) of this section. A water that otherwise qualifies as a tributary under this definition does not lose its status as a tributary if, for any length, there are one or more constructed breaks (such as bridges, culverts, pipes, or dams), or one or more natural breaks (such as wetlands along the run of a stream, debris piles, boulder fields, or a stream that flows underground) so long as a bed and banks and an ordinary high water mark can be identified upstream of the break. A water that otherwise qualifies as a tributary under this definition does not lose its status as a tributary if it contributes flow through a water of the United States that does not meet the definition of tributary or through a non-jurisdictional water to a water identified in paragraphs (a)(1) through (3) of this section.</p>	<p>mark (OHWM) are features that generally are physical indicators of flow. OHWM generally defines the lateral limits of a water. In many tributaries, the bed is that part of the channel below the OHWM, and the banks often extend above the OHWM.</p> <p>Man-altered and man-made tributaries perform many of the same functions as natural tributaries and provide connectivity between streams and downstream rivers.</p>

Existing Regulatory Language <sup>a</sup>	Proposed Regulatory Language	Revised Regulatory Language	Comments <sup>b</sup>
<p>(7) <b>Significant nexus:</b> The term <i>significant nexus</i> means that a water, including wetlands, either alone or in combination with other similarly situated waters in the region (i.e., the watershed that drains to a water identified in paragraphs (a)(1) through (3) of this section), significantly affects the chemical, physical or biological integrity of a water identified in paragraphs (a)(1) through (3) of this section. For an effect to be significant, it must be more than speculative or insubstantial. Other waters, including wetlands, are similarly situated when they perform similar functions and are located sufficiently close together or close to a “water of the U.S.” so that they can be evaluated as a single landscape unit with regard to their effect on the chemical, physical, or biological integrity of a water identified in paragraphs (a)(1) through (3) of this section.</p>	<p>(8) <i>Significant nexus.</i> The term <i>significant nexus</i> means that a water, including wetlands, either alone or in combination with other similarly situated waters in the region, significantly affects the chemical, physical, or biological integrity of a water identified in paragraphs (a)(1) through (3) of this section. The term “in the region” means the watershed that drains to the nearest water identified in paragraphs (a)(1) through (3) of this section. For an effect to be significant, it must be more than speculative or insubstantial. Waters are similarly situated when they function alike and are sufficiently close to function together in affecting downstream waters. For purposes of determining whether or not a water has a significant nexus, the water’s effect on downstream (a)(1) through (3) waters shall be assessed by evaluating the aquatic functions identified in paragraphs (A) through (I) of this paragraph.<sup>e</sup> A water has a significant nexus when any single function or combination of functions performed by the water, alone or together with similarly situated waters in the region, contributes significantly to the chemical, physical, or biological integrity of the nearest water identified in paragraphs (a)(1) through (3) of this section. Functions relevant to the significant nexus evaluation are the following:</p> <ul style="list-style-type: none"> <li>(i) Sediment trapping,</li> <li>(ii) Nutrient recycling,</li> <li>(iii) Pollutant trapping, transformation,</li> </ul>	<p>In the final rule, the agencies list specific functions relevant to significant nexus evaluation to add clarity and transparency. A water does not need to perform all functions. If a water performs a single function that has significant impact on a downstream water, that is a significant nexus.</p> <p>Under the final rule, only waters covered by subparagraph (a)(7) or (a)(8) require case-specific analysis.</p>

**Notes:** The proposed rule that was announced on March 25, 2014, was published in the *Federal Register* on April 21, 2014 (79 *Federal Register* 22188-22274). The final revised rule was announced jointly by EPA and the Army Corps on May 27, 2015, and was published in the *Federal Register* on June 29: Department of the Army, Corps of Engineers, and Environmental Protection Agency, “Clean Water Rule: Definition of ‘Waters of the United States,’ Final Rule,” 80 *Federal Register* 37054-37127, June 29, 2015.

- a. 33 C.F.R. 328.3, 40 C.F.R. 122.2, 40 C.F.R. 230.3, and 40 C.F.R. 232.2 (definition of “waters of the United States”). The term “navigable waters” is defined at 40 C.F.R. 110.1 (Discharge of Oil); 40 C.F.R. 112.2 (Oil Pollution Prevention); 40 C.F.R. 116.3 (Designation of Hazardous Substance); 40 C.F.R. 117.1(i) (Determination of Reportable Quantities for Hazardous Substances); 40 C.F.R. 300.5 and Appendix E 1.5 to Part 300 (National Oil and Hazardous Substances Pollution Contingency Plan); and 40 C.F.R. 302.3 (Designation, Reportable Quantities, and Notification).
- b. Comments in this table are drawn from the preamble and text of the final rule.
- c. The term “prior converted cropland” is included in the U.S. Department of Agriculture’s administrative definition of the term “wetland” (see 7 C.F.R. 12.2).
- d. A definition of “waste treatment system” is found in EPA regulations (35 C.F.R. 35.905): “Complete waste treatment system. A complete waste treatment system consists of all of the treatment works necessary to meet the requirements of title III of the Act, involved in (a) The transport of waste waters from individual homes or buildings to a plant or facility where treatment of the waste water is accomplished; (b) the treatment of the waste waters to remove pollutants; and (c) the ultimate disposal, including recycling or reuse, of the treated waste waters and residues which result from the treatment process. One complete waste treatment system would, normally, include one treatment plant or facility, but also includes two or more connected or integrated treatment plants or facilities.”
- e. Probably should be “(i) through (ix) of this paragraph.”

## Appendix. EPA's Connectivity Report and Review by the Science Advisory Board

In September 2013, EPA released a draft report that reviews and synthesizes the peer-reviewed scientific literature on the connectivity or isolation of streams and wetlands relative to large water bodies such as rivers, lakes, estuaries, and oceans. As described below, after review and revision, this report was finalized in January 2015. The purpose of the review, according to EPA, was to summarize current understanding about these connections, the factors that influence them, and mechanisms by which connected waters affect the function or condition of downstream waters. The focus of the draft report, which was prepared by EPA's Office of Research and Development, was on small or temporary non-tidal streams, wetlands, and open waters. Based on the reviewed literature, it made certain findings.

- All tributary streams, including perennial, intermittent, and ephemeral streams, are physically, chemically, and biologically connected to downstream rivers.
- Wetlands and open waters in riparian areas and floodplains also are physically, chemically, and biologically connected with rivers and serve an important role in the integrity of downstream waters. In these types of wetlands, water-borne materials can be transported from the wetland to the river network and vice versa (e.g., water from a stream flows into and affects the wetland).
- Wetlands and open waters where water only flows from the wetland or water to a river network, (i.e., non-floodplain waters and wetlands that lack surface water inlets) such as many prairie potholes, vernal pools, and playa lakes, provide numerous functions that can benefit downstream water quality and integrity. However, because such wetlands occur on a gradient of connectivity, it is difficult to generalize, from the literature alone, about their effects on downstream waters or to generalize about the degree of connectivity (absolute or relative).

EPA asked its Science Advisory Board (SAB) to review the draft report and to comment on whether its conclusions and findings are supported by the available science.<sup>35</sup> The EPA draft report is not intended as a policy document—it does not reference either the Scalia plurality or Kennedy tests in *Rapanos*, nor does it address legal standards for CWA jurisdiction. Nevertheless, the report is important to EPA and the Corps because, when finalized, it will provide a scientific basis needed to clarify CWA jurisdiction and, thus, to inform the “waters of the United States” rulemaking.<sup>36</sup> The SAB convened a special panel of scientists to review the draft synthesis document. This ad hoc panel held meetings and teleconferences from late 2013 through mid-2014 and prepared a report with recommendations.

In its report,<sup>37</sup> the SAB ad hoc panel found strong support for the first two of EPA's major conclusions in the synthesis document and concluded that it is a thorough and technically

---

<sup>35</sup> The SAB was established pursuant to the Environmental Research, Development, and Demonstration Authorization Act (42 U.S.C. 4365) to provide independent scientific and technical advice to the EPA Administrator on the technical basis for agency positions and regulations.

<sup>36</sup> See U.S. Environmental Protection Agency, “Clean Water Act Definition of ‘Waters of the United States,’” <http://water.epa.gov/lawsregs/guidance/wetlands/CWAwaters.cfm>.

<sup>37</sup> Science Advisory Board, “SAB Review of the Draft EPA Report *Connectivity of Streams and Wetlands to Downstream Waters: A Review and Synthesis of the Scientific Evidence*, Draft Report,” August 11, 2014, 105 pp., (continued...)

accurate review of the literature on the connectivity of streams and wetlands to downstream waters. In particular, the panel agreed with EPA's conclusions that ephemeral, intermittent, and perennial streams exert a strong influence on the character and functioning of downstream waters and that tributary streams are connected to downstream waters. Further, the panel agreed with EPA that streams and wetlands in floodplain settings are physically, chemically, and/or biologically connected to downstream navigable waters.

The ad hoc panel found that the peer-reviewed literature supports EPA's conclusions in the synthesis report that connectivity occurs along a gradient or continuum between fully connected and completely isolated, with a transition in between that varies case-by-case. However, the panel concluded that the EPA report often refers to connectivity as though it is a binary property (connected versus not connected). Instead, the panel found that there are four dimensions to connectivity (longitudinal, lateral, vertical, and temporal). It is technically more accurate to state that the consequences to downstream waters are determined by variation in the frequency, duration, predictability, and magnitude of connections and that relatively low levels of connectivity can be meaningful in terms of impacts.

The ad hoc panel disagreed with EPA's third major conclusion, that it is difficult to generalize from currently available literature the degree of connectivity or the downstream effects of non-floodplain waters and wetlands that are not connected to a river network through surface or shallow subsurface water. The SAB panel found that "the scientific literature supports a more definitive statement that reflects how numerous functions of non-floodplain wetlands sustain the physical, chemical, and/or biological integrity of downstream waters, although the degree of connectivity can vary widely."<sup>38</sup> The report would be strengthened, the ad hoc panel said, if it framed the discussion of connectivity gradients and their consequences as a function of the magnitude, duration, and frequency of connectivity pathways among wetlands and downstream waters and if it quantified each connection, to the degree possible, while identifying research and data gaps. The panel found that at sufficiently large spatial and temporal scales, all waters and wetlands are connected. More important are the degree of connection (e.g., frequency, duration) and the extent to which those connections affect the chemical, physical, and biological integrity of downstream waters. Within non-floodplain wetlands, the degree of connectivity and implications for integrity of downstream waters vary considerably.

The EPA Report suggests that determining the connectedness of each non-floodplain wetland must be done on a case-by-case basis. The SAB suggests that the vast majority of non-floodplain wetlands can be classified with respect to some degree of hydrologic, chemical or biological connections to downstream waters; however, some hydrologically and spatially disconnected wetlands may need to be considered on a case-by-case basis. The challenge for the EPA is to describe the hierarchy of decisions and the tools necessary to assess the degree of connection necessary to warrant case-by-case analysis.<sup>39</sup>

The full, chartered SAB reviewed the ad hoc panel's report in September 2014. SAB members said that the panel's review of the draft EPA study was technically accurate and clear and that it accurately established linkages between streams, wetlands, and downstream waters. The SAB members asked for several minor revisions to the ad hoc panel's report, which were reflected in

<sup>39</sup> Ibid., p. 56.

an October 17, 2014, letter to the EPA Administrator with its findings and recommendations regarding the synthesis document.<sup>40</sup>

Based on the SAB review, EPA's scientists revised the draft scientific assessment report and released a final report in January 2015.<sup>41</sup> As revised, the report endorses the SAB recommendation in full by interpreting the literature on connectivity of streams to downstream waters as reflecting a gradient approach that recognizes variation in the frequency, duration, magnitude, predictability, and consequences of those connections. In the final report, EPA says that connectivity of streams and wetlands to downstream waters occurs along a continuum, and that variation in the degree of connectivity influences the range of functions provided by streams and wetlands. The final report no longer concludes that there is insufficient science to find that there are connections between non-floodplain wetlands and downstream waters, suggesting that case-specific analysis may not be needed for all such waters to determine that CWA jurisdiction applies.

## SAB Review of the Proposed "Waters of the U.S." Rule

In addition to advising the EPA Administrator on the "connectivity" report, the chartered SAB agreed to review the adequacy of the scientific and technical basis of the proposed "waters of the United States" rule. As input to the SAB, members of the ad hoc panel that reviewed the "connectivity" report subsequently reviewed the proposed rule. (Unlike their formal review of the "connectivity" report, the panel did not seek consensus on their views of the scientific basis of the proposed CWA rule.) The ad hoc panel sought to bring their scientific expertise to questions of law and policy in the proposed rule, but at the same time, members' comments highlighted some difficulties in doing so.

Members of the ad hoc panel found general agreement that, based on available science, tributaries and adjacent waters and wetlands are appropriately jurisdictional under the proposed rule. They generally agreed that from a scientist's perspective, key terms in the proposed rule need clarification and better definition, including "significant," "similarly situated," "floodplain," and "adjacent." The definition of "adjacent" is important, for example, because where "adjacent" is determined then determines the beginning of "other waters" that require case-by-case evaluation of jurisdiction. Several said that the proposed definition of "tributary" should be broader, that is, that it should specify a bed and bank (as proposed) and *in some cases* an ordinary high water mark (but not in all cases, as proposed in the rule). Several referred to the panel's review of the "connectivity" report and said that the rule should equally reflect the importance of chemical and biological connections between waters, as well as hydrological connections, in determining significant nexus, as the panel's report did. Similarly, several noted the emphasis in the panel's report on connections resulting from groundwater pathways—shallow subsurface, shallow or deep groundwater—in questioning the categorical exclusion of federal jurisdiction over groundwater in the proposed rule.<sup>42</sup> Likewise, some on the panel said that the distinction between

---

<sup>40</sup> The October 17, 2014, letter and SAB final peer review of the draft "connectivity" report is available at [http://yosemite.epa.gov/sab/sabproduct.nsf/WebReportsLastFiveBOARD/AF1A28537854F8AB85257D74005003D2/\\$File/EPA-SAB-15-001+unsigned.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/WebReportsLastFiveBOARD/AF1A28537854F8AB85257D74005003D2/$File/EPA-SAB-15-001+unsigned.pdf).

<sup>41</sup> Environmental Protection Agency, Office of Research and Development, *Connectivity of Streams & Wetlands to Downstream Waters: A Review & Synthesis of the Scientific Evidence*, EPA/600/R-14-475F, January 2015, <http://cfpub.epa.gov/ncea/cfm/recordisplay.cfm?deid=296414>.

<sup>42</sup> In addition to uncertainty over the scope of CWA jurisdiction in general, courts are split on the question of whether EPA and the Corps may assert jurisdiction over groundwater connected to navigable waters. The statutory language is ambiguous when discussing groundwater. See Anna Makowski, "Beneath the Surface of the Clean Water Act: (continued...)"

ditches that would and would not be jurisdictional under the proposed rule is unclear and may not be adequately supported by the science, although they recognized that the agencies may have policy reasons for including some ditches as jurisdictional and excluding others.

The full chartered SAB also considered the ad hoc panel's review of the proposed "waters of the United States" rule in September, and it approved an advisory letter to be sent to the EPA Administrator.<sup>43</sup> The letter also supports case-by-case consideration of most "other waters" as "waters of the United States," but it finds that there is adequate scientific evidence to support a determination that certain types of waters in particular U.S. regions (e.g., prairie potholes, Texas coastal prairie wetlands) could be categorically considered waters of the United States, thus not requiring case-specific analysis. In the letter, the SAB urged EPA to reconsider the definition of tributaries, which the proposed rule defines as having a bed, a bank, and an ordinary high water mark, because in the SAB's judgment, not all tributaries have ordinary high water marks. Finally, the letter disagrees with certain categorical exclusions in the proposed rule, saying that science does not justify excluding waters such as groundwater, ditches with only intermittent or ephemeral flow, gullies, rills, and non-wetland swales, because in many cases they can be connected to jurisdictional waters or can be conduits for moving water between jurisdictional waters.

## Summary

On August 3, 2015, the Environmental Protection Agency (EPA) released a prepublication version of the final rule known as the Clean Power Plan (CPP). The CPP final rule requires states to reduce carbon dioxide (CO<sub>2</sub>) emissions or emission rates—measured in pounds of CO<sub>2</sub> emissions per megawatt-hour of electricity generation—from existing fossil fuel electricity generating units. EPA estimates that in 2030, the CPP will result in CO<sub>2</sub> emission levels from the electric power sector that are 32% below 2005 levels. This report provides an initial analysis of EPA's final rule.

The 2015 final rule is substantially different from the rule EPA proposed on June 18, 2014. For example, a major change in EPA's final rule is EPA's establishment of uniform national CO<sub>2</sub> emission performance rates for each of the two subcategories of electricity generating units—fossil-fuel-fired electric steam generating units (whether coal, oil, or natural gas) and stationary combustion turbines (natural gas combined cycle)—affected by the rule. These standards are the underpinnings for the state-specific emission rate and mass-based targets.

The state-specific emission rate and mass-based targets are considerably different from the proposed rule. The state targets in the final rule imply lower percentage reductions for some states, while implied percentage reductions are higher for others states compared to the proposed rule. The state-specific targets differ in the final rule, because EPA altered its methodology (i.e., underlying calculations and assumptions) compared to the proposed rule, which involved four “building blocks.” EPA eliminated building block 4 (energy efficiency improvements) and modified components in building blocks 1-3. In particular, the final rule's estimated renewable energy generation level in 2030 is more than twice the level in the proposed rule.

In the final rule, EPA continues to use 2012 data as the baseline for calculated state targets. However, the agency made several state-specific adjustments to address concerns raised by stakeholders. Perhaps the most substantial adjustments are in states that generate a significant percentage of electricity from hydropower.

EPA also modified its treatment of nuclear power in the final rule, removing both “at risk” and under-construction nuclear power from the emission rate calculations. EPA clarified that the final rule would allow the generation from under-construction units, new nuclear units, and capacity upgrades to help states meet their compliance objectives.

EPA would allow states to use “qualified biomass” as a means of meeting state-specific reduction requirements. This appears to be a narrower approach to biomass than in the proposed rule.

Multiple stakeholders raised concerns about electricity reliability. The final rule contains, among other changes, a provision for a reliability “safety valve” for individual power plants. EPA states that there may be a need for generating units to continue to operate and release “excess emissions” if an emergency situation arises that could compromise electric system reliability. The reliability safety valve allows for a 90-day reprieve from CO<sub>2</sub> emissions limits.

The final rule requires states to submit to EPA their plans to comply with the rule by September 6, 2016. A state may choose to seek a two-year extension (September 6, 2018) to submit its final plan if the state needs to complete administrative and stakeholder processes. Under the final rule, states can submit one of two types of plans: an “emission standards” approach or a “state measures” approach. An emission standards approach imposes federally enforceable emission standards directly on affected units in the state. In contrast, a state measures approach must meet equivalent rates statewide, but this approach may include some elements that are not federally

enforceable, such as renewable energy and/or energy efficiency requirements that could apply to affected units or other entities.

In EPA's final rule, compliance begins in 2022, giving the states two additional years (compared to the proposed rule) before their plans must go into effect. Also, EPA created a new program to encourage states to support renewable energy and energy efficiency projects (in low-income communities) in 2020 and 2021.

## Introduction

On August 3, 2015, the Environmental Protection Agency (EPA) released a prepublication version (i.e., not yet published in the *Federal Register*) of its final rule, known as the Clean Power Plan (CPP), pursuant to Section 111(d) of the Clean Air Act.<sup>1</sup> The CPP final rule establishes regulations that would reduce carbon dioxide (CO<sub>2</sub>) emissions or emission rates from existing electricity generating units (EGUs).

In general, an affected EGU is a fossil-fuel-fired unit (e.g., coal, oil, or natural gas) that was in operation or had commenced construction as of January 8, 2014;<sup>2</sup> has a generating capacity above a certain threshold; and sells a certain amount of its electricity generation to the electric grid. EPA estimates that in 2030, the CPP will result in a 32% reduction in CO<sub>2</sub> emissions from the electric power sector in the United States compared to 2005 levels.<sup>3</sup> By comparison, in its proposed rule, EPA had estimated that in 2030, the rule would have resulted in a 30% reduction in CO<sub>2</sub> emissions from the electric power sector in the United States compared to 2005 levels.<sup>4</sup>

The proposed rule received considerable attention from Congress, state officials, and a wide spectrum of stakeholders. EPA conducted hundreds of stakeholder meetings and received 4.3 million comments on the proposal.<sup>5</sup>

The CPP final rule is substantially different from the proposed rule published in the *Federal Register* on June 18, 2014.<sup>6</sup> This report provides an initial analysis of EPA's final rule, summarizing highlights and identifying differences between the final and proposed rules. The topics discussed do not represent an exhaustive list of the differences from the proposed rule or the support or opposition that may be raised by various stakeholders. This report does not provide a legal analysis of the final rule.<sup>7</sup>

---

<sup>1</sup> 42 U.S.C. §7411(d).

<sup>2</sup> This is the date of the proposed rule for new sources. See EPA, "Standards of Performance for Greenhouse Gas Emissions From New Stationary Sources: Electric Utility Generating Units," 79 *Federal Register* 1430, January 8, 2014. A "New Source Performance Standards" (NSPS) rule under Section 111(b) of the Clean Air Act is a prerequisite for the standards for existing sources under Section 111(d), which is the focus of this report. EPA also announced a final NSPS rule for this source category on August 3, 2015. See <http://www2.epa.gov/cleanpowerplan/carbon-pollution-standards-new-modified-and-reconstructed-power-plants>.

# Highlights and Differences from the Proposed Rule

## State Plan Requirements and Options

Under Section 111(d) of the Clean Air Act (CAA), states must establish performance standards that reflect the “best system of emission reduction” (BSER) that the EPA Administrator determines has been adequately demonstrated, taking into account costs and any non-air-quality health and environmental impacts and energy requirements.

The final rule requires states to submit to EPA either an initial plan or final plan by September 6, 2016. Like the proposed rule, states can submit either individual plans or multi-state plans. If a state submits an initial plan in 2016, the state can seek an extension from EPA to submit its final plan by September 6, 2018. If EPA grants the extension, the state must submit a progress report by September 6, 2017. By comparison, the proposed rule would have allowed states to receive a one-year extension for submitting their final plan and a two-year extension if states submitted a multi-state plan.

The final rule allows states to select from two types of plans, described by EPA as (1) an “emission standards” approach or (2) a “state measures” approach.<sup>8</sup> If a state chooses the emission standards approach, the state would implement the federally enforceable emission rate standards (discussed below) directly at the affected EGUs in the state. This approach could involve multiple states and an emission rate trading system or a mass-based trading system.

### Emission Rate Targets and Mass-Based Targets

An emission rate target is measured in pounds of CO<sub>2</sub> emissions per megawatt-hour (MWh) of electricity generation. EPA uses the state-specific emission rate targets to calculate equivalent state-specific mass-based targets, which are measured in metric tons of CO<sub>2</sub>. Although EPA's emission rates are in pounds per megawatt-hour, most national and international measures of CO<sub>2</sub> emissions are provided in metric tons. One metric ton is approximately 2,205 pounds.

A state measures approach allows a state to achieve the equivalent of the CO<sub>2</sub> emission standards approach by using some combination of federally enforceable standards for EGUs and elements that would be enforceable only under state laws. Examples of such elements include renewable energy and/or energy efficiency requirements that could be applied to affected EGUs or other entities. A plan that employs the state measures approach requires the inclusion of federally enforceable standards that would take effect if the state measures approach did not achieve the required result. If a state uses the state measures approach, the state must use a mass-based target “to provide certainty that the state measures are achieving the required emission reductions.”<sup>9</sup> Multi-state systems are allowed with this approach as well.<sup>10</sup>

<sup>8</sup> Final rule, p. 241; see also EPA, *The Role of States: States Decide How to Achieve Their Goal*, August 2015, <http://www.epa.gov/airquality/cpp/fs-cpp-states-decide.pdf>.

<sup>9</sup> Final rule, p. 852.

<sup>10</sup> Nine states in the Northeast and Mid-Atlantic regions have established a program, which took effect in 2009, to control CO<sub>2</sub> emissions from power plants. For more details, see CRS Report R41836, *The Regional Greenhouse Gas Initiative: Lessons Learned and Issues for Congress*, by Jonathan L. Ramseur.

### Federal Implementation Plan

EPA cannot compel a state to submit a state plan pursuant to CAA Section 111(d). If a state fails to submit a satisfactory plan by EPA's regulatory deadline, CAA Section 111(d) directs EPA to prescribe a plan for the state, often described as a federal implementation plan (FIP).

On the same day (August 3, 2015) that EPA released a prepublication version of its CPP final rule, EPA released a prepublication version of a proposed rule that presents two options for a FIP: a rate-based and a mass-based emissions trading program.<sup>11</sup> A 90-day comment period for the proposed rule will start when the proposal is published in the *Federal Register*.

## Timing Requirements for State Targets

The proposed rule set a final emission rate target for each state for 2030 and an interim target to be achieved “on average” between 2020 and 2029. In EPA's final rule the interim targets would be measured between 2022 and 2029, effectively giving the states an additional two years before reductions are necessary. As discussed below, EPA created a new program (the Clean Energy Incentive Program) in the final rule to encourage states to take action in 2020 and 2021.

In addition, the final rule requires states to demonstrate their progress in implementing a gradual application of BSER with “glide paths” that the states identify for reductions in three time periods: 2022-2024, 2025-2027, and 2028-2029. The interim target is, nonetheless, to be achieved using the average of the eight-year interim period.

## National Performance Standards

A major change in EPA's final rule compared with the proposed rule is its core of what EPA called “a traditional, performance-based approach to establishing emission guidelines for affected sources.”<sup>12</sup> The final rule establishes uniform national CO<sub>2</sub> emission performance rates (measured in pounds of CO<sub>2</sub> per MWh of electricity generation) for each of the two subcategories of EGUs—fossil-fuel-fired electric steam generating units (e.g., coal, oil, or natural gas units) and stationary combustion turbines (e.g., natural gas combined cycle units)—affected by the rule. These standards are the underpinnings for the state-specific emission rates and mass-based targets. The methodology for these targets is discussed below.

## State-Specific Targets

Like the proposed rule, EPA's final rule contains state-specific emission rate targets and mass-based targets. These targets apply to the state's total electricity portfolio (which can include generation from renewables and nuclear power), not the individual units, as with the national performance standards (above). The interim and final targets, however, differ from the ones in the proposed rule. **Table A-1** lists each state's 2012 baseline, its 2030 emission rate target, and the implied percentage reduction required to achieve the 2030 target. The mass-based targets are based on the emission rate targets.

<sup>11</sup> Available at <http://www.epa.gov/airquality/cpp/cpp-proposed-federal-plan.pdf>.

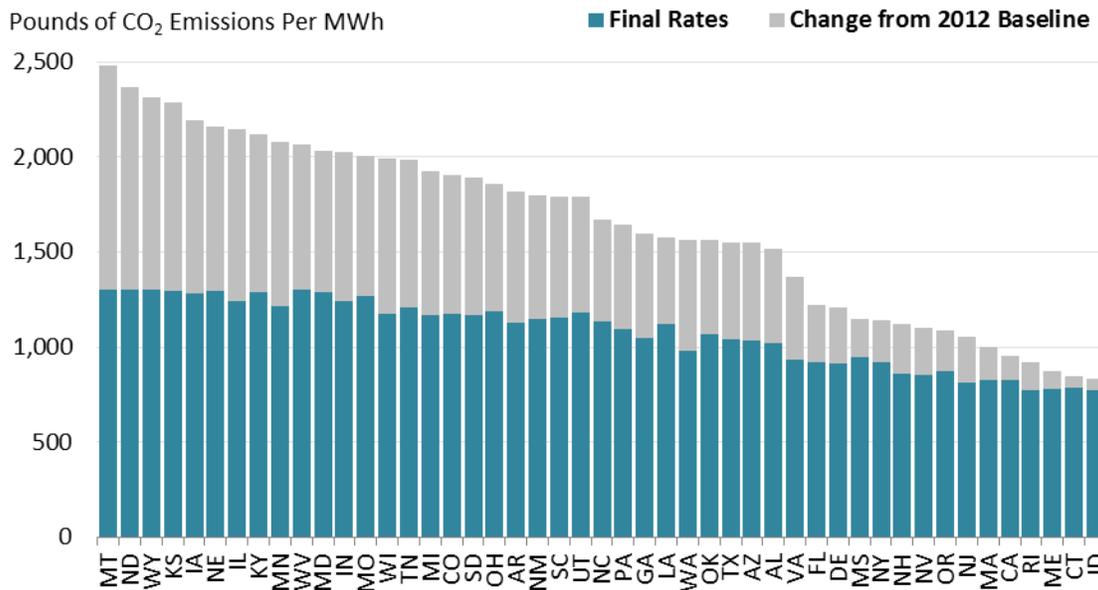

<sup>12</sup> Final rule, p. 230.

For comparison purposes, **Table A-1** also lists the same information from the proposed rule. The final rule implies lower percentage reduction requirements for some states and implies higher percentage reduction requirements for others compared to the proposed rule.

**Figure 1** compares the state-specific emission rate targets in 2030 (the dark-colored columns) with the state-specific emission rate baselines in 2012 (the combined dark- and light-colored columns). The light-colored columns illustrate the emission rate reductions required by 2030.

**Figure 1. State-Specific Emission Rate Targets in 2030 Compared to 2012 Emission Rate Baselines**

States Listed in Order of Their 2012 Emission Rate Baselines (High to Low)

**Source:** Prepared by CRS; final rule target and baseline data from EPA, CO<sub>2</sub> Emission Performance Rate and Goal Computation Technical Support Document for CPP Final Rule (August 2015) and accompanying spreadsheets, <http://www2.epa.gov/cleanpowerplan/clean-power-plan-final-rule-technical-documents>.

**Notes:** The dark-colored columns illustrate the state-specific emission rate targets in 2030. The combined dark- and light-colored columns illustrate the state-specific emission rate baselines in 2012. The light-colored columns illustrate the emission rate reduction requirements states must achieve by 2030.

EPA did not establish emission rate goals for Vermont and the District of Columbia because they do not currently have affected EGUs. Although Alaska and Hawaii have targets in the proposed rule, in its final rule, EPA stated that Alaska, Hawaii, and the two U.S. territories with affected EGUs (Guam and Puerto Rico) will not be required to submit state plans on the schedule required by the final rule, because EPA “does not possess all of the information or analytical tools needed to quantify” the best system of emission reduction for these areas. EPA stated it will “determine how to address the requirements of section 111(d) with respect to these jurisdictions at a later time.”

EPA did not establish emission rate goals for Vermont and the District of Columbia because they do not currently have affected EGUs. In its final rule, EPA stated that Alaska, Hawaii, and the two U.S. territories with affected EGUs (Guam and Puerto Rico) will not be required to submit state plans on the schedule required by the final rule. EPA asserts it “does not possess all of the information or analytical tools needed to quantify” the BSERs for these areas. EPA stated it will

“determine how to address the requirements of section 111(d) with respect to these jurisdictions at a later time.”<sup>13</sup>

In addition, EPA crafted emission rate targets for three areas of Indian country. The tribes have “the opportunity, but not the obligation,” to establish and submit plans to meet their emission rate targets. If a tribe does not seek authority to submit its own plan, EPA is responsible for establishing a plan if the agency determines at a later date that “a plan is necessary or appropriate.”<sup>14</sup>

## EPA's Methodology

The methodology (i.e., underlying calculations and assumptions) in the final rule that EPA used to create (1) the national CO<sub>2</sub> emission performance rates and (2) the state-specific emission rate (and mass-based) targets is considerably different than EPA's methodology in its proposed rule. Although an in-depth comparison between the two approaches is beyond the scope of this report,<sup>15</sup> some initial observations are included below.

In its proposed rule, EPA applied four “building blocks” to the state 2012 baselines to generate emission rate targets for each state. The four building blocks in the June 2014 proposed rule involved estimates of various opportunities for states to decrease their emission rates:

1. Coal-fired power plant efficiency improvements;
2. Natural gas combined cycle (NGCC) displacement of more carbon-intensive sources, particularly coal;
3. Increased use of renewable energy and preservation of existing and under-construction nuclear power; and
4. Energy efficiency improvements.

In its final rule, EPA eliminated building block 4 and modified the components in building blocks 1-3. In particular, the renewable energy assumptions (building block 3) changed dramatically in the final rule. According to EPA, the final rule's renewable energy generation level in 2030 is more than twice the level in the proposed rule.<sup>16</sup> In addition, EPA assumed a coal-fired plant efficiency improvement of 6% in the proposed rule (building block 1), while the final rule includes region-specific improvements that range from 2.1% to 4.3%. The natural gas generation assumptions in building block 2 changed as well.

In its final rule, EPA established CO<sub>2</sub> emission performance standards for two subcategories of affected sources: (1) fossil-fuel-fired electric steam generating units (e.g., coal- and oil-fired units) and (2) stationary combustion turbines (e.g., natural gas combined cycle units). To derive the BSER on which these rates were based, EPA divided the states into three regions, illustrated in **Figure 2** and compiled 2012 data—CO<sub>2</sub> emissions and electricity generation—from each source in each state. Using the final rule's new building block applications, EPA calculated annual emission rates for each source type in each of the three regions. EPA's final rule uses the least

---

<sup>13</sup> Ibid., p. 417.

<sup>14</sup> Ibid., p. 1007.

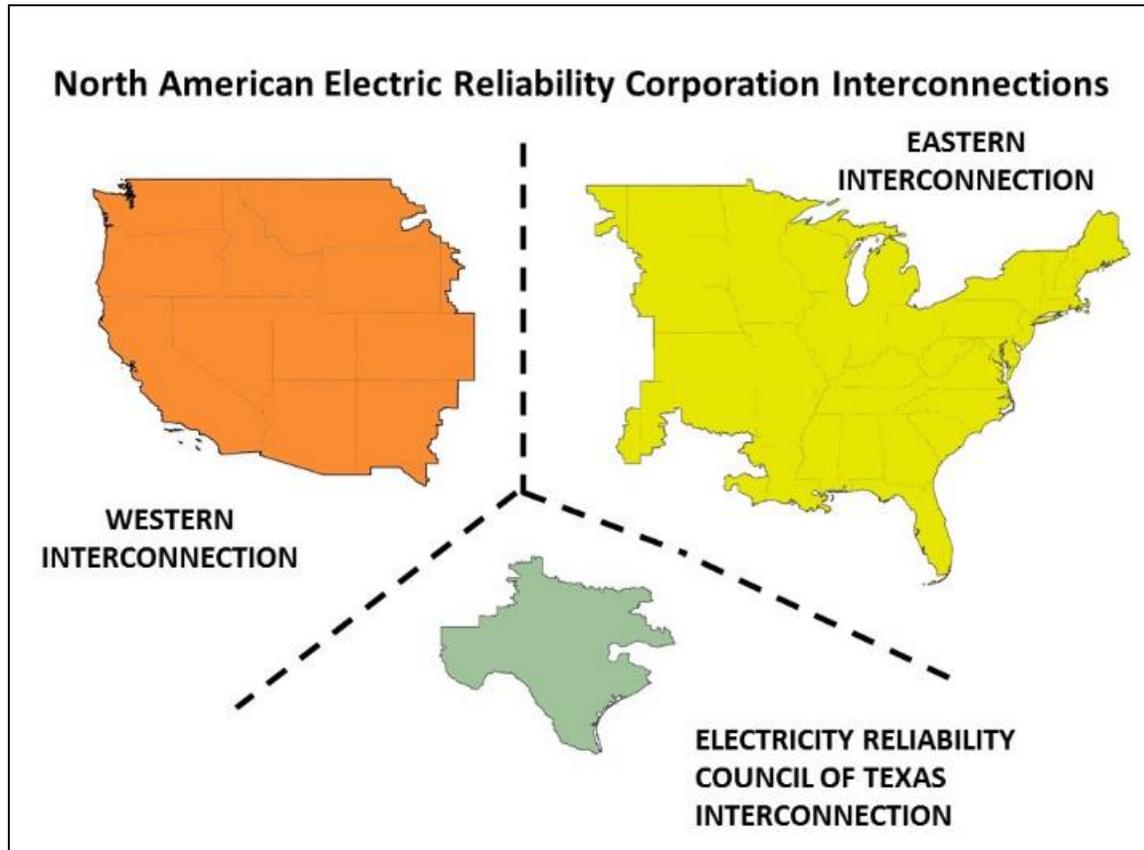

<sup>15</sup> For a detailed analysis of the proposed rule's methodology, see CRS Report R43652, *State CO<sub>2</sub> Emission Rate Goals in EPA's Proposed Rule for Existing Power Plants*, by Jonathan L. Ramseur.

<sup>16</sup> See EPA, *Greenhouse Gas Mitigation Measures*, Technical Support Document, August 2015, p. 4-11, <http://epa.gov/airquality/cpp/tsd-cpp-ghg-mitigation-measures.pdf>.

stringent emission rate for each source as the national performance standard for each fossil fuel source.

To generate state-specific emission rate targets, EPA applied the annual performance rates to each state's baseline (2012) fossil fuel generation mix. These state-specific emission rate targets are listed in **Table A-1**.

**Figure 2. Regions in EPA's Methodology**

**Source:** Reproduced from EPA, *Overview of the Clean Power Plan: Cutting Carbon Pollution from Power Plants*, August 2015, <http://www.epa.gov/airquality/cpp/fs-cpp-overview.pdf>. The figure has a minor error, as the Texas region should be labeled as the Electric Reliability Council of Texas (ERCOT) Interconnection.

**Notes:** EPA did not establish emission rate goals for Vermont and the District of Columbia because they do not currently have affected EGUs. Although Alaska and Hawaii have targets in the proposed rule, in its final rule, EPA stated that Alaska, Hawaii, and the two U.S. territories with affected EGUs (Guam and Puerto Rico) will not be required to submit state plans on the schedule required by the final rule, because EPA "does not possess all of the information or analytical tools needed to quantify" the best system of emission reduction for these areas. EPA stated it will "determine how to address the requirements of section 111(d) with respect to these jurisdictions at a later time."

## 2012 Baseline

After EPA's proposed rule in June 2014, multiple states and stakeholders raised a variety of concerns with EPA's use of 2012 as the baseline year to calculate the emission rate targets. In both its proposed and final rules, EPA uses 2012 as the baseline year in its emission rate and mass-based target calculations. However, EPA made several state-specific adjustments in the final rule to address some of the concerns. Perhaps the most substantial adjustments are in states that

generate a significant percentage of electricity from hydropower. According to EPA, 2012 was an “outlier” year for snowpack, resulting in relatively high use of hydropower and a corresponding decrease in fossil fuel generation in particular states.<sup>17</sup> As **Table A-1** indicates, this adjustment seemed to have a considerable impact in states that use a high percentage of hydropower: Washington, Oregon, Idaho, and Maine. In addition, EPA made other state-specific adjustments for EGUs that came online during 2012.

## Renewable Energy Treatment

Renewable energy played a significant role in the proposed rule, and its role appears to be even greater in the final rule. Although an in-depth analysis of renewable energy in the final rule is beyond the scope of this report, a comparison of estimated results from the Regulatory Impact Analyses (RIA) accompanying the proposed and final rules indicates a substantial increase in EPA’s analysis of renewable energy’s contribution to the nation’s electricity portfolio by 2030. For example, in the proposed rule RIA, non-hydro renewable energy generation was projected to increase by 2% in 2030, compared to a business-as-usual scenario.<sup>18</sup> In the final rule RIA, non-hydro renewable energy generation was projected to increase by 9% in 2030 (under a rate-based scenario), compared to a business-as-usual scenario.<sup>19</sup>

In addition, renewable energy is included in a new voluntary program that EPA developed for the final rule. This program would provide incentives to states to develop renewable energy projects in 2020 and 2021 (discussed below).

## Energy Efficiency Treatment

As mentioned above, EPA’s final rule does not include demand-side energy efficiency (EE) improvements in its emission rate methodology. In EPA’s proposed rule, EE improvements were addressed in building block 4. The impacts of building block 4 on emission rate targets varied by state.<sup>20</sup> In general, the effects appeared more pronounced in states that generate a large percentage of their electricity from sources that were not already included in the proposed rule emission rate equation—primarily hydroelectric power and, to some extent, nuclear power.

In its final rule, EPA explained its reasoning for removing EE from the building blocks:

[Clean Air Act] section 111 has allowed regulated entities to produce as much of a particular good as they desire provided that they do so through an appropriately clean (or low-emitting) process. While building blocks 1, 2, and 3 fall squarely within this paradigm, the proposed building block 4 does not.<sup>21</sup>

Building block 4 is outside our paradigm for section 111 as it targets consumer-oriented behavior and demand for the good, which would reduce the amount of electricity to be produced.<sup>22</sup>

---

<sup>17</sup> Final rule, starting on p. 793.

<sup>18</sup> EPA, *Regulatory Impact Analysis for the Proposed Carbon Pollution Guidelines for Existing Power Plants and Emission Standards for Modified and Reconstructed Power Plants*, June 2014, Table 3-11.

<sup>19</sup> EPA, *Regulatory Impact Analysis for the Clean Power Plan Final Rule*, August 2015, Table 3-11.

<sup>20</sup> See Table 7 in CRS Report R43652, *State CO<sub>2</sub> Emission Rate Goals in EPA’s Proposed Rule for Existing Power Plants*, by Jonathan L. Ramseur.

<sup>21</sup> Final rule, p. 390.

<sup>22</sup> *Ibid.*, p. 604.

Although EPA removed EE from its emission rate calculations, states may choose to employ EE improvement activities as part of their plans to meet their targets. In particular, the final rule includes a new voluntary program that provides incentives for early investments (in 2020 and 2021) in EE programs in low-income communities (as discussed below).

### **Nuclear Power Treatment**

EPA modified its treatment of nuclear power in the final rule. In its proposed rule, EPA factored “at risk” nuclear power (estimated at 5.8%)<sup>23</sup> into the state emission rate methodology. As a result, states had an incentive to maintain the at-risk nuclear power generation or their emission rates would increase (all else being equal). The final rule does not include at-risk nuclear generation in its building block calculations. EPA stated:

It is inappropriate to base the BSER in part on the premise that the preservation of existing low- or zero-carbon generation, as opposed to the production of incremental, low- or zero-carbon generation, could reduce CO<sub>2</sub> emissions from current levels.<sup>24</sup>

In addition, in its final rule, EPA decided not to include under-construction nuclear power capacity in the emission rate calculations. In its proposed rule, EPA identified five under-construction nuclear units at facilities in Georgia, South Carolina, and Tennessee. Including the estimated generation from these anticipated units in the emission rate equation would have substantially lowered the emission rate targets of these three states. If the final rule had retained this feature, and these nuclear units did not complete construction and enter service, these three states would likely have more difficulty achieving their emission rate goals. EPA clarified that the final rule would allow the generation from under-construction units, new nuclear units, and capacity upgrades to help sources meet emission rate or mass-based targets.

### **Biomass Treatment<sup>25</sup>**

In its final rule, EPA would allow states to use “qualified biomass” as a means of meeting state-specific reduction requirements.<sup>26</sup> This appears to be a narrower approach than was taken in the proposed rule. Also, EPA requires additional accounting and reporting requirements if a state decides to use qualified biomass. The agency gives some indication as to which biomass types may qualify:

The EPA generally acknowledges the CO<sub>2</sub> and climate policy benefits of waste-derived biogenic feedstocks and certain forest- and agriculture-derived industrial byproduct feedstocks.... Use of such waste derived and certain industrial byproduct biomass feedstocks would likely be approvable as qualified biomass in a state plan when proposed with measures that meet the biomass monitoring, reporting and verification requirements.<sup>27</sup>

---

<sup>23</sup> Using projections from Energy Information Administration, EPA determined that 5.8% of total U.S. nuclear power capacity was at risk of being retired in the near future. See EPA, *GHG Abatement Measures*, Technical Support Document, June 2014, <http://www2.epa.gov/sites/production/files/2014-06/documents/20140602tsd-ghg-abatement-measures.pdf>.

<sup>24</sup> Final rule, p. 388.

<sup>25</sup> For more information on biomass issues, see CRS Report R41440, *Biopower: Background and Federal Support*, by Kelsi Bracmort.

<sup>26</sup> EPA defines qualified biomass as a “feedstock that is demonstrated as a method to control increases of CO<sub>2</sub> levels in the atmosphere.” Final rule, p. 1552.

<sup>27</sup> *Ibid.*, p. 1166.

EPA's review of biomass power and its role in the CPP will continue, with the agency looking at efforts external but still relevant to the CPP and biomass. For example, in November 2014, EPA released a second draft of the technical report, *Framework for Assessing Biogenic Carbon Dioxide for Stationary Sources*. EPA expects another round of peer review for this report in 2015. In addition, EPA stated that it will “closely monitor overall bioenergy demand and associated landscape conditions for changes that might have negative impacts on public health or the environment.”<sup>28</sup>

## Clean Energy Incentive Program<sup>29</sup>

EPA's final CPP includes a Clean Energy Incentive Program (CEIP) “to reward early investments in renewable energy (RE) generation and demand-side energy efficiency (EE) measures ... during 2020 and/or 2021.”<sup>30</sup> The CEIP was not part of the proposed rule and is optional for states. States would need to include particular design elements in their final plans if they want to participate.

The CEIP sets up a system to award credits to EE projects in low-income communities and RE projects (only wind and solar) in participating states.<sup>31</sup> The credits are in the form of emission rate credits (ERCs) or emission allowances, depending on whether a state uses an emission rate or mass-based target, respectively. The credits could be sold to or used by an affected emission source to comply with the state-specific requirements (e.g., emission rate or mass-based targets).

RE projects would receive one credit (either an allowance or ERC) from the state and one credit from EPA for every two megawatt-hours (MWh) of solar or wind generation. EE projects in low-income communities would receive double credits: For every two MWh of avoided electricity generation, EE projects will receive two credits from the state and two credits from EPA. EPA will match up to 300 million short tons in credits during the CEIP program life. The amount of EPA credits potentially available to each state participating in the CEIP depends on the relative amount of emission reduction each state is required to achieve compared to its 2012 baseline. Thus, states with greater reduction requirements would have access to a greater share of the EPA credits.

To generate the credits, states would effectively borrow from their mass-based or rate-based compliance targets for the interim 2022-2029 compliance period. EPA would provide its share of credits from a to-be-established reserve. In its proposed rule for the federal implementation plan (discussed above), EPA is asking for comments on the size of the credit reserve and other CEIP implementation details.<sup>32</sup>

## Electricity Reliability<sup>33</sup>

The proposed CPP generated substantial interest in the potential effects of the rule on the reliability of the electric power supply. EPA asserts that it does not want compliance with the final rule to interfere with industry's ability to maintain the reliability of the nation's electricity supply. EPA's final rule would address electric system reliability in several ways.

---

<sup>30</sup> EPA, *Fact Sheet: Clean Energy Incentive Program*, August 2015, <http://www.epa.gov/airquality/cpp/fs-cpp-ceip.pdf>.

<sup>31</sup> Final rule, starting on p. 865.

<sup>32</sup> Available at <http://www.epa.gov/airquality/cpp/cpp-proposed-federal-plan.pdf>.

<sup>33</sup> This section was written by Richard J. Campbell, Specialist in Energy Policy, 7-7905.

In the final rule, we are requiring that each state demonstrate in its final state plan submittal that it has considered reliability issues in developing its plan. Second, we recognize that issues may arise during the implementation of the guidelines that may warrant adjustments to a state's plan in order to maintain electric system reliability. The final guidelines make clear that states have the ability to propose amendments to approved plans in the event that unanticipated and significant electric system reliability challenges arise and compel affected EGUs to generate at levels that conflict with their compliance obligations under those plans.<sup>34</sup>

In particular, the final rule contains a provision for a reliability "safety valve" for individual power plants.<sup>35</sup> EPA states that there may be a need for an EGU to continue to operate and release "excess emissions" if an emergency situation arises that could compromise electric system reliability. The reliability safety valve allows for a 90-day reprieve from carbon emissions limits. EPA stated that the safety valve could be triggered only in an emergency situation. For example, extreme weather events are "of short duration and would not require major—if any—adjustments to emission standards for affected EGUs or to state plans."<sup>36</sup>

In addition, EPA, the Department of Energy, and the Federal Energy Regulatory Commission have agreed to coordinate efforts while the state compliance plans are developed and implemented to ensure that the power sector can continue to maintain electric reliability. A formal memorandum expresses their joint understanding of how they will cooperate, monitor, implement, share information, and resolve difficulties that may be encountered.<sup>37</sup>

**Source:** Prepared by CRS; proposed rule target and baseline data from EPA, *Goal Computation Technical Support Document* (June 2014) and accompanying spreadsheets, <http://www2.epa.gov/carbon-pollution-standards/clean-power-plan-proposed-rule-technical-documents>; final rule target and baseline data from EPA, *CO<sub>2</sub> Emission Performance Rate and Goal Computation Technical Support Document for CPP Final Rule* (August 2015) and accompanying spreadsheets, <http://www2.epa.gov/cleanpowerplan/clean-power-plan-final-rule-technical-documents>.

**Notes:** EPA did not establish emission rate goals for Vermont and the District of Columbia because they do not currently have affected EGUs. Although Alaska and Hawaii had targets in the proposed rule, in its final rule, EPA stated that Alaska, Hawaii, and the two U.S. territories with affected EGUs (Guam and Puerto Rico) will not be required to submit state plans on the schedule required by the final rule, because EPA “does not possess all of the information or analytical tools needed to quantify” the best system of emission reduction for these areas. EPA stated it will “determine how to address the requirements of section 111(d) with respect to these jurisdictions at a later time.”

EPA used different formulas to prepare the 2012 baselines in the proposed and final rules. The final rule baseline includes pounds of CO<sub>2</sub> generated from affected EGUs in each state (the numerator) divided by the electricity generated from these units. The proposed rule baseline included pounds of CO<sub>2</sub> generated from affected EGUs in each state (the numerator) divided by the electricity generated from these units *and* “at-risk” nuclear power and renewable energy generation (the denominator). Including these additional elements in the denominator can yield lower baselines compared to the final rule.

In addition, EPA made several state-specific adjustments to the 2012 baselines in the final rule. In all cases, these adjustments increased the state baselines.

## Summary

On October 1, 2015, the Environmental Protection Agency (EPA) finalized revisions to the National Ambient Air Quality Standards (NAAQS) for ground-level ozone. The rule sets more stringent standards, lowering both the primary (health-based) and secondary (welfare-based) standards from the current 75 parts per billion (ppb) to 70 ppb. This report discusses the standard-setting process, the specifics of the current and past reviews, and issues raised by the final rulemaking.

NAAQS are standards for outdoor (ambient) air that are intended to protect public health and welfare from harmful concentrations of pollution. By lowering the NAAQS for ozone, EPA has concluded that protecting public health and welfare requires lower concentrations of ozone pollution than were previously judged to be safe. In high enough concentrations, ozone aggravates heart and lung diseases and may contribute to premature death. Ozone also can have negative effects on forests and crop yields, which the secondary (welfare-based) NAAQS is intended to protect.

NAAQS do not directly limit emissions of a pollutant; rather, they set in motion a long process in which states and EPA identify areas that do not meet the standards and states prepare implementation plans to demonstrate how emissions will be lowered sufficiently to reach attainment in those areas. Using monitoring data and recommendations submitted by the states, EPA expects to designate nonattainment areas for the revised ozone NAAQS no earlier than October 2017, and states would have until at least 2020 to achieve compliance with the revised standards. Areas with more severe ozone pollution would have additional time to reach attainment, with an ultimate deadline as late as 2037 in the most polluted areas.

As of October 2015, 122 million people (40% of the U.S. population) lived in areas classified as “nonattainment” for the current 75 ppb ozone NAAQS. These areas include 224 counties in 25 states and the District of Columbia. The revised standard may affect more areas. If the nonattainment designations were made using current (i.e., 2012-2014) monitoring data, EPA estimates that 241 counties in 33 states would be in nonattainment at 70 ppb. The actual designations will be based on later (likely 2014-2016) monitoring data, and may differ.

EPA projects that most areas will be able to reach attainment of the new standards as a result of already promulgated regulations for gasoline, autos, power plants, and other sources of emissions. Thus, the agency’s estimates of the cost of NAAQS compliance included in the Regulatory Impact Analysis accompanying the final rule are substantially lower than many earlier analyses (including the agency’s own). EPA estimates the cost of meeting a 70 ppb standard in all states except California at \$1.4 billion annually in 2025. Because most areas in California would have until the 2030s to reach attainment, EPA provided separate cost estimates for California (\$0.80 billion post-2015). EPA’s cost estimates are substantially less than one from the National Association of Manufacturers that has been widely circulated. EPA estimates the economic value of the benefits of reducing ozone concentrations at \$2.9 billion-5.9 billion annually by 2025. Some stakeholders have argued that EPA overstates these benefits.

Members of Congress have shown particular interest in whether the expected benefits of the proposed standards justify their projected costs—a perennial issue raised by stakeholders when EPA considers revising NAAQS. Both nationwide and in California, the agency expects the benefits of attainment to exceed the costs, but there is controversy over the methods used to estimate both. More importantly, as the Clean Air Act is currently written, the agency is prohibited from weighing costs against benefits in setting the standards. The statute simply states

that the Administrator is to set the primary standard at a level requisite to protect public health, allowing an adequate margin of safety.

Because of the potential cost, various interest groups have lobbied against strengthening the standards. In the 114<sup>th</sup> Congress, four bills have been introduced to delay the promulgation of a revised ozone NAAQS or to change EPA's authority to revise the standards: H.R. 1044, H.R. 1327/S. 640, H.R. 1388/S. 751, and H.R. 2111. The standards could also be the subject of a resolution of disapproval under the Congressional Review Act.

## Introduction

On October 1, 2015, under the authority of Sections 108 and 109 of the Clean Air Act (CAA) as amended,<sup>1</sup> the Environmental Protection Agency (EPA) finalized revisions<sup>2</sup> to the National Ambient Air Quality Standards (NAAQS) for ground-level ozone<sup>3</sup> from the then-current level of 75 parts per billion (ppb) to 70 ppb. The revised standards are based on a review of 2,300 scientific studies by EPA staff.<sup>4</sup> The EPA science assessment was itself reviewed by a panel of 20 outside scientific experts, a group known as the Clean Air Scientific Advisory Committee (CASAC).<sup>5</sup>

The EPA Administrator was under a court order to sign any changes to the standards by October 1, 2015. A comment period, public hearings, and interagency review had followed the publication of a proposed range of standards in December 2014.

Ground-level ozone (often referred to as “smog”) is associated with potentially serious health effects when present in high enough concentrations. These health effects include aggravated asthma, chronic bronchitis, and heart attacks, and in some cases premature death. In its revised Regulatory Impact Analysis (RIA) accompanying the final rule,<sup>6</sup> EPA states that reducing concentrations to 70 parts per billion (ppb) versus the previous standard of 75 ppb<sup>7</sup> would avoid 320 to 660 premature deaths annually in 2025 nationwide (excluding California). [Note: California was excluded from EPA’s estimate of both costs and benefits of the nationwide standard, because most areas of the state will have until the 2030s to reach attainment of the NAAQS.<sup>8</sup> California costs and benefits are presented separately in the “Costs and Benefits of Control” section of this report.]

<sup>1</sup> The Clean Air Act, codified as 42 U.S.C. 7401 *et seq.*

<sup>2</sup> U.S. Environmental Protection Agency (EPA), “National Ambient Air Quality Standards for Ozone: Final Rule,” October 1, 2015, <http://www3.epa.gov/ozonepollution/actions.html>. The rule appeared in the Federal Register October 26, 2015, at 80 *Federal Register* 65292.

<sup>3</sup> Ground-level (tropospheric) ozone can be a lung irritant with serious adverse health effects. In the stratosphere, however, ozone protects the Earth from harmful ultraviolet rays of the sun. For more information, see EPA, “Ozone—Good Up High Bad Nearby,” at <http://www.epa.gov/airquality/gooduphigh/>.

<sup>4</sup> See EPA, “Final Report: Integrated Science Assessment of Ozone and Related Photochemical Oxidants,” U.S. EPA, Washington, DC, EPA/600/R-10/076F, 2013, <http://cfpub.epa.gov/ncea/isa/recordisplay.cfm?deid=247492>.

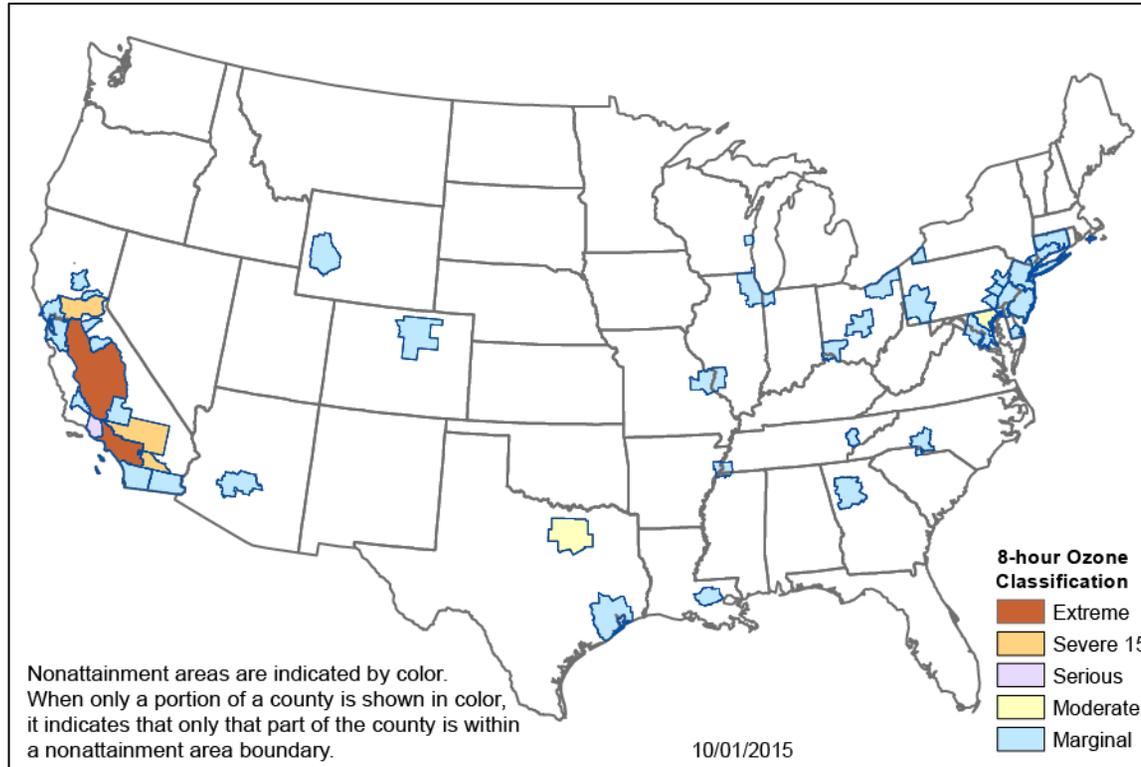

<sup>5</sup> CASAC’s review of the ISA, dated November 14, 2012, can be found at [http://yosemite.epa.gov/sab/sabproduct.nsf/60C2732674A5EEF385257AB6007274B9/\\$File/EPA-CASAC-13-001+unsigned.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/60C2732674A5EEF385257AB6007274B9/$File/EPA-CASAC-13-001+unsigned.pdf).

<sup>6</sup> EPA, *Regulatory Impact Analysis of the Final Revisions to the National Ambient Air Quality Standards for Ground-Level Ozone*, September 2015, pp. ES-14 to ES-19, at <http://www3.epa.gov/ozonepollution/pdfs/20151001ria.pdf>. Hereinafter, “EPA, 2015 RIA.” A separate estimate for California shows a 70 ppb NAAQS resulting in 120-220 premature deaths avoided annually post-2025 (p. ES-18).

<sup>7</sup> The ozone NAAQS is also frequently expressed in terms of parts per *million* rather than parts per *billion*. A standard of 0.075 parts per million (ppm) would be the same as a standard of 75 parts per billion (ppb), and is often referred to as such. This report uses parts per billion in most cases, as does EPA in most of the explanatory materials accompanying the standard. Until 2008, the standard was expressed in parts per million with two decimal places (e.g., 0.08 ppm from 1997 to 2008). Without a third decimal place, concentrations as high as 0.084 ppm (or 84 ppb) could be rounded to 0.08 and considered to be in attainment of the standard. The 2008 standard added greater precision to the standard by adding a third decimal place (0.075 ppm).

<sup>8</sup> Most of California’s population lives in areas classified as Severe or Extreme for their nonattainment, under the Clean Air Act’s statutory categorization scheme. These areas have more stringent emission control requirements and more time to reach attainment, so EPA provided separate cost-benefit estimates for the state.

**Figure 1. Current Ozone Nonattainment Areas, October 2015 (2008 Standard, 0.075 ppm)**

**Source:** U.S. EPA Green Book, [http://www.epa.gov/airquality/greenbk/map8hr\\_2008.html](http://www.epa.gov/airquality/greenbk/map8hr_2008.html). Map shows areas designated nonattainment by EPA as of October 1, 2015.

**Notes:** Nonattainment designations were based on 2008-2010 monitoring data in most cases. Some areas that have not attained the 2008 standard are also designated nonattainment for the less stringent 1997 standard. These areas may have more recent monitoring data that demonstrate attainment with the 1997 (and the 2008) standards, but they must have an approved maintenance plan in place before they will be removed from the list of nonattainment areas.

High ozone concentrations also affect the growth of plants, causing damage to both forests and field crops. In 2006, the U.S. Forest Service examined 380 monitoring sites in the Mid-Atlantic and Southeastern states and found visible injury to forest plants from ozone at 121 (32%) of them. At 20 of the sites, the damage was described as “severe.”<sup>9</sup> In addition, EPA found that “several economically important crop species are sensitive to ozone levels typical of those found in the United States,” and estimated that crop losses could be reduced by \$400 million to \$620 million annually by implementation of a more stringent ozone standard.<sup>10</sup>

While EPA’s analysis has found that there would be substantial health and welfare benefits to reducing ozone, the agency also has concluded that there could be substantial costs. EPA estimates the economic value of the benefits of reducing ozone concentrations to 70 ppb (for areas other than California) at \$2.9 billion-5.9 billion annually by 2025, with costs at \$1.4 billion annually in 2025.<sup>11</sup>

The ozone NAAQS are among EPA’s most far-reaching standards. At the current level, set in March 2008 (75 ppb), 122 million people live in areas that were designated nonattainment for the standards (see **Figure 1**).<sup>12</sup> These 45 areas (referred to as “nonattainment areas”) include 224 counties in 25 states and the District of Columbia. The areas generally coincide with metropolitan areas, but may be larger or smaller.

The agency states that if the most recent available monitoring data (for the years 2012-2014) were used to identify nonattainment areas for the revised standards, the number of counties showing nonattainment would be 241 in 33 states (see **Figure 2**).<sup>13</sup> Actual nonattainment designations will not be made until late 2017 at the earliest, however, and EPA notes that the decisions will most likely be based on 2014-2016 monitoring data. In the intervening years, the emissions that contribute to ozone formation are likely to decline, in response to already promulgated standards for motor vehicles, gasoline, power plants, and other sources of emissions. Thus, the number of counties showing nonattainment may be less than the estimate shown in **Figure 2**.<sup>14</sup>

The potential economic, health, and environmental impacts of a change in the ozone NAAQS have led to great interest in EPA’s ongoing review of the standards. To assist Members and staff in evaluating EPA’s review, this report provides background on NAAQS, the process used to establish them, the 2008 ozone standards, and issues that may be raised as EPA implements the final rule.

---

<sup>9</sup> EPA, *Regulatory Impact Analysis, Final National Ambient Air Quality Standard for Ozone*, July 2011, p. 64, at [http://www.epa.gov/glo/pdfs/201107\\_OMBdraft-OzoneRIA.pdf](http://www.epa.gov/glo/pdfs/201107_OMBdraft-OzoneRIA.pdf).

<sup>10</sup> *Ibid.*, p. 74.

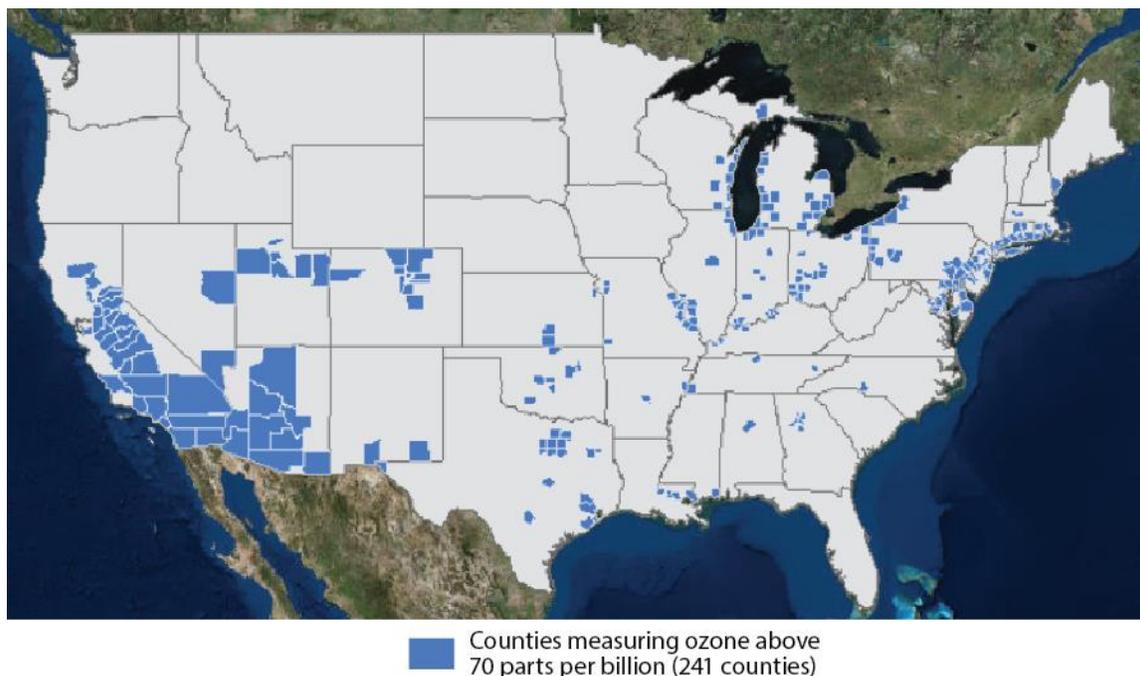

<sup>11</sup> EPA, 2015 RIA, p. ES-15. Most of California’s population lives in areas classified as Severe or Extreme for their nonattainment, under the Clean Air Act’s statutory categorization scheme. These areas have more stringent emission control requirements and more time to reach attainment, so EPA provided separate cost-benefit estimates for the state.

<sup>12</sup> For specifics, see EPA’s “Green Book,” at <http://www.epa.gov/oaqps001/greenbk/hntc.html>.

<sup>13</sup> EPA, “Ozone Maps,” at <http://www3.epa.gov/ozonepollution/maps.html>.

<sup>14</sup> When the agency last promulgated a revision to the ozone NAAQS in March 2008, it identified 345 counties with monitors showing nonattainment of the new standard. By the time the agency designated nonattainment areas in May 2012, the number of nonattaining counties had declined to 232.

**Figure 2. Counties Where Measured Ozone Is Above the Final Standard of 0.070 ppm, Based on 2012-2014 Monitoring Data**

**Source:** U.S. Environmental Protection Agency, “Ozone Maps,” <http://www3.epa.gov/ozonepollution/maps.html>.

**Notes:** Actual nonattainment area designations will be made in 2017 or later based on 2014-2016 or later monitoring data.

## What Are NAAQS?

NAAQS are federal standards that apply to ambient (outdoor) air. Section 109 of the Clean Air Act directs EPA to set both primary NAAQS, which are standards, “the attainment and maintenance of which in the judgment of the [EPA] Administrator ... are requisite to protect the public health,” with “an adequate margin of safety,” and secondary NAAQS, which are standards necessary to protect public welfare, a broad term that includes damage to crops, vegetation, property, building materials, climate, etc.<sup>15</sup>

The pollutants for which NAAQS have been set are generally referred to as “criteria” pollutants. The act defines them as pollutants that “endanger public health or welfare,” and whose presence in ambient air “results from numerous or diverse mobile or stationary sources.”<sup>16</sup> Six pollutants are currently identified as criteria pollutants: ozone, particulates, carbon monoxide, sulfur dioxide, nitrogen oxides, and lead. The EPA Administrator can add to this list if she determines that additional pollutants meet the definition, or delete pollutants from the list if they no longer meet the definition. There have been no changes to the list, however, since the late 1970s.

<sup>15</sup> The CAA’s definition of welfare is found in Section 302(h) of the act (42 U.S.C. 7602(h)).

<sup>16</sup> Authority to establish NAAQS comes from both Sections 108 and 109 of the act; this definition of criteria pollutants is found in Section 108. The authority and procedures for controlling the sources of criteria pollutants are found throughout Titles I, II, and IV of the act. Many pollutants that are less widely emitted are classified as “hazardous air pollutants” and are regulated under a different section of the act (Section 112). That section lists 187 pollutants or groups of pollutants as hazardous and establishes different authorities and requirements for controlling their emissions.

NAAQS are at the core of the Clean Air Act even though they do not directly regulate emissions. In essence, they are standards that define what EPA considers to be clean air for the pollutant in question. Once a NAAQS has been set, the agency, using monitoring data and other information submitted by the states, identifies areas that exceed the standards and must reduce pollutant concentrations (referred to as “nonattainment areas”). This designation process is often delayed by litigation over the standards, by EPA’s agreement to reconsider aspects of them, or by consultations with the states regarding the specifics of the areas to be designated. Designation of nonattainment areas for the 1997 ozone NAAQS, for example, took seven years. Designations under the 2008 standards took four years.

After nonattainment areas are designated, state and local governments have up to three years to produce State Implementation Plans (SIPs), which outline the measures that will reduce emission levels and attain the standards. Finalizing SIPs, through EPA review and approval, often takes longer.

Under the CAA, actual attainment of the standards is allowed to stretch over a 3-year to 20-year period, depending on the severity of the area’s pollution. Ozone nonattainment areas are designated as Marginal, Moderate, Serious, Severe, or Extreme, depending on the level of pollution. Each of these classifications comes with required pollution control measures: the more severe the pollution, the more stringent are the required controls, and the longer the area is allowed before it must demonstrate attainment.<sup>17</sup>

Thus, establishment or revision of a NAAQS is not an event that requires immediate compliance with an air quality standard; rather, it sets in motion a long and complex implementation process. That process may ultimately have far-reaching impacts for public health and welfare, for sources of pollution in numerous economic sectors, and for states and local governments.

EPA has several tools available to encourage nonattainment areas to comply with a NAAQS. The most frequently mentioned of these is the potential for highway-fund sanctions: failure to submit or implement a SIP adequate to attain or maintain compliance with the NAAQS can lead to the temporary suspension of federal highway funds for new non-safety-related projects. Ultimately, EPA can impose a federal implementation or maintenance plan (a FIP) in an area that does not have an approved SIP. Imposition of sanctions or FIPs is relatively rare, however: generally the states avoid sanctions by submitting plans that require sufficient emission reductions to be deemed adequate by EPA.

In addition to state and local actions to address ambient concentrations of NAAQS pollutants, EPA itself acts to control emissions and concentrations of criteria pollutants through national standards. These national standards apply to products that contribute to ozone and other criteria pollution (particularly mobile sources, such as automobiles) and to stationary sources (such as power plants). These standards lead to emission reductions that states can factor into their implementation plans, reducing the need for local air pollution control measures.

## Reviewing the Ozone NAAQS

Section 109(d) of the Clean Air Act requires the agency to review each NAAQS every five years. That schedule is rarely met, but it often triggers lawsuits that force the agency to undertake a

---

<sup>17</sup> For a more detailed discussion, see CRS Report RL30853, *Clean Air Act: A Summary of the Act and Its Major Requirements*.

review.<sup>18</sup> In June 2013, the Sierra Club and three other groups filed suit over EPA's failure to complete the current ozone review by the March 2013 deadline, and a court subsequently ordered EPA to propose any changes to the standards by December 1, 2014, and complete the review, with promulgation of any revisions by October 1, 2015.<sup>19</sup>

An historical review of the ozone NAAQS and their revisions is presented in **Table 1**.

## The NAAQS Review Process

Reviewing an existing NAAQS is generally a long process. To begin the process, EPA scientists compile the scientific literature published since the last NAAQS revision, and summarize it in a report known as a Criteria Document or Integrated Science Assessment (ISA). The ISA for ozone, completed in February 2013, reviewed 2,300 scientific studies.<sup>20</sup>

Ozone ISAs cover topics as wide-ranging as the physics and chemistry of ozone in the atmosphere; environmental concentrations, patterns, and exposure; dosimetry; animal-to-human extrapolation; toxicology; interactions with co-occurring pollutants; controlled human exposure studies; epidemiology; effects on vegetation and ecosystems; effects on UVB (ultraviolet light) exposures and climate; and effects on man-made materials.

Following completion of the ISA, EPA prepares a Risk and Exposure Assessment to identify exposure pathways, at-risk populations, and health endpoints. This document was completed for the current review in August 2014.<sup>21</sup>

A final document prepared by EPA staff, the Staff Paper or Policy Assessment, summarizes the information compiled in the ISA and Risk Assessment and provides the Administrator with options regarding the indicators, averaging times, statistical form, and numerical level (concentration) of the NAAQS. A Policy Assessment was completed and publicly released on August 29, 2014.<sup>22</sup>

To ensure that NAAQS reviews meet the highest scientific standards, the 1977 amendments to the Clean Air Act required the Administrator to appoint an independent Clean Air Scientific Advisory Committee (CASAC). CASAC has seven members, largely from academia and from private research institutions. In conducting NAAQS reviews, their expertise is supplemented by panels of the nation's leading experts on the health and environmental effects of the specific pollutants that are under review. These panels can be rather large. The panel for the current ozone review, for example, has 20 members. CASAC and the public make suggestions regarding the membership of the panels on specific pollutants, with the final selections made by EPA. The panels evaluate

## Recent Reviews of the Ozone Standard

EPA last changed the NAAQS for ozone in March 2008, from 0.08 ppm (effectively 84 ppb) to 0.075 ppm (75 ppb). Although the standard was strengthened, the level chosen at that time was

subject to controversy. A 23-member CASAC Review Panel unanimously recommended a range of standards more stringent than what the Administrator chose.<sup>23</sup>

In September 2009, EPA agreed to reconsider the 2008 standard. As a result, a more stringent primary standard and a different version of the secondary standard were proposed in January 2010. After a year and a half of public comment and review, EPA sent what it considered a final set of standards to the Office of Management and Budget (OMB) for interagency review. The process was short-circuited, however, by a presidential decision to await conclusion of the next regular review—the review now nearing completion—before promulgating any change.

## The Primary Standard

The review completed in 2008 found evidence of health effects, including mortality, at levels of exposure below the then-current 0.08 ppm standard. As a result, both EPA staff and CASAC recommended strengthening the standard. CASAC stated: “There is no scientific justification for retaining the current [0.08 ppm] primary 8-hr NAAQS.”<sup>24</sup> The panel unanimously recommended a range of 0.060 to 0.070 ppm (60 to 70 parts per billion) for the primary (health-based) 8-hour standard.

EPA staff also recommended strengthening the primary standard. They recommended “considering a standard level within the range of somewhat below 0.080 parts per million (ppm) to 0.060 ppm.”<sup>25</sup>

Based on these recommendations, and his own judgment regarding the strength of the science, Stephen Johnson, the Bush Administration’s last EPA Administrator, chose to finalize the standard at 0.075 ppm (75 parts per billion).<sup>26</sup> That revision led to designation of nonattainment areas in April and May 2012, as shown above in **Figure 1**.<sup>27</sup>

The Regulatory Impact Analysis that accompanied the final 2008 standard identified 345 counties in 36 states in exceedance of the 0.075 ppm standard, using data for 2004-2006 (the most recent available at the time). By May 2012, when the nonattainment areas were actually designated, the number of counties in nonattainment had fallen to 232 in 26 states and the District of Columbia,

<sup>23</sup> In a letter to the Administrator sent after promulgation of the NAAQS, the panel’s chair stated, “Nevertheless, the members of the CASAC Ozone Review Panel do not endorse the new primary ozone standard as being sufficiently protective of public health. The CASAC—as the Agency’s statutorily-established science advisory committee for advising you on the national ambient air quality standards—unanimously recommended decreasing the primary standard to within the range of 0.060–0.070 ppm. It is the Committee’s consensus scientific opinion that your decision to set the primary ozone standard above this range fails to satisfy the explicit stipulations of the Clean Air Act that you ensure an adequate margin of safety for all individuals, including sensitive populations.” Letter of Rogene F. Henderson, Chair, Clean Air Scientific Advisory Committee, to EPA Administrator Stephen L. Johnson, April 7, 2008, at [http://yosemite.epa.gov/sab/sabproduct.nsf/4AF8764324331288852574250069E494/\\$File/EPA-CASAC-08-009-unsigned.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/4AF8764324331288852574250069E494/$File/EPA-CASAC-08-009-unsigned.pdf).

<sup>24</sup> Letter of Rogene Henderson, Chair, Clean Air Scientific Advisory Committee, to Hon. Stephen L. Johnson, EPA Administrator, October 24, 2006, available at [http://yosemite.epa.gov/sab/sabproduct.nsf/AB290E0DB8B72A33852572120055858F/\\$File/casac-07-001.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/AB290E0DB8B72A33852572120055858F/$File/casac-07-001.pdf).

<sup>25</sup> “Review of National Ambient Air Quality Standards for Ozone Final Staff Paper, Human Exposure and Risk Assessments and Environmental Report,” Fact Sheet, at [http://www.epa.gov/ttn/naaqs/standards/ozone/data/2007\\_01\\_finalsp\\_factsheet.pdf](http://www.epa.gov/ttn/naaqs/standards/ozone/data/2007_01_finalsp_factsheet.pdf).

<sup>26</sup> All of EPA’s references to the 2008 standard are expressed as parts per million (e.g., 0.075 ppm), but many references in the press convert this to a more readable parts per billion (i.e., 75 parts per billion).

<sup>27</sup> Detailed information on the designations, including links to *Federal Register* notices, can be found on EPA’s website at <http://www.epa.gov/airquality/ozonepollution/designations/2008standards/regs.htm#may12>.

based mostly on data for 2008-2010.<sup>28</sup> In the intervening years, emissions declined in most areas as more stringent standards for both mobile and stationary sources took effect. The recession and other economic factors also contributed to the lower numbers. When the economy is operating well below capacity, emissions generally decline; and changes in the economy (e.g., fewer vehicle miles traveled and a switch to cleaner fuels) have resulted in lower emissions.

### ***Reconsideration of the 2008 Standard***

As noted, EPA began a process to reconsider the 2008 ozone NAAQS in September 2009, and proposed a more stringent primary NAAQS in January 2010. The reconsideration process, which generally relied on the same data as that used to set the 2008 standard, led EPA to recommend a primary NAAQS of 0.070 ppm (70 ppb), within the range recommended by the CASAC Ozone Review Panel in 2008. A draft final standard was prepared and sent to OMB for final interagency review in the summer of 2011, but was withdrawn at the President's request in September 2011.

### ***The Current Review***

The current review, after assessing hundreds of new studies, has reached conclusions similar to those of the 2008 process:

The available scientific evidence and exposure/risk information provide strong support for considering a primary O<sub>3</sub> [ozone] standard with a revised level in order to increase public health protection, including for at-risk populations and lifestages. Staff concludes that it is appropriate in this review to consider a revised primary O<sub>3</sub> standard level within the range of 70 ppb to 60 ppb. A standard set within this range would result in important improvements in public protection, compared to the current standard, and could reasonably be judged to provide an appropriate degree of public health protection, including for at-risk populations and lifestages. In its advice to the Administrator, CASAC also concluded that the scientific evidence and exposure/risk information support consideration of standard levels from 70 to 60 ppb. Within this range, CASAC concluded that a level of 70 ppb would provide little margin of safety and, therefore, provided the policy advice that the level of the O<sub>3</sub> standard should be set below 70 ppb.<sup>29</sup>

Based on these recommendations, the EPA Administrator proposed revising the primary NAAQS on November 26, 2014, to a level somewhere in the range of 65 to 70 ppb. She also asked for comments on retaining the current 75 ppb standard or promulgating a standard of 60 ppb.

### **The Secondary Standard**

As part of the review completed in 2008, the 2009-2011 reconsideration process, and the current review, EPA has also assessed the secondary NAAQS for ozone. As explained above, secondary NAAQS are standards necessary to protect public welfare, a broad term that includes damage to crops, vegetation, property, building materials, climate, etc.<sup>30</sup> Prior to 2008, the secondary standard was identical to the primary standard—0.08 ppm beginning in 1997.

<sup>28</sup> EPA, "Nonattainment Designations for the 2008 Ozone Standards—Counties by State, April 30, 2012 and May 31, 2012," at <http://www.epa.gov/air/ozonepollution/designations/2008standards/final/finaldes.htm>. A few states had certified monitoring data for 2009-2011, and their designations were based on that three-year period. As of January 2015, the number is 227 counties in 26 states and the District of Columbia. For a listing, see U.S. EPA Green Book, "8-Hr Ozone (2008) Nonattainment Areas," at <http://www.epa.gov/airquality/greenbook/hntc.html>.

<sup>29</sup> EPA, 2014 Policy Assessment, p. ES-5.

<sup>30</sup> The Clean Air Act's definition of welfare is found in Section 302(h) of the act (42 U.S.C. 7602(h)).

Ozone affects both tree growth and crop yields, and the damage from exposure is cumulative over the growing season. In order to address this damage, EPA staff recommended in the 2008 review that the Administrator establish a new form for the secondary standard: a seasonal (three-month) average that would cumulate hourly ozone exposures for the daily 12-hour daylight window (termed a “W126 index”).<sup>31</sup> The staff initially recommended a standard in a range of 7-21 parts per million-hours (ppm-hours). CASAC’s ozone panel agreed unanimously that the form of the secondary standard should be changed as the staff suggested, but it did not agree that the upper bound of the range should be as high as 21 ppm-hours, suggesting that the upper bound be no higher than 15 ppm-hours.<sup>32</sup>

The Administrator’s June 2007 proposal was in line with the staff recommendation, 7-21 ppm-hours, but his final March 2008 choice was to duplicate the primary standard he promulgated at that time. He set a secondary standard at 0.075 ppm averaged over 8 hours, rejecting the advice of both CASAC and his staff.

The secondary standard carries no deadline for attainment and has never been the subject of penalties or sanctions for areas that failed to meet it, but there was substantial disagreement between the Bush Administration EPA and the Office of Management and Budget over the form in which this standard should be set. OMB maintained that EPA had failed to consider or evaluate the effects of a W126 standard on “economic values, personal comfort, and well-being”—terms that are also included in the Clean Air Act’s definition of welfare—and thus did not provide a balanced consideration of welfare effects, as required by the act. OMB also maintained that EPA had not adequately demonstrated that the proposed secondary standard would be more protective than one set equal to the primary standard.<sup>33</sup> Ultimately, OMB prevailed.<sup>34</sup>

Upon reconsideration, the 2011 draft final standards would also have adopted the W126 index and would have set the secondary standard at 13 ppm-hours, in line with CASAC’s recommendations. With the President’s request to withdraw the draft standard and await completion of the current five-year review, a seasonal standard has yet to be implemented.

EPA’s August 2014 Policy Assessment renewed this debate, this time with an additional thumb on the scale. The agency’s staff again recommended that the Administrator set a secondary standard using the W126 index. The staff recommended a standard somewhere in the range of 7 to 17 ppm-hours, similar to CASAC’s recommended range of 7 to 15 ppm-hours.<sup>35</sup> In the interim, the D.C. Circuit Court of Appeals also weighed in. In a July 23, 2013, decision, *Mississippi v. EPA*, the court remanded the 2008 secondary standard to EPA for further explanation or

---

<sup>31</sup> The index gives greater weight to higher concentrations of ozone. For a detailed explanation of how it is calculated, see EPA, “June 2007 Proposal to Revise the National Ambient Air Quality Standards for Ground-level Ozone, General Overview,” pp. 14-15, at <http://www.epa.gov/groundlevelozone/pdfs/20070627slides.pdf>.

Johnson, EPA Administrator, March 12, 2008, at [http://www.reginfo.gov/public/postreview/Steve\\_Johnson\\_Letter\\_on\\_NAAQs\\_final\\_3-13-08\\_2.pdf](http://www.reginfo.gov/public/postreview/Steve_Johnson_Letter_on_NAAQs_final_3-13-08_2.pdf).

<sup>35</sup> See EPA, 2014 Policy Assessment, pp. ES-9 to ES-12.

reconsideration: the court found that “EPA must expressly ‘determine what level of ... protection is requisite to protect the public welfare,’ [citation omitted] and explain why this is so.”<sup>36</sup>

The 2015 final rule is something of a hybrid: it describes the protection offered by the proposed secondary standard in terms of a cumulative seasonal approach, but retains the practice of making the standard identical to the primary standard. The overview of the agency’s rule states:

- EPA also is strengthening the secondary standard to improve protection for trees, plants and ecosystems. Like the primary, an area will meet the standard if the fourth-highest maximum daily 8-hour ozone concentration per year, averaged over three years, is equal to or less than 70 ppb. [ ... ]
- The agency has assessed ozone exposure to vegetation using a seasonal index known as a “W126 index.” A W126 index, named after portions of the equation used to calculate it, is a weighted index designed to reflect the cumulative exposures that can damage plants and trees during the consecutive three months in the growing season when daytime ozone concentrations are the highest and plant growth is most affected.
- EPA determined that a W126 index level of 17 parts per million-hours (ppm-hours) is sufficient to protect the public welfare based on the latest science.
- Analyses of data from air quality monitors show that an 8-hour standard of 70 ppb will limit cumulative, seasonal exposures above a W126 index level of 17 ppm-hours, averaged over three years.<sup>37</sup>

Whether the last bullet is sufficient to address the D.C. Circuit decision in the *Mississippi* case is an open question. CASAC, in its review of the EPA staff recommendations, made two points that might argue against it being sufficient. First, they stated:

The CASAC does not support a level higher than 15 ppm-hrs. For example, at 17 ppm-hrs, the median tree species has 6% relative biomass loss, and the median crop species has over 5% yield loss. These levels are unacceptably high. ... Furthermore, there are specific economically significant crops, such as soybeans, that may not be protected at 15 ppm-hrs but would be protected at lower levels. A level below 10 ppm-hrs is required to reduce foliar injury. A level of 7 ppm-hrs is protective of relative biomass loss for trees and offers additional protection against crop yield loss and foliar injury.<sup>38</sup>

Second, CASAC specifically did not recommend a three-year average for the secondary standard, stating that if the agency chose a three-year average, “then the level of the standard should be revised downward such that the level for the highest three-month summation in any given year of the three-year period would not exceed the scientifically recommended range of 7 ppm-hrs to 15 ppm-hrs.”<sup>39</sup>

## Controlling Ozone Pollution

Controlling ozone pollution is more complicated than controlling many other pollutants, because ozone generally is not emitted directly by pollution sources. Rather, it forms in the atmosphere

<sup>36</sup> *Mississippi v. EPA*, 723 F.3d 246, 272, 273 (D.C. Cir. 2013) (ellipses in original).

<sup>38</sup> Letter of Dr. H. Christopher Frey, Chair, Clean Air Scientific Advisory Committee, to Hon. Gina McCarthy, Administrator, U.S. EPA, June 26, 2014, p. iii, at [http://yosemite.epa.gov/sab/sabproduct.nsf/5EFA320CCAD326E885257D030071531C/\\$File/EPA-CASAC-14-004+unsigned.pdf](http://yosemite.epa.gov/sab/sabproduct.nsf/5EFA320CCAD326E885257D030071531C/$File/EPA-CASAC-14-004+unsigned.pdf).

<sup>39</sup> *Ibid.*, pp. iii-iv.

when volatile organic compounds (VOCs) and nitrogen oxides (NO<sub>x</sub>) react in the presence of sunlight. The ozone concentration is as dependent on the temperature and amount of sunshine as it is on the presence of the precursor gases.

In general, ozone is a summertime pollutant. Other factors being equal, a cool, cloudy summer will produce fewer high ozone readings than a warm, sunny summer.

There are also complicated reactions that affect ozone formation. In general, lower emissions of precursor gases (particularly lower emissions of VOCs) lead to less ozone. But under some conditions, *higher* emissions of NO<sub>x</sub> lead to lower ozone readings. This makes modeling ozone air quality and predicting attainment more difficult and contentious than the modeling of other air pollutants, and can affect consultations between EPA and the states to determine the boundaries of nonattainment areas and the adequacy of SIPs.

Most stationary and mobile sources of air pollution are considered to be contributors to ozone pollution. Thus, there are literally hundreds of millions of sources of the pollutants of concern, and control strategies require implementation of a wide array of measures. Among the sources of VOCs are motor vehicles (about one-fourth of total emissions), industrial processes, particularly the chemical and petroleum industries, and any use of paints, coatings, and solvents (about 40% for these sources combined). Service stations, pesticide application, dry cleaning, fuel combustion, and open burning are other significant sources of VOCs. Nitrogen oxides come overwhelmingly from motor vehicles and fuel combustion by electric utilities and other industrial sources.

## Wintertime Ozone

An emerging set of issues has arisen in regard to wintertime ozone pollution in rural areas of the Western United States. Ozone is generally considered a summertime pollutant, but winter exceedances of the ozone NAAQS have recently been found to occur near oil and gas fields in rural areas of Wyoming, Utah, and Colorado.<sup>40</sup> At times, ozone concentrations as high as those in Los Angeles, the nation's smoggiest city, have been found in these areas—principally the Upper Green River Basin of Wyoming, the Uintah Basin of Utah, and a nearby area of Colorado. Thus far, only one of these areas, the Upper Green River Basin area of Wyoming, has been designated nonattainment.

The mechanism of ozone formation in the areas is still being studied, but recent assessments have found that the thousands of oil and gas wells in the two basins release VOCs that react with NO<sub>x</sub> from oil and gas operations and coal-fired power plants to create ozone. A study of the Uintah Basin by the National Oceanic and Atmospheric Administration, EPA, the Bureau of Land Management, the Western Energy Alliance, the Utah Department of Environmental Quality, and seven universities found that sources external to the basin are not major sources of the ozone found within it, and that among inventoried sources within the basin, 98% to 99% of the VOCs and 57% to 61% of the NO<sub>x</sub> come from oil and gas operations.<sup>41</sup> The sunlight necessary for

---

<sup>40</sup> Wintertime ozone levels are occasionally elevated in urban areas, as well, when concentrations of pollution become trapped in cold stagnant air near the Earth's surface. What is unusual about the rural areas discussed in this section of the report is that they do not experience high ozone concentrations in warm weather. In addition, elevated ozone in Western rural areas is a newly observed phenomenon, whereas pollution episodes associated with temperature inversions in urban areas have been observed for decades.

<sup>41</sup> *2012 Uintah Basin Winter Ozone & Air Quality Study*, Final Report, February 1, 2013, p. 2, at [http://rd.usu.edu/files/uploads/ubos\\_2011-12\\_final\\_report.pdf](http://rd.usu.edu/files/uploads/ubos_2011-12_final_report.pdf). The remaining NO<sub>x</sub> comes primarily from the Bonanza Power Plant.

ozone to be created is magnified when it is reflected off of heavy snow cover. Snow cover also helps create temperature inversions that trap polluted air in the basins. In winters with little snow, there have been few exceedances of the standards.<sup>42</sup>

In 2012, EPA promulgated standards requiring the reduction of VOC emissions from new and modified oil and gas production and transmission operations, including a requirement to use “green completions” on hydraulically fractured onshore natural gas wells. Further, in 2015, EPA proposed extending VOC reduction requirements to existing oil and gas sources in ozone nonattainment areas and states in the Ozone Transport Region.<sup>43</sup> (For a discussion, see CRS Report R42986, *An Overview of Air Quality Issues in Natural Gas Systems*, by Richard K. Lattanzio.) The impact of these regulations on wintertime ozone concentrations is yet to be determined.

## Costs and Benefits of Control

As noted elsewhere in this report (“The Role of Cost,” below), EPA is prohibited by statute from taking cost into account in setting NAAQS. Despite that prohibition, in order to comply with an executive order (E.O. 12866) and guidance from the Office of Management and Budget, the agency produces a Regulatory Impact Analysis (RIA) analyzing in detail the costs and benefits of new or revised NAAQS standards.<sup>44</sup>

### EPA's Cost Estimates

The RIA for the 2015 final rule shows estimates for 70 ppb (the high end of the range for the proposed NAAQS) and 65 ppb (the low end of the range for the proposed NAAQS). EPA's estimates of the nationwide benefits and costs of the two options for all areas except California are summarized in **Table 2**. The table shows projected annual costs and benefits for the year 2025.

The estimated annual nationwide costs (excluding the cost in California) is \$1.4 billion in 2025 for a 70 ppb standard.<sup>45</sup> Although this is a large sum, it is substantially less than the cost estimates EPA provided for the same range of standards in 2008 and 2011. At that time, EPA projected costs of \$19 billion to \$25 billion to attain a 70 ppb standard. Two factors account for the reduction in cost:

1. The baseline from which additional costs are projected is now set at 75 ppb (the current standard). In 2011, EPA projected \$7.6 billion to \$8.8 billion in costs to reach what is now the baseline.
2. Other rules promulgated since 2011 (notably the Tier 3 auto emission and gasoline standards and two rules affecting power plants) are expected to reduce ozone precursors whether or not EPA revises the NAAQS. As shown in **Figure 3**,

<sup>42</sup> Ibid. In the Uintah Basin, for example, winter 2011-2012 measurements indicated no exceedance of the 75 ppb NAAQS for ozone: the highest 8-hour average reading was 63 ppb. In 2010-2011, by contrast, there were 25 winter days with ozone levels exceeding the 75 ppb standard, with the highest 8-hour reading being 139 ppb.

<sup>43</sup> EPA, “Control Techniques Guidelines for the Oil and Natural Gas Industry (Draft),” EPA-453/P-15-001, August 2015, [http://www.epa.gov/airquality/oilandgas/pdfs/og\\_ctg\\_draft\\_081815.pdf](http://www.epa.gov/airquality/oilandgas/pdfs/og_ctg_draft_081815.pdf).

<sup>44</sup> Executive Office of the President, “Regulatory Planning and Review, Executive Order 12866 of September 30, 1993,” 58 *Federal Register* 51735, October 4, 1993, <http://www.archives.gov/federal-register/executive-orders/pdf/12866.pdf>.

<sup>45</sup> EPA, 2015 RIA, p. ES-15.

the 2015 RIA projects that, by 2025, these other (already promulgated) rules will bring monitored ozone levels to 70 ppb or below in all but 14 counties (excluding California) of the 241 counties currently showing nonattainment with the 70 ppb level.<sup>46</sup>

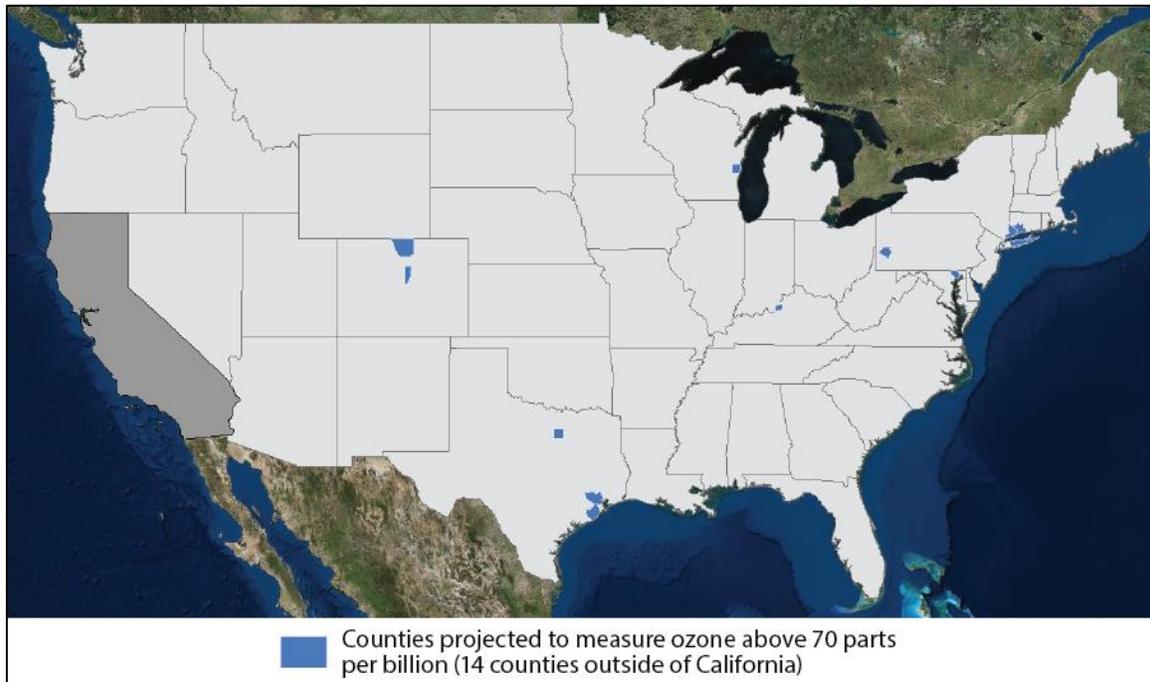

**Table 2. Estimated Annual Costs and Health Benefits of Ozone NAAQS Options, Nationwide Except California, in 2025**  
(in billions of 2011 dollars)

Option	Costs	Health Benefits
70 ppb	\$1.4	\$2.9 to \$5.9
65 ppb	\$16.0	\$15.0 to \$30.0

**Source:** U.S. Environmental Protection Agency, “Regulatory Impact Analysis” of the Final Revisions to the NAAQS for Ground-Level Ozone, September 2015.

**Notes:** The data reflect annualized costs and annual monetized benefits of achieving the standard in 2025 for all areas of the United States except California. Because of more severe pollution, the Clean Air Act will give most areas of California until the 2030s to reach attainment. The estimates assume a 7% discount rate.

**Figure 3. EPA Projection of Counties That Will Not Meet the Proposed Ozone Standards in 2025 Without Promulgation of Additional Emission Controls**

**Source:** U.S. Environmental Protection Agency, “Ozone Maps” accompanying the October 2015 release of the final ozone NAAQS rule, <http://www3.epa.gov/ozonepollution/maps.html>.

**Notes:** EPA did not include areas in California. Because of more severe pollution, the Clean Air Act will give many areas in California until the 2030s to reach attainment.

<sup>46</sup> See EPA, “Ozone Maps,” <http://www3.epa.gov/ozonepollution/maps.html>.

## EPA's Benefit Estimates

As presented in its 2015 RIA, EPA's estimate of monetized nationwide benefits (excluding those in California) range from \$2.9 billion to \$5.9 billion annually in 2025 for a 70 ppb standard. The public health benefits of setting a more stringent ozone standard are the monetized value of such effects as fewer premature deaths, fewer hospital admissions, fewer emergency room visits, fewer asthma attacks, less time lost at work and school, and fewer restricted activity days.<sup>47</sup> The RIA for the final standard states that the nationwide benefits of the revised standard (excluding California) would include the avoidance of 320 to 660 premature deaths annually in 2025 (at 70 ppb) or 1,590 to 3,320 deaths annually (at 65 ppb).<sup>48</sup> The dollar value of the avoided premature deaths accounts for 94% to 98% of EPA's total monetized benefits.<sup>49</sup>

The benefit estimates include benefits of reduced fine particle (PM<sub>2.5</sub>) concentrations associated with ozone controls, in addition to the benefits of reduced ozone itself. The RIA states that "PM<sub>2.5</sub> co-benefits account for approximately half to three-quarters of the estimated benefits, depending on the standard analyzed and on the choice of ozone and PM mortality functions used."<sup>50</sup> Including these co-benefits is consistent with the methodology EPA has used in valuing benefits of many other proposed and promulgated standards, but some observers are critical of this approach, noting that including these co-benefits results in a net benefit, whereas an analysis that considered the costs and benefits of ozone reductions in isolation would not. The control technologies used to capture ozone precursors do capture particles and their precursors, however. Since they do so at no additional cost, EPA considers this a benefit of the controls.

Other EPA projections of benefits associated with a 70 ppb standard in 2025 include preventing the following, annually:

- 28-260 nonfatal heart attacks,
- 960 hospital admissions and emergency room visits,
- 340 cases of acute bronchitis,
- 11,000 cases of upper and lower respiratory symptoms,
- 230,000 cases of exacerbated asthma,
- 188,000 days when people miss work or school, and
- 620,000 minor restricted activity days.<sup>51</sup>

## California and Other Regional Costs and Benefits

EPA provided separate cost and benefit estimates for California. Because of the statutory classification scheme for ozone nonattainment areas, under which more polluted areas have more stringent emission control requirements and more time to reach attainment, most areas of California will have until the 2030s to reach attainment. EPA's California estimates use

<sup>47</sup> For a full discussion of these variables and their monetized values, see Chapter 6 of the 2008 RIA at [http://www.epa.gov/ttn/ecas/regdata/RIAs/452\\_R\\_08\\_003.pdf](http://www.epa.gov/ttn/ecas/regdata/RIAs/452_R_08_003.pdf).

<sup>48</sup> EPA, 2015 RIA, p. ES-16.

<sup>49</sup> EPA's estimate uses an approach called the Value of a Statistical Life (VSL). See EPA, 2015 RIA, p. 6-55. For additional information on VSL, see archived CRS Report R41140, *How Agencies Monetize "Statistical Lives" Expected to Be Saved By Regulations*, by Curtis W. Copeland. (The author of that report is no longer with CRS. Questions on it should be directed to Maeve Carey, Analyst in Government Organization and Management.)

<sup>50</sup> EPA, 2015 RIA, p. 8-11.

<sup>51</sup> EPA, 2015 RIA, p. ES-16.

projections for post-2025 (see **Table 3**). The agency concluded: “Because of the differences in the timing of achieving needed emissions reductions, incurring costs, and accruing benefits for California, the separate costs and benefits estimates for post-2025 should not be added to the primary estimates for 2025.”<sup>52</sup>

EPA also estimated the costs of the proposed NAAQS separately for the eastern United States (defined as Texas and the 36 states to its north and east) and the western United States (Montana, Wyoming, Colorado, New Mexico, and other states to the west, excluding California). These regional estimates show that 98% of the \$1.4 billion estimated cost to achieve a 70 ppb standard is incurred by emission sources in the eastern United States.<sup>53</sup>

**Table 3. Estimated Annual Costs and Health Benefits of Ozone NAAQS Options in California, Post-2025**

(in billions of 2011 dollars)

Option	Costs	Health Benefits
70 ppb	\$0.8	\$1.2 to \$2.1
65 ppb	\$1.5	\$2.3 to \$4.2

**Source:** U.S. Environmental Protection Agency, RIA of the Final Revisions to the NAAQS for Ground-Level Ozone, September 2015.

**Notes:** The data reflect annualized costs and annual monetized benefits of achieving the standard (or a more stringent, 65 ppb option considered, but not adopted) post-2025 in California. Because of more severe pollution, the Clean Air Act will give most areas of California until the 2030s to reach attainment. The agency states that “estimates of costs and benefits for California in a post-2025 time frame are likely to be relatively more uncertain than the national attainment estimates for 2025.” In particular, the agency did not project emissions and air quality for any year other than 2025, although it assumed that emission controls and associated costs would occur through the beginning of 2038; benefits for California were modeled using population demographics in 2038. The estimates assume a 7% discount rate for future costs and benefits.

## Industry Estimates

Industry sources have generally estimated the future cost of emission controls necessary to attain a revised ozone NAAQS to be greater than EPA has. A 2015 study by the National Association of Manufacturers, for example, projected the cost of attaining a more stringent ozone NAAQS, as measured in reduced Gross Domestic Product, at up to \$140 billion annually from 2017 to 2040.<sup>54</sup>

In reaching these conclusions, the NAM study made a number of assumptions different from those in EPA's 2015 RIA:

- The study looked only at the most stringent option in the range proposed by EPA (65 ppb). EPA proposed a standard in the range of 65 to 70 ppb. In EPA's analysis, the cost of attaining a 65 ppb NAAQS would be over 10 times that of a 70 ppb NAAQS.

<sup>52</sup> EPA, 2015 RIA, p. ES-17.

<sup>53</sup> EPA, 2015 RIA, p. ES-17.

<sup>54</sup> NERA Economic Consulting for the National Association of Manufacturers, *Assessing Economic Impacts of a Stricter National Ambient Air Quality Standard for Ozone*, February 2015, p. S-1, at <http://www.nam.org/Special/Media-Campaign/EPA-Overregulation/Ozone-Regulations.aspx>. Hereinafter, “NAM Report.”

- The NAM study's baseline differs from that of EPA. It appears not to include some recently promulgated EPA regulations that will reduce NO<sub>x</sub> emissions (e.g., the Cross State Air Pollution Rule). It also doesn't include EPA's Clean Power Plan, which was finalized after the release of NAM's study, but before promulgation of the final ozone NAAQS. EPA projects that the Clean Power Plan will cause coal-fired electricity generation to decline 12% to 15% in 2025,<sup>55</sup> resulting in substantial reductions of NO<sub>x</sub> emissions.
- The NAM study concluded that more than half of the emission reductions needed to reach attainment would have to come from "unknown controls,"<sup>56</sup> which, in an earlier version of its study, it estimated could cost as much as \$500,000 per ton of emissions reduced.<sup>57</sup> EPA's modeling of the rule's costs found that unknown controls would play a much smaller role: both the number of tons to which such controls would apply and the cost per ton would be substantially less.
- NAM's analysis focused exclusively on emissions of NO<sub>x</sub>, without any consideration of VOC controls. VOC emissions from petroleum and related industries have more than quadrupled since 2005, according to EPA, while emissions from most other sources have declined.<sup>58</sup> Recent EPA analyses suggest that there are low cost emission control options in the oil and gas sector.<sup>59</sup>

## Issues

The current ozone NAAQS review has raised issues regarding the cost of attainment, background ozone levels, and the schedule for NAAQS reviews. The adequacy of the ozone monitoring network and the role of federal versus state and local pollution control measures are other important issues.

## The Role of Cost

The issue of cost is a perennial one in NAAQS decisions, even though EPA is prohibited by the Clean Air Act from considering costs in setting the standards. The Clean Air Act's §109 has been so interpreted since the NAAQS provisions were added to the act in 1970; in 2001, this interpretation was affirmed in a unanimous Supreme Court decision, *Whitman v. American Trucking Associations*.<sup>60</sup> The Court pointed to numerous other CAA sections where Congress had explicitly allowed consideration of economic factors, concluding that if Congress had intended to

<sup>55</sup> EPA, Office of Air and Radiation and Office of Air Quality Planning and Standards, *Regulatory Impact Analysis for the Clean Power Plan Final Rule*, August 2015, p. 3-27, at <http://www2.epa.gov/sites/production/files/2015-08/documents/cpp-final-rule-ria.pdf>.

<sup>56</sup> NAM Report, p. 2.

<sup>57</sup> NAM Report, July 2014, pp. 12-19, at <http://www.nam.org/Issues/Energy-and-Environment/Ozone-Regulations/NERA-NAM-Ozone-Full-Report-20140726/>. The \$500,000 figure does not appear in the February 2015 NAM report, but the February report continues to rely on scrappage programs to estimate the cost of unknown controls. NAM's present value of the cost of all necessary controls is more than six times that of EPA. See NAM Report, p. 10.

<sup>58</sup> See EPA, National Emissions Inventory (NEI) Air Pollutant Emission Trends Data, at <http://www.epa.gov/ttn/chieftrends/>.

<sup>59</sup> See, for example, EPA, "Regulatory Impact Analysis, Final New Source Performance Standards and Amendments to the National Emissions Standards for Hazardous Air Pollutants for the Oil and Natural Gas Industry," April 2012, at [http://www.epa.gov/ttnecas1/regdata/RIAs/oil\\_natural\\_gas\\_final\\_neshap\\_nsps\\_ria.pdf](http://www.epa.gov/ttnecas1/regdata/RIAs/oil_natural_gas_final_neshap_nsps_ria.pdf).

<sup>60</sup> 531 U.S. 457 (2001).

allow such factors in the setting of a primary NAAQS, it would have been more forthright—particularly given the centrality of the NAAQS concept to the CAA's regulatory scheme. The court concluded that §109(b)(1) “unambiguously bars cost considerations from the NAAQS-setting process.”<sup>61</sup>

This is not to say that cost considerations play no role in Clean Air Act decisions, including in *implementation* of a NAAQS. Cost-effectiveness is considered extensively by EPA and the states in selecting emission control options to meet the standards. Also, as discussed above, the agency prepares cost and benefit estimates at the time it proposes or promulgates a NAAQS, both for information purposes, and in order to comply with Executive Order 12866, under which the OMB requires cost-benefit analysis of economically significant rules. But in deciding what level of ambient pollution poses a health threat, the statute bars consideration of costs.

Some Members in Congress would like to change this, by revising the CAA to require consideration of cost in NAAQS decisions. In the 112<sup>th</sup> Congress, the House twice passed legislation that would have done so: H.R. 2401 and H.R. 3409 would have required the EPA Administrator to take feasibility and costs into consideration in setting National Ambient Air Quality Standards. The Senate did not pass either bill. In the 114<sup>th</sup> Congress, H.R. 1388 / S. 751 would require EPA to take into consideration feasibility and cost in setting ozone NAAQS, as well as establishing several other conditions on the Administrator's ozone-NAAQS-setting authority.

## Background Ozone Levels

A number of states, particularly in the inter-mountain West, experience what are termed high “background” levels of ozone. As EPA explains:

Any ozone formed by processes other than the chemical conversion of local or regional ozone precursor emissions is generically referred to as “background” ozone. Background ozone can originate from natural sources of ozone and ozone precursors, as well as from manmade international emissions of ozone precursors. Natural sources of ozone precursor emissions such as wildfires, lightning, and vegetation can lead to ozone formation by chemical reactions with other natural sources. Another important component of background is ozone that is naturally formed in the stratosphere through interactions of ultraviolet light with molecular oxygen. Stratospheric ozone can mix down to the surface at high concentrations in discrete events called intrusions, especially at higher-altitude locations. The manmade portion of the background includes any ozone formed due to anthropogenic sources of ozone precursors emitted far away from the local area (e.g., international emissions). Finally, both biogenic and international anthropogenic emissions of methane, which can be chemically converted to ozone over relatively long time scales, can also contribute to global background ozone levels.<sup>62</sup>

In the final rule, EPA identified two definitions of background ozone:<sup>63</sup>

- natural background (NB) (ozone “that would exist in the absence of any manmade precursor emissions”); and

<sup>61</sup> For further discussion of the American Trucking case, see CRS Report RS20860, *The Supreme Court Upholds EPA Standard-Setting Under the Clean Air Act: Whitman v. American Trucking Ass'ns*, by Robert Meltz and James E. McCarthy.

<sup>62</sup> EPA, 2014 RIA, pp. 2-10 and 2-11.

<sup>63</sup> 80 *Federal Register* 65327, note 84.

- United States background (USB) (ozone “that would exist in the absence of any manmade emissions inside the U.S.”).

What the definitions have in common is that they identify ozone levels that cannot be influenced by actions within the jurisdiction of concern.

EPA noted in the final rule that, “Various commenters maintained that it was inappropriate to revise the current NAAQS based on their view that natural background concentrations in several states are at or above O<sub>3</sub> concentrations associated with meeting a NAAQS set at a level less than 75 ppb (presumably retaining the same indicator, form, and averaging time), making the NAAQS impossible for those states to attain and maintain, a result they claim is legally impermissible.”<sup>64</sup>

The agency did not agree. In the final rule, EPA stated that it had “summarized a variety of modeling-based analyses of background O<sub>3</sub> ... and conducted our own multi-model assessment of USB concentrations across the U.S. ... The EPA analyses ... concluded that seasonal mean daily maximum 8-hour average concentrations of USB O<sub>3</sub> range from 25-50 ppb, with the highest estimates located across the intermountain western U.S.”

In response to the comments, the final rule stated that “EPA analyses indicate that there may be infrequent instances in a limited number of rural areas where background O<sub>3</sub> would be appreciable but not the sole contributor to an exceedance of the revised NAAQS, but do not indicate U.S. background (USB) O<sub>3</sub> concentrations will prevent attainment of a revised O<sub>3</sub> standard with a level of 70 ppb.” Additionally, the rule noted that “the courts have clearly established that “[a]ttainability and technological feasibility are not relevant considerations in the promulgation of [NAAQS].” *API v. EPA*, 665 F. 2d 1176, 1185 (D.C. Cir. 1981). Further, the courts have clarified that the EPA may consider proximity to background concentrations as a factor in the decision whether and how to revise the NAAQS only in the context of considering standard levels within the range of reasonable values supported by the air quality criteria and judgments of the Administrator. 79 *FR* 75242-43 (citing *ATA III*, 283 F. 3d at 379).”<sup>65</sup>

Finally, the final rule outlined various forms of regulatory relief allowed under the statute and EPA implementing regulations, including “the exclusion of air quality monitoring data from design value calculations when there are exceedances caused by certain event-related U.S. background influences (e.g., wildfires or stratospheric intrusions)”;<sup>66</sup> relief from more stringent requirements in areas designated as “rural transport areas”; and the application of CAA Section 179B, which allows EPA to approve state SIP submissions that demonstrate an area would have met the ozone NAAQS by the attainment date if not for international emissions contributing to the area.<sup>67</sup>

The invocation of these regulatory relief measures, as even EPA acknowledges, is not burden-free: each would require some level of assessment or demonstration by a state and/or EPA. States that have tried to invoke the “exceptional event” exceptions have expressed frustration with the lack of clarity and the burden involved in meeting EPA’s data requirements and, thus, may not be confident in the agency’s offer of regulatory relief.<sup>68</sup> But, as noted earlier (in **Figure 3**), EPA does

<sup>64</sup> 80 *Federal Register* 65327.

<sup>65</sup> 80 *Federal Register* 65328.

<sup>66</sup> *Ibid.*

<sup>67</sup> See, EPA, “Tools for Addressing Background Ozone,” <http://www3.epa.gov/ozonepollution/pdfs/20151001toolsfs.pdf>.

<sup>68</sup> See, for example, the comments of state and local officials on EPA’s proposed 2012 Exceptional Events guidance, at <http://www.regulations.gov/#!documentDetail;D=EPA-HQ-OAR-2011-0887-0051>.

not believe it will be necessary in most cases to invoke such measures. EPA modeling shows only 14 counties outside of California exceeding a 70 ppb standard without any emission control measures additional to those already promulgated as of this date.

## Schedule for Review

Section 109(d) of the Clean Air Act requires EPA to conduct reviews of the NAAQS and “make such revisions ... as may be appropriate” at five-year intervals. This required schedule is rarely adhered to: the current ozone review has taken more than seven years, and as shown in **Table 1**, previous ozone reviews have taken as long as 14 years. Once a review is complete, implementation of a revised standard (i.e., the designation of nonattainment areas and the submittal and review of SIPs) generally takes longer than five years; so if EPA were to meet the statutory NAAQS review schedule, it would be likely that the previous review would still be being implemented at the time the next revised NAAQS was being promulgated.

This has led many in Congress and in various affected industries to suggest that there be a longer time between mandatory reviews of the NAAQS: in the 114<sup>th</sup> Congress, at least five bills have been introduced to date that would change the required schedule for NAAQS reviews (see “Next Steps” section, below).

Although a change in the mandated schedule might seem to be just a recognition that five years is an insufficient period of time for review, the five-year non-discretionary deadline serves an important role in the minds of environment and public health groups: it allows them to file suit under the Clean Air Act’s citizen suit provision to establish a judicial deadline for completion of a review. In the minds of plaintiffs, extending a deadline to 10 years would mean a five-year delay before they could establish a court-ordered schedule for such reviews. Thus, there is substantial opposition to what might otherwise seem a mere recognition of reality.

## Monitoring

The existing network of ozone monitors is concentrated in urban areas, because of the larger population potentially affected, and because most of the sources of ozone precursor emissions are located in such areas. But, as noted earlier, ozone is not generally emitted directly by pollution sources. It forms in the atmosphere, often downwind of emission sources. Thus, rural areas can have high ozone concentrations. The new form of the secondary NAAQS discussed by EPA suggested a need for additional monitoring in rural areas to detect impacts of ozone on forests and agricultural production. Both EPA and state monitoring budgets are constrained, however, raising questions as to how any additional monitoring requirement would be funded.

The agency, in a 2009 rulemaking separate from the NAAQS, proposed changing the minimum ozone monitoring requirements for both urban and non-urban areas.<sup>69</sup> That proposal would have required that each state operate at least three ozone monitors in non-urban areas. It would also have required at least one ozone monitor in each urban area with a population between 50,000 and 350,000. The requirements were not finalized.

In the final rule, EPA made some adjustments to its monitoring requirements,<sup>70</sup> including updating

---

<sup>69</sup> 74 *Federal Register* 34525, July 16, 2009.

<sup>70</sup> For a summary of these actions, see EPA, “Updates to the Air Quality Index for Ozone and Ozone Monitoring Requirements,” <http://www3.epa.gov/ozonepollution/pdfs/20151001aqifs.pdf>.

1. the Air Quality Index (AQI) based on the strengthened ozone health standard, to provide the public with the most up-to-date information about air quality where they live; updating the monitoring season in 32 states and the District of Columbia;
2. requirements to modernize and streamline the Photochemical Assessment Monitoring Stations (PAMS) Network, which helps provide information on ozone formation and transport; and
3. the Federal Reference Method for monitoring to include an additional method that is based on advanced technology and monitoring methods.

Although EPA has finalized these changes, the agency is not requiring additional monitors in smaller urban or rural areas.

The absence of ozone monitors in rural areas is another factor that should help mitigate concerns of Western states that background levels of ozone will cause rural areas in their states to be designated nonattainment. EPA's policy in designating ozone nonattainment areas has always relied on the submission of EPA-certified monitoring data. Areas without monitors (unless they are contributing to an area with monitored nonattainment) have generally been termed "unclassifiable." When non-regulatory monitors indicate exceedance of the ozone NAAQS, designation as nonattainment does not automatically follow. Rather, the state must first establish regulatory monitors<sup>71</sup> and collect three years of data before submitting a proposed designation to EPA.<sup>72</sup>

As of May 2015, approximately 814 counties had ozone monitors, according to EPA, while 2,330 counties did not.<sup>73</sup>

## The Role of Federal Versus State and Local Pollution Control Measures

EPA has promulgated more stringent standards for most of the major sources of ozone precursors, including Tier 3 auto emission and fuel standards that will begin to take effect in 2017 and more stringent standards for power plants that begin to take effect in 2015. (For additional information on these standards, see CRS Report R43497, *Tier 3 Motor Vehicle Emission and Fuel Standards* and CRS Report R42144, *EPA's Utility MACT: Will the Lights Go Out?*) These standards should make the task of demonstrating attainment with a more stringent ozone NAAQS substantially easier. As noted earlier, EPA estimates that nationwide (except in California) already promulgated EPA and state regulations would bring all but 14 counties into attainment of a 70 ppb ozone NAAQS by 2025. Some Members in Congress have objected to the standards for motor vehicles, fuels, power plants, and other sources when they were under consideration, but at this date, the

<sup>71</sup> An ambient air monitor used to determine whether an area is in attainment of a NAAQS (a "regulatory monitor") must meet three criteria: it must use methods specified in 40 C.F.R. Part 58, Appendix C; it must meet siting criteria specified in 40 C.F.R. Part 58, Appendix E; and it must meet quality assurance criteria specified in 40 C.F.R. Part 58, Appendix A.

<sup>72</sup> The Uintah Basin in Utah provides an example. Non-regulatory monitors indicated ozone levels that exceeded the NAAQS in December 2009, January-March 2010, and January-March 2011. The state began collecting regulatory monitoring data in April 2011. As of December 2014, the state has not submitted to EPA data with which to designate the area nonattainment, and the area has not been designated nonattainment.

<sup>73</sup> Office of Air Quality Planning and Standards, U.S. EPA, personal communication, May 1, 2015.

net effect of repealing them would be to shift the burden of attaining the ozone NAAQS more squarely in the direction of state and local governments.

A tighter ozone NAAQS has frequently raised the issue of how to control emission sources that contribute to pollution downwind, in other states. Ozone, which forms in the atmosphere from chemical reactions of precursor emissions, is the prime example of such downwind pollution. Under both the Bush and Obama Administrations, EPA has addressed this interstate air pollution issue—through the Clean Air Interstate Rule (CAIR, 2005) and the Cross State Air Pollution Rule (CSAPR, 2011). The D.C. Circuit Court of Appeals found fault with both rules, although it allowed CAIR to take effect pending promulgation of an acceptable replacement.<sup>74</sup>

Whether EPA, in the CSAPR rule, had correctly interpreted its authority to control emissions leading to downwind pollution ultimately reached the Supreme Court. On April 29, 2014, in a 6-2 decision (*EPA v. EME Homer City Generation, LLP*), the Court upheld the methodology at the heart of EPA's CSAPR standard-setting process.<sup>75</sup> The rule was remanded to the D.C. Circuit for consideration of additional issues, but it is now being implemented.

The complexity of establishing controls on air pollution that crosses state lines has suggested to many stakeholders that Congress should revisit the Clean Air Act sections that authorize or require such controls, and numerous bills have been introduced on the subject over the years. Since the last major CAA revision in 1990, however, none of those bills has made it to the floor of the House or Senate. The Supreme Court's decision in the *Homer City* case may have further reduced the odds of congressional action on the subject.

## Next Steps

The ozone NAAQS final rule was signed by the EPA Administrator on October 1, 2015. This action set in motion a long and complex implementation process. EPA will now work with state, federal, and tribal air quality agencies to carry out the duties of air quality management for the revised ozone standards.<sup>76</sup>

Implementation will begin with states reviewing their existing air quality management infrastructure SIP for ozone and reporting back to EPA. Using monitoring data and other information, states are expected to submit proposals for attainment/nonattainment area designations to their local EPA regional office by October 2016. EPA will review these proposals, and after what is often significant dialogue with each state, finalize these designations (reportedly, in late 2017). After nonattainment areas are designated, state and local governments will have up to three years to produce State Implementation Plans (SIPs), which outline the measures that will reduce emission levels. Finalizing SIPs, through EPA review and approval, often takes longer. Finally, under the CAA, actual attainment of the standards is allowed to stretch over a 3-year to 20-year period, depending on the severity of the area's pollution.

Congress had taken an interest in the ozone proposal before it was released, with three bills introduced in the 113<sup>th</sup> Congress that would have affected the timing and/or EPA's authority to

---

<sup>74</sup> For a discussion of the Bush and Obama Administration regulations and the D.C. Circuit decisions remanding them, see CRS Report R42895, *Clean Air Issues in the 113<sup>th</sup> Congress: An Overview*.

<sup>75</sup> *EPA v. EME Homer City Generation, L.P.*, 134 S. Ct. 1584 (2014).

<sup>76</sup> The implementation process is outlined in "Implementing the 2015 Ozone NAAQS," Memorandum of Janet G. McCabe, Acting Assistant Administrator, Office of Air and Radiation, EPA, to Regional Administrators, Regions 1-10, October 1, 2015, at <http://www3.epa.gov/ozonepollution/pdfs/20151001memo.pdf>.

promulgate an ozone NAAQS. In the 114<sup>th</sup> Congress, there are at least five bills introduced, to date, to address the revision of the ozone (and, in some cases, other) NAAQS:

- H.R. 1044 would require each state to revise the boundaries of ozone and carbon monoxide nonattainment areas that include entire metropolitan or consolidated metropolitan statistical areas, to exclude counties that are not in violation of the NAAQS, as determined by air quality monitoring;
- H.R. 1327 / S. 640, the ORDEAL Act, would delay the review and revision of the ozone NAAQS for three years and require future reviews at 10-year rather than 5-year intervals;
- H.R. 1388 / S. 751, the CASE Act, would prohibit a more stringent ozone standard until at least 85% of the counties in nonattainment areas as of July 2, 2014, attained the current standard, and would require EPA to consider feasibility and cost in setting an ozone NAAQS, among other provisions; and
- H.R. 2111 would, among many other provisions, provide that no funds made available under any act may be used by EPA to implement any ozone standard promulgated after its date of enactment.
- S. 2072 would require EPA to establish a program under which the Administrator defers the designation of an area as a nonattainment area for purposes of the 8-hour ozone national ambient air quality standard if the area achieves and maintains certain standards under a voluntary early action compact plan.

On June 3, 2015, a Senate Environment and Public Works Committee hearing heard testimony regarding the two Senate bills. On April 29, 2015, the House Science, Space, and Technology Committee's Subcommittee on Environment held a hearing on the proposed rule's impact on rural America.

The standards could also be the subject of a resolution of disapproval under the Congressional Review Act. For additional information on the Congressional Review Act, see CRS Report R43992, *The Congressional Review Act: Frequently Asked Questions*, by Maeve P. Carey, Alissa M. Dolan, and Christopher M. Davis.

## Summary

California is in its fourth year of drought. As of late July 2015, 47% of California was experiencing *exceptional* drought—the most severe U.S. federal drought classification—and approximately 71% of the state was experiencing *extreme* drought. The 2014 water year (October 2013 through September 2014) was the third driest on record. Water users that receive water supplies from the state of California and federal water projects are experiencing unprecedented water supply shortages due to the drought. Severe water supply shortages also hampered the state during a recent three-year drought (2008-2010). Paleontological and tree-ring records indicate that California has experienced many multiyear droughts over several millennia; however, some experts estimate that the current drought may be the most severe in the past 1,200 years.

This report focuses on hydrological and regulatory compliance issues that affect operation and management of two large water supply projects that serve farms and communities throughout California: the federal Central Valley Project (CVP), owned and operated by the Bureau of Reclamation (Reclamation) in the Department of the Interior, and the State Water Project (SWP), owned and operated by the California Department of Water Resources (DWR). Reductions in water supplied by these projects in drought years result in economic disruption across the state such as concentrated crop and financial losses in agricultural areas throughout the Central Valley, including portions of the San Joaquin Valley. At the same time, several fish species—one of which may be close to extinction—whose habitat lies at the heart of California’s water supply system and throughout its northern rivers are in decline. Declining fish species, exacerbated by drought, also may have economic implications, resulting in job and income losses in coastal areas. In addition, the drought and low water supplies affect recreation, power production, other industries, and small and large communities.

With below-average snowpack and severe water shortages again in 2015, a short-term issue for Congress is how to respond to demands for increased water deliveries given other policy concerns, such as avoiding harm to threatened and endangered species. Other issues include how to address water supply availability broadly and how to finance water supply or other projects. These are challenges given fiscal constraints and policies discouraging site-specific project authorizations and appropriations. A long-term issue for Congress is how to address federal water delivery reliability without destabilizing the aquatic ecosystems and related resources (e.g., clean water, commercial and recreational fisheries, etc.) upon which many communities depend.

Several bills were introduced in the 113<sup>th</sup> Congress to address short- and long-term water shortage issues and CVP and SWP water management (e.g., H.R. 3964, H.R. 5781, and S. 2198). These bills each passed their respective chambers but were not enacted. Legislation with similar aims—to maximize CVP and SWP water supplies—has been introduced in the 114<sup>th</sup> Congress (H.R. 2898 and S. 1894). H.R. 2898 passed the House on July 16, 2015, and S. 1894 was introduced on July 30, 2015. Other bills introduced in the 114<sup>th</sup> Congress that address California drought and water management include several authorizing conservation and water H.R. 291 recycling initiatives, among other activities (e.g., and S. 176; H.R. 2983 and S. 1837; and H.R. 3045).

Questions and debate are likely to continue as Congress considers legislation addressing CVP and SWP management and other activities to lessen the impacts of drought. This report provides background and analysis on factors affecting CVP and SWP water management. For information on legislation, see CRS In Focus IF10019, *H.R. 5781: Legislation Proposed to Maximize Water Supplies to Address Drought in California*; CRS Report R43820, *Analysis of H.R. 5781, California Emergency Drought Relief Act of 2014*; and CRS Insight IN10308, *Drought Legislation: H.R. 2898*.

## Introduction

California is experiencing its fourth consecutive year of drought. As of late July 2015, 47% of California was experiencing exceptional drought and more than 94% of the state was facing drought conditions that ranged from severe to exceptional. According to the National Oceanic and Atmospheric Administration's (NOAA's) Climate Prediction Center (CPC), the outlook for California through the end of October calls for little if any chance for improvement in drought conditions.<sup>1</sup> Unless there is an anomalous weather event, California likely will experience persistent drought conditions for the rest of the 2015 water year (October 2014-September 2015).<sup>2</sup>

The Congressional Research Service (CRS) has analyzed a variety of data and information on current California hydrological conditions, regulatory factors affecting management of California's developed water supplies, and restrictions due to baseline water rights allocations and delivery priorities of the Central Valley Project (CVP), a large water supply project that serves farms and communities throughout California. This report provides a summary of California's 2012-2015 drought with comparisons, where applicable, to previous droughts; a summary of the key regulatory requirements that at certain times limit water deliveries (or *exports*) from the San Joaquin and Sacramento Rivers' Delta; and a brief discussion of California water rights and how they relate to different types of federal contracts and their associated water allocations.

The report specifically addresses issues related to management of the U.S. Bureau of Reclamation's (Reclamation's) CVP and to reductions in water deliveries to CVP water users—specifically, to irrigation districts, water districts, and others that have long-term contracts for delivery of CVP water (i.e., CVP contractors). The CVP delivers water to contractors throughout the state, largely serving agricultural water contractors as well as some municipal and industrial (M&I) contractors. A somewhat parallel state system, the State Water Project (SWP) serves primarily M&I water users and some agricultural users. The CVP and SWP are operated in conjunction under a Coordinated Operations Agreement (COA) pursuant to P.L. 99-546.<sup>3</sup>

Major CVP and SWP pumps that supply water for central and southern California are located at the southern portion of the Sacramento and San Joaquin Rivers' Delta confluence with San Francisco Bay (Bay-Delta, or Delta, see **Figure 1**). An estimated 25 million people get some, if not all, of their drinking and agricultural water supplies from the Bay-Delta—often referred to as the hub of California's water supply system.<sup>4</sup> **Figure 2** shows an overview of CVP and SWP facilities statewide.

<sup>2</sup> For more information on drought generally, see CRS Report R43407, *Drought in the United States: Causes and Current Understanding*, by Peter Folger and Betsy A. Cody.

<sup>3</sup> According to the Bureau of Reclamation, “The [Coordinated Operations Agreement, or COA] defines the rights and responsibilities of the CVP and SWP with respect to in-basin water needs and provides a mechanism to account for those rights and responsibilities.” See U. S. Dept. of the Interior, Bureau of Reclamation, *Biological Assessment on the Continued Long-term Operations of the Central Valley Project and the State Water Project (OCAP)*, pp. 1-9, at [http://www.usbr.gov/mp/cvo/OCAP/sep08\\_docs/OCAP\\_BA\\_001\\_Aug08.pdf](http://www.usbr.gov/mp/cvo/OCAP/sep08_docs/OCAP_BA_001_Aug08.pdf).

<sup>4</sup> State of California, Department of Natural Resources and Department of Water Resources, *Sacramento-San Joaquin Delta Overview*, Sacramento, CA (no date), p. 2, at [http://baydeltaoffice.water.ca.gov/sdb/tbp/deltaoverview/delta\\_overview.pdf](http://baydeltaoffice.water.ca.gov/sdb/tbp/deltaoverview/delta_overview.pdf).

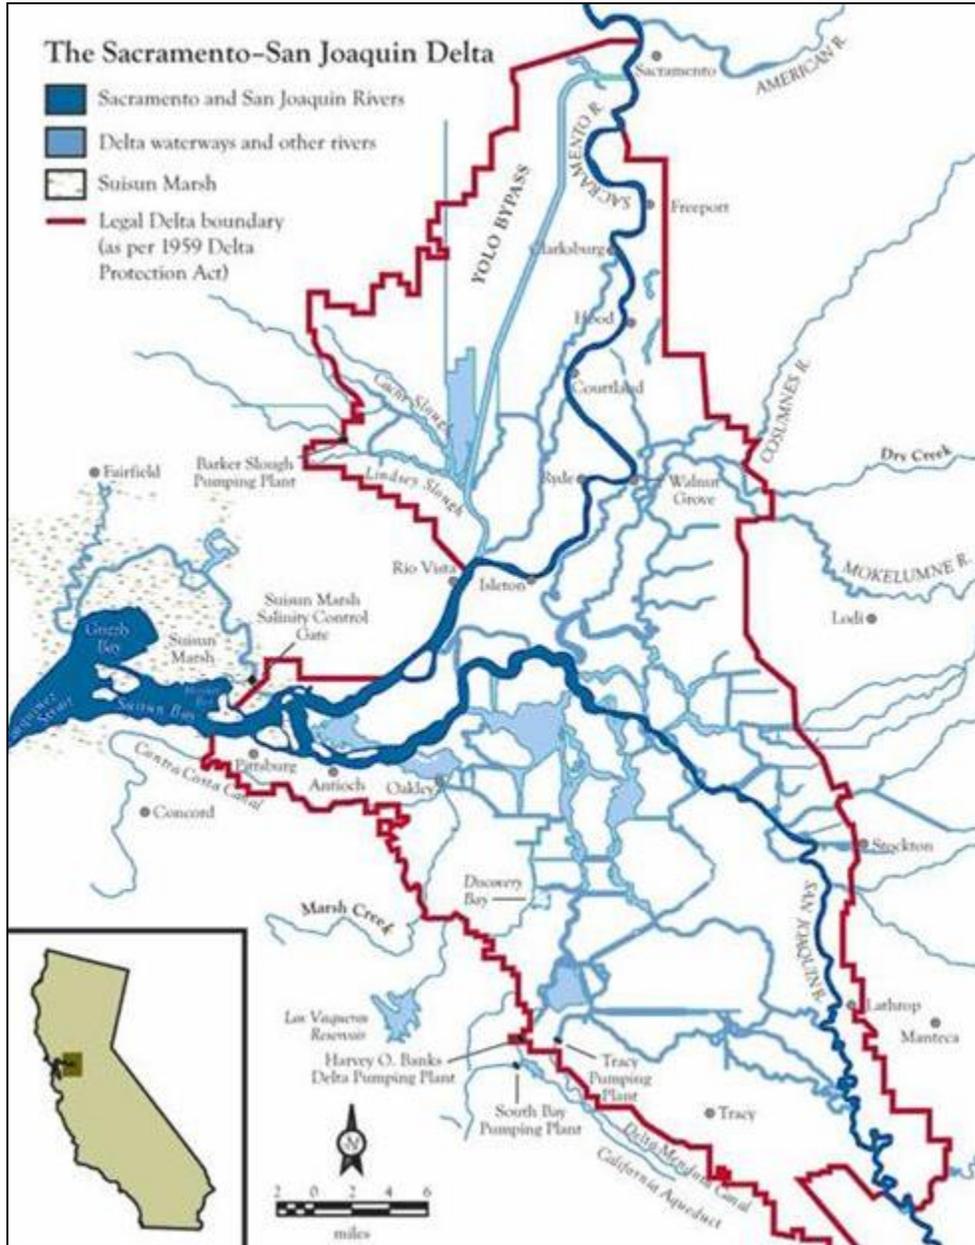

Many factors affect CVP water deliveries. These include hydrologic factors, state and federal laws and regulations, court orders implementing those laws and regulations, CVP contract and allocations policies, and the state's long-established state water rights system. The current hydrological drought in California (2012-present) has lasted longer than the previous California drought (2007-2009) and probably is more severe. For example, the 2014 water year (October 2013 through September 2014)<sup>5</sup> was the third driest in California since record-keeping began in 1895, and 2013 was the driest calendar year on record for the state. The human factors—laws and regulations, water rights, and CVP allocations policies—can magnify the impacts of drought on water deliveries to some contractors. The system of state water rights and water code, together with CVP contract allocations and priorities, largely dictates who gets how much water and when, particularly in times of drought or other changes in the hydrologic cycle.<sup>6</sup> As with the previous California drought, some stakeholders are questioning the extent to which compliance with environmental laws such as the federal Endangered Species Act (ESA; P.L. 93-205; 16 U.S.C. §§1531 et seq.) and with state water quality laws and regulations are worsening drought impacts and resulting in significantly reduced project water deliveries—particularly CVP and SWP exports of water from the Delta.

---

<sup>5</sup> The California Department of Water Resources and the Bureau of Reclamation typically gather data on precipitation, runoff, and water supply storage on a *water year* basis. A water year is from October 1 through September 30, as opposed to the calendar year: January 1 through December 31.

<sup>6</sup> For information on water rights, see CRS Legal Sidebar WSLG9, *Riparian vs. Appropriated Water Rights*, by Cynthia Brown.

**Figure I. Sacramento-San Joaquin Delta**  
(with CVP and SWP pumping plants)

**Source:** DeltaRevision, *Delta Maps*, at [http://www.deltarevision.com/maps/Delta\\_land\\_use\\_ownership/legal\\_delta.jpg](http://www.deltarevision.com/maps/Delta_land_use_ownership/legal_delta.jpg), 1990.

**Notes:** State and federal facilities that pump and export water out of the Delta for users south of the Delta are located on the southwestern edge of the legally defined Delta area. CVP = Central Valley Project; SWP = State Water Project.

**Figure 2. Major Rivers and Water Infrastructure Facilities in California**  
(state, federal, and local water project facilities)

**Source:** California State Department of Water Resources, *California Water Plan Update 2013, Investing in Innovation & Infrastructure*, Vol. I, Chapter 3, Figure 2-3, issued Oct. 30, 2014.

Water shortages due to hydrologic variability, regulatory export, and other management restrictions have resulted in unequal impacts on CVP water contractors because of differences in

priority of water rights and other legal agreements underlying different water contracts and federal and state allocation policies. Combined Delta exports have increased *on average* since the 1980s and early 1990s, even with implementation of several regulatory restrictions; nonetheless, CVP water allocations for some contractors have been reduced significantly.

Controversy over CVP water supply deliveries persists in part because even in years with high levels of precipitation and runoff,<sup>7</sup> such as 2011, water deliveries still are often reduced below their contract amount for some contractors—typically south-of-Delta (SOD) CVP water service contractors.<sup>8</sup> Due to low precipitation levels during the 2011-2012 winter months (2012 water year), and again throughout the 2012 and 2013 calendar years, water storage levels leading into the 2013-2014 winter were very low. The result was a low amount of water in reserve going into the spring of 2014—an unusually warm year with below-average precipitation. CVP and SWP contract deliveries were allocated at historic lows in 2014, and even senior water rights users were affected. Some municipalities nearly exhausted water supplies, and some unincorporated areas experienced wells going dry. Historically low levels of winter precipitation and snowpack for the 2015 water year have resulted in reduced water allocations again, including zero allocations for many agricultural water users throughout the CVP. Some communities reliant on groundwater also have experienced dry wells.

The California State Water Resources Control Board (SWRCB) summarized 2014 drought impacts as follows:<sup>9</sup>

- \$2.2 billion in total economic costs due to drought;
- \$1.5 billion direct loss to agriculture (3% of the state’s total agricultural production value);
- 17,100 jobs lost (3.8% of farm employment);
- 428,000 acres idled (5%) in the Central Valley, Central Coast, and Southern California;
- \$447 million in added groundwater pumping costs;
- 95% winter-run Chinook egg mortality due to high temperatures;
- high spring-run Chinook mortality due to high temperatures;
- lowest survey level of Delta smelt on record;
- second-lowest level of longfin smelt on record;
- population indexes of the striped bass, American shad, and threadfin shad near record lows; and
- potential (unaccounted) impacts to commercial and recreational fishing, recreation, and other nonagricultural water-dependent industries.

<sup>7</sup> Runoff is what occurs as a result of precipitation—rain or snow—that is in excess of evaporation from the land surface, transpiration from vegetation, and infiltration into soils. The remaining water—runoff—makes its way into rivers, streams, reservoirs, and possibly the ocean. USGS, California Water Science Center, “Annual Runoff Estimate for California, at <http://ca.water.usgs.gov/data/drought/runoff.html>, viewed August 2014.

<sup>8</sup> For example, even though water year 2011 was classified as a wet year and more water was pumped from the Delta than ever before (6.52 million acre-feet, or MAF), the CVP south-of-Delta agricultural water service contractors’ allocation for 2011 started at 50% of contract supply. Although it increased monthly based on revised projections, it never rose above 80% from April 25 through the rest of the year. Most of the water exported from the Delta in 2011 went to the SWP (3.96 million acre-feet). The CVP total for 2011 was 2.63 MAF.

<sup>9</sup> California Water Boards, State Water Resources Control Board, Regional Water Quality Control Boards, *2015 Drought Water Project Operations*, PowerPoint presentation, pp. 2-3.

The 113<sup>th</sup> Congress responded to the 2014 drought by reauthorizing several drought programs, including the Reclamation States Emergency Drought Relief Act (RSEDR), the National Integrated Drought Information System (NIDIS), and agricultural assistance programs (2014 farm bill; Agricultural Act of 2014 [P.L. 113-79]). Congress also included provisions to facilitate water banking, water transfers, and new storage projects in the FY2014 Consolidated Appropriations Act (P.L. 113-76). In addition, the 113<sup>th</sup> Congress debated California-specific legislation, including S. 2016, S. 2198 (which passed the Senate in May 2014), H.R. 3964 (which passed the House in February 2014), and H.R. 5781, a compromise bill that passed the House in December 2014; however, none were enacted.

Several bills have been introduced in the 114<sup>th</sup> Congress. For example, H.R. 2898 passed the House on July 16, 2015. The bill is similar in several aspects to previously passed House bills (H.R. 3964 and 5781 from the 113<sup>th</sup> Congress). Several titles of H.R. 2898 focus on maximizing CVP and SWP water deliveries, while other titles address Bureau of Reclamation project authorization and financing throughout the West. With regard to California-specific provisions, a key challenge for legislators is whether to increase water supplies for CVP and SWP water users, particularly those in the San Joaquin Valley and Southern California areas (SOD), and how this could be accomplished without further threatening or endangering the survival of several fish species and degrading water quality for in-Delta water users. Other bills introduced in the 114<sup>th</sup> Congress would address drought management in California more broadly by focusing on increasing the provision of water supplies through conservation and recycling, among other activities (e.g., H.R. 291 and S. 176; H.R. 2983 and S. 1837; and H.R. 3045). The state also has been active in addressing the drought, including funding specific water projects and conservation activities and calling for mandatory statewide reductions in water use.<sup>10</sup>

## What Is Drought?

Droughts have affected the United States, particularly the American West, for centuries. *Drought* is defined in a number of ways; the simplest may be as a deficiency of precipitation over an extended period of time, usually a season or more, resulting in a water shortage for some activity, group, or environmental sector.<sup>11</sup> The deficiency usually is evaluated relative to some long-term average condition or balance between precipitation, evaporation, and transpiration by plants. Drought, which has a beginning and an end, is distinguished from *aridity*, which describes to low-rainfall regions and is a relatively permanent feature of climate (e.g., deserts are regions of relatively permanent aridity).<sup>12</sup>

At the national level, drought is monitored and reported in an index known as the U.S. Drought Monitor, which synthesizes various drought indexes and impacts and represents a consensus among academic and federal scientists of ongoing drought conditions. The U.S. Drought Monitor uses five key indicators<sup>13</sup> as well as expert opinion and other indexes, such as those that account

---

<sup>10</sup> See “California Drought” at <http://ca.gov/drought/>. See also activities of local water districts at <http://www.acwa.com/content/local-agencies-find-innovative-ways-reduce-use>.

<sup>11</sup> National Drought Mitigation Center (NDMC), “What Is Drought?” at <http://drought.unl.edu/DroughtBasics/WhatisDrought.aspx>.

<sup>12</sup> Permanently arid conditions reflect the *climate* of the region, which is the composite of the day-to-day weather over a longer period of time. Climatologists traditionally interpret climate as the 30-year average. See NDMC, “What Is Climatology?” at <http://www.drought.unl.edu/DroughtBasics/WhatisClimatology.aspx>.

<sup>13</sup> The five key indicators include the Palmer Drought Index, the Climate Prediction Center soil moisture model, U.S. Geological Survey (USGS) weekly streamflow data, the Standardized Precipitation Index, and short- and long-term (continued...)

for conditions in the West where snowpack is relatively important and those that are used mainly during the growing season. Drought indexes typically are used to assess and classify the intensity and type of drought. The classification of drought intensity, such as that shown in **Figure 3**, may depend on a single indicator or on several indicators, often combined with expert opinion from the academic, public, and private sectors.

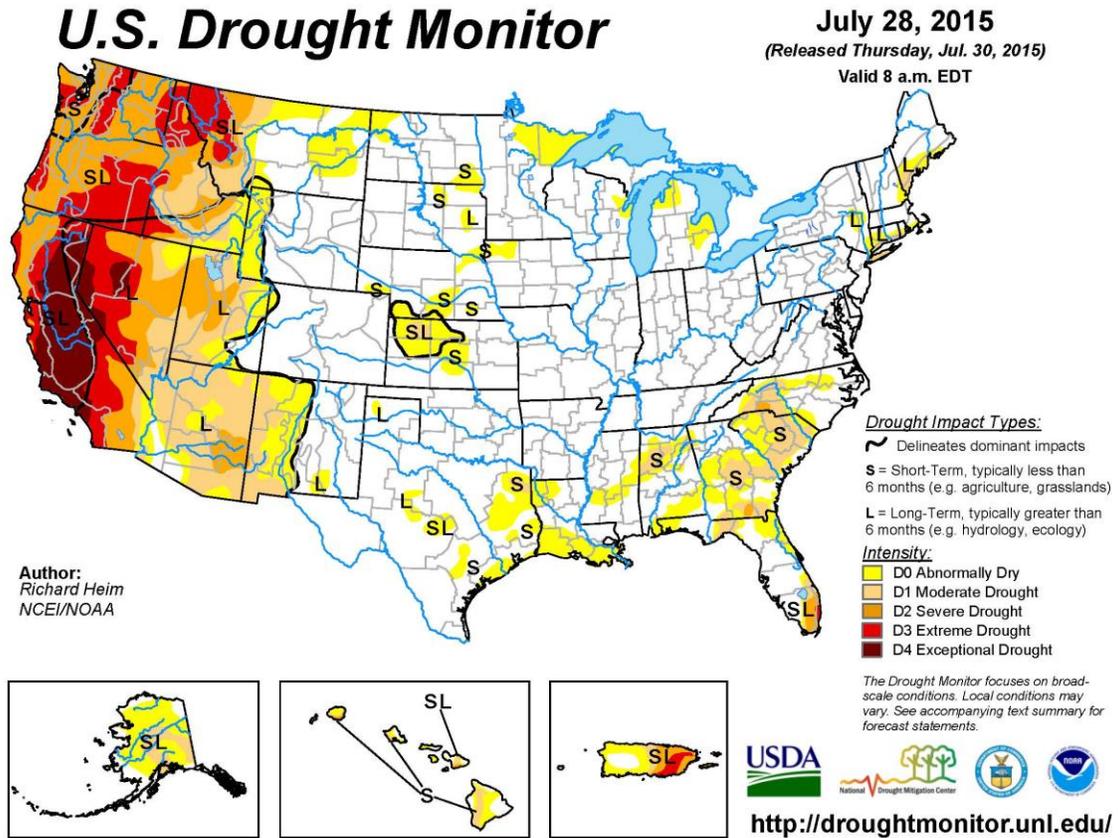

The U.S. Drought Monitor intensity scheme—D0 to D4—is used to depict broad-scale conditions but not necessarily drought circumstances at the local scale. For example, the large regions depicted as red and brown, most notably California and parts of Nevada, in **Figure 3** faced extreme to exceptional drought conditions for the week of July 28, 2015, but they may contain local areas and individual communities that experienced less (or more) severe drought. The U.S. Drought Monitor in **Figure 3** does not reflect availability of water supplied by federal or state reservoirs or projected water deliveries. It strictly represents the hydrological status of California from factors other than deliveries of water mandated or restricted by regulation (e.g., precipitation, snowpack, streamflow, soil conditions, as described above). In addition to the color-coded D0-D4 designations, U.S. Drought Monitor maps often include an *S* and *L* designation to provide additional information about the nature of drought. The *S designation* indicates a combination of drought indexes that reflect impacts that respond to precipitation over several days up to a few months (short-term effects). These effects would include impact to agriculture, topsoil moisture, unregulated streamflows, and aspects of wildfire danger. The *L designation* approximates responses to precipitation over several months up to a few years (long-term effects). These effects would include reservoir levels, groundwater, and lake levels. As **Figure 3** shows, some regions of the United States, such as California, include both an *S* and an *L* designation, indicating that in late July 2015 those regions experienced both short- and long-term impacts.

---

(...continued)

drought indicator blends. For a discussion of drought indexes, see NDMC, <http://www.droughtmonitor.unl.edu/AboutUs/ClassificationScheme.aspx>.

## California Drought and Hydrological Conditions

At the beginning of the 2015 water year—as of October 1, 2014—nearly 60% of California was experiencing exceptional drought, the most severe U.S. federal drought classification. The dry conditions resulted, in part, because the 2014 water year was the third driest on record in terms of precipitation (2013 was the driest calendar year on record, whereas the 1924 water year was the driest on record).<sup>14</sup> California typically receives more than 80% of its annual precipitation in the November–April winter precipitation season, and the November 2013–April 2014 precipitation for the state as a whole was the sixth driest since records began in 1895.<sup>15</sup>

<sup>14</sup> California Department of Water Resources, “Water Year 2014 Ends as 3<sup>rd</sup> Driest in Precipitation,” press release, September 30, 2014, at <http://www.water.ca.gov/waterconditions/>.

<sup>15</sup> Richard Seager et al., *Causes and Predictability of the 2011–2014 California Drought*, National Oceanic and Atmospheric Administration, Assessment Report, December 2014, p. 3, at [http://cpo.noaa.gov/sites/cpo/MAPP/Task%20Forces/DTF/californiadrought/california\\_drought\\_report.pdf](http://cpo.noaa.gov/sites/cpo/MAPP/Task%20Forces/DTF/californiadrought/california_drought_report.pdf). Hereafter referred to as NOAA Assessment Report 2014.

The state is experiencing its fourth consecutive dry year. As of July 28, 2015, 47% of California still was experiencing exceptional drought and more than 94% of the state was facing drought conditions that ranged from severe to exceptional.<sup>16</sup>

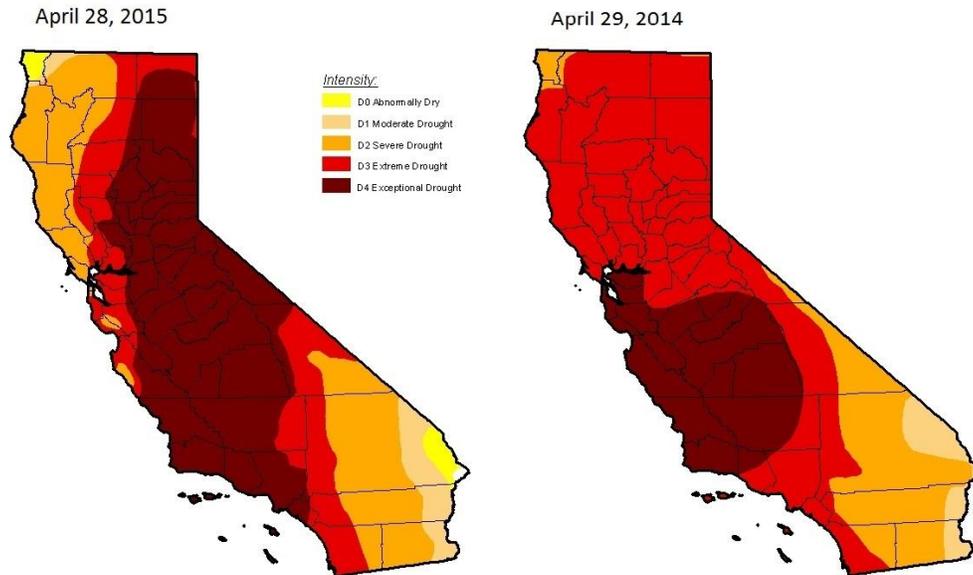

Water users receiving supplies from California state and federal water projects are experiencing unprecedented water supply shortages due to the drought. Severe water supply shortages also hampered the state during the 2007-2009 drought. Other severe droughts in the last 100 years include a six-year drought (1987–1992); a two-year drought (1976–1977), and an extended dry period during the 1920s and 1930s which included the single driest water year on record—1924. (The driest winter on record was 1976-1977.) Studies of relict tree stumps, tree rings, and other evidence indicate that parts of California have experienced numerous multiyear droughts, some of which lasted for decades or even centuries, during the past 2,000 years.<sup>17</sup> Whether the current drought is the worst in California’s history is currently being debated. The role of human-induced climate change also is being debated, in particular whether the record high temperatures in 2014 combined with low precipitation are a fingerprint of human influence on climate (see text box below).

**Figure 4** provides a comparison of drought conditions in California on April 29, 2014, and April 28, 2015. **Figure 4** shows that the area of exceptional drought expanded considerably over the course of the year. According to the U.S. Drought Monitor, exceptional drought nearly doubled in a year, from 25% of California at the end of April 2014 to nearly 47% in late April 2015.

<sup>17</sup> Rachel Berkowitz, “A Dry State in the West,” *Physics Today*, July 2014, at <http://scitation.aip.org/content/aip/magazine/physicstoday/news/10.1063/PT.5.4004>. See also Scott Stine, “Extreme and Persistent Drought in California and Patagonia During Mediaeval Time,” *Nature*, vol. 369 (June 16, 1994), pp. 546-549.

**Figure 4. Comparison of California Drought Conditions for April 2014 and April 2015**

**Source:** U.S. Drought Monitor, <http://droughtmonitor.unl.edu/MapsAndData/MapArchive.aspx>, modified by CRS.

**Notes:** Colors matching drought intensity are identical to those shown in **Figure 3**.

California has experienced years of consecutive drought in the past. Observations of below-average runoff, reservoir levels, and groundwater levels for 2007-2009 were broadly comparable to those observed during previous episodes of drought in California (e.g., 1977-1978 and 1987-1992). Drought conditions for 2015 appear more severe and widespread in scope.

## Runoff and Storage

The 2014 water year was one of the driest on record, which has led to below-average storage levels and runoff for the year. According to the California Department of Water Resources (DWR):

Water Year 2014—overlapping with California’s driest calendar year—ended on September 30 as the state’s third driest in 119 years of record, based on statewide precipitation.

As the Water Year ended on September 30, the state’s major reservoirs collectively held only 60 percent of average storage for the date, or about 41 percent of capacity. Cumulative reservoir storage in 1977, California’s driest calendar year on record, was approximately five million acre-feet less than this year, but the state had 16 million fewer people then.<sup>18</sup>

<sup>18</sup> California Department of Water Resources, “Water Year 2014 Ends as 3<sup>rd</sup> Driest in Precipitation,” press release, September 30, 2014, at <http://www.water.ca.gov/waterconditions/news-archive.cfm>.

Runoff in California has declined since 2012 and is continuing its downward trend in 2015. According to the U.S. Geological Survey, runoff in California has shown a downward trend since 2006, despite relatively wet years in 2010 and 2011.<sup>19</sup> Below-average runoff indicates an underlying deficit in precipitation, which would support a common definition of drought: less rain or snow than a region would receive compared with some long-term average (consistent with the description of hydrological drought; see “What Is Drought?” above). California has experienced three dry years in a row, and so far 2015 is a fourth dry year, compared with the long-term average.

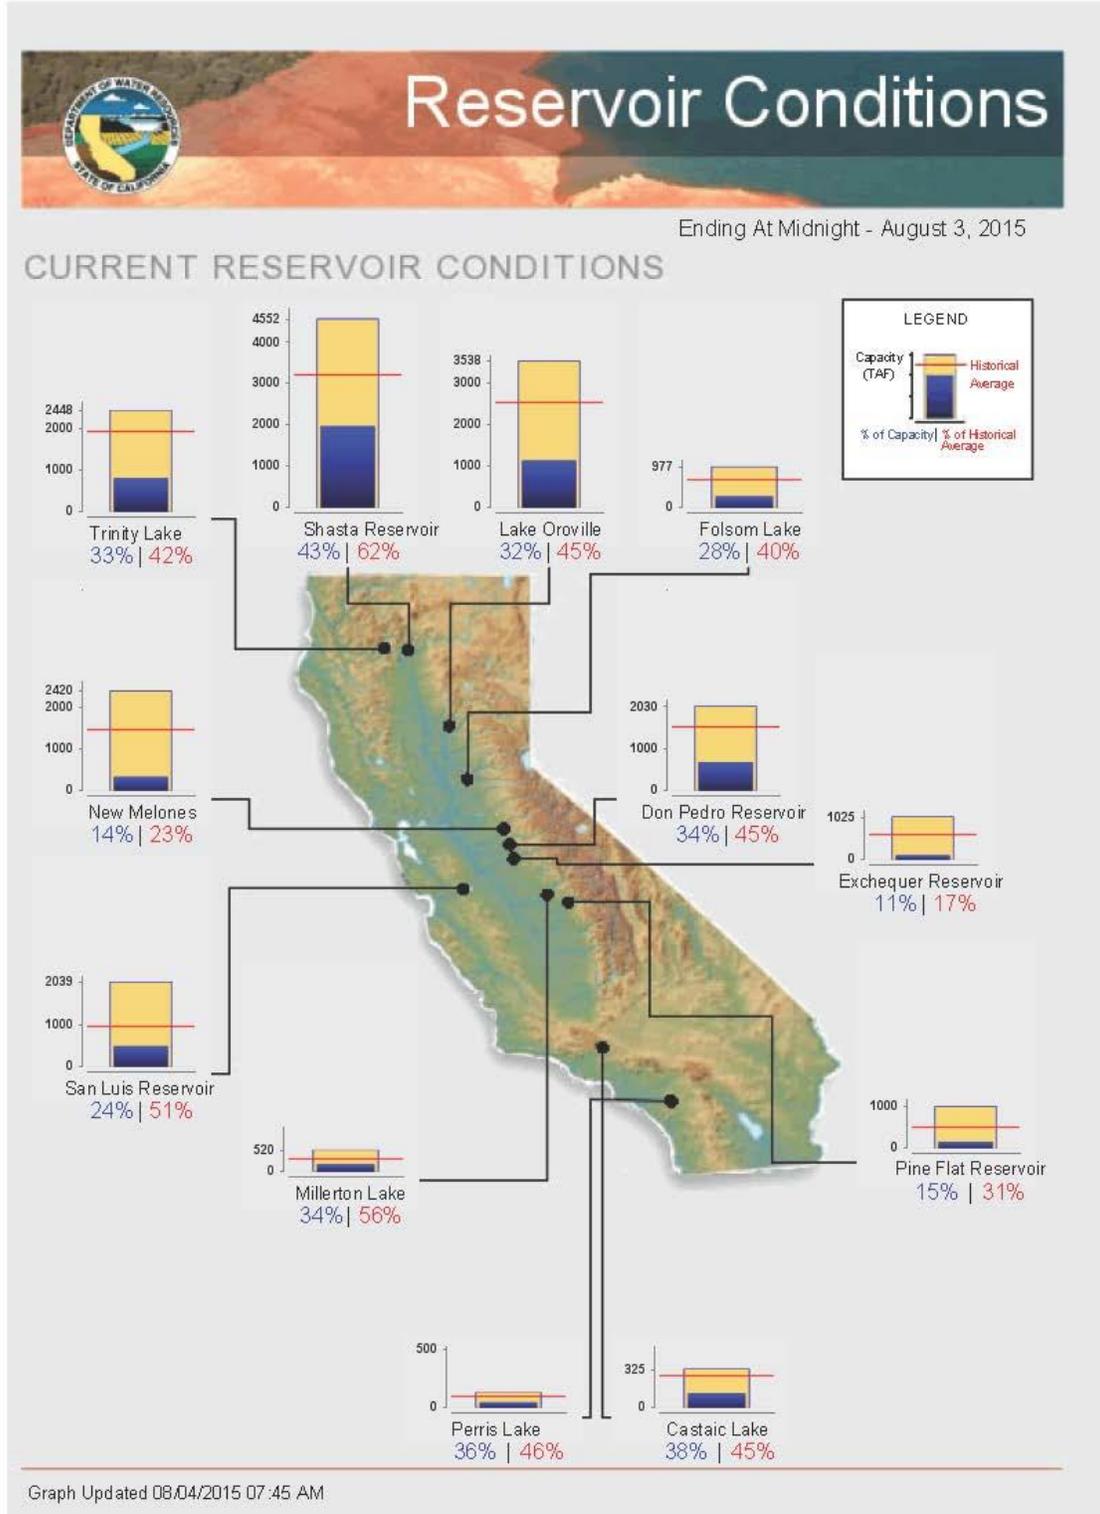

**Figure 5** shows reservoir storage in early August 2015 for several of the major CVP and SWP water storage reservoirs. All the major reservoirs shown in **Figure 5** are well below their historical average capacity.

Snowpack is an essential component of water storage in California. Runoff from the snowpack typically contributes to a large portion of storage in many of the reservoirs shown in **Figure 5**. For a year with average or above-average snowpack levels in early May, runoff from spring snowmelt would be expected to contribute additional water storage in reservoirs through May and June before dropping off in the summer months. **Figure 6** shows this pattern for a wet year (1983), a dry year (1977), the 30-year average, and for 2014 and 2015 (through June 2015). However, the very low snowpack levels in spring 2015 resulted in low amounts of runoff, compared with average values, in early summer. As the figure shows, June runoff in 2015 was about 0.15 inches and trending downward, whereas the 30-year average runoff for June is 0.54 inches. That value likely reflects the unusually low snowpack levels in the Sierras in 2015 (approximately 5% of average for April). Absent the unlikely event of significant amounts of summer precipitation, the trend of below-average runoff shown in **Figure 6** probably will continue.

---

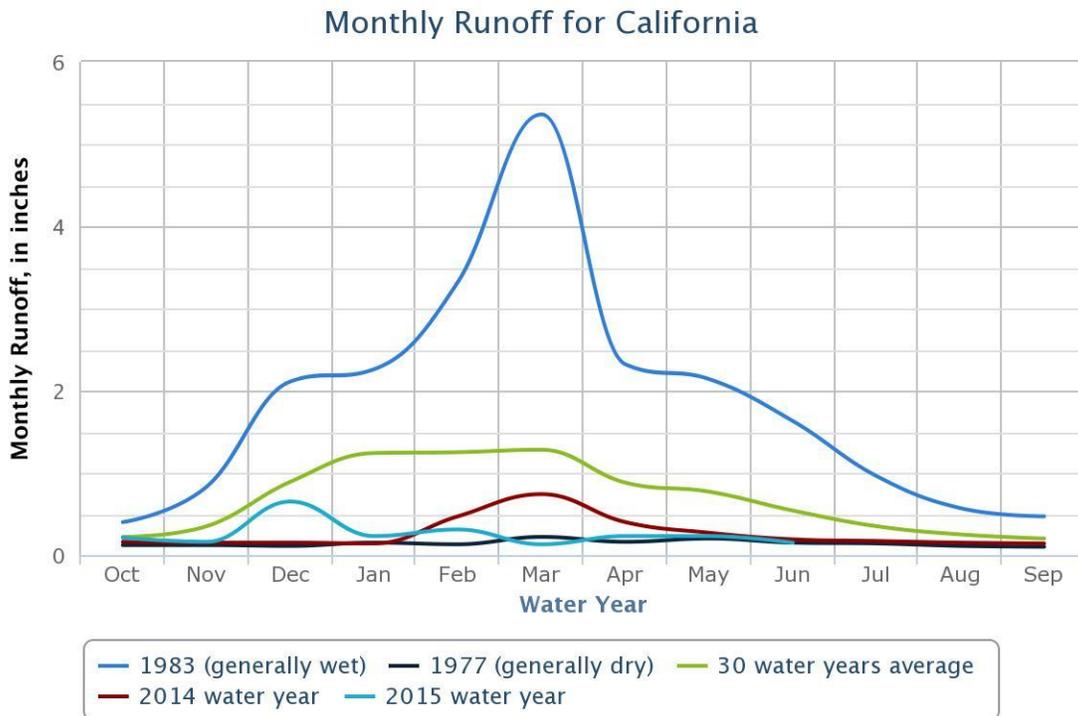

<sup>19</sup> Ibid. USGS plotted a smoothed curve that trended downward from the relatively wet year in 2006 through March 2015, even though water years 2010 and 2011 were relatively wet. The overall downward trend reflects the consecutive dry years 2007-2009, the last three dry years (2012-2014), and a dry 2015 to date.

**Figure 6. Comparison of Runoff Amounts for California Between a Wet Year, Dry Year, 30-Year Average, 2014, and 2015 Through June**

**Source:** U.S. Geological Survey (USGS), California Water Science Center, *Annual Runoff Estimate for California*, at <http://ca.water.usgs.gov/data/drought/runoff.html>, viewed August 4, 2015.

**Notes:** The original source is an interactive feature, enabling the user to scroll over the lines on the figure and extract runoff amounts in inches for the midpoint of each month. All 2015 data are provisional and subject to change.

## Timing

Persistently dry or drought conditions in most of California since 2012 do not necessarily mean that all locations throughout California have experienced similar drought conditions at all times. Drought conditions change over time and vary by location. For example, January is normally the wettest month for California, averaging approximately 4.1 inches of precipitation in the state.<sup>20</sup> (See **Table 1**.) In January 2015, however, California received only 0.47 inches, or 12% of average precipitation for the month. By contrast, in December—also one of the wettest months for California—the state received 7.3 inches of precipitation, or 202% of the monthly average of about 3.6 inches. Despite the relatively wet months of November and December 2014, very dry conditions in January and below-average precipitation through April resulted in the cumulative average of annual precipitation at 76% through the first seven months of the water year. During the months of October through March, California typically receives more than 80% of its annual precipitation for the 12-month water year.

<sup>20</sup> California Climate Tracker, at [http://www.wrcc.dri.edu/monitor/cal-mon/frames\\_data.html](http://www.wrcc.dri.edu/monitor/cal-mon/frames_data.html). CRS calculated the average monthly values using California Climate Tracker data back to 1895.

**Table 1** also shows that July 2015 was an unusually wet month in California, receiving roughly 10 times the average amount of precipitation that normally falls during the month. However, the above-average rainfall likely will not affect drought conditions significantly. Even though California received more than 1.6 inches of precipitation averaged over the state, well above the normal 0.16 inches, the total amount that fell was less than what the state usually receives each month from November through March, and the total was equal to about the average precipitation California receives in April at the end of the wet season (**Table 1**). Despite the relatively very wet July, the first 10 months of the 2015 water year cumulatively were still below average (about 83% of normal), reflecting the dry winter months in early 2015.

Timing of precipitation, and the consequent amount of runoff in the spring that flows into the state's reservoirs, is a critical factor leading to water delivery decisions in the spring. Where and how precipitation occurs (e.g., snow versus rain) also are critical to water delivery decisions for the SWP and CVP. Both projects rely on precipitation data, including data indicating the water content of snowpack and projected runoff, to decide how much water to allocate to water users early in the water year (February-May).

**Table 1. Average and Observed Statewide Precipitation, by Month**

(percentage of average by month and cumulatively for water year 2015, through July 31, 2015)

Month	Average Precipitation Statewide (inches)	Water Year 2015		
		Observed Precipitation (inches)	% of Average (by month)	% of Average (cumulative)
October	1.16	0.71	61%	61%
November	2.40	2.0	82%	75%
December	3.60	7.3	202%	139%
January	4.08	0.47	12%	93%
February	3.58	2.7	75%	88%
March	3.03	0.55	18%	77%
April	1.59	1.1	69%	76%
May	0.86	0.77	88%	76%
June	0.34	0.21	62%	76%
July	0.16	1.63	1051%	83%
<b>Total</b>	<b>20.82</b>	<b>17.36</b>	<b>83%</b>	<b>83%</b>

**Note:** Totals may not sum due to rounding.

## Nature of the California Drought: Possible Causes and Consequences

The immediate cause of the current California drought appears to be the region of persistent atmospheric high pressure over the northeast Pacific Ocean offshore Oregon and Washington. The *resilient ridge*, as it is sometimes referred to, has changed the atmospheric circulation patterns so that the wintertime streams of intense precipitation are blocked from reaching the northern California coastline. These weather features are referred to as *atmospheric rivers* (ARs) and are

extremely important contributors to California's precipitation during the winter months. Some shifts in the high-pressure ridge in December 2014 led to a few AR storms in northern California, as discussed above, but since that time the resilient ridge has reestablished itself.

## Atmospheric Rivers

ARs play an extremely important role in making or "busting" California droughts. The absence of ARs in January 2014 led to precipitation levels of only 0.43 inches statewide, or 11% of average for the month. January 2015 precipitation was 0.47 inches statewide, nearly mirroring the previous year.<sup>21</sup> Again, the absence of ARs was in part responsible for the lack of significant precipitation during the crucial month of January. Further, some have speculated that up to half of California droughts are busted by ARs that provide a significant proportion of annual precipitation over a relatively short period.<sup>22</sup> However, from May through September, California typically receives less than an inch of precipitation statewide per month, so the occurrence of a drought-busting AR in the 2015 water year is increasingly unlikely.

### **Did Human-Induced Climate Change Cause the 2012-2015 California Drought?**

Two studies published in late 2014 provide examples of the ongoing scientific discussion about whether emissions of heat-trapping greenhouse gases by human activities have influenced the current California drought. One study claimed that the current drought is the most severe in the past 1,200 years of California's history.<sup>23</sup> The study stated that diminished snowpack, streamflows, and reservoir levels resulted in a convergence of reduced surface water supply with increased demand, a combination that appears unique in the state's history. The study stated that 2014 was the worst single drought year in at least the last 1,200 years in California but that it was not the driest year. What made the 2012-2014 drought—and 2014 in particular—stand out was the combination of lack of precipitation and record high temperatures, resulting in extreme dryness according to a soil-moisture metric known as the Palmer Drought Severity Index.<sup>24</sup> Attributing a human influence is more tenuous, according to the study, as attribution of a human influence on California rainfall and Pacific storm tracks is equivocal. The study, however, stated that "projections for a continued trend toward higher mean and extreme temperatures are robust." Further, the study linked the future warming to human activities, claiming that "future 'hot' droughts driven by increasing temperatures due to anthropogenic emissions of greenhouse gases ... are assured."

Another study also published in 2014 found that the 2012-2014 dry conditions were not without precedent in California's history. Even with the current drought, the study did not find a clear trend toward wetter or drier conditions over the past 120 years in California.<sup>25</sup> It noted that the impacts of lack of precipitation were exacerbated by warm temperatures and that November 2013 through April 2014 was the warmest winter half-year on record.<sup>26</sup> This second study focused on the influence of sea surface temperatures (SSTs) on atmospheric behavior (SST forcing) and examined the role of natural atmospheric variability and SST forcing as factors influencing the California drought. In its examination of the causes of the current drought, the study observed that generally California dry winters arise from internal atmospheric variability, but that the past three winters also contained a component of SST forcing. In addition, the study noted that many climate model projections show a future *increase* in California precipitation over the midwinter and that "the recent severe all-winter rainfall deficit is thus not a harbinger of future precipitation

<sup>21</sup> California Climate Tracker, at [http://www.wrcc.dri.edu/monitor/cal-mon/frames\\_data.html](http://www.wrcc.dri.edu/monitor/cal-mon/frames_data.html). CRS calculated the average monthly values from using California Climate Tracker data back to 1895.

<sup>26</sup> California receives most of its precipitation during the winter and early spring months, November through April.

change.” However, this second study also stated that in the future California may experience a net surface moisture deficit due to the projected increase in evapotranspiration, driven by warmer temperatures, which would exceed the projected increase in precipitation. Both studies appear to support that prediction.

## Prospects for a Continuing Hydrologic Drought

California receives the bulk of its precipitation in the late fall and winter months (see **Table 1**), and it is difficult to predict with any certainty what the precipitation patterns will be going forward. According to the National Oceanic and Atmospheric Administration’s Climate Prediction Center (CPC), the outlook for California through the end of October calls for little if any chance for improvement in drought conditions.<sup>27</sup> Unless there is an anomalous weather event, California likely will experience persistent drought conditions for the rest of the 2015 water year. The CPC notes that August to October is a dry time in California, a fact that strongly favors drought persistence for much of the state. Any improvement in drought conditions likely would be limited to the southeast California desert, which might receive some rainfall associated with the monsoon and tropical cyclone activity in the eastern Pacific.

As of July 2015, atmospheric and oceanic features reflected an ongoing and strengthening El Niño. They also reflected a greater than 90% chance that El Niño will continue through the 2015-2016 winter in the Northern Hemisphere and an 80% chance it will last into early spring 2016.<sup>28</sup> Within the modeling community, there appears to be a consensus predicting a strong El Niño, with temperature and precipitation impacts expected to increase in the late fall and winter.<sup>29</sup> Strong El Niño conditions have been associated with a greater probability of above-normal precipitation for California and parts of the American Southwest, whereas La Niña conditions often appear to be correlated with drier conditions in those regions.<sup>30</sup> However, the relationship between El Niño-Southern Oscillation (ENSO) conditions and the atmospheric circulation patterns and SSTs in the eastern and northeastern Pacific Ocean—which have been shown to be the immediate cause of California’s drought—are complex and unclear.<sup>31</sup>

## Groundwater and Land Subsidence

In the Central Valley, one of the typical consequences of below-average precipitation, reduced snowpack levels, and lower reservoir levels is an increase in groundwater pumping to offset reduced surface-water supplies. In an average year, groundwater provides about 45% of California’s water supply; in a drought year such as 2015, it may supply as much as 65%.<sup>32</sup> A

<sup>32</sup> Lohdorff and Scalmanini Consulting Engineers, James W. Borchers, and Michael Carpenter, *Land Subsidence from Groundwater Use in California*, California Water Foundation, Summary Report, April 2014, at <http://www.californiawaterfoundation.org/uploads/1397858037-SubsidenceShortReportFINAL%2800248030xA1C15%29.pdf>.

result of increased pumping is often a decrease in groundwater storage, as indicated by lower water table levels. (See text box for a discussion of groundwater storage and availability in the Central Valley.) In addition to affecting groundwater storage, rapid and/or large decreases in water table levels, especially when they decline past historical lows, may lead to land subsidence and may pose risks to surface infrastructure such as roads, pipelines, levees, and canals. Land subsidence has been a longtime issue in the Central Valley, with historical levels of subsidence approaching 30 feet (Figure 7).

**Figure 7. Land Subsidence in the San Joaquin Valley Southwest of Mendota Between 1925 and 1977**

**Source:** Devin Galloway et al., USGS Circular 1182, "Land Subsidence in the United States," 1999, p. 23, at <http://pubs.usgs.gov/circ/circ1182/pdf/06SanJoaquinValley.pdf>.

**Notes:** Approximate location of the maximum land subsidence in the United States, showing the approximate altitude of the land surface in 1925, 1955, and 1977.

In a 2014 summary report, the California Department of Water Resources (DWR) documented that groundwater levels since 2008 in much of the state, and particularly in the Central Valley, were at or below historical lows experienced sometime prior to 2000.<sup>33</sup> The report examined

<sup>33</sup> State of California Department of Water Resources, *Summary of Recent, Historical, and Estimated Potential for Future Land Subsidence in California*, 2014, at <http://www.water.ca.gov/groundwater/docs/> (continued...)

water-level data from long-term wells with a record of 10 or more years. Some wells, especially from portions of the Sacramento Valley, southern San Joaquin Valley, and a few other locations, exhibit groundwater levels more than 50 feet below historical levels. In the Central Valley in 2014, 36% of the long-term wells in the Sacramento Valley and 55% of the long-term wells in the San Joaquin Valley were at or below historical levels recorded during springtime conditions.<sup>34</sup> (See **Figure 8**.)

As a result of increased groundwater pumping, subsidence is occurring or reoccurring in many portions of the state. In some cases, it has damaged land surface features (e.g., one study indicated subsidence of 1.35 feet between 1995 and 2010 along the Coachella Branch of the All American Canal in the Coachella Valley, causing earth fissures).<sup>35</sup> The California DWR report estimates that areas with the highest potential for future subsidence are in the southern San Joaquin, Antelope, Coachella, and western Sacramento Valleys. (See **Figure 9**.)

### Groundwater Availability and Storage in the Central Valley<sup>36</sup>

Groundwater has been an integral component of water supply for towns and farms in the Central Valley for over a century. Today, groundwater is the principal supply for municipal and industrial use in the San Joaquin Valley. By volume, however, agricultural demand for groundwater dwarfs municipal and industrial demand in the Central Valley, which comprises three-quarters of irrigated land in California and one-sixth of all irrigated land in the United States. The huge agricultural demand exceeds the availability of surface water or groundwater by themselves; it is met only by a combination of surface water and groundwater supplies. According to a U.S. Geological Survey (USGS) analysis, between 1961 and 2003 surface water supplied, on average, about 10 million acre-feet (MAF) per year for irrigation in the Central Valley and groundwater supplied slightly less than 9 MAF per year. Groundwater pumping from Central Valley aquifers constitutes about 20% of total U.S. groundwater demand, which makes it the second-most-pumped aquifer system in the nation.

#### Groundwater Demand Increases in Dry Years

The relationship between surface water use and groundwater use for irrigation in the Central Valley is complex and variable, but historically the proportion of groundwater use has increased during drier and drought years and has decreased during wetter years. That is, the aquifers function to some extent as multiyear reservoirs that are tapped more heavily when surface water is less available. In the USGS modeling analysis, for example, in a wet year groundwater pumping may be only 4.5 MAF, about half of the surface water deliveries for irrigation, whereas in a dry year groundwater pumping may be nearly 12 MAF and exceed the amount supplied by surface water.

#### Central Valley Groundwater Supply Decreases

Some question whether groundwater stored in Central Valley aquifers could be further used to help farmers meet their irrigation demands during periods of extended drought or as a long-term substitute for decreased deliveries of surface water as a result of regulatory requirements, legal actions, or other curtailments. The answer depends in part on what is known as the water budget. Put simply, when the amount of groundwater pumped from the Central Valley equals the amount of water returned to the aquifer system, the amount of groundwater held in storage remains the same—the hydrological equivalent of a balanced budget. However, if the amount of groundwater pumped exceeds the amount returned, then groundwater storage decreases. Over the period 1961-2003, USGS estimated that the amount of groundwater held in storage decreased by an average of 1.4 MAF per year, signifying that pumping exceeded recharge even though California went through cycles of wetter and drier years. Decreases in groundwater storage typically are indicated by declines in the water table (i.e., the elevation of the groundwater surface that lies below the land surface). Thus, if groundwater storage continues to decline, then water levels also would be expected to decline.

#### Increased Groundwater Use Has Consequences

How much the water table would decline is difficult to predict because the geology of the Central Valley aquifer system is not homogenous. Different agricultural regions likely would pump groundwater at different rates depending on a host of factors, such as cost of pumping (which depends partly on the depth to the water table), availability of alternate supplies, groundwater quality, and others. Parts of the Central Valley, such as the western side of the San Joaquin Valley, experienced hundreds of feet of water table decline in the 20<sup>th</sup> century because of groundwater pumping, which in some places resulted in actual land subsidence approaching 30 feet. Reduced pumping in some of those areas has allowed groundwater levels to recover, however, the compaction of the aquifer from land subsidence means that the volume of groundwater storage has been permanently decreased.

The use of groundwater to offset diminished surface water supplies during droughts is therefore not without consequences. Although the absolute amount of groundwater held in storage in the Central Valley aquifer system is likely huge (one estimate is 800 MAF in the upper 1,000 feet of sediments), increased pumping that outstrips the amount of water returned means that water table levels likely will drop. Lower water tables generally increase pumping costs, increase the likelihood of land subsidence, and may reduce the availability of groundwater to regions where the aquifer sediments are thinner and less extensive or may have impaired water quality.

#### New California Groundwater Law

<sup>36</sup> C. C. Faunt et al., *Groundwater Availability of the Central Valley Aquifer, California*, USGS Professional Paper 1766, 2009, p. 62, at [http://pubs.usgs.gov/pp/1766/PP\\_1766.pdf](http://pubs.usgs.gov/pp/1766/PP_1766.pdf); U.S. Bureau of Reclamation, *The Central Valley Project: Introduction*, by Eric A. Stene, at <http://www.usbr.gov/history/cvpintro.html>; W. M. Alley, "Tracking U.S. Groundwater Reserves for the Future," *Environment*, vol. 48, no. 3 (2006), pp. 10-25; Devin Galloway, David R. Jones, and S.E. Ingebritsen, *Land Subsidence in the United States, San Joaquin Valley, California*, USGS Circular 1182, 2005, at <http://pubs.usgs.gov/circ/circ1182/>; and California Department of Water Resources, *California Groundwater, Sustainable Groundwater Management*, at <http://www.water.ca.gov/cagroundwater/>.

California Governor Brown signed three bills into law on September 16, 2014, collectively referred to as the Sustainable Groundwater Management Act. The new law establishes a framework that requires local agencies to manage groundwater in a sustainable manner. The law sets out a schedule that begins with the California DWR adopting regulations for evaluating groundwater sustainability plans by June 1, 2016. It also requires formation of regional groundwater sustainability agencies, identifies high- and medium-priority basins in critical groundwater overdraft status, and implements the plans. It ultimately would result in sustainably groundwater management by January 2040.

## California's Drought and CVP Operations

Several factors in addition to hydrology affect the operation of the CVP and SWP. These include protections for threatened and endangered species under the federal Endangered Species Act (ESA; P.L. 93-205; 16 U.S.C. §§1531 et seq.); state water quality protections under state law and the federal Clean Water Act (CWA; P.L. 92-500); and other federal and state laws, including the state's system of water rights.

Some observers of the 2012-2015 drought have cited regulatory compliance—particularly restrictions on pumping and proscribed reservoir storage releases under the federal ESA—as a key driver of reduced water supplies, referring to the drought as “Congress-made” or “man-made.”<sup>37</sup> The argument stems from the fact that stored water has been released to support threatened and endangered fish species during wet years, rather than storing the water for delivery to users in these dry times. Conversely, fish protection requirements at times require holding back water in reservoirs to provide cold water for fish during warmer periods of the year. Thus, the regulations do not allow that water to be released and pumped further south during the winter for storage or for use at a later time south of the Bay-Delta. Even in above-normal precipitation years, water deliveries have been curtailed for some water users—typically water and irrigation districts with more junior water priorities relative to others receiving water from the CVP system. Such actions have led some to blame federal ESA restrictions for water supply reductions. It is not clear how much more water might have been available to CVP water users had supplies not been restricted due to species protection requirements in prior years—particularly wet years; however, some have estimated that it could be as high as 1.1 million acre-feet (MAF) in a wet year, or 440,000 acre-feet (AF) annually, on average.<sup>38</sup>

Based on federal and state estimates provided for the 2014 water year—a drought year—it appears that ESA compliance was not the predominant controlling factor in CVP and SWP pumping restrictions.<sup>39</sup> State water quality standards and other factors also play an important role

<sup>37</sup> Kendall Breitman, “Carly Fiorina Blames Environmentalists for California Drought,” *Politico*, April 6, 2015, at <http://www.politico.com/story/2015/04/carly-fiorina-california-drought-116711.html>. See also U.S. House Committee on Natural Resources at <http://naturalresources.house.gov/issues/issue/?IssueID=5921>.

<sup>38</sup> For example, see *San Luis & Delta-Mendota Water Authority, et al., California Department of Water Resources v. Kenneth Lee Salazar, et al., Natural Resources Defense Council*, 1:09-cv-00407-LJO-DLB 9 (9<sup>th</sup> Cir. Court of Appeals 2014), p. 3 *infra* note 1. Plaintiffs refer to reports projecting that had 2009 been a wet year, the BiOps (biological opinions) would have resulted in “water losses of 1.1 MAF, with an average annual loss over time of 440,000 acre feet” and to a DWR report stating exports in September and October might be reduced by 70%.

<sup>39</sup> Email communications from the California Department of Water Resources on May 22, 2015, noting that Endangered Species Act (ESA) impacts to SWP for the 2014 water year are estimated to be 47,000 acre-feet; and email communication from Reclamation on July 14, 2015, noting that ESA impacts on CVP pumping are estimated to be 62,200 acre-feet for the 2014 water year. See also CALFED Operations Group, *Water Year 2014 CVPLA Section 3406(b)(2) Operations and accounting*, January 28, 2015, p. 12, at [http://www.usbr.gov/mp/cvo/data/FINAL\\_WY14\\_b2\\_presentation.pdf](http://www.usbr.gov/mp/cvo/data/FINAL_WY14_b2_presentation.pdf).

in CVP water management, particularly in dry years, whereas ESA compliance may play a larger role in non-drought years.<sup>40</sup>

The following sections discuss the range of factors that affect Delta pumping and CVP water deliveries. Specifically, they discuss key regulatory and water management factors that contribute to annual water allocation decisions (e.g., biological opinions [BiOps] under the federal ESA, other federal laws such as the Central Valley Project Improvement Act (CVPIA), the federal CWA and resultant state water quality requirements, and the state system of water rights and CVP water allocation priorities). Understanding the limits of the underlying hydrological system upon which CVP water supply allocations are based is critical to addressing short-term and long-term water supply issues for the state. Similarly, it is important to understand the complex mix of regulatory and statutory restrictions, water rights, and contract priorities that affect CVP water management.

## Regulatory and Statutory Restrictions Affecting CVP and SWP Water Deliveries

There are at least four key regulatory compliance factors that affect the timing and amount of water that is available for delivery to CVP and SWP contractors.<sup>41</sup> The factors relate primarily to the following:

- State water quality requirements pursuant to state and federal water quality laws;
- Regulations and court orders pertaining to implementation of the federal ESA;<sup>42</sup>
- Implementation of the 1992 CVPIA; and
- State water rights and CVP water allocation priorities.

Another compliance factor related to state water rights priorities is the contracting process for water delivered from the CVP and SWP. Water users enter contracts with Reclamation and the DWR that include provisions for the amount of water to be delivered and conditions under which water may not be delivered. Specifically, these contracts include provisions noting that contractors are not guaranteed full contracted amounts of water.<sup>43</sup> The contracts also provide exceptions for Reclamation to reduce the contract quantity due to hydrologic conditions and other conditions outside the control of the contracting officer.<sup>44</sup> Other considerations at play during drought years include maintaining deliveries for essential human health and safety and maintaining reservoir reserves for future years in case of long-term or extended drought.

---

<sup>40</sup> See, *Infra* note 2.

<sup>41</sup> For purposes of this report, *regulatory compliance restrictions* are defined as restrictions for which the basis in state or federal law generally falls into three categories and has resulted in flow or other requirements restricting pumping: (1) water quality protection; (2) fish and wildlife protection, enhancement, and restoration; and (3) threatened and endangered species protection.

<sup>42</sup> Requirements of the California Endangered Species Act (CESA) are currently being satisfied through implementation of the federal ESA due to a California state determination that project operations under the federal BiOps are consistent with requirements under CESA. Presumably, if protections afforded to threatened and endangered species under the federal ESA were no longer in place, the state of California could invoke protections under CESA.

<sup>43</sup> In total, the CVP has issued contracts for approximately 9 MAF of water, more water than it delivers on average (6 MAF to 7 MAF).

<sup>44</sup> See U.S. Bureau of Reclamation, Mid-Pacific Region, *Final Form of Contract, 4-19-2004*, Articles 3b, 11, 12a, and 12b, at [http://www.usbr.gov/mp/cvpia/3404c/lt\\_contracts/index.html](http://www.usbr.gov/mp/cvpia/3404c/lt_contracts/index.html).

## Limitations on Delta Pumping

An estimated 25 million people get some portion, if not all, of their drinking and agricultural water supplies from the Sacramento and San Joaquin Rivers Delta confluence with San Francisco Bay—often referred to as the hub of California’s water supply system.<sup>45</sup> Water from the Sacramento and San Joaquin Rivers enters the Bay-Delta estuary and mixes with tidally influenced saline water from San Francisco Bay. At the southern tip of the Delta, two sets of large pumps—one for the SWP (the Harvey O. Banks pumping station) and one for the CVP (the William C. “Bill” Jones pumping station)—extract water from the Delta and pump it into state and federal canals for delivery to “south-of-Delta” (SOD) water users. For decades, this transfer of water from northern California through the Delta to supply farms and cities in southern California has had profound impacts on fish and wildlife resources, water quality, and regional water supplies. For example, commercial and recreational fisheries on which many north coast fishermen depend are affected by water management and water quality in the Delta and its tributaries, as are communities and farmers within the Delta area who divert water from the Delta for their own use. At the same time, large agricultural areas in the southern portions of the Central Valley and communities as far south as Los Angeles and San Diego also rely on water diverted (or exported) from the Delta.

Over decades—particularly since the 1950s—both state and federal laws have been enacted and implemented to protect Delta resources and the fish, wildlife, and human populations that rely on these resources.<sup>46</sup> More recently—since the early 1990s—state water quality requirements, ESA requirements, and CVPIA provisions have combined to limit Delta pumping (Delta exports) and thus deliveries to some SOD water users, even in relatively wet years.

Thus, in addition to hydrologic or drought-related restrictions on water supplies, also at issue is how state and federal laws and regulations affect deliveries of water from the CVP and SWP. The effects of reduced pumping—or Delta exports—can and have resulted in economic losses in some of California’s most productive agricultural areas. Some estimate such losses for 2014 at \$1.5 billion in direct agricultural losses (\$800 million in the Central Valley and Tulare Basin, which receive a significant amount of water from the CVP) and \$2.2 billion in total economic costs due to drought.<sup>47</sup>

Changes in water deliveries due to reduced water supplies can pit widespread economic losses in some areas of central and southern California against (1) possible extinction of several species and economic losses to north-coast communities and others dependent on salmon and recreation industries, and (2) in-Delta farmers and communities that rely on freshwater in the Delta to maintain reasonable salinity levels. For example, the 95% loss of winter-run Chinook salmon reproduction and high mortality of spring-run Chinook salmon spawning may result in closures of north-coast commercial or recreational fishing in subsequent years, as occurred during the last

---

<sup>45</sup> State of California, Department of Natural Resources and Department of Water Resources, Bay-Delta Conservation Plan, “About the Delta,” at <http://baydeltaconservationplan.com/AboutTheDelta/AbouttheDelta.aspx>.

<sup>46</sup> For example, as early as 1959, the state of California enacted the Delta Protection Act to provide “assurances to [Delta water interests] that an adequate water supply in the Delta would be maintained” and would “provide protection to the Delta from the effects of tidal salinity.” See Craig M. Wilson, Delta Watermaster, *California’s Area of Origin Laws*, a report to the State Water Resources Control Board and the Delta Stewardship Council, (no date), pp. 5-7. See also CRS Report RL34554, *California Water Law and Related Legal Authority Affecting the Sacramento-San Joaquin Delta*, by Cynthia Brown.

<sup>47</sup> California Water Boards, State Water Resources Control Board, Regional Water Quality Control Boards, *2015 Drought Water Project Operations*, PowerPoint presentation, pp. 2-3.

drought.<sup>48</sup> And the situation involving reduced Delta pumping is more complex than “farms vs. fish.” Freshwater flows and mixing in the Delta are required for a number of reasons, including maintaining adequate water quality for in-Delta farmers and communities dependent on Delta water supplies and maintaining a salinity barrier to avoid saltwater intrusion deep into the estuary.

Following is a brief description of some of the major regulations and statutory requirements that sometimes restrict flows or otherwise affect Delta pumping and thus at times limit Delta exports to SOD water contractors. Some of these requirements serve more than one purpose. For example, the state Water Quality Control Plan (WQCP, or D-1641), discussed below, includes a significant number of water quality and flow actions to protect or maintain in-Delta water quality (primarily from saltwater intrusion) and to protect fish and wildlife habitat generally.

### ***The 1995 Delta Water Quality Control Plan and Decision 1641***

The WQCP was issued by the California State Water Resources Control Board (SWRCB) to comply with state obligations under the federal CWA.<sup>49</sup> The plan requires the SWP and CVP to meet certain water-flow objectives in the Delta to maintain desired salinity and other water quality objectives, including conditions and actions to support fish and wildlife habitat. These objectives (e.g., outflow targets, export to inflow ratios, X2 and the Vernalis Adaptive Management Program [VAMP] targets or objectives) often affect the amount and timing of water available to be pumped, or exported, from the Delta, and thus at times result in reduced Delta exports to CVP and SWP water users south of the Delta.<sup>50</sup> According to Reclamation, implementation of D-1641 significantly reduced water for export and included significant “new ‘export limitation’ criteria such as the export to inflow [E/I] ratios and San Joaquin River pulse period export limits”<sup>51</sup> to manage Delta salinity levels and protect fish and wildlife.

### ***Central Valley Project Improvement Act***

In 1992 (at the end of a major six-year California drought), Congress passed the CVPIA.<sup>52</sup> The act established fish and wildlife purposes as official project purposes of the CVP and called for a number of actions both to protect and restore fish and wildlife resources and to mitigate CVP damages to fish and wildlife resources. These actions included directives to double certain fish populations by 2002 (which has not occurred), allocate 800,000 AF of project water (600,000 AF in drought years) to fish and wildlife purposes (often referred to as *(b)(2) water*, after the

---

<sup>48</sup> California Water Boards, State Water Resources Control Board, Regional Water Quality Control Boards, *2015 Drought Water Project Operations*, PowerPoint presentation, pp. 2-3.

<sup>49</sup> The CWA requires the states to implement water quality standards that designate water uses to be protected and adopt water quality criteria that protect the designated uses. For application to California, see *United States v. State Water Resources Control Board (Racanelli)*, 182 Cal. App. 3d 82, 109 (Cal. Ct. App. 1986). Through the Porter-Cologne Act (a state law), California implements federal CWA requirements and authorizes the State Water Resources Control Board to adopt water quality control plans, or basin plans (see Cal. Water Code §13160).

<sup>50</sup> Inability to reach agreement on water quality objectives through deliberation and litigation nearly shut down Delta pumping in the early 1990s and was a significant factor in creation of the Bay-Delta Accord—a partnership between federal and state agencies with projects, responsibilities, and activities affecting the Delta. Habitat protection commitments in the accord were incorporated into the WQCP, as were actions called for under the Vernalis Adaptive Management Program (VAMP), and were included by the State Water Resources Control Board in a document known as D-1641, which amended the underlying water rights of the SWP and CVP. (See U.S. Department of the Interior, Bureau of Reclamation, Mid-Pacific Region, *Long-Term Central Valley Project Operations Criteria and Plan (CVP-OCAP)*, Sacramento, CA, May 22, 2008, pp. 2-6.)

<sup>51</sup> *Ibid.*

<sup>52</sup> P.L. 102-575, P.L. 102-575, Title 34, 106 Stat. 4706.

provision in the act calling for the allocation), and provide water supplies for Central Valley refuges (full Level 4 supplies have not been fully implemented).<sup>53</sup> The (b)(2) allocation often has resulted in less water being exported annually from the Delta and thus has reduced the amount of water available to some CVP water service contractors with junior priority within the CVP system.

However, the (b)(2) allocation is sometimes also used to meet other state and federal requirements, such as fish and wildlife aspects of the WQCP as implemented under D-1641, and thus is not always an additional requirement.<sup>54</sup> For example, for the 2014 water year, CVP accounting of (b)(2) allocations note that of the 402,000 AF (b)(2) assets used, 176,300 AF (44%) was attributed to export reductions for WQCP Delta outflow requirements.<sup>55</sup> The remainder was attributed to reservoir releases (163.5 MAF) for both CVPIA anadromous fish restoration and salmonid BiOp purposes, and to export actions (62.2 MAF) under the 2009 salmonid BiOp.<sup>56</sup>

### *ESA Biological Opinions*

Until 2004, a federal 1993 winter-run Chinook salmon Biological Opinion (BiOp) and a 1995 Delta smelt BiOp (as amended) governed Delta exports for federal ESA purposes (see text box).<sup>57</sup> However, a proposed change in coordinated operation of the SWP and CVP in 2004 (including increased Delta exports), known as OCAP (Operations Criteria and Plan),<sup>58</sup> resulted in development of new BiOps by the National Marine Fisheries Service (NMFS) in 2004 and the Fish and Wildlife Service (FWS) in 2005 to assess the effects of increased pumping and other proposed operations on threatened and endangered species. While the first OCAP BiOps found “no jeopardy” to listed species, the 2005 FWS BiOp was found unlawful and inadequate by a federal court<sup>59</sup> and the NMFS BiOp was subsequently voluntarily withdrawn and redone. Subsequent BiOps include a host of actions to protect listed species, including restrictions on pumping during certain periods, prescriptions on the release and storage of cold water to support fisheries, and other CVP management prescriptions.

Implementation of the reasonable and prudent alternatives (RPAs) contained in the federal BiOps, which limit pumping and call for water releases from key reservoirs to support listed species, has been modified due to temporary urgency change orders (TUCs) issued by the SWRCB in 2014 and again in 2015. These TUCs have been sanctioned by NMFS and FWS. Such changes have

---

<sup>53</sup> Level 4 water supplies are defined as the increment over Level 2 supplies needed to provide the optimal amount of water supply for the refuges, to be acquired from willing sellers or sources outside the CVP.

(The full 600,000 AF (b)(2) allocation was not used in 2014.)

<sup>56</sup> *Ibid.*

<sup>57</sup> DWR has relied on federal restrictions for compliance with the California Endangered Species Act (CESA), a decision that has been the subject of some controversy.

<sup>58</sup> U.S. Department of the Interior, Bureau of Reclamation, Mid-Pacific Region, *Long-Term Central Valley Project Operations Criteria and Plan (CVP-OCAP)*, June 30, 2004. On July 31, 2015, Reclamation released a new environmental impact statement (EIS) on implementation of the 2008 and 2009 BiOps. CRS was not able to analyze the EIS prior to preparation of this report.

<sup>59</sup> *Natural Resources Defense Council v. Kempthorne*, 506 F. Supp. 2d 322 (E.D. Cal. 2007). In 2007, a federal court held that the 2005 Fish and Wildlife Service Delta Smelt BiOp, which found that Operations Criteria and Plan (OCAP) posed no jeopardy to the Delta smelt, was unlawful and inadequate.

allowed more water to be pumped during certain periods based on real-time monitoring of species and water conditions. The state DWR estimates that approximately 400,000 AF of water was made available for export due to these orders in 2014.<sup>60</sup>

### Biological Opinions Under ESA

Federal agencies are required to consult with the Fish and Wildlife Service (FWS) or the National Marine Fisheries Service (NMFS) to determine whether an agency project might jeopardize the continued existence of species listed as endangered or threatened pursuant to the federal Endangered Species Act (ESA)<sup>61</sup> or might destroy or adversely modify a species' critical habitat. This process is known as *consultation*. Consultation concludes with the appropriate service issuing a biological opinion (BiOp) on the potential harm the project poses. If a project could jeopardize a species, a *jeopardy opinion* is released, along with any reasonable and prudent alternatives (RPAs) to the agency action that would avoid jeopardy. If no jeopardy is found, a *no jeopardy opinion* is issued.

FWS and NMFS each have issued federal BiOps on the effects of changes to the coordinated operation of the State Water Project (SWP) and Central Valley Project (CVP) and found that proposed changes, including increased pumping from the Delta, would jeopardize the continued existence of several species protected under the ESA and thus risk the extinction of these species. To avoid such jeopardy, the FWS and NMFS BiOps included RPAs for project operations. Actions needed to avoid jeopardy to Delta smelt under the FWS BiOp issued in December 2008<sup>62</sup> resulted in restrictions on the amount of water exported via SWP and CVP Delta pumps (Delta exports). The June 2009 NMFS BiOp on salmon and other anadromous and ocean species includes further limitations on pumping and release of stored water.<sup>63</sup> These restrictions, combined with reductions necessitated by drought conditions, have resulted in some water users receiving less or no water normally supplied by the CVP.

### Other Factors Affecting Pumping

In addition to the ESA, several other state and federal laws enacted to protect Delta resources have resulted in restrictions on how much, and when, water may be pumped from the Delta by the SWP and CVP. For example, the California Endangered Species Act (CESA) was the basis for halting pumps in 2008,<sup>64</sup> and in 2014 California's water quality control plan (D-1641) often came into play restricting pumping before ESA. These restrictions, while protecting the interests of those who rely on and value Delta resources and the goods and services they provide (e.g., cleaner, less saline water; viable fish habitat for recreational and commercial fish species; and water supply for in-Delta or near-Delta users), also have resulted in some water users receiving less water than they originally contracted to receive from the SWP and CVP. Although many of these water users benefit from better-quality water than what otherwise might be delivered, these regulatory restrictions to protect threatened and endangered species and water quality have reduced the quantity of water available to those south-of-Delta SWP and CVP users with contracts based on water rights junior in priority to other senior rights holders or with otherwise lower priority for CVP project deliveries.<sup>65</sup>

<sup>64</sup> *Watershed Enforcers v. California Dep't of Natural Resources*, No. RG06292124 (Sup. Ct. Alameda Co. March 22, 2007).

<sup>65</sup> Lack of sufficient water supplies in 2014 also resulted in historically low water deliveries to senior water rights (continued...)

Many of those adversely affected have expressed anger over export reductions and frustration with federal and state officials who are responsible for or who implement Delta export reductions.<sup>66</sup> Others, including Pacific Coast fishermen's organizations and groups concerned about the effects of increased pumping on declining fish species and north-coast fish-dependent economies, generally oppose efforts to halt or modify implementation of the BiOps, including recent legislative attempts to increase pumping.<sup>67</sup>

## Effects of Regulatory and Statutory Restrictions

The above restrictions, combined with hydrologic conditions, contribute to reductions in pumping from the Bay-Delta at both the CVP and SWP pumping plants and to significant reductions in SOD water deliveries for some users. For example, CVP agricultural water service contractors have had their deliveries reduced from full contract supplies in all but 3 of the last 25 years—since the regulatory factors noted above have been in place—and reduced by 50% or more in 12, or nearly half, of those 25 years, even though total combined exports rates are on average higher than in the past (see **Table 2**).

It is not clear to what extent each of the above statutory and regulatory requirements independently has contributed to Delta export reductions in any given year. In managing SWP and CVP operations, both DWR and Reclamation must balance flow and other criteria in the Delta with temperature requirements and other factors in disparate places within the projects' system, including stretches of the Sacramento River. Thus, some of these requirements overlap and at times also may conflict with one another. For example, river temperature requirements may dictate release of water from upstream reservoirs at certain times when such releases may leave less water available for species needs at a later date. These factors make it especially difficult to ascertain to what extent the different water quality and/or CVPIA obligations noted above contribute to Delta export reductions in any given year.

## Recent Delta Export Reductions: Selected Examples<sup>68</sup>

Combined CVP and SWP Delta exports in the 2014 water year are estimated to have been 1.86 MAF (or 38% of total average annual exports of 4.84 MAF) from 1976-2014, the lowest combined export recorded during that 38-year time period (see **Table 2**).<sup>69</sup> Reclamation estimates that the amount of CVP water not pumped (CVP export reduction) due to ESA restrictions was 62,200 AF (0.062 MAF) of water in 2014; approximately 2% of the total reduction in pumping

---

(...continued)

holders south of the Delta. Some water users argue that had these regulatory restrictions not been in place in wet water years, there would have been more water available for use during these drought years.

<sup>66</sup> See House Committee on Natural Resources, Oversight Field Hearing on "California Water Crisis and Its Impact: The Need for Immediate and Long-Term Solutions," March 19, 2014, and congressional floor debate on H.R. 2898, July 15 and 16, 2015.

<sup>67</sup> John McManus, Dick Pool, and Randy Repass, et al., *The Impact of the California Drought on Salmon*, Golden Gate Salmon Association, handout from presentation for congressional staff, April 15, 2015, p. 1.

<sup>68</sup> Examples are based on data supplied by Reclamation or more readily available in operations reports.

<sup>69</sup> The annual combined exports of the SWP and CVP averaged 5.7 MAF from 1998 through 2007. However, a five-year average (2003-2007) was 6.1 MAF, and a three-year average (2004-2006, when OCAP changes were in effect), was 6.2 MAF. U.S. Department of the Interior, Bureau of Reclamation, Mid-Pacific Region, *Biological Assessment on the Long-Term Operations of the Central Valley Project and the State Water Project*, Sacramento, CA, August 2008, Table 2-25, p. 120, at [http://www.usbr.gov/mp/cvo/OCAP/sep08\\_docs/OCAP\\_BA\\_Aug08.pdf](http://www.usbr.gov/mp/cvo/OCAP/sep08_docs/OCAP_BA_Aug08.pdf) (hereinafter referred to as the 2008 BA).

from the long-term average of 4.84 MAF.<sup>70</sup> The state estimates that SWP exports were reduced by approximately 47,000 AF (0.047 MAF) over 29 days due to ESA restrictions in 2014.<sup>71</sup> Combined, it appears that 0.109 MAF (109,000 acre-feet) of the total reduction in combined exports can be attributed to pumping restrictions required to protect listed species under ESA. The remaining reductions were most likely due to a lack of runoff and operational changes needed to control salinity levels in the Delta.

In contrast to the estimated reductions for ESA, Reclamation estimates that CVP export reductions made for state D-1641 habitat and fishery purposes in 2014 totaled 176,300 AF.<sup>72</sup> As noted earlier, Reclamation identified these state-mandated reductions as actions counting toward CVPIA (b)(2) water allocation for (b)(2) accounting purposes. In years past, it has been noted that up to 450,000 AF annually could be used to meet Delta D-1641 water quality and habitat obligations from the 800,000 AF (b)(2) allocation set aside for fish and wildlife purposes under the CVPIA.<sup>73</sup> Thus, in some years, pumping restrictions are controlled more often by D-1641, resulting in CVP pumping reductions for D-1641 greater than for ESA purposes. In wet years, however, ESA restrictions may have a higher nominal impact on exports and proportionally higher impacts in certain months.<sup>74</sup> DWR does not account for reductions from historical levels due to D-1641 standards.<sup>75</sup>

Reclamation estimated that restrictions for the protection of salmon and other fish species resulted in approximately 250,000 AF of CVP export reductions in 2013. This figure represents nearly 39% of the total CVP export reductions for 2013 (depending on agency calculations). Reclamation noted similar reductions in 2009 during the previous drought (see below).<sup>76</sup> For 2011 (a wet year), Reclamation estimated that pumping restrictions totaled 90,000 AF (62,000 AF for endangered species and 28,000 AF for CVPIA purposes), or approximately 1.4% of the 6.9 MAF that was exported from the Delta that year. **Figure 10** shows CVP and SWP pumping levels from 1976 through 2014. As shown in **Figure 10**, higher-than-average combined pumping levels were sustained from 2000 through 2007.

Under several different scenarios (using different export baseline totals), the estimated impacts of ESA restrictions on exports in 2009 ranged from 20% to 25% (see text box below). The 2008

<sup>73</sup> According to CALFED documents, the agencies, “in conjunction with the Governor’s Drought Contingency Plan ... will use their available resources to create an insurance policy that will seek to eliminate impacts to water users, while not adversely affecting other uses.” See CALFED Bay-Delta Program, Programmatic Record of Decision, vol. 1, Record of Decision and Attachments 1-4, Aug. 28, 2000, p. 55.

<sup>74</sup> *San Luis & Delta-Mendota Water Authority, et al., California Department of Water Resources v. Kenneth Lee Salazar, et al., Natural Resources Defense Council*, 1:09-cv-00407-LJO-DLB 9 (9<sup>th</sup> Cir. Court of Appeals 2014), p. 3 *infra* note 1. Plaintiffs refer to reports projecting that had 2009 been a wet year, the BiOps would have resulted in “water losses of 1.1 MAF, with an average annual loss over time of 440,000 acre feet” and to a DWR report stating exports in September and October might be reduced by 70%.

<sup>75</sup> Email communication with the California Department of Water Resources, February 10 and February 13, 2015, and May 22, 2015.

<sup>76</sup> U.S. Department of the Interior, Bureau of Reclamation, *California Drought Response Fact Sheet*, revised September 17, 2009, p. 1.

FWS Delta smelt BiOp actions initially were estimated to reduce Delta exports by 500,000 AF (0.5 MAF). However, a district court prevented those measures from fully taking effect in 2009,<sup>77</sup> and drought conditions affected operations such that other factors reduced pumping ability before ESA restrictions could fully take effect. For example, at a March 31, 2009, House Committee on Natural Resources hearing, acting Reclamation Commissioner William McDonald noted that although FWS Delta smelt BiOp pumping restrictions became effective in early March 2009, Reclamation at the same time needed to restrict pumping due to other statutory restrictions (i.e., CVPIA). The Commissioner stated: “There was actually no net reduction in pumping [from federal pumps in early 2009] merely because of ESA.”<sup>78</sup> Later in the year, however, ESA did come into play resulting in restricted pumping, as discussed below.

### **Caveats Regarding Factors Affecting Exports**

The volume of water estimated to make up the export reductions in any given year depends on assumptions underlying calculations of the estimate (e.g., the amount of rescheduled water from a prior year that might have been moved earlier to make space available for additional storage, water that might have been hydrologically available for pumping, etc.). (See <http://www.usbr.gov/newsroom/newsrelease/detail.cfm?RecordID=42804> for information on actions to make up for reduced pumping.)

Additionally, the export reduction as a percentage of exports will vary depending on the baseline used for the total average export. For example, the average annual combined export level based on a selective three-year average (e.g., 2004-2006, when Reclamation increased pumping under the new coordinated operations plan [OCAP]) is 6.2 MAF (see Table 2). This three-year window approximates the time between the issuance of OCAP and court-imposed restrictions on pumping levels. The estimated exports for 2009 of 3.6 MAF under this scenario represent a reduction of 2.6 MAF for 2009, or 42% from the three-year average. Of this amount, approximately 19% (0.5 MAF) could be attributed to Delta smelt restrictions and 81% (2.1 MAF) to drought and other factors. However, the average pumping levels during this time were 0.05 MAF higher than the average from 1998 to 2007 and substantially higher than in any other period except 1989 and 1990. Different baselines would yield different results. For example, if the 10-year average from 2000 through 2009 (5.4 MAF) were used, the pumping reduction would be smaller—1.8 MAF as opposed to 2.6 MAF—but the percentage attributable to Delta smelt restrictions would be higher (28%). The percentage reductions attributable to Delta smelt restrictions in non-dry (non-drought) years in all scenarios are estimated to be higher than those estimated for 2009.

In sum, although the RPAs for threatened and endangered species protection under ESA affect Delta exports, other requirements also restrict exports and contribute to RPA actions. Together these elements are intended to provide a network of protection for species and water quality for in-Delta uses such as farming and drinking water, and one element is not easily separated from others. Thus, even if the ESA were waived or overridden, federal and state agencies would still be required to comply with several state and federal laws and directives that in combination limit Delta exports (e.g., the federal Clean Water Act and CVPIA, the state Porter-Cologne Act and its implementing directive D-1641, the California Endangered Species Act, and the California Fish and Game Code). Crafting congressional solutions to the water supply restrictions thus becomes difficult and involves many interested parties and stakeholders with differing interests, as well as interactions with state law and policies.

<sup>77</sup> *San Luis and Delta-Mendota Water Authority v. Salazar*, 2009 WL 1575169 (E.O. Cal. May 29, 2009). It is not clear what effect this decision had on the 500,000 AF estimate.

**Source:** CRS from data provided by the U.S. Dept. of the Interior, Bureau of Reclamation, email communication, November 14, 2014, *Total Annual Pumping at Banks, Jones, and Contra Costa Pumping Plants 1976-2014 (MAF)*.

**Notes:** Water year types are as follows: AN = Above Normal; BN = Below Normal; D = Dry; W = Wet; and C = Critical (critically dry). MAF = Million acre-feet.

- a. In the sixth column, SOD-Ag refers to south-of-Delta agricultural water service contractors (junior water rights holders under California water law). Percentages show water allocations for these contractors as a percentage of their maximum contract total.
- b. In the seventh column, the “Shasta Index” refers to an index used to determine water allocations based on unimpaired inflows into Shasta Lake, the reservoir behind Shasta Dam in Northern California. Water year types and thus water allocations are determined based on the elevation of Shasta Lake at certain times of the year. Critical refers to a critically dry year in which the Shasta inflows were below specified levels, triggering reduced water allocations for CVP contractors.
- c. Averages may not square due to rounding.

**Figure 10. CVP and SWP Delta Water Exports, 1976-2014**

**Source:** CRS from data provided by the U.S. Dept. of the Interior, Bureau of Reclamation, November 14, 2014: *Total Annual Pumping at Banks, Jones, and Contra Costa Pumping Plants 1976-2014 (MAF)*.

**Notes:** The spike in 2001 correlates to the filling of Diamond Valley reservoir and the ability of the SWP to export high excess winter flows; albeit in an overall dry year. The troughs in 1977, 1991-1992, and 2008-2009 reflect exports during previous California droughts.

## How Do Recent Exports Compare to Previous Droughts?

California is experiencing its fourth significant drought in approximately 40 years, averaging one each decade: 1976-1977; 1987-1992; 2008-2010; and 2012-the present. Combined CVP and SWP exports were curtailed to 2.71 MAF in 1977 but reached a record high for the time in 1989 and 1990 (6.1 MAF and 5.92 MAF, respectively) in the middle of a six-year drought.<sup>79</sup> It was not until 1991 and 1992, the last two years of the drought, that combined CVP and SWP exports were significantly curtailed to 3.29 MAF and 3.0 MAF, respectively (see **Table 2**).

Reclamation estimates that during the last drought, combined 2008 water year exports totaled 3.49 MAF, a difference of +0.2 to +0.49 MAF compared with 1991 and 1992. All three water years (1991, 1992, and 2008) were classified as *critical dry*. Thus, it appears that more water was exported in 2008 than during the driest years of the 1987-1992 drought.<sup>80</sup> Further, the relatively large export values occurred even though post-1992 regulatory restrictions—such as the new Delta smelt BiOp (see **Figure 10**), those contained in CVPIA, and D-1641—were not then in place. Similarly, combined exports for the dry 2009 water year, the second year of the recent three-year drought, were 3.47 MAF—higher than the end of the six-year drought in the early 1990s and with more recent regulatory restrictions in place. For the 2014 water year, however, combined exports were only 1.86 MAF, far less than in any year since 1977, and 0.31 MAF less than in 1977, the previous drought of record affecting CVP deliveries.

Combined exports have exceeded 6.0 MAF seven times since 1977. Six of those times have been since 2000, and four were between 2003 and 2006. The highest combined export, 6.52 MAF, occurred in 2011 (a very wet year). Once between 1976 and 2000 combined exports reached more than 6.0 MAF (6.10 MAF in 1989, during the fourth year of a six-year drought). For example, combined exports averaged 4.38 MAF for the 10-year period 1976-1985, and they averaged roughly 5.05 MAF for the 10 year-period 1980-1989. Average combined exports during both these periods were less than the average deliveries for the 10-year period 2000-2009 (5.44 MAF), and they were less than the average deliveries during the last 15 years (5.10 MAF). Thus, even with numerous restrictions, combined CVP and SWP Delta exports have in recent times averaged more annually—they exceeded exports during the 1976-1985 and 1980-1989 timeframes—than in any time prior to enactment of the CVPIA and other more recent regulatory restrictions (e.g. D-1641 and ESA BiOps). CVP exports, however, have declined in proportion to SWP exports, resulting in reduced water deliveries to some CVP contractors south of the Delta.<sup>81</sup>

Some of the differences between recent pumping levels and pre-2000 pumping levels can be explained by successive wet years from 1995 to 1999 and other wet years in 2006 and 2011 (resulting in more water stored in reservoirs), as well as by significant increases in SWP pumping (see **Table 2**) from 2003 through 2006 (reflecting increased demand SOD).<sup>82</sup> It is not clear, however, how much of the difference can be explained without analyzing total supplies available

<sup>79</sup> These pumping levels have since been exceeded in 2000 (6.28 MAF), coinciding with filling of Diamond Valley Lake in Southern California, and in 2003–2006 (ranging from 6.07 MAF to 6.25 MAF), roughly coinciding with increased pumping under the proposed new OCAP in 2004.

<sup>80</sup> Combined pumping during the 2009 and 2010 drought years also was higher than in 1991 and 1992; however, the former years were classified as dry and below normal years, respectively, whereas the latter were critical dry years.

<sup>81</sup> Some attribute the switch from CVP having the higher proportional exports to SWP having the larger share to the SWP having larger canal capacity and being able to take on more water when more is available to be pumped.

<sup>82</sup> Demand for water from growing urban areas in Southern California, which have experienced an increase in population of 8 million-10 million people since the early 1990s, development of new SWP contractor storage facilities south of the Delta, and declines in water availability to Southern California from the Colorado River have resulted in increased pressure on Delta and Northern California supplies and increased SWP exports from the Delta.

for each year, the timing of supplies available for export, and the availability of SOD storage capacity and canal capacity. Such analysis is beyond the scope of this report.

Regardless of the exact causes behind differences in annual pumping totals, CVP agricultural water service contractors have received *less* water than contracted for in most of the last 15 years (see “SOD-Ag” column in **Table 2**), even with record high combined exports. This appears to be due to relatively static CVP pumping levels (relative to increased SWP pumping levels) as indicated in **Figure 10**, restrictions affecting Delta exports, and some exported water now going to CVPIA wildlife refuges. For example, CVP water allocations have been reduced in part because of obligations under CVPIA to deliver water to SOD wildlife refuges. Other factors may also limit storage at the San Luis Reservoir (SOD). Thus, although combined exports have on average increased since the 1980s, CVP water allocations for SOD agricultural water service contractors have been significantly reduced. In contrast, SWP exports, primarily serving SOD municipal and industrial contractors, increased in 2000 and 2003-2006<sup>83</sup> (see **Table 2** and **Figure 10**)—a reversal of prior proportions serving CVP and SWP contractors.

## California Water Rights: Acquisitions and Allocations

Another factor affecting water allocations is state water rights. The system of state water rights has a profound effect on who gets how much water and when, particularly during times of drought or other restrictions on water supply. California law provides for several limits on the use of the state’s water, and these limits have a direct effect on how much water state and federal contractors receive both north and south of the Delta.<sup>84</sup> Because the waters of California are considered to be “the property of the people of the State,” anyone wishing to use those waters must acquire a right to do so.<sup>85</sup> California follows a dual system of water rights, recognizing both the riparian and prior appropriation doctrines.<sup>86</sup> Under the riparian doctrine, a person who owns land that borders a watercourse has the right to make reasonable use of the water on that land (riparian rights).<sup>87</sup> Riparian rights are reduced proportionally during times of shortage.<sup>88</sup> Under the prior appropriation doctrine, a person who diverts water from a watercourse (regardless of his location relative thereto) and makes reasonable and beneficial use of the water acquires a right to that use of the water (appropriated rights).<sup>89</sup> Appropriated rights are filled in order of seniority during times of shortage.<sup>90</sup> Before exercising the right to use the water, appropriative users must

---

<sup>83</sup> Some contend that the increased pumping under earlier BiOps in the mid-2000s, combined with poor ocean conditions, contributed to a sharp decline in returning adult fall run salmon in subsequent years. See, for example, John McManus, Dick Pool, and Randy Repass, et al., *The Impact of the California Drought on Salmon*, Golden Gate Salmon Association, handout from presentation for congressional staff, April 15, 2015, p. 1.

obtain permission from the state through a permit system run by the State Water Resources Control Board (SWRCB).

## Water Rights and Allocations for Water Delivered via the CVP

Both the CVP and SWP acquired appropriative rights for water use from the state of California, receiving several permits for water diversions at various points between 1927 and 1967.<sup>91</sup> Section 8 of the Reclamation Act of 1902<sup>92</sup> requires Reclamation to comply with state law, including requiring the agency to acquire water rights for its projects, such as the CVP.<sup>93</sup> If Reclamation found it necessary to take the water rights of other users, those users would be entitled to just compensation.<sup>94</sup> In some cases, Reclamation found it necessary to enter into *settlement* or *exchange* contracts with water users who had rights predating the CVP and thus were senior users in time and right. Many of these special contracts were entered into in areas where water users were diverting water directly from the Sacramento and San Joaquin Rivers. **Figure 11** shows the distribution of areas served under different types of CVP contracts, including senior water rights contractors known as the Sacramento River Settlement Contractors north of the Delta and the Exchange Contractors south of the Delta.

---

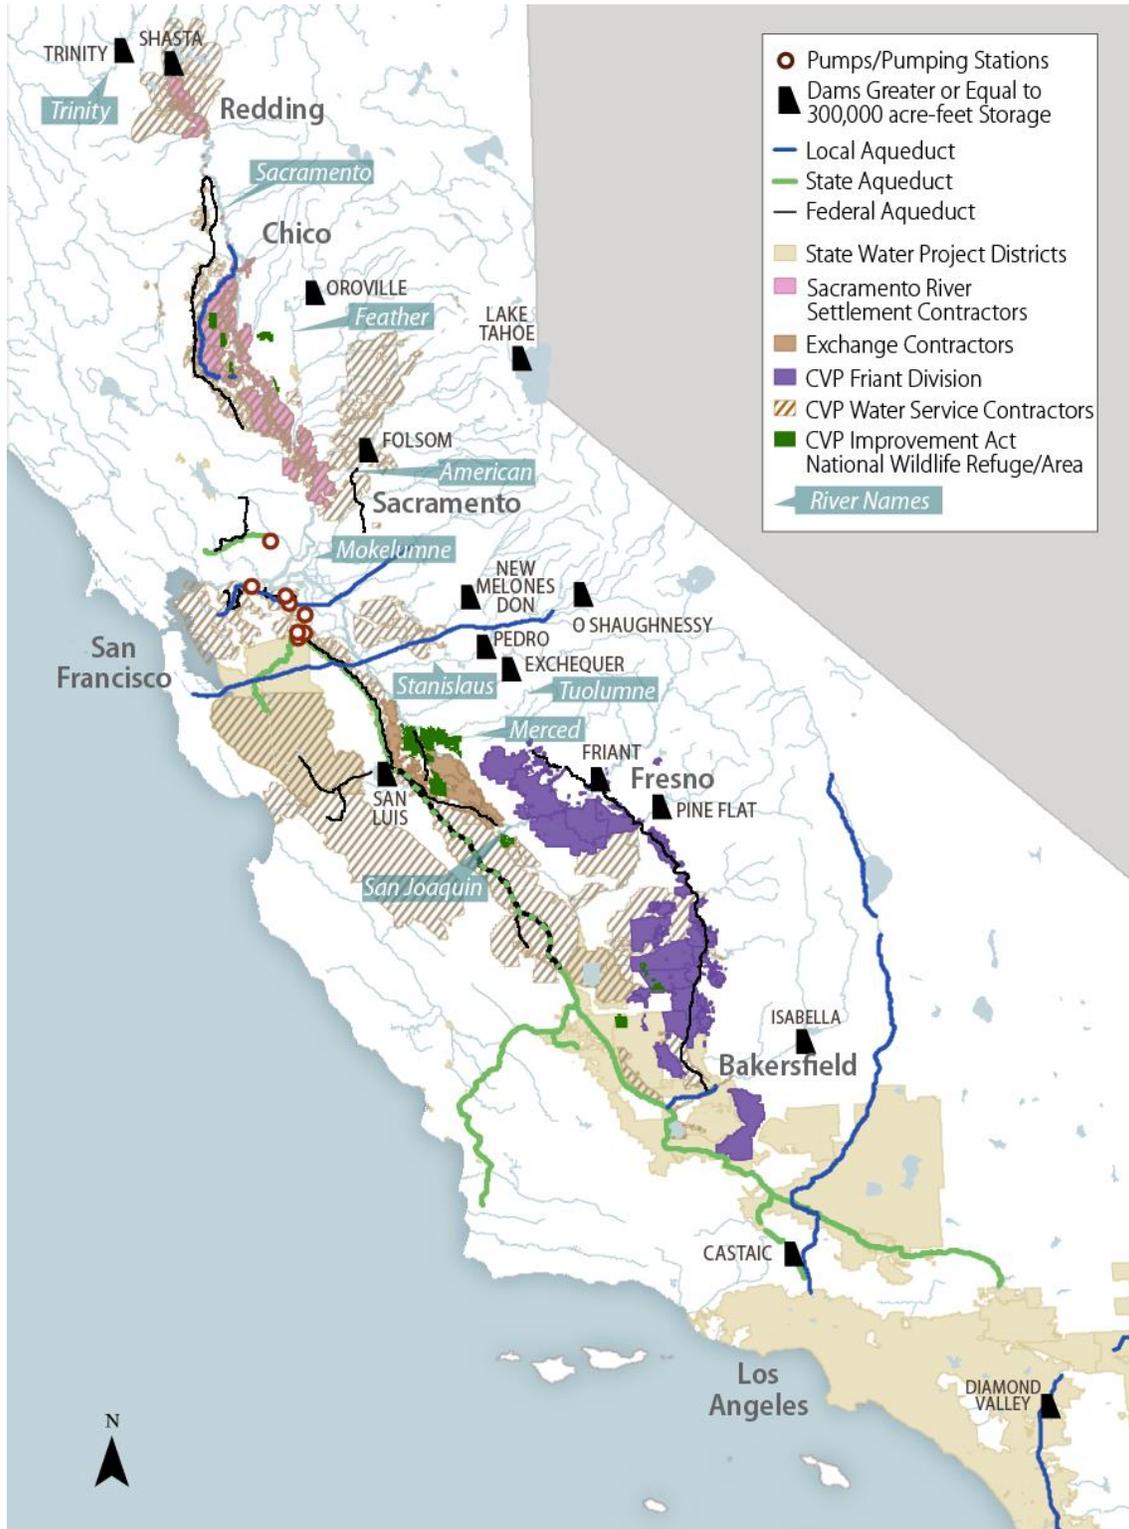

<sup>91</sup> For a discussion of the projects' permit process, see Racanelli, 182 Cal. App. 3d at 106.

<sup>92</sup> 43 U.S.C. §383.

<sup>93</sup> The U.S. Supreme Court has held that Section 8 “requires the Secretary to comply with state law in the ‘control, appropriation, use or distribution of water’” by a federal project. See *California v. United States*, 438 U.S. 645, 674-75 (1978). This requirement to comply with state law applied so long as the conditions imposed by state law were “not inconsistent with clear congressional directives respecting the project.” See *id.* at 670-73; see also *Ivanhoe Irrig. Dist. v. McCracken*, 357 U.S. 275 (1958); *City of Fresno v. California*, 372 U.S. 627 (1963). In the context of the CVP, a court has held that the permit conditions were consistent with the project purpose of river regulation. Racanelli, 182 Cal. App. 3d at 135. See also *United States v. State Water Resources Control Board*, 694 F.2d 1171 (9<sup>th</sup> Cir. 1982).

<sup>94</sup> See *Int'l Paper Co. v. United States*, 282 U.S. 399, 407 (1931); *United States v. Gerlach Live Stock Co.*, 339 U.S. 725, 736-39 (1950).

**Figure 11. CVP and SWP Service Areas**  
(with major federal and state water conveyance systems)

**Sources:** Prepared by CRS based on data from the U.S. Bureau of Reclamation; California Spatial Information Library; Census Bureau TIGER/Line data files; and ESRI Community Data, 2008.

**Notes:** Areas displayed do not correspond to amount of water in contracts; rather, they correspond to water or irrigation district boundaries and bear no relation to the amount of contracted water supplies.

For example, many farmers were diverting water from the Sacramento River before construction of the Shasta Dam. For Reclamation to undertake the CVP as planned, it had to come to agreement with these prior users on use and delivery of Sacramento River water supplies. The result was a series of Sacramento River settlement contracts, which guarantee prior users certain amounts of *base supply* water. Some of these contractors also have contracts for CVP *project* water. North-of-Delta settlement contracts total approximately 2.1 MAF. Similarly, Reclamation entered into exchange contracts with certain water users who diverted water from the San Joaquin River prior to construction of the Friant Dam. These users exchanged their use of river water for water delivered from the Delta through the CVP Delta-Mendota canal; however, they retain a right to divert water from the San Joaquin River if Reclamation cannot deliver CVP water. South-of-Delta water rights contracts total approximately 880,000 AF. (See **Table 3** for a summary of 2015 water allocations by contract type and **Table 4** for a summary of 2009 water allocations.) In 2014, for the first time in the history of this exchange agreement, Reclamation was not able to deliver the base 75% of the exchange contractors’ water. This resulted in the exchange contractors calling on their right to divert water from the San Joaquin River and left Friant Division with a first-time zero allocation of CVP water.<sup>95</sup> For 2015, an agreement has been reached among Reclamation, exchange contractors, and others to deliver approximately 63,000 AF to Friant water users through a number of purchases and exchanges.<sup>96</sup>

**Notes:** Increases in allocations were made on March 20, March 30, April 21, and May 22, 2009. NOD = North-of-Delta; SOD = South-of-Delta; M&I = Municipal and Industrial.

- a. Level 2 supplies are less than full level 4 supplies to which refuges are granted under the Central Valley Project Improvement Act. Class I and Class II refer to Friant Division contractors only. Class I contractors have a higher priority for receiving supplies when available.

Other CVP contracts, known as *water service contracts* (shown as an overlay by brown crosshatch marks in **Figure 11**), are held by users for water supply generally based on water rights that Reclamation holds (issued by the state) for water stored, diverted, and delivered as part of the CVP.<sup>97</sup> The amount of water supplied to users under these contracts generally is determined by the terms of the contract rather than the legal doctrines of water rights. These contracts also incorporate the requirements of federal Reclamation law.<sup>98</sup> Specifically, the contracts typically include provisions that address the possibility of water shortages due to drought and other conditions that may affect users’ access to water provided under their contract.<sup>99</sup> Generally, courts have allowed the federal government to reduce water allocations provided by contract if the

<sup>97</sup> Some water and irrigation districts or individual contractors hold more than one type of contract, hence the CVP crosshatch overlay for some areas in **Figure 11**.

<sup>98</sup> CVP Contract preamble. For a CVP-wide form of contract (CVP Contract) that Reclamation uses, see [http://www.usbr.gov/mp/cvpia/3404c/lt\\_contracts/cvpwide\\_final\\_form\\_contract\\_04-19-04.pdf](http://www.usbr.gov/mp/cvpia/3404c/lt_contracts/cvpwide_final_form_contract_04-19-04.pdf).

<sup>99</sup> See CVP Contract art. 3(b) (“Because the capacity of the Central Valley Project to deliver Project Water has been constrained in recent years and may be constrained in the future due to many factors including hydrologic conditions and implementation of Federal and State laws, the likelihood of the Contractor actually receiving the amount of Project Water set out [in this contract] in any given Year is uncertain.”) See also contract articles 11 and 12.

reduction is made necessary by federal law, but the extent of liability depends on the terms of the specific contract used in each case.<sup>100</sup>

Senior water rights holders (i.e., settlement contractors, shown in pink, and exchange contractors, shown in brown, in **Figure 11**) have a combined first priority to approximately 3.0 MAF of CVP water. This water rights priority, together with drought and regulatory restrictions, means that water service contractors with contracts based on CVP water rights that are junior to settlement and exchange contractors may face significant cuts during times of water supply shortages (particularly SOD water service contractors). For example, in dry years (indicated by certain water levels at Shasta Lake by a certain time early in the water year), senior water rights contractors are allocated 75% of their contract amounts, whereas CVP water service contractors might be allocated as little as 0% of their contracted supplies. For 2015, senior water rights contractors have been allocated 75% of their contract supplies, while M&I water service contractors have been allocated 25%, and agricultural water service contractors north and south of the Delta have been allocated 0% of their contracted water.<sup>101</sup> (See **Table 3**.) When water is scarce due to hydrologic conditions, regulatory restrictions, or both, water supply reductions are primarily a function of state water rights, legal settlements, and agreements with landowners who were senior water rights holders. Without these agreements, construction of the CVP and irrigation of new areas south of the Delta likely would not have been possible.

## Issues for Congress

As California endures its fourth year of drought, Congress faces a number of issues that confront California in the short term. One such issue is how to respond to immediate demands for water deliveries during the drought, given other policy concerns, such as avoiding harm to several fish species. Other issues include how to address water supply availability in general and how to finance any improvement or increase in water supply storage given current fiscal constraints and congressional policies discouraging site-specific project authorizations and appropriations. Longer-term issues for Congress include how to improve federal water delivery reliability for an array of users and how to stabilize aquatic ecosystems to improve resilience to inevitable future droughts. Water and power users that are part of diverse economies depend on reliable water supplies and healthy aquatic ecosystems. California agriculture is important not only to the state but also to the nation. At the same time, protecting, conserving, and improving habitat for federally listed species is required under federal and state endangered species laws. Another long-term issue is what role the federal government should play in providing or improving water supplies nationwide.

---

<sup>100</sup> See *Stockton E. Water Dist. v. United States*, 76 Fed. Cl. 321, 358-59 (Fed. Cl. 2007) (Bureau not liable where reductions “occurred due to implementation of amendments to federal Reclamation law”); *O’Neill v. United States*, 50 F.3d 677, 682-83 (9<sup>th</sup> Cir. 1995) (contract provision relieving government of liability “for any damage ... arising from a shortage on account of errors in operation, drought, or any other causes” included protection for shortages caused by “the effects of subsequent Congressional mandates”). But see *Tulare Lake Basin Water Storage Dist. v. United States*, 49 Fed. Cl. 313 (Fed. Cl. 2001) (federal government liable when federal legislation forced reductions under state contract to which the federal government was not a party). Six years later, the same judge that wrote the *Tulare* decision repudiated the physical taking characterization, citing intervening case law and noting the absence of a physical diversion. See *Casitas Municipal Water Dist. v. United States*, 76 Fed. Cl. 100 (Fed. Cl. 2007). On appeal, the U.S. Court of Appeals for the Federal Circuit reversed the district court’s holding in *Casitas*, noting that the intervening caselaw did not bear on the case. *Casitas Municipal Water Dist. v. United States*, 543 F.3d 1276 (Fed. Cir. 2008).

<sup>101</sup> Historical CVP water allocations can be viewed at [http://www.usbr.gov/mp/cvo/vungvari/water\\_allocations\\_historical.pdf](http://www.usbr.gov/mp/cvo/vungvari/water_allocations_historical.pdf).

Legislation addressing the management of the CVP and SWP can generate controversy because of the enormous complexity of the water delivery system in California. The coordinated operation and management of the CVP and SWP involves a web of federal and state law, encompassing state water rights priorities; water delivery contracts; federal, state, and local agency regulations and policies; multiagency agreements and other factors, as noted above. Achieving consensus on such legislation often is difficult because if legislation leads to a change in any of these factors, it can affect multiple parties and interests by potentially altering the timing or amount of water made available to such parties or to the underlying ecosystem. For example, if legislation directs that the volume of water pumped from the Delta is to be increased beyond the status quo, a number of questions arise: Where will the additional water come from? What effect might the increased pumping have on other water users or species? How will the increased pumping affect in-Delta water quality?

Similarly, legislation that prohibits involuntary reductions in water supply to those who receive water from the CVP and SWP could affect other water users, reducing their water supplies or changing the timing of water availability. Such legislative directions might conflict with the declaration that the CVP must be operated in conformity with state water law. There is a question about whether it would be possible to pump at the levels specified in certain bills without having redirected impacts on other water users. If it is possible, the question becomes how such impacts might be avoided. If these impacts cannot be avoided, the question then becomes who might bear responsibility or pay for unavoidable costs.

These were some of the issues raised by legislation in the 113<sup>th</sup> Congress that specifically addressed short- and long-term CVP and SWP water management. Three bills—H.R. 3964, H.R. 5781, and S. 2198—passed their respective chambers, but a compromise among the different proposals was not reached before the end of the 113<sup>th</sup> Congress.<sup>102</sup> Legislation with similar aims—to maximize water supplies—has been introduced in the 114<sup>th</sup> Congress (e.g., H.R. 2898, which passed the House on July 16, 2015, and S. 1894, introduced July 30, 2015). Both bills also include several titles that go beyond CVP and SWP water management. Other bills introduced in the 114<sup>th</sup> Congress that address California drought and water management include several that would authorize conservation and water recycling initiatives, among other activities (e.g., H.R. 291 and S. 176; H.R. 2983 and S. 1837; and H.R. 3045). For more information on legislation, see CRS In Focus IF10019, *H.R. 5781: Legislation Proposed to Maximize Water Supplies to Address Drought in California*; CRS Report R43820, *Analysis of H.R. 5781, California Emergency Drought Relief Act of 2014*; and CRS Insight IN10308, *Drought Legislation: H.R. 2898*.

---

<sup>102</sup> H.R. 3964, the Sacramento-San Joaquin Valley Emergency Water Delivery Act, aimed to reduce the negative effects of environmental and other laws on CVP water deliveries. Critics contend, however, that although the bill may have improved the water supply situation for some, it could have contributed to continued decline of threatened and endangered fish species. Likewise, S. 2198, the Emergency Drought Relief Act of 2014, aimed to direct the Bureau of Reclamation to “maximize water supplies” while also protecting species. Some believe that S. 2198 did not go far enough to ensure reliable water supplies, while others feared it could effectively negate protections for threatened and endangered species, depending on how the law would have been implemented. H.R. 5781 addressed similar issues but would have affected CVP operations only during drought. (For information on H.R. 3964 and S. 2198, see CRS Report R43649, *Federal Response to Drought in California: An Analysis of S. 2198 and H.R. 3964*, by Pervaze A. Sheikh, Betsy A. Cody, and Charles V. Stern; CRS Report R43594, *Analysis of Senate-Passed S. 2198: Emergency Drought Relief Act of 2014*, by Betsy A. Cody and Pervaze A. Sheikh; and CRS Report R43648, *H.R. 3964: Analysis of Key Provisions*, by Charles V. Stern, Betsy A. Cody, and Pervaze A. Sheikh. For information on H.R. 5781, see CRS In Focus IF10019, *H.R. 5781: Legislation Proposed to Maximize Water Supplies to Address Drought in California*, by Betsy A. Cody, Pervaze A. Sheikh, and Charles V. Stern; CRS Report R43820, *Analysis of H.R. 5781, California Emergency Drought Relief Act of 2014*, by Betsy A. Cody, Pervaze A. Sheikh, and Charles V. Stern.

## Outlook

California is in its fourth year of drought, with many areas of the state experiencing extreme to exceptional drought conditions. The current drought has created a fundamental water supply shortage. In addition to hydrological limitations on water supplies, several federal and state statutes, regulations, and policies have reduced reservoir storage and water deliveries from the federal CVP and California's SWP. The extended drought conditions have exacerbated controversy over water delivery restrictions from state and federal projects. Some argue that the restrictions would not be so severe had water in wet years been allowed to be pumped or held in storage for later use. Regulatory or court-imposed restrictions related to species and water quality, as well as the long-established state water rights system, have intensified effects of the drought for agricultural and urban water users. For example, even in the wettest years, some CVP contractors have had their water deliveries cut due to environmental factors. These effects are not always perceived as equitable or fair to those with CVP contracts based on CVP project water rights junior in priority to senior water rights holders or to those who otherwise have lower priority for receiving SWP and CVP water.

The effects on water deliveries resulting directly from federal ESA requirements have become a flash point of sorts over CVP water management. For the 2014 water year, ESA compliance was estimated to have been approximately 2% of total water delivery reductions for 2014. The remaining water reductions presumably are due to drought and other factors, such as state water quality control requirements. However, reductions due to compliance with the federal ESA in other years have constituted a higher percentage of total water delivery reductions. For example, reductions due to ESA restrictions in 2009 ranged roughly from 20% to 25% of total water delivery reductions, depending on the time period used for estimating annual deliveries, and were as high as 39% for 2013. It is clear that various regulatory restrictions have contributed to reduced exports of water to water users south of the Delta; however, year over year, there appears to be wide variation in reductions due solely to regulatory compliance versus other factors—both in percentage and nominal terms.

In sum, although the reasonable and prudent alternatives (RPAs) for threatened and endangered species protection under ESA affect Delta exports, other requirements also restrict exports and contribute to RPA actions. Together, these elements provide a network of protection for species and water quality for in-Delta uses such as farming and drinking water, and one element is not easily separated from others. Thus, even if the ESA were waived or overridden, federal and state agencies still would be required to comply with several state and federal laws and directives that, in combination, limit Delta exports (e.g., the federal CWA and CVPIA, the state Porter-Cologne Act and its implementing directive D-1641, the California Endangered Species Act, and the California Fish and Game Code). Crafting congressional solutions to the water supply restrictions thus becomes difficult and involves many interested parties and stakeholders with various interests, as well as interactions with state law and policies.

# Wildlife Poaching and Trafficking in Asia: An Overview

## Scope of the Problem

Asian demand for illegal wildlife has increased in recent years, raising concerns about species conservation amid heightened poaching rates. As one of several contributing threats to biodiversity, wildlife poaching also raises national security and transnational crime concerns. Crimes related to illegal wildlife reportedly generate billions of dollars each year, a source of funds that may fuel instability and finance armed groups, particularly in Africa. Closer to illicit retail outlets, the markup on wildlife products is most pronounced in Asia, and Asian criminal groups largely control this high-profit, low-risk black market—often benefitting from the cooperation of corrupt government officials to facilitate cross-border shipments and protect traffickers. According to the United Nations, environmental crimes represent nearly one-third of the Asia-Pacific black market, conservatively estimated to be worth approximately \$86 billion annually (see **Figure 1**, below). Illegal wildlife, however, represents only a small portion of major environmental crimes in the region (the largest contributor to environmental crimes is illegal trade in wood products).

total illegal wildlife market for mammals in Asia (more than \$200 million annually). Other wildlife commonly trafficked include pangolins, rhinos, bears, and tigers.

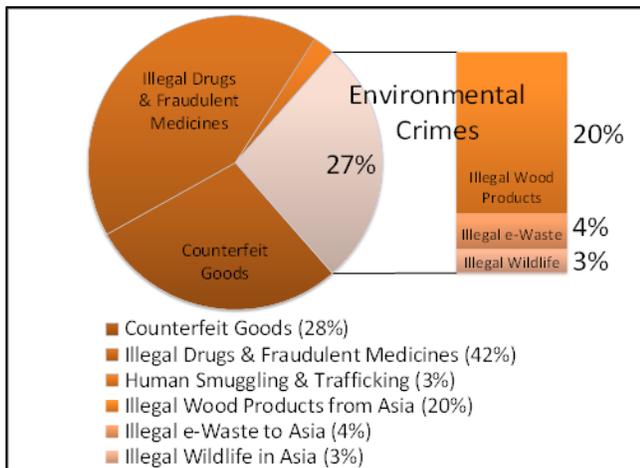

### Illegal Ivory: Top Asian Countries of Concern

At the 16<sup>th</sup> meeting of the Conference of the Parties (CoP) to the Convention on International Trade in Endangered Species of Wild Fauna and Flora in 2013, eight States Parties were identified as countries of “primary concern” for their role in the illegal trade in elephant ivory—including five Asian countries: **China** (including **Hong Kong**), **Malaysia**, **the Philippines**, **Thailand**, and **Vietnam**. At subsequent CITES Standing Committee meetings, several additional countries were designated as countries of “secondary concern” or “importance to watch”—including **Laos**.

### Tiger Trafficking and Population Trends

Wild tigers in Asia are believed to range across 13 countries, although field estimates suggest that tiger populations are declining overall (see **Table 1** below). Bucking the trend, India has reported increases of up to 30% in tiger populations in the past three years. Captive tiger populations in several Asian countries may be higher. For example, China has over 5,000 captive tigers.

**Figure 1. Organized Crime in the Asia-Pacific Region**

**Source:** United Nations Office on Drugs and Crime, *Transnational Organized Crime in East Asia and the Pacific* (2013).

The recent surge in Asian demand for illegal wildlife is driven largely by an expansion of wealth in Asian countries and the perceived value of rare wildlife and related products as luxury goods, exotic pets, restaurant delicacies, and ingredients in traditional Asian medicine. According to the United Nations, illegal marine wildlife trafficking (excluding off-shore illegal fishing) represents the largest market in Asia (at least \$850 million annually). Such trafficking involves species of sharks, marine turtles, corals and aquarium fish, and seahorses. Among illegally traded mammals, Asian consumer demand for elephant ivory has surged in recent years and represents more than half the

## U.S. Responses

In July 2013, President Barack Obama issued Executive Order (E.O.) 13648 on combating wildlife trafficking. It directed federal agencies to enhance efforts to address the problem, established an interagency Presidential Task Force on Wildlife Trafficking to produce a National Strategy for Combating Wildlife Trafficking, and created a non-governmental Advisory Council on Wildlife Trafficking to provide outside expertise and support to the Task Force.

In February 2014, the Obama Administration released a National Strategy for Combating Wildlife Trafficking. It prioritizes domestic and international responses to wildlife trafficking related to law enforcement, demand reduction, and cooperation. The Administration also released a plan to implement the National Strategy with 24 core objectives—several of which involve steps specific to Asia, including support for U.S. participation in international enforcement operations targeting wildlife poaching networks in Asia; initiatives in Asia to reduce demand and raise trafficking awareness among potential consumers; and expanded cooperation with China.

## Policy Implementation

Key U.S. agencies involved in implementing the National Strategy in Asia include the U.S. Fish and Wildlife Service (FWS), which has stationed a special agent at the U.S. Embassy in Bangkok, Thailand, since 2014 and continues to protect Asian wildlife through its Multinational Species Conservation Fund (MSCF) programs for Asian tigers, rhinos, elephants, and marine turtles. The U.S. Department of State and Agency for International Development additionally fund multiple anti-trafficking projects internationally. U.S. agencies also partner with outside groups to develop training material for wildlife trafficking investigations, implement novel technologies to survey animal populations, and pursue consumer awareness and demand reduction campaigns.

Building on recent momentum to address wildlife trafficking, the United States has supported three multinational counter-trafficking operations known as Cobra I, II, and III. During Cobra III, which took place in May 2015, participating law enforcement authorities from 62 countries reported 139 arrests and more than 247 seizures of ivory, rhino horns, pangolins, tortoises, rosewood, rare medicinal plants, and other Asian wildlife. Law enforcement activity has also translated into U.S. indictments, prosecutions, and convictions related to Asia-linked wildlife trafficking.

Heightened attention to the wildlife trafficking situation has prompted several Asian countries to increase their commitments and political will to combat such crimes. China, Hong Kong, and the Philippines have also destroyed domestic ivory stockpiles since 2013 (the United States conducted its own ivory stockpile crushes in 2013 and 2015). In 2014, the Prime Minister of Vietnam issued a top-level directive to give priority to wildlife trafficking enforcement, and China committed \$10 million in funding to support wildlife protection and conservation in Africa.

## Congressional Role and Policy Issues

Recent Congresses have taken steps to address wildlife trafficking by holding hearings; expanding, renewing, authorizing, and allocating specific funds for programs to combat such trafficking; and introducing new bills. Such efforts have included the following:

- Department of State Rewards Program Update and Technical Corrections Act of 2012 (P.L. 112-283), which allows the State Department to offer rewards for information on transnational criminal networks, including those related to wildlife trafficking (up to \$1 million is currently being offered for information on the Xaysavang Network, a wildlife trafficking syndicate led by Laos-based Vixay Keosavang);
- Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for FY2015 (P.L. 113-291), which expands the Defense Department’s counternarcotics authorities to include international support to combat wildlife trafficking (in Asia, partner support efforts are underway through the U.S. Pacific Command, the Joint Interagency Task Force-West, and the Naval Criminal Investigative Service); and
- State Department funding in FY2014 (\$45 million) and FY2015 (\$55 million) appropriations Acts (P.L. 113-76 and P.L. 113-235) specifically to combat wildlife poaching and trafficking—in addition to longstanding appropriations for FWS’s MSCF (\$9.1 million in FY2015), a program that is also funded with proceeds of a special-issued postage stamp as well as through matching support from partner organizations.

Several bills pertaining to wildlife trafficking have been introduced in the 114<sup>th</sup> Congress (e.g., S. 27, H.R. 2494, and H.R. 1945). As Congress evaluates the Obama Administration’s anti-trafficking efforts, the Asia-Pacific region may come under particular scrutiny, especially with respect to demand reduction. Some approaches to enhance existing efforts might include greater Intelligence Community focus on the impact of Asian wildlife trafficking on U.S. national security, along the lines of a 2013 assessment by the National Intelligence Council on poaching threats in Africa. Another approach might involve more regional action to account for differences in the manifestation of wildlife trafficking among Asian countries. Wildlife trafficking has also been a topic under consideration as part of the multilateral Trans-Pacific Partnership trade negotiations.

Within the Asia-Pacific region, much attention remains on China, which is widely believed to be the primary source of global demand for illegal wildlife products. The topic was discussed during President Xi Jinping’s State Visit to the United States in September 2015. It has also been discussed in past meetings of the U.S.-China Strategic and Economic Dialogues, Association of Southeast Asian Nations, and Asia-Pacific Economic Cooperation forum.

## E.O. 13690 and the Federal Flood Risk Management Standard

President Obama issued Executive Order (E.O.) 13690 on January 30, 2015, to improve the nation’s resilience to floods and manage federal disaster recovery costs. It requires federal agencies to update their procedures and regulations related to federal investment and other actions in floodplains. E.O. 13690 amended a 1977 order on floodplain management, E.O. 11988. The amendments added a Federal Flood Risk Management Standard (FFRMS) and new approaches to use in determining the floodplain for E.O. 11988 compliance. Public comment on draft implementing guidelines for the amended E.O. 11988 ended May 6, 2015 (see FR Doc. 2015-02284). The Water Resources Council (WRC) is to issue the final guidelines. Affected agencies have until June 6, 2015, to develop plans for updating agency-specific procedures; the agency update processes are anticipated to provide additional public comment opportunities. Congress is weighing whether to influence E.O. 13690 and FFRMS implementation. It can influence implementation through oversight and authorization, appropriations, and other legislation.

### E.O. 11988

E.O. 11988 remains the framework for federal agencies to avoid or minimize actions in or impacting floodplains. E.O. 11988 defines “action” as any federal activity, including

- (1) acquiring, managing, and disposing of Federal lands, and facilities;
- (2) providing Federally undertaken, financed, or assisted construction and improvements; and
- (3) conducting Federal activities and programs affecting land use, including but not limited to water and related land resources planning, regulating, and licensing activities.

For E.O. 11988, the floodplain had been defined as the 1% annual chance floodplain (i.e., 100-year floodplain), which is known as the base flood elevation (BFE) floodplain. Implementing guidelines from 1978 had established use of the 0.2% floodplain for critical actions (i.e., the 500-year floodplain). A critical action is any activity for which even a slight chance of flooding would be too great (e.g., prisons). Section 3 of E.O. 11988 established specific requirements for federal real property and facilities. For new construction or major rehabilitations, agencies were to (1) use accepted floodproofing and other flood protection measures for structures and facilities, and, (2) wherever practicable, elevate structures above the BFE floodplain. A structure is a walled or roofed building; a facility is a man-made or man-placed item other than a structure.

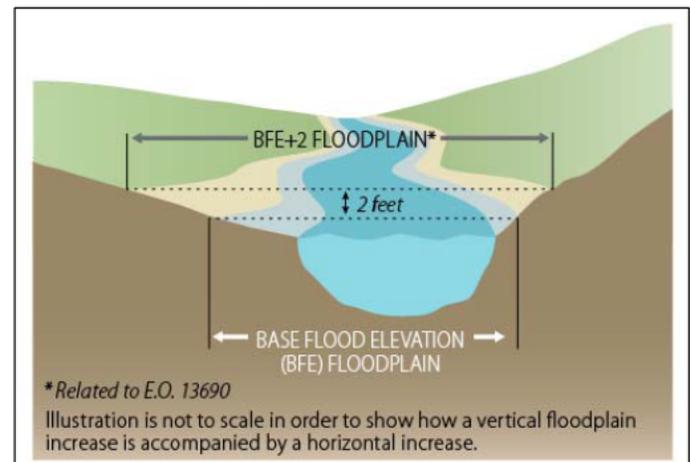

### E.O. 13690

While E.O. 13690 maintained the federal actions covered under E.O. 11988, it changed how the floodplain is

determined. The order also requires use of natural systems, ecosystem processes, or nature-based approaches (i.e., human designs that mimic natural processes) where possible during development for alternatives for federal actions in the floodplain.

E.O. 13690 requires agencies to determine the floodplain using one of three currently available approaches: freeboard value, 500-year floodplain, or climate-informed science. Collectively these approaches are referred to herein as the “E.O. 13690 floodplain.” The E.O. 13690 floodplain in most cases will be wider than the BFE floodplain. The FFRMS provides details regarding how to select and apply each approach. In the near term, for many federal actions, the most common approach to determine the E.O. 13690 floodplain may be the freeboard value approach, which is 2 feet above BFE (BFE+2), as illustrated by **Figure 1**. For critical actions, the freeboard value approach is BFE+3.

**Figure 1. Illustration of E.O. 13690 Floodplain Determination Using 2 Foot Vertical Increase**

Source: CRS.

Notes: Topography will largely determine the horizontal increase.

E.O. 13690 amends Section 3 of E.O. 11988 to use the E.O. 13690 floodplain for the floodproofing and elevation requirements for federal real property and facilities. E.O. 13690 and the FFRMS indicate that a similar structural elevation requirement applies to federally funded actions. The final guidelines and updates of agency procedures are anticipated to clarify which new construction and major rehabilitations of structures are required to have their elevations in compliance with the FFRMS.

### Agency Implementation

Given the federal action definition, numerous departments, agencies, programs, and projects that are covered by E.O. 11988 also may be affected by the amendments and

requirements in E.O. 13690 and the FFRMS. These include the activities of the Departments of Agriculture, Defense, Energy, Health and Human Services, Housing and Urban Development, the Interior, and Transportation; the Environmental Protection Agency; the General Services Administration; and NASA. Under E.O. 13690, an agency or department may “except” (i.e., exempt) particular activities from the E.O. 13690 floodplain for national security, emergency actions, and federal facilities for which it is demonstrably inappropriate. What is known and what remains uncertain regarding agency-level implementation of E.O. 13690 and the FFRMS varies depending on the extent that publicly available documents address various topics. **Table 1** addresses select topics related to the Federal Emergency Management Agency (FEMA) and U.S. Army Corps of Engineers (Corps).

## Other Implementation and Policy Topics

The Administration conducted listening sessions in March and April 2015 on FFRMS implementation. Topics that may be clarified in the final guidelines or in agency procedures include “grandfathering” of ongoing projects and implementation oversight. Regarding grandfathering, many infrastructure projects take years or decades to plan and construct. For many activities, E.O. 11988 compliance has been met as part of National Environmental Policy Act (NEPA) compliance. Regarding oversight, E.O. 11988 has been policy since 1977, but the extent to which it was followed in recent decades is unclear. When E.O. 11988 was signed, the Water Resources Council was active in coordinating and overseeing executive branch water activities. With the WRC largely inactive since 1983, there has been limited oversight of E.O. 11988 implementation beyond floodplain considerations being incorporated within NEPA documents.

The Administration’s position is that E.O. 13690 and the FFRMS are in the interest of national security and consistent with the Administration’s Climate Action Plan. The Office of Management and Budget released a statement on the order’s budget impacts indicating that its implementation is anticipated to increase federal costs but that effects on federal obligations and outlays will depend on appropriations. It cited the order’s benefits as increasing resilience against flooding and helping to preserve the natural values of floodplains. No comprehensive benefit-cost analyses of E.O. 13690 and the FFRMS (e.g., analysis that evaluates anticipated effects and their distribution across stakeholders in the near term and long term) is required or has been released. Benefit-cost analyses may be part of the update processes for agency-specific regulations. Whether the ongoing development process provides sufficient opportunities to satisfy the requirement in the Consolidated and Further Continuing Appropriation Act of FY2015 (P.L. 113-235) for input by governors, mayors, and other stakeholders is a subject of debate.

Numerous states and communities have established freeboard requirements within their jurisdictions. Therefore, any structural elevation requirement emanating from the FFRMS would be part of a preexisting collage of state and

local freeboard and floodplain requirements. That is, the structural elevation for FFRMS compliance may be less, equal, or more than is required locally.

**Table 1. Select Questions Raised by E.O. 13690 and FFRMS for FEMA and Corps**

Agency/Department, Program, and Questions
<p><i>FEMA: Disaster Assistance and Mitigation Programs</i></p> <p>How does E.O. 13690 affect FEMA’s emergency response programs? The E.O. does not apply to emergency work undertaken with the authority of Stafford Act, Section 403.</p> <p>How does this affect other Stafford Act sections? FEMA’s permanent work to repair and restore facilities, Section 406 of Stafford, is covered by E.O. 13690. This would include any mitigation activities within a Section 406-funded project. FEMA regulations do not contemplate rebuilding of any facilities unless they are more than 50% damaged.</p> <p>Does the FFRMS apply to FEMA mitigation programs? As with E.O. 11988, E.O. 13690 covers Section 404, FEMA’s Hazard Mitigation Grant Program (HMGP); Section 203, the Pre-Disaster Mitigation Program (PDMP); and the Flood Mitigation Assistance (FMA) Program, which is a part of the National Flood Insurance Program (NFIP).</p>
<p><i>FEMA: National Flood Insurance Program</i></p> <p>The NFIP uses the 100-year flood to indicate Special Flood Hazard Areas (SFHA), as well as a minimum flood level to be addressed by a community’s floodplain management ordinances. FEMA stipulates that these ordinances require the first floor of newly constructed buildings in SFHA to be at least at BFE. E.O. 13690 does not trigger an update of these local ordinances. According to the Council on Environmental Quality in its fact sheet, “Taking Action to Protect Communities and Reduce the Cost of Future Flood Disasters,” E.O. 13690 and the FFRMS are not anticipated to directly affect NFIP standards or rates. One question that is anticipated to be addressed in agency-specific regulations is: could there be indirect NFIP impacts if FEMA amends FEMA regulations at 44 C.F.R. §9, Floodplain Management and Protection of Wetlands (which were developed in response to E.O. 11988) to address E.O. 13690?</p>
<p><i>U.S. Army Corps of Engineers Projects, Repairs and Permits</i></p> <p>Because Corps civil works are often in floodplains, several questions arise. For example, does E.O. 13690 create a minimum design standard for Corps coastal storm damage reduction projects? To comply with E.O. 11988, the Corps regulatory program is to avoid both significant adverse impacts associated with floodplain occupancy and floodplain development whenever practicable. Do E.O. 13690 and its floodplain determination for E.O. 11988 create new requirements for the regulatory program?</p>

## In this week's Rokita Report

- **Every Student Succeeds Act**
- **FAST Act for Hoosier Roads**
- **House Rejects Clean Power Plan**

---

### Every Student Succeeds Act

On Wednesday, the House passed the *Every Student Succeeds Act* 359 to 64, a strong show of bipartisan support. This bill was the result of negotiations that I took part in and shared details of in last week's Rokita Report. This landmark education bill was recognized by the [Wall Street Journal](#) as the largest transfer of authority from the federal government back to states in 25 years.

The bill brings power back to states by ending the federally mandated, unproductive, high stakes testing, the core of *No Child Left Behind*. The law's high-stakes testing, while well-intended, has proven unworkable. It has caused tremendous stress to parents, teachers, and students without yielding the planned results. Therefore, the Secretary of Education, through waivers, runs schools by executive fiat, imposing requirements on state testing standards and conditioning receipt of federal funds on adopting Common Core standards.

### In Case You Missed It:

[House sends 'No Child' rewrite to the Senate](#)

[Rokita congratulates new INFB leaders](#)

[No more excuses - State loses federal cover on education overhaul](#)

[Rokita Commends Mooresville Schools for Collaborative Efforts to Thwart Bomb Threat](#)

[Rokita Hosts Roundtable Discussion](#)

### Red Tape Rollback

### Recent Video

In contrast, the *Every Student Succeeds Act* prohibits the federal government from requiring adoption of Common Core or conditioning receipt of funds on adoption of Common Core. It reins in the Secretary of Education by prohibiting the Secretary from adding requirements to state testing standards or requiring teacher evaluations. It also eliminates 49 ineffective programs and starts eliminating the bureaucrats associated with them. The money saved plus additional funds go to a flexible grant.

This bill solves the problems created by *No Child Left Behind* and provides much needed flexibility to schools. Now, voters and tax payers, through their locally elected officials, can determine what success in testing looks like and hold school systems and teachers accountable to them. It recognizes that when it comes to determining academic standards, local school administrators, teachers, parents, and taxpayers know what is best regarding what to test, how long to test, how many tests to administer, and which testing companies to use.

The reauthorization bill originated in the Subcommittee that I chair, the Early Childhood, Elementary, and Secondary Education Subcommittee, as H.R. 5, the *Student Success Act*. I co-authored that bill with the Chairman of the [Committee of Education and the Workforce](#), John Kline, and led it to House passage in July. Afterwards, I served on the Conference negotiating team to reconcile the House and Senate versions.

The bill had wide support from many groups. Among these [endorsements](#), were the [National Governor's Association](#) which offered their first endorsement of a bill since the 1996 welfare reforms. Support also came from parochial school organizations including [Agudath Israel of America](#) and the [Committee on Catholic Education](#). The House passage of the *Every Student Succeeds Act* was a victory for parents, teachers, communities, and supporters of smaller government.

---

## FAST Act for Hoosier Roads

This week the House passed the bipartisan, bicameral, *Fixing America's Surface Transportation (FAST) Act*.

Indiana is known as "the Crossroads of America" and I am fighting for policies that will not leave an infrastructure debt of crumbling roads and bridges to future generations. The *FAST Act* will responsibly bring over \$5 billion to Indiana in the next five years and incorporates Hoosier innovation that will improve traffic congestion, vehicle safety, and roadways. The bill restores local control over decision making so states and local governments have more flexibility to address their unique infrastructure priorities.

As a member of the [Transportation & Infrastructure Committee](#)

[Unsubscribe](#) | [Privacy](#)

my priorities were to ensure the legislation included key concepts vital to Hoosiers and those traveling through Indiana, specifically Critical Commerce Corridors (CCC's) and the text of a bill that I authored, *H.R. 2702, the Safety Through Informed Consumers (STICRS) Act*.

The CCC idea started in Indiana. In 2003, the [Hudson Institute](#) and [Purdue University Civil Engineering](#) developed a study to improve our interstate system. CCC's create a physical separation between passenger and commercial vehicles. They are an efficient way we can not only move our goods throughout the country but also improve safety on our nation's highways.

I introduced the STICRS Act in July, which requires manufacturers to post ratings for crash avoidance systems in all new cars. This bill showcases new safety technologies that American innovators develop to improve automobile safety. One of these manufacturing plants working on new safety technology is Delphi Automotive, an auto parts supplier with a facility in Kokomo, Indiana.

The FAST Act is a fully paid-for, five-year reauthorization that will improve the nation's surface transportation infrastructure, including our roads, bridges, transit systems, and rail transportation network. It reforms and strengthens surface transportation infrastructure and safety programs. It also refocuses programs on national priorities, including nationally and regionally significant projects and the movement of freight. The bill passed 369-65.

---

## House Rejects Clean Power Plan

On Tuesday, the House passed two bills to reject the Clean Power Plan. The EPA's Clean Power Plan is part of President Obama's War on Coal and would greatly increase Hoosier electric bills. The Clean Power Plan requires states to reduce their CO<sub>2</sub>-per-megawatt emissions in a way that would require the closure of many of Indiana's coal plants.

I recognize the importance of energy independence and the roll that our nation's natural resources, including coal will play in doing so. We should pursue all energy possibilities, instead of rejecting proven sources of power like coal. I supported both motions of disapproval against the Clean Power Regulations and cosponsored the House companion bills of these resolutions. With approval from both the House and Senate, these bills head to the President's desk for his consideration

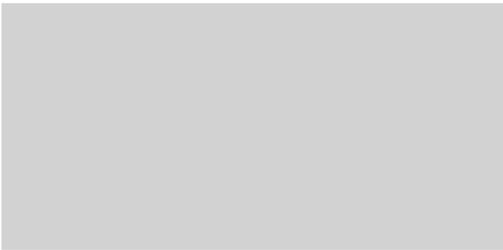

---

Thank you for your continued interest in Congress and for supporting my efforts to bring Hoosier common sense to Washington. Take care.

Sincerely,

Todd Rokita

Jason,

I appreciate these milestones and our continual work on these issues. Do you have time to talk this afternoon?

Sent from my iPhone

On Dec 23, 2015, at 11:37 AM, Powell, Jason <[jason\\_powell@ios.doi.gov](mailto:jason_powell@ios.doi.gov)> wrote:

Hello Bill,

I am following up on our recent telephone conversation on the matters you have recently raised. You indicated that, if I could note for you how we expected to respond to our new understanding of your priorities, the Committee might not continue to seek DOI's participation in your anticipated January 7<sup>th</sup> Hearing.

As I mentioned we are somewhat limited in our capabilities due to holiday schedules. However, we are committed to addressing your priorities. The following reiterates what I substantially described to you on the phone regarding our schedule/ability to provide additional information on these topics:

Regarding Sage Grouse, as we discussed on the phone, based on our last conversations on this matter were unaware of your present interest in additional information before we last spoke. However, we can and will provide additional information on this matter. I anticipate that we can make a production by the first full week of January.

Regarding the BLM Hydraulic Fracturing Rule, we are working very hard to get through a large volume of material, but I anticipate that BLM will be able to supplement its response during the second or third week of January.

Regarding the BLM Arizona and New Mexico State Offices, as we discussed we have been willing to supplement our response on this, but we had prioritized other matters based on our discussions with you. However, understanding that this is

now a top priority, BLM will supplement its response in January.

We did not discuss the NPS concession contract in detail on our last phone call, but I thought we had previously discussed that matter and reached a mutual understanding in July on how we would accommodate the Committee's interest in that matter following the briefing NPS provided. We understood that you would be satisfied if we could allow you to review documents illustrative of the concessions contracting process instead of the specific bus tour contract documents that were the subject of the litigation and the judicial protective order. NPS made the arrangements in July for the *in camera* review that we discussed. We are ready to follow through on providing that *in camera* review at your convenience.

As I mentioned to you on the phone, I appreciate the dialogue that you and I have, and I am always more than willing to discuss the Committee's priorities and how we can respond. We are doing our best to get you what you need.

I would appreciate it if you could let me know as soon as possible if we should make our priority responding to the matters discussed above within these anticipated timeframes, or if the Committee will continue to seek DOI's participation in the anticipated hearing, in which case our focus would need to be responding to the request to testify.

Best regards,

Jason

Hello Bill,

I am following up on our recent telephone conversation on the matters you have recently raised. You indicated that, if I could note for you how we expected to respond to our new understanding of your priorities, the Committee might not continue to seek DOI's participation in your anticipated January 7<sup>th</sup> Hearing.

As I mentioned we are somewhat limited in our capabilities due to holiday schedules. However, we are committed to addressing your priorities. The following reiterates what I substantially described to you on the phone regarding our schedule/ability to provide additional information on these topics:

Regarding Sage Grouse, as we discussed on the phone, based on our last conversations on this matter we were unaware of your present interest in additional information before we last spoke. However, we can and will provide additional information on this matter. I

anticipate that we can make a production by the first full week of January.

Regarding the BLM Hydraulic Fracturing Rule, we are working very hard to get through a large volume of material, but I anticipate that BLM will be able to supplement its response during the second or third week of January.

Regarding the BLM Arizona and New Mexico State Offices, as we discussed we have been willing to supplement our response on this, but we had prioritized other matters based on our discussions with you. However, understanding that this is now a top priority, BLM will supplement its response in January.

We did not discuss the NPS concession contract in detail on our last phone call, but I thought we had previously discussed that matter and reached a mutual understanding in July on how we would accommodate the Committee's interest in that matter following the briefing NPS provided. We understood that you would be satisfied if we could allow you to review documents illustrative of the concessions contracting process instead of the specific bus tour contract documents that were the subject of the litigation and the judicial protective order. NPS made the arrangements in July for the *in camera* review that we discussed. We are ready to follow through on providing that *in camera* review at your convenience.

Viz:

1 Strike all after the enacting clause and insert the fol-  
2 lowing:

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the  
5 “Energy Policy Modernization Act of 2015”.

6 (b) TABLE OF CONTENTS.—The table of contents for  
7 this Act is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Definitions.

TITLE I—EFFICIENCY

Subtitle A—Buildings

Sec. 1001. Greater energy efficiency in building codes.

Sec. 1002. Budget-neutral demonstration program for energy and water con-  
servation improvements at multifamily residential units.

Sec. 1003. Coordination of energy retrofitting assistance for schools.

## 2

- Sec. 1004. Energy efficiency retrofit pilot program.
- Sec. 1005. Utility energy service contracts.
- Sec. 1006. Use of energy and water efficiency measures in Federal buildings.
- Sec. 1007. Building training and assessment centers.
- Sec. 1008. Career skills training.
- Sec. 1009. Energy-efficient and energy-saving information technologies.
- Sec. 1010. Availability of funds for design updates.
- Sec. 1011. Energy efficient data centers.
- Sec. 1012. Weatherization Assistance Program.
- Sec. 1013. Reauthorization of State energy program.
- Sec. 1014. Smart building acceleration.
- Sec. 1015. Repeal of fossil phase-out.
- Sec. 1016. Federal building energy efficiency performance standards.
- Sec. 1017. Codification of Executive Order.
- Sec. 1018. Certification for green buildings.
- Sec. 1019. High performance green federal buildings.
- Sec. 1020. Evaluation of potentially duplicative green building programs within Department of Energy.
- Sec. 1021. Study and report on energy savings benefits of operational efficiency programs and services.

#### Subtitle B—Appliances

- Sec. 1101. Extended product system rebate program.
- Sec. 1102. Energy efficient transformer rebate program.
- Sec. 1103. Standards for certain furnaces.
- Sec. 1104. Third-party certification under Energy Star program.
- Sec. 1105. Energy conservation standards for commercial refrigeration equipment.
- Sec. 1106. Voluntary verification programs for air conditioning, furnace, boiler, heat pump, and water heater products.

#### Subtitle C—Manufacturing

- Sec. 1201. Manufacturing energy efficiency.
- Sec. 1202. Leveraging existing Federal agency programs to assist small and medium manufacturers.
- Sec. 1203. Leveraging smart manufacturing infrastructure at National Laboratories.

#### Subtitle D—Vehicles

- Sec. 1301. Short title.
- Sec. 1302. Objectives.
- Sec. 1303. Coordination and nonduplication.
- Sec. 1304. Authorization of appropriations.
- Sec. 1305. Reporting.

### PART I—VEHICLE RESEARCH AND DEVELOPMENT

- Sec. 1306. Program.
- Sec. 1307. Manufacturing.

### PART II—MEDIUM- AND HEAVY-DUTY COMMERCIAL AND TRANSIT VEHICLES

- Sec. 1308. Program.

## 3

- Sec. 1309. Class 8 truck and trailer systems demonstration.
- Sec. 1310. Technology testing and metrics.
- Sec. 1311. Nonroad systems pilot program.

## PART III—ADMINISTRATION

- Sec. 1312. Repeal of existing authorities.

## Subtitle E—Short Title

- Sec. 1401. Short title.

## TITLE II—INFRASTRUCTURE

## Subtitle A—Cybersecurity

- Sec. 2001. Cybersecurity threats.
- Sec. 2002. Enhanced grid security.

## Subtitle B—Strategic Petroleum Reserve

- Sec. 2101. Strategic Petroleum Reserve modernization.

## Subtitle C—Trade

- Sec. 2201. Action on applications to export liquefied natural gas.
- Sec. 2202. Public disclosure of liquefied natural gas export destinations.
- Sec. 2203. Energy data collaboration.

## Subtitle D—Electricity and Energy Storage

- Sec. 2301. Grid storage program.
- Sec. 2302. Electric system grid architecture, scenario development, and modeling.
- Sec. 2303. Technology demonstration on the distribution system.
- Sec. 2304. Hybrid micro-grid systems for isolated and resilient communities.
- Sec. 2305. Voluntary model pathways.
- Sec. 2306. Performance metrics for electricity infrastructure providers.
- Sec. 2307. State and regional electricity distribution planning.
- Sec. 2308. Authorization of appropriations.
- Sec. 2309. Electric transmission infrastructure permitting.
- Sec. 2310. Report by transmission organizations on distributed energy resources and micro-grid systems.
- Sec. 2311. Net metering study guidance.

## Subtitle E—Computing

- Sec. 2401. Exascale computer research program.

## TITLE III—SUPPLY

## Subtitle A—Renewables

## PART I—HYDROELECTRIC

- Sec. 3001. Hydropower regulatory improvements.
- Sec. 3002. Hydroelectric production incentives and efficiency improvements.
- Sec. 3003. Extension of time for a Federal Energy Regulatory Commission project involving Clark Canyon Dam.

## 4

- Sec. 3004. Extension of time for a Federal Energy Regulatory Commission project involving Gibson Dam.

## PART II—GEOTHERMAL

## SUBPART A—GEOTHERMAL ENERGY

- Sec. 3005. National goals for production and site identification.  
 Sec. 3006. Priority areas for development on Federal land.  
 Sec. 3007. Facilitation of coproduction of geothermal energy on oil and gas leases.  
 Sec. 3008. Noncompetitive leasing of adjoining areas for development of geothermal resources.  
 Sec. 3009. Large-scale geothermal energy.  
 Sec. 3010. Report to Congress.  
 Sec. 3011. Authorization of appropriations.

## SUBPART B—GEOTHERMAL EXPLORATION

- Sec. 3012. Geothermal exploration test projects.

## PART III—MARINE HYDROKINETIC

- Sec. 3013. Definition of marine and hydrokinetic renewable energy.  
 Sec. 3014. Marine and hydrokinetic renewable energy research and development.  
 Sec. 3015. National Marine Renewable Energy Research, Development, and Demonstration Centers.  
 Sec. 3016. Authorization of appropriations.

## PART IV—BIOMASS

- Sec. 3017. Bio-power.

## Subtitle B—Oil and Gas

- Sec. 3101. Amendments to the Methane Hydrate Research and Development Act of 2000.  
 Sec. 3102. Liquefied natural gas study.  
 Sec. 3103. FERC process coordination with respect to regulatory approval of gas projects.  
 Sec. 3104. Pilot program.

## Subtitle C—Helium

- Sec. 3201. Rights to helium.

## Subtitle D—Critical Minerals

- Sec. 3301. Definitions.  
 Sec. 3302. Policy.  
 Sec. 3303. Critical mineral designations.  
 Sec. 3304. Resource assessment.  
 Sec. 3305. Permitting.  
 Sec. 3306. Federal Register process.  
 Sec. 3307. Recycling, efficiency, and alternatives.  
 Sec. 3308. Analysis and forecasting.  
 Sec. 3309. Education and workforce.  
 Sec. 3310. National geological and geophysical data preservation program.

## 5

- Sec. 3311. Administration.
- Sec. 3312. Authorization of appropriations.

## Subtitle E—Coal

- Sec. 3401. Fossil energy.
- Sec. 3402. Establishment of coal technology program.

## Subtitle F—Nuclear

- Sec. 3501. Report on fusion and fission reactor prototypes.
- Sec. 3502. Next generation nuclear plant project.

## Subtitle G—Workforce Development

- Sec. 3601. 21st Century Energy Workforce Advisory Board.
- Sec. 3602. Energy workforce pilot grant program.

## Subtitle H—Recycling

- Sec. 3701. Recycled carbon fiber.
- Sec. 3702. Energy generation and regulatory relief study regarding recovery and conversion of nonrecycled mixed plastics.
- Sec. 3703. Eligible projects.

## TITLE IV—ACCOUNTABILITY

## Subtitle A—Loan Programs

- Sec. 4001. Terms and conditions for incentives for innovative technologies.
- Sec. 4002. State loan eligibility.
- Sec. 4003. GAO Study on fossil loan guarantee incentive program.
- Sec. 4004. Program eligibility for vessels.
- Sec. 4005. Additional reforms.
- Sec. 4006. Department of Energy Indian energy education planning and management assistance program.

## Subtitle B—Energy-Water Nexus

- Sec. 4101. Nexus of energy and water for sustainability.
- Sec. 4102. Smart energy and water efficiency pilot program.

## Subtitle C—Innovation

- Sec. 4201. America COMPETES programs.
- Sec. 4202. Inclusion of early stage technology demonstration in authorized technology transfer activities.
- Sec. 4203. Supporting access of small business concerns to National Laboratories.
- Sec. 4204. Microlab technology commercialization.

## Subtitle D—Grid Reliability

- Sec. 4301. Bulk-power system reliability impact statement.
- Sec. 4302. Report by transmission organizations on diversity of supply.

## Subtitle E—Management

- Sec. 4401. Federal land management.
- Sec. 4402. Quadrennial Energy Review.

## 6

- Sec. 4403. State oversight of oil and gas programs.
- Sec. 4404. Under Secretary for Science and Energy.

## Subtitle F—Markets

- Sec. 4501. Enhanced information on critical energy supplies.
- Sec. 4502. Working Group on Energy Markets.
- Sec. 4503. Study of regulatory framework for energy markets.

## Subtitle G—Affordability

- Sec. 4601. E-prize competition pilot program.

## Subtitle H—Code Maintenance

- Sec. 4701. Repeal of off-highway motor vehicles study.
- Sec. 4702. Repeal of methanol study.
- Sec. 4703. Repeal of authorization of appropriations provision.
- Sec. 4704. Repeal of residential energy efficiency standards study.
- Sec. 4705. Repeal of weatherization study.
- Sec. 4706. Repeal of report to Congress.
- Sec. 4707. Repeal of report by General Services Administration.
- Sec. 4708. Repeal of intergovernmental energy management planning and coordination workshops.
- Sec. 4709. Repeal of Inspector General audit survey and President's Council on Integrity and Efficiency report to Congress.
- Sec. 4710. Repeal of procurement and identification of energy efficient products program.
- Sec. 4711. Repeal of national action plan for demand response.
- Sec. 4712. Repeal of national coal policy study.
- Sec. 4713. Repeal of study on compliance problem of small electric utility systems.
- Sec. 4714. Repeal of study of socioeconomic impacts of increased coal production and other energy development.
- Sec. 4715. Repeal of study of the use of petroleum and natural gas in combustors.
- Sec. 4716. Repeal of submission of reports.
- Sec. 4717. Repeal of electric utility conservation plan.
- Sec. 4718. Emergency Energy Conservation repeals.
- Sec. 4719. Energy Security Act repeals.
- Sec. 4720. Nuclear Safety Research, Development, and Demonstration Act of 1980 repeals.
- Sec. 4721. Elimination and consolidation of certain America COMPETES programs.
- Sec. 4722. Repeal of state utility regulatory assistance.
- Sec. 4723. Repeal of survey of energy saving potential.
- Sec. 4724. Repeal of photovoltaic energy program.
- Sec. 4725. Repeal of energy auditor training and certification.
- Sec. 4726. Repeal of authorization of appropriations.
- Sec. 4727. Repeal of Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989.
- Sec. 4728. Repeal of hydrogen research, development, and demonstration program.
- Sec. 4729. Repeal of study on alternative fuel use in nonroad vehicles and engines.

- Sec. 4730. Repeal of low interest loan program for small business fleet purchases.
- Sec. 4731. Repeal of technical and policy analysis for replacement fuel demand and supply information.
- Sec. 4732. Repeal of 1992 Report on Climate Change.
- Sec. 4733. Repeal of Director of Climate Protector establishment.
- Sec. 4734. Repeal of 1994 report on global climate change emissions.
- Sec. 4735. Repeal of telecommuting study.
- Sec. 4736. Repeal of advanced buildings for 2005 program.
- Sec. 4737. Repeal of Energy Research, Development, Demonstration, and Commercial Application Advisory Board.
- Sec. 4738. Repeal of study on use of energy futures for fuel purchase.
- Sec. 4739. Repeal of energy subsidy study.

#### TITLE V—CONSERVATION REAUTHORIZATION

- Sec. 5001. National Park Service Maintenance and Revitalization Conservation Fund.
- Sec. 5002. Land and Water Conservation Fund.
- Sec. 5003. Historic Preservation Fund.

### 1 **SEC. 2. DEFINITIONS.**

2 In this Act:

3 (1) DEPARTMENT.—The term “Department”  
4 means the Department of Energy.

5 (2) SECRETARY.—The term “Secretary” means  
6 the Secretary of Energy.

## 7 **TITLE I—EFFICIENCY**

### 8 **Subtitle A—Buildings**

#### 9 **SEC. 1001. GREATER ENERGY EFFICIENCY IN BUILDING** 10 **CODES.**

11 (a) DEFINITIONS.—Section 303 of the Energy Con-  
12 servation and Production Act (42 U.S.C. 6832) is amend-  
13 ed—

14 (1) by striking paragraph (14) and inserting  
15 the following:

1           “(14) MODEL BUILDING ENERGY CODE.—The  
2           term ‘model building energy code’ means a voluntary  
3           building energy code and standards developed and  
4           updated through a consensus process among inter-  
5           ested persons, such as the IECC or the code used  
6           by—

7                   “(A) the Council of American Building Of-  
8                   ficials, or its legal successor, International Code  
9                   Council, Inc.;

10                   “(B) the American Society of Heating, Re-  
11                   frigerating, and Air-Conditioning Engineers; or

12                   “(C) other appropriate organizations.”;  
13           and

14           (2) by adding at the end the following:

15                   “(17) IECC.—The term ‘IECC’ means the  
16           International Energy Conservation Code.

17                   “(18) INDIAN TRIBE.—The term ‘Indian tribe’  
18           has the meaning given the term in section 4 of the  
19           Native American Housing Assistance and Self-De-  
20           termination Act of 1996 (25 U.S.C. 4103).”.

21           (b) STATE BUILDING ENERGY EFFICIENCY  
22           CODES.—Section 304 of the Energy Conservation and  
23           Production Act (42 U.S.C. 6833) is amended to read as  
24           follows:

1 **“SEC. 304. UPDATING STATE BUILDING ENERGY EFFI-**  
2 **CIENCY CODES.**

3 “(a) IN GENERAL.—The Secretary shall—

4 “(1) encourage and support the adoption of  
5 building energy codes by States, Indian tribes, and,  
6 as appropriate, by local governments that meet or  
7 exceed the model building energy codes, or achieve  
8 equivalent or greater energy savings; and

9 “(2) support full compliance with the State and  
10 local codes.

11 “(b) STATE AND INDIAN TRIBE CERTIFICATION OF  
12 BUILDING ENERGY CODE UPDATES.—

13 “(1) REVIEW AND UPDATING OF CODES BY  
14 EACH STATE AND INDIAN TRIBE.—

15 “(A) IN GENERAL.—Not later than 2 years  
16 after the date on which a model building energy  
17 code is updated, each State or Indian tribe shall  
18 certify whether or not the State or Indian tribe,  
19 respectively, has reviewed and updated the en-  
20 ergy provisions of the building code of the State  
21 or Indian tribe, respectively.

22 “(B) DEMONSTRATION.—The certification  
23 shall include a demonstration of whether or not  
24 the energy savings for the code provisions that  
25 are in effect throughout the State or Indian  
26 tribal territory meet or exceed—

1 “(i) the energy savings of the updated  
2 model building energy code; or

3 “(ii) the targets established under sec-  
4 tion 307(b)(2).

5 “(C) NO MODEL BUILDING ENERGY CODE  
6 UPDATE.—If a model building energy code is  
7 not updated by a target date established under  
8 section 307(b)(2)(D), each State or Indian tribe  
9 shall, not later than 2 years after the specified  
10 date, certify whether or not the State or Indian  
11 tribe, respectively, has reviewed and updated  
12 the energy provisions of the building code of the  
13 State or Indian tribe, respectively, to meet or  
14 exceed the target in section 307(b)(2).

15 “(2) VALIDATION BY SECRETARY.—Not later  
16 than 90 days after a State or Indian tribe certifi-  
17 cation under paragraph (1), the Secretary shall—

18 “(A) determine whether the code provi-  
19 sions of the State or Indian tribe, respectively,  
20 meet the criteria specified in paragraph (1);  
21 and

22 “(B) if the determination is positive, vali-  
23 date the certification.

24 “(c) IMPROVEMENTS IN COMPLIANCE WITH BUILD-  
25 ING ENERGY CODES.—

1 “(1) REQUIREMENT.—

2 “(A) IN GENERAL.—Not later than 3 years  
3 after the date of a certification under sub-  
4 section (b), each State and Indian tribe shall  
5 certify whether or not the State and Indian  
6 tribe, respectively, has—

7 “(i) achieved full compliance under  
8 paragraph (3) with the applicable certified  
9 State and Indian tribe building energy  
10 code or with the associated model building  
11 energy code; or

12 “(ii) made significant progress under  
13 paragraph (4) toward achieving compliance  
14 with the applicable certified State and In-  
15 dian tribe building energy code or with the  
16 associated model building energy code.

17 “(B) REPEAT CERTIFICATIONS.—If the  
18 State or Indian tribe certifies progress toward  
19 achieving compliance, the State or Indian tribe  
20 shall repeat the certification until the State or  
21 Indian tribe certifies that the State or Indian  
22 tribe has achieved full compliance, respectively.

23 “(2) MEASUREMENT OF COMPLIANCE.—A cer-  
24 tification under paragraph (1) shall include docu-  
25 mentation of the rate of compliance based on—

1           “(A) independent inspections of a random  
2           sample of the buildings covered by the code in  
3           the preceding year; or

4           “(B) an alternative method that yields an  
5           accurate measure of compliance.

6           “(3) ACHIEVEMENT OF COMPLIANCE.—A State  
7           or Indian tribe shall be considered to achieve full  
8           compliance under paragraph (1) if—

9           “(A) at least 90 percent of building space  
10           covered by the code in the preceding year sub-  
11           stantially meets all the requirements of the ap-  
12           plicable code specified in paragraph (1), or  
13           achieves equivalent or greater energy savings  
14           level; or

15           “(B) the estimated excess energy use of  
16           buildings that did not meet the applicable code  
17           specified in paragraph (1) in the preceding  
18           year, compared to a baseline of comparable  
19           buildings that meet this code, is not more than  
20           5 percent of the estimated energy use of all  
21           buildings covered by this code during the pre-  
22           ceding year.

23           “(4) SIGNIFICANT PROGRESS TOWARD  
24           ACHIEVEMENT OF COMPLIANCE.—A State or Indian  
25           tribe shall be considered to have made significant

1 progress toward achieving compliance for purposes  
2 of paragraph (1) if the State or Indian tribe—

3 “(A) has developed and is implementing a  
4 plan for achieving compliance during the 8-  
5 year-period beginning on the date of enactment  
6 of this paragraph, including annual targets for  
7 compliance and active training and enforcement  
8 programs; and

9 “(B) has met the most recent target under  
10 subparagraph (A).

11 “(5) VALIDATION BY SECRETARY.—Not later  
12 than 90 days after a State or Indian tribe certifi-  
13 cation under paragraph (1), the Secretary shall—

14 “(A) determine whether the State or In-  
15 dian tribe has demonstrated meeting the cri-  
16 teria of this subsection, including accurate  
17 measurement of compliance; and

18 “(B) if the determination is positive, vali-  
19 date the certification.

20 “(d) STATES OR INDIAN TRIBES THAT DO NOT  
21 ACHIEVE COMPLIANCE.—

22 “(1) REPORTING.—A State or Indian tribe that  
23 has not made a certification required under sub-  
24 section (b) or (c) by the applicable deadline shall  
25 submit to the Secretary a report on—

1           “(A) the status of the State or Indian tribe  
2           with respect to meeting the requirements and  
3           submitting the certification; and

4           “(B) a plan for meeting the requirements  
5           and submitting the certification.

6           “(2) FEDERAL SUPPORT.—For any State or In-  
7           dian tribe for which the Secretary has not validated  
8           a certification by a deadline under subsection (b) or  
9           (c), the lack of the certification may be a consider-  
10          ation for Federal support authorized under this sec-  
11          tion for code adoption and compliance activities.

12          “(3) LOCAL GOVERNMENT.—In any State or  
13          Indian tribe for which the Secretary has not vali-  
14          dated a certification under subsection (b) or (c), a  
15          local government may be eligible for Federal support  
16          by meeting the certification requirements of sub-  
17          sections (b) and (c).

18          “(4) ANNUAL REPORTS BY SECRETARY.—

19                 “(A) IN GENERAL.—The Secretary shall  
20                 annually submit to Congress, and publish in the  
21                 Federal Register, a report on—

22                         “(i) the status of model building en-  
23                         ergy codes;

24                         “(ii) the status of code adoption and  
25                         compliance in the States and Indian tribes;

1 “(iii) the implementation of this sec-  
2 tion; and

3 “(iv) improvements in energy savings  
4 over time as a result of the targets estab-  
5 lished under section 307(b)(2).

6 “(B) IMPACTS.—The report shall include  
7 estimates of impacts of past action under this  
8 section, and potential impacts of further action,  
9 on—

10 “(i) upfront financial and construction  
11 costs, cost benefits and returns (using in-  
12 vestment analysis), and lifetime energy use  
13 for buildings;

14 “(ii) resulting energy costs to individ-  
15 uals and businesses; and

16 “(iii) resulting overall annual building  
17 ownership and operating costs.

18 “(e) TECHNICAL ASSISTANCE TO STATES AND IN-  
19 DIAN TRIBES.—The Secretary shall provide technical as-  
20 sistance to States and Indian tribes to implement the goals  
21 and requirements of this section, including procedures and  
22 technical analysis for States and Indian tribes—

23 “(1) to improve and implement State residential  
24 and commercial building energy codes;

1           “(2) to demonstrate that the code provisions of  
2 the States and Indian tribes achieve equivalent or  
3 greater energy savings than the model building en-  
4 ergy codes and targets;

5           “(3) to document the rate of compliance with a  
6 building energy code; and

7           “(4) to otherwise promote the design and con-  
8 struction of energy efficient buildings.

9           “(f) AVAILABILITY OF INCENTIVE FUNDING.—

10           “(1) IN GENERAL.—The Secretary shall provide  
11 incentive funding to States and Indian tribes—

12           “(A) to implement the requirements of this  
13 section;

14           “(B) to improve and implement residential  
15 and commercial building energy codes, including  
16 increasing and verifying compliance with the  
17 codes and training of State, local, and tribal  
18 building code officials to implement and enforce  
19 the codes; and

20           “(C) to promote building energy efficiency  
21 through the use of the codes.

22           “(2) ADDITIONAL FUNDING.—Additional fund-  
23 ing shall be provided under this subsection for im-  
24 plementation of a plan to achieve and document full

1 compliance with residential and commercial building  
2 energy codes under subsection (c)—

3 “(A) to a State or Indian tribe for which  
4 the Secretary has validated a certification under  
5 subsection (b) or (c); and

6 “(B) in a State or Indian tribe that is not  
7 eligible under subparagraph (A), to a local gov-  
8 ernment that is eligible under this section.

9 “(3) TRAINING.—Of the amounts made avail-  
10 able under this subsection, the State or Indian tribe  
11 may use amounts required, but not to exceed  
12 \$750,000 for a State, to train State and local build-  
13 ing code officials to implement and enforce codes de-  
14 scribed in paragraph (2).

15 “(4) LOCAL GOVERNMENTS.—States may share  
16 grants under this subsection with local governments  
17 that implement and enforce the codes.

18 “(g) STRETCH CODES AND ADVANCED STAND-  
19 ARDS.—

20 “(1) IN GENERAL.—The Secretary shall provide  
21 technical and financial support for the development  
22 of stretch codes and advanced standards for residen-  
23 tial and commercial buildings for use as—

1           “(A) an option for adoption as a building  
2           energy code by State, local, or tribal govern-  
3           ments; and

4           “(B) guidelines for energy-efficient build-  
5           ing design.

6           “(2) TARGETS.—The stretch codes and ad-  
7           vanced standards shall be designed—

8           “(A) to achieve substantial energy savings  
9           compared to the model building energy codes;  
10          and

11          “(B) to meet targets under section 307(b),  
12          if available, at least 3 to 6 years in advance of  
13          the target years.

14          “(h) STUDIES.—The Secretary, in consultation with  
15          building science experts from the National Laboratories  
16          and institutions of higher education, designers and build-  
17          ers of energy-efficient residential and commercial build-  
18          ings, code officials, and other stakeholders, shall under-  
19          take a study of the feasibility, impact, economics, and  
20          merit of—

21          “(1) code improvements that would require that  
22          buildings be designed, sited, and constructed in a  
23          manner that makes the buildings more adaptable in  
24          the future to become zero-net-energy after initial

1 construction, as advances are achieved in energy-sav-  
2 ing technologies;

3 “(2) code procedures to incorporate measured  
4 lifetimes, not just first-year energy use, in trade-offs  
5 and performance calculations; and

6 “(3) legislative options for increasing energy  
7 savings from building energy codes, including addi-  
8 tional incentives for effective State and local action,  
9 and verification of compliance with and enforcement  
10 of a code other than by a State or local government.

11 “(i) EFFECT ON OTHER LAWS.—Nothing in this sec-  
12 tion or section 307 supersedes or modifies the application  
13 of sections 321 through 346 of the Energy Policy and  
14 Conservation Act (42 U.S.C. 6291 et seq.).

15 “(j) AUTHORIZATION OF APPROPRIATIONS.—There  
16 is authorized to be appropriated to carry out this section  
17 and section 307 \$200,000,000, to remain available until  
18 expended.”.

19 (c) FEDERAL BUILDING ENERGY EFFICIENCY  
20 STANDARDS.—Section 305 of the Energy Conservation  
21 and Production Act (42 U.S.C. 6834) is amended by strik-  
22 ing “voluntary building energy code” each place it appears  
23 in subsections (a)(2)(B) and (b) and inserting “model  
24 building energy code”.

1 (d) MODEL BUILDING ENERGY CODES.—Section 307  
2 of the Energy Conservation and Production Act (42  
3 U.S.C. 6836) is amended to read as follows:

4 **“SEC. 307. SUPPORT FOR MODEL BUILDING ENERGY**  
5 **CODES.**

6 “(a) IN GENERAL.—The Secretary shall support the  
7 updating of model building energy codes.

8 “(b) TARGETS.—

9 “(1) IN GENERAL.—The Secretary shall sup-  
10 port the updating of the model building energy codes  
11 to enable the achievement of aggregate energy sav-  
12 ings targets established under paragraph (2).

13 “(2) TARGETS.—

14 “(A) IN GENERAL.—The Secretary shall  
15 work with States, local governments, and In-  
16 dian tribes, nationally recognized code and  
17 standards developers, and other interested par-  
18 ties to support the updating of model building  
19 energy codes by establishing one or more aggre-  
20 gate energy savings targets to achieve the pur-  
21 poses of this section.

22 “(B) SEPARATE TARGETS.—The Secretary  
23 may establish separate targets for commercial  
24 and residential buildings.

1                   “(C) BASELINES.—The baseline for updat-  
2                   ing model building energy codes shall be the  
3                   2009 IECC for residential buildings and  
4                   ASHRAE Standard 90.1–2010 for commercial  
5                   buildings.

6                   “(D) SPECIFIC YEARS.—

7                   “(i) IN GENERAL.—Targets for spe-  
8                   cific years shall be established and revised  
9                   by the Secretary through rulemaking and  
10                  coordinated with nationally recognized code  
11                  and standards developers at a level that—

12                   “(I) is at the maximum level of  
13                   energy efficiency that is techno-  
14                   logically feasible and life-cycle cost ef-  
15                   fective, while accounting for the eco-  
16                   nomic considerations under paragraph  
17                   (4);

18                   “(II) is higher than the preceding  
19                   target; and

20                   “(III) promotes the achievement  
21                   of commercial and residential high-  
22                   performance buildings through high-  
23                   performance energy efficiency (within  
24                   the meaning of section 401 of the En-

1                   ergy Independence and Security Act  
2                   of 2007 (42 U.S.C. 17061)).

3                   “(ii) INITIAL TARGETS.—Not later  
4                   than 1 year after the date of enactment of  
5                   this clause, the Secretary shall establish  
6                   initial targets under this subparagraph.

7                   “(iii) DIFFERENT TARGET YEARS.—  
8                   Subject to clause (i), prior to the applica-  
9                   ble year, the Secretary may set a later tar-  
10                  get year for any of the model building en-  
11                  ergy codes described in subparagraph (A)  
12                  if the Secretary determines that a target  
13                  cannot be met.

14                  “(iv) SMALL BUSINESS.—When estab-  
15                  lishing targets under this paragraph  
16                  through rulemaking, the Secretary shall  
17                  ensure compliance with the Small Business  
18                  Regulatory Enforcement Fairness Act of  
19                  1996 (5 U.S.C. 601 note; Public Law 104–  
20                  121).

21                  “(3) APPLIANCE STANDARDS AND OTHER FAC-  
22                  TORS AFFECTING BUILDING ENERGY USE.—In es-  
23                  tablishing building code targets under paragraph  
24                  (2), the Secretary shall develop and adjust the tar-

1 gets in recognition of potential savings and costs re-  
2 lating to—

3 “(A) efficiency gains made in appliances,  
4 lighting, windows, insulation, and building enve-  
5 lope sealing;

6 “(B) advancement of distributed genera-  
7 tion and on-site renewable power generation  
8 technologies;

9 “(C) equipment improvements for heating,  
10 cooling, and ventilation systems;

11 “(D) building management systems and  
12 SmartGrid technologies to reduce energy use;  
13 and

14 “(E) other technologies, practices, and  
15 building systems that the Secretary considers  
16 appropriate regarding building plug load and  
17 other energy uses.

18 “(4) ECONOMIC CONSIDERATIONS.—In estab-  
19 lishing and revising building code targets under  
20 paragraph (2), the Secretary shall consider the eco-  
21 nomic feasibility of achieving the proposed targets  
22 established under this section and the potential costs  
23 and savings for consumers and building owners, in-  
24 cluding a return on investment analysis.

1           “(c) TECHNICAL ASSISTANCE TO MODEL BUILDING  
2 ENERGY CODE-SETTING AND STANDARD DEVELOPMENT  
3 ORGANIZATIONS.—

4           “(1) IN GENERAL.—The Secretary shall, on a  
5 timely basis, provide technical assistance to model  
6 building energy code-setting and standard develop-  
7 ment organizations consistent with the goals of this  
8 section.

9           “(2) ASSISTANCE.—The assistance shall in-  
10 clude, as requested by the organizations, technical  
11 assistance in—

12           “(A) evaluating code or standards pro-  
13 posals or revisions;

14           “(B) building energy analysis and design  
15 tools;

16           “(C) building demonstrations;

17           “(D) developing definitions of energy use  
18 intensity and building types for use in model  
19 building energy codes to evaluate the efficiency  
20 impacts of the model building energy codes;

21           “(E) performance-based standards;

22           “(F) evaluating economic considerations  
23 under subsection (b)(4); and

1           “(G) developing model building energy  
2 codes by Indian tribes in accordance with tribal  
3 law.

4           “(3) AMENDMENT PROPOSALS.—The Secretary  
5 may submit timely model building energy code  
6 amendment proposals to the model building energy  
7 code-setting and standard development organiza-  
8 tions, with supporting evidence, sufficient to enable  
9 the model building energy codes to meet the targets  
10 established under subsection (b)(2).

11           “(4) ANALYSIS METHODOLOGY.—The Secretary  
12 shall make publicly available the entire calculation  
13 methodology (including input assumptions and data)  
14 used by the Secretary to estimate the energy savings  
15 of code or standard proposals and revisions.

16           “(d) DETERMINATION.—

17           “(1) REVISION OF MODEL BUILDING ENERGY  
18 CODES.—If the provisions of the IECC or ASHRAE  
19 Standard 90.1 regarding building energy use are re-  
20 vised, the Secretary shall make a preliminary deter-  
21 mination not later than 90 days after the date of the  
22 revision, and a final determination not later than 15  
23 months after the date of the revision, on whether or  
24 not the revision will—

1           “(A) improve energy efficiency in buildings  
2 compared to the existing model building energy  
3 code; and

4           “(B) meet the applicable targets under  
5 subsection (b)(2).

6           “(2) CODES OR STANDARDS NOT MEETING TAR-  
7 GETS.—

8           “(A) IN GENERAL.—If the Secretary  
9 makes a preliminary determination under para-  
10 graph (1)(B) that a code or standard does not  
11 meet the targets established under subsection  
12 (b)(2), the Secretary may at the same time pro-  
13 vide the model building energy code or standard  
14 developer with proposed changes that would re-  
15 sult in a model building energy code that meets  
16 the targets and with supporting evidence, tak-  
17 ing into consideration—

18           “(i) whether the modified code is tech-  
19 nically feasible and life-cycle cost effective;

20           “(ii) available appliances, technologies,  
21 materials, and construction practices; and

22           “(iii) the economic considerations  
23 under subsection (b)(4).

24           “(B) INCORPORATION OF CHANGES.—

1                   “(i) IN GENERAL.—On receipt of the  
2                   proposed changes, the model building en-  
3                   ergy code or standard developer shall have  
4                   an additional 270 days to accept or reject  
5                   the proposed changes of the Secretary to  
6                   the model building energy code or standard  
7                   for the Secretary to make a final deter-  
8                   mination.

9                   “(ii) FINAL DETERMINATION.—A  
10                  final determination under paragraph (1)  
11                  shall be on the modified model building en-  
12                  ergy code or standard.

13                  “(e) ADMINISTRATION.—In carrying out this section,  
14 the Secretary shall—

15                  “(1) publish notice of targets and supporting  
16                  analysis and determinations under this section in the  
17                  Federal Register to provide an explanation of and  
18                  the basis for such actions, including any supporting  
19                  modeling, data, assumptions, protocols, and cost-  
20                  benefit analysis, including return on investment; and

21                  “(2) provide an opportunity for public comment  
22                  on targets and supporting analysis and determina-  
23                  tions under this section.

24                  “(f) VOLUNTARY CODES AND STANDARDS.—Not-  
25 withstanding any other provision of this section, any

1 model building code or standard established under section  
2 304 shall not be binding on a State, local government, or  
3 Indian tribe as a matter of Federal law.”.

4 **SEC. 1002. BUDGET-NEUTRAL DEMONSTRATION PROGRAM**  
5 **FOR ENERGY AND WATER CONSERVATION IM-**  
6 **PROVEMENTS AT MULTIFAMILY RESIDEN-**  
7 **TIAL UNITS.**

8 (a) ESTABLISHMENT.—The Secretary of Housing  
9 and Urban Development (referred to in this section as the  
10 “Secretary”) shall establish a demonstration program  
11 under which, during the period beginning on the date of  
12 enactment of this Act, and ending on September 30, 2018,  
13 the Secretary may enter into budget-neutral, performance-  
14 based agreements that result in a reduction in energy or  
15 water costs with such entities as the Secretary determines  
16 to be appropriate under which the entities shall carry out  
17 projects for energy or water conservation improvements at  
18 not more than 20,000 residential units in multifamily  
19 buildings participating in—

20 (1) the project-based rental assistance program  
21 under section 8 of the United States Housing Act of  
22 1937 (42 U.S.C. 1437f), other than assistance pro-  
23 vided under section 8(o) of that Act;

1           (2) the supportive housing for the elderly pro-  
2           gram under section 202 of the Housing Act of 1959  
3           (12 U.S.C. 1701q); or

4           (3) the supportive housing for persons with dis-  
5           abilities program under section 811(d)(2) of the  
6           Cranston-Gonzalez National Affordable Housing Act  
7           (42 U.S.C. 8013(d)(2)).

8           (b) REQUIREMENTS.—

9           (1) PAYMENTS CONTINGENT ON SAVINGS.—

10           (A) IN GENERAL.—The Secretary shall  
11           provide to an entity a payment under an agree-  
12           ment under this section only during applicable  
13           years for which an energy or water cost savings  
14           is achieved with respect to the applicable multi-  
15           family portfolio of properties, as determined by  
16           the Secretary, in accordance with subparagraph  
17           (B).

18           (B) PAYMENT METHODOLOGY.—

19           (i) IN GENERAL.—Each agreement  
20           under this section shall include a pay-for-  
21           success provision—

22                   (I) that will serve as a payment  
23                   threshold for the term of the agree-  
24                   ment; and

1 (II) pursuant to which the De-  
2 partment of Housing and Urban De-  
3 velopment shall share a percentage of  
4 the savings at a level determined by  
5 the Secretary that is sufficient to  
6 cover the administrative costs of car-  
7 rying out this section.

8 (ii) LIMITATIONS.—A payment made  
9 by the Secretary under an agreement  
10 under this section shall—

11 (I) be contingent on documented  
12 utility savings; and

13 (II) not exceed the utility savings  
14 achieved by the date of the payment,  
15 and not previously paid, as a result of  
16 the improvements made under the  
17 agreement.

18 (C) THIRD PARTY VERIFICATION.—Savings  
19 payments made by the Secretary under this sec-  
20 tion shall be based on a measurement and  
21 verification protocol that includes at least—

22 (i) establishment of a weather-normal-  
23 ized and occupancy-normalized utility con-  
24 sumption baseline established preretrofit;

1                   (ii) annual third party confirmation of  
2                   actual utility consumption and cost for  
3                   owner-paid utilities;

4                   (iii) annual third party validation of  
5                   the tenant utility allowances in effect dur-  
6                   ing the applicable year and vacancy rates  
7                   for each unit type; and

8                   (iv) annual third party determination  
9                   of savings to the Secretary.

10               (2) TERM.—The term of an agreement under  
11               this section shall be not longer than 12 years.

12               (3) ENTITY ELIGIBILITY.—The Secretary  
13               shall—

14                   (A) establish a competitive process for en-  
15                   tering into agreements under this section; and

16                   (B) enter into such agreements only with  
17                   entities that demonstrate significant experience  
18                   relating to—

19                       (i) financing and operating properties  
20                       receiving assistance under a program de-  
21                       scribed in subsection (a);

22                       (ii) oversight of energy and water con-  
23                       servation programs, including oversight of  
24                       contractors; and

1                   (iii) raising capital for energy and  
2                   water conservation improvements from  
3                   charitable organizations or private inves-  
4                   tors.

5                   (4) GEOGRAPHICAL DIVERSITY.—Each agree-  
6                   ment entered into under this section shall provide  
7                   for the inclusion of properties with the greatest fea-  
8                   sible regional and State variance.

9                   (c) PLAN AND REPORTS.—

10                  (1) PLAN.—Not later than 90 days after the  
11                  date of enactment of this Act, the Secretary shall  
12                  submit to the Committees on Appropriations of the  
13                  House of Representatives and the Senate, the Com-  
14                  mittee on Energy and Natural Resources of the Sen-  
15                  ate, and the Committee on Energy and Commerce of  
16                  the House of Representatives a detailed plan for the  
17                  implementation of this section.

18                  (2) REPORTS.—Not later than 1 year after the  
19                  date of enactment of this Act, and annually there-  
20                  after, the Secretary shall—

21                         (A) conduct an evaluation of the program  
22                         under this section; and

23                         (B) submit to Congress a report describing  
24                         each evaluation conducted under subparagraph

25                         (A).

1 (d) FUNDING.—For each fiscal year during which an  
2 agreement under this section is in effect, the Secretary  
3 may use to carry out this section any funds appropriated  
4 to the Secretary for the renewal of contracts under a pro-  
5 gram described in subsection (a).

6 **SEC. 1003. COORDINATION OF ENERGY RETROFITTING AS-**  
7 **SISTANCE FOR SCHOOLS.**

8 (a) DEFINITION OF SCHOOL.—In this section, the  
9 term “school” means—

10 (1) an elementary school or secondary school  
11 (as defined in section 9101 of the Elementary and  
12 Secondary Education Act of 1965 (20 U.S.C.  
13 7801));

14 (2) an institution of higher education (as de-  
15 fined in section 102(a) of the Higher Education Act  
16 of 1965 (20 U.S.C. 1002(a));

17 (3) a school of the defense dependents’ edu-  
18 cation system under the Defense Dependents’ Edu-  
19 cation Act of 1978 (20 U.S.C. 921 et seq.) or estab-  
20 lished under section 2164 of title 10, United States  
21 Code;

22 (4) a school operated by the Bureau of Indian  
23 Affairs;

1           (5) a tribally controlled school (as defined in  
2           section 5212 of the Tribally Controlled Schools Act  
3           of 1988 (25 U.S.C. 2511)); and

4           (6) a Tribal College or University (as defined in  
5           section 316(b) of the Higher Education Act of 1965  
6           (20 U.S.C. 1059c(b))).

7           (b) DESIGNATION OF LEAD AGENCY.—The Sec-  
8           retary, acting through the Office of Energy Efficiency and  
9           Renewable Energy, shall act as the lead Federal agency  
10          for coordinating and disseminating information on exist-  
11          ing Federal programs and assistance that may be used  
12          to help initiate, develop, and finance energy efficiency, re-  
13          newable energy, and energy retrofitting projects for  
14          schools.

15          (c) REQUIREMENTS.—In carrying out coordination  
16          and outreach under subsection (b), the Secretary shall—

17               (1) in consultation and coordination with the  
18               appropriate Federal agencies, carry out a review of  
19               existing programs and financing mechanisms (in-  
20               cluding revolving loan funds and loan guarantees)  
21               available in or from the Department of Agriculture,  
22               the Department of Energy, the Department of Edu-  
23               cation, the Department of the Treasury, the Internal  
24               Revenue Service, the Environmental Protection  
25               Agency, and other appropriate Federal agencies with

1 jurisdiction over energy financing and facilitation  
2 that are currently used or may be used to help ini-  
3 tiate, develop, and finance energy efficiency, renew-  
4 able energy, and energy retrofitting projects for  
5 schools;

6 (2) establish a Federal cross-departmental col-  
7 laborative coordination, education, and outreach ef-  
8 fort to streamline communication and promote avail-  
9 able Federal opportunities and assistance described  
10 in paragraph (1) for energy efficiency, renewable en-  
11 ergy, and energy retrofitting projects that enables  
12 States, local educational agencies, and schools—

13 (A) to use existing Federal opportunities  
14 more effectively; and

15 (B) to form partnerships with Governors,  
16 State energy programs, local educational, finan-  
17 cial, and energy officials, State and local gov-  
18 ernment officials, nonprofit organizations, and  
19 other appropriate entities to support the initi-  
20 ation of the projects;

21 (3) provide technical assistance for States, local  
22 educational agencies, and schools to help develop  
23 and finance energy efficiency, renewable energy, and  
24 energy retrofitting projects—

1 (A) to increase the energy efficiency of  
2 buildings or facilities;

3 (B) to install systems that individually  
4 generate energy from renewable energy re-  
5 sources;

6 (C) to establish partnerships to leverage  
7 economies of scale and additional financing  
8 mechanisms available to larger clean energy ini-  
9 tiatives; or

10 (D) to promote—

11 (i) the maintenance of health, environ-  
12 mental quality, and safety in schools, in-  
13 cluding the ambient air quality, through  
14 energy efficiency, renewable energy, and  
15 energy retrofit projects; and

16 (ii) the achievement of expected en-  
17 ergy savings and renewable energy produc-  
18 tion through proper operations and main-  
19 tenance practices;

20 (4) develop and maintain a single online re-  
21 source website with contact information for relevant  
22 technical assistance and support staff in the Office  
23 of Energy Efficiency and Renewable Energy for  
24 States, local educational agencies, and schools to ef-  
25 fectively access and use Federal opportunities and

1 assistance described in paragraph (1) to develop en-  
2 ergy efficiency, renewable energy, and energy retro-  
3 fitting projects; and

4 (5) establish a process for recognition of schools  
5 that—

6 (A) have successfully implemented energy  
7 efficiency, renewable energy, and energy retro-  
8 fitting projects; and

9 (B) are willing to serve as resources for  
10 other local educational agencies and schools to  
11 assist initiation of similar efforts.

12 (d) REPORT.—Not later than 180 days after the date  
13 of enactment of this Act, the Secretary shall submit to  
14 Congress a report describing the implementation of this  
15 section.

16 **SEC. 1004. ENERGY EFFICIENCY RETROFIT PILOT PRO-**  
17 **GRAM.**

18 (a) DEFINITIONS.—In this section:

19 (1) APPLICANT.—The term “applicant” means  
20 a nonprofit organization that applies for a grant  
21 under this section.

22 (2) ENERGY-EFFICIENCY IMPROVEMENT.—

23 (A) IN GENERAL.—The term “energy-effi-  
24 ciency improvement” means an installed meas-  
25 ure (including a product, equipment, system,

1 service, or practice) that results in a reduction  
2 in use by a nonprofit organization for energy or  
3 fuel supplied from outside the nonprofit build-  
4 ing.

5 (B) INCLUSIONS.—The term “energy-effi-  
6 ciency improvement” includes an installed  
7 measure described in subparagraph (A) involv-  
8 ing—

9 (i) repairing, replacing, or installing—

10 (I) a roof or lighting system, or  
11 component of a roof or lighting sys-  
12 tem;

13 (II) a window;

14 (III) a door, including a security  
15 door; or

16 (IV) a heating, ventilation, or air  
17 conditioning system or component of  
18 the system (including insulation and  
19 wiring and plumbing improvements  
20 needed to serve a more efficient sys-  
21 tem);

22 (ii) a renewable energy generation or  
23 heating system, including a solar, photo-  
24 voltaic, wind, geothermal, or biomass (in-

1 cluding wood pellet) system or component  
2 of the system; and

3 (iii) any other measure taken to mod-  
4 ernize, renovate, or repair a nonprofit  
5 building to make the nonprofit building  
6 more energy efficient.

7 (3) NONPROFIT BUILDING.—

8 (A) IN GENERAL.—The term “nonprofit  
9 building” means a building operated and owned  
10 by a nonprofit organization.

11 (B) INCLUSIONS.—The term “nonprofit  
12 building” includes a building described in sub-  
13 paragraph (A) that is—

- 14 (i) a hospital;  
15 (ii) a youth center;  
16 (iii) a school;  
17 (iv) a social-welfare program facility;  
18 (v) a faith-based organization; and  
19 (vi) any other nonresidential and non-  
20 commercial structure.

21 (b) ESTABLISHMENT.—Not later than 1 year after  
22 the date of enactment of this Act, the Secretary shall es-  
23 tablish a pilot program to award grants for the purpose  
24 of retrofitting nonprofit buildings with energy-efficiency  
25 improvements.

1 (c) GRANTS.—

2 (1) IN GENERAL.—The Secretary may award  
3 grants under the program established under sub-  
4 section (b).

5 (2) APPLICATION.—The Secretary may award a  
6 grant under this section if an applicant submits to  
7 the Secretary an application at such time, in such  
8 form, and containing such information as the Sec-  
9 retary may prescribe.

10 (3) CRITERIA FOR GRANT.—In determining  
11 whether to award a grant under this section, the  
12 Secretary shall apply performance-based criteria,  
13 which shall give priority to applications based on—

14 (A) the energy savings achieved;

15 (B) the cost-effectiveness of the energy-ef-  
16 ficiency improvement;

17 (C) an effective plan for evaluation, meas-  
18 urement, and verification of energy savings;

19 (D) the financial need of the applicant;  
20 and

21 (E) the percentage of the matching con-  
22 tribution by the applicant.

23 (4) LIMITATION ON INDIVIDUAL GRANT  
24 AMOUNT.—Each grant awarded under this section  
25 shall not exceed—

1 (A) an amount equal to 50 percent of the  
2 energy-efficiency improvement; and

3 (B) \$200,000.

4 (5) COST SHARING.—

5 (A) IN GENERAL.—A grant awarded under  
6 this section shall be subject to a minimum non-  
7 Federal cost-sharing requirement of 50 percent.

8 (B) IN-KIND CONTRIBUTIONS.—The non-  
9 Federal share may be provided in the form of  
10 in-kind contributions of materials or services.

11 (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
12 authorized to be appropriated to carry out this section  
13 \$10,000,000 for each of fiscal years 2016 through 2020,  
14 to remain available until expended.

15 **SEC. 1005. UTILITY ENERGY SERVICE CONTRACTS.**

16 Section 546 of the National Energy Conservation  
17 Policy Act (42 U.S.C. 8256) is amended by adding at the  
18 end the following:

19 “(f) UTILITY ENERGY SERVICE CONTRACTS.—

20 “(1) IN GENERAL.—Each Federal agency may  
21 use, to the maximum extent practicable, measures  
22 provided by law to meet energy efficiency and con-  
23 servation mandates and laws, including through util-  
24 ity energy service contracts.

1           “(2) CONTRACT PERIOD.—The term of a utility  
2 energy service contract entered into by a Federal  
3 agency may have a contract period that extends be-  
4 yond 10 years, but not to exceed 25 years.

5           “(3) REQUIREMENTS.—The conditions of a util-  
6 ity energy service contract entered into by a Federal  
7 agency shall include requirements for measurement,  
8 verification, and performance assurances or guaran-  
9 tees of the savings.”.

10 **SEC. 1006. USE OF ENERGY AND WATER EFFICIENCY MEAS-**  
11 **URES IN FEDERAL BUILDINGS.**

12           (a) ENERGY MANAGEMENT REQUIREMENTS.—Sec-  
13 tion 543(f)(4) of the National Energy Conservation Policy  
14 Act (42 U.S.C. 8253(f)(4)) is amended—

15           (1) by redesignating subparagraphs (A) and  
16 (B) as clauses (i) and (ii), respectively, and indent-  
17 ing appropriately;

18           (2) by striking “Not later than” and inserting  
19 the following:

20           “(A) IN GENERAL.—Not later than”; and

21           (3) by adding at the end the following:

22           “(B) MEASURES NOT IMPLEMENTED.—  
23 Each energy manager, as part of the certifi-  
24 cation system under paragraph (7) and using  
25 guidelines developed by the Secretary, shall pro-

1           vide an explanation regarding any life-cycle  
2           cost-effective measures described in subpara-  
3           graph (A)(i) that have not been implemented.”.

4           (b) REPORTS.—Section 548(b) of the National En-  
5   ergy Conservation Policy Act (42 U.S.C. 8258(b)) is  
6   amended—

7           (1) in paragraph (3), by striking “and” at the  
8   end;

9           (2) in paragraph (4), by striking the period at  
10   the end and inserting “; and”; and

11          (3) by adding at the end the following:

12           “(5)(A) the status of the energy savings per-  
13   formance contracts and utility energy service con-  
14   tracts of each agency;

15           “(B) the investment value of the contracts;

16           “(C) the guaranteed energy savings for the pre-  
17   vious year as compared to the actual energy savings  
18   for the previous year;

19           “(D) the plan for entering into the contracts in  
20   the coming year; and

21           “(E) information explaining why any previously  
22   submitted plans for the contracts were not imple-  
23   mented.”.

24          (c) DEFINITION OF ENERGY CONSERVATION MEAS-  
25   URES.—Section 551(4) of the National Energy Conserva-

1 tion Policy Act (42 U.S.C. 8259(4)) is amended by strik-  
2 ing “or retrofit activities” and inserting “retrofit activi-  
3 ties, or energy consuming devices and required support  
4 structures”.

5 (d) **AUTHORITY TO ENTER INTO CONTRACTS.**—Sec-  
6 tion 801(a)(2)(F) of the National Energy Conservation  
7 Policy Act (42 U.S.C. 8287(a)(2)(F)) is amended—

8 (1) in clause (i), by striking “or” at the end;

9 (2) in clause (ii), by striking the period at the  
10 end and inserting “; or”; and

11 (3) by adding at the end the following:

12 “(iii) limit the recognition of oper-  
13 ation and maintenance savings associated  
14 with systems modernized or replaced with  
15 the implementation of energy conservation  
16 measures, water conservation measures, or  
17 any combination of energy conservation  
18 measures and water conservation meas-  
19 ures.”.

20 (e) **MISCELLANEOUS AUTHORITY.**—Section  
21 801(a)(2) of the National Energy Conservation Policy Act  
22 (42 U.S.C. 8287(a)(2)) is amended by adding at the end  
23 the following:

24 “(H) **MISCELLANEOUS AUTHORITY.**—Not-  
25 withstanding any other provision of law, a Fed-

1           eral agency may sell or transfer energy savings  
2           and apply the proceeds of the sale or transfer  
3           to fund a contract under this title.”.

4           (f) PAYMENT OF COSTS.—Section 802 of the Na-  
5           tional Energy Conservation Policy Act (42 U.S.C. 8287a)  
6           is amended by striking “(and related operation and main-  
7           tenance expenses)” and inserting “, including related op-  
8           erations and maintenance expenses”.

9           (g) DEFINITION OF FEDERAL BUILDING.—Section  
10          551(6) of the National Energy Conservation Policy Act  
11          (42 U.S.C. 8259(6)) is amended by striking the semicolon  
12          at the end and inserting “the term does not include a dam,  
13          reservoir, or hydropower facility owned or operated by a  
14          Federal agency;”.

15          (h) DEFINITION OF ENERGY SAVINGS.—Section  
16          804(2) of the National Energy Conservation Policy Act  
17          (42 U.S.C. 8287c(2)) is amended—

18                 (1) in subparagraph (A), by striking “federally  
19                 owned building or buildings or other federally owned  
20                 facilities” and inserting “Federal building (as de-  
21                 fined in section 551)” each place it appears;

22                 (2) in subparagraph (C), by striking “; and”  
23                 and inserting a semicolon;

24                 (3) in subparagraph (D), by striking the period  
25                 at the end and inserting a semicolon; and

1 (4) by adding at the end the following:

2 “(E) the use, sale, or transfer of energy in-  
3 centives, rebates, or credits (including renew-  
4 able energy credits) from Federal, State, or  
5 local governments or utilities; and

6 “(F) any revenue generated from a reduc-  
7 tion in energy or water use, more efficient  
8 waste recycling, or additional energy generated  
9 from more efficient equipment.”.

10 **SEC. 1007. BUILDING TRAINING AND ASSESSMENT CEN-**  
11 **TERS.**

12 (a) IN GENERAL.—The Secretary shall provide  
13 grants to institutions of higher education (as defined in  
14 section 101 of the Higher Education Act of 1965 (20  
15 U.S.C. 1001)) and Tribal Colleges or Universities (as de-  
16 fined in section 316(b) of that Act (20 U.S.C. 1059c(b)))  
17 to establish building training and assessment centers—

18 (1) to identify opportunities for optimizing en-  
19 ergy efficiency and environmental performance in  
20 buildings;

21 (2) to promote the application of emerging con-  
22 cepts and technologies in commercial and institu-  
23 tional buildings;

24 (3) to train engineers, architects, building sci-  
25 entists, building energy permitting and enforcement

1 officials, and building technicians in energy-efficient  
2 design and operation;

3 (4) to assist institutions of higher education  
4 and Tribal Colleges or Universities in training build-  
5 ing technicians;

6 (5) to promote research and development for  
7 the use of alternative energy sources and distributed  
8 generation to supply heat and power for buildings,  
9 particularly energy-intensive buildings; and

10 (6) to coordinate with and assist State-accred-  
11 ited technical training centers, community colleges,  
12 Tribal Colleges or Universities, and local offices of  
13 the National Institute of Food and Agriculture and  
14 ensure appropriate services are provided under this  
15 section to each region of the United States.

16 (b) COORDINATION AND NONDUPLICATION.—

17 (1) IN GENERAL.—The Secretary shall coordi-  
18 nate the program with the industrial research and  
19 assessment centers program and with other Federal  
20 programs to avoid duplication of effort.

21 (2) COLLOCATION.—To the maximum extent  
22 practicable, building, training, and assessment cen-  
23 ters established under this section shall be collocated  
24 with Industrial Assessment Centers.

1 (c) AUTHORIZATION OF APPROPRIATIONS.—There is  
2 authorized to be appropriated to carry out this section  
3 \$10,000,000, to remain available until expended.

4 **SEC. 1008. CAREER SKILLS TRAINING.**

5 (a) IN GENERAL.—The Secretary shall pay grants to  
6 eligible entities described in subsection (b) to pay the Fed-  
7 eral share of associated career skills training programs  
8 under which students concurrently receive classroom in-  
9 struction and on-the-job training for the purpose of ob-  
10 taining an industry-related certification to install energy  
11 efficient buildings technologies, including technologies de-  
12 scribed in section 307(b)(3) of the Energy Conservation  
13 and Production Act (42 U.S.C. 6836(b)(3)).

14 (b) ELIGIBILITY.—To be eligible to obtain a grant  
15 under subsection (a), an entity shall be a nonprofit part-  
16 nership described in section 171(e)(2)(B)(ii) of the Work-  
17 force Investment Act of 1998 (29 U.S.C.  
18 2916(e)(2)(B)(ii)).

19 (c) FEDERAL SHARE.—The Federal share of the cost  
20 of carrying out a career skills training program described  
21 in subsection (a) shall be 50 percent.

22 (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
23 authorized to be appropriated to carry out this section  
24 \$10,000,000, to remain available until expended.

1 **SEC. 1009. ENERGY-EFFICIENT AND ENERGY-SAVING IN-**  
2 **FORMATION TECHNOLOGIES.**

3 Section 543 of the National Energy Conservation  
4 Policy Act (42 U.S.C. 8253) is amended by adding at the  
5 end the following:

6 “(h) FEDERAL IMPLEMENTATION STRATEGY FOR  
7 ENERGY-EFFICIENT AND ENERGY-SAVING INFORMATION  
8 TECHNOLOGIES.—

9 “(1) DEFINITIONS.—In this subsection:

10 “(A) DIRECTOR.—The term ‘Director’  
11 means the Director of the Office of Manage-  
12 ment and Budget.

13 “(B) INFORMATION TECHNOLOGY.—The  
14 term ‘information technology’ has the meaning  
15 given the term in section 11101 of title 40,  
16 United States Code.

17 “(2) DEVELOPMENT OF IMPLEMENTATION  
18 STRATEGY.—Not later than 1 year after the date of  
19 enactment of this subsection, each Federal agency  
20 shall collaborate with the Director to develop an im-  
21 plementation strategy (including best-practices and  
22 measurement and verification techniques) for the  
23 maintenance, purchase, and use by the Federal  
24 agency of energy-efficient and energy-saving infor-  
25 mation technologies.

1           “(3) ADMINISTRATION.—In developing an im-  
2           plementation strategy, each Federal agency shall  
3           consider—

4                   “(A) advanced metering infrastructure;

5                   “(B) energy efficient data center strategies  
6           and methods of increasing asset and infrastruc-  
7           ture utilization;

8                   “(C) advanced power management tools;

9                   “(D) building information modeling, in-  
10          cluding building energy management; and

11                  “(E) secure telework and travel substi-  
12          tution tools.

13          “(4) PERFORMANCE GOALS.—

14                  “(A) IN GENERAL.—Not later than Sep-  
15          tember 30, 2015, the Director, in consultation  
16          with the Secretary, shall establish performance  
17          goals for evaluating the efforts of Federal agen-  
18          cies in improving the maintenance, purchase,  
19          and use of energy-efficient and energy-saving  
20          information technology systems.

21                  “(B) BEST PRACTICES.—The Chief Infor-  
22          mation Officers Council established under sec-  
23          tion 3603 of title 44, United States Code, shall  
24          supplement the performance goals established  
25          under this paragraph with recommendations on

1 best practices for the attainment of the per-  
2 formance goals, to include a requirement for  
3 agencies to consider the use of—

4 “(i) energy savings performance con-  
5 tracting; and

6 “(ii) utility energy services con-  
7 tracting.

8 “(5) REPORTS.—

9 “(A) AGENCY REPORTS.—Each Federal  
10 agency subject to the requirements of this sub-  
11 section shall include in the report of the agency  
12 under section 527 of the Energy Independence  
13 and Security Act of 2007 (42 U.S.C. 17143) a  
14 description of the efforts and results of the  
15 agency under this subsection.

16 “(B) OMB GOVERNMENT EFFICIENCY RE-  
17 PORTS AND SCORECARDS.—Effective beginning  
18 not later than October 1, 2015, the Director  
19 shall include in the annual report and scorecard  
20 of the Director required under section 528 of  
21 the Energy Independence and Security Act of  
22 2007 (42 U.S.C. 17144) a description of the ef-  
23 forts and results of Federal agencies under this  
24 subsection.

1                   “(C) USE OF EXISTING REPORTING STRUC-  
2                   TURES.—The Director may require Federal  
3                   agencies to submit any information required to  
4                   be submitted under this subsection though re-  
5                   porting structures in use as of the date of en-  
6                   actment of the Energy Policy Modernization  
7                   Act of 2015.”.

8 **SEC. 1010. AVAILABILITY OF FUNDS FOR DESIGN UPDATES.**

9                   Section 3307 of title 40, United States Code, is  
10 amended—

11                   (1) by redesignating subsections (d) through (h)  
12                   as subsections (e) through (i), respectively; and

13                   (2) by inserting after subsection (c) the fol-  
14                   lowing:

15                   “(d) AVAILABILITY OF FUNDS FOR DESIGN UP-  
16 DATES.—

17                   “(1) IN GENERAL.—Subject to paragraph (2),  
18                   for any project for which congressional approval is  
19                   received under subsection (a) and for which the de-  
20                   sign has been substantially completed but construc-  
21                   tion has not begun, the Administrator of General  
22                   Services may use appropriated funds to update the  
23                   project design to meet applicable Federal building  
24                   energy efficiency standards established under section  
25                   305 of the Energy Conservation and Production Act

1 (42 U.S.C. 6834) and other requirements estab-  
2 lished under section 3312.

3 “(2) LIMITATION.—The use of funds under  
4 paragraph (1) shall not exceed 125 percent of the  
5 estimated energy or other cost savings associated  
6 with the updates as determined by a life cycle cost  
7 analysis under section 544 of the National Energy  
8 Conservation Policy Act (42 U.S.C. 8254).”.

9 **SEC. 1011. ENERGY EFFICIENT DATA CENTERS.**

10 Section 453 of the Energy Independence and Security  
11 Act of 2007 (42 U.S.C. 17112) is amended—

12 (1) in subsection (b)—

13 (A) in paragraph (2)(D)(iv), by striking  
14 “the organization” and inserting “an organiza-  
15 tion”; and

16 (B) by striking paragraph (3); and

17 (2) by striking subsections (e) through (g) and  
18 inserting the following:

19 “(c) STAKEHOLDER INVOLVEMENT.—

20 “(1) IN GENERAL.—The Secretary and the Ad-  
21 ministrator shall carry out subsection (b) in con-  
22 sultation with the information technology industry  
23 and other key stakeholders, with the goal of pro-  
24 ducing results that accurately reflect the best knowl-  
25 edge in the most pertinent domains.

1           “(2) CONSIDERATIONS.—In carrying out con-  
2           sultation described in paragraph (1), the Secretary  
3           and the Administrator shall pay particular attention  
4           to organizations that—

5                   “(A) have members with expertise in en-  
6                   ergy efficiency and in the development, oper-  
7                   ation, and functionality of data centers, infor-  
8                   mation technology equipment, and software, in-  
9                   cluding representatives of hardware manufac-  
10                  turers, data center operators, and facility man-  
11                  agers;

12                  “(B) obtain and address input from the  
13                  National Laboratories (as that term is defined  
14                  in section 2 of the Energy Policy Act of 2005  
15                  (42 U.S.C. 15801)) or any institution of higher  
16                  education, research institution, industry asso-  
17                  ciation, company, or public interest group with  
18                  applicable expertise;

19                  “(C) follow—

20                          “(i) commonly accepted procedures  
21                          for the development of specifications; and

22                          “(ii) accredited standards development  
23                          processes; or

1                   “(D) have a mission to promote energy ef-  
2                   ficiency for data centers and information tech-  
3                   nology.

4           “(d) MEASUREMENTS AND SPECIFICATIONS.—The  
5 Secretary and the Administrator shall consider and assess  
6 the adequacy of the specifications, measurements, and  
7 benchmarks described in subsection (b) for use by the  
8 Federal Energy Management Program, the Energy Star  
9 Program, and other efficiency programs of the Depart-  
10 ment of Energy or the Environmental Protection Agency.

11           “(e) STUDY.—The Secretary, in consultation with the  
12 Administrator, not later than 18 months after the date  
13 of enactment of the Energy Policy Modernization Act of  
14 2015, shall make available to the public an update to the  
15 report submitted to Congress pursuant to section 1 of the  
16 Act of December 20, 2006 (Public Law 109–431; 120  
17 Stat. 2920), entitled ‘Report to Congress on Server and  
18 Data Center Energy Efficiency’ and dated August 2,  
19 2007, that provides—

20                   “(1) a comparison and gap analysis of the esti-  
21                   mates and projections contained in the original re-  
22                   port with new data regarding the period from 2007  
23                   through 2014;

1           “(2) an analysis considering the impact of in-  
2           formation technologies, including virtualization and  
3           cloud computing, in the public and private sectors;

4           “(3) an evaluation of the impact of the com-  
5           bination of cloud platforms, mobile devices, social  
6           media, and big data on data center energy usage;

7           “(4) an evaluation of water usage in data cen-  
8           ters and recommendations for reductions in such  
9           water usage; and

10           “(5) updated projections and recommendations  
11           for best practices through fiscal year 2020.

12           “(f) DATA CENTER ENERGY PRACTITIONER PRO-  
13           GRAM.—

14           “(1) IN GENERAL.—The Secretary, in consulta-  
15           tion with key stakeholders and the Director of the  
16           Office of Management and Budget, shall maintain a  
17           data center energy practitioner program that pro-  
18           vides for the certification of energy practitioners  
19           qualified to evaluate the energy usage and efficiency  
20           opportunities in Federal data centers.

21           “(2) EVALUATIONS.—Each Federal agency  
22           shall consider having the data centers of the agency  
23           evaluated once every 4 years by energy practitioners  
24           certified pursuant to the program, whenever prac-

1        ticable using certified practitioners employed by the  
2        agency.

3        “(g) OPEN DATA INITIATIVE.—

4                “(1) IN GENERAL.—The Secretary, in consulta-  
5        tion with key stakeholders and the Director of the  
6        Office of Management and Budget, shall establish  
7        an open data initiative for Federal data center en-  
8        ergy usage data, with the purpose of making the  
9        data available and accessible in a manner that en-  
10       courages further data center innovation, optimiza-  
11       tion, and consolidation.

12               “(2) CONSIDERATION.—In establishing the ini-  
13       tiative under paragraph (1), the Secretary shall con-  
14       sider using the online Data Center Maturity Model.

15        “(h)    INTERNATIONAL    SPECIFICATIONS    AND  
16       METRICS.—The Secretary, in consultation with key stake-  
17       holders, shall actively participate in efforts to harmonize  
18       global specifications and metrics for data center energy  
19       and water efficiency.

20        “(i) DATA CENTER UTILIZATION METRIC.—The Sec-  
21       retary, in collaboration with key stakeholders, shall facili-  
22       tate in the development of an efficiency metric that meas-  
23       ures the energy efficiency of a data center (including  
24       equipment and facilities).

1           “(j) PROTECTION OF PROPRIETARY INFORMATION.—  
2 The Secretary and the Administrator shall not disclose  
3 any proprietary information or trade secrets provided by  
4 any individual or company for the purposes of carrying  
5 out this section or the programs and initiatives established  
6 under this section.”.

7 **SEC. 1012. WEATHERIZATION ASSISTANCE PROGRAM.**

8           (a) REAUTHORIZATION OF WEATHERIZATION AS-  
9 SISTANCE PROGRAM.—Section 422 of the Energy Con-  
10 servation and Production Act (42 U.S.C. 6872) is amend-  
11 ed by striking “appropriated—” and all that follows  
12 through the period at the end and inserting “appropriated  
13 \$350,000,000 for each of fiscal years 2016 through  
14 2020.”.

15           (b) GRANTS FOR NEW, SELF-SUSTAINING LOW-IN-  
16 COME, SINGLE-FAMILY AND MULTIFAMILY HOUSING EN-  
17 ERGY RETROFIT MODEL PROGRAMS TO ELIGIBLE  
18 MULTISTATE HOUSING AND ENERGY NONPROFIT ORGA-  
19 NIZATIONS.—The Energy Conservation and Production  
20 Act is amended by inserting after section 414B (42 U.S.C.  
21 6864b) the following:

1 **“SEC. 414C. GRANTS FOR NEW, SELF-SUSTAINING LOW-IN-**  
2 **COME, SINGLE-FAMILY AND MULTIFAMILY**  
3 **HOUSING ENERGY RETROFIT MODEL PRO-**  
4 **GRAMS TO ELIGIBLE MULTISTATE HOUSING**  
5 **AND ENERGY NONPROFIT ORGANIZATIONS.**

6 “(a) PURPOSES.—The purposes of this section are—

7 “(1) to expand the number of low-income, sin-  
8 gle-family and multifamily homes that receive energy  
9 efficiency retrofits;

10 “(2) to promote innovation and new models of  
11 retrofitting low-income homes through new Federal  
12 partnerships with covered organizations that lever-  
13 age substantial donations, donated materials, volun-  
14 teer labor, homeowner labor equity, and other pri-  
15 vate sector resources;

16 “(3) to assist the covered organizations in dem-  
17 onstrating, evaluating, improving, and replicating  
18 widely the model low-income energy retrofit pro-  
19 grams of the covered organizations; and

20 “(4) to ensure that the covered organizations  
21 make the energy retrofit programs of the covered or-  
22 ganizations self-sustaining by the time grant funds  
23 have been expended.

24 “(b) DEFINITIONS.—In this section:

25 “(1) COVERED ORGANIZATION.—The term ‘cov-  
26 ered organization’ means an organization that—

1           “(A) is described in section 501(c)(3) of  
2           the Internal Revenue Code of 1986 and exempt  
3           from taxation under 501(a) of that Code; and

4           “(B) has an established record of con-  
5           structing, renovating, repairing, or making en-  
6           ergy efficient a total of not less than 250  
7           owner-occupied, single-family or multifamily  
8           homes per year for low-income households, ei-  
9           ther directly or through affiliates, chapters, or  
10          other direct partners (using the most recent  
11          year for which data are available).

12          “(2) LOW-INCOME.—The term ‘low-income’  
13          means an income level that is not more than 200  
14          percent of the poverty level (as determined in ac-  
15          cordance with criteria established by the Director of  
16          the Office of Management and Budget) applicable to  
17          a family of the size involved, except that the Sec-  
18          retary may establish a higher or lower level if the  
19          Secretary determines that a higher or lower level is  
20          necessary to carry out this section.

21          “(3) WEATHERIZATION ASSISTANCE PROGRAM  
22          FOR LOW-INCOME PERSONS.—The term ‘Weatheriza-  
23          tion Assistance Program for Low-Income Persons’  
24          means the program established under this part (in-

1 including part 440 of title 10, Code of Federal Regu-  
2 lations, or successor regulations).

3 “(c) COMPETITIVE GRANT PROGRAM.—The Sec-  
4 retary shall make grants to covered organizations through  
5 a national competitive process for use in accordance with  
6 this section.

7 “(d) AWARD FACTORS.—In making grants under this  
8 section, the Secretary shall consider—

9 “(1) the number of low-income homes the appli-  
10 cant—

11 “(A) has built, renovated, repaired, or  
12 made more energy efficient as of the date of the  
13 application; and

14 “(B) can reasonably be projected to build,  
15 renovate, repair, or make energy efficient dur-  
16 ing the 10-year period beginning on the date of  
17 the application;

18 “(2) the qualifications, experience, and past  
19 performance of the applicant, including experience  
20 successfully managing and administering Federal  
21 funds;

22 “(3) the number and diversity of States and cli-  
23 mates in which the applicant works as of the date  
24 of the application;

1           “(4) the amount of non-Federal funds, donated  
2 or discounted materials, discounted or volunteer  
3 skilled labor, volunteer unskilled labor, homeowner  
4 labor equity, and other resources the applicant will  
5 provide;

6           “(5) the extent to which the applicant could  
7 successfully replicate the energy retrofit program of  
8 the applicant and sustain the program after the  
9 grant funds have been expended;

10           “(6) regional diversity;

11           “(7) urban, suburban, and rural localities; and

12           “(8) such other factors as the Secretary deter-  
13 mines to be appropriate.

14           “(e) APPLICATIONS.—

15           “(1) IN GENERAL.—Not later than 180 days  
16 after the date of enactment of this section, the Sec-  
17 retary shall request proposals from covered organiza-  
18 tions.

19           “(2) ADMINISTRATION.—To be eligible to re-  
20 ceive a grant under this section, an applicant shall  
21 submit to the Secretary an application at such time,  
22 in such manner, and containing such information as  
23 the Secretary may require.

1           “(3) AWARDS.—Not later than 90 days after  
2           the date of issuance of a request for proposals, the  
3           Secretary shall award grants under this section.

4           “(f) ELIGIBLE USES OF GRANT FUNDS.—A grant  
5           under this section may be used for—

6           “(1) energy efficiency audits, cost-effective ret-  
7           rofit, and related activities in different climatic re-  
8           gions of the United States;

9           “(2) energy efficiency materials and supplies;

10          “(3) organizational capacity—

11           “(A) to significantly increase the number  
12          of energy retrofits;

13           “(B) to replicate an energy retrofit pro-  
14          gram in other States; and

15           “(C) to ensure that the program is self-  
16          sustaining after the Federal grant funds are ex-  
17          pended;

18          “(4) energy efficiency, audit and retrofit train-  
19          ing, and ongoing technical assistance;

20          “(5) information to homeowners on proper  
21          maintenance and energy savings behaviors;

22          “(6) quality control and improvement;

23          “(7) data collection, measurement, and  
24          verification;

1           “(8) program monitoring, oversight, evaluation,  
2           and reporting;

3           “(9) management and administration (up to a  
4           maximum of 10 percent of the total grant);

5           “(10) labor and training activities; and

6           “(11) such other activities as the Secretary de-  
7           termines to be appropriate.

8           “(g) MAXIMUM AMOUNT.—

9           “(1) IN GENERAL.—The amount of a grant  
10          provided under this section shall not exceed—

11           “(A) if the amount made available to carry  
12          out this section for a fiscal year is  
13          \$225,000,000 or more, \$5,000,000; and

14           “(B) if the amount made available to carry  
15          out this section for a fiscal year is less than  
16          \$225,000,000, \$1,500,000.

17          “(2) TECHNICAL AND TRAINING ASSISTANCE.—

18          The total amount of a grant provided under this sec-  
19          tion shall be reduced by the cost of any technical  
20          and training assistance provided by the Secretary  
21          that relates to the grant.

22          “(h) GUIDELINES.—

23           “(1) IN GENERAL.—Not later than 90 days  
24          after the date of enactment of this section, the Sec-

1       retary shall issue guidelines to implement the grant  
2       program established under this section.

3               “(2) ADMINISTRATION.—The guidelines—

4                       “(A) shall not apply to the Weatherization  
5                       Assistance Program for Low-Income Persons,  
6                       in whole or major part; but

7                       “(B) may rely on applicable provisions of  
8                       law governing the Weatherization Assistance  
9                       Program for Low-Income Persons to estab-  
10                      lish—

11                      “(i) standards for allowable expendi-  
12                      tures;

13                      “(ii) a minimum savings-to-investment  
14                      ratio;

15                      “(iii) standards—

16                               “(I) to carry out training pro-  
17                               grams;

18                               “(II) to conduct energy audits  
19                               and program activities;

20                               “(III) to provide technical assist-  
21                               ance;

22                               “(IV) to monitor program activi-  
23                               ties; and

24                               “(V) to verify energy and cost  
25                               savings;

1                   “(iv) liability insurance requirements;

2                   and

3                   “(v) recordkeeping requirements,

4                   which shall include reporting to the Office

5                   of Weatherization and Intergovernmental

6                   Programs of the Department of Energy

7                   applicable data on each home retrofitted.

8           “(i) REVIEW AND EVALUATION.—The Secretary shall

9 review and evaluate the performance of any covered orga-

10 nization that receives a grant under this section (which

11 may include an audit), as determined by the Secretary.

12           “(j) COMPLIANCE WITH STATE AND LOCAL LAW.—

13 Nothing in this section or any program carried out using

14 a grant provided under this section supersedes or other-

15 wise affects any State or local law, to the extent that the

16 State or local law contains a requirement that is more

17 stringent than the applicable requirement of this section.

18           “(k) ANNUAL REPORTS.—The Secretary shall submit

19 to Congress annual reports that provide—

20                   “(1) findings;

21                   “(2) a description of energy and cost savings

22                   achieved and actions taken under this section; and

23                   “(3) any recommendations for further action.

24           “(l) FUNDING.—Of the amount of funds that are

25 made available to carry out the Weatherization Assistance

1 Program for each of fiscal years 2016 through 2020 under  
2 section 422, the Secretary shall use to carry out this sec-  
3 tion for each of fiscal years 2016 through 2020 not less  
4 than—

5 “(1) 2 percent of the amount if the amount is  
6 less than \$225,000,000;

7 “(2) 5 percent of the amount if the amount is  
8 \$225,000,000 or more but less than \$260,000,000;  
9 and

10 “(3) 10 percent of the amount if the amount is  
11 \$260,000,000 or more.”.

12 (c) STANDARDS PROGRAM.—Section 415 of the En-  
13 ergy Conservation and Production Act (42 U.S.C. 6865)  
14 is amended by adding at the end the following:

15 “(f) STANDARDS PROGRAM.—

16 “(1) CONTRACTOR QUALIFICATION.—Effective  
17 beginning January 1, 2016, to be eligible to carry  
18 out weatherization using funds made available under  
19 this part, a contractor shall be selected through a  
20 competitive bidding process and be—

21 “(A) accredited by the Building Perform-  
22 ance Institute;

23 “(B) an Energy Smart Home Performance  
24 Team accredited under the Residential Energy  
25 Services Network; or

1           “(C) accredited by an equivalent accredita-  
2           tion or program accreditation-based State cer-  
3           tification program approved by the Secretary.

4           “(2) GRANTS FOR ENERGY RETROFIT MODEL  
5           PROGRAMS.—

6           “(A) IN GENERAL.—To be eligible to re-  
7           ceive a grant under section 414C, a covered or-  
8           ganization (as defined in section 414C(b)) shall  
9           use a crew chief who—

10                   “(i) is certified or accredited in ac-  
11                   cordance with paragraph (1); and

12                   “(ii) supervises the work performed  
13                   with grant funds.

14           “(B) VOLUNTEER LABOR.—A volunteer  
15           who performs work for a covered organization  
16           that receives a grant under section 414C shall  
17           not be required to be certified under this sub-  
18           section if the volunteer is not directly installing  
19           or repairing mechanical equipment or other  
20           items that require skilled labor.

21           “(C) TRAINING.—The Secretary shall use  
22           training and technical assistance funds available  
23           to the Secretary to assist covered organizations  
24           under section 414C in providing training to ob-

1           tain certification required under this subsection,  
2           including provisional or temporary certification.

3           “(3) MINIMUM EFFICIENCY STANDARDS.—Ef-  
4           fective beginning October 1, 2016, the Secretary  
5           shall ensure that—

6                   “(A) each retrofit for which weatherization  
7                   assistance is provided under this part meets  
8                   minimum efficiency and quality of work stand-  
9                   ards established by the Secretary after weather-  
10                  ization of a dwelling unit;

11                   “(B) at least 10 percent of the dwelling  
12                   units are randomly inspected by a third party  
13                   accredited under this subsection to ensure com-  
14                   pliance with the minimum efficiency and quality  
15                   of work standards established under subpara-  
16                   graph (A); and

17                   “(C) the standards established under this  
18                   subsection meet or exceed the industry stand-  
19                   ards for home performance work that are in ef-  
20                   fect on the date of enactment of this subsection,  
21                   as determined by the Secretary.”.

22 **SEC. 1013. REAUTHORIZATION OF STATE ENERGY PRO-**  
23 **GRAM.**

24           Section 365(f) of the Energy Policy and Conservation  
25 Act (42 U.S.C. 6325(f)) is amended by striking

1 “\$125,000,000 for each of fiscal years 2007 through  
2 2012” and inserting “\$90,000,000 for each of fiscal years  
3 2016 through 2020, of which not greater than 5 percent  
4 may be used to provide competitively awarded financial as-  
5 sistance”.

6 **SEC. 1014. SMART BUILDING ACCELERATION.**

7 (a) DEFINITIONS.—In this section:

8 (1) PROGRAM.—The term “program” means  
9 the Federal Smart Building Program established  
10 under subsection (b)(1).

11 (2) SMART BUILDING.—The term “smart build-  
12 ing” means a building, or collection of buildings,  
13 with an energy system that—

14 (A) is flexible and automated;

15 (B) has extensive operational monitoring  
16 and communication connectivity, allowing re-  
17 mote monitoring and analysis of all building  
18 functions;

19 (C) takes a systems-based approach in in-  
20 tegrating the overall building operations for  
21 control of energy generation, consumption, and  
22 storage;

23 (D) communicates with utilities and other  
24 third-party commercial entities, if appropriate;  
25 and

1 (E) is cybersecure.

2 (3) SMART BUILDING ACCELERATOR.—The  
3 term “smart building accelerator” means an initia-  
4 tive that is designed to demonstrate specific innova-  
5 tive policies and approaches—

6 (A) with clear goals and a clear timeline;  
7 and

8 (B) that, on successful demonstration,  
9 would accelerate investment in energy effi-  
10 ciency.

11 (b) FEDERAL SMART BUILDING PROGRAM.—

12 (1) ESTABLISHMENT.—Not later than 1 year  
13 after the date of enactment of this Act, the Sec-  
14 retary shall establish a program to be known as the  
15 “Federal Smart Building Program”—

16 (A) to implement smart building tech-  
17 nology; and

18 (B) to demonstrate the costs and benefits  
19 of smart buildings.

20 (2) SELECTION.—

21 (A) IN GENERAL.—The Secretary shall co-  
22 ordinate the selection of not fewer than 1 build-  
23 ing from among each of several key Federal  
24 agencies, as described in paragraph (4), to com-  
25 pose an appropriately diverse set of smart

1 buildings based on size, type, and geographic lo-  
2 cation.

3 (B) INCLUSION OF COMMERCIALY OPER-  
4 ATED BUILDINGS.—In making selections under  
5 subparagraph (A), the Secretary may include  
6 buildings that are owned by the Federal Gov-  
7 ernment but are commercially operated.

8 (3) TARGETS.—Not later than 18 months after  
9 the date of enactment of this Act, the Secretary  
10 shall establish targets for the number of smart  
11 buildings to be commissioned and evaluated by key  
12 Federal agencies by 3 years and 6 years after the  
13 date of enactment of this Act.

14 (4) FEDERAL AGENCY DESCRIBED.—The key  
15 Federal agencies referred to in this subsection shall  
16 include buildings operated by—

17 (A) the Department of the Army;

18 (B) the Department of the Navy;

19 (C) the Department of the Air Force;

20 (D) the Department;

21 (E) the Department of the Interior;

22 (F) the Department of Veterans Affairs;

23 and

24 (G) the General Services Administration.

1           (5) REQUIREMENT.—In implementing the pro-  
2           gram, the Secretary shall leverage existing financing  
3           mechanisms including energy savings performance  
4           contracts, utility energy service contracts, and an-  
5           nual appropriations.

6           (6) EVALUATION.—Using the guidelines of the  
7           Federal Energy Management Program relating to  
8           whole-building evaluation, measurement, and  
9           verification, the Secretary shall evaluate the costs  
10          and benefits of the buildings selected under para-  
11          graph (2), including an identification of—

12                   (A) which advanced building tech-  
13                   nologies—

14                           (i) are most cost-effective; and

15                           (ii) show the most promise for—

16                                   (I) increasing building energy  
17                                   savings;

18                                   (II) increasing service perform-  
19                                   ance to building occupants;

20                                   (III) reducing environmental im-  
21                                   pacts; and

22                                   (IV) establishing cybersecurity;

23                                   and

24                           (B) any other information the Secretary  
25                           determines to be appropriate.

1           (7) AWARDS.—The Secretary may expand  
2 awards made under the Federal Energy Manage-  
3 ment Program and the Better Building Challenge to  
4 recognize specific agency achievements in accel-  
5 erating the adoption of smart building technologies.

6           (c) SURVEY OF PRIVATE SECTOR SMART BUILD-  
7 INGS.—

8           (1) SURVEY.—The Secretary shall conduct a  
9 survey of privately owned smart buildings through-  
10 out the United States, including commercial build-  
11 ings, laboratory facilities, hospitals, multifamily resi-  
12 dential buildings, and buildings owned by nonprofit  
13 organizations and institutions of higher education.

14           (2) SELECTION.—From among the smart build-  
15 ings surveyed under paragraph (1), the Secretary  
16 shall select not fewer than 1 building each from an  
17 appropriate range of building sizes, types, and geo-  
18 graphic locations.

19           (3) EVALUATION.—Using the guidelines of the  
20 Federal Energy Management Program relating to  
21 whole-building evaluation, measurement, and  
22 verification, the Secretary shall evaluate the costs  
23 and benefits of the buildings selected under para-  
24 graph (2), including an identification of—

1 (A) which advanced building technologies  
2 and systems—

3 (i) are most cost-effective; and

4 (ii) show the most promise for—

5 (I) increasing building energy  
6 savings;

7 (II) increasing service perform-  
8 ance to building occupants;

9 (III) reducing environmental im-  
10 pacts; and

11 (IV) establishing cybersecurity;  
12 and

13 (B) any other information the Secretary  
14 determines to be appropriate.

15 (d) LEVERAGING EXISTING PROGRAMS.—

16 (1) BETTER BUILDING CHALLENGE.—As part  
17 of the Better Building Challenge of the Department,  
18 the Secretary, in consultation with major private  
19 sector property owners, shall develop smart building  
20 accelerators to demonstrate innovative policies and  
21 approaches that will accelerate the transition to  
22 smart buildings in the public, institutional, and com-  
23 mercial buildings sectors.

24 (2) RESEARCH AND DEVELOPMENT.—

1           (A) IN GENERAL.—The Secretary shall  
2           conduct research and development to address  
3           key barriers to the integration of advanced  
4           building technologies and to accelerate the tran-  
5           sition to smart buildings.

6           (B) INCLUSION.—The research and devel-  
7           opment conducted under subparagraph (A)  
8           shall include research and development on—

9                   (i) achieving whole-building, systems-  
10                  level efficiency through smart system and  
11                  component integration;

12                  (ii) improving physical components,  
13                  such as sensors and controls, to be adapt-  
14                  ive, anticipatory, and networked;

15                  (iii) reducing the cost of key compo-  
16                  nents to accelerate the adoption of smart  
17                  building technologies;

18                  (iv) data management, including the  
19                  capture and analysis of data and the inter-  
20                  operability of the energy systems;

21                  (v) protecting against cybersecurity  
22                  threats and addressing security  
23                  vulnerabilities of building systems or  
24                  equipment;

1 (vi) business models, including how  
2 business models may limit the adoption of  
3 smart building technologies and how to  
4 support transactive energy;

5 (vii) integration and application of  
6 combined heat and power systems and en-  
7 ergy storage for resiliency;

8 (viii) characterization of buildings and  
9 components;

10 (ix) consumer and utility protections;

11 (x) continuous management, including  
12 the challenges of managing multiple energy  
13 systems and optimizing systems for dis-  
14 parate stakeholders; and

15 (xi) other areas of research and devel-  
16 opment, as determined appropriate by the  
17 Secretary.

18 (e) REPORT.—Not later than 2 years after the date  
19 of enactment of this Act, and every 2 years thereafter until  
20 a total of 3 reports have been made, the Secretary shall  
21 submit to the Committee on Energy and Natural Re-  
22 sources of the Senate and the Committee on Energy and  
23 Commerce of the House of Representatives a report on—

1           (1) the establishment of the Federal Smart  
2           Building Program and the evaluation of Federal  
3           smart buildings under subsection (b);

4           (2) the survey and evaluation of private sector  
5           smart buildings under subsection (c); and

6           (3) any recommendations of the Secretary to  
7           further accelerate the transition to smart buildings.

8   **SEC. 1015. REPEAL OF FOSSIL PHASE-OUT.**

9           Section 305(a)(3) of the Energy Conservation and  
10          Production Act (42 U.S.C. 6834(a)(3)) is amended by  
11          striking subparagraph (D).

12   **SEC. 1016. FEDERAL BUILDING ENERGY EFFICIENCY PER-**  
13                           **FORMANCE STANDARDS.**

14          (a) DEFINITIONS.—Section 303 of the Energy Con-  
15          servation and Production Act (42 U.S.C. 6832) (as  
16          amended by section 1001(a)) is amended—

17               (1) in paragraph (6), by striking “to be con-  
18               structed” and inserting “constructed or altered”;

19               and

20               (2) by adding at the end the following:

21                   “(19) MAJOR RENOVATION.—The term ‘major  
22                   renovation’ means a modification of building energy  
23                   systems sufficiently extensive that the whole building  
24                   can meet energy standards for new buildings, based

1 on criteria to be established by the Secretary  
2 through notice and comment rulemaking.”.

3 (b) FEDERAL BUILDING EFFICIENCY STANDARDS.—

4 Section 305(a)(3) of the Energy Conservation and Pro-  
5 duction Act (42 U.S.C. 6834(a)(3)) (as amended by sec-  
6 tion 1015) is amended—

7 (1) by striking “(3)(A) Not later than” and all  
8 that follows through subparagraph (B) and inserting  
9 the following:

10 “(3) REVISED FEDERAL BUILDING ENERGY EF-  
11 FICIENCY PERFORMANCE STANDARDS.—

12 “(A) REVISED FEDERAL BUILDING EN-  
13 ERGY EFFICIENCY PERFORMANCE STAND-  
14 ARDS.—

15 “(i) IN GENERAL.—Not later than 1  
16 year after the date of enactment of the En-  
17 ergy Policy Modernization Act of 2015, the  
18 Secretary shall establish, by rule, revised  
19 Federal building energy efficiency perform-  
20 ance standards that require that—

21 “(I) new Federal buildings and  
22 alterations and additions to existing  
23 Federal buildings—

24 “(aa) meet or exceed the  
25 most recent revision of the Inter-

1 national Energy Conservation  
2 Code (in the case of residential  
3 buildings) or ASHRAE Standard  
4 90.1 (in the case of commercial  
5 buildings) as of the date of en-  
6 actment of the Energy Policy  
7 Modernization Act of 2015; and

8 “(bb) meet or exceed the en-  
9 ergy provisions of State and local  
10 building codes applicable to the  
11 building, if the codes are more  
12 stringent than the International  
13 Energy Conservation Code or  
14 ASHRAE Standard 90.1, as ap-  
15 plicable;

16 “(II) unless demonstrated not to  
17 be life-cycle cost effective for new  
18 Federal buildings and Federal build-  
19 ings with major renovations—

20 “(aa) the buildings be de-  
21 signed to achieve energy con-  
22 sumption levels that are at least  
23 30 percent below the levels estab-  
24 lished in the version of the  
25 ASHRAE Standard or the Inter-

1 national Energy Conservation  
2 Code, as appropriate, that is ap-  
3 plied under subelause (I)(aa), in-  
4 cluding updates under subpara-  
5 graph (B); and

6 “(bb) sustainable design  
7 principles are applied to the loca-  
8 tion, siting, design, and construc-  
9 tion of all new Federal buildings  
10 and replacement Federal build-  
11 ings;

12 “(III) if water is used to achieve  
13 energy efficiency, water conservation  
14 technologies shall be applied to the ex-  
15 tent that the technologies are life-  
16 cycle cost effective; and

17 “(IV) if life-cycle cost effective,  
18 as compared to other reasonably avail-  
19 able technologies, not less than 30  
20 percent of the hot water demand for  
21 each new Federal building or Federal  
22 building undergoing a major renova-  
23 tion be met through the installation  
24 and use of solar hot water heaters.

1                   “(ii) LIMITATION.—Clause (i)(I) shall  
2                   not apply to unaltered portions of existing  
3                   Federal buildings and systems that have  
4                   been added to or altered.

5                   “(B) UPDATES.—Not later than 1 year  
6                   after the date of approval of each subsequent  
7                   revision of the ASHRAE Standard or the Inter-  
8                   national Energy Conservation Code, as appro-  
9                   priate, the Secretary shall determine whether  
10                  the revised standards established under sub-  
11                  paragraph (A) should be updated to reflect the  
12                  revisions, based on the energy savings and life-  
13                  cycle cost-effectiveness of the revisions.”; and

14                  (2) in subparagraph (C), by striking “(C) In  
15                  the budget request” and inserting the following:

16                         “(C) BUDGET REQUEST.—In the budget  
17                         request”.

18 **SEC. 1017. CODIFICATION OF EXECUTIVE ORDER.**

19                  Beginning in fiscal year 2016 and each fiscal year  
20                  thereafter through fiscal year 2025, the head of each Fed-  
21                  eral agency shall, unless otherwise specified and where  
22                  life-cycle cost-effective, promote building energy conserva-  
23                  tion, efficiency, and management by reducing, in Federal  
24                  buildings of the agency, building energy intensity, as  
25                  measured in British thermal units per gross square foot,

1 by 2.5 percent each fiscal year, relative to the baseline  
2 of the building energy use of the applicable Federal build-  
3 ings in fiscal year 2015 and after taking into account the  
4 progress of the Federal agency in preceding fiscal years.

5 **SEC. 1018. CERTIFICATION FOR GREEN BUILDINGS.**

6 Section 305 of the Energy Conservation and Produc-  
7 tion Act (42 U.S.C. 6834) (as amended by sections 1015  
8 and 1016(b)) is amended—

9 (1) in subsection (a)(3), by adding at the end  
10 the following:

11 “(D) CERTIFICATION FOR GREEN BUILD-  
12 INGS.—

13 “(i) SUSTAINABLE DESIGN PRIN-  
14 CIPLES.—Sustainable design principles  
15 shall be applied to the siting, design, and  
16 construction of buildings covered by this  
17 subparagraph.

18 “(ii) SELECTION OF CERTIFICATION  
19 SYSTEMS.—The Secretary, after reviewing  
20 the findings of the Federal Director under  
21 section 436(h) of the Energy Independence  
22 and Security Act of 2007 (42 U.S.C.  
23 17092(h)), in consultation with the Admin-  
24 istrator of General Services, and in con-  
25 sultation with the Secretary of Defense re-

1           lating to those facilities under the custody  
2           and control of the Department of Defense,  
3           shall determine those certification systems  
4           for green commercial and residential build-  
5           ings that the Secretary determines to be  
6           the most likely to encourage a comprehen-  
7           sive and environmentally sound approach  
8           to certification of green buildings.

9           “(iii) BASIS FOR SELECTION.—The  
10          determination of the certification systems  
11          under clause (ii) shall be based on ongoing  
12          review of the findings of the Federal Direc-  
13          tor under section 436(h) of the Energy  
14          Independence and Security Act of 2007  
15          (42 U.S.C. 17092(h)) and the criteria de-  
16          scribed in clause (v).

17          “(iv) ADMINISTRATION.—In deter-  
18          mining certification systems under this  
19          subparagraph, the Secretary shall—

20                 “(I) make a separate determina-  
21                 tion for all or part of each system;

22                 “(II) confirm that the criteria  
23                 used to support the selection of build-  
24                 ing products, materials, brands, and  
25                 technologies—

1                   “(aa) are fair and neutral  
2                   (meaning that the criteria are  
3                   based on an objective assessment  
4                   of relevant technical data);

5                   “(bb) do not prohibit, dis-  
6                   favor, or discriminate against se-  
7                   lection based on technically inad-  
8                   equate information to inform  
9                   human or environmental risk;  
10                  and

11                  “(cc) are expressed to prefer  
12                  performance measures whenever  
13                  performance measures may rea-  
14                  sonably be used in lieu of pre-  
15                  scriptive measures; and

16                  “(III) use environmental and  
17                  health criteria that are based on risk  
18                  assessment methodology that is gen-  
19                  erally accepted by the applicable sci-  
20                  entific disciplines.

21                  “(v) CONSIDERATIONS.—In deter-  
22                  mining the green building certification sys-  
23                  tems under this subparagraph, the Sec-  
24                  retary shall take into consideration—

1                   “(I) the ability and availability of  
2 assessors and auditors to independ-  
3 ently verify the criteria and measure-  
4 ment of metrics at the scale necessary  
5 to implement this subparagraph;

6                   “(II) the ability of the applicable  
7 certification organization to collect  
8 and reflect public comment;

9                   “(III) the ability of the standard  
10 to be developed and revised through a  
11 consensus-based process;

12                   “(IV) an evaluation of the  
13 robustness of the criteria for a high-  
14 performance green building, which  
15 shall give credit for promoting—

16                   “(aa) efficient and sustain-  
17 able use of water, energy, and  
18 other natural resources;

19                   “(bb) the use of renewable  
20 energy sources;

21                   “(cc) improved indoor envi-  
22 ronmental quality through en-  
23 hanced indoor air quality, ther-  
24 mal comfort, acoustics, day light-  
25 ing, pollutant source control, and

1 use of low-emission materials and  
2 building system controls; and

3 “(dd) such other criteria as  
4 the Secretary determines to be  
5 appropriate; and

6 “(V) national recognition within  
7 the building industry.

8 “(vi) REVIEW.—The Secretary, in  
9 consultation with the Administrator of  
10 General Services and the Secretary of De-  
11 fense, shall conduct an ongoing review to  
12 evaluate and compare private sector green  
13 building certification systems, taking into  
14 account—

15 “(I) the criteria described in  
16 clause (v); and

17 “(II) the identification made by  
18 the Federal Director under section  
19 436(h) of the Energy Independence  
20 and Security Act of 2007 (42 U.S.C.  
21 17092(h)).

22 “(vii) EXCLUSIONS.—

23 “(I) IN GENERAL.—Subject to  
24 subclause (II), if a certification sys-  
25 tem fails to meet the review require-

1                   ments of clause (v), the Secretary  
2 shall—

3                   “(aa) identify the portions  
4                   of the system, whether pre-  
5                   requisites, credits, points, or oth-  
6                   erwise, that meet the review cri-  
7                   teria of clause (v);

8                   “(bb) determine the portions  
9                   of the system that are suitable  
10                  for use; and

11                  “(cc) exclude all other por-  
12                  tions of the system from identi-  
13                  fication and use.

14                  “(II) ENTIRE SYSTEMS.—The  
15                  Secretary shall exclude an entire sys-  
16                  tem from use if an exclusion under  
17                  subclause (I)—

18                  “(aa) impedes the integrated  
19                  use of the system;

20                  “(bb) creates disparate re-  
21                  view criteria or unequal point ac-  
22                  cess for competing materials; or

23                  “(cc) increases agency costs  
24                  of the use.

1                   “(viii) INTERNAL CERTIFICATION  
2 PROCESSES.—The Secretary may by rule  
3 allow Federal agencies to develop internal  
4 certification processes, using certified pro-  
5 fessionals, in lieu of certification by certifi-  
6 cation entities identified under clause (ii).

7                   “(ix) PRIVATIZED MILITARY HOUS-  
8 ING.—With respect to privatized military  
9 housing, the Secretary of Defense, after  
10 consultation with the Secretary may,  
11 through rulemaking, develop alternative  
12 certification systems and levels than the  
13 systems and levels identified under clause  
14 (ii) that achieve an equivalent result in  
15 terms of energy savings, sustainable de-  
16 sign, and green building performance.

17                   “(x) WATER CONSERVATION TECH-  
18 NOLOGIES.—In addition to any use of  
19 water conservation technologies otherwise  
20 required by this section, water conservation  
21 technologies shall be applied to the extent  
22 that the technologies are life-cycle cost-ef-  
23 fective.

24                   “(xi) EFFECTIVE DATE.—

1                   “(I) DETERMINATIONS MADE  
2 AFTER DECEMBER 31, 2015.—This  
3 subparagraph shall apply to any de-  
4 termination made by a Federal agency  
5 after December 31, 2015.

6                   “(II) DETERMINATIONS MADE ON  
7 OR BEFORE DECEMBER 31, 2015.—  
8 This subparagraph (as in effect on the  
9 day before the date of enactment of  
10 the Energy Policy Modernization Act  
11 of 2015) shall apply to any use of a  
12 certification system for green commer-  
13 cial and residential buildings by a  
14 Federal agency on or before December  
15 31, 2015.”; and

16                   (2) by striking subsections (c) and (d) and in-  
17 serting the following:

18                   “(c) PERIODIC REVIEW.—The Secretary shall—

19                   “(1) once every 5 years, review the Federal  
20 building energy standards established under this sec-  
21 tion; and

22                   “(2) on completion of a review under paragraph  
23 (1), if the Secretary determines that significant en-  
24 ergy savings would result, upgrade the standards to  
25 include all new energy efficiency and renewable en-

1 energy measures that are technologically feasible and  
2 economically justified.”.

3 **SEC. 1019. HIGH PERFORMANCE GREEN FEDERAL BUILD-**  
4 **INGS.**

5 Section 436(h) of the Energy Independence and Se-  
6 curity Act of 2007 (42 U.S.C. 17092(h)) is amended—

7 (1) in the subsection heading, by striking “SYS-  
8 TEM” and inserting “SYSTEMS”;

9 (2) by striking paragraph (1) and inserting the  
10 following:

11 “(1) IN GENERAL.—Based on an ongoing re-  
12 view, the Federal Director shall identify and shall  
13 provide to the Secretary pursuant to section  
14 305(a)(3)(D) of the Energy Conservation and Pro-  
15 duction Act (42 U.S.C. 6834(a)(3)(D)), a list of  
16 those certification systems that the Director identi-  
17 fies as the most likely to encourage a comprehensive  
18 and environmentally sound approach to certification  
19 of green buildings.”; and

20 (3) in paragraph (2)—

21 (A) in the matter preceding subparagraph  
22 (A), by striking “system” and inserting “sys-  
23 tems”;

24 (B) by striking subparagraph (A) and in-  
25 serting the following:

1           “(A) an ongoing review provided to the  
2 Secretary pursuant to section 305(a)(3)(D) of  
3 the Energy Conservation and Production Act  
4 (42 U.S.C. 6834(a)(3)(D)), which shall—

5                   “(i) be carried out by the Federal Di-  
6 rector to compare and evaluate standards;  
7 and

8                   “(ii) allow any developer or adminis-  
9 trator of a rating system or certification  
10 system to be included in the review;”;

11           (C) in subparagraph (E)(v), by striking  
12 “and” after the semicolon at the end;

13           (D) in subparagraph (F), by striking the  
14 period at the end and inserting a semicolon;  
15 and

16           (E) by adding at the end the following:

17                   “(G) a finding that, for all credits address-  
18 ing grown, harvested, or mined materials, the  
19 system does not discriminate against the use of  
20 domestic products that have obtained certifi-  
21 cations of responsible sourcing; and

22                   “(H) a finding that the system incor-  
23 porates life-cycle assessment as a credit path-  
24 way.”.

1 **SEC. 1020. EVALUATION OF POTENTIALLY DUPLICATIVE**  
2 **GREEN BUILDING PROGRAMS WITHIN DE-**  
3 **PARTMENT OF ENERGY.**

4 (a) DEFINITIONS.—In this section:

5 (1) ADMINISTRATIVE EXPENSES.—

6 (A) IN GENERAL.—The term “administra-  
7 tive expenses” has the meaning given the term  
8 by the Director of the Office of Management  
9 and Budget under section 504(b)(2) of the En-  
10 ergy and Water Development and Related  
11 Agencies Appropriations Act, 2010 (31 U.S.C.  
12 1105 note; Public Law 111–85).

13 (B) INCLUSIONS.—The term “administra-  
14 tive expenses” includes, with respect to an  
15 agency—

16 (i) costs incurred by—

17 (I) the agency; or

18 (II) any grantee, subgrantee, or  
19 other recipient of funds from a grant  
20 program or other program adminis-  
21 tered by the agency; and

22 (ii) expenses relating to personnel sal-  
23 aries and benefits, property management,  
24 travel, program management, promotion,  
25 reviews and audits, case management, and  
26 communication regarding, promotion of,

1                   and outreach for programs and program  
2                   activities administered by the agency.

3                   (2) APPLICABLE PROGRAM.—The term “appli-  
4                   cable program” means any program that is—

5                   (A) listed in Table 9 (pages 348–350) of  
6                   the report of the Government Accountability  
7                   Office entitled “2012 Annual Report: Opportu-  
8                   nities to Reduce Duplication, Overlap and  
9                   Fragmentation, Achieve Savings, and Enhance  
10                  Revenue”; and

11                  (B) administered by the Secretary.

12                  (3) SERVICE.—

13                  (A) IN GENERAL.—Subject to subpara-  
14                  graph (B), the term “service” has the meaning  
15                  given the term by the Director of the Office of  
16                  Management and Budget.

17                  (B) REQUIREMENTS.—For purposes of  
18                  subparagraph (A), the term “service” shall be  
19                  limited to activities, assistance, or other aid  
20                  that provides a direct benefit to a recipient,  
21                  such as—

22                         (i) the provision of technical assist-  
23                         ance;

24                         (ii) assistance for housing or tuition;

25                         or

1                   (iii) financial support (including  
2                   grants, loans, tax credits, and tax deduc-  
3                   tions).

4           (b) REPORT.—

5           (1) IN GENERAL.—Not later than January 1,  
6           2016, the Secretary shall submit to Congress and  
7           make available on the public Internet website of the  
8           Department a report that describes the applicable  
9           programs.

10          (2) REQUIREMENTS.—In preparing the report  
11          under paragraph (1), the Secretary shall—

12               (A) determine the approximate annual  
13               total administrative expenses of each applicable  
14               program;

15               (B) determine the approximate annual ex-  
16               penditures for services for each applicable pro-  
17               gram;

18               (C) describe the intended market for each  
19               applicable program, including the—

20                   (i) estimated the number of clients  
21                   served by each applicable program; and

22                   (ii) beneficiaries who received services  
23                   or information under the applicable pro-  
24                   gram (if applicable and if data is readily  
25                   available);

1 (D) estimate—

2 (i) the number of full-time employees  
3 who administer each applicable program;  
4 and

5 (ii) the number of full-time equiva-  
6 lents (the salary of whom is paid in part  
7 or full by the Federal Government through  
8 a grant or contract, a subaward of a grant  
9 or contract, a cooperative agreement, or  
10 another form of financial award or assist-  
11 ance) who assist in administering the ap-  
12 plicable program;

13 (E) briefly describe the type of services  
14 each applicable program provides, such as infor-  
15 mation, grants, technical assistance, loans, tax  
16 credits, or tax deductions;

17 (F) identify the type of recipient who is in-  
18 tended to benefit from the services or informa-  
19 tion provided under the applicable program,  
20 such as individual property owners or renters,  
21 local governments, businesses, nonprofit organi-  
22 zations, or State governments; and

23 (G) identify whether written program goals  
24 are available for each applicable program.

1 (c) RECOMMENDATIONS.—Not later than January 1,  
2 2016, the Secretary shall submit to Congress a report that  
3 includes—

4 (1) a recommendation of whether any applicable  
5 program should be eliminated or consolidated, in-  
6 cluding any legislative changes that would be nec-  
7 essary to eliminate or consolidate applicable pro-  
8 grams; and

9 (2) methods to improve the applicable programs  
10 by establishing program goals or increasing collabo-  
11 ration to reduce any potential overlap or duplication,  
12 taking into account—

13 (A) the 2011 report of the Government Ac-  
14 countability Office entitled “Federal Initiatives  
15 for the NonFederal Sector Could Benefit from  
16 More Interagency Collaboration”; and

17 (B) the report of the Government Account-  
18 ability Office entitled “2012 Annual Report:  
19 Opportunities to Reduce Duplication, Overlap  
20 and Fragmentation, Achieve Savings, and En-  
21 hance Revenue”.

22 (d) ANALYSES.—Not later than January 1, 2016, the  
23 Secretary shall identify—

24 (1) which applicable programs were specifically  
25 authorized by Congress; and

1           (2) which applicable programs are carried out  
2           solely under the discretionary authority of the Sec-  
3           retary.

4 **SEC. 1021. STUDY AND REPORT ON ENERGY SAVINGS BENE-**  
5 **FITS OF OPERATIONAL EFFICIENCY PRO-**  
6 **GRAMS AND SERVICES.**

7           (a) DEFINITION OF OPERATIONAL EFFICIENCY PRO-  
8 GRAMS AND SERVICES.—In this section, the term “oper-  
9 ational efficiency programs and services” means programs  
10 and services that use information and communications  
11 technologies (including computer hardware, energy effi-  
12 ciency software, and power management tools) to operate  
13 buildings and equipment in the optimum manner at the  
14 optimum times.

15           (b) STUDY AND REPORT.—Not later than 1 year  
16 after the date of enactment of this Act, the Secretary shall  
17 conduct a study and issue a report that quantifies the po-  
18 tential energy savings of operational efficiency programs  
19 and services for commercial, institutional, industrial, and  
20 governmental entities, including Federal agencies.

21           (c) MEASUREMENT AND VERIFICATION OF ENERGY  
22 SAVINGS.—The report required under this section shall in-  
23 clude potential methodologies or protocols for utilities,  
24 utility regulators, and Federal agencies to evaluate, meas-

1 ure, and verify energy savings from operational efficiency  
2 programs and services.

### 3 **Subtitle B—Appliances**

#### 4 **SEC. 1101. EXTENDED PRODUCT SYSTEM REBATE PRO-** 5 **GRAM.**

6 (a) DEFINITIONS.—In this section:

7 (1) ELECTRIC MOTOR.—The term “electric  
8 motor” has the meaning given the term in section  
9 431.12 of title 10, Code of Federal Regulations (as  
10 in effect on the date of enactment of this Act).

11 (2) ELECTRONIC CONTROL.—The term “elec-  
12 tronic control” means—

13 (A) a power converter; or

14 (B) a combination of a power circuit and  
15 control circuit included on 1 chassis.

16 (3) EXTENDED PRODUCT SYSTEM.—The term  
17 “extended product system” means an electric motor  
18 and any required associated electronic control and  
19 driven load that—

20 (A) offers variable speed or multispeed op-  
21 eration;

22 (B) offers partial load control that reduces  
23 input energy requirements (as measured in kilo-  
24 watt-hours) as compared to identified base lev-  
25 els set by the Secretary; and

1 (C)(i) has greater than 1 horsepower; and

2 (ii) uses an extended product system tech-

3 nology, as determined by the Secretary.

4 (4) QUALIFIED EXTENDED PRODUCT SYS-

5 TEM.—

6 (A) IN GENERAL.—The term “qualified ex-

7 tended product system” means an extended

8 product system that—

9 (i) includes an electric motor and an

10 electronic control; and

11 (ii) reduces the input energy (as

12 measured in kilowatt-hours) required to

13 operate the extended product system by

14 not less than 5 percent, as compared to

15 identified base levels set by the Secretary.

16 (B) INCLUSIONS.—The term “qualified ex-

17 tended product system” includes commercial or

18 industrial machinery or equipment that—

19 (i)(I) did not previously make use of

20 the extended product system prior to the

21 redesign described in subclause (II); and

22 (II) incorporates an extended product

23 system that has greater than 1 horsepower

24 into redesigned machinery or equipment;

25 and

1                   (ii) was previously used prior to, and  
2                   was placed back into service during, cal-  
3                   endar year 2016 or 2017.

4           (b) ESTABLISHMENT.—Not later than 180 days after  
5 the date of enactment of this Act, the Secretary shall es-  
6 tablish a program to provide rebates for expenditures  
7 made by qualified entities for the purchase or installation  
8 of a qualified extended product system.

9           (c) QUALIFIED ENTITIES.—

10           (1) ELIGIBILITY REQUIREMENTS.—A qualified  
11 entity under this section shall be—

12                   (A) in the case of a qualified extended  
13 product system described in subsection  
14 (a)(4)(A), the purchaser of the qualified ex-  
15 tended product that is installed; and

16                   (B) in the case of a qualified extended  
17 product system described in subsection  
18 (a)(4)(B), the manufacturer of the commercial  
19 or industrial machinery or equipment that in-  
20 corporated the extended product system into  
21 that machinery or equipment.

22           (2) APPLICATION.—To be eligible to receive a  
23 rebate under this section, a qualified entity shall  
24 submit to the Secretary—

1 (A) an application in such form, at such  
2 time, and containing such information as the  
3 Secretary may require; and

4 (B) a certification that includes dem-  
5 onstrated evidence—

6 (i) that the entity is a qualified entity;

7 and

8 (ii)(I) in the case of a qualified entity  
9 described in paragraph (1)(A)—

10 (aa) that the qualified entity in-  
11 stalled the qualified extended product  
12 system during the 2 fiscal years fol-  
13 lowing the date of enactment of this  
14 Act;

15 (bb) that the qualified extended  
16 product system meets the require-  
17 ments of subsection (a)(4)(A); and

18 (cc) showing the serial number,  
19 manufacturer, and model number  
20 from the nameplate of the installed  
21 motor of the qualified entity on which  
22 the qualified extended product system  
23 was installed; or

1 (II) in the case of a qualified entity  
2 described in paragraph (1)(B), dem-  
3 onstrated evidence—

4 (aa) that the qualified extended  
5 product system meets the require-  
6 ments of subsection (a)(4)(B); and

7 (bb) showing the serial number,  
8 manufacturer, and model number  
9 from the nameplate of the installed  
10 motor of the qualified entity with  
11 which the extended product system is  
12 integrated.

13 (d) AUTHORIZED AMOUNT OF REBATE.—

14 (1) IN GENERAL.—The Secretary may provide  
15 to a qualified entity a rebate in an amount equal to  
16 the product obtained by multiplying—

17 (A) an amount equal to the sum of the  
18 nameplate rated horsepower of—

19 (i) the electric motor to which the  
20 qualified extended product system is at-  
21 tached; and

22 (ii) the electronic control; and

23 (B) \$25.

24 (2) MAXIMUM AGGREGATE AMOUNT.—A quali-  
25 fied entity shall not be entitled to aggregate rebates

1 under this section in excess of \$25,000 per calendar  
2 year.

3 (e) AUTHORIZATION OF APPROPRIATIONS.—There is  
4 authorized to be appropriated to carry out this section  
5 \$5,000,000 for each of the first 2 full fiscal years following  
6 the date of enactment of this Act, to remain available until  
7 expended.

8 **SEC. 1102. ENERGY EFFICIENT TRANSFORMER REBATE**  
9 **PROGRAM.**

10 (a) DEFINITIONS.—In this section:

11 (1) QUALIFIED ENERGY EFFICIENT TRANS-  
12 FORMER.—The term “qualified energy efficient  
13 transformer” means a transformer that meets or ex-  
14 ceeds the applicable energy conservation standards  
15 described in the tables in subsection (b)(2) and  
16 paragraphs (1) and (2) of subsection (c) of section  
17 431.196 of title 10, Code of Federal Regulations (as  
18 in effect on the date of enactment of this Act).

19 (2) QUALIFIED ENERGY INEFFICIENT TRANS-  
20 FORMER.—The term “qualified energy inefficient  
21 transformer” means a transformer with an equal  
22 number of phases and capacity to a transformer de-  
23 scribed in any of the tables in subsection (b)(2) and  
24 paragraphs (1) and (2) of subsection (c) of section  
25 431.196 of title 10, Code of Federal Regulations (as

1 in effect on the date of enactment of this Act)  
2 that—

3 (A) does not meet or exceed the applicable  
4 energy conservation standards described in  
5 paragraph (1); and

6 (B)(i) was manufactured between January  
7 1, 1985, and December 31, 2006, for a trans-  
8 former with an equal number of phases and ca-  
9 pacity as a transformer described in the table  
10 in subsection (b)(2) of section 431.196 of title  
11 10, Code of Federal Regulations (as in effect on  
12 the date of enactment of this Act); or

13 (ii) was manufactured between January 1,  
14 1990, and December 31, 2009, for a trans-  
15 former with an equal number of phases and ca-  
16 pacity as a transformer described in the table  
17 in paragraph (1) or (2) of subsection (c) of that  
18 section (as in effect on the date of enactment  
19 of this Act).

20 (3) QUALIFIED ENTITY.—The term “qualified  
21 entity” means an owner of industrial or manufac-  
22 turing facilities, commercial buildings, or multifamily  
23 residential buildings, a utility, or an energy service  
24 company that fulfills the requirements of subsection  
25 (d).

1           (b) ESTABLISHMENT.—Not later than 90 days after  
2 the date of enactment of this Act, the Secretary shall es-  
3 tablish a program to provide rebates to qualified entities  
4 for expenditures made by the qualified entity for the re-  
5 placement of a qualified energy inefficient transformer  
6 with a qualified energy efficient transformer.

7           (c) REQUIREMENTS.—To be eligible to receive a re-  
8 bate under this section, an entity shall submit to the Sec-  
9 retary an application in such form, at such time, and con-  
10 taining such information as the Secretary may require, in-  
11 cluding demonstrated evidence—

12               (1) that the entity purchased a qualified energy  
13               efficient transformer;

14               (2) of the core loss value of the qualified energy  
15               efficient transformer;

16               (3) of the age of the qualified energy inefficient  
17               transformer being replaced;

18               (4) of the core loss value of the qualified energy  
19               inefficient transformer being replaced—

20                       (A) as measured by a qualified professional  
21                       or verified by the equipment manufacturer, as  
22                       applicable; or

23                       (B) for transformers described in sub-  
24                       section (a)(2)(B)(i), as selected from a table of

1           default values as determined by the Secretary  
2           in consultation with applicable industry; and

3           (5) that the qualified energy inefficient trans-  
4           former has been permanently decommissioned and  
5           scrapped.

6           (d) AUTHORIZED AMOUNT OF REBATE.—The  
7           amount of a rebate provided under this section shall be—

8           (1) for a 3-phase or single-phase transformer  
9           with a capacity of not less than 10 and not greater  
10          than 2,500 kilovolt-amperes, twice the amount equal  
11          to the difference in Watts between the core loss  
12          value (as measured in accordance with paragraphs  
13          (2) and (4) of subsection (c)) of—

14                 (A) the qualified energy inefficient trans-  
15                 former; and

16                 (B) the qualified energy efficient trans-  
17                 former; or

18           (2) for a transformer described in subsection  
19           (a)(2)(B)(i), the amount determined using a table of  
20           default rebate values by rated transformer output,  
21           as measured in kilovolt-amperes, as determined by  
22           the Secretary in consultation with applicable indus-  
23           try.

24           (e) AUTHORIZATION OF APPROPRIATIONS.—There is  
25           authorized to be appropriated to carry out this section

1 \$5,000,000 for each of fiscal years 2016 and 2017, to re-  
2 main available until expended.

3 (f) TERMINATION OF EFFECTIVENESS.—The author-  
4 ity provided by this section terminates on December 31,  
5 2017.

6 **SEC. 1103. STANDARDS FOR CERTAIN FURNACES.**

7 Section 325(f)(4) of the Energy Policy and Conserva-  
8 tion Act (42 U.S.C. 6295(f)(4)) is amended by adding at  
9 the end the following:

10 (E) RESTRICTION ON FINAL RULE FOR  
11 RESIDENTIAL NON-WEATHERIZED GAS FUR-  
12 NACES AND MOBILE HOME FURNACES.—

13 (i) IN GENERAL.—Notwithstanding  
14 any other provision of this Act, the Sec-  
15 retary shall not prescribe a final rule  
16 amending the efficiency standards for resi-  
17 dential non-weatherized gas furnaces or  
18 mobile home furnaces until each of the fol-  
19 lowing has occurred:

20 (I) The Secretary convenes a  
21 representative advisory group of inter-  
22 ested stakeholders, including the man-  
23 ufacturers, distributors, and contrac-  
24 tors of residential non-weatherized gas  
25 furnaces and mobile home furnaces,

1 home builders, building owners, en-  
2 ergy efficiency advocates, natural gas  
3 utilities, electric utilities, and con-  
4 sumer groups.

5 “(II) Not later than 1 year after  
6 the date of enactment of this subpara-  
7 graph, the advisory group described in  
8 subclause (I) completes an analysis of  
9 a nationwide requirement of a con-  
10 densing furnace efficiency standard  
11 including—

12 “(aa) a complete analysis of  
13 current market trends regarding  
14 the transition of sales from non-  
15 condensing furnaces to con-  
16 densing furnaces;

17 “(bb) the projected net loss  
18 in the industry of the present  
19 value of original equipment man-  
20 ufactured after adoption of the  
21 standard;

22 “(cc) the projected consumer  
23 payback period and life cycle cost  
24 savings after adoption of the  
25 standard;

1                   “(dd) a determination of  
2                   whether the standard is economi-  
3                   cally justified, based solely on the  
4                   definition of energy under section  
5                   321; and

6                   “(ee) other common eco-  
7                   nomic principles.

8                   “(III) The advisory group de-  
9                   scribed in subclause (I) reviews the  
10                  analysis and determines whether a na-  
11                  tionwide requirement of a condensing  
12                  furnace efficiency standard is tech-  
13                  nically feasible and economically justi-  
14                  fied.

15                  “(IV) The final determination of  
16                  the advisory group under subclause  
17                  (III) is published in the Federal Reg-  
18                  ister.

19                  “(ii) AMENDED STANDARDS.—If the  
20                  advisory group determines under clause  
21                  (i)(III) that a nationwide requirement of a  
22                  condensing furnace efficiency standard is  
23                  not technically feasible and economically  
24                  justified, the Secretary shall, not later than  
25                  180 days after the date on which the final

1 determination of the advisory group is pub-  
2 lished in the Federal Register under clause  
3 (i)(IV), establish amended standards  
4 through the negotiated rulemaking proce-  
5 dure provided for under subchapter III of  
6 chapter 5 of title 5, United States Code  
7 (commonly known as the ‘Negotiated Rule-  
8 making Act of 1990’).”

9 **SEC. 1104. THIRD-PARTY CERTIFICATION UNDER ENERGY**  
10 **STAR PROGRAM.**

11 Section 324A of the Energy Policy and Conservation  
12 Act (42 U.S.C. 6294a) is amended by adding at the end  
13 the following:

14 “(e) **THIRD-PARTY CERTIFICATION.**—

15 “(1) **IN GENERAL.**—Subject to paragraph (2),  
16 not later than 180 days after the date of enactment  
17 of this subsection, the Administrator shall revise the  
18 certification requirements for the labeling of con-  
19 sumer, home, and office electronic products for pro-  
20 gram partners that have complied with all require-  
21 ments of the Energy Star program for a period of  
22 at least 18 months.

23 “(2) **ADMINISTRATION.**—In the case of a pro-  
24 gram partner described in paragraph (1), the new  
25 requirements under paragraph (1)—

1           “(A) shall not require third-party certifi-  
2           cation for a product to be listed; but

3           “(B) may require that test data and other  
4           product information be submitted to facilitate  
5           product listing and performance verification for  
6           a sample of products.

7           “(3) THIRD PARTIES.—Nothing in this sub-  
8           section prevents the Administrator from using third  
9           parties in the course of the administration of the  
10          Energy Star program.

11          “(4) TERMINATION.—

12           “(A) IN GENERAL.—Subject to subpara-  
13           graph (B), an exemption from third-party cer-  
14           tification provided to a program partner under  
15           paragraph (1) shall terminate if the program  
16           partner is found to have violated program re-  
17           quirements with respect to at least 2 separate  
18           models during a 2-year period.

19           “(B) RESUMPTION.—A termination for a  
20           program partner under subparagraph (A) shall  
21           cease if the program partner complies with all  
22           Energy Star program requirements for a period  
23           of at least 3 years.”.

1 **SEC. 1105. ENERGY CONSERVATION STANDARDS FOR COM-**  
2 **MERCIAL REFRIGERATION EQUIPMENT.**

3 (a) DEADLINE.—The requirements of the final rule  
4 entitled “Energy Conservation Program: Energy Con-  
5 servation Standards for Commercial Refrigeration Equip-  
6 ment” (79 Fed. Reg. 17725 (March 28, 2014)), shall take  
7 effect on January 1, 2020, for equipment covered by the  
8 final rule that—

9 (1) uses natural refrigerants with a global  
10 warming potential of 10 or less that are approved  
11 for use by the Environmental Protection Agency  
12 under the Significant New Alternatives Program;

13 (2) is within 1 of the following product cat-  
14 egories:

15 (A) VCT.SC.M vertical cooler with trans-  
16 parent door self contained medium temperature;  
17 or

18 (B) HCT.SC.M horizontal cooler with  
19 transparent door self contained medium tem-  
20 perature; and

21 (3) uses not more than 115 percent of the en-  
22 ergy use allowed by applicable standards under En-  
23 ergy Star 3.0.

24 (b) FUTURE RULEMAKINGS.—Nothing in this section  
25 changes the criteria to be considered during future  
26 rulemakings undertaken by the Department under title III

1 of the Energy Policy and Conservation Act (42 U.S.C.  
2 6291 et seq.).

3 (c) REVIEW.—Notwithstanding subsection (a), the  
4 next review required under section 342(c)(6)(B) of the  
5 Energy Policy and Conservation Act (42 U.S.C.  
6 6313(c)(6)(B)) shall be conducted based on an effective  
7 date of March 27, 2017.

8 **SEC. 1106. VOLUNTARY VERIFICATION PROGRAMS FOR AIR**  
9 **CONDITIONING, FURNACE, BOILER, HEAT**  
10 **PUMP, AND WATER HEATER PRODUCTS.**

11 Section 326(b) of the Energy Policy and Conserva-  
12 tion Act (42 U.S.C. 6296(b)) is amended by adding at  
13 the end the following:

14 “(6) VOLUNTARY VERIFICATION PROGRAMS FOR  
15 AIR CONDITIONING, FURNACE, BOILER, HEAT PUMP,  
16 AND WATER HEATER PRODUCTS.—

17 “(A) RELIANCE ON VOLUNTARY PRO-  
18 GRAMS.—For the purpose of periodic testing to  
19 verify compliance with energy conservation  
20 standards and Energy Star specifications estab-  
21 lished under sections 324A, 325, and 342 for  
22 covered products described in paragraphs (3),  
23 (4), (5), (9), and (11) of section 322(a) and  
24 covered equipment described in subparagraphs  
25 (B), (C), (D), (F), (I), (J), and (K) of section

1           340(1), the Secretary and the Administrator of  
2           the Environmental Protection Agency shall rely  
3           on testing conducted by voluntary verification  
4           programs that are recognized by the Secretary  
5           in accordance with subparagraph (B).

6           “(B) RECOGNITION OF VOLUNTARY  
7           VERIFICATION PROGRAMS.—

8           “(i) IN GENERAL.—Not later than  
9           180 days after the date of enactment of  
10          this paragraph, the Secretary shall initiate  
11          a negotiated rulemaking in accordance  
12          with subchapter III of chapter 5 of title 5,  
13          United States Code (commonly known as  
14          the ‘Negotiated Rulemaking Act of 1990’)  
15          to develop criteria that have consensus  
16          support for achieving recognition by the  
17          Secretary as an approved voluntary  
18          verification program.

19          “(ii) MINIMUM REQUIREMENTS.—The  
20          criteria developed under clause (i) shall, at  
21          a minimum, ensure that the voluntary  
22          verification program—

23                           “(I) is nationally recognized;

1                   “(II) is operated by a third party  
2                   and not directly operated by a pro-  
3                   gram participant;

4                   “(III) satisfies any applicable ele-  
5                   ments of—

6                   “(aa) International Organi-  
7                   zation for Standardization stand-  
8                   ard numbered 17025; and

9                   “(bb) any other relevant  
10                  International Organization for  
11                  Standardization standards identi-  
12                  fied and agreed to through the  
13                  negotiated rulemaking under  
14                  clause (i);

15                  “(IV) at least annually tests  
16                  independently obtained products fol-  
17                  lowing the test procedures established  
18                  under this title to verify the certified  
19                  rating of a representative sample of  
20                  products and equipment within the  
21                  scope of the program;

22                  “(V) maintains a publicly avail-  
23                  able list of all ratings of products sub-  
24                  ject to verification;

1                   “(VI) requires the changing of  
2                   the performance rating or removal of  
3                   the product or equipment from the  
4                   program if testing determines that the  
5                   performance rating does not meet the  
6                   levels the manufacturer has certified  
7                   to the Secretary;

8                   “(VII) requires new program  
9                   participants to substantiate ratings  
10                  through test data generated in accord-  
11                  ance with DOE regulations;

12                  “(VIII) allows for challenge test-  
13                  ing of products and equipment within  
14                  the scope of the program;

15                  “(IX) requires program partici-  
16                  pants to disclose the performance rat-  
17                  ing of all covered products and equip-  
18                  ment within the scope of the program  
19                  for the covered product or equipment;

20                  “(X) provides to the Secretary—

21                         “(aa) an annual report of all  
22                         test results, the contents of which  
23                         shall be determined through the  
24                         negotiated rulemaking process  
25                         under clause (i); and

1                   “(bb) test reports, on the re-  
2                   quest of the Secretary or the Ad-  
3                   ministrator of the Environmental  
4                   Protection Agency, that note any  
5                   instructions specified by the man-  
6                   ufacturer or the representative of  
7                   the manufacturer for the purpose  
8                   of conducting the verification  
9                   testing, to be exempted from dis-  
10                  closure to the extent provided  
11                  under section 552(b)(4) of title  
12                  5, United States Code (commonly  
13                  known as the ‘Freedom of Infor-  
14                  mation Act’); and

15                  “(XI) satisfies any additional re-  
16                  quirements or standards that the Sec-  
17                  retary and Administrator of the Envi-  
18                  ronmental Protection Agency shall es-  
19                  tablish consistent with this subpara-  
20                  graph.

21                  “(iii) FINDING REQUIRED FOR CES-  
22                  SATION OF RECOGNITION.—The Secretary  
23                  may only cease recognition of a voluntary  
24                  verification program as an approved pro-  
25                  gram described in subparagraph (A) on a

1 finding that the program is not meeting its  
2 obligations for compliance through pro-  
3 gram review criteria established under this  
4 subparagraph.

5 “(iv) REVISIONS.—

6 “(I) IN GENERAL.—Major revi-  
7 sions to voluntary verification pro-  
8 gram criteria established under this  
9 subparagraph shall only be made pur-  
10 suant to a subsequent negotiated rule-  
11 making in accordance with subchapter  
12 III of chapter 5 of title 5, United  
13 States Code (commonly known as the  
14 ‘Negotiated Rulemaking Act of  
15 1990’).

16 “(II) NONMAJOR REVISIONS.—

17 “(aa) IN GENERAL.—The  
18 Secretary may make all other  
19 nonmajor criteria revisions by  
20 initiating a direct final rule in ac-  
21 cordance with section  
22 553(b)(3)(B) of title 5, United  
23 States Code, on a determination  
24 published in the Federal Register  
25 that revisions to the criteria are

1 necessary and that substantive  
2 opposition to the proposed revi-  
3 sions is not expected.

4 “(bb) CONDITIONS FOR EF-  
5 FECTIVENESS.—If the Secretary  
6 does not receive adversarial com-  
7 ments with respect to the deter-  
8 mination published under item  
9 (aa) during the 30-day-period fol-  
10 lowing publication of that deter-  
11 mination in the Federal Register,  
12 the direct final rule shall have  
13 the force and effect of law.

14 “(cc) WITHDRAWAL OF  
15 FINAL RULE.—Receipt of any ad-  
16 versarial comment with respect to  
17 the determination published  
18 under item (aa) shall require the  
19 Secretary to withdraw the direct  
20 final rule and publish—

21 “(AA) a notice of pro-  
22 posed rulemaking pursuant  
23 to section 553 of title 5,  
24 United States Code; or

1                   “(BB) a notice of pro-  
2                   posed rulemaking pursuant  
3                   to section 553 of title 5,  
4                   United States Code, that in-  
5                   cludes a determination that  
6                   revisions to the criteria are  
7                   necessary.

8                   “(C) ADMINISTRATION.—

9                   “(i) IN GENERAL.—The Secretary and  
10                  the Administrator of the Environmental  
11                  Protection Agency shall not require—

12                   “(I) manufacturers to participate  
13                   in a voluntary verification program  
14                   described in subparagraph (A); or

15                   “(II) participating manufacturers  
16                   to provide information that has al-  
17                   ready been provided to the Secretary  
18                   or the Administrator.

19                   “(ii) LIST OF COVERED PRODUCTS.—  
20                  The Secretary or the Administrator of the  
21                  Environmental Protection Agency may  
22                  maintain a publicly available list of covered  
23                  products and equipment that distinguishes  
24                  between products that are, and are not  
25                  covered products and equipment verified

1 through a voluntary verification program  
2 described in subparagraph (A);

3 “(iii) PERIODIC VERIFICATION TEST-  
4 ING.—

5 “(I) IN GENERAL.—The Sec-  
6 retary—

7 “(aa) shall not subject prod-  
8 ucts or equipment that have been  
9 verification tested under a vol-  
10 untary verification program de-  
11 scribed in subparagraph (A) to  
12 periodic verification testing that  
13 verifies the accuracy of the cer-  
14 tified performance rating of the  
15 products or equipment; but

16 “(bb) may test products or  
17 equipment described in subclause  
18 (I) if the testing is necessary—

19 “(AA) to assess the  
20 overall performance of a vol-  
21 untary verification program;

22 “(BB) to address spe-  
23 cific performance issues;

1 “(CC) for use in updat-  
2 ing test procedures and  
3 standards; or

4 “(DD) for other pur-  
5 poses consistent with this  
6 title.

7 “(II) ADDITIONAL TESTING.—  
8 The Secretary may subject products  
9 or equipment described in subclause  
10 (I) to periodic verification testing out-  
11 side the restrictions of subclause  
12 (I)(bb), if agreed to during the rule-  
13 making described in subparagraph  
14 (B)

15 “(D) EFFECT ON OTHER AUTHORITY.—  
16 Nothing in this paragraph limits the authority  
17 of the Secretary or the Administrator of the  
18 Environmental Protection Agency to enforce  
19 compliance with any law.”.

## 20 **Subtitle C—Manufacturing**

### 21 **SEC. 1201. MANUFACTURING ENERGY EFFICIENCY.**

22 (a) PURPOSES.—The purposes of this section are—  
23 (1) to reform and reorient the industrial effi-  
24 ciency programs of the Department;

1           (2) to establish a clear and consistent authority  
2 for industrial efficiency programs of the Depart-  
3 ment;

4           (3) to accelerate the deployment of technologies  
5 and practices that will increase industrial energy ef-  
6 ficiency and improve productivity;

7           (4) to accelerate the development and dem-  
8 onstration of technologies that will assist the deploy-  
9 ment goals of the industrial efficiency programs of  
10 the Department and increase manufacturing effi-  
11 ciency;

12           (5) to stimulate domestic economic growth and  
13 improve industrial productivity and competitiveness;  
14 and

15           (6) to strengthen partnerships between Federal  
16 and State governmental agencies and the private  
17 and academic sectors.

18 (b) FUTURE OF INDUSTRY PROGRAM.—

19           (1) IN GENERAL.—Section 452 of the Energy  
20 Independence and Security Act of 2007 (42 U.S.C.  
21 17111) is amended by striking the section heading  
22 and inserting the following: “**FUTURE OF INDUS-**  
23 **TRY PROGRAM**”.

24           (2) DEFINITION OF ENERGY SERVICE PRO-  
25 VIDER.—Section 452(a) of the Energy Independence

1 and Security Act of 2007 (42 U.S.C. 17111(a)) is  
2 amended—

3 (A) by redesignating paragraphs (3)  
4 through (5) as paragraphs (4) through (6), re-  
5 spectively; and

6 (B) by inserting after paragraph (2) the  
7 following:

8 “(3) ENERGY SERVICE PROVIDER.—The term  
9 ‘energy service provider’ means any business pro-  
10 viding technology or services to improve the energy  
11 efficiency, water efficiency, power factor, or load  
12 management of a manufacturing site or other indus-  
13 trial process in an energy-intensive industry, or any  
14 utility operating under a utility energy service  
15 project.”.

16 (3) INDUSTRIAL RESEARCH AND ASSESSMENT  
17 CENTERS.—Section 452(e) of the Energy Independ-  
18 ence and Security Act of 2007 (42 U.S.C. 17111(e))  
19 is amended—

20 (A) by redesignating paragraphs (1)  
21 through (5) as subparagraphs (A) through (E),  
22 respectively, and indenting appropriately;

23 (B) by striking “The Secretary” and in-  
24 serting the following:

25 “(1) IN GENERAL.—The Secretary”;

1           (C) in subparagraph (A) (as redesignated  
2           by subparagraph (A)), by inserting before the  
3           semicolon at the end the following: “, including  
4           assessments of sustainable manufacturing goals  
5           and the implementation of information tech-  
6           nology advancements for supply chain analysis,  
7           logistics, system monitoring, industrial and  
8           manufacturing processes, and other purposes”;  
9           and

10           (D) by adding at the end the following:

11           “(2) COORDINATION.—To increase the value  
12           and capabilities of the industrial research and as-  
13           sessment centers, the centers shall—

14           “(A) coordinate with Manufacturing Ex-  
15           tension Partnership Centers of the National In-  
16           stitute of Standards and Technology;

17           “(B) coordinate with the Building Tech-  
18           nologies Program of the Department of Energy  
19           to provide building assessment services to man-  
20           ufacturers;

21           “(C) increase partnerships with the Na-  
22           tional Laboratories of the Department of En-  
23           ergy to leverage the expertise and technologies  
24           of the National Laboratories for national indus-  
25           trial and manufacturing needs;

1           “(D) increase partnerships with energy  
2 service providers and technology providers to le-  
3 verage private sector expertise and accelerate  
4 deployment of new and existing technologies  
5 and processes for energy efficiency, power fac-  
6 tor, and load management;

7           “(E) identify opportunities for reducing  
8 greenhouse gas emissions; and

9           “(F) promote sustainable manufacturing  
10 practices for small- and medium-sized manufac-  
11 turers.

12           “(3) OUTREACH.—The Secretary shall provide  
13 funding for—

14           “(A) outreach activities by the industrial  
15 research and assessment centers to inform  
16 small- and medium-sized manufacturers of the  
17 information, technologies, and services avail-  
18 able; and

19           “(B) coordination activities by each indus-  
20 trial research and assessment center to leverage  
21 efforts with—

22                   “(i) Federal and State efforts;

23                   “(ii) the efforts of utilities and energy  
24 service providers;

1                   “(iii) the efforts of regional energy ef-  
2                   ficiency organizations; and

3                   “(iv) the efforts of other industrial re-  
4                   search and assessment centers.

5                   “(4) WORKFORCE TRAINING.—

6                   “(A) IN GENERAL.—The Secretary shall  
7                   pay the Federal share of associated internship  
8                   programs under which students work with or  
9                   for industries, manufacturers, and energy serv-  
10                  ice providers to implement the recommendations  
11                  of industrial research and assessment centers.

12                  “(B) FEDERAL SHARE.—The Federal  
13                  share of the cost of carrying out internship pro-  
14                  grams described in subparagraph (A) shall be  
15                  50 percent.

16                  “(5) SMALL BUSINESS LOANS.—The Adminis-  
17                  trator of the Small Business Administration shall, to  
18                  the maximum extent practicable, expedite consider-  
19                  ation of applications from eligible small business  
20                  concerns for loans under the Small Business Act (15  
21                  U.S.C. 631 et seq.) to implement recommendations  
22                  of industrial research and assessment centers estab-  
23                  lished under paragraph (1).

24                  “(6) ADVANCED MANUFACTURING STEERING  
25                  COMMITTEE.—The Secretary shall establish an advi-

1 sory steering committee to provide recommendations  
2 to the Secretary on planning and implementation of  
3 the Advanced Manufacturing Office of the Depart-  
4 ment of Energy.”.

5 (c) SUSTAINABLE MANUFACTURING INITIATIVE.—

6 (1) IN GENERAL.—Part E of title III of the  
7 Energy Policy and Conservation Act (42 U.S.C.  
8 6341) is amended by adding at the end the fol-  
9 lowing:

10 **“SEC. 376. SUSTAINABLE MANUFACTURING INITIATIVE.**

11 “(a) IN GENERAL.—As part of the Office of Energy  
12 Efficiency and Renewable Energy, the Secretary, on the  
13 request of a manufacturer, shall conduct on-site technical  
14 assessments to identify opportunities for—

15 “(1) maximizing the energy efficiency of indus-  
16 trial processes and cross-cutting systems;

17 “(2) preventing pollution and minimizing waste;

18 “(3) improving efficient use of water in manu-  
19 facturing processes;

20 “(4) conserving natural resources; and

21 “(5) achieving such other goals as the Secretary  
22 determines to be appropriate.

23 “(b) COORDINATION.—The Secretary shall carry out  
24 the initiative in coordination with the private sector and  
25 appropriate agencies, including the National Institute of

1 Standards and Technology, to accelerate adoption of new  
2 and existing technologies and processes that improve en-  
3 ergy efficiency.

4 “(c) RESEARCH AND DEVELOPMENT PROGRAM FOR  
5 SUSTAINABLE MANUFACTURING AND INDUSTRIAL TECH-  
6 NOLOGIES AND PROCESSES.—As part of the industrial ef-  
7 ficiency programs of the Department of Energy, the Sec-  
8 retary shall carry out a joint industry-government partner-  
9 ship program to research, develop, and demonstrate new  
10 sustainable manufacturing and industrial technologies and  
11 processes that maximize the energy efficiency of industrial  
12 plants, reduce pollution, and conserve natural resources.”.

13 (2) TABLE OF CONTENTS.—The table of con-  
14 tents of the Energy Policy and Conservation Act (42  
15 U.S.C. prec. 6201) is amended by adding at the end  
16 of the items relating to part E of title III the fol-  
17 lowing:

“Sec. 376. Sustainable manufacturing initiative.”.

18 (d) CONFORMING AMENDMENTS.—

19 (1) Section 106 of the Energy Policy Act of  
20 2005 (42 U.S.C. 15811) is repealed.

21 (2) Sections 131, 132, 133, 2103, and 2107 of  
22 the Energy Policy Act of 1992 (42 U.S.C. 6348,  
23 6349, 6350, 13453, 13456) are repealed.

24 (3) Section 2101(a) of the Energy Policy Act of  
25 1992 (42 U.S.C. 13451(a)) is amended in the third

1 sentence by striking “sections 2102, 2103, 2104,  
2 2105, 2106, 2107, and 2108” and inserting “sec-  
3 tions 2102, 2104, 2105, 2106, and 2108 of this Act  
4 and section 376 of the Energy Policy and Conserva-  
5 tion Act.”.

6 **SEC. 1202. LEVERAGING EXISTING FEDERAL AGENCY PRO-**  
7 **GRAMS TO ASSIST SMALL AND MEDIUM MAN-**  
8 **UFACTURERS.**

9 (a) DEFINITIONS.—In this section and section 1203:

10 (1) ENERGY MANAGEMENT SYSTEM.—The term  
11 “energy management system” means a business  
12 management process based on standards of the  
13 American National Standards Institute that enables  
14 an organization to follow a systematic approach in  
15 achieving continual improvement of energy perform-  
16 ance, including energy efficiency, security, use, and  
17 consumption.

18 (2) INDUSTRIAL ASSESSMENT CENTER.—The  
19 term “industrial assessment center” means a center  
20 located at an institution of higher education that—

21 (A) receives funding from the Department;

22 (B) provides an in-depth assessment of  
23 small- and medium-size manufacturer plant  
24 sites to evaluate the facilities, services, and  
25 manufacturing operations of the plant site; and

1           (C) identifies opportunities for potential  
2 savings for small- and medium-size manufac-  
3 turer plant sites from energy efficiency improve-  
4 ments, waste minimization, pollution preven-  
5 tion, and productivity improvement.

6           (3) NATIONAL LABORATORY.—The term “Na-  
7 tional Laboratory” has the meaning given the term  
8 in section 2 of the Energy Policy Act of 2005 (42  
9 U.S.C. 15801).

10          (4) SMALL AND MEDIUM MANUFACTURERS.—  
11 The term “small and medium manufacturers”  
12 means manufacturing firms—

13           (A) classified in the North American In-  
14 dustry Classification System as any of sectors  
15 31 through 33;

16           (B) with gross annual sales of less than  
17 \$100,000,000;

18           (C) with fewer than 500 employees at the  
19 plant site; and

20           (D) with annual energy bills totaling more  
21 than \$100,000 and less than \$2,500,000.

22          (5) SMART MANUFACTURING.—The term  
23 “smart manufacturing” means a set of advanced  
24 sensing, instrumentation, monitoring, controls, and  
25 process optimization technologies and practices that

1 merge information and communication technologies  
2 with the manufacturing environment for the real-  
3 time management of energy, productivity, and costs  
4 across factories and companies.

5 (b) EXPANSION OF TECHNICAL ASSISTANCE PRO-  
6 GRAMS.—The Secretary shall expand the scope of tech-  
7 nologies covered by the Industrial Assessment Centers of  
8 the Department—

9 (1) to include smart manufacturing technologies  
10 and practices; and

11 (2) to equip the directors of the Industrial As-  
12 sessment Centers with the training and tools nec-  
13 essary to provide technical assistance in smart man-  
14 ufacturing technologies and practices, including en-  
15 ergy management systems, to manufacturers.

16 (c) FUNDING.—The Secretary shall use unobligated  
17 funds of the Department to carry out this section.

18 **SEC. 1203. LEVERAGING SMART MANUFACTURING INFRA-**  
19 **STRUCTURE AT NATIONAL LABORATORIES.**

20 (a) STUDY.—

21 (1) IN GENERAL.—Not later than 180 days  
22 after the date of enactment of this Act, the Sec-  
23 retary shall conduct a study on ways in which the  
24 Department can increase access to existing high-per-  
25 formance computing resources in the National Lab-

1 oratories, particularly for small and medium manu-  
2 facturers.

3 (2) INCLUSIONS.—In identifying ways to in-  
4 crease access to National Laboratories under para-  
5 graph (1), the Secretary shall—

6 (A) focus on increasing access to the com-  
7 puting facilities of the National Laboratories;  
8 and

9 (B) ensure that—

10 (i) the information from the manufac-  
11 turer is protected; and

12 (ii) the security of the National Lab-  
13 oratory facility is maintained.

14 (3) REPORT.—Not later than 1 year after the  
15 date of enactment of this Act, the Secretary shall  
16 submit to Congress a report describing the results of  
17 the study.

18 (b) ACTIONS FOR INCREASED ACCESS.—The Sec-  
19 retary shall facilitate access to the National Laboratories  
20 studied under subsection (a) for small and medium manu-  
21 facturers so that small and medium manufacturers can  
22 fully use the high-performance computing resources of the  
23 National Laboratories to enhance the manufacturing com-  
24 petitiveness of the United States.

1                                   **Subtitle D—Vehicles**

2   **SEC. 1301. SHORT TITLE.**

3           This subtitle may be cited as the “Vehicle Innovation  
4 Act of 2015”.

5   **SEC. 1302. OBJECTIVES.**

6           The objectives of this subtitle are—

7                   (1) to establish a consistent and consolidated  
8 authority for the vehicle technology program at the  
9 Department;

10                   (2) to develop United States technologies and  
11 practices that—

12                           (A) improve the fuel efficiency and emis-  
13 sions of all vehicles produced in the United  
14 States; and

15                           (B) reduce vehicle reliance on petroleum-  
16 based fuels;

17                   (3) to support domestic research, development,  
18 engineering, demonstration, and commercial applica-  
19 tion and manufacturing of advanced vehicles, en-  
20 gines, and components;

21                   (4) to enable vehicles to move larger volumes of  
22 goods and more passengers with less energy and  
23 emissions;

24                   (5) to develop cost-effective advanced tech-  
25 nologies for wide-scale utilization throughout the

1 passenger, commercial, government, and transit ve-  
2 hicle sectors;

3 (6) to allow for greater consumer choice of vehi-  
4 cle technologies and fuels;

5 (7) shorten technology development and inte-  
6 gration cycles in the vehicle industry;

7 (8) to ensure a proper balance and diversity of  
8 Federal investment in vehicle technologies; and

9 (9) to strengthen partnerships between Federal  
10 and State governmental agencies and the private  
11 and academic sectors.

12 **SEC. 1303. COORDINATION AND NONDUPLICATION.**

13 The Secretary shall ensure, to the maximum extent  
14 practicable, that the activities authorized by this subtitle  
15 do not duplicate those of other programs within the De-  
16 partment or other relevant research agencies.

17 **SEC. 1304. AUTHORIZATION OF APPROPRIATIONS.**

18 There are authorized to be appropriated to the Sec-  
19 retary for research, development, engineering, demonstra-  
20 tion, and commercial application of vehicles and related  
21 technologies in the United States, including activities au-  
22 thorized under this subtitle—

23 (1) for fiscal year 2016, \$313,567,000;

24 (2) for fiscal year 2017, \$326,109,000;

25 (3) for fiscal year 2018, \$339,154,000;

1 (4) for fiscal year 2019, \$352,720,000; and

2 (5) for fiscal year 2020, \$366,829,000.

3 **SEC. 1305. REPORTING.**

4 (a) TECHNOLOGIES DEVELOPED.—Not later than 18  
5 months after the date of enactment of this Act and annu-  
6 ally thereafter through 2020, the Secretary shall submit  
7 to Congress a report regarding the technologies developed  
8 as a result of the activities authorized by this subtitle, with  
9 a particular emphasis on whether the technologies were  
10 successfully adopted for commercial applications, and if  
11 so, whether products relying on those technologies are  
12 manufactured in the United States.

13 (b) ADDITIONAL MATTERS.—At the end of each fis-  
14 cal year through 2020, the Secretary shall submit to the  
15 relevant Congressional committees of jurisdiction an an-  
16 nual report describing activities undertaken in the pre-  
17 vious year under this Act, active industry participants, the  
18 status of public private partnerships, progress of the pro-  
19 gram in meeting goals and timelines, and a strategic plan  
20 for funding of activities across agencies.

21 **PART I—VEHICLE RESEARCH AND**

22 **DEVELOPMENT**

23 **SEC. 1306. PROGRAM.**

24 (a) ACTIVITIES.—The Secretary shall conduct a pro-  
25 gram of basic and applied research, development, engi-

1 neering, demonstration, and commercial application activi-  
2 ties on materials, technologies, and processes with the po-  
3 tential to substantially reduce or eliminate petroleum use  
4 and the emissions of the Nation's passenger and commer-  
5 cial vehicles, including activities in the areas of—

6 (1) electrification of vehicle systems;

7 (2) batteries, ultracapacitors, and other energy  
8 storage devices;

9 (3) power electronics;

10 (4) vehicle, component, and subsystem manu-  
11 facturing technologies and processes;

12 (5) engine efficiency and combustion optimiza-  
13 tion;

14 (6) waste heat recovery;

15 (7) transmission and drivetrains;

16 (8) hydrogen vehicle technologies, including fuel  
17 cells and internal combustion engines, and hydrogen  
18 infrastructure, including hydrogen energy storage to  
19 enable renewables and provide hydrogen for fuel and  
20 power;

21 (9) natural gas vehicle technologies;

22 (10) aerodynamics, rolling resistance (including  
23 tires and wheel assemblies), and accessory power  
24 loads of vehicles and associated equipment;

- 1           (11) vehicle weight reduction, including
- 2           lightweighting materials and the development of
- 3           manufacturing processes to fabricate, assemble, and
- 4           use dissimilar materials;
- 5           (12) friction and wear reduction;
- 6           (13) engine and component durability;
- 7           (14) innovative propulsion systems;
- 8           (15) advanced boosting systems;
- 9           (16) hydraulic hybrid technologies;
- 10          (17) engine compatibility with and optimization
- 11          for a variety of transportation fuels including nat-
- 12          ural gas and other liquid and gaseous fuels;
- 13          (18) predictive engineering, modeling, and sim-
- 14          ulation of vehicle and transportation systems;
- 15          (19) refueling and charging infrastructure for
- 16          alternative fueled and electric or plug-in electric hy-
- 17          brid vehicles, including the unique challenges facing
- 18          rural areas;
- 19          (20) gaseous fuels storage systems and system
- 20          integration and optimization;
- 21          (21) sensing, communications, and actuation
- 22          technologies for vehicle, electrical grid, and infra-
- 23          structure;
- 24          (22) efficient use, substitution, and recycling of
- 25          potentially critical materials in vehicles, including

1 rare earth elements and precious metals, at risk of  
2 supply disruption;

3 (23) aftertreatment technologies;

4 (24) thermal management of battery systems;

5 (25) retrofitting advanced vehicle technologies  
6 to existing vehicles;

7 (26) development of common standards, speci-  
8 fications, and architectures for both transportation  
9 and stationary battery applications;

10 (27) advanced internal combustion engines;

11 (28) mild hybrid;

12 (29) engine down speeding;

13 (30) vehicle-to-vehicle, vehicle-to-pedestrian,  
14 and vehicle-to-infrastructure technologies; and

15 (31) other research areas as determined by the  
16 Secretary.

17 (b) TRANSFORMATIONAL TECHNOLOGY.—The Sec-  
18 retary shall ensure that the Department continues to sup-  
19 port research, development, engineering, demonstration,  
20 and commercial application activities and maintains com-  
21 petency in mid- to long-term transformational vehicle tech-  
22 nologies with potential to achieve reductions in emissions,  
23 including activities in the areas of—

24 (1) hydrogen vehicle technologies, including fuel  
25 cells, hydrogen storage, infrastructure, and activities

1 in hydrogen technology validation and safety codes  
2 and standards;

3 (2) multiple battery chemistries and novel en-  
4 ergy storage devices, including nonchemical batteries  
5 and electromechanical storage technologies such as  
6 hydraulics, flywheels, and compressed air storage;

7 (3) communication and connectivity among ve-  
8 hicles, infrastructure, and the electrical grid; and

9 (4) other innovative technologies research and  
10 development, as determined by the Secretary.

11 (c) INDUSTRY PARTICIPATION.—To the maximum  
12 extent practicable, activities under this Act shall be carried  
13 out in partnership or collaboration with automotive manu-  
14 facturers, heavy commercial, vocational, and transit vehi-  
15 cle manufacturers, qualified plug-in electric vehicle manu-  
16 facturers, compressed natural gas vehicle manufacturers,  
17 vehicle and engine equipment and component manufactur-  
18 ers, manufacturing equipment manufacturers, advanced  
19 vehicle service providers, fuel producers and energy sup-  
20 pliers, electric utilities, universities, national laboratories,  
21 and independent research laboratories. In carrying out  
22 this Act the Secretary shall—

23 (1) determine whether a wide range of compa-  
24 nies that manufacture or assemble vehicles or com-  
25 ponents in the United States are represented in on-

1 going public private partnership activities, including  
2 firms that have not traditionally participated in fed-  
3 erally sponsored research and development activities,  
4 and where possible, partner with such firms that  
5 conduct significant and relevant research and devel-  
6 opment activities in the United States;

7 (2) leverage the capabilities and resources of,  
8 and formalize partnerships with, industry-led stake-  
9 holder organizations, nonprofit organizations, indus-  
10 try consortia, and trade associations with expertise  
11 in the research and development of, and education  
12 and outreach activities in, advanced automotive and  
13 commercial vehicle technologies;

14 (3) develop more effective processes for trans-  
15 ferring research findings and technologies to indus-  
16 try;

17 (4) support public-private partnerships, dedi-  
18 cated to overcoming barriers in commercial applica-  
19 tion of transformational vehicle technologies, that  
20 utilize such industry-led technology development fa-  
21 cilities of entities with demonstrated expertise in  
22 successfully designing and engineering pre-commer-  
23 cial generations of such transformational technology;  
24 and

1           (5) promote efforts to ensure that technology  
2           research, development, engineering, and commercial  
3           application activities funded under this Act are car-  
4           ried out in the United States.

5           (d) INTERAGENCY AND INTRAAGENCY COORDINA-  
6           TION.—To the maximum extent practicable, the Secretary  
7           shall coordinate research, development, demonstration,  
8           and commercial application activities among—

9           (1) relevant programs within the Department,  
10          including—

11           (A) the Office of Energy Efficiency and  
12           Renewable Energy;

13           (B) the Office of Science;

14           (C) the Office of Electricity Delivery and  
15           Energy Reliability;

16           (D) the Office of Fossil Energy;

17           (E) the Advanced Research Projects Agen-  
18           cy—Energy; and

19           (F) other offices as determined by the Sec-  
20           retary; and

21           (2) relevant technology research and develop-  
22           ment programs within other Federal agencies, as de-  
23           termined by the Secretary.

24           (e) FEDERAL DEMONSTRATION OF TECH-  
25           NOLOGIES.—The Secretary shall make information avail-

1 able to procurement programs of Federal agencies regard-  
2 ing the potential to demonstrate technologies resulting  
3 from activities funded through programs under this Act.

4 (f) INTERGOVERNMENTAL COORDINATION.—The  
5 Secretary shall seek opportunities to leverage resources  
6 and support initiatives of State and local governments in  
7 developing and promoting advanced vehicle technologies,  
8 manufacturing, and infrastructure.

9 (g) CRITERIA.—When awarding grants under this  
10 program, the Secretary shall give priority to those tech-  
11 nologies (either individually or as part of a system) that—

12 (1) provide the greatest aggregate fuel savings  
13 based on the reasonable projected sales volumes of  
14 the technology; and

15 (2) provide the greatest increase in United  
16 States employment.

17 **SEC. 1307. MANUFACTURING.**

18 The Secretary shall carry out a research, develop-  
19 ment, engineering, demonstration, and commercial appli-  
20 cation program of advanced vehicle manufacturing tech-  
21 nologies and practices, including innovative processes—

22 (1) to increase the production rate and decrease  
23 the cost of advanced battery and fuel cell manufac-  
24 turing;

- 1           (2) to vary the capability of individual manufac-  
2           turing facilities to accommodate different battery  
3           chemistries and configurations;
- 4           (3) to reduce waste streams, emissions, and en-  
5           ergy intensity of vehicle, engine, advanced battery  
6           and component manufacturing processes;
- 7           (4) to recycle and remanufacture used batteries  
8           and other vehicle components for reuse in vehicles or  
9           stationary applications;
- 10          (5) to develop manufacturing processes to effec-  
11          tively fabricate, assemble, and produce cost-effective  
12          lightweight materials such as advanced aluminum  
13          and other metal alloys, polymeric composites, and  
14          carbon fiber for use in vehicles;
- 15          (6) to produce lightweight high pressure storage  
16          systems for gaseous fuels;
- 17          (7) to design and manufacture purpose-built hy-  
18          drogen fuel cell vehicles and components;
- 19          (8) to improve the calendar life and cycle life of  
20          advanced batteries; and
- 21          (9) to produce permanent magnets for advanced  
22          vehicles.

1           **PART II—MEDIUM- AND HEAVY-DUTY**  
2           **COMMERCIAL AND TRANSIT VEHICLES**  
3   **SEC. 1308. PROGRAM.**

4           The Secretary, in partnership with relevant research  
5 and development programs in other Federal agencies, and  
6 a range of appropriate industry stakeholders, shall carry  
7 out a program of cooperative research, development, dem-  
8 onstration, and commercial application activities on ad-  
9 vanced technologies for medium- to heavy-duty commer-  
10 cial, vocational, recreational, and transit vehicles, includ-  
11 ing activities in the areas of—

- 12           (1) engine efficiency and combustion research;  
13           (2) onboard storage technologies for compressed  
14 and liquefied natural gas;  
15           (3) development and integration of engine tech-  
16 nologies designed for natural gas operation of a vari-  
17 ety of vehicle platforms;  
18           (4) waste heat recovery and conversion;  
19           (5) improved aerodynamics and tire rolling re-  
20 sistance;  
21           (6) energy and space-efficient emissions control  
22 systems;  
23           (7) mild hybrid, heavy hybrid, hybrid hydraulic,  
24 plug-in hybrid, and electric platforms, and energy  
25 storage technologies;  
26           (8) drivetrain optimization;

- 1 (9) friction and wear reduction;
- 2 (10) engine idle and parasitic energy loss reduc-
- 3 tion;
- 4 (11) electrification of accessory loads;
- 5 (12) onboard sensing and communications tech-
- 6 nologies;
- 7 (13) advanced lightweighting materials and ve-
- 8 hicle designs;
- 9 (14) increasing load capacity per vehicle;
- 10 (15) thermal management of battery systems;
- 11 (16) recharging infrastructure;
- 12 (17) compressed natural gas infrastructure;
- 13 (18) advanced internal combustion engines;
- 14 (19) complete vehicle and power pack modeling,
- 15 simulation, and testing;
- 16 (20) hydrogen vehicle technologies, including
- 17 fuel cells and internal combustion engines, and hy-
- 18 drogen infrastructure, including hydrogen energy
- 19 storage to enable renewables and provide hydrogen
- 20 for fuel and power;
- 21 (21) retrofitting advanced technologies onto ex-
- 22 isting truck fleets;
- 23 (22) advanced boosting systems;
- 24 (23) engine down speeding; and

1 (24) integration of these and other advanced  
2 systems onto a single truck and trailer platform.

3 **SEC. 1309. CLASS 8 TRUCK AND TRAILER SYSTEMS DEM-**  
4 **ONSTRATION.**

5 (a) IN GENERAL.—The Secretary shall conduct a  
6 competitive grant program to demonstrate the integration  
7 of multiple advanced technologies on Class 8 truck and  
8 trailer platforms, including a combination of technologies  
9 listed in section 1308.

10 (b) APPLICANT TEAMS.—Applicant teams may be  
11 comprised of truck and trailer manufacturers, engine and  
12 component manufacturers, fleet customers, university re-  
13 searchers, and other applicants as appropriate for the de-  
14 velopment and demonstration of integrated Class 8 truck  
15 and trailer systems.

16 **SEC. 1310. TECHNOLOGY TESTING AND METRICS.**

17 The Secretary, in coordination with the partners of  
18 the interagency research program described in section  
19 1308—

20 (1) shall develop standard testing procedures  
21 and technologies for evaluating the performance of  
22 advanced heavy vehicle technologies under a range of  
23 representative duty cycles and operating conditions,  
24 including for heavy hybrid propulsion systems;

1           (2) shall evaluate heavy vehicle performance  
2           using work performance-based metrics other than  
3           those based on miles per gallon, including those  
4           based on units of volume and weight transported for  
5           freight applications, and appropriate metrics based  
6           on the work performed by nonroad systems; and

7           (3) may construct heavy duty truck and bus  
8           testing facilities.

9   **SEC. 1311. NONROAD SYSTEMS PILOT PROGRAM.**

10          The Secretary shall undertake a pilot program of re-  
11          search, development, demonstration, and commercial ap-  
12          plications of technologies to improve total machine or sys-  
13          tem efficiency for nonroad mobile equipment including ag-  
14          ricultural, construction, air, and sea port equipment, and  
15          shall seek opportunities to transfer relevant research find-  
16          ings and technologies between the nonroad and on-high-  
17          way equipment and vehicle sectors.

18                           **PART III—ADMINISTRATION**

19   **SEC. 1312. REPEAL OF EXISTING AUTHORITIES.**

20          (a) **IN GENERAL.**—Sections 706, 711, 712, and 933  
21          of the Energy Policy Act of 2005 (42 U.S.C. 16051,  
22          16061, 16062, 16233) are repealed.

23          (b) **ENERGY EFFICIENCY.**—Section 911 of the En-  
24          ergy Policy Act of 2005 (42 U.S.C. 16191) is amended—

25                  (1) in subsection (a)—

1 (A) in paragraph (1)(A), by striking “vehi-  
 2 cles, buildings,” and inserting “buildings”; and  
 3 (B) in paragraph (2)—  
 4 (i) by striking subparagraph (A); and  
 5 (ii) by redesignating subparagraphs  
 6 (B) through (E) as subparagraphs (A)  
 7 through (D), respectively; and  
 8 (2) in subsection (c)—  
 9 (A) by striking paragraph (3);  
 10 (B) by redesignating paragraph (4) as  
 11 paragraph (3); and  
 12 (C) in paragraph (3) (as so redesignated),  
 13 by striking “(a)(2)(D)” and inserting  
 14 “(a)(2)(C)”.

## 15 **Subtitle E—Short Title**

### 16 **SEC. 1401. SHORT TITLE.**

17 This title may be cited as the “Portman-Shaheen En-  
 18 ergy Efficiency Improvement Act of 2016”.

## 19 **TITLE II—INFRASTRUCTURE**

### 20 **Subtitle A—Cybersecurity**

#### 21 **SEC. 2001. CYBERSECURITY THREATS.**

22 Part II of the Federal Power Act (16 U.S.C. 824 et  
 23 seq.) is amended by adding at the end the following:

#### 24 **“SEC. 224. CYBERSECURITY THREATS.**

25 “(a) **DEFINITIONS.**—In this section:

1           “(1) BULK-POWER SYSTEM.—The term ‘bulk-  
2 power system’ has the meaning given the term in  
3 section 215.

4           “(2) CRITICAL ELECTRIC INFRASTRUCTURE.—  
5 The term ‘critical electric infrastructure’ means a  
6 system or asset of the bulk-power system, whether  
7 physical or virtual, the incapacity or destruction of  
8 which would negatively affect national security, eco-  
9 nomic security, public health or safety, or any com-  
10 bination of those matters.

11           “(3) CRITICAL ELECTRIC INFRASTRUCTURE IN-  
12 FORMATION.—

13           “(A) IN GENERAL.—The term ‘critical  
14 electric infrastructure information’ means infor-  
15 mation related to critical electric infrastructure,  
16 or proposed critical electric infrastructure, gen-  
17 erated by or provided to the Commission or  
18 other Federal agency, other than classified na-  
19 tional security information, that is designated  
20 as critical electric infrastructure information by  
21 the Commission under subsection (d)(2).

22           “(B) INCLUSIONS.—The term ‘critical elec-  
23 tric infrastructure information’ includes infor-  
24 mation that qualifies as critical energy infra-

1 structure information under regulations promul-  
2 gated by the Commission.

3 “(4) CYBERSECURITY THREAT.—The term ‘cy-  
4 bersecurity threat’ means the imminent danger of an  
5 act that severely disrupts, attempts to severely dis-  
6 rupt, or poses a significant risk of severely dis-  
7 rupting the operation of programmable electronic de-  
8 vices or communications networks (including hard-  
9 ware, software, and data) essential to the reliable  
10 operation of the bulk-power system.

11 “(5) ELECTRIC RELIABILITY ORGANIZATION.—  
12 The term ‘Electric Reliability Organization’ has the  
13 meaning given the term in section 215.

14 “(6) REGIONAL ENTITY.—The term ‘regional  
15 entity’ has the meaning given the term in section  
16 215.

17 “(7) SECRETARY.—The term ‘Secretary’ means  
18 the Secretary of Energy.

19 “(b) EMERGENCY AUTHORITY OF SECRETARY.—

20 “(1) IN GENERAL.—If the President notifies  
21 the Secretary that the President has made a deter-  
22 mination that immediate action is necessary to pro-  
23 tect the bulk-power system from a cybersecurity  
24 threat, the Secretary may require, by order and with  
25 or without notice, any entity that is registered with

1 the Electric Reliability Organization as an owner,  
2 operator, or user of the bulk-power system to take  
3 such actions as the Secretary determines will best  
4 avert or mitigate the cybersecurity threat.

5 “(2) WRITTEN EXPLANATION.—As soon as  
6 practicable after notifying the Secretary under para-  
7 graph (1), the President shall—

8 “(A) provide to the Secretary, in writing,  
9 a record of the determination and an expla-  
10 nation of the reasons for the determination; and

11 “(B) promptly notify, in writing, congres-  
12 sional committees of relevant jurisdiction, in-  
13 cluding the Committee on Energy and Com-  
14 merce of the House of Representatives and the  
15 Committee on Energy and Natural Resources of  
16 the Senate, of the contents of, and justification  
17 for, the directive or determination.

18 “(3) COORDINATION WITH CANADA AND MEX-  
19 ICO.—In exercising the authority pursuant to this  
20 subsection, the Secretary is encouraged to consult  
21 and coordinate with the appropriate officials in Can-  
22 ada and Mexico responsible for the protection of cy-  
23 bersecurity of the interconnected North American  
24 electricity grid.

1           “(4) CONSULTATION.—Before exercising au-  
2           thority pursuant to this subsection, to the maximum  
3           extent practicable, taking into consideration the na-  
4           ture of an identified cybersecurity threat and the ur-  
5           gency of need for action, the Secretary shall consult  
6           regarding implementation of actions that will effec-  
7           tively address the cybersecurity threat with—

8                   “(A) any entities potentially subject to the  
9                   cybersecurity threat that own, control, or oper-  
10                  ate bulk-power system facilities;

11                  “(B) the Electric Reliability Organization;

12                  “(C) the Electricity Sub-sector Coordi-  
13                  nating Council (as established by the Electric  
14                  Reliability Organization); and

15                  “(D) officials of other Federal departments  
16                  and agencies, as appropriate.

17           “(5) COST RECOVERY.—

18                   “(A) IN GENERAL.—The Commission shall  
19                   adopt regulations that permit entities subject to  
20                   an order under paragraph (1) to seek recovery  
21                   of prudently incurred costs required to imple-  
22                   ment actions ordered by the Secretary under  
23                   this subsection.

1                   “(B) REQUIREMENTS.—Any rate or charge  
2                   approved under regulations adopted pursuant to  
3                   this paragraph—

4                   “(i) shall be just and reasonable; and  
5                   “(ii) shall not be unduly discrimina-  
6                   tory or preferential.

7                   “(c) DURATION OF EMERGENCY ORDERS.—An order  
8                   issued by the Secretary pursuant to subsection (b) shall  
9                   remain in effect for not longer than the 30-day period be-  
10                  ginning on the effective date of the order, unless, during  
11                  that 30 day-period, the Secretary—

12                  “(1) provides to interested persons an oppor-  
13                  tunity to submit written data, recommendations, and  
14                  arguments; and

15                  “(2) affirms, amends, or repeals the order, sub-  
16                  ject to the condition that an amended order shall not  
17                  exceed a total duration of 90 days.

18                  “(d) PROTECTION AND SHARING OF CRITICAL ELEC-  
19                  TRIC INFRASTRUCTURE.—

20                  “(1) PROTECTION OF CRITICAL ELECTRIC IN-  
21                  FRASTRUCTURE.—Critical electric infrastructure in-  
22                  formation—

23                  “(A) shall be exempt from disclosure under  
24                  section 552(b)(3) of title 5, United States Code;  
25                  and

1           “(B) shall not be made available by any  
2           State, political subdivision, or tribal authority  
3           pursuant to any State, political subdivision, or  
4           tribal law requiring disclosure of information or  
5           records.

6           “(2) DESIGNATION AND SHARING OF CRITICAL  
7           ELECTRIC INFRASTRUCTURE INFORMATION.—Not  
8           later than 1 year after the date of enactment of this  
9           section, the Commission, in consultation with the  
10          Secretary of Energy, shall promulgate such regula-  
11          tions and issue such orders as necessary—

12                 “(A) to designate critical electric infra-  
13                 structure information;

14                 “(B) to prohibit the unauthorized disclo-  
15                 sure of critical electric infrastructure informa-  
16                 tion; and

17                 “(C) to ensure there are appropriate sanc-  
18                 tions in place for Commissioners, officers, em-  
19                 ployees, or agents of the Commission who  
20                 knowingly and willfully disclose critical electric  
21                 infrastructure information in a manner that is  
22                 not authorized under this section;

23           “(3) CONSIDERATIONS.—In promulgating regu-  
24          lations and issuing orders under paragraph (2), the

1 Commission shall take into consideration the role of  
2 State commissions in—

3 “(A) reviewing the prudence and cost of  
4 investments;

5 “(B) determining the rates and terms of  
6 conditions for electric services; and

7 “(C) ensuring the safety and reliability of  
8 the bulk-power system and distribution facilities  
9 within the respective jurisdictions of the State  
10 commissions.

11 “(4) NO REQUIRED SHARING OF INFORMA-  
12 TION.—Nothing in this section requires a person or  
13 entity in possession of critical electric infrastructure  
14 information to share the information with Federal,  
15 State, political subdivision, or tribal authorities, or  
16 any other person or entity.

17 “(5) DISCLOSURE OF NONCRITICAL ELECTRIC  
18 INFRASTRUCTURE INFORMATION.—In carrying out  
19 this section, the Commission shall segregate critical  
20 electric infrastructure information within documents  
21 and electronic communications, wherever feasible, to  
22 facilitate disclosure of information that is not des-  
23 ignated as critical electric infrastructure informa-  
24 tion.”.

1 **SEC. 2002. ENHANCED GRID SECURITY.**

2 (a) DEFINITIONS.—In this section:

3 (1) ELECTRIC UTILITY.—The term “electric  
4 utility” has the meaning given the term in section  
5 3 of the Federal Power Act (16 U.S.C. 796).

6 (2) ES-ISAC.—The term “ES-ISAC” means  
7 the Electricity Sector Information Sharing and  
8 Analysis Center.

9 (3) NATIONAL LABORATORY.—The term “Na-  
10 tional Laboratory” has the meaning given the term  
11 in section 2 of the Energy Policy Act of 2005 (42  
12 U.S.C. 15801).

13 (4) SECTOR-SPECIFIC AGENCY.—The term  
14 “Sector-Specific Agency” has the meaning given the  
15 term in the Presidential policy directive entitled  
16 “Critical Infrastructure Security and Resilience”,  
17 numbered 21, and dated February 12, 2013.

18 (b) SECTOR-SPECIFIC AGENCY FOR CYBERSECURITY  
19 FOR THE ENERGY SECTOR.—

20 (1) IN GENERAL.—The Department shall be the  
21 lead Sector-Specific Agency for cybersecurity for the  
22 energy sector.

23 (2) DUTIES.—As the designated Sector-Specific  
24 Agency for cybersecurity, the duties of the Depart-  
25 ment shall include—

- 1 (A) coordinating with the Department of  
2 Homeland Security and other relevant Federal  
3 departments and agencies;
- 4 (B) collaborating with—
- 5 (i) critical infrastructure owners and  
6 operators; and
- 7 (ii) as appropriate—
- 8 (I) independent regulatory agen-  
9 cies; and
- 10 (II) State, local, tribal and terri-  
11 torial entities;
- 12 (C) serving as a day-to-day Federal inter-  
13 face for the dynamic prioritization and coordi-  
14 nation of sector-specific activities;
- 15 (D) carrying out incident management re-  
16 sponsibilities consistent with applicable law (in-  
17 cluding regulations) and other appropriate poli-  
18 cies or directives;
- 19 (E) providing, supporting, or facilitating  
20 technical assistance and consultations for the  
21 energy sector to identify vulnerabilities and help  
22 mitigate incidents, as appropriate; and
- 23 (F) supporting the reporting requirements  
24 of the Department of Homeland Security under  
25 applicable law by providing, on an annual basis,

1 sector-specific critical infrastructure informa-  
2 tion.

3 (c) CYBERSECURITY FOR THE ENERGY SECTOR RE-  
4 SEARCH, DEVELOPMENT, AND DEMONSTRATION PRO-  
5 GRAM.—

6 (1) IN GENERAL.—The Secretary, in consulta-  
7 tion with appropriate Federal agencies, the energy  
8 sector, the States, and other stakeholders, shall  
9 carry out a program—

10 (A) to develop advanced cybersecurity ap-  
11 plications and technologies for the energy sec-  
12 tor—

13 (i) to identify and mitigate  
14 vulnerabilities, including—

15 (I) dependencies on other critical  
16 infrastructure; and

17 (II) impacts from weather and  
18 fuel supply; and

19 (ii) to advance the security of field de-  
20 vices and third-party control systems, in-  
21 cluding—

22 (I) systems for generation, trans-  
23 mission, distribution, end use, and  
24 market functions;

1 (II) specific electric grid elements  
2 including advanced metering, demand  
3 response, distributed generation, and  
4 electricity storage;

5 (III) forensic analysis of infected  
6 systems; and

7 (IV) secure communications;

8 (B) to leverage electric grid architecture as  
9 a means to assess risks to the energy sector, in-  
10 cluding by implementing an all-hazards ap-  
11 proach to communications infrastructure, con-  
12 trol systems architecture, and power systems  
13 architecture;

14 (C) to perform pilot demonstration projects  
15 with the energy sector to gain experience with  
16 new technologies; and

17 (D) to develop workforce development cur-  
18 ricula for energy sector-related cybersecurity.

19 (2) AUTHORIZATION OF APPROPRIATIONS.—

20 There is authorized to be appropriated to carry out  
21 this subsection \$65,000,000 for each of fiscal years  
22 2017 through 2025.

23 (d) ENERGY SECTOR COMPONENT TESTING FOR  
24 CYBERRESILIENCE PROGRAM.—

1           (1) IN GENERAL.—The Secretary shall carry  
2 out a program—

3           (A) to establish a cybertesting and mitiga-  
4 tion program to identify vulnerabilities of en-  
5 ergy sector supply chain products to known  
6 threats;

7           (B) to oversee third-party cybertesting;  
8 and

9           (C) to develop procurement guidelines for  
10 energy sector supply chain components.

11           (2) AUTHORIZATION OF APPROPRIATIONS.—

12 There is authorized to be appropriated to carry out  
13 this subsection \$15,000,000 for each of fiscal years  
14 2017 through 2025.

15           (e) ENERGY SECTOR OPERATIONAL SUPPORT FOR  
16 CYBERRESILIENCE PROGRAM.—

17           (1) IN GENERAL.—The Secretary may carry out  
18 a program—

19           (A) to enhance and periodically test—

20                   (i) the emergency response capabilities  
21 of the Department; and

22                   (ii) the coordination of the Depart-  
23 ment with other agencies, the National  
24 Laboratories, and private industry;

1 (B) to expand cooperation of the Depart-  
2 ment with the intelligence communities for en-  
3 ergy sector-related threat collection and anal-  
4 ysis;

5 (C) to enhance the tools of the Department  
6 and ES-ISAC for monitoring the status of the  
7 energy sector;

8 (D) to expand industry participation in  
9 ES-ISAC; and

10 (E) to provide technical assistance to small  
11 electric utilities for purposes of assessing  
12 cybermaturity level.

13 (2) AUTHORIZATION OF APPROPRIATIONS.—  
14 There is authorized to be appropriated to carry out  
15 this subsection \$10,000,000 for each of fiscal years  
16 2017 through 2025.

17 (f) MODELING AND ASSESSING ENERGY INFRA-  
18 STRUCTURE RISK.—

19 (1) IN GENERAL.—The Secretary shall develop  
20 an advanced energy security program to secure en-  
21 ergy networks, including electric, natural gas, and  
22 oil exploration, transmission, and delivery.

23 (2) SECURITY AND RESILIENCY OBJECTIVE.—  
24 The objective of the program developed under para-  
25 graph (1) is to increase the functional preservation

1 of the electric grid operations or natural gas and oil  
2 operations in the face of natural and human-made  
3 threats and hazards, including electric magnetic  
4 pulse and geomagnetic disturbances.

5 (3) ELIGIBLE ACTIVITIES.—In carrying out the  
6 program developed under paragraph (1), the Sec-  
7 retary may—

8 (A) develop capabilities to identify  
9 vulnerabilities and critical components that pose  
10 major risks to grid security if destroyed or im-  
11 paired;

12 (B) provide modeling at the national level  
13 to predict impacts from natural or human-made  
14 events;

15 (C) develop a maturity model for physical  
16 security and cybersecurity;

17 (D) conduct exercises and assessments to  
18 identify and mitigate vulnerabilities to the elec-  
19 tric grid, including providing mitigation rec-  
20 ommendations;

21 (E) conduct research hardening solutions  
22 for critical components of the electric grid;

23 (F) conduct research mitigation and recov-  
24 ery solutions for critical components of the elec-  
25 tric grid; and

1                   (G) provide technical assistance to States  
2                   and other entities for standards and risk anal-  
3                   ysis.

4                   (4) AUTHORIZATION OF APPROPRIATIONS.—

5                   There is authorized to be appropriated to carry out  
6                   this subsection \$10,000,000 for each of fiscal years  
7                   2017 through 2025.

8                   (g) LEVERAGING EXISTING PROGRAMS.—The pro-  
9                   grams established under this section shall be carried out  
10                  consistent with—

11                  (1) the report of the Department entitled  
12                  “Roadmap to Achieve Energy Delivery Systems Cy-  
13                  bersecurity” and dated 2011;

14                  (2) existing programs of the Department; and

15                  (3) any associated strategic framework that  
16                  links together academic and National Laboratory re-  
17                  searchers, electric utilities, manufacturers, and any  
18                  other relevant private industry organizations, includ-  
19                  ing the Electricity Sub-sector Coordinating Council.

20                  (h) STUDY.—

21                  (1) IN GENERAL.—Not later than 180 days  
22                  after the date of enactment of this Act, the Sec-  
23                  retary, in consultation with the Federal Energy Reg-  
24                  ulatory Commission and the North American Elec-  
25                  tric Reliability Corporation, shall conduct a study to

1 explore alternative management structures and fund-  
2 ing mechanisms to expand industry membership and  
3 participation in ES–ISAC.

4 (2) REPORT.—The Secretary shall submit to  
5 the appropriate committees of Congress a report de-  
6 scribing the results of the study conducted under  
7 paragraph (1).

## 8 **Subtitle B—Strategic Petroleum** 9 **Reserve**

### 10 **SEC. 2101. STRATEGIC PETROLEUM RESERVE MODERNIZA-** 11 **TION.**

12 (a) REAFFIRMATION OF POLICY.—Congress reaff-  
13 firms the continuing strategic importance and need for the  
14 Strategic Petroleum Reserve as found and declared in sec-  
15 tion 151 of the Energy Policy and Conservation Act (42  
16 U.S.C. 6231).

17 (b) SPR PETROLEUM ACCOUNT.—Section 167(b) of  
18 the Energy Policy and Conservation Act (42 U.S.C.  
19 6247(b)) is amended to read as follows:

20 “(b) OBLIGATION OF FUNDS FOR THE ACQUISITION,  
21 TRANSPORTATION, AND INJECTION OF PETROLEUM  
22 PRODUCTS INTO SPR AND FOR OTHER PURPOSES.—

23 “(1) PURPOSES.—Amounts in the Account may  
24 be obligated by the Secretary of Energy for—

1           “(A) the acquisition, transportation, and  
2 injection of petroleum products into the Re-  
3 serve;

4           “(B) test sales of petroleum products from  
5 the Reserve;

6           “(C) the drawdown, sale, and delivery of  
7 petroleum products from the Reserve;

8           “(D) the construction, maintenance, re-  
9 pair, and replacement of storage facilities and  
10 related facilities; and

11           “(E) carrying out non-Reserve projects  
12 needed to enhance the energy security of the  
13 United States by increasing the resilience, reli-  
14 ability, safety, and security of energy supply,  
15 transmission, storage, or distribution infrastruc-  
16 ture.

17           “(2) AMOUNTS.—Amounts in the Account may  
18 be obligated by the Secretary of Energy for purposes  
19 of paragraph (1), in the case of any fiscal year—

20           “(A) subject to section 660 of the Depart-  
21 ment of Energy Organization Act (42 U.S.C.  
22 7270), in such aggregate amounts as may be  
23 appropriated in advance in appropriations Acts;  
24 and

1           “(B) notwithstanding section 660 of the  
2           Department of Energy Organization Act (42  
3           U.S.C. 7270), in an aggregate amount equal to  
4           the aggregate amount of the receipts to the  
5           United States from the sale of petroleum prod-  
6           ucts in any drawdown and a distribution of the  
7           Reserve under section 161, including—

8                   “(i) a drawdown and distribution car-  
9                   ried out under subsection (g) of that sec-  
10                  tion; or

11                   “(ii) from the sale of petroleum prod-  
12                  ucts under section 160(f).

13           “(3) AVAILABILITY OF FUNDS.—Funds avail-  
14           able to the Secretary of Energy for obligation under  
15           this subsection may remain available without fiscal  
16           year limitation.”.

17           (c) DEFINITION OF RELATED FACILITY.—Section  
18           152(8) of the Energy Policy and Conservation Act (42  
19           U.S.C. 6232(8)) is amended by inserting “terminals,”  
20           after “reservoirs,”.

## 21                   **Subtitle C—Trade**

### 22           **SEC. 2201. ACTION ON APPLICATIONS TO EXPORT LIQUE-** 23           **FIED NATURAL GAS.**

24           (a) DECISION DEADLINE.—For proposals that must  
25           also obtain authorization from the Federal Energy Regu-

1 latory Commission or the Maritime Administration to site,  
2 construct, expand, or operate liquefied natural gas export  
3 facilities, the Secretary shall issue a final decision on any  
4 application for the authorization to export natural gas  
5 under section 3(a) of the Natural Gas Act (15 U.S.C.  
6 717b(a)) not later than 45 days after the later of—

7 (1) the conclusion of the review to site, con-  
8 struct, expand, or operate the liquefied natural gas  
9 export facilities required by the National Environ-  
10 mental Policy Act of 1969 (42 U.S.C. 4321 et seq.);  
11 or

12 (2) the date of enactment of this Act.

13 (b) CONCLUSION OF REVIEW.—For purposes of sub-  
14 section (a), review required by the National Environ-  
15 mental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall  
16 be considered concluded when the lead agency—

17 (1) for a project requiring an Environmental  
18 Impact Statement, publishes a Final Environmental  
19 Impact Statement;

20 (2) for a project for which an Environmental  
21 Assessment has been prepared, publishes a Finding  
22 of No Significant Impact; or

23 (3) determines that an application is eligible for  
24 a categorical exclusion pursuant to National Envi-

1       ronmental Policy Act of 1969 (42 U.S.C. 4321 et  
2       seq.) implementing regulations.

3       (c) JUDICIAL REVIEW.—

4             (1) IN GENERAL.—Except for review in the Su-  
5       preme Court, the United States Court of Appeals for  
6       the District of Columbia Circuit or the circuit in  
7       which the liquefied natural gas export facility will be  
8       located pursuant to an application described in sub-  
9       section (a) shall have original and exclusive jurisdic-  
10      tion over any civil action for the review of—

11             (A) an order issued by the Secretary with  
12      respect to such application; or

13             (B) the failure of the Secretary to issue a  
14      final decision on such application.

15             (2) ORDER.—If the Court in a civil action de-  
16      scribed in paragraph (1) finds that the Secretary  
17      has failed to issue a final decision on the application  
18      as required under subsection (a), the Court shall  
19      order the Secretary to issue the final decision not  
20      later than 30 days after the order of the Court.

21             (3) EXPEDITED CONSIDERATION.—The Court  
22      shall—

23             (A) set any civil action brought under this  
24      subsection for expedited consideration; and

1 (B) set the matter on the docket as soon  
2 as practicable after the filing date of the initial  
3 pleading.

4 (4) TRANSFERS.—In the case of an application  
5 described in subsection (a) for which a petition for  
6 review has been filed—

7 (A) upon motion by an applicant, the mat-  
8 ter shall be transferred to the United States  
9 Court of Appeals for the District of Columbia  
10 Circuit or the circuit in which a liquefied nat-  
11 ural gas export facility will be located pursuant  
12 to an application described in section 3(a) of  
13 the Natural Gas Act (15 U.S.C. 717b(a)); and

14 (B) the provisions of this section shall  
15 apply.

16 **SEC. 2202. PUBLIC DISCLOSURE OF LIQUEFIED NATURAL**  
17 **GAS EXPORT DESTINATIONS.**

18 Section 3 of the Natural Gas Act (15 U.S.C. 717b)  
19 is amended by adding at the end the following:

20 “(g) PUBLIC DISCLOSURE OF LNG EXPORT DES-  
21 TINATIONS.—

22 “(1) IN GENERAL.—In the case of any author-  
23 ization to export liquefied natural gas, the Secretary  
24 of Energy shall require the applicant to report to the  
25 Secretary of Energy the names of the 1 or more

1 countries of destination to which the exported lique-  
2 fied natural gas is delivered.

3 “(2) TIMING.—The applicant shall file the re-  
4 port required under paragraph (1) not later than—

5 “(A) in the case of the first export, the  
6 last day of the month following the month of  
7 the first export; and

8 “(B) in the case of subsequent exports, the  
9 date that is 30 days after the last day of the  
10 applicable month concerning the activity of the  
11 previous month.

12 “(3) DISCLOSURE.—The Secretary of Energy  
13 shall publish the information reported under this  
14 subsection on the website of the Department of En-  
15 ergy and otherwise make the information available  
16 to the public.”.

17 **SEC. 2203. ENERGY DATA COLLABORATION.**

18 (a) IN GENERAL.—The Administrator of the Energy  
19 Information Administration (referred to in this section as  
20 the “Administrator”) shall collaborate with the appro-  
21 priate officials in Canada and Mexico, as determined by  
22 the Administrator, to improve—

23 (1) the quality and transparency of energy data  
24 in North America through reconciliation of data on

1 energy trade flows among the United States, Can-  
2 ada, and Mexico;

3 (2) the extension of energy mapping capabilities  
4 in the United States, Canada, and Mexico; and

5 (3) the development of common energy data  
6 terminology among the United States, Canada, and  
7 Mexico.

8 (b) PERIODIC UPDATES.—The Administrator shall  
9 periodically submit to the Committee on Energy and Nat-  
10 ural Resources of the Senate and the Committee on En-  
11 ergy and Commerce of the House of Representatives an  
12 update on—

13 (1) the extent to which energy data is being  
14 shared under subsection (a); and

15 (2) whether forward-looking projections for re-  
16 gional energy flows are improving in accuracy as a  
17 result of the energy data sharing under that sub-  
18 section.

## 19 **Subtitle D—Electricity and Energy** 20 **Storage**

### 21 **SEC. 2301. GRID STORAGE PROGRAM.**

22 (a) IN GENERAL.—The Secretary shall conduct a  
23 program of research, development, and demonstration of  
24 electric grid energy storage that addresses the principal

1 challenges identified in the 2013 Department of Energy  
2 Strategic Plan for Grid Energy Storage.

3 (b) AREAS OF FOCUS.—The program under this sec-  
4 tion shall focus on—

5 (1) materials and electrochemical systems re-  
6 search;

7 (2) power conversion technologies research;

8 (3) developing—

9 (A) empirical and science-based industry  
10 standards to compare the storage capacity,  
11 cycle length and capabilities, and reliability of  
12 different types of electricity storage; and

13 (B) validation and testing techniques;

14 (4) other fundamental and applied research  
15 critical to widespread deployment of electricity stor-  
16 age;

17 (5) device development that builds on results  
18 from research described in paragraphs (1), (2), and  
19 (4), including combinations of power electronics, ad-  
20 vanced optimizing controls, and energy storage as a  
21 general purpose element of the electric grid;

22 (6) grid-scale testing and analysis of storage  
23 devices, including test-beds and field trials;

1           (7) cost-benefit analyses that inform capital ex-  
2           penditure planning for regulators and owners and  
3           operators of components of the electric grid;

4           (8) electricity storage device safety and reli-  
5           ability, including potential failure modes, mitigation  
6           measures, and operational guidelines;

7           (9) standards for storage device performance,  
8           control interface, grid interconnection, and inter-  
9           operability; and

10          (10) maintaining a public database of energy  
11          storage projects, policies, codes, standards, and reg-  
12          ulations.

13          (c) ASSISTANCE TO STATES.—The Secretary may  
14          provide technical and financial assistance to States, Indian  
15          tribes, or units of local government to participate in or  
16          use research, development, or deployment of technology  
17          developed under this section.

18          (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
19          authorized to be appropriated to the Secretary to carry  
20          out this section \$50,000,000 for each of fiscal years 2017  
21          through 2026.

22          (e) NO EFFECT ON OTHER PROVISIONS OF LAW.—  
23          Nothing in this subtitle or an amendment made by this  
24          subtitle authorizes regulatory actions that would duplicate  
25          or conflict with regulatory requirements, mandatory

1 standards, or related processes under section 215 of the  
2 Federal Power Act (16 U.S.C. 824o).

3 **SEC. 2302. ELECTRIC SYSTEM GRID ARCHITECTURE, SCE-**  
4 **NARIO DEVELOPMENT, AND MODELING.**

5 (a) GRID ARCHITECTURE AND SCENARIO DEVELOP-  
6 MENT.—

7 (1) IN GENERAL.—Subject to paragraph (2),  
8 the Secretary shall establish and facilitate a collabo-  
9 rative process to develop model grid architecture and  
10 a set of future scenarios for the electric system to  
11 examine the impacts of different combinations of re-  
12 sources (including different quantities of distributed  
13 energy resources and large-scale, central generation)  
14 on the electric grid.

15 (2) MARKET STRUCTURE.—The grid architec-  
16 ture and scenarios developed under paragraph (1)  
17 shall account for differences in market structure, in-  
18 cluding an examination of the potential for stranded  
19 costs in each type of market structure.

20 (3) FINDINGS.—Based on the findings of grid  
21 architecture developed under paragraph (1), the Sec-  
22 retary shall—

23 (A) determine whether any additional  
24 standards are necessary to ensure the interoper-

1 ability of grid systems and associated commu-  
2 nications networks; and

3 (B) if the Secretary makes a determination  
4 that additional standards are necessary under  
5 subparagraph (A), make recommendations for  
6 additional standards, including, as may be ap-  
7 propriate, to the Electric Reliability Organiza-  
8 tion under section 215 of the Federal Power  
9 Act (16 U.S.C. 824o).

10 (b) MODELING.—Subject to subsection (c), the Sec-  
11 retary shall—

12 (1) conduct modeling based on the scenarios de-  
13 veloped under subsection (a); and

14 (2) analyze and evaluate the technical and fi-  
15 nancial impacts of the models to assist States, utili-  
16 ties, and other stakeholders in—

17 (A) enhancing strategic planning efforts;

18 (B) avoiding stranded costs; and

19 (C) maximizing the cost-effectiveness of fu-  
20 ture grid-related investments.

21 (c) INPUT.—The Secretary shall develop the sce-  
22 narios and conduct the modeling and analysis under sub-  
23 sections (a) and (b) with participation or input, as appro-  
24 priate, from—

25 (1) the National Laboratories;

- 1 (2) States;
- 2 (3) State regulatory authorities;
- 3 (4) transmission organizations;
- 4 (5) representatives of the electric industry;
- 5 (6) academic institutions;
- 6 (7) independent research institutes; and
- 7 (8) other entities.

8 **SEC. 2303. TECHNOLOGY DEMONSTRATION ON THE DIS-**  
9 **TRIBUTION SYSTEM.**

10 (a) IN GENERAL.—The Secretary shall establish a  
11 grant program to carry out eligible projects related to the  
12 modernization of the electric grid, including the applica-  
13 tion of technologies to improve observability, advanced  
14 controls, and prediction of system performance on the dis-  
15 tribution system.

16 (b) ELIGIBLE PROJECTS.—To be eligible for a grant  
17 under subsection (a), a project shall—

18 (1) be designed to improve the performance and  
19 efficiency of the future electric grid, while ensuring  
20 the continued provision of safe, secure, reliable, and  
21 affordable power; and

22 (2) demonstrate—

23 (A) secure integration and management of  
24 2 or more energy resources, including distrib-  
25 uted energy generation, combined heat and

1 power, micro-grids, energy storage, electric ve-  
2 hicles, energy efficiency, demand response, and  
3 intelligent loads; and

4 (B) secure integration and interoperability  
5 of communications and information tech-  
6 nologies.

7 (c) PARTICIPATION.—Projects conducted under sub-  
8 section (b) shall include the participation of a partnership  
9 consisting of 2 or more entities that—

10 (1) may include

11 (A) any institution of higher education;

12 (B) a National Laboratory;

13 (C) a representative of a State or local  
14 government;

15 (D) a representative of an Indian tribe; or

16 (E) a Federal power marketing adminis-  
17 tration; and

18 (2) shall include at least 1 of any of—

19 (A) an investor-owned electric utility;

20 (B) a publicly owned utility;

21 (C) a technology provider;

22 (D) a rural electric cooperative;

23 (E) a regional transmission organization;

24 or

25 (F) an independent system operator

1 (d) CYBERSECURITY PLAN.—Each demonstration  
2 project conducted under subsection (a) shall include the  
3 development of a cybersecurity plan approved by the Sec-  
4 retary.

5 (e) PRIVACY RISK ANALYSIS.—Each demonstration  
6 project conducted under subsection (a) shall include a pri-  
7 vacy impact assessment that evaluates the project against  
8 the 5 core concepts in the Voluntary Code of Conduct of  
9 the Department, commonly known as the “DataGuard  
10 Energy Data Privacy Program”, or the most recent revi-  
11 sions to the privacy program of the Department.

12 **SEC. 2304. HYBRID MICRO-GRID SYSTEMS FOR ISOLATED**  
13 **AND RESILIENT COMMUNITIES.**

14 (a) DEFINITIONS.—In this section:

15 (1) HYBRID MICRO-GRID SYSTEM.—The term  
16 “hybrid micro-grid system” means a stand-alone  
17 electrical system that—

18 (A) is comprised of conventional generation  
19 and at least 1 alternative energy resource; and

20 (B) may use grid-scale energy storage.

21 (2) ISOLATED COMMUNITY.—The term “iso-  
22 lated community” means a community that is pow-  
23 ered by a stand-alone electric generation and dis-  
24 tribution system without the economic and reliability  
25 benefits of connection to a regional electric grid.

1           (3) MICRO-GRID SYSTEM.—The term “micro-  
2           grid system” means a standalone electrical system  
3           that uses grid-scale energy storage.

4           (4) STRATEGY.—The term “strategy” means  
5           the strategy developed pursuant to subsection  
6           (b)(2)(B).

7           (b) PROGRAM.—

8           (1) ESTABLISHMENT.—The Secretary shall es-  
9           tablish a program to promote the development of—

10           (A) hybrid micro-grid systems for isolated  
11           communities; and

12           (B) micro-grid systems to increase the re-  
13           silience of critical infrastructure.

14           (2) PHASES.—The program established under  
15           paragraph (1) shall be divided into the following  
16           phases:

17           (A) Phase I, which shall consist of the de-  
18           velopment of a feasibility assessment for—

19           (i) hybrid micro-grid systems in iso-  
20           lated communities; and

21           (ii) micro-grid systems to enhance the  
22           resilience of critical infrastructure.

23           (B) Phase II, which shall consist of the de-  
24           velopment of an implementation strategy, in ac-  
25           cordance with paragraph (3), to promote the

1 development of hybrid micro-grid systems for  
2 isolated communities, particularly for those  
3 communities exposed to extreme weather condi-  
4 tions and high energy costs, including elec-  
5 tricity, space heating and cooling, and transpor-  
6 tation.

7 (C) Phase III, which shall be carried out  
8 in parallel with Phase II and consist of the de-  
9 velopment of an implementation strategy to  
10 promote the development of micro-grid systems  
11 that increase the resilience of critical infrastruc-  
12 ture.

13 (D) Phase IV, which shall consist of cost-  
14 shared demonstration projects, based upon the  
15 strategies developed under subparagraph (B)  
16 that include the development of physical and cy-  
17 bersecurity plans to take appropriate measures  
18 to protect and secure the electric grid.

19 (E) Phase V, which shall establish a bene-  
20 fits analysis plan to help inform regulators, pol-  
21 icymakers, and industry stakeholders about the  
22 affordability, environmental and resilience bene-  
23 fits associated with Phases II, III and IV.

1           (3) REQUIREMENTS FOR STRATEGY.—In devel-  
2           oping the strategy under paragraph (2)(B), the Sec-  
3           retary shall consider—

4                   (A) establishing future targets for the eco-  
5                   nomic displacement of conventional generation  
6                   using hybrid micro-grid systems, including dis-  
7                   placement of conventional generation used for  
8                   electric power generation, heating and cooling,  
9                   and transportation;

10                   (B) the potential for renewable resources,  
11                   including wind, solar, and hydropower, to be in-  
12                   tegrated into a hybrid micro-grid system;

13                   (C) opportunities for improving the effi-  
14                   ciency of existing hybrid micro-grid systems;

15                   (D) the capacity of the local workforce to  
16                   operate, maintain, and repair a hybrid micro-  
17                   grid system;

18                   (E) opportunities to develop the capacity of  
19                   the local workforce to operate, maintain, and  
20                   repair a hybrid micro-grid system;

21                   (F) leveraging existing capacity within  
22                   local or regional research organizations, such as  
23                   organizations based at institutions of higher  
24                   education, to support development of hybrid  
25                   micro-grid systems, including by testing novel

1 components and systems prior to field deploy-  
2 ment;

3 (G) the need for basic infrastructure to de-  
4 velop, deploy, and sustain a hybrid micro-grid  
5 system;

6 (H) input of traditional knowledge from  
7 local leaders of isolated communities in the de-  
8 velopment of a hybrid micro-grid system;

9 (I) the impact of hybrid micro-grid systems  
10 on defense, homeland security, economic devel-  
11 opment, and environmental interests;

12 (J) opportunities to leverage existing inter-  
13 agency coordination efforts and recommenda-  
14 tions for new interagency coordination efforts to  
15 minimize unnecessary overhead, mobilization,  
16 and other project costs; and

17 (K) any other criteria the Secretary deter-  
18 mines appropriate.

19 (c) COLLABORATION.—The program established  
20 under subsection (b)(1) shall be carried out in collabora-  
21 tion with relevant stakeholders, including, as appro-  
22 priate—

23 (1) States;

24 (2) Indian tribes;

25 (3) regional entities and regulators;

1 (4) units of local government;

2 (5) institutions of higher education; and

3 (6) private sector entities.

4 (d) REPORT.—Not later than 180 days after the date  
5 of enactment of this Act, and annually thereafter, the Sec-  
6 retary shall submit to the Committee on Energy and Nat-  
7 ural Resources of the Senate and the Committee on En-  
8 ergy and Commerce of the House of Representatives a re-  
9 port on the efforts to implement the program established  
10 under subsection (b)(1) and the status of the strategy de-  
11 veloped under subsection (b)(2)(B).

12 **SEC. 2305. VOLUNTARY MODEL PATHWAYS.**

13 (a) ESTABLISHMENT OF VOLUNTARY MODEL PATH-  
14 WAYS.—

15 (1) ESTABLISHMENT.—Not later than 90 days  
16 after the date of enactment of this Act, the Sec-  
17 retary shall initiate the development of voluntary  
18 model pathways for modernizing the electric grid  
19 through a collaborative, public-private effort that—

20 (A) produces illustrative policy pathways  
21 that can be adapted for State and regional ap-  
22 plications by regulators and policymakers;

23 (B) facilitates the modernization of the  
24 electric grid to achieve the objectives described  
25 in paragraph (2);

1 (C) ensures a reliable, resilient, affordable,  
2 safe, and secure electric system; and

3 (D) acknowledges and provides for dif-  
4 ferent priorities, electric systems, and rate  
5 structures across States and regions.

6 (2) OBJECTIVES.—The pathways established  
7 under paragraph (1) shall facilitate achievement of  
8 the following objectives:

9 (A) Near real-time situational awareness of  
10 the electric system.

11 (B) Data visualization.

12 (C) Advanced monitoring and control of  
13 the advanced electric grid.

14 (D) Enhanced certainty for private invest-  
15 ment in the electric system.

16 (E) Increased innovation.

17 (F) Greater consumer empowerment.

18 (G) Enhanced grid resilience, reliability,  
19 and robustness.

20 (H) Improved—

21 (i) integration of distributed energy  
22 resources;

23 (ii) interoperability of the electric sys-  
24 tem; and

1 (iii) predictive modeling and capacity  
2 forecasting.

3 (3) STEERING COMMITTEE.—Not later than 90  
4 days after the date of enactment of this Act, the  
5 Secretary shall establish a steering committee to fa-  
6 cilitate the development of the pathways under para-  
7 graph (1), to be composed of members appointed by  
8 the Secretary, consisting of persons with appropriate  
9 expertise representing a diverse range of interests in  
10 the public, private, and academic sectors, including  
11 representatives of—

12 (A) the Smart Grid Task Force; and

13 (B) the Smart Grid Advisory Committee.

14 (b) TECHNICAL ASSISTANCE.—The Secretary may  
15 provide technical assistance to States, Indian tribes, or  
16 units of local government to adopt 1 or more elements of  
17 the pathways developed under subsection (a)(1).

18 **SEC. 2306. PERFORMANCE METRICS FOR ELECTRICITY IN-**

19 **FRASTRUCTURE PROVIDERS.**

20 (a) IN GENERAL.—Not later than 2 years after the  
21 date of enactment of this Act, the Secretary shall submit  
22 to the appropriate committees of Congress a report that  
23 includes—

24 (1) an evaluation of the performance of the  
25 electric grid as of the date of the report; and

1           (2) a description of the quantified costs and  
2           benefits associated with the changes evaluated under  
3           the scenarios developed under section 2302.

4           (b) CONSIDERATIONS FOR DEVELOPMENT OF  
5 METRICS.—In developing metrics for evaluating and  
6 quantifying the electric grid under subsection (a), the Sec-  
7 retary shall consider—

8           (1) standard methodologies for calculating im-  
9           provements or deteriorations in the performance  
10          metrics, such as reliability, grid efficiency, power  
11          quality, consumer satisfaction, sustainability, and fi-  
12          nancial incentives;

13          (2) standard methodologies for calculating value  
14          to ratepayers, including broad economic and related  
15          impacts from improvements to the performance  
16          metrics;

17          (3) appropriate ownership and operating roles  
18          for electric utilities that would enable improved per-  
19          formance through the adoption of emerging, com-  
20          mercially available or advanced grid technologies or  
21          solutions, including—

22                 (A) multicustomer micro-grids;

23                 (B) distributed energy resources;

24                 (C) energy storage;

25                 (D) electric vehicles;

1 (E) electric vehicle charging infrastructure;

2 (F) integrated information and commu-

3 nications systems;

4 (G) transactive energy systems; and

5 (H) advanced demand management sys-

6 tems; and

7 (4) with respect to States, the role of the grid

8 operator in enabling a robust future electric system

9 to ensure that—

10 (A) electric utilities remain financially via-

11 ble;

12 (B) electric utilities make the needed in-

13 vestments that ensure a reliable, secure, and re-

14 siliant grid; and

15 (C) costs incurred to transform to an inte-

16 grated grid are allocated and recovered respon-

17 sibly, efficiently, and equitably.

18 **SEC. 2307. STATE AND REGIONAL ELECTRICITY DISTRIBU-**

19 **TION PLANNING.**

20 (a) **IN GENERAL.**—Upon the request of a State or

21 regional organization, the Secretary shall partner with

22 States and regional organizations to facilitate the develop-

23 ment of State and regional electricity distribution plans

24 by—

1           (1) conducting a resource assessment and anal-  
2           ysis of future demand and distribution requirements;  
3           and

4           (2) developing open source tools for State and  
5           regional planning and operations.

6           (b) **RISK AND SECURITY ANALYSIS.**—The assessment  
7           under subsection (a)(1) shall include—

8           (1) the evaluation of the physical and cyberse-  
9           curity needs of an advanced distribution manage-  
10          ment system and the integration of distributed en-  
11          ergy resources; and

12          (2) advanced use of grid architecture to analyze  
13          risks in an all-hazards approach that includes com-  
14          munications infrastructure, control systems architec-  
15          ture, and power systems architecture.

16          (c) **TECHNICAL ASSISTANCE.**—For the purpose of de-  
17          veloping State and regional electricity distribution plans,  
18          the Secretary shall provide technical assistance to—

19               (1) States;

20               (2) regional reliability entities; and

21               (3) other distribution asset owners and opera-  
22          tors.

1 **SEC. 2308. AUTHORIZATION OF APPROPRIATIONS.**

2 There is authorized to be appropriated to the Sec-  
3 retary to carry out sections 2302 through 2307  
4 \$200,000,000 for each of fiscal years 2017 through 2026.

5 **SEC. 2309. ELECTRIC TRANSMISSION INFRASTRUCTURE**  
6 **PERMITTING.**

7 (a) INTERAGENCY RAPID RESPONSE TEAM FOR  
8 TRANSMISSION.—

9 (1) ESTABLISHMENT.—There is established an  
10 interagency rapid response team, to be known as the  
11 “Interagency Rapid Response Team for Trans-  
12 mission” (referred to in this subsection as the  
13 “Team”), to expedite and improve the permitting  
14 process for electric transmission infrastructure on  
15 Federal land and non-Federal land.

16 (2) MISSION.—The mission of the Team shall  
17 be—

18 (A) to improve the timeliness and effi-  
19 ciency of electric transmission infrastructure  
20 permitting; and

21 (B) to facilitate the performance of main-  
22 tenance and upgrades to electric transmission  
23 lines on Federal land and non-Federal land.

24 (3) MEMBERSHIP.—The Team shall be com-  
25 prised of representatives of—

- 1 (A) the Federal Energy Regulatory Com-  
2 mission;
- 3 (B) the Department;
- 4 (C) the Department of the Interior;
- 5 (D) the Department of Defense;
- 6 (E) the Department of Agriculture;
- 7 (F) the Council on Environmental Quality;
- 8 (G) the Department of Commerce;
- 9 (H) the Advisory Council on Historic Pres-  
10 ervation; and
- 11 (I) the Environmental Protection Agency.

12 (4) DUTIES.—The Team shall—

13 (A) facilitate coordination and unified envi-  
14 ronmental documentation among electric trans-  
15 mission infrastructure project applicants, Fed-  
16 eral agencies, States, and Indian tribes involved  
17 in the siting and permitting process;

18 (B) establish clear timelines for the review  
19 and coordination of electric transmission infra-  
20 structure projects by the applicable agencies;

21 (C) ensure that each electric transmission  
22 infrastructure project is posted on the Federal  
23 permitting transmission tracking system known  
24 as “e-Trans”, including information on the sta-

1           tus and anticipated completion date of each  
2           project; and

3           (D) regularly notify all participating mem-  
4           bers of the Team involved in any specific permit  
5           of—

6                   (i) any outstanding agency action that  
7                   is required with respect to the permit; and

8                   (ii) any approval or required comment  
9                   that has exceeded statutory or agency  
10                  timelines for completion, including an iden-  
11                  tification of any Federal agency, depart-  
12                  ment, or field office that has not met the  
13                  applicable timeline.

14           (5) ANNUAL REPORTS.—Annually, the Team  
15           shall submit to the Committee on Energy and Nat-  
16           ural Resources of the Senate and the Committee on  
17           Energy and Commerce of the House of Representa-  
18           tives a report that describes the average completion  
19           time for specific categories of regionally and nation-  
20           ally significant transmission projects, based on infor-  
21           mation obtained from the applicable Federal agen-  
22           cies.

23           (6) USE OF DATA BY OMB.—Using data pro-  
24           vided by the Team, the Director of the Office of  
25           Management and Budget shall prioritize inclusion of

1 individual electric transmission infrastructure  
2 projects on the website operated by the Office of  
3 Management and Budget in accordance with section  
4 1122 of title 31, United States Code.

5 (b) TRANSMISSION OMBUDSPERSON.—

6 (1) ESTABLISHMENT.—To enhance and ensure  
7 the reliability of the electric grid, there is established  
8 within the Council on Environmental Quality the po-  
9 sition of Transmission Ombudsperson (referred to in  
10 this subsection as the “Ombudsperson”), to provide  
11 a unified point of contact for—

12 (A) resolving interagency or intra-agency  
13 issues or delays with respect to electric trans-  
14 mission infrastructure permits; and

15 (B) receiving and resolving complaints  
16 from parties with outstanding or in-process ap-  
17 plications relating to electric transmission infra-  
18 structure.

19 (2) DUTIES.—The Ombudsperson shall—

20 (A) establish a process for—

21 (i) facilitating the permitting process  
22 for performance of maintenance and up-  
23 grades to electric transmission lines on  
24 Federal land and non-Federal land, with a  
25 special emphasis on facilitating access for

1 immediate maintenance, repair, and vege-  
2 tation management needs;

3 (ii) resolving complaints filed with the  
4 Ombudsperson with respect to in-process  
5 electric transmission infrastructure per-  
6 mits; and

7 (iii) issuing recommended resolutions  
8 to address the complaints filed with the  
9 Ombudsperson; and

10 (B) hear, compile, and share any com-  
11 plaints filed with Ombudsperson relating to in-  
12 process electric transmission infrastructure per-  
13 mits.

14 (c) AGREEMENTS.—

15 (1) IN GENERAL.—The Secretary of the Inte-  
16 rior, with respect to public lands (as defined in sec-  
17 tion 103(e) of the Federal Land Policy and Manage-  
18 ment Act (43 U.S.C. 1702(e)), and the Secretary of  
19 Agriculture, with respect to National Forest System  
20 land, shall provide for continuity of the existing use  
21 and occupancy for the transmission of electric en-  
22 ergy by any Federal department or agency granted  
23 across public lands or National Forest System land.

24 (2) AGREEMENTS.—The Secretary of the Inte-  
25 rior or the Secretary of Agriculture, as applicable,

1 within 30 days after receiving a request from the  
2 Federal department or agency administering the  
3 electric energy transmission facilities, shall, in con-  
4 sultation with that department or agency, initiate  
5 agreements regarding the use and occupancy or  
6 right-of-way (including vegetation management  
7 agreements, where applicable).

8 **SEC. 2310. REPORT BY TRANSMISSION ORGANIZATIONS ON**  
9 **DISTRIBUTED ENERGY RESOURCES AND**  
10 **MICRO-GRID SYSTEMS.**

11 (a) DEFINITIONS.—In this section:

12 (1) DISTRIBUTED ENERGY RESOURCE.—The  
13 term “distributed energy resource” means an elec-  
14 tricity supply resource that, as permitted by State  
15 law—

16 (A)(i) is interconnected to the electric sys-  
17 tem operated by a transmission organization at  
18 or below 69kV; and

19 (ii) is subject to dispatch by the trans-  
20 mission organization; and

21 (B)(i) generates electricity using any pri-  
22 mary energy source, including solar energy and  
23 other renewable resources; or

24 (ii) stores energy and is capable of sup-  
25 plying electricity to the electric system operated

1           by the transmission organization from the stor-  
2           age reservoir.

3           (2) ELECTRIC GENERATING CAPACITY RE-  
4           SOURCE.—The term “electric generating capacity re-  
5           source” means an electric generating resource, as  
6           measured by the maximum load-carrying ability of  
7           the resource, exclusive of station use and planned,  
8           unplanned, or other outage or derating, that is sub-  
9           ject to dispatch by a transmission organization to  
10          meet the resource adequacy needs of the systems op-  
11          erated by the transmission organization.

12          (3) MICRO-GRID SYSTEM.—The term “micro-  
13          grid system” means an electrically distinct system  
14          under common control that—

15                (A) serves an electric load at or below  
16                69kV from a distributed energy resource or  
17                electric generating capacity resource; and

18                (B) is subject to dispatch by a trans-  
19                mission organization.

20          (4) TRANSMISSION ORGANIZATION.—The term  
21          “transmission organization” has the meaning given  
22          the term in section 3 of the Federal Power Act (16  
23          U.S.C. 796).

24          (b) REPORT.—

1           (1) NOTICE.—Not later than 14 days after the  
2           date of enactment of this section, the Commission  
3           shall submit to each transmission organization no-  
4           tice that the transmission organization is required to  
5           file with the Commission a report in accordance with  
6           paragraph (2).

7           (2) REPORT.—Not later than 180 days after  
8           the date on which a transmission organization re-  
9           ceives a notice under paragraph (1), the trans-  
10          mission organization shall submit to the Commission  
11          a report that—

12                 (A)(i) identifies distributed energy re-  
13                 sources and micro-grid systems that are subject  
14                 to dispatch by the transmission organization as  
15                 of the date of the report; and

16                 (ii) describes the fuel sources and oper-  
17                 ational characteristics of such distributed en-  
18                 ergy resources and micro-grid systems, includ-  
19                 ing, to the extent practicable, a discussion of  
20                 the benefits and costs associated with the dis-  
21                 tributed energy resources and micro-grid sys-  
22                 tems identified under clause (i);

23                 (B) evaluates, with due regard for oper-  
24                 ational and economic benefits and costs, the po-  
25                 tential for distributed energy resources and

1 micro-grid systems to be deployed to the trans-  
2 mission organization over the short- and long-  
3 term periods in the planning cycle of the trans-  
4 mission organization; and

5 (C) identifies—

6 (i) over the short- and long-term peri-  
7 ods in the planning cycle of the trans-  
8 mission organization, barriers to the de-  
9 ployment to the transmission organization  
10 of distributed energy resources and micro-  
11 grid systems; and

12 (ii) potential changes to the oper-  
13 ational requirements for, or charges associ-  
14 ated with, the interconnection of distrib-  
15 uted energy resources and micro-grid sys-  
16 tems to the transmission organization that  
17 would reduce the barriers identified under  
18 clause (i).

19 **SEC. 2311. NET METERING STUDY GUIDANCE.**

20 Title XVIII of Energy Policy Act of 2005 (Public  
21 Law 109–58; 119 Stat. 1122) is amended by adding at  
22 the end the following:

23 **“SEC. 1841. NET ENERGY METERING STUDY.**

24 “(a) IN GENERAL.—Not later than 180 days after  
25 the date of enactment of this Act, the Secretary shall—

1           “(1) issue guidance on criteria required to be  
2 included in studies of net metering conducted by the  
3 Department; and

4           “(2) undertake a study of net energy metering.

5           “(b) REQUIREMENTS AND CONTENTS.—The model  
6 guidance issued under subsection (a) shall clarify without  
7 prejudice to other study criteria that any study of net en-  
8 ergy metering, including the study conducted by the De-  
9 partment under subsection (a) shall—

10           “(1) be publicly available; and

11           “(2) assess benefits and costs of net energy me-  
12 tering, including—

13           “(A) load data, including hourly profiles;

14           “(B) distributed generation production  
15 data;

16           “(C) best available technology, including  
17 inverter capability; and

18           “(D) benefits and costs of distributed en-  
19 ergy deployment, including—

20           “(i) environmental benefits;

21           “(ii) changes in electric system reli-  
22 ability;

23           “(iii) changes in peak power require-  
24 ments;

1                   “(iv) provision of ancillary services,  
2                   including reactive power;  
3                   “(v) changes in power quality;  
4                   “(vi) changes in land-use effects;  
5                   “(vii) changes in right-of-way acquisi-  
6                   tion costs;  
7                   “(viii) changes in vulnerability to ter-  
8                   rorism; and  
9                   “(ix) changes in infrastructure resil-  
10                  ience.”.

## 11                   **Subtitle E—Computing**

### 12                  **SEC. 2401. EXASCALE COMPUTER RESEARCH PROGRAM.**

#### 13                  (a) RENAMING OF ACT.—

14                   (1) IN GENERAL.—Section 1 of the Department  
15                   of Energy High-End Computing Revitalization Act  
16                   of 2004 (15 U.S.C. 5501 note; Public Law 108–  
17                   423) is amended by striking “Department of Energy  
18                   High-End Computing Revitalization Act of 2004”  
19                   and inserting “Exascale Computing Act of 2015”.

20                   (2) CONFORMING AMENDMENT.—Section  
21                   976(a)(1) of the Energy Policy Act of 2005 (42  
22                   U.S.C. 16316(1)) is amended by striking “Depart-  
23                   ment of Energy High-End Computing Revitalization  
24                   Act of 2004” and inserting “Exascale Computing  
25                   Act of 2015”.

1 (b) DEFINITIONS.—Section 2 of the Exascale Com-  
2 puting Act of 2015 (15 U.S.C. 5541) is amended—

3 (1) by redesignating paragraphs (2) through  
4 (5) as paragraphs (3) through (6), respectively;

5 (2) by striking paragraph (1) and inserting the  
6 following:

7 “(1) DEPARTMENT.—The term ‘Department’  
8 means the Department of Energy.

9 “(2) EXASCALE COMPUTING.—The term  
10 ‘exascale computing’ means computing through the  
11 use of a computing machine that performs near or  
12 above 10 to the 18th power floating point operations  
13 per second.”; and

14 (3) in paragraph (6) (as redesignated by para-  
15 graph (1)), by striking “, acting through the Direc-  
16 tor of the Office of Science of the Department of  
17 Energy”.

18 (c) DEPARTMENT OF ENERGY HIGH-END COM-  
19 PUTING RESEARCH AND DEVELOPMENT PROGRAM.—Sec-  
20 tion 3 of the Exascale Computing Act of 2015 (15 U.S.C.  
21 5542) is amended—

22 (1) in subsection (a)(1), by striking “program”  
23 and inserting “coordinated program across the De-  
24 partment”;

1           (2) in subsection (b)(2), by striking “, which  
2           may” and all that follows through “architectures”;  
3           and

4           (3) by striking subsection (d) and inserting the  
5           following:

6           “(d) EXASCALE COMPUTING PROGRAM.—

7           “(1) IN GENERAL.—The Secretary shall con-  
8           duct a research program (referred to in this sub-  
9           section as the ‘Program’) to develop 2 or more  
10          exascale computing machine architectures to pro-  
11          mote the missions of the Department.

12          “(2) IMPLEMENTATION.—

13          “(A) IN GENERAL.—In carrying out the  
14          Program, the Secretary shall—

15                  “(i) establish 2 or more National Lab-  
16                  oratory partnerships with industry part-  
17                  ners and institutions of higher education  
18                  for the research and development of 2 or  
19                  more exascale computing architectures  
20                  across all applicable organizations of the  
21                  Department; and

22                  “(ii) provide, as appropriate, on a  
23                  competitive, merit-reviewed basis, access  
24                  for researchers in industries in the United  
25                  States, institutions of higher education,

1 National Laboratories, and other Federal  
2 agencies to the exascale computing systems  
3 developed pursuant to clause (i).

4 “(B) SELECTION OF PARTNERS.—The Sec-  
5 retary shall select members for the partnerships  
6 with the computing facilities of the Department  
7 under subparagraph (A) through a competitive,  
8 peer-review process.

9 “(3) CODESIGN AND APPLICATION DEVELOP-  
10 MENT.—

11 “(A) IN GENERAL.—The Secretary shall  
12 carry out the Program through an integration  
13 of applications, computer science, applied math-  
14 ematics, and computer hardware architecture  
15 using the partnerships established pursuant to  
16 paragraph (2) to ensure that, to the maximum  
17 extent practicable, 2 or more exascale com-  
18 puting machine architectures are capable of  
19 solving Department target applications and  
20 broader scientific problems.

21 “(B) REPORT.—The Secretary shall sub-  
22 mit to Congress a report on how the integration  
23 under subparagraph (A) is furthering applica-  
24 tion science data and computational workloads  
25 across application interests, including national

1 security, material science, physical science, cy-  
2 bersecurity, biological science, the Materials Ge-  
3 nome and BRAIN Initiatives of the President,  
4 advanced manufacturing, and the national elec-  
5 tric grid.

6 “(4) PROJECT REVIEW.—

7 “(A) IN GENERAL.—The exascale architec-  
8 tures developed pursuant to partnerships estab-  
9 lished pursuant to paragraph (2) shall be re-  
10 viewed through a project review process.

11 “(B) REPORT.—Not later than 90 days  
12 after the date of enactment of this subsection,  
13 the Secretary shall submit to Congress a report  
14 on—

15 “(i) the results of the review con-  
16 ducted under subparagraph (A); and

17 “(ii) the coordination and manage-  
18 ment of the Program to ensure an inte-  
19 grated research program across the De-  
20 partment.

21 “(5) ANNUAL REPORTS.—At the time of the  
22 budget submission of the Department for each fiscal  
23 year, the Secretary, in consultation with the mem-  
24 bers of the partnerships established pursuant to  
25 paragraph (2), shall submit to Congress a report

1 that describes funding for the Program as a whole  
2 by functional element of the Department and critical  
3 milestones.”.

4 (d) AUTHORIZATION OF APPROPRIATIONS.—Section  
5 4 of the Exascale Computing Act of 2015 (15 U.S.C.  
6 5543) is amended—

7 (1) by striking “this Act” and inserting “sec-  
8 tion 3(d)”; and

9 (2) by striking paragraphs (1) through (3) and  
10 inserting the following:

11 “(1) \$272,000,000 for fiscal year 2016;

12 “(2) \$340,000,000 for fiscal year 2017; and

13 “(3) \$360,000,000 for fiscal year 2018.”.

14 **TITLE III—SUPPLY**  
15 **Subtitle A—Renewables**

16 **PART I—HYDROELECTRIC**

17 **SEC. 3001. HYDROPOWER REGULATORY IMPROVEMENTS.**

18 (a) SENSE OF CONGRESS ON THE USE OF HYDRO-  
19 POWER RENEWABLE RESOURCES.—It is the sense of Con-  
20 gress that—

21 (1) hydropower is a renewable resource for pur-  
22 poses of all Federal programs and is an essential  
23 source of energy in the United States; and

24 (2) the United States should increase substan-  
25 tially the capacity and generation of clean, renewable

1       hydropower resources that would improve environ-  
2       mental quality in the United States.

3       (b) **MODIFYING THE DEFINITION OF RENEWABLE**  
4 **ENERGY TO INCLUDE HYDROPOWER.**—Section 203 of the  
5 Energy Policy Act of 2005 (42 U.S.C. 15852) is amend-  
6 ed—

7           (1) in subsection (a), by striking “the following  
8       amounts” and all that follows through paragraph (3)  
9       and inserting “not less than 15 percent in fiscal year  
10      2016 and each fiscal year thereafter shall be renew-  
11      able energy.” ; and

12          (2) in subsection (b), by striking paragraph (2)  
13      and inserting the following:

14           “(2) **RENEWABLE ENERGY.**—The term ‘renew-  
15      able energy’ means energy produced from solar,  
16      wind, biomass, landfill gas, ocean (including tidal,  
17      wave, current, and thermal), geothermal, municipal  
18      solid waste, or hydropower.”.

19      (c) **LICENSES FOR CONSTRUCTION.**—Section 4(e) of  
20 the Federal Power Act (16 U.S.C. 797(e)) is amended,  
21 in the first proviso, by striking “deem” and inserting “de-  
22 termine to be”.

23      (d) **PRELIMINARY PERMITS.**—Section 5 of the Fed-  
24 eral Power Act (16 U.S.C. 798) is amended—

1           (1) in subsection (a), by striking “three” and  
2           inserting “4”; and

3           (2) in subsection (b)—

4                 (A) by striking “Commission may extend  
5                 the period of a preliminary permit once for not  
6                 more than 2 additional years beyond the 3  
7                 years” and inserting the following: “Commis-  
8                 sion may—

9                 “(1) extend the period of a preliminary permit  
10                once for not more than 4 additional years beyond  
11                the 4 years”;

12                (B) by striking the period at the end and  
13                inserting “; and”; and

14                (C) by adding at the end the following:

15                “(2) after the end of an extension period grant-  
16                ed under paragraph (1), issue an additional permit  
17                to the permittee if the Commission determines that  
18                there are extraordinary circumstances that warrant  
19                the issuance of the additional permit.”.

20           (e) TIME LIMIT FOR CONSTRUCTION OF PROJECT  
21           WORKS.—Section 13 of the Federal Power Act (16 U.S.C.  
22           806) is amended in the second sentence by striking “once  
23           but not longer than two additional years” and inserting  
24           “for not more than 8 additional years,”.

1 (f) LICENSE TERM.—Section 15(e) of the Federal  
2 Power Act (16 U.S.C. 808(e)) is amended—

3 (1) by striking “(e) Except” and inserting the  
4 following:

5 “(e) LICENSE TERM ON RELICENSING.—

6 “(1) IN GENERAL.—Except”; and

7 (2) by adding at the end the following:

8 “(2) CONSIDERATION.—In determining the  
9 term of a license under paragraph (1), the Commis-  
10 sion shall consider project-related investments by the  
11 licensee over the term of the existing license (includ-  
12 ing any terms under annual licenses) that resulted  
13 in new development, construction, capacity, effi-  
14 ciency improvements, or environmental measures,  
15 but which did not result in the extension of the term  
16 of the license by the Commission.”.

17 (g) OPERATION OF NAVIGATION FACILITIES.—Sec-  
18 tion 18 of the Federal Power Act (16 U.S.C. 811) is  
19 amended by striking the second, third, and fourth sen-  
20 tences.

21 (h) ALTERNATIVE CONDITIONS AND PRESCRIP-  
22 TIONS.—Section 33 of the Federal Power Act (16 U.S.C.  
23 823d) is amended—

24 (1) in subsection (a)—

1 (A) in paragraph (1), by striking “deems”  
2 and inserting “determines”;

3 (B) in paragraph (2)(B), in the matter  
4 preceding clause (i), by inserting “determined  
5 to be necessary” before “by the Secretary”;

6 (C) by striking paragraph (4); and

7 (D) by striking paragraph (5);

8 (2) in subsection (b)—

9 (A) by striking paragraph (4); and

10 (B) by striking paragraph (5); and

11 (3) by adding at the end the following:

12 “(c) FURTHER CONDITIONS.—This section applies to  
13 any further conditions or prescriptions proposed or im-  
14 posed pursuant to section 4(e), 6, or 18.”.

15 (i) LICENSING PROCESS IMPROVEMENTS AND CO-  
16 ORDINATION.—Part I of the Federal Power Act (16  
17 U.S.C. 792 et seq.) is amended by adding at the end the  
18 following:

19 **“SEC. 34. LICENSING PROCESS IMPROVEMENTS.**

20 “(a) LICENSE STUDIES.—

21 “(1) IN GENERAL.—To facilitate the timely and  
22 efficient completion of the license proceedings under  
23 this part, the Commission shall—

24 “(A) conduct an investigation of best prac-  
25 tices in performing licensing studies, including

1 methodologies and the design of studies to as-  
2 sess the full range of environmental impacts of  
3 a project;

4 “(B) compile a comprehensive collection of  
5 studies and data accessible to the public that  
6 could be used to inform license proceedings  
7 under this paragraph; and

8 “(C) encourage license applicants and co-  
9 operating agencies to develop and use, for the  
10 purpose of fostering timely and efficient consid-  
11 eration of license applications, a limited number  
12 of open-source methodologies and tools applica-  
13 ble across a wide array of projects, including  
14 water balance models and streamflow analyses.

15 “(2) USE OF EXISTING STUDIES.—To the max-  
16 imum extent practicable, the Commission shall use  
17 existing studies and data in individual licensing pro-  
18 ceedings under this part in accordance with para-  
19 graph (1).

20 “(3) NONDUPLICATION REQUIREMENT.—To the  
21 maximum extent practicable, the Commission shall  
22 ensure that studies and data required for any Fed-  
23 eral authorization (as defined in section 35(a)) ap-  
24 plicable to a particular project or facility are not du-

1 plicated in other licensing proceedings under this  
2 part.

3 “(4) BIOLOGICAL OPINIONS.—To the maximum  
4 extent practicable, the Secretary of Commerce shall  
5 ensure that relevant offices within the National Ma-  
6 rine Fisheries Service prepare any biological opinion  
7 under section 7 of the Endangered Species Act of  
8 1973 (16 U.S.C. 1536) that forms the basis for a  
9 prescription under section 18 on a concurrent rather  
10 than sequential basis.

11 “(5) WATER QUALITY CERTIFICATION DEAD-  
12 LINE.—

13 “(A) IN GENERAL.—For purposes of  
14 issuing a license under this part, the deadline  
15 for a certifying agency to act under section  
16 401(a) of the Federal Water Pollution Control  
17 Act (33 U.S.C. 1341(a)) shall take effect only  
18 on the submission of a request for certification  
19 determined to be complete by the certifying  
20 agency.

21 “(B) NOTICE OF COMPLETE REQUEST.—  
22 The certifying agency shall inform the Commis-  
23 sion when a request for certification is deter-  
24 mined to be complete.

1 **“SEC. 35. LICENSING PROCESS COORDINATION.**

2 “(a) DEFINITION OF FEDERAL AUTHORIZATION.—In  
3 this section, the term ‘Federal authorization’ means any  
4 authorization required under Federal law (including any  
5 license, permit, special use authorization, certification,  
6 opinion, consultation, determination, or other approval)  
7 with respect to—

8 “(1) a project licensed under section 4 or 15;  
9 or

10 “(2) a facility exempted under—

11 “(A) section 30; or

12 “(B) section 405(d) of the Public Utility  
13 Regulatory Policies Act of 1978 (16 U.S.C.  
14 2705(d)).

15 “(b) DESIGNATION AS LEAD AGENCY.—

16 “(1) IN GENERAL.—The Commission shall act  
17 as the lead agency for the purposes of coordinating  
18 all applicable Federal authorizations.

19 “(2) OTHER AGENCIES.—Each Federal and  
20 State agency considering an aspect of an application  
21 for Federal authorization shall cooperate with the  
22 Commission.

23 “(c) SCHEDULE.—

24 “(1) TIMING FOR ISSUANCE.—It is the sense of  
25 Congress that all Federal authorizations required for  
26 a project or facility, including a license or exemption

1 order of the Commission, should be issued by the  
2 date that is 3 years after the date on which an ap-  
3 plication is considered to be complete by the Com-  
4 mission.

5 “(2) COMMISSION SCHEDULE.—

6 “(A) IN GENERAL.—The Commission shall  
7 establish a schedule for the issuance of all Fed-  
8 eral authorizations.

9 “(B) REQUIREMENTS.—In establishing the  
10 schedule under subparagraph (A), the Commis-  
11 sion shall—

12 “(i) consult and cooperate with the  
13 Federal and State agencies responsible for  
14 a Federal authorization;

15 “(ii) ensure the expeditious comple-  
16 tion of all proceedings relating to a Fed-  
17 eral authorization; and

18 “(iii) comply with applicable schedules  
19 established by Federal law with respect to  
20 a Federal authorization.

21 “(3) RESOLUTION OF INTERAGENCY DIS-  
22 PUTES.—If the Federal agency fails to adhere to the  
23 schedule established by the Commission under para-  
24 graph (2), or if the final condition of the Secretary  
25 under section 4(e) or prescription under section 18

1 has been unreasonably delayed in derogation of the  
2 schedule established under paragraph (2), or if a  
3 proposed alternative condition or prescription has  
4 been unreasonably denied, or if a final condition or  
5 prescription would be inconsistent with the purposes  
6 of this part or other applicable law, the Commission  
7 may refer the matter to the Chairman of the Council  
8 on Environmental Quality—

9 “(A) to ensure timely participation;

10 “(B) to ensure a timely decision;

11 “(C) to mediate the dispute; or

12 “(D) to refer the matter to the President.

13 “(d) CONSOLIDATED RECORD.—

14 “(1) IN GENERAL.—The Commission shall  
15 maintain official consolidated records of all license  
16 proceedings under this part.

17 “(2) SUBMISSION OF RECOMMENDATIONS.—

18 Any Federal or State agency that is providing rec-  
19 ommendations with respect to a license proceeding  
20 under this part shall submit to the Commission for  
21 inclusion in the consolidated record relating to the li-  
22 cense proceeding maintained under paragraph (1)—

23 “(A) the recommendations;

24 “(B) the rationale for the recommenda-

25 tions; and

1           “(C) any supporting materials relating to  
2           the recommendations.

3           “(3) WRITTEN STATEMENT.—In a case in  
4           which a Federal agency is making a determination  
5           with respect to a covered measure (as defined in sec-  
6           tion 36(a)), the head of the Federal agency shall in-  
7           clude in the consolidated record a written statement  
8           demonstrating that the Federal agency gave equal  
9           consideration to the effects of the covered measure  
10          on—

11           “(A) energy supply, distribution, cost, and  
12          use;

13           “(B) flood control;

14           “(C) navigation;

15           “(D) water supply; and

16           “(E) air quality and the preservation of  
17          other aspects of environmental quality.

18 **“SEC. 36. TRIAL-TYPE HEARINGS.**

19          “(a) DEFINITION OF COVERED MEASURE.—In this  
20          section, the term ‘covered measure’ means—

21           “(1) a condition prescribed under section 4(e),  
22          including an alternative condition proposed under  
23          section 33(a);

1           “(2) fishways prescribed under section 18, in-  
2           cluding an alternative prescription proposed under  
3           section 33(b); or

4           “(3) any further condition pursuant to section  
5           4(e), 6, or 18.

6           “(b) AUTHORIZATION OF TRIAL-TYPE HEARING.—

7           The license applicant (including an applicant for a license  
8           under section 15) and any party to the proceeding shall  
9           be entitled to a determination on the record, after oppor-  
10          tunity for a trial-type hearing of not more than 120 days,  
11          on any disputed issues of material fact with respect to an  
12          applicable covered measure.

13          “(c) DEADLINE FOR REQUEST.—A request for a  
14          trial-type hearing under this section shall be submitted not  
15          later than 60 days after the date on which, as applicable—

16               “(1) the Secretary submits the condition under  
17               section 4(e) or prescription under section 18; or

18               “(2)(A) the Commission publishes notice of the  
19               intention to use the reserved authority of the Com-  
20               mission to order a further condition under section 6;  
21               or

22               “(B) the Secretary exercises reserved authority  
23               under the license to prescribe, submit, or revise any  
24               condition to a license under the first proviso of sec-

1       tion 4(e) or fishway prescribed under section 18, as  
2       appropriate.

3       “(d) NO REQUIREMENT TO EXHAUST.—By electing  
4 not to request a trial-type hearing under subsection (d),  
5 a license applicant and any other party to a license pro-  
6 ceeding shall not be considered to have waived the right  
7 of the applicant or other party to raise any issue of fact  
8 or law in a non-trial-type proceeding, but no issue may  
9 be raised for the first time on rehearing or judicial review  
10 of the license decision of the Commission.

11       “(e) ADMINISTRATIVE LAW JUDGE.—All disputed  
12 issues of material fact raised by a party in a request for  
13 a trial-type hearing submitted under subsection (d) shall  
14 be determined in a single trial-type hearing to be con-  
15 ducted by an Administrative Law Judge within the Office  
16 of Administrative Law Judges and Dispute Resolution of  
17 the Commission, in accordance with the Commission rules  
18 of practice and procedure under part 385 of title 18, Code  
19 of Federal Regulations (or successor regulations), and  
20 within the timeframe established by the Commission for  
21 each license proceeding (including a proceeding for a li-  
22 cense under section 15) under section 35(c).

23       “(f) STAY.—The Administrative Law Judge may im-  
24 pose a stay of a trial-type hearing under this section for  
25 a period of not more than 120 days to facilitate settlement

1 negotiations relating to resolving the disputed issues of  
2 material fact with respect to the covered measure.

3 “(g) DECISION OF THE ADMINISTRATIVE LAW  
4 JUDGE.—

5 “(1) CONTENTS.—The decision of the Adminis-  
6 trative Law Judge shall contain—

7 “(A) findings of fact on all disputed issues  
8 of material fact;

9 “(B) conclusions of law necessary to make  
10 the findings of fact, including rulings on mate-  
11 riality and the admissibility of evidence; and

12 “(C) reasons for the findings and conclu-  
13 sions.

14 “(2) LIMITATION.—The decision of the Admin-  
15 istrative Law Judge shall not contain conclusions as  
16 to whether—

17 “(A) any condition or prescription should  
18 be adopted, modified, or rejected; or

19 “(B) any alternative condition or prescrip-  
20 tion should be adopted, modified, or rejected.

21 “(3) FINALITY.—A decision of an Administra-  
22 tive Law Judge under this section with respect to a  
23 disputed issue of material fact shall not be subject  
24 to further administrative review.

1           “(4) SERVICE.—The Administrative Law Judge  
2 shall serve the decision on each party to the hearing  
3 and forward the complete record of the hearing to  
4 the Commission and the Secretary that proposed the  
5 original condition or prescription.

6           “(h) SECRETARIAL DETERMINATION.—

7           “(1) IN GENERAL.—Not later than 60 days  
8 after the date on which the Administrative Law  
9 Judge issues the decision under subsection (g) and  
10 in accordance with the schedule established by the  
11 Commission under section 35(c), the Secretary pro-  
12 posing a condition under section 4(e) or a prescrip-  
13 tion under section 18 shall file with the Commission  
14 a final determination to adopt, modify, or withdraw  
15 any condition or prescription that was the subject of  
16 a hearing under this section, based on the decision  
17 of the Administrative Law Judge.

18           “(2) RECORD OF DETERMINATION.—The final  
19 determination of the Secretary filed with the Com-  
20 mission shall identify the reasons for the decision  
21 and any considerations taken into account that were  
22 not part of, or inconsistent with, the findings of the  
23 Administrative Law Judge and shall be included in  
24 the consolidated record in section 35(d).

1       “(i) LICENSING DECISION OF THE COMMISSION.—  
2 Notwithstanding sections 4(e) and 18, if the Commission  
3 finds that the final condition or prescription of the Sec-  
4 retary is inconsistent with the purposes of this part or  
5 other applicable law, the Commission may refer the matter  
6 to the Chairman of the Council on Environmental Quality  
7 under section 35(c).

8       “(j) JUDICIAL REVIEW.—The decision of the Admin-  
9 istrative Law Judge and the record of determination of  
10 the Secretary shall be included in the record of the appli-  
11 cable licensing proceeding and subject to judicial review  
12 of the final licensing decision of the Commission under  
13 section 313(b).

14 **“SEC. 37. PUMPED STORAGE PROJECTS.**

15       “‘In carrying out section 6(a) of the Hydropower Reg-  
16 ulatory Efficiency Act of 2013 (16 U.S.C. 797 note; Pub-  
17 lic Law 113–23), the Commission shall consider a closed  
18 loop pumped storage project to include a project—

19               “(1) in which the upper and lower reservoirs do  
20 not impound or directly withdraw water from a navi-  
21 gable stream; or

22               “(2) that is not continuously connected to a  
23 naturally flowing water feature.

24 **“SEC. 38. ANNUAL REPORTS.**

25       “(a) COMMISSION ANNUAL REPORT.—

1           “(1) IN GENERAL.—The Commission shall sub-  
2           mit to the Committee on Energy and Natural Re-  
3           sources of the Senate and the Committee on Energy  
4           and Commerce of the House of Representatives an  
5           annual report that—

6                   “(A) describes and quantifies, for each li-  
7                   censed, exempted, or proposed project under  
8                   this part or section 405(d) of the Public Utility  
9                   Regulatory Policies Act of 1978 (16 U.S.C.  
10                  2705(d)) (referred to in this subsection as the  
11                  ‘covered project’), the quantity of energy and  
12                  capacity authorized for new development and  
13                  reauthorized for continued operation during the  
14                  reporting year, including an assessment of the  
15                  economic, climactic, air quality, and other envi-  
16                  ronmental benefits achieved by the new and re-  
17                  authorized energy and capacity;

18                   “(B) describes and quantifies the loss of  
19                   energy, capacity, or ancillary services as a re-  
20                   sult of any licensing action under this part or  
21                   other requirement under Federal law during the  
22                   reporting year;

23                   “(C) identifies any application to license,  
24                   relicense, or expand a covered project pending  
25                   as of the date of the annual report, including

1 a quantification of the new energy and capacity  
2 with the potential to be gained or lost by action  
3 relating to the covered project; and

4 “(D) lists all proposed covered projects  
5 that, as of the date of the annual report, are  
6 subject to a preliminary permit issued under  
7 section 4(f), including a description of the  
8 quantity of new energy and capacity that would  
9 be achieved through the development of each  
10 proposed covered project.

11 “(2) AVAILABILITY.—The Commission shall es-  
12 tablish and maintain a publicly available website or  
13 comparable resource that tracks all information re-  
14 quired for the annual report under paragraph (1).

15 “(b) RESOURCE AGENCY ANNUAL REPORT.—

16 “(1) IN GENERAL.—Any Federal or State re-  
17 source agency that is participating in any Commis-  
18 sion proceeding under this part or that has respon-  
19 sibilities for any Federal authorization shall submit  
20 to the Committee on Energy and Natural Resources  
21 of the Senate and the Committee on Energy and  
22 Commerce of the House of Representatives a report  
23 that—

24 “(A) describes each term, condition, or  
25 other requirement prepared by the resource

1 agency during the reporting year with respect  
2 to a Commission proceeding under this part, in-  
3 cluding—

4 “(i) an assessment of whether imple-  
5 mentation of the term, condition, or other  
6 requirement would result in the loss of en-  
7 ergy, capacity, or ancillary services at the  
8 project, including a quantification of the  
9 losses;

10 “(ii) an analysis of economic, air qual-  
11 ity, climactic and other environmental ef-  
12 fects associated with implementation of the  
13 term, condition, or other requirement;

14 “(iii) a demonstration, based on evi-  
15 dence in the record of the Commission,  
16 that the resource agency prepared the  
17 term, condition, or other requirement in a  
18 manner that meets the policy established  
19 by this part while discharging the respon-  
20 sibilities of the resource agency under this  
21 part or any other applicable requirement  
22 under Federal law; and

23 “(iv) a statement of whether the head  
24 of the applicable Federal agency has ren-  
25 dered final approval of the term, condition,

1 or other requirement, or whether the term,  
2 condition, or other requirement remains a  
3 preliminary recommendation of staff of the  
4 resource agency; and

5 “(B) identifies all pending, scheduled, and  
6 anticipated proceedings under this part that, as  
7 of the date of the annual report, the resource  
8 agency expects to participate in, or has any ap-  
9 proval or participatory responsibilities for under  
10 Federal law, including—

11 “(i) an accounting of whether the re-  
12 source agency met all deadlines or other  
13 milestones established by the resource  
14 agency or the Commission during the re-  
15 porting year; and

16 “(ii) the specific plans of the resource  
17 agency for allocating sufficient resources  
18 for each project during the upcoming year.

19 “(2) AVAILABILITY.—Any resource agency pre-  
20 paring an annual report to Congress under para-  
21 graph (1) shall establish and maintain a publicly  
22 available website or comparable resource that tracks  
23 all information required for the annual report.”.

24 (j) PILOT PROGRAM.—

1           (1) IN GENERAL.—The Commission (as the  
2 term is defined in section 3 of the Federal Power  
3 Act (16 U.S.C. 796)) shall establish a voluntary  
4 pilot program covering at least 1 region in which the  
5 Commission, in consultation with the heads of co-  
6 operating agencies, shall direct a set of region-wide  
7 studies to inform subsequent project-level studies  
8 within each region.

9           (2) DESIGNATION.—Not later than 2 years  
10 after the date of enactment of this Act, if the condi-  
11 tions under paragraph (3) are met, the Commission,  
12 in consultation with the heads of cooperating agen-  
13 cies, shall designate 1 or more regions to be studied  
14 under this subsection.

15           (3) VOLUNTARY BASIS.—The Commission may  
16 only designate regions under paragraph (2) in which  
17 every licensee, on a voluntary basis and in writing,  
18 agrees—

19                   (A) to be included in the pilot program;  
20                   and

21                   (B) to any cost-sharing arrangement with  
22 other licensees and applicable Federal and  
23 State agencies with respect to conducting basin-  
24 wide studies.

1           (4) SCALE.—The regions designated under  
2 paragraph (2) shall—

3           (A) be at an adequately large scale to  
4 cover at least 5 existing projects that—

5           (i) are licensed under this part; and

6           (ii) the licenses of which shall expire  
7 not later than 15 years after the date of  
8 enactment of this section; and

9           (B) be likely to yield region-wide studies  
10 and information that will significantly reduce  
11 the need for and scope of subsequent project-  
12 level studies and information.

13           (5) PROJECT LICENSE TERMS.—The Commis-  
14 sion may extend the term of any existing license  
15 within a region designated under paragraph (2) by  
16 up to 8 years to provide sufficient time for relevant  
17 region-wide studies to inform subsequent project-  
18 level studies.

19 **SEC. 3002. HYDROELECTRIC PRODUCTION INCENTIVES**  
20 **AND EFFICIENCY IMPROVEMENTS.**

21           (a) HYDROELECTRIC PRODUCTION INCENTIVES.—  
22 Section 242 of the Energy Policy Act of 2005 (42 U.S.C.  
23 15881) is amended—

24           (1) in subsection (c), by striking “10” and in-  
25 serting “20”;

1           (2) in subsection (f), by striking “20” and in-  
2           serting “30”; and

3           (3) in subsection (g), by striking “each of the  
4           fiscal years 2006 through 2015” and inserting “each  
5           of fiscal years 2016 through 2025”.

6           (b) HYDROELECTRIC EFFICIENCY IMPROVEMENT.—  
7           Section 243(c) of the Energy Policy Act of 2005 (42  
8           U.S.C. 15882(c)) is amended by striking “each of the fis-  
9           cal years 2006 through 2015” and inserting “each of fis-  
10          cal years 2016 through 2025”.

11   **SEC. 3003. EXTENSION OF TIME FOR A FEDERAL ENERGY**  
12                           **REGULATORY COMMISSION PROJECT IN-**  
13                           **VOLVING CLARK CANYON DAM.**

14           Notwithstanding the time period described in section  
15   13 of the Federal Power Act (16 U.S.C. 806) that would  
16   otherwise apply to the Federal Energy Regulatory Com-  
17   mission project numbered 12429, the Federal Energy  
18   Regulatory Commission (referred to in this section as the  
19   “Commission”) shall, at the request of the licensee for the  
20   project, and after reasonable notice and in accordance  
21   with the procedures of the Commission under that section,  
22   reinstate the license and extend the time period during  
23   which the licensee is required to commence construction  
24   of project works for the 3-year period beginning on the  
25   date of enactment of this Act.

1 **SEC. 3004. EXTENSION OF TIME FOR A FEDERAL ENERGY**  
2 **REGULATORY COMMISSION PROJECT IN-**  
3 **VOLVING GIBSON DAM.**

4 (a) IN GENERAL.—Notwithstanding the require-  
5 ments of section 13 of the Federal Power Act (16 U.S.C.  
6 806) that would otherwise apply to the Federal Energy  
7 Regulatory Commission project numbered 12478–003, the  
8 Federal Energy Regulatory Commission (referred to in  
9 this section as the “Commission”) may, at the request of  
10 the licensee for the project, and after reasonable notice  
11 and in accordance with the procedures of the Commission  
12 under that section, extend the time period during which  
13 the licensee is required to commence construction of the  
14 project for a 6-year period that begins on the date de-  
15 scribed in subsection (b).

16 (b) DATE DESCRIBED.—The date described in this  
17 subsection is the date of the expiration of the extension  
18 of the period required for commencement of construction  
19 for the project described in subsection (a) that was issued  
20 by the Commission prior to the date of enactment of this  
21 Act under section 13 of the Federal Power Act (16 U.S.C.  
22 806).

1                                   **PART II—GEOTHERMAL**

2                                   **Subpart A—Geothermal Energy**

3   **SEC. 3005. NATIONAL GOALS FOR PRODUCTION AND SITE**  
4                                   **IDENTIFICATION.**

5           It is the sense of Congress that, not later than 10  
6 years after the date of enactment of this Act—

7                   (1) the Secretary of the Interior shall seek to  
8           approve a significant increase in new geothermal en-  
9           ergy capacity on public land across a geographically  
10          diverse set of States using the full range of available  
11          technologies; and

12                   (2) the Director of the Geological Survey and  
13          the Secretary should identify sites capable of pro-  
14          ducing a total of 50,000 megawatts of geothermal  
15          power, using the full range of available technologies.

16   **SEC. 3006. PRIORITY AREAS FOR DEVELOPMENT ON FED-**  
17                                   **ERAL LAND.**

18          The Director of the Bureau of Land Management,  
19          in consultation with other appropriate Federal agencies,  
20          shall—

21                   (1) identify high priority areas for new geo-  
22          thermal development; and

23                   (2) take any actions the Director determines  
24          necessary to facilitate that development, consistent  
25          with applicable laws.

1 **SEC. 3007. FACILITATION OF COPRODUCTION OF GEO-**  
2 **THERMAL ENERGY ON OIL AND GAS LEASES.**

3 Section 4(b) of the Geothermal Steam Act of 1970  
4 (30 U.S.C. 1003(b)) is amended by adding at the end the  
5 following:

6 “(4) LAND SUBJECT TO OIL AND GAS LEASE.—  
7 Land under an oil and gas lease issued pursuant to  
8 the Mineral Leasing Act (30 U.S.C. 181 et seq.) or  
9 the Mineral Leasing Act for Acquired Lands (30  
10 U.S.C. 351 et seq.) that is subject to an approved  
11 application for permit to drill and from which oil  
12 and gas production is occurring may be available for  
13 noncompetitive leasing under this section to the  
14 holder of the oil and gas lease—

15 “(A) on a determination that—

16 “(i) geothermal energy will be pro-  
17 duced from a well producing or capable of  
18 producing oil and gas; and

19 “(ii) national energy security will be  
20 improved by the issuance of such a lease;  
21 and

22 “(B) to provide for the coproduction of  
23 geothermal energy with oil and gas.”.

1 **SEC. 3008. NONCOMPETITIVE LEASING OF ADJOINING**  
2 **AREAS FOR DEVELOPMENT OF GEOTHERMAL**  
3 **RESOURCES.**

4 Section 4(b) of the Geothermal Steam Act of 1970  
5 (30 U.S.C. 1003(b)) (as amended by section 3007) is  
6 amended by adding at the end the following:

7 “(5) ADJOINING LAND.—

8 “(A) DEFINITIONS.—In this paragraph:

9 “(i) FAIR MARKET VALUE PER  
10 ACRE.—The term ‘fair market value per  
11 acre’ means a dollar amount per acre  
12 that—

13 “(I) except as provided in this  
14 clause, shall be equal to the market  
15 value per acre (taking into account  
16 the determination under subparagraph  
17 (B)(iii) regarding a valid discovery on  
18 the adjoining land), as determined by  
19 the Secretary under regulations issued  
20 under this paragraph;

21 “(II) shall be determined by the  
22 Secretary with respect to a lease  
23 under this paragraph, by not later  
24 than the end of the 180-day period  
25 beginning on the date the Secretary

1 receives an application for the lease;

2 and

3 “(III) shall be not less than the

4 greater of—

5 “(aa) 4 times the median

6 amount paid per acre for all land

7 leased under this Act during the

8 preceding year; or

9 “(bb) \$50.

10 “(ii) INDUSTRY STANDARDS.—The

11 term ‘industry standards’ means the stand-

12 ards by which a qualified geothermal pro-

13 fessional assesses whether downhole or

14 flowing temperature measurements with

15 indications of permeability are sufficient to

16 produce energy from geothermal resources,

17 as determined through flow or injection

18 testing or measurement of lost circulation

19 while drilling.

20 “(iii) QUALIFIED FEDERAL LAND.—

21 The term ‘qualified Federal land’ means

22 land that is otherwise available for leasing

23 under this Act.

24 “(iv) QUALIFIED GEOTHERMAL PRO-

25 FESSIONAL.—The term ‘qualified geo-

1 thermal professional’ means an individual  
2 who is an engineer or geoscientist in good  
3 professional standing with at least 5 years  
4 of experience in geothermal exploration,  
5 development, or project assessment.

6 “(v) QUALIFIED LESSEE.—The term  
7 ‘qualified lessee’ means a person that is el-  
8 igible to hold a geothermal lease under this  
9 Act (including applicable regulations).

10 “(vi) VALID DISCOVERY.—The term  
11 ‘valid discovery’ means a discovery of a  
12 geothermal resource by a new or existing  
13 slim hole or production well, that exhibits  
14 downhole or flowing temperature measure-  
15 ments with indications of permeability that  
16 are sufficient to meet industry standards.

17 “(B) AUTHORITY.—An area of qualified  
18 Federal land that adjoins other land for which  
19 a qualified lessee holds a legal right to develop  
20 geothermal resources may be available for a  
21 noncompetitive lease under this section to the  
22 qualified lessee at the fair market value per  
23 acre, if—

24 “(i) the area of qualified Federal  
25 land—

1                   “(I) consists of not less than 1  
2                   acre and not more than 640 acres;  
3                   and

4                   “(II) is not already leased under  
5                   this Act or nominated to be leased  
6                   under subsection (a);

7                   “(ii) the qualified lessee has not pre-  
8                   viously received a noncompetitive lease  
9                   under this paragraph in connection with  
10                  the valid discovery for which data has been  
11                  submitted under clause (iii)(I); and

12                  “(iii) sufficient geological and other  
13                  technical data prepared by a qualified geo-  
14                  thermal professional has been submitted by  
15                  the qualified lessee to the applicable Fed-  
16                  eral land management agency that would  
17                  lead individuals who are experienced in the  
18                  subject matter to believe that—

19                  “(I) there is a valid discovery of  
20                  geothermal resources on the land for  
21                  which the qualified lessee holds the  
22                  legal right to develop geothermal re-  
23                  sources; and

24                  “(II) that thermal feature ex-  
25                  tends into the adjoining areas.

1                   “(C) DETERMINATION OF FAIR MARKET  
2                   VALUE.—

3                   “(i) IN GENERAL.—The Secretary  
4                   shall—

5                   “(I) publish a notice of any re-  
6                   quest to lease land under this para-  
7                   graph;

8                   “(II) determine fair market value  
9                   for purposes of this paragraph in ac-  
10                  cordance with procedures for making  
11                  those determinations that are estab-  
12                  lished by regulations issued by the  
13                  Secretary;

14                  “(III) provide to a qualified les-  
15                  see and publish, with an opportunity  
16                  for public comment for a period of 30  
17                  days, any proposed determination  
18                  under this subparagraph of the fair  
19                  market value of an area that the  
20                  qualified lessee seeks to lease under  
21                  this paragraph; and

22                  “(IV) provide to the qualified les-  
23                  see and any adversely affected party  
24                  the opportunity to appeal the final de-  
25                  termination of fair market value in an

1 administrative proceeding before the  
2 applicable Federal land management  
3 agency, in accordance with applicable  
4 law (including regulations).

5 “(ii) LIMITATION ON NOMINATION.—  
6 After publication of a notice of request to  
7 lease land under this paragraph, the Sec-  
8 retary may not accept under subsection (a)  
9 any nomination of the land for leasing un-  
10 less the request has been denied or with-  
11 drawn.

12 “(iii) ANNUAL RENTAL.—For pur-  
13 poses of section 5(a)(3), a lease awarded  
14 under this paragraph shall be considered a  
15 lease awarded in a competitive lease sale.

16 “(D) REGULATIONS.—Not later than 270  
17 days after the date of enactment of the Energy  
18 Policy Modernization Act of 2015, the Sec-  
19 retary shall issue regulations to carry out this  
20 paragraph.”.

21 **SEC. 3009. LARGE-SCALE GEOTHERMAL ENERGY.**

22 Title VI of the Energy Independence and Security  
23 Act of 2007 is amended by inserting after section 616 (42  
24 U.S.C. 17195) the following:

1 **“SEC. 616A. LARGE-SCALE GEOTHERMAL ENERGY.**

2 “(a) PURPOSES.—The purposes of this section are—

3 “(1) to improve the components, processes, and  
4 systems used for geothermal heat pumps and the di-  
5 rect use of geothermal energy; and

6 “(2) to increase the energy efficiency, lower the  
7 cost, increase the use, and improve and demonstrate  
8 the applicability of geothermal heat pumps to, and  
9 the direct use of geothermal energy in, large build-  
10 ings, commercial districts, residential communities,  
11 and large municipal, agricultural, or industrial  
12 projects.

13 “(b) DEFINITIONS.—In this section:

14 “(1) DIRECT USE OF GEOTHERMAL ENERGY.—  
15 The term ‘direct use of geothermal energy’ means  
16 systems that use water that is at a temperature be-  
17 tween approximately 38 degrees Celsius and 149 de-  
18 grees Celsius directly or through a heat exchanger to  
19 provide—

20 “(A) heating to buildings; or

21 “(B) heat required for industrial processes,  
22 agriculture, aquaculture, and other facilities.

23 “(2) GEOTHERMAL HEAT PUMP.—The term  
24 ‘geothermal heat pump’ means a system that pro-  
25 vides heating and cooling by exchanging heat from  
26 shallow ground or surface water using—

1           “(A) a closed loop system, which transfers  
2           heat by way of buried or immersed pipes that  
3           contain a mix of water and working fluid; or

4           “(B) an open loop system, which circulates  
5           ground or surface water directly into the build-  
6           ing and returns the water to the same aquifer  
7           or surface water source.

8           “(3) LARGE-SCALE APPLICATION.—The term  
9           ‘large-scale application’ means an application for  
10          space or process heating or cooling for large entities  
11          with a name-plate capacity, expected resource, or  
12          rating of 10 or more megawatts, such as a large  
13          building, commercial district, residential community,  
14          or a large municipal, agricultural, or industrial  
15          project.

16          “(c) PROGRAM.—

17                 “(1) IN GENERAL.—The Secretary shall estab-  
18                 lish a program of research, development, and dem-  
19                 onstration for geothermal heat pumps and the direct  
20                 use of geothermal energy.

21                 “(2) AREAS.—The program may include re-  
22                 search, development, demonstration, and commercial  
23                 application of—

1           “(A) geothermal ground loop efficiency im-  
2           provements through more efficient heat transfer  
3           fluids;

4           “(B) geothermal ground loop efficiency im-  
5           provements through more efficient thermal  
6           grouts for wells and trenches;

7           “(C) geothermal ground loop installation  
8           cost reduction through—

9                   “(i) improved drilling methods;

10                   “(ii) improvements in drilling equip-  
11           ment;

12                   “(iii) improvements in design method-  
13           ology and energy analysis procedures; and

14                   “(iv) improved methods for deter-  
15           mination of ground thermal properties and  
16           ground temperatures;

17           “(D) installing geothermal ground loops  
18           near the foundation walls of new construction  
19           to take advantage of existing structures;

20           “(E) using gray or black wastewater as a  
21           method of heat exchange;

22           “(F) improving geothermal heat pump sys-  
23           tem economics through integration of geo-  
24           thermal systems with other building systems,  
25           including providing hot and cold water and re-

1           jecting or circulating industrial process heat  
2           through refrigeration heat rejection and waste  
3           heat recovery;

4           “(G) advanced geothermal systems using  
5           variable pumping rates to increase efficiency;

6           “(H) geothermal heat pump efficiency im-  
7           provements;

8           “(I) use of hot water found in mines and  
9           mine shafts and other surface waters as the  
10          heat exchange medium;

11          “(J) heating of districts, neighborhoods,  
12          communities, large commercial or public build-  
13          ings (including office, retail, educational, gov-  
14          ernment, and institutional buildings and multi-  
15          family residential buildings and campuses), and  
16          industrial and manufacturing facilities;

17          “(K) geothermal system integration with  
18          solar thermal water heating or cool roofs and  
19          solar-regenerated desiccants to balance loads  
20          and use building hot water to store geothermal  
21          energy;

22          “(L) use of hot water coproduced from oil  
23          and gas recovery;

1           “(M) use of water sources at a tempera-  
2           ture of less than 150 degrees Celsius for direct  
3           use;

4           “(N) system integration of direct use with  
5           geothermal electricity production; and

6           “(O) coproduction of heat and power, in-  
7           cluding on-site use.

8           “(3) ENVIRONMENTAL IMPACTS.—In carrying  
9           out the program, the Secretary shall identify and  
10          mitigate potential environmental impacts in accord-  
11          ance with section 614(c).

12          “(d) GRANTS.—

13                 “(1) IN GENERAL.—The Secretary shall make  
14                 grants available to State and local governments, in-  
15                 stitutions of higher education, nonprofit entities,  
16                 utilities, and for-profit companies (including manu-  
17                 facturers of heat-pump and direct-use components  
18                 and systems) to promote the development of geo-  
19                 thermal heat pumps and the direct use of geo-  
20                 thermal energy.

21                 “(2) PRIORITY.—In making grants under this  
22                 subsection, the Secretary shall give priority to pro-  
23                 posals that apply to large buildings (including office,  
24                 retail, educational, government, institutional, and  
25                 multifamily residential buildings and campuses and

1 industrial and manufacturing facilities), commercial  
2 districts, and residential communities.

3 “(3) NATIONAL SOLICITATION.—Not later than  
4 180 days after the date of enactment of this section,  
5 the Secretary shall conduct a national solicitation for  
6 applications for grants under this section.

7 “(e) REPORTS.—

8 “(1) IN GENERAL.—Not later than 2 years  
9 after the date of enactment of this section and annu-  
10 ally thereafter, the Secretary shall submit to the  
11 Committee on Energy and Natural Resources of the  
12 Senate and the Committee on Science, Space, and  
13 Technology of the House of Representatives a report  
14 on progress made and results obtained under this  
15 section to develop geothermal heat pumps and direct  
16 use of geothermal energy.

17 “(2) AREAS.—Each of the reports required  
18 under this subsection shall include—

19 “(A) an analysis of progress made in each  
20 of the areas described in subsection (c)(2); and

21 “(B)(i) a description of any relevant rec-  
22 ommendations made during a review of the pro-  
23 gram; and

24 “(ii) any plans to address the rec-  
25 ommendations under clause (i).”.

1 **SEC. 3010. REPORT TO CONGRESS.**

2 Not later than 3 years after the date of enactment  
3 of this Act and not less frequently than once every 5 years  
4 thereafter, the Secretary of the Interior and the Secretary  
5 shall submit to Congress a report describing the progress  
6 made towards achieving the goals described in section  
7 3005.

8 **SEC. 3011. AUTHORIZATION OF APPROPRIATIONS.**

9 There are authorized to be appropriated to carry out  
10 this subpart—

- 11 (1) \$65,000,000 for fiscal year 2017; and  
12 (2) \$75,000,000 for each of fiscal years 2018  
13 through 2021.

14 **Subpart B—Geothermal Exploration**

15 **SEC. 3012. GEOTHERMAL EXPLORATION TEST PROJECTS.**

16 The Geothermal Steam Act of 1970 (30 U.S.C. 1001  
17 et seq.) is amended by adding at the end the following:

18 **“SEC. 30. GEOTHERMAL EXPLORATION TEST PROJECTS.**

19 **“(a) DEFINITIONS.—**In this section:

20 **“(1) COVERED LAND.—**The term ‘covered land’  
21 means land that is—

22 **“(A)** subject to geothermal leasing in ac-  
23 cordance with section 3; and

24 **“(B)** not excluded from the development of  
25 geothermal energy under—

1                   “(i) a final land use plan established  
2                   under the Federal Land Policy and Man-  
3                   agement Act of 1976 (43 U.S.C. 1701 et  
4                   seq.);

5                   “(ii) a final land and resource man-  
6                   agement plan established under the Na-  
7                   tional Forest Management Act of 1976 (16  
8                   U.S.C. 1600 et seq.); or

9                   “(iii) any other applicable law.

10                  “(2) SECRETARY CONCERNED.—The term ‘Sec-  
11                  retary concerned’ means—

12                   “(A) the Secretary of Agriculture (acting  
13                   through the Chief of the Forest Service), with  
14                   respect to National Forest System land; and

15                   “(B) the Secretary, with respect to land  
16                   managed by the Bureau of Land Management  
17                   (including land held for the benefit of an Indian  
18                   tribe).

19                  “(b) NEPA REVIEW OF GEOTHERMAL EXPLORATION  
20                  TEST PROJECTS.—

21                   “(1) IN GENERAL.—An eligible activity de-  
22                   scribed in paragraph (2) carried out on covered land  
23                   shall be considered an action categorically excluded  
24                   from the requirements for an environmental assess-  
25                   ment or an environmental impact statement under

1 the National Environmental Policy Act of 1969 (42  
2 U.S.C. 4321 et seq.) or section 1508.4 of title 40,  
3 Code of Federal Regulations (or a successor regula-  
4 tion) if—

5 “(A) the action is for the purpose of geo-  
6 thermal resource exploration operations; and

7 “(B) the action is conducted pursuant to  
8 this Act.

9 “(2) ELIGIBLE ACTIVITY.—An eligible activity  
10 referred to in paragraph (1) is—

11 “(A) a geophysical exploration activity that  
12 does not require drilling, including a seismic  
13 survey;

14 “(B) the drilling of a well to test or ex-  
15 plore for geothermal resources on land leased  
16 by the Secretary concerned for the development  
17 and production of geothermal resources that—

18 “(i) is carried out by the holder of the  
19 lease;

20 “(ii) causes—

21 “(I) fewer than 5 acres of soil or  
22 vegetation disruption at the location  
23 of each geothermal exploration well;  
24 and

1                   “(II) not more than an additional  
2                   5 acres of soil or vegetation disruption  
3                   during access or egress to the project  
4                   site;

5                   “(iii) is completed in fewer than 90  
6                   days, including the removal of any surface  
7                   infrastructure from the project site; and

8                   “(iv) requires the restoration of the  
9                   project site not later than 3 years after the  
10                  date of completion of the project to ap-  
11                  proximately the condition that existed at  
12                  the time the project began, unless—

13                  “(I) the project site is subse-  
14                  quently used as part of energy devel-  
15                  opment on the lease; or

16                  “(II) the project—

17                          “(aa) yields geothermal re-  
18                          sources; and

19                          “(bb) the use of the geo-  
20                          thermal resources will be carried  
21                          out under another geothermal  
22                          generation project in existence at  
23                          the time of the discovery of the  
24                          geothermal resources; or

1           “(C) the drilling of a well to test or explore  
2 for geothermal resources on land leased by the  
3 Secretary concerned for the development and  
4 production of geothermal resources that—

5           “(i) causes an individual surface dis-  
6 turbance of fewer than 5 acres if—

7           “(I) the total surface disturbance  
8 on the leased land is not more than  
9 150 acres; and

10           “(II) a site-specific analysis has  
11 been prepared under the National En-  
12 vironmental Policy Act of 1969 (42  
13 U.S.C. 4321 et seq.);

14           “(ii) involves the drilling of a geo-  
15 thermal well at a location or well pad site  
16 at which drilling has occurred within 5  
17 years before the date of spudding the well;  
18 or

19           “(iii) involves the drilling of a geo-  
20 thermal well in a developed field for  
21 which—

22           “(I) an approved land use plan  
23 or any environmental document pre-  
24 pared under the National Environ-  
25 mental Policy Act of 1969 (42 U.S.C.

1 4321 et seq.) analyzed the drilling as  
2 a reasonably foreseeable activity; and

3 “(II) the land use plan or envi-  
4 ronmental document was approved  
5 within 10 years before the date of  
6 spudding the well.

7 “(3) LIMITATION BASED ON EXTRAORDINARY  
8 CIRCUMSTANCES.—The categorical exclusion estab-  
9 lished under paragraph (1) shall be subject to ex-  
10 traordinary circumstances in accordance with the  
11 Departmental Manual, 516 DM 2.3A(3) and 516  
12 DM 2, Appendix 2 (or successor provisions).

13 “(c) NOTICE OF INTENT; REVIEW AND DETERMINA-  
14 TION.—

15 “(1) REQUIREMENT TO PROVIDE NOTICE.—Not  
16 later than 30 days before the date on which drilling  
17 begins, a leaseholder intending to carry out an eligi-  
18 ble activity shall provide notice to the Secretary con-  
19 cerned.

20 “(2) REVIEW OF PROJECT.—Not later than 10  
21 days after receipt of a notice of intent provided  
22 under paragraph (1), the Secretary concerned  
23 shall—

1           “(A) review the project described in the  
2 notice and determine whether the project is an  
3 eligible activity; and

4           “(B)(i) if the project is an eligible activity,  
5 notify the leaseholder that under subsection (b),  
6 the project is considered a categorical exclusion  
7 under the National Environmental Policy Act of  
8 1969 (42 U.S.C. 4321 et seq.) and section  
9 1508.4 of title 40, Code of Federal Regulations  
10 (or a successor regulation); or

11           “(ii) if the project is not an eligible activ-  
12 ity—

13           “(I) notify the leaseholder that section  
14 102(2)(C) of the National Environmental  
15 Policy Act of 1969 (42 U.S.C. 4332(2)(C))  
16 applies to the project;

17           “(II) include in that notification clear  
18 and detailed findings on any deficiencies in  
19 the project that prevent the application of  
20 subsection (b) to the project; and

21           “(III) provide an opportunity to the  
22 leaseholder to remedy the deficiencies de-  
23 scribed in the notification before the date  
24 on which the leaseholder plans to begin the  
25 project under paragraph (1).”.

1                   **PART III—MARINE HYDROKINETIC**

2   **SEC. 3013. DEFINITION OF MARINE AND HYDROKINETIC RE-**  
3                   **NEWABLE ENERGY.**

4           Section 632 of the Energy Independence and Security  
5 Act of 2007 (42 U.S.C. 17211) is amended in the matter  
6 preceding paragraph (1) by striking “electrical”.

7   **SEC. 3014. MARINE AND HYDROKINETIC RENEWABLE EN-**  
8                   **ERGY RESEARCH AND DEVELOPMENT.**

9           Section 633 of the Energy Independence and Security  
10 Act of 2007 (42 U.S.C. 17212) is amended to read as  
11 follows:

12   **“SEC. 633. MARINE AND HYDROKINETIC RENEWABLE EN-**  
13                   **ERGY RESEARCH AND DEVELOPMENT.**

14           “The Secretary, in consultation with the Secretary of  
15 the Interior, the Secretary of Commerce, and the Federal  
16 Energy Regulatory Commission, shall carry out a program  
17 of research, development, demonstration, and commercial  
18 application to accelerate the introduction of marine and  
19 hydrokinetic renewable energy production into the United  
20 States energy supply, giving priority to fostering acceler-  
21 ated research, development, and commercialization of  
22 technology, including programs—

23                   “(1) to assist technology development to im-  
24           prove the components, processes, and systems used  
25           for power generation from marine and hydrokinetic  
26           renewable energy resources;

1           “(2) to establish critical testing infrastructure  
2           necessary—

3           “(A) to cost effectively and efficiently test  
4           and prove marine and hydrokinetic renewable  
5           energy devices; and

6           “(B) to accelerate the technological readi-  
7           ness and commercialization of those devices;

8           “(3) to support efforts to increase the efficiency  
9           of energy conversion, lower the cost, increase the  
10          use, improve the reliability, and demonstrate the ap-  
11          plicability of marine and hydrokinetic renewable en-  
12          ergy technologies by participating in demonstration  
13          projects;

14          “(4) to investigate variability issues and the ef-  
15          ficient and reliable integration of marine and  
16          hydrokinetic renewable energy with the utility grid;

17          “(5) to identify and study critical short- and  
18          long-term needs to create a sustainable marine and  
19          hydrokinetic renewable energy supply chain based in  
20          the United States;

21          “(6) to increase the reliability and survivability  
22          of marine and hydrokinetic renewable energy tech-  
23          nologies;

24          “(7) to verify the performance, reliability, main-  
25          tainability, and cost of new marine and hydrokinetic

1 renewable energy device designs and system compo-  
2 nents in an operating environment, and consider the  
3 protection of critical infrastructure, such as ade-  
4 quate separation between marine and hydrokinetic  
5 devices and projects and submarine telecommuni-  
6 cations cables, including consideration of established  
7 industry standards;

8 “(8) to coordinate and avoid duplication of ac-  
9 tivities across programs of the Department and  
10 other applicable Federal agencies, including National  
11 Laboratories and to coordinate public-private col-  
12 laboration in all programs under this section;

13 “(9) to identify opportunities for joint research  
14 and development programs and development of  
15 economies of scale between—

16 “(A) marine and hydrokinetic renewable  
17 energy technologies; and

18 “(B) other renewable energy and fossil en-  
19 ergy programs, offshore oil and gas production  
20 activities, and activities of the Department of  
21 Defense; and

22 “(10) to support in-water technology develop-  
23 ment with international partners using existing co-  
24 operative procedures (including memoranda of un-  
25 derstanding)—

1           “(A) to allow cooperative funding and  
2           other support of value to be exchanged and le-  
3           veraged; and

4           “(B) to encourage the participation of  
5           international research centers and companies  
6           within the United States and the participation  
7           of United States research centers and compa-  
8           nies in international projects.”.

9 **SEC. 3015. NATIONAL MARINE RENEWABLE ENERGY RE-**  
10 **SEARCH, DEVELOPMENT, AND DEMONSTRA-**  
11 **TION CENTERS.**

12       Section 634 of the Energy Independence and Security  
13 Act of 2007 (42 U.S.C. 17213) is amended by striking  
14 subsection (b) and inserting the following:

15       “(b) PURPOSES.—A Center (in coordination with the  
16 Department and National Laboratories) shall—

17           “(1) advance research, development, demonstra-  
18           tion, and commercial application of marine and  
19           hydrokinetic renewable energy technologies;

20           “(2) support in-water testing and demonstra-  
21           tion of marine and hydrokinetic renewable energy  
22           technologies, including facilities capable of testing—

23           “(A) marine and hydrokinetic renewable  
24           energy systems of various technology readiness  
25           levels and scales;

1 (A) by redesignating paragraphs (2) and  
2 (3) as paragraphs (4) and (5), respectively;

3 (B) by inserting after paragraph (1) the  
4 following:

5 “(2) BIO-POWER.—The term ‘bio-power’ means  
6 the use of woody biomass to generate electricity.

7 “(3) BOARD.—The term ‘Board’ means the  
8 Biomass Research and Development Board.”; and

9 (C) by adding at the end the following:

10 “(6) WOODY BIOMASS HEAT.—The term ‘woody  
11 biomass heat’ means the use of woody biomass to  
12 generate heat.”.

13 (2) BIOMASS RESEARCH AND DEVELOPMENT  
14 BOARD.—Section 9008(c)(3)(A) of the Farm Secu-  
15 rity and Rural Investment Act of 2002 (7 U.S.C.  
16 8108(c)(3)(A)) is amended by striking “biofuels and  
17 biobased products” and inserting “biofuels, biobased  
18 products, bio-power, and woody biomass heat  
19 projects”.

20 (3) WOODY BIOMASS HEAT AND BIO-POWER  
21 GRANTS.—Section 9008 of the Farm Security and  
22 Rural Investment Act of 2002 (7 U.S.C. 8108) is  
23 amended—

1 (A) by redesignating subsections (f), (g),  
2 and (h) as subsections (g), (h), and (i), respec-  
3 tively; and

4 (B) by inserting after subsection (e) the  
5 following:

6 “(f) WOODY BIOMASS HEAT AND BIO-POWER  
7 GRANTS.—

8 “(1) ESTABLISHMENT.—The Secretary of Agri-  
9 culture and the Secretary of Energy, in consultation  
10 with the Board, shall establish a program under  
11 which the Secretary of Agriculture and the Secretary  
12 of Energy shall provide grants to relevant projects  
13 to support innovation and market development in  
14 woody biomass heat and bio-power.

15 “(2) APPLICATIONS.—To be eligible to receive a  
16 grant under this subsection, the owner or operator  
17 of a relevant project shall submit to the Secretary of  
18 Agriculture and the Secretary of Energy an applica-  
19 tion at such time, in such manner, and containing  
20 such information as the Secretary of Agriculture and  
21 the Secretary of Energy may require.

22 “(3) ALLOCATION.—Of the amounts appro-  
23 priated to carry out this subsection, the Secretary of  
24 Agriculture and the Secretary of Energy shall not  
25 provide more than—

1                   “(A) \$15,000,000 for projects that develop  
2 innovative techniques for preprocessing biomass  
3 for woody biomass heat and bio-power, with the  
4 goals of lowering the costs of—

5                   “(i) distributed preprocessing tech-  
6 nologies, including technologies designed to  
7 promote densification, torrefaction, and the  
8 broader commoditization of bioenergy feed-  
9 stocks; and

10                   “(ii) transportation; and

11                   “(B) \$15,000,000 for innovative woody  
12 biomass heat and bio-power demonstration  
13 projects, including—

14                   “(i) district energy projects;

15                   “(ii) innovation in transportation; and

16                   “(iii) projects addressing the chal-  
17 lenges of retrofitting existing coal-fired  
18 electricity generation facilities to use bio-  
19 mass.

20                   “(4) REGIONAL DISTRIBUTION.—In selecting  
21 projects to receive grants under this subsection, the  
22 Secretary of Agriculture and the Secretary of En-  
23 ergy shall ensure, to the maximum extent prac-  
24 ticable, diverse geographical distribution among the  
25 projects.

1           “(5) COST SHARE.—The Federal share of the  
2 cost of a project carried out using a grant under this  
3 subsection shall be 50 percent.

4           “(6) DUTIES OF RECIPIENTS.—As a condition  
5 of receiving a grant under this subsection, the owner  
6 or operator of a project shall—

7                 “(A) participate in the applicable working  
8 group under paragraph (7);

9                 “(B) submit to the Secretary of Agri-  
10 culture and the Secretary of Energy a report  
11 that includes—

12                     “(i) a description of the project and  
13 any relevant findings; and

14                     “(ii) such other information as the  
15 Secretary of Agriculture and the Secretary  
16 of Energy determine to be necessary to  
17 complete the report of the Secretary under  
18 paragraph (9); and

19                 “(C) carry out such other activities as the  
20 Secretary of Agriculture and the Secretary of  
21 Energy determine to be necessary.

22           “(7) WORKING GROUPS.—The Secretary of Agri-  
23 culture and the Secretary of Energy shall establish  
24 2 working groups to share best practices and col-  
25 laborate in project implementation, of which—

1           “(A) 1 shall be comprised of representa-  
2           tives of projects that receive grants under para-  
3           graph (3)(A); and

4           “(B) 1 shall be comprised of representa-  
5           tives of projects that receive grants under para-  
6           graph (3)(B).

7           “(8) INCLUSION OF OILSEED CROPS.—A grant  
8           may be provided under this subsection to relevant  
9           projects to support innovation and market develop-  
10          ment in oilseed crops.

11          “(9) REPORTS.—Not later than 5 years after  
12          the date of enactment of this Act, the Secretary of  
13          Agriculture and the Secretary of Energy shall sub-  
14          mit to Congress a report describing—

15               “(A) each project for which a grant has  
16               been provided under this subsection;

17               “(B) any findings as a result of those  
18               projects; and

19               “(C) the state of market and technology  
20               development, including market barriers and op-  
21               portunities.”.

22          (b) LOAN PROGRAMS; STRATEGIC ANALYSIS AND RE-  
23          SEARCH.—

24               (1) LOW-INTEREST LOANS.—

1           (A) ESTABLISHMENT.—The Secretary of  
2           Agriculture shall establish, within the Rural  
3           Development Office, a low-interest loan pro-  
4           gram to support construction of residential,  
5           commercial or institutional, and industrial  
6           woody biomass heat and bio-power systems.

7           (B) REQUIREMENTS.—The program under  
8           this subsection shall be carried out in accord-  
9           ance with such requirements as the Secretary of  
10          Agriculture may establish, by regulation, in tak-  
11          ing into consideration best practices.

12          (C) AUTHORIZATION OF APPROPRIA-  
13          TIONS.—There is authorized to be appropriated  
14          to the Secretary of Agriculture to carry out this  
15          subsection \$50,000,000.

16          (2) ENERGY EFFICIENCY AND CONSERVATION  
17          LOAN PROGRAM.—In addition to loans under para-  
18          graph (1), woody biomass heat residential, commer-  
19          cial or institutional, and industrial wood energy sys-  
20          tems shall be eligible to receive loans under the en-  
21          ergy efficiency and conservation loan program of the  
22          Department of Agriculture under section 2 of the  
23          Rural Electrification Act of 1936 (7 U.S.C. 902).

1                   **Subtitle B—Oil and Gas**

2   **SEC. 3101. AMENDMENTS TO THE METHANE HYDRATE RE-**  
3                   **SEARCH AND DEVELOPMENT ACT OF 2000.**

4           (a) METHANE HYDRATE RESEARCH AND DEVELOP-  
5   MENT PROGRAM.—

6                   (1) IN GENERAL.—Section 4 of the Methane  
7           Hydrate Research and Development Act of 2000 (30  
8           U.S.C. 2003) is amended by striking subsection (b)  
9           and inserting the following:

10           “(b) GRANTS, CONTRACTS, COOPERATIVE AGREE-  
11   MENTS, INTERAGENCY FUNDS TRANSFER AGREEMENTS,  
12   AND FIELD WORK PROPOSALS.—

13                   “(1) ASSISTANCE AND COORDINATION.—In car-  
14           rying out the program of methane hydrate research  
15           and development authorized by this section, the Sec-  
16           retary may award grants to, or enter into contracts  
17           or cooperative agreements with, institutions—

18                           “(A) to conduct basic and applied re-  
19                           search—

20                                   “(i) to identify, explore, assess, and  
21                                   develop methane hydrate as a commercially  
22                                   viable source of energy; and

23                                   “(ii) to identify the environmental,  
24                                   health, and safety impacts of methane hy-  
25                                   drate development;

1           “(B) to identify and characterize methane  
2 hydrate resources using remote sensing and  
3 seismic data, including the characterization of  
4 hydrate concentrations in marine reservoirs in  
5 the Gulf of Mexico or the Atlantic Ocean Basin  
6 by the date that is 4 years after the date of en-  
7 actment of the Energy Policy Modernization  
8 Act of 2015;

9           “(C) to develop technologies required for  
10 efficient and environmentally sound develop-  
11 ment of methane hydrate resources;

12           “(D) to conduct basic and applied research  
13 to assess and mitigate the environmental im-  
14 pact of hydrate degassing (including natural  
15 degassing and degassing associated with com-  
16 mercial development);

17           “(E) to develop technologies to reduce the  
18 risks of drilling through methane hydrates;

19           “(F) to conduct exploratory drilling, well  
20 testing, and production testing operations on  
21 permafrost and nonpermafrost gas hydrates in  
22 support of the activities authorized by this  
23 paragraph, including—

24                   “(i) drilling of a test well and per-  
25 forming a long-term hydrate production

1 test on land in the United States Arctic re-  
2 gion by the date that is 4 years after the  
3 date of enactment of the Energy Policy  
4 Modernization Act of 2015;

5 “(ii) drilling of a test well and per-  
6 forming a long-term hydrate production  
7 test in a marine environment by the date  
8 that is 10 years after the date of enact-  
9 ment of the Energy Policy Modernization  
10 Act of 2015; and

11 “(iii) drilling a full-scale production  
12 test well at a location to be determined by  
13 the Secretary; or

14 “(G) to expand education and training pro-  
15 grams in methane hydrate resource research  
16 and resource development through fellowships  
17 or other means for graduate education and  
18 training.

19 “(2) ENVIRONMENTAL MONITORING AND RE-  
20 SEARCH.—The Secretary shall conduct a long-term  
21 environmental monitoring and research program to  
22 study the effects of production from methane hy-  
23 drate reservoirs.

24 “(3) COMPETITIVE PEER REVIEW.—Funds  
25 made available under paragraphs (1) and (2) shall

1 be made available based on a competitive process  
2 using external scientific peer review of proposed re-  
3 search.”.

4 (2) CONFORMING AMENDMENT.—Section 4(e)  
5 of the Methane Hydrate Research and Development  
6 Act of 2000 (30 U.S.C. 2003(e)) is amended in the  
7 matter preceding paragraph (1) by striking “sub-  
8 section (b)(1)” and inserting “paragraphs (1) and  
9 (2) of subsection (b)”.

10 (b) AUTHORIZATION OF APPROPRIATIONS.—The  
11 Methane Hydrate Research and Development Act of 2000  
12 is amended by striking section 7 (30 U.S.C. 2006) and  
13 inserting the following:

14 **“SEC. 7. AUTHORIZATION OF APPROPRIATIONS.**

15 “There is authorized to be appropriated to carry out  
16 this Act \$35,000,000 for each of fiscal years 2017 through  
17 2021.”.

18 **SEC. 3102. LIQUEFIED NATURAL GAS STUDY.**

19 (a) STUDY.—

20 (1) IN GENERAL.—Not later than 1 year after  
21 the date of enactment of this Act, the Secretary, in  
22 consultation with the National Association of Regu-  
23 latory Utility Commissioners and the National Asso-  
24 ciation of State Energy Officials, shall conduct a  
25 study of the State, regional, and national implica-

1 tions of exporting liquefied natural gas with respect  
2 to consumers and the economy.

3 (2) CONTENTS.—The study conducted under  
4 paragraph (1) shall include an analysis of—

5 (A) the economic impact that exporting liq-  
6 uefied natural gas will have in regions that cur-  
7 rently import liquefied natural gas;

8 (B) job creation in the manufacturing sec-  
9 tors; and

10 (C) such other issues as the Secretary con-  
11 siders appropriate.

12 (b) REPORT TO CONGRESS.—Not later than 1 year  
13 after the date of enactment of this Act, the Administrator  
14 shall submit to Congress a report on the results of the  
15 study conducted under subsection (a).

16 **SEC. 3103. FERC PROCESS COORDINATION WITH RESPECT**  
17 **TO REGULATORY APPROVAL OF GAS**  
18 **PROJECTS.**

19 (a) DEFINITIONS.—In this section:

20 (1) COMMISSION.—The term “Commission”  
21 means the Federal Energy Regulatory Commission.

22 (2) FEDERAL AUTHORIZATION.—

23 (A) IN GENERAL.—The term “Federal au-  
24 thorization” means any authorization required  
25 under Federal law with respect to an applica-

1           tion for authorization or a certificate of public  
2           convenience and necessity relating to gas trans-  
3           portation subject to the jurisdiction of the Com-  
4           mission.

5           (B) INCLUSIONS.—The term “Federal au-  
6           thorization” includes any permits, special use  
7           authorizations, certifications, opinions, or other  
8           approvals as may be required under Federal law  
9           with respect to an application for authorization  
10          or a certificate of public convenience and neces-  
11          sity relating to gas transportation subject to the  
12          jurisdiction of the Commission.

13       (b) DESIGNATION AS LEAD AGENCY.—

14           (1) IN GENERAL.—The Commission shall act as  
15          the lead agency for the purposes of—

16           (A) coordinating all applicable Federal au-  
17          thorizations; and

18           (B) compliance with the National Environ-  
19          mental Policy Act of 1969 (42 U.S.C. 4321 et  
20          seq.).

21           (2) OTHER AGENCIES.—Each Federal and  
22          State agency considering an aspect of an application  
23          for Federal authorization shall cooperate with the  
24          Commission.

25       (c) SCHEDULE.—

1           (1) TIMING FOR ISSUANCE.—It is the sense of  
2 Congress that all Federal authorizations required for  
3 a project or facility should be issued by not later  
4 than the date that is 90 days after the date on  
5 which an application is considered to be complete by  
6 the Commission.

7           (2) COMMISSION SCHEDULE.—

8           (A) IN GENERAL.—The Commission shall  
9 establish a schedule for the issuance of all Fed-  
10 eral authorizations.

11           (B) REQUIREMENTS.—In establishing the  
12 schedule under subparagraph (A), the Commis-  
13 sion shall—

14           (i) consult and cooperate with the  
15 Federal and State agencies responsible for  
16 a Federal authorization;

17           (ii) ensure the expeditious completion  
18 of all proceedings relating to a Federal au-  
19 thorization; and

20           (iii) comply with applicable schedules  
21 established under Federal law with respect  
22 to a Federal authorization.

23           (3) RESOLUTION OF INTERAGENCY DIS-  
24 PUTES.—If the Federal agency with responsibility  
25 fails to adhere to the schedule established by the

1 Commission under paragraph (2), or if a Federal  
2 authorization has been unreasonably denied, or if a  
3 Federal authorization would be inconsistent with the  
4 purposes of this section or other applicable law, the  
5 Commission shall refer the matter to the Chairman  
6 of the Council on Environmental Quality—

7 (A) to ensure timely participation;

8 (B) to ensure a timely decision;

9 (C) to mediate the dispute; or

10 (D) to refer the matter to the President.

11 (d) CONSOLIDATED RECORD.—The Commission shall  
12 maintain official consolidated records of all license pro-  
13 ceedings under this section.

14 (e) DEFERENCE TO COMMISSION.—In making a deci-  
15 sion with respect to a Federal authorization, each agency  
16 shall give deference, to the maximum extent authorized  
17 by law, to the scope of environmental review that the Com-  
18 mission determines to be appropriate.

19 (f) CONCURRENT REVIEWS.—Pursuant to the sched-  
20 ule established under subsection (c)(2), each agency con-  
21 sidering an aspect of an application for Federal authoriza-  
22 tion shall—

23 (1) to the maximum extent authorized by law,  
24 carry out the obligations of that agency under appli-  
25 cable law concurrently and in conjunction with the

1 review required by the National Environmental Pol-  
2 icy Act of 1969 (42 U.S.C. 4321 et seq.), unless  
3 doing so would impair the ability of the agency to  
4 conduct needed analysis or otherwise carry out those  
5 obligations;

6 (2) formulate and implement administrative,  
7 policy, and procedural mechanisms to enable the  
8 agency to complete the required Federal authoriza-  
9 tions in accordance with the schedule described in  
10 subsection (c); and

11 (3) transmit to the Commission a statement—

12 (A) acknowledging notice of the schedule  
13 described in subsection (c); and

14 (B) describing the plan formulated under  
15 paragraph (2).

16 (g) FAILURE TO MEET DEADLINE.—If an agency  
17 does not complete a proceeding for an approval that is  
18 required for a Federal authorization in accordance with  
19 the schedule described in subsection (c), the head of the  
20 relevant Federal agency (including, in the case of a failure  
21 by the State agency or unit of local government, the Fed-  
22 eral agency overseeing the delegated authority) shall—

23 (1) notify Congress and the Commission of the  
24 failure; and

1           (2) describe in that notification an implementa-  
2           tion plan to ensure completion.

3           (h) ACCOUNTABILITY; TRANSPARENCY; EFFI-  
4           CIENCY.—

5           (1) IN GENERAL.—For applications requiring  
6           multiple Federal authorizations, the Commission, in  
7           consultation with any agency considering an aspect  
8           of the application, shall track and make available to  
9           the public on the website of the Commission infor-  
10          mation relating to the actions required to complete  
11          permitting, reviews, and other requirements.

12          (2) INCLUSIONS.—Information tracked under  
13          paragraph (1) shall include the following:

14                 (A) The schedule described in subsection  
15                 (c).

16                 (B) A list of all the actions required by  
17                 each applicable agency to complete permitting,  
18                 reviews, and other requirements necessary to  
19                 obtain a final decision on the Federal author-  
20                 ization.

21                 (C) The expected completion date for each  
22                 action listed under subparagraph (B).

23                 (D) A point of contact at the agency ac-  
24                 countable for each action listed under subpara-  
25                 graph (B).

1                   (E) In the event that an action is still  
2                   pending as of the expected date of completion,  
3                   a brief explanation of the reason for the delay.

4 **SEC. 3104. PILOT PROGRAM.**

5           (a) ESTABLISHMENT.—The Secretary of the Interior,  
6 acting through the Director of the Bureau of Land Man-  
7 agement (referred to in this section as the “Director”),  
8 shall establish a pilot program in 1 State with at least  
9 2,000 oil and gas drilling spacing units (as defined under  
10 State law), in which—

11                   (1) 25 percent or less of the minerals are owned  
12                   or held in trust by the Federal Government; and

13                   (2) there is no surface land owned or held in  
14                   trust by the Federal Government.

15           (b) ACTIVITIES.—In carrying out the pilot program,  
16 the Director shall identify and implement ways to stream-  
17 line the review and approval of Applications for Permits  
18 to Drill for oil and gas drilling spacing units of the State  
19 in order to achieve a processing time for those oil and gas  
20 drilling spacing units similar to that of spacing units that  
21 require an Application for Permit to Drill and are not part  
22 of the pilot program in the same State.

23           (c) FUNDING.—Beginning in fiscal year 2016, and  
24 for a period of 3 years thereafter, to carry out the pilot

1 program efficiently, the Director may fund up to 10 full-  
2 time equivalents at appropriate field offices.

3 (d) REPORT.—Not later than 4 years after the date  
4 of enactment of this Act, the Director shall submit to Con-  
5 gress a report on the results of the pilot program.

6 (e) WAIVER.—The Secretary of the Interior may  
7 waive the requirement for an Application for Permit to  
8 Drill if the Director determines that the mineral interest  
9 of the United States in the spacing units in land covered  
10 by this section is adequately protected, if otherwise in ac-  
11 cordance with applicable laws, regulations, and lease  
12 terms.

## 13 **Subtitle C—Helium**

### 14 **SEC. 3201. RIGHTS TO HELIUM.**

15 (a) DEFINITION OF HELIUM-RELATED PROJECT.—  
16 The term “helium-related project” means a project—

17 (1) to explore or produce crude helium; and

18 (2) to sell crude or refined helium.

19 (b) EXPEDITED COMPLETION.—Notwithstanding any  
20 other provision of law, applicable environmental reviews  
21 under the National Environmental Policy Act of 1969 (42  
22 U.S.C. 4321 et seq.) for helium-related projects shall be  
23 completed on an expeditious basis and the shortest exist-  
24 ing applicable process under that Act shall be used for  
25 such projects.

1           (c) REPEAL OF RESERVATION OF HELIUM  
2 RIGHTS.—The first section of the Mineral Leasing Act  
3 (30 U.S.C. 181) is amended by striking the flush text that  
4 follows the last undesignated subsection.

5           (d) RIGHTS TO HELIUM UNDER LEASES UNDER  
6 MINERAL LEASING ACT FOR ACQUIRED LANDS.—The  
7 Mineral Leasing Act for Acquired Lands (30 U.S.C. 351  
8 et seq.) is amended by adding at the end the following:  
9 **“SEC. 12. RIGHTS TO HELIUM.**

10           “Any lease issued under this Act that authorizes ex-  
11 ploration for, or development or production of, gas shall  
12 be considered to grant to the lessee a right of first refusal  
13 to engage in exploration for, and development and produc-  
14 tion of, helium on land that is subject to the lease in ac-  
15 cordance with regulations issued by the Secretary.”.

## 16           **Subtitle D—Critical Minerals**

### 17           **SEC. 3301. DEFINITIONS.**

18           In this subtitle:

19                   (1) CRITICAL MINERAL.—

20                           (A) IN GENERAL.—The term “critical min-  
21 eral” means any mineral, element, substance, or  
22 material designated as critical pursuant to sec-  
23 tion 3303.

24                           (B) EXCLUSIONS.—The term “critical  
25 mineral” does not include—

1 (i) fuel minerals, including oil, natural  
2 gas, or any other fossil fuels; or

3 (ii) water, ice, or snow.

4 (2) CRITICAL MINERAL MANUFACTURING.—The  
5 term “critical mineral manufacturing” means—

6 (A) the production, processing, refining,  
7 alloying, separation, concentration, magnetic  
8 sintering, melting, or beneficiation of critical  
9 minerals within the United States;

10 (B) the fabrication, assembly, or produc-  
11 tion, within the United States, of equipment,  
12 components, or other goods with energy tech-  
13 nology-, defense-, agriculture-, consumer elec-  
14 tronics-, or health care-related applications; or

15 (C) any other value-added, manufacturing-  
16 related use of critical minerals undertaken with-  
17 in the United States.

18 (3) INDIAN TRIBE.—The term “Indian tribe”  
19 has the meaning given the term in section 4 of the  
20 Indian Self-Determination and Education Assistance  
21 Act (25 U.S.C. 450b).

22 (4) STATE.—The term “State” means—

23 (A) a State;

24 (B) the District of Columbia;

25 (C) the Commonwealth of Puerto Rico;

- 1 (D) Guam;
- 2 (E) American Samoa;
- 3 (F) the Commonwealth of the Northern
- 4 Mariana Islands; and
- 5 (G) the United States Virgin Islands.

6 **SEC. 3302. POLICY.**

7 (a) IN GENERAL.—Section 3 of the National Mate-

8 rials and Minerals Policy, Research and Development Act

9 of 1980 (30 U.S.C. 1602) is amended in the second sen-

10 tence—

11 (1) by striking paragraph (3) and inserting the

12 following:

13 “(3) establish an analytical and forecasting ca-

14 pability for identifying critical mineral demand, sup-

15 ply, and other factors to allow informed actions to

16 be taken to avoid supply shortages, mitigate price

17 volatility, and prepare for demand growth and other

18 market shifts;”;

19 (2) in paragraph (6), by striking “and” after

20 the semicolon at the end; and

21 (3) by striking paragraph (7) and inserting the

22 following:

23 “(7) encourage Federal agencies to facilitate

24 the availability, development, and environmentally

1 responsible production of domestic resources to meet  
2 national material or critical mineral needs;

3 “(8) avoid duplication of effort, prevent unneces-  
4 sary paperwork, and minimize delays in the ad-  
5 ministration of applicable laws (including regula-  
6 tions) and the issuance of permits and authoriza-  
7 tions necessary to explore for, develop, and produce  
8 critical minerals and to construct critical mineral  
9 manufacturing facilities in accordance with applica-  
10 ble environmental and land management laws;

11 “(9) strengthen educational and research capa-  
12 bilities and workforce training;

13 “(10) bolster international cooperation through  
14 technology transfer, information sharing, and other  
15 means;

16 “(11) promote the efficient production, use, and  
17 recycling of critical minerals;

18 “(12) develop alternatives to critical minerals;  
19 and

20 “(13) establish contingencies for the production  
21 of, or access to, critical minerals for which viable  
22 sources do not exist within the United States.”.

23 (b) CONFORMING AMENDMENT.—Section 2(b) of the  
24 National Materials and Minerals Policy, Research and De-  
25 velopment Act of 1980 (30 U.S.C. 1601(b)) is amended

1 by striking “(b) As used in this Act, the term” and insert-  
2 ing the following:

3 “(b) DEFINITIONS.—In this Act:

4 “(1) CRITICAL MINERAL.—The term ‘critical  
5 mineral’ means any mineral or element designated  
6 as a critical mineral pursuant to section 3303 of the  
7 Energy Policy Modernization Act of 2015.

8 “(2) MATERIALS.—The term”.

9 **SEC. 3303. CRITICAL MINERAL DESIGNATIONS.**

10 (a) DRAFT METHODOLOGY.—Not later than 90 days  
11 after the date of enactment of this Act, the Secretary of  
12 the Interior (acting through the Director of the United  
13 States Geological Survey) (referred to in this subtitle as  
14 the “Secretary”), in consultation with relevant Federal  
15 agencies and entities, shall publish in the Federal Register  
16 for public comment a draft methodology for determining  
17 which minerals qualify as critical minerals based on an  
18 assessment of whether the minerals are—

19 (1) subject to potential supply restrictions (in-  
20 cluding restrictions associated with foreign political  
21 risk, abrupt demand growth, military conflict, violent  
22 unrest, anti-competitive or protectionist behaviors,  
23 and other risks throughout the supply chain); and

1           (2) important in use (including energy tech-  
2           nology-, defense-, currency-, agriculture-, consumer  
3           electronics-, and health care-related applications).

4           (b) AVAILABILITY OF DATA.—If available data is in-  
5           sufficient to provide a quantitative basis for the method-  
6           ology developed under this section, qualitative evidence  
7           may be used to the extent necessary.

8           (c) FINAL METHODOLOGY.—After reviewing public  
9           comments on the draft methodology under subsection (a)  
10          and updating the draft methodology as appropriate, not  
11          later than 270 days after the date of enactment of this  
12          Act, the Secretary shall publish in the Federal Register  
13          a description of the final methodology for determining  
14          which minerals qualify as critical minerals.

15          (d) DESIGNATIONS.—

16               (1) IN GENERAL.—For purposes of carrying out  
17               this subtitle, the Secretary shall maintain a list of  
18               minerals and elements designated as critical, pursu-  
19               ant to the methodology under subsection (c).

20               (2) INITIAL LIST.—Subject to paragraph (1),  
21               not later than 1 year after the date of enactment of  
22               this Act, the Secretary shall publish in the Federal  
23               Register an initial list of minerals designated as crit-  
24               ical pursuant to the final methodology under sub-

1 section (c) for the purpose of carrying out this sub-  
2 title.

3 (3) INCLUSIONS.—Notwithstanding the criteria  
4 under subsection (c), the Secretary may designate  
5 and include on the list any mineral or element deter-  
6 mined by another Federal agency to be strategic and  
7 critical to the defense or national security of the  
8 United States.

9 (e) SUBSEQUENT REVIEW.—

10 (1) IN GENERAL.—The Secretary shall review  
11 the methodology and designations under subsections  
12 (c) and (d) at least every 3 years, or more frequently  
13 as the Secretary considers to be appropriate.

14 (2) REVISIONS.—Subject to subsection (d)(1),  
15 the Secretary may—

16 (A) revise the methodology described in  
17 this section;

18 (B) determine that minerals or elements  
19 previously determined to be critical minerals are  
20 no longer critical minerals; and

21 (C) designate additional minerals or ele-  
22 ments as critical minerals.

23 (f) NOTICE.—On finalization of the methodology  
24 under subsection (c), the list under subsection (d), or any  
25 revision to the methodology or list under subsection (e),

1 the Secretary shall submit to Congress written notice of  
2 the action.

3 **SEC. 3304. RESOURCE ASSESSMENT.**

4 (a) IN GENERAL.—Not later than 4 years after the  
5 date of enactment of this Act, in consultation with applica-  
6 ble State (including geological surveys), local, academic,  
7 industry, and other entities, the Secretary shall complete  
8 a comprehensive national assessment of each critical min-  
9 eral that—

10 (1) identifies and quantifies known critical min-  
11 eral resources, using all available public and private  
12 information and datasets, including exploration his-  
13 tories; and

14 (2) provides a quantitative and qualitative as-  
15 sessment of undiscovered critical mineral resources  
16 throughout the United States, including probability  
17 estimates of tonnage and grade, using all available  
18 public and private information and datasets, includ-  
19 ing exploration histories.

20 (b) SUPPLEMENTARY INFORMATION.—In carrying  
21 out this section, the Secretary may carry out surveys and  
22 field work (including drilling, remote sensing, geophysical  
23 surveys, geological mapping, and geochemical sampling  
24 and analysis) to supplement existing information and

1 datasets available for determining the existence of critical  
2 minerals in the United States.

3 (c) TECHNICAL ASSISTANCE.—At the request of the  
4 Governor of a State or the head of an Indian tribe, the  
5 Secretary may provide technical assistance to State gov-  
6 ernments and Indian tribes conducting critical mineral re-  
7 source assessments on non-Federal land.

8 (d) PRIORITIZATION.—

9 (1) IN GENERAL.—The Secretary may sequence  
10 the completion of resource assessments for each crit-  
11 ical mineral such that critical minerals considered to  
12 be most critical under the methodology established  
13 under section 3303 are completed first.

14 (2) REPORTING.—During the period beginning  
15 not later than 1 year after the date of enactment of  
16 this Act and ending on the date of completion of all  
17 of the assessments required under this section, the  
18 Secretary shall submit to Congress on an annual  
19 basis an interim report that—

20 (A) identifies the sequence and schedule  
21 for completion of the assessments if the Sec-  
22 retary sequences the assessments; or

23 (B) describes the progress of the assess-  
24 ments if the Secretary does not sequence the  
25 assessments.

1 (e) UPDATES.—The Secretary may periodically up-  
2 date the assessments conducted under this section based  
3 on—

4 (1) the generation of new information or  
5 datasets by the Federal Government; or

6 (2) the receipt of new information or datasets  
7 from critical mineral producers, State geological sur-  
8 veys, academic institutions, trade associations, or  
9 other persons.

10 (f) ADDITIONAL SURVEYS.—The Secretary shall com-  
11 plete a resource assessment for each additional mineral  
12 or element subsequently designated as a critical mineral  
13 under section 3303(e)(2) not later than 2 years after the  
14 designation of the mineral or element.

15 (g) REPORT.—Not later than 2 years after the date  
16 of enactment of this Act, the Secretary shall submit to  
17 Congress a report describing the status of geological sur-  
18 veying of Federal land for any mineral commodity—

19 (1) for which the United States was dependent  
20 on a foreign country for more than 25 percent of the  
21 United States supply, as depicted in the report  
22 issued by the United States Geological Survey enti-  
23 tled “Mineral Commodity Summaries 2015”; but

24 (2) that is not designated as a critical mineral  
25 under section 3303.

1 **SEC. 3305. PERMITTING.**

2 (a) PERFORMANCE IMPROVEMENTS.—To improve  
3 the quality and timeliness of decisions, the Secretary (act-  
4 ing through the Director of the Bureau of Land Manage-  
5 ment) and the Secretary of Agriculture (acting through  
6 the Chief of the Forest Service) (referred to in this section  
7 as the “Secretaries”) shall, to the maximum extent prac-  
8 ticable, with respect to critical mineral production on Fed-  
9 eral land, complete Federal permitting and review proc-  
10 esses with maximum efficiency and effectiveness, while  
11 supporting vital economic growth, by—

12 (1) establishing and adhering to timelines and  
13 schedules for the consideration of, and final deci-  
14 sions regarding, applications, operating plans, leases,  
15 licenses, permits, and other use authorizations for  
16 mineral-related activities on Federal land;

17 (2) establishing clear, quantifiable, and tem-  
18 poral permitting performance goals and tracking  
19 progress against those goals;

20 (3) engaging in early collaboration among agen-  
21 cies, project sponsors, and affected stakeholders—

22 (A) to incorporate and address the inter-  
23 ests of those parties; and

24 (B) to minimize delays;

25 (4) ensuring transparency and accountability by  
26 using cost-effective information technology to collect

1 and disseminate information regarding individual  
2 projects and agency performance;

3 (5) engaging in early and active consultation  
4 with State, local, and Indian tribal governments to  
5 avoid conflicts or duplication of effort, resolve con-  
6 cerns, and allow for concurrent, rather than sequen-  
7 tial, reviews;

8 (6) providing demonstrable improvements in the  
9 performance of Federal permitting and review proc-  
10 esses, including lower costs and more timely deci-  
11 sions;

12 (7) expanding and institutionalizing permitting  
13 and review process improvements that have proven  
14 effective;

15 (8) developing mechanisms to better commu-  
16 nicate priorities and resolve disputes among agencies  
17 at the national, regional, State, and local levels; and

18 (9) developing other practices, such as  
19 preapplication procedures.

20 (b) REVIEW AND REPORT.—Not later than 1 year  
21 after the date of enactment of this Act, the Secretaries  
22 shall submit to Congress a report that—

23 (1) identifies additional measures (including  
24 regulatory and legislative proposals, as appropriate)  
25 that would increase the timeliness of permitting ac-

1        activities for the exploration and development of do-  
2        mestic critical minerals;

3            (2) identifies options (including cost recovery  
4        paid by permit applicants) for ensuring adequate  
5        staffing and training of Federal entities and per-  
6        sonnel responsible for the consideration of applica-  
7        tions, operating plans, leases, licenses, permits, and  
8        other use authorizations for critical mineral-related  
9        activities on Federal land;

10           (3) quantifies the amount of time typically re-  
11        quired (including range derived from minimum and  
12        maximum durations, mean, median, variance, and  
13        other statistical measures or representations) to  
14        complete each step (including those aspects outside  
15        the control of the executive branch, such as judicial  
16        review, applicant decisions, or State and local gov-  
17        ernment involvement) associated with the develop-  
18        ment and processing of applications, operating  
19        plans, leases, licenses, permits, and other use au-  
20        thorizations for critical mineral-related activities on  
21        Federal land, which shall serve as a baseline for the  
22        performance metric under subsection (c); and

23           (4) describes actions carried out pursuant to  
24        subsection (a).

1           (c) PERFORMANCE METRIC.—Not later than 90 days  
2 after the date of submission of the report under subsection  
3 (b), the Secretaries, after providing public notice and an  
4 opportunity to comment, shall develop and publish a per-  
5 formance metric for evaluating the progress made by the  
6 executive branch to expedite the permitting of activities  
7 that will increase exploration for, and development of, do-  
8 mestic critical minerals, while maintaining environmental  
9 standards.

10          (d) ANNUAL REPORTS.—Beginning with the first  
11 budget submission by the President under section 1105  
12 of title 31, United States Code, after publication of the  
13 performance metric required under subsection (c), and an-  
14 nually thereafter, the Secretaries shall submit to Congress  
15 a report that—

16           (1) summarizes the implementation of rec-  
17 ommendations, measures, and options identified in  
18 paragraphs (1) and (2) of subsection (b);

19           (2) using the performance metric under sub-  
20 section (c), describes progress made by the executive  
21 branch, as compared to the baseline established pur-  
22 suant to subsection (b)(3), on expediting the permit-  
23 ting of activities that will increase exploration for,  
24 and development of, domestic critical minerals; and

1           (3) compares the United States to other coun-  
2           tries in terms of permitting efficiency and any other  
3           criteria relevant to the globally competitive critical  
4           minerals industry.

5           (e) INDIVIDUAL PROJECTS.—Using data from the  
6           Secretaries generated under subsection (d), the Director  
7           of the Office of Management and Budget shall prioritize  
8           inclusion of individual critical mineral projects on the  
9           website operated by the Office of Management and Budget  
10          in accordance with section 1122 of title 31, United States  
11          Code.

12          (f) REPORT OF SMALL BUSINESS ADMINISTRA-  
13          TION.—Not later than 1 year and 300 days after the date  
14          of enactment of this Act, the Administrator of the Small  
15          Business Administration shall submit to the applicable  
16          committees of Congress a report that assesses the per-  
17          formance of Federal agencies with respect to—

18                (1) complying with chapter 6 of title 5, United  
19                States Code (commonly known as the “Regulatory  
20                Flexibility Act”), in promulgating regulations appli-  
21                cable to the critical minerals industry; and

22                (2) performing an analysis of regulations appli-  
23                cable to the critical minerals industry that may be  
24                outmoded, inefficient, duplicative, or excessively bur-  
25                densome.

1 **SEC. 3306. FEDERAL REGISTER PROCESS.**

2 (a) DEPARTMENTAL REVIEW.—Absent any extraor-  
3 dinary circumstance, and except as otherwise required by  
4 law, the Secretary and the Secretary of Agriculture shall  
5 ensure that each Federal Register notice described in sub-  
6 section (b) shall be—

7 (1) subject to any required reviews within the  
8 Department of the Interior or the Department of  
9 Agriculture; and

10 (2) published in final form in the Federal Reg-  
11 ister not later than 45 days after the date of initial  
12 preparation of the notice.

13 (b) PREPARATION.—The preparation of Federal Reg-  
14 ister notices required by law associated with the issuance  
15 of a critical mineral exploration or mine permit shall be  
16 delegated to the organizational level within the agency re-  
17 sponsible for issuing the critical mineral exploration or  
18 mine permit.

19 (c) TRANSMISSION.—All Federal Register notices re-  
20 garding official document availability, announcements of  
21 meetings, or notices of intent to undertake an action shall  
22 be originated in, and transmitted to the Federal Register  
23 from, the office in which, as applicable—

24 (1) the documents or meetings are held; or

25 (2) the activity is initiated.

1 **SEC. 3307. RECYCLING, EFFICIENCY, AND ALTERNATIVES.**

2 (a) ESTABLISHMENT.—The Secretary of Energy (re-  
3 ferred to in this section as the “Secretary”) shall conduct  
4 a program of research and development—

5 (1) to promote the efficient production, use,  
6 and recycling of critical minerals throughout the  
7 supply chain; and

8 (2) to develop alternatives to critical minerals  
9 that do not occur in significant abundance in the  
10 United States.

11 (b) COOPERATION.—In carrying out the program, the  
12 Secretary shall cooperate with appropriate—

13 (1) Federal agencies and National Laboratories;

14 (2) critical mineral producers;

15 (3) critical mineral processors;

16 (4) critical mineral manufacturers;

17 (5) trade associations;

18 (6) academic institutions;

19 (7) small businesses; and

20 (8) other relevant entities or individuals.

21 (c) ACTIVITIES.—Under the program, the Secretary  
22 shall carry out activities that include the identification and  
23 development of—

24 (1) advanced critical mineral extraction, pro-  
25 duction, separation, alloying, or processing tech-  
26 nologies that decrease the energy consumption, envi-

1       ronmental impact, and costs of those activities, in-  
2       cluding—

3               (A) efficient water and wastewater man-  
4               agement strategies;

5               (B) technologies and management strate-  
6               gies to control the environmental impacts of  
7               radionuclides in ore tailings; and

8               (C) technologies for separation and proc-  
9               essing;

10              (2) technologies or process improvements that  
11              minimize the use, or lead to more efficient use, of  
12              critical minerals across the full supply chain;

13              (3) technologies, process improvements, or de-  
14              sign optimizations that facilitate the recycling of  
15              critical minerals, and options for improving the rates  
16              of collection of products and scrap containing critical  
17              minerals from post-consumer, industrial, or other  
18              waste streams;

19              (4) commercial markets, advanced storage  
20              methods, energy applications, and other beneficial  
21              uses of critical minerals processing byproducts;

22              (5) alternative minerals, metals, and materials,  
23              particularly those available in abundance within the  
24              United States and not subject to potential supply re-

1        restrictions, that lessen the need for critical minerals;  
2        and

3            (6) alternative energy technologies or alter-  
4        native designs of existing energy technologies, par-  
5        ticularly those that use minerals that—

6            (A) occur in abundance in the United  
7        States; and

8            (B) are not subject to potential supply re-  
9        strictions.

10        (d) REPORTS.—Not later than 2 years after the date  
11        of enactment of this Act, and annually thereafter, the Sec-  
12        retary shall submit to Congress a report summarizing the  
13        activities, findings, and progress of the program.

14        **SEC. 3308. ANALYSIS AND FORECASTING.**

15        (a) CAPABILITIES.—In order to evaluate existing crit-  
16        ical mineral policies and inform future actions that may  
17        be taken to avoid supply shortages, mitigate price vola-  
18        tility, and prepare for demand growth and other market  
19        shifts, the Secretary, in consultation with the Energy In-  
20        formation Administration, academic institutions, and oth-  
21        ers in order to maximize the application of existing com-  
22        petencies related to developing and maintaining computer-  
23        models and similar analytical tools, shall conduct and pub-  
24        lish the results of an annual report that includes—

1           (1) as part of the annually published Mineral  
2           Commodity Summaries from the United States Geo-  
3           logical Survey, a comprehensive review of critical  
4           mineral production, consumption, and recycling pat-  
5           terns, including—

6                   (A) the quantity of each critical mineral  
7                   domestically produced during the preceding  
8                   year;

9                   (B) the quantity of each critical mineral  
10                  domestically consumed during the preceding  
11                  year;

12                  (C) market price data or other price data  
13                  for each critical mineral;

14                  (D) an assessment of—

15                   (i) critical mineral requirements to  
16                   meet the national security, energy, eco-  
17                   nomic, industrial, technological, and other  
18                   needs of the United States during the pre-  
19                   ceding year;

20                   (ii) the reliance of the United States  
21                   on foreign sources to meet those needs  
22                   during the preceding year; and

23                   (iii) the implications of any supply  
24                   shortages, restrictions, or disruptions dur-  
25                   ing the preceding year;

1 (E) the quantity of each critical mineral  
2 domestically recycled during the preceding year;

3 (F) the market penetration during the pre-  
4 ceding year of alternatives to each critical min-  
5 eral;

6 (G) a discussion of international trends as-  
7 sociated with the discovery, production, con-  
8 sumption, use, costs of production, prices, and  
9 recycling of each critical mineral as well as the  
10 development of alternatives to critical minerals;  
11 and

12 (H) such other data, analyses, and evalua-  
13 tions as the Secretary finds are necessary to  
14 achieve the purposes of this section; and

15 (2) a comprehensive forecast, entitled the “An-  
16 nual Critical Minerals Outlook”, of projected critical  
17 mineral production, consumption, and recycling pat-  
18 terns, including—

19 (A) the quantity of each critical mineral  
20 projected to be domestically produced over the  
21 subsequent 1-year, 5-year, and 10-year periods;

22 (B) the quantity of each critical mineral  
23 projected to be domestically consumed over the  
24 subsequent 1-year, 5-year, and 10-year periods;

25 (C) an assessment of—

1 (i) critical mineral requirements to  
2 meet projected national security, energy,  
3 economic, industrial, technological, and  
4 other needs of the United States;

5 (ii) the projected reliance of the  
6 United States on foreign sources to meet  
7 those needs; and

8 (iii) the projected implications of po-  
9 tential supply shortages, restrictions, or  
10 disruptions;

11 (D) the quantity of each critical mineral  
12 projected to be domestically recycled over the  
13 subsequent 1-year, 5-year, and 10-year periods;

14 (E) the market penetration of alternatives  
15 to each critical mineral projected to take place  
16 over the subsequent 1-year, 5-year, and 10-year  
17 periods;

18 (F) a discussion of reasonably foreseeable  
19 international trends associated with the dis-  
20 covery, production, consumption, use, costs of  
21 production, and recycling of each critical min-  
22 eral as well as the development of alternatives  
23 to critical minerals; and

24 (G) such other projections relating to each  
25 critical mineral as the Secretary determines to

1           be necessary to achieve the purposes of this sec-  
2           tion.

3           (b) PROPRIETARY INFORMATION.—In preparing a re-  
4 port described in subsection (a), the Secretary shall en-  
5 sure, consistent with section 5(f) of the National Materials  
6 and Minerals Policy, Research and Development Act of  
7 1980 (30 U.S.C. 1604(f)), that—

8           (1) no person uses the information and data  
9           collected for the report for a purpose other than the  
10          development of or reporting of aggregate data in a  
11          manner such that the identity of the person or firm  
12          who supplied the information is not discernible and  
13          is not material to the intended uses of the informa-  
14          tion;

15          (2) no person discloses any information or data  
16          collected for the report unless the information or  
17          data has been transformed into a statistical or ag-  
18          gregate form that does not allow the identification of  
19          the person or firm who supplied particular informa-  
20          tion; and

21          (3) procedures are established to require the  
22          withholding of any information or data collected for  
23          the report if the Secretary determines that with-  
24          holding is necessary to protect proprietary informa-

1           tion, including any trade secrets or other confiden-  
2           tial information.

3   **SEC. 3309. EDUCATION AND WORKFORCE.**

4           (a) WORKFORCE ASSESSMENT.—Not later than 1  
5   year and 300 days after the date of enactment of this Act,  
6   the Secretary of Labor (in consultation with the Secretary,  
7   the Director of the National Science Foundation, institu-  
8   tions of higher education with substantial expertise in  
9   mining, institutions of higher education with significant  
10  expertise in minerals research, including fundamental re-  
11  search into alternatives, and employers in the critical min-  
12  erals sector) shall submit to Congress an assessment of  
13  the domestic availability of technically trained personnel  
14  necessary for critical mineral exploration, development, as-  
15  sessment, production, manufacturing, recycling, analysis,  
16  forecasting, education, and research, including an analysis  
17  of—

18           (1) skills that are in the shortest supply as of  
19           the date of the assessment;

20           (2) skills that are projected to be in short sup-  
21           ply in the future;

22           (3) the demographics of the critical minerals in-  
23           dustry and how the demographics will evolve under  
24           the influence of factors such as an aging workforce;

1           (4) the effectiveness of training and education  
2 programs in addressing skills shortages;

3           (5) opportunities to hire locally for new and ex-  
4 isting critical mineral activities;

5           (6) the sufficiency of personnel within relevant  
6 areas of the Federal Government for achieving the  
7 policies described in section 3 of the National Mate-  
8 rials and Minerals Policy, Research and Develop-  
9 ment Act of 1980 (30 U.S.C. 1602); and

10          (7) the potential need for new training pro-  
11 grams to have a measurable effect on the supply of  
12 trained workers in the critical minerals industry.

13 (b) CURRICULUM STUDY.—

14          (1) IN GENERAL.—The Secretary and the Sec-  
15 retary of Labor shall jointly enter into an arrange-  
16 ment with the National Academy of Sciences and the  
17 National Academy of Engineering under which the  
18 Academies shall coordinate with the National  
19 Science Foundation on conducting a study—

20           (A) to design an interdisciplinary program  
21 on critical minerals that will support the critical  
22 mineral supply chain and improve the ability of  
23 the United States to increase domestic, critical  
24 mineral exploration, development, production,

1 manufacturing, research, including fundamental  
2 research into alternatives, and recycling;

3 (B) to address undergraduate and grad-  
4 uate education, especially to assist in the devel-  
5 opment of graduate level programs of research  
6 and instruction that lead to advanced degrees  
7 with an emphasis on the critical mineral supply  
8 chain or other positions that will increase do-  
9 mestic, critical mineral exploration, develop-  
10 ment, production, manufacturing, research, in-  
11 cluding fundamental research into alternatives,  
12 and recycling;

13 (C) to develop guidelines for proposals  
14 from institutions of higher education with sub-  
15 stantial capabilities in the required disciplines  
16 for activities to improve the critical mineral  
17 supply chain and advance the capacity of the  
18 United States to increase domestic, critical min-  
19 eral exploration, research, development, produc-  
20 tion, manufacturing, and recycling; and

21 (D) to outline criteria for evaluating per-  
22 formance and recommendations for the amount  
23 of funding that will be necessary to establish  
24 and carry out the program described in sub-  
25 section (c).

1           (2) REPORT.—Not later than 2 years after the  
2 date of enactment of this Act, the Secretary shall  
3 submit to Congress a description of the results of  
4 the study required under paragraph (1).

5           (c) PROGRAM.—

6           (1) ESTABLISHMENT.—The Secretary and the  
7 Secretary of Labor shall jointly conduct a competi-  
8 tive grant program under which institutions of high-  
9 er education may apply for and receive 4-year grants  
10 for—

11                   (A) startup costs for newly designated fac-  
12 ulty positions in integrated critical mineral edu-  
13 cation, research, innovation, training, and work-  
14 force development programs consistent with  
15 subsection (b);

16                   (B) internships, scholarships, and fellow-  
17 ships for students enrolled in programs related  
18 to critical minerals;

19                   (C) equipment necessary for integrated  
20 critical mineral innovation, training, and work-  
21 force development programs; and

22                   (D) research of critical minerals and their  
23 applications, particularly concerning the manu-  
24 facture of critical components vital to national  
25 security.

1           (2) RENEWAL.—A grant under this subsection  
2           shall be renewable for up to 2 additional 3-year  
3           terms based on performance criteria outlined under  
4           subsection (b)(1)(D).

5 **SEC. 3310. NATIONAL GEOLOGICAL AND GEOPHYSICAL**  
6           **DATA PRESERVATION PROGRAM.**

7           Section 351(k) of the Energy Policy Act of 2005 (42  
8 U.S.C. 15908(k)) is amended by striking “\$30,000,000  
9 for each of fiscal years 2006 through 2010” and inserting  
10 “\$5,000,000 for each of fiscal years 2017 through 2026,  
11 to remain available until expended”.

12 **SEC. 3311. ADMINISTRATION.**

13           (a) IN GENERAL.—The National Critical Materials  
14 Act of 1984 (30 U.S.C. 1801 et seq.) is repealed.

15           (b) CONFORMING AMENDMENT.—Section 3(d) of the  
16 National Superconductivity and Competitiveness Act of  
17 1988 (15 U.S.C. 5202(d)) is amended in the first sentence  
18 by striking “, with the assistance of the National Critical  
19 Materials Council as specified in the National Critical Ma-  
20 terials Act of 1984 (30 U.S.C. 1801 et seq.),”.

21           (c) SAVINGS CLAUSES.—

22           (1) IN GENERAL.—Nothing in this subtitle or  
23 an amendment made by this subtitle modifies any  
24 requirement or authority provided by—

1 (A) the matter under the heading “**GEO-**  
2 **LOGICAL SURVEY**” of the first section of the  
3 Act of March 3, 1879 (43 U.S.C. 31(a)); or

4 (B) the first section of Public Law 87–626  
5 (43 U.S.C. 31(b)).

6 (2) POTASH.—Nothing in this subtitle affects  
7 any aspect of Secretarial Order 3324, issued by the  
8 Secretary of the Interior on December 3, 2012, with  
9 respect to potash and oil and gas operators.

10 **SEC. 3312. AUTHORIZATION OF APPROPRIATIONS.**

11 There is authorized to be appropriated to carry out  
12 this subtitle \$50,000,000 for each of fiscal years 2017  
13 through 2026.

14 **Subtitle E—Coal**

15 **SEC. 3401. FOSSIL ENERGY.**

16 Section 961(a) of the Energy Policy Act of 2005 (42  
17 U.S.C. 16291(a)) is amended by adding at the end the  
18 following:

19 “(8) Improving the conversion, use, and storage  
20 of carbon dioxide produced from fossil fuels.”.

21 **SEC. 3402. ESTABLISHMENT OF COAL TECHNOLOGY PRO-**  
22 **GRAM.**

23 (a) REPEALS.—

24 (1) IN GENERAL.—

1           (A) Sections 962 and 963 of the Energy  
2 Policy Act of 2005 (42 U.S.C. 16292, 16293)  
3 are repealed.

4           (B) Subtitle A of title IV of the Energy  
5 Policy Act of 2005 (42 U.S.C. 15961 et seq.)  
6 is repealed.

7           (2) SAVINGS CLAUSE.—Notwithstanding the  
8 amendments made by paragraph (1), the Secretary  
9 shall continue to manage any program activities that  
10 are outstanding as of the date of enactment of this  
11 Act under the terms and conditions of sections 962  
12 and 963 of the Energy Policy Act of 2005 (42  
13 U.S.C. 16292, 16293) or subtitle A of title IV of the  
14 Energy Policy Act of 2005 (42 U.S.C. 15961 et  
15 seq.) (as in effect on the day before the date of en-  
16 actment of this Act), as applicable.

17           (3) CONFORMING AMENDMENTS.—

18           (A) Section 703(a)(3) of the Energy Inde-  
19 pendence and Security Act of 2007 (42 U.S.C.  
20 17251(a)(3)) is amended—

21           (i) in the matter preceding subpara-  
22 graph (A), by striking the first and second  
23 sentences; and

24           (ii) in subparagraph (B), by striking  
25 “including” in the matter preceding clause

1 (i) and all that follows through the period  
2 at the end and inserting “, including such  
3 geologic sequestration projects as are ap-  
4 proved by the Secretary”.

5 (B) Section 704 of the Energy Independ-  
6 ence and Security Act of 2007 (42 U.S.C.  
7 17252) is amended in the first sentence by  
8 striking “under section 963(c)(3) of the Energy  
9 Policy Act of 2005 (42 U.S.C. 16293(c)(3)), as  
10 added by section 702 of this subtitle, and”.

11 (b) ESTABLISHMENT OF COAL TECHNOLOGY PRO-  
12 GRAM.—

13 (1) IN GENERAL.—The Energy Policy Act of  
14 2005 (as amended by subsection (a)) is amended by  
15 inserting after section 961 (42 U.S.C. 16291) the  
16 following:

17 **“SEC. 962. COAL TECHNOLOGY PROGRAM.**

18 **“(a) DEFINITIONS.—**In this section:

19 **“(1) LARGE-SCALE PILOT PROJECT.—**The term  
20 ‘large-scale pilot project’ means a pilot project  
21 that—

22 **“(A)** represents the scale of technology de-  
23 velopment beyond laboratory development and  
24 bench scale testing, but not yet advanced to the

1 point of being tested under real operational con-  
2 ditions at commercial scale;

3 “(B) represents the scale of technology  
4 necessary to gain the operational data needed  
5 to understand the technical and performance  
6 risks of the technology before the application of  
7 that technology at commercial scale or in com-  
8 mercial-scale demonstration; and

9 “(C) is large enough—

10 “(i) to validate scaling factors; and

11 “(ii) to demonstrate the interaction  
12 between major components so that control  
13 philosophies for a new process can be de-  
14 veloped and enable the technology to ad-  
15 vance from large-scale pilot plant applica-  
16 tion to commercial scale demonstration or  
17 application.

18 “(2) PROGRAM.—The term ‘program’ means  
19 the program established under subsection (b).

20 “(3) TRANSFORMATIONAL TECHNOLOGY.—

21 “(A) IN GENERAL.—The term ‘trans-  
22 formational technology’ means a power genera-  
23 tion technology that represents an entirely new  
24 way to convert energy that will enable a step  
25 change in performance, efficiency, and cost of

1 electricity as compared to the technology in ex-  
2 istence on the date of enactment of this Act.

3 “(B) INCLUSIONS.—The term ‘trans-  
4 formational technology’ includes a broad range  
5 of technology improvements, including—

6 “(i) thermodynamic improvements in  
7 energy conversion and heat transfer, in-  
8 cluding—

9 “(I) oxygen combustion;

10 “(II) chemical looping; and

11 “(III) the replacement of steam  
12 cycles with supercritical carbon diox-  
13 ide cycles;

14 “(ii) improvements in turbine tech-  
15 nology;

16 “(iii) improvements in carbon capture  
17 systems technology; and

18 “(iv) any other technology the Sec-  
19 retary recognizes as transformational tech-  
20 nology.

21 “(b) COAL TECHNOLOGY PROGRAM.—

22 “(1) IN GENERAL.—The Secretary shall estab-  
23 lish a coal technology program to ensure the contin-  
24 ued use of the abundant, domestic coal resources of  
25 the United States through the development of tech-

1 nologies that will significantly improve the efficiency,  
2 effectiveness, costs, and environmental performance  
3 of coal use.

4 “(2) REQUIREMENTS.—The program shall in-  
5 clude—

6 “(A) a research and development program;

7 “(B) large-scale pilot projects; and

8 “(C) demonstration projects.

9 “(3) PROGRAM GOALS AND OBJECTIVES.—In  
10 consultation with the interested entities described in  
11 paragraph (4)(C), the Secretary shall develop goals  
12 and objectives for the program to be applied to the  
13 technologies developed within the program, taking  
14 into consideration the following objectives:

15 “(A) Ensure reliable, low cost power from  
16 new and existing coal plants.

17 “(B) Achieve high conversion efficiencies.

18 “(C) Address emissions of carbon dioxide  
19 through high efficiency platforms and carbon  
20 capture from new and existing coal plants.

21 “(D) Support small-scale and modular  
22 technologies to enable incremental capacity ad-  
23 ditions and load growth and large-scale genera-  
24 tion technologies.

1           “(E) Support flexible baseload operations  
2 for new and existing applications of coal gen-  
3 eration.

4           “(F) Further reduce emissions of criteria  
5 pollutants and reduce the use and manage the  
6 discharge of water in power plant operations.

7           “(G) Accelerate the development of tech-  
8 nologies that have transformational energy con-  
9 version characteristics.

10           “(H) Validate geologic storage of large vol-  
11 umes of anthropogenic sources of carbon diox-  
12 ide and support the development of the infra-  
13 structure needed to support a carbon dioxide  
14 use and storage industry.

15           “(I) Examine methods of converting coal  
16 to other valuable products and commodities in  
17 addition to electricity.

18           “(4) CONSULTATIONS REQUIRED.—In carrying  
19 out the program, the Secretary shall—

20           “(A) undertake international collabora-  
21 tions, as recommended by the National Coal  
22 Council;

23           “(B) use existing authorities to encourage  
24 international cooperation; and

1                   “(C) consult with interested entities, in-  
2                   cluding –  
3                   “(i) coal producers;  
4                   “(ii) industries that use coal;  
5                   “(iii) organizations that promote coal  
6                   and advanced coal technologies;  
7                   “(iv) environmental organizations;  
8                   “(v) organizations representing work-  
9                   ers; and  
10                   “(vi) organizations representing con-  
11                   sumers.

12                   “(c) REPORT.—

13                   “(1) IN GENERAL.—Not later than 18 months  
14                   after the date of enactment of this Act, the Sec-  
15                   retary shall submit to Congress a report describing  
16                   the performance standards adopted under subsection  
17                   (b)(3).

18                   “(2) UPDATE.—Once every 2 years after the  
19                   initial report is submitted under paragraph (1), the  
20                   Secretary shall submit to Congress a report describ-  
21                   ing the progress made towards achieving the objec-  
22                   tives and performance standards adopted under sub-  
23                   section (b)(3).

24                   “(d) FUNDING.—

1           “(1) AUTHORIZATION OF APPROPRIATIONS.—

2           There are authorized to be appropriated to the Sec-  
3           retary to carry out this Act, to remain available until  
4           expended—

5                   “(A) \$610,000,000 for each of fiscal years  
6                   2017 through 2020; and

7                   “(B) \$560,000,000 for fiscal year 2021.

8           “(2) ALLOCATIONS.—The amounts made avail-  
9           able under paragraph (1) shall be allocated as fol-  
10          lows:

11                   “(A) For activities under the research and  
12                   development program component described in  
13                   subsection (b)(2)(A)—

14                           “(i) \$275,000,000 for each of fiscal  
15                           years 2017 through 2020; and

16                           “(ii) \$200,000,000 for fiscal year  
17                           2021.

18                   “(B) For activities under the demonstra-  
19                   tion projects program component described in  
20                   subsection (b)(2)(C)—

21                           “(i) \$50,000,000 for each of fiscal  
22                           years 2017 through 2020; and

23                           “(ii) \$75,000,000 for fiscal year 2021.

24                   “(C) For activities under the large-scale  
25                   pilot projects program component described in

1 subsection (b)(2)(B), \$285,000,000 for each of  
2 fiscal years 2017 through 2021.”.

3 (2) COST SHARING FOR LARGE-SCALE PILOT  
4 PROJECTS.—Activities under subsection (b)(2)(B)  
5 shall be subject to the cost-sharing requirements of  
6 section 988(b) of the Energy Policy Act of 2005 (42  
7 U.S.C. 16352(b)).

## 8 **Subtitle F—Nuclear**

### 9 **SEC. 3501. REPORT ON FUSION AND FISSION REACTOR** 10 **PROTOTYPES.**

11 (a) IN GENERAL.—Not later than 180 days after the  
12 date of enactment of this Act, the Secretary, in consulta-  
13 tion with the National Laboratories, relevant Federal  
14 agencies, and other stakeholders, shall submit to the Com-  
15 mittees on Energy and Natural Resources and Environ-  
16 ment and Public Works of the Senate and the Committee  
17 on Science, Space, and Technology of the House of Rep-  
18 resentatives a report assessing the capability of the De-  
19 partment to host privately funded fusion and fission reac-  
20 tor prototypes up to 20 megawatts thermal output and  
21 related demonstration facilities at sites owned by the De-  
22 partment.

23 (b) CONTENT.—The report submitted under sub-  
24 section (a) shall describe the results of an assessment of—

1           (1) the safety review, oversight capabilities, and  
2 potential liability of the Department;

3           (2) potential sites capable of hosting research,  
4 development, and demonstration of prototype reac-  
5 tors and related facilities for the purpose of reducing  
6 technical risk;

7           (3) the existing physical and technical capabili-  
8 ties of the Department and the National Labora-  
9 tories relevant to research, development, and over-  
10 sight;

11          (4) the efficacy of the available contractual  
12 mechanisms of the Department, including—

13           (A) cooperative research and development  
14 agreements;

15           (B) work for others agreements; and

16           (C) agreements for commercializing tech-  
17 nology;

18          (5) potential cost structures relating to physical  
19 security, decommissioning, liability, and other long-  
20 term project costs;

21          (6) the feasibility of the Department providing  
22 technical assistance to developers of privately funded  
23 fusion and advanced fission reactors in connection  
24 with obtaining a license from the Nuclear Regu-  
25 latory Commission for demonstration reactors or

1 commercial reactors of varying size and readiness  
2 levels up to 2 gigawatts of thermal output; and  
3 (7) other challenges or considerations identified  
4 by the Secretary, including issues relating to poten-  
5 tial cases of demonstration reactors up to 2  
6 gigawatts of thermal output.

7 **SEC. 3502. NEXT GENERATION NUCLEAR PLANT PROJECT.**

8 Section 642(b) of the Energy Policy Act of 2005 (42  
9 U.S.C. 16022(b)) is amended—

10 (1) by striking paragraph (3); and

11 (2) by redesignating paragraphs (4) and (5) as  
12 paragraphs (3) and (4), respectively.

13 **Subtitle G—Workforce**  
14 **Development**

15 **SEC. 3601. 21ST CENTURY ENERGY WORKFORCE ADVISORY**  
16 **BOARD.**

17 (a) ESTABLISHMENT.—The Secretary shall establish  
18 the 21st Century Energy Workforce Advisory Board (re-  
19 ferred to in this section as the “Board”), to develop a  
20 strategy for the support and development of a skilled en-  
21 ergy workforce that—

22 (1) meets the current and future industry and  
23 labor needs of the energy sector;

1           (2) provides opportunities for students to be-  
2           come qualified for placement in traditional energy  
3           sector and clean energy sector jobs;

4           (3) aligns apprenticeship programs and work-  
5           force development programs to provide industry rec-  
6           ognized certifications and credentials;

7           (4) encourages leaders in the education system  
8           of the United States to equip students with the  
9           skills, mentorships, training, and technical expertise  
10          necessary to fill the employment opportunities vital  
11          to managing and operating the energy- and manu-  
12          facturing-related industries of the United States;

13          (5) appropriately supports other Federal agen-  
14          cies;

15          (6) strengthens and more fully engages work-  
16          force training programs of the Department and the  
17          National Laboratories in carrying out the Minorities  
18          in Energy Initiative of the Department and other  
19          Department workforce priorities;

20          (7) supports the design and replication of exist-  
21          ing model energy curricula, particularly in new and  
22          emerging technologies, that leads to industry-wide  
23          credentials;

24          (8) develops plans to support and retrain dis-  
25          placed and unemployed energy sector workers; and

1           (9) makes a Department priority to provide  
2           education and job training to underrepresented  
3           groups, including ethnic minorities, Indian tribes (as  
4           defined in section 4 of the Indian Self-Determination  
5           and Education Assistance Act (25 U.S.C. 450b)),  
6           women, veterans, and socioeconomically disadvan-  
7           taged individuals.

8           (b) MEMBERSHIP.—

9           (1) IN GENERAL.—The Board shall be com-  
10          posed of 9 members, with the initial members of the  
11          Board to be appointed by the Secretary not later  
12          than 1 year after the date of enactment of this Act.

13          (2) NOMINATIONS.—Not later than 1 year after  
14          the date of enactment of this Act, the President’s  
15          Council of Advisors on Science and Technology shall  
16          nominate for appointment to the Board under para-  
17          graph (1) not less than 18 individuals who meet the  
18          qualifications described in paragraph (3).

19          (3) QUALIFICATIONS.—Each individual nomi-  
20          nated for appointment to the Board under para-  
21          graph (1) shall—

22                 (A) be eminent in the field of economics or  
23                 workforce development;

24                 (B) have expertise in relevant traditional  
25                 energy industries and clean energy industries;

1           (C) have expertise in secondary and post-  
2 secondary education;

3           (D) have expertise in energy workforce de-  
4 velopment or apprentice programs of States and  
5 units of local government;

6           (E) have expertise in relevant organized  
7 labor organizations; or

8           (F) have expertise in bringing underrep-  
9 resented groups, including ethnic minorities,  
10 women, veterans, and socioeconomically dis-  
11 advantaged individuals, into the workforce.

12           (4) REPRESENTATION.—The membership of the  
13 Board shall be representative of the broad range of  
14 the energy industry, labor organizations, workforce  
15 development, education, minority participation, and  
16 economics disciplines related to activities carried out  
17 under this section.

18           (5) LIMITATION.—No individual shall be nomi-  
19 nated for appointment to the Board who is an em-  
20 ployee of an entity applying for a grant under sec-  
21 tion 3602.

22           (c) ADVISORY BOARD REVIEW AND RECOMMENDA-  
23 TIONS.—

1                   (ii) make resources available to pro-  
2                   vide training to displaced and unemployed  
3                   energy sector workers to reenter the en-  
4                   ergy workforce; and

5                   (E) identify the energy sectors in greatest  
6                   need of workforce training and develop guide-  
7                   lines for the skills necessary to develop a work-  
8                   force trained to work in those energy sectors.

9                   (2) REQUIRED ANALYSIS.—In developing the  
10                  strategy required under subsection (a), the Board  
11                  shall analyze the effectiveness of—

12                  (A) existing Department directed support;  
13                  and

14                  (B) developing energy workforce training  
15                  programs.

16                  (3) REPORT.—Not later than 1 year after the  
17                  date on which the Board is established under this  
18                  section, and each year thereafter, the Board shall  
19                  submit to the Secretary and Congress, and make  
20                  public, a report containing the findings of the Board  
21                  and model energy curricula with respect to the strat-  
22                  egy required to be developed under subsection (a).

23                  (d) REPORT BY SECRETARY.—Not later than 18  
24                  months after the date on which the Board is established  
25                  under this section, the Secretary shall submit to the Com-

1 mittees on Appropriations of Senate and the House of  
2 Representatives, the Committee on Energy and Natural  
3 Resources of the Senate, and the Committee on Energy  
4 and Commerce of the House of Representatives a report  
5 that—

6           (1) describes whether the Secretary approves or  
7           disapproves the recommendations of the Board  
8           under subsection (c)(3); and

9           (2) provides an implementation plan for rec-  
10          ommendations approved by the Board under para-  
11          graph (1).

12          (e) CLEARINGHOUSE.—Based on the recommenda-  
13          tions of the Board, the Secretary shall establish a clearing-  
14          house—

15               (1) to maintain and update information and re-  
16               sources on training and workforce development pro-  
17               grams for energy- and manufacturing-related jobs;  
18               and

19               (2) to act as a resource, and provide guidance,  
20               for secondary schools, institutions of higher edu-  
21               cation (including community colleges and minority-  
22               serving institutions), workforce development organi-  
23               zations, labor management organizations, and indus-  
24               try organizations that would like to develop and im-

1       plement energy- and manufacturing-related training  
2       programs.

3       (f) SUNSET.—The Board established under this sec-  
4       tion shall remain in effect until September 30, 2020.

5       **SEC. 3602. ENERGY WORKFORCE PILOT GRANT PROGRAM.**

6       (a) IN GENERAL.—Not later than 1 year after the  
7       date of enactment of this Act, the Secretary, in consulta-  
8       tion with the Secretary of Labor and the Secretary of  
9       Education, shall establish a pilot program to award grants  
10      on a competitive basis to eligible entities for job training  
11      programs that lead to an industry-recognized credential.

12      (b) ELIGIBILITY.—To be eligible to receive a grant  
13      under this section, an entity shall be a public or nonprofit  
14      organization or a consortium of public or nonprofit organi-  
15      zations that—

16              (1) includes an advisory board of proportional  
17              participation, as determined by the Secretary, of rel-  
18              evant organizations, including—

19                      (A) relevant energy industry organizations,  
20                      including public and private employers;

21                      (B) labor organizations;

22                      (C) postsecondary education organizations;

23                      and

24                      (D) workforce development boards;

1           (2) work with the Secretary of Defense or vet-  
2           erans organizations to transition members of the  
3           Armed Forces and veterans to careers in the energy  
4           sector;

5           (3) work with Indian tribes (as defined in sec-  
6           tion 4 of the Indian Self-Determination and Edu-  
7           cation Assistance Act (25 U.S.C. 450b));

8           (4) apply as a State or regional consortia to le-  
9           verage best practices already available in the State  
10          or region in which the community college or institu-  
11          tion of higher education is located;

12          (5) have a State-supported entity included in  
13          the consortium applying for the grant;

14          (6) include an apprenticeship program reg-  
15          istered with the Department of Labor or a State as  
16          part of the job training and education program;

17          (7) provide support services and career coach-  
18          ing;

19          (8) provide introductory energy workforce devel-  
20          opment training;

21          (9) work with minority-serving institutions to  
22          provide job training to increase the number of  
23          skilled minorities and women in the energy sector; or

24          (10) provide job training for displaced and un-  
25          employed workers in the energy sector.

1           (e) ADDITIONAL CONSIDERATION.—In making  
2 grants under this section, the Secretary shall consider re-  
3 gional diversity.

4           (f) LIMITATION ON APPLICATIONS.—An eligible enti-  
5 ty may not submit, either individually or as part of a joint  
6 application, more than 1 application for a grant under this  
7 section during any 1 fiscal year.

8           (g) LIMITATIONS ON AMOUNT OF GRANT.—The  
9 amount of an individual grant for any 1 year shall not  
10 exceed \$1,000,000.

11          (h) COST SHARING.—

12           (1) FEDERAL SHARE.—The Federal share of  
13 the cost of a job training and education program  
14 carried out using a grant under this section shall be  
15 not greater than 65 percent.

16           (2) NON-FEDERAL SHARE.—

17           (A) IN GENERAL.—The non-Federal share  
18 of the cost of a job training and education pro-  
19 gram carried out using a grant under this sec-  
20 tion shall consist of not less than 50 percent  
21 cash.

22           (B) LIMITATION.—Not greater than 50  
23 percent of the non-Federal contribution of the  
24 total cost of a job training and education pro-  
25 gram carried out using a grant under this sec-

1           tion shall be in the form of in-kind contribu-  
2           tions of goods or services fairly valued.

3           (i) REDUCTION OF DUPLICATION.—Prior to submit-  
4           ting an application for a grant under this section, each  
5           applicant shall consult with the appropriate agencies of  
6           the Federal Government and coordinate the proposed ac-  
7           tivities of the applicant with existing State and local pro-  
8           grams.

9           (j) TECHNICAL ASSISTANCE.—The Secretary shall  
10          provide technical assistance and capacity building to na-  
11          tional and State energy partnerships, including the enti-  
12          ties described in subsection (b)(1), to leverage the existing  
13          job training and education programs of the Department.

14          (k) REPORT.—The Secretary shall submit to Con-  
15          gress and make publicly available on the website of the  
16          Department an annual report on the program established  
17          under this section, including a description of—

18                 (1) the entities receiving grants;

19                 (2) the activities carried out using the grants;

20                 (3) best practices used to leverage the invest-  
21          ment of the Federal Government;

22                 (4) the rate of employment for participants  
23          after completing a job training and education pro-  
24          gram carried out using a grant; and

1           (C) any financial incentives that may be  
2 necessary for the development of recycled car-  
3 bon fiber or production waste carbon fiber;

4           (D) the potential lifecycle savings in energy  
5 from producing recycled carbon fiber, as com-  
6 pared to producing new carbon fiber;

7           (E) the best and highest use for recycled  
8 carbon fiber;

9           (F) the potential reduction in carbon diox-  
10 ide emissions from producing recycled carbon  
11 fiber, as compared to producing new carbon  
12 fiber;

13           (G) any economic benefits gained from  
14 using recycled carbon fiber or production waste  
15 carbon fiber;

16           (H) workforce training and skills needed to  
17 address labor demands in the development of  
18 recycled carbon fiber or production waste car-  
19 bon fiber; and

20           (I) how the Department can leverage exist-  
21 ing efforts in the industry on the use of produc-  
22 tion waste carbon fiber.

23           (3) REPORT.—Not later than 1 year after the  
24 date of enactment of this Act, the Secretary shall

1 submit to Congress a report describing the results of  
2 the study conducted under paragraph (1).

3 (b) RECYCLED CARBON FIBER DEMONSTRATION  
4 PROJECT.—On completion of the study required under  
5 subsection (a)(1), the Secretary shall consult with the  
6 aviation and automotive industries and existing programs  
7 of the Advanced Manufacturing Office of the Department  
8 to develop a carbon fiber recycling demonstration project.

9 (c) AUTHORIZATION OF APPROPRIATIONS.—There is  
10 authorized to be appropriated to the Secretary to carry  
11 out this section \$10,000,000, to remain available until ex-  
12 pended.

13 **SEC. 3702. ENERGY GENERATION AND REGULATORY RE-**  
14 **LIEF STUDY REGARDING RECOVERY AND**  
15 **CONVERSION OF NONRECYCLED MIXED**  
16 **PLASTICS.**

17 (a) DEFINITIONS.—In this section:

18 (1) ENGINEERED FUEL.—The term “engi-  
19 neered fuel” means a solid fuel that is manufactured  
20 from nonrecycled constituents of municipal solid  
21 waste or other secondary materials.

22 (2) GASIFICATION.—The term “gasification”  
23 means a process through which nonrecycled waste is  
24 heated and converted to synthesis gas in an oxygen-

1       deficient atmosphere, which can be converted into  
2       fuels such as ethanol or other chemical feedstocks.

3           (3) PYROLYSIS.—The term “pyrolysis” means a  
4       process through which nonrecycled plastics are heat-  
5       ed in the absence of oxygen until melted and ther-  
6       mally decomposed, and are then cooled, condensed,  
7       and converted into synthetic crude oil or refined into  
8       synthetic fuels and feedstocks such as diesel or  
9       naphtha.

10       (b) STUDY.—With respect to nonrecycled mixed plas-  
11      tics that are part of municipal solid waste or other sec-  
12      ondary materials in the United States (and are often de-  
13      posited in landfills), the Secretary shall conduct a study  
14      to determine the manner in which the United States can  
15      make progress toward a cost-effective system (including  
16      with respect to environmental issues) through which pyrol-  
17      ysis, gasification, and other innovative technologies such  
18      as engineered fuels are used to convert such plastics, alone  
19      or in combination with other municipal solid waste or sec-  
20      ondary materials, into materials that can be used to gen-  
21      erate electric energy or fuels or as chemical feedstocks.

22       (c) COMPLETION OF STUDY.—Not later than 2 years  
23      after the date of enactment of this Act, the Secretary shall  
24      complete the study described in subsection (b) and submit  
25      to the appropriate committees of Congress reports pro-

1 viding findings and recommendations developed through  
2 the study.

3 (d) FUNDING.—The Secretary may use unobligated  
4 funds of the Department to carry out this section.

5 **SEC. 3703. ELIGIBLE PROJECTS.**

6 Section 1703(b)(1) of the Energy Policy Act of 2005  
7 (42 U.S.C. 16513(b)(1)) is amended by inserting “(ex-  
8 cluding the burning of commonly recycled paper that has  
9 been segregated from solid waste to generate electricity)”  
10 after “systems”.

11 **TITLE IV—ACCOUNTABILITY**  
12 **Subtitle A—Loan Programs**

13 **SEC. 4001. TERMS AND CONDITIONS FOR INCENTIVES FOR**  
14 **INNOVATIVE TECHNOLOGIES.**

15 (a) BORROWER PAYMENT OF SUBSIDY COST.—

16 (1) IN GENERAL.—Section 1702 of the Energy  
17 Policy Act of 2005 (42 U.S.C. 16512) is amended  
18 by adding at the end the following:

19 “(1) BORROWER PAYMENT OF SUBSIDY COST.—

20 “(1) IN GENERAL.—In addition to the require-  
21 ment in subsection (b)(1), no guarantee shall be  
22 made unless the Secretary has received from the  
23 borrower not less than 25 percent of the cost of the  
24 guarantee.

1           “(2) ESTIMATE.—The Secretary shall provide  
2           to the borrower, as soon as practicable, an estimate  
3           or range of the cost of the guarantee under para-  
4           graph (1).”.

5           (2) CONFORMING AMENDMENT.—Section  
6           1702(b) of the Energy Policy Act of 2005 (42  
7           U.S.C. 16512(b)) is amended—

8                   (A) by striking “(1) IN GENERAL.—No  
9                   guarantee” and inserting the following: “Sub-  
10                  ject to subsection (l), no guarantee”;

11                  (B) by redesignating subparagraphs (A),  
12                  (B), and (C) as paragraphs (1), (2), and (3),  
13                  respectively, and indenting appropriately; and

14                  (C) in paragraph (3) (as so redesign-  
15                  ated)—

16                          (i) by striking “subparagraph (A)”  
17                          and inserting “paragraph (1)”; and

18                          (ii) by striking “subparagraph (B)”  
19                          and inserting “paragraph (2)”.

20           (3) EFFECTIVE DATE.—The amendments made  
21           by paragraphs (1) and (2) shall take effect on Octo-  
22           ber 1, 2019.

23           (b) PROHIBITION ON SUBORDINATION OF DEBT.—  
24           Section 1702(d)(3) of the Energy Policy Act of 2005 (42  
25           U.S.C. 16512(d)(3)) is amended by striking “is not subor-

1 dinate” and inserting “(including any reorganization, re-  
2 structuring, or termination of the obligation) shall not at  
3 any time be subordinate”.

4 (c) LOAN PROGRAM TRANSPARENCY.—Section 1703  
5 of the Energy Policy Act of 2005 (42 U.S.C. 16513) is  
6 amended by adding at the end the following:

7 “(f) LOAN STATUS.—

8 “(1) REQUEST.—If the Secretary does not  
9 make a final decision on an application for a loan  
10 guarantee under this section by the date that is 270  
11 days after receipt of the application by the Sec-  
12 retary, on that date and every 90 days thereafter  
13 until the final decision is made, the applicant may  
14 request that the Secretary provide to the applicant  
15 a description of the status of the application.

16 “(2) RESPONSE.—Not later than 10 days after  
17 receiving a request from an applicant under para-  
18 graph (1), the Secretary shall provide to the appli-  
19 cant a response that includes—

20 “(A) a summary of any factors that are  
21 delaying a final decision on the application; and

22 “(B) an estimate of when review of the ap-  
23 plication will be completed.”.

1 (d) TEMPORARY PROGRAM FOR RAPID DEPLOYMENT  
2 OF RENEWABLE ENERGY AND ELECTRIC POWER TRANS-  
3 MISSION PROJECTS.—

4 (1) REPEAL.—Section 1705 of the Energy Pol-  
5 icy Act of 2005 (42 U.S.C. 16516) is repealed.

6 (2) RESCISSION.—There is rescinded the unob-  
7 ligated balance of amounts made available to carry  
8 out the loan guarantee program established under  
9 section 1705 of the Energy Policy Act of 2005 (42  
10 U.S.C. 16516) (before the amendment made by  
11 paragraph (1)).

12 (3) MANAGEMENT.—The Secretary shall ensure  
13 rigorous continued management and oversight of all  
14 outstanding loans guaranteed under the program de-  
15 scribed in subsection (b) until those loans have been  
16 repaid in full.

17 **SEC. 4002. STATE LOAN ELIGIBILITY.**

18 (a) DEFINITIONS.—Section 1701 of the Energy Pol-  
19 icy Act of 2005 (42 U.S.C. 16511) is amended by adding  
20 at the end the following:

21 “(6) STATE.—The term ‘State’ has the mean-  
22 ing given the term in section 202 of the Energy  
23 Conservation and Production Act (42 U.S.C. 6802).

24 “(7) STATE ENERGY FINANCING INSTITU-  
25 TION.—

1           “(A) IN GENERAL.—The term ‘State en-  
2           ergy financing institution’ means a quasi-inde-  
3           pendent entity or an entity within a State agen-  
4           cy or financing authority established by a  
5           State—

6                   “(i) to provide financing support or  
7                   credit enhancements, including loan guar-  
8                   antees and loan loss reserves, for eligible  
9                   projects; and

10                   “(ii) to create liquid markets for eligi-  
11                   ble projects, including warehousing and  
12                   securitization, or take other steps to reduce  
13                   financial barriers to the deployment of ex-  
14                   isting and new eligible projects.

15           “(B) INCLUSION.—The term ‘State energy  
16           financing institution’ includes an entity or orga-  
17           nization established to achieve the purposes de-  
18           scribed in clauses (i) and (ii) of subparagraph  
19           (A) by an Indian tribal entity or an Alaska Na-  
20           tive Corporation.”.

21           (b) TERMS AND CONDITIONS.—Section 1702 of the  
22           Energy Policy Act of 2005 (42 U.S.C. 16512) (as amend-  
23           ed by section 4001(a)(1)) is amended—

1           (1) in subsection (a), by inserting “or to a  
2     State energy financing institution” after “for  
3     projects”; and

4           (2) by adding at the end the following:

5     “(m) STATE ENERGY FINANCING INSTITUTIONS.—

6           “(1) ELIGIBILITY.—To be eligible for a guar-  
7     antee under this title, a State energy financing insti-  
8     tution—

9           “(A) shall meet the requirements of section  
10     1703(a)(1); and

11          “(B) shall not be required to meet the re-  
12     quirements of section 1703(a)(2).

13          “(2) PARTNERSHIPS AUTHORIZED.—In car-  
14     rying out a project receiving a loan guarantee under  
15     this title, State energy financing institutions may  
16     enter into partnerships with private entities, tribal  
17     entities, and Alaska Native corporations.

18          “(3) PROHIBITION ON USE OF APPROPRIATED  
19     FUNDS.—Amounts appropriated to the Department  
20     of Energy before the date of enactment of this sub-  
21     section shall not be available to be used for the cost  
22     of loan guarantees made to State energy financing  
23     institutions under this subsection.”.

1 **SEC. 4003. GAO STUDY ON FOSSIL LOAN GUARANTEE IN-**  
2 **CENTIVE PROGRAM.**

3 (a) IN GENERAL.—Not later than 180 days after the  
4 date of enactment of this Act, the Comptroller General  
5 of the United States shall carry out, and submit to Con-  
6 gress a report describing the results of, a study on the  
7 effectiveness of the advanced fossil loan guarantee incen-  
8 tive program and other incentive programs for advanced  
9 fossil energy of the Department.

10 (b) CONTENTS.—In carrying out the study under  
11 subsection (a), the Comptroller General of the United  
12 States shall—

13 (1) solicit industry and stakeholder input;

14 (2) evaluate the effectiveness of the advanced  
15 fossil loan guarantee incentive program, alone or in  
16 combination with other incentives, in advancing car-  
17 bon capture and storage technology;

18 (3) review each Federal incentive provided by  
19 the Department and other Federal agencies for car-  
20 bon capture and storage demonstration projects to  
21 determine the adequacy and effectiveness of the  
22 combined Federal incentives in advancing carbon  
23 capture and storage and advanced fossil energy tech-  
24 nologies;

25 (4) assess whether combinations of the incentive  
26 programs in existence as of the date of enactment of

1 this Act could be effective to advance carbon capture  
2 and storage and advanced fossil energy technologies;  
3 and

4 (5) evaluate the impact and costs of imple-  
5 menting the recommendations described in the Jan-  
6 uary 2015 National Coal Council report entitled  
7 “Fossil Forward: Revitalizing CCS, Bringing Scale  
8 and Speed to CCS Deployment” on the effectiveness  
9 of the advanced fossil loan guarantee program.

10 **SEC. 4004. PROGRAM ELIGIBILITY FOR VESSELS.**

11 Subtitle B of title I of the Energy Independence and  
12 Security Act of 2007 (42 U.S.C. 17011 et seq.) is amend-  
13 ed by adding at the end the following:

14 **“SEC. 137. ADVANCED TECHNOLOGY VEHICLES MANUFAC-**  
15 **TURING INCENTIVE PROGRAM ELIGIBILITY**  
16 **FOR VESSELS.**

17 “(a) DEFINITION OF VESSEL.—In this section, the  
18 term ‘vessel’ means a vessel (as defined in section 3 of  
19 title 1, United States Code), whether in existence or under  
20 construction, that has been issued a certificate of docu-  
21 mentation as a United States flagged vessel under chapter  
22 121 of title 46, United States Code and that meets the  
23 standards established under section 4005(a) of the Energy  
24 Policy Modernization Act of 2015.

1       “(b) ELIGIBILITY.—Subject to the terms and condi-  
2 tions of subsections (d) and (f) of section 136, projects  
3 for the reequipping, expanding, or establishing of a manu-  
4 facturing facility in the United States to produce vessels  
5 shall be considered eligible for direct loans under section  
6 136(d).

7       “(c) FUNDING.—

8           “(1) PROHIBITION ON USE OF EXISTING CRED-  
9 IT SUBSIDY.—None of the projects made eligible  
10 under this section shall be eligible to receive any  
11 credit subsidy provided under section 136 before the  
12 date of enactment of this section.

13           “(2) SPECIFIC APPROPRIATION OR CONTRIBU-  
14 TION.—The authority under this section to incur in-  
15 debtedness, or enter into contracts, obligating  
16 amounts to be expended by the Federal Government  
17 shall be effective for any fiscal year only—

18           “(A)(i) to such extent or in such amounts  
19 as are provided in advance by appropriation  
20 Acts; and

21           “(ii) if the borrower has agreed to pay a  
22 reasonable percentage of the cost of the obliga-  
23 tion; or

24           “(B) if the Secretary has received from the  
25 borrower a payment in full for the cost of the

1 obligation and deposited the payment into the  
2 Treasury.”.

3 **SEC. 4005. ADDITIONAL REFORMS.**

4 (a) ISSUANCE OF RULE.—Not later than 180 days  
5 after the date of enactment of this Act and after consulta-  
6 tion with, and taking into account comments from, the  
7 vessel industry, the Secretary shall issue a rule that speci-  
8 fies which energy efficiency improvement standards shall  
9 apply to applicants for loans under section 137 of the En-  
10 ergy Independence and Security Act of 2007 (as added  
11 by section 4004) for the manufacturing, retrofitting, or  
12 repowering vessels that have been issued certificates of  
13 documentation as United States flagged vessels under  
14 chapter 121 of title 46, United States Code.

15 (b) FEES.—Section 136 of the Energy Independence  
16 and Security Act of 2007 (42 U.S.C. 17013) is amended  
17 by striking subsection (f) and inserting the following:

18 “(f) FEES.—

19 “(1) IN GENERAL.—The Secretary shall charge  
20 and collect fees for loans provided under this section  
21 in amounts that the Secretary determines are suffi-  
22 cient to cover applicable administrative expenses as-  
23 sociated with the loans, including reasonable closing  
24 fees on the loans.

1           “(2) AVAILABILITY.—Fees collected under  
2 paragraph (1) shall—

3           “(A) be deposited by the Secretary into the  
4 Treasury; and

5           “(B) remain available until expended, sub-  
6 ject to such other conditions as are contained in  
7 annual appropriations Acts.”.

8 **SEC. 4006. DEPARTMENT OF ENERGY INDIAN ENERGY EDU-**  
9 **CATION PLANNING AND MANAGEMENT AS-**  
10 **SISTANCE PROGRAM.**

11       Section 2602(b)(6) of the Energy Policy Act of 1992  
12 (25 U.S.C. 3502(b)(6)) is amended by striking “2016”  
13 and inserting “2026”.

14 **Subtitle B—Energy-Water Nexus**

15 **SEC. 4101. NEXUS OF ENERGY AND WATER FOR SUSTAIN-**  
16 **ABILITY.**

17       (a) DEFINITIONS.—In this section:

18           (1) ENERGY-WATER NEXUS.—The term “en-  
19 ergy-water nexus” means the links between—

20           (A) the water needed to produce fuels,  
21 electricity, and other forms of energy; and

22           (B) the energy needed to transport, re-  
23 claim, and treat water and wastewater.

24           (2) INTERAGENCY COORDINATION COM-  
25 MITTEE.—The term “Interagency Coordination

1 Committee” means the Committee on the Nexus of  
2 Energy and Water for Sustainability (or the  
3 “NEWS Committee”) established under subsection  
4 (b)(1).

5 (3) NEXUS OF ENERGY AND WATER SUSTAIN-  
6 ABILITY OFFICE; NEWS OFFICE.—The term “Nexus  
7 of Energy and Water Sustainability Office” or the  
8 “NEWS Office” means an office located at the De-  
9 partment and managed in cooperation with the De-  
10 partment of the Interior pursuant to an agreement  
11 between the 2 agencies to carry out leadership and  
12 administrative functions for the Interagency Coordi-  
13 nation Committee.

14 (4) RD&D ACTIVITIES.—The term “RD&D ac-  
15 tivities” means research, development, and dem-  
16 onstration activities.

17 (b) INTERAGENCY COORDINATION COMMITTEE.—

18 (1) ESTABLISHMENT.—Not later than 180 days  
19 after the date of enactment of this Act, the Sec-  
20 retary and the Secretary of the Interior shall estab-  
21 lish the joint NEWS Office and Interagency Coordi-  
22 nation Committee on the Nexus of Energy and  
23 Water for Sustainability (or the “NEWS Com-  
24 mittee”) to carry out the duties described in para-  
25 graph (3).

1 (2) ADMINISTRATION.—

2 (A) CHAIRS.—The Secretary and the Sec-  
3 retary of the Interior shall jointly manage the  
4 NEWS Office and serve as co-chairs of the  
5 Interagency Coordination Committee.

6 (B) MEMBERSHIP; STAFFING.—Member-  
7 ship and staffing shall be determined by the co-  
8 chairs.

9 (3) DUTIES.—The Interagency Coordination  
10 Committee shall—

11 (A) serve as a forum for developing com-  
12 mon Federal goals and plans on energy-water  
13 nexus RD&D activities in coordination with the  
14 National Science and Technology Council;

15 (B) not later than 1 year after the date of  
16 enactment of this Act, and biannually there-  
17 after, issue a strategic plan on energy-water  
18 nexus RD&D activities priorities and objectives;

19 (C) convene and promote coordination of  
20 the activities of Federal departments and agen-  
21 cies on energy-water nexus RD&D activities, in-  
22 cluding the activities of—

23 (i) the Department;

24 (ii) the Department of the Interior;

25 (iii) the Corps of Engineers;

- 1 (iv) the Department of Agriculture;
- 2 (v) the Department of Defense;
- 3 (vi) the Department of State;
- 4 (vii) the Environmental Protection
- 5 Agency;
- 6 (viii) the Council on Environmental
- 7 Quality;
- 8 (ix) the National Institute of Stand-
- 9 ards and Technology;
- 10 (x) the National Oceanic and Atmos-
- 11 pheric Administration;
- 12 (xi) the National Science Foundation;
- 13 (xii) the Office of Management and
- 14 Budget;
- 15 (xiii) the Office of Science and Tech-
- 16 nology Policy;
- 17 (xiv) the National Aeronautics and
- 18 Space Administration; and
- 19 (xv) such other Federal departments
- 20 and agencies as the Interagency Coordina-
- 21 tion Committee considers appropriate;
- 22 (D)(i) coordinate and develop capabilities
- 23 and methodologies for data collection, manage-
- 24 ment, and dissemination of information related
- 25 to energy-water nexus RD&D activities from

1 and to other Federal departments and agencies;  
2 and

3 (ii) promote information exchange between  
4 Federal departments and agencies—

5 (I) to identify and document Federal  
6 and non-Federal programs and funding op-  
7 portunities that support basic and applied  
8 research, development, and demonstration  
9 proposals to advance energy-water nexus  
10 related science and technologies;

11 (II) to leverage existing programs by  
12 encouraging joint solicitations, block  
13 grants, and matching programs with non-  
14 Federal entities; and

15 (III) to identify opportunities for do-  
16 mestic and international public-private  
17 partnerships, innovative financing mecha-  
18 nisms, information and data exchange;

19 (E) promote the integration of energy-  
20 water nexus considerations into existing Federal  
21 water, energy, and other natural resource, in-  
22 frastructure, and science programs at the na-  
23 tional and regional levels and with programs  
24 administered in partnership with non-Federal  
25 entities; and

1 (F) not later than 1 year after the date of  
2 enactment of this Act, issue a report on the po-  
3 tential benefits and feasibility of establishing an  
4 energy-water center of excellence within the Na-  
5 tional Laboratories (as that term is defined in  
6 section 2 of the Energy Policy Act of 2005 (42  
7 U.S.C. 15801)).

8 (4) NO REGULATION.—Nothing in this sub-  
9 section grants to the Interagency Coordination Com-  
10 mittee the authority to promulgate regulations or set  
11 standards.

12 (5) REVIEW; REPORT.—At the end of the 5-  
13 year period beginning on the date on which the  
14 Interagency Coordination Committee and NEWS Of-  
15 fice are established, the NEWS Office shall—

16 (A) review the activities, relevance, and ef-  
17 fectiveness of the Interagency Coordination  
18 Committee; and

19 (B) submit to the Committee on Energy  
20 and Natural Resources of the Senate and the  
21 Committees on Science, Space, and Technology,  
22 Energy and Commerce, and Natural Resources  
23 of the House of Representatives a report that—

24 (i) describes the results of the review  
25 conducted under subparagraph (A); and

1                   (ii) includes a recommendation on  
2                   whether the Interagency Coordination  
3                   Committee should continue.

4           (c) CROSSCUT BUDGET.—Not later than 30 days  
5 after the President submits the budget of the United  
6 States Government under section 1105 of title 31, United  
7 States Code, the co-chairs of the Interagency Coordination  
8 Committee (acting through the NEWS Office) shall sub-  
9 mit to the Committee on Energy and Natural Resources  
10 of the Senate and the Committees on Science, Space, and  
11 Technology, Energy and Commerce, and Natural Re-  
12 sources of the House of Representatives, an interagency  
13 budget crosscut report that displays at the program-,  
14 project-, and activity-level for each of the Federal agencies  
15 that carry out or support (including through grants, con-  
16 tracts, interagency and intraagency transfers, and  
17 multiyear and no-year funds) basic and applied RD&D ac-  
18 tivities to advance the energy-water nexus related science  
19 and technologies—

20           (1) the budget proposed in the budget request  
21           of the President for the upcoming fiscal year;

22           (2) expenditures and obligations for the prior  
23           fiscal year; and

24           (3) estimated expenditures and obligations for  
25           the current fiscal year.

1 **SEC. 4102. SMART ENERGY AND WATER EFFICIENCY PILOT**  
2 **PROGRAM.**

3 Subtitle A of title IX of the Energy Policy Act of  
4 2005 (42 U.S.C. 16191 et seq.) is amended by adding at  
5 the end the following:

6 **“SEC. 918. SMART ENERGY AND WATER EFFICIENCY PILOT**  
7 **PROGRAM.**

8 “(a) DEFINITIONS.—In this section:

9 “(1) ELIGIBLE ENTITY.—The term ‘eligible en-  
10 tity’ means—

11 “(A) a utility;

12 “(B) a municipality;

13 “(C) a water district;

14 “(D) an Indian tribe or Alaska Native vil-  
15 lage; and

16 “(E) any other authority that provides  
17 water, wastewater, or water reuse services.

18 “(2) SMART ENERGY AND WATER EFFICIENCY  
19 PILOT PROGRAM.—The term ‘smart energy and  
20 water efficiency pilot program’ or ‘pilot program’  
21 means the pilot program established under sub-  
22 section (b).

23 “(b) SMART ENERGY AND WATER EFFICIENCY  
24 PILOT PROGRAM.—

1           “(1) IN GENERAL.—The Secretary shall estab-  
2           lish and carry out a smart energy and water effi-  
3           ciency pilot program in accordance with this section.

4           “(2) PURPOSE.—The purpose of the smart en-  
5           ergy and water efficiency pilot program is to award  
6           grants to eligible entities to demonstrate unique, ad-  
7           vanced, or innovative technology-based solutions that  
8           will—

9                   “(A) increase the energy efficiency of  
10                  water, wastewater, and water reuse systems;

11                  “(B) improve energy efficiency of water,  
12                  wastewater, and water reuse systems to help  
13                  communities across the United States make  
14                  measurable progress in conserving water, saving  
15                  energy, and reducing costs;

16                  “(C) support the implementation of inno-  
17                  vative and unique processes and the installation  
18                  of established advanced automated systems that  
19                  provide real-time data on energy and water; and

20                  “(D) improve energy-water conservation  
21                  and quality and predictive maintenance through  
22                  technologies that utilize internet connected  
23                  technologies, including sensors, intelligent gate-  
24                  ways, and security embedded in hardware.

25           “(3) PROJECT SELECTION.—

1           “(A) IN GENERAL.—The Secretary shall  
2           make competitive, merit-reviewed grants under  
3           the pilot program to not less than 3, but not  
4           more than 5, eligible entities.

5           “(B) SELECTION CRITERIA.—In selecting  
6           an eligible entity to receive a grant under the  
7           pilot program, the Secretary shall consider—

8                   “(i) energy and cost savings;

9                   “(ii) the uniqueness, commercial via-  
10                  bility, and reliability of the technology to  
11                  be used;

12                  “(iii) the degree to which the project  
13                  integrates next-generation sensors soft-  
14                  ware, analytics, and management tools;

15                  “(iv) the anticipated cost-effectiveness  
16                  of the pilot project through measurable en-  
17                  ergy efficiency savings, water savings or  
18                  reuse, and infrastructure costs averted;

19                  “(v) whether the technology can be  
20                  deployed in a variety of geographic regions  
21                  and the degree to which the technology can  
22                  be implemented in a wide range of applica-  
23                  tions ranging in scale from small towns to  
24                  large cities, including tribal communities;

1           “(vi) whether the technology has been  
2 successfully deployed elsewhere;

3           “(vii) whether the technology was  
4 sourced from a manufacturer based in the  
5 United States; and

6           “(viii) whether the project will be  
7 completed in 5 years or less.

8           “(C) APPLICATIONS.—

9           “(i) IN GENERAL.—Subject to clause  
10 (ii), an eligible entity seeking a grant  
11 under the pilot program shall submit to  
12 the Secretary an application at such time,  
13 in such manner, and containing such infor-  
14 mation as the Secretary determines to be  
15 necessary.

16           “(ii) CONTENTS.—An application  
17 under clause (i) shall, at a minimum, in-  
18 clude—

19                   “(I) a description of the project;

20                   “(II) a description of the tech-  
21 nology to be used in the project;

22                   “(III) the anticipated results, in-  
23 cluding energy and water savings, of  
24 the project;

1           oped by the Secretary, consistent with the  
2           purposes of this section.

3           “(ii)     REQUIREMENTS.—Consistent  
4           with the performance measures and bench-  
5           marks developed under clause (i), in car-  
6           rying out an evaluation under that clause,  
7           the Secretary shall —

8                     “(I) evaluate the progress and  
9                     impact of the project; and

10                    “(II) assesses the degree to  
11                    which the project is meeting the goals  
12                    of the pilot program.

13           “(C)   TECHNICAL AND POLICY ASSIST-  
14           ANCE.—On the request of a grant recipient, the  
15           Secretary shall provide technical and policy as-  
16           sistance.

17           “(D)   BEST PRACTICES.—The Secretary  
18           shall make available to the public through the  
19           Internet and other means the Secretary con-  
20           siders to be appropriate—

21                    “(i) a copy of each evaluation carried  
22                    out under subparagraph (B); and

23                    “(ii) a description of any best prac-  
24                    tices identified by the Secretary as a result  
25                    of those evaluations.

1                   “(E) REPORT TO CONGRESS.—The Sec-  
2                   retary shall submit to Congress a report con-  
3                   taining the results of each evaluation carried  
4                   out under subparagraph (B).

5                   “(c) AUTHORIZATION OF APPROPRIATIONS.—There  
6                   is authorized to be appropriated to carry out this section  
7                   \$15,000,000, to remain available until expended.”.

## 8                   **Subtitle C—Innovation**

### 9                   **SEC. 4201. AMERICA COMPETES PROGRAMS.**

10                  (a) BASIC RESEARCH.—Section 971(b) of the Energy  
11                  Policy Act of 2005 (42 U.S.C. 16311(b)) is amended—

12                   (1) in paragraph (6), by striking “and” at the  
13                  end;

14                   (2) in paragraph (7), by striking the period at  
15                  the end and inserting a semicolon; and

16                   (3) by adding at the end the following:

17                   “(8) \$5,271,000,000 for fiscal year 2016;

18                   “(9) \$5,485,000,000 for fiscal year 2017;

19                   “(10) \$5,704,000,000 for fiscal year 2018;

20                   “(11) \$5,932,000,000 for fiscal year 2019; and

21                   “(12) \$6,178,000,000 for fiscal year 2020.”.

22                  (b) ADVANCED RESEARCH PROJECTS AGENCY-EN-  
23                  ERGY.—Section 5012 of the America COMPETES Act  
24                  (42 U.S.C. 16538) is amended—

1           (1) in subsection (a)(3), by striking “subsection  
2           (n)(1)” and inserting “subsection (o)(1)”;

3           (2) in subsection (i), by striking paragraph (1)  
4           and inserting the following:

5           “(1) IN GENERAL.—To the maximum extent  
6           practicable, the Director shall ensure that—

7                   “(A) the activities of ARPA–E are coordi-  
8                   nated with, and do not duplicate the efforts of,  
9                   programs and laboratories within the Depart-  
10                  ment and other relevant research agencies; and

11                   “(B) ARPA–E does not provide funding  
12                  for a project unless the prospective grantee  
13                  demonstrates sufficient attempts to secure pri-  
14                  vate financing or indicates that the project is  
15                  not independently commercially viable.”;

16           (3) by redesignating subsection (n) as sub-  
17           section (o);

18           (4) by inserting after subsection (m) the fol-  
19           lowing:

20           “(n) PROTECTION OF INFORMATION.—The following  
21           types of information collected by the ARPA–E from recipi-  
22           ents of financial assistance awards shall be considered  
23           commercial and financial information obtained from a per-  
24           son and privileged or confidential and not subject to dis-

1 closure under section 552(b)(4) of title 5, United States  
2 Code:

3 “(1) Plans for commercialization of technologies  
4 developed under the award, including business plans,  
5 technology-to-market plans, market studies, and cost  
6 and performance models.

7 “(2) Investments provided to an awardee from  
8 third parties (such as venture capital firms, hedge  
9 funds, and private equity firms), including amounts  
10 and the percentage of ownership of the awardee pro-  
11 vided in return for the investments.

12 “(3) Additional financial support that the  
13 awardee—

14 “(A) plans to or has invested into the tech-  
15 nology developed under the award; or

16 “(B) is seeking from third parties.

17 “(4) Revenue from the licensing or sale of new  
18 products or services resulting from research con-  
19 ducted under the award.”; and

20 (5) in subsection (o) (as redesignated by para-  
21 graph (3))—

22 (A) in paragraph (2)—

23 (i) in the matter preceding subpara-  
24 graph (A), by striking “paragraphs (4)  
25 and (5)” and inserting “paragraph (4)”;

1 (ii) in subparagraph (D), by striking  
2 “and” at the end;

3 (iii) in subparagraph (E), by striking  
4 the period at the end and inserting a semi-  
5 colon; and

6 (iv) by adding at the end the fol-  
7 lowing:

8 “(F) \$291,200,000 for fiscal year 2016;

9 “(G) \$303,600,000 for fiscal year 2017;

10 “(H) \$314,700,000 for fiscal year 2018;

11 “(I) \$327,300,000 for fiscal year 2019;

12 and

13 “(J) \$340,600,000 for fiscal year 2020 .”;

14 and

15 (B) in paragraph (4)(B), by striking

16 “(c)(2)(D)” and inserting “(c)(2)(C)”.

17 **SEC. 4202. INCLUSION OF EARLY STAGE TECHNOLOGY**

18 **DEMONSTRATION IN AUTHORIZED TECH-**

19 **NOLOGY TRANSFER ACTIVITIES.**

20 Section 1001 of the Energy Policy Act of 2005 (42  
21 U.S.C. 16391) is amended—

22 (1) by redesignating subsection (g) as sub-  
23 section (h); and

24 (2) by inserting after subsection (f) the fol-  
25 lowing:

1       “(g) EARLY STAGE TECHNOLOGY DEMONSTRA-  
2 TION.—The Secretary shall permit the directors of the Na-  
3 tional Laboratories to use funds authorized to support  
4 technology transfer within the Department to carry out  
5 early stage and precommercial technology demonstration  
6 activities to remove technology barriers that limit private  
7 sector interest and demonstrate potential commercial ap-  
8 plications of any research and technologies arising from  
9 National Laboratory activities.”.

10 **SEC. 4203. SUPPORTING ACCESS OF SMALL BUSINESS CON-**  
11 **CERNS TO NATIONAL LABORATORIES.**

12       (a) DEFINITIONS.—In this section:

13           (1) NATIONAL LABORATORY.—The term “Na-  
14 tional Laboratory” has the meaning given the term  
15 in section 2 of the Energy Policy Act of 2005 (42  
16 U.S.C. 15801).

17           (2) SMALL BUSINESS CONCERN.—The term  
18 “small business concern” has the same meaning as  
19 in section 3 of the Small Business Act (15 U.S.C.  
20 632).

21       (b) ACTIONS FOR INCREASED ACCESS AT NATIONAL  
22 LABORATORIES FOR SMALL BUSINESS CONCERNS.—To  
23 promote the technology transfer of innovative energy tech-  
24 nologies and enhance the competitiveness of the United  
25 States, the Secretary shall take such actions as are appro-

1 piate to facilitate access to the National Laboratories for  
2 small business concerns.

3 (c) INFORMATION ON THE DOE WEBSITE RELATING  
4 TO NATIONAL LABORATORY PROGRAMS AVAILABLE TO  
5 SMALL BUSINESS CONCERNS.—

6 (1) IN GENERAL.—Not later than 180 days  
7 after the date of enactment of this Act, the Sec-  
8 retary, in coordination with the Directors of the Na-  
9 tional Laboratories, shall—

10 (A) publish in a consolidated manner on  
11 the website of the Department information re-  
12 lating to National Laboratory programs that  
13 are available to small business concerns;

14 (B) provide for the information published  
15 under subparagraph (A) to be kept up-to-date;  
16 and

17 (C) include in the information published  
18 under subparagraph (A), information on each  
19 available program under which small business  
20 concerns are eligible to enter into agreements to  
21 work with the National Laboratories.

22 (2) COMPONENTS.—The information published  
23 on the Department website under paragraph (1)  
24 shall include—

1 (A) a brief description of each agreement  
2 available to small business concerns to work  
3 with National Laboratories;

4 (B) a step-by-step guide for completing  
5 agreements to work with National Laboratories;

6 (C) best practices for working with Na-  
7 tional Laboratories;

8 (D) individual National Laboratory  
9 websites that provide information specific to  
10 technology transfer and working with small  
11 business concerns;

12 (E) links to funding opportunity announce-  
13 ments, nonfinancial resources, and other pro-  
14 grams available to small business concerns; and

15 (F) any other information that the Sec-  
16 retary determines to be appropriate.

17 (3) ACCESSIBILITY.—The information published  
18 on the Department website under paragraph (1)  
19 shall be—

20 (A) readily accessible and easily found on  
21 the Internet by the public and members and  
22 committees of Congress; and

23 (B) presented in a searchable, machine-  
24 readable format.

1           (4) GUIDANCE.—The Secretary shall issue De-  
2           partmental guidance to ensure that the information  
3           published on the Department website under para-  
4           graph (1) is provided in a manner that presents a  
5           coherent picture of all National Laboratory pro-  
6           grams that are relevant to small business concerns.

7 **SEC. 4204. MICROLAB TECHNOLOGY COMMERCIALIZATION.**

8           (a) DEFINITIONS.—In this section:

9           (1) MICROLAB.—The term “microlab” means a  
10          small laboratory established by the Secretary under  
11          subsection (b).

12          (2) NATIONAL LABORATORY.—The term “na-  
13          tional laboratory” means—

14                (A) a National Laboratory, as defined in  
15                section 2 of the Energy Policy Act of 2005 (42  
16                U.S.C. 15801); and

17                (B) a national security laboratory, as de-  
18                fined in section 3281 of the National Nuclear  
19                Security Administration Act (50 U.S.C. 2471).

20          (b) ESTABLISHMENT OF MICROLAB PROGRAM.—

21                (1) IN GENERAL.—The Secretary, in collabora-  
22                tion with the directors of national laboratories, may  
23                establish a microlab program under which the Sec-  
24                retary establishes microlabs that are located in close

1 proximity to national laboratories and that are ac-  
2 cessible to the public for the purposes of—

3 (A) enhancing collaboration with regional  
4 research groups, such as institutions of higher  
5 education and industry groups;

6 (B) accelerating technology transfer from  
7 national laboratories to the marketplace; and

8 (C) promoting regional workforce develop-  
9 ment through science, technology, engineering,  
10 and mathematics (“STEM”) instruction and  
11 training.

12 (2) CRITERIA.—In determining the placement  
13 of microlabs under paragraph (1), the Secretary  
14 shall consider—

15 (A) the commitment of a national labora-  
16 tory to establishing a microlab;

17 (B) the existence of a joint research insti-  
18 tute or a new facility that—

19 (i) is not on the main site of a na-  
20 tional laboratory;

21 (ii) is in close proximity to a national  
22 laboratory; and

23 (iii) has the capability to house a  
24 microlab;

1           (C) whether employees of a national lab-  
2           oratory and persons from academia, industry,  
3           and government are available to be assigned to  
4           the microlab; and

5           (D) cost-sharing or in-kind contributions  
6           from State and local governments and private  
7           industry.

8           (3) TIMING.—If the Secretary, in collaboration  
9           with the directors of national laboratories, elects to  
10          establish a microlab program under this subsection,  
11          the Secretary, in collaboration with the directors of  
12          national laboratories, shall—

13           (A) not later than 60 days after the date  
14           of enactment of this Act, begin the process of  
15           determining the placement of microlabs under  
16           paragraph (1); and

17           (B) not later than 180 days after the date  
18           of enactment of this Act, implement the  
19           microlab program under this subsection.

20          (c) REPORTS.—

21           (1) INITIAL REPORT.—Not later than 60 days  
22           after the date of implementation of the microlab pro-  
23           gram under subsection (b), the Secretary shall sub-  
24           mit to the Committee on Armed Services of the Sen-  
25           ate, the Committee on Armed Services of the House

1 of Representatives, the Committee on Energy and  
2 Natural Resources of the Senate, and the Committee  
3 on Science, Space, and Technology of the House of  
4 Representatives a report that provides an update on  
5 the implementation of the microlab program under  
6 subsection (b).

7 (2) PROGRESS REPORT.—Not later than 1 year  
8 after the date of implementation of the microlab pro-  
9 gram under subsection (b), the Secretary shall sub-  
10 mit to the Committee on Armed Services of the Sen-  
11 ate, the Committee on Armed Services of the House  
12 of Representatives, the Committee on Energy and  
13 Natural Resources of the Senate, and the Committee  
14 on Science, Space, and Technology of the House of  
15 Representatives a report on the microlab program  
16 under subsection (b), including findings and rec-  
17 ommendations of the Secretary.

18 (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
19 authorized to be appropriated to carry out this Act  
20 \$50,000,000 for fiscal year 2016.

## 21 **Subtitle D—Grid Reliability**

### 22 **SEC. 4301. BULK-POWER SYSTEM RELIABILITY IMPACT** 23 **STATEMENT.**

24 (a) RELIABILITY REPORTS.—Section 215(g) of the  
25 Federal Power Act (16 U.S.C. 824o(g)) is amended—

1           (1) by striking “The ERO” and inserting the  
2 following:

3           “(1) IN GENERAL.—The ERO”; and

4           (2) by adding at the end the following:

5           “(2) REGIONAL ENTITIES.—Not later than 180  
6 days after the date of enactment of this paragraph  
7 and not less than every 3 years thereafter, each re-  
8 gional entity shall submit to the appropriate commit-  
9 tees of Congress and the Commission a report that  
10 describes, as of the date of the report—

11                   “(A) the state of and prospects for the re-  
12 liability of electricity within the geographic area  
13 covered by the regional entity; and

14                   “(B) the most significant risks to the reli-  
15 ability of the bulk-power system that might  
16 arise or need to be monitored within the geo-  
17 graphic area covered by the regional entity, in-  
18 cluding risks from proposed or final Federal  
19 regulations.”.

20           (b) RELIABILITY IMPACT STATEMENT.—Section 215  
21 of the Federal Power Act (16 U.S.C. 824o) is amended  
22 by adding at the end the following:

23           “(1) RELIABILITY IMPACT STATEMENT.—

24                   “(1) SOLICITATION BY COMMISSION.—Not later  
25 than 15 days after the date on which the head of a

1 Federal agency proposes a major rule (as defined in  
2 section 804 of title 5, United States Code) that may  
3 significantly affect the reliable operation of the bulk-  
4 power system, the Commission shall solicit from any  
5 applicable regional entity affected by the proposed  
6 rule a reliability impact statement with respect to  
7 the proposed rule.

8 “(2) VOLUNTARY SUBMISSION BY REGIONAL  
9 ENTITY.—A regional entity may prepare, on the ini-  
10 tiative of the regional entity, a reliability impact  
11 statement for any proposed major Federal rule that  
12 the regional entity determines would significantly af-  
13 fect the reliable operation of the bulk-power system  
14 within the area covered by the regional entity.

15 “(3) MULTIJURISDICTIONAL COORDINATION.—  
16 If a proposed rule subject to a reliability impact  
17 statement under paragraph (1) or (2) affects an  
18 area broader than the area covered by a single re-  
19 gional entity, the ERO shall convene a committee of  
20 the affected regional entities to produce a single reli-  
21 ability impact statement that demonstrates for each  
22 affected area the reliability impact of the proposed  
23 rule.

1           “(4) REQUIREMENTS.—A reliability impact  
2 statement under paragraph (1) or (2) shall include  
3 a detailed statement on—

4           “(A) the impact of the proposed rule on  
5 the reliable operation of the bulk-power system;

6           “(B) any adverse effects on the reliable op-  
7 eration of the bulk-power system if the pro-  
8 posed rule was implemented; and

9           “(C) alternatives to cure the identified ad-  
10 verse reliability impacts, including, at the dis-  
11 cretion of the regional entity, a no-action alter-  
12 native.

13           “(5) SUBMISSION TO COMMISSION.—On comple-  
14 tion of a reliability impact statement under para-  
15 graph (1) or (2), the regional entity or a committee  
16 of affected regional entities convened under para-  
17 graph (3) shall submit to the Commission the reli-  
18 ability impact statement.

19           “(6) TRANSMITTAL TO HEAD OF FEDERAL  
20 AGENCY.—On receipt of a reliability impact state-  
21 ment submitted to the Commission under paragraph  
22 (5), the Commission shall transmit to the head of  
23 the applicable Federal agency the reliability impact  
24 statement prepared under this subsection for inclu-  
25 sion in the public record.

1           “(7) INCLUSION OF DETAILED RESPONSE IN  
2 FINAL RULE.—With respect to a final major rule  
3 subject to a reliability impact statement prepared  
4 under paragraph (1) or (2), the head of the Federal  
5 agency shall—

6           “(A) consider the reliability impact state-  
7 ment;

8           “(B) give due weight to the technical ex-  
9 pertise of the regional entity with respect to  
10 matters that are the subject of the reliability  
11 impact statement; and

12           “(C) include in the final rule a detailed re-  
13 sponse to the reliability impact statement that  
14 reasonably addresses the detailed statements re-  
15 quired under paragraph (4).”.

16 **SEC. 4302. REPORT BY TRANSMISSION ORGANIZATIONS ON**  
17 **DIVERSITY OF SUPPLY.**

18 (a) DEFINITIONS.—In this section:

19 (1) ELECTRIC GENERATING CAPACITY RE-  
20 SOURCE.—

21 (A) IN GENERAL.—The term “electric gen-  
22 erating capacity resource” means an electric  
23 generating resource, as measured by the max-  
24 imum load-carrying ability of the resource, ex-  
25 clusive of station use and planned, unplanned,

1           or other outage or derating subject to dispatch  
2           by the transmission organization to meet the re-  
3           source adequacy needs of the systems operated  
4           by the transmission organization.

5           (B) EFFECT.—The term “electric gener-  
6           ating capacity resource” does not address non-  
7           electric generating resources that are qualified  
8           as capacity resources in the tariffs of various  
9           transmission organizations as of the date of en-  
10          actment of this Act.

11          (2) TRANSMISSION ORGANIZATION.—The term  
12          “transmission organization” has the meaning given  
13          the term in section 3 of the Federal Power Act (16  
14          U.S.C. 796).

15          (b) REPORT.—

16          (1) NOTICE.—Not later than 14 days after the  
17          date of enactment of this Act, the Commission (as  
18          the term is defined in section 3 of the Federal  
19          Power Act (16 U.S.C. 796)) shall submit to each  
20          transmission organization that has a tariff on file  
21          with the Commission that includes provisions ad-  
22          dressing the procurement of electric generating ca-  
23          pacity resources, a notice that the transmission or-  
24          ganization is required to file with the Commission a  
25          report in accordance with paragraph (2).

1           (2) REPORT.—Not later than 180 days after  
2 the date on which a transmission organization re-  
3 ceives a notice under paragraph (1), the trans-  
4 mission organization shall submit to the Commission  
5 a report that, to the maximum extent practicable—

6           (A)(i) identifies electric generating capac-  
7 ity resources that are available to the trans-  
8 mission organization as of the date of the re-  
9 port; and

10           (ii) describes the primary energy sources  
11 and operational characteristics of electric capac-  
12 ity resources available, in the aggregate, to the  
13 transmission organization;

14           (B) evaluates, using generally accepted  
15 metrics, the current operational performance, in  
16 the aggregate, of electric capacity resources;

17           (C) identifies, for the aggregate of electric  
18 generating capacity resources available to the  
19 transmission organization—

20           (i) over the short- and long-term peri-  
21 ods in the planning cycle of the trans-  
22 mission organization, reasonable projec-  
23 tions concerning the operational and eco-  
24 nomic risk profile of electric generating ca-  
25 pacity resources;

1 (ii) the projected future needs of the  
2 transmission organization for electric gen-  
3 erating capacity resources; and

4 (iii) the availability of transmission fa-  
5 cilities and transmission support services  
6 necessary to provide for the transmission  
7 organization reasonable assurances of es-  
8 sential reliability services, including ade-  
9 quate voltage support; and

10 (D) assesses whether and to what extent  
11 the market rules of the transmission organiza-  
12 tion—

13 (i) yield capacity auction clearing  
14 prices that promote necessary and prudent  
15 investment;

16 (ii) yield energy market clearing  
17 prices that reflect the marginal cost of  
18 supply, taking into account transmission  
19 constraints and other factors needed to en-  
20 sure reliable grid operation;

21 (iii) produce meaningful price signals  
22 that clearly indicate where new supply and  
23 investment are needed;

1                   (iv) reduce uncertainty or instability  
2                   resulting from changes to market rules,  
3                   processes, or protocols;

4                   (v) promote transparency and commu-  
5                   nication by the market operator to market  
6                   participants;

7                   (vi) support a diverse generation port-  
8                   folio and the availability of transmission  
9                   facilities and transmission support services  
10                  on a short- and long-term basis necessary  
11                  to provide reasonable assurances of a con-  
12                  tinuous supply of electricity for customers  
13                  of the transmission organization at the  
14                  proper voltage and frequency; and

15                  (vii) provide an enhanced opportunity  
16                  for self-supply of electric generating capac-  
17                  ity resources by electric cooperatives, Fed-  
18                  eral power marketing agencies, and State  
19                  utilities with a service obligation (as those  
20                  terms are defined in section 217(a)) of the  
21                  Federal Power Act (16 U.S.C. 824q(a))) in  
22                  a manner that is consistent with tradi-  
23                  tional utility business models and does not  
24                  unduly affect wholesale market prices.

## 1                   **Subtitle E—Management**

### 2   **SEC. 4401. FEDERAL LAND MANAGEMENT.**

3           (a) DEFINITIONS.—In this section:

4                   (1) CADASTRE.—The term “cadastre” means  
5           an inventory of buildings and other real property  
6           (including associated infrastructure such as roads  
7           and utility transmission lines and pipelines) located  
8           on land administered by the Secretary, which is de-  
9           veloped through collecting, storing, retrieving, or dis-  
10          seminating graphical or digital data and any infor-  
11          mation related to the data, including surveys, maps,  
12          charts, images, and services.

13                   (2) SECRETARY.—The term “Secretary” means  
14          the Secretary of the Interior.

15          (b) CADASTRE OF FEDERAL REAL PROPERTY.—

16                   (1) IN GENERAL.—The Secretary is author-  
17          ized—

18                           (A) to develop and maintain a current and  
19                           accurate multipurpose cadastre to support Fed-  
20                           eral land management activities for the Depart-  
21                           ment of the Interior;

22                           (B) to incorporate any related inventories  
23                           of Federal real property, including any inven-  
24                           tories prepared under applicable land or re-  
25                           source management plans; and

1 (C) to enter into discussions with other  
2 Federal agencies to make the cadastre available  
3 for use by the agency to support agency man-  
4 agement activities.

5 (2) COST-SHARING AGREEMENTS.—

6 (A) IN GENERAL.—The Secretary may  
7 enter into cost-sharing agreements with other  
8 Federal agencies, and with States, Indian  
9 tribes, and local governments, to include any  
10 non-Federal land in a State in the cadastre.

11 (B) COST SHARE.—The Federal share of  
12 any cost agreement described in subparagraph  
13 (A) shall not exceed 50 percent of the total cost  
14 to a State, Indian tribe, or local government for  
15 the development of the cadastre of non-Federal  
16 land.

17 (3) CONSOLIDATION AND REPORT.—Not later  
18 than 180 days after the date of enactment of this  
19 Act, the Secretary shall submit to the Committee on  
20 Energy and Natural Resources of the Senate and  
21 the Committee on Natural Resources of the House  
22 of Representatives a report on the real property in-  
23 ventories or any components of any cadastre or re-  
24 lated inventories that—

1 (A) exist as of the date of enactment of  
2 this Act;

3 (B) are authorized by law or conducted by  
4 the Secretary; and

5 (C) are of sufficient accuracy to be in-  
6 cluded in the cadastre authorized under para-  
7 graph (1).

8 (4) COORDINATION.—In carrying out this sub-  
9 section, the Secretary shall—

10 (A) participate (in accordance with section  
11 216 of the E–Government Act of 2002 (44  
12 U.S.C. 3501 note; Public Law 107–347)) in the  
13 establishment of such standards and common  
14 protocols as are necessary to ensure the inter-  
15 operability of geospatial information pertaining  
16 to the cadastre for all users of the information;

17 (B) coordinate with, seek assistance and  
18 cooperation of, and provide liaison to the Fed-  
19 eral Geographic Data Committee pursuant to  
20 Office of Management and Budget Circular A–  
21 16 and Executive Order 12906 (43 U.S.C.  
22 1457 note; relating to coordinating geographic  
23 data acquisition and access: the National Spa-  
24 tial Data Infrastructure) for the implementa-

1           tion of and compliance with such standards as  
2           may be applicable to the cadastre;

3           (C) make the cadastre interoperable with  
4           the Federal Real Property Profile established  
5           pursuant to Executive Order 13327 (40 U.S.C.  
6           121 note; relating to Federal real property  
7           asset management);

8           (D) integrate with and leverage, to the  
9           maximum extent practicable, cadastre activities  
10          of units of State and local government; and

11          (E) use contracts with the private sector,  
12          if practicable, to provide such products and  
13          services as are necessary to develop the cadas-  
14          tre.

15          (c) **TRANSPARENCY AND PUBLIC ACCESS.**—The Sec-  
16          retary shall—

17               (1) make the cadastre required under this sec-  
18               tion publically available on the Internet in a graphi-  
19               cally geoenabled and searchable format; and

20               (2) in consultation with the Secretary of De-  
21               fense and the Secretary of Homeland Security, pre-  
22               vent the disclosure of the identity of any buildings  
23               or facilities, or information related to the buildings  
24               or facilities, if the disclosure would impair or jeop-

1       ardize the national security or homeland defense of  
2       the United States.

3       (d) EFFECT.—Nothing in this section—

4           (1) creates any substantive or procedural right  
5       or benefit;

6           (2) authorizes any new surveying or mapping of  
7       Federal real property, except that a Federal agency  
8       may conduct a new survey to update the accuracy of  
9       the inventory data of the agency before storage on  
10      a cadaster; or

11          (3) authorizes—

12           (A) the evaluation of any real property  
13      owned by the United States for disposal; or

14           (B) new appraisals or assessments of the  
15      value of—

16           (i) real property; or

17           (ii) cultural or archaeological re-  
18      sources on any parcel of Federal land or  
19      other real property.

20   **SEC. 4402. QUADRENNIAL ENERGY REVIEW.**

21      (a) IN GENERAL.—Section 801 of the Department of  
22   Energy Organization Act (42 U.S.C. 7321) is amended  
23   to read as follows:

1 **“SEC. 801. QUADRENNIAL ENERGY REVIEW.**

2 “(a) QUADRENNIAL ENERGY REVIEW TASK  
3 FORCE.—

4 “(1) ESTABLISHMENT.—The President shall es-  
5 tablish a Quadrennial Energy Review Task Force  
6 (referred to in this section as the ‘Task Force’) to  
7 coordinate the Quadrennial Energy Review.

8 “(2) COCHAIRPERSONS.—The President shall  
9 designate appropriate senior Federal Government of-  
10 ficials to be cochairpersons of the Task Force.

11 “(3) MEMBERSHIP.—The Task Force may be  
12 comprised of representatives at level I or II of the  
13 Executive Schedule of—

14 “(A) the Department of Energy;

15 “(B) the Department of Commerce;

16 “(C) the Department of Defense;

17 “(D) the Department of State;

18 “(E) the Department of the Interior;

19 “(F) the Department of Agriculture;

20 “(G) the Department of the Treasury;

21 “(H) the Department of Transportation;

22 “(I) the Department of Homeland Secu-  
23 rity;

24 “(J) the Office of Management and Budg-  
25 et;

26 “(K) the National Science Foundation;

1           “(L) the Environmental Protection Agen-  
2           cy; and

3           “(M) such other Federal agencies, and en-  
4           tities within the Executive Office of the Presi-  
5           dent, as the President considers to be appro-  
6           priate.

7           “(b) CONDUCT OF REVIEW.—

8           “(1) IN GENERAL.—Each Quadrennial Energy  
9           Review shall be conducted to—

10           “(A) provide an integrated view of impor-  
11           tant national energy objectives and Federal en-  
12           ergy policy; and

13           “(B) identify the maximum practicable  
14           alignment of research programs, incentives, reg-  
15           ulations, and partnerships.

16           “(2) ELEMENTS.—A Quadrennial Energy Re-  
17           view shall—

18           “(A) establish integrated, governmentwide  
19           national energy objectives in the context of eco-  
20           nomic, environmental, and security priorities;

21           “(B) recommend coordinated actions  
22           across Federal agencies;

23           “(C) assess and recommend priorities for  
24           research, development, and demonstration;

1           “(D) provide a strong analytical base for  
2 Federal energy policy decisions;

3           “(E) consider reasonable estimates of fu-  
4 ture Federal budgetary resources when making  
5 recommendations; and

6           “(F) be conducted with substantial input  
7 from—

8           “(i) Congress;

9           “(ii) the energy industry;

10          “(iii) academia;

11          “(iv) State, local, and tribal govern-  
12 ments;

13          “(v) nongovernmental organizations;

14          and

15          “(vi) the public.

16          “(c) SUBMISSION OF QUADRENNIAL ENERGY RE-  
17 VIEW TO CONGRESS.—

18          “(1) IN GENERAL.—The President—

19           “(A) shall publish and submit to Congress  
20 a report on the Quadrennial Energy Review  
21 once every 4 years; and

22           “(B) more frequently than once every 4  
23 years, as the President determines to be appro-  
24 priate, may prepare and publish interim reports  
25 as part of the Quadrennial Energy Review.

1           “(2) INCLUSIONS.—The reports described in  
2 paragraph (1) shall address or consider, as appro-  
3 priate—

4           “(A) an integrated view of short-term, in-  
5 termediate-term, and long-term objectives for  
6 Federal energy policy in the context of eco-  
7 nomic, environmental, and security priorities;

8           “(B) potential executive actions (including  
9 programmatic, regulatory, and fiscal actions)  
10 and resource requirements—

11           “(i) to achieve the objectives described  
12 in subparagraph (A); and

13           “(ii) to be coordinated across multiple  
14 agencies;

15           “(C) analysis of the existing and prospec-  
16 tive roles of parties (including academia, indus-  
17 try, consumers, the public, and Federal agen-  
18 cies) in achieving the objectives described in  
19 subparagraph (A), including—

20           “(i) an analysis by energy use sector,  
21 including—

22           “(I) commercial and residential  
23 buildings;

24           “(II) the industrial sector;

25           “(III) transportation; and

1 “(IV) electric power;

2 “(ii) requirements for invention, adop-  
3 tion, development, and diffusion of energy  
4 technologies as they relate to each of the  
5 energy use sectors; and

6 “(iii) other research that informs  
7 strategies to incentivize desired actions;

8 “(D) assessment of policy options to in-  
9 crease domestic energy supplies and energy effi-  
10 ciency;

11 “(E) evaluation of national and regional  
12 energy storage, transmission, and distribution  
13 requirements, including requirements for renew-  
14 able energy;

15 “(F) portfolio assessments that describe  
16 the optimal deployment of resources, including  
17 prioritizing financial resources for energy-rel-  
18 evant programs;

19 “(G) mapping of the linkages among basic  
20 research and applied programs, demonstration  
21 programs, and other innovation mechanisms  
22 across the Federal agencies;

23 “(H) identification of demonstration  
24 projects;

1           “(I) identification of public and private  
2 funding needs for various energy technologies,  
3 systems, and infrastructure, including consider-  
4 ation of public-private partnerships, loans, and  
5 loan guarantees;

6           “(J) assessment of global competitors and  
7 an identification of programs that can be en-  
8 hanced with international cooperation;

9           “(K) identification of policy gaps that need  
10 to be filled to accelerate the adoption and diffu-  
11 sion of energy technologies, including consider-  
12 ation of—

13                   “(i) Federal tax policies; and

14                   “(ii) the role of Federal agencies as  
15 early adopters and purchasers of new en-  
16 ergy technologies;

17           “(L) priority listing for implementation of  
18 objectives and actions taking into account esti-  
19 mated Federal budgetary resources;

20           “(M) analysis of—

21                   “(i) points of maximum leverage for  
22 policy intervention to achieve outcomes;  
23 and

1                   “(ii) areas of energy policy that can  
2                   be most effective in meeting national goals  
3                   for the energy sector; and

4                   “(N) recommendations for executive  
5                   branch organization changes to facilitate the  
6                   development and implementation of Federal en-  
7                   ergy policies.

8           “(d) REPORT DEVELOPMENT.—The Secretary of En-  
9           ergy shall provide such support for the Quadrennial En-  
10          ergy Review with the necessary analytical, financial, and  
11          administrative support for the conduct of each Quadren-  
12          nial Energy Review required under this section as may  
13          be requested by the cochairpersons designated under sub-  
14          section (a)(2).

15          “(e) COOPERATION.—The heads of applicable Fed-  
16          eral agencies shall cooperate with the Secretary and pro-  
17          vide such assistance, information, and resources as the  
18          Secretary may require to assist in carrying out this sec-  
19          tion.”.

20          (b) TABLE OF CONTENTS AMENDMENT.—The item  
21          relating to section 801 in the table of contents of such  
22          Act is amended to read as follows:

          “Sec. 801. Quadrennial Energy Review.”.

23          (c) ADMINISTRATION.—Nothing in this section or an  
24          amendment made by this section supersedes, modifies,  
25          amends, or repeals any provision of Federal law not ex-

1 pressly superseded, modified, amended, or repealed by this  
2 section.

3 **SEC. 4403. STATE OVERSIGHT OF OIL AND GAS PROGRAMS.**

4 On request of the Governor of a State, the Secretary  
5 of the Interior shall establish a program under which the  
6 Director of the Bureau of Land Management shall enter  
7 into a memorandum of understanding with the State to  
8 consider the costs and benefits of consistent rules and  
9 processes for the measurement of oil and gas production  
10 activities, inspection of meters or other measurement  
11 methodologies, and other operational activities, as deter-  
12 mined by the Secretary of the Interior.

13 **SEC. 4404. UNDER SECRETARY FOR SCIENCE AND ENERGY.**

14 (a) IN GENERAL.—Section 202(b) of the Department  
15 of Energy Organization Act (42 U.S.C. 7132(b)) is  
16 amended—

17 (1) in paragraph (1), by striking “for Science”  
18 and inserting “for Science and Energy (referred to  
19 in this subsection as the ‘Under Secretary’)”;

20 (2) in paragraph (3), in the matter preceding  
21 subparagraph (A), by striking “for Science”; and

22 (3) in paragraph (4)—

23 (A) in the matter preceding subparagraph

24 (A), by striking “for Science”;

1 (B) in subparagraph (F), by striking  
2 “and” at the end;

3 (C) in subparagraph (G), by striking the  
4 period at the end and inserting a semicolon;  
5 and

6 (D) by inserting after subparagraph (G)  
7 the following:

8 “(H) establish appropriate linkages be-  
9 tween offices under the jurisdiction of the  
10 Under Secretary; and

11 “(I) perform such functions and duties as  
12 the Secretary shall prescribe, consistent with  
13 this section.”.

14 (b) CONFORMING AMENDMENT.—Section 641(h)(2)  
15 of the United States Energy Storage Competitiveness Act  
16 of 2007 (42 U.S.C. 17231(h)(2)) is amended by striking  
17 “Under Secretary for Science” and inserting “Under Sec-  
18 retary for Science and Energy”.

## 19 **Subtitle F—Markets**

### 20 **SEC. 4501. ENHANCED INFORMATION ON CRITICAL ENERGY** 21 **SUPPLIES.**

22 (a) IN GENERAL.—Section 205 of the Department of  
23 Energy Organization Act (42 U.S.C. 7135) is amended  
24 by adding at the end the following:

1       “(n) COLLECTION OF INFORMATION ON CRITICAL  
2 ENERGY SUPPLIES.—

3           “(1) IN GENERAL.—To ensure transparency of  
4 information relating to energy infrastructure and  
5 product ownership in the United States and improve  
6 the ability to evaluate the energy security of the  
7 United States, the Administrator, in consultation  
8 with other Federal agencies (as necessary), shall—

9           “(A) not later than 120 days after the date  
10 of enactment of this subsection, develop and  
11 provide notice of a plan to collect, in coopera-  
12 tion with the Commodity Futures Trade Com-  
13 mission, information identifying all oil inven-  
14 tories, and other physical oil assets (including  
15 all petroleum-based products and the storage of  
16 such products in off-shore tankers), that are  
17 owned by the 50 largest traders of oil contracts  
18 (including derivative contracts), as determined  
19 by the Commodity Futures Trade Commission;  
20 and

21           “(B) not later than 90 days after the date  
22 on which notice is provided under subparagraph  
23 (A), implement the plan described in that sub-  
24 paragraph.

1           “(2) INFORMATION.—The plan required under  
2 paragraph (1) shall include a description of the plan  
3 of the Administrator for collecting company-specific  
4 data, including—

5                   “(A) volumes of product under ownership;  
6           and

7                   “(B) storage and transportation capacity  
8           (including owned and leased capacity).

9           “(3) PROTECTION OF PROPRIETARY INFORMA-  
10          TION.—Section 12(f) of the Federal Energy Admin-  
11          istration Act of 1974 (15 U.S.C. 771(f)) shall apply  
12          to information collected under this subsection.

13          “(o) COLLECTION OF INFORMATION ON STORAGE  
14          CAPACITY FOR OIL AND NATURAL GAS.—

15               “(1) IN GENERAL.—Not later than 90 days  
16          after the date of enactment of this subsection, the  
17          Administrator of the Energy Information Adminis-  
18          tration shall collect information quantifying the com-  
19          mercial storage capacity for oil and natural gas in  
20          the United States.

21               “(2) UPDATES.—The Administrator shall up-  
22          date annually the information required under para-  
23          graph (1).

24               “(3) PROTECTION OF PROPRIETARY INFORMA-  
25          TION.—Section 12(f) of the Federal Energy Admin-

1       istration Act of 1974 (15 U.S.C. 771(f)) shall apply  
2       to information collected under this subsection.

3       “(p) FINANCIAL MARKET ANALYSIS OFFICE.—

4               “(1) ESTABLISHMENT.—There shall be within  
5       the Energy Information Administration a Financial  
6       Market Analysis Office.

7               “(2) DUTIES.—The Office shall—

8                       “(A) be responsible for analysis of the fi-  
9       nancial aspects of energy markets;

10                      “(B) review the reports required by section  
11       4503(c) of the Energy Policy Modernization Act  
12       of 2015 in advance of the submission of the re-  
13       ports to Congress; and

14                      “(C) not later than 1 year after the date  
15       of enactment of this subsection—

16                               “(i) make recommendations to the  
17       Administrator of the Energy Information  
18       Administration that identify and quantify  
19       any additional resources that are required  
20       to improve the ability of the Energy Infor-  
21       mation Administration to more fully inte-  
22       grate financial market information into the  
23       analyses and forecasts of the Energy Infor-  
24       mation Administration, including the role  
25       of energy futures contracts, energy com-

1           modity swaps, and derivatives in price for-  
2           mation for oil;

3                   “(ii) conduct a review of implications  
4           of policy changes (including changes in ex-  
5           port or import policies) and changes in  
6           how crude oil and refined petroleum prod-  
7           ucts are transported with respect to price  
8           formation of crude oil and refined petro-  
9           leum products; and

10                   “(iii) notify the Committee on Energy  
11           and Natural Resources, and the Committee  
12           on Appropriations, of the Senate and the  
13           Committee on Energy and Commerce, and  
14           the Committee on Appropriations, of the  
15           House of Representatives of the rec-  
16           ommendations described in clause (i).

17                   “(3) ANALYSES.—The Administrator of the En-  
18           ergy Information Administration shall take analyses  
19           by the Office into account in conducting analyses  
20           and forecasting of energy prices.”.

21           (b) CONFORMING AMENDMENT.—Section 645 of the  
22           Department of Energy Organization Act (42 U.S.C. 7255)  
23           is amended by inserting “(15 U.S.C. 3301 et seq.) and  
24           the Natural Gas Act (15 U.S.C. 717 et seq.)” after “Nat-  
25           ural Gas Policy Act of 1978”.

1 **SEC. 4502. WORKING GROUP ON ENERGY MARKETS.**

2 (a) ESTABLISHMENT.—There is established a Work-  
3 ing Group on Energy Markets (referred to in this section  
4 as the “Working Group”).

5 (b) COMPOSITION.—The Working Group shall be  
6 composed of—

7 (1) the Secretary;

8 (2) the Secretary of the Treasury;

9 (3) the Chairman of the Federal Energy Regu-  
10 latory Commission;

11 (4) the Chairman of Federal Trade Commis-  
12 sion;

13 (5) the Chairman of the Securities and Ex-  
14 change Commission;

15 (6) the Chairman of the Commodity Futures  
16 Trading Commission; and

17 (7) the Administrator of the Energy Informa-  
18 tion Administration.

19 (c) CHAIRPERSON.—The Secretary shall serve as the  
20 Chairperson of the Working Group.

21 (d) COMPENSATION.—A member of the Working  
22 Group shall serve without additional compensation for the  
23 work of the member of the Working Group.

24 (e) PURPOSE AND FUNCTION.—The Working Group  
25 shall—

1           (1) investigate the effect of increased financial  
2 investment in energy commodities on energy prices  
3 and the energy security of the United States;

4           (2) recommend to the President and Congress  
5 laws (including regulations) that may be needed to  
6 prevent excessive speculation in energy commodity  
7 markets in order to prevent or minimize the adverse  
8 impact of excessive speculation on energy prices on  
9 consumers and the economy of the United States;  
10 and

11           (3) review energy security implications of devel-  
12 opments in international energy markets.

13       (f) ADMINISTRATION.—The Secretary shall provide  
14 the Working Group with such administrative and support  
15 services as may be necessary for the performance of the  
16 functions of the Working Group.

17       (g) COOPERATION OF OTHER AGENCIES.—The heads  
18 of Executive departments, agencies, and independent in-  
19 strumentalities shall, to the extent permitted by law, pro-  
20 vide the Working Group with such information as the  
21 Working Group requires to carry out this section.

22       (h) CONSULTATION.—The Working Group shall con-  
23 sult, as appropriate, with representatives of the various  
24 exchanges, clearinghouses, self-regulatory bodies, other

1 major market participants, consumers, and the general  
2 public.

3 **SEC. 4503. STUDY OF REGULATORY FRAMEWORK FOR EN-**  
4 **ERGY MARKETS.**

5 (a) STUDY.—The Working Group shall conduct a  
6 study—

7 (1) to identify the factors that affect the pricing  
8 of crude oil and refined petroleum products, includ-  
9 ing an examination of the effects of market specula-  
10 tion on prices; and

11 (2) to review and assess—

12 (A) existing statutory authorities relating  
13 to the oversight and regulation of markets crit-  
14 ical to the energy security of the United States;  
15 and

16 (B) the need for additional statutory au-  
17 thority for the Federal Government to effec-  
18 tively oversee and regulate markets critical to  
19 the energy security of the United States.

20 (b) ELEMENTS OF STUDY.—The study shall in-  
21 clude—

22 (1) an examination of price formation of crude  
23 oil and refined petroleum products;

24 (2) an examination of relevant international  
25 regulatory regimes; and

1           (3) an examination of the degree to which  
2 changes in energy market transparency, liquidity,  
3 and structure have influenced or driven abuse, ma-  
4 nipulation, excessive speculation, or inefficient price  
5 formation.

6           (c) REPORT AND RECOMMENDATIONS.—The Sec-  
7 retary shall submit to the Committee on Energy and Nat-  
8 ural Resources of the Senate and the Committee on En-  
9 ergy and Commerce of the House of Representatives quar-  
10 terly progress reports during the conduct of the study  
11 under this section, and a final report not later than 1 year  
12 after the date of enactment of this Act, that—

13           (1) describes the results of the study; and

14           (2) provides options and the recommendations  
15 of the Working Group for appropriate Federal co-  
16 ordination of oversight and regulatory actions to en-  
17 sure transparency of crude oil and refined petroleum  
18 product pricing and the elimination of excessive  
19 speculation, including recommendations on data col-  
20 lection and analysis to be carried out by the Finan-  
21 cial Market Analysis Office established by section  
22 205(p) of the Department of Energy Organization  
23 Act (42 U.S.C. 7135(p)).

1                   **Subtitle G—Affordability**

2   **SEC. 4601. E-PRIZE COMPETITION PILOT PROGRAM.**

3           Section 1008 of the Energy Policy Act of 2005 (42  
4 U.S.C. 16396) is amended by adding at the end the fol-  
5 lowing:

6           “(g) E-PRIZE COMPETITION PILOT PROGRAM.—

7                   “(1) DEFINITIONS.—In this section:

8                           “(A) ELIGIBLE ENTITY.—The term ‘eligi-  
9 ble entity’ means—

10                                   “(i) a private sector for-profit or non-  
11 profit entity;

12                                   “(ii) a public-private partnership; or

13                                   “(iii) a local, municipal, or tribal gov-  
14 ernmental entity.

15                           “(B) HIGH-COST REGION.—The term  
16 ‘high-cost region’ means a region in which the  
17 average annual unsubsidized costs of electrical  
18 power retail rates or household space heating  
19 costs per square foot exceed 150 percent of the  
20 national average, as determined by the Sec-  
21 retary.

22           “(2) E-PRIZE COMPETITION PILOT PROGRAM.—

23                   “(A) IN GENERAL.—The Secretary shall  
24 establish an e-prize competition or challenge  
25 pilot program to broadly implement sustainable

1 community and regional energy solutions that  
2 seek to reduce energy costs through increased  
3 efficiency, conservation, and technology innova-  
4 tion in high-cost regions.

5 “(B) SELECTION.—In carrying out the  
6 pilot program under subparagraph (A), the Sec-  
7 retary shall award a prize purse, in amounts to  
8 be determined by the Secretary, to each eligible  
9 entity selected through 1 or more of the fol-  
10 lowing competitions or challenges:

11 “(i) A point solution competition that  
12 rewards and spurs the development of solu-  
13 tions for a particular, well-defined problem.

14 “(ii) An exposition competition that  
15 helps identify and promote a broad range  
16 of ideas and practices that may not other-  
17 wise attract attention, facilitating further  
18 development of the idea or practice by  
19 third parties.

20 “(iii) A participation competition that  
21 creates value during and after the competi-  
22 tion by encouraging contestants to change  
23 their behavior or develop new skills that  
24 may have beneficial effects during and  
25 after the competition.

1                   “(iv) Such other types of prizes or  
2 challenges as the Secretary, in consultation  
3 with relevant heads of Federal agencies,  
4 considers appropriate to stimulate innova-  
5 tion that has the potential to advance the  
6 mission of the applicable Federal agency.

7                   “(3) AUTHORIZATION OF APPROPRIATIONS.—  
8 There is authorized to be appropriated to carry out  
9 this subsection \$10,000,000, to remain available  
10 until expended.”.

## 11                   **Subtitle H—Code Maintenance**

### 12                   **SEC. 4701. REPEAL OF OFF-HIGHWAY MOTOR VEHICLES** 13                   **STUDY.**

14                   (a) REPEAL.—Part I of title III of the Energy Policy  
15 and Conservation Act (42 U.S.C. 6373) is repealed.

16                   (b) CONFORMING AMENDMENT.—The table of con-  
17 tents for the Energy Policy and Conservation Act (Public  
18 Law 94–163; 89 Stat. 871) is amended—

19                   (1) by striking the item relating to part I of  
20 title III; and

21                   (2) by striking the item relating to section 385.

### 22                   **SEC. 4702. REPEAL OF METHANOL STUDY.**

23                   Section 400EE of the Energy Policy and Conserva-  
24 tion Act (42 U.S.C. 6374d) is amended—

25                   (1) by striking subsection (a); and

1           (2) by redesignating subsections (b) and (c) as  
2           subsections (a) and (b), respectively.

3 **SEC. 4703. REPEAL OF AUTHORIZATION OF APPROPRIA-**  
4 **TIONS PROVISION.**

5           (a) REPEAL.—Section 208 of the Energy Conserva-  
6 tion and Production Act (42 U.S.C. 6808) is repealed.

7           (b) CONFORMING AMENDMENT.—The table of con-  
8 tents for the Energy Conservation and Production Act  
9 (Public Law 94–385; 90 Stat. 1126) is amended by strik-  
10 ing the item relating to section 208.

11 **SEC. 4704. REPEAL OF RESIDENTIAL ENERGY EFFICIENCY**  
12 **STANDARDS STUDY.**

13           (a) REPEAL.—Section 253 of the National Energy  
14 Conservation Policy Act (42 U.S.C. 8232) is repealed.

15           (b) CONFORMING AMENDMENT.—The table of con-  
16 tents for the National Energy Conservation Policy Act  
17 (Public Law 95–619; 92 Stat. 3206) is amended by strik-  
18 ing the item relating to section 253.

19 **SEC. 4705. REPEAL OF WEATHERIZATION STUDY.**

20           (a) REPEAL.—Section 254 of the National Energy  
21 Conservation Policy Act (42 U.S.C. 8233) is repealed.

22           (b) CONFORMING AMENDMENT.—The table of con-  
23 tents for the National Energy Conservation Policy Act  
24 (Public Law 95–619; 92 Stat. 3206) is amended by strik-  
25 ing the item relating to section 254.

1 **SEC. 4706. REPEAL OF REPORT TO CONGRESS.**

2 (a) REPEAL.—Section 273 of the National Energy  
3 Conservation Policy Act (42 U.S.C. 8236b) is repealed.

4 (b) CONFORMING AMENDMENT.—The table of con-  
5 tents for the National Energy Conservation Policy Act  
6 (Public Law 95–619; 92 Stat. 3206) is amended by strik-  
7 ing the item relating to section 273.

8 **SEC. 4707. REPEAL OF REPORT BY GENERAL SERVICES AD-  
9 MINISTRATION.**

10 (a) REPEAL.—Section 154 of the Energy Policy Act  
11 of 1992 (42 U.S.C. 8262a) is repealed.

12 (b) CONFORMING AMENDMENTS.—

13 (1) The table of contents for the Energy Policy  
14 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
15 is amended by striking the item relating to section  
16 154.

17 (2) Section 159 of the Energy Policy Act of  
18 1992 (42 U.S.C. 8262e) is amended by striking sub-  
19 section (c).

20 **SEC. 4708. REPEAL OF INTERGOVERNMENTAL ENERGY  
21 MANAGEMENT PLANNING AND COORDINA-  
22 TION WORKSHOPS.**

23 (a) REPEAL.—Section 156 of the Energy Policy Act  
24 of 1992 (42 U.S.C. 8262b) is repealed.

25 (b) CONFORMING AMENDMENT.—The table of con-  
26 tents for the Energy Policy Act of 1992 (Public Law 102–

1 486; 106 Stat. 2776) is amended by striking the item re-  
 2 lating to section 156.

3 **SEC. 4709. REPEAL OF INSPECTOR GENERAL AUDIT SUR-**  
 4 **VEY AND PRESIDENT'S COUNCIL ON INTEG-**  
 5 **RITY AND EFFICIENCY REPORT TO CON-**  
 6 **GRESS.**

7 (a) REPEAL.—Section 160 of the Energy Policy Act  
 8 of 1992 (42 U.S.C. 8262f) is amended by striking the sec-  
 9 tion designation and heading and all that follows through  
 10 “(c) INSPECTOR GENERAL REVIEW.—Each Inspector  
 11 General” and inserting the following:

12 **“SEC. 160. INSPECTOR GENERAL REVIEW.**

13 “Each Inspector General”.

14 (b) CONFORMING AMENDMENT.—The table of con-  
 15 tents for the Energy Policy Act of 1992 (Public Law 102–  
 16 486; 106 Stat. 2776) is amended by striking the item re-  
 17 lating to section 160 and inserting the following:

“Sec. 160. Inspector General review. ....”.

18 **SEC. 4710. REPEAL OF PROCUREMENT AND IDENTIFICA-**  
 19 **TION OF ENERGY EFFICIENT PRODUCTS PRO-**  
 20 **GRAM.**

21 (a) REPEAL.—Section 161 of the Energy Policy Act  
 22 of 1992 (42 U.S.C. 8262g) is repealed.

23 (b) CONFORMING AMENDMENT.—The table of con-  
 24 tents for the Energy Policy Act of 1992 (Public Law 102–

1 486; 106 Stat. 2776) is amended by striking the item re-  
2 lating to section 161.

3 **SEC. 4711. REPEAL OF NATIONAL ACTION PLAN FOR DE-**  
4 **MAND RESPONSE.**

5 (a) REPEAL.—Part 5 of title V of the National En-  
6 ergy Conservation Policy Act (42 U.S.C. 8279 et seq.) is  
7 repealed.

8 (b) CONFORMING AMENDMENT.—The table of con-  
9 tents for the National Energy Conservation Policy Act  
10 (Public Law 95–619; 92 Stat. 3206; 121 Stat. 1665) is  
11 amended—

12 (1) by striking the item relating to part 5 of  
13 title V; and

14 (2) by striking the item relating to section 571.

15 **SEC. 4712. REPEAL OF NATIONAL COAL POLICY STUDY.**

16 (a) REPEAL.—Section 741 of the Powerplant and In-  
17 dustrial Fuel Use Act of 1978 (42 U.S.C. 8451) is re-  
18 pealed.

19 (b) CONFORMING AMENDMENT.—The table of con-  
20 tents for the Powerplant and Industrial Fuel Use Act of  
21 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
22 striking the item relating to section 741.

1 **SEC. 4713. REPEAL OF STUDY ON COMPLIANCE PROBLEM**  
2 **OF SMALL ELECTRIC UTILITY SYSTEMS.**

3 (a) REPEAL.—Section 744 of the Powerplant and In-  
4 dustrial Fuel Use Act of 1978 (42 U.S.C. 8454) is re-  
5 pealed.

6 (b) CONFORMING AMENDMENT.—The table of con-  
7 tents for the Powerplant and Industrial Fuel Use Act of  
8 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
9 striking the item relating to section 744.

10 **SEC. 4714. REPEAL OF STUDY OF SOCIOECONOMIC IM-**  
11 **PACTS OF INCREASED COAL PRODUCTION**  
12 **AND OTHER ENERGY DEVELOPMENT.**

13 (a) REPEAL.—Section 746 of the Powerplant and In-  
14 dustrial Fuel Use Act of 1978 (42 U.S.C. 8456) is re-  
15 pealed.

16 (b) CONFORMING AMENDMENT.—The table of con-  
17 tents for the Powerplant and Industrial Fuel Use Act of  
18 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
19 striking the item relating to section 746.

20 **SEC. 4715. REPEAL OF STUDY OF THE USE OF PETROLEUM**  
21 **AND NATURAL GAS IN COMBUSTORS.**

22 (a) REPEAL.—Section 747 of the Powerplant and In-  
23 dustrial Fuel Use Act of 1978 (42 U.S.C. 8457) is re-  
24 pealed.

25 (b) CONFORMING AMENDMENT.—The table of con-  
26 tents for the Powerplant and Industrial Fuel Use Act of

1 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
2 striking the item relating to section 747.

3 **SEC. 4716. REPEAL OF SUBMISSION OF REPORTS.**

4 (a) REPEAL.—Section 807 of the Powerplant and In-  
5 dustrial Fuel Use Act of 1978 (42 U.S.C. 8483) is re-  
6 pealed.

7 (b) CONFORMING AMENDMENT.—The table of con-  
8 tents for the Powerplant and Industrial Fuel Use Act of  
9 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
10 striking the item relating to section 807.

11 **SEC. 4717. REPEAL OF ELECTRIC UTILITY CONSERVATION**

12 **PLAN.**

13 (a) REPEAL.—Section 808 of the Powerplant and In-  
14 dustrial Fuel Use Act of 1978 (42 U.S.C. 8484) is re-  
15 pealed.

16 (b) CONFORMING AMENDMENTS.—

17 (1) TABLE OF CONTENTS.—The table of con-  
18 tents for the Powerplant and Industrial Fuel Use  
19 Act of 1978 (Public Law 95–620; 92 Stat. 3289) is  
20 amended by striking the item relating to section  
21 808.

22 (2) REPORT ON IMPLEMENTATION.—Section  
23 712 of the Powerplant and Industrial Fuel Use Act  
24 of 1978 (42 U.S.C. 8422) is amended—

25 (A) by striking “(a) GENERALLY.—”; and

1 (B) by striking subsection (b).

2 **SEC. 4718. EMERGENCY ENERGY CONSERVATION REPEALS.**

3 (a) REPEALS.—

4 (1) Section 201 of the Emergency Energy Con-  
5 servation Act of 1979 (42 U.S.C. 8501) is amend-  
6 ed—

7 (A) in the section heading, by striking  
8 “**FINDINGS AND**”; and

9 (B) by striking subsection (a).

10 (2) Section 221 of the Emergency Energy Con-  
11 servation Act of 1979 (42 U.S.C. 8521) is repealed.

12 (3) Section 222 of the Emergency Energy Con-  
13 servation Act of 1979 (42 U.S.C. 8522) is repealed.

14 (4) 241 of the Emergency Energy Conservation  
15 Act of 1979 (42 U.S.C. 8531) is repealed.

16 (b) CONFORMING AMENDMENT.—The table of con-  
17 tents for the Emergency Energy Conservation Act of 1979  
18 (Public Law 96–102; 93 Stat. 749) is amended—

19 (1) by striking the item relating to section 201  
20 and inserting the following:

“Sec. 201. Purposes.”; and

21 (2) by striking the items relating to sections  
22 221, 222, and 241.

1 **SEC. 4719. ENERGY SECURITY ACT REPEALS.**

2 (a) BIOMASS ENERGY DEVELOPMENT PLANS.—Sub-  
3 title A of title II of the Energy Security Act (42 U.S.C.  
4 8811 et seq.) is repealed.

5 (b) MUNICIPAL WASTE BIOMASS ENERGY.—Subtitle  
6 B of title II of the Energy Security Act (42 U.S.C. 8831  
7 et seq.) is repealed.

8 (c) USE OF GASOHOL IN FEDERAL MOTOR VEHI-  
9 CLES.—Section 271 of the Energy Security Act (42  
10 U.S.C. 8871) is repealed.

11 (d) CONFORMING AMENDMENTS.—

12 (1) The table of contents for the Energy Secu-  
13 rity Act (Public Law 96–294; 94 Stat. 611) is  
14 amended—

15 (A) by striking the items relating to sub-  
16 title A and B of title II;

17 (B) by striking the item relating to section  
18 204 and inserting the following:

“Sec. 204. Funding. .... ”; and

19 (C) by striking the item relating to section  
20 271.

21 (2) Section 203 of the Biomass Energy and Al-  
22 cohol Fuels Act of 1980 (42 U.S.C. 8802) is amend-  
23 ed—

24 (A) by striking paragraph (16); and

1 (B) by redesignating paragraphs (17)  
2 through (19) as paragraphs (16) through (18),  
3 respectively.

4 (3) Section 204 of the Energy Security Act (42  
5 U.S.C. 8803) is amended—

6 (A) in the section heading, by striking  
7 “FOR SUBTITLES A AND B”; and

8 (B) in subsection (a)—

9 (i) in paragraph (1), by adding “and”  
10 after the semicolon at the end;

11 (ii) in paragraph (2), by striking “;  
12 and” at the end and inserting a period;  
13 and

14 (iii) by striking paragraph (3).

15 **SEC. 4720. NUCLEAR SAFETY RESEARCH, DEVELOPMENT,**  
16 **AND DEMONSTRATION ACT OF 1980 REPEALS.**

17 Sections 5 and 6 of the Nuclear Safety Research, De-  
18 velopment, and Demonstration Act of 1980 (42 U.S.C.  
19 9704, 9705) are repealed.

20 **SEC. 4721. ELIMINATION AND CONSOLIDATION OF CERTAIN**  
21 **AMERICA COMPETES PROGRAMS.**

22 (a) **ELIMINATION OF PROGRAM AUTHORITIES.—**

23 (1) **NUCLEAR SCIENCE TALENT EXPANSION**  
24 **PROGRAM FOR INSTITUTIONS OF HIGHER EDU-**

1           CATION.—Section 5004 of the America COMPETES  
2           Act (42 U.S.C. 16532) is repealed.

3           (2) HYDROCARBON SYSTEMS SCIENCE TALENT  
4           EXPANSION PROGRAM FOR INSTITUTIONS OF HIGH-  
5           ER EDUCATION.—

6           (A) IN GENERAL.—Section 5005(e) of the  
7           America COMPETES Act (42 U.S.C.  
8           16533(e)) is repealed.

9           (B) CONFORMING AMENDMENTS.—Section  
10           5005(f) of the America COMPETES Act (42  
11           U.S.C. 16533(f)) is amended—

12                   (i) by striking paragraph (2);

13                   (ii) by striking the subsection designa-  
14                   tion and heading and all that follows  
15                   through “There are” in paragraph (1) and  
16                   inserting the following:

17           “(e) AUTHORIZATION OF APPROPRIATIONS.—There  
18           are”; and

19                   (iii) by redesignating subparagraphs  
20                   (A) through (F) as paragraphs (1) through  
21                   (6), respectively, and indenting appro-  
22                   priately.

23           (3) DISCOVERY SCIENCE AND ENGINEERING IN-  
24           NOVATION INSTITUTES.—Section 5008 of the Amer-  
25           ica COMPETES Act (42 U.S.C. 16535) is repealed.

1           (4) ELIMINATION OF DUPLICATIVE AUTHORITY  
2           FOR EDUCATION PROGRAMS.—Sections 3181 and  
3           3185 of the Department of Energy Science Edu-  
4           cation Enhancement Act (42 U.S.C. 7381*l*, 42  
5           U.S.C. 7381*n*) are repealed.

6           (5) MENTORING PROGRAM.—Section 3195 of  
7           the Department of Energy Science Education En-  
8           hancement Act (42 U.S.C. 7381*r*) is repealed.

9           (b) REPEAL OF AUTHORIZATIONS.—

10           (1) DEPARTMENT OF ENERGY EARLY CAREER  
11           AWARDS FOR SCIENCE, ENGINEERING, AND MATHE-  
12           MATICS RESEARCHERS.—Section 5006 of the Amer-  
13           ica COMPETES Act (42 U.S.C. 16534) is amended  
14           by striking subsection (h).

15           (2) DISTINGUISHED SCIENTIST PROGRAM.—  
16           Section 5011 of the America COMPETES Act (42  
17           U.S.C. 16537) is amended by striking subsection (j).

18           (3) PROTECTING AMERICA'S COMPETITIVE  
19           EDGE (PACE) GRADUATE FELLOWSHIP PROGRAM.—  
20           Section 5009 of the America COMPETES Act (42  
21           U.S.C. 16536) is amended by striking subsection (f).

22           (c) CONSOLIDATION OF DUPLICATIVE PROGRAM AU-  
23           THORITIES.—

1           (2) CONSOLIDATION OF DEPARTMENT OF EN-  
2           ERGY EARLY CAREER AWARDS FOR SCIENCE, ENGI-  
3           NEERING, AND MATHEMATICS RESEARCHERS PRO-  
4           GRAM AND DISTINGUISHED SCIENTIST PROGRAM.—

5           (A) FUNDING.—Section 971(c) of the En-  
6           ergy Policy Act of 2005 (42 U.S.C. 16311(c))  
7           is amended by adding at the end the following:

8           “(8) For the Department of Energy early ca-  
9           reer awards for science, engineering, and mathe-  
10          matics researchers program under section 5006 of  
11          the America COMPETES Act (42 U.S.C. 16534)  
12          and the distinguished scientist program under sec-  
13          tion 5011 of that Act (42 U.S.C. 16537),  
14          \$150,000,000 for each of fiscal years 2016 through  
15          2020, of which not more than 65 percent of the  
16          amount made available for a fiscal year under this  
17          paragraph may be used to carry out section 5006 or  
18          5011 of that Act.”.

19          (B) DEPARTMENT OF ENERGY EARLY CA-  
20          REER AWARDS FOR SCIENCE, ENGINEERING,  
21          AND MATHEMATICS RESEARCHERS.—Section  
22          5006 of the America COMPETES Act (42  
23          U.S.C. 16534) is amended—

24                 (i) in subsection (b)(1)—

1 (I) in the matter preceding sub-  
2 paragraph (A)—

3 (aa) by inserting “average”  
4 before “amount”; and

5 (bb) by inserting “for each  
6 year” before “shall”;

7 (II) in subparagraph (A), by  
8 striking “\$80,000” and inserting  
9 “\$190,000”; and

10 (III) in subparagraph (B), by  
11 striking “\$125,000” and inserting  
12 “\$490,000”;

13 (ii) in subsection (c)(1)(C)—

14 (I) in clause (i)—

15 (aa) by striking “assistant  
16 professor or equivalent title” and  
17 inserting “untenured assistant or  
18 associate professor”; and

19 (bb) by inserting “or” after  
20 the semicolon at the end;

21 (II) by striking clause (ii); and

22 (III) by redesignating clause (iii)  
23 as clause (ii);

24 (iii) in subsection (d), by striking “on  
25 a competitive, merit-reviewed basis” and

1 inserting “through a competitive process  
2 using merit-based peer review.”;

3 (iv) in subsection (e)—

4 (I) by striking “(e)” and all that  
5 follows through “To be eligible” and  
6 inserting the following:

7 “(e) SELECTION PROCESS AND CRITERIA.—To be eli-  
8 gible”; and

9 (II) by striking paragraph (2);

10 and

11 (v) in subsection (f)(1), by striking  
12 “nonprofit, nondegree-granting research  
13 organizations” and inserting “National  
14 Laboratories”.

15 (3) SCIENCE EDUCATION PROGRAMS.—Section  
16 3164 of the Department of Energy Science Edu-  
17 cation Enhancement Act (42 U.S.C. 7381a) is  
18 amended—

19 (A) in subsection (b)—

20 (i) by striking paragraphs (1) and (2)

21 and inserting the following:

22 “(1) IN GENERAL.—The Director of the Office  
23 of Science (referred to in this subsection as the ‘Di-  
24 rector’) shall provide for appropriate coordination of  
25 science, technology, engineering, and mathematics

1 education programs across all functions of the De-  
2 partment.

3 “(2) ADMINISTRATION.—In carrying out para-  
4 graph (1), the Director shall—

5 “(A) consult with—

6 “(i) the Assistant Secretary of Energy  
7 with responsibility for energy efficiency  
8 and renewable energy programs; and

9 “(ii) the Deputy Administrator for  
10 Defense Programs of the National Nuclear  
11 Security Administration; and

12 “(B) seek to increase the participation and  
13 advancement of women and underrepresented  
14 minorities at every level of science, technology,  
15 engineering, and mathematics education.”; and

16 (ii) in paragraph (3)—

17 (I) in subparagraph (D), by  
18 striking “and” at the end;

19 (II) by redesignating subpara-  
20 graph (E) as subparagraph (F); and

21 (III) by inserting after subpara-  
22 graph (D) the following:

23 “(E) represent the Department as the  
24 principal interagency liaison for all coordination  
25 activities under the President for science, tech-

1 nology, engineering, and mathematics education  
2 programs; and”;

3 (B) in subsection (d)—

4 (i) by striking “The Secretary” and  
5 inserting the following:

6 “(1) IN GENERAL.—The Secretary”; and

7 (ii) by adding at the end the fol-  
8 lowing:

9 “(2) REPORT.—Not later than 180 days after  
10 the date of enactment of this subparagraph, the Di-  
11 rector shall submit a report describing the impact of  
12 the activities assisted with the Fund established  
13 under paragraph (1) to—

14 “(A) the Committee on Science, Space,  
15 and Technology of the House of Representa-  
16 tives; and

17 “(B) the Committee on Energy and Nat-  
18 ural Resources of the Senate.”.

19 (4) PROTECTING AMERICA’S COMPETITIVE  
20 EDGE (PACE) GRADUATE FELLOWSHIP PROGRAM.—  
21 Section 5009 of the America COMPETES Act (42  
22 U.S.C. 16536) is amended—

23 (A) in subsection (c)—

1 (i) in paragraph (1) by striking “, in-  
2 volving” and all that follows through “Sec-  
3 retary”; and

4 (ii) in paragraph (2), by striking sub-  
5 paragraph (B) and inserting the following:

6 “(B) to demonstrate excellent academic  
7 performance and understanding of scientific or  
8 technical subjects; and”;

9 (B) in subsection (d)(1)(B)(i), by inserting  
10 “full or partial” before “graduate tuition”; and

11 (C) in subsection (e), in the matter pre-  
12 ceding paragraph (1), by striking “Director of  
13 Science, Engineering, and Mathematics Edu-  
14 cation” and inserting “Director of the Office of  
15 Science.”.

16 (d) CONFORMING AMENDMENTS.—The table of con-  
17 tents for the America COMPETES ACT (Public Law  
18 110–69; 121 Stat. 573) is amended by striking the items  
19 relating to sections 5004 and 5008.

20 **SEC. 4722. REPEAL OF STATE UTILITY REGULATORY AS-**  
21 **SISTANCE.**

22 (a) REPEAL.—Section 207 of the Energy Conserva-  
23 tion and Production Act (42 U.S.C. 6807) is repealed.

24 (b) CONFORMING AMENDMENT.—The table of con-  
25 tents for the Energy Conservation and Production Act

1 (Public Law 94–385; 90 Stat. 1126) is amended by strik-  
2 ing the item relating to section 207.

3 **SEC. 4723. REPEAL OF SURVEY OF ENERGY SAVING POTEN-**  
4 **TIAL.**

5 (a) REPEAL.—Section 550 of the National Energy  
6 Conservation Policy Act (42 U.S.C. 8258b) is repealed.

7 (b) CONFORMING AMENDMENTS.—

8 (1) The table of contents for the National En-  
9 ergy Conservation Policy Act (Public Law 95–619;  
10 92 Stat. 3206; 106 Stat. 2851) is amended by strik-  
11 ing the item relating to section 550.

12 (2) Section 543(d)(2) of the National Energy  
13 Conservation Policy Act (42 U.S.C. 8253(d)(2)) is  
14 amended by striking “, incorporating any relevant  
15 information obtained from the survey conducted pur-  
16 suant to section 550”.

17 **SEC. 4724. REPEAL OF PHOTOVOLTAIC ENERGY PROGRAM.**

18 (a) REPEAL.—Part 4 of title V of the National En-  
19 ergy Conservation Policy Act (42 U.S.C. 8271 et seq.) is  
20 repealed.

21 (b) CONFORMING AMENDMENT.—The table of con-  
22 tents for the National Energy Conservation Policy Act  
23 (Public Law 95–619; 92 Stat. 3206) is amended—

24 (1) by striking the item relating to part 4 of  
25 title V; and

1           (2) by striking the items relating to sections  
2           561 through 569.

3 **SEC. 4725. REPEAL OF ENERGY AUDITOR TRAINING AND**  
4 **CERTIFICATION.**

5           (a) REPEAL.—Subtitle F of title V of the Energy Se-  
6           curity Act (42 U.S.C. 8285 et seq.) is repealed.

7           (b) CONFORMING AMENDMENT.—The table of con-  
8           tents for the Energy Security Act (Public Law 96–294;  
9           94 Stat. 611) is amended by striking the items relating  
10          to subtitle F of title V.

11 **SEC. 4726. REPEAL OF AUTHORIZATION OF APPROPRIA-**  
12 **TIONS.**

13          (a) REPEAL.—Subtitle F of title VII of the Power-  
14          plant and Industrial Fuel Use Act of 1978 (42 U.S.C.  
15          8461) is repealed.

16          (b) CONFORMING AMENDMENT.—The table of con-  
17          tents for the Powerplant and Industrial Fuel Use Act of  
18          1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
19          striking the item relating to subtitle F of title VII.

20 **SEC. 4727. REPEAL OF RENEWABLE ENERGY AND ENERGY**  
21 **EFFICIENCY TECHNOLOGY COMPETITIVE-**  
22 **NESS ACT OF 1989.**

23          (a) REPEAL.—The Renewable Energy and Energy  
24          Efficiency Technology Competitiveness Act of 1989 (42  
25          U.S.C. 12001 et seq.) is repealed.

1 (b) CONFORMING AMENDMENTS.—

2 (1) Section 6(b)(3) of the Federal Nonnuclear  
3 Energy Research and Development Act of 1974 (42  
4 U.S.C. 5905(b)(3)) is amended—

5 (A) in subparagraph (Q), by adding “and”  
6 after the semicolon;

7 (B) by striking subparagraph (R); and

8 (C) by redesignating subparagraph (S) as  
9 subparagraph (R).

10 (2) Section 1204 of the Energy Policy Act of  
11 1992 (42 U.S.C. 13313) is amended—

12 (A) in subsection (b), in the matter pre-  
13 ceding paragraph (1), in the first sentence, by  
14 striking “, in consultation with” and all that  
15 follows through “under section 6 of the Renew-  
16 able Energy and Energy Efficiency Technology  
17 Competitiveness Act of 1989,”; and

18 (B) in subsection (c), by striking “, in con-  
19 sultation with the Advisory Committee,”.

20 **SEC. 4728. REPEAL OF HYDROGEN RESEARCH, DEVELOP-**  
21 **MENT, AND DEMONSTRATION PROGRAM.**

22 The Spark M. Matsunaga Hydrogen Research, Devel-  
23 opment, and Demonstration Act of 1990 (42 U.S.C.  
24 12401 et seq.) is repealed.

1 **SEC. 4729. REPEAL OF STUDY ON ALTERNATIVE FUEL USE**  
2 **IN NONROAD VEHICLES AND ENGINES.**

3 (a) IN GENERAL.—Section 412 of the Energy Policy  
4 Act of 1992 (42 U.S.C. 13238) is repealed.

5 (b) CONFORMING AMENDMENT.—The table of con-  
6 tents for the Energy Policy Act of 1992 (Public Law 102–  
7 486; 106 Stat. 2776) is amended by striking the item re-  
8 lating to section 412.

9 **SEC. 4730. REPEAL OF LOW INTEREST LOAN PROGRAM FOR**  
10 **SMALL BUSINESS FLEET PURCHASES.**

11 (a) IN GENERAL.—Section 414 of the Energy Policy  
12 Act of 1992 (42 U.S.C. 13239) is repealed.

13 (b) CONFORMING AMENDMENT.—The table of con-  
14 tents for the Energy Policy Act of 1992 (Public Law 102–  
15 486; 106 Stat. 2776) is amended by striking the item re-  
16 lating to section 414.

17 **SEC. 4731. REPEAL OF TECHNICAL AND POLICY ANALYSIS**  
18 **FOR REPLACEMENT FUEL DEMAND AND SUP-**  
19 **PLY INFORMATION.**

20 (a) IN GENERAL.—Section 506 of the Energy Policy  
21 Act of 1992 (42 U.S.C. 13256) is repealed.

22 (b) CONFORMING AMENDMENTS.—

23 (1) The table of contents for the Energy Policy  
24 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
25 is amended by striking the item relating to section  
26 506.

1           (2) Section 507(m) of the Energy Policy Act of  
2           1992 (42 U.S.C. 13257(m)) is amended by striking  
3           “and section 506”.

4 **SEC. 4732. REPEAL OF 1992 REPORT ON CLIMATE CHANGE.**

5           (a) IN GENERAL.—Section 1601 of the Energy Policy  
6 Act of 1992 (42 U.S.C. 13381) is repealed.

7           (b) CONFORMING AMENDMENTS.—

8           (1) The table of contents for the Energy Policy  
9 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
10 is amended by striking the item relating to section  
11 1601.

12           (2) Section 1602(a) of the Energy Policy Act of  
13 1992 (42 U.S.C. 13382(a)) is amended, in the mat-  
14 ter preceding paragraph (1), in the third sentence,  
15 by striking “the report required under section 1601  
16 and”.

17 **SEC. 4733. REPEAL OF DIRECTOR OF CLIMATE PROTECTOR**  
18 **ESTABLISHMENT.**

19           (a) IN GENERAL.—Section 1603 of the Energy Policy  
20 Act of 1992 (42 U.S.C. 13383) is repealed.

21           (b) CONFORMING AMENDMENT.—The table of con-  
22 tents for the Energy Policy Act of 1992 (Public Law 102–  
23 486; 106 Stat. 2776) is amended by striking the item re-  
24 lating to section 1603.

1 **SEC. 4734. REPEAL OF 1994 REPORT ON GLOBAL CLIMATE**  
2 **CHANGE EMISSIONS.**

3 (a) IN GENERAL.—Section 1604 of the Energy Policy  
4 Act of 1992 (42 U.S.C. 13384) is repealed.

5 (b) CONFORMING AMENDMENT.—The table of con-  
6 tents for the Energy Policy Act of 1992 (Public Law 102–  
7 486; 106 Stat. 2776) is amended by striking the item re-  
8 lating to section 1604.

9 **SEC. 4735. REPEAL OF TELECOMMUTING STUDY.**

10 (a) IN GENERAL.—Section 2028 of the Energy Policy  
11 Act of 1992 (42 U.S.C. 13438) is repealed.

12 (b) CONFORMING AMENDMENT.—The table of con-  
13 tents for the Energy Policy Act of 1992 (Public Law 102–  
14 486; 106 Stat. 2776) is amended by striking the item re-  
15 lating to section 2028.

16 **SEC. 4736. REPEAL OF ADVANCED BUILDINGS FOR 2005**  
17 **PROGRAM.**

18 (a) IN GENERAL.—Section 2104 of the Energy Policy  
19 Act of 1992 (42 U.S.C. 13454) is repealed.

20 (b) CONFORMING AMENDMENTS.—

21 (1) The table of contents for the Energy Policy  
22 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
23 is amended by striking the item relating to section  
24 2104.

25 (2) Section 2101(a) of the Energy Policy Act of  
26 1992 (42 U.S.C. 13451(a)) (as amended by section

1       1201(d)(3)) is amended, in the third sentence, by  
2       striking “2104,”.

3       **SEC. 4737. REPEAL OF ENERGY RESEARCH, DEVELOPMENT,**  
4                               **DEMONSTRATION, AND COMMERCIAL APPLI-**  
5                               **CATION ADVISORY BOARD.**

6       (a) IN GENERAL.—Section 2302 of the Energy Policy  
7       Act of 1992 (42 U.S.C. 13522) is repealed.

8       (b) CONFORMING AMENDMENTS.—

9               (1) The table of contents for the Energy Policy  
10       Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
11       is amended by striking the item relating to section  
12       2302.

13              (2) Section 6 of the Federal Nonnuclear Energy  
14       Research and Development Act of 1974 (42 U.S.C.  
15       5905) is amended—

16                      (A) in subsection (a), in the matter pre-  
17                      ceding paragraph (1), in the first sentence, by  
18                      striking “, in consultation with the Advisory  
19                      Board established under section 2302 of the  
20                      Energy Policy Act of 1992,”;

21                      (B) in subsection (b)—

22                              (i) in paragraph (1), in the first sen-  
23                              tence, by striking “, in consultation with  
24                              the Advisory Board established under sec-

1                   tion 2302 of the Energy Policy Act of  
2                   1992,”; and

3                   (ii) in paragraph (2), in the second  
4                   sentence, by striking “, in consultation  
5                   with the Advisory Board established under  
6                   section 2302 of the Energy Policy Act of  
7                   1992,”; and

8                   (C) in subsection (c), in the first sentence,  
9                   by striking “, in consultation with the Advisory  
10                  Board established under section 2302 of the  
11                  Energy Policy Act of 1992,”.

12                  (3) Section 2011(c) of the Energy Policy Act of  
13                  1992 (42 U.S.C. 13411(c)) is amended, in the sec-  
14                  ond sentence, by striking “, and with the Advisory  
15                  Board established under section 2302”.

16                  (4) Section 2304 of the Energy Policy Act of  
17                  1992 (42 U.S.C. 13523), is amended—

18                  (A) in subsection (a), by striking “, in con-  
19                  sultation with the Advisory Board established  
20                  under section 2302,”; and

21                  (B) in subsection (c), in the matter pre-  
22                  ceding paragraph (1), in the first sentence, by  
23                  striking “, with the advice of the Advisory  
24                  Board established under section 2302 of this  
25                  Act,”.

1 **SEC. 4738. REPEAL OF STUDY ON USE OF ENERGY FUTURES**  
2 **FOR FUEL PURCHASE.**

3 (a) IN GENERAL.—Section 3014 of the Energy Policy  
4 Act of 1992 (42 U.S.C. 13552) is repealed.

5 (b) CONFORMING AMENDMENT.—The table of con-  
6 tents for the Energy Policy Act of 1992 (Public Law 102–  
7 486; 106 Stat. 2776) is amended by striking the item re-  
8 lating to section 3014.

9 **SEC. 4739. REPEAL OF ENERGY SUBSIDY STUDY.**

10 (a) IN GENERAL.—Section 3015 of the Energy Policy  
11 Act of 1992 (42 U.S.C. 13553) is repealed.

12 (b) CONFORMING AMENDMENT.—The table of con-  
13 tents for the Energy Policy Act of 1992 (Public Law 102–  
14 486; 106 Stat. 2776) is amended by striking the item re-  
15 lating to section 3015.

16 **TITLE V—CONSERVATION**  
17 **REAUTHORIZATION**

18 **SEC. 5001. NATIONAL PARK SERVICE MAINTENANCE AND**  
19 **REVITALIZATION CONSERVATION FUND.**

20 (a) IN GENERAL.—Chapter 1049 of title 54, United  
21 States Code, is amended by adding at the end the fol-  
22 lowing:

23 **“§ 104908. National Park Service Maintenance and**  
24 **Revitalization Conservation Fund**

25 “(a) IN GENERAL.—There is established in the  
26 Treasury a fund, to be known as the ‘National Park Serv-

1 ice Critical Maintenance and Revitalization Conservation  
2 Fund’ (referred to in this section as the ‘Fund’).

3 “(b) DEPOSITS TO FUND.—Notwithstanding any  
4 provision of law providing that the proceeds shall be cred-  
5 ited to miscellaneous receipts of the Treasury, for each  
6 fiscal year, there shall be deposited in the Fund, from rev-  
7 enues due and payable to the United States under section  
8 9 of the Outer Continental Shelf Lands Act (43 U.S.C.  
9 1338) \$150,000,000.

10 “(c) USE AND AVAILABILITY.—

11 “(1) IN GENERAL.—Amounts deposited in the  
12 Fund shall—

13 “(A) be used only for the purposes de-  
14 scribed in subsection (d); and

15 “(B) be available for expenditure only after  
16 the amounts are appropriated for those pur-  
17 poses.

18 “(2) AVAILABILITY.—Any amounts in the Fund  
19 not appropriated shall remain available in the Fund  
20 until appropriated.

21 “(3) NO LIMITATION.—Appropriations from the  
22 Fund pursuant to this section may be made without  
23 fiscal year limitation.

24 “(d) NATIONAL PARK SYSTEM CRITICAL DEFERRED  
25 MAINTENANCE.—The Secretary shall use amounts appro-

1 priated from the Fund for high-priority deferred mainte-  
2 nance needs of the Service that support critical infrastruc-  
3 ture and visitor services.

4 “(e) LAND ACQUISITION PROHIBITION.—Amounts in  
5 the Fund shall not be used for land acquisition.”.

6 (b) CLERICAL AMENDMENT.—The table of sections  
7 for chapter 1049 of title 54, United States Code, is  
8 amended by inserting after the item relating to section  
9 104907 the following:

“§104908. National Park Service Maintenance and Revitalization Conservation  
Fund.”.

10 **SEC. 5002. LAND AND WATER CONSERVATION FUND.**

11 (a) REAUTHORIZATION.—Section 200302 of title 54,  
12 United States Code, is amended—

13 (1) in subsection (b), in the matter preceding  
14 paragraph (1), by striking “During the period end-  
15 ing September 30, 2018, there” and inserting  
16 “There”; and

17 (2) in subsection (c)(1), by striking “through  
18 September 30, 2018”.

19 (b) ALLOCATION OF FUNDS.—Section 200304 of title  
20 54, United States Code, is amended—

21 (1) by striking “There” and inserting “(a) In  
22 General.—There”; and

23 (2) by striking the second sentence and insert-  
24 ing the following:

1           “(b) ALLOCATION.—Of the appropriations from the  
2 Fund—

3           “(1) not less than 40 percent shall be used col-  
4 lectively for Federal purposes under section 200306;

5           “(2) not less than 40 percent shall be used col-  
6 lectively—

7           “(A) to provide financial assistance to  
8 States under section 200305;

9           “(B) for the Forest Legacy Program es-  
10 tablished under section 7 of the Cooperative  
11 Forestry Assistance Act of 1978 (16 U.S.C.  
12 2103c);

13           “(C) for cooperative endangered species  
14 grants authorized under section 6 of the En-  
15 dangered Species Act of 1973 (16 U.S.C.  
16 1535); and

17           “(D) for the American Battlefield Protec-  
18 tion Program established under chapter 3081;  
19 and

20           “(3) not less than 1.5 percent or \$10,000,000,  
21 whichever is greater, shall be used for projects that  
22 secure recreational public access to Federal public  
23 land for hunting, fishing, or other recreational pur-  
24 poses.”.

1           (c) CONSERVATION EASEMENTS.—Section 200306 of  
2 title 54, United States Code, is amended by adding at the  
3 end the following:

4           “(c) CONSERVATION EASEMENTS.—The Secretary  
5 and the Secretary of Agriculture shall consider the acqui-  
6 sition of conservation easements and other similar inter-  
7 ests in land where appropriate and feasible.”.

8           (d) ACQUISITION CONSIDERATIONS.—Section  
9 200306 of title 54, United States Code (as amended by  
10 subsection (c)), is amended by adding at the end the fol-  
11 lowing:

12           “(d) ACQUISITION CONSIDERATIONS.—The Secretary  
13 and the Secretary of Agriculture shall take into account  
14 the following in determining the land or interests in land  
15 to acquire:

16                   “(1) Management efficiencies.

17                   “(2) Management cost savings.

18                   “(3) Geographic distribution.

19                   “(4) Significance of the acquisition.

20                   “(5) Urgency of the acquisition.

21                   “(6) Threats to the integrity of the land to be  
22 acquired.

23                   “(7) The recreational value of the land.”.

1 **SEC. 5003. HISTORIC PRESERVATION FUND.**

2 Section 303102 of title 54, United States Code, is  
3 amended by striking “of fiscal years 2012 to 2015” and  
4 inserting “fiscal year”.

---

I believe this is it.

In addition, I've heard rumors of these voice votes:

- Vitter 3266 GAO study
- Scott amdt to Booker 3060 (Booker & Scott are supposedly working this out): Seismic on Atlantic Coast
- Flake 3055 Wapa Database
- Flake 3050 DOE paperwork
- Hatch 3237 Internet Study
- Murkowski 2960 Denali
- Heller 3286 PLREA
- Vitter/Kaine 3263 Workforce (originally Kaine-Vitter, but narrower and refiled)
- 3239 Thune High Energy Physics Research Cmte
- 3290 Alexander-Merkeley (was Merkeley-Alexander) Battery Research
- 3257 Cantwell Graham Mission Innovation
- 3214 Cantwell DOE emergency response
- 3154 Heinrich LDRD
- 3004 Gillibrand FEMA and Efficiency
- 3012 Udall Clean Energy Victory Bonds (w minor modification)
- 3288 Merkley Klamath
- 3211 Udall Watersense
- 3189 Klobuchar

And possibly having to take Cassidy revenue sharing (3129), Tillis/Burr Horses (3175), 3210 LWCF, or some Vitter amdt on extending the state boundaries in the gulf to 9 miles. All in exchange for a Flint vote.

Jasmine Hunt

**Subject:** Amdt 2953?

Just circling back to review some stuff on the energy bill and I don't seem to have the actual substitute amendment. Could you forward it my way? thanks, Sarah

AMENDMENT NO.

Calendar No.

Purpose: In the nature of a substitute.

**IN THE SENATE OF THE UNITED STATES—114th Cong., 2d Sess.****S. 2012**

To provide for the modernization of the energy policy of  
the United States, and for other purposes.

Referred to the Committee on \_\_\_\_\_ and  
ordered to be printed

Ordered to lie on the table and to be printed

AMENDMENT IN THE NATURE OF A SUBSTITUTE intended  
to be proposed by

Viz:

1 Strike all after the enacting clause and insert the fol-

2 lowing:

3 **SECTION 1. SHORT TITLE; TABLE OF CONTENTS.**

4 (a) SHORT TITLE.—This Act may be cited as the

5 “Energy Policy Modernization Act of 2015”.

6 (b) TABLE OF CONTENTS.—The table of contents for

7 this Act is as follows:

Sec. 1. Short title; table of contents.

Sec. 2. Definitions.

## TITLE I—EFFICIENCY

## Subtitle A—Buildings

Sec. 1001. Greater energy efficiency in building codes.

Sec. 1002. Budget-neutral demonstration program for energy and water con-  
servation improvements at multifamily residential units.

Sec. 1003. Coordination of energy retrofitting assistance for schools.

## 2

- Sec. 1004. Energy efficiency retrofit pilot program.
- Sec. 1005. Utility energy service contracts.
- Sec. 1006. Use of energy and water efficiency measures in Federal buildings.
- Sec. 1007. Building training and assessment centers.
- Sec. 1008. Career skills training.
- Sec. 1009. Energy-efficient and energy-saving information technologies.
- Sec. 1010. Availability of funds for design updates.
- Sec. 1011. Energy efficient data centers.
- Sec. 1012. Weatherization Assistance Program.
- Sec. 1013. Reauthorization of State energy program.
- Sec. 1014. Smart building acceleration.
- Sec. 1015. Repeal of fossil phase-out.
- Sec. 1016. Federal building energy efficiency performance standards.
- Sec. 1017. Codification of Executive Order.
- Sec. 1018. Certification for green buildings.
- Sec. 1019. High performance green federal buildings.
- Sec. 1020. Evaluation of potentially duplicative green building programs within Department of Energy.
- Sec. 1021. Study and report on energy savings benefits of operational efficiency programs and services.

#### Subtitle B—Appliances

- Sec. 1101. Extended product system rebate program.
- Sec. 1102. Energy efficient transformer rebate program.
- Sec. 1103. Standards for certain furnaces.
- Sec. 1104. Third-party certification under Energy Star program.
- Sec. 1105. Energy conservation standards for commercial refrigeration equipment.
- Sec. 1106. Voluntary verification programs for air conditioning, furnace, boiler, heat pump, and water heater products.

#### Subtitle C—Manufacturing

- Sec. 1201. Manufacturing energy efficiency.
- Sec. 1202. Leveraging existing Federal agency programs to assist small and medium manufacturers.
- Sec. 1203. Leveraging smart manufacturing infrastructure at National Laboratories.

#### Subtitle D—Vehicles

- Sec. 1301. Short title.
- Sec. 1302. Objectives.
- Sec. 1303. Coordination and nonduplication.
- Sec. 1304. Authorization of appropriations.
- Sec. 1305. Reporting.

### PART I—VEHICLE RESEARCH AND DEVELOPMENT

- Sec. 1306. Program.
- Sec. 1307. Manufacturing.

### PART II—MEDIUM- AND HEAVY-DUTY COMMERCIAL AND TRANSIT VEHICLES

- Sec. 1308. Program.

## 3

- Sec. 1309. Class 8 truck and trailer systems demonstration.
- Sec. 1310. Technology testing and metrics.
- Sec. 1311. Nonroad systems pilot program.

## PART III—ADMINISTRATION

- Sec. 1312. Repeal of existing authorities.

## Subtitle E—Short Title

- Sec. 1401. Short title.

## TITLE II—INFRASTRUCTURE

## Subtitle A—Cybersecurity

- Sec. 2001. Cybersecurity threats.
- Sec. 2002. Enhanced grid security.

## Subtitle B—Strategic Petroleum Reserve

- Sec. 2101. Strategic Petroleum Reserve modernization.

## Subtitle C—Trade

- Sec. 2201. Action on applications to export liquefied natural gas.
- Sec. 2202. Public disclosure of liquefied natural gas export destinations.
- Sec. 2203. Energy data collaboration.

## Subtitle D—Electricity and Energy Storage

- Sec. 2301. Grid storage program.
- Sec. 2302. Electric system grid architecture, scenario development, and modeling.
- Sec. 2303. Technology demonstration on the distribution system.
- Sec. 2304. Hybrid micro-grid systems for isolated and resilient communities.
- Sec. 2305. Voluntary model pathways.
- Sec. 2306. Performance metrics for electricity infrastructure providers.
- Sec. 2307. State and regional electricity distribution planning.
- Sec. 2308. Authorization of appropriations.
- Sec. 2309. Electric transmission infrastructure permitting.
- Sec. 2310. Report by transmission organizations on distributed energy resources and micro-grid systems.
- Sec. 2311. Net metering study guidance.

## Subtitle E—Computing

- Sec. 2401. Exascale computer research program.

## TITLE III—SUPPLY

## Subtitle A—Renewables

## PART I—HYDROELECTRIC

- Sec. 3001. Hydropower regulatory improvements.
- Sec. 3002. Hydroelectric production incentives and efficiency improvements.
- Sec. 3003. Extension of time for a Federal Energy Regulatory Commission project involving Clark Canyon Dam.

## 4

- Sec. 3004. Extension of time for a Federal Energy Regulatory Commission project involving Gibson Dam.

## PART II—GEOTHERMAL

## SUBPART A—GEOTHERMAL ENERGY

- Sec. 3005. National goals for production and site identification.  
 Sec. 3006. Priority areas for development on Federal land.  
 Sec. 3007. Facilitation of coproduction of geothermal energy on oil and gas leases.  
 Sec. 3008. Noncompetitive leasing of adjoining areas for development of geothermal resources.  
 Sec. 3009. Large-scale geothermal energy.  
 Sec. 3010. Report to Congress.  
 Sec. 3011. Authorization of appropriations.

## SUBPART B—GEOTHERMAL EXPLORATION

- Sec. 3012. Geothermal exploration test projects.

## PART III—MARINE HYDROKINETIC

- Sec. 3013. Definition of marine and hydrokinetic renewable energy.  
 Sec. 3014. Marine and hydrokinetic renewable energy research and development.  
 Sec. 3015. National Marine Renewable Energy Research, Development, and Demonstration Centers.  
 Sec. 3016. Authorization of appropriations.

## PART IV—BIOMASS

- Sec. 3017. Bio-power.

## Subtitle B—Oil and Gas

- Sec. 3101. Amendments to the Methane Hydrate Research and Development Act of 2000.  
 Sec. 3102. Liquefied natural gas study.  
 Sec. 3103. FERC process coordination with respect to regulatory approval of gas projects.  
 Sec. 3104. Pilot program.

## Subtitle C—Helium

- Sec. 3201. Rights to helium.

## Subtitle D—Critical Minerals

- Sec. 3301. Definitions.  
 Sec. 3302. Policy.  
 Sec. 3303. Critical mineral designations.  
 Sec. 3304. Resource assessment.  
 Sec. 3305. Permitting.  
 Sec. 3306. Federal Register process.  
 Sec. 3307. Recycling, efficiency, and alternatives.  
 Sec. 3308. Analysis and forecasting.  
 Sec. 3309. Education and workforce.  
 Sec. 3310. National geological and geophysical data preservation program.

## 5

- Sec. 3311. Administration.
- Sec. 3312. Authorization of appropriations.

## Subtitle E—Coal

- Sec. 3401. Fossil energy.
- Sec. 3402. Establishment of coal technology program.

## Subtitle F—Nuclear

- Sec. 3501. Report on fusion and fission reactor prototypes.
- Sec. 3502. Next generation nuclear plant project.

## Subtitle G—Workforce Development

- Sec. 3601. 21st Century Energy Workforce Advisory Board.
- Sec. 3602. Energy workforce pilot grant program.

## Subtitle H—Recycling

- Sec. 3701. Recycled carbon fiber.
- Sec. 3702. Energy generation and regulatory relief study regarding recovery and conversion of nonrecycled mixed plastics.
- Sec. 3703. Eligible projects.

## TITLE IV—ACCOUNTABILITY

## Subtitle A—Loan Programs

- Sec. 4001. Terms and conditions for incentives for innovative technologies.
- Sec. 4002. State loan eligibility.
- Sec. 4003. GAO Study on fossil loan guarantee incentive program.
- Sec. 4004. Program eligibility for vessels.
- Sec. 4005. Additional reforms.
- Sec. 4006. Department of Energy Indian energy education planning and management assistance program.

## Subtitle B—Energy-Water Nexus

- Sec. 4101. Nexus of energy and water for sustainability.
- Sec. 4102. Smart energy and water efficiency pilot program.

## Subtitle C—Innovation

- Sec. 4201. America COMPETES programs.
- Sec. 4202. Inclusion of early stage technology demonstration in authorized technology transfer activities.
- Sec. 4203. Supporting access of small business concerns to National Laboratories.
- Sec. 4204. Microlab technology commercialization.

## Subtitle D—Grid Reliability

- Sec. 4301. Bulk-power system reliability impact statement.
- Sec. 4302. Report by transmission organizations on diversity of supply.

## Subtitle E—Management

- Sec. 4401. Federal land management.
- Sec. 4402. Quadrennial Energy Review.

## 6

- Sec. 4403. State oversight of oil and gas programs.
- Sec. 4404. Under Secretary for Science and Energy.

## Subtitle F—Markets

- Sec. 4501. Enhanced information on critical energy supplies.
- Sec. 4502. Working Group on Energy Markets.
- Sec. 4503. Study of regulatory framework for energy markets.

## Subtitle G—Affordability

- Sec. 4601. E-prize competition pilot program.

## Subtitle H—Code Maintenance

- Sec. 4701. Repeal of off-highway motor vehicles study.
- Sec. 4702. Repeal of methanol study.
- Sec. 4703. Repeal of authorization of appropriations provision.
- Sec. 4704. Repeal of residential energy efficiency standards study.
- Sec. 4705. Repeal of weatherization study.
- Sec. 4706. Repeal of report to Congress.
- Sec. 4707. Repeal of report by General Services Administration.
- Sec. 4708. Repeal of intergovernmental energy management planning and coordination workshops.
- Sec. 4709. Repeal of Inspector General audit survey and President's Council on Integrity and Efficiency report to Congress.
- Sec. 4710. Repeal of procurement and identification of energy efficient products program.
- Sec. 4711. Repeal of national action plan for demand response.
- Sec. 4712. Repeal of national coal policy study.
- Sec. 4713. Repeal of study on compliance problem of small electric utility systems.
- Sec. 4714. Repeal of study of socioeconomic impacts of increased coal production and other energy development.
- Sec. 4715. Repeal of study of the use of petroleum and natural gas in combustors.
- Sec. 4716. Repeal of submission of reports.
- Sec. 4717. Repeal of electric utility conservation plan.
- Sec. 4718. Emergency Energy Conservation repeals.
- Sec. 4719. Energy Security Act repeals.
- Sec. 4720. Nuclear Safety Research, Development, and Demonstration Act of 1980 repeals.
- Sec. 4721. Elimination and consolidation of certain America COMPETES programs.
- Sec. 4722. Repeal of state utility regulatory assistance.
- Sec. 4723. Repeal of survey of energy saving potential.
- Sec. 4724. Repeal of photovoltaic energy program.
- Sec. 4725. Repeal of energy auditor training and certification.
- Sec. 4726. Repeal of authorization of appropriations.
- Sec. 4727. Repeal of Renewable Energy and Energy Efficiency Technology Competitiveness Act of 1989.
- Sec. 4728. Repeal of hydrogen research, development, and demonstration program.
- Sec. 4729. Repeal of study on alternative fuel use in nonroad vehicles and engines.

- Sec. 4730. Repeal of low interest loan program for small business fleet purchases.
- Sec. 4731. Repeal of technical and policy analysis for replacement fuel demand and supply information.
- Sec. 4732. Repeal of 1992 Report on Climate Change.
- Sec. 4733. Repeal of Director of Climate Protector establishment.
- Sec. 4734. Repeal of 1994 report on global climate change emissions.
- Sec. 4735. Repeal of telecommuting study.
- Sec. 4736. Repeal of advanced buildings for 2005 program.
- Sec. 4737. Repeal of Energy Research, Development, Demonstration, and Commercial Application Advisory Board.
- Sec. 4738. Repeal of study on use of energy futures for fuel purchase.
- Sec. 4739. Repeal of energy subsidy study.

#### TITLE V—CONSERVATION REAUTHORIZATION

- Sec. 5001. National Park Service Maintenance and Revitalization Conservation Fund.
- Sec. 5002. Land and Water Conservation Fund.
- Sec. 5003. Historic Preservation Fund.

### 1 **SEC. 2. DEFINITIONS.**

2 In this Act:

3 (1) DEPARTMENT.—The term “Department”  
4 means the Department of Energy.

5 (2) SECRETARY.—The term “Secretary” means  
6 the Secretary of Energy.

## 7 **TITLE I—EFFICIENCY**

### 8 **Subtitle A—Buildings**

#### 9 **SEC. 1001. GREATER ENERGY EFFICIENCY IN BUILDING** 10 **CODES.**

11 (a) DEFINITIONS.—Section 303 of the Energy Con-  
12 servation and Production Act (42 U.S.C. 6832) is amend-  
13 ed—

14 (1) by striking paragraph (14) and inserting  
15 the following:

1           “(14) MODEL BUILDING ENERGY CODE.—The  
2           term ‘model building energy code’ means a voluntary  
3           building energy code and standards developed and  
4           updated through a consensus process among inter-  
5           ested persons, such as the IECC or the code used  
6           by—

7                     “(A) the Council of American Building Of-  
8                     ficials, or its legal successor, International Code  
9                     Council, Inc.;

10                    “(B) the American Society of Heating, Re-  
11                    frigerating, and Air-Conditioning Engineers; or

12                    “(C) other appropriate organizations.”;  
13           and

14           (2) by adding at the end the following:

15                    “(17) IECC.—The term ‘IECC’ means the  
16           International Energy Conservation Code.

17                    “(18) INDIAN TRIBE.—The term ‘Indian tribe’  
18           has the meaning given the term in section 4 of the  
19           Native American Housing Assistance and Self-De-  
20           termination Act of 1996 (25 U.S.C. 4103).”.

21           (b) STATE BUILDING ENERGY EFFICIENCY  
22   CODES.—Section 304 of the Energy Conservation and  
23   Production Act (42 U.S.C. 6833) is amended to read as  
24   follows:

1 **“SEC. 304. UPDATING STATE BUILDING ENERGY EFFI-**  
2 **CIENCY CODES.**

3 “(a) IN GENERAL.—The Secretary shall—

4 “(1) encourage and support the adoption of  
5 building energy codes by States, Indian tribes, and,  
6 as appropriate, by local governments that meet or  
7 exceed the model building energy codes, or achieve  
8 equivalent or greater energy savings; and

9 “(2) support full compliance with the State and  
10 local codes.

11 “(b) STATE AND INDIAN TRIBE CERTIFICATION OF  
12 BUILDING ENERGY CODE UPDATES.—

13 “(1) REVIEW AND UPDATING OF CODES BY  
14 EACH STATE AND INDIAN TRIBE.—

15 “(A) IN GENERAL.—Not later than 2 years  
16 after the date on which a model building energy  
17 code is updated, each State or Indian tribe shall  
18 certify whether or not the State or Indian tribe,  
19 respectively, has reviewed and updated the en-  
20 ergy provisions of the building code of the State  
21 or Indian tribe, respectively.

22 “(B) DEMONSTRATION.—The certification  
23 shall include a demonstration of whether or not  
24 the energy savings for the code provisions that  
25 are in effect throughout the State or Indian  
26 tribal territory meet or exceed—

1 “(i) the energy savings of the updated  
2 model building energy code; or

3 “(ii) the targets established under sec-  
4 tion 307(b)(2).

5 “(C) NO MODEL BUILDING ENERGY CODE  
6 UPDATE.—If a model building energy code is  
7 not updated by a target date established under  
8 section 307(b)(2)(D), each State or Indian tribe  
9 shall, not later than 2 years after the specified  
10 date, certify whether or not the State or Indian  
11 tribe, respectively, has reviewed and updated  
12 the energy provisions of the building code of the  
13 State or Indian tribe, respectively, to meet or  
14 exceed the target in section 307(b)(2).

15 “(2) VALIDATION BY SECRETARY.—Not later  
16 than 90 days after a State or Indian tribe certifi-  
17 cation under paragraph (1), the Secretary shall—

18 “(A) determine whether the code provi-  
19 sions of the State or Indian tribe, respectively,  
20 meet the criteria specified in paragraph (1);  
21 and

22 “(B) if the determination is positive, vali-  
23 date the certification.

24 “(c) IMPROVEMENTS IN COMPLIANCE WITH BUILD-  
25 ING ENERGY CODES.—

1 “(1) REQUIREMENT.—

2 “(A) IN GENERAL.—Not later than 3 years  
3 after the date of a certification under sub-  
4 section (b), each State and Indian tribe shall  
5 certify whether or not the State and Indian  
6 tribe, respectively, has—

7 “(i) achieved full compliance under  
8 paragraph (3) with the applicable certified  
9 State and Indian tribe building energy  
10 code or with the associated model building  
11 energy code; or

12 “(ii) made significant progress under  
13 paragraph (4) toward achieving compliance  
14 with the applicable certified State and In-  
15 dian tribe building energy code or with the  
16 associated model building energy code.

17 “(B) REPEAT CERTIFICATIONS.—If the  
18 State or Indian tribe certifies progress toward  
19 achieving compliance, the State or Indian tribe  
20 shall repeat the certification until the State or  
21 Indian tribe certifies that the State or Indian  
22 tribe has achieved full compliance, respectively.

23 “(2) MEASUREMENT OF COMPLIANCE.—A cer-  
24 tification under paragraph (1) shall include docu-  
25 mentation of the rate of compliance based on—

1           “(A) independent inspections of a random  
2           sample of the buildings covered by the code in  
3           the preceding year; or

4           “(B) an alternative method that yields an  
5           accurate measure of compliance.

6           “(3) ACHIEVEMENT OF COMPLIANCE.—A State  
7           or Indian tribe shall be considered to achieve full  
8           compliance under paragraph (1) if—

9           “(A) at least 90 percent of building space  
10           covered by the code in the preceding year sub-  
11           stantially meets all the requirements of the ap-  
12           plicable code specified in paragraph (1), or  
13           achieves equivalent or greater energy savings  
14           level; or

15           “(B) the estimated excess energy use of  
16           buildings that did not meet the applicable code  
17           specified in paragraph (1) in the preceding  
18           year, compared to a baseline of comparable  
19           buildings that meet this code, is not more than  
20           5 percent of the estimated energy use of all  
21           buildings covered by this code during the pre-  
22           ceding year.

23           “(4) SIGNIFICANT PROGRESS TOWARD  
24           ACHIEVEMENT OF COMPLIANCE.—A State or Indian  
25           tribe shall be considered to have made significant

1 progress toward achieving compliance for purposes  
2 of paragraph (1) if the State or Indian tribe—

3 “(A) has developed and is implementing a  
4 plan for achieving compliance during the 8-  
5 year-period beginning on the date of enactment  
6 of this paragraph, including annual targets for  
7 compliance and active training and enforcement  
8 programs; and

9 “(B) has met the most recent target under  
10 subparagraph (A).

11 “(5) VALIDATION BY SECRETARY.—Not later  
12 than 90 days after a State or Indian tribe certifi-  
13 cation under paragraph (1), the Secretary shall—

14 “(A) determine whether the State or In-  
15 dian tribe has demonstrated meeting the cri-  
16 teria of this subsection, including accurate  
17 measurement of compliance; and

18 “(B) if the determination is positive, vali-  
19 date the certification.

20 “(d) STATES OR INDIAN TRIBES THAT DO NOT  
21 ACHIEVE COMPLIANCE.—

22 “(1) REPORTING.—A State or Indian tribe that  
23 has not made a certification required under sub-  
24 section (b) or (c) by the applicable deadline shall  
25 submit to the Secretary a report on—

1           “(A) the status of the State or Indian tribe  
2           with respect to meeting the requirements and  
3           submitting the certification; and

4           “(B) a plan for meeting the requirements  
5           and submitting the certification.

6           “(2) FEDERAL SUPPORT.—For any State or In-  
7           dian tribe for which the Secretary has not validated  
8           a certification by a deadline under subsection (b) or  
9           (c), the lack of the certification may be a consider-  
10          ation for Federal support authorized under this sec-  
11          tion for code adoption and compliance activities.

12          “(3) LOCAL GOVERNMENT.—In any State or  
13          Indian tribe for which the Secretary has not vali-  
14          dated a certification under subsection (b) or (c), a  
15          local government may be eligible for Federal support  
16          by meeting the certification requirements of sub-  
17          sections (b) and (c).

18          “(4) ANNUAL REPORTS BY SECRETARY.—

19                 “(A) IN GENERAL.—The Secretary shall  
20                 annually submit to Congress, and publish in the  
21                 Federal Register, a report on—

22                         “(i) the status of model building en-  
23                         ergy codes;

24                         “(ii) the status of code adoption and  
25                         compliance in the States and Indian tribes;

1 “(iii) the implementation of this sec-  
2 tion; and

3 “(iv) improvements in energy savings  
4 over time as a result of the targets estab-  
5 lished under section 307(b)(2).

6 “(B) IMPACTS.—The report shall include  
7 estimates of impacts of past action under this  
8 section, and potential impacts of further action,  
9 on—

10 “(i) upfront financial and construction  
11 costs, cost benefits and returns (using in-  
12 vestment analysis), and lifetime energy use  
13 for buildings;

14 “(ii) resulting energy costs to individ-  
15 uals and businesses; and

16 “(iii) resulting overall annual building  
17 ownership and operating costs.

18 “(e) TECHNICAL ASSISTANCE TO STATES AND IN-  
19 DIAN TRIBES.—The Secretary shall provide technical as-  
20 sistance to States and Indian tribes to implement the goals  
21 and requirements of this section, including procedures and  
22 technical analysis for States and Indian tribes—

23 “(1) to improve and implement State residential  
24 and commercial building energy codes;

1           “(2) to demonstrate that the code provisions of  
2 the States and Indian tribes achieve equivalent or  
3 greater energy savings than the model building en-  
4 ergy codes and targets;

5           “(3) to document the rate of compliance with a  
6 building energy code; and

7           “(4) to otherwise promote the design and con-  
8 struction of energy efficient buildings.

9           “(f) AVAILABILITY OF INCENTIVE FUNDING.—

10           “(1) IN GENERAL.—The Secretary shall provide  
11 incentive funding to States and Indian tribes—

12           “(A) to implement the requirements of this  
13 section;

14           “(B) to improve and implement residential  
15 and commercial building energy codes, including  
16 increasing and verifying compliance with the  
17 codes and training of State, local, and tribal  
18 building code officials to implement and enforce  
19 the codes; and

20           “(C) to promote building energy efficiency  
21 through the use of the codes.

22           “(2) ADDITIONAL FUNDING.—Additional fund-  
23 ing shall be provided under this subsection for im-  
24 plementation of a plan to achieve and document full

1 compliance with residential and commercial building  
2 energy codes under subsection (c)—

3 “(A) to a State or Indian tribe for which  
4 the Secretary has validated a certification under  
5 subsection (b) or (c); and

6 “(B) in a State or Indian tribe that is not  
7 eligible under subparagraph (A), to a local gov-  
8 ernment that is eligible under this section.

9 “(3) TRAINING.—Of the amounts made avail-  
10 able under this subsection, the State or Indian tribe  
11 may use amounts required, but not to exceed  
12 \$750,000 for a State, to train State and local build-  
13 ing code officials to implement and enforce codes de-  
14 scribed in paragraph (2).

15 “(4) LOCAL GOVERNMENTS.—States may share  
16 grants under this subsection with local governments  
17 that implement and enforce the codes.

18 “(g) STRETCH CODES AND ADVANCED STAND-  
19 ARDS.—

20 “(1) IN GENERAL.—The Secretary shall provide  
21 technical and financial support for the development  
22 of stretch codes and advanced standards for residen-  
23 tial and commercial buildings for use as—

1           “(A) an option for adoption as a building  
2           energy code by State, local, or tribal govern-  
3           ments; and

4           “(B) guidelines for energy-efficient build-  
5           ing design.

6           “(2) TARGETS.—The stretch codes and ad-  
7           vanced standards shall be designed—

8           “(A) to achieve substantial energy savings  
9           compared to the model building energy codes;  
10          and

11          “(B) to meet targets under section 307(b),  
12          if available, at least 3 to 6 years in advance of  
13          the target years.

14          “(h) STUDIES.—The Secretary, in consultation with  
15          building science experts from the National Laboratories  
16          and institutions of higher education, designers and build-  
17          ers of energy-efficient residential and commercial build-  
18          ings, code officials, and other stakeholders, shall under-  
19          take a study of the feasibility, impact, economics, and  
20          merit of—

21          “(1) code improvements that would require that  
22          buildings be designed, sited, and constructed in a  
23          manner that makes the buildings more adaptable in  
24          the future to become zero-net-energy after initial

1 construction, as advances are achieved in energy-sav-  
2 ing technologies;

3 “(2) code procedures to incorporate measured  
4 lifetimes, not just first-year energy use, in trade-offs  
5 and performance calculations; and

6 “(3) legislative options for increasing energy  
7 savings from building energy codes, including addi-  
8 tional incentives for effective State and local action,  
9 and verification of compliance with and enforcement  
10 of a code other than by a State or local government.

11 “(i) EFFECT ON OTHER LAWS.—Nothing in this sec-  
12 tion or section 307 supersedes or modifies the application  
13 of sections 321 through 346 of the Energy Policy and  
14 Conservation Act (42 U.S.C. 6291 et seq.).

15 “(j) AUTHORIZATION OF APPROPRIATIONS.—There  
16 is authorized to be appropriated to carry out this section  
17 and section 307 \$200,000,000, to remain available until  
18 expended.”.

19 (c) FEDERAL BUILDING ENERGY EFFICIENCY  
20 STANDARDS.—Section 305 of the Energy Conservation  
21 and Production Act (42 U.S.C. 6834) is amended by strik-  
22 ing “voluntary building energy code” each place it appears  
23 in subsections (a)(2)(B) and (b) and inserting “model  
24 building energy code”.

1 (d) MODEL BUILDING ENERGY CODES.—Section 307  
2 of the Energy Conservation and Production Act (42  
3 U.S.C. 6836) is amended to read as follows:

4 **“SEC. 307. SUPPORT FOR MODEL BUILDING ENERGY**  
5 **CODES.**

6 “(a) IN GENERAL.—The Secretary shall support the  
7 updating of model building energy codes.

8 “(b) TARGETS.—

9 “(1) IN GENERAL.—The Secretary shall sup-  
10 port the updating of the model building energy codes  
11 to enable the achievement of aggregate energy sav-  
12 ings targets established under paragraph (2).

13 “(2) TARGETS.—

14 “(A) IN GENERAL.—The Secretary shall  
15 work with States, local governments, and In-  
16 dian tribes, nationally recognized code and  
17 standards developers, and other interested par-  
18 ties to support the updating of model building  
19 energy codes by establishing one or more aggre-  
20 gate energy savings targets to achieve the pur-  
21 poses of this section.

22 “(B) SEPARATE TARGETS.—The Secretary  
23 may establish separate targets for commercial  
24 and residential buildings.

1                   ergy Independence and Security Act  
2                   of 2007 (42 U.S.C. 17061)).

3                   “(ii) INITIAL TARGETS.—Not later  
4                   than 1 year after the date of enactment of  
5                   this clause, the Secretary shall establish  
6                   initial targets under this subparagraph.

7                   “(iii) DIFFERENT TARGET YEARS.—  
8                   Subject to clause (i), prior to the applica-  
9                   ble year, the Secretary may set a later tar-  
10                  get year for any of the model building en-  
11                  ergy codes described in subparagraph (A)  
12                  if the Secretary determines that a target  
13                  cannot be met.

14                  “(iv) SMALL BUSINESS.—When estab-  
15                  lishing targets under this paragraph  
16                  through rulemaking, the Secretary shall  
17                  ensure compliance with the Small Business  
18                  Regulatory Enforcement Fairness Act of  
19                  1996 (5 U.S.C. 601 note; Public Law 104-  
20                  121).

21                  “(3) APPLIANCE STANDARDS AND OTHER FAC-  
22                  TORS AFFECTING BUILDING ENERGY USE.—In es-  
23                  tablishing building code targets under paragraph  
24                  (2), the Secretary shall develop and adjust the tar-

1 gets in recognition of potential savings and costs re-  
2 lating to—

3 “(A) efficiency gains made in appliances,  
4 lighting, windows, insulation, and building enve-  
5 lope sealing;

6 “(B) advancement of distributed genera-  
7 tion and on-site renewable power generation  
8 technologies;

9 “(C) equipment improvements for heating,  
10 cooling, and ventilation systems;

11 “(D) building management systems and  
12 SmartGrid technologies to reduce energy use;  
13 and

14 “(E) other technologies, practices, and  
15 building systems that the Secretary considers  
16 appropriate regarding building plug load and  
17 other energy uses.

18 “(4) ECONOMIC CONSIDERATIONS.—In estab-  
19 lishing and revising building code targets under  
20 paragraph (2), the Secretary shall consider the eco-  
21 nomic feasibility of achieving the proposed targets  
22 established under this section and the potential costs  
23 and savings for consumers and building owners, in-  
24 cluding a return on investment analysis.

1           “(c) TECHNICAL ASSISTANCE TO MODEL BUILDING  
2 ENERGY CODE-SETTING AND STANDARD DEVELOPMENT  
3 ORGANIZATIONS.—

4           “(1) IN GENERAL.—The Secretary shall, on a  
5 timely basis, provide technical assistance to model  
6 building energy code-setting and standard develop-  
7 ment organizations consistent with the goals of this  
8 section.

9           “(2) ASSISTANCE.—The assistance shall in-  
10 clude, as requested by the organizations, technical  
11 assistance in—

12                   “(A) evaluating code or standards pro-  
13 posals or revisions;

14                   “(B) building energy analysis and design  
15 tools;

16                   “(C) building demonstrations;

17                   “(D) developing definitions of energy use  
18 intensity and building types for use in model  
19 building energy codes to evaluate the efficiency  
20 impacts of the model building energy codes;

21                   “(E) performance-based standards;

22                   “(F) evaluating economic considerations  
23 under subsection (b)(4); and

1           “(G) developing model building energy  
2 codes by Indian tribes in accordance with tribal  
3 law.

4           “(3) AMENDMENT PROPOSALS.—The Secretary  
5 may submit timely model building energy code  
6 amendment proposals to the model building energy  
7 code-setting and standard development organiza-  
8 tions, with supporting evidence, sufficient to enable  
9 the model building energy codes to meet the targets  
10 established under subsection (b)(2).

11           “(4) ANALYSIS METHODOLOGY.—The Secretary  
12 shall make publicly available the entire calculation  
13 methodology (including input assumptions and data)  
14 used by the Secretary to estimate the energy savings  
15 of code or standard proposals and revisions.

16           “(d) DETERMINATION.—

17           “(1) REVISION OF MODEL BUILDING ENERGY  
18 CODES.—If the provisions of the IECC or ASHRAE  
19 Standard 90.1 regarding building energy use are re-  
20 vised, the Secretary shall make a preliminary deter-  
21 mination not later than 90 days after the date of the  
22 revision, and a final determination not later than 15  
23 months after the date of the revision, on whether or  
24 not the revision will—

1           “(A) improve energy efficiency in buildings  
2 compared to the existing model building energy  
3 code; and

4           “(B) meet the applicable targets under  
5 subsection (b)(2).

6           “(2) CODES OR STANDARDS NOT MEETING TAR-  
7 GETS.—

8           “(A) IN GENERAL.—If the Secretary  
9 makes a preliminary determination under para-  
10 graph (1)(B) that a code or standard does not  
11 meet the targets established under subsection  
12 (b)(2), the Secretary may at the same time pro-  
13 vide the model building energy code or standard  
14 developer with proposed changes that would re-  
15 sult in a model building energy code that meets  
16 the targets and with supporting evidence, tak-  
17 ing into consideration—

18           “(i) whether the modified code is tech-  
19 nically feasible and life-cycle cost effective;

20           “(ii) available appliances, technologies,  
21 materials, and construction practices; and

22           “(iii) the economic considerations  
23 under subsection (b)(4).

24           “(B) INCORPORATION OF CHANGES.—

1                   “(i) IN GENERAL.—On receipt of the  
2                   proposed changes, the model building en-  
3                   ergy code or standard developer shall have  
4                   an additional 270 days to accept or reject  
5                   the proposed changes of the Secretary to  
6                   the model building energy code or standard  
7                   for the Secretary to make a final deter-  
8                   mination.

9                   “(ii) FINAL DETERMINATION.—A  
10                  final determination under paragraph (1)  
11                  shall be on the modified model building en-  
12                  ergy code or standard.

13                  “(e) ADMINISTRATION.—In carrying out this section,  
14                  the Secretary shall—

15                         “(1) publish notice of targets and supporting  
16                         analysis and determinations under this section in the  
17                         Federal Register to provide an explanation of and  
18                         the basis for such actions, including any supporting  
19                         modeling, data, assumptions, protocols, and cost-  
20                         benefit analysis, including return on investment; and

21                         “(2) provide an opportunity for public comment  
22                         on targets and supporting analysis and determina-  
23                         tions under this section.

24                  “(f) VOLUNTARY CODES AND STANDARDS.—Not-  
25                  withstanding any other provision of this section, any

1 model building code or standard established under section  
2 304 shall not be binding on a State, local government, or  
3 Indian tribe as a matter of Federal law.”.

4 **SEC. 1002. BUDGET-NEUTRAL DEMONSTRATION PROGRAM**  
5 **FOR ENERGY AND WATER CONSERVATION IM-**  
6 **PROVEMENTS AT MULTIFAMILY RESIDEN-**  
7 **TIAL UNITS.**

8 (a) ESTABLISHMENT.—The Secretary of Housing  
9 and Urban Development (referred to in this section as the  
10 “Secretary”) shall establish a demonstration program  
11 under which, during the period beginning on the date of  
12 enactment of this Act, and ending on September 30, 2018,  
13 the Secretary may enter into budget-neutral, performance-  
14 based agreements that result in a reduction in energy or  
15 water costs with such entities as the Secretary determines  
16 to be appropriate under which the entities shall carry out  
17 projects for energy or water conservation improvements at  
18 not more than 20,000 residential units in multifamily  
19 buildings participating in—

20 (1) the project-based rental assistance program  
21 under section 8 of the United States Housing Act of  
22 1937 (42 U.S.C. 1437f), other than assistance pro-  
23 vided under section 8(o) of that Act;

1           (2) the supportive housing for the elderly pro-  
2           gram under section 202 of the Housing Act of 1959  
3           (12 U.S.C. 1701q); or

4           (3) the supportive housing for persons with dis-  
5           abilities program under section 811(d)(2) of the  
6           Cranston-Gonzalez National Affordable Housing Act  
7           (42 U.S.C. 8013(d)(2)).

8           (b) REQUIREMENTS.—

9           (1) PAYMENTS CONTINGENT ON SAVINGS.—

10           (A) IN GENERAL.—The Secretary shall  
11           provide to an entity a payment under an agree-  
12           ment under this section only during applicable  
13           years for which an energy or water cost savings  
14           is achieved with respect to the applicable multi-  
15           family portfolio of properties, as determined by  
16           the Secretary, in accordance with subparagraph  
17           (B).

18           (B) PAYMENT METHODOLOGY.—

19           (i) IN GENERAL.—Each agreement  
20           under this section shall include a pay-for-  
21           success provision—

22                   (I) that will serve as a payment  
23                   threshold for the term of the agree-  
24                   ment; and

1 (II) pursuant to which the De-  
2 partment of Housing and Urban De-  
3 velopment shall share a percentage of  
4 the savings at a level determined by  
5 the Secretary that is sufficient to  
6 cover the administrative costs of car-  
7 rying out this section.

8 (ii) LIMITATIONS.—A payment made  
9 by the Secretary under an agreement  
10 under this section shall—

11 (I) be contingent on documented  
12 utility savings; and

13 (II) not exceed the utility savings  
14 achieved by the date of the payment,  
15 and not previously paid, as a result of  
16 the improvements made under the  
17 agreement.

18 (C) THIRD PARTY VERIFICATION.—Savings  
19 payments made by the Secretary under this sec-  
20 tion shall be based on a measurement and  
21 verification protocol that includes at least—

22 (i) establishment of a weather-normal-  
23 ized and occupancy-normalized utility con-  
24 sumption baseline established preretrofit;

1                   (ii) annual third party confirmation of  
2                   actual utility consumption and cost for  
3                   owner-paid utilities;

4                   (iii) annual third party validation of  
5                   the tenant utility allowances in effect dur-  
6                   ing the applicable year and vacancy rates  
7                   for each unit type; and

8                   (iv) annual third party determination  
9                   of savings to the Secretary.

10               (2) TERM.—The term of an agreement under  
11               this section shall be not longer than 12 years.

12               (3) ENTITY ELIGIBILITY.—The Secretary  
13               shall—

14                   (A) establish a competitive process for en-  
15                   tering into agreements under this section; and

16                   (B) enter into such agreements only with  
17                   entities that demonstrate significant experience  
18                   relating to—

19                       (i) financing and operating properties  
20                       receiving assistance under a program de-  
21                       scribed in subsection (a);

22                       (ii) oversight of energy and water con-  
23                       servation programs, including oversight of  
24                       contractors; and

1 (iii) raising capital for energy and  
2 water conservation improvements from  
3 charitable organizations or private inves-  
4 tors.

5 (4) GEOGRAPHICAL DIVERSITY.—Each agree-  
6 ment entered into under this section shall provide  
7 for the inclusion of properties with the greatest fea-  
8 sible regional and State variance.

9 (c) PLAN AND REPORTS.—

10 (1) PLAN.—Not later than 90 days after the  
11 date of enactment of this Act, the Secretary shall  
12 submit to the Committees on Appropriations of the  
13 House of Representatives and the Senate, the Com-  
14 mittee on Energy and Natural Resources of the Sen-  
15 ate, and the Committee on Energy and Commerce of  
16 the House of Representatives a detailed plan for the  
17 implementation of this section.

18 (2) REPORTS.—Not later than 1 year after the  
19 date of enactment of this Act, and annually there-  
20 after, the Secretary shall—

21 (A) conduct an evaluation of the program  
22 under this section; and

23 (B) submit to Congress a report describing  
24 each evaluation conducted under subparagraph

25 (A).

1 (d) FUNDING.—For each fiscal year during which an  
2 agreement under this section is in effect, the Secretary  
3 may use to carry out this section any funds appropriated  
4 to the Secretary for the renewal of contracts under a pro-  
5 gram described in subsection (a).

6 **SEC. 1003. COORDINATION OF ENERGY RETROFITTING AS-**  
7 **SISTANCE FOR SCHOOLS.**

8 (a) DEFINITION OF SCHOOL.—In this section, the  
9 term “school” means—

10 (1) an elementary school or secondary school  
11 (as defined in section 9101 of the Elementary and  
12 Secondary Education Act of 1965 (20 U.S.C.  
13 7801));

14 (2) an institution of higher education (as de-  
15 fined in section 102(a) of the Higher Education Act  
16 of 1965 (20 U.S.C. 1002(a));

17 (3) a school of the defense dependents’ edu-  
18 cation system under the Defense Dependents’ Edu-  
19 cation Act of 1978 (20 U.S.C. 921 et seq.) or estab-  
20 lished under section 2164 of title 10, United States  
21 Code;

22 (4) a school operated by the Bureau of Indian  
23 Affairs;

1           (5) a tribally controlled school (as defined in  
2           section 5212 of the Tribally Controlled Schools Act  
3           of 1988 (25 U.S.C. 2511)); and

4           (6) a Tribal College or University (as defined in  
5           section 316(b) of the Higher Education Act of 1965  
6           (20 U.S.C. 1059c(b))).

7           (b) DESIGNATION OF LEAD AGENCY.—The Sec-  
8           retary, acting through the Office of Energy Efficiency and  
9           Renewable Energy, shall act as the lead Federal agency  
10          for coordinating and disseminating information on exist-  
11          ing Federal programs and assistance that may be used  
12          to help initiate, develop, and finance energy efficiency, re-  
13          newable energy, and energy retrofitting projects for  
14          schools.

15          (c) REQUIREMENTS.—In carrying out coordination  
16          and outreach under subsection (b), the Secretary shall—

17               (1) in consultation and coordination with the  
18               appropriate Federal agencies, carry out a review of  
19               existing programs and financing mechanisms (in-  
20               cluding revolving loan funds and loan guarantees)  
21               available in or from the Department of Agriculture,  
22               the Department of Energy, the Department of Edu-  
23               cation, the Department of the Treasury, the Internal  
24               Revenue Service, the Environmental Protection  
25               Agency, and other appropriate Federal agencies with

1 jurisdiction over energy financing and facilitation  
2 that are currently used or may be used to help ini-  
3 tiate, develop, and finance energy efficiency, renew-  
4 able energy, and energy retrofitting projects for  
5 schools;

6 (2) establish a Federal cross-departmental col-  
7 laborative coordination, education, and outreach ef-  
8 fort to streamline communication and promote avail-  
9 able Federal opportunities and assistance described  
10 in paragraph (1) for energy efficiency, renewable en-  
11 ergy, and energy retrofitting projects that enables  
12 States, local educational agencies, and schools—

13 (A) to use existing Federal opportunities  
14 more effectively; and

15 (B) to form partnerships with Governors,  
16 State energy programs, local educational, finan-  
17 cial, and energy officials, State and local gov-  
18 ernment officials, nonprofit organizations, and  
19 other appropriate entities to support the initi-  
20 ation of the projects;

21 (3) provide technical assistance for States, local  
22 educational agencies, and schools to help develop  
23 and finance energy efficiency, renewable energy, and  
24 energy retrofitting projects—

1 (A) to increase the energy efficiency of  
2 buildings or facilities;

3 (B) to install systems that individually  
4 generate energy from renewable energy re-  
5 sources;

6 (C) to establish partnerships to leverage  
7 economies of scale and additional financing  
8 mechanisms available to larger clean energy ini-  
9 tiatives; or

10 (D) to promote—

11 (i) the maintenance of health, environ-  
12 mental quality, and safety in schools, in-  
13 cluding the ambient air quality, through  
14 energy efficiency, renewable energy, and  
15 energy retrofit projects; and

16 (ii) the achievement of expected en-  
17 ergy savings and renewable energy produc-  
18 tion through proper operations and main-  
19 tenance practices;

20 (4) develop and maintain a single online re-  
21 source website with contact information for relevant  
22 technical assistance and support staff in the Office  
23 of Energy Efficiency and Renewable Energy for  
24 States, local educational agencies, and schools to ef-  
25 fectively access and use Federal opportunities and

1 assistance described in paragraph (1) to develop en-  
2 ergy efficiency, renewable energy, and energy retro-  
3 fitting projects; and

4 (5) establish a process for recognition of schools  
5 that—

6 (A) have successfully implemented energy  
7 efficiency, renewable energy, and energy retro-  
8 fitting projects; and

9 (B) are willing to serve as resources for  
10 other local educational agencies and schools to  
11 assist initiation of similar efforts.

12 (d) REPORT.—Not later than 180 days after the date  
13 of enactment of this Act, the Secretary shall submit to  
14 Congress a report describing the implementation of this  
15 section.

16 **SEC. 1004. ENERGY EFFICIENCY RETROFIT PILOT PRO-**  
17 **GRAM.**

18 (a) DEFINITIONS.—In this section:

19 (1) APPLICANT.—The term “applicant” means  
20 a nonprofit organization that applies for a grant  
21 under this section.

22 (2) ENERGY-EFFICIENCY IMPROVEMENT.—

23 (A) IN GENERAL.—The term “energy-effi-  
24 ciency improvement” means an installed meas-  
25 ure (including a product, equipment, system,

1 service, or practice) that results in a reduction  
2 in use by a nonprofit organization for energy or  
3 fuel supplied from outside the nonprofit build-  
4 ing.

5 (B) INCLUSIONS.—The term “energy-effi-  
6 ciency improvement” includes an installed  
7 measure described in subparagraph (A) involv-  
8 ing—

9 (i) repairing, replacing, or installing—

10 (I) a roof or lighting system, or  
11 component of a roof or lighting sys-  
12 tem;

13 (II) a window;

14 (III) a door, including a security  
15 door; or

16 (IV) a heating, ventilation, or air  
17 conditioning system or component of  
18 the system (including insulation and  
19 wiring and plumbing improvements  
20 needed to serve a more efficient sys-  
21 tem);

22 (ii) a renewable energy generation or  
23 heating system, including a solar, photo-  
24 voltaic, wind, geothermal, or biomass (in-

1 cluding wood pellet) system or component  
2 of the system; and

3 (iii) any other measure taken to mod-  
4 ernize, renovate, or repair a nonprofit  
5 building to make the nonprofit building  
6 more energy efficient.

7 (3) NONPROFIT BUILDING.—

8 (A) IN GENERAL.—The term “nonprofit  
9 building” means a building operated and owned  
10 by a nonprofit organization.

11 (B) INCLUSIONS.—The term “nonprofit  
12 building” includes a building described in sub-  
13 paragraph (A) that is—

- 14 (i) a hospital;  
15 (ii) a youth center;  
16 (iii) a school;  
17 (iv) a social-welfare program facility;  
18 (v) a faith-based organization; and  
19 (vi) any other nonresidential and non-  
20 commercial structure.

21 (b) ESTABLISHMENT.—Not later than 1 year after  
22 the date of enactment of this Act, the Secretary shall es-  
23 tablish a pilot program to award grants for the purpose  
24 of retrofitting nonprofit buildings with energy-efficiency  
25 improvements.

1 (c) GRANTS.—

2 (1) IN GENERAL.—The Secretary may award  
3 grants under the program established under sub-  
4 section (b).

5 (2) APPLICATION.—The Secretary may award a  
6 grant under this section if an applicant submits to  
7 the Secretary an application at such time, in such  
8 form, and containing such information as the Sec-  
9 retary may prescribe.

10 (3) CRITERIA FOR GRANT.—In determining  
11 whether to award a grant under this section, the  
12 Secretary shall apply performance-based criteria,  
13 which shall give priority to applications based on—

14 (A) the energy savings achieved;

15 (B) the cost-effectiveness of the energy-ef-  
16 ficiency improvement;

17 (C) an effective plan for evaluation, meas-  
18 urement, and verification of energy savings;

19 (D) the financial need of the applicant;  
20 and

21 (E) the percentage of the matching con-  
22 tribution by the applicant.

23 (4) LIMITATION ON INDIVIDUAL GRANT  
24 AMOUNT.—Each grant awarded under this section  
25 shall not exceed—

1 (A) an amount equal to 50 percent of the  
2 energy-efficiency improvement; and

3 (B) \$200,000.

4 (5) COST SHARING.—

5 (A) IN GENERAL.—A grant awarded under  
6 this section shall be subject to a minimum non-  
7 Federal cost-sharing requirement of 50 percent.

8 (B) IN-KIND CONTRIBUTIONS.—The non-  
9 Federal share may be provided in the form of  
10 in-kind contributions of materials or services.

11 (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
12 authorized to be appropriated to carry out this section  
13 \$10,000,000 for each of fiscal years 2016 through 2020,  
14 to remain available until expended.

15 **SEC. 1005. UTILITY ENERGY SERVICE CONTRACTS.**

16 Section 546 of the National Energy Conservation  
17 Policy Act (42 U.S.C. 8256) is amended by adding at the  
18 end the following:

19 “(f) UTILITY ENERGY SERVICE CONTRACTS.—

20 “(1) IN GENERAL.—Each Federal agency may  
21 use, to the maximum extent practicable, measures  
22 provided by law to meet energy efficiency and con-  
23 servation mandates and laws, including through util-  
24 ity energy service contracts.

1           “(2) CONTRACT PERIOD.—The term of a utility  
2 energy service contract entered into by a Federal  
3 agency may have a contract period that extends be-  
4 yond 10 years, but not to exceed 25 years.

5           “(3) REQUIREMENTS.—The conditions of a util-  
6 ity energy service contract entered into by a Federal  
7 agency shall include requirements for measurement,  
8 verification, and performance assurances or guaran-  
9 tees of the savings.”.

10 **SEC. 1006. USE OF ENERGY AND WATER EFFICIENCY MEAS-**  
11 **URES IN FEDERAL BUILDINGS.**

12           (a) ENERGY MANAGEMENT REQUIREMENTS.—Sec-  
13 tion 543(f)(4) of the National Energy Conservation Policy  
14 Act (42 U.S.C. 8253(f)(4)) is amended—

15           (1) by redesignating subparagraphs (A) and  
16 (B) as clauses (i) and (ii), respectively, and indent-  
17 ing appropriately;

18           (2) by striking “Not later than” and inserting  
19 the following:

20           “(A) IN GENERAL.—Not later than”; and

21           (3) by adding at the end the following:

22           “(B) MEASURES NOT IMPLEMENTED.—  
23 Each energy manager, as part of the certifi-  
24 cation system under paragraph (7) and using  
25 guidelines developed by the Secretary, shall pro-

1           vide an explanation regarding any life-cycle  
2           cost-effective measures described in subpara-  
3           graph (A)(i) that have not been implemented.”.

4           (b) REPORTS.—Section 548(b) of the National En-  
5   ergy Conservation Policy Act (42 U.S.C. 8258(b)) is  
6   amended—

7           (1) in paragraph (3), by striking “and” at the  
8           end;

9           (2) in paragraph (4), by striking the period at  
10          the end and inserting “; and”; and

11          (3) by adding at the end the following:

12           “(5)(A) the status of the energy savings per-  
13          formance contracts and utility energy service con-  
14          tracts of each agency;

15           “(B) the investment value of the contracts;

16           “(C) the guaranteed energy savings for the pre-  
17          vious year as compared to the actual energy savings  
18          for the previous year;

19           “(D) the plan for entering into the contracts in  
20          the coming year; and

21           “(E) information explaining why any previously  
22          submitted plans for the contracts were not imple-  
23          mented.”.

24          (c) DEFINITION OF ENERGY CONSERVATION MEAS-  
25   URES.—Section 551(4) of the National Energy Conserva-

1 tion Policy Act (42 U.S.C. 8259(4)) is amended by strik-  
2 ing “or retrofit activities” and inserting “retrofit activi-  
3 ties, or energy consuming devices and required support  
4 structures”.

5 (d) **AUTHORITY TO ENTER INTO CONTRACTS.**—Sec-  
6 tion 801(a)(2)(F) of the National Energy Conservation  
7 Policy Act (42 U.S.C. 8287(a)(2)(F)) is amended—

8 (1) in clause (i), by striking “or” at the end;

9 (2) in clause (ii), by striking the period at the  
10 end and inserting “; or”; and

11 (3) by adding at the end the following:

12 “(iii) limit the recognition of oper-  
13 ation and maintenance savings associated  
14 with systems modernized or replaced with  
15 the implementation of energy conservation  
16 measures, water conservation measures, or  
17 any combination of energy conservation  
18 measures and water conservation meas-  
19 ures.”.

20 (e) **MISCELLANEOUS AUTHORITY.**—Section  
21 801(a)(2) of the National Energy Conservation Policy Act  
22 (42 U.S.C. 8287(a)(2)) is amended by adding at the end  
23 the following:

24 “(H) **MISCELLANEOUS AUTHORITY.**—Not-  
25 withstanding any other provision of law, a Fed-

1           eral agency may sell or transfer energy savings  
2           and apply the proceeds of the sale or transfer  
3           to fund a contract under this title.”.

4           (f) PAYMENT OF COSTS.—Section 802 of the Na-  
5           tional Energy Conservation Policy Act (42 U.S.C. 8287a)  
6           is amended by striking “(and related operation and main-  
7           tenance expenses)” and inserting “, including related op-  
8           erations and maintenance expenses”.

9           (g) DEFINITION OF FEDERAL BUILDING.—Section  
10          551(6) of the National Energy Conservation Policy Act  
11          (42 U.S.C. 8259(6)) is amended by striking the semicolon  
12          at the end and inserting “the term does not include a dam,  
13          reservoir, or hydropower facility owned or operated by a  
14          Federal agency;”.

15          (h) DEFINITION OF ENERGY SAVINGS.—Section  
16          804(2) of the National Energy Conservation Policy Act  
17          (42 U.S.C. 8287c(2)) is amended—

18                 (1) in subparagraph (A), by striking “federally  
19                 owned building or buildings or other federally owned  
20                 facilities” and inserting “Federal building (as de-  
21                 fined in section 551)” each place it appears;

22                 (2) in subparagraph (C), by striking “; and”  
23                 and inserting a semicolon;

24                 (3) in subparagraph (D), by striking the period  
25                 at the end and inserting a semicolon; and

1 (4) by adding at the end the following:

2 “(E) the use, sale, or transfer of energy in-  
3 centives, rebates, or credits (including renew-  
4 able energy credits) from Federal, State, or  
5 local governments or utilities; and

6 “(F) any revenue generated from a reduc-  
7 tion in energy or water use, more efficient  
8 waste recycling, or additional energy generated  
9 from more efficient equipment.”.

10 **SEC. 1007. BUILDING TRAINING AND ASSESSMENT CEN-**  
11 **TERS.**

12 (a) IN GENERAL.—The Secretary shall provide  
13 grants to institutions of higher education (as defined in  
14 section 101 of the Higher Education Act of 1965 (20  
15 U.S.C. 1001)) and Tribal Colleges or Universities (as de-  
16 fined in section 316(b) of that Act (20 U.S.C. 1059c(b)))  
17 to establish building training and assessment centers—

18 (1) to identify opportunities for optimizing en-  
19 ergy efficiency and environmental performance in  
20 buildings;

21 (2) to promote the application of emerging con-  
22 cepts and technologies in commercial and institu-  
23 tional buildings;

24 (3) to train engineers, architects, building sci-  
25 entists, building energy permitting and enforcement

1 officials, and building technicians in energy-efficient  
2 design and operation;

3 (4) to assist institutions of higher education  
4 and Tribal Colleges or Universities in training build-  
5 ing technicians;

6 (5) to promote research and development for  
7 the use of alternative energy sources and distributed  
8 generation to supply heat and power for buildings,  
9 particularly energy-intensive buildings; and

10 (6) to coordinate with and assist State-accred-  
11 ited technical training centers, community colleges,  
12 Tribal Colleges or Universities, and local offices of  
13 the National Institute of Food and Agriculture and  
14 ensure appropriate services are provided under this  
15 section to each region of the United States.

16 (b) COORDINATION AND NONDUPLICATION.—

17 (1) IN GENERAL.—The Secretary shall coordi-  
18 nate the program with the industrial research and  
19 assessment centers program and with other Federal  
20 programs to avoid duplication of effort.

21 (2) COLLOCATION.—To the maximum extent  
22 practicable, building, training, and assessment cen-  
23 ters established under this section shall be collocated  
24 with Industrial Assessment Centers.

1 (c) AUTHORIZATION OF APPROPRIATIONS.—There is  
2 authorized to be appropriated to carry out this section  
3 \$10,000,000, to remain available until expended.

4 **SEC. 1008. CAREER SKILLS TRAINING.**

5 (a) IN GENERAL.—The Secretary shall pay grants to  
6 eligible entities described in subsection (b) to pay the Fed-  
7 eral share of associated career skills training programs  
8 under which students concurrently receive classroom in-  
9 struction and on-the-job training for the purpose of ob-  
10 taining an industry-related certification to install energy  
11 efficient buildings technologies, including technologies de-  
12 scribed in section 307(b)(3) of the Energy Conservation  
13 and Production Act (42 U.S.C. 6836(b)(3)).

14 (b) ELIGIBILITY.—To be eligible to obtain a grant  
15 under subsection (a), an entity shall be a nonprofit part-  
16 nership described in section 171(e)(2)(B)(ii) of the Work-  
17 force Investment Act of 1998 (29 U.S.C.  
18 2916(e)(2)(B)(ii)).

19 (c) FEDERAL SHARE.—The Federal share of the cost  
20 of carrying out a career skills training program described  
21 in subsection (a) shall be 50 percent.

22 (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
23 authorized to be appropriated to carry out this section  
24 \$10,000,000, to remain available until expended.

1 **SEC. 1009. ENERGY-EFFICIENT AND ENERGY-SAVING IN-**  
2 **FORMATION TECHNOLOGIES.**

3 Section 543 of the National Energy Conservation  
4 Policy Act (42 U.S.C. 8253) is amended by adding at the  
5 end the following:

6 “(h) FEDERAL IMPLEMENTATION STRATEGY FOR  
7 ENERGY-EFFICIENT AND ENERGY-SAVING INFORMATION  
8 TECHNOLOGIES.—

9 “(1) DEFINITIONS.—In this subsection:

10 “(A) DIRECTOR.—The term ‘Director’  
11 means the Director of the Office of Manage-  
12 ment and Budget.

13 “(B) INFORMATION TECHNOLOGY.—The  
14 term ‘information technology’ has the meaning  
15 given the term in section 11101 of title 40,  
16 United States Code.

17 “(2) DEVELOPMENT OF IMPLEMENTATION  
18 STRATEGY.—Not later than 1 year after the date of  
19 enactment of this subsection, each Federal agency  
20 shall collaborate with the Director to develop an im-  
21 plementation strategy (including best-practices and  
22 measurement and verification techniques) for the  
23 maintenance, purchase, and use by the Federal  
24 agency of energy-efficient and energy-saving infor-  
25 mation technologies.

1           “(3) ADMINISTRATION.—In developing an im-  
2           plementation strategy, each Federal agency shall  
3           consider—

4                   “(A) advanced metering infrastructure;

5                   “(B) energy efficient data center strategies  
6           and methods of increasing asset and infrastruc-  
7           ture utilization;

8                   “(C) advanced power management tools;

9                   “(D) building information modeling, in-  
10          cluding building energy management; and

11                  “(E) secure telework and travel substi-  
12          tution tools.

13          “(4) PERFORMANCE GOALS.—

14                  “(A) IN GENERAL.—Not later than Sep-  
15          tember 30, 2015, the Director, in consultation  
16          with the Secretary, shall establish performance  
17          goals for evaluating the efforts of Federal agen-  
18          cies in improving the maintenance, purchase,  
19          and use of energy-efficient and energy-saving  
20          information technology systems.

21                  “(B) BEST PRACTICES.—The Chief Infor-  
22          mation Officers Council established under sec-  
23          tion 3603 of title 44, United States Code, shall  
24          supplement the performance goals established  
25          under this paragraph with recommendations on

1 best practices for the attainment of the per-  
2 formance goals, to include a requirement for  
3 agencies to consider the use of—

4 “(i) energy savings performance con-  
5 tracting; and

6 “(ii) utility energy services con-  
7 tracting.

8 “(5) REPORTS.—

9 “(A) AGENCY REPORTS.—Each Federal  
10 agency subject to the requirements of this sub-  
11 section shall include in the report of the agency  
12 under section 527 of the Energy Independence  
13 and Security Act of 2007 (42 U.S.C. 17143) a  
14 description of the efforts and results of the  
15 agency under this subsection.

16 “(B) OMB GOVERNMENT EFFICIENCY RE-  
17 PORTS AND SCORECARDS.—Effective beginning  
18 not later than October 1, 2015, the Director  
19 shall include in the annual report and scorecard  
20 of the Director required under section 528 of  
21 the Energy Independence and Security Act of  
22 2007 (42 U.S.C. 17144) a description of the ef-  
23 forts and results of Federal agencies under this  
24 subsection.

1                   “(C) USE OF EXISTING REPORTING STRUC-  
2                   TURES.—The Director may require Federal  
3                   agencies to submit any information required to  
4                   be submitted under this subsection though re-  
5                   porting structures in use as of the date of en-  
6                   actment of the Energy Policy Modernization  
7                   Act of 2015.”.

8 **SEC. 1010. AVAILABILITY OF FUNDS FOR DESIGN UPDATES.**

9                   Section 3307 of title 40, United States Code, is  
10 amended—

11                   (1) by redesignating subsections (d) through (h)  
12                   as subsections (e) through (i), respectively; and

13                   (2) by inserting after subsection (c) the fol-  
14                   lowing:

15                   “(d) AVAILABILITY OF FUNDS FOR DESIGN UP-  
16 DATES.—

17                   “(1) IN GENERAL.—Subject to paragraph (2),  
18                   for any project for which congressional approval is  
19                   received under subsection (a) and for which the de-  
20                   sign has been substantially completed but construc-  
21                   tion has not begun, the Administrator of General  
22                   Services may use appropriated funds to update the  
23                   project design to meet applicable Federal building  
24                   energy efficiency standards established under section  
25                   305 of the Energy Conservation and Production Act

1 (42 U.S.C. 6834) and other requirements estab-  
2 lished under section 3312.

3 “(2) LIMITATION.—The use of funds under  
4 paragraph (1) shall not exceed 125 percent of the  
5 estimated energy or other cost savings associated  
6 with the updates as determined by a life cycle cost  
7 analysis under section 544 of the National Energy  
8 Conservation Policy Act (42 U.S.C. 8254).”.

9 **SEC. 1011. ENERGY EFFICIENT DATA CENTERS.**

10 Section 453 of the Energy Independence and Security  
11 Act of 2007 (42 U.S.C. 17112) is amended—

12 (1) in subsection (b)—

13 (A) in paragraph (2)(D)(iv), by striking  
14 “the organization” and inserting “an organiza-  
15 tion”; and

16 (B) by striking paragraph (3); and

17 (2) by striking subsections (e) through (g) and  
18 inserting the following:

19 “(c) STAKEHOLDER INVOLVEMENT.—

20 “(1) IN GENERAL.—The Secretary and the Ad-  
21 ministrator shall carry out subsection (b) in con-  
22 sultation with the information technology industry  
23 and other key stakeholders, with the goal of pro-  
24 ducing results that accurately reflect the best knowl-  
25 edge in the most pertinent domains.

1           “(2) CONSIDERATIONS.—In carrying out con-  
2           sultation described in paragraph (1), the Secretary  
3           and the Administrator shall pay particular attention  
4           to organizations that—

5                   “(A) have members with expertise in en-  
6                   ergy efficiency and in the development, oper-  
7                   ation, and functionality of data centers, infor-  
8                   mation technology equipment, and software, in-  
9                   cluding representatives of hardware manufac-  
10                  turers, data center operators, and facility man-  
11                  agers;

12                  “(B) obtain and address input from the  
13                  National Laboratories (as that term is defined  
14                  in section 2 of the Energy Policy Act of 2005  
15                  (42 U.S.C. 15801)) or any institution of higher  
16                  education, research institution, industry asso-  
17                  ciation, company, or public interest group with  
18                  applicable expertise;

19                  “(C) follow—

20                          “(i) commonly accepted procedures  
21                          for the development of specifications; and

22                          “(ii) accredited standards development  
23                          processes; or

1                   “(D) have a mission to promote energy ef-  
2                   ficiency for data centers and information tech-  
3                   nology.

4           “(d) MEASUREMENTS AND SPECIFICATIONS.—The  
5 Secretary and the Administrator shall consider and assess  
6 the adequacy of the specifications, measurements, and  
7 benchmarks described in subsection (b) for use by the  
8 Federal Energy Management Program, the Energy Star  
9 Program, and other efficiency programs of the Depart-  
10 ment of Energy or the Environmental Protection Agency.

11           “(e) STUDY.—The Secretary, in consultation with the  
12 Administrator, not later than 18 months after the date  
13 of enactment of the Energy Policy Modernization Act of  
14 2015, shall make available to the public an update to the  
15 report submitted to Congress pursuant to section 1 of the  
16 Act of December 20, 2006 (Public Law 109–431; 120  
17 Stat. 2920), entitled ‘Report to Congress on Server and  
18 Data Center Energy Efficiency’ and dated August 2,  
19 2007, that provides—

20                   “(1) a comparison and gap analysis of the esti-  
21                   mates and projections contained in the original re-  
22                   port with new data regarding the period from 2007  
23                   through 2014;

1           “(2) an analysis considering the impact of in-  
2           formation technologies, including virtualization and  
3           cloud computing, in the public and private sectors;

4           “(3) an evaluation of the impact of the com-  
5           bination of cloud platforms, mobile devices, social  
6           media, and big data on data center energy usage;

7           “(4) an evaluation of water usage in data cen-  
8           ters and recommendations for reductions in such  
9           water usage; and

10           “(5) updated projections and recommendations  
11           for best practices through fiscal year 2020.

12           “(f) DATA CENTER ENERGY PRACTITIONER PRO-  
13           GRAM.—

14           “(1) IN GENERAL.—The Secretary, in consulta-  
15           tion with key stakeholders and the Director of the  
16           Office of Management and Budget, shall maintain a  
17           data center energy practitioner program that pro-  
18           vides for the certification of energy practitioners  
19           qualified to evaluate the energy usage and efficiency  
20           opportunities in Federal data centers.

21           “(2) EVALUATIONS.—Each Federal agency  
22           shall consider having the data centers of the agency  
23           evaluated once every 4 years by energy practitioners  
24           certified pursuant to the program, whenever prac-

1        ticable using certified practitioners employed by the  
2        agency.

3        “(g) OPEN DATA INITIATIVE.—

4                “(1) IN GENERAL.—The Secretary, in consulta-  
5        tion with key stakeholders and the Director of the  
6        Office of Management and Budget, shall establish  
7        an open data initiative for Federal data center en-  
8        ergy usage data, with the purpose of making the  
9        data available and accessible in a manner that en-  
10       courages further data center innovation, optimiza-  
11       tion, and consolidation.

12               “(2) CONSIDERATION.—In establishing the ini-  
13       tiative under paragraph (1), the Secretary shall con-  
14       sider using the online Data Center Maturity Model.

15        “(h)    INTERNATIONAL    SPECIFICATIONS    AND  
16       METRICS.—The Secretary, in consultation with key stake-  
17       holders, shall actively participate in efforts to harmonize  
18       global specifications and metrics for data center energy  
19       and water efficiency.

20        “(i) DATA CENTER UTILIZATION METRIC.—The Sec-  
21       retary, in collaboration with key stakeholders, shall facili-  
22       tate in the development of an efficiency metric that meas-  
23       ures the energy efficiency of a data center (including  
24       equipment and facilities).

1           “(j) PROTECTION OF PROPRIETARY INFORMATION.—  
2 The Secretary and the Administrator shall not disclose  
3 any proprietary information or trade secrets provided by  
4 any individual or company for the purposes of carrying  
5 out this section or the programs and initiatives established  
6 under this section.”.

7 **SEC. 1012. WEATHERIZATION ASSISTANCE PROGRAM.**

8           (a) REAUTHORIZATION OF WEATHERIZATION AS-  
9 SISTANCE PROGRAM.—Section 422 of the Energy Con-  
10 servation and Production Act (42 U.S.C. 6872) is amend-  
11 ed by striking “appropriated—” and all that follows  
12 through the period at the end and inserting “appropriated  
13 \$350,000,000 for each of fiscal years 2016 through  
14 2020.”.

15           (b) GRANTS FOR NEW, SELF-SUSTAINING LOW-IN-  
16 COME, SINGLE-FAMILY AND MULTIFAMILY HOUSING EN-  
17 ERGY RETROFIT MODEL PROGRAMS TO ELIGIBLE  
18 MULTISTATE HOUSING AND ENERGY NONPROFIT ORGA-  
19 NIZATIONS.—The Energy Conservation and Production  
20 Act is amended by inserting after section 414B (42 U.S.C.  
21 6864b) the following:

1 **“SEC. 414C. GRANTS FOR NEW, SELF-SUSTAINING LOW-IN-**  
2 **COME, SINGLE-FAMILY AND MULTIFAMILY**  
3 **HOUSING ENERGY RETROFIT MODEL PRO-**  
4 **GRAMS TO ELIGIBLE MULTISTATE HOUSING**  
5 **AND ENERGY NONPROFIT ORGANIZATIONS.**

6 “(a) PURPOSES.—The purposes of this section are—

7 “(1) to expand the number of low-income, sin-  
8 gle-family and multifamily homes that receive energy  
9 efficiency retrofits;

10 “(2) to promote innovation and new models of  
11 retrofitting low-income homes through new Federal  
12 partnerships with covered organizations that lever-  
13 age substantial donations, donated materials, volun-  
14 teer labor, homeowner labor equity, and other pri-  
15 vate sector resources;

16 “(3) to assist the covered organizations in dem-  
17 onstrating, evaluating, improving, and replicating  
18 widely the model low-income energy retrofit pro-  
19 grams of the covered organizations; and

20 “(4) to ensure that the covered organizations  
21 make the energy retrofit programs of the covered or-  
22 ganizations self-sustaining by the time grant funds  
23 have been expended.

24 “(b) DEFINITIONS.—In this section:

25 “(1) COVERED ORGANIZATION.—The term ‘cov-  
26 ered organization’ means an organization that—

1           “(A) is described in section 501(c)(3) of  
2           the Internal Revenue Code of 1986 and exempt  
3           from taxation under 501(a) of that Code; and

4           “(B) has an established record of con-  
5           structing, renovating, repairing, or making en-  
6           ergy efficient a total of not less than 250  
7           owner-occupied, single-family or multifamily  
8           homes per year for low-income households, ei-  
9           ther directly or through affiliates, chapters, or  
10          other direct partners (using the most recent  
11          year for which data are available).

12          “(2) LOW-INCOME.—The term ‘low-income’  
13          means an income level that is not more than 200  
14          percent of the poverty level (as determined in ac-  
15          cordance with criteria established by the Director of  
16          the Office of Management and Budget) applicable to  
17          a family of the size involved, except that the Sec-  
18          retary may establish a higher or lower level if the  
19          Secretary determines that a higher or lower level is  
20          necessary to carry out this section.

21          “(3) WEATHERIZATION ASSISTANCE PROGRAM  
22          FOR LOW-INCOME PERSONS.—The term ‘Weatheriza-  
23          tion Assistance Program for Low-Income Persons’  
24          means the program established under this part (in-

1 including part 440 of title 10, Code of Federal Regu-  
2 lations, or successor regulations).

3 “(c) COMPETITIVE GRANT PROGRAM.—The Sec-  
4 retary shall make grants to covered organizations through  
5 a national competitive process for use in accordance with  
6 this section.

7 “(d) AWARD FACTORS.—In making grants under this  
8 section, the Secretary shall consider—

9 “(1) the number of low-income homes the appli-  
10 cant—

11 “(A) has built, renovated, repaired, or  
12 made more energy efficient as of the date of the  
13 application; and

14 “(B) can reasonably be projected to build,  
15 renovate, repair, or make energy efficient dur-  
16 ing the 10-year period beginning on the date of  
17 the application;

18 “(2) the qualifications, experience, and past  
19 performance of the applicant, including experience  
20 successfully managing and administering Federal  
21 funds;

22 “(3) the number and diversity of States and cli-  
23 mates in which the applicant works as of the date  
24 of the application;

1           “(4) the amount of non-Federal funds, donated  
2 or discounted materials, discounted or volunteer  
3 skilled labor, volunteer unskilled labor, homeowner  
4 labor equity, and other resources the applicant will  
5 provide;

6           “(5) the extent to which the applicant could  
7 successfully replicate the energy retrofit program of  
8 the applicant and sustain the program after the  
9 grant funds have been expended;

10           “(6) regional diversity;

11           “(7) urban, suburban, and rural localities; and

12           “(8) such other factors as the Secretary deter-  
13 mines to be appropriate.

14           “(e) APPLICATIONS.—

15           “(1) IN GENERAL.—Not later than 180 days  
16 after the date of enactment of this section, the Sec-  
17 retary shall request proposals from covered organiza-  
18 tions.

19           “(2) ADMINISTRATION.—To be eligible to re-  
20 ceive a grant under this section, an applicant shall  
21 submit to the Secretary an application at such time,  
22 in such manner, and containing such information as  
23 the Secretary may require.

1           “(3) AWARDS.—Not later than 90 days after  
2           the date of issuance of a request for proposals, the  
3           Secretary shall award grants under this section.

4           “(f) ELIGIBLE USES OF GRANT FUNDS.—A grant  
5           under this section may be used for—

6           “(1) energy efficiency audits, cost-effective ret-  
7           rofit, and related activities in different climatic re-  
8           gions of the United States;

9           “(2) energy efficiency materials and supplies;

10          “(3) organizational capacity—

11           “(A) to significantly increase the number  
12          of energy retrofits;

13           “(B) to replicate an energy retrofit pro-  
14          gram in other States; and

15           “(C) to ensure that the program is self-  
16          sustaining after the Federal grant funds are ex-  
17          pended;

18          “(4) energy efficiency, audit and retrofit train-  
19          ing, and ongoing technical assistance;

20          “(5) information to homeowners on proper  
21          maintenance and energy savings behaviors;

22          “(6) quality control and improvement;

23          “(7) data collection, measurement, and  
24          verification;

1           “(8) program monitoring, oversight, evaluation,  
2           and reporting;

3           “(9) management and administration (up to a  
4           maximum of 10 percent of the total grant);

5           “(10) labor and training activities; and

6           “(11) such other activities as the Secretary de-  
7           termines to be appropriate.

8           “(g) MAXIMUM AMOUNT.—

9           “(1) IN GENERAL.—The amount of a grant  
10          provided under this section shall not exceed—

11           “(A) if the amount made available to carry  
12          out this section for a fiscal year is  
13          \$225,000,000 or more, \$5,000,000; and

14           “(B) if the amount made available to carry  
15          out this section for a fiscal year is less than  
16          \$225,000,000, \$1,500,000.

17          “(2) TECHNICAL AND TRAINING ASSISTANCE.—

18          The total amount of a grant provided under this sec-  
19          tion shall be reduced by the cost of any technical  
20          and training assistance provided by the Secretary  
21          that relates to the grant.

22          “(h) GUIDELINES.—

23           “(1) IN GENERAL.—Not later than 90 days  
24          after the date of enactment of this section, the Sec-

1       retary shall issue guidelines to implement the grant  
2       program established under this section.

3               “(2) ADMINISTRATION.—The guidelines—

4                       “(A) shall not apply to the Weatherization  
5                       Assistance Program for Low-Income Persons,  
6                       in whole or major part; but

7                       “(B) may rely on applicable provisions of  
8                       law governing the Weatherization Assistance  
9                       Program for Low-Income Persons to estab-  
10                      lish—

11                      “(i) standards for allowable expendi-  
12                      tures;

13                      “(ii) a minimum savings-to-investment  
14                      ratio;

15                      “(iii) standards—

16                               “(I) to carry out training pro-  
17                               grams;

18                               “(II) to conduct energy audits  
19                               and program activities;

20                               “(III) to provide technical assist-  
21                               ance;

22                               “(IV) to monitor program activi-  
23                               ties; and

24                               “(V) to verify energy and cost  
25                               savings;

1                   “(iv) liability insurance requirements;

2                   and

3                   “(v) recordkeeping requirements,

4                   which shall include reporting to the Office

5                   of Weatherization and Intergovernmental

6                   Programs of the Department of Energy

7                   applicable data on each home retrofitted.

8           “(i) REVIEW AND EVALUATION.—The Secretary shall

9 review and evaluate the performance of any covered orga-

10 nization that receives a grant under this section (which

11 may include an audit), as determined by the Secretary.

12           “(j) COMPLIANCE WITH STATE AND LOCAL LAW.—

13 Nothing in this section or any program carried out using

14 a grant provided under this section supersedes or other-

15 wise affects any State or local law, to the extent that the

16 State or local law contains a requirement that is more

17 stringent than the applicable requirement of this section.

18           “(k) ANNUAL REPORTS.—The Secretary shall submit

19 to Congress annual reports that provide—

20                   “(1) findings;

21                   “(2) a description of energy and cost savings

22                   achieved and actions taken under this section; and

23                   “(3) any recommendations for further action.

24           “(l) FUNDING.—Of the amount of funds that are

25 made available to carry out the Weatherization Assistance

1 Program for each of fiscal years 2016 through 2020 under  
2 section 422, the Secretary shall use to carry out this sec-  
3 tion for each of fiscal years 2016 through 2020 not less  
4 than—

5 “(1) 2 percent of the amount if the amount is  
6 less than \$225,000,000;

7 “(2) 5 percent of the amount if the amount is  
8 \$225,000,000 or more but less than \$260,000,000;  
9 and

10 “(3) 10 percent of the amount if the amount is  
11 \$260,000,000 or more.”.

12 (c) STANDARDS PROGRAM.—Section 415 of the En-  
13 ergy Conservation and Production Act (42 U.S.C. 6865)  
14 is amended by adding at the end the following:

15 “(f) STANDARDS PROGRAM.—

16 “(1) CONTRACTOR QUALIFICATION.—Effective  
17 beginning January 1, 2016, to be eligible to carry  
18 out weatherization using funds made available under  
19 this part, a contractor shall be selected through a  
20 competitive bidding process and be—

21 “(A) accredited by the Building Perform-  
22 ance Institute;

23 “(B) an Energy Smart Home Performance  
24 Team accredited under the Residential Energy  
25 Services Network; or

1           “(C) accredited by an equivalent accredita-  
2           tion or program accreditation-based State cer-  
3           tification program approved by the Secretary.

4           “(2) GRANTS FOR ENERGY RETROFIT MODEL  
5           PROGRAMS.—

6           “(A) IN GENERAL.—To be eligible to re-  
7           ceive a grant under section 414C, a covered or-  
8           ganization (as defined in section 414C(b)) shall  
9           use a crew chief who—

10           “(i) is certified or accredited in ac-  
11           cordance with paragraph (1); and

12           “(ii) supervises the work performed  
13           with grant funds.

14           “(B) VOLUNTEER LABOR.—A volunteer  
15           who performs work for a covered organization  
16           that receives a grant under section 414C shall  
17           not be required to be certified under this sub-  
18           section if the volunteer is not directly installing  
19           or repairing mechanical equipment or other  
20           items that require skilled labor.

21           “(C) TRAINING.—The Secretary shall use  
22           training and technical assistance funds available  
23           to the Secretary to assist covered organizations  
24           under section 414C in providing training to ob-

1           tain certification required under this subsection,  
2           including provisional or temporary certification.

3           “(3) MINIMUM EFFICIENCY STANDARDS.—Ef-  
4           fective beginning October 1, 2016, the Secretary  
5           shall ensure that—

6                   “(A) each retrofit for which weatherization  
7                   assistance is provided under this part meets  
8                   minimum efficiency and quality of work stand-  
9                   ards established by the Secretary after weather-  
10                  ization of a dwelling unit;

11                   “(B) at least 10 percent of the dwelling  
12                   units are randomly inspected by a third party  
13                   accredited under this subsection to ensure com-  
14                   pliance with the minimum efficiency and quality  
15                   of work standards established under subpara-  
16                   graph (A); and

17                   “(C) the standards established under this  
18                   subsection meet or exceed the industry stand-  
19                   ards for home performance work that are in ef-  
20                   fect on the date of enactment of this subsection,  
21                   as determined by the Secretary.”.

22 **SEC. 1013. REAUTHORIZATION OF STATE ENERGY PRO-**  
23 **GRAM.**

24           Section 365(f) of the Energy Policy and Conservation  
25 Act (42 U.S.C. 6325(f)) is amended by striking

1 “\$125,000,000 for each of fiscal years 2007 through  
2 2012” and inserting “\$90,000,000 for each of fiscal years  
3 2016 through 2020, of which not greater than 5 percent  
4 may be used to provide competitively awarded financial as-  
5 sistance”.

6 **SEC. 1014. SMART BUILDING ACCELERATION.**

7 (a) DEFINITIONS.—In this section:

8 (1) PROGRAM.—The term “program” means  
9 the Federal Smart Building Program established  
10 under subsection (b)(1).

11 (2) SMART BUILDING.—The term “smart build-  
12 ing” means a building, or collection of buildings,  
13 with an energy system that—

14 (A) is flexible and automated;

15 (B) has extensive operational monitoring  
16 and communication connectivity, allowing re-  
17 mote monitoring and analysis of all building  
18 functions;

19 (C) takes a systems-based approach in in-  
20 tegrating the overall building operations for  
21 control of energy generation, consumption, and  
22 storage;

23 (D) communicates with utilities and other  
24 third-party commercial entities, if appropriate;  
25 and

1 (E) is cybersecure.

2 (3) SMART BUILDING ACCELERATOR.—The  
3 term “smart building accelerator” means an initia-  
4 tive that is designed to demonstrate specific innova-  
5 tive policies and approaches—

6 (A) with clear goals and a clear timeline;  
7 and

8 (B) that, on successful demonstration,  
9 would accelerate investment in energy effi-  
10 ciency.

11 (b) FEDERAL SMART BUILDING PROGRAM.—

12 (1) ESTABLISHMENT.—Not later than 1 year  
13 after the date of enactment of this Act, the Sec-  
14 retary shall establish a program to be known as the  
15 “Federal Smart Building Program”—

16 (A) to implement smart building tech-  
17 nology; and

18 (B) to demonstrate the costs and benefits  
19 of smart buildings.

20 (2) SELECTION.—

21 (A) IN GENERAL.—The Secretary shall co-  
22 ordinate the selection of not fewer than 1 build-  
23 ing from among each of several key Federal  
24 agencies, as described in paragraph (4), to com-  
25 pose an appropriately diverse set of smart

1 buildings based on size, type, and geographic lo-  
2 cation.

3 (B) INCLUSION OF COMMERCIALY OPER-  
4 ATED BUILDINGS.—In making selections under  
5 subparagraph (A), the Secretary may include  
6 buildings that are owned by the Federal Gov-  
7 ernment but are commercially operated.

8 (3) TARGETS.—Not later than 18 months after  
9 the date of enactment of this Act, the Secretary  
10 shall establish targets for the number of smart  
11 buildings to be commissioned and evaluated by key  
12 Federal agencies by 3 years and 6 years after the  
13 date of enactment of this Act.

14 (4) FEDERAL AGENCY DESCRIBED.—The key  
15 Federal agencies referred to in this subsection shall  
16 include buildings operated by—

17 (A) the Department of the Army;

18 (B) the Department of the Navy;

19 (C) the Department of the Air Force;

20 (D) the Department;

21 (E) the Department of the Interior;

22 (F) the Department of Veterans Affairs;

23 and

24 (G) the General Services Administration.

1           (5) REQUIREMENT.—In implementing the pro-  
2           gram, the Secretary shall leverage existing financing  
3           mechanisms including energy savings performance  
4           contracts, utility energy service contracts, and an-  
5           nual appropriations.

6           (6) EVALUATION.—Using the guidelines of the  
7           Federal Energy Management Program relating to  
8           whole-building evaluation, measurement, and  
9           verification, the Secretary shall evaluate the costs  
10          and benefits of the buildings selected under para-  
11          graph (2), including an identification of—

12                   (A) which advanced building tech-  
13                   nologies—

14                           (i) are most cost-effective; and

15                           (ii) show the most promise for—

16                                   (I) increasing building energy  
17                                   savings;

18                                   (II) increasing service perform-  
19                                   ance to building occupants;

20                                   (III) reducing environmental im-  
21                                   pacts; and

22                                   (IV) establishing cybersecurity;

23                                   and

24                           (B) any other information the Secretary  
25                           determines to be appropriate.

1           (7) AWARDS.—The Secretary may expand  
2 awards made under the Federal Energy Manage-  
3 ment Program and the Better Building Challenge to  
4 recognize specific agency achievements in accel-  
5 erating the adoption of smart building technologies.

6           (c) SURVEY OF PRIVATE SECTOR SMART BUILD-  
7 INGS.—

8           (1) SURVEY.—The Secretary shall conduct a  
9 survey of privately owned smart buildings through-  
10 out the United States, including commercial build-  
11 ings, laboratory facilities, hospitals, multifamily resi-  
12 dential buildings, and buildings owned by nonprofit  
13 organizations and institutions of higher education.

14           (2) SELECTION.—From among the smart build-  
15 ings surveyed under paragraph (1), the Secretary  
16 shall select not fewer than 1 building each from an  
17 appropriate range of building sizes, types, and geo-  
18 graphic locations.

19           (3) EVALUATION.—Using the guidelines of the  
20 Federal Energy Management Program relating to  
21 whole-building evaluation, measurement, and  
22 verification, the Secretary shall evaluate the costs  
23 and benefits of the buildings selected under para-  
24 graph (2), including an identification of—

1 (A) which advanced building technologies  
2 and systems—

3 (i) are most cost-effective; and

4 (ii) show the most promise for—

5 (I) increasing building energy  
6 savings;

7 (II) increasing service perform-  
8 ance to building occupants;

9 (III) reducing environmental im-  
10 pacts; and

11 (IV) establishing cybersecurity;  
12 and

13 (B) any other information the Secretary  
14 determines to be appropriate.

15 (d) LEVERAGING EXISTING PROGRAMS.—

16 (1) BETTER BUILDING CHALLENGE.—As part  
17 of the Better Building Challenge of the Department,  
18 the Secretary, in consultation with major private  
19 sector property owners, shall develop smart building  
20 accelerators to demonstrate innovative policies and  
21 approaches that will accelerate the transition to  
22 smart buildings in the public, institutional, and com-  
23 mercial buildings sectors.

24 (2) RESEARCH AND DEVELOPMENT.—

1           (A) IN GENERAL.—The Secretary shall  
2           conduct research and development to address  
3           key barriers to the integration of advanced  
4           building technologies and to accelerate the tran-  
5           sition to smart buildings.

6           (B) INCLUSION.—The research and devel-  
7           opment conducted under subparagraph (A)  
8           shall include research and development on—

9                   (i) achieving whole-building, systems-  
10                  level efficiency through smart system and  
11                  component integration;

12                  (ii) improving physical components,  
13                  such as sensors and controls, to be adapt-  
14                  ive, anticipatory, and networked;

15                  (iii) reducing the cost of key compo-  
16                  nents to accelerate the adoption of smart  
17                  building technologies;

18                  (iv) data management, including the  
19                  capture and analysis of data and the inter-  
20                  operability of the energy systems;

21                  (v) protecting against cybersecurity  
22                  threats and addressing security  
23                  vulnerabilities of building systems or  
24                  equipment;

1 (vi) business models, including how  
2 business models may limit the adoption of  
3 smart building technologies and how to  
4 support transactive energy;

5 (vii) integration and application of  
6 combined heat and power systems and en-  
7 ergy storage for resiliency;

8 (viii) characterization of buildings and  
9 components;

10 (ix) consumer and utility protections;

11 (x) continuous management, including  
12 the challenges of managing multiple energy  
13 systems and optimizing systems for dis-  
14 parate stakeholders; and

15 (xi) other areas of research and devel-  
16 opment, as determined appropriate by the  
17 Secretary.

18 (e) REPORT.—Not later than 2 years after the date  
19 of enactment of this Act, and every 2 years thereafter until  
20 a total of 3 reports have been made, the Secretary shall  
21 submit to the Committee on Energy and Natural Re-  
22 sources of the Senate and the Committee on Energy and  
23 Commerce of the House of Representatives a report on—

1           (1) the establishment of the Federal Smart  
2           Building Program and the evaluation of Federal  
3           smart buildings under subsection (b);

4           (2) the survey and evaluation of private sector  
5           smart buildings under subsection (c); and

6           (3) any recommendations of the Secretary to  
7           further accelerate the transition to smart buildings.

8   **SEC. 1015. REPEAL OF FOSSIL PHASE-OUT.**

9           Section 305(a)(3) of the Energy Conservation and  
10          Production Act (42 U.S.C. 6834(a)(3)) is amended by  
11          striking subparagraph (D).

12   **SEC. 1016. FEDERAL BUILDING ENERGY EFFICIENCY PER-**  
13                           **FORMANCE STANDARDS.**

14          (a) DEFINITIONS.—Section 303 of the Energy Con-  
15          servation and Production Act (42 U.S.C. 6832) (as  
16          amended by section 1001(a)) is amended—

17               (1) in paragraph (6), by striking “to be con-  
18               structed” and inserting “constructed or altered”;

19               and

20               (2) by adding at the end the following:

21                   “(19) MAJOR RENOVATION.—The term ‘major  
22                   renovation’ means a modification of building energy  
23                   systems sufficiently extensive that the whole building  
24                   can meet energy standards for new buildings, based

1 on criteria to be established by the Secretary  
2 through notice and comment rulemaking.”.

3 (b) FEDERAL BUILDING EFFICIENCY STANDARDS.—

4 Section 305(a)(3) of the Energy Conservation and Pro-  
5 duction Act (42 U.S.C. 6834(a)(3)) (as amended by sec-  
6 tion 1015) is amended—

7 (1) by striking “(3)(A) Not later than” and all  
8 that follows through subparagraph (B) and inserting  
9 the following:

10 “(3) REVISED FEDERAL BUILDING ENERGY EF-  
11 FICIENCY PERFORMANCE STANDARDS.—

12 “(A) REVISED FEDERAL BUILDING EN-  
13 ERGY EFFICIENCY PERFORMANCE STAND-  
14 ARDS.—

15 “(i) IN GENERAL.—Not later than 1  
16 year after the date of enactment of the En-  
17 ergy Policy Modernization Act of 2015, the  
18 Secretary shall establish, by rule, revised  
19 Federal building energy efficiency perform-  
20 ance standards that require that—

21 “(I) new Federal buildings and  
22 alterations and additions to existing  
23 Federal buildings—

24 “(aa) meet or exceed the  
25 most recent revision of the Inter-

1 national Energy Conservation  
2 Code (in the case of residential  
3 buildings) or ASHRAE Standard  
4 90.1 (in the case of commercial  
5 buildings) as of the date of en-  
6 actment of the Energy Policy  
7 Modernization Act of 2015; and

8 “(bb) meet or exceed the en-  
9 ergy provisions of State and local  
10 building codes applicable to the  
11 building, if the codes are more  
12 stringent than the International  
13 Energy Conservation Code or  
14 ASHRAE Standard 90.1, as ap-  
15 plicable;

16 “(II) unless demonstrated not to  
17 be life-cycle cost effective for new  
18 Federal buildings and Federal build-  
19 ings with major renovations—

20 “(aa) the buildings be de-  
21 signed to achieve energy con-  
22 sumption levels that are at least  
23 30 percent below the levels estab-  
24 lished in the version of the  
25 ASHRAE Standard or the Inter-

1 national Energy Conservation  
2 Code, as appropriate, that is ap-  
3 plied under subelause (I)(aa), in-  
4 cluding updates under subpara-  
5 graph (B); and

6 “(bb) sustainable design  
7 principles are applied to the loca-  
8 tion, siting, design, and construc-  
9 tion of all new Federal buildings  
10 and replacement Federal build-  
11 ings;

12 “(III) if water is used to achieve  
13 energy efficiency, water conservation  
14 technologies shall be applied to the ex-  
15 tent that the technologies are life-  
16 cycle cost effective; and

17 “(IV) if life-cycle cost effective,  
18 as compared to other reasonably avail-  
19 able technologies, not less than 30  
20 percent of the hot water demand for  
21 each new Federal building or Federal  
22 building undergoing a major renova-  
23 tion be met through the installation  
24 and use of solar hot water heaters.

1                   “(ii) LIMITATION.—Clause (i)(I) shall  
2                   not apply to unaltered portions of existing  
3                   Federal buildings and systems that have  
4                   been added to or altered.

5                   “(B) UPDATES.—Not later than 1 year  
6                   after the date of approval of each subsequent  
7                   revision of the ASHRAE Standard or the Inter-  
8                   national Energy Conservation Code, as appro-  
9                   priate, the Secretary shall determine whether  
10                  the revised standards established under sub-  
11                  paragraph (A) should be updated to reflect the  
12                  revisions, based on the energy savings and life-  
13                  cycle cost-effectiveness of the revisions.”; and

14                  (2) in subparagraph (C), by striking “(C) In  
15                  the budget request” and inserting the following:

16                         “(C) BUDGET REQUEST.—In the budget  
17                         request”.

18 **SEC. 1017. CODIFICATION OF EXECUTIVE ORDER.**

19                  Beginning in fiscal year 2016 and each fiscal year  
20                  thereafter through fiscal year 2025, the head of each Fed-  
21                  eral agency shall, unless otherwise specified and where  
22                  life-cycle cost-effective, promote building energy conserva-  
23                  tion, efficiency, and management by reducing, in Federal  
24                  buildings of the agency, building energy intensity, as  
25                  measured in British thermal units per gross square foot,

1 by 2.5 percent each fiscal year, relative to the baseline  
2 of the building energy use of the applicable Federal build-  
3 ings in fiscal year 2015 and after taking into account the  
4 progress of the Federal agency in preceding fiscal years.

5 **SEC. 1018. CERTIFICATION FOR GREEN BUILDINGS.**

6 Section 305 of the Energy Conservation and Produc-  
7 tion Act (42 U.S.C. 6834) (as amended by sections 1015  
8 and 1016(b)) is amended—

9 (1) in subsection (a)(3), by adding at the end  
10 the following:

11 “(D) CERTIFICATION FOR GREEN BUILD-  
12 INGS.—

13 “(i) SUSTAINABLE DESIGN PRIN-  
14 CIPLES.—Sustainable design principles  
15 shall be applied to the siting, design, and  
16 construction of buildings covered by this  
17 subparagraph.

18 “(ii) SELECTION OF CERTIFICATION  
19 SYSTEMS.—The Secretary, after reviewing  
20 the findings of the Federal Director under  
21 section 436(h) of the Energy Independence  
22 and Security Act of 2007 (42 U.S.C.  
23 17092(h)), in consultation with the Admin-  
24 istrator of General Services, and in con-  
25 sultation with the Secretary of Defense re-

1           lating to those facilities under the custody  
2           and control of the Department of Defense,  
3           shall determine those certification systems  
4           for green commercial and residential build-  
5           ings that the Secretary determines to be  
6           the most likely to encourage a comprehen-  
7           sive and environmentally sound approach  
8           to certification of green buildings.

9           “(iii) BASIS FOR SELECTION.—The  
10          determination of the certification systems  
11          under clause (ii) shall be based on ongoing  
12          review of the findings of the Federal Direc-  
13          tor under section 436(h) of the Energy  
14          Independence and Security Act of 2007  
15          (42 U.S.C. 17092(h)) and the criteria de-  
16          scribed in clause (v).

17          “(iv) ADMINISTRATION.—In deter-  
18          mining certification systems under this  
19          subparagraph, the Secretary shall—

20                 “(I) make a separate determina-  
21                 tion for all or part of each system;

22                 “(II) confirm that the criteria  
23                 used to support the selection of build-  
24                 ing products, materials, brands, and  
25                 technologies—

1                   “(aa) are fair and neutral  
2                   (meaning that the criteria are  
3                   based on an objective assessment  
4                   of relevant technical data);

5                   “(bb) do not prohibit, dis-  
6                   favor, or discriminate against se-  
7                   lection based on technically inad-  
8                   equate information to inform  
9                   human or environmental risk;  
10                  and

11                  “(cc) are expressed to prefer  
12                  performance measures whenever  
13                  performance measures may rea-  
14                  sonably be used in lieu of pre-  
15                  scriptive measures; and

16                  “(III) use environmental and  
17                  health criteria that are based on risk  
18                  assessment methodology that is gen-  
19                  erally accepted by the applicable sci-  
20                  entific disciplines.

21                  “(v) CONSIDERATIONS.—In deter-  
22                  mining the green building certification sys-  
23                  tems under this subparagraph, the Sec-  
24                  retary shall take into consideration—

1                   “(I) the ability and availability of  
2 assessors and auditors to independ-  
3 ently verify the criteria and measure-  
4 ment of metrics at the scale necessary  
5 to implement this subparagraph;

6                   “(II) the ability of the applicable  
7 certification organization to collect  
8 and reflect public comment;

9                   “(III) the ability of the standard  
10 to be developed and revised through a  
11 consensus-based process;

12                   “(IV) an evaluation of the  
13 robustness of the criteria for a high-  
14 performance green building, which  
15 shall give credit for promoting—

16                   “(aa) efficient and sustain-  
17 able use of water, energy, and  
18 other natural resources;

19                   “(bb) the use of renewable  
20 energy sources;

21                   “(cc) improved indoor envi-  
22 ronmental quality through en-  
23 hanced indoor air quality, ther-  
24 mal comfort, acoustics, day light-  
25 ing, pollutant source control, and

1 use of low-emission materials and  
2 building system controls; and

3 “(dd) such other criteria as  
4 the Secretary determines to be  
5 appropriate; and

6 “(V) national recognition within  
7 the building industry.

8 “(vi) REVIEW.—The Secretary, in  
9 consultation with the Administrator of  
10 General Services and the Secretary of De-  
11 fense, shall conduct an ongoing review to  
12 evaluate and compare private sector green  
13 building certification systems, taking into  
14 account—

15 “(I) the criteria described in  
16 clause (v); and

17 “(II) the identification made by  
18 the Federal Director under section  
19 436(h) of the Energy Independence  
20 and Security Act of 2007 (42 U.S.C.  
21 17092(h)).

22 “(vii) EXCLUSIONS.—

23 “(I) IN GENERAL.—Subject to  
24 subclause (II), if a certification sys-  
25 tem fails to meet the review require-

1                   ments of clause (v), the Secretary  
2 shall—

3                   “(aa) identify the portions  
4                   of the system, whether pre-  
5                   requisites, credits, points, or oth-  
6                   erwise, that meet the review cri-  
7                   teria of clause (v);

8                   “(bb) determine the portions  
9                   of the system that are suitable  
10                  for use; and

11                  “(cc) exclude all other por-  
12                  tions of the system from identi-  
13                  fication and use.

14                  “(II) ENTIRE SYSTEMS.—The  
15                  Secretary shall exclude an entire sys-  
16                  tem from use if an exclusion under  
17                  subclause (I)—

18                  “(aa) impedes the integrated  
19                  use of the system;

20                  “(bb) creates disparate re-  
21                  view criteria or unequal point ac-  
22                  cess for competing materials; or

23                  “(cc) increases agency costs  
24                  of the use.

1                   “(viii) INTERNAL CERTIFICATION  
2 PROCESSES.—The Secretary may by rule  
3 allow Federal agencies to develop internal  
4 certification processes, using certified pro-  
5 fessionals, in lieu of certification by certifi-  
6 cation entities identified under clause (ii).

7                   “(ix) PRIVATIZED MILITARY HOUS-  
8 ING.—With respect to privatized military  
9 housing, the Secretary of Defense, after  
10 consultation with the Secretary may,  
11 through rulemaking, develop alternative  
12 certification systems and levels than the  
13 systems and levels identified under clause  
14 (ii) that achieve an equivalent result in  
15 terms of energy savings, sustainable de-  
16 sign, and green building performance.

17                   “(x) WATER CONSERVATION TECH-  
18 NOLOGIES.—In addition to any use of  
19 water conservation technologies otherwise  
20 required by this section, water conservation  
21 technologies shall be applied to the extent  
22 that the technologies are life-cycle cost-ef-  
23 fective.

24                   “(xi) EFFECTIVE DATE.—

1                   “(I) DETERMINATIONS MADE  
2 AFTER DECEMBER 31, 2015.—This  
3 subparagraph shall apply to any de-  
4 termination made by a Federal agency  
5 after December 31, 2015.

6                   “(II) DETERMINATIONS MADE ON  
7 OR BEFORE DECEMBER 31, 2015.—  
8 This subparagraph (as in effect on the  
9 day before the date of enactment of  
10 the Energy Policy Modernization Act  
11 of 2015) shall apply to any use of a  
12 certification system for green commer-  
13 cial and residential buildings by a  
14 Federal agency on or before December  
15 31, 2015.”; and

16                   (2) by striking subsections (c) and (d) and in-  
17 serting the following:

18                   “(c) PERIODIC REVIEW.—The Secretary shall—

19                   “(1) once every 5 years, review the Federal  
20 building energy standards established under this sec-  
21 tion; and

22                   “(2) on completion of a review under paragraph  
23 (1), if the Secretary determines that significant en-  
24 ergy savings would result, upgrade the standards to  
25 include all new energy efficiency and renewable en-

1 energy measures that are technologically feasible and  
2 economically justified.”.

3 **SEC. 1019. HIGH PERFORMANCE GREEN FEDERAL BUILD-**  
4 **INGS.**

5 Section 436(h) of the Energy Independence and Se-  
6 curity Act of 2007 (42 U.S.C. 17092(h)) is amended—

7 (1) in the subsection heading, by striking “SYS-  
8 TEM” and inserting “SYSTEMS”;

9 (2) by striking paragraph (1) and inserting the  
10 following:

11 “(1) IN GENERAL.—Based on an ongoing re-  
12 view, the Federal Director shall identify and shall  
13 provide to the Secretary pursuant to section  
14 305(a)(3)(D) of the Energy Conservation and Pro-  
15 duction Act (42 U.S.C. 6834(a)(3)(D)), a list of  
16 those certification systems that the Director identi-  
17 fies as the most likely to encourage a comprehensive  
18 and environmentally sound approach to certification  
19 of green buildings.”; and

20 (3) in paragraph (2)—

21 (A) in the matter preceding subparagraph  
22 (A), by striking “system” and inserting “sys-  
23 tems”;

24 (B) by striking subparagraph (A) and in-  
25 serting the following:

1           “(A) an ongoing review provided to the  
2 Secretary pursuant to section 305(a)(3)(D) of  
3 the Energy Conservation and Production Act  
4 (42 U.S.C. 6834(a)(3)(D)), which shall—

5           “(i) be carried out by the Federal Di-  
6 rector to compare and evaluate standards;  
7 and

8           “(ii) allow any developer or adminis-  
9 trator of a rating system or certification  
10 system to be included in the review;”;

11           (C) in subparagraph (E)(v), by striking  
12 “and” after the semicolon at the end;

13           (D) in subparagraph (F), by striking the  
14 period at the end and inserting a semicolon;  
15 and

16           (E) by adding at the end the following:

17           “(G) a finding that, for all credits address-  
18 ing grown, harvested, or mined materials, the  
19 system does not discriminate against the use of  
20 domestic products that have obtained certifi-  
21 cations of responsible sourcing; and

22           “(H) a finding that the system incor-  
23 porates life-cycle assessment as a credit path-  
24 way.”.

1 **SEC. 1020. EVALUATION OF POTENTIALLY DUPLICATIVE**  
2 **GREEN BUILDING PROGRAMS WITHIN DE-**  
3 **PARTMENT OF ENERGY.**

4 (a) DEFINITIONS.—In this section:

5 (1) ADMINISTRATIVE EXPENSES.—

6 (A) IN GENERAL.—The term “administra-  
7 tive expenses” has the meaning given the term  
8 by the Director of the Office of Management  
9 and Budget under section 504(b)(2) of the En-  
10 ergy and Water Development and Related  
11 Agencies Appropriations Act, 2010 (31 U.S.C.  
12 1105 note; Public Law 111–85).

13 (B) INCLUSIONS.—The term “administra-  
14 tive expenses” includes, with respect to an  
15 agency—

16 (i) costs incurred by—

17 (I) the agency; or

18 (II) any grantee, subgrantee, or  
19 other recipient of funds from a grant  
20 program or other program adminis-  
21 tered by the agency; and

22 (ii) expenses relating to personnel sal-  
23 aries and benefits, property management,  
24 travel, program management, promotion,  
25 reviews and audits, case management, and  
26 communication regarding, promotion of,

1           and outreach for programs and program  
2           activities administered by the agency.

3           (2) APPLICABLE PROGRAM.—The term “appli-  
4           cable program” means any program that is—

5                   (A) listed in Table 9 (pages 348–350) of  
6           the report of the Government Accountability  
7           Office entitled “2012 Annual Report: Opportu-  
8           nities to Reduce Duplication, Overlap and  
9           Fragmentation, Achieve Savings, and Enhance  
10          Revenue”; and

11                   (B) administered by the Secretary.

12          (3) SERVICE.—

13                   (A) IN GENERAL.—Subject to subpara-  
14          graph (B), the term “service” has the meaning  
15          given the term by the Director of the Office of  
16          Management and Budget.

17                   (B) REQUIREMENTS.—For purposes of  
18          subparagraph (A), the term “service” shall be  
19          limited to activities, assistance, or other aid  
20          that provides a direct benefit to a recipient,  
21          such as—

22                           (i) the provision of technical assist-  
23                           ance;

24                           (ii) assistance for housing or tuition;

25                           or

1                   (iii) financial support (including  
2                   grants, loans, tax credits, and tax deduc-  
3                   tions).

4       (b) REPORT.—

5           (1) IN GENERAL.—Not later than January 1,  
6       2016, the Secretary shall submit to Congress and  
7       make available on the public Internet website of the  
8       Department a report that describes the applicable  
9       programs.

10          (2) REQUIREMENTS.—In preparing the report  
11       under paragraph (1), the Secretary shall—

12               (A) determine the approximate annual  
13               total administrative expenses of each applicable  
14               program;

15               (B) determine the approximate annual ex-  
16               penditures for services for each applicable pro-  
17               gram;

18               (C) describe the intended market for each  
19               applicable program, including the—

20                       (i) estimated the number of clients  
21                       served by each applicable program; and

22                       (ii) beneficiaries who received services  
23                       or information under the applicable pro-  
24                       gram (if applicable and if data is readily  
25                       available);

1 (D) estimate—

2 (i) the number of full-time employees  
3 who administer each applicable program;  
4 and

5 (ii) the number of full-time equiva-  
6 lents (the salary of whom is paid in part  
7 or full by the Federal Government through  
8 a grant or contract, a subaward of a grant  
9 or contract, a cooperative agreement, or  
10 another form of financial award or assist-  
11 ance) who assist in administering the ap-  
12 plicable program;

13 (E) briefly describe the type of services  
14 each applicable program provides, such as infor-  
15 mation, grants, technical assistance, loans, tax  
16 credits, or tax deductions;

17 (F) identify the type of recipient who is in-  
18 tended to benefit from the services or informa-  
19 tion provided under the applicable program,  
20 such as individual property owners or renters,  
21 local governments, businesses, nonprofit organi-  
22 zations, or State governments; and

23 (G) identify whether written program goals  
24 are available for each applicable program.

1 (c) RECOMMENDATIONS.—Not later than January 1,  
2 2016, the Secretary shall submit to Congress a report that  
3 includes—

4 (1) a recommendation of whether any applicable  
5 program should be eliminated or consolidated, in-  
6 cluding any legislative changes that would be nec-  
7 essary to eliminate or consolidate applicable pro-  
8 grams; and

9 (2) methods to improve the applicable programs  
10 by establishing program goals or increasing collabo-  
11 ration to reduce any potential overlap or duplication,  
12 taking into account—

13 (A) the 2011 report of the Government Ac-  
14 countability Office entitled “Federal Initiatives  
15 for the NonFederal Sector Could Benefit from  
16 More Interagency Collaboration”; and

17 (B) the report of the Government Account-  
18 ability Office entitled “2012 Annual Report:  
19 Opportunities to Reduce Duplication, Overlap  
20 and Fragmentation, Achieve Savings, and En-  
21 hance Revenue”.

22 (d) ANALYSES.—Not later than January 1, 2016, the  
23 Secretary shall identify—

24 (1) which applicable programs were specifically  
25 authorized by Congress; and

1           (2) which applicable programs are carried out  
2           solely under the discretionary authority of the Sec-  
3           retary.

4 **SEC. 1021. STUDY AND REPORT ON ENERGY SAVINGS BENE-**  
5 **FITS OF OPERATIONAL EFFICIENCY PRO-**  
6 **GRAMS AND SERVICES.**

7           (a) DEFINITION OF OPERATIONAL EFFICIENCY PRO-  
8 GRAMS AND SERVICES.—In this section, the term “oper-  
9 ational efficiency programs and services” means programs  
10 and services that use information and communications  
11 technologies (including computer hardware, energy effi-  
12 ciency software, and power management tools) to operate  
13 buildings and equipment in the optimum manner at the  
14 optimum times.

15           (b) STUDY AND REPORT.—Not later than 1 year  
16 after the date of enactment of this Act, the Secretary shall  
17 conduct a study and issue a report that quantifies the po-  
18 tential energy savings of operational efficiency programs  
19 and services for commercial, institutional, industrial, and  
20 governmental entities, including Federal agencies.

21           (c) MEASUREMENT AND VERIFICATION OF ENERGY  
22 SAVINGS.—The report required under this section shall in-  
23 clude potential methodologies or protocols for utilities,  
24 utility regulators, and Federal agencies to evaluate, meas-

1 ure, and verify energy savings from operational efficiency  
2 programs and services.

### 3 **Subtitle B—Appliances**

#### 4 **SEC. 1101. EXTENDED PRODUCT SYSTEM REBATE PRO-** 5 **GRAM.**

6 (a) DEFINITIONS.—In this section:

7 (1) ELECTRIC MOTOR.—The term “electric  
8 motor” has the meaning given the term in section  
9 431.12 of title 10, Code of Federal Regulations (as  
10 in effect on the date of enactment of this Act).

11 (2) ELECTRONIC CONTROL.—The term “elec-  
12 tronic control” means—

13 (A) a power converter; or

14 (B) a combination of a power circuit and  
15 control circuit included on 1 chassis.

16 (3) EXTENDED PRODUCT SYSTEM.—The term  
17 “extended product system” means an electric motor  
18 and any required associated electronic control and  
19 driven load that—

20 (A) offers variable speed or multispeed op-  
21 eration;

22 (B) offers partial load control that reduces  
23 input energy requirements (as measured in kilo-  
24 watt-hours) as compared to identified base lev-  
25 els set by the Secretary; and

1 (C)(i) has greater than 1 horsepower; and

2 (ii) uses an extended product system tech-

3 nology, as determined by the Secretary.

4 (4) QUALIFIED EXTENDED PRODUCT SYS-

5 TEM.—

6 (A) IN GENERAL.—The term “qualified ex-

7 tended product system” means an extended

8 product system that—

9 (i) includes an electric motor and an

10 electronic control; and

11 (ii) reduces the input energy (as

12 measured in kilowatt-hours) required to

13 operate the extended product system by

14 not less than 5 percent, as compared to

15 identified base levels set by the Secretary.

16 (B) INCLUSIONS.—The term “qualified ex-

17 tended product system” includes commercial or

18 industrial machinery or equipment that—

19 (i)(I) did not previously make use of

20 the extended product system prior to the

21 redesign described in subclause (II); and

22 (II) incorporates an extended product

23 system that has greater than 1 horsepower

24 into redesigned machinery or equipment;

25 and

1                   (ii) was previously used prior to, and  
2                   was placed back into service during, cal-  
3                   endar year 2016 or 2017.

4           (b) ESTABLISHMENT.—Not later than 180 days after  
5 the date of enactment of this Act, the Secretary shall es-  
6 tablish a program to provide rebates for expenditures  
7 made by qualified entities for the purchase or installation  
8 of a qualified extended product system.

9           (c) QUALIFIED ENTITIES.—

10           (1) ELIGIBILITY REQUIREMENTS.—A qualified  
11 entity under this section shall be—

12                   (A) in the case of a qualified extended  
13 product system described in subsection  
14 (a)(4)(A), the purchaser of the qualified ex-  
15 tended product that is installed; and

16                   (B) in the case of a qualified extended  
17 product system described in subsection  
18 (a)(4)(B), the manufacturer of the commercial  
19 or industrial machinery or equipment that in-  
20 corporated the extended product system into  
21 that machinery or equipment.

22           (2) APPLICATION.—To be eligible to receive a  
23 rebate under this section, a qualified entity shall  
24 submit to the Secretary—

1 (A) an application in such form, at such  
2 time, and containing such information as the  
3 Secretary may require; and

4 (B) a certification that includes dem-  
5 onstrated evidence—

6 (i) that the entity is a qualified entity;

7 and

8 (ii)(I) in the case of a qualified entity  
9 described in paragraph (1)(A)—

10 (aa) that the qualified entity in-  
11 stalled the qualified extended product  
12 system during the 2 fiscal years fol-  
13 lowing the date of enactment of this  
14 Act;

15 (bb) that the qualified extended  
16 product system meets the require-  
17 ments of subsection (a)(4)(A); and

18 (cc) showing the serial number,  
19 manufacturer, and model number  
20 from the nameplate of the installed  
21 motor of the qualified entity on which  
22 the qualified extended product system  
23 was installed; or

1 (II) in the case of a qualified entity  
2 described in paragraph (1)(B), dem-  
3 onstrated evidence—

4 (aa) that the qualified extended  
5 product system meets the require-  
6 ments of subsection (a)(4)(B); and

7 (bb) showing the serial number,  
8 manufacturer, and model number  
9 from the nameplate of the installed  
10 motor of the qualified entity with  
11 which the extended product system is  
12 integrated.

13 (d) AUTHORIZED AMOUNT OF REBATE.—

14 (1) IN GENERAL.—The Secretary may provide  
15 to a qualified entity a rebate in an amount equal to  
16 the product obtained by multiplying—

17 (A) an amount equal to the sum of the  
18 nameplate rated horsepower of—

19 (i) the electric motor to which the  
20 qualified extended product system is at-  
21 tached; and

22 (ii) the electronic control; and

23 (B) \$25.

24 (2) MAXIMUM AGGREGATE AMOUNT.—A quali-  
25 fied entity shall not be entitled to aggregate rebates

1 under this section in excess of \$25,000 per calendar  
2 year.

3 (e) AUTHORIZATION OF APPROPRIATIONS.—There is  
4 authorized to be appropriated to carry out this section  
5 \$5,000,000 for each of the first 2 full fiscal years following  
6 the date of enactment of this Act, to remain available until  
7 expended.

8 **SEC. 1102. ENERGY EFFICIENT TRANSFORMER REBATE**  
9 **PROGRAM.**

10 (a) DEFINITIONS.—In this section:

11 (1) QUALIFIED ENERGY EFFICIENT TRANS-  
12 FORMER.—The term “qualified energy efficient  
13 transformer” means a transformer that meets or ex-  
14 ceeds the applicable energy conservation standards  
15 described in the tables in subsection (b)(2) and  
16 paragraphs (1) and (2) of subsection (c) of section  
17 431.196 of title 10, Code of Federal Regulations (as  
18 in effect on the date of enactment of this Act).

19 (2) QUALIFIED ENERGY INEFFICIENT TRANS-  
20 FORMER.—The term “qualified energy inefficient  
21 transformer” means a transformer with an equal  
22 number of phases and capacity to a transformer de-  
23 scribed in any of the tables in subsection (b)(2) and  
24 paragraphs (1) and (2) of subsection (c) of section  
25 431.196 of title 10, Code of Federal Regulations (as

1 in effect on the date of enactment of this Act)  
2 that—

3 (A) does not meet or exceed the applicable  
4 energy conservation standards described in  
5 paragraph (1); and

6 (B)(i) was manufactured between January  
7 1, 1985, and December 31, 2006, for a trans-  
8 former with an equal number of phases and ca-  
9 pacity as a transformer described in the table  
10 in subsection (b)(2) of section 431.196 of title  
11 10, Code of Federal Regulations (as in effect on  
12 the date of enactment of this Act); or

13 (ii) was manufactured between January 1,  
14 1990, and December 31, 2009, for a trans-  
15 former with an equal number of phases and ca-  
16 pacity as a transformer described in the table  
17 in paragraph (1) or (2) of subsection (c) of that  
18 section (as in effect on the date of enactment  
19 of this Act).

20 (3) QUALIFIED ENTITY.—The term “qualified  
21 entity” means an owner of industrial or manufac-  
22 turing facilities, commercial buildings, or multifamily  
23 residential buildings, a utility, or an energy service  
24 company that fulfills the requirements of subsection  
25 (d).

1           (b) ESTABLISHMENT.—Not later than 90 days after  
2 the date of enactment of this Act, the Secretary shall es-  
3 tablish a program to provide rebates to qualified entities  
4 for expenditures made by the qualified entity for the re-  
5 placement of a qualified energy inefficient transformer  
6 with a qualified energy efficient transformer.

7           (c) REQUIREMENTS.—To be eligible to receive a re-  
8 bate under this section, an entity shall submit to the Sec-  
9 retary an application in such form, at such time, and con-  
10 taining such information as the Secretary may require, in-  
11 cluding demonstrated evidence—

12                   (1) that the entity purchased a qualified energy  
13           efficient transformer;

14                   (2) of the core loss value of the qualified energy  
15           efficient transformer;

16                   (3) of the age of the qualified energy inefficient  
17           transformer being replaced;

18                   (4) of the core loss value of the qualified energy  
19           inefficient transformer being replaced—

20                           (A) as measured by a qualified professional  
21                           or verified by the equipment manufacturer, as  
22                           applicable; or

23                           (B) for transformers described in sub-  
24                           section (a)(2)(B)(i), as selected from a table of

1           default values as determined by the Secretary  
2           in consultation with applicable industry; and

3           (5) that the qualified energy inefficient trans-  
4           former has been permanently decommissioned and  
5           scrapped.

6           (d) AUTHORIZED AMOUNT OF REBATE.—The  
7           amount of a rebate provided under this section shall be—

8           (1) for a 3-phase or single-phase transformer  
9           with a capacity of not less than 10 and not greater  
10          than 2,500 kilovolt-amperes, twice the amount equal  
11          to the difference in Watts between the core loss  
12          value (as measured in accordance with paragraphs  
13          (2) and (4) of subsection (c)) of—

14                 (A) the qualified energy inefficient trans-  
15                 former; and

16                 (B) the qualified energy efficient trans-  
17                 former; or

18           (2) for a transformer described in subsection  
19           (a)(2)(B)(i), the amount determined using a table of  
20           default rebate values by rated transformer output,  
21           as measured in kilovolt-amperes, as determined by  
22           the Secretary in consultation with applicable indus-  
23           try.

24           (e) AUTHORIZATION OF APPROPRIATIONS.—There is  
25           authorized to be appropriated to carry out this section

1 \$5,000,000 for each of fiscal years 2016 and 2017, to re-  
2 main available until expended.

3 (f) TERMINATION OF EFFECTIVENESS.—The author-  
4 ity provided by this section terminates on December 31,  
5 2017.

6 **SEC. 1103. STANDARDS FOR CERTAIN FURNACES.**

7 Section 325(f)(4) of the Energy Policy and Conserva-  
8 tion Act (42 U.S.C. 6295(f)(4)) is amended by adding at  
9 the end the following:

10 “(E) RESTRICTION ON FINAL RULE FOR  
11 RESIDENTIAL NON-WEATHERIZED GAS FUR-  
12 NACES AND MOBILE HOME FURNACES.—

13 “(i) IN GENERAL.—Notwithstanding  
14 any other provision of this Act, the Sec-  
15 retary shall not prescribe a final rule  
16 amending the efficiency standards for resi-  
17 dential non-weatherized gas furnaces or  
18 mobile home furnaces until each of the fol-  
19 lowing has occurred:

20 “(I) The Secretary convenes a  
21 representative advisory group of inter-  
22 ested stakeholders, including the man-  
23 ufacturers, distributors, and contrac-  
24 tors of residential non-weatherized gas  
25 furnaces and mobile home furnaces,

1 home builders, building owners, en-  
2 ergy efficiency advocates, natural gas  
3 utilities, electric utilities, and con-  
4 sumer groups.

5 “(II) Not later than 1 year after  
6 the date of enactment of this subpara-  
7 graph, the advisory group described in  
8 subclause (I) completes an analysis of  
9 a nationwide requirement of a con-  
10 densing furnace efficiency standard  
11 including—

12 “(aa) a complete analysis of  
13 current market trends regarding  
14 the transition of sales from non-  
15 condensing furnaces to con-  
16 densing furnaces;

17 “(bb) the projected net loss  
18 in the industry of the present  
19 value of original equipment man-  
20 ufactured after adoption of the  
21 standard;

22 “(cc) the projected consumer  
23 payback period and life cycle cost  
24 savings after adoption of the  
25 standard;

1                   “(dd) a determination of  
2                   whether the standard is economi-  
3                   cally justified, based solely on the  
4                   definition of energy under section  
5                   321; and

6                   “(ee) other common eco-  
7                   nomic principles.

8                   “(III) The advisory group de-  
9                   scribed in subclause (I) reviews the  
10                  analysis and determines whether a na-  
11                  tionwide requirement of a condensing  
12                  furnace efficiency standard is tech-  
13                  nically feasible and economically justi-  
14                  fied.

15                  “(IV) The final determination of  
16                  the advisory group under subclause  
17                  (III) is published in the Federal Reg-  
18                  ister.

19                  “(ii) AMENDED STANDARDS.—If the  
20                  advisory group determines under clause  
21                  (i)(III) that a nationwide requirement of a  
22                  condensing furnace efficiency standard is  
23                  not technically feasible and economically  
24                  justified, the Secretary shall, not later than  
25                  180 days after the date on which the final

1 determination of the advisory group is pub-  
2 lished in the Federal Register under clause  
3 (i)(IV), establish amended standards  
4 through the negotiated rulemaking proce-  
5 dure provided for under subchapter III of  
6 chapter 5 of title 5, United States Code  
7 (commonly known as the ‘Negotiated Rule-  
8 making Act of 1990’).”

9 **SEC. 1104. THIRD-PARTY CERTIFICATION UNDER ENERGY**  
10 **STAR PROGRAM.**

11 Section 324A of the Energy Policy and Conservation  
12 Act (42 U.S.C. 6294a) is amended by adding at the end  
13 the following:

14 “(e) **THIRD-PARTY CERTIFICATION.**—

15 “(1) **IN GENERAL.**—Subject to paragraph (2),  
16 not later than 180 days after the date of enactment  
17 of this subsection, the Administrator shall revise the  
18 certification requirements for the labeling of con-  
19 sumer, home, and office electronic products for pro-  
20 gram partners that have complied with all require-  
21 ments of the Energy Star program for a period of  
22 at least 18 months.

23 “(2) **ADMINISTRATION.**—In the case of a pro-  
24 gram partner described in paragraph (1), the new  
25 requirements under paragraph (1)—

1           “(A) shall not require third-party certifi-  
2           cation for a product to be listed; but

3           “(B) may require that test data and other  
4           product information be submitted to facilitate  
5           product listing and performance verification for  
6           a sample of products.

7           “(3) THIRD PARTIES.—Nothing in this sub-  
8           section prevents the Administrator from using third  
9           parties in the course of the administration of the  
10          Energy Star program.

11          “(4) TERMINATION.—

12           “(A) IN GENERAL.—Subject to subpara-  
13           graph (B), an exemption from third-party cer-  
14           tification provided to a program partner under  
15           paragraph (1) shall terminate if the program  
16           partner is found to have violated program re-  
17           quirements with respect to at least 2 separate  
18           models during a 2-year period.

19           “(B) RESUMPTION.—A termination for a  
20           program partner under subparagraph (A) shall  
21           cease if the program partner complies with all  
22           Energy Star program requirements for a period  
23           of at least 3 years.”.

1 **SEC. 1105. ENERGY CONSERVATION STANDARDS FOR COM-**  
2 **MERCIAL REFRIGERATION EQUIPMENT.**

3 (a) DEADLINE.—The requirements of the final rule  
4 entitled “Energy Conservation Program: Energy Con-  
5 servation Standards for Commercial Refrigeration Equip-  
6 ment” (79 Fed. Reg. 17725 (March 28, 2014)), shall take  
7 effect on January 1, 2020, for equipment covered by the  
8 final rule that—

9 (1) uses natural refrigerants with a global  
10 warming potential of 10 or less that are approved  
11 for use by the Environmental Protection Agency  
12 under the Significant New Alternatives Program;

13 (2) is within 1 of the following product cat-  
14 egories:

15 (A) VCT.SC.M vertical cooler with trans-  
16 parent door self contained medium temperature;  
17 or

18 (B) HCT.SC.M horizontal cooler with  
19 transparent door self contained medium tem-  
20 perature; and

21 (3) uses not more than 115 percent of the en-  
22 ergy use allowed by applicable standards under En-  
23 ergy Star 3.0.

24 (b) FUTURE RULEMAKINGS.—Nothing in this section  
25 changes the criteria to be considered during future  
26 rulemakings undertaken by the Department under title III

1 of the Energy Policy and Conservation Act (42 U.S.C.  
2 6291 et seq.).

3 (c) REVIEW.—Notwithstanding subsection (a), the  
4 next review required under section 342(c)(6)(B) of the  
5 Energy Policy and Conservation Act (42 U.S.C.  
6 6313(c)(6)(B)) shall be conducted based on an effective  
7 date of March 27, 2017.

8 **SEC. 1106. VOLUNTARY VERIFICATION PROGRAMS FOR AIR**  
9 **CONDITIONING, FURNACE, BOILER, HEAT**  
10 **PUMP, AND WATER HEATER PRODUCTS.**

11 Section 326(b) of the Energy Policy and Conserva-  
12 tion Act (42 U.S.C. 6296(b)) is amended by adding at  
13 the end the following:

14 “(6) VOLUNTARY VERIFICATION PROGRAMS FOR  
15 AIR CONDITIONING, FURNACE, BOILER, HEAT PUMP,  
16 AND WATER HEATER PRODUCTS.—

17 “(A) RELIANCE ON VOLUNTARY PRO-  
18 GRAMS.—For the purpose of periodic testing to  
19 verify compliance with energy conservation  
20 standards and Energy Star specifications estab-  
21 lished under sections 324A, 325, and 342 for  
22 covered products described in paragraphs (3),  
23 (4), (5), (9), and (11) of section 322(a) and  
24 covered equipment described in subparagraphs  
25 (B), (C), (D), (F), (I), (J), and (K) of section

1           340(1), the Secretary and the Administrator of  
2           the Environmental Protection Agency shall rely  
3           on testing conducted by voluntary verification  
4           programs that are recognized by the Secretary  
5           in accordance with subparagraph (B).

6           “(B) RECOGNITION OF VOLUNTARY  
7           VERIFICATION PROGRAMS.—

8           “(i) IN GENERAL.—Not later than  
9           180 days after the date of enactment of  
10          this paragraph, the Secretary shall initiate  
11          a negotiated rulemaking in accordance  
12          with subchapter III of chapter 5 of title 5,  
13          United States Code (commonly known as  
14          the ‘Negotiated Rulemaking Act of 1990’)  
15          to develop criteria that have consensus  
16          support for achieving recognition by the  
17          Secretary as an approved voluntary  
18          verification program.

19          “(ii) MINIMUM REQUIREMENTS.—The  
20          criteria developed under clause (i) shall, at  
21          a minimum, ensure that the voluntary  
22          verification program—

23                           “(I) is nationally recognized;

1 “(II) is operated by a third party  
2 and not directly operated by a pro-  
3 gram participant;

4 “(III) satisfies any applicable ele-  
5 ments of—

6 “(aa) International Organi-  
7 zation for Standardization stand-  
8 ard numbered 17025; and

9 “(bb) any other relevant  
10 International Organization for  
11 Standardization standards identi-  
12 fied and agreed to through the  
13 negotiated rulemaking under  
14 clause (i);

15 “(IV) at least annually tests  
16 independently obtained products fol-  
17 lowing the test procedures established  
18 under this title to verify the certified  
19 rating of a representative sample of  
20 products and equipment within the  
21 scope of the program;

22 “(V) maintains a publicly avail-  
23 able list of all ratings of products sub-  
24 ject to verification;

1                   “(VI) requires the changing of  
2                   the performance rating or removal of  
3                   the product or equipment from the  
4                   program if testing determines that the  
5                   performance rating does not meet the  
6                   levels the manufacturer has certified  
7                   to the Secretary;

8                   “(VII) requires new program  
9                   participants to substantiate ratings  
10                  through test data generated in accord-  
11                  ance with DOE regulations;

12                  “(VIII) allows for challenge test-  
13                  ing of products and equipment within  
14                  the scope of the program;

15                  “(IX) requires program partici-  
16                  pants to disclose the performance rat-  
17                  ing of all covered products and equip-  
18                  ment within the scope of the program  
19                  for the covered product or equipment;

20                  “(X) provides to the Secretary—

21                         “(aa) an annual report of all  
22                         test results, the contents of which  
23                         shall be determined through the  
24                         negotiated rulemaking process  
25                         under clause (i); and

1                   “(bb) test reports, on the re-  
2                   quest of the Secretary or the Ad-  
3                   ministrator of the Environmental  
4                   Protection Agency, that note any  
5                   instructions specified by the man-  
6                   ufacturer or the representative of  
7                   the manufacturer for the purpose  
8                   of conducting the verification  
9                   testing, to be exempted from dis-  
10                  closure to the extent provided  
11                  under section 552(b)(4) of title  
12                  5, United States Code (commonly  
13                  known as the ‘Freedom of Infor-  
14                  mation Act’); and

15                  “(XI) satisfies any additional re-  
16                  quirements or standards that the Sec-  
17                  retary and Administrator of the Envi-  
18                  ronmental Protection Agency shall es-  
19                  tablish consistent with this subpara-  
20                  graph.

21                  “(iii) FINDING REQUIRED FOR CES-  
22                  SATION OF RECOGNITION.—The Secretary  
23                  may only cease recognition of a voluntary  
24                  verification program as an approved pro-  
25                  gram described in subparagraph (A) on a

1 finding that the program is not meeting its  
2 obligations for compliance through pro-  
3 gram review criteria established under this  
4 subparagraph.

5 “(iv) REVISIONS.—

6 “(I) IN GENERAL.—Major revi-  
7 sions to voluntary verification pro-  
8 gram criteria established under this  
9 subparagraph shall only be made pur-  
10 suant to a subsequent negotiated rule-  
11 making in accordance with subchapter  
12 III of chapter 5 of title 5, United  
13 States Code (commonly known as the  
14 ‘Negotiated Rulemaking Act of  
15 1990’).

16 “(II) NONMAJOR REVISIONS.—

17 “(aa) IN GENERAL.—The  
18 Secretary may make all other  
19 nonmajor criteria revisions by  
20 initiating a direct final rule in ac-  
21 cordance with section  
22 553(b)(3)(B) of title 5, United  
23 States Code, on a determination  
24 published in the Federal Register  
25 that revisions to the criteria are

1 necessary and that substantive  
2 opposition to the proposed revi-  
3 sions is not expected.

4 “(bb) CONDITIONS FOR EF-  
5 FECTIVENESS.—If the Secretary  
6 does not receive adversarial com-  
7 ments with respect to the deter-  
8 mination published under item  
9 (aa) during the 30-day-period fol-  
10 lowing publication of that deter-  
11 mination in the Federal Register,  
12 the direct final rule shall have  
13 the force and effect of law.

14 “(cc) WITHDRAWAL OF  
15 FINAL RULE.—Receipt of any ad-  
16 versarial comment with respect to  
17 the determination published  
18 under item (aa) shall require the  
19 Secretary to withdraw the direct  
20 final rule and publish—

21 “(AA) a notice of pro-  
22 posed rulemaking pursuant  
23 to section 553 of title 5,  
24 United States Code; or

1                   “(BB) a notice of pro-  
2                   posed rulemaking pursuant  
3                   to section 553 of title 5,  
4                   United States Code, that in-  
5                   cludes a determination that  
6                   revisions to the criteria are  
7                   necessary.

8                   “(C) ADMINISTRATION.—

9                   “(i) IN GENERAL.—The Secretary and  
10                  the Administrator of the Environmental  
11                  Protection Agency shall not require—

12                   “(I) manufacturers to participate  
13                   in a voluntary verification program  
14                   described in subparagraph (A); or

15                   “(II) participating manufacturers  
16                   to provide information that has al-  
17                   ready been provided to the Secretary  
18                   or the Administrator.

19                   “(ii) LIST OF COVERED PRODUCTS.—  
20                  The Secretary or the Administrator of the  
21                  Environmental Protection Agency may  
22                  maintain a publicly available list of covered  
23                  products and equipment that distinguishes  
24                  between products that are, and are not  
25                  covered products and equipment verified

1 through a voluntary verification program  
2 described in subparagraph (A);

3 “(iii) PERIODIC VERIFICATION TEST-  
4 ING.—

5 “(I) IN GENERAL.—The Sec-  
6 retary—

7 “(aa) shall not subject prod-  
8 ucts or equipment that have been  
9 verification tested under a vol-  
10 untary verification program de-  
11 scribed in subparagraph (A) to  
12 periodic verification testing that  
13 verifies the accuracy of the cer-  
14 tified performance rating of the  
15 products or equipment; but

16 “(bb) may test products or  
17 equipment described in subclause  
18 (I) if the testing is necessary—

19 “(AA) to assess the  
20 overall performance of a vol-  
21 untary verification program;

22 “(BB) to address spe-  
23 cific performance issues;

1 “(CC) for use in updat-  
2 ing test procedures and  
3 standards; or

4 “(DD) for other pur-  
5 poses consistent with this  
6 title.

7 “(II) ADDITIONAL TESTING.—  
8 The Secretary may subject products  
9 or equipment described in subclause  
10 (I) to periodic verification testing out-  
11 side the restrictions of subclause  
12 (I)(bb), if agreed to during the rule-  
13 making described in subparagraph  
14 (B)

15 “(D) EFFECT ON OTHER AUTHORITY.—  
16 Nothing in this paragraph limits the authority  
17 of the Secretary or the Administrator of the  
18 Environmental Protection Agency to enforce  
19 compliance with any law.”.

## 20 **Subtitle C—Manufacturing**

### 21 **SEC. 1201. MANUFACTURING ENERGY EFFICIENCY.**

22 (a) PURPOSES.—The purposes of this section are—  
23 (1) to reform and reorient the industrial effi-  
24 ciency programs of the Department;

1           (2) to establish a clear and consistent authority  
2 for industrial efficiency programs of the Depart-  
3 ment;

4           (3) to accelerate the deployment of technologies  
5 and practices that will increase industrial energy ef-  
6 ficiency and improve productivity;

7           (4) to accelerate the development and dem-  
8 onstration of technologies that will assist the deploy-  
9 ment goals of the industrial efficiency programs of  
10 the Department and increase manufacturing effi-  
11 ciency;

12           (5) to stimulate domestic economic growth and  
13 improve industrial productivity and competitiveness;  
14 and

15           (6) to strengthen partnerships between Federal  
16 and State governmental agencies and the private  
17 and academic sectors.

18 (b) FUTURE OF INDUSTRY PROGRAM.—

19           (1) IN GENERAL.—Section 452 of the Energy  
20 Independence and Security Act of 2007 (42 U.S.C.  
21 17111) is amended by striking the section heading  
22 and inserting the following: “**FUTURE OF INDUS-**  
23 **TRY PROGRAM**”.

24           (2) DEFINITION OF ENERGY SERVICE PRO-  
25 VIDER.—Section 452(a) of the Energy Independence

1 and Security Act of 2007 (42 U.S.C. 17111(a)) is  
2 amended—

3 (A) by redesignating paragraphs (3)  
4 through (5) as paragraphs (4) through (6), re-  
5 spectively; and

6 (B) by inserting after paragraph (2) the  
7 following:

8 “(3) ENERGY SERVICE PROVIDER.—The term  
9 ‘energy service provider’ means any business pro-  
10 viding technology or services to improve the energy  
11 efficiency, water efficiency, power factor, or load  
12 management of a manufacturing site or other indus-  
13 trial process in an energy-intensive industry, or any  
14 utility operating under a utility energy service  
15 project.”.

16 (3) INDUSTRIAL RESEARCH AND ASSESSMENT  
17 CENTERS.—Section 452(e) of the Energy Independ-  
18 ence and Security Act of 2007 (42 U.S.C. 17111(e))  
19 is amended—

20 (A) by redesignating paragraphs (1)  
21 through (5) as subparagraphs (A) through (E),  
22 respectively, and indenting appropriately;

23 (B) by striking “The Secretary” and in-  
24 serting the following:

25 “(1) IN GENERAL.—The Secretary”;

1 (C) in subparagraph (A) (as redesignated  
2 by subparagraph (A)), by inserting before the  
3 semicolon at the end the following: “, including  
4 assessments of sustainable manufacturing goals  
5 and the implementation of information tech-  
6 nology advancements for supply chain analysis,  
7 logistics, system monitoring, industrial and  
8 manufacturing processes, and other purposes”;  
9 and

10 (D) by adding at the end the following:

11 “(2) COORDINATION.—To increase the value  
12 and capabilities of the industrial research and as-  
13 sessment centers, the centers shall—

14 “(A) coordinate with Manufacturing Ex-  
15 tension Partnership Centers of the National In-  
16 stitute of Standards and Technology;

17 “(B) coordinate with the Building Tech-  
18 nologies Program of the Department of Energy  
19 to provide building assessment services to man-  
20 ufacturers;

21 “(C) increase partnerships with the Na-  
22 tional Laboratories of the Department of En-  
23 ergy to leverage the expertise and technologies  
24 of the National Laboratories for national indus-  
25 trial and manufacturing needs;

1           “(D) increase partnerships with energy  
2 service providers and technology providers to le-  
3 verage private sector expertise and accelerate  
4 deployment of new and existing technologies  
5 and processes for energy efficiency, power fac-  
6 tor, and load management;

7           “(E) identify opportunities for reducing  
8 greenhouse gas emissions; and

9           “(F) promote sustainable manufacturing  
10 practices for small- and medium-sized manufac-  
11 turers.

12           “(3) OUTREACH.—The Secretary shall provide  
13 funding for—

14           “(A) outreach activities by the industrial  
15 research and assessment centers to inform  
16 small- and medium-sized manufacturers of the  
17 information, technologies, and services avail-  
18 able; and

19           “(B) coordination activities by each indus-  
20 trial research and assessment center to leverage  
21 efforts with—

22                   “(i) Federal and State efforts;

23                   “(ii) the efforts of utilities and energy  
24 service providers;

1                   “(iii) the efforts of regional energy ef-  
2                   ficiency organizations; and

3                   “(iv) the efforts of other industrial re-  
4                   search and assessment centers.

5                   “(4) WORKFORCE TRAINING.—

6                   “(A) IN GENERAL.—The Secretary shall  
7                   pay the Federal share of associated internship  
8                   programs under which students work with or  
9                   for industries, manufacturers, and energy serv-  
10                  ice providers to implement the recommendations  
11                  of industrial research and assessment centers.

12                  “(B) FEDERAL SHARE.—The Federal  
13                  share of the cost of carrying out internship pro-  
14                  grams described in subparagraph (A) shall be  
15                  50 percent.

16                  “(5) SMALL BUSINESS LOANS.—The Adminis-  
17                  trator of the Small Business Administration shall, to  
18                  the maximum extent practicable, expedite consider-  
19                  ation of applications from eligible small business  
20                  concerns for loans under the Small Business Act (15  
21                  U.S.C. 631 et seq.) to implement recommendations  
22                  of industrial research and assessment centers estab-  
23                  lished under paragraph (1).

24                  “(6) ADVANCED MANUFACTURING STEERING  
25                  COMMITTEE.—The Secretary shall establish an advi-

1 sory steering committee to provide recommendations  
2 to the Secretary on planning and implementation of  
3 the Advanced Manufacturing Office of the Depart-  
4 ment of Energy.”.

5 (c) SUSTAINABLE MANUFACTURING INITIATIVE.—

6 (1) IN GENERAL.—Part E of title III of the  
7 Energy Policy and Conservation Act (42 U.S.C.  
8 6341) is amended by adding at the end the fol-  
9 lowing:

10 **“SEC. 376. SUSTAINABLE MANUFACTURING INITIATIVE.**

11 “(a) IN GENERAL.—As part of the Office of Energy  
12 Efficiency and Renewable Energy, the Secretary, on the  
13 request of a manufacturer, shall conduct on-site technical  
14 assessments to identify opportunities for—

15 “(1) maximizing the energy efficiency of indus-  
16 trial processes and cross-cutting systems;

17 “(2) preventing pollution and minimizing waste;

18 “(3) improving efficient use of water in manu-  
19 facturing processes;

20 “(4) conserving natural resources; and

21 “(5) achieving such other goals as the Secretary  
22 determines to be appropriate.

23 “(b) COORDINATION.—The Secretary shall carry out  
24 the initiative in coordination with the private sector and  
25 appropriate agencies, including the National Institute of

1 Standards and Technology, to accelerate adoption of new  
2 and existing technologies and processes that improve en-  
3 ergy efficiency.

4 “(c) RESEARCH AND DEVELOPMENT PROGRAM FOR  
5 SUSTAINABLE MANUFACTURING AND INDUSTRIAL TECH-  
6 NOLOGIES AND PROCESSES.—As part of the industrial ef-  
7 ficiency programs of the Department of Energy, the Sec-  
8 retary shall carry out a joint industry-government partner-  
9 ship program to research, develop, and demonstrate new  
10 sustainable manufacturing and industrial technologies and  
11 processes that maximize the energy efficiency of industrial  
12 plants, reduce pollution, and conserve natural resources.”.

13 (2) TABLE OF CONTENTS.—The table of con-  
14 tents of the Energy Policy and Conservation Act (42  
15 U.S.C. prec. 6201) is amended by adding at the end  
16 of the items relating to part E of title III the fol-  
17 lowing:

“Sec. 376. Sustainable manufacturing initiative.”.

18 (d) CONFORMING AMENDMENTS.—

19 (1) Section 106 of the Energy Policy Act of  
20 2005 (42 U.S.C. 15811) is repealed.

21 (2) Sections 131, 132, 133, 2103, and 2107 of  
22 the Energy Policy Act of 1992 (42 U.S.C. 6348,  
23 6349, 6350, 13453, 13456) are repealed.

24 (3) Section 2101(a) of the Energy Policy Act of  
25 1992 (42 U.S.C. 13451(a)) is amended in the third

1 sentence by striking “sections 2102, 2103, 2104,  
2 2105, 2106, 2107, and 2108” and inserting “sec-  
3 tions 2102, 2104, 2105, 2106, and 2108 of this Act  
4 and section 376 of the Energy Policy and Conserva-  
5 tion Act.”.

6 **SEC. 1202. LEVERAGING EXISTING FEDERAL AGENCY PRO-**  
7 **GRAMS TO ASSIST SMALL AND MEDIUM MAN-**  
8 **UFACTURERS.**

9 (a) DEFINITIONS.—In this section and section 1203:

10 (1) ENERGY MANAGEMENT SYSTEM.—The term  
11 “energy management system” means a business  
12 management process based on standards of the  
13 American National Standards Institute that enables  
14 an organization to follow a systematic approach in  
15 achieving continual improvement of energy perform-  
16 ance, including energy efficiency, security, use, and  
17 consumption.

18 (2) INDUSTRIAL ASSESSMENT CENTER.—The  
19 term “industrial assessment center” means a center  
20 located at an institution of higher education that—

21 (A) receives funding from the Department;

22 (B) provides an in-depth assessment of  
23 small- and medium-size manufacturer plant  
24 sites to evaluate the facilities, services, and  
25 manufacturing operations of the plant site; and

1           (C) identifies opportunities for potential  
2 savings for small- and medium-size manufac-  
3 turer plant sites from energy efficiency improve-  
4 ments, waste minimization, pollution preven-  
5 tion, and productivity improvement.

6           (3) NATIONAL LABORATORY.—The term “Na-  
7 tional Laboratory” has the meaning given the term  
8 in section 2 of the Energy Policy Act of 2005 (42  
9 U.S.C. 15801).

10          (4) SMALL AND MEDIUM MANUFACTURERS.—  
11 The term “small and medium manufacturers”  
12 means manufacturing firms—

13           (A) classified in the North American In-  
14 dustry Classification System as any of sectors  
15 31 through 33;

16           (B) with gross annual sales of less than  
17 \$100,000,000;

18           (C) with fewer than 500 employees at the  
19 plant site; and

20           (D) with annual energy bills totaling more  
21 than \$100,000 and less than \$2,500,000.

22          (5) SMART MANUFACTURING.—The term  
23 “smart manufacturing” means a set of advanced  
24 sensing, instrumentation, monitoring, controls, and  
25 process optimization technologies and practices that

1 merge information and communication technologies  
2 with the manufacturing environment for the real-  
3 time management of energy, productivity, and costs  
4 across factories and companies.

5 (b) EXPANSION OF TECHNICAL ASSISTANCE PRO-  
6 GRAMS.—The Secretary shall expand the scope of tech-  
7 nologies covered by the Industrial Assessment Centers of  
8 the Department—

9 (1) to include smart manufacturing technologies  
10 and practices; and

11 (2) to equip the directors of the Industrial As-  
12 sessment Centers with the training and tools nec-  
13 essary to provide technical assistance in smart man-  
14 ufacturing technologies and practices, including en-  
15 ergy management systems, to manufacturers.

16 (c) FUNDING.—The Secretary shall use unobligated  
17 funds of the Department to carry out this section.

18 **SEC. 1203. LEVERAGING SMART MANUFACTURING INFRA-**  
19 **STRUCTURE AT NATIONAL LABORATORIES.**

20 (a) STUDY.—

21 (1) IN GENERAL.—Not later than 180 days  
22 after the date of enactment of this Act, the Sec-  
23 retary shall conduct a study on ways in which the  
24 Department can increase access to existing high-per-  
25 formance computing resources in the National Lab-

1 oratories, particularly for small and medium manu-  
2 facturers.

3 (2) INCLUSIONS.—In identifying ways to in-  
4 crease access to National Laboratories under para-  
5 graph (1), the Secretary shall—

6 (A) focus on increasing access to the com-  
7 puting facilities of the National Laboratories;  
8 and

9 (B) ensure that—

10 (i) the information from the manufac-  
11 turer is protected; and

12 (ii) the security of the National Lab-  
13 oratory facility is maintained.

14 (3) REPORT.—Not later than 1 year after the  
15 date of enactment of this Act, the Secretary shall  
16 submit to Congress a report describing the results of  
17 the study.

18 (b) ACTIONS FOR INCREASED ACCESS.—The Sec-  
19 retary shall facilitate access to the National Laboratories  
20 studied under subsection (a) for small and medium manu-  
21 facturers so that small and medium manufacturers can  
22 fully use the high-performance computing resources of the  
23 National Laboratories to enhance the manufacturing com-  
24 petitiveness of the United States.

1                                   **Subtitle D—Vehicles**

2   **SEC. 1301. SHORT TITLE.**

3           This subtitle may be cited as the “Vehicle Innovation  
4 Act of 2015”.

5   **SEC. 1302. OBJECTIVES.**

6           The objectives of this subtitle are—

7                   (1) to establish a consistent and consolidated  
8 authority for the vehicle technology program at the  
9 Department;

10                   (2) to develop United States technologies and  
11 practices that—

12                           (A) improve the fuel efficiency and emis-  
13 sions of all vehicles produced in the United  
14 States; and

15                           (B) reduce vehicle reliance on petroleum-  
16 based fuels;

17                   (3) to support domestic research, development,  
18 engineering, demonstration, and commercial applica-  
19 tion and manufacturing of advanced vehicles, en-  
20 gines, and components;

21                   (4) to enable vehicles to move larger volumes of  
22 goods and more passengers with less energy and  
23 emissions;

24                   (5) to develop cost-effective advanced tech-  
25 nologies for wide-scale utilization throughout the

1 passenger, commercial, government, and transit ve-  
2 hicle sectors;

3 (6) to allow for greater consumer choice of vehi-  
4 cle technologies and fuels;

5 (7) shorten technology development and inte-  
6 gration cycles in the vehicle industry;

7 (8) to ensure a proper balance and diversity of  
8 Federal investment in vehicle technologies; and

9 (9) to strengthen partnerships between Federal  
10 and State governmental agencies and the private  
11 and academic sectors.

12 **SEC. 1303. COORDINATION AND NONDUPLICATION.**

13 The Secretary shall ensure, to the maximum extent  
14 practicable, that the activities authorized by this subtitle  
15 do not duplicate those of other programs within the De-  
16 partment or other relevant research agencies.

17 **SEC. 1304. AUTHORIZATION OF APPROPRIATIONS.**

18 There are authorized to be appropriated to the Sec-  
19 retary for research, development, engineering, demonstra-  
20 tion, and commercial application of vehicles and related  
21 technologies in the United States, including activities au-  
22 thorized under this subtitle—

23 (1) for fiscal year 2016, \$313,567,000;

24 (2) for fiscal year 2017, \$326,109,000;

25 (3) for fiscal year 2018, \$339,154,000;

1 (4) for fiscal year 2019, \$352,720,000; and

2 (5) for fiscal year 2020, \$366,829,000.

3 **SEC. 1305. REPORTING.**

4 (a) TECHNOLOGIES DEVELOPED.—Not later than 18  
5 months after the date of enactment of this Act and annu-  
6 ally thereafter through 2020, the Secretary shall submit  
7 to Congress a report regarding the technologies developed  
8 as a result of the activities authorized by this subtitle, with  
9 a particular emphasis on whether the technologies were  
10 successfully adopted for commercial applications, and if  
11 so, whether products relying on those technologies are  
12 manufactured in the United States.

13 (b) ADDITIONAL MATTERS.—At the end of each fis-  
14 cal year through 2020, the Secretary shall submit to the  
15 relevant Congressional committees of jurisdiction an an-  
16 nual report describing activities undertaken in the pre-  
17 vious year under this Act, active industry participants, the  
18 status of public private partnerships, progress of the pro-  
19 gram in meeting goals and timelines, and a strategic plan  
20 for funding of activities across agencies.

21 **PART I—VEHICLE RESEARCH AND**

22 **DEVELOPMENT**

23 **SEC. 1306. PROGRAM.**

24 (a) ACTIVITIES.—The Secretary shall conduct a pro-  
25 gram of basic and applied research, development, engi-

1 neering, demonstration, and commercial application activi-  
2 ties on materials, technologies, and processes with the po-  
3 tential to substantially reduce or eliminate petroleum use  
4 and the emissions of the Nation's passenger and commer-  
5 cial vehicles, including activities in the areas of—

6 (1) electrification of vehicle systems;

7 (2) batteries, ultracapacitors, and other energy  
8 storage devices;

9 (3) power electronics;

10 (4) vehicle, component, and subsystem manu-  
11 facturing technologies and processes;

12 (5) engine efficiency and combustion optimiza-  
13 tion;

14 (6) waste heat recovery;

15 (7) transmission and drivetrains;

16 (8) hydrogen vehicle technologies, including fuel  
17 cells and internal combustion engines, and hydrogen  
18 infrastructure, including hydrogen energy storage to  
19 enable renewables and provide hydrogen for fuel and  
20 power;

21 (9) natural gas vehicle technologies;

22 (10) aerodynamics, rolling resistance (including  
23 tires and wheel assemblies), and accessory power  
24 loads of vehicles and associated equipment;

- 1           (11) vehicle weight reduction, including
- 2           lightweighting materials and the development of
- 3           manufacturing processes to fabricate, assemble, and
- 4           use dissimilar materials;
- 5           (12) friction and wear reduction;
- 6           (13) engine and component durability;
- 7           (14) innovative propulsion systems;
- 8           (15) advanced boosting systems;
- 9           (16) hydraulic hybrid technologies;
- 10          (17) engine compatibility with and optimization
- 11          for a variety of transportation fuels including nat-
- 12          ural gas and other liquid and gaseous fuels;
- 13          (18) predictive engineering, modeling, and sim-
- 14          ulation of vehicle and transportation systems;
- 15          (19) refueling and charging infrastructure for
- 16          alternative fueled and electric or plug-in electric hy-
- 17          brid vehicles, including the unique challenges facing
- 18          rural areas;
- 19          (20) gaseous fuels storage systems and system
- 20          integration and optimization;
- 21          (21) sensing, communications, and actuation
- 22          technologies for vehicle, electrical grid, and infra-
- 23          structure;
- 24          (22) efficient use, substitution, and recycling of
- 25          potentially critical materials in vehicles, including

1 rare earth elements and precious metals, at risk of  
2 supply disruption;

3 (23) aftertreatment technologies;

4 (24) thermal management of battery systems;

5 (25) retrofitting advanced vehicle technologies  
6 to existing vehicles;

7 (26) development of common standards, speci-  
8 fications, and architectures for both transportation  
9 and stationary battery applications;

10 (27) advanced internal combustion engines;

11 (28) mild hybrid;

12 (29) engine down speeding;

13 (30) vehicle-to-vehicle, vehicle-to-pedestrian,  
14 and vehicle-to-infrastructure technologies; and

15 (31) other research areas as determined by the  
16 Secretary.

17 (b) TRANSFORMATIONAL TECHNOLOGY.—The Sec-  
18 retary shall ensure that the Department continues to sup-  
19 port research, development, engineering, demonstration,  
20 and commercial application activities and maintains com-  
21 petency in mid- to long-term transformational vehicle tech-  
22 nologies with potential to achieve reductions in emissions,  
23 including activities in the areas of—

24 (1) hydrogen vehicle technologies, including fuel  
25 cells, hydrogen storage, infrastructure, and activities

1 in hydrogen technology validation and safety codes  
2 and standards;

3 (2) multiple battery chemistries and novel en-  
4 ergy storage devices, including nonchemical batteries  
5 and electromechanical storage technologies such as  
6 hydraulics, flywheels, and compressed air storage;

7 (3) communication and connectivity among ve-  
8 hicles, infrastructure, and the electrical grid; and

9 (4) other innovative technologies research and  
10 development, as determined by the Secretary.

11 (c) INDUSTRY PARTICIPATION.—To the maximum  
12 extent practicable, activities under this Act shall be carried  
13 out in partnership or collaboration with automotive manu-  
14 facturers, heavy commercial, vocational, and transit vehi-  
15 cle manufacturers, qualified plug-in electric vehicle manu-  
16 facturers, compressed natural gas vehicle manufacturers,  
17 vehicle and engine equipment and component manufactur-  
18 ers, manufacturing equipment manufacturers, advanced  
19 vehicle service providers, fuel producers and energy sup-  
20 pliers, electric utilities, universities, national laboratories,  
21 and independent research laboratories. In carrying out  
22 this Act the Secretary shall—

23 (1) determine whether a wide range of compa-  
24 nies that manufacture or assemble vehicles or com-  
25 ponents in the United States are represented in on-

1 going public private partnership activities, including  
2 firms that have not traditionally participated in fed-  
3 erally sponsored research and development activities,  
4 and where possible, partner with such firms that  
5 conduct significant and relevant research and devel-  
6 opment activities in the United States;

7 (2) leverage the capabilities and resources of,  
8 and formalize partnerships with, industry-led stake-  
9 holder organizations, nonprofit organizations, indus-  
10 try consortia, and trade associations with expertise  
11 in the research and development of, and education  
12 and outreach activities in, advanced automotive and  
13 commercial vehicle technologies;

14 (3) develop more effective processes for trans-  
15 ferring research findings and technologies to indus-  
16 try;

17 (4) support public-private partnerships, dedi-  
18 cated to overcoming barriers in commercial applica-  
19 tion of transformational vehicle technologies, that  
20 utilize such industry-led technology development fa-  
21 cilities of entities with demonstrated expertise in  
22 successfully designing and engineering pre-commer-  
23 cial generations of such transformational technology;  
24 and

1           (5) promote efforts to ensure that technology  
2           research, development, engineering, and commercial  
3           application activities funded under this Act are car-  
4           ried out in the United States.

5           (d) INTERAGENCY AND INTRAAGENCY COORDINA-  
6           TION.—To the maximum extent practicable, the Secretary  
7           shall coordinate research, development, demonstration,  
8           and commercial application activities among—

9           (1) relevant programs within the Department,  
10          including—

11           (A) the Office of Energy Efficiency and  
12           Renewable Energy;

13           (B) the Office of Science;

14           (C) the Office of Electricity Delivery and  
15           Energy Reliability;

16           (D) the Office of Fossil Energy;

17           (E) the Advanced Research Projects Agen-  
18           cy—Energy; and

19           (F) other offices as determined by the Sec-  
20           retary; and

21           (2) relevant technology research and develop-  
22           ment programs within other Federal agencies, as de-  
23           termined by the Secretary.

24           (e) FEDERAL DEMONSTRATION OF TECH-  
25           NOLOGIES.—The Secretary shall make information avail-

1 able to procurement programs of Federal agencies regard-  
2 ing the potential to demonstrate technologies resulting  
3 from activities funded through programs under this Act.

4 (f) INTERGOVERNMENTAL COORDINATION.—The  
5 Secretary shall seek opportunities to leverage resources  
6 and support initiatives of State and local governments in  
7 developing and promoting advanced vehicle technologies,  
8 manufacturing, and infrastructure.

9 (g) CRITERIA.—When awarding grants under this  
10 program, the Secretary shall give priority to those tech-  
11 nologies (either individually or as part of a system) that—

12 (1) provide the greatest aggregate fuel savings  
13 based on the reasonable projected sales volumes of  
14 the technology; and

15 (2) provide the greatest increase in United  
16 States employment.

17 **SEC. 1307. MANUFACTURING.**

18 The Secretary shall carry out a research, develop-  
19 ment, engineering, demonstration, and commercial appli-  
20 cation program of advanced vehicle manufacturing tech-  
21 nologies and practices, including innovative processes—

22 (1) to increase the production rate and decrease  
23 the cost of advanced battery and fuel cell manufac-  
24 turing;

1           (2) to vary the capability of individual manufac-  
2           turing facilities to accommodate different battery  
3           chemistries and configurations;

4           (3) to reduce waste streams, emissions, and en-  
5           ergy intensity of vehicle, engine, advanced battery  
6           and component manufacturing processes;

7           (4) to recycle and remanufacture used batteries  
8           and other vehicle components for reuse in vehicles or  
9           stationary applications;

10          (5) to develop manufacturing processes to effec-  
11          tively fabricate, assemble, and produce cost-effective  
12          lightweight materials such as advanced aluminum  
13          and other metal alloys, polymeric composites, and  
14          carbon fiber for use in vehicles;

15          (6) to produce lightweight high pressure storage  
16          systems for gaseous fuels;

17          (7) to design and manufacture purpose-built hy-  
18          drogen fuel cell vehicles and components;

19          (8) to improve the calendar life and cycle life of  
20          advanced batteries; and

21          (9) to produce permanent magnets for advanced  
22          vehicles.

1           **PART II—MEDIUM- AND HEAVY-DUTY**  
2           **COMMERCIAL AND TRANSIT VEHICLES**  
3   **SEC. 1308. PROGRAM.**

4           The Secretary, in partnership with relevant research  
5 and development programs in other Federal agencies, and  
6 a range of appropriate industry stakeholders, shall carry  
7 out a program of cooperative research, development, dem-  
8 onstration, and commercial application activities on ad-  
9 vanced technologies for medium- to heavy-duty commer-  
10 cial, vocational, recreational, and transit vehicles, includ-  
11 ing activities in the areas of—

- 12           (1) engine efficiency and combustion research;  
13           (2) onboard storage technologies for compressed  
14 and liquefied natural gas;  
15           (3) development and integration of engine tech-  
16 nologies designed for natural gas operation of a vari-  
17 ety of vehicle platforms;  
18           (4) waste heat recovery and conversion;  
19           (5) improved aerodynamics and tire rolling re-  
20 sistance;  
21           (6) energy and space-efficient emissions control  
22 systems;  
23           (7) mild hybrid, heavy hybrid, hybrid hydraulic,  
24 plug-in hybrid, and electric platforms, and energy  
25 storage technologies;  
26           (8) drivetrain optimization;

- 1 (9) friction and wear reduction;
- 2 (10) engine idle and parasitic energy loss reduc-
- 3 tion;
- 4 (11) electrification of accessory loads;
- 5 (12) onboard sensing and communications tech-
- 6 nologies;
- 7 (13) advanced lightweighting materials and ve-
- 8 hicle designs;
- 9 (14) increasing load capacity per vehicle;
- 10 (15) thermal management of battery systems;
- 11 (16) recharging infrastructure;
- 12 (17) compressed natural gas infrastructure;
- 13 (18) advanced internal combustion engines;
- 14 (19) complete vehicle and power pack modeling,
- 15 simulation, and testing;
- 16 (20) hydrogen vehicle technologies, including
- 17 fuel cells and internal combustion engines, and hy-
- 18 drogen infrastructure, including hydrogen energy
- 19 storage to enable renewables and provide hydrogen
- 20 for fuel and power;
- 21 (21) retrofitting advanced technologies onto ex-
- 22 isting truck fleets;
- 23 (22) advanced boosting systems;
- 24 (23) engine down speeding; and

1           (24) integration of these and other advanced  
2           systems onto a single truck and trailer platform.

3 **SEC. 1309. CLASS 8 TRUCK AND TRAILER SYSTEMS DEM-**  
4 **ONSTRATION.**

5           (a) IN GENERAL.—The Secretary shall conduct a  
6 competitive grant program to demonstrate the integration  
7 of multiple advanced technologies on Class 8 truck and  
8 trailer platforms, including a combination of technologies  
9 listed in section 1308.

10          (b) APPLICANT TEAMS.—Applicant teams may be  
11 comprised of truck and trailer manufacturers, engine and  
12 component manufacturers, fleet customers, university re-  
13 searchers, and other applicants as appropriate for the de-  
14 velopment and demonstration of integrated Class 8 truck  
15 and trailer systems.

16 **SEC. 1310. TECHNOLOGY TESTING AND METRICS.**

17          The Secretary, in coordination with the partners of  
18 the interagency research program described in section  
19 1308—

20           (1) shall develop standard testing procedures  
21           and technologies for evaluating the performance of  
22           advanced heavy vehicle technologies under a range of  
23           representative duty cycles and operating conditions,  
24           including for heavy hybrid propulsion systems;

1           (2) shall evaluate heavy vehicle performance  
2           using work performance-based metrics other than  
3           those based on miles per gallon, including those  
4           based on units of volume and weight transported for  
5           freight applications, and appropriate metrics based  
6           on the work performed by nonroad systems; and

7           (3) may construct heavy duty truck and bus  
8           testing facilities.

9   **SEC. 1311. NONROAD SYSTEMS PILOT PROGRAM.**

10          The Secretary shall undertake a pilot program of re-  
11          search, development, demonstration, and commercial ap-  
12          plications of technologies to improve total machine or sys-  
13          tem efficiency for nonroad mobile equipment including ag-  
14          ricultural, construction, air, and sea port equipment, and  
15          shall seek opportunities to transfer relevant research find-  
16          ings and technologies between the nonroad and on-high-  
17          way equipment and vehicle sectors.

18                           **PART III—ADMINISTRATION**

19   **SEC. 1312. REPEAL OF EXISTING AUTHORITIES.**

20          (a) **IN GENERAL.**—Sections 706, 711, 712, and 933  
21          of the Energy Policy Act of 2005 (42 U.S.C. 16051,  
22          16061, 16062, 16233) are repealed.

23          (b) **ENERGY EFFICIENCY.**—Section 911 of the En-  
24          ergy Policy Act of 2005 (42 U.S.C. 16191) is amended—

25                  (1) in subsection (a)—

1 (A) in paragraph (1)(A), by striking “vehi-  
2 cles, buildings,” and inserting “buildings”; and  
3 (B) in paragraph (2)—  
4 (i) by striking subparagraph (A); and  
5 (ii) by redesignating subparagraphs  
6 (B) through (E) as subparagraphs (A)  
7 through (D), respectively; and  
8 (2) in subsection (c)—  
9 (A) by striking paragraph (3);  
10 (B) by redesignating paragraph (4) as  
11 paragraph (3); and  
12 (C) in paragraph (3) (as so redesignated),  
13 by striking “(a)(2)(D)” and inserting  
14 “(a)(2)(C)”.

## 15 **Subtitle E—Short Title**

### 16 **SEC. 1401. SHORT TITLE.**

17 This title may be cited as the “Portman-Shaheen En-  
18 ergy Efficiency Improvement Act of 2016”.

## 19 **TITLE II—INFRASTRUCTURE**

### 20 **Subtitle A—Cybersecurity**

#### 21 **SEC. 2001. CYBERSECURITY THREATS.**

22 Part II of the Federal Power Act (16 U.S.C. 824 et  
23 seq.) is amended by adding at the end the following:

#### 24 **“SEC. 224. CYBERSECURITY THREATS.**

25 “(a) DEFINITIONS.—In this section:

1           “(1) BULK-POWER SYSTEM.—The term ‘bulk-  
2 power system’ has the meaning given the term in  
3 section 215.

4           “(2) CRITICAL ELECTRIC INFRASTRUCTURE.—  
5 The term ‘critical electric infrastructure’ means a  
6 system or asset of the bulk-power system, whether  
7 physical or virtual, the incapacity or destruction of  
8 which would negatively affect national security, eco-  
9 nomic security, public health or safety, or any com-  
10 bination of those matters.

11           “(3) CRITICAL ELECTRIC INFRASTRUCTURE IN-  
12 FORMATION.—

13           “(A) IN GENERAL.—The term ‘critical  
14 electric infrastructure information’ means infor-  
15 mation related to critical electric infrastructure,  
16 or proposed critical electric infrastructure, gen-  
17 erated by or provided to the Commission or  
18 other Federal agency, other than classified na-  
19 tional security information, that is designated  
20 as critical electric infrastructure information by  
21 the Commission under subsection (d)(2).

22           “(B) INCLUSIONS.—The term ‘critical elec-  
23 tric infrastructure information’ includes infor-  
24 mation that qualifies as critical energy infra-

1 structure information under regulations promul-  
2 gated by the Commission.

3 “(4) CYBERSECURITY THREAT.—The term ‘cy-  
4 bersecurity threat’ means the imminent danger of an  
5 act that severely disrupts, attempts to severely dis-  
6 rupt, or poses a significant risk of severely dis-  
7 rupting the operation of programmable electronic de-  
8 vices or communications networks (including hard-  
9 ware, software, and data) essential to the reliable  
10 operation of the bulk-power system.

11 “(5) ELECTRIC RELIABILITY ORGANIZATION.—  
12 The term ‘Electric Reliability Organization’ has the  
13 meaning given the term in section 215.

14 “(6) REGIONAL ENTITY.—The term ‘regional  
15 entity’ has the meaning given the term in section  
16 215.

17 “(7) SECRETARY.—The term ‘Secretary’ means  
18 the Secretary of Energy.

19 “(b) EMERGENCY AUTHORITY OF SECRETARY.—

20 “(1) IN GENERAL.—If the President notifies  
21 the Secretary that the President has made a deter-  
22 mination that immediate action is necessary to pro-  
23 tect the bulk-power system from a cybersecurity  
24 threat, the Secretary may require, by order and with  
25 or without notice, any entity that is registered with

1 the Electric Reliability Organization as an owner,  
2 operator, or user of the bulk-power system to take  
3 such actions as the Secretary determines will best  
4 avert or mitigate the cybersecurity threat.

5 “(2) WRITTEN EXPLANATION.—As soon as  
6 practicable after notifying the Secretary under para-  
7 graph (1), the President shall—

8 “(A) provide to the Secretary, in writing,  
9 a record of the determination and an expla-  
10 nation of the reasons for the determination; and

11 “(B) promptly notify, in writing, congres-  
12 sional committees of relevant jurisdiction, in-  
13 cluding the Committee on Energy and Com-  
14 merce of the House of Representatives and the  
15 Committee on Energy and Natural Resources of  
16 the Senate, of the contents of, and justification  
17 for, the directive or determination.

18 “(3) COORDINATION WITH CANADA AND MEX-  
19 ICO.—In exercising the authority pursuant to this  
20 subsection, the Secretary is encouraged to consult  
21 and coordinate with the appropriate officials in Can-  
22 ada and Mexico responsible for the protection of cy-  
23 bersecurity of the interconnected North American  
24 electricity grid.

1           “(4) CONSULTATION.—Before exercising au-  
2           thority pursuant to this subsection, to the maximum  
3           extent practicable, taking into consideration the na-  
4           ture of an identified cybersecurity threat and the ur-  
5           gency of need for action, the Secretary shall consult  
6           regarding implementation of actions that will effec-  
7           tively address the cybersecurity threat with—

8                   “(A) any entities potentially subject to the  
9                   cybersecurity threat that own, control, or oper-  
10                  ate bulk-power system facilities;

11                  “(B) the Electric Reliability Organization;

12                  “(C) the Electricity Sub-sector Coordi-  
13                  nating Council (as established by the Electric  
14                  Reliability Organization); and

15                  “(D) officials of other Federal departments  
16                  and agencies, as appropriate.

17           “(5) COST RECOVERY.—

18                   “(A) IN GENERAL.—The Commission shall  
19                   adopt regulations that permit entities subject to  
20                   an order under paragraph (1) to seek recovery  
21                   of prudently incurred costs required to imple-  
22                   ment actions ordered by the Secretary under  
23                   this subsection.

1                   “(B) REQUIREMENTS.—Any rate or charge  
2                   approved under regulations adopted pursuant to  
3                   this paragraph—

4                               “(i) shall be just and reasonable; and  
5                               “(ii) shall not be unduly discrimina-  
6                               tory or preferential.

7                   “(c) DURATION OF EMERGENCY ORDERS.—An order  
8                   issued by the Secretary pursuant to subsection (b) shall  
9                   remain in effect for not longer than the 30-day period be-  
10                   ginning on the effective date of the order, unless, during  
11                   that 30 day-period, the Secretary—

12                               “(1) provides to interested persons an oppor-  
13                               tunity to submit written data, recommendations, and  
14                               arguments; and

15                               “(2) affirms, amends, or repeals the order, sub-  
16                               ject to the condition that an amended order shall not  
17                               exceed a total duration of 90 days.

18                   “(d) PROTECTION AND SHARING OF CRITICAL ELEC-  
19                   TRIC INFRASTRUCTURE.—

20                               “(1) PROTECTION OF CRITICAL ELECTRIC IN-  
21                               FRASTRUCTURE.—Critical electric infrastructure in-  
22                               formation—

23                               “(A) shall be exempt from disclosure under  
24                               section 552(b)(3) of title 5, United States Code;  
25                               and

1           “(B) shall not be made available by any  
2           State, political subdivision, or tribal authority  
3           pursuant to any State, political subdivision, or  
4           tribal law requiring disclosure of information or  
5           records.

6           “(2) DESIGNATION AND SHARING OF CRITICAL  
7           ELECTRIC INFRASTRUCTURE INFORMATION.—Not  
8           later than 1 year after the date of enactment of this  
9           section, the Commission, in consultation with the  
10          Secretary of Energy, shall promulgate such regula-  
11          tions and issue such orders as necessary—

12                 “(A) to designate critical electric infra-  
13                 structure information;

14                 “(B) to prohibit the unauthorized disclo-  
15                 sure of critical electric infrastructure informa-  
16                 tion; and

17                 “(C) to ensure there are appropriate sanc-  
18                 tions in place for Commissioners, officers, em-  
19                 ployees, or agents of the Commission who  
20                 knowingly and willfully disclose critical electric  
21                 infrastructure information in a manner that is  
22                 not authorized under this section;

23           “(3) CONSIDERATIONS.—In promulgating regu-  
24          lations and issuing orders under paragraph (2), the

1 Commission shall take into consideration the role of  
2 State commissions in—

3 “(A) reviewing the prudence and cost of  
4 investments;

5 “(B) determining the rates and terms of  
6 conditions for electric services; and

7 “(C) ensuring the safety and reliability of  
8 the bulk-power system and distribution facilities  
9 within the respective jurisdictions of the State  
10 commissions.

11 “(4) NO REQUIRED SHARING OF INFORMA-  
12 TION.—Nothing in this section requires a person or  
13 entity in possession of critical electric infrastructure  
14 information to share the information with Federal,  
15 State, political subdivision, or tribal authorities, or  
16 any other person or entity.

17 “(5) DISCLOSURE OF NONCRITICAL ELECTRIC  
18 INFRASTRUCTURE INFORMATION.—In carrying out  
19 this section, the Commission shall segregate critical  
20 electric infrastructure information within documents  
21 and electronic communications, wherever feasible, to  
22 facilitate disclosure of information that is not des-  
23 ignated as critical electric infrastructure informa-  
24 tion.”.

1 **SEC. 2002. ENHANCED GRID SECURITY.**

2 (a) DEFINITIONS.—In this section:

3 (1) ELECTRIC UTILITY.—The term “electric  
4 utility” has the meaning given the term in section  
5 3 of the Federal Power Act (16 U.S.C. 796).

6 (2) ES-ISAC.—The term “ES-ISAC” means  
7 the Electricity Sector Information Sharing and  
8 Analysis Center.

9 (3) NATIONAL LABORATORY.—The term “Na-  
10 tional Laboratory” has the meaning given the term  
11 in section 2 of the Energy Policy Act of 2005 (42  
12 U.S.C. 15801).

13 (4) SECTOR-SPECIFIC AGENCY.—The term  
14 “Sector-Specific Agency” has the meaning given the  
15 term in the Presidential policy directive entitled  
16 “Critical Infrastructure Security and Resilience”,  
17 numbered 21, and dated February 12, 2013.

18 (b) SECTOR-SPECIFIC AGENCY FOR CYBERSECURITY  
19 FOR THE ENERGY SECTOR.—

20 (1) IN GENERAL.—The Department shall be the  
21 lead Sector-Specific Agency for cybersecurity for the  
22 energy sector.

23 (2) DUTIES.—As the designated Sector-Specific  
24 Agency for cybersecurity, the duties of the Depart-  
25 ment shall include—

- 1 (A) coordinating with the Department of  
2 Homeland Security and other relevant Federal  
3 departments and agencies;
- 4 (B) collaborating with—
- 5 (i) critical infrastructure owners and  
6 operators; and
- 7 (ii) as appropriate—
- 8 (I) independent regulatory agen-  
9 cies; and
- 10 (II) State, local, tribal and terri-  
11 torial entities;
- 12 (C) serving as a day-to-day Federal inter-  
13 face for the dynamic prioritization and coordi-  
14 nation of sector-specific activities;
- 15 (D) carrying out incident management re-  
16 sponsibilities consistent with applicable law (in-  
17 cluding regulations) and other appropriate poli-  
18 cies or directives;
- 19 (E) providing, supporting, or facilitating  
20 technical assistance and consultations for the  
21 energy sector to identify vulnerabilities and help  
22 mitigate incidents, as appropriate; and
- 23 (F) supporting the reporting requirements  
24 of the Department of Homeland Security under  
25 applicable law by providing, on an annual basis,

1 sector-specific critical infrastructure informa-  
2 tion.

3 (c) CYBERSECURITY FOR THE ENERGY SECTOR RE-  
4 SEARCH, DEVELOPMENT, AND DEMONSTRATION PRO-  
5 GRAM.—

6 (1) IN GENERAL.—The Secretary, in consulta-  
7 tion with appropriate Federal agencies, the energy  
8 sector, the States, and other stakeholders, shall  
9 carry out a program—

10 (A) to develop advanced cybersecurity ap-  
11 plications and technologies for the energy sec-  
12 tor—

13 (i) to identify and mitigate  
14 vulnerabilities, including—

15 (I) dependencies on other critical  
16 infrastructure; and

17 (II) impacts from weather and  
18 fuel supply; and

19 (ii) to advance the security of field de-  
20 vices and third-party control systems, in-  
21 cluding—

22 (I) systems for generation, trans-  
23 mission, distribution, end use, and  
24 market functions;

1 (II) specific electric grid elements  
2 including advanced metering, demand  
3 response, distributed generation, and  
4 electricity storage;

5 (III) forensic analysis of infected  
6 systems; and

7 (IV) secure communications;

8 (B) to leverage electric grid architecture as  
9 a means to assess risks to the energy sector, in-  
10 cluding by implementing an all-hazards ap-  
11 proach to communications infrastructure, con-  
12 trol systems architecture, and power systems  
13 architecture;

14 (C) to perform pilot demonstration projects  
15 with the energy sector to gain experience with  
16 new technologies; and

17 (D) to develop workforce development cur-  
18 ricula for energy sector-related cybersecurity.

19 (2) AUTHORIZATION OF APPROPRIATIONS.—

20 There is authorized to be appropriated to carry out  
21 this subsection \$65,000,000 for each of fiscal years  
22 2017 through 2025.

23 (d) ENERGY SECTOR COMPONENT TESTING FOR  
24 CYBERRESILIENCE PROGRAM.—

1           (1) IN GENERAL.—The Secretary shall carry  
2 out a program—

3           (A) to establish a cybertesting and mitiga-  
4 tion program to identify vulnerabilities of en-  
5 ergy sector supply chain products to known  
6 threats;

7           (B) to oversee third-party cybertesting;  
8 and

9           (C) to develop procurement guidelines for  
10 energy sector supply chain components.

11           (2) AUTHORIZATION OF APPROPRIATIONS.—

12 There is authorized to be appropriated to carry out  
13 this subsection \$15,000,000 for each of fiscal years  
14 2017 through 2025.

15           (e) ENERGY SECTOR OPERATIONAL SUPPORT FOR  
16 CYBERRESILIENCE PROGRAM.—

17           (1) IN GENERAL.—The Secretary may carry out  
18 a program—

19           (A) to enhance and periodically test—

20                   (i) the emergency response capabilities  
21 of the Department; and

22                   (ii) the coordination of the Depart-  
23 ment with other agencies, the National  
24 Laboratories, and private industry;

1 (B) to expand cooperation of the Depart-  
2 ment with the intelligence communities for en-  
3 ergy sector-related threat collection and anal-  
4 ysis;

5 (C) to enhance the tools of the Department  
6 and ES–ISAC for monitoring the status of the  
7 energy sector;

8 (D) to expand industry participation in  
9 ES–ISAC; and

10 (E) to provide technical assistance to small  
11 electric utilities for purposes of assessing  
12 cybermaturity level.

13 (2) AUTHORIZATION OF APPROPRIATIONS.—  
14 There is authorized to be appropriated to carry out  
15 this subsection \$10,000,000 for each of fiscal years  
16 2017 through 2025.

17 (f) MODELING AND ASSESSING ENERGY INFRA-  
18 STRUCTURE RISK.—

19 (1) IN GENERAL.—The Secretary shall develop  
20 an advanced energy security program to secure en-  
21 ergy networks, including electric, natural gas, and  
22 oil exploration, transmission, and delivery.

23 (2) SECURITY AND RESILIENCY OBJECTIVE.—  
24 The objective of the program developed under para-  
25 graph (1) is to increase the functional preservation

1 of the electric grid operations or natural gas and oil  
2 operations in the face of natural and human-made  
3 threats and hazards, including electric magnetic  
4 pulse and geomagnetic disturbances.

5 (3) ELIGIBLE ACTIVITIES.—In carrying out the  
6 program developed under paragraph (1), the Sec-  
7 retary may—

8 (A) develop capabilities to identify  
9 vulnerabilities and critical components that pose  
10 major risks to grid security if destroyed or im-  
11 paired;

12 (B) provide modeling at the national level  
13 to predict impacts from natural or human-made  
14 events;

15 (C) develop a maturity model for physical  
16 security and cybersecurity;

17 (D) conduct exercises and assessments to  
18 identify and mitigate vulnerabilities to the elec-  
19 tric grid, including providing mitigation rec-  
20 ommendations;

21 (E) conduct research hardening solutions  
22 for critical components of the electric grid;

23 (F) conduct research mitigation and recov-  
24 ery solutions for critical components of the elec-  
25 tric grid; and

1 (G) provide technical assistance to States  
2 and other entities for standards and risk anal-  
3 ysis.

4 (4) AUTHORIZATION OF APPROPRIATIONS.—  
5 There is authorized to be appropriated to carry out  
6 this subsection \$10,000,000 for each of fiscal years  
7 2017 through 2025.

8 (g) LEVERAGING EXISTING PROGRAMS.—The pro-  
9 grams established under this section shall be carried out  
10 consistent with—

11 (1) the report of the Department entitled  
12 “Roadmap to Achieve Energy Delivery Systems Cy-  
13 bersecurity” and dated 2011;

14 (2) existing programs of the Department; and

15 (3) any associated strategic framework that  
16 links together academic and National Laboratory re-  
17 searchers, electric utilities, manufacturers, and any  
18 other relevant private industry organizations, includ-  
19 ing the Electricity Sub-sector Coordinating Council.

20 (h) STUDY.—

21 (1) IN GENERAL.—Not later than 180 days  
22 after the date of enactment of this Act, the Sec-  
23 retary, in consultation with the Federal Energy Reg-  
24 ulatory Commission and the North American Elec-  
25 tric Reliability Corporation, shall conduct a study to

1 explore alternative management structures and fund-  
2 ing mechanisms to expand industry membership and  
3 participation in ES–ISAC.

4 (2) REPORT.—The Secretary shall submit to  
5 the appropriate committees of Congress a report de-  
6 scribing the results of the study conducted under  
7 paragraph (1).

## 8 **Subtitle B—Strategic Petroleum** 9 **Reserve**

### 10 **SEC. 2101. STRATEGIC PETROLEUM RESERVE MODERNIZA-** 11 **TION.**

12 (a) REAFFIRMATION OF POLICY.—Congress reaff-  
13 firms the continuing strategic importance and need for the  
14 Strategic Petroleum Reserve as found and declared in sec-  
15 tion 151 of the Energy Policy and Conservation Act (42  
16 U.S.C. 6231).

17 (b) SPR PETROLEUM ACCOUNT.—Section 167(b) of  
18 the Energy Policy and Conservation Act (42 U.S.C.  
19 6247(b)) is amended to read as follows:

20 “(b) OBLIGATION OF FUNDS FOR THE ACQUISITION,  
21 TRANSPORTATION, AND INJECTION OF PETROLEUM  
22 PRODUCTS INTO SPR AND FOR OTHER PURPOSES.—

23 “(1) PURPOSES.—Amounts in the Account may  
24 be obligated by the Secretary of Energy for—

1           “(A) the acquisition, transportation, and  
2 injection of petroleum products into the Re-  
3 serve;

4           “(B) test sales of petroleum products from  
5 the Reserve;

6           “(C) the drawdown, sale, and delivery of  
7 petroleum products from the Reserve;

8           “(D) the construction, maintenance, re-  
9 pair, and replacement of storage facilities and  
10 related facilities; and

11           “(E) carrying out non-Reserve projects  
12 needed to enhance the energy security of the  
13 United States by increasing the resilience, reli-  
14 ability, safety, and security of energy supply,  
15 transmission, storage, or distribution infrastruc-  
16 ture.

17           “(2) AMOUNTS.—Amounts in the Account may  
18 be obligated by the Secretary of Energy for purposes  
19 of paragraph (1), in the case of any fiscal year—

20           “(A) subject to section 660 of the Depart-  
21 ment of Energy Organization Act (42 U.S.C.  
22 7270), in such aggregate amounts as may be  
23 appropriated in advance in appropriations Acts;  
24 and

1           “(B) notwithstanding section 660 of the  
2           Department of Energy Organization Act (42  
3           U.S.C. 7270), in an aggregate amount equal to  
4           the aggregate amount of the receipts to the  
5           United States from the sale of petroleum prod-  
6           ucts in any drawdown and a distribution of the  
7           Reserve under section 161, including—

8                   “(i) a drawdown and distribution car-  
9                   ried out under subsection (g) of that sec-  
10                  tion; or

11                   “(ii) from the sale of petroleum prod-  
12                  ucts under section 160(f).

13           “(3) AVAILABILITY OF FUNDS.—Funds avail-  
14           able to the Secretary of Energy for obligation under  
15           this subsection may remain available without fiscal  
16           year limitation.”.

17           (c) DEFINITION OF RELATED FACILITY.—Section  
18           152(8) of the Energy Policy and Conservation Act (42  
19           U.S.C. 6232(8)) is amended by inserting “terminals,”  
20           after “reservoirs,”.

## 21                   **Subtitle C—Trade**

### 22           **SEC. 2201. ACTION ON APPLICATIONS TO EXPORT LIQUE-** 23           **FIED NATURAL GAS.**

24           (a) DECISION DEADLINE.—For proposals that must  
25           also obtain authorization from the Federal Energy Regu-

1 latory Commission or the Maritime Administration to site,  
2 construct, expand, or operate liquefied natural gas export  
3 facilities, the Secretary shall issue a final decision on any  
4 application for the authorization to export natural gas  
5 under section 3(a) of the Natural Gas Act (15 U.S.C.  
6 717b(a)) not later than 45 days after the later of—

7 (1) the conclusion of the review to site, con-  
8 struct, expand, or operate the liquefied natural gas  
9 export facilities required by the National Environ-  
10 mental Policy Act of 1969 (42 U.S.C. 4321 et seq.);  
11 or

12 (2) the date of enactment of this Act.

13 (b) CONCLUSION OF REVIEW.—For purposes of sub-  
14 section (a), review required by the National Environ-  
15 mental Policy Act of 1969 (42 U.S.C. 4321 et seq.) shall  
16 be considered concluded when the lead agency—

17 (1) for a project requiring an Environmental  
18 Impact Statement, publishes a Final Environmental  
19 Impact Statement;

20 (2) for a project for which an Environmental  
21 Assessment has been prepared, publishes a Finding  
22 of No Significant Impact; or

23 (3) determines that an application is eligible for  
24 a categorical exclusion pursuant to National Envi-

1       ronmental Policy Act of 1969 (42 U.S.C. 4321 et  
2       seq.) implementing regulations.

3       (c) JUDICIAL REVIEW.—

4             (1) IN GENERAL.—Except for review in the Su-  
5       preme Court, the United States Court of Appeals for  
6       the District of Columbia Circuit or the circuit in  
7       which the liquefied natural gas export facility will be  
8       located pursuant to an application described in sub-  
9       section (a) shall have original and exclusive jurisdic-  
10      tion over any civil action for the review of—

11             (A) an order issued by the Secretary with  
12             respect to such application; or

13             (B) the failure of the Secretary to issue a  
14             final decision on such application.

15             (2) ORDER.—If the Court in a civil action de-  
16       scribed in paragraph (1) finds that the Secretary  
17       has failed to issue a final decision on the application  
18       as required under subsection (a), the Court shall  
19       order the Secretary to issue the final decision not  
20       later than 30 days after the order of the Court.

21             (3) EXPEDITED CONSIDERATION.—The Court  
22             shall—

23             (A) set any civil action brought under this  
24             subsection for expedited consideration; and

1 (B) set the matter on the docket as soon  
2 as practicable after the filing date of the initial  
3 pleading.

4 (4) TRANSFERS.—In the case of an application  
5 described in subsection (a) for which a petition for  
6 review has been filed—

7 (A) upon motion by an applicant, the mat-  
8 ter shall be transferred to the United States  
9 Court of Appeals for the District of Columbia  
10 Circuit or the circuit in which a liquefied nat-  
11 ural gas export facility will be located pursuant  
12 to an application described in section 3(a) of  
13 the Natural Gas Act (15 U.S.C. 717b(a)); and

14 (B) the provisions of this section shall  
15 apply.

16 **SEC. 2202. PUBLIC DISCLOSURE OF LIQUEFIED NATURAL**  
17 **GAS EXPORT DESTINATIONS.**

18 Section 3 of the Natural Gas Act (15 U.S.C. 717b)  
19 is amended by adding at the end the following:

20 “(g) PUBLIC DISCLOSURE OF LNG EXPORT DES-  
21 TINATIONS.—

22 “(1) IN GENERAL.—In the case of any author-  
23 ization to export liquefied natural gas, the Secretary  
24 of Energy shall require the applicant to report to the  
25 Secretary of Energy the names of the 1 or more

1 countries of destination to which the exported lique-  
2 fied natural gas is delivered.

3 “(2) TIMING.—The applicant shall file the re-  
4 port required under paragraph (1) not later than—

5 “(A) in the case of the first export, the  
6 last day of the month following the month of  
7 the first export; and

8 “(B) in the case of subsequent exports, the  
9 date that is 30 days after the last day of the  
10 applicable month concerning the activity of the  
11 previous month.

12 “(3) DISCLOSURE.—The Secretary of Energy  
13 shall publish the information reported under this  
14 subsection on the website of the Department of En-  
15 ergy and otherwise make the information available  
16 to the public.”.

17 **SEC. 2203. ENERGY DATA COLLABORATION.**

18 (a) IN GENERAL.—The Administrator of the Energy  
19 Information Administration (referred to in this section as  
20 the “Administrator”) shall collaborate with the appro-  
21 priate officials in Canada and Mexico, as determined by  
22 the Administrator, to improve—

23 (1) the quality and transparency of energy data  
24 in North America through reconciliation of data on

1 energy trade flows among the United States, Can-  
2 ada, and Mexico;

3 (2) the extension of energy mapping capabilities  
4 in the United States, Canada, and Mexico; and

5 (3) the development of common energy data  
6 terminology among the United States, Canada, and  
7 Mexico.

8 (b) PERIODIC UPDATES.—The Administrator shall  
9 periodically submit to the Committee on Energy and Nat-  
10 ural Resources of the Senate and the Committee on En-  
11 ergy and Commerce of the House of Representatives an  
12 update on—

13 (1) the extent to which energy data is being  
14 shared under subsection (a); and

15 (2) whether forward-looking projections for re-  
16 gional energy flows are improving in accuracy as a  
17 result of the energy data sharing under that sub-  
18 section.

## 19 **Subtitle D—Electricity and Energy** 20 **Storage**

### 21 **SEC. 2301. GRID STORAGE PROGRAM.**

22 (a) IN GENERAL.—The Secretary shall conduct a  
23 program of research, development, and demonstration of  
24 electric grid energy storage that addresses the principal

1 challenges identified in the 2013 Department of Energy  
2 Strategic Plan for Grid Energy Storage.

3 (b) AREAS OF FOCUS.—The program under this sec-  
4 tion shall focus on—

5 (1) materials and electrochemical systems re-  
6 search;

7 (2) power conversion technologies research;

8 (3) developing—

9 (A) empirical and science-based industry  
10 standards to compare the storage capacity,  
11 cycle length and capabilities, and reliability of  
12 different types of electricity storage; and

13 (B) validation and testing techniques;

14 (4) other fundamental and applied research  
15 critical to widespread deployment of electricity stor-  
16 age;

17 (5) device development that builds on results  
18 from research described in paragraphs (1), (2), and  
19 (4), including combinations of power electronics, ad-  
20 vanced optimizing controls, and energy storage as a  
21 general purpose element of the electric grid;

22 (6) grid-scale testing and analysis of storage  
23 devices, including test-beds and field trials;

1           (7) cost-benefit analyses that inform capital ex-  
2           penditure planning for regulators and owners and  
3           operators of components of the electric grid;

4           (8) electricity storage device safety and reli-  
5           ability, including potential failure modes, mitigation  
6           measures, and operational guidelines;

7           (9) standards for storage device performance,  
8           control interface, grid interconnection, and inter-  
9           operability; and

10          (10) maintaining a public database of energy  
11          storage projects, policies, codes, standards, and reg-  
12          ulations.

13          (c) ASSISTANCE TO STATES.—The Secretary may  
14          provide technical and financial assistance to States, Indian  
15          tribes, or units of local government to participate in or  
16          use research, development, or deployment of technology  
17          developed under this section.

18          (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
19          authorized to be appropriated to the Secretary to carry  
20          out this section \$50,000,000 for each of fiscal years 2017  
21          through 2026.

22          (e) NO EFFECT ON OTHER PROVISIONS OF LAW.—  
23          Nothing in this subtitle or an amendment made by this  
24          subtitle authorizes regulatory actions that would duplicate  
25          or conflict with regulatory requirements, mandatory

1 standards, or related processes under section 215 of the  
2 Federal Power Act (16 U.S.C. 824o).

3 **SEC. 2302. ELECTRIC SYSTEM GRID ARCHITECTURE, SCE-**  
4 **NARIO DEVELOPMENT, AND MODELING.**

5 (a) GRID ARCHITECTURE AND SCENARIO DEVELOP-  
6 MENT.—

7 (1) IN GENERAL.—Subject to paragraph (2),  
8 the Secretary shall establish and facilitate a collabo-  
9 rative process to develop model grid architecture and  
10 a set of future scenarios for the electric system to  
11 examine the impacts of different combinations of re-  
12 sources (including different quantities of distributed  
13 energy resources and large-scale, central generation)  
14 on the electric grid.

15 (2) MARKET STRUCTURE.—The grid architec-  
16 ture and scenarios developed under paragraph (1)  
17 shall account for differences in market structure, in-  
18 cluding an examination of the potential for stranded  
19 costs in each type of market structure.

20 (3) FINDINGS.—Based on the findings of grid  
21 architecture developed under paragraph (1), the Sec-  
22 retary shall—

23 (A) determine whether any additional  
24 standards are necessary to ensure the interoper-

1 ability of grid systems and associated commu-  
2 nications networks; and

3 (B) if the Secretary makes a determination  
4 that additional standards are necessary under  
5 subparagraph (A), make recommendations for  
6 additional standards, including, as may be ap-  
7 propriate, to the Electric Reliability Organiza-  
8 tion under section 215 of the Federal Power  
9 Act (16 U.S.C. 824o).

10 (b) MODELING.—Subject to subsection (c), the Sec-  
11 retary shall—

12 (1) conduct modeling based on the scenarios de-  
13 veloped under subsection (a); and

14 (2) analyze and evaluate the technical and fi-  
15 nancial impacts of the models to assist States, utili-  
16 ties, and other stakeholders in—

17 (A) enhancing strategic planning efforts;

18 (B) avoiding stranded costs; and

19 (C) maximizing the cost-effectiveness of fu-  
20 ture grid-related investments.

21 (c) INPUT.—The Secretary shall develop the sce-  
22 narios and conduct the modeling and analysis under sub-  
23 sections (a) and (b) with participation or input, as appro-  
24 priate, from—

25 (1) the National Laboratories;

- 1 (2) States;
- 2 (3) State regulatory authorities;
- 3 (4) transmission organizations;
- 4 (5) representatives of the electric industry;
- 5 (6) academic institutions;
- 6 (7) independent research institutes; and
- 7 (8) other entities.

8 **SEC. 2303. TECHNOLOGY DEMONSTRATION ON THE DIS-**  
9 **TRIBUTION SYSTEM.**

10 (a) IN GENERAL.—The Secretary shall establish a  
11 grant program to carry out eligible projects related to the  
12 modernization of the electric grid, including the applica-  
13 tion of technologies to improve observability, advanced  
14 controls, and prediction of system performance on the dis-  
15 tribution system.

16 (b) ELIGIBLE PROJECTS.—To be eligible for a grant  
17 under subsection (a), a project shall—

18 (1) be designed to improve the performance and  
19 efficiency of the future electric grid, while ensuring  
20 the continued provision of safe, secure, reliable, and  
21 affordable power; and

22 (2) demonstrate—

23 (A) secure integration and management of  
24 2 or more energy resources, including distrib-  
25 uted energy generation, combined heat and

1 power, micro-grids, energy storage, electric ve-  
2 hicles, energy efficiency, demand response, and  
3 intelligent loads; and

4 (B) secure integration and interoperability  
5 of communications and information tech-  
6 nologies.

7 (c) PARTICIPATION.—Projects conducted under sub-  
8 section (b) shall include the participation of a partnership  
9 consisting of 2 or more entities that—

10 (1) may include

11 (A) any institution of higher education;

12 (B) a National Laboratory;

13 (C) a representative of a State or local  
14 government;

15 (D) a representative of an Indian tribe; or

16 (E) a Federal power marketing adminis-  
17 tration; and

18 (2) shall include at least 1 of any of—

19 (A) an investor-owned electric utility;

20 (B) a publicly owned utility;

21 (C) a technology provider;

22 (D) a rural electric cooperative;

23 (E) a regional transmission organization;

24 or

25 (F) an independent system operator

1 (d) CYBERSECURITY PLAN.—Each demonstration  
2 project conducted under subsection (a) shall include the  
3 development of a cybersecurity plan approved by the Sec-  
4 retary.

5 (e) PRIVACY RISK ANALYSIS.—Each demonstration  
6 project conducted under subsection (a) shall include a pri-  
7 vacy impact assessment that evaluates the project against  
8 the 5 core concepts in the Voluntary Code of Conduct of  
9 the Department, commonly known as the “DataGuard  
10 Energy Data Privacy Program”, or the most recent revi-  
11 sions to the privacy program of the Department.

12 **SEC. 2304. HYBRID MICRO-GRID SYSTEMS FOR ISOLATED**  
13 **AND RESILIENT COMMUNITIES.**

14 (a) DEFINITIONS.—In this section:

15 (1) HYBRID MICRO-GRID SYSTEM.—The term  
16 “hybrid micro-grid system” means a stand-alone  
17 electrical system that—

18 (A) is comprised of conventional generation  
19 and at least 1 alternative energy resource; and

20 (B) may use grid-scale energy storage.

21 (2) ISOLATED COMMUNITY.—The term “iso-  
22 lated community” means a community that is pow-  
23 ered by a stand-alone electric generation and dis-  
24 tribution system without the economic and reliability  
25 benefits of connection to a regional electric grid.

1           (3) MICRO-GRID SYSTEM.—The term “micro-  
2           grid system” means a standalone electrical system  
3           that uses grid-scale energy storage.

4           (4) STRATEGY.—The term “strategy” means  
5           the strategy developed pursuant to subsection  
6           (b)(2)(B).

7           (b) PROGRAM.—

8           (1) ESTABLISHMENT.—The Secretary shall es-  
9           tablish a program to promote the development of—

10           (A) hybrid micro-grid systems for isolated  
11           communities; and

12           (B) micro-grid systems to increase the re-  
13           silience of critical infrastructure.

14           (2) PHASES.—The program established under  
15           paragraph (1) shall be divided into the following  
16           phases:

17           (A) Phase I, which shall consist of the de-  
18           velopment of a feasibility assessment for—

19           (i) hybrid micro-grid systems in iso-  
20           lated communities; and

21           (ii) micro-grid systems to enhance the  
22           resilience of critical infrastructure.

23           (B) Phase II, which shall consist of the de-  
24           velopment of an implementation strategy, in ac-  
25           cordance with paragraph (3), to promote the

1 development of hybrid micro-grid systems for  
2 isolated communities, particularly for those  
3 communities exposed to extreme weather condi-  
4 tions and high energy costs, including elec-  
5 tricity, space heating and cooling, and transpor-  
6 tation.

7 (C) Phase III, which shall be carried out  
8 in parallel with Phase II and consist of the de-  
9 velopment of an implementation strategy to  
10 promote the development of micro-grid systems  
11 that increase the resilience of critical infrastruc-  
12 ture.

13 (D) Phase IV, which shall consist of cost-  
14 shared demonstration projects, based upon the  
15 strategies developed under subparagraph (B)  
16 that include the development of physical and cy-  
17 bersecurity plans to take appropriate measures  
18 to protect and secure the electric grid.

19 (E) Phase V, which shall establish a bene-  
20 fits analysis plan to help inform regulators, pol-  
21 icymakers, and industry stakeholders about the  
22 affordability, environmental and resilience bene-  
23 fits associated with Phases II, III and IV.

1           (3) REQUIREMENTS FOR STRATEGY.—In devel-  
2           oping the strategy under paragraph (2)(B), the Sec-  
3           retary shall consider—

4                   (A) establishing future targets for the eco-  
5                   nomic displacement of conventional generation  
6                   using hybrid micro-grid systems, including dis-  
7                   placement of conventional generation used for  
8                   electric power generation, heating and cooling,  
9                   and transportation;

10                   (B) the potential for renewable resources,  
11                   including wind, solar, and hydropower, to be in-  
12                   tegrated into a hybrid micro-grid system;

13                   (C) opportunities for improving the effi-  
14                   ciency of existing hybrid micro-grid systems;

15                   (D) the capacity of the local workforce to  
16                   operate, maintain, and repair a hybrid micro-  
17                   grid system;

18                   (E) opportunities to develop the capacity of  
19                   the local workforce to operate, maintain, and  
20                   repair a hybrid micro-grid system;

21                   (F) leveraging existing capacity within  
22                   local or regional research organizations, such as  
23                   organizations based at institutions of higher  
24                   education, to support development of hybrid  
25                   micro-grid systems, including by testing novel

1 components and systems prior to field deploy-  
2 ment;

3 (G) the need for basic infrastructure to de-  
4 velop, deploy, and sustain a hybrid micro-grid  
5 system;

6 (H) input of traditional knowledge from  
7 local leaders of isolated communities in the de-  
8 velopment of a hybrid micro-grid system;

9 (I) the impact of hybrid micro-grid systems  
10 on defense, homeland security, economic devel-  
11 opment, and environmental interests;

12 (J) opportunities to leverage existing inter-  
13 agency coordination efforts and recommenda-  
14 tions for new interagency coordination efforts to  
15 minimize unnecessary overhead, mobilization,  
16 and other project costs; and

17 (K) any other criteria the Secretary deter-  
18 mines appropriate.

19 (c) COLLABORATION.—The program established  
20 under subsection (b)(1) shall be carried out in collabora-  
21 tion with relevant stakeholders, including, as appro-  
22 priate—

23 (1) States;

24 (2) Indian tribes;

25 (3) regional entities and regulators;

- 1 (4) units of local government;
- 2 (5) institutions of higher education; and
- 3 (6) private sector entities.

4 (d) REPORT.—Not later than 180 days after the date  
5 of enactment of this Act, and annually thereafter, the Sec-  
6 retary shall submit to the Committee on Energy and Nat-  
7 ural Resources of the Senate and the Committee on En-  
8 ergy and Commerce of the House of Representatives a re-  
9 port on the efforts to implement the program established  
10 under subsection (b)(1) and the status of the strategy de-  
11 veloped under subsection (b)(2)(B).

12 **SEC. 2305. VOLUNTARY MODEL PATHWAYS.**

13 (a) ESTABLISHMENT OF VOLUNTARY MODEL PATH-  
14 WAYS.—

15 (1) ESTABLISHMENT.—Not later than 90 days  
16 after the date of enactment of this Act, the Sec-  
17 retary shall initiate the development of voluntary  
18 model pathways for modernizing the electric grid  
19 through a collaborative, public-private effort that—

20 (A) produces illustrative policy pathways  
21 that can be adapted for State and regional ap-  
22 plications by regulators and policymakers;

23 (B) facilitates the modernization of the  
24 electric grid to achieve the objectives described  
25 in paragraph (2);

1 (C) ensures a reliable, resilient, affordable,  
2 safe, and secure electric system; and

3 (D) acknowledges and provides for dif-  
4 ferent priorities, electric systems, and rate  
5 structures across States and regions.

6 (2) OBJECTIVES.—The pathways established  
7 under paragraph (1) shall facilitate achievement of  
8 the following objectives:

9 (A) Near real-time situational awareness of  
10 the electric system.

11 (B) Data visualization.

12 (C) Advanced monitoring and control of  
13 the advanced electric grid.

14 (D) Enhanced certainty for private invest-  
15 ment in the electric system.

16 (E) Increased innovation.

17 (F) Greater consumer empowerment.

18 (G) Enhanced grid resilience, reliability,  
19 and robustness.

20 (H) Improved—

21 (i) integration of distributed energy  
22 resources;

23 (ii) interoperability of the electric sys-  
24 tem; and

1 (iii) predictive modeling and capacity  
2 forecasting.

3 (3) STEERING COMMITTEE.—Not later than 90  
4 days after the date of enactment of this Act, the  
5 Secretary shall establish a steering committee to fa-  
6 cilitate the development of the pathways under para-  
7 graph (1), to be composed of members appointed by  
8 the Secretary, consisting of persons with appropriate  
9 expertise representing a diverse range of interests in  
10 the public, private, and academic sectors, including  
11 representatives of—

12 (A) the Smart Grid Task Force; and

13 (B) the Smart Grid Advisory Committee.

14 (b) TECHNICAL ASSISTANCE.—The Secretary may  
15 provide technical assistance to States, Indian tribes, or  
16 units of local government to adopt 1 or more elements of  
17 the pathways developed under subsection (a)(1).

18 **SEC. 2306. PERFORMANCE METRICS FOR ELECTRICITY IN-**

19 **FRASTRUCTURE PROVIDERS.**

20 (a) IN GENERAL.—Not later than 2 years after the  
21 date of enactment of this Act, the Secretary shall submit  
22 to the appropriate committees of Congress a report that  
23 includes—

24 (1) an evaluation of the performance of the  
25 electric grid as of the date of the report; and

1           (2) a description of the quantified costs and  
2           benefits associated with the changes evaluated under  
3           the scenarios developed under section 2302.

4           (b) CONSIDERATIONS FOR DEVELOPMENT OF  
5 METRICS.—In developing metrics for evaluating and  
6 quantifying the electric grid under subsection (a), the Sec-  
7 retary shall consider—

8           (1) standard methodologies for calculating im-  
9           provements or deteriorations in the performance  
10          metrics, such as reliability, grid efficiency, power  
11          quality, consumer satisfaction, sustainability, and fi-  
12          nancial incentives;

13          (2) standard methodologies for calculating value  
14          to ratepayers, including broad economic and related  
15          impacts from improvements to the performance  
16          metrics;

17          (3) appropriate ownership and operating roles  
18          for electric utilities that would enable improved per-  
19          formance through the adoption of emerging, com-  
20          mercially available or advanced grid technologies or  
21          solutions, including—

22                 (A) multicustomer micro-grids;

23                 (B) distributed energy resources;

24                 (C) energy storage;

25                 (D) electric vehicles;

1 (E) electric vehicle charging infrastructure;

2 (F) integrated information and commu-

3 nications systems;

4 (G) transactive energy systems; and

5 (H) advanced demand management sys-

6 tems; and

7 (4) with respect to States, the role of the grid

8 operator in enabling a robust future electric system

9 to ensure that—

10 (A) electric utilities remain financially via-

11 ble;

12 (B) electric utilities make the needed in-

13 vestments that ensure a reliable, secure, and re-

14 siliant grid; and

15 (C) costs incurred to transform to an inte-

16 grated grid are allocated and recovered respon-

17 sibly, efficiently, and equitably.

18 **SEC. 2307. STATE AND REGIONAL ELECTRICITY DISTRIBU-**

19 **TION PLANNING.**

20 (a) IN GENERAL.—Upon the request of a State or

21 regional organization, the Secretary shall partner with

22 States and regional organizations to facilitate the develop-

23 ment of State and regional electricity distribution plans

24 by—

1           (1) conducting a resource assessment and anal-  
2           ysis of future demand and distribution requirements;  
3           and

4           (2) developing open source tools for State and  
5           regional planning and operations.

6           (b) **RISK AND SECURITY ANALYSIS.**—The assessment  
7           under subsection (a)(1) shall include—

8           (1) the evaluation of the physical and cyberse-  
9           curity needs of an advanced distribution manage-  
10          ment system and the integration of distributed en-  
11          ergy resources; and

12          (2) advanced use of grid architecture to analyze  
13          risks in an all-hazards approach that includes com-  
14          munications infrastructure, control systems architec-  
15          ture, and power systems architecture.

16          (c) **TECHNICAL ASSISTANCE.**—For the purpose of de-  
17          veloping State and regional electricity distribution plans,  
18          the Secretary shall provide technical assistance to—

19               (1) States;

20               (2) regional reliability entities; and

21               (3) other distribution asset owners and opera-  
22          tors.

1 **SEC. 2308. AUTHORIZATION OF APPROPRIATIONS.**

2 There is authorized to be appropriated to the Sec-  
3 retary to carry out sections 2302 through 2307  
4 \$200,000,000 for each of fiscal years 2017 through 2026.

5 **SEC. 2309. ELECTRIC TRANSMISSION INFRASTRUCTURE**  
6 **PERMITTING.**

7 (a) INTERAGENCY RAPID RESPONSE TEAM FOR  
8 TRANSMISSION.—

9 (1) ESTABLISHMENT.—There is established an  
10 interagency rapid response team, to be known as the  
11 “Interagency Rapid Response Team for Trans-  
12 mission” (referred to in this subsection as the  
13 “Team”), to expedite and improve the permitting  
14 process for electric transmission infrastructure on  
15 Federal land and non-Federal land.

16 (2) MISSION.—The mission of the Team shall  
17 be—

18 (A) to improve the timeliness and effi-  
19 ciency of electric transmission infrastructure  
20 permitting; and

21 (B) to facilitate the performance of main-  
22 tenance and upgrades to electric transmission  
23 lines on Federal land and non-Federal land.

24 (3) MEMBERSHIP.—The Team shall be com-  
25 prised of representatives of—

- 1 (A) the Federal Energy Regulatory Com-  
2 mission;
- 3 (B) the Department;
- 4 (C) the Department of the Interior;
- 5 (D) the Department of Defense;
- 6 (E) the Department of Agriculture;
- 7 (F) the Council on Environmental Quality;
- 8 (G) the Department of Commerce;
- 9 (H) the Advisory Council on Historic Pres-  
10 ervation; and
- 11 (I) the Environmental Protection Agency.

12 (4) DUTIES.—The Team shall—

13 (A) facilitate coordination and unified envi-  
14 ronmental documentation among electric trans-  
15 mission infrastructure project applicants, Fed-  
16 eral agencies, States, and Indian tribes involved  
17 in the siting and permitting process;

18 (B) establish clear timelines for the review  
19 and coordination of electric transmission infra-  
20 structure projects by the applicable agencies;

21 (C) ensure that each electric transmission  
22 infrastructure project is posted on the Federal  
23 permitting transmission tracking system known  
24 as “e-Trans”, including information on the sta-

1           tus and anticipated completion date of each  
2           project; and

3           (D) regularly notify all participating mem-  
4           bers of the Team involved in any specific permit  
5           of—

6                   (i) any outstanding agency action that  
7                   is required with respect to the permit; and

8                   (ii) any approval or required comment  
9                   that has exceeded statutory or agency  
10                  timelines for completion, including an iden-  
11                  tification of any Federal agency, depart-  
12                  ment, or field office that has not met the  
13                  applicable timeline.

14           (5) ANNUAL REPORTS.—Annually, the Team  
15           shall submit to the Committee on Energy and Nat-  
16           ural Resources of the Senate and the Committee on  
17           Energy and Commerce of the House of Representa-  
18           tives a report that describes the average completion  
19           time for specific categories of regionally and nation-  
20           ally significant transmission projects, based on infor-  
21           mation obtained from the applicable Federal agen-  
22           cies.

23           (6) USE OF DATA BY OMB.—Using data pro-  
24           vided by the Team, the Director of the Office of  
25           Management and Budget shall prioritize inclusion of

1 individual electric transmission infrastructure  
2 projects on the website operated by the Office of  
3 Management and Budget in accordance with section  
4 1122 of title 31, United States Code.

5 (b) TRANSMISSION OMBUDSPERSON.—

6 (1) ESTABLISHMENT.—To enhance and ensure  
7 the reliability of the electric grid, there is established  
8 within the Council on Environmental Quality the po-  
9 sition of Transmission Ombudsperson (referred to in  
10 this subsection as the “Ombudsperson”), to provide  
11 a unified point of contact for—

12 (A) resolving interagency or intra-agency  
13 issues or delays with respect to electric trans-  
14 mission infrastructure permits; and

15 (B) receiving and resolving complaints  
16 from parties with outstanding or in-process ap-  
17 plications relating to electric transmission infra-  
18 structure.

19 (2) DUTIES.—The Ombudsperson shall—

20 (A) establish a process for—

21 (i) facilitating the permitting process  
22 for performance of maintenance and up-  
23 grades to electric transmission lines on  
24 Federal land and non-Federal land, with a  
25 special emphasis on facilitating access for

1                   immediate maintenance, repair, and vege-  
2                   tation management needs;

3                   (ii) resolving complaints filed with the  
4                   Ombudsperson with respect to in-process  
5                   electric transmission infrastructure per-  
6                   mits; and

7                   (iii) issuing recommended resolutions  
8                   to address the complaints filed with the  
9                   Ombudsperson; and

10                  (B) hear, compile, and share any com-  
11                  plaints filed with Ombudsperson relating to in-  
12                  process electric transmission infrastructure per-  
13                  mits.

14                  (c) AGREEMENTS.—

15                  (1) IN GENERAL.—The Secretary of the Inte-  
16                  rior, with respect to public lands (as defined in sec-  
17                  tion 103(e) of the Federal Land Policy and Manage-  
18                  ment Act (43 U.S.C. 1702(e)), and the Secretary of  
19                  Agriculture, with respect to National Forest System  
20                  land, shall provide for continuity of the existing use  
21                  and occupancy for the transmission of electric en-  
22                  ergy by any Federal department or agency granted  
23                  across public lands or National Forest System land.

24                  (2) AGREEMENTS.—The Secretary of the Inte-  
25                  rior or the Secretary of Agriculture, as applicable,

1 within 30 days after receiving a request from the  
2 Federal department or agency administering the  
3 electric energy transmission facilities, shall, in con-  
4 sultation with that department or agency, initiate  
5 agreements regarding the use and occupancy or  
6 right-of-way (including vegetation management  
7 agreements, where applicable).

8 **SEC. 2310. REPORT BY TRANSMISSION ORGANIZATIONS ON**  
9 **DISTRIBUTED ENERGY RESOURCES AND**  
10 **MICRO-GRID SYSTEMS.**

11 (a) DEFINITIONS.—In this section:

12 (1) DISTRIBUTED ENERGY RESOURCE.—The  
13 term “distributed energy resource” means an elec-  
14 tricity supply resource that, as permitted by State  
15 law—

16 (A)(i) is interconnected to the electric sys-  
17 tem operated by a transmission organization at  
18 or below 69kV; and

19 (ii) is subject to dispatch by the trans-  
20 mission organization; and

21 (B)(i) generates electricity using any pri-  
22 mary energy source, including solar energy and  
23 other renewable resources; or

24 (ii) stores energy and is capable of sup-  
25 plying electricity to the electric system operated

1           by the transmission organization from the stor-  
2           age reservoir.

3           (2) ELECTRIC GENERATING CAPACITY RE-  
4           SOURCE.—The term “electric generating capacity re-  
5           source” means an electric generating resource, as  
6           measured by the maximum load-carrying ability of  
7           the resource, exclusive of station use and planned,  
8           unplanned, or other outage or derating, that is sub-  
9           ject to dispatch by a transmission organization to  
10          meet the resource adequacy needs of the systems op-  
11          erated by the transmission organization.

12          (3) MICRO-GRID SYSTEM.—The term “micro-  
13          grid system” means an electrically distinct system  
14          under common control that—

15                (A) serves an electric load at or below  
16                69kV from a distributed energy resource or  
17                electric generating capacity resource; and

18                (B) is subject to dispatch by a trans-  
19                mission organization.

20          (4) TRANSMISSION ORGANIZATION.—The term  
21          “transmission organization” has the meaning given  
22          the term in section 3 of the Federal Power Act (16  
23          U.S.C. 796).

24          (b) REPORT.—

1           (1) NOTICE.—Not later than 14 days after the  
2           date of enactment of this section, the Commission  
3           shall submit to each transmission organization no-  
4           tice that the transmission organization is required to  
5           file with the Commission a report in accordance with  
6           paragraph (2).

7           (2) REPORT.—Not later than 180 days after  
8           the date on which a transmission organization re-  
9           ceives a notice under paragraph (1), the trans-  
10          mission organization shall submit to the Commission  
11          a report that—

12                   (A)(i) identifies distributed energy re-  
13                   sources and micro-grid systems that are subject  
14                   to dispatch by the transmission organization as  
15                   of the date of the report; and

16                   (ii) describes the fuel sources and oper-  
17                   ational characteristics of such distributed en-  
18                   ergy resources and micro-grid systems, includ-  
19                   ing, to the extent practicable, a discussion of  
20                   the benefits and costs associated with the dis-  
21                   tributed energy resources and micro-grid sys-  
22                   tems identified under clause (i);

23                   (B) evaluates, with due regard for oper-  
24                   ational and economic benefits and costs, the po-  
25                   tential for distributed energy resources and

1 micro-grid systems to be deployed to the trans-  
2 mission organization over the short- and long-  
3 term periods in the planning cycle of the trans-  
4 mission organization; and

5 (C) identifies—

6 (i) over the short- and long-term peri-  
7 ods in the planning cycle of the trans-  
8 mission organization, barriers to the de-  
9 ployment to the transmission organization  
10 of distributed energy resources and micro-  
11 grid systems; and

12 (ii) potential changes to the oper-  
13 ational requirements for, or charges associ-  
14 ated with, the interconnection of distrib-  
15 uted energy resources and micro-grid sys-  
16 tems to the transmission organization that  
17 would reduce the barriers identified under  
18 clause (i).

19 **SEC. 2311. NET METERING STUDY GUIDANCE.**

20 Title XVIII of Energy Policy Act of 2005 (Public  
21 Law 109–58; 119 Stat. 1122) is amended by adding at  
22 the end the following:

23 **“SEC. 1841. NET ENERGY METERING STUDY.**

24 “(a) IN GENERAL.—Not later than 180 days after  
25 the date of enactment of this Act, the Secretary shall—

1           “(1) issue guidance on criteria required to be  
2 included in studies of net metering conducted by the  
3 Department; and

4           “(2) undertake a study of net energy metering.

5           “(b) REQUIREMENTS AND CONTENTS.—The model  
6 guidance issued under subsection (a) shall clarify without  
7 prejudice to other study criteria that any study of net en-  
8 ergy metering, including the study conducted by the De-  
9 partment under subsection (a) shall—

10           “(1) be publicly available; and

11           “(2) assess benefits and costs of net energy me-  
12 tering, including—

13           “(A) load data, including hourly profiles;

14           “(B) distributed generation production  
15 data;

16           “(C) best available technology, including  
17 inverter capability; and

18           “(D) benefits and costs of distributed en-  
19 ergy deployment, including—

20           “(i) environmental benefits;

21           “(ii) changes in electric system reli-  
22 ability;

23           “(iii) changes in peak power require-  
24 ments;

1                   “(iv) provision of ancillary services,  
2                   including reactive power;  
3                   “(v) changes in power quality;  
4                   “(vi) changes in land-use effects;  
5                   “(vii) changes in right-of-way acquisi-  
6                   tion costs;  
7                   “(viii) changes in vulnerability to ter-  
8                   rorism; and  
9                   “(ix) changes in infrastructure resil-  
10                  ience.”.

## 11                   **Subtitle E—Computing**

### 12                  **SEC. 2401. EXASCALE COMPUTER RESEARCH PROGRAM.**

#### 13                  (a) RENAMING OF ACT.—

14                   (1) IN GENERAL.—Section 1 of the Department  
15                   of Energy High-End Computing Revitalization Act  
16                   of 2004 (15 U.S.C. 5501 note; Public Law 108–  
17                   423) is amended by striking “Department of Energy  
18                   High-End Computing Revitalization Act of 2004”  
19                   and inserting “Exascale Computing Act of 2015”.

20                   (2) CONFORMING AMENDMENT.—Section  
21                   976(a)(1) of the Energy Policy Act of 2005 (42  
22                   U.S.C. 16316(1)) is amended by striking “Depart-  
23                   ment of Energy High-End Computing Revitalization  
24                   Act of 2004” and inserting “Exascale Computing  
25                   Act of 2015”.

1 (b) DEFINITIONS.—Section 2 of the Exascale Com-  
2 puting Act of 2015 (15 U.S.C. 5541) is amended—

3 (1) by redesignating paragraphs (2) through  
4 (5) as paragraphs (3) through (6), respectively;

5 (2) by striking paragraph (1) and inserting the  
6 following:

7 “(1) DEPARTMENT.—The term ‘Department’  
8 means the Department of Energy.

9 “(2) EXASCALE COMPUTING.—The term  
10 ‘exascale computing’ means computing through the  
11 use of a computing machine that performs near or  
12 above 10 to the 18th power floating point operations  
13 per second.”; and

14 (3) in paragraph (6) (as redesignated by para-  
15 graph (1)), by striking “, acting through the Direc-  
16 tor of the Office of Science of the Department of  
17 Energy”.

18 (c) DEPARTMENT OF ENERGY HIGH-END COM-  
19 PUTING RESEARCH AND DEVELOPMENT PROGRAM.—Sec-  
20 tion 3 of the Exascale Computing Act of 2015 (15 U.S.C.  
21 5542) is amended—

22 (1) in subsection (a)(1), by striking “program”  
23 and inserting “coordinated program across the De-  
24 partment”;

1           (2) in subsection (b)(2), by striking “, which  
2           may” and all that follows through “architectures”;  
3           and

4           (3) by striking subsection (d) and inserting the  
5           following:

6           “(d) EXASCALE COMPUTING PROGRAM.—

7           “(1) IN GENERAL.—The Secretary shall con-  
8           duct a research program (referred to in this sub-  
9           section as the ‘Program’) to develop 2 or more  
10          exascale computing machine architectures to pro-  
11          mote the missions of the Department.

12          “(2) IMPLEMENTATION.—

13          “(A) IN GENERAL.—In carrying out the  
14          Program, the Secretary shall—

15                  “(i) establish 2 or more National Lab-  
16                  oratory partnerships with industry part-  
17                  ners and institutions of higher education  
18                  for the research and development of 2 or  
19                  more exascale computing architectures  
20                  across all applicable organizations of the  
21                  Department; and

22                  “(ii) provide, as appropriate, on a  
23                  competitive, merit-reviewed basis, access  
24                  for researchers in industries in the United  
25                  States, institutions of higher education,

1 National Laboratories, and other Federal  
2 agencies to the exascale computing systems  
3 developed pursuant to clause (i).

4 “(B) SELECTION OF PARTNERS.—The Sec-  
5 retary shall select members for the partnerships  
6 with the computing facilities of the Department  
7 under subparagraph (A) through a competitive,  
8 peer-review process.

9 “(3) CODESIGN AND APPLICATION DEVELOP-  
10 MENT.—

11 “(A) IN GENERAL.—The Secretary shall  
12 carry out the Program through an integration  
13 of applications, computer science, applied math-  
14 ematics, and computer hardware architecture  
15 using the partnerships established pursuant to  
16 paragraph (2) to ensure that, to the maximum  
17 extent practicable, 2 or more exascale com-  
18 puting machine architectures are capable of  
19 solving Department target applications and  
20 broader scientific problems.

21 “(B) REPORT.—The Secretary shall sub-  
22 mit to Congress a report on how the integration  
23 under subparagraph (A) is furthering applica-  
24 tion science data and computational workloads  
25 across application interests, including national

1 security, material science, physical science, cy-  
2 bersecurity, biological science, the Materials Ge-  
3 nome and BRAIN Initiatives of the President,  
4 advanced manufacturing, and the national elec-  
5 tric grid.

6 “(4) PROJECT REVIEW.—

7 “(A) IN GENERAL.—The exascale architec-  
8 tures developed pursuant to partnerships estab-  
9 lished pursuant to paragraph (2) shall be re-  
10 viewed through a project review process.

11 “(B) REPORT.—Not later than 90 days  
12 after the date of enactment of this subsection,  
13 the Secretary shall submit to Congress a report  
14 on—

15 “(i) the results of the review con-  
16 ducted under subparagraph (A); and

17 “(ii) the coordination and manage-  
18 ment of the Program to ensure an inte-  
19 grated research program across the De-  
20 partment.

21 “(5) ANNUAL REPORTS.—At the time of the  
22 budget submission of the Department for each fiscal  
23 year, the Secretary, in consultation with the mem-  
24 bers of the partnerships established pursuant to  
25 paragraph (2), shall submit to Congress a report

1 that describes funding for the Program as a whole  
2 by functional element of the Department and critical  
3 milestones.”.

4 (d) AUTHORIZATION OF APPROPRIATIONS.—Section  
5 4 of the Exascale Computing Act of 2015 (15 U.S.C.  
6 5543) is amended—

7 (1) by striking “this Act” and inserting “sec-  
8 tion 3(d)”; and

9 (2) by striking paragraphs (1) through (3) and  
10 inserting the following:

11 “(1) \$272,000,000 for fiscal year 2016;

12 “(2) \$340,000,000 for fiscal year 2017; and

13 “(3) \$360,000,000 for fiscal year 2018.”.

14 **TITLE III—SUPPLY**  
15 **Subtitle A—Renewables**

16 **PART I—HYDROELECTRIC**

17 **SEC. 3001. HYDROPOWER REGULATORY IMPROVEMENTS.**

18 (a) SENSE OF CONGRESS ON THE USE OF HYDRO-  
19 POWER RENEWABLE RESOURCES.—It is the sense of Con-  
20 gress that—

21 (1) hydropower is a renewable resource for pur-  
22 poses of all Federal programs and is an essential  
23 source of energy in the United States; and

24 (2) the United States should increase substan-  
25 tially the capacity and generation of clean, renewable

1       hydropower resources that would improve environ-  
2       mental quality in the United States.

3       (b) **MODIFYING THE DEFINITION OF RENEWABLE**  
4 **ENERGY TO INCLUDE HYDROPOWER.**—Section 203 of the  
5 Energy Policy Act of 2005 (42 U.S.C. 15852) is amend-  
6 ed—

7           (1) in subsection (a), by striking “the following  
8       amounts” and all that follows through paragraph (3)  
9       and inserting “not less than 15 percent in fiscal year  
10      2016 and each fiscal year thereafter shall be renew-  
11      able energy.” ; and

12          (2) in subsection (b), by striking paragraph (2)  
13      and inserting the following:

14           “(2) **RENEWABLE ENERGY.**—The term ‘renew-  
15      able energy’ means energy produced from solar,  
16      wind, biomass, landfill gas, ocean (including tidal,  
17      wave, current, and thermal), geothermal, municipal  
18      solid waste, or hydropower.”.

19      (c) **LICENSES FOR CONSTRUCTION.**—Section 4(e) of  
20 the Federal Power Act (16 U.S.C. 797(e)) is amended,  
21 in the first proviso, by striking “deem” and inserting “de-  
22 termine to be”.

23      (d) **PRELIMINARY PERMITS.**—Section 5 of the Fed-  
24 eral Power Act (16 U.S.C. 798) is amended—

1           (1) in subsection (a), by striking “three” and  
2           inserting “4”; and

3           (2) in subsection (b)—

4                 (A) by striking “Commission may extend  
5                 the period of a preliminary permit once for not  
6                 more than 2 additional years beyond the 3  
7                 years” and inserting the following: “Commis-  
8                 sion may—

9                 “(1) extend the period of a preliminary permit  
10                once for not more than 4 additional years beyond  
11                the 4 years”;

12                (B) by striking the period at the end and  
13                inserting “; and”; and

14                (C) by adding at the end the following:

15                “(2) after the end of an extension period grant-  
16                ed under paragraph (1), issue an additional permit  
17                to the permittee if the Commission determines that  
18                there are extraordinary circumstances that warrant  
19                the issuance of the additional permit.”.

20           (e) TIME LIMIT FOR CONSTRUCTION OF PROJECT  
21           WORKS.—Section 13 of the Federal Power Act (16 U.S.C.  
22           806) is amended in the second sentence by striking “once  
23           but not longer than two additional years” and inserting  
24           “for not more than 8 additional years,”.

1 (f) LICENSE TERM.—Section 15(e) of the Federal  
2 Power Act (16 U.S.C. 808(e)) is amended—

3 (1) by striking “(e) Except” and inserting the  
4 following:

5 “(e) LICENSE TERM ON RELICENSING.—

6 “(1) IN GENERAL.—Except”; and

7 (2) by adding at the end the following:

8 “(2) CONSIDERATION.—In determining the  
9 term of a license under paragraph (1), the Commis-  
10 sion shall consider project-related investments by the  
11 licensee over the term of the existing license (includ-  
12 ing any terms under annual licenses) that resulted  
13 in new development, construction, capacity, effi-  
14 ciency improvements, or environmental measures,  
15 but which did not result in the extension of the term  
16 of the license by the Commission.”.

17 (g) OPERATION OF NAVIGATION FACILITIES.—Sec-  
18 tion 18 of the Federal Power Act (16 U.S.C. 811) is  
19 amended by striking the second, third, and fourth sen-  
20 tences.

21 (h) ALTERNATIVE CONDITIONS AND PRESCRIP-  
22 TIONS.—Section 33 of the Federal Power Act (16 U.S.C.  
23 823d) is amended—

24 (1) in subsection (a)—

1 (A) in paragraph (1), by striking “deems”  
2 and inserting “determines”;

3 (B) in paragraph (2)(B), in the matter  
4 preceding clause (i), by inserting “determined  
5 to be necessary” before “by the Secretary”;

6 (C) by striking paragraph (4); and

7 (D) by striking paragraph (5);

8 (2) in subsection (b)—

9 (A) by striking paragraph (4); and

10 (B) by striking paragraph (5); and

11 (3) by adding at the end the following:

12 “(c) FURTHER CONDITIONS.—This section applies to  
13 any further conditions or prescriptions proposed or im-  
14 posed pursuant to section 4(e), 6, or 18.”.

15 (i) LICENSING PROCESS IMPROVEMENTS AND CO-  
16 ORDINATION.—Part I of the Federal Power Act (16  
17 U.S.C. 792 et seq.) is amended by adding at the end the  
18 following:

19 **“SEC. 34. LICENSING PROCESS IMPROVEMENTS.**

20 “(a) LICENSE STUDIES.—

21 “(1) IN GENERAL.—To facilitate the timely and  
22 efficient completion of the license proceedings under  
23 this part, the Commission shall—

24 “(A) conduct an investigation of best prac-  
25 tices in performing licensing studies, including

1 methodologies and the design of studies to as-  
2 sess the full range of environmental impacts of  
3 a project;

4 “(B) compile a comprehensive collection of  
5 studies and data accessible to the public that  
6 could be used to inform license proceedings  
7 under this paragraph; and

8 “(C) encourage license applicants and co-  
9 operating agencies to develop and use, for the  
10 purpose of fostering timely and efficient consid-  
11 eration of license applications, a limited number  
12 of open-source methodologies and tools applica-  
13 ble across a wide array of projects, including  
14 water balance models and streamflow analyses.

15 “(2) USE OF EXISTING STUDIES.—To the max-  
16 imum extent practicable, the Commission shall use  
17 existing studies and data in individual licensing pro-  
18 ceedings under this part in accordance with para-  
19 graph (1).

20 “(3) NONDUPLICATION REQUIREMENT.—To the  
21 maximum extent practicable, the Commission shall  
22 ensure that studies and data required for any Fed-  
23 eral authorization (as defined in section 35(a)) ap-  
24 plicable to a particular project or facility are not du-

1 plicated in other licensing proceedings under this  
2 part.

3 “(4) BIOLOGICAL OPINIONS.—To the maximum  
4 extent practicable, the Secretary of Commerce shall  
5 ensure that relevant offices within the National Ma-  
6 rine Fisheries Service prepare any biological opinion  
7 under section 7 of the Endangered Species Act of  
8 1973 (16 U.S.C. 1536) that forms the basis for a  
9 prescription under section 18 on a concurrent rather  
10 than sequential basis.

11 “(5) WATER QUALITY CERTIFICATION DEAD-  
12 LINE.—

13 “(A) IN GENERAL.—For purposes of  
14 issuing a license under this part, the deadline  
15 for a certifying agency to act under section  
16 401(a) of the Federal Water Pollution Control  
17 Act (33 U.S.C. 1341(a)) shall take effect only  
18 on the submission of a request for certification  
19 determined to be complete by the certifying  
20 agency.

21 “(B) NOTICE OF COMPLETE REQUEST.—  
22 The certifying agency shall inform the Commis-  
23 sion when a request for certification is deter-  
24 mined to be complete.

1 **“SEC. 35. LICENSING PROCESS COORDINATION.**

2 “(a) DEFINITION OF FEDERAL AUTHORIZATION.—In  
3 this section, the term ‘Federal authorization’ means any  
4 authorization required under Federal law (including any  
5 license, permit, special use authorization, certification,  
6 opinion, consultation, determination, or other approval)  
7 with respect to—

8 “(1) a project licensed under section 4 or 15;  
9 or

10 “(2) a facility exempted under—

11 “(A) section 30; or

12 “(B) section 405(d) of the Public Utility  
13 Regulatory Policies Act of 1978 (16 U.S.C.  
14 2705(d)).

15 “(b) DESIGNATION AS LEAD AGENCY.—

16 “(1) IN GENERAL.—The Commission shall act  
17 as the lead agency for the purposes of coordinating  
18 all applicable Federal authorizations.

19 “(2) OTHER AGENCIES.—Each Federal and  
20 State agency considering an aspect of an application  
21 for Federal authorization shall cooperate with the  
22 Commission.

23 “(c) SCHEDULE.—

24 “(1) TIMING FOR ISSUANCE.—It is the sense of  
25 Congress that all Federal authorizations required for  
26 a project or facility, including a license or exemption

1 order of the Commission, should be issued by the  
2 date that is 3 years after the date on which an ap-  
3 plication is considered to be complete by the Com-  
4 mission.

5 “(2) COMMISSION SCHEDULE.—

6 “(A) IN GENERAL.—The Commission shall  
7 establish a schedule for the issuance of all Fed-  
8 eral authorizations.

9 “(B) REQUIREMENTS.—In establishing the  
10 schedule under subparagraph (A), the Commis-  
11 sion shall—

12 “(i) consult and cooperate with the  
13 Federal and State agencies responsible for  
14 a Federal authorization;

15 “(ii) ensure the expeditious comple-  
16 tion of all proceedings relating to a Fed-  
17 eral authorization; and

18 “(iii) comply with applicable schedules  
19 established by Federal law with respect to  
20 a Federal authorization.

21 “(3) RESOLUTION OF INTERAGENCY DIS-  
22 PUTES.—If the Federal agency fails to adhere to the  
23 schedule established by the Commission under para-  
24 graph (2), or if the final condition of the Secretary  
25 under section 4(e) or prescription under section 18

1 has been unreasonably delayed in derogation of the  
2 schedule established under paragraph (2), or if a  
3 proposed alternative condition or prescription has  
4 been unreasonably denied, or if a final condition or  
5 prescription would be inconsistent with the purposes  
6 of this part or other applicable law, the Commission  
7 may refer the matter to the Chairman of the Council  
8 on Environmental Quality—

9 “(A) to ensure timely participation;

10 “(B) to ensure a timely decision;

11 “(C) to mediate the dispute; or

12 “(D) to refer the matter to the President.

13 “(d) CONSOLIDATED RECORD.—

14 “(1) IN GENERAL.—The Commission shall  
15 maintain official consolidated records of all license  
16 proceedings under this part.

17 “(2) SUBMISSION OF RECOMMENDATIONS.—

18 Any Federal or State agency that is providing rec-  
19 ommendations with respect to a license proceeding  
20 under this part shall submit to the Commission for  
21 inclusion in the consolidated record relating to the li-  
22 cense proceeding maintained under paragraph (1)—

23 “(A) the recommendations;

24 “(B) the rationale for the recommenda-

25 tions; and

1                   “(C) any supporting materials relating to  
2                   the recommendations.

3                   “(3) WRITTEN STATEMENT.—In a case in  
4                   which a Federal agency is making a determination  
5                   with respect to a covered measure (as defined in sec-  
6                   tion 36(a)), the head of the Federal agency shall in-  
7                   clude in the consolidated record a written statement  
8                   demonstrating that the Federal agency gave equal  
9                   consideration to the effects of the covered measure  
10                  on—

11                   “(A) energy supply, distribution, cost, and  
12                  use;

13                   “(B) flood control;

14                   “(C) navigation;

15                   “(D) water supply; and

16                   “(E) air quality and the preservation of  
17                  other aspects of environmental quality.

18 **“SEC. 36. TRIAL-TYPE HEARINGS.**

19                  “(a) DEFINITION OF COVERED MEASURE.—In this  
20                  section, the term ‘covered measure’ means—

21                   “(1) a condition prescribed under section 4(e),  
22                  including an alternative condition proposed under  
23                  section 33(a);

1           “(2) fishways prescribed under section 18, in-  
2           cluding an alternative prescription proposed under  
3           section 33(b); or

4           “(3) any further condition pursuant to section  
5           4(e), 6, or 18.

6           “(b) AUTHORIZATION OF TRIAL-TYPE HEARING.—

7           The license applicant (including an applicant for a license  
8           under section 15) and any party to the proceeding shall  
9           be entitled to a determination on the record, after oppor-  
10          tunity for a trial-type hearing of not more than 120 days,  
11          on any disputed issues of material fact with respect to an  
12          applicable covered measure.

13          “(c) DEADLINE FOR REQUEST.—A request for a  
14          trial-type hearing under this section shall be submitted not  
15          later than 60 days after the date on which, as applicable—

16                 “(1) the Secretary submits the condition under  
17                 section 4(e) or prescription under section 18; or

18                 “(2)(A) the Commission publishes notice of the  
19                 intention to use the reserved authority of the Com-  
20                 mission to order a further condition under section 6;  
21                 or

22                 “(B) the Secretary exercises reserved authority  
23                 under the license to prescribe, submit, or revise any  
24                 condition to a license under the first proviso of sec-

1       tion 4(e) or fishway prescribed under section 18, as  
2       appropriate.

3       “(d) NO REQUIREMENT TO EXHAUST.—By electing  
4 not to request a trial-type hearing under subsection (d),  
5 a license applicant and any other party to a license pro-  
6 ceeding shall not be considered to have waived the right  
7 of the applicant or other party to raise any issue of fact  
8 or law in a non-trial-type proceeding, but no issue may  
9 be raised for the first time on rehearing or judicial review  
10 of the license decision of the Commission.

11       “(e) ADMINISTRATIVE LAW JUDGE.—All disputed  
12 issues of material fact raised by a party in a request for  
13 a trial-type hearing submitted under subsection (d) shall  
14 be determined in a single trial-type hearing to be con-  
15 ducted by an Administrative Law Judge within the Office  
16 of Administrative Law Judges and Dispute Resolution of  
17 the Commission, in accordance with the Commission rules  
18 of practice and procedure under part 385 of title 18, Code  
19 of Federal Regulations (or successor regulations), and  
20 within the timeframe established by the Commission for  
21 each license proceeding (including a proceeding for a li-  
22 cense under section 15) under section 35(c).

23       “(f) STAY.—The Administrative Law Judge may im-  
24 pose a stay of a trial-type hearing under this section for  
25 a period of not more than 120 days to facilitate settlement

1 negotiations relating to resolving the disputed issues of  
2 material fact with respect to the covered measure.

3 “(g) DECISION OF THE ADMINISTRATIVE LAW  
4 JUDGE.—

5 “(1) CONTENTS.—The decision of the Adminis-  
6 trative Law Judge shall contain—

7 “(A) findings of fact on all disputed issues  
8 of material fact;

9 “(B) conclusions of law necessary to make  
10 the findings of fact, including rulings on mate-  
11 riality and the admissibility of evidence; and

12 “(C) reasons for the findings and conclu-  
13 sions.

14 “(2) LIMITATION.—The decision of the Admin-  
15 istrative Law Judge shall not contain conclusions as  
16 to whether—

17 “(A) any condition or prescription should  
18 be adopted, modified, or rejected; or

19 “(B) any alternative condition or prescrip-  
20 tion should be adopted, modified, or rejected.

21 “(3) FINALITY.—A decision of an Administra-  
22 tive Law Judge under this section with respect to a  
23 disputed issue of material fact shall not be subject  
24 to further administrative review.

1           “(4) SERVICE.—The Administrative Law Judge  
2 shall serve the decision on each party to the hearing  
3 and forward the complete record of the hearing to  
4 the Commission and the Secretary that proposed the  
5 original condition or prescription.

6           “(h) SECRETARIAL DETERMINATION.—

7           “(1) IN GENERAL.—Not later than 60 days  
8 after the date on which the Administrative Law  
9 Judge issues the decision under subsection (g) and  
10 in accordance with the schedule established by the  
11 Commission under section 35(c), the Secretary pro-  
12 posing a condition under section 4(e) or a prescrip-  
13 tion under section 18 shall file with the Commission  
14 a final determination to adopt, modify, or withdraw  
15 any condition or prescription that was the subject of  
16 a hearing under this section, based on the decision  
17 of the Administrative Law Judge.

18           “(2) RECORD OF DETERMINATION.—The final  
19 determination of the Secretary filed with the Com-  
20 mission shall identify the reasons for the decision  
21 and any considerations taken into account that were  
22 not part of, or inconsistent with, the findings of the  
23 Administrative Law Judge and shall be included in  
24 the consolidated record in section 35(d).

1           “(i) LICENSING DECISION OF THE COMMISSION.—  
2 Notwithstanding sections 4(e) and 18, if the Commission  
3 finds that the final condition or prescription of the Sec-  
4 retary is inconsistent with the purposes of this part or  
5 other applicable law, the Commission may refer the matter  
6 to the Chairman of the Council on Environmental Quality  
7 under section 35(c).

8           “(j) JUDICIAL REVIEW.—The decision of the Admin-  
9 istrative Law Judge and the record of determination of  
10 the Secretary shall be included in the record of the appli-  
11 cable licensing proceeding and subject to judicial review  
12 of the final licensing decision of the Commission under  
13 section 313(b).

14 **“SEC. 37. PUMPED STORAGE PROJECTS.**

15           “‘In carrying out section 6(a) of the Hydropower Reg-  
16 ulatory Efficiency Act of 2013 (16 U.S.C. 797 note; Pub-  
17 lic Law 113–23), the Commission shall consider a closed  
18 loop pumped storage project to include a project—

19                   “(1) in which the upper and lower reservoirs do  
20 not impound or directly withdraw water from a navi-  
21 gable stream; or

22                   “(2) that is not continuously connected to a  
23 naturally flowing water feature.

24 **“SEC. 38. ANNUAL REPORTS.**

25           “(a) COMMISSION ANNUAL REPORT.—

1           “(1) IN GENERAL.—The Commission shall sub-  
2           mit to the Committee on Energy and Natural Re-  
3           sources of the Senate and the Committee on Energy  
4           and Commerce of the House of Representatives an  
5           annual report that—

6                   “(A) describes and quantifies, for each li-  
7                   censed, exempted, or proposed project under  
8                   this part or section 405(d) of the Public Utility  
9                   Regulatory Policies Act of 1978 (16 U.S.C.  
10                  2705(d)) (referred to in this subsection as the  
11                  ‘covered project’), the quantity of energy and  
12                  capacity authorized for new development and  
13                  reauthorized for continued operation during the  
14                  reporting year, including an assessment of the  
15                  economic, climactic, air quality, and other envi-  
16                  ronmental benefits achieved by the new and re-  
17                  authorized energy and capacity;

18                   “(B) describes and quantifies the loss of  
19                   energy, capacity, or ancillary services as a re-  
20                   sult of any licensing action under this part or  
21                   other requirement under Federal law during the  
22                   reporting year;

23                   “(C) identifies any application to license,  
24                   relicense, or expand a covered project pending  
25                   as of the date of the annual report, including

1 a quantification of the new energy and capacity  
2 with the potential to be gained or lost by action  
3 relating to the covered project; and

4 “(D) lists all proposed covered projects  
5 that, as of the date of the annual report, are  
6 subject to a preliminary permit issued under  
7 section 4(f), including a description of the  
8 quantity of new energy and capacity that would  
9 be achieved through the development of each  
10 proposed covered project.

11 “(2) AVAILABILITY.—The Commission shall es-  
12 tablish and maintain a publicly available website or  
13 comparable resource that tracks all information re-  
14 quired for the annual report under paragraph (1).

15 “(b) RESOURCE AGENCY ANNUAL REPORT.—

16 “(1) IN GENERAL.—Any Federal or State re-  
17 source agency that is participating in any Commis-  
18 sion proceeding under this part or that has respon-  
19 sibilities for any Federal authorization shall submit  
20 to the Committee on Energy and Natural Resources  
21 of the Senate and the Committee on Energy and  
22 Commerce of the House of Representatives a report  
23 that—

24 “(A) describes each term, condition, or  
25 other requirement prepared by the resource

1 agency during the reporting year with respect  
2 to a Commission proceeding under this part, in-  
3 cluding—

4 “(i) an assessment of whether imple-  
5 mentation of the term, condition, or other  
6 requirement would result in the loss of en-  
7 ergy, capacity, or ancillary services at the  
8 project, including a quantification of the  
9 losses;

10 “(ii) an analysis of economic, air qual-  
11 ity, climactic and other environmental ef-  
12 fects associated with implementation of the  
13 term, condition, or other requirement;

14 “(iii) a demonstration, based on evi-  
15 dence in the record of the Commission,  
16 that the resource agency prepared the  
17 term, condition, or other requirement in a  
18 manner that meets the policy established  
19 by this part while discharging the respon-  
20 sibilities of the resource agency under this  
21 part or any other applicable requirement  
22 under Federal law; and

23 “(iv) a statement of whether the head  
24 of the applicable Federal agency has ren-  
25 dered final approval of the term, condition,

1 or other requirement, or whether the term,  
2 condition, or other requirement remains a  
3 preliminary recommendation of staff of the  
4 resource agency; and

5 “(B) identifies all pending, scheduled, and  
6 anticipated proceedings under this part that, as  
7 of the date of the annual report, the resource  
8 agency expects to participate in, or has any ap-  
9 proval or participatory responsibilities for under  
10 Federal law, including—

11 “(i) an accounting of whether the re-  
12 source agency met all deadlines or other  
13 milestones established by the resource  
14 agency or the Commission during the re-  
15 porting year; and

16 “(ii) the specific plans of the resource  
17 agency for allocating sufficient resources  
18 for each project during the upcoming year.

19 “(2) AVAILABILITY.—Any resource agency pre-  
20 paring an annual report to Congress under para-  
21 graph (1) shall establish and maintain a publicly  
22 available website or comparable resource that tracks  
23 all information required for the annual report.”.

24 (j) PILOT PROGRAM.—

1           (1) IN GENERAL.—The Commission (as the  
2 term is defined in section 3 of the Federal Power  
3 Act (16 U.S.C. 796)) shall establish a voluntary  
4 pilot program covering at least 1 region in which the  
5 Commission, in consultation with the heads of co-  
6 operating agencies, shall direct a set of region-wide  
7 studies to inform subsequent project-level studies  
8 within each region.

9           (2) DESIGNATION.—Not later than 2 years  
10 after the date of enactment of this Act, if the condi-  
11 tions under paragraph (3) are met, the Commission,  
12 in consultation with the heads of cooperating agen-  
13 cies, shall designate 1 or more regions to be studied  
14 under this subsection.

15           (3) VOLUNTARY BASIS.—The Commission may  
16 only designate regions under paragraph (2) in which  
17 every licensee, on a voluntary basis and in writing,  
18 agrees—

19                   (A) to be included in the pilot program;  
20                   and

21                   (B) to any cost-sharing arrangement with  
22 other licensees and applicable Federal and  
23 State agencies with respect to conducting basin-  
24 wide studies.

1           (4) SCALE.—The regions designated under  
2 paragraph (2) shall—

3           (A) be at an adequately large scale to  
4 cover at least 5 existing projects that—

5           (i) are licensed under this part; and

6           (ii) the licenses of which shall expire  
7 not later than 15 years after the date of  
8 enactment of this section; and

9           (B) be likely to yield region-wide studies  
10 and information that will significantly reduce  
11 the need for and scope of subsequent project-  
12 level studies and information.

13           (5) PROJECT LICENSE TERMS.—The Commis-  
14 sion may extend the term of any existing license  
15 within a region designated under paragraph (2) by  
16 up to 8 years to provide sufficient time for relevant  
17 region-wide studies to inform subsequent project-  
18 level studies.

19 **SEC. 3002. HYDROELECTRIC PRODUCTION INCENTIVES**  
20 **AND EFFICIENCY IMPROVEMENTS.**

21           (a) HYDROELECTRIC PRODUCTION INCENTIVES.—  
22 Section 242 of the Energy Policy Act of 2005 (42 U.S.C.  
23 15881) is amended—

24           (1) in subsection (c), by striking “10” and in-  
25 serting “20”;

1           (2) in subsection (f), by striking “20” and in-  
2           serting “30”; and

3           (3) in subsection (g), by striking “each of the  
4           fiscal years 2006 through 2015” and inserting “each  
5           of fiscal years 2016 through 2025”.

6           (b) HYDROELECTRIC EFFICIENCY IMPROVEMENT.—  
7           Section 243(c) of the Energy Policy Act of 2005 (42  
8           U.S.C. 15882(c)) is amended by striking “each of the fis-  
9           cal years 2006 through 2015” and inserting “each of fis-  
10          cal years 2016 through 2025”.

11   **SEC. 3003. EXTENSION OF TIME FOR A FEDERAL ENERGY**  
12                           **REGULATORY COMMISSION PROJECT IN-**  
13                           **VOLVING CLARK CANYON DAM.**

14          Notwithstanding the time period described in section  
15   13 of the Federal Power Act (16 U.S.C. 806) that would  
16   otherwise apply to the Federal Energy Regulatory Com-  
17   mission project numbered 12429, the Federal Energy  
18   Regulatory Commission (referred to in this section as the  
19   “Commission”) shall, at the request of the licensee for the  
20   project, and after reasonable notice and in accordance  
21   with the procedures of the Commission under that section,  
22   reinstate the license and extend the time period during  
23   which the licensee is required to commence construction  
24   of project works for the 3-year period beginning on the  
25   date of enactment of this Act.

1 **SEC. 3004. EXTENSION OF TIME FOR A FEDERAL ENERGY**  
2 **REGULATORY COMMISSION PROJECT IN-**  
3 **VOLVING GIBSON DAM.**

4 (a) **IN GENERAL.**—Notwithstanding the require-  
5 ments of section 13 of the Federal Power Act (16 U.S.C.  
6 806) that would otherwise apply to the Federal Energy  
7 Regulatory Commission project numbered 12478–003, the  
8 Federal Energy Regulatory Commission (referred to in  
9 this section as the “Commission”) may, at the request of  
10 the licensee for the project, and after reasonable notice  
11 and in accordance with the procedures of the Commission  
12 under that section, extend the time period during which  
13 the licensee is required to commence construction of the  
14 project for a 6-year period that begins on the date de-  
15 scribed in subsection (b).

16 (b) **DATE DESCRIBED.**—The date described in this  
17 subsection is the date of the expiration of the extension  
18 of the period required for commencement of construction  
19 for the project described in subsection (a) that was issued  
20 by the Commission prior to the date of enactment of this  
21 Act under section 13 of the Federal Power Act (16 U.S.C.  
22 806).

1                                   **PART II—GEOTHERMAL**

2                                   **Subpart A—Geothermal Energy**

3 **SEC. 3005. NATIONAL GOALS FOR PRODUCTION AND SITE**  
4                                   **IDENTIFICATION.**

5           It is the sense of Congress that, not later than 10  
6 years after the date of enactment of this Act—

7                   (1) the Secretary of the Interior shall seek to  
8           approve a significant increase in new geothermal en-  
9           ergy capacity on public land across a geographically  
10          diverse set of States using the full range of available  
11          technologies; and

12                   (2) the Director of the Geological Survey and  
13          the Secretary should identify sites capable of pro-  
14          ducing a total of 50,000 megawatts of geothermal  
15          power, using the full range of available technologies.

16 **SEC. 3006. PRIORITY AREAS FOR DEVELOPMENT ON FED-**  
17                                   **ERAL LAND.**

18          The Director of the Bureau of Land Management,  
19          in consultation with other appropriate Federal agencies,  
20          shall—

21                   (1) identify high priority areas for new geo-  
22          thermal development; and

23                   (2) take any actions the Director determines  
24          necessary to facilitate that development, consistent  
25          with applicable laws.

1 **SEC. 3007. FACILITATION OF COPRODUCTION OF GEO-**  
2 **THERMAL ENERGY ON OIL AND GAS LEASES.**

3 Section 4(b) of the Geothermal Steam Act of 1970  
4 (30 U.S.C. 1003(b)) is amended by adding at the end the  
5 following:

6 “(4) LAND SUBJECT TO OIL AND GAS LEASE.—  
7 Land under an oil and gas lease issued pursuant to  
8 the Mineral Leasing Act (30 U.S.C. 181 et seq.) or  
9 the Mineral Leasing Act for Acquired Lands (30  
10 U.S.C. 351 et seq.) that is subject to an approved  
11 application for permit to drill and from which oil  
12 and gas production is occurring may be available for  
13 noncompetitive leasing under this section to the  
14 holder of the oil and gas lease—

15 “(A) on a determination that—

16 “(i) geothermal energy will be pro-  
17 duced from a well producing or capable of  
18 producing oil and gas; and

19 “(ii) national energy security will be  
20 improved by the issuance of such a lease;  
21 and

22 “(B) to provide for the coproduction of  
23 geothermal energy with oil and gas.”.

1 **SEC. 3008. NONCOMPETITIVE LEASING OF ADJOINING**  
2 **AREAS FOR DEVELOPMENT OF GEOTHERMAL**  
3 **RESOURCES.**

4 Section 4(b) of the Geothermal Steam Act of 1970  
5 (30 U.S.C. 1003(b)) (as amended by section 3007) is  
6 amended by adding at the end the following:

7 “(5) ADJOINING LAND.—

8 “(A) DEFINITIONS.—In this paragraph:

9 “(i) FAIR MARKET VALUE PER  
10 ACRE.—The term ‘fair market value per  
11 acre’ means a dollar amount per acre  
12 that—

13 “(I) except as provided in this  
14 clause, shall be equal to the market  
15 value per acre (taking into account  
16 the determination under subparagraph  
17 (B)(iii) regarding a valid discovery on  
18 the adjoining land), as determined by  
19 the Secretary under regulations issued  
20 under this paragraph;

21 “(II) shall be determined by the  
22 Secretary with respect to a lease  
23 under this paragraph, by not later  
24 than the end of the 180-day period  
25 beginning on the date the Secretary

1 receives an application for the lease;

2 and

3 “(III) shall be not less than the

4 greater of—

5 “(aa) 4 times the median

6 amount paid per acre for all land

7 leased under this Act during the

8 preceding year; or

9 “(bb) \$50.

10 “(ii) INDUSTRY STANDARDS.—The

11 term ‘industry standards’ means the stand-

12 ards by which a qualified geothermal pro-

13 fessional assesses whether downhole or

14 flowing temperature measurements with

15 indications of permeability are sufficient to

16 produce energy from geothermal resources,

17 as determined through flow or injection

18 testing or measurement of lost circulation

19 while drilling.

20 “(iii) QUALIFIED FEDERAL LAND.—

21 The term ‘qualified Federal land’ means

22 land that is otherwise available for leasing

23 under this Act.

24 “(iv) QUALIFIED GEOTHERMAL PRO-

25 FESSIONAL.—The term ‘qualified geo-

1 thermal professional’ means an individual  
2 who is an engineer or geoscientist in good  
3 professional standing with at least 5 years  
4 of experience in geothermal exploration,  
5 development, or project assessment.

6 “(v) QUALIFIED LESSEE.—The term  
7 ‘qualified lessee’ means a person that is el-  
8 igible to hold a geothermal lease under this  
9 Act (including applicable regulations).

10 “(vi) VALID DISCOVERY.—The term  
11 ‘valid discovery’ means a discovery of a  
12 geothermal resource by a new or existing  
13 slim hole or production well, that exhibits  
14 downhole or flowing temperature measure-  
15 ments with indications of permeability that  
16 are sufficient to meet industry standards.

17 “(B) AUTHORITY.—An area of qualified  
18 Federal land that adjoins other land for which  
19 a qualified lessee holds a legal right to develop  
20 geothermal resources may be available for a  
21 noncompetitive lease under this section to the  
22 qualified lessee at the fair market value per  
23 acre, if—

24 “(i) the area of qualified Federal  
25 land—

1                   “(I) consists of not less than 1  
2                   acre and not more than 640 acres;  
3                   and

4                   “(II) is not already leased under  
5                   this Act or nominated to be leased  
6                   under subsection (a);

7                   “(ii) the qualified lessee has not pre-  
8                   viously received a noncompetitive lease  
9                   under this paragraph in connection with  
10                  the valid discovery for which data has been  
11                  submitted under clause (iii)(I); and

12                  “(iii) sufficient geological and other  
13                  technical data prepared by a qualified geo-  
14                  thermal professional has been submitted by  
15                  the qualified lessee to the applicable Fed-  
16                  eral land management agency that would  
17                  lead individuals who are experienced in the  
18                  subject matter to believe that—

19                         “(I) there is a valid discovery of  
20                         geothermal resources on the land for  
21                         which the qualified lessee holds the  
22                         legal right to develop geothermal re-  
23                         sources; and

24                         “(II) that thermal feature ex-  
25                         tends into the adjoining areas.

1                   “(C) DETERMINATION OF FAIR MARKET  
2                   VALUE.—

3                   “(i) IN GENERAL.—The Secretary  
4                   shall—

5                   “(I) publish a notice of any re-  
6                   quest to lease land under this para-  
7                   graph;

8                   “(II) determine fair market value  
9                   for purposes of this paragraph in ac-  
10                  cordance with procedures for making  
11                  those determinations that are estab-  
12                  lished by regulations issued by the  
13                  Secretary;

14                  “(III) provide to a qualified les-  
15                  see and publish, with an opportunity  
16                  for public comment for a period of 30  
17                  days, any proposed determination  
18                  under this subparagraph of the fair  
19                  market value of an area that the  
20                  qualified lessee seeks to lease under  
21                  this paragraph; and

22                  “(IV) provide to the qualified les-  
23                  see and any adversely affected party  
24                  the opportunity to appeal the final de-  
25                  termination of fair market value in an

1 administrative proceeding before the  
2 applicable Federal land management  
3 agency, in accordance with applicable  
4 law (including regulations).

5 “(ii) LIMITATION ON NOMINATION.—  
6 After publication of a notice of request to  
7 lease land under this paragraph, the Sec-  
8 retary may not accept under subsection (a)  
9 any nomination of the land for leasing un-  
10 less the request has been denied or with-  
11 drawn.

12 “(iii) ANNUAL RENTAL.—For pur-  
13 poses of section 5(a)(3), a lease awarded  
14 under this paragraph shall be considered a  
15 lease awarded in a competitive lease sale.

16 “(D) REGULATIONS.—Not later than 270  
17 days after the date of enactment of the Energy  
18 Policy Modernization Act of 2015, the Sec-  
19 retary shall issue regulations to carry out this  
20 paragraph.”.

21 **SEC. 3009. LARGE-SCALE GEOTHERMAL ENERGY.**

22 Title VI of the Energy Independence and Security  
23 Act of 2007 is amended by inserting after section 616 (42  
24 U.S.C. 17195) the following:

1 **“SEC. 616A. LARGE-SCALE GEOTHERMAL ENERGY.**

2 “(a) PURPOSES.—The purposes of this section are—

3 “(1) to improve the components, processes, and  
4 systems used for geothermal heat pumps and the di-  
5 rect use of geothermal energy; and

6 “(2) to increase the energy efficiency, lower the  
7 cost, increase the use, and improve and demonstrate  
8 the applicability of geothermal heat pumps to, and  
9 the direct use of geothermal energy in, large build-  
10 ings, commercial districts, residential communities,  
11 and large municipal, agricultural, or industrial  
12 projects.

13 “(b) DEFINITIONS.—In this section:

14 “(1) DIRECT USE OF GEOTHERMAL ENERGY.—  
15 The term ‘direct use of geothermal energy’ means  
16 systems that use water that is at a temperature be-  
17 tween approximately 38 degrees Celsius and 149 de-  
18 grees Celsius directly or through a heat exchanger to  
19 provide—

20 “(A) heating to buildings; or

21 “(B) heat required for industrial processes,  
22 agriculture, aquaculture, and other facilities.

23 “(2) GEOTHERMAL HEAT PUMP.—The term  
24 ‘geothermal heat pump’ means a system that pro-  
25 vides heating and cooling by exchanging heat from  
26 shallow ground or surface water using—

1           “(A) a closed loop system, which transfers  
2           heat by way of buried or immersed pipes that  
3           contain a mix of water and working fluid; or

4           “(B) an open loop system, which circulates  
5           ground or surface water directly into the build-  
6           ing and returns the water to the same aquifer  
7           or surface water source.

8           “(3) LARGE-SCALE APPLICATION.—The term  
9           ‘large-scale application’ means an application for  
10          space or process heating or cooling for large entities  
11          with a name-plate capacity, expected resource, or  
12          rating of 10 or more megawatts, such as a large  
13          building, commercial district, residential community,  
14          or a large municipal, agricultural, or industrial  
15          project.

16          “(c) PROGRAM.—

17                 “(1) IN GENERAL.—The Secretary shall estab-  
18                 lish a program of research, development, and dem-  
19                 onstration for geothermal heat pumps and the direct  
20                 use of geothermal energy.

21                 “(2) AREAS.—The program may include re-  
22                 search, development, demonstration, and commercial  
23                 application of—

1           “(A) geothermal ground loop efficiency im-  
2           provements through more efficient heat transfer  
3           fluids;

4           “(B) geothermal ground loop efficiency im-  
5           provements through more efficient thermal  
6           grouts for wells and trenches;

7           “(C) geothermal ground loop installation  
8           cost reduction through—

9                   “(i) improved drilling methods;

10                   “(ii) improvements in drilling equip-  
11           ment;

12                   “(iii) improvements in design method-  
13           ology and energy analysis procedures; and

14                   “(iv) improved methods for deter-  
15           mination of ground thermal properties and  
16           ground temperatures;

17           “(D) installing geothermal ground loops  
18           near the foundation walls of new construction  
19           to take advantage of existing structures;

20           “(E) using gray or black wastewater as a  
21           method of heat exchange;

22           “(F) improving geothermal heat pump sys-  
23           tem economics through integration of geo-  
24           thermal systems with other building systems,  
25           including providing hot and cold water and re-

1           jecting or circulating industrial process heat  
2           through refrigeration heat rejection and waste  
3           heat recovery;

4           “(G) advanced geothermal systems using  
5           variable pumping rates to increase efficiency;

6           “(H) geothermal heat pump efficiency im-  
7           provements;

8           “(I) use of hot water found in mines and  
9           mine shafts and other surface waters as the  
10          heat exchange medium;

11          “(J) heating of districts, neighborhoods,  
12          communities, large commercial or public build-  
13          ings (including office, retail, educational, gov-  
14          ernment, and institutional buildings and multi-  
15          family residential buildings and campuses), and  
16          industrial and manufacturing facilities;

17          “(K) geothermal system integration with  
18          solar thermal water heating or cool roofs and  
19          solar-regenerated desiccants to balance loads  
20          and use building hot water to store geothermal  
21          energy;

22          “(L) use of hot water coproduced from oil  
23          and gas recovery;

1           “(M) use of water sources at a tempera-  
2           ture of less than 150 degrees Celsius for direct  
3           use;

4           “(N) system integration of direct use with  
5           geothermal electricity production; and

6           “(O) coproduction of heat and power, in-  
7           cluding on-site use.

8           “(3) ENVIRONMENTAL IMPACTS.—In carrying  
9           out the program, the Secretary shall identify and  
10          mitigate potential environmental impacts in accord-  
11          ance with section 614(e).

12          “(d) GRANTS.—

13           “(1) IN GENERAL.—The Secretary shall make  
14           grants available to State and local governments, in-  
15           stitutions of higher education, nonprofit entities,  
16           utilities, and for-profit companies (including manu-  
17           facturers of heat-pump and direct-use components  
18           and systems) to promote the development of geo-  
19           thermal heat pumps and the direct use of geo-  
20           thermal energy.

21           “(2) PRIORITY.—In making grants under this  
22           subsection, the Secretary shall give priority to pro-  
23           posals that apply to large buildings (including office,  
24           retail, educational, government, institutional, and  
25           multifamily residential buildings and campuses and

1 industrial and manufacturing facilities), commercial  
2 districts, and residential communities.

3 “(3) NATIONAL SOLICITATION.—Not later than  
4 180 days after the date of enactment of this section,  
5 the Secretary shall conduct a national solicitation for  
6 applications for grants under this section.

7 “(e) REPORTS.—

8 “(1) IN GENERAL.—Not later than 2 years  
9 after the date of enactment of this section and annu-  
10 ally thereafter, the Secretary shall submit to the  
11 Committee on Energy and Natural Resources of the  
12 Senate and the Committee on Science, Space, and  
13 Technology of the House of Representatives a report  
14 on progress made and results obtained under this  
15 section to develop geothermal heat pumps and direct  
16 use of geothermal energy.

17 “(2) AREAS.—Each of the reports required  
18 under this subsection shall include—

19 “(A) an analysis of progress made in each  
20 of the areas described in subsection (c)(2); and

21 “(B)(i) a description of any relevant rec-  
22 ommendations made during a review of the pro-  
23 gram; and

24 “(ii) any plans to address the rec-  
25 ommendations under clause (i).”.

1 **SEC. 3010. REPORT TO CONGRESS.**

2 Not later than 3 years after the date of enactment  
3 of this Act and not less frequently than once every 5 years  
4 thereafter, the Secretary of the Interior and the Secretary  
5 shall submit to Congress a report describing the progress  
6 made towards achieving the goals described in section  
7 3005.

8 **SEC. 3011. AUTHORIZATION OF APPROPRIATIONS.**

9 There are authorized to be appropriated to carry out  
10 this subpart—

- 11 (1) \$65,000,000 for fiscal year 2017; and  
12 (2) \$75,000,000 for each of fiscal years 2018  
13 through 2021.

14 **Subpart B—Geothermal Exploration**

15 **SEC. 3012. GEOTHERMAL EXPLORATION TEST PROJECTS.**

16 The Geothermal Steam Act of 1970 (30 U.S.C. 1001  
17 et seq.) is amended by adding at the end the following:

18 **“SEC. 30. GEOTHERMAL EXPLORATION TEST PROJECTS.**

19 **“(a) DEFINITIONS.—**In this section:

20 **“(1) COVERED LAND.—**The term ‘covered land’  
21 means land that is—

22 **“(A)** subject to geothermal leasing in ac-  
23 cordance with section 3; and

24 **“(B)** not excluded from the development of  
25 geothermal energy under—

1                   “(i) a final land use plan established  
2                   under the Federal Land Policy and Man-  
3                   agement Act of 1976 (43 U.S.C. 1701 et  
4                   seq.);

5                   “(ii) a final land and resource man-  
6                   agement plan established under the Na-  
7                   tional Forest Management Act of 1976 (16  
8                   U.S.C. 1600 et seq.); or

9                   “(iii) any other applicable law.

10                  “(2) SECRETARY CONCERNED.—The term ‘Sec-  
11                  retary concerned’ means—

12                   “(A) the Secretary of Agriculture (acting  
13                   through the Chief of the Forest Service), with  
14                   respect to National Forest System land; and

15                   “(B) the Secretary, with respect to land  
16                   managed by the Bureau of Land Management  
17                   (including land held for the benefit of an Indian  
18                   tribe).

19                  “(b) NEPA REVIEW OF GEOTHERMAL EXPLORATION  
20                  TEST PROJECTS.—

21                   “(1) IN GENERAL.—An eligible activity de-  
22                   scribed in paragraph (2) carried out on covered land  
23                   shall be considered an action categorically excluded  
24                   from the requirements for an environmental assess-  
25                   ment or an environmental impact statement under

1 the National Environmental Policy Act of 1969 (42  
2 U.S.C. 4321 et seq.) or section 1508.4 of title 40,  
3 Code of Federal Regulations (or a successor regula-  
4 tion) if—

5 “(A) the action is for the purpose of geo-  
6 thermal resource exploration operations; and

7 “(B) the action is conducted pursuant to  
8 this Act.

9 “(2) ELIGIBLE ACTIVITY.—An eligible activity  
10 referred to in paragraph (1) is—

11 “(A) a geophysical exploration activity that  
12 does not require drilling, including a seismic  
13 survey;

14 “(B) the drilling of a well to test or ex-  
15 plore for geothermal resources on land leased  
16 by the Secretary concerned for the development  
17 and production of geothermal resources that—

18 “(i) is carried out by the holder of the  
19 lease;

20 “(ii) causes—

21 “(I) fewer than 5 acres of soil or  
22 vegetation disruption at the location  
23 of each geothermal exploration well;  
24 and

1                   “(II) not more than an additional  
2                   5 acres of soil or vegetation disruption  
3                   during access or egress to the project  
4                   site;

5                   “(iii) is completed in fewer than 90  
6                   days, including the removal of any surface  
7                   infrastructure from the project site; and

8                   “(iv) requires the restoration of the  
9                   project site not later than 3 years after the  
10                  date of completion of the project to ap-  
11                  proximately the condition that existed at  
12                  the time the project began, unless—

13                  “(I) the project site is subse-  
14                  quently used as part of energy devel-  
15                  opment on the lease; or

16                  “(II) the project—

17                         “(aa) yields geothermal re-  
18                         sources; and

19                         “(bb) the use of the geo-  
20                         thermal resources will be carried  
21                         out under another geothermal  
22                         generation project in existence at  
23                         the time of the discovery of the  
24                         geothermal resources; or

1           “(C) the drilling of a well to test or explore  
2 for geothermal resources on land leased by the  
3 Secretary concerned for the development and  
4 production of geothermal resources that—

5           “(i) causes an individual surface dis-  
6 turbance of fewer than 5 acres if—

7           “(I) the total surface disturbance  
8 on the leased land is not more than  
9 150 acres; and

10           “(II) a site-specific analysis has  
11 been prepared under the National En-  
12 vironmental Policy Act of 1969 (42  
13 U.S.C. 4321 et seq.);

14           “(ii) involves the drilling of a geo-  
15 thermal well at a location or well pad site  
16 at which drilling has occurred within 5  
17 years before the date of spudding the well;  
18 or

19           “(iii) involves the drilling of a geo-  
20 thermal well in a developed field for  
21 which—

22           “(I) an approved land use plan  
23 or any environmental document pre-  
24 pared under the National Environ-  
25 mental Policy Act of 1969 (42 U.S.C.

1                   4321 et seq.) analyzed the drilling as  
2                   a reasonably foreseeable activity; and

3                   “(II) the land use plan or envi-  
4                   ronmental document was approved  
5                   within 10 years before the date of  
6                   spudding the well.

7                   “(3) LIMITATION BASED ON EXTRAORDINARY  
8                   CIRCUMSTANCES.—The categorical exclusion estab-  
9                   lished under paragraph (1) shall be subject to ex-  
10                  traordinary circumstances in accordance with the  
11                  Departmental Manual, 516 DM 2.3A(3) and 516  
12                  DM 2, Appendix 2 (or successor provisions).

13                  “(c) NOTICE OF INTENT; REVIEW AND DETERMINA-  
14                  TION.—

15                  “(1) REQUIREMENT TO PROVIDE NOTICE.—Not  
16                  later than 30 days before the date on which drilling  
17                  begins, a leaseholder intending to carry out an eligi-  
18                  ble activity shall provide notice to the Secretary con-  
19                  cerned.

20                  “(2) REVIEW OF PROJECT.—Not later than 10  
21                  days after receipt of a notice of intent provided  
22                  under paragraph (1), the Secretary concerned  
23                  shall—

1           “(A) review the project described in the  
2 notice and determine whether the project is an  
3 eligible activity; and

4           “(B)(i) if the project is an eligible activity,  
5 notify the leaseholder that under subsection (b),  
6 the project is considered a categorical exclusion  
7 under the National Environmental Policy Act of  
8 1969 (42 U.S.C. 4321 et seq.) and section  
9 1508.4 of title 40, Code of Federal Regulations  
10 (or a successor regulation); or

11           “(ii) if the project is not an eligible activ-  
12 ity—

13           “(I) notify the leaseholder that section  
14 102(2)(C) of the National Environmental  
15 Policy Act of 1969 (42 U.S.C. 4332(2)(C))  
16 applies to the project;

17           “(II) include in that notification clear  
18 and detailed findings on any deficiencies in  
19 the project that prevent the application of  
20 subsection (b) to the project; and

21           “(III) provide an opportunity to the  
22 leaseholder to remedy the deficiencies de-  
23 scribed in the notification before the date  
24 on which the leaseholder plans to begin the  
25 project under paragraph (1).”.

1                   **PART III—MARINE HYDROKINETIC**

2   **SEC. 3013. DEFINITION OF MARINE AND HYDROKINETIC RE-**  
3                   **NEWABLE ENERGY.**

4           Section 632 of the Energy Independence and Security  
5 Act of 2007 (42 U.S.C. 17211) is amended in the matter  
6 preceding paragraph (1) by striking “electrical”.

7   **SEC. 3014. MARINE AND HYDROKINETIC RENEWABLE EN-**  
8                   **ERGY RESEARCH AND DEVELOPMENT.**

9           Section 633 of the Energy Independence and Security  
10 Act of 2007 (42 U.S.C. 17212) is amended to read as  
11 follows:

12   **“SEC. 633. MARINE AND HYDROKINETIC RENEWABLE EN-**  
13                   **ERGY RESEARCH AND DEVELOPMENT.**

14           “The Secretary, in consultation with the Secretary of  
15 the Interior, the Secretary of Commerce, and the Federal  
16 Energy Regulatory Commission, shall carry out a program  
17 of research, development, demonstration, and commercial  
18 application to accelerate the introduction of marine and  
19 hydrokinetic renewable energy production into the United  
20 States energy supply, giving priority to fostering acceler-  
21 ated research, development, and commercialization of  
22 technology, including programs—

23                   “(1) to assist technology development to im-  
24           prove the components, processes, and systems used  
25           for power generation from marine and hydrokinetic  
26           renewable energy resources;

1           “(2) to establish critical testing infrastructure  
2 necessary—

3           “(A) to cost effectively and efficiently test  
4 and prove marine and hydrokinetic renewable  
5 energy devices; and

6           “(B) to accelerate the technological readi-  
7 ness and commercialization of those devices;

8           “(3) to support efforts to increase the efficiency  
9 of energy conversion, lower the cost, increase the  
10 use, improve the reliability, and demonstrate the ap-  
11 plicability of marine and hydrokinetic renewable en-  
12 ergy technologies by participating in demonstration  
13 projects;

14           “(4) to investigate variability issues and the ef-  
15 ficient and reliable integration of marine and  
16 hydrokinetic renewable energy with the utility grid;

17           “(5) to identify and study critical short- and  
18 long-term needs to create a sustainable marine and  
19 hydrokinetic renewable energy supply chain based in  
20 the United States;

21           “(6) to increase the reliability and survivability  
22 of marine and hydrokinetic renewable energy tech-  
23 nologies;

24           “(7) to verify the performance, reliability, main-  
25 tainability, and cost of new marine and hydrokinetic

1 renewable energy device designs and system compo-  
2 nents in an operating environment, and consider the  
3 protection of critical infrastructure, such as ade-  
4 quate separation between marine and hydrokinetic  
5 devices and projects and submarine telecommuni-  
6 cations cables, including consideration of established  
7 industry standards;

8 “(8) to coordinate and avoid duplication of ac-  
9 tivities across programs of the Department and  
10 other applicable Federal agencies, including National  
11 Laboratories and to coordinate public-private col-  
12 laboration in all programs under this section;

13 “(9) to identify opportunities for joint research  
14 and development programs and development of  
15 economies of scale between—

16 “(A) marine and hydrokinetic renewable  
17 energy technologies; and

18 “(B) other renewable energy and fossil en-  
19 ergy programs, offshore oil and gas production  
20 activities, and activities of the Department of  
21 Defense; and

22 “(10) to support in-water technology develop-  
23 ment with international partners using existing co-  
24 operative procedures (including memoranda of un-  
25 derstanding)—

1           “(A) to allow cooperative funding and  
2           other support of value to be exchanged and le-  
3           veraged; and

4           “(B) to encourage the participation of  
5           international research centers and companies  
6           within the United States and the participation  
7           of United States research centers and compa-  
8           nies in international projects.”.

9 **SEC. 3015. NATIONAL MARINE RENEWABLE ENERGY RE-**  
10 **SEARCH, DEVELOPMENT, AND DEMONSTRA-**  
11 **TION CENTERS.**

12       Section 634 of the Energy Independence and Security  
13 Act of 2007 (42 U.S.C. 17213) is amended by striking  
14 subsection (b) and inserting the following:

15       “(b) PURPOSES.—A Center (in coordination with the  
16 Department and National Laboratories) shall—

17           “(1) advance research, development, demonstra-  
18           tion, and commercial application of marine and  
19           hydrokinetic renewable energy technologies;

20           “(2) support in-water testing and demonstra-  
21           tion of marine and hydrokinetic renewable energy  
22           technologies, including facilities capable of testing—

23           “(A) marine and hydrokinetic renewable  
24           energy systems of various technology readiness  
25           levels and scales;

1 (A) by redesignating paragraphs (2) and  
2 (3) as paragraphs (4) and (5), respectively;

3 (B) by inserting after paragraph (1) the  
4 following:

5 “(2) BIO-POWER.—The term ‘bio-power’ means  
6 the use of woody biomass to generate electricity.

7 “(3) BOARD.—The term ‘Board’ means the  
8 Biomass Research and Development Board.”; and

9 (C) by adding at the end the following:

10 “(6) WOODY BIOMASS HEAT.—The term ‘woody  
11 biomass heat’ means the use of woody biomass to  
12 generate heat.”.

13 (2) BIOMASS RESEARCH AND DEVELOPMENT  
14 BOARD.—Section 9008(c)(3)(A) of the Farm Secu-  
15 rity and Rural Investment Act of 2002 (7 U.S.C.  
16 8108(c)(3)(A)) is amended by striking “biofuels and  
17 biobased products” and inserting “biofuels, biobased  
18 products, bio-power, and woody biomass heat  
19 projects”.

20 (3) WOODY BIOMASS HEAT AND BIO-POWER  
21 GRANTS.—Section 9008 of the Farm Security and  
22 Rural Investment Act of 2002 (7 U.S.C. 8108) is  
23 amended—

1                   (A) by redesignating subsections (f), (g),  
2                   and (h) as subsections (g), (h), and (i), respec-  
3                   tively; and

4                   (B) by inserting after subsection (e) the  
5                   following:

6           “(f) WOODY BIOMASS HEAT AND BIO-POWER  
7 GRANTS.—

8                   “(1) ESTABLISHMENT.—The Secretary of Agri-  
9                   culture and the Secretary of Energy, in consultation  
10                  with the Board, shall establish a program under  
11                  which the Secretary of Agriculture and the Secretary  
12                  of Energy shall provide grants to relevant projects  
13                  to support innovation and market development in  
14                  woody biomass heat and bio-power.

15                  “(2) APPLICATIONS.—To be eligible to receive a  
16                  grant under this subsection, the owner or operator  
17                  of a relevant project shall submit to the Secretary of  
18                  Agriculture and the Secretary of Energy an applica-  
19                  tion at such time, in such manner, and containing  
20                  such information as the Secretary of Agriculture and  
21                  the Secretary of Energy may require.

22                  “(3) ALLOCATION.—Of the amounts appro-  
23                  priated to carry out this subsection, the Secretary of  
24                  Agriculture and the Secretary of Energy shall not  
25                  provide more than—

1           “(A) \$15,000,000 for projects that develop  
2 innovative techniques for preprocessing biomass  
3 for woody biomass heat and bio-power, with the  
4 goals of lowering the costs of—

5           “(i) distributed preprocessing tech-  
6 nologies, including technologies designed to  
7 promote densification, torrefaction, and the  
8 broader commoditization of bioenergy feed-  
9 stocks; and

10           “(ii) transportation; and

11           “(B) \$15,000,000 for innovative woody  
12 biomass heat and bio-power demonstration  
13 projects, including—

14           “(i) district energy projects;

15           “(ii) innovation in transportation; and

16           “(iii) projects addressing the chal-  
17 lenges of retrofitting existing coal-fired  
18 electricity generation facilities to use bio-  
19 mass.

20           “(4) REGIONAL DISTRIBUTION.—In selecting  
21 projects to receive grants under this subsection, the  
22 Secretary of Agriculture and the Secretary of En-  
23 ergy shall ensure, to the maximum extent prac-  
24 ticable, diverse geographical distribution among the  
25 projects.

1           “(5) COST SHARE.—The Federal share of the  
2 cost of a project carried out using a grant under this  
3 subsection shall be 50 percent.

4           “(6) DUTIES OF RECIPIENTS.—As a condition  
5 of receiving a grant under this subsection, the owner  
6 or operator of a project shall—

7                 “(A) participate in the applicable working  
8 group under paragraph (7);

9                 “(B) submit to the Secretary of Agri-  
10 culture and the Secretary of Energy a report  
11 that includes—

12                     “(i) a description of the project and  
13 any relevant findings; and

14                     “(ii) such other information as the  
15 Secretary of Agriculture and the Secretary  
16 of Energy determine to be necessary to  
17 complete the report of the Secretary under  
18 paragraph (9); and

19                 “(C) carry out such other activities as the  
20 Secretary of Agriculture and the Secretary of  
21 Energy determine to be necessary.

22           “(7) WORKING GROUPS.—The Secretary of Ag-  
23 riculture and the Secretary of Energy shall establish  
24 2 working groups to share best practices and col-  
25 laborate in project implementation, of which—

1           “(A) 1 shall be comprised of representa-  
2           tives of projects that receive grants under para-  
3           graph (3)(A); and

4           “(B) 1 shall be comprised of representa-  
5           tives of projects that receive grants under para-  
6           graph (3)(B).

7           “(8) INCLUSION OF OILSEED CROPS.—A grant  
8           may be provided under this subsection to relevant  
9           projects to support innovation and market develop-  
10          ment in oilseed crops.

11          “(9) REPORTS.—Not later than 5 years after  
12          the date of enactment of this Act, the Secretary of  
13          Agriculture and the Secretary of Energy shall sub-  
14          mit to Congress a report describing—

15               “(A) each project for which a grant has  
16               been provided under this subsection;

17               “(B) any findings as a result of those  
18               projects; and

19               “(C) the state of market and technology  
20               development, including market barriers and op-  
21               portunities.”.

22          (b) LOAN PROGRAMS; STRATEGIC ANALYSIS AND RE-  
23          SEARCH.—

24               (1) LOW-INTEREST LOANS.—

1           (A) ESTABLISHMENT.—The Secretary of  
2           Agriculture shall establish, within the Rural  
3           Development Office, a low-interest loan pro-  
4           gram to support construction of residential,  
5           commercial or institutional, and industrial  
6           woody biomass heat and bio-power systems.

7           (B) REQUIREMENTS.—The program under  
8           this subsection shall be carried out in accord-  
9           ance with such requirements as the Secretary of  
10          Agriculture may establish, by regulation, in tak-  
11          ing into consideration best practices.

12          (C) AUTHORIZATION OF APPROPRIA-  
13          TIONS.—There is authorized to be appropriated  
14          to the Secretary of Agriculture to carry out this  
15          subsection \$50,000,000.

16          (2) ENERGY EFFICIENCY AND CONSERVATION  
17          LOAN PROGRAM.—In addition to loans under para-  
18          graph (1), woody biomass heat residential, commer-  
19          cial or institutional, and industrial wood energy sys-  
20          tems shall be eligible to receive loans under the en-  
21          ergy efficiency and conservation loan program of the  
22          Department of Agriculture under section 2 of the  
23          Rural Electrification Act of 1936 (7 U.S.C. 902).

1                   **Subtitle B—Oil and Gas**

2   **SEC. 3101. AMENDMENTS TO THE METHANE HYDRATE RE-**  
3                   **SEARCH AND DEVELOPMENT ACT OF 2000.**

4           (a) METHANE HYDRATE RESEARCH AND DEVELOP-  
5   MENT PROGRAM.—

6           (1) IN GENERAL.—Section 4 of the Methane  
7   Hydrate Research and Development Act of 2000 (30  
8   U.S.C. 2003) is amended by striking subsection (b)  
9   and inserting the following:

10          “(b) GRANTS, CONTRACTS, COOPERATIVE AGREE-  
11   MENTS, INTERAGENCY FUNDS TRANSFER AGREEMENTS,  
12   AND FIELD WORK PROPOSALS.—

13           “(1) ASSISTANCE AND COORDINATION.—In car-  
14   rying out the program of methane hydrate research  
15   and development authorized by this section, the Sec-  
16   retary may award grants to, or enter into contracts  
17   or cooperative agreements with, institutions—

18           “(A) to conduct basic and applied re-  
19   search—

20           “(i) to identify, explore, assess, and  
21   develop methane hydrate as a commercially  
22   viable source of energy; and

23           “(ii) to identify the environmental,  
24   health, and safety impacts of methane hy-  
25   drate development;

1           “(B) to identify and characterize methane  
2 hydrate resources using remote sensing and  
3 seismic data, including the characterization of  
4 hydrate concentrations in marine reservoirs in  
5 the Gulf of Mexico or the Atlantic Ocean Basin  
6 by the date that is 4 years after the date of en-  
7 actment of the Energy Policy Modernization  
8 Act of 2015;

9           “(C) to develop technologies required for  
10 efficient and environmentally sound develop-  
11 ment of methane hydrate resources;

12           “(D) to conduct basic and applied research  
13 to assess and mitigate the environmental im-  
14 pact of hydrate degassing (including natural  
15 degassing and degassing associated with com-  
16 mercial development);

17           “(E) to develop technologies to reduce the  
18 risks of drilling through methane hydrates;

19           “(F) to conduct exploratory drilling, well  
20 testing, and production testing operations on  
21 permafrost and nonpermafrost gas hydrates in  
22 support of the activities authorized by this  
23 paragraph, including—

24                   “(i) drilling of a test well and per-  
25 forming a long-term hydrate production

1 test on land in the United States Arctic re-  
2 gion by the date that is 4 years after the  
3 date of enactment of the Energy Policy  
4 Modernization Act of 2015;

5 “(ii) drilling of a test well and per-  
6 forming a long-term hydrate production  
7 test in a marine environment by the date  
8 that is 10 years after the date of enact-  
9 ment of the Energy Policy Modernization  
10 Act of 2015; and

11 “(iii) drilling a full-scale production  
12 test well at a location to be determined by  
13 the Secretary; or

14 “(G) to expand education and training pro-  
15 grams in methane hydrate resource research  
16 and resource development through fellowships  
17 or other means for graduate education and  
18 training.

19 “(2) ENVIRONMENTAL MONITORING AND RE-  
20 SEARCH.—The Secretary shall conduct a long-term  
21 environmental monitoring and research program to  
22 study the effects of production from methane hy-  
23 drate reservoirs.

24 “(3) COMPETITIVE PEER REVIEW.—Funds  
25 made available under paragraphs (1) and (2) shall

1 be made available based on a competitive process  
2 using external scientific peer review of proposed re-  
3 search.”.

4 (2) CONFORMING AMENDMENT.—Section 4(e)  
5 of the Methane Hydrate Research and Development  
6 Act of 2000 (30 U.S.C. 2003(e)) is amended in the  
7 matter preceding paragraph (1) by striking “sub-  
8 section (b)(1)” and inserting “paragraphs (1) and  
9 (2) of subsection (b)”.

10 (b) AUTHORIZATION OF APPROPRIATIONS.—The  
11 Methane Hydrate Research and Development Act of 2000  
12 is amended by striking section 7 (30 U.S.C. 2006) and  
13 inserting the following:

14 **“SEC. 7. AUTHORIZATION OF APPROPRIATIONS.**

15 “There is authorized to be appropriated to carry out  
16 this Act \$35,000,000 for each of fiscal years 2017 through  
17 2021.”.

18 **SEC. 3102. LIQUEFIED NATURAL GAS STUDY.**

19 (a) STUDY.—

20 (1) IN GENERAL.—Not later than 1 year after  
21 the date of enactment of this Act, the Secretary, in  
22 consultation with the National Association of Regu-  
23 latory Utility Commissioners and the National Asso-  
24 ciation of State Energy Officials, shall conduct a  
25 study of the State, regional, and national implica-

1 tions of exporting liquefied natural gas with respect  
2 to consumers and the economy.

3 (2) CONTENTS.—The study conducted under  
4 paragraph (1) shall include an analysis of—

5 (A) the economic impact that exporting liq-  
6 uefied natural gas will have in regions that cur-  
7 rently import liquefied natural gas;

8 (B) job creation in the manufacturing sec-  
9 tors; and

10 (C) such other issues as the Secretary con-  
11 siders appropriate.

12 (b) REPORT TO CONGRESS.—Not later than 1 year  
13 after the date of enactment of this Act, the Administrator  
14 shall submit to Congress a report on the results of the  
15 study conducted under subsection (a).

16 **SEC. 3103. FERC PROCESS COORDINATION WITH RESPECT**  
17 **TO REGULATORY APPROVAL OF GAS**  
18 **PROJECTS.**

19 (a) DEFINITIONS.—In this section:

20 (1) COMMISSION.—The term “Commission”  
21 means the Federal Energy Regulatory Commission.

22 (2) FEDERAL AUTHORIZATION.—

23 (A) IN GENERAL.—The term “Federal au-  
24 thorization” means any authorization required  
25 under Federal law with respect to an applica-

1           tion for authorization or a certificate of public  
2           convenience and necessity relating to gas trans-  
3           portation subject to the jurisdiction of the Com-  
4           mission.

5           (B) INCLUSIONS.—The term “Federal au-  
6           thorization” includes any permits, special use  
7           authorizations, certifications, opinions, or other  
8           approvals as may be required under Federal law  
9           with respect to an application for authorization  
10          or a certificate of public convenience and neces-  
11          sity relating to gas transportation subject to the  
12          jurisdiction of the Commission.

13       (b) DESIGNATION AS LEAD AGENCY.—

14           (1) IN GENERAL.—The Commission shall act as  
15          the lead agency for the purposes of—

16           (A) coordinating all applicable Federal au-  
17          thorizations; and

18           (B) compliance with the National Environ-  
19          mental Policy Act of 1969 (42 U.S.C. 4321 et  
20          seq.).

21           (2) OTHER AGENCIES.—Each Federal and  
22          State agency considering an aspect of an application  
23          for Federal authorization shall cooperate with the  
24          Commission.

25       (c) SCHEDULE.—

1           (1) TIMING FOR ISSUANCE.—It is the sense of  
2 Congress that all Federal authorizations required for  
3 a project or facility should be issued by not later  
4 than the date that is 90 days after the date on  
5 which an application is considered to be complete by  
6 the Commission.

7           (2) COMMISSION SCHEDULE.—

8           (A) IN GENERAL.—The Commission shall  
9 establish a schedule for the issuance of all Fed-  
10 eral authorizations.

11           (B) REQUIREMENTS.—In establishing the  
12 schedule under subparagraph (A), the Commis-  
13 sion shall—

14           (i) consult and cooperate with the  
15 Federal and State agencies responsible for  
16 a Federal authorization;

17           (ii) ensure the expeditious completion  
18 of all proceedings relating to a Federal au-  
19 thorization; and

20           (iii) comply with applicable schedules  
21 established under Federal law with respect  
22 to a Federal authorization.

23           (3) RESOLUTION OF INTERAGENCY DIS-  
24 PUTES.—If the Federal agency with responsibility  
25 fails to adhere to the schedule established by the

1 Commission under paragraph (2), or if a Federal  
2 authorization has been unreasonably denied, or if a  
3 Federal authorization would be inconsistent with the  
4 purposes of this section or other applicable law, the  
5 Commission shall refer the matter to the Chairman  
6 of the Council on Environmental Quality—

7 (A) to ensure timely participation;

8 (B) to ensure a timely decision;

9 (C) to mediate the dispute; or

10 (D) to refer the matter to the President.

11 (d) CONSOLIDATED RECORD.—The Commission shall  
12 maintain official consolidated records of all license pro-  
13 ceedings under this section.

14 (e) DEFERENCE TO COMMISSION.—In making a deci-  
15 sion with respect to a Federal authorization, each agency  
16 shall give deference, to the maximum extent authorized  
17 by law, to the scope of environmental review that the Com-  
18 mission determines to be appropriate.

19 (f) CONCURRENT REVIEWS.—Pursuant to the sched-  
20 ule established under subsection (c)(2), each agency con-  
21 sidering an aspect of an application for Federal authoriza-  
22 tion shall—

23 (1) to the maximum extent authorized by law,  
24 carry out the obligations of that agency under appli-  
25 cable law concurrently and in conjunction with the

1 review required by the National Environmental Pol-  
2 icy Act of 1969 (42 U.S.C. 4321 et seq.), unless  
3 doing so would impair the ability of the agency to  
4 conduct needed analysis or otherwise carry out those  
5 obligations;

6 (2) formulate and implement administrative,  
7 policy, and procedural mechanisms to enable the  
8 agency to complete the required Federal authoriza-  
9 tions in accordance with the schedule described in  
10 subsection (c); and

11 (3) transmit to the Commission a statement—

12 (A) acknowledging notice of the schedule  
13 described in subsection (c); and

14 (B) describing the plan formulated under  
15 paragraph (2).

16 (g) FAILURE TO MEET DEADLINE.—If an agency  
17 does not complete a proceeding for an approval that is  
18 required for a Federal authorization in accordance with  
19 the schedule described in subsection (c), the head of the  
20 relevant Federal agency (including, in the case of a failure  
21 by the State agency or unit of local government, the Fed-  
22 eral agency overseeing the delegated authority) shall—

23 (1) notify Congress and the Commission of the  
24 failure; and

1           (2) describe in that notification an implementa-  
2           tion plan to ensure completion.

3           (h) ACCOUNTABILITY; TRANSPARENCY; EFFI-  
4           CIENCY.—

5           (1) IN GENERAL.—For applications requiring  
6           multiple Federal authorizations, the Commission, in  
7           consultation with any agency considering an aspect  
8           of the application, shall track and make available to  
9           the public on the website of the Commission infor-  
10          mation relating to the actions required to complete  
11          permitting, reviews, and other requirements.

12          (2) INCLUSIONS.—Information tracked under  
13          paragraph (1) shall include the following:

14                 (A) The schedule described in subsection  
15                 (c).

16                 (B) A list of all the actions required by  
17                 each applicable agency to complete permitting,  
18                 reviews, and other requirements necessary to  
19                 obtain a final decision on the Federal author-  
20                 ization.

21                 (C) The expected completion date for each  
22                 action listed under subparagraph (B).

23                 (D) A point of contact at the agency ac-  
24                 countable for each action listed under subpara-  
25                 graph (B).

1                   (E) In the event that an action is still  
2                   pending as of the expected date of completion,  
3                   a brief explanation of the reason for the delay.

4 **SEC. 3104. PILOT PROGRAM.**

5           (a) ESTABLISHMENT.—The Secretary of the Interior,  
6 acting through the Director of the Bureau of Land Man-  
7 agement (referred to in this section as the “Director”),  
8 shall establish a pilot program in 1 State with at least  
9 2,000 oil and gas drilling spacing units (as defined under  
10 State law), in which—

11                   (1) 25 percent or less of the minerals are owned  
12                   or held in trust by the Federal Government; and

13                   (2) there is no surface land owned or held in  
14                   trust by the Federal Government.

15           (b) ACTIVITIES.—In carrying out the pilot program,  
16 the Director shall identify and implement ways to stream-  
17 line the review and approval of Applications for Permits  
18 to Drill for oil and gas drilling spacing units of the State  
19 in order to achieve a processing time for those oil and gas  
20 drilling spacing units similar to that of spacing units that  
21 require an Application for Permit to Drill and are not part  
22 of the pilot program in the same State.

23           (c) FUNDING.—Beginning in fiscal year 2016, and  
24 for a period of 3 years thereafter, to carry out the pilot

1 program efficiently, the Director may fund up to 10 full-  
2 time equivalents at appropriate field offices.

3 (d) REPORT.—Not later than 4 years after the date  
4 of enactment of this Act, the Director shall submit to Con-  
5 gress a report on the results of the pilot program.

6 (e) WAIVER.—The Secretary of the Interior may  
7 waive the requirement for an Application for Permit to  
8 Drill if the Director determines that the mineral interest  
9 of the United States in the spacing units in land covered  
10 by this section is adequately protected, if otherwise in ac-  
11 cordance with applicable laws, regulations, and lease  
12 terms.

## 13 **Subtitle C—Helium**

### 14 **SEC. 3201. RIGHTS TO HELIUM.**

15 (a) DEFINITION OF HELIUM-RELATED PROJECT.—  
16 The term “helium-related project” means a project—

- 17 (1) to explore or produce crude helium; and
- 18 (2) to sell crude or refined helium.

19 (b) EXPEDITED COMPLETION.—Notwithstanding any  
20 other provision of law, applicable environmental reviews  
21 under the National Environmental Policy Act of 1969 (42  
22 U.S.C. 4321 et seq.) for helium-related projects shall be  
23 completed on an expeditious basis and the shortest exist-  
24 ing applicable process under that Act shall be used for  
25 such projects.

1           (c) REPEAL OF RESERVATION OF HELIUM  
2 RIGHTS.—The first section of the Mineral Leasing Act  
3 (30 U.S.C. 181) is amended by striking the flush text that  
4 follows the last undesignated subsection.

5           (d) RIGHTS TO HELIUM UNDER LEASES UNDER  
6 MINERAL LEASING ACT FOR ACQUIRED LANDS.—The  
7 Mineral Leasing Act for Acquired Lands (30 U.S.C. 351  
8 et seq.) is amended by adding at the end the following:  
9 **“SEC. 12. RIGHTS TO HELIUM.**

10           “Any lease issued under this Act that authorizes ex-  
11 ploration for, or development or production of, gas shall  
12 be considered to grant to the lessee a right of first refusal  
13 to engage in exploration for, and development and produc-  
14 tion of, helium on land that is subject to the lease in ac-  
15 cordance with regulations issued by the Secretary.”.

## 16           **Subtitle D—Critical Minerals**

### 17           **SEC. 3301. DEFINITIONS.**

18           In this subtitle:

19                   (1) CRITICAL MINERAL.—

20                           (A) IN GENERAL.—The term “critical min-  
21 eral” means any mineral, element, substance, or  
22 material designated as critical pursuant to sec-  
23 tion 3303.

24                           (B) EXCLUSIONS.—The term “critical  
25 mineral” does not include—

1 (i) fuel minerals, including oil, natural  
2 gas, or any other fossil fuels; or

3 (ii) water, ice, or snow.

4 (2) CRITICAL MINERAL MANUFACTURING.—The  
5 term “critical mineral manufacturing” means—

6 (A) the production, processing, refining,  
7 alloying, separation, concentration, magnetic  
8 sintering, melting, or beneficiation of critical  
9 minerals within the United States;

10 (B) the fabrication, assembly, or produc-  
11 tion, within the United States, of equipment,  
12 components, or other goods with energy tech-  
13 nology-, defense-, agriculture-, consumer elec-  
14 tronics-, or health care-related applications; or

15 (C) any other value-added, manufacturing-  
16 related use of critical minerals undertaken with-  
17 in the United States.

18 (3) INDIAN TRIBE.—The term “Indian tribe”  
19 has the meaning given the term in section 4 of the  
20 Indian Self-Determination and Education Assistance  
21 Act (25 U.S.C. 450b).

22 (4) STATE.—The term “State” means—

23 (A) a State;

24 (B) the District of Columbia;

25 (C) the Commonwealth of Puerto Rico;

- 1 (D) Guam;
- 2 (E) American Samoa;
- 3 (F) the Commonwealth of the Northern
- 4 Mariana Islands; and
- 5 (G) the United States Virgin Islands.

6 **SEC. 3302. POLICY.**

7 (a) IN GENERAL.—Section 3 of the National Mate-

8 rials and Minerals Policy, Research and Development Act

9 of 1980 (30 U.S.C. 1602) is amended in the second sen-

10 tence—

11 (1) by striking paragraph (3) and inserting the

12 following:

13 “(3) establish an analytical and forecasting ca-

14 pability for identifying critical mineral demand, sup-

15 ply, and other factors to allow informed actions to

16 be taken to avoid supply shortages, mitigate price

17 volatility, and prepare for demand growth and other

18 market shifts;”;

19 (2) in paragraph (6), by striking “and” after

20 the semicolon at the end; and

21 (3) by striking paragraph (7) and inserting the

22 following:

23 “(7) encourage Federal agencies to facilitate

24 the availability, development, and environmentally

1 responsible production of domestic resources to meet  
2 national material or critical mineral needs;

3 “(8) avoid duplication of effort, prevent unneces-  
4 sary paperwork, and minimize delays in the ad-  
5 ministration of applicable laws (including regula-  
6 tions) and the issuance of permits and authoriza-  
7 tions necessary to explore for, develop, and produce  
8 critical minerals and to construct critical mineral  
9 manufacturing facilities in accordance with applica-  
10 ble environmental and land management laws;

11 “(9) strengthen educational and research capa-  
12 bilities and workforce training;

13 “(10) bolster international cooperation through  
14 technology transfer, information sharing, and other  
15 means;

16 “(11) promote the efficient production, use, and  
17 recycling of critical minerals;

18 “(12) develop alternatives to critical minerals;  
19 and

20 “(13) establish contingencies for the production  
21 of, or access to, critical minerals for which viable  
22 sources do not exist within the United States.”.

23 (b) CONFORMING AMENDMENT.—Section 2(b) of the  
24 National Materials and Minerals Policy, Research and De-  
25 velopment Act of 1980 (30 U.S.C. 1601(b)) is amended

1 by striking “(b) As used in this Act, the term” and insert-  
2 ing the following:

3 “(b) DEFINITIONS.—In this Act:

4 “(1) CRITICAL MINERAL.—The term ‘critical  
5 mineral’ means any mineral or element designated  
6 as a critical mineral pursuant to section 3303 of the  
7 Energy Policy Modernization Act of 2015.

8 “(2) MATERIALS.—The term”.

9 **SEC. 3303. CRITICAL MINERAL DESIGNATIONS.**

10 (a) DRAFT METHODOLOGY.—Not later than 90 days  
11 after the date of enactment of this Act, the Secretary of  
12 the Interior (acting through the Director of the United  
13 States Geological Survey) (referred to in this subtitle as  
14 the “Secretary”), in consultation with relevant Federal  
15 agencies and entities, shall publish in the Federal Register  
16 for public comment a draft methodology for determining  
17 which minerals qualify as critical minerals based on an  
18 assessment of whether the minerals are—

19 (1) subject to potential supply restrictions (in-  
20 cluding restrictions associated with foreign political  
21 risk, abrupt demand growth, military conflict, violent  
22 unrest, anti-competitive or protectionist behaviors,  
23 and other risks throughout the supply chain); and

1           (2) important in use (including energy tech-  
2           nology-, defense-, currency-, agriculture-, consumer  
3           electronics-, and health care-related applications).

4           (b) AVAILABILITY OF DATA.—If available data is in-  
5           sufficient to provide a quantitative basis for the method-  
6           ology developed under this section, qualitative evidence  
7           may be used to the extent necessary.

8           (c) FINAL METHODOLOGY.—After reviewing public  
9           comments on the draft methodology under subsection (a)  
10          and updating the draft methodology as appropriate, not  
11          later than 270 days after the date of enactment of this  
12          Act, the Secretary shall publish in the Federal Register  
13          a description of the final methodology for determining  
14          which minerals qualify as critical minerals.

15          (d) DESIGNATIONS.—

16               (1) IN GENERAL.—For purposes of carrying out  
17               this subtitle, the Secretary shall maintain a list of  
18               minerals and elements designated as critical, pursu-  
19               ant to the methodology under subsection (c).

20               (2) INITIAL LIST.—Subject to paragraph (1),  
21               not later than 1 year after the date of enactment of  
22               this Act, the Secretary shall publish in the Federal  
23               Register an initial list of minerals designated as crit-  
24               ical pursuant to the final methodology under sub-

1 section (c) for the purpose of carrying out this sub-  
2 title.

3 (3) INCLUSIONS.—Notwithstanding the criteria  
4 under subsection (c), the Secretary may designate  
5 and include on the list any mineral or element deter-  
6 mined by another Federal agency to be strategic and  
7 critical to the defense or national security of the  
8 United States.

9 (e) SUBSEQUENT REVIEW.—

10 (1) IN GENERAL.—The Secretary shall review  
11 the methodology and designations under subsections  
12 (c) and (d) at least every 3 years, or more frequently  
13 as the Secretary considers to be appropriate.

14 (2) REVISIONS.—Subject to subsection (d)(1),  
15 the Secretary may—

16 (A) revise the methodology described in  
17 this section;

18 (B) determine that minerals or elements  
19 previously determined to be critical minerals are  
20 no longer critical minerals; and

21 (C) designate additional minerals or ele-  
22 ments as critical minerals.

23 (f) NOTICE.—On finalization of the methodology  
24 under subsection (c), the list under subsection (d), or any  
25 revision to the methodology or list under subsection (e),

1 the Secretary shall submit to Congress written notice of  
2 the action.

3 **SEC. 3304. RESOURCE ASSESSMENT.**

4 (a) IN GENERAL.—Not later than 4 years after the  
5 date of enactment of this Act, in consultation with applica-  
6 ble State (including geological surveys), local, academic,  
7 industry, and other entities, the Secretary shall complete  
8 a comprehensive national assessment of each critical min-  
9 eral that—

10 (1) identifies and quantifies known critical min-  
11 eral resources, using all available public and private  
12 information and datasets, including exploration his-  
13 tories; and

14 (2) provides a quantitative and qualitative as-  
15 sessment of undiscovered critical mineral resources  
16 throughout the United States, including probability  
17 estimates of tonnage and grade, using all available  
18 public and private information and datasets, includ-  
19 ing exploration histories.

20 (b) SUPPLEMENTARY INFORMATION.—In carrying  
21 out this section, the Secretary may carry out surveys and  
22 field work (including drilling, remote sensing, geophysical  
23 surveys, geological mapping, and geochemical sampling  
24 and analysis) to supplement existing information and

1 datasets available for determining the existence of critical  
2 minerals in the United States.

3 (c) TECHNICAL ASSISTANCE.—At the request of the  
4 Governor of a State or the head of an Indian tribe, the  
5 Secretary may provide technical assistance to State gov-  
6 ernments and Indian tribes conducting critical mineral re-  
7 source assessments on non-Federal land.

8 (d) PRIORITIZATION.—

9 (1) IN GENERAL.—The Secretary may sequence  
10 the completion of resource assessments for each crit-  
11 ical mineral such that critical minerals considered to  
12 be most critical under the methodology established  
13 under section 3303 are completed first.

14 (2) REPORTING.—During the period beginning  
15 not later than 1 year after the date of enactment of  
16 this Act and ending on the date of completion of all  
17 of the assessments required under this section, the  
18 Secretary shall submit to Congress on an annual  
19 basis an interim report that—

20 (A) identifies the sequence and schedule  
21 for completion of the assessments if the Sec-  
22 retary sequences the assessments; or

23 (B) describes the progress of the assess-  
24 ments if the Secretary does not sequence the  
25 assessments.

1 (e) UPDATES.—The Secretary may periodically up-  
2 date the assessments conducted under this section based  
3 on—

4 (1) the generation of new information or  
5 datasets by the Federal Government; or

6 (2) the receipt of new information or datasets  
7 from critical mineral producers, State geological sur-  
8 veys, academic institutions, trade associations, or  
9 other persons.

10 (f) ADDITIONAL SURVEYS.—The Secretary shall com-  
11 plete a resource assessment for each additional mineral  
12 or element subsequently designated as a critical mineral  
13 under section 3303(e)(2) not later than 2 years after the  
14 designation of the mineral or element.

15 (g) REPORT.—Not later than 2 years after the date  
16 of enactment of this Act, the Secretary shall submit to  
17 Congress a report describing the status of geological sur-  
18 veying of Federal land for any mineral commodity—

19 (1) for which the United States was dependent  
20 on a foreign country for more than 25 percent of the  
21 United States supply, as depicted in the report  
22 issued by the United States Geological Survey enti-  
23 tled “Mineral Commodity Summaries 2015”; but

24 (2) that is not designated as a critical mineral  
25 under section 3303.

1 **SEC. 3305. PERMITTING.**

2 (a) PERFORMANCE IMPROVEMENTS.—To improve  
3 the quality and timeliness of decisions, the Secretary (act-  
4 ing through the Director of the Bureau of Land Manage-  
5 ment) and the Secretary of Agriculture (acting through  
6 the Chief of the Forest Service) (referred to in this section  
7 as the “Secretaries”) shall, to the maximum extent prac-  
8 ticable, with respect to critical mineral production on Fed-  
9 eral land, complete Federal permitting and review proc-  
10 esses with maximum efficiency and effectiveness, while  
11 supporting vital economic growth, by—

12 (1) establishing and adhering to timelines and  
13 schedules for the consideration of, and final deci-  
14 sions regarding, applications, operating plans, leases,  
15 licenses, permits, and other use authorizations for  
16 mineral-related activities on Federal land;

17 (2) establishing clear, quantifiable, and tem-  
18 poral permitting performance goals and tracking  
19 progress against those goals;

20 (3) engaging in early collaboration among agen-  
21 cies, project sponsors, and affected stakeholders—

22 (A) to incorporate and address the inter-  
23 ests of those parties; and

24 (B) to minimize delays;

25 (4) ensuring transparency and accountability by  
26 using cost-effective information technology to collect

1 and disseminate information regarding individual  
2 projects and agency performance;

3 (5) engaging in early and active consultation  
4 with State, local, and Indian tribal governments to  
5 avoid conflicts or duplication of effort, resolve con-  
6 cerns, and allow for concurrent, rather than sequen-  
7 tial, reviews;

8 (6) providing demonstrable improvements in the  
9 performance of Federal permitting and review proc-  
10 esses, including lower costs and more timely deci-  
11 sions;

12 (7) expanding and institutionalizing permitting  
13 and review process improvements that have proven  
14 effective;

15 (8) developing mechanisms to better commu-  
16 nicate priorities and resolve disputes among agencies  
17 at the national, regional, State, and local levels; and

18 (9) developing other practices, such as  
19 preapplication procedures.

20 (b) REVIEW AND REPORT.—Not later than 1 year  
21 after the date of enactment of this Act, the Secretaries  
22 shall submit to Congress a report that—

23 (1) identifies additional measures (including  
24 regulatory and legislative proposals, as appropriate)  
25 that would increase the timeliness of permitting ac-

1        activities for the exploration and development of do-  
2        mestic critical minerals;

3            (2) identifies options (including cost recovery  
4        paid by permit applicants) for ensuring adequate  
5        staffing and training of Federal entities and per-  
6        sonnel responsible for the consideration of applica-  
7        tions, operating plans, leases, licenses, permits, and  
8        other use authorizations for critical mineral-related  
9        activities on Federal land;

10           (3) quantifies the amount of time typically re-  
11        quired (including range derived from minimum and  
12        maximum durations, mean, median, variance, and  
13        other statistical measures or representations) to  
14        complete each step (including those aspects outside  
15        the control of the executive branch, such as judicial  
16        review, applicant decisions, or State and local gov-  
17        ernment involvement) associated with the develop-  
18        ment and processing of applications, operating  
19        plans, leases, licenses, permits, and other use au-  
20        thorizations for critical mineral-related activities on  
21        Federal land, which shall serve as a baseline for the  
22        performance metric under subsection (c); and

23           (4) describes actions carried out pursuant to  
24        subsection (a).

1           (c) PERFORMANCE METRIC.—Not later than 90 days  
2 after the date of submission of the report under subsection  
3 (b), the Secretaries, after providing public notice and an  
4 opportunity to comment, shall develop and publish a per-  
5 formance metric for evaluating the progress made by the  
6 executive branch to expedite the permitting of activities  
7 that will increase exploration for, and development of, do-  
8 mestic critical minerals, while maintaining environmental  
9 standards.

10          (d) ANNUAL REPORTS.—Beginning with the first  
11 budget submission by the President under section 1105  
12 of title 31, United States Code, after publication of the  
13 performance metric required under subsection (c), and an-  
14 nually thereafter, the Secretaries shall submit to Congress  
15 a report that—

16           (1) summarizes the implementation of rec-  
17 ommendations, measures, and options identified in  
18 paragraphs (1) and (2) of subsection (b);

19           (2) using the performance metric under sub-  
20 section (c), describes progress made by the executive  
21 branch, as compared to the baseline established pur-  
22 suant to subsection (b)(3), on expediting the permit-  
23 ting of activities that will increase exploration for,  
24 and development of, domestic critical minerals; and

1           (3) compares the United States to other coun-  
2           tries in terms of permitting efficiency and any other  
3           criteria relevant to the globally competitive critical  
4           minerals industry.

5           (e) INDIVIDUAL PROJECTS.—Using data from the  
6           Secretaries generated under subsection (d), the Director  
7           of the Office of Management and Budget shall prioritize  
8           inclusion of individual critical mineral projects on the  
9           website operated by the Office of Management and Budget  
10          in accordance with section 1122 of title 31, United States  
11          Code.

12          (f) REPORT OF SMALL BUSINESS ADMINISTRA-  
13          TION.—Not later than 1 year and 300 days after the date  
14          of enactment of this Act, the Administrator of the Small  
15          Business Administration shall submit to the applicable  
16          committees of Congress a report that assesses the per-  
17          formance of Federal agencies with respect to—

18                 (1) complying with chapter 6 of title 5, United  
19                 States Code (commonly known as the “Regulatory  
20                 Flexibility Act”), in promulgating regulations appli-  
21                 cable to the critical minerals industry; and

22                 (2) performing an analysis of regulations appli-  
23                 cable to the critical minerals industry that may be  
24                 outmoded, inefficient, duplicative, or excessively bur-  
25                 densome.

1 **SEC. 3306. FEDERAL REGISTER PROCESS.**

2 (a) DEPARTMENTAL REVIEW.—Absent any extraor-  
3 dinary circumstance, and except as otherwise required by  
4 law, the Secretary and the Secretary of Agriculture shall  
5 ensure that each Federal Register notice described in sub-  
6 section (b) shall be—

7 (1) subject to any required reviews within the  
8 Department of the Interior or the Department of  
9 Agriculture; and

10 (2) published in final form in the Federal Reg-  
11 ister not later than 45 days after the date of initial  
12 preparation of the notice.

13 (b) PREPARATION.—The preparation of Federal Reg-  
14 ister notices required by law associated with the issuance  
15 of a critical mineral exploration or mine permit shall be  
16 delegated to the organizational level within the agency re-  
17 sponsible for issuing the critical mineral exploration or  
18 mine permit.

19 (c) TRANSMISSION.—All Federal Register notices re-  
20 garding official document availability, announcements of  
21 meetings, or notices of intent to undertake an action shall  
22 be originated in, and transmitted to the Federal Register  
23 from, the office in which, as applicable—

24 (1) the documents or meetings are held; or

25 (2) the activity is initiated.

1 **SEC. 3307. RECYCLING, EFFICIENCY, AND ALTERNATIVES.**

2 (a) ESTABLISHMENT.—The Secretary of Energy (re-  
3 ferred to in this section as the “Secretary”) shall conduct  
4 a program of research and development—

5 (1) to promote the efficient production, use,  
6 and recycling of critical minerals throughout the  
7 supply chain; and

8 (2) to develop alternatives to critical minerals  
9 that do not occur in significant abundance in the  
10 United States.

11 (b) COOPERATION.—In carrying out the program, the  
12 Secretary shall cooperate with appropriate—

13 (1) Federal agencies and National Laboratories;

14 (2) critical mineral producers;

15 (3) critical mineral processors;

16 (4) critical mineral manufacturers;

17 (5) trade associations;

18 (6) academic institutions;

19 (7) small businesses; and

20 (8) other relevant entities or individuals.

21 (c) ACTIVITIES.—Under the program, the Secretary  
22 shall carry out activities that include the identification and  
23 development of—

24 (1) advanced critical mineral extraction, pro-  
25 duction, separation, alloying, or processing tech-  
26 nologies that decrease the energy consumption, envi-

1       ronmental impact, and costs of those activities, in-  
2       cluding—

3               (A) efficient water and wastewater man-  
4               agement strategies;

5               (B) technologies and management strate-  
6               gies to control the environmental impacts of  
7               radionuclides in ore tailings; and

8               (C) technologies for separation and proc-  
9               essing;

10              (2) technologies or process improvements that  
11              minimize the use, or lead to more efficient use, of  
12              critical minerals across the full supply chain;

13              (3) technologies, process improvements, or de-  
14              sign optimizations that facilitate the recycling of  
15              critical minerals, and options for improving the rates  
16              of collection of products and scrap containing critical  
17              minerals from post-consumer, industrial, or other  
18              waste streams;

19              (4) commercial markets, advanced storage  
20              methods, energy applications, and other beneficial  
21              uses of critical minerals processing byproducts;

22              (5) alternative minerals, metals, and materials,  
23              particularly those available in abundance within the  
24              United States and not subject to potential supply re-

1        restrictions, that lessen the need for critical minerals;  
2        and

3            (6) alternative energy technologies or alter-  
4        native designs of existing energy technologies, par-  
5        ticularly those that use minerals that—

6            (A) occur in abundance in the United  
7        States; and

8            (B) are not subject to potential supply re-  
9        strictions.

10        (d) REPORTS.—Not later than 2 years after the date  
11        of enactment of this Act, and annually thereafter, the Sec-  
12        retary shall submit to Congress a report summarizing the  
13        activities, findings, and progress of the program.

14        **SEC. 3308. ANALYSIS AND FORECASTING.**

15        (a) CAPABILITIES.—In order to evaluate existing crit-  
16        ical mineral policies and inform future actions that may  
17        be taken to avoid supply shortages, mitigate price vola-  
18        tility, and prepare for demand growth and other market  
19        shifts, the Secretary, in consultation with the Energy In-  
20        formation Administration, academic institutions, and oth-  
21        ers in order to maximize the application of existing com-  
22        petencies related to developing and maintaining computer-  
23        models and similar analytical tools, shall conduct and pub-  
24        lish the results of an annual report that includes—

1           (1) as part of the annually published Mineral  
2           Commodity Summaries from the United States Geo-  
3           logical Survey, a comprehensive review of critical  
4           mineral production, consumption, and recycling pat-  
5           terns, including—

6                   (A) the quantity of each critical mineral  
7                   domestically produced during the preceding  
8                   year;

9                   (B) the quantity of each critical mineral  
10                  domestically consumed during the preceding  
11                  year;

12                  (C) market price data or other price data  
13                  for each critical mineral;

14                  (D) an assessment of—

15                   (i) critical mineral requirements to  
16                   meet the national security, energy, eco-  
17                   nomic, industrial, technological, and other  
18                   needs of the United States during the pre-  
19                   ceding year;

20                   (ii) the reliance of the United States  
21                   on foreign sources to meet those needs  
22                   during the preceding year; and

23                   (iii) the implications of any supply  
24                   shortages, restrictions, or disruptions dur-  
25                   ing the preceding year;

1 (E) the quantity of each critical mineral  
2 domestically recycled during the preceding year;

3 (F) the market penetration during the pre-  
4 ceding year of alternatives to each critical min-  
5 eral;

6 (G) a discussion of international trends as-  
7 sociated with the discovery, production, con-  
8 sumption, use, costs of production, prices, and  
9 recycling of each critical mineral as well as the  
10 development of alternatives to critical minerals;  
11 and

12 (H) such other data, analyses, and evalua-  
13 tions as the Secretary finds are necessary to  
14 achieve the purposes of this section; and

15 (2) a comprehensive forecast, entitled the “An-  
16 nual Critical Minerals Outlook”, of projected critical  
17 mineral production, consumption, and recycling pat-  
18 terns, including—

19 (A) the quantity of each critical mineral  
20 projected to be domestically produced over the  
21 subsequent 1-year, 5-year, and 10-year periods;

22 (B) the quantity of each critical mineral  
23 projected to be domestically consumed over the  
24 subsequent 1-year, 5-year, and 10-year periods;

25 (C) an assessment of—

1 (i) critical mineral requirements to  
2 meet projected national security, energy,  
3 economic, industrial, technological, and  
4 other needs of the United States;

5 (ii) the projected reliance of the  
6 United States on foreign sources to meet  
7 those needs; and

8 (iii) the projected implications of po-  
9 tential supply shortages, restrictions, or  
10 disruptions;

11 (D) the quantity of each critical mineral  
12 projected to be domestically recycled over the  
13 subsequent 1-year, 5-year, and 10-year periods;

14 (E) the market penetration of alternatives  
15 to each critical mineral projected to take place  
16 over the subsequent 1-year, 5-year, and 10-year  
17 periods;

18 (F) a discussion of reasonably foreseeable  
19 international trends associated with the dis-  
20 covery, production, consumption, use, costs of  
21 production, and recycling of each critical min-  
22 eral as well as the development of alternatives  
23 to critical minerals; and

24 (G) such other projections relating to each  
25 critical mineral as the Secretary determines to

1           be necessary to achieve the purposes of this sec-  
2           tion.

3           (b) PROPRIETARY INFORMATION.—In preparing a re-  
4 port described in subsection (a), the Secretary shall en-  
5 sure, consistent with section 5(f) of the National Materials  
6 and Minerals Policy, Research and Development Act of  
7 1980 (30 U.S.C. 1604(f)), that—

8           (1) no person uses the information and data  
9           collected for the report for a purpose other than the  
10          development of or reporting of aggregate data in a  
11          manner such that the identity of the person or firm  
12          who supplied the information is not discernible and  
13          is not material to the intended uses of the informa-  
14          tion;

15          (2) no person discloses any information or data  
16          collected for the report unless the information or  
17          data has been transformed into a statistical or ag-  
18          gregate form that does not allow the identification of  
19          the person or firm who supplied particular informa-  
20          tion; and

21          (3) procedures are established to require the  
22          withholding of any information or data collected for  
23          the report if the Secretary determines that with-  
24          holding is necessary to protect proprietary informa-

1           tion, including any trade secrets or other confiden-  
2           tial information.

3   **SEC. 3309. EDUCATION AND WORKFORCE.**

4           (a) WORKFORCE ASSESSMENT.—Not later than 1  
5   year and 300 days after the date of enactment of this Act,  
6   the Secretary of Labor (in consultation with the Secretary,  
7   the Director of the National Science Foundation, institu-  
8   tions of higher education with substantial expertise in  
9   mining, institutions of higher education with significant  
10  expertise in minerals research, including fundamental re-  
11  search into alternatives, and employers in the critical min-  
12  erals sector) shall submit to Congress an assessment of  
13  the domestic availability of technically trained personnel  
14  necessary for critical mineral exploration, development, as-  
15  sessment, production, manufacturing, recycling, analysis,  
16  forecasting, education, and research, including an analysis  
17  of—

18           (1) skills that are in the shortest supply as of  
19   the date of the assessment;

20           (2) skills that are projected to be in short sup-  
21   ply in the future;

22           (3) the demographics of the critical minerals in-  
23   dustry and how the demographics will evolve under  
24   the influence of factors such as an aging workforce;

1           (4) the effectiveness of training and education  
2 programs in addressing skills shortages;

3           (5) opportunities to hire locally for new and ex-  
4 isting critical mineral activities;

5           (6) the sufficiency of personnel within relevant  
6 areas of the Federal Government for achieving the  
7 policies described in section 3 of the National Mate-  
8 rials and Minerals Policy, Research and Develop-  
9 ment Act of 1980 (30 U.S.C. 1602); and

10          (7) the potential need for new training pro-  
11 grams to have a measurable effect on the supply of  
12 trained workers in the critical minerals industry.

13 (b) CURRICULUM STUDY.—

14          (1) IN GENERAL.—The Secretary and the Sec-  
15 retary of Labor shall jointly enter into an arrange-  
16 ment with the National Academy of Sciences and the  
17 National Academy of Engineering under which the  
18 Academies shall coordinate with the National  
19 Science Foundation on conducting a study—

20           (A) to design an interdisciplinary program  
21 on critical minerals that will support the critical  
22 mineral supply chain and improve the ability of  
23 the United States to increase domestic, critical  
24 mineral exploration, development, production,

1 manufacturing, research, including fundamental  
2 research into alternatives, and recycling;

3 (B) to address undergraduate and grad-  
4 uate education, especially to assist in the devel-  
5 opment of graduate level programs of research  
6 and instruction that lead to advanced degrees  
7 with an emphasis on the critical mineral supply  
8 chain or other positions that will increase do-  
9 mestic, critical mineral exploration, develop-  
10 ment, production, manufacturing, research, in-  
11 cluding fundamental research into alternatives,  
12 and recycling;

13 (C) to develop guidelines for proposals  
14 from institutions of higher education with sub-  
15 stantial capabilities in the required disciplines  
16 for activities to improve the critical mineral  
17 supply chain and advance the capacity of the  
18 United States to increase domestic, critical min-  
19 eral exploration, research, development, produc-  
20 tion, manufacturing, and recycling; and

21 (D) to outline criteria for evaluating per-  
22 formance and recommendations for the amount  
23 of funding that will be necessary to establish  
24 and carry out the program described in sub-  
25 section (c).

1           (2) REPORT.—Not later than 2 years after the  
2 date of enactment of this Act, the Secretary shall  
3 submit to Congress a description of the results of  
4 the study required under paragraph (1).

5           (c) PROGRAM.—

6           (1) ESTABLISHMENT.—The Secretary and the  
7 Secretary of Labor shall jointly conduct a competi-  
8 tive grant program under which institutions of high-  
9 er education may apply for and receive 4-year grants  
10 for—

11                   (A) startup costs for newly designated fac-  
12 ulty positions in integrated critical mineral edu-  
13 cation, research, innovation, training, and work-  
14 force development programs consistent with  
15 subsection (b);

16                   (B) internships, scholarships, and fellow-  
17 ships for students enrolled in programs related  
18 to critical minerals;

19                   (C) equipment necessary for integrated  
20 critical mineral innovation, training, and work-  
21 force development programs; and

22                   (D) research of critical minerals and their  
23 applications, particularly concerning the manu-  
24 facture of critical components vital to national  
25 security.

1 (A) the matter under the heading “**GEO-**  
2 **LOGICAL SURVEY**” of the first section of the  
3 Act of March 3, 1879 (43 U.S.C. 31(a)); or

4 (B) the first section of Public Law 87–626  
5 (43 U.S.C. 31(b)).

6 (2) POTASH.—Nothing in this subtitle affects  
7 any aspect of Secretarial Order 3324, issued by the  
8 Secretary of the Interior on December 3, 2012, with  
9 respect to potash and oil and gas operators.

10 **SEC. 3312. AUTHORIZATION OF APPROPRIATIONS.**

11 There is authorized to be appropriated to carry out  
12 this subtitle \$50,000,000 for each of fiscal years 2017  
13 through 2026.

14 **Subtitle E—Coal**

15 **SEC. 3401. FOSSIL ENERGY.**

16 Section 961(a) of the Energy Policy Act of 2005 (42  
17 U.S.C. 16291(a)) is amended by adding at the end the  
18 following:

19 “(8) Improving the conversion, use, and storage  
20 of carbon dioxide produced from fossil fuels.”.

21 **SEC. 3402. ESTABLISHMENT OF COAL TECHNOLOGY PRO-**  
22 **GRAM.**

23 (a) REPEALS.—

24 (1) IN GENERAL.—

1           (A) Sections 962 and 963 of the Energy  
2 Policy Act of 2005 (42 U.S.C. 16292, 16293)  
3 are repealed.

4           (B) Subtitle A of title IV of the Energy  
5 Policy Act of 2005 (42 U.S.C. 15961 et seq.)  
6 is repealed.

7           (2) SAVINGS CLAUSE.—Notwithstanding the  
8 amendments made by paragraph (1), the Secretary  
9 shall continue to manage any program activities that  
10 are outstanding as of the date of enactment of this  
11 Act under the terms and conditions of sections 962  
12 and 963 of the Energy Policy Act of 2005 (42  
13 U.S.C. 16292, 16293) or subtitle A of title IV of the  
14 Energy Policy Act of 2005 (42 U.S.C. 15961 et  
15 seq.) (as in effect on the day before the date of en-  
16 actment of this Act), as applicable.

17           (3) CONFORMING AMENDMENTS.—

18           (A) Section 703(a)(3) of the Energy Inde-  
19 pendence and Security Act of 2007 (42 U.S.C.  
20 17251(a)(3)) is amended—

21           (i) in the matter preceding subpara-  
22 graph (A), by striking the first and second  
23 sentences; and

24           (ii) in subparagraph (B), by striking  
25 “including” in the matter preceding clause

1 (i) and all that follows through the period  
2 at the end and inserting “, including such  
3 geologic sequestration projects as are ap-  
4 proved by the Secretary”.

5 (B) Section 704 of the Energy Independ-  
6 ence and Security Act of 2007 (42 U.S.C.  
7 17252) is amended in the first sentence by  
8 striking “under section 963(c)(3) of the Energy  
9 Policy Act of 2005 (42 U.S.C. 16293(c)(3)), as  
10 added by section 702 of this subtitle, and”.

11 (b) ESTABLISHMENT OF COAL TECHNOLOGY PRO-  
12 GRAM.—

13 (1) IN GENERAL.—The Energy Policy Act of  
14 2005 (as amended by subsection (a)) is amended by  
15 inserting after section 961 (42 U.S.C. 16291) the  
16 following:

17 **“SEC. 962. COAL TECHNOLOGY PROGRAM.**

18 **“(a) DEFINITIONS.—**In this section:

19 **“(1) LARGE-SCALE PILOT PROJECT.—**The term  
20 ‘large-scale pilot project’ means a pilot project  
21 that—

22 **“(A)** represents the scale of technology de-  
23 velopment beyond laboratory development and  
24 bench scale testing, but not yet advanced to the

1 point of being tested under real operational con-  
2 ditions at commercial scale;

3 “(B) represents the scale of technology  
4 necessary to gain the operational data needed  
5 to understand the technical and performance  
6 risks of the technology before the application of  
7 that technology at commercial scale or in com-  
8 mercial-scale demonstration; and

9 “(C) is large enough—

10 “(i) to validate scaling factors; and

11 “(ii) to demonstrate the interaction  
12 between major components so that control  
13 philosophies for a new process can be de-  
14 veloped and enable the technology to ad-  
15 vance from large-scale pilot plant applica-  
16 tion to commercial scale demonstration or  
17 application.

18 “(2) PROGRAM.—The term ‘program’ means  
19 the program established under subsection (b).

20 “(3) TRANSFORMATIONAL TECHNOLOGY.—

21 “(A) IN GENERAL.—The term ‘trans-  
22 formational technology’ means a power genera-  
23 tion technology that represents an entirely new  
24 way to convert energy that will enable a step  
25 change in performance, efficiency, and cost of

1 electricity as compared to the technology in ex-  
2 istence on the date of enactment of this Act.

3 “(B) INCLUSIONS.—The term ‘trans-  
4 formational technology’ includes a broad range  
5 of technology improvements, including—

6 “(i) thermodynamic improvements in  
7 energy conversion and heat transfer, in-  
8 cluding—

9 “(I) oxygen combustion;

10 “(II) chemical looping; and

11 “(III) the replacement of steam  
12 cycles with supercritical carbon diox-  
13 ide cycles;

14 “(ii) improvements in turbine tech-  
15 nology;

16 “(iii) improvements in carbon capture  
17 systems technology; and

18 “(iv) any other technology the Sec-  
19 retary recognizes as transformational tech-  
20 nology.

21 “(b) COAL TECHNOLOGY PROGRAM.—

22 “(1) IN GENERAL.—The Secretary shall estab-  
23 lish a coal technology program to ensure the contin-  
24 ued use of the abundant, domestic coal resources of  
25 the United States through the development of tech-

1 nologies that will significantly improve the efficiency,  
2 effectiveness, costs, and environmental performance  
3 of coal use.

4 “(2) REQUIREMENTS.—The program shall in-  
5 clude—

6 “(A) a research and development program;

7 “(B) large-scale pilot projects; and

8 “(C) demonstration projects.

9 “(3) PROGRAM GOALS AND OBJECTIVES.—In  
10 consultation with the interested entities described in  
11 paragraph (4)(C), the Secretary shall develop goals  
12 and objectives for the program to be applied to the  
13 technologies developed within the program, taking  
14 into consideration the following objectives:

15 “(A) Ensure reliable, low cost power from  
16 new and existing coal plants.

17 “(B) Achieve high conversion efficiencies.

18 “(C) Address emissions of carbon dioxide  
19 through high efficiency platforms and carbon  
20 capture from new and existing coal plants.

21 “(D) Support small-scale and modular  
22 technologies to enable incremental capacity ad-  
23 ditions and load growth and large-scale genera-  
24 tion technologies.

1           “(E) Support flexible baseload operations  
2 for new and existing applications of coal gen-  
3 eration.

4           “(F) Further reduce emissions of criteria  
5 pollutants and reduce the use and manage the  
6 discharge of water in power plant operations.

7           “(G) Accelerate the development of tech-  
8 nologies that have transformational energy con-  
9 version characteristics.

10           “(H) Validate geologic storage of large vol-  
11 umes of anthropogenic sources of carbon diox-  
12 ide and support the development of the infra-  
13 structure needed to support a carbon dioxide  
14 use and storage industry.

15           “(I) Examine methods of converting coal  
16 to other valuable products and commodities in  
17 addition to electricity.

18           “(4) CONSULTATIONS REQUIRED.—In carrying  
19 out the program, the Secretary shall—

20           “(A) undertake international collabora-  
21 tions, as recommended by the National Coal  
22 Council;

23           “(B) use existing authorities to encourage  
24 international cooperation; and

1                   “(C) consult with interested entities, in-  
2                   cluding –  
3                   “(i) coal producers;  
4                   “(ii) industries that use coal;  
5                   “(iii) organizations that promote coal  
6                   and advanced coal technologies;  
7                   “(iv) environmental organizations;  
8                   “(v) organizations representing work-  
9                   ers; and  
10                   “(vi) organizations representing con-  
11                   sumers.

12                   “(c) REPORT.—

13                   “(1) IN GENERAL.—Not later than 18 months  
14                   after the date of enactment of this Act, the Sec-  
15                   retary shall submit to Congress a report describing  
16                   the performance standards adopted under subsection  
17                   (b)(3).

18                   “(2) UPDATE.—Once every 2 years after the  
19                   initial report is submitted under paragraph (1), the  
20                   Secretary shall submit to Congress a report describ-  
21                   ing the progress made towards achieving the objec-  
22                   tives and performance standards adopted under sub-  
23                   section (b)(3).

24                   “(d) FUNDING.—

1           “(1) AUTHORIZATION OF APPROPRIATIONS.—

2           There are authorized to be appropriated to the Sec-  
3           retary to carry out this Act, to remain available until  
4           expended—

5                   “(A) \$610,000,000 for each of fiscal years  
6                   2017 through 2020; and

7                   “(B) \$560,000,000 for fiscal year 2021.

8           “(2) ALLOCATIONS.—The amounts made avail-  
9           able under paragraph (1) shall be allocated as fol-  
10          lows:

11                   “(A) For activities under the research and  
12                   development program component described in  
13                   subsection (b)(2)(A)—

14                           “(i) \$275,000,000 for each of fiscal  
15                           years 2017 through 2020; and

16                           “(ii) \$200,000,000 for fiscal year  
17                           2021.

18                   “(B) For activities under the demonstra-  
19                   tion projects program component described in  
20                   subsection (b)(2)(C)—

21                           “(i) \$50,000,000 for each of fiscal  
22                           years 2017 through 2020; and

23                           “(ii) \$75,000,000 for fiscal year 2021.

24                   “(C) For activities under the large-scale  
25                   pilot projects program component described in

1 subsection (b)(2)(B), \$285,000,000 for each of  
2 fiscal years 2017 through 2021.”.

3 (2) COST SHARING FOR LARGE-SCALE PILOT  
4 PROJECTS.—Activities under subsection (b)(2)(B)  
5 shall be subject to the cost-sharing requirements of  
6 section 988(b) of the Energy Policy Act of 2005 (42  
7 U.S.C. 16352(b)).

## 8 **Subtitle F—Nuclear**

### 9 **SEC. 3501. REPORT ON FUSION AND FISSION REACTOR** 10 **PROTOTYPES.**

11 (a) IN GENERAL.—Not later than 180 days after the  
12 date of enactment of this Act, the Secretary, in consulta-  
13 tion with the National Laboratories, relevant Federal  
14 agencies, and other stakeholders, shall submit to the Com-  
15 mittees on Energy and Natural Resources and Environ-  
16 ment and Public Works of the Senate and the Committee  
17 on Science, Space, and Technology of the House of Rep-  
18 resentatives a report assessing the capability of the De-  
19 partment to host privately funded fusion and fission reac-  
20 tor prototypes up to 20 megawatts thermal output and  
21 related demonstration facilities at sites owned by the De-  
22 partment.

23 (b) CONTENT.—The report submitted under sub-  
24 section (a) shall describe the results of an assessment of—

1           (1) the safety review, oversight capabilities, and  
2 potential liability of the Department;

3           (2) potential sites capable of hosting research,  
4 development, and demonstration of prototype reac-  
5 tors and related facilities for the purpose of reducing  
6 technical risk;

7           (3) the existing physical and technical capabili-  
8 ties of the Department and the National Labora-  
9 tories relevant to research, development, and over-  
10 sight;

11          (4) the efficacy of the available contractual  
12 mechanisms of the Department, including—

13           (A) cooperative research and development  
14 agreements;

15           (B) work for others agreements; and

16           (C) agreements for commercializing tech-  
17 nology;

18          (5) potential cost structures relating to physical  
19 security, decommissioning, liability, and other long-  
20 term project costs;

21          (6) the feasibility of the Department providing  
22 technical assistance to developers of privately funded  
23 fusion and advanced fission reactors in connection  
24 with obtaining a license from the Nuclear Regu-  
25 latory Commission for demonstration reactors or

1 commercial reactors of varying size and readiness  
2 levels up to 2 gigawatts of thermal output; and  
3 (7) other challenges or considerations identified  
4 by the Secretary, including issues relating to poten-  
5 tial cases of demonstration reactors up to 2  
6 gigawatts of thermal output.

7 **SEC. 3502. NEXT GENERATION NUCLEAR PLANT PROJECT.**

8 Section 642(b) of the Energy Policy Act of 2005 (42  
9 U.S.C. 16022(b)) is amended—

10 (1) by striking paragraph (3); and

11 (2) by redesignating paragraphs (4) and (5) as  
12 paragraphs (3) and (4), respectively.

13 **Subtitle G—Workforce**  
14 **Development**

15 **SEC. 3601. 21ST CENTURY ENERGY WORKFORCE ADVISORY**  
16 **BOARD.**

17 (a) ESTABLISHMENT.—The Secretary shall establish  
18 the 21st Century Energy Workforce Advisory Board (re-  
19 ferred to in this section as the “Board”), to develop a  
20 strategy for the support and development of a skilled en-  
21 ergy workforce that—

22 (1) meets the current and future industry and  
23 labor needs of the energy sector;

1           (2) provides opportunities for students to be-  
2           come qualified for placement in traditional energy  
3           sector and clean energy sector jobs;

4           (3) aligns apprenticeship programs and work-  
5           force development programs to provide industry rec-  
6           ognized certifications and credentials;

7           (4) encourages leaders in the education system  
8           of the United States to equip students with the  
9           skills, mentorships, training, and technical expertise  
10          necessary to fill the employment opportunities vital  
11          to managing and operating the energy- and manu-  
12          facturing-related industries of the United States;

13          (5) appropriately supports other Federal agen-  
14          cies;

15          (6) strengthens and more fully engages work-  
16          force training programs of the Department and the  
17          National Laboratories in carrying out the Minorities  
18          in Energy Initiative of the Department and other  
19          Department workforce priorities;

20          (7) supports the design and replication of exist-  
21          ing model energy curricula, particularly in new and  
22          emerging technologies, that leads to industry-wide  
23          credentials;

24          (8) develops plans to support and retrain dis-  
25          placed and unemployed energy sector workers; and

1           (9) makes a Department priority to provide  
2           education and job training to underrepresented  
3           groups, including ethnic minorities, Indian tribes (as  
4           defined in section 4 of the Indian Self-Determination  
5           and Education Assistance Act (25 U.S.C. 450b)),  
6           women, veterans, and socioeconomically disadvan-  
7           taged individuals.

8           (b) MEMBERSHIP.—

9           (1) IN GENERAL.—The Board shall be com-  
10          posed of 9 members, with the initial members of the  
11          Board to be appointed by the Secretary not later  
12          than 1 year after the date of enactment of this Act.

13          (2) NOMINATIONS.—Not later than 1 year after  
14          the date of enactment of this Act, the President’s  
15          Council of Advisors on Science and Technology shall  
16          nominate for appointment to the Board under para-  
17          graph (1) not less than 18 individuals who meet the  
18          qualifications described in paragraph (3).

19          (3) QUALIFICATIONS.—Each individual nomi-  
20          nated for appointment to the Board under para-  
21          graph (1) shall—

22                 (A) be eminent in the field of economics or  
23                 workforce development;

24                 (B) have expertise in relevant traditional  
25                 energy industries and clean energy industries;

1 (C) have expertise in secondary and post-  
2 secondary education;

3 (D) have expertise in energy workforce de-  
4 velopment or apprentice programs of States and  
5 units of local government;

6 (E) have expertise in relevant organized  
7 labor organizations; or

8 (F) have expertise in bringing underrep-  
9 resented groups, including ethnic minorities,  
10 women, veterans, and socioeconomically dis-  
11 advantaged individuals, into the workforce.

12 (4) REPRESENTATION.—The membership of the  
13 Board shall be representative of the broad range of  
14 the energy industry, labor organizations, workforce  
15 development, education, minority participation, and  
16 economics disciplines related to activities carried out  
17 under this section.

18 (5) LIMITATION.—No individual shall be nomi-  
19 nated for appointment to the Board who is an em-  
20 ployee of an entity applying for a grant under sec-  
21 tion 3602.

22 (c) ADVISORY BOARD REVIEW AND RECOMMENDA-  
23 TIONS.—

1                   (ii) make resources available to pro-  
2                   vide training to displaced and unemployed  
3                   energy sector workers to reenter the en-  
4                   ergy workforce; and

5                   (E) identify the energy sectors in greatest  
6                   need of workforce training and develop guide-  
7                   lines for the skills necessary to develop a work-  
8                   force trained to work in those energy sectors.

9                   (2) REQUIRED ANALYSIS.—In developing the  
10                  strategy required under subsection (a), the Board  
11                  shall analyze the effectiveness of—

12                   (A) existing Department directed support;  
13                  and

14                   (B) developing energy workforce training  
15                  programs.

16                  (3) REPORT.—Not later than 1 year after the  
17                  date on which the Board is established under this  
18                  section, and each year thereafter, the Board shall  
19                  submit to the Secretary and Congress, and make  
20                  public, a report containing the findings of the Board  
21                  and model energy curricula with respect to the strat-  
22                  egy required to be developed under subsection (a).

23                  (d) REPORT BY SECRETARY.—Not later than 18  
24                  months after the date on which the Board is established  
25                  under this section, the Secretary shall submit to the Com-

1 mittees on Appropriations of Senate and the House of  
2 Representatives, the Committee on Energy and Natural  
3 Resources of the Senate, and the Committee on Energy  
4 and Commerce of the House of Representatives a report  
5 that—

6           (1) describes whether the Secretary approves or  
7           disapproves the recommendations of the Board  
8           under subsection (c)(3); and

9           (2) provides an implementation plan for rec-  
10          ommendations approved by the Board under para-  
11          graph (1).

12          (e) CLEARINGHOUSE.—Based on the recommenda-  
13          tions of the Board, the Secretary shall establish a clearing-  
14          house—

15               (1) to maintain and update information and re-  
16               sources on training and workforce development pro-  
17               grams for energy- and manufacturing-related jobs;  
18               and

19               (2) to act as a resource, and provide guidance,  
20               for secondary schools, institutions of higher edu-  
21               cation (including community colleges and minority-  
22               serving institutions), workforce development organi-  
23               zations, labor management organizations, and indus-  
24               try organizations that would like to develop and im-

1       plement energy- and manufacturing-related training  
2       programs.

3       (f) SUNSET.—The Board established under this sec-  
4       tion shall remain in effect until September 30, 2020.

5       **SEC. 3602. ENERGY WORKFORCE PILOT GRANT PROGRAM.**

6       (a) IN GENERAL.—Not later than 1 year after the  
7       date of enactment of this Act, the Secretary, in consulta-  
8       tion with the Secretary of Labor and the Secretary of  
9       Education, shall establish a pilot program to award grants  
10      on a competitive basis to eligible entities for job training  
11      programs that lead to an industry-recognized credential.

12      (b) ELIGIBILITY.—To be eligible to receive a grant  
13      under this section, an entity shall be a public or nonprofit  
14      organization or a consortium of public or nonprofit organi-  
15      zations that—

16              (1) includes an advisory board of proportional  
17              participation, as determined by the Secretary, of rel-  
18              evant organizations, including—

19                      (A) relevant energy industry organizations,  
20                      including public and private employers;

21                      (B) labor organizations;

22                      (C) postsecondary education organizations;

23                      and

24                      (D) workforce development boards;

1           (2) work with the Secretary of Defense or vet-  
2           erans organizations to transition members of the  
3           Armed Forces and veterans to careers in the energy  
4           sector;

5           (3) work with Indian tribes (as defined in sec-  
6           tion 4 of the Indian Self-Determination and Edu-  
7           cation Assistance Act (25 U.S.C. 450b));

8           (4) apply as a State or regional consortia to le-  
9           verage best practices already available in the State  
10          or region in which the community college or institu-  
11          tion of higher education is located;

12          (5) have a State-supported entity included in  
13          the consortium applying for the grant;

14          (6) include an apprenticeship program reg-  
15          istered with the Department of Labor or a State as  
16          part of the job training and education program;

17          (7) provide support services and career coach-  
18          ing;

19          (8) provide introductory energy workforce devel-  
20          opment training;

21          (9) work with minority-serving institutions to  
22          provide job training to increase the number of  
23          skilled minorities and women in the energy sector; or

24          (10) provide job training for displaced and un-  
25          employed workers in the energy sector.

1 (e) ADDITIONAL CONSIDERATION.—In making  
2 grants under this section, the Secretary shall consider re-  
3 gional diversity.

4 (f) LIMITATION ON APPLICATIONS.—An eligible enti-  
5 ty may not submit, either individually or as part of a joint  
6 application, more than 1 application for a grant under this  
7 section during any 1 fiscal year.

8 (g) LIMITATIONS ON AMOUNT OF GRANT.—The  
9 amount of an individual grant for any 1 year shall not  
10 exceed \$1,000,000.

11 (h) COST SHARING.—

12 (1) FEDERAL SHARE.—The Federal share of  
13 the cost of a job training and education program  
14 carried out using a grant under this section shall be  
15 not greater than 65 percent.

16 (2) NON-FEDERAL SHARE.—

17 (A) IN GENERAL.—The non-Federal share  
18 of the cost of a job training and education pro-  
19 gram carried out using a grant under this sec-  
20 tion shall consist of not less than 50 percent  
21 cash.

22 (B) LIMITATION.—Not greater than 50  
23 percent of the non-Federal contribution of the  
24 total cost of a job training and education pro-  
25 gram carried out using a grant under this sec-

1           tion shall be in the form of in-kind contribu-  
2           tions of goods or services fairly valued.

3           (i) REDUCTION OF DUPLICATION.—Prior to submit-  
4           ting an application for a grant under this section, each  
5           applicant shall consult with the appropriate agencies of  
6           the Federal Government and coordinate the proposed ac-  
7           tivities of the applicant with existing State and local pro-  
8           grams.

9           (j) TECHNICAL ASSISTANCE.—The Secretary shall  
10          provide technical assistance and capacity building to na-  
11          tional and State energy partnerships, including the enti-  
12          ties described in subsection (b)(1), to leverage the existing  
13          job training and education programs of the Department.

14          (k) REPORT.—The Secretary shall submit to Con-  
15          gress and make publicly available on the website of the  
16          Department an annual report on the program established  
17          under this section, including a description of—

18               (1) the entities receiving grants;

19               (2) the activities carried out using the grants;

20               (3) best practices used to leverage the invest-  
21          ment of the Federal Government;

22               (4) the rate of employment for participants  
23          after completing a job training and education pro-  
24          gram carried out using a grant; and

1           (C) any financial incentives that may be  
2 necessary for the development of recycled car-  
3 bon fiber or production waste carbon fiber;

4           (D) the potential lifecycle savings in energy  
5 from producing recycled carbon fiber, as com-  
6 pared to producing new carbon fiber;

7           (E) the best and highest use for recycled  
8 carbon fiber;

9           (F) the potential reduction in carbon diox-  
10 ide emissions from producing recycled carbon  
11 fiber, as compared to producing new carbon  
12 fiber;

13           (G) any economic benefits gained from  
14 using recycled carbon fiber or production waste  
15 carbon fiber;

16           (H) workforce training and skills needed to  
17 address labor demands in the development of  
18 recycled carbon fiber or production waste car-  
19 bon fiber; and

20           (I) how the Department can leverage exist-  
21 ing efforts in the industry on the use of produc-  
22 tion waste carbon fiber.

23           (3) REPORT.—Not later than 1 year after the  
24 date of enactment of this Act, the Secretary shall

1 submit to Congress a report describing the results of  
2 the study conducted under paragraph (1).

3 (b) RECYCLED CARBON FIBER DEMONSTRATION  
4 PROJECT.—On completion of the study required under  
5 subsection (a)(1), the Secretary shall consult with the  
6 aviation and automotive industries and existing programs  
7 of the Advanced Manufacturing Office of the Department  
8 to develop a carbon fiber recycling demonstration project.

9 (c) AUTHORIZATION OF APPROPRIATIONS.—There is  
10 authorized to be appropriated to the Secretary to carry  
11 out this section \$10,000,000, to remain available until ex-  
12 pended.

13 **SEC. 3702. ENERGY GENERATION AND REGULATORY RE-**  
14 **LIEF STUDY REGARDING RECOVERY AND**  
15 **CONVERSION OF NONRECYCLED MIXED**  
16 **PLASTICS.**

17 (a) DEFINITIONS.—In this section:

18 (1) ENGINEERED FUEL.—The term “engi-  
19 neered fuel” means a solid fuel that is manufactured  
20 from nonrecycled constituents of municipal solid  
21 waste or other secondary materials.

22 (2) GASIFICATION.—The term “gasification”  
23 means a process through which nonrecycled waste is  
24 heated and converted to synthesis gas in an oxygen-

1       deficient atmosphere, which can be converted into  
2       fuels such as ethanol or other chemical feedstocks.

3           (3) PYROLYSIS.—The term “pyrolysis” means a  
4       process through which nonrecycled plastics are heat-  
5       ed in the absence of oxygen until melted and ther-  
6       mally decomposed, and are then cooled, condensed,  
7       and converted into synthetic crude oil or refined into  
8       synthetic fuels and feedstocks such as diesel or  
9       naphtha.

10       (b) STUDY.—With respect to nonrecycled mixed plas-  
11      tics that are part of municipal solid waste or other sec-  
12      ondary materials in the United States (and are often de-  
13      posited in landfills), the Secretary shall conduct a study  
14      to determine the manner in which the United States can  
15      make progress toward a cost-effective system (including  
16      with respect to environmental issues) through which pyrol-  
17      ysis, gasification, and other innovative technologies such  
18      as engineered fuels are used to convert such plastics, alone  
19      or in combination with other municipal solid waste or sec-  
20      ondary materials, into materials that can be used to gen-  
21      erate electric energy or fuels or as chemical feedstocks.

22       (c) COMPLETION OF STUDY.—Not later than 2 years  
23      after the date of enactment of this Act, the Secretary shall  
24      complete the study described in subsection (b) and submit  
25      to the appropriate committees of Congress reports pro-

1 viding findings and recommendations developed through  
2 the study.

3 (d) FUNDING.—The Secretary may use unobligated  
4 funds of the Department to carry out this section.

5 **SEC. 3703. ELIGIBLE PROJECTS.**

6 Section 1703(b)(1) of the Energy Policy Act of 2005  
7 (42 U.S.C. 16513(b)(1)) is amended by inserting “(ex-  
8 cluding the burning of commonly recycled paper that has  
9 been segregated from solid waste to generate electricity)”  
10 after “systems”.

11 **TITLE IV—ACCOUNTABILITY**  
12 **Subtitle A—Loan Programs**

13 **SEC. 4001. TERMS AND CONDITIONS FOR INCENTIVES FOR**  
14 **INNOVATIVE TECHNOLOGIES.**

15 (a) BORROWER PAYMENT OF SUBSIDY COST.—

16 (1) IN GENERAL.—Section 1702 of the Energy  
17 Policy Act of 2005 (42 U.S.C. 16512) is amended  
18 by adding at the end the following:

19 “(1) BORROWER PAYMENT OF SUBSIDY COST.—

20 “(1) IN GENERAL.—In addition to the require-  
21 ment in subsection (b)(1), no guarantee shall be  
22 made unless the Secretary has received from the  
23 borrower not less than 25 percent of the cost of the  
24 guarantee.

1           “(2) ESTIMATE.—The Secretary shall provide  
2           to the borrower, as soon as practicable, an estimate  
3           or range of the cost of the guarantee under para-  
4           graph (1).”.

5           (2) CONFORMING AMENDMENT.—Section  
6           1702(b) of the Energy Policy Act of 2005 (42  
7           U.S.C. 16512(b)) is amended—

8                   (A) by striking “(1) IN GENERAL.—No  
9                   guarantee” and inserting the following: “Sub-  
10                  ject to subsection (l), no guarantee”;

11                  (B) by redesignating subparagraphs (A),  
12                  (B), and (C) as paragraphs (1), (2), and (3),  
13                  respectively, and indenting appropriately; and

14                  (C) in paragraph (3) (as so redesign-  
15                  ated)—

16                          (i) by striking “subparagraph (A)”  
17                          and inserting “paragraph (1)”; and

18                          (ii) by striking “subparagraph (B)”  
19                          and inserting “paragraph (2)”.

20           (3) EFFECTIVE DATE.—The amendments made  
21           by paragraphs (1) and (2) shall take effect on Octo-  
22           ber 1, 2019.

23           (b) PROHIBITION ON SUBORDINATION OF DEBT.—  
24           Section 1702(d)(3) of the Energy Policy Act of 2005 (42  
25           U.S.C. 16512(d)(3)) is amended by striking “is not subor-

1 dinate” and inserting “(including any reorganization, re-  
2 structuring, or termination of the obligation) shall not at  
3 any time be subordinate”.

4 (c) LOAN PROGRAM TRANSPARENCY.—Section 1703  
5 of the Energy Policy Act of 2005 (42 U.S.C. 16513) is  
6 amended by adding at the end the following:

7 “(f) LOAN STATUS.—

8 “(1) REQUEST.—If the Secretary does not  
9 make a final decision on an application for a loan  
10 guarantee under this section by the date that is 270  
11 days after receipt of the application by the Sec-  
12 retary, on that date and every 90 days thereafter  
13 until the final decision is made, the applicant may  
14 request that the Secretary provide to the applicant  
15 a description of the status of the application.

16 “(2) RESPONSE.—Not later than 10 days after  
17 receiving a request from an applicant under para-  
18 graph (1), the Secretary shall provide to the appli-  
19 cant a response that includes—

20 “(A) a summary of any factors that are  
21 delaying a final decision on the application; and

22 “(B) an estimate of when review of the ap-  
23 plication will be completed.”.

1 (d) TEMPORARY PROGRAM FOR RAPID DEPLOYMENT  
2 OF RENEWABLE ENERGY AND ELECTRIC POWER TRANS-  
3 MISSION PROJECTS.—

4 (1) REPEAL.—Section 1705 of the Energy Pol-  
5 icy Act of 2005 (42 U.S.C. 16516) is repealed.

6 (2) RESCISSION.—There is rescinded the unob-  
7 ligated balance of amounts made available to carry  
8 out the loan guarantee program established under  
9 section 1705 of the Energy Policy Act of 2005 (42  
10 U.S.C. 16516) (before the amendment made by  
11 paragraph (1)).

12 (3) MANAGEMENT.—The Secretary shall ensure  
13 rigorous continued management and oversight of all  
14 outstanding loans guaranteed under the program de-  
15 scribed in subsection (b) until those loans have been  
16 repaid in full.

17 **SEC. 4002. STATE LOAN ELIGIBILITY.**

18 (a) DEFINITIONS.—Section 1701 of the Energy Pol-  
19 icy Act of 2005 (42 U.S.C. 16511) is amended by adding  
20 at the end the following:

21 “(6) STATE.—The term ‘State’ has the mean-  
22 ing given the term in section 202 of the Energy  
23 Conservation and Production Act (42 U.S.C. 6802).

24 “(7) STATE ENERGY FINANCING INSTITU-  
25 TION.—

1           “(A) IN GENERAL.—The term ‘State en-  
2           ergy financing institution’ means a quasi-inde-  
3           pendent entity or an entity within a State agen-  
4           cy or financing authority established by a  
5           State—

6                   “(i) to provide financing support or  
7                   credit enhancements, including loan guar-  
8                   antees and loan loss reserves, for eligible  
9                   projects; and

10                   “(ii) to create liquid markets for eligi-  
11                   ble projects, including warehousing and  
12                   securitization, or take other steps to reduce  
13                   financial barriers to the deployment of ex-  
14                   isting and new eligible projects.

15           “(B) INCLUSION.—The term ‘State energy  
16           financing institution’ includes an entity or orga-  
17           nization established to achieve the purposes de-  
18           scribed in clauses (i) and (ii) of subparagraph  
19           (A) by an Indian tribal entity or an Alaska Na-  
20           tive Corporation.”.

21           (b) TERMS AND CONDITIONS.—Section 1702 of the  
22           Energy Policy Act of 2005 (42 U.S.C. 16512) (as amend-  
23           ed by section 4001(a)(1)) is amended—

1           (1) in subsection (a), by inserting “or to a  
2     State energy financing institution” after “for  
3     projects”; and

4           (2) by adding at the end the following:

5     “(m) STATE ENERGY FINANCING INSTITUTIONS.—

6           “(1) ELIGIBILITY.—To be eligible for a guar-  
7     antee under this title, a State energy financing insti-  
8     tution—

9           “(A) shall meet the requirements of section  
10     1703(a)(1); and

11           “(B) shall not be required to meet the re-  
12     quirements of section 1703(a)(2).

13           “(2) PARTNERSHIPS AUTHORIZED.—In car-  
14     rying out a project receiving a loan guarantee under  
15     this title, State energy financing institutions may  
16     enter into partnerships with private entities, tribal  
17     entities, and Alaska Native corporations.

18           “(3) PROHIBITION ON USE OF APPROPRIATED  
19     FUNDS.—Amounts appropriated to the Department  
20     of Energy before the date of enactment of this sub-  
21     section shall not be available to be used for the cost  
22     of loan guarantees made to State energy financing  
23     institutions under this subsection.”.

1 **SEC. 4003. GAO STUDY ON FOSSIL LOAN GUARANTEE IN-**  
2 **CENTIVE PROGRAM.**

3 (a) IN GENERAL.—Not later than 180 days after the  
4 date of enactment of this Act, the Comptroller General  
5 of the United States shall carry out, and submit to Con-  
6 gress a report describing the results of, a study on the  
7 effectiveness of the advanced fossil loan guarantee incen-  
8 tive program and other incentive programs for advanced  
9 fossil energy of the Department.

10 (b) CONTENTS.—In carrying out the study under  
11 subsection (a), the Comptroller General of the United  
12 States shall—

13 (1) solicit industry and stakeholder input;

14 (2) evaluate the effectiveness of the advanced  
15 fossil loan guarantee incentive program, alone or in  
16 combination with other incentives, in advancing car-  
17 bon capture and storage technology;

18 (3) review each Federal incentive provided by  
19 the Department and other Federal agencies for car-  
20 bon capture and storage demonstration projects to  
21 determine the adequacy and effectiveness of the  
22 combined Federal incentives in advancing carbon  
23 capture and storage and advanced fossil energy tech-  
24 nologies;

25 (4) assess whether combinations of the incentive  
26 programs in existence as of the date of enactment of

1       this Act could be effective to advance carbon capture  
2       and storage and advanced fossil energy technologies;  
3       and

4             (5) evaluate the impact and costs of imple-  
5       menting the recommendations described in the Jan-  
6       uary 2015 National Coal Council report entitled  
7       “Fossil Forward: Revitalizing CCS, Bringing Scale  
8       and Speed to CCS Deployment” on the effectiveness  
9       of the advanced fossil loan guarantee program.

10 **SEC. 4004. PROGRAM ELIGIBILITY FOR VESSELS.**

11       Subtitle B of title I of the Energy Independence and  
12       Security Act of 2007 (42 U.S.C. 17011 et seq.) is amend-  
13       ed by adding at the end the following:

14 **“SEC. 137. ADVANCED TECHNOLOGY VEHICLES MANUFAC-**  
15                   **TURING INCENTIVE PROGRAM ELIGIBILITY**  
16                   **FOR VESSELS.**

17       “(a) DEFINITION OF VESSEL.—In this section, the  
18       term ‘vessel’ means a vessel (as defined in section 3 of  
19       title 1, United States Code), whether in existence or under  
20       construction, that has been issued a certificate of docu-  
21       mentation as a United States flagged vessel under chapter  
22       121 of title 46, United States Code and that meets the  
23       standards established under section 4005(a) of the Energy  
24       Policy Modernization Act of 2015.

1       “(b) ELIGIBILITY.—Subject to the terms and condi-  
2 tions of subsections (d) and (f) of section 136, projects  
3 for the reequipping, expanding, or establishing of a manu-  
4 facturing facility in the United States to produce vessels  
5 shall be considered eligible for direct loans under section  
6 136(d).

7       “(c) FUNDING.—

8           “(1) PROHIBITION ON USE OF EXISTING CRED-  
9 IT SUBSIDY.—None of the projects made eligible  
10 under this section shall be eligible to receive any  
11 credit subsidy provided under section 136 before the  
12 date of enactment of this section.

13           “(2) SPECIFIC APPROPRIATION OR CONTRIBU-  
14 TION.—The authority under this section to incur in-  
15 debtedness, or enter into contracts, obligating  
16 amounts to be expended by the Federal Government  
17 shall be effective for any fiscal year only—

18           “(A)(i) to such extent or in such amounts  
19 as are provided in advance by appropriation  
20 Acts; and

21           “(ii) if the borrower has agreed to pay a  
22 reasonable percentage of the cost of the obliga-  
23 tion; or

24           “(B) if the Secretary has received from the  
25 borrower a payment in full for the cost of the

1 obligation and deposited the payment into the  
2 Treasury.”.

3 **SEC. 4005. ADDITIONAL REFORMS.**

4 (a) **ISSUANCE OF RULE.**—Not later than 180 days  
5 after the date of enactment of this Act and after consulta-  
6 tion with, and taking into account comments from, the  
7 vessel industry, the Secretary shall issue a rule that speci-  
8 fies which energy efficiency improvement standards shall  
9 apply to applicants for loans under section 137 of the En-  
10 ergy Independence and Security Act of 2007 (as added  
11 by section 4004) for the manufacturing, retrofitting, or  
12 repowering vessels that have been issued certificates of  
13 documentation as United States flagged vessels under  
14 chapter 121 of title 46, United States Code.

15 (b) **FEEES.**—Section 136 of the Energy Independence  
16 and Security Act of 2007 (42 U.S.C. 17013) is amended  
17 by striking subsection (f) and inserting the following:

18 “(f) **FEEES.**—

19 “(1) **IN GENERAL.**—The Secretary shall charge  
20 and collect fees for loans provided under this section  
21 in amounts that the Secretary determines are suffi-  
22 cient to cover applicable administrative expenses as-  
23 sociated with the loans, including reasonable closing  
24 fees on the loans.

1           “(2) AVAILABILITY.—Fees collected under  
2 paragraph (1) shall—

3           “(A) be deposited by the Secretary into the  
4 Treasury; and

5           “(B) remain available until expended, sub-  
6 ject to such other conditions as are contained in  
7 annual appropriations Acts.”.

8 **SEC. 4006. DEPARTMENT OF ENERGY INDIAN ENERGY EDU-**  
9 **CATION PLANNING AND MANAGEMENT AS-**  
10 **SISTANCE PROGRAM.**

11       Section 2602(b)(6) of the Energy Policy Act of 1992  
12 (25 U.S.C. 3502(b)(6)) is amended by striking “2016”  
13 and inserting “2026”.

14 **Subtitle B—Energy-Water Nexus**

15 **SEC. 4101. NEXUS OF ENERGY AND WATER FOR SUSTAIN-**  
16 **ABILITY.**

17       (a) DEFINITIONS.—In this section:

18           (1) ENERGY-WATER NEXUS.—The term “en-  
19 ergy-water nexus” means the links between—

20           (A) the water needed to produce fuels,  
21 electricity, and other forms of energy; and

22           (B) the energy needed to transport, re-  
23 claim, and treat water and wastewater.

24           (2) INTERAGENCY COORDINATION COM-  
25 MITTEE.—The term “Interagency Coordination

1 Committee” means the Committee on the Nexus of  
2 Energy and Water for Sustainability (or the  
3 “NEWS Committee”) established under subsection  
4 (b)(1).

5 (3) NEXUS OF ENERGY AND WATER SUSTAIN-  
6 ABILITY OFFICE; NEWS OFFICE.—The term “Nexus  
7 of Energy and Water Sustainability Office” or the  
8 “NEWS Office” means an office located at the De-  
9 partment and managed in cooperation with the De-  
10 partment of the Interior pursuant to an agreement  
11 between the 2 agencies to carry out leadership and  
12 administrative functions for the Interagency Coordi-  
13 nation Committee.

14 (4) RD&D ACTIVITIES.—The term “RD&D ac-  
15 tivities” means research, development, and dem-  
16 onstration activities.

17 (b) INTERAGENCY COORDINATION COMMITTEE.—

18 (1) ESTABLISHMENT.—Not later than 180 days  
19 after the date of enactment of this Act, the Sec-  
20 retary and the Secretary of the Interior shall estab-  
21 lish the joint NEWS Office and Interagency Coordi-  
22 nation Committee on the Nexus of Energy and  
23 Water for Sustainability (or the “NEWS Com-  
24 mittee”) to carry out the duties described in para-  
25 graph (3).

1 (2) ADMINISTRATION.—

2 (A) CHAIRS.—The Secretary and the Sec-  
3 retary of the Interior shall jointly manage the  
4 NEWS Office and serve as co-chairs of the  
5 Interagency Coordination Committee.

6 (B) MEMBERSHIP; STAFFING.—Member-  
7 ship and staffing shall be determined by the co-  
8 chairs.

9 (3) DUTIES.—The Interagency Coordination  
10 Committee shall—

11 (A) serve as a forum for developing com-  
12 mon Federal goals and plans on energy-water  
13 nexus RD&D activities in coordination with the  
14 National Science and Technology Council;

15 (B) not later than 1 year after the date of  
16 enactment of this Act, and biannually there-  
17 after, issue a strategic plan on energy-water  
18 nexus RD&D activities priorities and objectives;

19 (C) convene and promote coordination of  
20 the activities of Federal departments and agen-  
21 cies on energy-water nexus RD&D activities, in-  
22 cluding the activities of—

23 (i) the Department;

24 (ii) the Department of the Interior;

25 (iii) the Corps of Engineers;

- 1 (iv) the Department of Agriculture;  
2 (v) the Department of Defense;  
3 (vi) the Department of State;  
4 (vii) the Environmental Protection  
5 Agency;  
6 (viii) the Council on Environmental  
7 Quality;  
8 (ix) the National Institute of Stand-  
9 ards and Technology;  
10 (x) the National Oceanic and Atmos-  
11 pheric Administration;  
12 (xi) the National Science Foundation;  
13 (xii) the Office of Management and  
14 Budget;  
15 (xiii) the Office of Science and Tech-  
16 nology Policy;  
17 (xiv) the National Aeronautics and  
18 Space Administration; and  
19 (xv) such other Federal departments  
20 and agencies as the Interagency Coordina-  
21 tion Committee considers appropriate;
- 22 (D)(i) coordinate and develop capabilities  
23 and methodologies for data collection, manage-  
24 ment, and dissemination of information related  
25 to energy-water nexus RD&D activities from

1 and to other Federal departments and agencies;  
2 and

3 (ii) promote information exchange between  
4 Federal departments and agencies—

5 (I) to identify and document Federal  
6 and non-Federal programs and funding op-  
7 portunities that support basic and applied  
8 research, development, and demonstration  
9 proposals to advance energy-water nexus  
10 related science and technologies;

11 (II) to leverage existing programs by  
12 encouraging joint solicitations, block  
13 grants, and matching programs with non-  
14 Federal entities; and

15 (III) to identify opportunities for do-  
16 mestic and international public-private  
17 partnerships, innovative financing mecha-  
18 nisms, information and data exchange;

19 (E) promote the integration of energy-  
20 water nexus considerations into existing Federal  
21 water, energy, and other natural resource, in-  
22 frastructure, and science programs at the na-  
23 tional and regional levels and with programs  
24 administered in partnership with non-Federal  
25 entities; and

1 (F) not later than 1 year after the date of  
2 enactment of this Act, issue a report on the po-  
3 tential benefits and feasibility of establishing an  
4 energy-water center of excellence within the Na-  
5 tional Laboratories (as that term is defined in  
6 section 2 of the Energy Policy Act of 2005 (42  
7 U.S.C. 15801)).

8 (4) NO REGULATION.—Nothing in this sub-  
9 section grants to the Interagency Coordination Com-  
10 mittee the authority to promulgate regulations or set  
11 standards.

12 (5) REVIEW; REPORT.—At the end of the 5-  
13 year period beginning on the date on which the  
14 Interagency Coordination Committee and NEWS Of-  
15 fice are established, the NEWS Office shall—

16 (A) review the activities, relevance, and ef-  
17 fectiveness of the Interagency Coordination  
18 Committee; and

19 (B) submit to the Committee on Energy  
20 and Natural Resources of the Senate and the  
21 Committees on Science, Space, and Technology,  
22 Energy and Commerce, and Natural Resources  
23 of the House of Representatives a report that—

24 (i) describes the results of the review  
25 conducted under subparagraph (A); and

1                   (ii) includes a recommendation on  
2                   whether the Interagency Coordination  
3                   Committee should continue.

4           (c) CROSSCUT BUDGET.—Not later than 30 days  
5 after the President submits the budget of the United  
6 States Government under section 1105 of title 31, United  
7 States Code, the co-chairs of the Interagency Coordination  
8 Committee (acting through the NEWS Office) shall sub-  
9 mit to the Committee on Energy and Natural Resources  
10 of the Senate and the Committees on Science, Space, and  
11 Technology, Energy and Commerce, and Natural Re-  
12 sources of the House of Representatives, an interagency  
13 budget crosscut report that displays at the program-,  
14 project-, and activity-level for each of the Federal agencies  
15 that carry out or support (including through grants, con-  
16 tracts, interagency and intraagency transfers, and  
17 multiyear and no-year funds) basic and applied RD&D ac-  
18 tivities to advance the energy-water nexus related science  
19 and technologies—

20                   (1) the budget proposed in the budget request  
21                   of the President for the upcoming fiscal year;

22                   (2) expenditures and obligations for the prior  
23                   fiscal year; and

24                   (3) estimated expenditures and obligations for  
25                   the current fiscal year.

1 **SEC. 4102. SMART ENERGY AND WATER EFFICIENCY PILOT**  
2 **PROGRAM.**

3 Subtitle A of title IX of the Energy Policy Act of  
4 2005 (42 U.S.C. 16191 et seq.) is amended by adding at  
5 the end the following:

6 **“SEC. 918. SMART ENERGY AND WATER EFFICIENCY PILOT**  
7 **PROGRAM.**

8 “(a) DEFINITIONS.—In this section:

9 “(1) ELIGIBLE ENTITY.—The term ‘eligible en-  
10 tity’ means—

11 “(A) a utility;

12 “(B) a municipality;

13 “(C) a water district;

14 “(D) an Indian tribe or Alaska Native vil-  
15 lage; and

16 “(E) any other authority that provides  
17 water, wastewater, or water reuse services.

18 “(2) SMART ENERGY AND WATER EFFICIENCY  
19 PILOT PROGRAM.—The term ‘smart energy and  
20 water efficiency pilot program’ or ‘pilot program’  
21 means the pilot program established under sub-  
22 section (b).

23 “(b) SMART ENERGY AND WATER EFFICIENCY  
24 PILOT PROGRAM.—

1           “(1) IN GENERAL.—The Secretary shall estab-  
2           lish and carry out a smart energy and water effi-  
3           ciency pilot program in accordance with this section.

4           “(2) PURPOSE.—The purpose of the smart en-  
5           ergy and water efficiency pilot program is to award  
6           grants to eligible entities to demonstrate unique, ad-  
7           vanced, or innovative technology-based solutions that  
8           will—

9                   “(A) increase the energy efficiency of  
10                  water, wastewater, and water reuse systems;

11                  “(B) improve energy efficiency of water,  
12                  wastewater, and water reuse systems to help  
13                  communities across the United States make  
14                  measurable progress in conserving water, saving  
15                  energy, and reducing costs;

16                  “(C) support the implementation of inno-  
17                  vative and unique processes and the installation  
18                  of established advanced automated systems that  
19                  provide real-time data on energy and water; and

20                  “(D) improve energy-water conservation  
21                  and quality and predictive maintenance through  
22                  technologies that utilize internet connected  
23                  technologies, including sensors, intelligent gate-  
24                  ways, and security embedded in hardware.

25           “(3) PROJECT SELECTION.—

1           “(A) IN GENERAL.—The Secretary shall  
2           make competitive, merit-reviewed grants under  
3           the pilot program to not less than 3, but not  
4           more than 5, eligible entities.

5           “(B) SELECTION CRITERIA.—In selecting  
6           an eligible entity to receive a grant under the  
7           pilot program, the Secretary shall consider—

8                   “(i) energy and cost savings;

9                   “(ii) the uniqueness, commercial via-  
10                  bility, and reliability of the technology to  
11                  be used;

12                  “(iii) the degree to which the project  
13                  integrates next-generation sensors soft-  
14                  ware, analytics, and management tools;

15                  “(iv) the anticipated cost-effectiveness  
16                  of the pilot project through measurable en-  
17                  ergy efficiency savings, water savings or  
18                  reuse, and infrastructure costs averted;

19                  “(v) whether the technology can be  
20                  deployed in a variety of geographic regions  
21                  and the degree to which the technology can  
22                  be implemented in a wide range of applica-  
23                  tions ranging in scale from small towns to  
24                  large cities, including tribal communities;

1           “(vi) whether the technology has been  
2 successfully deployed elsewhere;

3           “(vii) whether the technology was  
4 sourced from a manufacturer based in the  
5 United States; and

6           “(viii) whether the project will be  
7 completed in 5 years or less.

8           “(C) APPLICATIONS.—

9           “(i) IN GENERAL.—Subject to clause  
10 (ii), an eligible entity seeking a grant  
11 under the pilot program shall submit to  
12 the Secretary an application at such time,  
13 in such manner, and containing such infor-  
14 mation as the Secretary determines to be  
15 necessary.

16           “(ii) CONTENTS.—An application  
17 under clause (i) shall, at a minimum, in-  
18 clude—

19                   “(I) a description of the project;

20                   “(II) a description of the tech-  
21 nology to be used in the project;

22                   “(III) the anticipated results, in-  
23 cluding energy and water savings, of  
24 the project;

1           oped by the Secretary, consistent with the  
2           purposes of this section.

3           “(ii)     REQUIREMENTS.—Consistent  
4           with the performance measures and bench-  
5           marks developed under clause (i), in car-  
6           rying out an evaluation under that clause,  
7           the Secretary shall —

8                     “(I) evaluate the progress and  
9                     impact of the project; and

10                    “(II) assesses the degree to  
11                    which the project is meeting the goals  
12                    of the pilot program.

13           “(C)   TECHNICAL AND POLICY ASSIST-  
14           ANCE.—On the request of a grant recipient, the  
15           Secretary shall provide technical and policy as-  
16           sistance.

17           “(D)   BEST PRACTICES.—The Secretary  
18           shall make available to the public through the  
19           Internet and other means the Secretary con-  
20           siders to be appropriate—

21                    “(i) a copy of each evaluation carried  
22                    out under subparagraph (B); and

23                    “(ii) a description of any best prac-  
24                    tices identified by the Secretary as a result  
25                    of those evaluations.

1           “(E) REPORT TO CONGRESS.—The Sec-  
2           retary shall submit to Congress a report con-  
3           taining the results of each evaluation carried  
4           out under subparagraph (B).

5           “(c) AUTHORIZATION OF APPROPRIATIONS.—There  
6           is authorized to be appropriated to carry out this section  
7           \$15,000,000, to remain available until expended.”.

## 8           **Subtitle C—Innovation**

### 9           **SEC. 4201. AMERICA COMPETES PROGRAMS.**

10          (a) BASIC RESEARCH.—Section 971(b) of the Energy  
11          Policy Act of 2005 (42 U.S.C. 16311(b)) is amended—

12                 (1) in paragraph (6), by striking “and” at the  
13          end;

14                 (2) in paragraph (7), by striking the period at  
15          the end and inserting a semicolon; and

16                 (3) by adding at the end the following:

17                         “(8) \$5,271,000,000 for fiscal year 2016;

18                         “(9) \$5,485,000,000 for fiscal year 2017;

19                         “(10) \$5,704,000,000 for fiscal year 2018;

20                         “(11) \$5,932,000,000 for fiscal year 2019; and

21                         “(12) \$6,178,000,000 for fiscal year 2020.”.

22          (b) ADVANCED RESEARCH PROJECTS AGENCY-EN-  
23          ERGY.—Section 5012 of the America COMPETES Act  
24          (42 U.S.C. 16538) is amended—

1           (1) in subsection (a)(3), by striking “subsection  
2           (n)(1)” and inserting “subsection (o)(1)”;

3           (2) in subsection (i), by striking paragraph (1)  
4           and inserting the following:

5           “(1) IN GENERAL.—To the maximum extent  
6           practicable, the Director shall ensure that—

7                   “(A) the activities of ARPA–E are coordi-  
8                   nated with, and do not duplicate the efforts of,  
9                   programs and laboratories within the Depart-  
10                  ment and other relevant research agencies; and

11                   “(B) ARPA–E does not provide funding  
12                  for a project unless the prospective grantee  
13                  demonstrates sufficient attempts to secure pri-  
14                  vate financing or indicates that the project is  
15                  not independently commercially viable.”;

16           (3) by redesignating subsection (n) as sub-  
17           section (o);

18           (4) by inserting after subsection (m) the fol-  
19           lowing:

20           “(n) PROTECTION OF INFORMATION.—The following  
21           types of information collected by the ARPA–E from recipi-  
22           ents of financial assistance awards shall be considered  
23           commercial and financial information obtained from a per-  
24           son and privileged or confidential and not subject to dis-

1 closure under section 552(b)(4) of title 5, United States  
2 Code:

3 “(1) Plans for commercialization of technologies  
4 developed under the award, including business plans,  
5 technology-to-market plans, market studies, and cost  
6 and performance models.

7 “(2) Investments provided to an awardee from  
8 third parties (such as venture capital firms, hedge  
9 funds, and private equity firms), including amounts  
10 and the percentage of ownership of the awardee pro-  
11 vided in return for the investments.

12 “(3) Additional financial support that the  
13 awardee—

14 “(A) plans to or has invested into the tech-  
15 nology developed under the award; or

16 “(B) is seeking from third parties.

17 “(4) Revenue from the licensing or sale of new  
18 products or services resulting from research con-  
19 ducted under the award.”; and

20 (5) in subsection (o) (as redesignated by para-  
21 graph (3))—

22 (A) in paragraph (2)—

23 (i) in the matter preceding subpara-  
24 graph (A), by striking “paragraphs (4)  
25 and (5)” and inserting “paragraph (4)”;

1 (ii) in subparagraph (D), by striking  
2 “and” at the end;

3 (iii) in subparagraph (E), by striking  
4 the period at the end and inserting a semi-  
5 colon; and

6 (iv) by adding at the end the fol-  
7 lowing:

8 “(F) \$291,200,000 for fiscal year 2016;

9 “(G) \$303,600,000 for fiscal year 2017;

10 “(H) \$314,700,000 for fiscal year 2018;

11 “(I) \$327,300,000 for fiscal year 2019;

12 and

13 “(J) \$340,600,000 for fiscal year 2020 .”;

14 and

15 (B) in paragraph (4)(B), by striking

16 “(c)(2)(D)” and inserting “(c)(2)(C)”.

17 **SEC. 4202. INCLUSION OF EARLY STAGE TECHNOLOGY**

18 **DEMONSTRATION IN AUTHORIZED TECH-**

19 **NOLOGY TRANSFER ACTIVITIES.**

20 Section 1001 of the Energy Policy Act of 2005 (42

21 U.S.C. 16391) is amended—

22 (1) by redesignating subsection (g) as sub-  
23 section (h); and

24 (2) by inserting after subsection (f) the fol-  
25 lowing:

1       “(g) EARLY STAGE TECHNOLOGY DEMONSTRA-  
2 TION.—The Secretary shall permit the directors of the Na-  
3 tional Laboratories to use funds authorized to support  
4 technology transfer within the Department to carry out  
5 early stage and precommercial technology demonstration  
6 activities to remove technology barriers that limit private  
7 sector interest and demonstrate potential commercial ap-  
8 plications of any research and technologies arising from  
9 National Laboratory activities.”.

10 **SEC. 4203. SUPPORTING ACCESS OF SMALL BUSINESS CON-**  
11 **CERNS TO NATIONAL LABORATORIES.**

12       (a) DEFINITIONS.—In this section:

13           (1) NATIONAL LABORATORY.—The term “Na-  
14 tional Laboratory” has the meaning given the term  
15 in section 2 of the Energy Policy Act of 2005 (42  
16 U.S.C. 15801).

17           (2) SMALL BUSINESS CONCERN.—The term  
18 “small business concern” has the same meaning as  
19 in section 3 of the Small Business Act (15 U.S.C.  
20 632).

21       (b) ACTIONS FOR INCREASED ACCESS AT NATIONAL  
22 LABORATORIES FOR SMALL BUSINESS CONCERNS.—To  
23 promote the technology transfer of innovative energy tech-  
24 nologies and enhance the competitiveness of the United  
25 States, the Secretary shall take such actions as are appro-

1 piate to facilitate access to the National Laboratories for  
2 small business concerns.

3 (c) INFORMATION ON THE DOE WEBSITE RELATING  
4 TO NATIONAL LABORATORY PROGRAMS AVAILABLE TO  
5 SMALL BUSINESS CONCERNS.—

6 (1) IN GENERAL.—Not later than 180 days  
7 after the date of enactment of this Act, the Sec-  
8 retary, in coordination with the Directors of the Na-  
9 tional Laboratories, shall—

10 (A) publish in a consolidated manner on  
11 the website of the Department information re-  
12 lating to National Laboratory programs that  
13 are available to small business concerns;

14 (B) provide for the information published  
15 under subparagraph (A) to be kept up-to-date;  
16 and

17 (C) include in the information published  
18 under subparagraph (A), information on each  
19 available program under which small business  
20 concerns are eligible to enter into agreements to  
21 work with the National Laboratories.

22 (2) COMPONENTS.—The information published  
23 on the Department website under paragraph (1)  
24 shall include—

1 (A) a brief description of each agreement  
2 available to small business concerns to work  
3 with National Laboratories;

4 (B) a step-by-step guide for completing  
5 agreements to work with National Laboratories;

6 (C) best practices for working with Na-  
7 tional Laboratories;

8 (D) individual National Laboratory  
9 websites that provide information specific to  
10 technology transfer and working with small  
11 business concerns;

12 (E) links to funding opportunity announce-  
13 ments, nonfinancial resources, and other pro-  
14 grams available to small business concerns; and

15 (F) any other information that the Sec-  
16 retary determines to be appropriate.

17 (3) ACCESSIBILITY.—The information published  
18 on the Department website under paragraph (1)  
19 shall be—

20 (A) readily accessible and easily found on  
21 the Internet by the public and members and  
22 committees of Congress; and

23 (B) presented in a searchable, machine-  
24 readable format.

1           (4) GUIDANCE.—The Secretary shall issue De-  
2           partmental guidance to ensure that the information  
3           published on the Department website under para-  
4           graph (1) is provided in a manner that presents a  
5           coherent picture of all National Laboratory pro-  
6           grams that are relevant to small business concerns.

7 **SEC. 4204. MICROLAB TECHNOLOGY COMMERCIALIZATION.**

8           (a) DEFINITIONS.—In this section:

9           (1) MICROLAB.—The term “microlab” means a  
10          small laboratory established by the Secretary under  
11          subsection (b).

12          (2) NATIONAL LABORATORY.—The term “na-  
13          tional laboratory” means—

14                (A) a National Laboratory, as defined in  
15                section 2 of the Energy Policy Act of 2005 (42  
16                U.S.C. 15801); and

17                (B) a national security laboratory, as de-  
18                fined in section 3281 of the National Nuclear  
19                Security Administration Act (50 U.S.C. 2471).

20          (b) ESTABLISHMENT OF MICROLAB PROGRAM.—

21                (1) IN GENERAL.—The Secretary, in collabora-  
22                tion with the directors of national laboratories, may  
23                establish a microlab program under which the Sec-  
24                retary establishes microlabs that are located in close

1 proximity to national laboratories and that are ac-  
2 cessible to the public for the purposes of—

3 (A) enhancing collaboration with regional  
4 research groups, such as institutions of higher  
5 education and industry groups;

6 (B) accelerating technology transfer from  
7 national laboratories to the marketplace; and

8 (C) promoting regional workforce develop-  
9 ment through science, technology, engineering,  
10 and mathematics (“STEM”) instruction and  
11 training.

12 (2) CRITERIA.—In determining the placement  
13 of microlabs under paragraph (1), the Secretary  
14 shall consider—

15 (A) the commitment of a national labora-  
16 tory to establishing a microlab;

17 (B) the existence of a joint research insti-  
18 tute or a new facility that—

19 (i) is not on the main site of a na-  
20 tional laboratory;

21 (ii) is in close proximity to a national  
22 laboratory; and

23 (iii) has the capability to house a  
24 microlab;

1           (C) whether employees of a national lab-  
2           oratory and persons from academia, industry,  
3           and government are available to be assigned to  
4           the microlab; and

5           (D) cost-sharing or in-kind contributions  
6           from State and local governments and private  
7           industry.

8           (3) TIMING.—If the Secretary, in collaboration  
9           with the directors of national laboratories, elects to  
10          establish a microlab program under this subsection,  
11          the Secretary, in collaboration with the directors of  
12          national laboratories, shall—

13           (A) not later than 60 days after the date  
14           of enactment of this Act, begin the process of  
15           determining the placement of microlabs under  
16           paragraph (1); and

17           (B) not later than 180 days after the date  
18           of enactment of this Act, implement the  
19           microlab program under this subsection.

20          (c) REPORTS.—

21           (1) INITIAL REPORT.—Not later than 60 days  
22           after the date of implementation of the microlab pro-  
23           gram under subsection (b), the Secretary shall sub-  
24           mit to the Committee on Armed Services of the Sen-  
25           ate, the Committee on Armed Services of the House

1 of Representatives, the Committee on Energy and  
2 Natural Resources of the Senate, and the Committee  
3 on Science, Space, and Technology of the House of  
4 Representatives a report that provides an update on  
5 the implementation of the microlab program under  
6 subsection (b).

7 (2) PROGRESS REPORT.—Not later than 1 year  
8 after the date of implementation of the microlab pro-  
9 gram under subsection (b), the Secretary shall sub-  
10 mit to the Committee on Armed Services of the Sen-  
11 ate, the Committee on Armed Services of the House  
12 of Representatives, the Committee on Energy and  
13 Natural Resources of the Senate, and the Committee  
14 on Science, Space, and Technology of the House of  
15 Representatives a report on the microlab program  
16 under subsection (b), including findings and rec-  
17 ommendations of the Secretary.

18 (d) AUTHORIZATION OF APPROPRIATIONS.—There is  
19 authorized to be appropriated to carry out this Act  
20 \$50,000,000 for fiscal year 2016.

## 21 **Subtitle D—Grid Reliability**

### 22 **SEC. 4301. BULK-POWER SYSTEM RELIABILITY IMPACT** 23 **STATEMENT.**

24 (a) RELIABILITY REPORTS.—Section 215(g) of the  
25 Federal Power Act (16 U.S.C. 824o(g)) is amended—

1           (1) by striking “The ERO” and inserting the  
2 following:

3           “(1) IN GENERAL.—The ERO”; and

4           (2) by adding at the end the following:

5           “(2) REGIONAL ENTITIES.—Not later than 180  
6 days after the date of enactment of this paragraph  
7 and not less than every 3 years thereafter, each re-  
8 gional entity shall submit to the appropriate commit-  
9 tees of Congress and the Commission a report that  
10 describes, as of the date of the report—

11                   “(A) the state of and prospects for the re-  
12 liability of electricity within the geographic area  
13 covered by the regional entity; and

14                   “(B) the most significant risks to the reli-  
15 ability of the bulk-power system that might  
16 arise or need to be monitored within the geo-  
17 graphic area covered by the regional entity, in-  
18 cluding risks from proposed or final Federal  
19 regulations.”.

20           (b) RELIABILITY IMPACT STATEMENT.—Section 215  
21 of the Federal Power Act (16 U.S.C. 824o) is amended  
22 by adding at the end the following:

23           “(1) RELIABILITY IMPACT STATEMENT.—

24                   “(1) SOLICITATION BY COMMISSION.—Not later  
25 than 15 days after the date on which the head of a

1 Federal agency proposes a major rule (as defined in  
2 section 804 of title 5, United States Code) that may  
3 significantly affect the reliable operation of the bulk-  
4 power system, the Commission shall solicit from any  
5 applicable regional entity affected by the proposed  
6 rule a reliability impact statement with respect to  
7 the proposed rule.

8 “(2) VOLUNTARY SUBMISSION BY REGIONAL  
9 ENTITY.—A regional entity may prepare, on the ini-  
10 tiative of the regional entity, a reliability impact  
11 statement for any proposed major Federal rule that  
12 the regional entity determines would significantly af-  
13 fect the reliable operation of the bulk-power system  
14 within the area covered by the regional entity.

15 “(3) MULTIJURISDICTIONAL COORDINATION.—  
16 If a proposed rule subject to a reliability impact  
17 statement under paragraph (1) or (2) affects an  
18 area broader than the area covered by a single re-  
19 gional entity, the ERO shall convene a committee of  
20 the affected regional entities to produce a single reli-  
21 ability impact statement that demonstrates for each  
22 affected area the reliability impact of the proposed  
23 rule.

1           “(4) REQUIREMENTS.—A reliability impact  
2 statement under paragraph (1) or (2) shall include  
3 a detailed statement on—

4           “(A) the impact of the proposed rule on  
5 the reliable operation of the bulk-power system;

6           “(B) any adverse effects on the reliable op-  
7 eration of the bulk-power system if the pro-  
8 posed rule was implemented; and

9           “(C) alternatives to cure the identified ad-  
10 verse reliability impacts, including, at the dis-  
11 cretion of the regional entity, a no-action alter-  
12 native.

13           “(5) SUBMISSION TO COMMISSION.—On comple-  
14 tion of a reliability impact statement under para-  
15 graph (1) or (2), the regional entity or a committee  
16 of affected regional entities convened under para-  
17 graph (3) shall submit to the Commission the reli-  
18 ability impact statement.

19           “(6) TRANSMITTAL TO HEAD OF FEDERAL  
20 AGENCY.—On receipt of a reliability impact state-  
21 ment submitted to the Commission under paragraph  
22 (5), the Commission shall transmit to the head of  
23 the applicable Federal agency the reliability impact  
24 statement prepared under this subsection for inclu-  
25 sion in the public record.

1           “(7) INCLUSION OF DETAILED RESPONSE IN  
2 FINAL RULE.—With respect to a final major rule  
3 subject to a reliability impact statement prepared  
4 under paragraph (1) or (2), the head of the Federal  
5 agency shall—

6           “(A) consider the reliability impact state-  
7 ment;

8           “(B) give due weight to the technical ex-  
9 pertise of the regional entity with respect to  
10 matters that are the subject of the reliability  
11 impact statement; and

12           “(C) include in the final rule a detailed re-  
13 sponse to the reliability impact statement that  
14 reasonably addresses the detailed statements re-  
15 quired under paragraph (4).”.

16 **SEC. 4302. REPORT BY TRANSMISSION ORGANIZATIONS ON**  
17 **DIVERSITY OF SUPPLY.**

18 (a) DEFINITIONS.—In this section:

19           (1) ELECTRIC GENERATING CAPACITY RE-  
20 SOURCE.—

21           (A) IN GENERAL.—The term “electric gen-  
22 erating capacity resource” means an electric  
23 generating resource, as measured by the max-  
24 imum load-carrying ability of the resource, ex-  
25 clusive of station use and planned, unplanned,

1 or other outage or derating subject to dispatch  
2 by the transmission organization to meet the re-  
3 source adequacy needs of the systems operated  
4 by the transmission organization.

5 (B) EFFECT.—The term “electric gener-  
6 ating capacity resource” does not address non-  
7 electric generating resources that are qualified  
8 as capacity resources in the tariffs of various  
9 transmission organizations as of the date of en-  
10 actment of this Act.

11 (2) TRANSMISSION ORGANIZATION.—The term  
12 “transmission organization” has the meaning given  
13 the term in section 3 of the Federal Power Act (16  
14 U.S.C. 796).

15 (b) REPORT.—

16 (1) NOTICE.—Not later than 14 days after the  
17 date of enactment of this Act, the Commission (as  
18 the term is defined in section 3 of the Federal  
19 Power Act (16 U.S.C. 796)) shall submit to each  
20 transmission organization that has a tariff on file  
21 with the Commission that includes provisions ad-  
22 dressing the procurement of electric generating ca-  
23 pacity resources, a notice that the transmission or-  
24 ganization is required to file with the Commission a  
25 report in accordance with paragraph (2).

1           (2) REPORT.—Not later than 180 days after  
2 the date on which a transmission organization re-  
3 ceives a notice under paragraph (1), the trans-  
4 mission organization shall submit to the Commission  
5 a report that, to the maximum extent practicable—

6           (A)(i) identifies electric generating capac-  
7 ity resources that are available to the trans-  
8 mission organization as of the date of the re-  
9 port; and

10           (ii) describes the primary energy sources  
11 and operational characteristics of electric capac-  
12 ity resources available, in the aggregate, to the  
13 transmission organization;

14           (B) evaluates, using generally accepted  
15 metrics, the current operational performance, in  
16 the aggregate, of electric capacity resources;

17           (C) identifies, for the aggregate of electric  
18 generating capacity resources available to the  
19 transmission organization—

20           (i) over the short- and long-term peri-  
21 ods in the planning cycle of the trans-  
22 mission organization, reasonable projec-  
23 tions concerning the operational and eco-  
24 nomic risk profile of electric generating ca-  
25 pacity resources;

1 (ii) the projected future needs of the  
2 transmission organization for electric gen-  
3 erating capacity resources; and

4 (iii) the availability of transmission fa-  
5 cilities and transmission support services  
6 necessary to provide for the transmission  
7 organization reasonable assurances of es-  
8 sential reliability services, including ade-  
9 quate voltage support; and

10 (D) assesses whether and to what extent  
11 the market rules of the transmission organiza-  
12 tion—

13 (i) yield capacity auction clearing  
14 prices that promote necessary and prudent  
15 investment;

16 (ii) yield energy market clearing  
17 prices that reflect the marginal cost of  
18 supply, taking into account transmission  
19 constraints and other factors needed to en-  
20 sure reliable grid operation;

21 (iii) produce meaningful price signals  
22 that clearly indicate where new supply and  
23 investment are needed;

1 (iv) reduce uncertainty or instability  
2 resulting from changes to market rules,  
3 processes, or protocols;

4 (v) promote transparency and commu-  
5 nication by the market operator to market  
6 participants;

7 (vi) support a diverse generation port-  
8 folio and the availability of transmission  
9 facilities and transmission support services  
10 on a short- and long-term basis necessary  
11 to provide reasonable assurances of a con-  
12 tinuous supply of electricity for customers  
13 of the transmission organization at the  
14 proper voltage and frequency; and

15 (vii) provide an enhanced opportunity  
16 for self-supply of electric generating capac-  
17 ity resources by electric cooperatives, Fed-  
18 eral power marketing agencies, and State  
19 utilities with a service obligation (as those  
20 terms are defined in section 217(a)) of the  
21 Federal Power Act (16 U.S.C. 824q(a))) in  
22 a manner that is consistent with tradi-  
23 tional utility business models and does not  
24 unduly affect wholesale market prices.

## 1                   **Subtitle E—Management**

### 2   **SEC. 4401. FEDERAL LAND MANAGEMENT.**

3           (a) DEFINITIONS.—In this section:

4                   (1) CADASTRE.—The term “cadastre” means  
5           an inventory of buildings and other real property  
6           (including associated infrastructure such as roads  
7           and utility transmission lines and pipelines) located  
8           on land administered by the Secretary, which is de-  
9           veloped through collecting, storing, retrieving, or dis-  
10          seminating graphical or digital data and any infor-  
11          mation related to the data, including surveys, maps,  
12          charts, images, and services.

13                  (2) SECRETARY.—The term “Secretary” means  
14          the Secretary of the Interior.

15          (b) CADASTRE OF FEDERAL REAL PROPERTY.—

16                  (1) IN GENERAL.—The Secretary is author-  
17          ized—

18                          (A) to develop and maintain a current and  
19                  accurate multipurpose cadastre to support Fed-  
20                  eral land management activities for the Depart-  
21                  ment of the Interior;

22                          (B) to incorporate any related inventories  
23                  of Federal real property, including any inven-  
24                  tories prepared under applicable land or re-  
25                  source management plans; and

1 (C) to enter into discussions with other  
2 Federal agencies to make the cadastre available  
3 for use by the agency to support agency man-  
4 agement activities.

5 (2) COST-SHARING AGREEMENTS.—

6 (A) IN GENERAL.—The Secretary may  
7 enter into cost-sharing agreements with other  
8 Federal agencies, and with States, Indian  
9 tribes, and local governments, to include any  
10 non-Federal land in a State in the cadastre.

11 (B) COST SHARE.—The Federal share of  
12 any cost agreement described in subparagraph  
13 (A) shall not exceed 50 percent of the total cost  
14 to a State, Indian tribe, or local government for  
15 the development of the cadastre of non-Federal  
16 land.

17 (3) CONSOLIDATION AND REPORT.—Not later  
18 than 180 days after the date of enactment of this  
19 Act, the Secretary shall submit to the Committee on  
20 Energy and Natural Resources of the Senate and  
21 the Committee on Natural Resources of the House  
22 of Representatives a report on the real property in-  
23 ventories or any components of any cadastre or re-  
24 lated inventories that—

1 (A) exist as of the date of enactment of  
2 this Act;

3 (B) are authorized by law or conducted by  
4 the Secretary; and

5 (C) are of sufficient accuracy to be in-  
6 cluded in the cadastre authorized under para-  
7 graph (1).

8 (4) COORDINATION.—In carrying out this sub-  
9 section, the Secretary shall—

10 (A) participate (in accordance with section  
11 216 of the E-Government Act of 2002 (44  
12 U.S.C. 3501 note; Public Law 107–347)) in the  
13 establishment of such standards and common  
14 protocols as are necessary to ensure the inter-  
15 operability of geospatial information pertaining  
16 to the cadastre for all users of the information;

17 (B) coordinate with, seek assistance and  
18 cooperation of, and provide liaison to the Fed-  
19 eral Geographic Data Committee pursuant to  
20 Office of Management and Budget Circular A-  
21 16 and Executive Order 12906 (43 U.S.C.  
22 1457 note; relating to coordinating geographic  
23 data acquisition and access: the National Spa-  
24 tial Data Infrastructure) for the implementa-

1           tion of and compliance with such standards as  
2           may be applicable to the cadastre;

3           (C) make the cadastre interoperable with  
4           the Federal Real Property Profile established  
5           pursuant to Executive Order 13327 (40 U.S.C.  
6           121 note; relating to Federal real property  
7           asset management);

8           (D) integrate with and leverage, to the  
9           maximum extent practicable, cadastre activities  
10          of units of State and local government; and

11          (E) use contracts with the private sector,  
12          if practicable, to provide such products and  
13          services as are necessary to develop the cadas-  
14          tre.

15          (c) **TRANSPARENCY AND PUBLIC ACCESS.**—The Sec-  
16          retary shall—

17               (1) make the cadastre required under this sec-  
18               tion publically available on the Internet in a graphi-  
19               cally geoenabled and searchable format; and

20               (2) in consultation with the Secretary of De-  
21               fense and the Secretary of Homeland Security, pre-  
22               vent the disclosure of the identity of any buildings  
23               or facilities, or information related to the buildings  
24               or facilities, if the disclosure would impair or jeop-

1       ardize the national security or homeland defense of  
2       the United States.

3       (d) EFFECT.—Nothing in this section—

4           (1) creates any substantive or procedural right  
5       or benefit;

6           (2) authorizes any new surveying or mapping of  
7       Federal real property, except that a Federal agency  
8       may conduct a new survey to update the accuracy of  
9       the inventory data of the agency before storage on  
10      a cadaster; or

11          (3) authorizes—

12           (A) the evaluation of any real property  
13      owned by the United States for disposal; or

14           (B) new appraisals or assessments of the  
15      value of—

16           (i) real property; or

17           (ii) cultural or archaeological re-  
18      sources on any parcel of Federal land or  
19      other real property.

20   **SEC. 4402. QUADRENNIAL ENERGY REVIEW.**

21      (a) IN GENERAL.—Section 801 of the Department of  
22   Energy Organization Act (42 U.S.C. 7321) is amended  
23   to read as follows:

1 **“SEC. 801. QUADRENNIAL ENERGY REVIEW.**

2 “(a) QUADRENNIAL ENERGY REVIEW TASK  
3 FORCE.—

4 “(1) ESTABLISHMENT.—The President shall es-  
5 tablish a Quadrennial Energy Review Task Force  
6 (referred to in this section as the ‘Task Force’) to  
7 coordinate the Quadrennial Energy Review.

8 “(2) COCHAIRPERSONS.—The President shall  
9 designate appropriate senior Federal Government of-  
10 ficials to be cochairpersons of the Task Force.

11 “(3) MEMBERSHIP.—The Task Force may be  
12 comprised of representatives at level I or II of the  
13 Executive Schedule of—

14 “(A) the Department of Energy;

15 “(B) the Department of Commerce;

16 “(C) the Department of Defense;

17 “(D) the Department of State;

18 “(E) the Department of the Interior;

19 “(F) the Department of Agriculture;

20 “(G) the Department of the Treasury;

21 “(H) the Department of Transportation;

22 “(I) the Department of Homeland Secu-  
23 rity;

24 “(J) the Office of Management and Budg-  
25 et;

26 “(K) the National Science Foundation;

1           “(L) the Environmental Protection Agen-  
2           cy; and

3           “(M) such other Federal agencies, and en-  
4           tities within the Executive Office of the Presi-  
5           dent, as the President considers to be appro-  
6           priate.

7           “(b) CONDUCT OF REVIEW.—

8           “(1) IN GENERAL.—Each Quadrennial Energy  
9           Review shall be conducted to—

10           “(A) provide an integrated view of impor-  
11           tant national energy objectives and Federal en-  
12           ergy policy; and

13           “(B) identify the maximum practicable  
14           alignment of research programs, incentives, reg-  
15           ulations, and partnerships.

16           “(2) ELEMENTS.—A Quadrennial Energy Re-  
17           view shall—

18           “(A) establish integrated, governmentwide  
19           national energy objectives in the context of eco-  
20           nomic, environmental, and security priorities;

21           “(B) recommend coordinated actions  
22           across Federal agencies;

23           “(C) assess and recommend priorities for  
24           research, development, and demonstration;

1           “(D) provide a strong analytical base for  
2 Federal energy policy decisions;

3           “(E) consider reasonable estimates of fu-  
4 ture Federal budgetary resources when making  
5 recommendations; and

6           “(F) be conducted with substantial input  
7 from—

8           “(i) Congress;

9           “(ii) the energy industry;

10           “(iii) academia;

11           “(iv) State, local, and tribal govern-  
12 ments;

13           “(v) nongovernmental organizations;

14           and

15           “(vi) the public.

16           “(c) SUBMISSION OF QUADRENNIAL ENERGY RE-  
17 VIEW TO CONGRESS.—

18           “(1) IN GENERAL.—The President—

19           “(A) shall publish and submit to Congress  
20 a report on the Quadrennial Energy Review  
21 once every 4 years; and

22           “(B) more frequently than once every 4  
23 years, as the President determines to be appro-  
24 priate, may prepare and publish interim reports  
25 as part of the Quadrennial Energy Review.

1           “(2) INCLUSIONS.—The reports described in  
2 paragraph (1) shall address or consider, as appro-  
3 priate—

4           “(A) an integrated view of short-term, in-  
5 termediate-term, and long-term objectives for  
6 Federal energy policy in the context of eco-  
7 nomic, environmental, and security priorities;

8           “(B) potential executive actions (including  
9 programmatic, regulatory, and fiscal actions)  
10 and resource requirements—

11           “(i) to achieve the objectives described  
12 in subparagraph (A); and

13           “(ii) to be coordinated across multiple  
14 agencies;

15           “(C) analysis of the existing and prospec-  
16 tive roles of parties (including academia, indus-  
17 try, consumers, the public, and Federal agen-  
18 cies) in achieving the objectives described in  
19 subparagraph (A), including—

20           “(i) an analysis by energy use sector,  
21 including—

22           “(I) commercial and residential  
23 buildings;

24           “(II) the industrial sector;

25           “(III) transportation; and

- 1                   “(IV) electric power;
- 2                   “(ii) requirements for invention, adop-
- 3                   tion, development, and diffusion of energy
- 4                   technologies as they relate to each of the
- 5                   energy use sectors; and
- 6                   “(iii) other research that informs
- 7                   strategies to incentivize desired actions;
- 8                   “(D) assessment of policy options to in-
- 9                   crease domestic energy supplies and energy effi-
- 10                  ciency;
- 11                  “(E) evaluation of national and regional
- 12                  energy storage, transmission, and distribution
- 13                  requirements, including requirements for renew-
- 14                  able energy;
- 15                  “(F) portfolio assessments that describe
- 16                  the optimal deployment of resources, including
- 17                  prioritizing financial resources for energy-rel-
- 18                  evant programs;
- 19                  “(G) mapping of the linkages among basic
- 20                  research and applied programs, demonstration
- 21                  programs, and other innovation mechanisms
- 22                  across the Federal agencies;
- 23                  “(H) identification of demonstration
- 24                  projects;

1           “(I) identification of public and private  
2 funding needs for various energy technologies,  
3 systems, and infrastructure, including consider-  
4 ation of public-private partnerships, loans, and  
5 loan guarantees;

6           “(J) assessment of global competitors and  
7 an identification of programs that can be en-  
8 hanced with international cooperation;

9           “(K) identification of policy gaps that need  
10 to be filled to accelerate the adoption and diffu-  
11 sion of energy technologies, including consider-  
12 ation of—

13                   “(i) Federal tax policies; and

14                   “(ii) the role of Federal agencies as  
15 early adopters and purchasers of new en-  
16 ergy technologies;

17           “(L) priority listing for implementation of  
18 objectives and actions taking into account esti-  
19 mated Federal budgetary resources;

20           “(M) analysis of—

21                   “(i) points of maximum leverage for  
22 policy intervention to achieve outcomes;  
23 and

1                   “(ii) areas of energy policy that can  
2                   be most effective in meeting national goals  
3                   for the energy sector; and

4                   “(N) recommendations for executive  
5                   branch organization changes to facilitate the  
6                   development and implementation of Federal en-  
7                   ergy policies.

8           “(d) REPORT DEVELOPMENT.—The Secretary of En-  
9           ergy shall provide such support for the Quadrennial En-  
10          ergy Review with the necessary analytical, financial, and  
11          administrative support for the conduct of each Quadren-  
12          nial Energy Review required under this section as may  
13          be requested by the cochairpersons designated under sub-  
14          section (a)(2).

15          “(e) COOPERATION.—The heads of applicable Fed-  
16          eral agencies shall cooperate with the Secretary and pro-  
17          vide such assistance, information, and resources as the  
18          Secretary may require to assist in carrying out this sec-  
19          tion.”.

20          (b) TABLE OF CONTENTS AMENDMENT.—The item  
21          relating to section 801 in the table of contents of such  
22          Act is amended to read as follows:

          “Sec. 801. Quadrennial Energy Review.”.

23          (c) ADMINISTRATION.—Nothing in this section or an  
24          amendment made by this section supersedes, modifies,  
25          amends, or repeals any provision of Federal law not ex-

1 pressly superseded, modified, amended, or repealed by this  
2 section.

3 **SEC. 4403. STATE OVERSIGHT OF OIL AND GAS PROGRAMS.**

4 On request of the Governor of a State, the Secretary  
5 of the Interior shall establish a program under which the  
6 Director of the Bureau of Land Management shall enter  
7 into a memorandum of understanding with the State to  
8 consider the costs and benefits of consistent rules and  
9 processes for the measurement of oil and gas production  
10 activities, inspection of meters or other measurement  
11 methodologies, and other operational activities, as deter-  
12 mined by the Secretary of the Interior.

13 **SEC. 4404. UNDER SECRETARY FOR SCIENCE AND ENERGY.**

14 (a) IN GENERAL.—Section 202(b) of the Department  
15 of Energy Organization Act (42 U.S.C. 7132(b)) is  
16 amended—

17 (1) in paragraph (1), by striking “for Science”  
18 and inserting “for Science and Energy (referred to  
19 in this subsection as the ‘Under Secretary’)”;

20 (2) in paragraph (3), in the matter preceding  
21 subparagraph (A), by striking “for Science”; and

22 (3) in paragraph (4)—

23 (A) in the matter preceding subparagraph

24 (A), by striking “for Science”;

1 (B) in subparagraph (F), by striking  
2 “and” at the end;

3 (C) in subparagraph (G), by striking the  
4 period at the end and inserting a semicolon;  
5 and

6 (D) by inserting after subparagraph (G)  
7 the following:

8 “(H) establish appropriate linkages be-  
9 tween offices under the jurisdiction of the  
10 Under Secretary; and

11 “(I) perform such functions and duties as  
12 the Secretary shall prescribe, consistent with  
13 this section.”.

14 (b) CONFORMING AMENDMENT.—Section 641(h)(2)  
15 of the United States Energy Storage Competitiveness Act  
16 of 2007 (42 U.S.C. 17231(h)(2)) is amended by striking  
17 “Under Secretary for Science” and inserting “Under Sec-  
18 retary for Science and Energy”.

## 19 **Subtitle F—Markets**

### 20 **SEC. 4501. ENHANCED INFORMATION ON CRITICAL ENERGY** 21 **SUPPLIES.**

22 (a) IN GENERAL.—Section 205 of the Department of  
23 Energy Organization Act (42 U.S.C. 7135) is amended  
24 by adding at the end the following:

1           “(n) COLLECTION OF INFORMATION ON CRITICAL  
2 ENERGY SUPPLIES.—

3           “(1) IN GENERAL.—To ensure transparency of  
4 information relating to energy infrastructure and  
5 product ownership in the United States and improve  
6 the ability to evaluate the energy security of the  
7 United States, the Administrator, in consultation  
8 with other Federal agencies (as necessary), shall—

9           “(A) not later than 120 days after the date  
10 of enactment of this subsection, develop and  
11 provide notice of a plan to collect, in coopera-  
12 tion with the Commodity Futures Trade Com-  
13 mission, information identifying all oil inven-  
14 tories, and other physical oil assets (including  
15 all petroleum-based products and the storage of  
16 such products in off-shore tankers), that are  
17 owned by the 50 largest traders of oil contracts  
18 (including derivative contracts), as determined  
19 by the Commodity Futures Trade Commission;  
20 and

21           “(B) not later than 90 days after the date  
22 on which notice is provided under subparagraph  
23 (A), implement the plan described in that sub-  
24 paragraph.

1           “(2) INFORMATION.—The plan required under  
2 paragraph (1) shall include a description of the plan  
3 of the Administrator for collecting company-specific  
4 data, including—

5                   “(A) volumes of product under ownership;  
6           and

7                   “(B) storage and transportation capacity  
8           (including owned and leased capacity).

9           “(3) PROTECTION OF PROPRIETARY INFORMA-  
10          TION.—Section 12(f) of the Federal Energy Admin-  
11          istration Act of 1974 (15 U.S.C. 771(f)) shall apply  
12          to information collected under this subsection.

13          “(o) COLLECTION OF INFORMATION ON STORAGE  
14          CAPACITY FOR OIL AND NATURAL GAS.—

15                   “(1) IN GENERAL.—Not later than 90 days  
16          after the date of enactment of this subsection, the  
17          Administrator of the Energy Information Adminis-  
18          tration shall collect information quantifying the com-  
19          mercial storage capacity for oil and natural gas in  
20          the United States.

21                   “(2) UPDATES.—The Administrator shall up-  
22          date annually the information required under para-  
23          graph (1).

24                   “(3) PROTECTION OF PROPRIETARY INFORMA-  
25          TION.—Section 12(f) of the Federal Energy Admin-

1       istration Act of 1974 (15 U.S.C. 771(f)) shall apply  
2       to information collected under this subsection.

3       “(p) FINANCIAL MARKET ANALYSIS OFFICE.—

4               “(1) ESTABLISHMENT.—There shall be within  
5       the Energy Information Administration a Financial  
6       Market Analysis Office.

7               “(2) DUTIES.—The Office shall—

8                       “(A) be responsible for analysis of the fi-  
9       nancial aspects of energy markets;

10                      “(B) review the reports required by section  
11       4503(c) of the Energy Policy Modernization Act  
12       of 2015 in advance of the submission of the re-  
13       ports to Congress; and

14                      “(C) not later than 1 year after the date  
15       of enactment of this subsection—

16                               “(i) make recommendations to the  
17       Administrator of the Energy Information  
18       Administration that identify and quantify  
19       any additional resources that are required  
20       to improve the ability of the Energy Infor-  
21       mation Administration to more fully inte-  
22       grate financial market information into the  
23       analyses and forecasts of the Energy Infor-  
24       mation Administration, including the role  
25       of energy futures contracts, energy com-

1           modity swaps, and derivatives in price for-  
2           mation for oil;

3                   “(ii) conduct a review of implications  
4           of policy changes (including changes in ex-  
5           port or import policies) and changes in  
6           how crude oil and refined petroleum prod-  
7           ucts are transported with respect to price  
8           formation of crude oil and refined petro-  
9           leum products; and

10                   “(iii) notify the Committee on Energy  
11           and Natural Resources, and the Committee  
12           on Appropriations, of the Senate and the  
13           Committee on Energy and Commerce, and  
14           the Committee on Appropriations, of the  
15           House of Representatives of the rec-  
16           ommendations described in clause (i).

17                   “(3) ANALYSES.—The Administrator of the En-  
18           ergy Information Administration shall take analyses  
19           by the Office into account in conducting analyses  
20           and forecasting of energy prices.”.

21           (b) CONFORMING AMENDMENT.—Section 645 of the  
22           Department of Energy Organization Act (42 U.S.C. 7255)  
23           is amended by inserting “(15 U.S.C. 3301 et seq.) and  
24           the Natural Gas Act (15 U.S.C. 717 et seq.)” after “Nat-  
25           ural Gas Policy Act of 1978”.

1 **SEC. 4502. WORKING GROUP ON ENERGY MARKETS.**

2 (a) ESTABLISHMENT.—There is established a Work-  
3 ing Group on Energy Markets (referred to in this section  
4 as the “Working Group”).

5 (b) COMPOSITION.—The Working Group shall be  
6 composed of—

7 (1) the Secretary;

8 (2) the Secretary of the Treasury;

9 (3) the Chairman of the Federal Energy Regu-  
10 latory Commission;

11 (4) the Chairman of Federal Trade Commis-  
12 sion;

13 (5) the Chairman of the Securities and Ex-  
14 change Commission;

15 (6) the Chairman of the Commodity Futures  
16 Trading Commission; and

17 (7) the Administrator of the Energy Informa-  
18 tion Administration.

19 (c) CHAIRPERSON.—The Secretary shall serve as the  
20 Chairperson of the Working Group.

21 (d) COMPENSATION.—A member of the Working  
22 Group shall serve without additional compensation for the  
23 work of the member of the Working Group.

24 (e) PURPOSE AND FUNCTION.—The Working Group  
25 shall—

1           (1) investigate the effect of increased financial  
2 investment in energy commodities on energy prices  
3 and the energy security of the United States;

4           (2) recommend to the President and Congress  
5 laws (including regulations) that may be needed to  
6 prevent excessive speculation in energy commodity  
7 markets in order to prevent or minimize the adverse  
8 impact of excessive speculation on energy prices on  
9 consumers and the economy of the United States;  
10 and

11           (3) review energy security implications of devel-  
12 opments in international energy markets.

13       (f) ADMINISTRATION.—The Secretary shall provide  
14 the Working Group with such administrative and support  
15 services as may be necessary for the performance of the  
16 functions of the Working Group.

17       (g) COOPERATION OF OTHER AGENCIES.—The heads  
18 of Executive departments, agencies, and independent in-  
19 strumentalities shall, to the extent permitted by law, pro-  
20 vide the Working Group with such information as the  
21 Working Group requires to carry out this section.

22       (h) CONSULTATION.—The Working Group shall con-  
23 sult, as appropriate, with representatives of the various  
24 exchanges, clearinghouses, self-regulatory bodies, other

1 major market participants, consumers, and the general  
2 public.

3 **SEC. 4503. STUDY OF REGULATORY FRAMEWORK FOR EN-**  
4 **ERGY MARKETS.**

5 (a) STUDY.—The Working Group shall conduct a  
6 study—

7 (1) to identify the factors that affect the pricing  
8 of crude oil and refined petroleum products, includ-  
9 ing an examination of the effects of market specula-  
10 tion on prices; and

11 (2) to review and assess—

12 (A) existing statutory authorities relating  
13 to the oversight and regulation of markets crit-  
14 ical to the energy security of the United States;  
15 and

16 (B) the need for additional statutory au-  
17 thority for the Federal Government to effec-  
18 tively oversee and regulate markets critical to  
19 the energy security of the United States.

20 (b) ELEMENTS OF STUDY.—The study shall in-  
21 clude—

22 (1) an examination of price formation of crude  
23 oil and refined petroleum products;

24 (2) an examination of relevant international  
25 regulatory regimes; and

1           (3) an examination of the degree to which  
2           changes in energy market transparency, liquidity,  
3           and structure have influenced or driven abuse, ma-  
4           nipulation, excessive speculation, or inefficient price  
5           formation.

6           (c) REPORT AND RECOMMENDATIONS.—The Sec-  
7           retary shall submit to the Committee on Energy and Nat-  
8           ural Resources of the Senate and the Committee on En-  
9           ergy and Commerce of the House of Representatives quar-  
10          terly progress reports during the conduct of the study  
11          under this section, and a final report not later than 1 year  
12          after the date of enactment of this Act, that—

13           (1) describes the results of the study; and

14           (2) provides options and the recommendations  
15          of the Working Group for appropriate Federal co-  
16          ordination of oversight and regulatory actions to en-  
17          sure transparency of crude oil and refined petroleum  
18          product pricing and the elimination of excessive  
19          speculation, including recommendations on data col-  
20          lection and analysis to be carried out by the Finan-  
21          cial Market Analysis Office established by section  
22          205(p) of the Department of Energy Organization  
23          Act (42 U.S.C. 7135(p)).

1                   **Subtitle G—Affordability**

2   **SEC. 4601. E-PRIZE COMPETITION PILOT PROGRAM.**

3           Section 1008 of the Energy Policy Act of 2005 (42  
4 U.S.C. 16396) is amended by adding at the end the fol-  
5 lowing:

6           “(g) E-PRIZE COMPETITION PILOT PROGRAM.—

7                   “(1) DEFINITIONS.—In this section:

8                           “(A) ELIGIBLE ENTITY.—The term ‘eligi-  
9 ble entity’ means—

10                                   “(i) a private sector for-profit or non-  
11 profit entity;

12                                   “(ii) a public-private partnership; or

13                                   “(iii) a local, municipal, or tribal gov-  
14 ernmental entity.

15                           “(B) HIGH-COST REGION.—The term  
16 ‘high-cost region’ means a region in which the  
17 average annual unsubsidized costs of electrical  
18 power retail rates or household space heating  
19 costs per square foot exceed 150 percent of the  
20 national average, as determined by the Sec-  
21 retary.

22           “(2) E-PRIZE COMPETITION PILOT PROGRAM.—

23                   “(A) IN GENERAL.—The Secretary shall  
24 establish an e-prize competition or challenge  
25 pilot program to broadly implement sustainable

1 community and regional energy solutions that  
2 seek to reduce energy costs through increased  
3 efficiency, conservation, and technology innova-  
4 tion in high-cost regions.

5 “(B) SELECTION.—In carrying out the  
6 pilot program under subparagraph (A), the Sec-  
7 retary shall award a prize purse, in amounts to  
8 be determined by the Secretary, to each eligible  
9 entity selected through 1 or more of the fol-  
10 lowing competitions or challenges:

11 “(i) A point solution competition that  
12 rewards and spurs the development of solu-  
13 tions for a particular, well-defined problem.

14 “(ii) An exposition competition that  
15 helps identify and promote a broad range  
16 of ideas and practices that may not other-  
17 wise attract attention, facilitating further  
18 development of the idea or practice by  
19 third parties.

20 “(iii) A participation competition that  
21 creates value during and after the competi-  
22 tion by encouraging contestants to change  
23 their behavior or develop new skills that  
24 may have beneficial effects during and  
25 after the competition.

1                   “(iv) Such other types of prizes or  
2 challenges as the Secretary, in consultation  
3 with relevant heads of Federal agencies,  
4 considers appropriate to stimulate innova-  
5 tion that has the potential to advance the  
6 mission of the applicable Federal agency.

7                   “(3) AUTHORIZATION OF APPROPRIATIONS.—  
8 There is authorized to be appropriated to carry out  
9 this subsection \$10,000,000, to remain available  
10 until expended.”.

## 11                   **Subtitle H—Code Maintenance**

### 12                   **SEC. 4701. REPEAL OF OFF-HIGHWAY MOTOR VEHICLES** 13                   **STUDY.**

14                   (a) REPEAL.—Part I of title III of the Energy Policy  
15 and Conservation Act (42 U.S.C. 6373) is repealed.

16                   (b) CONFORMING AMENDMENT.—The table of con-  
17 tents for the Energy Policy and Conservation Act (Public  
18 Law 94–163; 89 Stat. 871) is amended—

19                   (1) by striking the item relating to part I of  
20 title III; and

21                   (2) by striking the item relating to section 385.

### 22                   **SEC. 4702. REPEAL OF METHANOL STUDY.**

23                   Section 400EE of the Energy Policy and Conserva-  
24 tion Act (42 U.S.C. 6374d) is amended—

25                   (1) by striking subsection (a); and

1           (2) by redesignating subsections (b) and (c) as  
2           subsections (a) and (b), respectively.

3 **SEC. 4703. REPEAL OF AUTHORIZATION OF APPROPRIA-**  
4 **TIONS PROVISION.**

5           (a) REPEAL.—Section 208 of the Energy Conserva-  
6           tion and Production Act (42 U.S.C. 6808) is repealed.

7           (b) CONFORMING AMENDMENT.—The table of con-  
8           tents for the Energy Conservation and Production Act  
9           (Public Law 94–385; 90 Stat. 1126) is amended by strik-  
10          ing the item relating to section 208.

11 **SEC. 4704. REPEAL OF RESIDENTIAL ENERGY EFFICIENCY**  
12 **STANDARDS STUDY.**

13          (a) REPEAL.—Section 253 of the National Energy  
14          Conservation Policy Act (42 U.S.C. 8232) is repealed.

15          (b) CONFORMING AMENDMENT.—The table of con-  
16          tents for the National Energy Conservation Policy Act  
17          (Public Law 95–619; 92 Stat. 3206) is amended by strik-  
18          ing the item relating to section 253.

19 **SEC. 4705. REPEAL OF WEATHERIZATION STUDY.**

20          (a) REPEAL.—Section 254 of the National Energy  
21          Conservation Policy Act (42 U.S.C. 8233) is repealed.

22          (b) CONFORMING AMENDMENT.—The table of con-  
23          tents for the National Energy Conservation Policy Act  
24          (Public Law 95–619; 92 Stat. 3206) is amended by strik-  
25          ing the item relating to section 254.

1 **SEC. 4706. REPEAL OF REPORT TO CONGRESS.**

2 (a) REPEAL.—Section 273 of the National Energy  
3 Conservation Policy Act (42 U.S.C. 8236b) is repealed.

4 (b) CONFORMING AMENDMENT.—The table of con-  
5 tents for the National Energy Conservation Policy Act  
6 (Public Law 95–619; 92 Stat. 3206) is amended by strik-  
7 ing the item relating to section 273.

8 **SEC. 4707. REPEAL OF REPORT BY GENERAL SERVICES AD-  
9 MINISTRATION.**

10 (a) REPEAL.—Section 154 of the Energy Policy Act  
11 of 1992 (42 U.S.C. 8262a) is repealed.

12 (b) CONFORMING AMENDMENTS.—

13 (1) The table of contents for the Energy Policy  
14 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
15 is amended by striking the item relating to section  
16 154.

17 (2) Section 159 of the Energy Policy Act of  
18 1992 (42 U.S.C. 8262e) is amended by striking sub-  
19 section (c).

20 **SEC. 4708. REPEAL OF INTERGOVERNMENTAL ENERGY  
21 MANAGEMENT PLANNING AND COORDINA-  
22 TION WORKSHOPS.**

23 (a) REPEAL.—Section 156 of the Energy Policy Act  
24 of 1992 (42 U.S.C. 8262b) is repealed.

25 (b) CONFORMING AMENDMENT.—The table of con-  
26 tents for the Energy Policy Act of 1992 (Public Law 102–

1 486; 106 Stat. 2776) is amended by striking the item re-  
 2 lating to section 156.

3 **SEC. 4709. REPEAL OF INSPECTOR GENERAL AUDIT SUR-**  
 4 **VEY AND PRESIDENT’S COUNCIL ON INTEG-**  
 5 **RITY AND EFFICIENCY REPORT TO CON-**  
 6 **GRESS.**

7 (a) REPEAL.—Section 160 of the Energy Policy Act  
 8 of 1992 (42 U.S.C. 8262f) is amended by striking the sec-  
 9 tion designation and heading and all that follows through  
 10 “(c) INSPECTOR GENERAL REVIEW.—Each Inspector  
 11 General” and inserting the following:

12 **“SEC. 160. INSPECTOR GENERAL REVIEW.**

13 “Each Inspector General”.

14 (b) CONFORMING AMENDMENT.—The table of con-  
 15 tents for the Energy Policy Act of 1992 (Public Law 102–  
 16 486; 106 Stat. 2776) is amended by striking the item re-  
 17 lating to section 160 and inserting the following:

“Sec. 160. Inspector General review. ....”.

18 **SEC. 4710. REPEAL OF PROCUREMENT AND IDENTIFICA-**  
 19 **TION OF ENERGY EFFICIENT PRODUCTS PRO-**  
 20 **GRAM.**

21 (a) REPEAL.—Section 161 of the Energy Policy Act  
 22 of 1992 (42 U.S.C. 8262g) is repealed.

23 (b) CONFORMING AMENDMENT.—The table of con-  
 24 tents for the Energy Policy Act of 1992 (Public Law 102–

1 486; 106 Stat. 2776) is amended by striking the item re-  
2 lating to section 161.

3 **SEC. 4711. REPEAL OF NATIONAL ACTION PLAN FOR DE-**  
4 **MAND RESPONSE.**

5 (a) REPEAL.—Part 5 of title V of the National En-  
6 ergy Conservation Policy Act (42 U.S.C. 8279 et seq.) is  
7 repealed.

8 (b) CONFORMING AMENDMENT.—The table of con-  
9 tents for the National Energy Conservation Policy Act  
10 (Public Law 95–619; 92 Stat. 3206; 121 Stat. 1665) is  
11 amended—

12 (1) by striking the item relating to part 5 of  
13 title V; and

14 (2) by striking the item relating to section 571.

15 **SEC. 4712. REPEAL OF NATIONAL COAL POLICY STUDY.**

16 (a) REPEAL.—Section 741 of the Powerplant and In-  
17 dustrial Fuel Use Act of 1978 (42 U.S.C. 8451) is re-  
18 pealed.

19 (b) CONFORMING AMENDMENT.—The table of con-  
20 tents for the Powerplant and Industrial Fuel Use Act of  
21 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
22 striking the item relating to section 741.

1 **SEC. 4713. REPEAL OF STUDY ON COMPLIANCE PROBLEM**  
2 **OF SMALL ELECTRIC UTILITY SYSTEMS.**

3 (a) REPEAL.—Section 744 of the Powerplant and In-  
4 dustrial Fuel Use Act of 1978 (42 U.S.C. 8454) is re-  
5 pealed.

6 (b) CONFORMING AMENDMENT.—The table of con-  
7 tents for the Powerplant and Industrial Fuel Use Act of  
8 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
9 striking the item relating to section 744.

10 **SEC. 4714. REPEAL OF STUDY OF SOCIOECONOMIC IM-**  
11 **PACTS OF INCREASED COAL PRODUCTION**  
12 **AND OTHER ENERGY DEVELOPMENT.**

13 (a) REPEAL.—Section 746 of the Powerplant and In-  
14 dustrial Fuel Use Act of 1978 (42 U.S.C. 8456) is re-  
15 pealed.

16 (b) CONFORMING AMENDMENT.—The table of con-  
17 tents for the Powerplant and Industrial Fuel Use Act of  
18 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
19 striking the item relating to section 746.

20 **SEC. 4715. REPEAL OF STUDY OF THE USE OF PETROLEUM**  
21 **AND NATURAL GAS IN COMBUSTORS.**

22 (a) REPEAL.—Section 747 of the Powerplant and In-  
23 dustrial Fuel Use Act of 1978 (42 U.S.C. 8457) is re-  
24 pealed.

25 (b) CONFORMING AMENDMENT.—The table of con-  
26 tents for the Powerplant and Industrial Fuel Use Act of

1 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
2 striking the item relating to section 747.

3 **SEC. 4716. REPEAL OF SUBMISSION OF REPORTS.**

4 (a) REPEAL.—Section 807 of the Powerplant and In-  
5 dustrial Fuel Use Act of 1978 (42 U.S.C. 8483) is re-  
6 pealed.

7 (b) CONFORMING AMENDMENT.—The table of con-  
8 tents for the Powerplant and Industrial Fuel Use Act of  
9 1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
10 striking the item relating to section 807.

11 **SEC. 4717. REPEAL OF ELECTRIC UTILITY CONSERVATION**  
12 **PLAN.**

13 (a) REPEAL.—Section 808 of the Powerplant and In-  
14 dustrial Fuel Use Act of 1978 (42 U.S.C. 8484) is re-  
15 pealed.

16 (b) CONFORMING AMENDMENTS.—

17 (1) TABLE OF CONTENTS.—The table of con-  
18 tents for the Powerplant and Industrial Fuel Use  
19 Act of 1978 (Public Law 95–620; 92 Stat. 3289) is  
20 amended by striking the item relating to section  
21 808.

22 (2) REPORT ON IMPLEMENTATION.—Section  
23 712 of the Powerplant and Industrial Fuel Use Act  
24 of 1978 (42 U.S.C. 8422) is amended—

25 (A) by striking “(a) GENERALLY.—”; and

1 (B) by striking subsection (b).

2 **SEC. 4718. EMERGENCY ENERGY CONSERVATION REPEALS.**

3 (a) REPEALS.—

4 (1) Section 201 of the Emergency Energy Con-  
5 servation Act of 1979 (42 U.S.C. 8501) is amend-  
6 ed—

7 (A) in the section heading, by striking  
8 “**FINDINGS AND**”; and

9 (B) by striking subsection (a).

10 (2) Section 221 of the Emergency Energy Con-  
11 servation Act of 1979 (42 U.S.C. 8521) is repealed.

12 (3) Section 222 of the Emergency Energy Con-  
13 servation Act of 1979 (42 U.S.C. 8522) is repealed.

14 (4) 241 of the Emergency Energy Conservation  
15 Act of 1979 (42 U.S.C. 8531) is repealed.

16 (b) CONFORMING AMENDMENT.—The table of con-  
17 tents for the Emergency Energy Conservation Act of 1979  
18 (Public Law 96–102; 93 Stat. 749) is amended—

19 (1) by striking the item relating to section 201  
20 and inserting the following:

“Sec. 201. Purposes.”; and

21 (2) by striking the items relating to sections  
22 221, 222, and 241.

1 **SEC. 4719. ENERGY SECURITY ACT REPEALS.**

2 (a) BIOMASS ENERGY DEVELOPMENT PLANS.—Sub-  
3 title A of title II of the Energy Security Act (42 U.S.C.  
4 8811 et seq.) is repealed.

5 (b) MUNICIPAL WASTE BIOMASS ENERGY.—Subtitle  
6 B of title II of the Energy Security Act (42 U.S.C. 8831  
7 et seq.) is repealed.

8 (c) USE OF GASOHOL IN FEDERAL MOTOR VEHI-  
9 CLES.—Section 271 of the Energy Security Act (42  
10 U.S.C. 8871) is repealed.

11 (d) CONFORMING AMENDMENTS.—

12 (1) The table of contents for the Energy Secu-  
13 rity Act (Public Law 96–294; 94 Stat. 611) is  
14 amended—

15 (A) by striking the items relating to sub-  
16 title A and B of title II;

17 (B) by striking the item relating to section  
18 204 and inserting the following:

“Sec. 204. Funding. .... ”; and

19 (C) by striking the item relating to section  
20 271.

21 (2) Section 203 of the Biomass Energy and Al-  
22 cohol Fuels Act of 1980 (42 U.S.C. 8802) is amend-  
23 ed—

24 (A) by striking paragraph (16); and

1 (B) by redesignating paragraphs (17)  
2 through (19) as paragraphs (16) through (18),  
3 respectively.

4 (3) Section 204 of the Energy Security Act (42  
5 U.S.C. 8803) is amended—

6 (A) in the section heading, by striking  
7 “FOR SUBTITLES A AND B”; and

8 (B) in subsection (a)—

9 (i) in paragraph (1), by adding “and”  
10 after the semicolon at the end;

11 (ii) in paragraph (2), by striking “;  
12 and” at the end and inserting a period;  
13 and

14 (iii) by striking paragraph (3).

15 **SEC. 4720. NUCLEAR SAFETY RESEARCH, DEVELOPMENT,**  
16 **AND DEMONSTRATION ACT OF 1980 REPEALS.**

17 Sections 5 and 6 of the Nuclear Safety Research, De-  
18 velopment, and Demonstration Act of 1980 (42 U.S.C.  
19 9704, 9705) are repealed.

20 **SEC. 4721. ELIMINATION AND CONSOLIDATION OF CERTAIN**  
21 **AMERICA COMPETES PROGRAMS.**

22 (a) **ELIMINATION OF PROGRAM AUTHORITIES.—**

23 (1) **NUCLEAR SCIENCE TALENT EXPANSION**  
24 **PROGRAM FOR INSTITUTIONS OF HIGHER EDU-**

1           CATION.—Section 5004 of the America COMPETES  
2           Act (42 U.S.C. 16532) is repealed.

3           (2) HYDROCARBON SYSTEMS SCIENCE TALENT  
4           EXPANSION PROGRAM FOR INSTITUTIONS OF HIGH-  
5           ER EDUCATION.—

6           (A) IN GENERAL.—Section 5005(e) of the  
7           America COMPETES Act (42 U.S.C.  
8           16533(e)) is repealed.

9           (B) CONFORMING AMENDMENTS.—Section  
10          5005(f) of the America COMPETES Act (42  
11          U.S.C. 16533(f)) is amended—

12                   (i) by striking paragraph (2);

13                   (ii) by striking the subsection designa-  
14                   tion and heading and all that follows  
15                   through “There are” in paragraph (1) and  
16                   inserting the following:

17          “(e) AUTHORIZATION OF APPROPRIATIONS.—There  
18          are”; and

19                   (iii) by redesignating subparagraphs  
20                   (A) through (F) as paragraphs (1) through  
21                   (6), respectively, and indenting appro-  
22                   priately.

23          (3) DISCOVERY SCIENCE AND ENGINEERING IN-  
24          NOVATION INSTITUTES.—Section 5008 of the Amer-  
25          ica COMPETES Act (42 U.S.C. 16535) is repealed.

1           (4) ELIMINATION OF DUPLICATIVE AUTHORITY  
2           FOR EDUCATION PROGRAMS.—Sections 3181 and  
3           3185 of the Department of Energy Science Edu-  
4           cation Enhancement Act (42 U.S.C. 7381*l*, 42  
5           U.S.C. 7381*n*) are repealed.

6           (5) MENTORING PROGRAM.—Section 3195 of  
7           the Department of Energy Science Education En-  
8           hancement Act (42 U.S.C. 7381*r*) is repealed.

9           (b) REPEAL OF AUTHORIZATIONS.—

10           (1) DEPARTMENT OF ENERGY EARLY CAREER  
11           AWARDS FOR SCIENCE, ENGINEERING, AND MATHE-  
12           MATICS RESEARCHERS.—Section 5006 of the Amer-  
13           ica COMPETES Act (42 U.S.C. 16534) is amended  
14           by striking subsection (h).

15           (2) DISTINGUISHED SCIENTIST PROGRAM.—  
16           Section 5011 of the America COMPETES Act (42  
17           U.S.C. 16537) is amended by striking subsection (j).

18           (3) PROTECTING AMERICA'S COMPETITIVE  
19           EDGE (PACE) GRADUATE FELLOWSHIP PROGRAM.—  
20           Section 5009 of the America COMPETES Act (42  
21           U.S.C. 16536) is amended by striking subsection (f).

22           (c) CONSOLIDATION OF DUPLICATIVE PROGRAM AU-  
23           THORITIES.—

1           (2) CONSOLIDATION OF DEPARTMENT OF EN-  
2           ERGY EARLY CAREER AWARDS FOR SCIENCE, ENGI-  
3           NEERING, AND MATHEMATICS RESEARCHERS PRO-  
4           GRAM AND DISTINGUISHED SCIENTIST PROGRAM.—

5           (A) FUNDING.—Section 971(c) of the En-  
6           ergy Policy Act of 2005 (42 U.S.C. 16311(c))  
7           is amended by adding at the end the following:

8           “(8) For the Department of Energy early ca-  
9           reer awards for science, engineering, and mathe-  
10          matics researchers program under section 5006 of  
11          the America COMPETES Act (42 U.S.C. 16534)  
12          and the distinguished scientist program under sec-  
13          tion 5011 of that Act (42 U.S.C. 16537),  
14          \$150,000,000 for each of fiscal years 2016 through  
15          2020, of which not more than 65 percent of the  
16          amount made available for a fiscal year under this  
17          paragraph may be used to carry out section 5006 or  
18          5011 of that Act.”.

19          (B) DEPARTMENT OF ENERGY EARLY CA-  
20          REER AWARDS FOR SCIENCE, ENGINEERING,  
21          AND MATHEMATICS RESEARCHERS.—Section  
22          5006 of the America COMPETES Act (42  
23          U.S.C. 16534) is amended—

24                 (i) in subsection (b)(1)—

1 (I) in the matter preceding sub-  
2 paragraph (A)—

3 (aa) by inserting “average”  
4 before “amount”; and

5 (bb) by inserting “for each  
6 year” before “shall”;

7 (II) in subparagraph (A), by  
8 striking “\$80,000” and inserting  
9 “\$190,000”; and

10 (III) in subparagraph (B), by  
11 striking “\$125,000” and inserting  
12 “\$490,000”;

13 (ii) in subsection (c)(1)(C)—

14 (I) in clause (i)—

15 (aa) by striking “assistant  
16 professor or equivalent title” and  
17 inserting “ untenured assistant or  
18 associate professor”; and

19 (bb) by inserting “or” after  
20 the semicolon at the end;

21 (II) by striking clause (ii); and

22 (III) by redesignating clause (iii)  
23 as clause (ii);

24 (iii) in subsection (d), by striking “on  
25 a competitive, merit-reviewed basis” and

1 inserting “through a competitive process  
2 using merit-based peer review.”;

3 (iv) in subsection (e)—

4 (I) by striking “(e)” and all that  
5 follows through “To be eligible” and  
6 inserting the following:

7 “(e) SELECTION PROCESS AND CRITERIA.—To be eli-  
8 gible”; and

9 (II) by striking paragraph (2);

10 and

11 (v) in subsection (f)(1), by striking  
12 “nonprofit, nondegree-granting research  
13 organizations” and inserting “National  
14 Laboratories”.

15 (3) SCIENCE EDUCATION PROGRAMS.—Section  
16 3164 of the Department of Energy Science Edu-  
17 cation Enhancement Act (42 U.S.C. 7381a) is  
18 amended—

19 (A) in subsection (b)—

20 (i) by striking paragraphs (1) and (2)

21 and inserting the following:

22 “(1) IN GENERAL.—The Director of the Office  
23 of Science (referred to in this subsection as the ‘Di-  
24 rector’) shall provide for appropriate coordination of  
25 science, technology, engineering, and mathematics

1 education programs across all functions of the De-  
2 partment.

3 “(2) ADMINISTRATION.—In carrying out para-  
4 graph (1), the Director shall—

5 “(A) consult with—

6 “(i) the Assistant Secretary of Energy  
7 with responsibility for energy efficiency  
8 and renewable energy programs; and

9 “(ii) the Deputy Administrator for  
10 Defense Programs of the National Nuclear  
11 Security Administration; and

12 “(B) seek to increase the participation and  
13 advancement of women and underrepresented  
14 minorities at every level of science, technology,  
15 engineering, and mathematics education.”; and

16 (ii) in paragraph (3)—

17 (I) in subparagraph (D), by  
18 striking “and” at the end;

19 (II) by redesignating subpara-  
20 graph (E) as subparagraph (F); and

21 (III) by inserting after subpara-  
22 graph (D) the following:

23 “(E) represent the Department as the  
24 principal interagency liaison for all coordination  
25 activities under the President for science, tech-

1 nology, engineering, and mathematics education  
2 programs; and”;

3 (B) in subsection (d)—

4 (i) by striking “The Secretary” and  
5 inserting the following:

6 “(1) IN GENERAL.—The Secretary”; and

7 (ii) by adding at the end the fol-  
8 lowing:

9 “(2) REPORT.—Not later than 180 days after  
10 the date of enactment of this subparagraph, the Di-  
11 rector shall submit a report describing the impact of  
12 the activities assisted with the Fund established  
13 under paragraph (1) to—

14 “(A) the Committee on Science, Space,  
15 and Technology of the House of Representa-  
16 tives; and

17 “(B) the Committee on Energy and Nat-  
18 ural Resources of the Senate.”.

19 (4) PROTECTING AMERICA’S COMPETITIVE  
20 EDGE (PACE) GRADUATE FELLOWSHIP PROGRAM.—  
21 Section 5009 of the America COMPETES Act (42  
22 U.S.C. 16536) is amended—

23 (A) in subsection (c)—

1 (i) in paragraph (1) by striking “, in-  
2 volving” and all that follows through “Sec-  
3 retary”; and

4 (ii) in paragraph (2), by striking sub-  
5 paragraph (B) and inserting the following:

6 “(B) to demonstrate excellent academic  
7 performance and understanding of scientific or  
8 technical subjects; and”;

9 (B) in subsection (d)(1)(B)(i), by inserting  
10 “full or partial” before “graduate tuition”; and

11 (C) in subsection (e), in the matter pre-  
12 ceding paragraph (1), by striking “Director of  
13 Science, Engineering, and Mathematics Edu-  
14 cation” and inserting “Director of the Office of  
15 Science.”.

16 (d) CONFORMING AMENDMENTS.—The table of con-  
17 tents for the America COMPETES ACT (Public Law  
18 110–69; 121 Stat. 573) is amended by striking the items  
19 relating to sections 5004 and 5008.

20 **SEC. 4722. REPEAL OF STATE UTILITY REGULATORY AS-**  
21 **SISTANCE.**

22 (a) REPEAL.—Section 207 of the Energy Conserva-  
23 tion and Production Act (42 U.S.C. 6807) is repealed.

24 (b) CONFORMING AMENDMENT.—The table of con-  
25 tents for the Energy Conservation and Production Act

1 (Public Law 94–385; 90 Stat. 1126) is amended by strik-  
2 ing the item relating to section 207.

3 **SEC. 4723. REPEAL OF SURVEY OF ENERGY SAVING POTEN-**  
4 **TIAL.**

5 (a) REPEAL.—Section 550 of the National Energy  
6 Conservation Policy Act (42 U.S.C. 8258b) is repealed.

7 (b) CONFORMING AMENDMENTS.—

8 (1) The table of contents for the National En-  
9 ergy Conservation Policy Act (Public Law 95–619;  
10 92 Stat. 3206; 106 Stat. 2851) is amended by strik-  
11 ing the item relating to section 550.

12 (2) Section 543(d)(2) of the National Energy  
13 Conservation Policy Act (42 U.S.C. 8253(d)(2)) is  
14 amended by striking “, incorporating any relevant  
15 information obtained from the survey conducted pur-  
16 suant to section 550”.

17 **SEC. 4724. REPEAL OF PHOTOVOLTAIC ENERGY PROGRAM.**

18 (a) REPEAL.—Part 4 of title V of the National En-  
19 ergy Conservation Policy Act (42 U.S.C. 8271 et seq.) is  
20 repealed.

21 (b) CONFORMING AMENDMENT.—The table of con-  
22 tents for the National Energy Conservation Policy Act  
23 (Public Law 95–619; 92 Stat. 3206) is amended—

24 (1) by striking the item relating to part 4 of  
25 title V; and

1           (2) by striking the items relating to sections  
2           561 through 569.

3 **SEC. 4725. REPEAL OF ENERGY AUDITOR TRAINING AND**  
4 **CERTIFICATION.**

5           (a) REPEAL.—Subtitle F of title V of the Energy Se-  
6           curity Act (42 U.S.C. 8285 et seq.) is repealed.

7           (b) CONFORMING AMENDMENT.—The table of con-  
8           tents for the Energy Security Act (Public Law 96–294;  
9           94 Stat. 611) is amended by striking the items relating  
10          to subtitle F of title V.

11 **SEC. 4726. REPEAL OF AUTHORIZATION OF APPROPRIA-**  
12 **TIONS.**

13          (a) REPEAL.—Subtitle F of title VII of the Power-  
14          plant and Industrial Fuel Use Act of 1978 (42 U.S.C.  
15          8461) is repealed.

16          (b) CONFORMING AMENDMENT.—The table of con-  
17          tents for the Powerplant and Industrial Fuel Use Act of  
18          1978 (Public Law 95–620; 92 Stat. 3289) is amended by  
19          striking the item relating to subtitle F of title VII.

20 **SEC. 4727. REPEAL OF RENEWABLE ENERGY AND ENERGY**  
21 **EFFICIENCY TECHNOLOGY COMPETITIVE-**  
22 **NESS ACT OF 1989.**

23          (a) REPEAL.—The Renewable Energy and Energy  
24          Efficiency Technology Competitiveness Act of 1989 (42  
25          U.S.C. 12001 et seq.) is repealed.

1 (b) CONFORMING AMENDMENTS.—

2 (1) Section 6(b)(3) of the Federal Nonnuclear  
3 Energy Research and Development Act of 1974 (42  
4 U.S.C. 5905(b)(3)) is amended—

5 (A) in subparagraph (Q), by adding “and”  
6 after the semicolon;

7 (B) by striking subparagraph (R); and

8 (C) by redesignating subparagraph (S) as  
9 subparagraph (R).

10 (2) Section 1204 of the Energy Policy Act of  
11 1992 (42 U.S.C. 13313) is amended—

12 (A) in subsection (b), in the matter pre-  
13 ceding paragraph (1), in the first sentence, by  
14 striking “, in consultation with” and all that  
15 follows through “under section 6 of the Renew-  
16 able Energy and Energy Efficiency Technology  
17 Competitiveness Act of 1989,”; and

18 (B) in subsection (c), by striking “, in con-  
19 sultation with the Advisory Committee,”.

20 **SEC. 4728. REPEAL OF HYDROGEN RESEARCH, DEVELOP-**  
21 **MENT, AND DEMONSTRATION PROGRAM.**

22 The Spark M. Matsunaga Hydrogen Research, Devel-  
23 opment, and Demonstration Act of 1990 (42 U.S.C.  
24 12401 et seq.) is repealed.

1 **SEC. 4729. REPEAL OF STUDY ON ALTERNATIVE FUEL USE**  
2 **IN NONROAD VEHICLES AND ENGINES.**

3 (a) IN GENERAL.—Section 412 of the Energy Policy  
4 Act of 1992 (42 U.S.C. 13238) is repealed.

5 (b) CONFORMING AMENDMENT.—The table of con-  
6 tents for the Energy Policy Act of 1992 (Public Law 102–  
7 486; 106 Stat. 2776) is amended by striking the item re-  
8 lating to section 412.

9 **SEC. 4730. REPEAL OF LOW INTEREST LOAN PROGRAM FOR**  
10 **SMALL BUSINESS FLEET PURCHASES.**

11 (a) IN GENERAL.—Section 414 of the Energy Policy  
12 Act of 1992 (42 U.S.C. 13239) is repealed.

13 (b) CONFORMING AMENDMENT.—The table of con-  
14 tents for the Energy Policy Act of 1992 (Public Law 102–  
15 486; 106 Stat. 2776) is amended by striking the item re-  
16 lating to section 414.

17 **SEC. 4731. REPEAL OF TECHNICAL AND POLICY ANALYSIS**  
18 **FOR REPLACEMENT FUEL DEMAND AND SUP-**  
19 **PLY INFORMATION.**

20 (a) IN GENERAL.—Section 506 of the Energy Policy  
21 Act of 1992 (42 U.S.C. 13256) is repealed.

22 (b) CONFORMING AMENDMENTS.—

23 (1) The table of contents for the Energy Policy  
24 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
25 is amended by striking the item relating to section  
26 506.

1           (2) Section 507(m) of the Energy Policy Act of  
2           1992 (42 U.S.C. 13257(m)) is amended by striking  
3           “and section 506”.

4 **SEC. 4732. REPEAL OF 1992 REPORT ON CLIMATE CHANGE.**

5           (a) IN GENERAL.—Section 1601 of the Energy Policy  
6 Act of 1992 (42 U.S.C. 13381) is repealed.

7           (b) CONFORMING AMENDMENTS.—

8           (1) The table of contents for the Energy Policy  
9 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
10 is amended by striking the item relating to section  
11 1601.

12           (2) Section 1602(a) of the Energy Policy Act of  
13 1992 (42 U.S.C. 13382(a)) is amended, in the mat-  
14 ter preceding paragraph (1), in the third sentence,  
15 by striking “the report required under section 1601  
16 and”.

17 **SEC. 4733. REPEAL OF DIRECTOR OF CLIMATE PROTECTOR**  
18 **ESTABLISHMENT.**

19           (a) IN GENERAL.—Section 1603 of the Energy Policy  
20 Act of 1992 (42 U.S.C. 13383) is repealed.

21           (b) CONFORMING AMENDMENT.—The table of con-  
22 tents for the Energy Policy Act of 1992 (Public Law 102–  
23 486; 106 Stat. 2776) is amended by striking the item re-  
24 lating to section 1603.

1 **SEC. 4734. REPEAL OF 1994 REPORT ON GLOBAL CLIMATE**  
2 **CHANGE EMISSIONS.**

3 (a) IN GENERAL.—Section 1604 of the Energy Policy  
4 Act of 1992 (42 U.S.C. 13384) is repealed.

5 (b) CONFORMING AMENDMENT.—The table of con-  
6 tents for the Energy Policy Act of 1992 (Public Law 102–  
7 486; 106 Stat. 2776) is amended by striking the item re-  
8 lating to section 1604.

9 **SEC. 4735. REPEAL OF TELECOMMUTING STUDY.**

10 (a) IN GENERAL.—Section 2028 of the Energy Policy  
11 Act of 1992 (42 U.S.C. 13438) is repealed.

12 (b) CONFORMING AMENDMENT.—The table of con-  
13 tents for the Energy Policy Act of 1992 (Public Law 102–  
14 486; 106 Stat. 2776) is amended by striking the item re-  
15 lating to section 2028.

16 **SEC. 4736. REPEAL OF ADVANCED BUILDINGS FOR 2005**  
17 **PROGRAM.**

18 (a) IN GENERAL.—Section 2104 of the Energy Policy  
19 Act of 1992 (42 U.S.C. 13454) is repealed.

20 (b) CONFORMING AMENDMENTS.—

21 (1) The table of contents for the Energy Policy  
22 Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
23 is amended by striking the item relating to section  
24 2104.

25 (2) Section 2101(a) of the Energy Policy Act of  
26 1992 (42 U.S.C. 13451(a)) (as amended by section

1       1201(d)(3)) is amended, in the third sentence, by  
2       striking “2104,”.

3       **SEC. 4737. REPEAL OF ENERGY RESEARCH, DEVELOPMENT,**  
4                               **DEMONSTRATION, AND COMMERCIAL APPLI-**  
5                               **CATION ADVISORY BOARD.**

6       (a) IN GENERAL.—Section 2302 of the Energy Policy  
7       Act of 1992 (42 U.S.C. 13522) is repealed.

8       (b) CONFORMING AMENDMENTS.—

9               (1) The table of contents for the Energy Policy  
10       Act of 1992 (Public Law 102–486; 106 Stat. 2776)  
11       is amended by striking the item relating to section  
12       2302.

13              (2) Section 6 of the Federal Nonnuclear Energy  
14       Research and Development Act of 1974 (42 U.S.C.  
15       5905) is amended—

16                      (A) in subsection (a), in the matter pre-  
17                      ceding paragraph (1), in the first sentence, by  
18                      striking “, in consultation with the Advisory  
19                      Board established under section 2302 of the  
20                      Energy Policy Act of 1992,”;

21                      (B) in subsection (b)—

22                              (i) in paragraph (1), in the first sen-  
23                              tence, by striking “, in consultation with  
24                              the Advisory Board established under sec-

1                   tion 2302 of the Energy Policy Act of  
2                   1992,”; and

3                   (ii) in paragraph (2), in the second  
4                   sentence, by striking “, in consultation  
5                   with the Advisory Board established under  
6                   section 2302 of the Energy Policy Act of  
7                   1992,”; and

8                   (C) in subsection (c), in the first sentence,  
9                   by striking “, in consultation with the Advisory  
10                  Board established under section 2302 of the  
11                  Energy Policy Act of 1992,”.

12                  (3) Section 2011(c) of the Energy Policy Act of  
13                  1992 (42 U.S.C. 13411(c)) is amended, in the sec-  
14                  ond sentence, by striking “, and with the Advisory  
15                  Board established under section 2302”.

16                  (4) Section 2304 of the Energy Policy Act of  
17                  1992 (42 U.S.C. 13523), is amended—

18                  (A) in subsection (a), by striking “, in con-  
19                  sultation with the Advisory Board established  
20                  under section 2302,”; and

21                  (B) in subsection (c), in the matter pre-  
22                  ceding paragraph (1), in the first sentence, by  
23                  striking “, with the advice of the Advisory  
24                  Board established under section 2302 of this  
25                  Act,”.

1 **SEC. 4738. REPEAL OF STUDY ON USE OF ENERGY FUTURES**  
2 **FOR FUEL PURCHASE.**

3 (a) IN GENERAL.—Section 3014 of the Energy Policy  
4 Act of 1992 (42 U.S.C. 13552) is repealed.

5 (b) CONFORMING AMENDMENT.—The table of con-  
6 tents for the Energy Policy Act of 1992 (Public Law 102–  
7 486; 106 Stat. 2776) is amended by striking the item re-  
8 lating to section 3014.

9 **SEC. 4739. REPEAL OF ENERGY SUBSIDY STUDY.**

10 (a) IN GENERAL.—Section 3015 of the Energy Policy  
11 Act of 1992 (42 U.S.C. 13553) is repealed.

12 (b) CONFORMING AMENDMENT.—The table of con-  
13 tents for the Energy Policy Act of 1992 (Public Law 102–  
14 486; 106 Stat. 2776) is amended by striking the item re-  
15 lating to section 3015.

16 **TITLE V—CONSERVATION**  
17 **REAUTHORIZATION**

18 **SEC. 5001. NATIONAL PARK SERVICE MAINTENANCE AND**  
19 **REVITALIZATION CONSERVATION FUND.**

20 (a) IN GENERAL.—Chapter 1049 of title 54, United  
21 States Code, is amended by adding at the end the fol-  
22 lowing:

23 **“§ 104908. National Park Service Maintenance and**  
24 **Revitalization Conservation Fund**

25 “(a) IN GENERAL.—There is established in the  
26 Treasury a fund, to be known as the ‘National Park Serv-

1 ice Critical Maintenance and Revitalization Conservation  
2 Fund' (referred to in this section as the 'Fund').

3       “(b) DEPOSITS TO FUND.—Notwithstanding any  
4 provision of law providing that the proceeds shall be cred-  
5 ited to miscellaneous receipts of the Treasury, for each  
6 fiscal year, there shall be deposited in the Fund, from rev-  
7 enues due and payable to the United States under section  
8 9 of the Outer Continental Shelf Lands Act (43 U.S.C.  
9 1338) \$150,000,000.

10       “(c) USE AND AVAILABILITY.—

11               “(1) IN GENERAL.—Amounts deposited in the  
12 Fund shall—

13                       “(A) be used only for the purposes de-  
14 scribed in subsection (d); and

15                       “(B) be available for expenditure only after  
16 the amounts are appropriated for those pur-  
17 poses.

18               “(2) AVAILABILITY.—Any amounts in the Fund  
19 not appropriated shall remain available in the Fund  
20 until appropriated.

21               “(3) NO LIMITATION.—Appropriations from the  
22 Fund pursuant to this section may be made without  
23 fiscal year limitation.

24       “(d) NATIONAL PARK SYSTEM CRITICAL DEFERRED  
25 MAINTENANCE.—The Secretary shall use amounts appro-

1 priated from the Fund for high-priority deferred mainte-  
2 nance needs of the Service that support critical infrastruc-  
3 ture and visitor services.

4 “(e) LAND ACQUISITION PROHIBITION.—Amounts in  
5 the Fund shall not be used for land acquisition.”.

6 (b) CLERICAL AMENDMENT.—The table of sections  
7 for chapter 1049 of title 54, United States Code, is  
8 amended by inserting after the item relating to section  
9 104907 the following:

“§104908. National Park Service Maintenance and Revitalization Conservation  
Fund.”.

10 **SEC. 5002. LAND AND WATER CONSERVATION FUND.**

11 (a) REAUTHORIZATION.—Section 200302 of title 54,  
12 United States Code, is amended—

13 (1) in subsection (b), in the matter preceding  
14 paragraph (1), by striking “During the period end-  
15 ing September 30, 2018, there” and inserting  
16 “There”; and

17 (2) in subsection (c)(1), by striking “through  
18 September 30, 2018”.

19 (b) ALLOCATION OF FUNDS.—Section 200304 of title  
20 54, United States Code, is amended—

21 (1) by striking “There” and inserting “(a) In  
22 General.—There”; and

23 (2) by striking the second sentence and insert-  
24 ing the following:

1       “(b) ALLOCATION.—Of the appropriations from the  
2 Fund—

3           “(1) not less than 40 percent shall be used col-  
4 lectively for Federal purposes under section 200306;

5           “(2) not less than 40 percent shall be used col-  
6 lectively—

7           “(A) to provide financial assistance to  
8 States under section 200305;

9           “(B) for the Forest Legacy Program es-  
10 tablished under section 7 of the Cooperative  
11 Forestry Assistance Act of 1978 (16 U.S.C.  
12 2103c);

13           “(C) for cooperative endangered species  
14 grants authorized under section 6 of the En-  
15 dangered Species Act of 1973 (16 U.S.C.  
16 1535); and

17           “(D) for the American Battlefield Protec-  
18 tion Program established under chapter 3081;  
19 and

20           “(3) not less than 1.5 percent or \$10,000,000,  
21 whichever is greater, shall be used for projects that  
22 secure recreational public access to Federal public  
23 land for hunting, fishing, or other recreational pur-  
24 poses.”.

1           (c) CONSERVATION EASEMENTS.—Section 200306 of  
2 title 54, United States Code, is amended by adding at the  
3 end the following:

4           “(c) CONSERVATION EASEMENTS.—The Secretary  
5 and the Secretary of Agriculture shall consider the acqui-  
6 sition of conservation easements and other similar inter-  
7 ests in land where appropriate and feasible.”.

8           (d) ACQUISITION CONSIDERATIONS.—Section  
9 200306 of title 54, United States Code (as amended by  
10 subsection (c)), is amended by adding at the end the fol-  
11 lowing:

12           “(d) ACQUISITION CONSIDERATIONS.—The Secretary  
13 and the Secretary of Agriculture shall take into account  
14 the following in determining the land or interests in land  
15 to acquire:

16                   “(1) Management efficiencies.

17                   “(2) Management cost savings.

18                   “(3) Geographic distribution.

19                   “(4) Significance of the acquisition.

20                   “(5) Urgency of the acquisition.

21                   “(6) Threats to the integrity of the land to be  
22 acquired.

23                   “(7) The recreational value of the land.”.

1 **SEC. 5003. HISTORIC PRESERVATION FUND.**

2 Section 303102 of title 54, United States Code, is  
3 amended by striking “of fiscal years 2012 to 2015” and  
4 inserting “fiscal year”.

COMMITTEE ON APPROPRIATIONS

## PROOF FOR FINAL REVIEW

Attached please find a PDF file of the Department of the Interior hearing held on Wednesday, March 4, 2015. If you have any changes please mark up the PDF file and send back the marked-up document as a PDF attachment. Inserts can be sent to me by email or fax inserts and/or corrected pages only (202-228-2348).

If you have any questions or concerns about the attachment please don't hesitate to contact me. Also, please send me an email if the final proof is acceptable to you.

Thank you.

DUE DATE: [Wednesday, March 16, 2016].

**DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES APPROPRIATIONS FOR FISCAL YEAR 2016**

**WEDNESDAY, MARCH 4, 2015**

U.S. SENATE,  
SUBCOMMITTEE OF THE COMMITTEE ON APPROPRIATIONS,  
*Washington, DC.*

The subcommittee met at 10:00 a.m., in room SD-124, Dirksen Senate Office Building, Hon. Lisa Murkowski (chairwoman) presiding.

Present: Senators Murkowski, Cochran, Blunt, Daines, Cassidy, Udall, Feinstein, Leahy, Reed, Tester, Merkley.

DEPARTMENT OF THE INTERIOR

OFFICE OF THE SECRETARY

**STATEMENT OF HON. SALLY JEWELL, SECRETARY**

**ACCOMPANIED BY HON. MIKE CONNOR, DEPUTY SECRETARY**

OPENING STATEMENT OF SENATOR LISA MURKOWSKI

Senator MURKOWSKI. Good morning. I would like to welcome everyone to the first hearing of our Interior Appropriations Subcommittee.

A special welcome to our new members on the committee. We have Senator McConnell who has joined us. Senators Daines and Cassidy are new to the committee. I think on the other side, everybody is pretty much an old hand at this, so thank you for being with us this morning.

Before we start with our witnesses, Secretary Jewell and Deputy Secretary Connor, I want to begin with just a couple of house-keeping matters for us. I intend to follow the early bird rule here in the committee for recognizing members for questions. I will call on members in the order in which you have arrived. We will go back and forth between the Majority and the Minority.

My proposal is to do six minute rounds. I figure that is an appropriate time to have a good dialogue with the witnesses. My expectation is we will do two, hopefully three rounds, but really trying to accommodate everyone so that they have a fair opportunity to address the issues that they wish to raise.

I also want to acknowledge Senator Reed for his excellent leadership on this subcommittee for the past couple of years. I am very pleased that you are staying with us on the committee, Senator

(1)

Reed, but I have appreciated how you and I have been able to work on the committee under your leadership, and I thank you for that.

I would like to recognize and welcome Tom Udall, our new ranking member on the committee. We have already had an opportunity to meet and talk about some of the priorities and issues that we share.

Senator Udall shared with me that he has already climbed the tallest mountain in our State. My hope is—you and I call it “Denali”—that we can actually make that permanent. I have a bill I will talk to you about later. I thank you for your engagement and your work as we move forward with the committee.

Finally, before turning to the Department of the Interior’s budget, I think it is important for all of our members and the public to hear from me as the subcommittee chairman that we will be marking up an Interior bill this year. We are going to do it. It has been 5 years since that has happened. I feel pretty strongly that we need to get back to regular order.

I think we appreciate that within this particular subcommittee we have some issues under our jurisdiction that are perhaps are a little more thorny than in some of the other committees, but that should not keep us from advancing to a markup.

I think it is our job to take up the tough issues and work together to produce legislation that reflects the collective will of the members, and I intend to do just that, working with Senator Udall here.

#### BUDGET REQUEST

Turning to the budget request for the Department, and again, Secretary Jewell, thank you, Deputy Secretary Connor, thank you for being here. The budget request is \$12.1 billion for programs within this subcommittee’s jurisdiction. This includes \$200 million for a proposal similar to last year, which allows certain firefighting costs to be appropriated as disaster funds. The budget request is almost \$1.4 billion above the current year spending levels.

Secretary, I noted when you were before the Energy Committee last week that the request violates the Budget Control Act. It ignores those statutory caps that are imposed by the BCA, and proposes new spending as if we had already moved to lift sequestration.

As I mentioned in that committee, and I will repeat here, I do think that demonstrates wishful thinking and not the governance we need with this budget.

Putting aside the discretionary spending request, there are other proposals in your budget to establish new mandatory spending totaling \$2 billion. The request includes \$500 million for the LWCF program in 2016, and \$500 million per year for 3 years in the new mandatory spending for the Park Service Centennial.

Unfortunately, there are no specific offsets for these spending increases.

Somewhat stunningly to me, when oil prices have fallen dramatically, the Department indicates that it will propose a host of new fees and royalty rate increases on energy producers that will exceed \$2.5 billion. Energy producers are already fleeing our public lands because of regulatory headaches and permitting delays. I am

looking at this and saying I do not see how making it more expensive and difficult to do business on public lands is good, sound policy, or good for the U.S. Treasury.

I think you noted yourself, Secretary, at the Energy hearing, you said it is hard to do business on our Federal lands. We need to do better. We must do better.

There are certainly some things in this budget that I can support. We have the addressing of the backlog of maintenance in our national parks. That is something that I hope we can agree should be a priority for us. Also, fully funding contract support costs for our Native Americans.

The concern that I have with the budget in front of us is that in many cases, it avoids the tough choices that must be made between programs in the constrained fiscal environment in which we are operating.

In all likelihood, we will have roughly the same amount to spend this year as we did last year under the budget caps, and yet we have a budget, a proposed budget, that is \$1.4 billion above that level.

This committee is forced to make some very difficult choices in how to prioritize among the many programs within the bill, and unfortunately, the budget does not help by giving us guidance as to the programs that the administration sees as its priorities.

Madam Secretary, when you appeared before the Energy Committee last week, I raised with you a number of recent actions that the administration has taken of late that either has or has the potential to do enormous damage to my State.

I mentioned the withdrawal of over 22 million more acres of Alaska from energy production. This has occurred on top of many other restrictions and regulations being imposed on us. These withdrawals have occurred despite the tremendous energy potential in those areas, despite the pressing need to refill our pipeline, and despite extreme opposition from most Alaskans.

Finally, I mentioned at the hearing in Energy that beyond energy, we still have the issue of King Cove that is yet unresolved. Last Monday marked 14 long months since the rejection of the necessary life saving, again, ten mile, one lane gravel non-commercial use road, and yet there is nothing in the budget to help those whose lives are needlessly in danger.

I was informed this morning that since the Energy hearing last week, there have been yet two more Medivac's out of King Cove, until the time we are here this morning. One was a Coast Guard Medivac, the other private.

I mention to my colleagues here at the committee these issues again so that you are aware that these are priorities not just for me but priorities for Americans that live in perhaps some very unique and different situations. I intend to do what I can to address and correct what I see are clear deficiencies and failures there.

Again, my thanks to the Secretary and appreciate the time you will give us this morning. We do have votes, two votes, that are beginning at 11:30. We will try to move quickly through it.

I want to recognize my ranking member, Senator Udall, for his comments at this time.

## STATEMENT OF SENATOR TOM UDALL

Senator UDALL. Thank you, Chairwoman Murkowski, and good morning and also welcome to the new members, Senators Cassidy and Daines.

Since this is my first hearing as ranking member of the Interior Appropriations Subcommittee, let me begin by saying how honored I am to serve in this position. The Interior Appropriations bill, I believe, is an essential tool to protect our Nation's rich, natural and cultural resources. It is our way to honor our commitment to American Indians and Alaskan Natives.

The programs funded by this bill are also incredibly important to New Mexico, and I look forward to using this position to ensure that our remarkable natural resources are protected and managed responsibly.

Let me also say how pleased I am to serve under the leadership of my new chairman, Senator Murkowski. There will be times when the Senator from Alaska and I will have to disagree, but I know there are many areas of common interests where we can work together. We have had some very good productive visits and I look forward to many more.

Madam Chairman, I can say without hesitation, I look forward to working with you as we move through the appropriations process this year, and I think it is a very good move that you say we are going to do a markup. I think that is a healthy part of the appropriations process, and I think we need to move our bills.

I also want to take a moment to thank our immediate past chairman, Senator Jack Reed. Over the last 4 years, Senator Reed worked very hard and in the face of some very difficult political issues to pass Interior bills that protected major environmental laws, and he supported critical conservation priorities. He had tremendous success, and I would like to thank him for his leadership.

Turning to the budget request, I am pleased to welcome Secretary Jewell and Deputy Secretary Connor before the subcommittee. I look forward to working more closely with both of you. You have given us a lot to discuss this morning.

This request clearly demonstrates the investments that we can make if Congress and the President work together to end sequestration and revisit the spending limits in the Budget Control Act.

Secretary Jewell, you proposed to increase the budget for the Department in fiscal year 2016 by 11 percent. That is more than \$1 billion in new spending for the programs in your Department, and it is, I must say, a bold vision.

Your budget includes a 17 percent increase to help the National Park Service to prepare for its 2016 Centennial. It also includes new funding to manage other public lands, fund energy development activities, and address climate change.

I want to thank you for your commitment to Tribal programs and for requesting a large increase for Indian education. That funding is long overdue.

I am also glad to see that your request again proposes to reform the Federal Wildland Firefighting budget by authorizing a new disaster cap adjustment to pay for the costs of the most catastrophic wildfires.

I also want to applaud you and the President for making a strong statement on the Land and Water Conservation Fund. In your request, LWCF just celebrated, as you know, its 50th anniversary, and it is up for reauthorization. Your support has never been more important or more timely.

I especially appreciate the increases for New Mexico priorities, including land acquisition, construction projects, Indian land and water claim settlements, as well as funding to support the newest national parks and monuments in our State.

As good as this budget request is, however, it is important to remember it is just a proposal. Until the law is changed, Congress has to live with the spending limits set by the Budget Control Act. That means non-defense discretionary programs like those in this budget request are facing a freeze in fiscal year 2016. A freeze does not even cover the costs of basic fixed cost increases, let alone the new investments in this budget.

In other words, many of the things in this budget will never happen if we do not end sequestration. We all need to ask ourselves, how is this Congress going to get serious about supporting important discretionary programs like these?

I want to commend Secretary Jewell for giving us an excellent place to start that conversation, and thank you very much, both you and Deputy Secretary Connor, for being with us. Thank you, Madam Chair.

Senator MURKOWSKI. Thank you, Senator Udall. I know that Senator Cochran has another Appropriations hearing that he has to go to, and I want to give you the courtesy of making a statement before you leave, before we turn to the Secretary.

#### STATEMENT OF SENATOR THAD COCHRAN

Senator COCHRAN. Thank you, Madam Chair. I appreciate the recognition, but I am not going to take time away from the other Senators who have already been here and are awaiting their turn.

I want to ask unanimous consent that my statement be printed in the record.

I join you in welcoming the distinguished Secretary to our hearing and I am looking forward to working with her and the officials at her Department to see that the intent and specific authorization and appropriations language is respected as we go through this next fiscal year.

We appreciate the cooperation that we received in special attention to the Mississippi Band of Choctaw Indians located in our State on Reservation lands and elsewhere. They are a very important part of our State's economy and attraction as a tourist destination, and also part of the living history that our State has contributed to our country.

I also want to support especially the Gulf of Mexico energy security legislation allowing Gulf States to receive specific portions of the revenues derived from offshore leases and production of oil and gas in the Eastern Gulf of Mexico, and the attention of the committee to assuring this is appreciated.

I ask unanimous consent that the balance of my remarks and my statement be printed in the record.

Senator MURKOWSKI. Senator Cochran, your full opening statement will be included as part of the record.

[CLERK'S NOTE: Senator Cochran did not submit additional remarks for the record.]

Senator MURKOWSKI. If any other members have any statements they would like to have incorporated, they will be as well.

[CLERK'S NOTE: Members did not submit any additional statements.]

Senator MURKOWSKI. With that, I would like to turn to the Secretary, recognizing that we probably have a lot of questions and a limited amount of time here this morning. With that, welcome to the committee, Secretary Jewell.

#### SUMMARY STATEMENT OF HON. SALLY JEWELL

Secretary JEWELL. Thank you. Good morning, Chairman Murkowski, Ranking Member Udall, Chairman Cochran, and members of the subcommittee. Thanks for the opportunity to testify today on the Department of the Interior's fiscal year 2016 budget request.

I want to thank you for the collaborative working relationship we have with the subcommittee and acknowledge and thank Leif, Rachel, and the subcommittee staff for the hard work they do on the budget.

Joining me today is Deputy Secretary Mike Connor.

I submitted a detailed statement for the record, so I will be brief in these opening remarks.

#### BUDGET REQUEST

This is a forward looking budget providing targeted investments to grow our domestic energy portfolio, creating jobs here at home, building community resilience, and revitalizing our national parks as they approach their 100th anniversary.

Our budget invests in science to help us understand natural resources on a landscape level and to apply that understanding to better manage America's assets for the long term.

Importantly, the budget also helps fulfill our Nation's commitments to American Indians and Alaskan Natives, including significant and much needed investment to help improve education for Indian children.

#### LAND AND WATER CONSERVATION FUND

I want to emphasize our investments in our national parks and public lands, places special to our Nation but which also boost local economies. On the 50th anniversary of the Land and Water Conservation Fund Act, the budget proposes full funding of \$900 million annually for LWCF programs. This is dollar for dollar one of the most effective Government programs that we have.

#### NATIONAL PARK SERVICE CENTENNIAL

Next year will mark another important milestone in our Nation's history. The National Park Service will celebrate its 100th anniversary, and this budget makes investments to launch a historic effort to celebrate and revitalize national parks and public lands.

The discretionary and mandatory portions of the budget include a \$150 million matching fund to leverage private donations to parks, and \$859 million to provide critical maintenance investments in high priority assets. Additional funding of \$43 million will provide staff to improve the visitor experience and support the expected influx of visitors during and after the Centennial.

#### CIVIL RIGHTS

We will also commemorate this year the 50th anniversary of the Voting Rights Act. The budget proposes \$50 million to restore and highlight key sites that tell the story of the struggle for civil rights, such as the Selma to Montgomery National Historic Trail, and the Martin Luther King, Jr. National Historic Site.

One of my top priorities is connecting young people to the great outdoors and our rich history and culture. We need to inspire and engage the next generation to be scientists, engineers, and stewards of our Nation's most prized assets, particularly as 40 percent of the Department's workforce will be eligible to retire very soon.

#### YOUTH

This budget proposes over \$107 million for Interior's youth programs, to provide opportunities for our Nation's young people to play, to learn, to serve, and to work on public lands. We will accomplish this through partnerships with youth conservation corps, schools, organizations like the YMCA and the National League of Cities, and private businesses.

#### INDIAN AFFAIRS

Next, I want to highlight the administration's continued commitment to Tribal self determination and strengthening Tribal communities. I recently visited Arizona to launch the administration's Native American Youth Listening Tour, to give young people in Indian country the opportunity to engage with Cabinet members directly about the challenges they face.

My recent trip to the Arctic also included meeting with youth leaders in Kotzebue who are helping their classmates cope with personal challenges.

Across the Federal family, agencies are committed to working together to better coordinate our services to more effectively serve American Indians and Alaskan Natives.

This budget holds the promise for a brighter future for Indian youth through education, for Native American communities through economic growth and social services, and for improving the stewardship of Trust resources.

We are requesting \$2.9 billion for Indian Affairs, an increase of 12 percent, which includes full funding of contract support costs that Tribes incur as they deliver services for Tribal members.

The Generation Indigenous Initiative includes an \$1 billion investment in Indian education to support a comprehensive transformation of the Bureau of Indian Education to better serve and support Tribes in educating their youth.

## ENERGY

When it comes to powering our Nation, the budget continues to invest in both renewable and conventional energy, so we can diversify our domestic energy portfolio, cut carbon pollution, and reduce our dependence on foreign oil. The budget includes \$100 million for renewable energy activities, helping us fast track projects like the SunZia Project in New Mexico. We also propose a total of \$658 million for conventional energy programs.

## SCIENCE

This budget invests in science and technology initiatives to support energy development, to create economic opportunities, to help communities build resilience.

The budget includes \$1.1 billion for research and development activities that range from scientific observations of the earth to applied research to better address problems such as invasive species and coastal erosion.

## COASTAL RESILIENCE

I recently visited Kivalina, a village on the Northwest Coast of Alaska where I heard directly from residents about their concern for their personal safety as encroaching storms threaten to wash away their village.

The budget includes a total of \$147 million to fund projects to help coastal communities. Tribes, Insular areas and land management bureaus use this science and technology to strengthen community and ecosystem resilience.

## WATER

Finally, I want to touch on water and fire. Western States are on the front lines of dealing with both drought and catastrophic wildfires. The budget includes \$1.1 billion for the Bureau of Reclamation to support water availability projects, Indian water rights settlements, ecosystem restoration, healthy watersheds, sustainable secure water supplies, and the WaterSMART program, to address drought and other water supply issues across the West.

## WILDLAND FIRE

This budget also renews the call for a new funding framework for wildfire suppression, similar to how the costs for other natural disasters are met. The initiative proposes base level funding of 70 percent of the 10 year average for suppression costs within the discretionary budget, and an additional \$200 million available in the event of the most severe fire activity, which comprises only 1 percent of the fires but 30 percent of the costs.

This is a common sense proposal that would help ensure that USDA and the Interior do not have to rob our budgets for fire prevention in order to fight the Nation's most catastrophic fires.

In closing, this is a smart and balanced budget that enables the Department to carry out these important missions. I look forward to discussing these issues and many other important investments proposed in this budget with you during your questions. Thank you.

[The statement follows:]

PREPARED STATEMENT OF HON. SALLY JEWELL

Ms. Chairman, Ranking Member Udall, and members of the subcommittee, I am pleased to present the 2016 President's budget for the Department of the Interior.

This is a forward-looking budget that invests in Interior's key missions so we can continue to serve the American people. This budget provides investments to grow our domestic energy portfolio, to revitalize our national parks as they approach their 100th anniversary and celebrate all of our public lands, and to strengthen science and management across all bureaus. The budget also helps fulfill our Nation's commitments to American Indians and Alaska Natives, including a significant and much-needed investment to help improve education for Indian children.

Interior's programs and activities serve as economic engines in communities across the Nation, contributing an estimated \$360 billion to the Nation's economy in 2013 and supporting more than 2 million American jobs. Of this total, energy and mineral development on Interior-managed lands and offshore areas generated more than \$237 billion of this economic activity and supported 1.1 million jobs. An estimated 407 million recreational visits to Interior lands—including national parks, wildlife refuges and public lands—contributed \$41 billion and supported nearly 355,000 jobs nationwide. Water supply, grazing and timber activities, primarily on public lands in the West, contributed nearly \$63 billion and supported more than 400,000 jobs. In 2016, the Department will generate an estimated \$13.8 billion in Federal receipts; these funds are deposited in the Treasury and serve to offset the cost of general government services, support a range of specific Federal programs, and support State and local governments through various revenue sharing arrangements.

2016 BUDGET

The 2016 budget proposal is \$13.2 billion, an increase of 8 percent, over the 2015 enacted level. This total includes a proposed \$200 million budget cap adjustment to ensure critical funds are available in the event of a catastrophic fire without requiring harmful transfers from other Interior programs that support land management and operations. It includes \$11.9 billion for Interior programs funded by the Interior, Environment, and Related Agencies appropriation, and \$1.1 billion for Interior's Bureau of Reclamation and the Central Utah Project Completion Act, funded in the Energy and Water Development Appropriations Act. The budget would generate \$5.6 billion in savings over 10 years through legislative reform proposals, including oil and gas management reforms to encourage diligent development of Federal energy resources while providing a fair return to taxpayers from royalty and other reforms.

The 2016 budget enables the Department to carry out its important mission by maintaining core capabilities and proposing investments in key priorities. This budget lays the groundwork for the future while meeting current commitments. The programs in this request emphasize partnerships, public engagement in Interior's places and programs, comprehensive upfront resource planning, tribal self-determination and self-governance, and increased scientific understanding leveraged with advanced tools and open access to data.

Importantly, the President's budget proposes to end sequestration, fully reversing it for domestic priorities in 2016, matched by equal dollar increases for defense funding. The last time sequestration was in full effect, the Congressional Budget Office estimated it reduced the gross domestic product by 0.6 percentage points and cost 750,000 jobs. But beyond the economic impacts, these across-the-board cuts also had severe programmatic impacts. At the Department of the Interior, sequestration required cuts to the Payments in Lieu of Taxes (PILT) program and mineral payments to States, slowed down permitting of energy projects because of cuts to operation budgets, and further added to the deferred maintenance backlog at national parks and on other public lands. All of these cuts impact local economies.

PRESERVING AND PROTECTING AMERICA'S NATURAL AND CULTURAL RESOURCES

The budget launches the National Parks Centennial to celebrate and revitalize national parks and public lands, and connect a new generation to the great outdoors. The budget includes funding in 2016 to allow the National Park Service to make targeted, measurable upgrades over the next 10 years to all of its highest priority, non-transportation assets, restoring and maintaining them in good condition. The budget also proposes \$150 million in discretionary and mandatory funding for a Centennial Challenge matching program to leverage private donations to parks,

and \$100 million in mandatory funding for a Public Lands Centennial Fund that competitively awards funds to Federal land management agencies for signature projects and programs. The budget includes complementary initiatives in the Bureau of Land Management and the Fish and Wildlife Service to engage the American public with Interior's broad range of outdoor recreation and natural learning opportunities.

To mark the 50th anniversary of the Voting Rights Act, the 2016 budget proposes \$50 million to restore and highlight key sites across the country that tell the story of the struggle for civil rights. State, local and tribal governments may also apply for grants to document and preserve stories and other sites related to the Civil Rights Movement.

On the 50th anniversary of the Land and Water Conservation Fund (LWCF) Act, the budget requests Congress to support full funding for LWCF programs. The innovative, highly successful program reinvests royalties from offshore oil and gas activities into public lands, enabling access for sportsmen and hunters, protecting historic battlefields and providing grants to States for recreation and conservation projects. In 2016, the budget proposes a total of \$400 million in discretionary funding and \$500 million in mandatory funding for LWCF programs. From Maine to Kansas and up to Washington and Alaska, the fiscal year 2016 request includes 105 projects in 39 States. The budget also includes a legislative proposal to provide full mandatory funding for LWCF starting in 2017.

The budget continues efforts to manage and promote the sustainability and resilience of ecosystems on a landscape scale, such as the California Bay-Delta, the Everglades, the Great Lakes, Chesapeake Bay, and the Gulf Coast. To protect and restore the American West's vast sage steppe landscape which supports abundant wildlife and significant economic activity, including recreation, ranching and energy development, the budget proposes an investment of \$78.1 million.

Interior spends over \$140 million in current funding within the Arctic for activities that include science, energy, Indian Affairs and land management. As the United States assumes the 2-year Chairmanship of the Arctic Council in April, we recognize this is an important opportunity to work with all eight Arctic countries to address the impacts of rapid climate change in the region, improve economic and living conditions of the people who live there, and enhance Arctic Ocean safety, security, and stewardship. Interior bureaus will play a significant role in these activities, which provide an important opportunity to build the resilience of Arctic communities and the ecosystems upon which they depend.

#### STRENGTHENING COMMUNITY RESILIENCE IN A CHANGING CLIMATE

The budget includes increases to strengthen the resilience of communities—including tribes and insular areas—and ecosystems to climate impacts, such as increased flooding and drought. The budget builds on the success of the Department of Interior's (DOI) Hurricane Sandy Coastal Resilience Grant Program, proposing a competitive grant program that would restore natural coastal systems to help reduce flood, storm, and sea level rise risks. To complement that program, the budget proposes an increase of \$30 million for the Challenge Cost-Share program, to be split evenly across the Bureau of Land Management (BLM), U.S. Fish and Wildlife Service (FWS), and National Park Service (NPS). The bureaus will prioritize projects to conserve and restore landscapes and resources vulnerable to change. Project funding will be leveraged with non-Federal investments to build resilience to inland threats such as drought, flooding, and wildfire. Proposed investments in the Bureau of Indian Affairs (BIA), FWS and the U.S. Geological Survey (USGS) specifically address the changing Arctic landscape and offer support to Alaska Native villages and other critically vulnerable communities in evaluating options for the long-term resilience of their communities. For example, the FWS is developing a demonstration project to enhance involvement of local people and subsistence users in the decisionmaking process for resource management on Federal lands. Through a pilot effort based at the Yukon National Wildlife Refuge, FWS and Native Alaskans are developing a draft fisheries cooperative management proposal to improve subsistence uses as the Kuskokwim River drainage changes. An additional \$7.0 million is also provided for insular areas to address needs related to sea level rise.

Tribes and other communities throughout the U.S. are already experiencing drought, intensifying wildfires, changes in plants and animals important to subsistence and cultural practices, impacts to treaty and trust resources, and coastal erosion and sea level rise. The budget provides a total of \$50.4 million, a \$40.4 million increase over 2015, across nine BIA trust resource programs to support tribal communities in preparing for and responding to the impacts of climate change. Funds

will provide support for tribes and Alaska Native villages to develop and access science, tools, training, and planning for building resilience.

The budget renews the call for a new funding framework for wildland fire suppression, similar to how the costs for other natural disasters are met. The initiative proposes base level funding of 70 percent of the 10-year average for suppression costs within the discretionary budget and an additional \$200 million available in the event of the most severe fire activity, which comprises only 1 percent of the fires but 30 percent of the costs. Wildland fire continues to be one of our most important land management challenges. In January, I issued Secretarial Order 3336 that recognizes the critical importance of fire in protecting, conserving, and restoring the health of the sagebrush-steppe ecosystem on which rural economies, wildlife—including the sage-grouse—and a way of life depend. Shortly, we will release our strategy for the 2015 fire season, to be followed by a long-term strategy for addressing rangeland fire prevention, management, and restoration. On a broader scale, the Department is firmly committed to the National Wildland Fire Cohesive Strategy and the three goals of restoring and maintaining fire-resilient landscapes, creating fire adapted communities, and safe and effective operations. In support of those goals, the budget reflects an integrated approach to wildland fire management, including \$30.0 million for a Resilient Landscapes program to create landscapes that are resilient to wildfire through long-term, landscape scale, place-based projects. Resilient Landscape program projects will be accomplished through collaborative partnerships that include non-fire bureau resources and land management programs along with other Federal, tribal, State and non-governmental partners. The budget continues to include funding for the Fuels Management program to improve the integrity and resilience of forests and rangelands, contribute to community adaptation to fire, and improve our ability to safely and appropriately respond to wildfires.

As part of the Bureau of Reclamation's proposed \$1.1 billion budget for fiscal year 2016, the WaterSMART program would receive \$58.1 million to support water conservation initiatives and technological breakthroughs that promote water reuse, recycling and conservation, in partnership with States, tribes, and other partners. Reclamation will continue strong partnerships with local water and conservation managers to conduct ongoing comprehensive water studies of river basins in Arizona, California, Colorado, Montana, Oklahoma and Oregon. In 2015 and 2016, the budget supports one or two new basin studies in the western U.S and one new West-wide climate risk impact assessment. In addition, Reclamation anticipates funding 40 new WaterSMART Grant projects that will contribute to water conservation. As part of WaterSMART, the USGS would receive \$31.0 million to continue to advance the National Water Census to create a more accurate picture of the quality and quantity of the Nation's water resources. The USGS will support focus area studies in the Apalachicola-Chattahoochee-Flint Basin, the Colorado River Basin and the Delaware River Basin.

#### POWERING THE FUTURE THROUGH BALANCED ENERGY DEVELOPMENT

To enhance national energy security and create jobs in new industries, the budget invests in renewable energy development programs, providing about \$100 million to review and permit renewable energy projects on public lands and offshore waters.

In order to address the continuing legacy of abandoned mine lands on the health, safety, environment and economic opportunity of communities, the budget makes available to States and tribes \$1 billion, over 5 years, as part of the President's POWER+ Plan. Funding would come by accelerating payments from the unappropriated balances in the Abandoned Mine Land (AML) Reclamation Fund, administered by the Department of the Interior's Office of Surface Mining Reclamation and Enforcement. The budget also includes reforms to strengthen the healthcare and pension plans that provide for the health and retirement security of retired coal miners and their families.

The budget invests in onshore energy permitting and oversight on Federal lands, with the BLM's oil and gas program receiving a 20 percent increase in funding, compared to the 2015 enacted level. The National Defense Authorization Act included an important authority that allows the BLM to implement increased fees for Applications for Permit to Drill to provide the funding needed to quickly and efficiently process APDs. To further improve responsiveness to industry demand and workload, the 2016 budget proposes a new fee system to meet program needs on the back end through inspections. A strong inspection program fully funded through fees, estimated to be \$48 million, will provide assurance BLM would not have to divert funds from processing permits or leasing activities in the event that appropriations for inspections did not keep pace with the workload associated with this critical responsibility. The inspection fee authority proposed for BLM is comparable to that already

in place for offshore inspections. Coupled with the transition to the implementation of a new automated permitting system that eliminates paper applications, these budget resources will significantly strengthen the BLM's program management capacity.

The budget request would fund Interior agencies overseeing oil and gas development on the Outer Continental Shelf as follows: \$170.9 million for the Bureau of Ocean Energy Management; and \$204.7 million for the Bureau of Safety and Environmental Enforcement. The President's proposal also supports continued reforms to strengthen oversight of industry operations following the 2010 *Deepwater Horizon* oil spill, with an additional emphasis on risk management.

#### SUPPORTING TRIBAL SOVEREIGNTY AND NATIVE YOUTH

The budget maintains the administration's strong commitment to tribal self-determination and strengthening tribal communities. It provides increases across Federal programs that serve tribes, including a proposed 12 percent increase over the 2015 enacted level for the Bureau of Indian Affairs (BIA) and the Bureau of Indian Education. The budget includes a \$26 million increase to fully fund Contract Support Costs that tribes incur from managing Federal programs, and a legislative proposal to reclassify Contract Support Costs as mandatory funding in 2017 in support of self-determination. The budget also capitalizes on the role of BIA as a broad ranging provider of Federal services by proposing to create a one-stop shop approach for facilitating tribal access to Federal programs across the U.S. Government. A total of \$244.5 million is requested to resolve Indian water rights claims and implement enacted settlement commitments—supporting sustainable water sharing and management, and providing critical infrastructure, jobs, and clean drinking water to some of the most impoverished communities in the Nation.

The President's budget supports a new and integrated approach to addressing barriers to success for Native youth. The Generation Indigenous, or Gen-I, initiative takes a comprehensive approach to help improve the lives of and opportunities for Native youth. Gen-I includes a \$1 billion investment in Indian education to support a comprehensive transformation of the Bureau of Indian Education (BIE). This multi-year process will transform the BIE into an organization that serves as a capacity builder and service provider to support tribes in educating their youth and deliver a world-class and culturally appropriate education across Indian Country.

#### ENGAGING THE NEXT GENERATION

The future of the Country's natural, cultural, and historic heritage depends on the next generation of active stewards. Interior's unique assets provide an unparalleled opportunity to connect the next generation to the great outdoors and the Nation's rich history. Building on the President's vision for the creation of the 21st Century Conservation Service Corps and implementation of My Brother's Keeper, I launched a youth initiative to inspire millions of young people to play, learn, serve and work outdoors. There is a growing disconnect between young people and the great outdoors and it is a gap Interior can help bridge through public-private partnerships coordinated with all levels of government. Interior is expanding efforts to pass on our Nation's rich conservation legacy and to inspire millions of young people to play, learn, serve and work outdoors.

The budget includes \$107.2 million for youth programs across the Department, a \$45.5 million increase from the 2015 enacted level. Within this increase, \$20.0 million is provided to NPS for youth activities, including bringing one million elementary school children from low-income areas to national parks. This increase will also fund dedicated youth coordinators to help enrich children and families' learning experiences at parks and online.

Our goal is to reach 10 million children through recreation programs, an additional 10 million children through environmental education programs, one million volunteers caring for our lands, and 100,000 young adults and veterans working on public lands. To do this, we need to engage the private sector and create more public-private partnerships. I have a personal goal to raise \$20 million for this endeavor and am happy to say we have received support from strong, enlightened companies like American Eagle Outfitters, Coca-Cola, CamelBak and The North Face. We can't do this alone, and we are actively involving partners from the private and nonprofit sectors to join us in creating a movement that helps prepare the next generation of stewards, policy-makers and leaders.

#### LEGISLATIVE PROPOSALS AND OFFSETTING COLLECTIONS

In 2016, the Department will generate an estimated \$13.8 billion in Federal receipts; these funds are deposited in the Treasury and serve to offset the cost of gen-

eral government services, support a range of specific Federal programs, and support State and local governments through various revenue sharing arrangements. The 2016 budget includes a number of revenue generating proposals estimated to result in savings to the Treasury of \$5.6 billion over 10 years.

Studies by the Government Accountability Office and Interior's Inspector General found taxpayers could earn a better return from DOI's oil and gas management programs through policy changes and more rigorous oversight. The budget proposes a package of legislative reforms to bolster administrative actions focused on advancing royalty reforms, encouraging diligent development of oil and gas leases, and improving revenue collection processes.

The administration is also committed to ensuring American taxpayers receive a fair return from the sale of public resources and benefit from the development of offshore energy resources owned by all Americans. The budget proposes the Interior Department work with Congress to redirect the distribution of expanded revenue payments under the 2006 Gulf of Mexico Energy Security Act. These payments, allocated to just four States in the Gulf of Mexico, are expected to increase significantly starting in 2018. Under the administration's proposal, funds will instead be directed to programs that offer broader natural resource, watershed, and conservation benefits for the entire Nation, help the Federal Government fulfill its role of being a good neighbor to local communities, and support other national priorities.

The budget includes a number of other legislative proposals, including full mandatory funding for the Land and Water Conservation Fund starting in 2017, full mandatory funding for Contract Support Costs starting in 2017, 3 years of mandatory funding for the National Parks and Public Lands Centennial, and a 1 year mandatory funding extension of the Payments in Lieu of Taxes program.

The budget also includes a number of discretionary user fee proposals to offset certain costs to the taxpayer.

#### BUREAU HIGHLIGHTS

*Bureau of Land Management.*—The 2016 request is \$1.2 billion, an increase of \$107.6 million from the 2015 enacted level. The 2016 request assumes the use of \$64.5 million in proposed offsetting fees that provide an effective increase of \$172.1 million above 2015. The 2016 request includes \$1.1 billion for the Management of Lands and Resources account, and \$38.0 million in current appropriations for Land Acquisition, including \$4.0 million to improve access to public lands for hunting, fishing, and other recreation. The budget proposes \$107.7 million for Oregon and California Grant Lands, which includes a \$3.2 million decrease in Western Oregon Resource Management Planning, reflecting expected completion of six revised plans in spring 2016.

To advance America's Great Outdoors, the request includes \$19.8 million in program increases for BLM's Recreation Resources Management program, National Conservation Lands, and Cultural Resources Management program. This includes a \$6.6 million increase to accelerate and enhance implementation of BLM's National Recreation Strategy—Connecting with Communities, which will enable BLM to more aggressively develop partnerships with communities and service providers to encourage recreational opportunities on public lands. The funds will also be used for such activities as improving signage and interpretative exhibits and meeting accessibility standards at visitor centers. An increase of \$11.2 million for the National Conservation Lands (also known as the National Landscape Conservation System) will enable BLM to accommodate the increased workload and responsibilities that have accompanied the addition of recently designated units. A \$2.0 million increase in Cultural Resources Management will enhance BLM capacity to preserve and protect the vast treasure of heritage resources on public lands. The budget request also includes \$6.0 million for youth programs, an increase of \$5.0 million from 2015, to put more young Americans to work protecting and restoring public lands and cultural and historical treasures.

The BLM continues to support the President's all-of-the-above energy strategy on public lands, including an initiative with important increases critical to BLM's ability to effectively manage onshore oil and gas development. The 2016 budget request for oil and gas management activities, including the request for direct and fee-funded appropriations and estimated mandatory appropriations, represents an increase of \$29.1 million, or 20 percent, in total program resources over the 2015 enacted level. The additional resources will enhance the bureau's ability to process Applications for Permits to Drill more quickly and efficiently, accelerate the development and completion of master leasing plans in support of BLM's leasing reform efforts, and strengthen its inspection and oversight program. The \$29.1 million total funding increase for BLM's Oil and Gas Management program includes a proposal to in-

stitute a fee system to support the inspection program. The estimated \$48.0 million in collections generated from the inspection fees will reduce the need for direct appropriations for the program by \$41.1 million while also providing for an increase of \$6.9 million above the amount appropriated in 2015 for this critical BLM management responsibility.

The 2016 budget request includes an increase of \$45.0 million, to support the increased workload and commitments required as implementation of the Greater Sage-Grouse conservation plans ramp up. The requested funds support activities that fall into three broad categories which involve both on-the-ground work and establishing the processes and organizational capability to plan and oversee the effort: managing resource uses in Greater Sage-Grouse habitats; restoring and reconnecting Greater Sage-Grouse habitats; and assessing, monitoring, and reporting on conditions in priority habitats.

Other budget highlights include a \$5.0 million program increase in the Resource Management Planning subactivity to expand BLM's Assessment, Inventory, and Monitoring program that will support increased data collection and monitoring needs central to the success of high priority landscape management efforts, such as the Western Solar Energy Plan, the implementation of the plan for the National Petroleum Reserve—Alaska, the Greater Sage-Grouse Conservation Strategy and the Department's broader landscape mitigation strategy. The request also includes an increase of \$7.8 million to accelerate implementation of BLM's enterprise geographic information system, which aggregates data and viewing information across boundaries to capture ecological conditions and trends; natural and human influences; and opportunities for resource conservation, restoration, development, and partnering. The BLM's geospatial proposal is a critical component of Interior's growing enterprise geospatial capabilities and strategy. A \$10.0 million increase in BLM's Challenge Cost Share program will be dedicated to projects that increase the resilience of landscapes in response to changing climate.

A proposed grazing administration fee will enhance BLM's capacity for processing grazing permits. A fee of \$2.50 per animal unit month, estimated to provide \$16.5 million in 2016, is proposed on a pilot basis. This additional revenue, which would be retained by BLM, more than offsets a decrease of \$3.0 million in appropriated funds in Rangeland Management. The net increase of \$13.5 million will allow BLM to expedite permit renewals and reduce the permit backlog.

*Bureau of Ocean Energy Management.*—The 2016 operating request is \$170.9 million, including \$74.2 million in current appropriations and \$96.6 million in offsetting collections. This is a net increase of \$1.8 million in current appropriations above the 2015 enacted level.

The 2016 budget maintains a strong offshore renewable energy program at slightly above the 2015 level of \$24.3 million for the total program. To date, the Bureau of Ocean Energy Management (BOEM) has issued seven commercial wind energy leases offshore Delaware, Maryland, Massachusetts, Rhode Island, and Virginia. In June 2014, BOEM issued the first outer continental shelf lease for marine hydrokinetic technology testing offshore Florida, and in November 2014, BOEM offered its first transmission right-of-way grant offshore Rhode Island.

Offshore conventional energy programs are funded with an increase of \$10.2 million, bringing total funding to \$59.9 million in 2016. To date, under BOEM's Five-Year OCS Leasing Program for 2012–2017, six sales were held generating over \$2.4 billion in high bids, and two additional lease sales are scheduled during calendar year 2015. The request includes an increase of \$2.5 million for establishing a risk management program, to better protect the Federal Government and taxpayers from financial risks that may arise from unfunded decommissioning costs.

*Bureau of Safety and Environmental Enforcement.*—The 2016 budget request is \$204.7 million, including \$82.5 million in current appropriations and \$122.2 million in offsetting collections, essentially level with 2015. The request for offsetting collections assumes \$65.0 million from offshore oil and gas inspection fees. The 2016 request allows the Bureau of Safety and Environmental Enforcement (BSEE) to begin to establish a renewable energy inspection program, and continue to strengthen regulatory and oversight capability on the Outer Continental Shelf (OCS), and oil spill response prevention.

The budget includes \$189.8 million for Offshore Safety and Environmental Enforcement. The request includes a program increase of \$1.7 million to establish an Engineering Technology Assessment Center to develop top-level engineering support for BSEE decisionmaking at all levels of the organization. Funding for Oil Spill Research is maintained at the 2015 level of \$14.9 million.

*Office of Surface Mining Reclamation and Enforcement.*—The 2016 budget request for the Office of Surface Mining Reclamation and Enforcement is \$160.5 million, an increase of \$10.4 million from the 2015 enacted level. The 2016 budget for Regula-

tion and Technology is \$128.4 million, an increase of \$5.7 million above the 2015 level. The request includes \$12.6 million, a program increase of \$3.8 million above the 2015 level, to improve implementation of existing laws and support State and tribal programs. It also includes \$65.5 million for State and tribal regulatory grants. This request fully funds estimated State requirements based on the return each year of an estimated \$3 million in previously appropriated regulatory grant funds by States.

The 2016 budget for the Abandoned Mine Reclamation Fund is \$32.1 million, an increase of \$4.7 million above the 2015 level. The budget includes a \$2.0 million program increase for technical assistance to States, Tribes, and communities on Abandoned Mine Land (AML) site reclamation and area-wide reclamation planning and a \$1.4 million program increase to evaluate AML program implementation, including identifying more effective and efficient tools for AML site identification, contract management, and program oversight. The 2016 budget proposes to distribute an estimated \$926.1 million in mandatory appropriations. This includes \$385.3 million to noncertified States and tribes in reclamation grants and \$540.8 million in payments to the United Mine Workers of America retiree health and pension plans. The administration proposes legislation to revitalize communities impacted by abandoned coal mines, reform current funding of abandoned coal mine land clean-up, increase funding for hardrock abandoned mine land clean-up, and provide for retired coal miners and their families.

*U.S. Geological Survey.*—The 2016 request is \$1.2 billion, an increase of nearly \$150 million above the 2015 enacted level. The 2016 budget reflects the vital role the USGS plays in advancing the President's commitment to scientific discovery and innovation to support sustainable economic growth, natural resource management, and science-based decisionmaking for critical societal needs. The budget includes funding for science to inform land and resource management decisions, advance a landscape level understanding of ecosystems, and develop new strategies to support communities in responding to climate change, historic drought, water quality issues, and natural hazards. The budget also funds science to support the Nation's energy strategy and to help identify critical mineral resources and address the impacts of energy and mineral development on the environment.

The 2016 budget provides an increase of \$14.6 million above the 2015 enacted level for science to support sustainable water management. The budget provides increased funding to support resource managers in managing competing demands related to water availability and quality and to enable adaptive management of watersheds. This includes a \$3.2 million increase for science to respond to drought, a \$4.0 million increase for water use information and research, a \$2.5 million increase to study ecological water flows, a \$1.3 million increase for streamgages, and a \$1.0 million increase to advance the National Groundwater Monitoring Network.

The 2016 budget provides an increase of \$11.0 million across the energy, minerals and environmental health portfolio for science to support the sustainable development of conventional and unconventional oil and gas resources; renewable energy sources such as geothermal, wind, and solar; critical minerals such as rare earth minerals; and address the environmental impacts of resource development such as uranium. These investments include \$19.5 million, \$5.3 million above 2015, to support an interagency effort with the Department of Energy and the Environmental Protection Agency to better understand the potential impacts of unconventional oil and gas development.

The budget includes a program increase of \$1.0 million for mineral resources science to continue life-cycle analysis for critical minerals such as rare earth elements, and to develop new science and tools to reduce the impacts of minerals extraction, production, and recycling on the environment and human health. A life-cycle analysis will trace the flow of critical minerals from occurrence through interaction with society to ultimate disposal. The increase will support new workforce capability to address the main thrusts of the President's four working groups in the Office of Science and Technology Policy that are currently focused on critical and strategic materials essential to national security, economic vitality, and environmental protection.

The budget provides increases totaling \$6.6 million above the 2015 enacted level for natural hazard science. This includes \$4.9 million to expand the Global Seismic Network used for worldwide earthquake monitoring and tsunami warning and \$1.7 million to support solar flare (space weather geomagnetic) monitoring which is critical to mitigating impacts to the electrical grid and other hazards. The budget supports the installation and operation of rapid-deployable streamgages to help manage flood response activities. The funding will increase volcano, landslide, wildfire, and sinkhole response capabilities as well as build on investments to continue develop-

ment of an earthquake early warning system, with the goal of implementing a limited public warning system for the U.S. west coast by 2018.

The budget includes \$15.6 million to expand and enhance ecosystem science activities to increase the understanding of the Nation's landscapes. Increases totaling \$6.7 million support research in critical landscapes, including \$4.2 million for the Arctic, \$1.0 million to study sage steppe landscapes, and \$1.5 million to support science for Puget Sound, Columbia River and the upper Mississippi River. USGS research will continue to support restoration of other priority ecosystems, such as Chesapeake Bay, Everglades, Great Lakes, California Bay-Delta, and Gulf Coast. Increases totaling \$3.8 million support research on invasive and declining species, including \$2.2 million for invasive plants and animals and \$1.6 million to study the decline of pollinating insects, birds, and mammals. The budget also requests \$5.1 million to support coastal resilience and adaptation to long-term change from sea-level rise and coastal erosion.

The President's budget request includes an increase of \$37.8 million to provide data and tools to help land and resource managers make informed decisions across the landscape and provide data and information to the public for use in a wide variety of applications. The budgets of USGS and the National Aeronautics and Space Administration provide complementary funding to sustain the Landsat data stream, which is critical to understanding global landscapes. Funding in the USGS budget supports the ground system portion of the Sustained Land Imaging Program, including funding for ground systems development for a Thermal Instrument Free Flyer, Landsat 9 (a rebuild of the Landsat 8), and to receive data from international partners. The budget also includes a \$4.0 million increase for Landsat science products for climate and resource assessments.

The budget provides increases for foundational data and tools needed to support landscape level understanding, increases for mapping, expanded lidar collection through the 3D Elevation Program, making data more easy to access and use under the Big Earth Data Initiative, and developing information and tools to assess ecosystem services and benefits. For example, an increase of \$3.7 million will expand three-dimensional elevation data collection in Alaska and elsewhere in the United States, mitigate the effects of coastal erosion, storms, and other hazards, and support many other critical activities. A \$1.8 million increase will enhance understanding of the benefits of the Nation's ecosystem services and a \$1.1 million increase for the Big Earth Data Initiative will make high-value data sets easier to discover, access and use.

The USGS plays an important role in conducting research and developing information and tools to support communities in preparing for, and responding to the impacts of global climate change. The budget includes an increase of \$32.0 million for science to support climate resilience and adaptation. The budget includes a \$6.8 million increase in science for adaptation and resilience planning and an increase of \$2.3 million for the USGS to provide interagency coordination of regional climate science activities across the Nation, an increase of \$9.1 million to support biological carbon sequestration, and \$11.0 million for the USGS to support the community resilience toolkit, which is a web based clearinghouse of data, tools, shared applications, and best practices for State, local and tribal resource managers, decision-makers, and the public.

*Fish and Wildlife Service.*—The 2016 budget for FWS totals \$3.0 billion, including current appropriations of \$1.6 billion, an increase of \$130.7 million compared to the 2015 level. The proposed funding level will allow the bureau to facilitate collaboration and action on the ground as the best way to preserve the wildlife and open spaces so important to the Nation. For this reason, I ask the committee remove the rider included in the Fiscal Year 2015 Appropriations Act that prevents the FWS from writing rules to list several species of sage-grouse. Our approach to working collaboratively among Federal agencies, States and stakeholders could provide the path for conserving species so Endangered Species Act protection for both the bi-State and Greater Sage-Grouse is not necessary. The fiscal year 2015 rider has complicated implementation of the urgent work needed to protect the sagebrush-steppe from threats such as invasive species, fire and fragmentation. These threats impact not only the sage-grouse, but 350 other species of wildlife and traditional economic activity like ranching, hunting and recreation central to the Western way of life. Absent effective conservation efforts to reduce or remove the threats now affecting the species, the likelihood of eventual listing of the Greater Sage-Grouse under the ESA will be increased.

The budget includes \$1.4 billion available under mandatory appropriations, most of which will be provided directly to States for fish and wildlife restoration and conservation. In 2016, a total of \$1.5 billion in current funding is proposed for FWS as part of the administration's initiative to reconnect Americans to the outdoors.

Creating opportunities for Americans to enjoy the outdoors through programs at FWS will help to ensure future generations appreciate and conserve natural resources and preserve natural places. Investments that support this effort in 2016 include \$1.3 billion for FWS operations, an increase of \$114.2 million over the 2015 level. The request includes \$5.0 million for the National Wildlife Refuge System's Urban Wildlife Conservation Partnerships that will reconnect the Nation's urban populations with the outdoors. With 80 percent of the U.S. population currently residing in urban communities near more than 260 wildlife refuges, using the Refuge System to help urbanites to rediscover the outdoors is a priority for FWS. The budget also requests \$108.3 million for grant programs administered by FWS that support America's Great Outdoors goals. Within this amount is an increase of \$11.3 million for the State and Tribal Wildlife grant program on which many States and tribes rely to fund non-game animal conservation. The request also includes program increases of \$10.0 million for Challenge Cost Share projects and \$5.0 million for the Joint Venture program to support cooperation with non-Federal partners to enhance the resilience of habitat to adapt to a changing climate.

The budget proposes \$16.8 million, an increase of \$2.6 million, for activities associated with energy development. Of this increase, \$1.4 million supports scientific research into the impacts of energy transmission and development infrastructure on wildlife and habitat. The research will identify potential impacts associated with the development of energy infrastructure and strategies to minimize the impacts on habitat and species. An increase of \$1.2 million for the Ecological Services Planning and Consultation program supports assessments of renewable energy projects proposed for development.

The budget request for the Resource Management account continues support for key programs with program increases of \$110.6 million above 2015. The request provides \$258.2 million in Ecological Services to conserve, protect, and enhance listed and at-risk species and their habitat, an increase of \$32.3 million. Within this request are increases of \$4.0 million to support conservation of the sage steppe habitat across 11 Western States and \$4.0 million to support Gulf Coast restoration.

The request includes funding within Law Enforcement and International Affairs to combat wildlife trafficking. The budget provides \$75.4 million for the law enforcement program to investigate wildlife crimes, enforce the laws governing the Nation's wildlife trade, and expand technical forensic expertise, with program increases of \$8.0 million over 2015.

The budget includes \$147.5 million for Fisheries and Aquatic Resource Conservation, a program increase of \$4.9 million. Within this request is \$53.4 million for operation of the National Fish Hatchery System and a \$2.4 million increase to prevent the spread of Asian carp in the Missouri, Ohio, upper Mississippi Rivers, and other high priority watersheds.

Funding for Cooperative Landscape Conservation activity is \$17.9 million, an increase of \$3.9 million, and funding for Science Support is \$31.7 million, a program increase of \$14.7 million. The budget supports applied science directed at high impact questions to mitigate threats to fish and wildlife resources, including \$2.5 million to address white-nose syndrome in bats, an increase of \$1.0 million to study biological carbon sequestration, and an increase of \$1.0 million to analyze ecosystem services valuation.

The 2016 budget proposes to eliminate the current funding contribution to the National Wildlife Refuge fund, a reduction of \$13.2 million below 2015. An estimated \$8.0 million in mandatory receipts collected and allocated under the program would remain available to counties.

*National Park Service.*—The 2016 budget request for NPS of \$3.0 billion is \$432.9 million above the 2015 enacted level. The 2016 NPS budget request for operations is \$2.5 billion. This is an increase of \$239.4 million above the 2015 enacted level, consisting of \$213.4 million in program increases, and \$25.3 million in fixed costs increases. Highlights of the 2016 budget include the increases for the Centennial. A \$40.0 million increase to the Centennial Challenge program will provide an important Federal match to leverage partner donations for projects and programs at national parks in anticipation and support of the upcoming Centennial.

Other changes include a \$2.2 million programmatic reduction to refocus operations funding which partially offsets the following increases: \$16.3 million to provide healthcare insurance to seasonal employees, \$6.0 million to fund projects that will document and preserve civil rights history in the national park system, \$3.5 million for climate change adaptation projects, \$3.0 million to improve baseline cultural resource documentation at park units, and \$2.5 million for science priorities. The 2016 budget also broadens the scope of NPS programs contributing to the understanding of and preparing for the impacts of a changing climate. A \$10.0 million program increase is requested in the Challenge Cost Share program for NPS to

work with non-Federal partners on projects that increase the resilience of landscapes in response to changing climate.

The administration proposes an initiative to Celebrate Civil Rights in America in 2016 by commemorating the struggles undertaken by Americans to secure civil rights and liberties. The 2016 budget will provide resources to celebrate how those actions inspired many groups in America and around the world to continue to pursue progress for civil rights. The budget proposes increases of \$50.0 million, including \$6.0 million to fund projects that will document and preserve civil rights history in the national park system, and \$1.5 million to address critical base operating NPS needs at sites such as the Harriet Tubman Underground Railroad National Historical Park in Maryland, and the Charles Young Buffalo Soldiers National Monument in Ohio. Also included in the \$50.0 million initiative is \$30.0 million for competitive historic preservation grants to preserve the stories and sites associated with the Civil Rights movement, and \$2.5 million for grants specifically to Historically Black Colleges and Universities to document, interpret, and preserve the stories and sites associated with the progression of Civil Rights in America. Finally, \$10.0 million will provide the necessary resources to complete high priority facility projects at NPS sites associated with the Civil Rights movement such as the Selma Interpretive Center at the Selma to Montgomery National Historic Trail, the Lincoln Memorial and the Martin Luther King, Jr. National Historic site.

The 2016 request for the Historic Preservation Fund is \$89.9 million, an increase of \$33.5 million. Of this total, \$46.9 million is requested for grants-in-aid to States and Territories, which is level with 2015. A total of \$10.0 million is requested for grants-in-aid to tribes, an increase of \$1.0 million. The budget proposes to fund grants-in-aid to Historically Black Colleges and Universities through a \$2.5 million increase, which is an important component of the Civil Rights initiative. Finally, the budget includes \$30.5 million for competitive grants-in-aid, a \$30.0 million increase for new competitive grants as part of the Civil Rights initiative, and \$500,000 for the existing competitive grants targeted toward communities currently under represented on the National Register of Historic Places.

The 2016 request includes \$54.2 million for the National Recreation and Preservation account, a decrease of \$8.9 million compared to 2015. These changes consist of a program reduction of \$9.7 million to Heritage Partnership Programs, a programmatic increase of \$703,000 for the National Register program to digitize records, a programmatic increase of \$260,000 for the Federal Lands to Parks program, and fixed costs increases of \$506,000.

Programs funded out of the Land and Water Conservation Fund are a key strategy to enhance America's Great Outdoors. The budget requests \$117.5 million for the Land Acquisition and State Assistance account, an increase of \$18.5 million. This includes \$53.2 million for the State Conservation Grants program, a programmatic increase of \$5.0 million, and \$64.3 million for NPS Federal land acquisition, a programmatic increase of \$13.3 million. Of this amount, \$16.3 million supports Collaborative Landscape projects.

Funding for Construction totals \$251.0 million, an increase of \$112.6 million. Of this amount, the budget includes \$153.3 million for line-item construction projects, a \$91.7 million program increase compared to 2015. The request includes \$8.7 million to provide seismic stabilization at the Mammoth Hotel at Yellowstone National Park and \$3.0 million to rehabilitate the Selma Interpretive Center at the Selma to Montgomery National Historic Trail.

*Indian Affairs.*—The 2016 budget for Indian Affairs is \$2.9 billion, \$323.5 million above the 2015 level. This includes an increase of \$231.4 million for Operation of Indian Programs; an increase of \$32.0 million for Indian Land and Water Claim Settlements; an increase of \$60.1 million for Construction; and level funding of \$7.7 million for the Indian Guaranteed Loan program.

The 2016 budget fully funds Contract Support Costs at \$277.0 million, an increase of \$26.0 million above 2015. Based on the most recent analysis, the requested amount for 2016 will fully fund Contract Support Costs. To stabilize long-term funding and address programmatic concerns with Contract Support Costs, the 2016 budget also proposes—for the first time—a legislative proposal to reclassify these costs as mandatory funding beginning in fiscal year 2017. Mandatory funding for Contract Support Costs will help stabilize this vital funding for Tribes and further self-governance and self-determination efforts.

The budget contains a number of critical increases to support tribal nation-building and economic development. The budget capitalizes on the important role BIA plays as a broad provider of Federal services by proposing \$4.0 million to establish the One-Stop Tribal Support Center to make it easier for tribes to find and access hundreds of services available to tribes across the Federal Government. The 2016 budget includes \$4.5 million to establish an Indian Energy Service Center to facili-

tate vital energy development in Indian Country of both conventional and alternative energy and to support assessment of the social and environmental impacts of energy development on tribal lands. A data initiative of \$12.0 million is proposed to improve and expand access to quality data for tribal leaders and other decision makers. This funding will establish an Office of Indian Affairs Policy, Program Evaluation, and Data which will help the Department collect, analyze, and utilize evidence to support effective policy making and program implementation. Lastly, a \$1.3 million increase for the Small and Needy Tribes program is proposed to assist eligible Tribes in expanding and sustaining tribal governance.

The 2016 budget proposes an additional \$15.0 million to expand Indian Affairs' capacity in current programs that address Indian child and family welfare and job training issues. The budget proposes program increases of \$6.0 million for social services programs, \$4.0 million for law enforcement special initiatives, and \$5.0 million for tribal courts. The law enforcement increases will expand on pilot projects initiated in 2015 in which BIA law enforcement is implementing a comprehensive strategy to support alternatives to incarceration. Funding increases for these programs will be integrated with other funding increases across the Federal Government, including an additional \$25.0 million to the Indian Health Service to address behavioral health issues, a \$25.0 million increase to the Substance Abuse and Mental Health Services Administration for the Tribal Behavioral Health program, and a \$132.0 million increase for the Administration for Children and Families for Tribal Child Care programs, cultural and language preservation programs, tribal child welfare programs, Tribal Head Start, and other native programs.

The 2016 budget proposes a \$1.0 billion investment in Indian education to support a comprehensive transformation of BIE. The multi-year process will transform BIE into an organization that serves as a capacity builder and service provider to support tribes in educating their youth and deliver a world class and culturally appropriate education across Indian Country. The budget provides increases totaling \$138.4 million for elementary and secondary school education activities funded by BIE and education construction. The request includes a program increase of \$45.5 million in Elementary and Secondary education. An increase of \$12.9 million will fully fund Tribal Grant Support Costs which, similar to Contract Support Costs, assists tribes that run their own schools by covering the costs of administering programs. The Education Program Enhancement program is increased by \$10.0 million to encourage creative solutions for school transformations. Requested facility maintenance and operations increases totaling \$20.0 million will provide essential preventive and routine maintenance and operating expenses so schools are operated in a safe and educationally conducive manner. The 2016 budget also includes a \$34.2 million increase for education information technology to enhance broadband and digital access for students at BIE-funded schools.

The budget requests a \$58.7 million increase for Education Construction to support the education transformation. This includes a \$25.3 million increase for replacement school construction to complete construction of the final two schools on the 2004 replacement school construction priority list: Little Singer Community School and Cove Day School, both in Arizona. A \$17.7 million increase for facilities improvement and repair is requested for repairs to building structures and components necessary to sustain and prolong the useful life of education buildings. Additionally, the budget includes \$11.9 million to address major facility replacement needs at schools like the Bug-O-Nay-Ge-Shig school on the Leech Lake Band of the Ojibwe reservation. Lastly, an increase of \$3.7 million is requested for employee housing repair which will complement a new \$10.0 million set-aside proposed in the Department of Housing and Urban Development to address teacher housing needs.

The 2016 budget also includes increases totaling \$7.4 million to meet educational needs beyond the BIE elementary and secondary system. To further higher education, a \$4.6 million increase is requested for scholarship and adult education and a \$250,000 increase is requested for Special Higher Education Scholarships. The 2016 budget includes a \$2.6 million increase for the Johnson O'Malley program to provide American Indian and Alaska Native students attending public schools with additional resources to meet their unique and specialized educational needs.

The 2016 budget strongly supports the sustainable stewardship of trust lands, natural resources, and the environment in Indian Country. The budget includes program increases totaling \$63.2 million for the trust natural resources and real estate services programs. The budget provides a total of \$50.4 million, a \$40.4 million increase over 2015, proposed across nine natural resource programs, to support tribal communities in sustainable resource management and in preparing and responding to the impacts of climate change, such as drought, wildfires, changes in the plants and animals important to subsistence and culture, rights protection, coastal erosion, and sea level rise.

The budget includes a total increase of \$16.2 million for trust real estate service activities to reinforce the stewardship of trust resources. The expanded capacity will address the probate backlog, land title and records processing, geospatial support needs, and database management in addition to providing expanded technical and legal support for authorized settlements involving tribal water rights. The BIA increases for water rights settlements represent a subset of increases totaling \$73.0 million across the Department to support resolving tribal water rights claims and ensuring that tribes have access to use and manage water to meet domestic, economic, cultural, and ecological needs.

Collectively, the 2016 budget proposes a total of \$982.7 million in Tribal Priority Allocations, an increase of \$56.2 million over the 2015 level.

The 2016 budget request for Indian Land and Water Claim Settlements is \$67.7 million, a \$32.0 million increase over the 2015 enacted level. Several funding increases demonstrate the administration's strong commitment to resolve tribal water rights claims to ensure tribes have access to use and manage water. Funding for the Taos Pueblos Indian Water Rights Settlement is increased by \$13.8 million over 2015 for a total funding request of \$29.2 million. This funding amount will constitute the final payment of the Taos Pueblo settlement. The Navajo-Gallup Water Supply project is increased by \$8.8 million to meet projected 2016 funding needs. The budget proposes a \$9.4 million increase for the second year of funding for the Aamodt Settlement enacted as part of the Claims Resolution Act of 2010. The budget also contains increases of \$14.1 million to provide expanded technical and legal support for tribal water rights settlement negotiations and implementation.

The 2016 budget for the Indian Guaranteed Loan Program is \$7.7 million, equivalent to the 2015 enacted level. This will provide \$113.8 million in loan guarantee authority to support Indian economic development.

*Departmental Offices and Department-wide Programs.*—The 2016 request for the Office of the Secretary is \$327.9 million, an increase of \$62.7 million from the 2015 enacted level. The budget reflects an increase of \$50.0 million for Coastal Resilience grants. The Coastal Resilience competitive grants will support the restoration and conservation of key ecological systems that protect communities and infrastructure from the impacts of coastal storms. In collaboration with State, local, and tribal governments, non-governmental organizations, universities, and other stakeholders, the program's goals are to mitigate the impacts of climate change on coastal and inland communities from storm wave velocity, salt water intrusion, erosion, flooding, sea level rise, and associated natural threats; and to strengthen the ecological integrity and functionality of coastal and inland ecosystems to protect communities and enhance the ability of Federal lands to support important recreational, wildlife, and cultural values. The program will also enhance understanding of the impacts of extreme weather events, the benefits of nature based infrastructure and ecosystem services, and identify cost-effective tools that help mitigate and support community resilience with future events. Such information, tools, and investments are of particular interest to vulnerable communities in Arctic Alaska, where villages are suffering the full impact of rapidly accelerating erosion rates and flooding due to loss of protective sea ice and degraded permafrost. As buildings are being claimed by the sea and critical infrastructure is threatened, representatives from Arctic villages and communities in coastal Alaska have repeatedly appealed for this type of support.

The budget proposes an increase of \$1.5 million for work with the National Invasive Species Council to develop an Early Detection Rapid Response framework in support of climate resilience efforts. Invasive species pose one of the greatest threats to the ecological, economic and cultural integrity of America's landscapes. Detecting invasive species early and rapidly responding to control their spread is one of the most cost effective strategies to mitigate their threat. The additional funding will support planning efforts for a coordinated invasive species early detection and rapid response framework with other Federal agencies, States, tribes and other partners. The funds also will be used to implement commitments identified in the Department's Invasive Species Action Plan, the National Invasive Species Council work plan, and the White House Priority Agenda—Enhancing the Climate Resilience of America's Resources report. As with coastal resilience support, Governors and tribal leaders from across the country have appealed for coordination and support for early detection and rapid response efforts, and this was of particular interest to a task force of State, local, and tribal leaders eager to build resilience for their communities and lands.

The budget proposes a \$5.9 million and 18 FTE increase to support the Office of Natural Resources Revenue's Osage Tribal accounting activities, to expand ONRR's Geospatial Information Systems capabilities, and to expand on-shore production verification and data integration efforts. The budget for the Office of the Secretary

also includes \$3.0 million for the development of a Digital Service team, which will be responsible for driving the efficiency and effectiveness of the Department's highest-impact digital services.

The budget request for the Office of Insular Affairs is \$103.0 million, an increase of \$13.7 million from the 2015 enacted level excluding the Palau Compact Extension funding of \$13.1 million. Within this amount, a program increase of \$10.4 million is requested in Office of Insular Affairs and General Technical Assistance to increase the grant management staff to improve oversight, and address needs in the insular areas related to sea level rise by supporting development of infrastructure and community resilience initiatives. The Maintenance Assistance Fund request includes a program increase of \$3.9 million to improve health and safety conditions in insular school facilities. The budget also requests a program increase of \$1.5 million in Empowering Insular Communities to implement energy projects identified by the territories in their comprehensive sustainable energy strategies. Brown Treesnake Control is funded at \$3.0 million, a program decrease of \$500,000, which reflects completion of an automated aerial bait system in 2015. The budget requests \$1.3 million for Compact Impact, a program decrease of \$1.7 million from 2015. This funding is supplemented by \$30.0 million annually in mandatory Compact Impact funding. The budget includes a mandatory proposal to fund the Palau Compact, as a result it does not include stopgap discretionary funding of \$13.1 million provided in the 2015 appropriations process.

The Solicitor's 2016 budget is \$69.9 million, \$4.1 million above the 2015 enacted level. Maintaining sufficient attorney resources to handle filed litigation, avoid potential litigation, and provide timely counseling is critical to ensuring that litigation risks are minimized. Front-end counseling is critical to realizing cost savings by either preventing litigation or narrowing the issues that might be challenged in litigation. The increase for legal services will allow for the continuation of existing services with sufficient resources to provide the Secretary and the Department the necessary legal services for the advancement of priority goals and other mission areas.

The Office of Inspector General request is \$52.2 million, an increase of \$1.8 million compared to the 2015 enacted level. The 2016 budget includes \$423,000 in funding to support the Council of the Inspectors General on Integrity and Efficiency. The Inspector General estimates staffing will equal 286 full time equivalents in 2016.

The Office of the Special Trustee request is \$143.0 million, \$3.9 million above the 2015 enacted level. The budget includes an increase of \$2.8 million in Program Operations and Support. A \$1.6 million increase is requested in field operations to provide additional estate planning opportunities to Indian Trust beneficiaries. This will help stem the growth of both land fractionation in Indian Country and the number of Trust beneficiary estates that require probate. A \$1.2 million increase is requested in appraisal services for an appraiser training program to address the shortage of qualified appraisers and the resulting delays in completing appraisal evaluations. Lastly, a \$1.0 million increase is requested in trust records to expand the records training program at Haskell Indian Nations University, create new records training programs at two additional tribal colleges, and fund the increased requirements related to the Department's email Enterprise Records and Document Management System initiative. The budget also includes a \$972,000 reduction in funding for Office of Historical Trust Accounting based on anticipated workload levels.

The 2016 request for the Department-wide Wildland Fire Management program is \$805.5 million without the proposed fire cap adjustment, and \$1.05 billion including the adjustment. The request includes \$268.6 million for fire suppression within the base budget, which is 70 percent of the 10 year suppression average spending. The cap adjustment of \$200.0 million would only be used for the most severe fires, since it is 1 percent of the fires that cause 30 percent of the costs. The new budget framework for Wildland Fire Management eliminates the need for additional funds through the FLAME Act.

The 2016 budget requests \$30.0 million in a new Resilient Landscapes subactivity to build on resilient landscapes activities supported by Congress in 2015. Congress provided \$10.0 million for resilient landscapes activities in the 2015 Omnibus Appropriations Act by designating that amount within Fuels Management. While fuels treatments and resilient landscapes activities are complementary and synergistic, they also have distinct differences, including the methodology for prioritizing place-based projects and a leveraged funding requirement for resilient landscapes. Establishing a separate subactivity for Resilient Landscapes will assist the Department and Wildland Fire Management bureaus in tracking funds obligated and program accomplishments. The \$20.0 million increase in funding will enable the Wildland Fire Management program to take better advantage of the shared goals of bureau resource management programs to treat large landscapes to achieve and maintain

fire-adapted ecosystems that both reduce the threat of catastrophic wildfire and achieve restoration and other ecological objectives. The increase for Resilient Landscapes is partially offset with a program realignment of \$17.7 million in the Fuels Management program from 2015; total funds for the combined Fuels Management and Resilient Landscapes subactivities are \$14.3 million above 2015.

The 2016 request for the Natural Resource Damage Assessment and Restoration program is \$9.2 million, an increase of \$1.5 million over the 2015 enacted level. The budget includes program increases of \$1.5 million for Restoration Support, \$233,000 for Program Management, \$100,000 for Inland Oil Spill Preparedness, and a program reduction of \$448,000 for Damage Assessment reflecting a reallocation of funding to increase restoration activities.

The budget includes \$10.0 million for the Central Hazardous Materials Fund, equal to the 2015 enacted level.

The Department's 2015 request for the Working Capital Fund appropriation is \$74.5 million, an increase of \$17.4 million from the 2015 enacted level. Within this request is \$53.9 million for the operation and maintenance of the Financial and Business Management System, an increase of \$1.0 million to continue support of the Department's Cultural and Scientific Collections initiative, an increase of \$702,000 for the Department's Service First initiative, and an increase of \$5.2 million to support Interior's Office Consolidation strategy. The budget also includes an increase of \$10.5 million to support Interior's multi-year effort to implement requirements identified under the Digital Accountability and Transparency Act, known as the DATA Act, and monitor compliance.

#### LEGISLATIVE PROPOSALS

The 2016 President's budget includes a suite of legislative and offsetting collection proposals affecting spending, revenues, and available budget authority that require action by the congressional authorizing committees. These proposals address a range of administration priorities, from investing in high-priority conservation and recreation programs to achieving a fair return to the American taxpayer from the sale of Federal resources and reducing unnecessary spending. The 2016 budget includes seven spending proposals with \$15.2 billion in estimated outlays over the next decade. This spending is partially offset by revenue and savings proposals estimated to reduce outlays from the Treasury by more than \$5.6 billion over the next decade.

*Bureau of Indian Affairs Contract Support Costs.*—The budget includes a legislative proposal to reclassify the existing Contract Support Costs program from current to mandatory funding beginning in fiscal year 2017. Congress requested that both BIA and the Indian Health Service consult with tribes to develop a long-term approach to funding Contract Support Costs. The leading tribal recommendation was to provide funding for contract support costs as a mandatory appropriation. Beginning the reclassification in 2017 will allow time for tribal consultation in 2016 on operational details. The budget proposes to adjust the discretionary budget caps to reflect the reclassification. The estimate for projected BIA program growth, above the discretionary cap amount, totals \$105.0 million for 2017–2019 and will be treated as a Statutory Pay-As-You-Go Act of 2010 cost for the authorizing legislation. New contract support cost legislative proposals and offsetting collections estimates will be provided on a 3-year cycle as part of the reauthorization process.

*Coal Abandoned Mine Lands Reform.*—As part of the administration's POWER+ Plan, the budget proposes to accelerate payments from a portion of the remaining unappropriated balance of the AML Fund to target the cleanup and redevelopment of AML sites and AML coal mine polluted waters in a manner that facilitates sustainable revitalization in economically depressed coalfield communities. The proposal will provide \$1.0 billion over 5 years to States based on AML program and economic eligibility factors—such as the unemployment rate of coal mining regions—and remaining priority coal problems, including abandoned mine drainage, where reclamation linked to job creating economic development strategies will help revitalize impacted communities.

*Gulf of Mexico Energy Security Act.*—The Gulf of Mexico Energy Security Act of 2006 opened some additional areas in the Gulf of Mexico for offshore oil and gas leasing, while maintaining moratoria on activities east of the Military Mission Line and within certain distances from the coastline of Florida. The Act provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to just four coastal States—Alabama, Louisiana, Mississippi, and Texas—and their local governments based on a complex allocation formula. Under the administration's all-of-the-above energy strategy, domestic energy production has grown each year. Offshore, the Department has made 60 million acres available for development

in the past three lease sales alone. The administration is committed to ensuring American taxpayers receive a fair return from the sale of public resources and taxpayers throughout the Country benefit from the development of offshore energy resources owned by all Americans. The administration proposes to work with the Congress on legislation to redirect funds currently allocated to GOMESA revenue-sharing payments to just four States from Gulf of Mexico oil and gas leases. The administration proposes to redirect these payments, which are set to expand substantially starting in 2018, to programs that provide broad natural resource, watershed and conservation benefits to the Nation, help the Federal Government fulfill its role of being a good neighbor to local communities, and support other national priorities. Such programs could include the Land and Water Conservation Fund, Payments in Lieu of Taxes, State and Tribal Wildlife Grants, Federal coastal restoration and resilience programs, and other national priorities.

*United Mineworkers of America Health and Pension Reform.*—The budget proposes to better provide for retired coal miners and their families by revising the formula for general fund payments to the 1993 UMWA Health Benefit Plan. The new formula will consider all beneficiaries enrolled in the plan as of enactment, as well as those retirees whose health benefits were denied or reduced as the result of a bituminous coal industry bankruptcy proceeding commenced in 2012. Additionally, the proposal will transfer funds through the Pension Benefit Guaranty Corporation to the trustees of the 1974 UMWA Pension Plan to ensure the plan's longterm solvency. The plan, which covers more than 100,000 mineworkers, is underfunded and approaching insolvency. The new formula will provide an additional \$363.0 million to the UMWA in 2016 and \$3.9 billion over 10 years.

*Land and Water Conservation Fund.*—The budget proposes \$900.0 million in current and mandatory funding in 2016, and starting in 2017, the budget proposes permanent authorization of \$900.0 million in mandatory funding for LWCF programs in the Departments of the Interior and Agriculture. During a transition to mandatory funding in 2016, the budget proposes \$500.0 million for mandatory funding and \$400.0 million for current funding, to be shared by Interior and Agriculture.

*National Parks and Public Lands Centennial.*—The Centennial initiative proposes \$500.0 million a year for 3 years or \$1.5 billion in mandatory funding beginning in 2016 for the following programs: \$100.0 million a year for a National Park Service Centennial Challenge to leverage private donations; \$300.0 million a year for addressing NPS deferred maintenance backlogs; and \$100.0 million a year for a Public Lands Centennial Fund, which will competitively allocate funds for projects on public lands. Interior's public lands bureaus and Agriculture's Forest Service will identify projects that enhance visitor services and outdoor recreation opportunities, restore lands, repair facilities, and increase energy and water efficiency. The availability of mandatory funding to address deferred maintenance and other conservation projects will allow these agencies to plan ahead more efficiently to achieve significant results. Stable and predictable funding streams will allow projects to be appropriately scheduled and phased for effective project delivery and completion from a capital investment standpoint.

*Federal Land Transaction Facilitation Act.*—The Department proposes to reauthorize this Act that expired on July 25, 2011 to allow Federal lands identified as suitable for disposal in recent land use plans to be sold using this authority. The sales revenues would continue to fund the acquisition of environmentally sensitive lands and administrative costs associated with conducting the sales.

*Recreation Fee Program.*—The Department of the Interior proposes to permanently authorize the Federal Lands Recreation Enhancement Act, which will expire September 30, 2016. The program currently brings in an estimated \$281 million in recreation fees annually under this authority and uses them to enhance the visitor experience at Interior facilities. In addition, as a short-term alternative to proposed legislation for long-term reauthorization, the budget proposes to extend authorization through September 30, 2017.

*Federal Oil and Gas Reforms.*—The budget includes a package of legislative reforms to bolster and backstop administrative actions being taken to reform the management of Interior's onshore and offshore oil and gas programs, with a key focus on improving the return to taxpayers from the sale of these Federal resources. Proposed statutory and administrative changes fall into three general categories: (1) advancing royalty reforms, (2) encouraging diligent development of oil and gas leases, and (3) improving revenue collection processes. Collectively, these reforms will generate roughly \$2.5 billion in net revenue to the Treasury over 10 years, of which about \$1.7 billion would result from statutory changes. Many States will also benefit from higher Federal revenue sharing payments.

*Palau Compact.*—On September 3, 2010, the U.S. and the Republic of Palau successfully concluded the review of the Compact of Free Association and signed a 15-year agreement that includes a package of assistance through 2024. The 2016 budget assumes authorization of mandatory funding for the Compact occurs in 2015. The cost for this proposal is estimated at \$163 million for 2016 through 2024.

*Payments in Lieu of Taxes.*—The Consolidated and Further Continuing Appropriations Act of 2015 provides \$372.0 million in current funding and the National Defense Authorization Act for fiscal year 2015 provides mandatory funding of \$33.0 million in 2015 and \$37.0 million in 2016. The 2016 budget proposes to extend authorization of the program an additional year while a sustainable long-term funding solution is developed for the PILT Program. The PILT payments help local governments carry out vital services, such as firefighting and police protection, construction of public schools and roads, and search and rescue operations. The cost of a 1 year extension is estimated to be \$452.0 million in 2016.

*Reclamation of Abandoned Hardrock Mines.*—To address the legacy of abandoned hardrock mines across the U.S. and hold the hardrock mining industry accountable for past mining practices, the Department will propose legislation to create a parallel Abandoned Mine Lands Program for abandoned hardrock sites. A new AML fee on hardrock production on both public and private lands would generate an estimated \$1.8 billion to reclaim the highest priority hardrock abandoned sites on Federal, State, tribal, and private lands.

*Reform Hardrock Mining on Federal Lands.*—Interior will submit a legislative proposal to provide a fair return to the taxpayer from hardrock production on Federal lands. The legislative proposal will institute a leasing program under the Mineral Leasing Act of 1920 for certain hardrock minerals including gold, silver, lead, zinc, copper, uranium, and molybdenum, currently covered by the General Mining Law of 1872. The proposal is projected to generate net revenues to the U.S. Treasury of \$80 million over 10 years, with larger revenues estimated in following years.

*Return Coal Abandoned Mine Land Reclamation Fees to Historic Levels.*—The budget proposes legislation to modify the 2006 amendments to the Surface Mining Control and Reclamation Act, which lowered the per-ton coal fee companies pay into the AML Fund. The proposal would return the current fee of 28 cents per ton of surface mined coal to 35 cents a ton, the same level companies paid prior to the 2006 fee reduction. The additional revenue, estimated at \$306 million over 10 years, will be used to reclaim high priority abandoned coal mines and reduce a portion of the estimated \$4.0 billion needed to address remaining dangerous coal AML sites nationwide.

*Termination of AML Payments to Certified States.*—The budget proposes to discontinue unrestricted payments to States and tribes certified for completing their coal reclamation work. This proposal terminates all such payments, with estimated savings of approximately \$224 million over the next 10 years.

*Termination of Geothermal Energy Payments to Counties.*—The Department proposes to repeal Section 224(b) of the Energy Policy Act of 2005 to permanently discontinue payments to counties and restore the disposition of Federal geothermal leasing revenues to the historical formula of 50 percent to the States and 50 percent to the Treasury. This results in estimated savings of \$4.0 million in 2016 and \$47.0 million over 10 years.

*Bureau of Land Management Foundation.*—The budget proposes legislation to establish a congressionally chartered National BLM Foundation. This Foundation will provide an opportunity to leverage private funding to support public lands, achieve shared outcomes, and focus public support on the BLM mission.

*Migratory Bird Hunting and Conservation Stamp Act.*—The passage of the Federal Duck Stamp Act of 2014 raised the price of a Duck Stamp for the first time in more than 20 years. To provide greater stability in the future, the budget includes a legislative proposal to provide the Secretary limited authority to increase the price of a Duck Stamp, with the approval of the Migratory Bird Conservation Commission, to keep pace with inflation.

#### OFFSETTING COLLECTIONS AND FEES

The budget includes the following proposals to collect or increase various fees, so industry shares some of the cost of Federal permitting and regulatory oversight. The budget also includes a proposal to recover costs from anyone who damages a national wildlife refuge.

*New Fee for Onshore Oil and Gas Inspections.*—Through appropriations language, the Department proposes to implement inspection fees in 2016 for onshore oil and gas activities subject to inspection by BLM. The proposed inspection fees are expected to generate \$48.0 million in 2016, \$6.9 million more than the 2015 enacted

program funding level, thereby expanding the capacity of BLM's oil and gas inspection program. The fees are similar to those already in place for offshore operations and will support Federal efforts to increase production accountability, human safety, and environmental protection.

*Grazing Administrative Fee.*—The 2016 budget proposes a new grazing administrative fee of \$2.50 per animal unit month. The BLM proposes to implement this fee through appropriations language on a pilot basis. The provision will generate an estimated \$16.5 million in 2016, more than offsetting a decrease of \$3.1 million in appropriated funds in the Rangeland Management program. The net increase of \$13.4 million in funding will assist BLM in processing backlogged grazing permits. During the period of the pilot, BLM will work to promulgate regulations to continue this cost recovery fee administratively, once the pilot expires.

*National Wildlife Refuge Damage Cost Recovery.*—The budget proposes appropriations language to authorize the Fish and Wildlife Service to pursue and retain recoveries from responsible parties, to be used to restore or replace damaged National Wildlife Refuge resources.

#### CONCLUSION

Thank you for the opportunity to testify on the President's 2016 budget request for the Department of the Interior. This budget is responsible, and proposes to maintain core capabilities with targeted investments to advance the stewardship of lands and resources, renewable energy, oil and gas development and reforms, water conservation, youth employment and engagement, and improvements in the quality of life in Indian communities. I thank you again for your continued support of the Department's mission. I look forward to answering questions about this budget. This concludes my written statement.

Senator MURKOWSKI. Thank you, Madam Secretary. I assume, Deputy Secretary Connor, you are available as we probe into the intricacies of the budget here, so appreciate your being here as well.

#### ARCTIC NATIONAL WILDLIFE REFUGE

Secretary, I have a number of questions that are related to this revised comprehensive conservation plan, and then the final EIS for the ANWR area, the Arctic National Wildlife Region.

More questions that we have time for here in this committee, so I am going to be asking a number of these questions about the plan and the FEIS for the record. I will be inquiring about when they were initiated, how, who worked on them.

I think it is important that folks understand how this plan came to be and the thinking behind it. I would just ask for your cooperation and that of the Department in receiving thorough, complete and prompt answers to these areas of inquiry.

#### KIVALINA, ALASKA

You mentioned your visit to Kivalina a couple of weeks ago. I appreciate the fact that you not only went to see Kivalina but you met with not only our Native leadership at their winter retreat but also with the Governor, the leadership in the House and Senate, and the entire Alaska Congressional Delegation on issues that are of concern to us.

You mentioned the funding in the budget that is available to help Tribes and coastal communities, and when you were in Alaska, you mentioned there was \$8 million that could be made available by way of grants.

I visited with the folks from the Northwest Arctic Borough region just yesterday in my office, and I asked them about accessing any of these funds that were available.

They described the offers almost laughable, that in fact, half of this \$8 million in grants would not be made available to them, that when you are looking to build an evacuation route or in many cases move a community, the costs that are associated are in the realm of \$100 to \$120 million for the community of Kivalina. Of course, we know Kivalina is just one of many.

They asked me to ask you this morning what is your proposal, having seen Kivalina and the situation that community faces, what is your proposal to help address their immediate needs for an emergency evacuation route.

Secretary JEWELL. Thank you, Senator Murkowski. I, too, had an opportunity to drop in on a meeting with our friends from Northwest Alaska.

The \$8 million in the 2015 budget is intended to support Tribal programs around resilience, but was certainly never intended to relocate villages. We have, since my visit to Kivalina, already visited with OMB looking at potential areas in the budget where we might be able to move relatively quickly, not just for Kivalina but many of the other coastal communities that are threatened.

The first step is planning and understanding options, and I certainly got some very helpful insights when I was in Kivalina about the decisions the village itself is facing, and what it wants to do.

There is certainly not enough money in the 2016 budget—or in the 2015 budget to do any major changes. That would require probably subsequent legislation, but I think working along side the State, understanding what other Federal resources we can bring to bear, which we are currently investigating right now, is a good step forward to try to figure out these very difficult situations that your State faces.

Senator MURKOWSKI. I think you would probably agree that we need a full on action plan because again it is not just Kivalina we are talking about. As our Governor has reminded you, we have a \$3.5 billion hole in our budget. The price of oil not looking like it is going to increase in the near term and production only going down, that is a concern for us, how we deal with that.

#### SHELL DRILLING IN CHUKCHI SEA

Let me speak just a moment here to the situation with Shell and their plans to drill in the Chukchi this summer for the first time since 2012. This is good news for us, particularly at a time that the price of oil is causing companies to really scrutinize their investment decisions on very large scale projects.

It makes it all the more important that Shell have the certainty that it needs before it proceeds to spend even yet more billions of dollars. It needs to retain its existing lease portfolio to warrant this enormous investment.

The difficulty, and I think you know this, is that Shell's leases were issued back in 2008. They are all scheduled to expire in 2020. Because of this very short window, a 75 day Arctic drilling season, and the difficulties, the delays, and legal challenges that are all out there, that Shell has endured for the past decade, there really are not enough drilling seasons remaining for Shell to complete more than a handful of exploration wells before the Chukchi lease portfolio expires.

The question to you—they have requested a suspension of operations and the application that Shell has presented has explained this suspension is warranted because of these delays, because of the challenging environment they operate in, and they are waiting for a little bit of certainty here.

I am told that in the Gulf, suspensions of operations are handled pretty routinely, pretty perfunctorily. They take a few months for a response. I understand absolutely that we have different issues in the Arctic. I appreciate that, but it has been 8 months now. The question is whether or not you can give me some certainty as to when Shell will receive an answer in response to its suspension of operations request.

Secretary JEWELL. Senator, we are actively working with Shell and other leaseholders up there on their requests for suspensions. Our team has been working very, very hard to address the supplemental EIS that was required of us by the courts to support Shell's activities potentially this summer.

The team focused on that, and the leases were suspended during the time that the court order was in place. As we have now released draft standards for the Arctic, and those are going through public review, we are continuing to work with Shell for this drilling season and the team is focusing a lot of attention on their request for suspension. We will be resolving that relatively soon. We understand the circumstances the companies have. We also understand the circumstances that Shell had in 2012. We get that it is complicated to do work up there. We want to make sure it is done safely and responsibly, and we want to be responsive to the companies.

Senator MURKOWSKI. You agree that it has taken—eight months is not a reasonable time period. Would you agree?

Secretary JEWELL. I do not know what a reasonable time period is honestly. It is very complicated up there. I do know we took our resources and focused them as we were requested to do on helping Shell move forward for this drilling season.

I also know we are actively working with them on suspensions, and I think they can expect an answer in the relatively near future.

Senator MURKOWSKI. I think you also would agree as a business person and one who looks longer term that it is difficult for any company to make the kinds of investment, the sizable investment that Shell will, without certainty as to whether or not you are going to have these leases.

I would appreciate it and I think not only Shell but others who are looking to advance operations in the offshore would appreciate some expediency on these requests for suspensions.

I will go to my ranking member.

#### NATIONAL PARK SERVICE CENTENNIAL

Senator UDALL. Thank you, Chairwoman Murkowski. Secretary Jewell, I was pleased to see that your budget request includes a 17 percent increase for the National Park Service to prepare for the Centennial, and I am especially proud that Congress, as you know, in the last Congress, authorized two new national parks in my State of New Mexico through the Defense Authorization Act. That is the Manhattan Project National Historical Park and the Valles

Caldera National Preserve, which was transferred to the Park Service.

#### VALLES CALDERA

First, I would like to ask about Valles Caldera. This Preserve is an incredible natural and cultural resource, and I was honored to work with other members of the New Mexico Delegation to get this done. We fought for this legislation to ensure this special place receives the resources that it needs.

That is why I am concerned that the Park Service budget request proposes reducing funding for the Preserve to \$2.8 million. That amount is a 17 percent cut below the level requested last year.

Secretary Jewell, this cut just does not make sense, especially in the face of other program increases you include in your budget for the National Park Service. Will you commit to working with me to ensure that the Valles Caldera receives the funding it needs to operate successfully in fiscal year 2016 and beyond?

Secretary JEWELL. Thanks, Senator. There is, as you point out, a shortfall from what the Forest Service was funding and what is in our budget. We are actively working with the Forest Service right now for additional funds that were lost in the shuffle on the budget, and certainly, we will continue to work with you on this over the course of the year.

Senator UDALL. Great. Thank you. We have discussed this and we will also work closely with the Forest Service and the Forest Service Chief on this.

#### PERMIT PROCESSING IMPROVEMENT FUND

As you know, I support responsible energy development on public lands as part of a “do it all, do it right” approach to energy policy. I was proud to sponsor legislation included in the National Defense Authorization Act enacted in December to improve permit processing for BLM oil and gas leases, providing certainty for industry and it aligned the fee with the actual cost to the BLM for processing applications for permits to drill.

Can you tell me where you are with fully implementing the Permit Processing Improvement Act, and share with us how the new resources provided through the bill will improve your ability to responsibly manage energy development. And then, are there aspects of the 2016 budget request that you need us to focus on to implement the improvements we made through the bill?

Secretary JEWELL. Thank you very much, Senator, for your support of increasing the APD, or application for permits to drill for the BLM to \$9,500. There was 15 percent of that that was taken away for other programs, so we have put in our budget to make up for that \$7.1 million in the discretionary request, so we do have the full money available for permitting.

That will help us on the permitting side, but it is not enough in and of itself to do the job that we are expected to do. We have requested in the budget the ability to learn a lesson from the offshore industry, and that is to charge a modest fee for onshore oil and gas producers to cover our costs for inspection and enforcement.

We have been criticized by the Government Accountability Office and our own Inspector General for not inspecting the wells that we

have. We are overseeing over 100,000 wells on public lands. We do not have the resources to inspect those wells. That is a challenge from a return to the taxpayer perspective, as well as ensuring there is no environmental damage.

We do request in the budget a couple of other things to make our program better. In addition to what you have done in terms of fees for the authorizations for permits to drill, we would very much appreciate fees to cover inspections, particularly for production and a fair return for taxpayers, and also there are funding requests to automate our system.

As I have gone out to Carlsbad, New Mexico, North Dakota, other States, we have a very paper oriented system, and as a business person, I know it costs money up front to put in investments for automating and streamlining that program, and there is money in this budget to do that, which will help us respond more quickly to oil and gas companies for the permits they want.

We have also brought the permitting time down because of a lot of hard work and streamlining and piloting. We want to take and roll some of those lessons out, and that is also in this budget.

#### PAYMENTS IN LIEU OF TAXES

Senator UDALL. We look forward to working with you on that. Quick question on Payments in Lieu of Taxes (PILT). As you know, this is very important to many of the counties in our Western States, and there are many members on this committee that have spoken with me a number of times about PILT.

Can we count on you to make mandatory extension of PILT a personal priority, and what is the Department doing to work with the relevant congressional committees to pass a long term mandatory extension for the PILT Program?

Secretary JEWELL. We understand how critically important PILT is to many, many rural counties across the country, particularly in the West. Yes, we are committed to working along side members on introducing legislation to make it mandatory.

I think to have it as uncertain as it is for the counties is very frustrating for them. There are real costs associated with the inability for rural counties to tap into a tax base on public lands, so we are supportive and look forward to working with you on that.

Senator UDALL. Thank you very much. Thanks, Madam Chairwoman.

Senator MURKOWSKI. Senator Daines.

#### SAGE-GROUSE

Senator DAINES. Thanks, Madam Chairman. Secretary Jewell, good to see you again here today. I would like to follow up on an item that we discussed last week at the Energy and Natural Resources Committee hearing, and I would mention the importance of incorporating Montana State's plan into the BLM's sage-grouse conservation efforts.

I would like to know what is the status of finalizing the BLM's RMPs as it pertains to sage-grouse conservation?

Secretary JEWELL. Thanks for the question. To say the work going on on sage-grouse with States is unprecedented is an understatement. A phenomenal amount of effort on the part of States,

the BLM, U.S. Fish and Wildlife Service, and parts of USDA, to really orchestrate an understanding of these ecosystems in a way such that we hope a listing will not be warranted.

The BLM plans are in place and being finalized right now. The State plans are in different stages but also are being finalized. There has been very close cooperation between States, the BLM, and the Fish and Wildlife Service throughout this process.

You will see the BLM plans finalized this spring, and State plans are in different stages depending on which State.

Senator DAINES. Again, we have a couple of Senators here from Montana that will be curious about that plan. Will these plans mirror the stipulations in the Montana State plan?

Secretary JEWELL. I have not looked at the details of the Montana State plan relative to the BLM plans. I do know there has been close cooperation between the State and the BLM as these have been developed. I would not expect there to be radical differences as we have talked about with the checkerboarding, but that is something I will look into.

Senator DAINES. With the checkerboard nature of some of our lands in Montana, those sage-grouse do not know whether they are on a BLM section or State section or private section.

Secretary JEWELL. I understand.

Senator DAINES. We would just like to have the State have primacy there to get that all aligned on one plan that would reflect a lot of work going on back in Montana for the folks who are closest to the bird, and we all want to ensure we protect the sage-grouse and prevent the listing.

Secretary JEWELL. I understand.

#### LAND AND WATER CONSERVATION FUND

Senator DAINES. I would like to move over to LWCF. I want to thank you for recognizing the importance of LWCF to Montana in your budget. As a sportsman, someone that represents the men and women who enjoy the outdoors in Montana, it is very important back home.

In a State like Montana, we have a lot of public lands, about a third of our State. Are you aware of the number of acres of Federal land in Montana and frankly across the West that are inaccessible to the public?

Secretary JEWELL. A major part of our effort with LWCF is addressing that. There are private land holdings that sometimes prevent people from getting to the public lands, which are very, very important for sportsmen/women and anglers. There is actually a proposal in our budget to identify a portion of the LWCF money specifically for access, and I would say when we have an opportunity to use conservation easements for access as opposed to acquisitions, that could help make our money go farther.

We are definitely planning to do more of that, and it certainly is a big factor within your State.

Senator DAINES. Do you have a sense of what portion of the budget you might propose to be used for increasing access to both Federal and State lands? We have about two million acres in Montana right now that are inaccessible to the public.

Secretary JEWELL. I want to say \$8.5 million in discretionary funding specifically for access, and then there is another chunk in the mandatory proposal specifically earmarked for that.

Senator DAINES. All right. I think we all agree the LWCF is one of the important tools we have to increase access to public lands.

Secretary JEWELL. Absolutely.

Senator DAINES. Great. Thank you. By the way, I am glad to see some of the Montana projects on the list here this morning. We have the Trumbull Creek Watershed, we have a couple of projects at Beaverhead-Deerlodge. We look forward to working with you on that, Secretary Jewell.

#### COAL

Last, I would like to talk a little bit about coal. I want to thank you for accommodating the request from the State of Montana, from the Montana Delegation, Senator Tester and myself, to extend the comment period for the new coal valuation rule that was issued on January 6, 2015.

Last week in the Senate Energy and Natural Resources Committee in reference to the new coal valuation rule, you stated that the proposed rule will “Streamline and make the process more efficient, providing more certainty on the return which we will be getting for the American people.”

I would like to perhaps better understand the basis of that assertion. I am hearing from stakeholders back in Montana that the rule contains ambiguities, uncertainties, which actually act as a disincentive to mine coal.

We are concerned with less coal produced. That is going to reduce royalty payments, reduce the taxes that coal companies pay, and it is going to add to the Federal deficit.

Secretary JEWELL. Thank you, Senator. The coal rules are a proposal. That is part of the benefit of the comment period, to hear comments for how people believe it is going to impact them.

We have been criticized from a number of different sectors for not getting a fair return for taxpayers on coal. When what we have been doing is criticized and ends up in court, that slows things down dramatically.

We are trying to put in place rules that identify a fair value for taxpayers that we believe will clear this up, but we welcome comments during the comment period on these coal rules, and if people feel there is a concern, we welcome comments on how to make that more streamlined.

Senator DAINES. Have you calculated the impact to coal production based on the ONRR rule, what that might be?

Secretary JEWELL. I have not personally. I am not sure if my team has. Mike, do you know?

Mr. CONNOR. I do not know.

Senator DAINES. As a follow up there, if we could take a look at what impact that is going to have in declining coal production, or is it going to increase it or decrease it. I would like to get a sense from the Department of the Interior of where you see that is headed.

Secretary JEWELL. If I can answer quickly, I know we are out of time. I will say that the regulations are only one part of an equation on whether or not a company chooses to go through that.

There are economics, global economics really at play. I am not sure how much we are going to be able to isolate as associated with our rule as opposed to the broader issues of a commodity, how it is priced, and what that does to the overall economics.

Senator DAINES. Thanks.

Senator MURKOWSKI. Senator Reed.

#### BLACKSTONE VALLEY NATIONAL PARK

Senator REED. Thank you, Madam Chairwoman. First, let me thank you for your extraordinary collaboration over several years. You did a superb job. I know you are going to do a superb job as chair of this committee.

You have a great partner in Senator Udall. In fact, much better than myself, I must admit. You did okay with me so you are going to do great with Tom.

Madam Secretary, thank you for your service, and Deputy Secretary Connor, thank you also. Let me start with an issue that is close to home, and that is the Blackstone Valley National Park. We are so pleased it was authorized last Congress. I understand there is about \$927,000 in the budget to start the process.

Could you tell us what you want to achieve, Madam Secretary, initially in terms of preparation and planning for the Park?

Secretary JEWELL. First, I want to say thank you very much for your advocacy of this special place. To say it was fun to kayak the river with you would be an understatement. It certainly opened my eyes into the history of our rivers and the history of the industrialization of the United States and how important that river corridor is.

The \$927,000 that is in the budget for park operations will really be around planning, understanding what the boundaries should be, understanding land ownership, what the priorities might be for the State and for the Federal Government with regards to filling out that over time.

We know there is an important historic story to be told there, and this money will help us plan for the future.

#### COASTAL RESILIENCE

Senator REED. Thank you very much, Madam Secretary. There is another issue, coastal resilience. We caught the tail end of Sandy, thank goodness, but it was still pretty devastating. With help, particularly help from the Department of the Interior, Sachuest is one of our national wildlife, and you were able to help us rebuild the road. Literally, it was cut off. It could not be used.

We still have a lot to do. I understand you have a \$50 million program that is going to talk about coastal resilience. Let me tell you, from someone in a coastal State, we had a great trauma with Sandy, but we know it is coming again, and this time it might not veer off to the right or left, it might come barreling in and be even more destructive. Coastal resilience has to be key.

Can you just again give us an idea of what you would like to do with this resource?

Secretary JEWELL. There is \$50 million in the budget, and it is lower than I would like it to be, but we think it is a step in the right direction, learning lessons from Sandy. We had \$100 million of the \$60 billion that you provided for Sandy, \$100 million of that within the part that came to Interior was used for competitive coastal resilience grants, and it worked so well because it was highly leveraged by local communities, it created collaboration with communities.

Some of that did go to Rhode Island. Understanding the impact of dredging and what that does to coastal resilience and how we rebuild those landscapes, being in Block Island, seeing the damage, even though through the periphery of the storm, there is no question this is really important.

It is a drop in the bucket. I would hope in the future we could learn lessons from Hurricane Sandy and recognize that we are on the firing lines as I saw in Kivalina, for other reasons, but related to climate change, and invest in advance of a catastrophe as opposed to after a catastrophe.

We learned from that storm that when we prepare our coastal communities and we use things like green infrastructure, dunes, as in the case in Block Island, and wetlands, as in the case of many places up and down the East Coast, that we will protect those communities.

We would welcome your support for this or even more.

Senator REED. Two other things. One is this is a much more efficient way to spend resources because we know when these storms barrel through and just obliterate beaches and homes, we will go back in and fix them, and that is billions of dollars, where if we could take proactive steps and much less than that to make them much more resilient, less exposed to these storms, we would be better off, and the point you raised about climate activity.

Not only are we getting more volatile storms, but we all the ocean level is rising. Every day it seems like there is another story about rising oceans, and that just complicates coastal preservation and coastal survival.

#### SEQUESTRATION

Thank you, Madam Secretary. A final point. I have the opportunity to serve as the ranking member of the Armed Services Committee with Senator McCain, my chairman. We both sent a letter to the Budget Committee indicating that sequestration would be devastating to defense, but the point has to be raised, it would be devastating to every department of the Federal Government.

Just looking from the center point of defense, without Homeland Security, without FBI, without the State Department, without the CDC for Ebola, et cetera, our national security is threatened. You cannot draw a line. We have to get rid of sequestration, and to your Department, too, with sequestration, you will not be able to perform basic functions.

I think your budget, the President's budget, recognizes this, and if you will, you might elaborate, if you would.

Secretary JEWELL. Thank you very much for pointing that out. We agree on a strong defense but we also recognize that a strong national economy is also critical.

When we went past sequestration last year, when we had a reasonable budget, we saw increases in the economy. As a business person, I know that it is crazy to operate a business without having certainty of what your budget is going to be.

We have put forward investments that we are confident will help grow the economy, will provide the certainty to businesses, and will take care of the assets that will help support our economy and our national security.

We do want to move beyond sequestration. That is in the President's budget. It does reflect his priorities. We do believe in a strong defense budget and we do believe in a strong non-defense budget, which is also essential, I think, for our Nation's security and our economic prosperity.

Senator REED. Thank you.

Senator MURKOWSKI. Senator Blunt.

#### NATIONAL PARK SERVICE CENTENNIAL

Senator BLUNT. Thank you, Chairman. Secretary, congratulations on getting the opportunity to launch the second hundred years of the National Park Service. It is a great time to reflect back on what the Park Service has been and what it can be.

I know in your request for money, just to focus on this anniversary opportunity to draw attention to the Park Service, a focus I certainly do not object to, one of your thoughts is private donations as part of that.

I have three questions I want to get to here in the next five minutes and 28 seconds. I will try to get that done.

#### DONATIONS

One is in the fiscal year 2015 omnibus bill, there was language included, report language, asking the Park Service to exercise maximum flexibility in recognizing donors. I just wondered if you would want to comment on your thoughts on that as we move forward, and particularly your thoughts on that even in the \$300 million request, looking for private additions to that.

Secretary JEWELL. Thanks for the question. I think there is uniform support from the Park Service and in the language that was reflected in the NDAA to give appropriate recognition to donors. There is no question we have high potential for donor money as seen in the Jefferson National Expansion Memorial, Gateway Arch, and the City Arch River Project.

Nobody wants to brand inappropriately, but we do think recognition is important. There is \$50 million in the discretionary budget and an additional \$100 million in the mandatory recommendation to match donations, which we think will take this great interest in supporting our national parks and spur it to even greater action.

Recognition for donors is going to be an important part of that, and that is something we are committed to doing.

Senator BLUNT. I agree. The St. Louis Arch Project that you and I both are very familiar with, nobody suggested neon lights or anything like that. I think people's desire to be able to offer some recognition when they are talking to donors, it is usually a recognition of a relatively modest impact.

Secretary JEWELL. Agree.

## JEFFERSON MEMORIAL ARCH PROJECT

Senator BLUNT. I am glad you are looking at that the way you are. On that same project, Secretary, of course, the local input there to expand the Jefferson Memorial, the Arch Project, you have \$210 million in private donations, \$90 million in a new tax that the City of St. Louis put on itself for this process. The Park Service's budget is \$10 million, so \$300 million to \$10 million, clearly local people are leveraging this in a significant way, and by the way, there is also a Department of Transportation amount, \$45 million, so it is \$55 million total Federal dollars, only \$10 million Park dollars.

I just want to say that our ongoing discussions, I think, just continue to be better and better, and your team as well as you, understand if you are going to look at the second century of the Park Service in a different way, you have to truly look at it in a different way. You just cannot say we want it to be different and we want local partners, but by the way, we do not want the local partners with a 300 to 10 match to have any real say in the discussions.

I think we are getting there and I think your understanding of how important that is helps get there.

The one other question I want to ask on this, in that money, the Park Service has decided that the \$200 or so million of outside money needs to be paid to the U.S. Treasury under current law instead of putting it in a third party escrow account.

Local donors would love to see any income earned on that money go to the park itself, for maintenance and other needs. We have been talking to your staff about that. I think your staff is open to how to deal with this new idea of input of local money and how that money is used to benefit the project it goes for.

I wonder if you would just comment on your own views on that and what we can do to help you make it possible for those local funds to be truly focused on the local project.

Secretary JEWELL. I think as we enter this second century of the national parks, we are going to see more interest like you had in St. Louis of communities saying we do not want the visitor center that just the Park Service could afford on its own, we want something better, and we believe that can be good for the economy and good for our city, and that is exactly what your folks have done.

If there are things that get in the way of our ability to get private donations and use those efficiently and effectively, we could certainly work together on changing the law to update that.

The Park Service is working on a Centennial piece of legislation to clean up some of the things that get in the way of its ability to be as efficient and effective in its use of resources.

Having been to St. Louis and talked specifically about this Fund, I do not have an update on where we are, but I do know there were some legal reasons why they could not do what the community wanted, and I will see if that is something we can fix in the Centennial legislation.

Senator BLUNT. As I understand that, Chairman and members of the committee, I think the goal here would be to come up with some language legislatively, if there is no other way to do it, so that money can be invested in U.S. Treasuries or some other vehi-

cle that provides income for the project that is being donated to instead of just go into the U.S. Treasury and frankly not be used at all or invested at all, or if it is invested, to go to other purposes.

We are going to continue to work with the Park Service on that. I have a question I will submit for the record on Doe Run, which employs 1,500 people in Missouri, and how the Natural Resources Damages group and the Fish and Wildlife Service is relating to that. I will submit that for the record.

Thank you, Madam Chairman.

Senator MURKOWSKI. Thank you, Senator Blunt. Senator Merkley.

#### SECURE RURAL SCHOOLS

Senator MERKLEY. Thank you very much, Madam Chairman, and thank you, Secretary Jewell, for your testimony and your efforts to tackle so many significant issues across the country.

I wanted to start with the Secure Rural Schools Program, and thank you for framing in the budget a 5 year reauthorization with mandatory United States Forest Service funding.

I just wanted to emphasize that this is a partnership related to funds that the counties have foregone because of so many restrictions on the use of the O&C lands. There is a lot of work being done to try to work out sustainable production, environmental responsible production. That work is not yet complete. The counties are hurting greatly.

Thank you for including this, and we can count on your cooperation in pursuing this. Thank you.

#### WILDLAND FIRE

Turning to the wildfire side, which has been mentioned by a couple of my colleagues, the challenges. In Oregon, we have had an increase in the fire season of about 20 days over the last 20 years, the amount of acreage has increased. Right now we are looking at very, very low snow levels in the Cascades, which generally corresponds to much dryer forests in the summer. We may have yet another major bad fire season, if you will.

Beginning to treat fires as something that the entire Forest Service budget has not depleted in the course of fighting them, because it means we rob everything on the front end, forest health and fire prevention, so I appreciate this proposal, which says there will be a baseline funding but then when there is a terrible fire year, which we do not know yet if this year will be or not, it will be treated as emergency funding.

Can you just make a comment on why that is a logical way to go forward?

Secretary JEWELL. One percent of wildfires eat up 30 percent of suppression costs. When we have a bad year, we have to rob all our other budgets to pay for it. That means we are not doing prevention that reduces the risk of fire in the future.

There is no question that not doing prevention programs cost us more in the long run, and this is a very sensible program that says let's take the catastrophes and treat them as the catastrophes they are. Take them outside of the regular budget and put them in the

disaster budget so we can, year in and year out, manage our landscape.

Senator MERKLEY. When you rob those other budgets, does not work stop in those other key functions in the Forest Service?

Secretary JEWELL. It does.

Senator MERKLEY. That creates an enormous inefficiency and failure to pursue many of the goals that we have laid out in the budget.

Secretary JEWELL. It does. In fact, it is a downward spiral that facilitates longer, hotter, drier fires with the drought situation we have, so it just makes the situation worse.

#### KLAMATH

Senator MERKLEY. Thank you. I want to turn to the Klamath. We had a multi-year process of trying to work out an agreement between stakeholders, and those stakeholders include the fishermen, the Tribes, the ranchers, the farmers, so on and so forth.

They have set aside the decades and decades of water wars to work out a strategy, but that strategy requires us to pass a bill here to fund it, and a piece of that is for them to get back a piece of their Reservation that they lost when the Tribe was terminated in the 1950s.

There are two ways to do that, either through purchasing a commercial tract if it is available or regaining a share of the Reservation land that has now been converted into the Winema National Forest.

Can we count on your Department's support in trying to figure out whether it is Plan A or Plan B, but a successful way to address this piece of the puzzle?

Secretary JEWELL. Absolutely, you can count on our support to try to get this across the finish line. We know that the forest part of it is very important, and we are disappointed that the deal did not go through as expected.

You can count on us to work with the Tribe. You can count on us to work with the Forest Service to see if there is a solution that gets this done, because it is very, very important.

Do you want to make any other comments, Mike?

Mr. CONNOR. No.

Senator MERKLEY. Should we not succeed in doing it, it could be a catastrophe in many, many ways, for all of the stakeholders. We have had the worse ever drought in 2001 followed by the worse ever drought in 2010 and a terrible drought in 2013.

The ranching and farming community has agreed to many conservation practices that would mean the amount of water that is lost is greatly reduced. It is a win-win all the way around, and thank you.

Secretary JEWELL. Thank you.

#### SAGE-GROUSE

Senator MERKLEY. Turning to sage-grouse, my colleague from Montana has already mentioned it. This is across a number of western States. In addition to the \$15 million that has been allocated to try to develop specific strategies to enhance preservation of sage-grouse, there is additional funds, I believe, of \$4 million,

that are now in the Fish and Wildlife Service, and some additional funds for broader conservation of sage-grouse type or sage terrain, if you will.

Our whole goal in Oregon is to avoid a listing. You are coming out to Oregon shortly to draw attention to a particular valuable part of this puzzle. Could you share some comments on that?

Secretary JEWELL. Yes. In Oregon, you have a lot of private land owners, and they are very interested in supporting conservation efforts. It was an Oregon rancher who said what is good for the bird is good for the herd. That recognizes that a healthy sagebrush ecosystem is important to the ranching community as well.

In the State of Oregon, through the work by the State along with private land owners and the Fish and Wildlife Service, we have multiple candidate conservation agreements with assurances that will be signed that will provide certainty to those ranchers, that if they take the conservation measures they signed up for, should the bird be listed as threatened in the future, it will not change their practices.

We share everybody's common interest in getting to a point where a listing is not warranted, but these ranchers, by virtue of the actions they have taken, will be reassured they can continue their ranching practices through these agreements. We are really appreciative of the private sector in Oregon stepping up.

Senator MERKLEY. Are we starting to see a similar strategy emerge in some other States?

Secretary JEWELL. We are in a number of other States. We signed some similar agreements in Wyoming not too long ago, and we are encouraging other States to sign up as well.

Senator MERKLEY. I really celebrate this type of partnership between the goal of conservation and the practices of local ranchers. I must say those who have been signing those agreements have been telling me in town halls that they are sleeping a lot more easier. They are happy and pleased to be part of the conservation effort, but also to know they do not face catastrophic loss down the road if the broader efforts are unsuccessful.

I know the chair has raised her concerns about the conservation strategies in Alaska.

Senator MURKOWSKI. The Senator's time has expired, if you could wrap up, please.

Senator MERKLEY. I am over time. Thank you very much.

Senator MURKOWSKI. Thank you. There will be an opportunity for a second round as well. Senator Tester.

Senator TESTER. Thank you, Chairwoman Murkowski, and Ranking Member Udall. I look forward to working with you guys on this committee. Thank you for being here today, Secretary Jewell and Deputy Secretary Connor. You are getting off easy today, Mike, and I am not going to break that here.

I think it was nearly a year right now that Secretary Jewell was out in Montana and we got to visit about issues that are important and they were reflected in your testimony, the importance to the outdoor economy or balanced energy development, or upholding our trust responsibilities for American Indians. I just want to thank you for the job that both of you have been doing in the Department of the Interior, I very much appreciate it.

We always look at Federal lands as to the highest and best use for those public lands, because they are very, very important to our economy.

I would just say not unlike the work that has been done on the Rocky Mountains front, I have to thank you personally for your work to protect pristine landscapes like the Arctic National Wildlife Refuge. I very much appreciate that. They do not make places—well, what we have is what we have, and if we destroy it, we will no longer have special places on this earth.

#### LAND AND WATER CONSERVATION FUND

I want to talk about the Land and Water Conservation Fund, too, because it is very, very important. You have already talked about access. I appreciate the dollars you have plugged into this program. I think it is money that will be paid back multiple times over.

The issue I have is could you talk about your vision for use of the Land and Water Conservation Fund? You have already addressed access. That is critically important. What other ways is this going to help further build a \$5.8 billion economy in the State of Montana and other States represented here?

Secretary JEWELL. Thank you, Senator Tester. In my old day job working in the outdoor industry, we recognized the necessity of public lands to a \$646 billion national industry, and certainly Montana feels that in a lot of its communities.

The Land and Water Conservation Fund facilitates transactions that actually help manage these lands much more effectively. As I spoke with Senator Daines, it is about access to resources, and much of that access can be provided through conservation easements. It does not have to be fee simple lands, but it helps align the interest of the private land owner with the public lands in a way that supports breadth and diversification of the economy.

I would also say there are some circumstances where costs are lowered by use of the Land and Water Conservation Fund. When we have an in-holding within a national park, for example, or in a wildlife refuge or in a critical migration corridor for animals, it costs us more to deal with that in-holding than it would if we actually owned that land.

The Land and Water Conservation Fund has been used in just about every county across the country. The stateside program is very important to local communities. In the eastern part of the country, there is a hunger for more public lands than we have because they see the economic engine that it provides to other parts of the country and they want to be a part of that.

It is one of the most successful programs we have ever had, one of the best laws passed by Congress, and we really appreciate your support and also reauthorization.

Senator TESTER. I would also tell you from a ranching perspective, they have used these funds very, very effectively in keeping ranches in the family, and I appreciate that. I also appreciate the fact that not only is it about hunting, fishing, bird watching, hiking and biking, and all that stuff. It is about recruiting businesses to places like Montana.

Secretary JEWELL. It is.

## SUN HIGHWAY GLACIER NATIONAL PARK

Senator TESTER. We thank you for that. I want to talk about Sun Highway for a minute. We will get a little parochial here. It is in the middle of a rebuild. Can you give me an idea of what percentage is done? Well, if you give me what percentage is done, I can do the math on what percentage is left.

Secretary JEWELL. I do not have an update on that. Mike, do you?

Mr. CONNOR. I do not.

Secretary JEWELL. We will have to get back to you.

[The information follows:]

## GLACIER NATIONAL PARK—GOING TO THE SUN ROAD

As currently planned, by the end of 2015 approximately 80 percent of the rehabilitation of the 50-mile historic Going-to-the-Sun Road will be completed. By the end of 2017, at current funding levels, the project is anticipated to be completed.

Senator TESTER. I would love to see when that is going to be finished. That is also a jewel for the American people.

Secretary JEWELL. It is beautiful.

## ONSHORE ENERGY DEVELOPMENT

Senator TESTER. It is also \$1 million a day to that economy just in the northwestern part of Montana. I want to jump over to a question that Senator Udall asked about wells. Did you say you had 100,000 wells?

Secretary JEWELL. 100,000.

Senator TESTER. That you are doing oversight on right now?

Secretary JEWELL. That is right.

## ONSHORE INSPECTION FEES

Senator TESTER. How much money did you put into that budget line item for well oversight? Has it been increased from the previous year?

Secretary JEWELL. I think the number is \$48 million, and that would be fees to industry to cover our costs. We have had this in the budget multiple times. I think there is \$41 million in our current budget for 2015, which was appropriated money.

Senator TESTER. I assume those inspections include making sure the well casing is adequate. Is there anything else that is being inspected?

Secretary JEWELL. We have a well in the State of Utah where we heard from people that were out in the outdoors that they saw oil in a creek. It turned out that well had been leaking for many, many years or a pipeline associated with that well, and we had not been out there.

It is about production and making sure the meters are working and the taxpayers are getting a fair return. It is about environmental inspections. Neither of those are being done adequately, and we are not able to do our job effectively without these resources.

Senator TESTER. First of all, I applaud your efforts on this, I think it is critically important. We just had a pipeline break in Montana that cost far more money than if we had proper inspec-

tors on the ground to take care of it, and we bumped that up. We plused those accounts up.

This is a big concern of mine and I will tell you why. I think drilling is important. I think it helps power our economy, but if we are screwing up water in the process, long term, we are making a huge mistake.

Do you think those funds are adequate that you presented for the inspection angle in this budget?

Secretary JEWELL. I think it is an important step forward. I cannot say they are fully adequate, but it is as much as we felt was reasonable to put in this budget in 2016.

#### COASTAL RESILIENCE

Senator TESTER. Thanks. I am going to close with just one thing. Senator Reed talked about coastal resilience, and you have \$50 million in that account, which is a drop in the bucket. We are going to spend \$3 billion in this election cycle on something that people hate to hear all the time on the t.v. I have to tell you, we have to redo our priorities in this country. It is ridiculous you do not have the kind of dollars you need to protect because of climate change, what is going on on the coasts of this country, and in Alaska, as you said earlier.

So, thank you very, very much.

Secretary JEWELL. Thank you.

Senator MURKOWSKI. Senator Feinstein.

#### DROUGHT

Senator FEINSTEIN. Thanks very much, Madam Chairman. Let me begin by thanking you, Mr. Chairman, of the Energy Committee, for what you helped with, with our number one problem, which was drought. Without you, I do not think that bill would have passed the Senate. I just want you to know that, and thank you very much,

Madam Secretary, and it is hard to call you Deputy Secretary, Mike, I want to thank you, and particularly Reclamation, for all your efforts to help with water supply. If you ask me what my number one issue is for the biggest State in the Union is, it is drought.

I just learned something very distressing ten minutes ago. As chair of the Energy and Water Subcommittee, I was able to get in the omnibus \$50 million for western drought. I think you spoke about it, Madam Secretary, when you were in California with the Governor. I just learned that it is not being continued this year.

I just want you to know that is really a serious concern for me because the situation is no better. If anything this year, it is going to be worse. Our snow pack is at 19 percent of normal. The reservoir levels are all very low. There is only one that is at 60 percent.

The Bureau just told Federal water contractors that they will be receiving no water allocation for the Central Valley Water Project for the second year in a row, and we all know that fish, wildlife and refuges are suffering as well.

I am deeply concerned, and given these conditions, the last time I talked to the Deputy Secretary, we talked about what could be

done to operate the pumps with the kind of flexibility that did not violate any Endangered Species Act, any Clean Water Act, any biological opinions, in other words, really adaptive management by the day, using the pumps from what we have learned from science.

I have a question. Is everything being done that can possibly be done now? Is there anything else that you can think of that can be done to improve water supply?

Secretary JEWELL. I am blessed with a Deputy Secretary that is immersed in these issues. Pardon the pun. I am going to turn it over to Mike to answer.

Mr. CONNOR. Thank you, Senator Feinstein, for the question, and thank you for the leadership and resources provided in the \$50 million of drought funding, and the funding even beforehand, which I think has really enhanced our abilities to implement strategies that are along the lines you stated, adaptive management.

We have a couple of biological opinions that control our pumping operations, both the Central Valley Project and State Water Project. Those biological opinions for the last couple of years, we have gotten increasing flexible in adjusting those, given the drought conditions, the emergency conditions, to try and increase pumping even above the limits that were first established in those biological opinions, and we do it because of the resources we have applied towards monitoring data collection and day to day operational management.

We have better strategies. We have more flexibility with respect to our water quality permits. We just do not have any precipitation. Those strategies are really geared towards making use of the high flow events, and we had one high flow event earlier, in February. Now, we are kind of past that and we are getting down to very low flows in the Delta.

As you mentioned, given the lack of reservoir levels, we are at the lowest levels since 1993, and 1993 was an above normal year, so it picked up then. We are just stressed on all levels.

A couple of years ago we did an exchange with Metropolitan Water District and got 100,000 acre feet more for the Central Valley, but we cannot do that this year because they are stressed because the Colorado River has also been in drought for the last 15 years. Now, some of the excess supplies they have had are not there.

Senator FEINSTEIN. That is why, if I may say, we have to get that \$50 million for western drought, which does not only affect California, it affects all the States on the Colorado, too.

Mr. CONNOR. Absolutely. You can see the two systems affecting each other right now. The options are tough to figure out. We need to continue to look and adaptively manage and see if we cannot increase some supplies from our existing operations, but we are losing flexibility in the system, both with groundwater, as you know, which is reducing fast, and our other basins that we can move water over from.

Senator FEINSTEIN. What you are saying to me is there are no more things that you can pull out of your hat, essentially, because of the dismal lack of water.

Mr. CONNOR. It is getting tougher and tougher.

## FEASIBILITY STUDIES

Senator FEINSTEIN. Okay. Let me move on to feasibility studies. California has now passed a bond issue for \$2 billion for a dam. I know you have been focused on these feasibility studies. Where are we with respect to Shasta undergoing final executive review? I understand it is “very close to completion.” Can you give us a date for finalization?

Mr. CONNOR. I cannot give you a specific date on finalization for Shasta right now, but I think it is within the next month or two, and as soon as we understand when that can be completed, we will let your office know. We are very close in completing that study.

Senator FEINSTEIN. Temperance Flat. Commissioner Lopez said the technical work is on track to be completed by July 2015. Will it stay on track?

Mr. CONNOR. It will stay on track. We will still have to complete the technical work so we can get to the final feasibility study. Everything is out in draft, as you know. We will still have to go through the same review process within the administration. There is always a little uncertainty as to timing at that point in time.

We have projected completion of the technical studies this summer, moving towards finalizing it and getting it out by the end of the year. We are going to try to stay on track to do that.

Senator FEINSTEIN. Sites. I had the privilege of meeting with the Joint Powers Authority to complete a project management plan. I was very impressed with it. It was scheduled to be completed at the end of February. Was it completed?

Mr. CONNOR. I do not know the specific answer, whether they wrapped up those discussions. I can get back to you on the record with that.

Senator FEINSTEIN. Okay.  
[The information follows:]

## JOINT POWERS AUTHORITY PROJECT MANAGEMENT PLAN

A meeting was held with representatives from Reclamation and the Sites Joint Powers Authority (JPA) on February 3, 2015, to discuss options for completing the feasibility study. It was agreed to develop a project management plan and cost share agreement to specify roles and responsibilities and a related schedule and budget as a basis to secure funding and develop and evaluate the potential effects of additional operational alternatives. It should be noted that Reclamation does not have the financial resources to conduct further study unless or until additional non-Federal cost shares are available consistent with non-Federal cost share requirements. Sites JPA expects that JPA and/or investor funding will be available later in 2015 to contribute to remaining study costs. The project management plan will include major decision points and milestones to support go/no-go decisions as critical determinations emerge regarding the type and extent of Federal and non-Federal interests in a potential North of the Delta Offstream Storage project.

Senator FEINSTEIN. This is very important because there are a lot of people that know, who think that Sites may be the best alternative. I do not know that. I know it is the most costly, and that concerns me. I really think we have to get this quickly to be able to evaluate it completely.

Senator MURKOWSKI. The Senator’s time has expired.

Senator FEINSTEIN. Thank you very much, Madam Chairman.

Senator MURKOWSKI. Senator Leahy.

## LAKE CHAMPLAIN

Senator LEAHY. Thank you very much, Madam Chairman. Secretary Jewell, I have to thank you for all you have done at the Department. I sometimes think you have cloned yourself because you have to protect our natural resources and you have to manage them. Sometimes that may seem at odds with one another as you protect special places, not just for us but for next generations after, and how you facilitate development and extraction of natural resources.

Over my 40 years here, occasionally parochial questions will be asked. Your Fish and Wildlife Service and U.S. Geological Survey staff in Vermont work very hard to address water quality, the ecological challenges in Lake Champlain, and outside the Great Lakes, it is the largest body of fresh water in the United States, they work with USDA on wetlands and wildlife conservation projects, and work with the Great Lakes Fisheries Commission, and so on.

A concern I have is that the EPA has requested a dramatic cut in funds for Lake Champlain compared to the fiscal year 2015 spending level, so creativity becomes far more important.

We saw Lake Erie when it was not protected, it became so polluted, the river caught fire. It took two or three days to put the fire out.

I know you are going to be on the shores of Lake Champlain soon and I look forward to that. Will you work with me to dedicate as many resources, and I know resources are limited, but as many as we can to address water quality, invasive species, climate driven challenges that we have in this huge body of water?

Secretary JEWELL. Senator, I certainly cannot weigh in on the EPA side of the budget, but we do have significant money in the budget particularly for invasive species around Lake Champlain. I am very happy to continue to work with you to understand those issues perhaps as I am up there in a week or two, to even deepen my understanding and to work with you on whatever resources we can bring to bear.

Senator LEAHY. We will probably inundate you with all kinds of things. Lake Champlain means a lot to us. This has been a non-partisan issue in Vermont. We have had Republican Governors, Democratic Governors. We have worked with New York State. We have worked with the Province of Quebec to protect it.

## MISSISQUOI AND TROUT RIVERS

We also have constituents in Vermont where we call the "North-east Kingdom," my wife was born there, my mother was born there, I am well aware of it. One of the final acts of the 113th Congress was to approve legislation designating over 46 miles of the Missisquoi and Trout Rivers in Vermont as wild and scenic. The Department moved quickly to request resources for these Vermont rivers, through the Park Service, in the 2016 funding request.

What motivated the National Park Service to request funding so quickly? I am not complaining. I am glad they did. What motivated the Department?

Secretary JEWELL. I cannot speak specifically to what motivates the Park Service to put different things in the budget other than

they prioritize their resources based on the areas they feel have the greatest need and the greatest potential. I have to assume that is the case there.

Senator LEAHY. Will they work at promptly implementing these new Vermont wild and scenic designations?

Secretary JEWELL. Yes, they will.

#### NORTHERN LONG-EARED BAT

Senator LEAHY. Thank you. I started raising years ago the question of what has happened with white-nose syndrome, putting money into various budgets on it. I was teased a little bit that I might be worried about Batman or something. It turns out if we lose these bats, it is going to cost our farmers in a whole lot of States, 25 States, billions of dollars in pesticides and everything else, as well as ecological problems.

If the Fish and Wildlife Service lists the northern long-eared bat as threatened, what kind of support can we continue to get on conservation measures that will protect habitats? I wish I knew the answer on this. What is happening with the bats is creating a huge ecological problem to half of the continental U.S.

Secretary JEWELL. Senator, first, I want to thank you profoundly for raising awareness about white-nose syndrome and bats early on, and providing the kind of support we needed to study this. We do not have an answer yet, but we have the U.S. Geological Survey and Fish and Wildlife Service and others working hard on trying to come up with a solution.

The northern long-eared bat in specific has been really decimated in the East, and the problem is marching West. The Fish and Wildlife Service preemptively produced what is called a 4(d) rule to provide guidance on measures that could be taken to protect the remaining habitat, even though the threat to the species is white-nose syndrome, for those that survive and are threatened. They need good habitat to be able to recover.

They preemptively put that out there for comment and are taking comment on that. That will help provide the kind of certainty to the logging industry, to the oil and gas industry, and to other industries about what is needed to try and prevent a catastrophe here, which we are well on the way to seeing because of white-nose syndrome.

Senator LEAHY. Thank you. Senator Murkowski, just on a personal level, I have pestered you with photographs of our home in Vermont and hundreds of acres. We have a quarter of a mile up on our land behind our house where there has been for decades a bat cave. In the early evening, we would sit out on our front lawn. The bats would come out and there would be no mosquitos. It was just wonderful. The bats have disappeared. Now we get pestered by mosquitos.

That is just a personal discomfort. Think of the farms that have thousands of acres of crops growing, bugs and pests that are normally kept in check by the bats, now they are not. We have a real problem.

I applaud the Secretary for keeping this on the Department's priorities. It means a lot. Thank you.

Senator MURKOWSKI. Senator Leahy, I do not know, maybe there is a correlation. Alaska's mosquitos are legendary in their size. We do not have many bats up there.

Senator LEAHY. We use fly swatters. I remember Ted Stevens told me they use baseball bats in Alaska.

Senator MURKOWSKI. They are real.

Senator LEAHY. There are aspects that are humorous. It was amazing when we started looking into this and realizing, and all of a sudden we started to hearing from other States. This is costing them a fortune in either crops lost or pesticides, if you are trying to raise organic farms, that creates a problem.

Anyway, thank you very much. Thank you, Madam Secretary.

Senator MURKOWSKI. Thank you, Senator Leahy. I am told the vote has been pushed back a few minutes so we will have a little more time. I know I have more questions and hopefully my colleagues will as well.

#### KING COVE

Secretary, I do want to make sure I correct the record. I noted in my opening comments that since the last time we were together in a hearing, there had been two Medivac's from King Cove, and one had been Coast Guard Medivac. I stand corrected. The information that I have received is on the 24th of February, there was an individual, a 50-year-old man from California, who was having a cardiac emergency there in King Cove. The Coast Guard was requested to come because of weather, the private Medivac was not able to get in. The Coast Guard said they could not come. They had other emergencies they were attending to. The individual, fortunately, was able to be stabilized and he went out the next morning in a private Medivac.

I think it speaks to the issue that we cannot always count on our Coast Guard to be the Medivac. That is not their mission set. That is not what they do. Fortunately, they have been there to help with life saving efforts in the past. It speaks again to the need, the very direct need to address the situation in King Cove, to provide a life saving road to folks.

#### ARCTIC

I wanted to ask a follow up to the question regarding funding for the Arctic that I presented in the Energy Committee. I mentioned to you that under the implementation plan that the administration has for the national strategy for the Arctic region, that DOI has oversight or lead for five different projects, as well as being designated as the supporting agency.

What I would like to get from you, Secretary, is an individual or a point of contact that we can be working with on these Arctic initiatives, whether it is what you are doing with the integrated Arctic management implementation plan or the invasive species project.

I am moving forward with an Arctic initiative. You are going to be invited to be part of the Arctic caucus tomorrow, having an opportunity to speak on the Floor about what it is we need to do from a legislative perspective. The administration is obviously moving

forward with multiple directives as we advance toward the Arctic Council.

One of my frustrations has been with every agency having a little bit of a piece of it, there is nobody that really has that ownership. I am looking for that point person within your Department, whether it is all the way up to the top to you or whether you have a deputy secretary or somebody underneath. I would like to know that we can work with them to determine how we are coming with these benchmarks. If you could provide me with that, I would appreciate it.

Secretary JEWELL. Just quickly because I know you probably have other questions you want to ask, Tommy Beaudreau, my chief of staff, who you know, is my point person on Arctic issues. You already know Tommy, so I would direct you there.

I would also say we have detailed a full time person over to the State Department to coordinate our efforts with theirs, because they are the lead role on the Arctic Council. Across a number of our Bureau's, there are investments in the Arctic specific to the five areas we are responsible for for the Arctic Council. We are happy to identify each of those for you, but Tommy is probably the easiest focal point for you to work with.

Senator MURKOWSKI. I appreciate that. He is very, very conversant in all these areas, I appreciate that.

#### TRIBAL COURTS

Let me ask about Tribal courts and funding. Last year in the 2015 omnibus appropriations bill, we included some language that directed the BIA to work with the Department of Justice to issue a report on the budgetary needs of Tribal courts in Public Law 280 States.

I am very concerned that we get no funding from DOJ within BIA for our Public Law 280 States, of which Alaska is one. I brought this issue up with Assistant Secretary Washburn last Wednesday when we had a hearing in Indian Affairs. I wanted to know the status of the report, because the report is due in June.

His words were "We do not have a report for you yet, and actually, the report is not required by law, we understand it was not in the bill, so there is no legal requirement for that report. It surfaced on my radar screen only fairly recently."

That concerns me because when something is included in our annual spending bills, whether it is in the bill or in report language, we expect that both the letter and the spirit of the law is going to be adhered to. He knows this is a big priority. I want you to know that this is a big priority for me, certainly for my State, and really all the Public Law 280 States.

Mr. Washburn indicated that he was going to work on it, but I need to know there will be a commitment from the Department that there will be a report issued by the June 14 deadline that details these budgetary needs.

Secretary JEWELL. We will certainly work with the subcommittee to follow the directions in the explanatory statement.

## GREATER MOOSES TOOTH

Senator MURKOWSKI. Great. Thank you. I appreciate that. Let me speak a little bit about where we are with Greater Mooses Tooth and the Secretarial Order on mitigation. You know I have expressed my frustration on the mitigation requirements that are associated with the GMT permitting process.

We have had discussion. I recognize mitigation is an important tool, but what I am concerned about is that we are perhaps moving in this direction of pay to play. I do not think that is where we should go, and I hope that is not where the Department is intending to go.

It appears that companies that have deep pockets and pretty considerable investments face some requirements that may be tangentially related, maybe not even related at all, but requirements that could harm their operations as they impose a condition on permits.

We have talked about where we are with Greater Mooses Tooth and the mitigation. I understand we have ratcheted that number down, which I think was important, but I am concerned about how we go forward with these mitigation requirements.

That perhaps with Greater Mooses Tooth and what Conoco has faced there in this process is going to be formalized and perhaps exported to the Lower 48, I do not know, by way of the Secretarial Order, Secretarial Order 3330 on mitigation.

We saw as with Greater Mooses Tooth Unit 1 (GMT1), that the Department is free and able to accept voluntary mitigation efforts as part of the permitting process, but I would like to know what you believe the legal justification is for the idea that you have authority to require them to make a payment into a mitigation fund in order to authorize what would otherwise be a permissible activity under the Federal Land Policy and Management Act (FLPMA).

I am trying to understand where we go forward from here, because the great concern, and you know because you have had these conversations, as has Tommy Beaudreau, the concern is what is the precedent of this going to be, what happens going forward.

Secretary JEWELL. Senator, I am going to speak in broad terms about mitigation, and then I will turn it over to Mike because he was right in the thick of the discussions with ConocoPhillips around Greater Mooses Tooth in specific.

First, mitigation is not new. When I wrote the Secretarial Order on mitigation, it was to say let's look broadly as we develop, for example, as we look at developing the California and Nevada deserts for renewable energy, project specific mitigation on site may be less important to addressing the mitigation issues than looking more broadly on a landscape scale.

In the California desert, for example, with the renewable energy permits we have done, we have done some landscape level mitigation, for example, setting aside desert tortoise habitat, buying conservation easements and land to address the impact of those solar farms on the desert tortoise.

Mitigation is not specific to oil and gas, it certainly is not specific to the project you referenced. It is something that we have done all along and what we are trying to do is say let's make sure that miti-

gation money is put into the projects that are most important to address the issues this development impacts.

In the case of Greater Mooses Tooth, we are within a setback for Fish Creek, and there will be a gravel road that goes through to that development, and it will have impacts on the subsistence and food security of the people.

The mitigation addresses the ability for the company to work with the village and others impacted by that to put that mitigation money into the most affected areas.

Mike has been working on that in specific. Is there anything you want to add?

Senator MURKOWSKI. If I can just give you a little direction here, in terms of the different mitigation ratios that are out there, part of what we are dealing with, I think, is the uncertainty to the operator, what will be required.

It seems to me there is a potential for a great deal of subjectivity here with what these mitigation ratios may or may not be.

Mr. CONNOR. I understand the concern, Chairman Murkowski. There is no specific mitigation ratios that were used with respect to Greater Mooses Tooth. I know with respect to Army Corps permitting and wetlands impacts, there is a ratio that is applied, and we have certainly looked at that, but there is no ratio that has been specifically applied here.

What we did with respect to Greater Mooses Tooth was there were impacts overall from the project that were identified, particularly to subsistence resources. Some of those were mitigated with the project itself, and always our goal is to avoid impacts, minimize impacts, and then compensate for the remaining impacts. That is the approach we took with respect to Greater Mooses Tooth.

There were impacts to subsistence resources in general, and there were specific impacts, as the Secretary alluded to, from the final decision that we made to intrude upon the Fish Creek setback. That setback had been identified in planning documents for some time, including the 2012 integrated activity plan.

Really, when we went to ConocoPhillips, in our mind, we had an objective, rational basis to request some compensatory mitigation. They took issue with the size of that.

We had a discussion and we came to an agreement with ConocoPhillips as to the level of compensatory mitigation, and most effectively, how to use those dollars to develop a regional mitigation strategy with ConocoPhillips, BLM, and the Alaskan Native entities that are affected, to put together how to best mitigate those impacts on subsistence resources.

I think that is viewed as a good approach. That is not BLM making decisions unilaterally about how to move forward in that mitigation strategy. I think we have a good result, and that strategy will help us facilitate future projects as we move forward.

I want to assure you that the specific mitigation for Greater Mooses Tooth was focused on the impacts we saw with that development itself.

Senator MURKOWSKI. Again, I will repeat myself here, the fear, of course, is that rather than creating efficiencies, what we may have developing here is additional unpredictability, lack of clarity

in terms of where you are going with the project that deters investment, that really can derail a project.

I think what we are trying to do is avoid what would be viewed as surprise requirements or requirements that come up at a later point in the process, where you have a company that has invested millions of dollars into it already, and they are looking at a situation where because of these requirements that had not been anticipated or anticipated to the level that perhaps the agency was, that they actually have to revisit that project.

Those are exactly the conversations we were having with ConocoPhillips, who were saying we have invested millions in this, and are we going to have to pull the plug on this because of where we are.

I am a little more optimistic now today where we are with GMT1 than I was a month ago. I think it is important to state very clearly that the concern and the anxiety up north is this is GMT1, what is the next project going to hold, what will the precedents be. We need to know there is a level of transparency that is fair and equitable.

I have long exceeded my time, and I need to turn to my ranking member.

#### NEW MEXICO MONUMENTS

Senator UDALL. Thank you, Chairman Murkowski. Just a quick question on our New Mexico monuments, Secretary Jewell. You have been out and seen them and assisted with their establishment, Organ Peaks and Rio Grande Del Norte.

I noticed the President's budget proposes a significant increase of \$16 million for monuments throughout the country, what are BLM's plans for moving forward with management changes on the new monuments in New Mexico, and what funding is included in the President's budget for these monuments, and how will those funds be used?

Secretary JEWELL. I am going to address the first part while Mike takes a look through the book to come up with the actual numbers.

First, in any new national monument, our first approach is to make sure we plan, we understand the resource, we work with local folks, and that is where these first steps are. Some of that involves where can we leverage existing resources, where can we work with other partners?

That planning effort is going on, along with making sure we are working along side those existing landowners and land uses within the monuments so they are reassured.

Specific numbers, Mike, do you have it? Go ahead.

Mr. CONNOR. Senator, overall, as you mentioned, there is a bump up in the BLM national conservation lands account. We have \$4.4 million allocated to New Mexico, specifically \$2 million to Organ Mountains-Desert Peaks, and \$1.5 million to Rio Grande Del Norte. They will be used for visitor services needs, basic security, starting partnership programs, those fundamental aspects that are key to those people enjoying those monuments.

Senator UDALL. Thank you very much. Thank you for your testimony. Thank you for your service. I just want to say to the chair,

you and Senator Leahy talked about the mosquitos. My experience has been in a lot of western States, if there are a lot of bugs and a lot of mosquitos, the fishing is great. I do not know whether that is true in Alaska. The more bugs, the better the fishing. You have to endure it, but it is always enjoyable.

Thank you. I see Senator Cassidy has come, so I am going to yield back any time I would have.

Senator MURKOWSKI. Thank you, Senator Udall. I will note that we do have a vote, but I want to let Senator Cassidy go. Welcome.

Senator CASSIDY. Thank you, Senator Murkowski, and thank you, Dr. Jewell, for your phone call the other day, very gracious.

We do have a vote. I am going to ask one question and then submit the others for the record.

#### REVENUE SHARING

The last time we spoke, my concern was the budget chooses to take away dollars from the Gulf Coast States, and your reply was that it was a Federal resource and really beyond the control of the State. We made a case that the states have disproportionately borne this.

That said, I am told that recently you stated that states in the Atlantic will have a chance to pull themselves out of the running for possible Federal approval of offshore drilling. In that case, you are giving the states control over what in the Gulf Coast is stated to be a federally controlled interest without the states having any say so.

How can you in a sense reconcile the two? On the one hand, I am on the Atlantic and I do not want to develop, Federal taxpayer be gone with you because I have control. On the other hand, in the Gulf of Mexico, if I am the people of Louisiana relying on those dollars to rebuild my coast line, sorry, we are the Federal Government and we have complete control and you have no stake.

I do not see how you reconcile those two.

Secretary JEWELL. Senator, thanks for the question. I appreciate your passion for the State of Louisiana. Let me give you a simple example, and that is Florida. Florida is on the Atlantic. It is also on the Gulf. Florida has made it very clear to our Department that they do not want to see—

Senator CASSIDY. If I may—

Secretary JEWELL. Let me just finish, if I may. That is input in advance of our draft proposed plan for the five year drilling plan. There are several states in the Atlantic that have said we would like you to consider a lease here, and there are several States that have not. The Pacific states have said we do not want to be in—other than Alaska, of course.

We have moved to honor the interests of those states as we take limited resources and focus them on the areas where the states do want Federal offshore leasing because of the economic activity it does drive to their states.

Revenue sharing as you talked about with GOMESA is an element, but there are many other economic activities that occur on the shore lines by virtue of the Federal offshore oil and gas activities, and I think that is resulting in some of the Atlantic states

saying we would like to be included. There are many more bites at that apple on the Gulf lease sales.

Senator CASSIDY. Thank you. As I gather, I think you just supported my contention. If you are going to say listen, the states have the option to pull themselves out and we recognize they have an interest, and we are going to honor that they have an interest, et cetera, than in the case of the Gulf of Mexico, it is not as if we have an interest, rather, we must do exactly what we are told.

I am not sure it is reconciled any other way.

Secretary JEWELL. Senator, the point I am making is development of the Outer Continental Shelf, which is a Federal resource, already supports the economies onshore for many of those states.

Senator CASSIDY. That is a different issue, so the development of the Outer Continental Shelf has borne some role in the dissolution of Louisiana's coast line. That is actually a separate issue.

The primary issue is that in this case you say the State can effectively control access to the revenue associated with drilling in the Outer Continental Shelf, but in the case of the Gulf Coast states, you do not have control over this revenue, because denying access to drilling in the OCS off these states is effectively denying access to the revenue.

So, okay. You control the revenue on behalf of the Federal taxpayers, and in these states, however, you have no control over that revenue. We consider it a Federal dollar, and we are going to distribute it elsewhere.

We have a call for votes, and I promised I would be short. I do think your answer supports my contention that the State is the one which should have a role. You have established the precedent really in allowing them to deny the Federal taxpayer access to the revenue derived thereof.

Thank you very much.

Secretary JEWELL. Senator, may I have a response?

Senator MURKOWSKI. Very briefly.

Secretary JEWELL. I just want to say that I do not think my comments are any different than what I stated, the Gulf Coast States, with the exception of Florida, have said we want you to continue to lease the Outer Continental Shelf, and we are, and we are doing it twice a year.

Some states have said we do not want leasing, and they have been excluded from the plan.

Senator CASSIDY. The issue is not the lease, the issue is the revenue derived thereof. That is really what we are talking about with the GOMESA revenue sharing. That is where I think you in the one case allow the State to deny the Federal taxpayer the revenue, and in the other State, you say no, you cannot deny the Federal taxpayer the revenue. That seems to be the inconsistency, not the leasing, per se.

Secretary JEWELL. I do not believe I am being inconsistent.

Senator MURKOWSKI. Senator Cassidy, know how much I agree with your concerns here and know that the issue of revenue sharing, fair and equitable revenue sharing, from our Outer Continental Shelf areas, is going to be a priority of mine.

I do think as we look at this budget and areas where I think the administration is just way off base is exactly what they have done

with the GOMESA revenue sharing, the agreement that was made to pull back on that, I think, is just wrong.

I think it is going to be important to make sure that we have a level of revenue sharing where those states, those coastal states, that host economic activity off their shores, their coast lines, are fairly compensated.

I mentioned the issues of the Arctic and whether it is an emergency evacuation route for a community like Kivalina or how we are going to fund a deepwater port for Arctic activities, I look to revenue sharing and increased production in our OCS as being that way we will be able to fund these vital priorities.

It is pretty tough trying to find the money under rocks onshore right now, particularly on our Federal lands. This is a priority of mine and I look forward to working with you on that.

#### ADDITIONAL COMMITTEE QUESTIONS

I think they have probably closed out our vote, so I hate to wrap it up when we are having so much fun.

Senator CASSIDY. Thank you.

Senator MURKOWSKI. Secretary Jewell, thank you for being here, and Deputy Secretary Connor, thank you.

[The following questions were not asked at the hearing, but were submitted to the Department for response subsequent to the hearing:]

#### QUESTIONS SUBMITTED TO HON. SALLY JEWELL

##### QUESTIONS SUBMITTED BY SENATOR LISA MURKOWSKI

*Question.* I have some concerns over the process associated with access to public lands for purposes of filming and have heard numerous complaints about people having access to our public lands in this regard. Most of the criticism is associated with issues on forest lands; however, it is an issue in National Parks and on the Bureau of Land Management (BLM) lands as well.

I am concerned that the law on commercial filming that Congress passed back in 2000 is being misconstrued and applied in a way to potentially restrict or outright deny access—certainly that is the case on Forest Service lands. It is my understanding these are not large movie scale kinds of operations but 1, 2, or maybe 3 people with cameras or hand held video camera equipment who do not disturb the landscape. In some places people are being allowed access and in some areas they are not leaving folks quite frustrated.

What activities do the Park Service and BLM consider “commercial” for purposes of issuing permits under the law?

*Answer.* The Department of the Interior (DOI) issued regulations on August 22, 2013, (43 CFR PART 5) to implement the commercial film rule in Public Law 106–206. While the Department of Interior’s regulations adopt a broad definition of commercial filming, there are exceptions which ensure the permitting and fee requirements do not impose an unreasonable burden.

Under the regulations, commercial filming includes the “film, electronic, magnetic, digital, or other recording, of a moving image by a person, business, or other entity for a market audience with the intent of generating income. Examples include, but are not limited to, feature film, videography, television broadcast, or documentary, or other similar projects. Commercial filming activities may include the advertisement of a product or service, or the use of actors, models, sets, or props” (43 CFR § 5.12). While commercial filming activities are generally required to obtain a permit, most still photography is exempt from this requirement unless: (i) it uses a model, set, or prop; or, (ii) the agency determines a permit is necessary because a proposed location is in a closed area or the agency would incur costs for providing oversight. Practically, this means, for example, that a photographer shooting an engagement photo in an area otherwise open to the public without any props would not need a permit even though he or she was presumably getting paid. The other important exception relates to news gathering activities. They do not require a per-

mit unless: (a) one is necessary to protect natural and cultural resources, avoid use conflicts, ensure public safety, or authorize entrance to closed areas; and, (b) getting one does not interfere with news gathering (43 CFR 5.4(a)).

The requirement that other commercial activities outside of these exceptions obtain a permit is consistent with Public Law 106–206, which directs Federal land management agencies in DOI and the U.S. Department of Agriculture (USDA) to collect a “fair return” for the use of the lands they manage. With respect to smaller groups that are required to get a permit, the recently issued fee schedule establishes a sliding scale linked to a group’s size.

*Question.* What are the fees for individuals to get a permit for filming on Park or BLM lands? How long does it take? What sort of paperwork is involved?

*Answer.* Only individuals or groups required to obtain a BLM permit are subject to a fee requirement, which includes two pieces. The first is cost recovery to reimburse the Government for the cost of processing their application. This is determined by the number of hours it takes to process the application. Cost recovery for a typical permit taking 1 to 8 hours to process would be \$121. Cost recovery fees are updated each fiscal year using the GDP/IDP index for inflation (43 CFR § 5.8, 43 CFR 2920.8(a) and (b)). In addition to cost recovery, individuals must also pay a location fee based on the type of filming (still or motion), the number of people involved, and the number of days. Location fees vary by State and group size and were established using statewide appraisals. Fees range from \$100 to \$250 per day for commercial still photography and \$250 to \$600 per day for commercial filming of live action depending on the number of people.

Processing times vary from a day or two to several weeks depending on the complexity of the production operation, whether the location is a popular area, and whether the National Environmental Policy Act (NEPA) has to be completed before filming can begin. The processing time also depends on the potential for impacts to other resources or activities, and the availability of BLM personnel to process the permit. On public lands, the BLM works with applicants to find alternate locations for filming activities if the location selected initially presents unique management challenges.

The permitting process and items needed vary depending on the location chosen and the type of filming proposed. The BLM works with film crews to ensure they are aware of the requirements specific to their request. To apply for a permit on public lands, film crews must complete Land Use Application Form 2920. They must also prepare a Detailed Description of Filming Activity form and provide a map showing the specific location(s) requested. Depending on the location, time of production, and type of production, additional items may be required, such as a bond or reimbursement for overtime costs. Bonds may be required to assure reclamation of sets or sensitive locations as appropriate.

The National Park Service (NPS) uses two applications for commercial filming and still photography—a short form for small crews with minimal equipment, and a long form for more complex proposals. Contingent on the complexity of the request, a short form may take as little as 2 days to be processed, while a request involving large crews, more equipment, and unique activities such as pyrotechnics, may take several weeks. Permits are subject to cost recovery charges and location fees. Cost recovery charges are based on the actual costs incurred in accepting the application, processing the request, and facilitating the permitted activity once approved. Location fees are based on a schedule developed by the NPS, Bureau of Land Management, Fish and Wildlife Service, and Forest Service. The schedule ensures consistent location fees between the agencies for similar activities. Fees are determined by the number of people involved with the permit and the number of days the activity is on Federal lands.

*Question.* How do the requirements for individuals or small groups (less than five compare) with the large Hollywood style operations?

*Answer.* On BLM public lands, smaller operations typically pay reduced application processing and location fees. Their applications are also likely to be simpler to prepare and process because less information would be necessary for activities that are smaller in scope. Larger operations (e.g., a major motion picture shoot) routinely require a bond, an onsite filming monitor, and additional permit stipulations that would not typically be required for smaller film crews. Large productions and requests to film outside popular locations will also usually require an onsite pre-application conference with the relevant BLM personnel.

The NPS uses two applications for commercial filming and still photography—a short form for small crews with minimal equipment, and a long form for more complex proposals. Commercial video crews of three people or less can be issued a permit for an extended period of time, usually up to 1 year, with authorization for unlimited access to areas of the park open to the general public. Fees are determined

by the number of people involved with the permit and the number of days the activity is on Federal lands. Small groups do not necessarily require on-site monitoring. Proof of insurance would be required of all commercial filming, though larger operations and operations with certain special effects would be required to carry higher amounts.

*Question.* How do the agencies ensure fair and consistent application of the law?

*Answer.* In order to ensure consistency among Bureaus, the Department of the Interior issued regulations on August 22, 2013, (43 CFR PART 5) to implement the commercial film rule in Public Law 106–206. Taking into consideration comments received from the public and industry and trade groups during the rulemaking process, the agencies developed a location fee schedule for use by all agencies to ensure consistency and that regulations were well-defined.

*Question.* Would the Department consider exempting from permitting a de minimis number of people who might engage in filming on Forest Service and other public lands?

*Answer.* With respect to activities on public lands, the Department's regulations contain a number of exemptions from the permitting requirement that capture a number of de minimis activities. As explained above, still photography and news gathering activities generally do not require a permit except under the specific circumstances identified in the regulations (43 CFR 5.2(b)). The Department would defer to the Department of Agriculture regarding management actions on Forest Service lands.

*Question.* Shell is forced to use the Bureau of Safety and Environmental Enforcement's (BSEE) existing Suspension of Operations regulations which were developed to address circumstances in the Gulf; however, Alaska is not the Gulf. Because of the unique and complex operations and the short timeframe for actually being able to operate in the Arctic compared to the Gulf, it is appropriate for BSEE to have Arctic-specific suspension regulations that reflect those differences. Do you agree? Why or why not? Additionally, BSEE has the authority to draft such regulations, but apparently has declined to do so. Why?

*Answer.* BSEE's regulations governing offshore oil and gas operations conducted on the Outer Continental Shelf (OCS) apply to all activities on the OCS regardless of location. BSEE does have the ability to issue additional regulations to address unique operating conditions and constraints. For example, BSEE is currently taking public comment on an Arctic exploratory drilling proposal. BSEE has not declined to draft Arctic specific suspension regulations and continues to explore these issues. BSEE is evaluating whether it can use its existing regulatory authority to address any unique and complex challenges associated with Arctic operations (ice coverage for the majority of the year). BSEE's analysis of this issue is ongoing with the goal of continuing to ensure the safe and environmentally responsible exploration and development of the Arctic OCS in accordance with the Outer Continental Shelf Lands Act and the ability to address suspension concerns in a timely manner.

*Question.* I have mentioned on many occasions that I am concerned about the pace of development on public lands—particularly in Alaska where lack of production threatens the sustainability of the Trans-Alaska Pipeline. The Department had a goal of permitting 10,000 megawatts of renewable energy production on Federal lands that was met in 2012. And currently, the administration has a goal for a “new renewable energy economy.”

Does the Department have a similar goal for conventional production?

*Answer.* The BLM provides for oil and gas development under the Mineral Leasing Act. Industry currently holds valid leases to 34 million acres of public lands but is only actively developing one in three of those acres. Last year, the BLM approved 50 percent more drilling permits than industry drilled that year, and oil and gas companies currently hold approximately 6,000 permits ready for drilling with no further action from the BLM—a 2-year supply under current drilling rates.

*Question.* If not, why? And, to what extent has the lack of any goals played a role in the downward trend of leasing on Federal lands?

*Answer.* BLM is responsible for making oil and gas resources available to industry where appropriate through its land use and leasing processes; however, actual production that takes place is generally up to industry. Oil and gas production is largely driven by economic and geologic considerations of the companies developing those resources. As a result, market conditions and technology advances cause shifts in areas where that development is focused. Oil and gas production trends from public and Indian lands have closely tracked that of comparable State and private lands. In fact, from 2008 to last year, oil production from lands requiring a BLM permit has increased 81 percent—from 113 million barrels to 205 million barrels. That is 92 million more barrels in 2014 than in 2008. Even where industry has seen de-

clines, like natural gas, those numbers often track statewide trends in the Western States where BLM predominantly works (e.g., New Mexico and Wyoming).

*Question.* According to the leasing statistics on DOI's own Web site for BLM lands over the past two decades, there is a downward trend. Over the course of the Clinton administration, the average acres leased per year was 3.3 million. Throughout the George W. Bush administration, the average acres leased was 3.6 million per year. During the first 6 years of the Obama administration, that number drops to an average of 1.6 million acres per year. If, like me, you view this information as negative, DOI's proposed rules relating to hydraulic fracturing, methane, and potential royalty rate increases certainly won't help reverse this trend.

Is this a trend the Department is aware of and happy with?

*Answer.* The BLM continues to provide significant opportunity for industry through leasing on public lands and permitting on public and tribal lands. However, industry has chosen to lease fewer acres in recent years, likely due in significant part to a large inventory of existing leases companies acquired in prior years. During the last fiscal year, the BLM offered over 5,500,000 acres for leasing, yet industry only bid on roughly 900,000 acres or 16 percent. Excluding Alaska, the BLM offered roughly 1.22 million acres in fiscal year 2014, yet industry only bid on 674,084 of those acres (55 percent), even though nearly all of the parcels offered for lease in the lower 48 were based on industry expressions of interest. These parcels are offered on top of the 34 million acres that industry already holds under lease, only one-third of which are actively producing oil and gas.

The recently published final rule on hydraulic fracturing is estimated by the BLM to cost industry on average less than one-quarter of 1 percent of the total cost of drilling a well. The BLM does not anticipate this rule to appreciably impact oil and gas production from public and Indian lands. The BLM has not yet published its proposed rule on venting and flaring or made specific decisions with respect to royalty rates, but will take into account the full range of information regarding anticipated impacts to both industry and Federal revenues as specific proposals are developed or considered.

*Question.* Is there anything the Department is proposing that you would argue is going to result in a reversal of that trend?

*Answer.* Most parcels with high development potential and low resource conflict are part of the 34 million acres already under lease to the oil and gas industry. For parcels with more potential for conflict, the BLM is working hard to resolve conflicts where they arise. For example, BLM reduced the number of successful protests because of improvements in its process. In calendar year 2014, while 690,958 acres within 484 parcels were protested, 478 of those parcels or 98 percent were eventually offered for leasing, reflecting the strong upfront analysis for the parcel posting.

Similarly, the BLM continues to work closely with the U.S. Fish and Wildlife Service and Western States on a West-wide planning effort to put in place meaningful conservation measures for the Greater sage-grouse along with innovative mitigation programs that together will increase certainty for industry while providing for the long-term protection of the species. The BLM is also working to finalize Master Leasing Plans in sensitive areas across the West. Together these plans, once finalized, will allow for responsible oil and gas development while also protecting other resources that are important to local economies.

*Question.* If the Department is unhappy with this trend, what are you doing to see that leasing on our public lands occurs at a rate similar to previous Republican and Democratic administrations?

*Answer.* Most parcels with high development potential and low resource conflict are part of the 34 million acres already under lease to the oil and gas industry. For parcels with more potential for conflict, the BLM is working hard to resolve conflicts where they arise. For example, BLM reduced the number of successful protests because of improvements in its process. In calendar year 2014, while 690,958 acres within 484 parcels were protested, 478 of those parcels or 98 percent were eventually offered for leasing, reflecting the strong upfront analysis for the parcel posting.

Similarly, the BLM continues to work closely with the U.S. Fish and Wildlife Service and Western States on a West-wide planning effort to put in place meaningful conservation measures for the Greater sage-grouse along with innovative mitigation programs that together will increase certainty for industry while providing for the long-term protection of the species. The BLM is also working to finalize Master Leasing Plans in sensitive areas across the West. Together these plans, once finalized, will allow for responsible oil and gas development while also protecting other resources that are important to local economies.

*Question.* In 2013, a report commissioned by the Department concluded that raising royalty rates on onshore oil and gas production on public lands would discourage

investment and bring less money to the treasury, and consequently was not warranted.

What has changed since then to convince the Department that a royalty increase is warranted?

Answer. One of the Department's primary responsibilities with respect to oil and gas development from public lands and waters is ensuring that the American public receives a fair return from the production of those resources. The Mineral Leasing Act of 1920 (MLA) requires the BLM to impose a royalty rate "at a rate of not less than 12.5 percent in amount or value of the production removed or sold from the lease" for new competitively issued leases. (30 U.S.C. 226(b)(1)(A)). The BLM currently fixes the rate for such leases at 12.5 percent. (43 CFR 3103.3-1(a)(1)). For non-competitively issued leases, the royalty rate is fixed by the MLA at a flat 12.5 percent (30 U.S.C. 226(c)).

The conclusions of the report referenced ("Comparative Assessment of the Federal Oil and Gas Fiscal System") were nuanced. In addition, a range of other reports and information suggest that taxpayers could be getting a better return from increasing the onshore royalty rate. The adequacy of the Department's oil and gas fiscal system has been the subject of many studies by the Government Accountability Office (GAO) and the Department's Office of the Inspector General (OIG) and others. The most recent one was completed by GAO in 2013 ("Oil and Gas Resources: Actions Needed for Interior to Better Ensure a Fair Return"). Both the GAO and the OIG have expressed concerns about the adequacy of the existing BLM regulations. Based on comparison of Federal Government oil and gas revenues with revenues received by foreign governments, both have concluded that the Federal Government receives one of the lowest "government takes" in the world. Rates charged by many State and private resource owners in the U.S. suggest similar a similar discrepancy for the Federal onshore rate. As result, the United States could be foregoing significant revenue from the production of Federal oil and gas resources. Most recently, in 2013 the GAO expressed concerns about the BLM's "lack of price flexibility in royalty rates" to respond to market conditions and "the inability [of the BLM] to change fiscal terms on existing leases."

The GAO also faulted the Department for not having procedures in place to routinely evaluate the ranking of the Federal oil and gas fiscal system, or the industry rates of return on Federal leases versus other resource owners. In response to these findings, the BLM, in coordination with the Bureau of Ocean Energy Management (BOEM), contracted for a comparative assessment of oil and gas fiscal systems (IHS CERA Study 2011). While that study concluded that the Federal Government's fiscal system and overall Government take were generally in the mainstream nationally and internationally, it pointed out the benefits of a sliding scale royalty system instead of the current fixed rate established by existing regulations. The purpose of the sliding scale system would be to allow the Department to better respond to changes in market conditions and other factors. In addition to the IHS CERA Study, the BLM also reviewed a separate study that was conducted by industry, independent of the BLM (Van Meurs Study (2011)). The Van Meurs Study looked at a wide range of jurisdictions and regions across North America and provided a comparison of the oil and gas fiscal systems on Federal, State, and private lands throughout the United States and the provinces in Canada. At the time it was published, the Van Meurs Study suggested that in the United States: (1) Government take was generally lower on Federal lands than the lessor's "take" on State lands or private lands; (2) Government take was higher for gas than for oil; and (3) The internal rate of return on leases was lower for gas than for oil.

To date there is no decision to change the royalty rate. However, based on the foregoing, the BLM published an Advance Notice of Proposed Rulemaking (ANPR) to solicit comments on potential changes to its royalty rate regulations, among other things, with the intent of ensuring that BLM is providing the American people a fair return on the oil and gas resources extracted from BLM-managed lands.

*Question.* Does the Department believe raising royalty rates would discourage investment and bring less money to the Federal treasury?

Answer. No, the Department anticipates that any decision to adjust the onshore oil and gas royalty rate would be made with the expectation that there would be a positive effect on net royalty revenues to the Treasury (with any Federal revenue gains shared with the States in which the production takes place). The Department has not made any decision yet regarding specific changes to the regulations governing the royalty rate charged for competitively issued oil and gas leases.

*Question.* Does the Department worry that increasing the royalty rate and driving away investment on public lands will make it even more difficult to provide funds for the land and water conservation fund?

Answer. No. Any increase in the royalty rate would be designed to ensure that taxpayers are receiving a fair return from oil and gas development, not to discourage that development.

*Question.* In the budget request for the Bureau of Ocean Energy Management 2.5 million was requested to address aging infrastructure and the future needs to decommission and plug aging offshore wells. While I can understand that the Department is seeking to protect Federal waters offshore by ensuring that the responsible party pays for such costs, it is bewildering that people are still waiting in Alaska for the necessary remediation of legacy wells drilled by the Federal Government.

Please provide an update on the requirement from the current spending bill on the Alaska Native Claims Settlement Act (ANCSA) contaminated sites, as well as the most current information as it relates to expenditure of funds provided through the Helium bill for cleanup.

Answer. The BLM is in the process of developing a database of potential contaminated sites conveyed to ANCSA corporations based on inventories compiled by State and Federal partners in Alaska. A preliminary review of inventoried sites in the database has found that a majority of sites are not on land conveyed to an ANCSA entity, and those sites that were conveyed are on parcels that were not managed by the BLM prior to conveyance. The BLM expects to make the database available to the public after verification of its contents. The BLM is on schedule to submit a report to Congress during the summer of this year. Additionally, BLM Director Neil Kornze hosted a stakeholder roundtable discussion on contaminated lands with Federal partners and congressional staff in Anchorage on March 10, 2015, to discuss the proposed interagency database verification process and establish a path forward, including outreach to ANCSA corporations.

With respect to the use of funds from the 2013 Helium Stewardship Act, BLM-Alaska is currently using approximately \$7 million to plug Umiat Wells 1, 3 and 11 and remove wellheads at Umiat 4, 8, and 10 in the National Petroleum Reserve in Alaska (NPR-A). This work is being performed by Marsh Creek, LLC, under an interagency agreement with the U.S. Army Corps of Engineers. This work is scheduled to be completed by mid-to late April 2015. In addition, the BLM National Operations Center will soon announce a solicitation for remediation services of additional NPR-A Legacy Wells based upon priorities established in BLM-Alaska's 2013 Legacy Wells Strategic Plan.

*Question.* In May 2014, the Fish and Wildlife Service issued two draft rules and one draft policy related to critical habitat designations under the Endangered Species Act. The Service suggests that these proposals are simply an update that makes the regulations regarding critical habitat designations consistent with current policy and current practices. I am concerned that this is not the case and that the proposals greatly expand areas the Service may designate as critical habitat for two reasons.

First, the proposals give the Service the authority to designate unoccupied areas as critical habitat even if occupied areas are sufficient to provide for the conservation of the species. Second, the proposals give the Service the authority to designate unoccupied areas as critical habitat if the habitat is not currently suitable—and may not ever be suitable—to be habitat essential to the conservation of the species. Under these proposals, the Services could designate large swaths of land without a species as critical habitat if they believe one day it might be suitable habitat using climate change models that may or may not be accurate.

Will the Department commit to ensuring that the final rules and draft policy do not expand the Service's ability to designate critical habitat in areas that are not currently suitable for a listed species?

What is the timeframe for releasing a final rule?

Answer. The proposed rule you are referring to is the May 12, 2014, proposed rule by the U.S. Fish and Wildlife Service (FWS) and the National Marine Fisheries Service implementing changes to the regulations for designating critical habitat (79 FR 27066–27078). That proposed rule serves to revise regulations at 50 CFR 424 which, in part, interpret and implement the statutory definition of "critical habitat", which includes "(i) specific areas outside the geographical area occupied by the species at the time it is listed . . . upon a determination by the Secretary that such areas are essential for the conservation of the species." The FWS's authority and ability to designate critical habitat in areas that were not occupied at the time of listing and are not currently suitable for a listed species flows from the statutory definition, but is limited to circumstances in which there is a specific determination that such areas are essential for the conservation of the species.

The FWS has learned through years of experience that the step-wise approach provided by the existing regulation can result in a larger designation that is less effective for species conservation. The proposed rule change would subsume and su-

persede language in the existing regulations that provides that areas outside the “geographical area presently occupied by the species” shall be designated only when “a designation limited to its present range would be inadequate to ensure the conservation of the species.” While the Department cannot commit to the outcome of the final rulemaking, be assured the FWS’s objective in proposing this revision is not to expand authority to designate critical habitat, but rather to remove an unnecessary limitation to achieve targeted designation of areas essential for the conservation of the species. The FWS focuses on areas where designation can make a difference for conservation of the species and avoiding areas where designation may provide a disincentive for voluntary conservation efforts.

To that end, the Service’s proposed policy with regard to the discretion to exclude specific areas from designation under authority of section 4(b)(2) reflects the intention, based on years of experience in designating critical habitat and defending those designations, to focus the designation on those areas where an added consideration to any section 7 consultation may benefit conservation of the species, but to generally exercise discretion to exclude from a designation areas where such benefits are unlikely or small and where designation may be a disincentive to voluntary conservation actions.

FWS anticipates finalizing the revised regulations and policy for critical habitat in early summer 2015.

*Question.* The sage-grouse rider that was included on the fiscal year 2015 Interior appropriations bill prohibits the Department from writing or issuing a proposed rule pursuant to the greater sage-grouse as is required when listing a species under Section 4 of the Endangered Species Act. The Department made the determination that the language of the bill allows you to continue working on a listing determination and only prohibits writing and publication of a rule.

Many question that interpretation and would argue that, regardless of whether you can technically take such actions, doing so is outside of the spirit of the appropriations language and is one more example of the Department using a questionable technical interpretation to circumvent the actual intent of Congress.

Regardless of whether the Department believes that you are legally entitled to do everything other than write or publish a rule on the Greater sage-grouse, do you think moving forward full steam a-head squares with the intent of the provision?

*Answer.* The Department and the FWS are not ignoring the General Provision relating to sage-grouse included in the fiscal year 2015 appropriation. At the same time, the Department is trying to comply with its obligation to the court to make a determination by the end of fiscal year 2015 as to whether a listing proposal is warranted or not warranted, as established in the 2010 settlement agreement. If FWS determines that a listing is not warranted, FWS will be in compliance with the settlement agreement and require no extension or relief. If the FWS determines that listing is warranted, the FWS will not write or publish a proposed rule listing the species until such time as Congress restores the authority to do so.

*Question.* The Department is prohibited from writing or issuing a proposed rule related to the greater sage-grouse. Is it in your legal authority to use the work product the Department gathers over the remainder of this fiscal year, when the rider is in effect, to write and publish a rule should the rider go away?

*Answer.* Yes. We believe doing so would be consistent with our Solicitor’s opinion that we can gather information for the listing determination and be in compliance with the appropriations language.

*Question.* This is a slightly more complicated issue, but I am interested in the Department’s interpretation of how the settlement agreement interacts with the appropriations bill, which is the law. Paragraph 2 of the settlement agreement expressly states “[t]he [Department] shall submit a Proposed Rule or a not-warranted finding to the Federal Register for the . . . Greater sage-grouse, including any Distinct Population Segments, by fiscal year 2015.” Paragraph 21 of the settlement agreement then states, “No provision in this Agreement shall be interpreted as, or constitute, a requirement that the [Department is] obligated to expend or pay any funds exceeding those available, or take any action in contravention of . . . any other appropriations law.”

Paragraph 2 requires the Department to submit a proposed rule in the Federal Register. The fiscal year 2015 prohibits the Department from writing or issuing a rule that would be published in the Federal Register. Paragraph 21 makes clear that the settlement agreement does not supersede Federal law.

If the settlement agreement requires the Department to submit a proposed rule to the Federal register and you’re prohibited from doing so by Federal law, doesn’t the appropriations bill, by its very language, prohibit the Department from acting in the manner that the settlement agreement requires you to act? And, if so, how

can the Department justify the course of action in moving forward with a listing determination?

Answer. The FWS will comply with the court-ordered settlement to make a determination by the end of fiscal year 2015 as to whether a listing proposal is still warranted or not warranted. Reaching a determination does not involve writing or issuing a proposed rule. If FWS finds that listing is still warranted, the General Provision in the fiscal year 2015 appropriation and the Anti-Deficiency Act will prevent the FWS from writing or issuing a proposed rule.

*Question.* I was pleased to see that the Department included \$22 million towards completion of Alaska land conveyances. This is the first time in many years that the Department hasn't slashed the program funding from the previous year. Last year, there were about 7 million acres pending approval of interim conveyances and about 56 million acres lacking surveys.

What will the Department be able to accomplish with the funds requested in the Budget?

Answer. The BLM estimates that survey and patent work is needed on 40.8 million acres of land in order to complete the United States' obligation to the State of Alaska under the Alaska Statehood Act. This field season BLM plans to survey approximately five million acres of the remaining State survey obligation. The BLM is also working with the State of Alaska to implement a new survey method using modern technology that could reduce the timeline for surveys by 60–75 percent and reduce the cost to the American taxpayer by 50 percent or more.

For lands covered by the Alaska Native Claims Settlement Act, the BLM estimates 11.9 million acres are left to survey and patent in order to complete the United States' obligation to the ANCSA corporations. In 2015, the BLM received \$22 million in conveyance funding which allows the BLM to conduct surveys for two of the 18 tracts conveyed to Sealaska on March 6, 2015, pursuant to the 2015 National Defense Authorization Act. Additionally, final surveys will be completed for up to six village corporations, allowing their entitlement to be finalized by patent in approximately 3 years. BLM will complete "14(c)" surveys for three village corporations and ten Native Allotment parcels. Focus will shift from fulfilling entitlement by interim conveyance to finalizing entitlement by patent. This year BLM already fulfilled entitlement, by patent, to seven ANCSA village Corporations with another seven village entitlements in the adjudication process. Additionally, the BLM anticipates reducing the 9.5 million acres in the interim conveyance status by nearly 500,000 acres by the end of the fiscal year.

As noted, the Department's fiscal year 2016 budget requests \$22 million to continue Alaska land conveyances. With this funding, the BLM plans to approve 1,000 miles of prior cadastral field surveys, complete 700 miles of new field surveys, and process 20 Native allotment claim applications. In addition, approximately 600,000 acres of Native corporation entitlements and 800,000 acres of the State of Alaska entitlement will be patented. Transfer of title through "Interim Conveyance" or "Tentative Approval" will continue to be completed, as necessary, for Native corporations and the State of Alaska.

*Question.* The Federal Government and the State are joint partners in the Alaska Mapping Initiative, with the goal of improving the topographic maps for the State. Some of the current topographic maps are over 50 years old and vital to aviation safety, land use planning, and research. The President's fiscal year 2016 budget proposes to increase funding for this program by \$1.3 million.

Would the Department please provide an update on where we are with the Mapping Initiative, how much of the State now has updated maps, and how long will it take to complete?

Answer. The Alaska Mapping Initiative is an interagency effort to update base geospatial information in Alaska. The Alaska Mapping Executive Committee (AMEC) coordinates Federal agency activities and works in partnership with the Alaska State government. This effort will result in statewide high-resolution geospatial coverage for elevation, hydrography, topographic mapping, and other thematic datasets.
