**2018 Yukon River Salmon Fishery News Release # 23
District 6 Subsistence and Personal Use Fishing Schedules
Districts Affected: Upper Yukon Area**

The Chinook salmon abundance estimates are well below average at the Pilot Station sonar to date. This news release puts Subdistricts 6-A, 6-B, and 6-C on a reduced salmon fishing schedule and restricts gillnets to 6-inch or smaller mesh. These actions are intended to limit the harvest on early groups of Chinook salmon while more information about the timing and strength of the run is collected.

Subsistence Management Actions:

Subdistricts 6-A and 6-B (from the mouth of the Tanana River upstream to the regulatory marker at the mouth of Wood River, which includes the communities of Manley, Minto, and Nenana)

Subsistence fishing is currently open with 7.5-inch or smaller mesh gillnets and fish wheels and will **close at 12 noon Sunday, June 24.**

Fishing will reopen at 6 p.m. Monday, June 25 for two **21-hour** periods per week with **6-inch or smaller mesh gillnets** and fish wheels from:

6 p.m. Mondays to 3 p.m. Tuesdays

6 p.m. Fridays to 3 p.m. Saturdays

During subsistence salmon fishing closures, fishing for non-salmon species is allowed. However, only gillnets with 4-inch or smaller mesh may be used.

A subsistence fishing permit is required to fish for salmon in the Tanana River drainage below the Wood River. Permits are available from the ADF&G office in Fairbanks. Subsistence salmon fishermen in the upper portion of Subdistrict 6-B, from three miles upstream of the mouth of Totchaket Slough to Wood River, are required to report their harvest catches to the department

by 4:30 p.m. Thursday each week by reporting online at www.adfg.alaska.gov/sf/PU/ or by calling (907) 459-7388. When you call, please provide your name, permit number, fishing location, and daily catch by species for that week.

The Kantishna River is open 24 hours a day, seven days per week. Fishermen may use fish wheels or gillnets with a mesh size of 7.5 inches or less.

Old Minto Area:
