Federal Subsistence Rod and Reel Fishery for Early-Run Kenai River Chinook Salmon is Closed

In an effort to conserve Chinook Salmon in the Kenai River, the Federal subsistence rod and reel fishery for early-run Chinook Salmon in the Kenai River downstream from the outlet of Skilak Lake will be closed beginning 12:01 a.m., Monday, June 15, through 11:59 p.m., Wednesday, July 15, 2020. This closure prohibits all subsistence rod and reel fishing for Chinook Salmon. Chinook Salmon incidentally caught while fishing for other species may not be removed from the water and must be released immediately unharmed.

The State of Alaska's 5 AAC 57.160 *Kenai River and Kasilof River Early-run King Salmon Management Plan* identifies an optimal escapement goal of 3,900 to 6,600 Chinook Salmon 75 cm mid eye to tail fork length and longer. The Alaska Department of Fish and Game (Department) estimates only 916 large Chinook Salmon have passed their sonar site at river mile 13.7 on the Kenai River through June 11 and inseason escapement projections range from approximately 1,700 large fish with average run timing to 2,200 large fish on a three day late run timing. The Department previously closed the sport fishery for Chinook Salmon in the Kenai River downstream of Skilak Lake through June 30th and through July 31st for the Kenai River upstream from the Department's Slikok Creek regulatory marker. Collectively, the State and Federal fishery management actions will provide the opportunity for early-run Chinook Salmon in the Kenai River to reach their spawning grounds.

For additional information, contact Federal in-season Manager Jeffry Anderson at (907) 260-0132. Additional information on the Federal Subsistence Management Program may be found on the Web at <http://www.doi.gov/subsistence/> or by visiting www.facebook.com/subsistencealaska
