## **Public hearing announced for deferred Temporary Wildlife Special Action Request WSA21-01 regarding caribou and moose in Units 23 and 26A**

In February 2021, the Northwest Arctic Subsistence Regional Advisory Council submitted Wildlife Special Action Request WSA21-01 to close Federal public lands in Units 23 and 26A to the harvest of caribou and moose by non-Federally qualified users from August 1 through September 30, 2021. In June 2021, the Federal Subsistence Board (Board) deferred this request to 2022, instructing the Office of Subsistence Management (OSM) to seek additional input on concerns related to caribou. The Board also asked OSM to include comparisons of moose harvest by survey area within Unit 23 in their analysis.

Public hearings on this issue took place on April 23, November 17, and December 2, 2021. An additional opportunity for public testimony on this request is scheduled for Monday, March 21, 2022 from 3pm – 6pm because significant new information on the Western Arctic Caribou Herd (WACH) population became available after the previous public hearings occurred. Specifically, the WACH declined 24% in two years from an estimated 244,000 caribou in 2019 to an estimated 188,000 caribou in 2021.

The public is encouraged to participate in this hearing by calling the telephone number below. When prompted, enter the passcode.

### **Public Hearing Information:**
